XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of Preparation and Consolidation

These unaudited consolidated financial statements include the accounts of the Company and all of its subsidiaries and have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, these unaudited financial statements reflect all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation of financial position and results of operations as at the end of and for the periods presented. The results of operations for any interim period are not necessarily indicative of the results for a full year. All significant inter-company accounts and transactions have been eliminated. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ materially from these estimates.

To facilitate period-to-period comparisons, certain reclassifications have been made to prior period consolidated financial statement amounts to conform to current period presentation. There was no effect on net income from this change in presentation.

Unless the context otherwise indicates, references herein to the Company include XL Capital Ltd and its consolidated subsidiaries.

2. Significant Accounting Policies

(a) Uncertain tax positions

The Company is not subject to any taxes in the Cayman Islands on either income or capital gains under current Cayman law. The Company has received an undertaking that the Company will be exempted from Cayman Islands income or capital gains taxes until June 2018 in the event of any such taxes being imposed. The Company's Bermuda subsidiaries are not subject to any income, withholding or capital gains taxes under current Bermuda law. In the event that there is a change such that these taxes are imposed, the Bermuda subsidiaries would be exempted from any such tax until March 2016 pursuant to the Bermuda Exempted Undertakings Tax Protection Act of 1966, and Amended Act of 1987. The Company's Indian subsidiary is not subject to certain income and capital gains taxes under current Indian law. This subsidiary is exempt from these taxes until March 31, 2009 pursuant to the Income Tax Act 1961.

The Company's U.S. subsidiaries are subject to federal, state and local corporate income taxes and other taxes applicable to U.S. corporations. The provision for federal income taxes has been determined under the principles of the consolidated tax provisions of the Internal Revenue Code and Regulations thereunder. Should the U.S. subsidiaries pay a dividend to the Company, withholding taxes will apply. The Company has operations in subsidiary and branch form in various other jurisdictions around the world, including but not limited to the U.K., Switzerland, Ireland, Germany, France, Luxembourg and various countries in Latin America that are subject to relevant taxes in those jurisdictions.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Significant Accounting Policies (continued)

The Company adopted the provisions of FASB Interpretation No. 48 (FIN 48), Accounting for Uncertainty in Income Taxes, on January 1, 2007. The Company did not recognize any liabilities for unrecognized tax benefits as a result of the implementation of FIN 48.

With few exceptions, the Company is no longer subject to tax examinations by tax authorities in the major jurisdictions in which the Company operates for years prior to the following dates:

U.S. 2003

U.K. 2001

The U.K. taxation authority, HM Revenue and Customs, has currently ongoing examinations of the Company's U.K. income tax returns for the years ended December 31, 2001 to December 31, 2004.

The Company's policy is to recognize any interest accrued related to unrecognized tax benefits as a component of interest expense and penalties in operating expenses. The Company did not have any accrued liabilities relating to interest and penalties as at March 31, 2007 or December 31, 2006, respectively.

3. Recent Accounting Pronouncements

In February 2006, the FASB issued FAS 155, *Accounting for Certain Hybrid Financial Instruments - an amendment of FASB Statements No. 133 and 140*. This standard permits fair value re-measurement of an entire hybrid financial instrument that contains an embedded derivative that otherwise would require bifurcation; narrows the scope exemption applicable to interest-only strips and principal-only strips from FAS 133; clarifies that only the simplest separations of interest payments and principal payments qualify as not being subject to the requirements of FAS 133; establishes a requirement to evaluate interests in securitized financial assets to identify interests that are freestanding derivatives or that are hybrid financial instruments that contain an embedded derivative requiring bifurcation; clarifies that concentrations of credit risk in the form of subordination are not embedded derivatives; and amends FAS 140 to eliminate the prohibition on a qualifying special-purpose entity from holding a derivative financial instrument that pertains to a beneficial interest other than another derivative financial instrument. This statement is intended to require more consistent accounting that eliminates exemptions and provides a means to simplify the accounting for hybrid financial instruments. This statement was effective for all financial instruments acquired or issued after January 1, 2007. The Company has applied the fair value option to its investments in interest-only strips from the effective date of this standard. The fair value of interest only strips was \$17.1 million and \$17.3 million at March 31, 2007 and December 31, 2006, respectively. The application of the fair value option did not have a material impact on the Company's financial condition and results of operations.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

3. Recent Accounting Pronouncements (continued)

In September 2006, the FASB issued FAS No. 157, *Fair Value Measurements* (FAS 157) which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. FAS 157 is applicable in conjunction with other accounting pronouncements that require or permit fair value measurements, where the FASB previously concluded in those accounting pronouncements that fair value is the relevant measurement attribute. Accordingly, FAS 157 does not require any new fair value measurements. FAS No. 157 will be effective for interim and annual financial statements issued after January 1, 2008. The Company is currently evaluating the impact of FAS 157; however, it is not expected to have a material impact on the Company's financial condition and results of operations.

In October 2006, the FASB issued proposed FASB Staff Position EITF 03-6-a, *Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities*. This FASB Staff Position (FSP) addresses whether instruments granted in share-based payment transactions may be participating securities prior to vesting and, therefore, need to be included in the earnings allocation in computing basic earnings per share (EPS) pursuant to the two-class method described in paragraphs 60 and 61 of FASB Statement No. 128, *Earnings per Share*. A share-based payment award that contains a non-forfeitable right to receive cash when dividends are paid to common shareholders irrespective of whether that award ultimately vests or remains unvested shall be considered a participating security as these rights to dividends provide a non-contingent transfer of value to the holder of the share-based payment award. Accordingly, these awards should be included in the computation of basic EPS pursuant to the two-class method. The guidance in this proposed FSP would be effective in the first reporting period beginning after the FASB posts the final FSP to its website. All prior period EPS data will have to be adjusted retrospectively to reflect the provisions of the FSP. Under the terms of the Company's restricted stock awards, grantees are entitled to the right to receive dividends on the unvested portions of their awards. There is no requirement to return these dividends in the event the unvested awards are forfeited in the future. Accordingly, this FSP will have an impact on the Company's EPS calculations should the FASB issue the proposed guidance as final during 2007. The Company will continue to evaluate the potential impact of this guidance.

During February 2007, the FASB issued FAS No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (FAS 159), which permits entities to choose to measure many financial instruments and certain other items at fair value. A company must report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The fair value option may be applied on an instrument by instrument basis, with a few exceptions. The fair value option is irrevocable (unless a new election date occurs) and the fair value option may be applied only to entire instruments and not to portions of instruments. FAS 159 will be effective for interim and annual financial statements issued after January 1, 2008. The Company is currently evaluating the potential impact of this guidance.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

3. Recent Accounting Pronouncements (continued)

The Company is aware of the SEC's review of the loss reserving practices of the financial guaranty industry. The Company recognizes that there is diversity in practice among financial guaranty insurers and reinsurers with respect to their accounting policies. Current accounting literature, specifically FASB Statement of Financial Accounting Standards No. 60 *Accounting and Reporting by Insurance Enterprises* (FAS 60) does not specifically address the unique characteristics of financial guaranty insurance contracts. Consequently, the accounting principles applied by the industry have evolved over time and incorporate the concepts of both short-duration and long-duration contracts accounting under the provisions of FAS 60 and other accounting literature such as FAS 5 and EITF 85-20. On April 18, 2007, the FASB issued its anticipated exposure draft, *Accounting for Financial Guarantee Insurance Contracts*, an interpretation of FAS 60 , which provides guidance for the accounting for financial guaranty insurance contracts under which it considers claims liability recognition, premium recognition, and the related amortization of deferred policy acquisition costs. This exposure draft was issued with a comment deadline of June 18, 2007. The Company is in the process of reviewing the exposure draft and will continue its loss reserving methodology as noted in Note 2 (k) of the Company's Form 10-K for the year ended December 31, 2006, until further guidance is finalized by the SEC or FASB. The Company had reserves for financial guaranty insurance contracts of \$259.2 million and \$262.7 million at March 31, 2007 and December 31, 2006, respectively.

