CAUTIONARY STATEMENT UNDER THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995

Statements contained in this Quarterly Report on Form 10-Q, including without limitation, as set forth under the caption "Management's Discussion and Analysis of Financial Condition and Results of Operations", as well as oral statements that may be made by the Company or by officers, directors or employees of the Company acting on the Company's behalf, that are not historical fact may contain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements involve risks and uncertainties. They are not historical facts or guarantees of future performance or events. They are based on current expectations, estimates, beliefs, assumptions, goals and objectives, and are subject to uncertainties that are difficult to predict. In particular, certain risks and uncertainties may include, but are not limited to, the risk that the Company may not be able to obtain additional financing if necessary; the risk that the Company may not be able to continue the necessary development of its operations, including maintaining or increasing sales and production levels, on a profitable basis; the risk the Company may in the future have to comply with more stringent environmental laws or regulations, or more vigorous enforcement policies of regulatory agencies, and that such compliance could require substantial expenditures by the Company; the risk that U.S. defense spending may be

Edgar Filing: GENERAL KINETICS INC - Form 10-Q

substantially reduced; and the risk that the Company's Common Stock will not continue to be quoted on the NASD OTC Bulletin Board services. Forward looking statements included in this quarterly report are based on information known to GKI as of the date of this quarterly report and GKI accepts no obligation (and expressly disclaims any obligations) to update these forward looking statements and does not intend to do so. Certain of these risks and uncertainties are described in the Company's reports and statements filed from time to time with the Securities and Exchange Commission, including this Report.

PART I FINANCIAL INFORMATION

Item 1 - Financial Statements

The unaudited condensed financial statements of General Kinetics Incorporated ("GKI" or the "Company") set forth below have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission for interim reporting. Certain financial information and footnote disclosures normally included in the annual financial statements prepared in accordance with generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to those rules and regulations. Revenues, expenses, assets and liabilities vary during the year and GAAP

3

requires GKI to make estimates and assumptions in preparing the interim financial statements. GKI has made their best effort in establishing good faith estimates and assumptions, however, actual results may differ.

In the opinion of management of the Company, the information furnished reflects all adjustments (consisting of normal recurring adjustments) that are necessary for a fair presentation of results of the interim periods. The financial statements should be read in conjunction with the audited financial statements and notes thereto filed with Form 10-K, as amended, for the fiscal year ended May 31, 2000.

Edgar Filing: GENERAL KINETICS INC - Form 10-Q

GENERAL KINETICS INCORPORATED Notes to Condensed Financial Statements (Unaudited)

Note 1 - Basis of Presentation

The unaudited condensed financial statements at February 28, 2001 and May 31, 2000, and for the three months and nine months ended February 28, 2001, and February 29, 2000, respectively, include the accounts of General Kinetics Incorporated ("GKI").

The financial information included herein is unaudited. In addition, the financial information does not include all disclosures required under generally accepted accounting principles in that certain information and footnotes included in the Company's Annual Report has been omitted; however, such information reflects all adjustments (consisting of normal recurring adjustments) which are, in the opinion of management, necessary to a fair presentation of the results of the interim periods.

The results of operations for the three month and nine month periods ended February 28, 2001, are not necessarily indicative of the results to be expected for the full year.

Note 2 - Net Income/(Loss)Per Share

The Company calculated earnings per share following the guidelines in Statement of Financial Accounting Standards ("SFAS") No. 128, "Earnings Per Share". SFAS 128 replaces the presentation of primary and fully diluted earnings per share with basic and diluted earnings per share and requires a reconciliation of the numerator and denominator of basic earnings per share to diluted earnings per share. Earnings per share have been computed using the weighted average number of common shares outstanding. The Company has excluded the effects of outstanding options and convertible securities as the effects would have been anti-dilutive.

Note 3 - Notes Payable

At February 28, 2001 and May 31, 2000, convertible debentures initially issued to clients of Gutzwiller & Partner, A.G. ("Gutzwiller") have an aggregate principal amount of approximately \$9.0 million, mature in August

8

2004, are convertible into common stock at a conversion price of 50 cents per share, and bear interest at 1% per annum, which is payable annually. Shares issuable upon conversion are also subject to certain rights to registration under the Securities Act of 1933, as amended.

Note 4 - Link2It Notes

At May 31, 2000 the Company had a membership interest in and certain notes receivable due from Link2It, LLC, a company formed by Larry M. Heimendinger and Richard McConnell, both GKI board members. The financial statements at May 31,

Edgar Filing: GENERAL KINETICS INC - Form 10-Q

2000 included a valuation reserve of \$175,000, which represented the total due under the notes receivable.

