- Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

Item 2.05 Costs Associated with Exit or Disposal

On June 25, 2015, the Board of Directors of Advanced Energy Industries, Inc. (the “Company”) approved a management recommendation to wind down operations of its Solar Inverter business unit in order to focus solely on its Precision Power business. The Solar Inverter business is solely operated by and under AE Solar Energy Inc., AEI Power GmbH and their subsidiaries.

The Company expects to record a pre-tax charge of approximately \$260 million to \$290 million related to the wind down of the Solar Inverter business operations, the majority of which will be recorded in the second quarter of 2015. Of this write down, approximately \$150 million relates to the impairment of goodwill and intangibles, \$45 million to \$75 million to the write down of inventory, fixed and other assets, \$15 million for employee termination cost, \$10 million for tax valuation allowances and the remaining \$40 million for other costs to exit the business. We anticipate that the wind down will be substantially complete by the end of 2015. Cash costs for severance and other expenses related to this decision are expected to range from \$30 million to \$45 million of which we expect \$20 million to \$30 million will be in 2015 with the remainder in subsequent years. These costs will be recorded as impairment and restructuring charges on the company’s income statement. The company plans to fund the cash costs through internally generated funds. The Company anticipates that minimal, if any, tax benefits will be recorded in the financial statements as a result of these charges.

The Company’s press release related to this exit is attached as Exhibit 99.1 and incorporated by reference.

Item 2.06 Material Impairments.

The information set forth under Item 2.05 of this report on Form 8-K is incorporated by reference into this Item 2.06.

Item 9.01 Financial Statements and Exhibits.