4. Segment Information

The Company is organized into five operating segments: Insurance, Reinsurance, Life Operations, SCA, and Financial Lines in addition to a corporate segment that includes the general investment and financing operations of the Company.

The Company evaluates the performance of each segment based on underwriting results for insurance and reinsurance operations, and contribution from both life and financial operations. Other items of revenue and expenditure of the Company are not evaluated at the segment level for reporting purposes. In addition, the Company does not allocate assets by segment for its general operations. Investment assets related to the Company's life and financial operations are held in separately identified portfolios. Net investment income from these assets is included in net income from life operations and contribution from financial operations, respectively.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Derivative Instruments

The Company enters into investment, structured financial, weather and energy and treasury related derivative instruments for both risk management and trading purposes. The Company also enters into credit derivatives in connection with its operations within the Financial Lines and SCA segments. The Company is exposed to potential loss from various market risks and manages its market risks based on guidelines established by senior management. All these derivative instruments are carried at fair value.

The following table summarizes the net realized and unrealized gains on derivative instruments included in net income for the three months ended March 31, 2007 and 2006:

(U.S. dollars in thousands)	(Unaudited) Three Months Ended March 31,	
	2007	2006
Credit derivatives – financial operations	\$ (11,381)	\$ (1,262)
Weather and energy derivatives	14,470	20,988
Other non-investment derivatives	3,840	18,896
Investment derivatives (1)	812	10,229
 Net realized and unrealized gains on derivative instruments	 \$ 7,741	 \$ 48,851

(1) Includes derivatives entered into by the Company's external investment portfolio managers

The Company records premiums received from sales of investment grade credit derivatives in gross premiums written and establishes loss reserves for this derivative business. These loss reserves represent the Company's best estimate of the probable losses expected under these contracts. Net realized and unrealized gains and losses on derivative instruments are computed as the difference between fair value and the net of unpaid losses and loss expenses and unpaid losses and loss expenses recoverable. Changes in unrealized gains and losses on derivative instruments are reflected in the consolidated statements of income. Cumulative unrealized gains and losses are reflected as assets and liabilities, respectively, in the Company's consolidated balance sheet. Net realized and unrealized gains and losses resulting from changes in the fair value of derivatives occur because of changes in interest rates, credit spreads, recovery rates, the credit ratings of the referenced entities and other market factors.

The following table summarizes insurance activities related to credit default swap derivative instruments excluding gains and losses on credit default swaps within the investment portfolio.

6. Notes Payable and Debt and Financing Arrangements

On February 15, 2007, the Company amended the letter of credit facility supporting its syndicates at Lloyd's of London by reducing the aggregate commitments from the participating banks from £500 million to £450 million.

On March 22, 2007, the Company amended the \$500 million letter of credit facility that originally closed on May 9, 2006, by extending the expiration date to June 22, 2007 which is the same expiration date as the company's \$2 billion credit facility that originally closed on June 23, 2004. The Company expects to replace these two facilities with a single syndicated credit facility on terms broadly similar to the expiring facilities.

7. Share Capital

On March 15, 2007, the Company issued 1,000,000 Fixed/Floating Series E Perpetual Non-Cumulative Preference Ordinary Shares, par value \$0.01 each, with liquidation preference US\$1,000 per share (the Series E Preference Shares). The Company received net proceeds of approximately \$983.8 million from the offering. Until April 15, 2017, dividends on the Series E Preference Shares are payable semiannually on a non-cumulative basis, when, as and if declared by the Company's Board of Directors, on April 15 and October 15 of each year at a fixed rate equal to 6.500% per annum on the liquidation preference. From and after April 15, 2017, dividends on the Series E Preference Shares are payable quarterly on a non-cumulative basis, when, as and if declared by the Company's Board of Directors, on January 15, April 15, July 15 and October 15 of each year at a floating rate equal to three-month LIBOR plus 2.4575% on the liquidation preference. Dividends on the Series E Preference Shares, if declared, will be payable commencing on October 15, 2007. The Series E Preference Shares are perpetual securities with no fixed maturity date and are not convertible into any of the Company's other securities.

During the first quarter of 2007, the Company's Board of Directors authorized a stock repurchase program of up to \$1.0 billion of Class A ordinary shares. Under the program, the Company repurchased 3.2 million shares for \$221.2 million in the first quarter of 2007. Subsequent to March 31, 2007 through May 9, 2007, the Company repurchased an additional 3.9 million shares for \$284.3 million.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. Exposures under Guaranties

The Company provides financial guaranty insurance and reinsurance to support public and private borrowing arrangements. Financial guaranty insurance guarantees the timely payment of principal and interest on insured obligations to third party holders of such obligations in the event of default by an issuer. The Company's potential liability in the event of non-payment by the issuer of an insured or reinsured obligation represents the aggregate outstanding principal insured or reinsured under its policies and contracts and related interest payable at the date of default. In addition, the Company provides credit protection on specific referenced credits or on pools of specific referenced credits through the issuance of credit default swaps. Under the terms of credit default swaps, the seller of credit protection makes a specified payment to the buyer of credit protection upon the occurrence of one or more specified credit events with respect to a reference obligation or entity. The Company's potential liability under credit default swaps represents the notional amount of such swaps.

At March 31, 2007, the Company's net outstanding par exposure under its in-force financial guaranty insurance and reinsurance policies and contracts (including credit default swaps) aggregated to \$131.6 billion and net reserves for losses and loss adjustment expenses relating to such exposures was \$172.0 million at such date. In addition, at March 31, 2007, the Company's notional exposure under credit default swaps aggregated to \$33.6 billion and the net liability for these credit default swaps reflected in the Company's balance sheet at March 31, 2007 was \$13.9 million.

9. XL Capital Finance (Europe) plc

XL Capital Finance (Europe) plc (XLFE) is a wholly owned finance subsidiary of the Company. In January 2002, XLFE issued \$600.0 million par value 6.5% Guaranteed Senior Notes due January 2012. These Notes are fully and unconditionally guaranteed by the Company. XL Capital Ltd's ability to obtain funds from its subsidiaries is subject to certain contractual restrictions, applicable laws and statutory requirements of the various countries in which the Company operates including Bermuda, the U.S. and the U.K., among others. Required statutory capital and surplus for the principal operating subsidiaries of the Company was \$5.5 billion as of December 31, 2006.