During January 2001, Link2It LLC merged into Link2It Corporation and completed a round of equity financing. The \$175,00 principal amount of the notes was repaid in full and recognized as "other income" on the accompanying statement of operations. GKI also retained approximately 5.7% of Link2It Corporation's currently outstanding common stock, which it accounts for in the cost method.

Note 5 - Income Taxes

The Company's estimated effective tax rate for fiscal 2001 is 0%. This estimated effective tax rate is lower than the statutory rate due to the existence of net operating loss carryforwards.

9

GENERAL KINETICS INCORPORATED

Item 2 - Management's Discussion and Analysis of Financial Condition and Results of Operations

Three Months Ended February 28, 2001 Compared to Three Months Ended February 29,

2000

Net sales for the three months ended February 28, 2001 were approximately \$1.53 million compared to net sales of approximately \$1.83 million for the quarter ended February 28, 2000. The decrease in sales was due primarily to what are believed to be normal fluctuations in demand for the Company's products and services.

The gross margin percentage increased from 2% for the quarter ended February 29, 2000 to 19% for the quarter ended February 28, 2001. The primary reasons for the increase in gross profit margins were the steps taken to address production issues identified during fiscal 2000 as the Company faced large increases and decreases in shipping volume.

Sales, General & Administrative costs were approximately \$306,900 in the third quarter of fiscal 2001 as compared to approximately \$331,200 in the corresponding quarter of the prior fiscal year. During the quarter ended February 28, 2001, the Company incurred \$5,000 in Product Research, Development & Improvement costs related to the initial development work on a new enclosure product.

For the three months ended February 28, 2001, the Company had an operating loss of \$23,700 compared to an operating loss of \$298,500 for the comparable quarter of the prior fiscal year. The decrease in the operating loss was due primarily to the increase in gross profit margins described above.

Interest expense decreased from \$58,000 in the third quarter of fiscal 2000 to \$55,200 in the third quarter of fiscal 2001.

During the quarter ended February 28, 2001, the Company recorded \$175,000 in "other income" related to the payment of Notes receivable due from Link2It that had been fully reserved in the prior fiscal year (see Note 4 above).

Edgar Filing: GENERAL KINETICS INC - Form 10-Q

10

During the quarter ended February 29, 2000, the Company recorded an extraordinary gain of \$278,800 from the settlement of its interest in Cryptek, LLC.

The Company's estimated effective tax rate for fiscal 2001 is 0%. This estimated effective tax rate is lower than the statutory rate due to the existence of net operating loss carryforwards.

Nine Months Ended February 28, 2001, Compared to Nine Months Ended February 29,

2000

Net sales for the nine months ended February 28, 2001 were approximately \$6.2 million compared to net sales of approximately \$6.9 million for the nine months ended February 29, 2000. The decrease in sales was due primarily to what are believed to be normal fluctuations in demand for the Company's products and services. The Company's contract backlog was approximately \$4.4 million at February 28, 2001 as compared to approximately \$3.8 million at February 29, 2000.

The gross margin percentage increased to 20% for the nine months ended February 28, 2001 from 11% for the nine months ended February 29, 2000. The primary reasons for the increase in gross profit margins were the steps taken to address production issues identified during fiscal 2000 as the Company faced large increases and decreases in shipping volume.

Sales, General & Administrative costs were essentially unchanged at approximately \$1.2 million in the first nine months of fiscal 2001 as compared to approximately \$1.2 million in the first nine months of the prior fiscal year. During the nine months ended February 28, 2001, the Company incurred \$42,800 in Product Research, Development & Improvement costs related to the initial development work on a new enclosure product.

For the nine months ended February 28, 2001, the Company had operating income of \$41,900 compared to an operating loss of \$389,000 for the comparable nine months of the prior fiscal year. The improvement was due principally to the increase in gross profit margins described above.

Interest expense decreased from \$234,100 in the first nine months of fiscal 2000 to \$165,400 in the first nine months of fiscal 2001. This decrease occurred principally because in fiscal 2001 the Company used less accounts receivable financing to alleviate short-term cash requirements than in the prior fiscal year.

11

During the nine months ended February 28, 2001, the Company recorded \$175,000 in "other income" related to the payment of Notes receivable due from Link2It that had been fully reserved in the prior fiscal year (see Note 4 above).