10. Minority Interest in Equity of Consolidated Subsidiaries

Minority interest in equity of consolidated subsidiaries includes third party interests in the common shares in Security Capital Assurance Ltd and XL International (Bermuda) Ltd., and preferred stock issued by XL Financial Assurance Ltd (XLFA). The balance is summarized as follows:

	(Unaudited)	
	March 31,	December 31,
	2007	2006
Minority interest in common shares of Security Capital Assurance Ltd.	\$ 521,589	\$ 505,612
Minority interest in common shares of XL International (Bermuda) Ltd.	2,493	2,493
Minority interest in preferred shares of XLFA (1)(2)	39,000	54,016
Total	\$ 563,082	\$ 562,121

- (1) In April 2006, XLFA completed a restructuring of the terms of the redeemable preferred shares as defined in its bye-laws. The restructuring effectively eliminated the participating dividend, which was based on a financial guaranty industry average dividend rate, and increased the fixed dividend rate from 5% to 8.25%. Amounts disclosed include all dividends payable to minority interest holders.
- (2) On March 30, 2007, XLFA paid an extraordinary dividend of \$15.0 million on its Series A Redeemable Preferred Shares, and reduced the stated value of the remaining

outstanding
Series A
Redeemable
Preferred
Shares by a

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

10. Minority Interest in Equity of Consolidated Subsidiaries (continued)

On March 29, 2007, Security Capital Assurance Ltd priced a \$250.0 million private placement of Security Capital Assurance Ltd's non-cumulative Fixed/Floating Series A Perpetual Preference Shares (the "SCA Series A Preference Shares"), which have a liquidation preference of \$1,000 per preference share. Settlement of the net proceeds of \$246.6 million did not occur until April 5, 2007, and as such are not reflected in these unaudited consolidated financial statements. The SCA Series A Preference Shares are perpetual securities with no fixed maturity date and, if declared by the Board of Security Capital Assurance Ltd will pay a fixed dividend rate of 6.88% until September 30, 2017. After such date, the Series A Preference Shares, if declared by the Board of Security Capital Assurance Ltd will pay dividends at a floating rate based on three-month LIBOR plus 2.715%. Dividends on the SCA Series A Preference Shares are non-cumulative.

XL CAPITAL LTD
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS (continued)

12. Subsequent Events

In March 2004, the Company issued 33 million 6.5% Equity Security Units (the 6.5% Units) in a public offering. Each 6.5% Unit has a stated amount of \$25 and consists of (a) a purchase contract pursuant to which the holder agrees to purchase, for \$25, a variable number of shares of the Company's Class A ordinary shares on May 15, 2007 and (b) a one-fortieth, or 2.5%, ownership interest in a 2.53% Senior Note with a principal amount of \$1,000, issued by the Company due May 15, 2009 (the 2009 Senior Notes). The 2009 Senior Notes are pledged by the holders to secure their obligations under the purchase contracts. The number of shares issued under the purchase contracts is adjustable based on, among other things, the average share price of the Company for the twenty consecutive trading days ending on the third trading day immediately preceding the stock purchase date and the dividend rate of the Company. On May 2, 2007, the 2009 Senior Notes were remarketed whereby the interest rate was reset in order to generate sufficient remarketing proceeds to satisfy the 6.5% Unit holders' obligations under the purchase contracts. On May 15, 2007, the purchase contracts will mature and the Company will issue Class A ordinary shares therewith.

On April 23, 2007, the Company entered into the Remarketing Agreement in connection with the remarketing of \$825.0 million aggregate principal amount of 2009 Senior Notes. The closing of the remarketing, is expected to occur on or about May 15, 2007. The Company intends to purchase all of the aggregate principal amount of the 2009 Senior Notes in the remarketing and retire all of the 2009 Senior Notes it purchases.

On May 2, 2007 the Company issued \$325.0 million aggregate principal amount of 6.25% Senior Notes due 2027, (2027 Senior Notes.), The 2027 Senior Notes were issued at 99.805% and gross proceeds were approximately \$324.4 million. Related expenses of the offering, including underwriting discounts, amounted to approximately \$2.5 million. Interest on the 2027 Senior Notes is payable on May 15, and November 15 of each year, beginning November 15, 2007. The Company may redeem the 2027 Senior Notes in whole at any time, or in part from time to time, at a make-whole redemption price. The Company may also redeem the Senior Notes in whole, but not in part, at any time upon the occurrence of certain tax events. The 2027 Senior Notes are unsecured and rank equally with all the Company's existing and future unsecured senior debt.

In addition, during March 2007 the Company entered into an interest rate swap agreement in anticipation of the issuance of fixed-rate debt. This transaction, which met the requirements of a cash flow hedge of a forecasted transaction under SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities* , was entered into to mitigate the interest rate risk associated with the subsequent issuance of the 2027 Senior Notes. The gain on the settlement of the swap transaction on May 2, 2007 of \$3.8 million will be credited to Accumulated Other Comprehensive Income and will be amortized to interest expense over the 20-year term of the related debt. At March 31, 2007 the unrealized gain associated with this transaction was \$4.1 million.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

General

The following is a discussion of the Company's financial condition and liquidity and results of operations. Certain aspects of the Company's business have loss experience characterized as low frequency and high severity. This may result in volatility in both the Company's and an individual segment's results of operations and financial condition.

This Management's Discussion and Analysis of Financial Condition and Results of Operations contains forward-looking statements that involve inherent risks and uncertainties. Statements that are not historical facts, including statements about the Company's beliefs and expectations, are forward-looking statements. These statements are based upon current plans, estimates and projections. Actual results may differ materially from those included in such forward-looking statements, and therefore undue reliance should not be placed on them. See Cautionary Note Regarding Forward-Looking Statements below for a list of factors that could cause actual results to differ materially from those contained in any forward-looking statement.

This discussion and analysis should be read in conjunction with the Management's Discussion and Analysis of Financial Condition and Results of Operations, and the audited Consolidated Financial Statements and notes thereto, presented under Item 7 and Item 8, respectively, of the Company's Form 10-K for the year ended December 31, 2006.

Executive Overview

See Executive Overview in Item 7 of the Company's Form 10-K for the year ended December 31, 2006.

Results of Operations

The following table presents an analysis of the Company's net income available to ordinary shareholders and other financial measures (described below) for the three months ended March 31, 2007 and 2006:

(U.S. dollars and shares in thousands, except per share amounts)	(Unaudited) Three Months Ended March 31,	
	2007	2006
Net income available to ordinary shareholders	\$ 549,718	\$ 458,503
Earnings per ordinary share - basic	\$ 3.07	\$ 2.57
Earnings per ordinary share - diluted	\$ 3.06	\$ 2.56
Weighted average number of ordinary shares and ordinary share equivalents basic	178,772	178,424
Weighted average number of ordinary shares and ordinary share equivalents diluted	179,601	179,158

The Company's net income and other financial measures as shown below for the three months ended March 31, 2007 have been affected, among other things, by the following significant items:

1) Continuing competitive underwriting environment

Insurance

In the Insurance segment, January renewals have shown a gradually softening market with variations by line and geography. In addition, competitive pressures have made new business more difficult to obtain. December and January rate changes ranged from flat to down 5% on the property and casualty global risk business, with as much as a 10% decrease in certain other lines. Renewals in the U.S. for 2007 have shown that traditional D&O and E&O professional rates are down approximately 10% with flat to modest increases in the design and select professional books. Specialty lines pricing remained generally flat. Aviation and marine lines were the exceptions to this as they face increasing competition.

Reinsurance

Competitive pressures have continued to impact most reinsurance lines; however, the market continues to demonstrate underwriting discipline and peak zone U.S. property capacity continues to be at a premium. During the January renewals, rate increases were noted for U.S. wind exposures of approximately 30% and increases of up to 20% for U.S. earthquake. Ocean marine pricing remained flat, unless it was wind exposed where price increases were experienced. There was some modest softening experienced in U.S. non-catastrophe exposed property pricing and in non-U.S. property pricing in general.

Casualty pricing trends in the Reinsurance segment generally followed those of the Insurance segment, with single digit price reductions, except for certain European casualty lines where there was some price improvement. In contrast, pricing within the aviation market has fallen on the primary insurance business, mostly as a result of continued good experience; however, excess loss pricing has generally increased.

2) European Windstorm Kyrill

On January 18 and 19, 2007, European Windstorm Kyrill (Kyrill) caused widespread damage and loss of life across Northern and Western Europe, particularly in Ireland, the United Kingdom and Germany. As a result of Kyrill, the Company has recorded losses incurred, net of reinsurance recoveries, of \$55.0 million, in the quarter ended March 31, 2007, based on preliminary reports and estimates of such loss and damage. The majority of the Company's losses from Kyrill are within the Reinsurance segment.

3) Growing asset base and positive contribution from investment and operating affiliates

Net investment income was \$553.1 million for the three months ended March 31, 2007 compared to \$463.7 million for the same period in 2006. This increase resulted from a larger investment base combined with higher investment yields. The increase in the size of the investment portfolio resulted primarily from positive cash flow from operations for the twelve months ended March 31, 2007, along with proceeds received in August 2006 from the initial public offering of Security Capital Assurance Ltd (the SCA IPO).

Net income from investment affiliates was \$118.9 million for the three months ended March 31, 2007 compared to \$106.4 million for the same period in 2006. These results reflect very strong performance in the alternative portfolio and good results from private investments.

Net income from operating affiliates was \$57.1 million for the three months ended March 31, 2007, compared to a loss of \$7.4 million for the same period in 2006. Operating affiliates include investment manager affiliates, financial affiliates, and certain other strategic investments. These results reflect strong returns from the Company's investments in investment manager companies during the fourth quarter of 2006, as well as strong results from certain financial affiliates.

4) Favorable prior year reserve development

During the first three months of 2007, the Company incurred net favorable prior year reserve development in general operations of \$73.8 million compared to net adverse prior year reserve development of \$18.3 million for the same period in 2006. Reinsurance favorable development accounted for \$53.6 million of the release in 2007, with the balance coming from the Insurance segment. The Reinsurance segment released reserves primarily in property and other short-tail lines of business of \$46.8 million, and \$6.8 million in casualty and other lines. For further details see the segment results in the Income Statement Analysis below.

Financial Measures

The following are some of the financial measures management considers important in evaluating the Company's operating performance:

(U.S. dollars and shares in thousands, except ratios and per share amounts)	(Unaudited) Three Months Ended March 31,	
	2007	2006
Underwriting profit - general operations	\$ 127,187	\$ 147,579
Combined ratio - general operations.	90.4 %	89.7 %
Net investment income - general operations	\$ 313,438	\$ 260,359

	(Unaudited)	
	March 31, 2007	December 31, 2006
Book value per ordinary share	\$ 54.95	\$ 53.12
<i>Underwriting profit - general operations</i>		

One way the Company evaluates the performance of its property and casualty insurance and reinsurance general operations is the underwriting profit or loss. The Company does not measure performance based on the amount of gross premiums written. Underwriting profit or loss is calculated from premiums earned and fee income, less net losses incurred and expenses related to the underwriting activities. Underwriting profits in the three month period ended March 31, 2007 are primarily reflective of the combined ratio discussed below.

Combined ratio - general operations

The combined ratio for general operations is used by the Company, and many other property and casualty insurance and reinsurance companies, as another measure of underwriting profitability. The combined ratio is calculated from the net losses incurred and underwriting expenses as a ratio of the net premiums earned for the Company's general insurance and reinsurance operations. A combined ratio of less than 100% indicates an underwriting profit and greater than 100% reflects an underwriting loss. The Company's combined ratio for the three months ended March 31, 2007, is

slightly higher than the same period in the previous year, primarily as a result of an increasing underwriting expense ratio partially offset by a lower loss and loss expense ratio. The increased underwriting expense ratio has been driven largely by increased compensation costs and continued pricing pressures that have resulted in less premium earned. The lower loss and loss expense ratio

has resulted from net favorable prior year development in the first quarter of 2007 while the first quarter of 2006 included net adverse development primarily on the 2005 Hurricanes.

Net investment income - general operations

Net investment income from the Company's general operations is an important measure that affects the Company's overall profitability. The largest liability of the Company relates to its unpaid loss reserves, and the Company's investment portfolio provides liquidity for claims settlements of these reserves as they become due, and thus a significant part of the portfolio is in fixed income securities. Net investment income is affected by the size of the portfolio and also the level of market interest rates. The average size of the investment portfolio during the three months ended March 31, 2007, increased as compared to the same period in 2006, mainly due to positive operating cash flow. Portfolio yields have increased as yields earned on investment of cash flows and reinvestment of maturing or sold securities are higher than on securities previously held, as prevailing market interest rates, particularly in the U.S., have increased in recent years.

Book value per ordinary share

Management also views the Company's book value per ordinary share as an additional measure of the Company's performance. Book value per ordinary share is calculated by dividing ordinary shareholders' equity by the number of outstanding ordinary shares at any period end. Book value per ordinary share is affected primarily by the Company's net income (loss), by any changes in the net unrealized gains and losses on its investment portfolio and also the impact of any share repurchase activity. Book value per ordinary share has increased by \$1.83 in the first three months of 2007 as compared to a decrease of \$0.08 in the first three months of 2006. The factors noted above have created \$562.5 million in net income for the three months ended March 31, 2007, which increased book value. However, the net unrealized gains associated with the Company's investment portfolio have decreased by \$102.6 million net of tax for the first three months of 2007. This movement was primarily a result of increasing interest rates in the U.K. and Euro zone. In addition, the Company's share repurchase activity has slightly reduced book value per share as the price paid for such shares is at a premium to book value.

Other Key Focuses of Management

See the discussion of the Other Key Focuses of Management in Item 7 of the Company's Form 10-K for the year ended December 31, 2006. That discussion is updated with the disclosures set forth below.

Ratings and Capital Management

The Company's ability to underwrite business is dependent upon the quality of its claims paying and financial strength ratings as evaluated by independent rating agencies. As a result, in the event that the Company's financial strength rating was downgraded, its ability to write business may be adversely affected.

The Company regularly evaluates the efficiency of its capital structure and its capital needs to support the volume of business written in order to maintain its claims paying and financial strength ratings. The Company continues to address these needs by monitoring various risk management measures and capital structuring initiatives intended to reduce volatility while, at the same time, improve the quality of the Company's risk adjusted returns. The Company addressed these needs during the three months ended March 31, 2007 with several key transactions described below.