During the nine months ended February 29, 2000 the Company recorded an extraordinary gain of \$278,800 from the settlement of its interest in Cryptek,

Edgar Filing: GENERAL KINETICS INC - Form 10-Q

LLC.

Liquidity and Capital Resources

The Company has relied upon internally generated funds and accounts receivable financing, plus cash from sales of two of its operating companies, to finance its operations. During the first nine months of fiscal 2001, operating income totaled \$41,900, after incurring significant operating losses during the prior two fiscal years. In order to generate the working capital required for operations, the Company must continue to generate orders, stabilize its level of shipments, and operate profitably during the remainder of fiscal 2001.

The Company must continue to market electronic enclosure products to government and commercial markets, enter into contracts which the Company can complete with favorable profit margins, ship the orders in a timely manner, and control its costs in order to recover from its liquidity problems and seek to operate profitably in the last quarter of fiscal 2001.

As of February 28, 2001, the Company had cash of \$865,200. The Company has faced production issues that have contributed to losses from operations. The Company has taken and is continuing to take steps to address these production issues through changes and additions to plant supervision and by adding new scheduling and planning procedures. The Company is trying to stabilize the level of shipments at a profitable level through these changes and an increased sales effort. The backlog at February 28, 2001 was \$4.4 million.

Management believes that cash on hand, borrowings from the factoring of accounts receivable, and careful management of operating costs and cash disbursements can enable the Company to meet its cash requirements through May 31, 2001. The Company may also seek additional funding sources to provide a cushion to handle variances in cash requirements if sales, gross profits and shipment levels fluctuate throughout the fiscal year. However, there is no assurance the Company will be successful in pursuing its plans or in obtaining additional financing to meet those cash requirements. The Company must continue to maintain its level of sales, consistently make

12

timely shipments and produce its products at adequate profit margins, or the Company will continue to face liquidity problems, and may be left without sufficient cash to meet its ongoing requirements.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As explained above, the Company sustained significant operating losses in fiscal 2000. In addition, the Company has significant short-term cash commitments, the funding of which is limited to cash flow from operations and the factoring of certain accounts receivable. These factors raise significant doubt about the Company's ability to continue as a going concern. The financial statements do not contain any adjustment that might result from the outcome of these uncertainties.

The Company is party to a factoring agreement with Reservoir Capital Corporation ("Reservoir") in which Reservoir agreed to purchase eligible accounts receivable from the Company at an assignment price equal to 80% of the outstanding amount of such accounts receivable. At February 28, 2001 there were no advances due to Reservoir. The Company expects to draw on this facility through fiscal 2001 as necessary to alleviate cash requirements, although, as discussed above, the Company will also need to control expenses, maintain the sales backlog at appropriate levels, and keep shipment levels in line with

Edgar Filing: GENERAL KINETICS INC - Form 10-Q

booked orders in order to meet these requirements.

The Company had significant amounts payable to trade creditors at February 28, 2001. In addition, commitments under operating leases, net of sublessee income, amount to \$90,500 in fiscal 2001. Current maturities of long-term debt amount to \$69,600 in fiscal 2001.

The Company has outstanding debentures originally issued to clients of Gutzwiller totaling approximately \$9.0 million. The debentures mature in August 2004, are convertible into common stock at a conversion price of 50 cents per share, and bear interest at 1% per annum payable annually.

Analysis of Cash Flows

Operating activities used \$143,300 in cash in the first three quarters of fiscal 2001. This reflects a net income of \$51,500 plus \$165,000 in non-cash expenses, less \$359,800 in cash to fund changes in working capital items. The cash to fund changes in working capital items included an increase in inventories of \$344,300 in the nine months ended February 28, 2001.

13

Investing activities provided \$151,700 in the first three quarters of fiscal 2001. These activities consisted the repayment of the Link2It loan offset by acquired property, plant and equipment.

Financing activities used \$101,300 in the first three quarters of fiscal 2001. These activities consisted of net repayments of factoring advances and repayments of long-term debt.

Management believes that inflation has not had a material effect on the operations of the Company during the first three quarters of fiscal 2001.

Item 3 - Quantitative and Qualitative Disclosures About Market Risk

In the normal course of business, operations of the Company may be exposed to fluctuations in currency values and interest rates. These fluctuations can vary the cost of financing, investing, and operating transactions. Because the Company has only fixed rate long-term convertible debentures and no foreign currency transactions, there is no material impact on earnings from fluctuations in interest and currency exchange rates.