On February 23, 2007, the Board of Directors of the Company approved a new share repurchase program, authorizing the Company to repurchase up to \$1.0 billion of its Class A ordinary shares. Purchases are made from time to time in the open market or in privately negotiated transactions, and those repurchases are funded from cash and/or the proceeds from the issuance of securities such as the Fixed/Floating Series E Perpetual Non-Cumulative Preference Ordinary Shares described below. The timing and amount of the share repurchases under the program depends on a variety of factors, including market conditions, legal requirements and other factors. The new share repurchase program includes the unused \$135.4 million allocated to the share repurchase program authorized by the Board of Directors in January of 2000. During the three months ended March 31, 2007, the Company repurchased and cancelled approximately 3.2 million Class A ordinary shares for \$221.2 million. Subsequent to March 31, 2007 through May 9, 2007 the Company repurchased an additional 3.9 million shares for \$284.3 million.

On March 15, 2007, the Company issued 1,000,000 Fixed/Floating Series E Perpetual Non-Cumulative Preference Ordinary Shares, par value \$0.01 each, with liquidation preference US\$1,000 per share (the Series E Preference Shares). The Company received net proceeds of approximately \$983.0 million from the offering. Until April 15, 2017, dividends on the Series E Preference Shares will be payable semi-annually on a non-cumulative basis, when, as and if declared by the Company's Board of Directors, on April 15 and October 15 of each year at a fixed rate equal to 6.500% per annum on the liquidation preference. From and after April 15, 2017, dividends on the Series E Preference Shares will be payable quarterly on a non-cumulative basis, when, as and if declared by the Company's Board of Directors, on January 15, April 15, July 15 and October 15 of each year at a floating rate equal to three-month LIBOR plus 2.4575% on the liquidation preference. Dividends on the Series E Preference Shares, if declared, will be payable commencing on October 15, 2007. The Series E Preference Shares will be perpetual securities with no fixed maturity date and will not be convertible into any of the Company's other securities.

On April 23, 2007, the Company entered into the Remarketing Agreement in connection with the remarketing of \$825.0 million aggregate principal amount of 2.53% Senior Notes due 2009 (the 2009 Senior Notes) that form part of the Company's 6.5% Equity Security Units (the 6.5% Units) issued in March of 2004. The closing of the remarketing, is expected to occur on or about May 15, 2007. The Company intends to purchase all of the aggregate principal amount of the 2009 Senior Notes in the remarketing and retire all of the 2009 Senior Notes it purchases. On May 15, 2007, the purchase contracts that form part of the 6.5% Units will mature and the Company will issue Class A ordinary shares therewith.

On May 2, 2007 the Company issued \$325.0 million aggregate principal amount of 6.25% Senior Notes due 2027 (2027 Senior Notes). The 2027 Senior Notes were issued at 99.805% and gross proceeds were approximately \$324.4 million. Related expenses of the offering, including underwriting discounts, amounted to approximately \$2.5 million. Interest on the 2027 Senior Notes is payable on May 15 and November 15 of each year, beginning November 15, 2007. The Company may redeem the 2027 Senior Notes in whole at any time, or in part from time to time, at a make-whole redemption price. The Company may also redeem the Senior Notes in whole, but not in part, at any time upon the occurrence of certain tax events. The 2027 Senior Notes are unsecured and rank equally with all the Company's existing and future unsecured senior debt.

Critical Accounting Policies and Estimates

See the discussion of the Company's Critical Accounting Policies and Estimates in Item 7 of the Company's Form 10-K for the year ended December 31, 2006.

Variable Interest Entities and Other Off-Balance Sheet Arrangements

See the discussion of the Company's variable interest entities and other off-balance sheet arrangements in Item 7 of the Company's Form 10-K for the year ended December 31, 2006.

Segment Results for the three months ended March 31, 2007 compared to the three months ended March 31, 2006

The Company is organized into five operating segments: Insurance, Reinsurance, Life Operations, SCA, and Financial Lines in addition to a corporate segment that includes the general investment and financing operations of the Company.

The Company evaluates the performance of each segment based on underwriting results for general operations, net income from life operations and contribution from financial operations. Other items of revenue and expenditure of the Company are not evaluated at the segment level. In addition, the Company does not allocate assets by segment for its general operations. Investment assets related to the Company's life and financial operations are held in separately identified portfolios. Net investment income from these assets is included in net income from life operations and contribution from financial operations, respectively.

Income Statement Analysis***Insurance***

General insurance business written includes risk management and specialty lines. Risk management products are comprised of global property and casualty insurance programs for large multinational companies, including umbrella liability, integrated risk and primary master property and liability coverages. Specialty lines products include directors and officers liability, environmental liability, professional liability, aviation and satellite, employment practices liability, marine, equine and certain other insurance coverages including program business.

A large part of the Company's casualty insurance business written has loss experience that is low frequency and high severity. As a result, large losses, though infrequent, can have a significant impact on the Company's results of operations, financial condition and liquidity. The Company attempts to mitigate this risk by using strict underwriting guidelines and various reinsurance arrangements.

The following table summarizes the underwriting results for this segment:

(U.S. dollars in thousands)	(Unaudited)			
	Three Months Ended			
	March 31,			
	2007	2006		% Change
Gross premiums written	\$ 1,554,578	\$ 1,558,823		(0.3)%
Net premiums written	1,222,930	1,153,163		6.1 %
Net premiums earned	1,038,604	1,031,297		0.7 %
Fee income and other	1,733	7,395		(76.6)%
Net losses and loss expenses	637,868	677,507		(5.9)%
Acquisition costs	123,964	127,694		(2.9)%
Operating expenses	163,920	138,078		18.7 %
Exchange losses	7,284	30,711		(76.3)%
Underwriting profit	\$ 107,301	\$ 64,702		65.8 %

Gross premiums written remained flat during the three months ended March 31, 2007 compared with the three months ended March 31, 2006, while net premiums written increased by 6.1% during the same period. Gross premiums written were primarily affected by decreases in aerospace and professional lines as a result of softening prices and premium adjustments combined with the runoff of certain property catastrophe exposures. These decreases were largely offset by increases in property and casualty lines resulting from increases in the number of long term agreements and

favorable foreign exchange movements. The increase in net premiums written compared to the same period in 2006 was primarily due to the termination of certain programs and marine and energy ceded reinsurance treaties, combined with increased retention in certain casualty programs, and slight changes in the mix of business written.

Net premiums earned increased slightly by 0.7% in the three months ended March 31, 2007 compared with the three months ended March 31, 2006. The increase primarily resulted from the factors affecting net premiums written noted above.

The following table presents the ratios for this segment:

	(Unaudited)	
	Three Months Ended	
	March 31,	
	2007	2006
Loss and loss expense ratio	61.4 %	65.7 %
Underwriting expense ratio	27.7 %	25.8 %
Combined ratio	89.1 %	91.5 %

The loss and loss expense ratio includes net losses incurred for both the current year and any adverse or favorable prior year development of loss and loss expense reserves held at the beginning of the year. The loss ratio for the three months ended March 31, 2007 decreased compared with the three months ended March 31, 2006, primarily due to net favorable prior period development of \$20.2 million as compared to net adverse development of \$11.6 million in the same period of the prior year. Net prior period reserve releases in the quarter ended March 31, 2007, were largely in casualty lines of business, partially offset by adverse prior period reserve development in certain specialty lines.

The increase in the underwriting expense ratio in the three months ended March 31, 2007, compared to the same period in 2006 was due to an increase in the operating expense ratio of 2.4 points (15.8% as compared to 13.4%), partially offset by a decrease in the acquisition expense ratio of 0.5 points (11.9% as compared to 12.4%). The increase in the operating expense ratio was due primarily to increased compensation costs and higher corporate expense allocations compared to the same quarter in the prior year as overall headcount has grown.

Foreign exchange losses in the first three months of 2007 relate to the weakening of the U.S. dollar against the U.K. Sterling and the Euro. This decrease is less than in prior periods due in part to decreases in foreign currency exposures related to certain intercompany transactions.

Reinsurance

Reinsurance business written includes casualty, property, marine, aviation and other specialty reinsurance on a global basis. The Company's reinsurance property business generally has loss experience characterized as low frequency and high severity, which can have a negative impact on the Company's results of operations, financial condition and liquidity. The Company endeavors to manage its exposures to catastrophic events by limiting the amount of its exposure in each geographic zone worldwide and requiring that its property catastrophe contracts provide for aggregate limits and varying attachment points.

The following table summarizes the underwriting results for this segment:

(U.S. dollars in thousands)	(Unaudited)		
	Three Months Ended		
	March 31,		
	2007	2006 (1)	% Change
Gross premiums written	\$ 1,356,786	\$ 1,410,437	(3.8)%
Net premiums written	1,134,392	1,217,643	(6.8)%
Net premiums earned	527,489	617,156	(14.5)%
Fee income and other	(100)	2,926	NM
Net losses and loss expenses	336,797	378,469	(11.0)%
Acquisition costs	108,989	117,246	(7.0)%
Operating expenses	45,068	38,076	18.4%
Exchange losses	16,649	3,414	NM
Underwriting profit	\$ 19,886	\$ 82,877	(76.0)%

(1) To facilitate period to period comparisons, certain Accident and Health business previously included in the Reinsurance segment has been reclassified to the Life Operations segment to conform with current management responsibilities.

* NM Not Meaningful

Gross and net premiums written decreased by 3.8% and 6.8%, respectively, in the first quarter of 2007 as compared to the first quarter in 2006. These decreases resulted from competitive pressures driving rates below the Company's acceptable underwriting levels, partially offset by favorable foreign exchange movements and certain timing

adjustments. Premium rate decreases were most significant in U.S. Casualty lines. Net premiums written reflect the above changes in gross premiums written, combined with slight changes in the mix of business with increases in certain programs with a greater proportion of ceded reinsurance. Excluding the impact of timing adjustments, net premiums written decreased approximately 11.0% in the quarter ended March 31, 2007 compared to the first quarter 2006.

Net premiums earned in the first quarter of 2007 decreased 14.5% as compared to the first quarter of 2006. This decrease was a reflection of the overall reduction of net premiums written over the last 24 months.

The following table presents the ratios for this segment:

	(Unaudited)	
	Three Months Ended	
	March 31,	
	2007	2006
Loss and loss expense ratio	63.8 %	61.3 %
Underwriting expense ratio	29.2 %	25.2 %
Combined ratio	93.0 %	86.5 %

The loss and loss expense ratio includes net losses incurred for both the current year and any adverse or favorable prior year development of loss reserves held at the beginning of the year. The increase in the loss and loss expense ratio in the three months ended March 31, 2007, compared to the same three months ended in 2006, primarily reflects the impact of Windstorm Kyrill, which the Reinsurance segment estimated losses incurred, net of reinsurance recoveries of \$45.0 million, combined with smaller natural catastrophes and pressures on pricing. Net favorable prior year loss development represented a release of \$53.6 million during the quarter ended March 31, 2007 and was primarily driven by net reserve releases in property and other short-tail lines of business of

\$46.8 million and in casualty and other lines of business of \$6.8 million. This compares to \$6.7 million net adverse prior year development in the first quarter of 2006, which primarily resulted from adverse development on the 2005 hurricanes.

The increase in the underwriting expense ratio in the three months ended March 31, 2007, as compared with the three months ended March 31, 2006, was due to an increase in both acquisition expense and operating expense ratios to 20.7% and 8.5%, respectively, as compared with 19.0% and 6.2%, respectively, in the first quarter of 2006. The increase in acquisition expenses was primarily due to an adjustment related to the earning of acquisition expenses within the individual risk portfolio in the U.S. The operating expense ratio increase was primarily due to higher compensation expenses and a lower level of net premiums earned.

Foreign exchange losses in the first three months of 2007 include a loss of approximately \$24 million related to updated currency information received on certain assumed Lloyd's business.

Life Operations

Business written by the Life operations segment is primarily European life reinsurance. This includes term assurances, group life, critical illness cover, immediate annuities and disability income business. Due to the nature of these contracts, premium volume may vary significantly from period to period.

The following summarizes net income from life operations:

(U.S. dollars in thousands)	(Unaudited)		
	Three Months Ended		
	March 31,		
	2007	2006 (1)	% Change
Gross premiums written	\$ 213,275	\$ 171,760	24.2 %
Net premiums written	202,938	161,824	25.4 %
Net premiums earned	146,994	108,636	35.3 %
Fee income and other	74	66	12.1 %
Claims and policy benefits	188,343	151,499	24.3 %
Acquisition costs	20,267	15,068	34.5 %
Operating expenses	8,490	7,978	6.4 %
Exchange (gains)	(290)	(3,374)	(91.4)%
Net investment income	92,834	80,631	15.1 %
Net income from life operations	\$ 23,092	\$ 18,162	27.1 %

current segment
management
responsibilities.

Gross and net premiums written as well as net premiums earned and claims and policy benefits increased in the first quarter of 2007 as compared to the first quarter of 2006. These increases were primarily as a result of favorable foreign exchange movements and the growing portfolio of regular installment premium term assurance business predominantly in the U.K. and Europe. Ceded premium ratios remained roughly consistent with the prior year.

Net premiums earned in the first quarter of 2007 increased 35.3% as compared to the first quarter of 2006. This increase was consistent with the increase in gross and net premiums written as described above.

Increases in claims and policy benefits are consistent with the increase in gross and net premiums written. Changes in claims and policy benefits also include the movement in policy benefit reserves related to other contracts where investment assets were acquired with the assumption of the policy benefit reserves at the inception of the contract.

For the three months ended March 31, 2007, acquisition costs increased by 34.5% related to higher business volume from the book of regular term and critical illness business and higher costs related to short term accident and health business consistent with above earned premium variance. Operating expenses increased in the first quarter of 2007 compared to the same period in 2006, due to higher compensations costs, partially offset by reduced professional fees.

Net investment income is included in the calculation of net income from Life operations, as it relates to income earned on portfolios of separately identified and managed life investment assets and other allocated assets. Net investment income increased by 15.1% in the three months ended March 31, 2007, as compared to the same period in 2006, primarily as a result of increases in the average investment balances to \$7.1 billion from \$6.5 billion for the three months ended March 31, 2007 and 2006, respectively combined with improved yields on the asset annuity portfolios.

Financial Lines

Financial Lines products include (i) a wide range of structured indemnity and structured credit products, (ii) municipal investment and funding agreements, (iii) political risk insurance, (iv) weather and energy risk management products, (v) the earnings on the Company's investment in Primus Guaranty, Ltd. (Primus) and (vi) legacy financial guaranty business and other transactions not transferred to Security Capital Assurance Ltd. Many of the products offered by Financial Lines are unique and tailored to the specific needs of the insured or user.

Structured indemnity and structured credit products cover complex financial risks, including property and casualty insurance and reinsurance, business enterprise risk management products and structured transactions covering credit and other financial risks.

Municipal investment contracts and funding agreements provide users guaranteed rates of interest on amounts deposited with the Company. The Company has investment risk related to its ability to generate sufficient investment income to enable the total invested assets to cover the payment of its estimated ultimate liability on such agreements.

Political risk insurance generally covers risks arising from expropriation, currency inconvertibility, contract frustration, non-payment and war on land or political violence (including terrorism) in developing regions of the world. Political risk insurance is typically provided to financial institutions, equity investors, exporters, importers, export credit agencies and multilateral agencies in connection with investments and contracts in emerging market countries.

The Company's weather and energy risk management products are customized solutions designed to assist corporate customers, primarily energy companies and utilities, to manage their financial exposure to variations in underlying weather conditions and related energy markets.

In addition, the Company retained certain legacy financial guaranty business and other transactions written prior to the SCA IPO.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table summarizes the contribution for the Financial Lines segment for the first quarter of 2007 along with comparative results for the same operations for the first quarter of 2006:

(U.S. dollars in thousands)	(Unaudited)		
	Three Months Ended March 31,		
	2007	2006	% Change
Gross premiums written	\$ 42,928	\$ 20,930	105.1 %
Net premiums written	40,685	17,259	135.7 %
Net premiums earned	31,578	17,883	76.6 %
Fee income and other	1,630	1,315	24.0 %
Net losses and loss expenses	20,923	28,401	(26.3)%
Acquisition costs	2,761	3,177	(13.1)%
Operating expenses	214	284	(24.6)%
Exchange (gains) losses	(74)	33	NM
Underwriting profit (loss)	\$ 9,384	\$ (12,697)	NM

Operating expenses structured products	7,735	10,004	(22.7)%
Net income from financial and investment affiliates	16,612	6,449	157.6 %
Net realized and unrealized gains on derivative instruments	9,989	22,415	(55.4)%
Net contribution from financial operations	\$ 56,768	\$ 36,032	57.5 %

* NM Not Meaningful

Increases in gross and net premiums written of 105.1% and 135.7%, respectively, in the first quarter of 2007, as compared to the corresponding period in 2006 were primarily due to additional premiums of \$16.8 million received upon a negotiated cancellation of an assumed structured property and casualty reinsurance contract.

Net premiums earned increased in the first quarter of 2007, as compared to the same period in 2006. The increase was primarily due to the factors affecting gross and net premiums written noted above.

Net losses and loss expenses include current year net losses incurred and adverse or favorable development of prior year net loss and loss expense reserves. Net losses and loss expenses for the first quarter of 2007 decreased by 26.3% primarily due to the absence in 2007 of a \$21.5 million structured finance transaction loss incurred during the first three months of 2006. This favorable variance was partially offset by \$9.1 million in losses associated with the negotiated cancellation noted above, combined with certain residual value contract losses.

For the three months ended March 31, 2007, acquisition costs were consistent with the prior year.

Operating expenses decreased in the first quarter of 2007, as compared to the first quarter of 2006, primarily due to decreased compensation expenses.

Net investment income related to Financial Lines increased by 12.4% in the three months ended March 31, 2007, as compared to the same period in 2006, primarily as a result of increased yields as combined average funding agreement and guaranteed investment contract balances remained relatively constant.

Interest expense for Financial Lines is comprised of accretion charges on deposit liabilities related to funding agreements, guaranteed investment contracts and certain structured insurance and reinsurance contracts. The increase in interest expense during the three months ended March 31, 2007, as compared to the same period in 2006, related primarily to the increase in crediting rates consistent with yield changes noted above, combined with favorable effective yield adjustments recorded in the prior year on certain structured property and casualty contract deposit liabilities.

Net realized and unrealized gains on derivative instruments represent changes in the market value of the Company's insured credit derivative portfolio, weather and energy derivative instruments and certain structured derivatives. The net results from derivatives for the three months ended March 31, 2007 primarily related to positive mark-to-market adjustments on certain European weather derivatives totaling \$15.0 million partially offset by deterioration on certain legacy credit default swap risks. The net results from derivatives for the three months ended March 31, 2006 included \$21.0 million in European weather contract gains.

Net income from financial and investment affiliates include earnings on the Company's investment in Primus and certain of the Company's investment affiliates. The increase in the first quarter of 2007, as compared to the first quarter of 2006, was due primarily to increased earnings from Primus. Primus specializes in providing credit risk protection through credit derivatives. Affiliate earnings are recorded with a one quarter lag.

SCA

SCA provides financial guaranty insurance and reinsurance products that generally guarantee payments of interest and principal on an issuer's obligations when due. Obligations guaranteed or enhanced by the Company range in duration and premiums are received either on an installment basis or upfront. Guaranties written in credit default swap form provide coverage for losses upon the occurrence of specified credit events set forth in the swap documentation.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The following table summarizes the contribution from SCA for the first quarter of 2007 along with comparative results for the same operations for the first quarter of 2006:

(U.S. dollars in thousands)	(Unaudited)		
	Three Months Ended March 31,		
	2007	2006	% Change
Gross premiums written	\$ 104,958	\$ 80,563	30.3 %
Net premiums written	84,725	79,047	7.2 %
Net premiums earned	46,379	43,577	6.4 %
Fee income and other		1,260	NM
Net losses and loss expenses	(801)	4,128	NM
Acquisition costs	3,970	3,902	1.7 %
Operating expenses	24,070	17,999	33.7 %
Exchange (gains)		(35)	NM
Underwriting profit	\$ 19,140	\$ 18,843	1.6 %
Net investment income SCA(1)	26,125	15,364	70.0 %
Minority interest	1,114	2,258	(50.7)%
Net realized and unrealized gains (losses) on derivative instruments	(6,929)	(3,487)	98.7 %
Net contribution from SCA	\$ 37,222	\$ 28,462	30.8 %

Income tax charge	79	15	NM
Net income from SCA	\$ 23,471	\$ 22,764	3.1 %

(1) Net of interest expense of \$9,022 in 2007.

* NM Not Meaningful

Gross and net premiums written relating to the financial guaranty line of business reflect premiums received and accrued for in the periods presented and do not include the present value of future cash receipts expected from financial guaranty installment premium policies and contracts written in the period. Gross premiums written increased by 30.3% in the first quarter of 2007 as compared to the first quarter of 2006, while net premiums written increased by only 7.2% over the same period. This increase in gross premiums written was primarily attributable to an increase in international finance business, which was driven by strength in the global utility and infrastructure sectors. This growth was partially offset by a decrease in public finance business. The increase in net premiums written in the first quarter of 2007 as compared to the first quarter of 2006 was partially offset by higher ceded premiums related to the

retrocession of two large policies that exceeded single risk limits.

Net premiums earned increased by 6.4% in the three months ended March 31, 2007, as compared to the same period in 2006, primarily as a result of growth of the in-force business (in particular, installment premiums business written in prior periods) as well as the reduction of earned ceded premiums associated with a commutation of certain reinsurance previously written with the Financial Lines segment.

Net losses and loss expenses for the first quarter of 2007, resulted in a small net reserve release compared to \$4.1 million in losses in the same period in 2006. Lower net losses and loss adjustment expenses during the three months ended March 31, 2007, reflected no significant new case basis provisions during the three months ended March 31, 2007, combined with \$3.3 million case reserve release.

For the three months ended March 31, 2007, acquisition costs were consistent with the same period in prior year.

Operating expenses increased by 33.7% in the first quarter of 2007, as compared to the first quarter of 2006. This increase was due primarily to increased costs associated with compensation, information technology and legal expenses.

Net investment income related to the financial guaranty business increased by 70.0% in the three months ended March 31, 2007, as compared to the same period in 2006, primarily as a result of increases in the average investment asset balances to \$2.2 billion from \$1.4 billion for the three months ended March 31, 2007 and 2006, respectively, combined with increased yields. The source of these additional assets was operating cash flows combined with the proceeds of the SCA IPO.

Net realized and unrealized gains on derivative instruments represent changes in the market value of the Company's insured credit derivative portfolio. The net losses from derivatives for the three months ended March 31, 2007, increased as compared to the same period in the prior year as a result of widening credit spreads in the quarter.

The improvement in net realized and unrealized gains (losses) on investments for the three months ended March 31, 2007 compared to the same period in the prior year, primarily related to an investment impairment charge of \$5.0 million in 2006.

Minority interest expense relating to the preferred shares of XLFA decreased by 50.7% due to restructuring of the agreement with the minority interest preferred shareholder. Minority interest expense relating to the common shares of Security Capital Assurance Ltd has increased following the SCA IPO in August 2006 and primarily represents the 37% ownership interest in Security Capital Assurance Ltd common shares held by the public.

Investment Activities

The following table illustrates the change in net investment income from general operations, net income from investment affiliates from general operations, net realized gains on investments and net realized and unrealized gains on investment and other derivative instruments from general operations for the three months ended March 31, 2007 and 2006.

(U.S. dollars in thousands)	(Unaudited)		
	Three Months Ended		
	March 31,		
	2007	2006	% Change
Net investment income - general operations	\$ 313,438	\$ 260,359	20.4 %
Net income from investment affiliates - general operations (1)	114,213	99,974	14.2 %
Net realized gains on investments	9,292	22,765	(59.2) %
Net realized and unrealized gains on investment and other derivative instruments - general operations	4,681	29,923	(84.4) %

(1) The Company records the income related to alternative fund affiliates on a one month lag and the private investment affiliates on a three month lag in order for the Company to meet the accelerated filing deadlines as specified by the SEC.

Net investment income related to general operations increased in the first quarter of 2007 as compared to the first quarter of 2006 due primarily to a higher investment base and increases in the yield of the portfolio. The market yield to maturity on the total fixed income portfolio was 5.3% at March 31, 2007, as compared to 5.1% at March 31, 2006 due primarily to higher interest rates in the U.K. and Euro zone. The growth in the investment base primarily reflected the Company's positive cash flow from operations.

Net income from investment affiliates increased in the first quarter of 2007 compared to the first quarter of 2006, due primarily to very strong performance in alternative fund affiliates and good performance in the private investment affiliates.

The Company manages its investment grade fixed income securities using an asset/liability management framework. Due to the unique nature of the underlying liabilities, customized benchmarks are used to measure investment performance and comparison to standard market indices is not meaningful. Investment performance is not monitored for certain assets primarily consisting of operating cash and special regulatory deposits. The following is a summary of the investment portfolio returns for the asset/liability portfolios and risk asset portfolios:

	(Unaudited)	
	Three Months Ended	
	March 31,	
	2007 (1)	2006 (1)
Asset/Liability portfolios		
USD fixed income portfolio	1.3 %	0.2 %
Non USD fixed income portfolio	0.0 %	(0.9)%
Risk Asset portfolios		
Alternative portfolio (2)	5.5 %	4.3 %
Equity portfolio	2.9 %	8.6 %
High-Yield fixed income portfolio	2.0 %	2.0 %

(1) Portfolio returns are calculated by dividing the sum of net investment income or net income from investment affiliates, realized gains (losses) and unrealized gains (losses) by the average market value of each portfolio. Performance

is measured
in either the
underlying
asset
currency or
the
functional
currency.

- (2) Performance
on the
alternative
portfolio
reflects the
three months
ended
February 28,
2007 and
February 28,
2006,
respectively.

Net Realized Gains and Losses and Other than Temporary Declines in the Value of Investments

Net realized gains on investments in the first quarter of 2007 included net realized gains of \$34.9 million from sales of investments and net realized losses of \$25.6 million related to the write-down of certain of the Company's fixed income, equity and other investments where the Company determined that there was an other than temporary decline in the value of those investments.

Net realized gains on investments in the first quarter of 2006 included net realized gains of \$33.5 million from sales of investments and net realized losses of \$10.7 million related to the write-down of certain of the Company's fixed income, equity and other investments where the Company determined that there was an other than temporary decline in the value of these investments.

The Company's process for identifying declines in the fair value of investments that are other than temporary involves consideration of several factors. These primary factors include: (i) the time period during which there has been a significant decline in value; (ii) an analysis of the liquidity, business prospects and overall financial condition of the issuer; (iii) the significance of the decline; (iv) an analysis of the collateral structure and other credit support, as applicable, of the securities in question; (v) expected future interest rate movements; and (vi) the Company's intent and ability to hold the investment for a sufficient period of time for the value to recover. Where the Company's analysis of the above factors results in the Company's conclusion that declines in fair values are other than temporary, the cost of the security is written down to fair value and the previously unrealized loss is therefore realized in the period such determination is made.

Net realized and unrealized on investment derivatives for the three months ended March 31, 2007, as well as the gains for the corresponding period in 2006, resulted from the Company's investment strategy to manage interest rate risk, foreign exchange risk, credit risk and to replicate permitted investments.

Net Unrealized Gains and Losses on Investments

At March 31, 2007, the Company had net unrealized gains on fixed income and short-term securities of \$31.0 million and net unrealized gains on equities of \$182.3 million. Of these amounts, gross unrealized losses on fixed income and short term securities and equities were \$274.2 million and \$5.2 million, respectively. The information presented below for the gross unrealized losses on the Company's investments at March 31, 2007, shows the potential effect upon future earnings and financial position should management later conclude that some of the current declines in the fair value of these investments are other than temporary. U.K. and the Euro zone interest rates increased during the three months ended March 31, 2007, which was the primary reason for the decline in the net unrealized position on fixed income securities.

At March 31, 2007, approximately 8,700 fixed income securities out of a total of approximately 17,300 securities were in an unrealized loss position. The largest single unrealized loss in the fixed income portfolio was \$2.9 million. Approximately 300 equity securities out of a total of approximately 1,400 securities were in an unrealized loss position at March 31, 2007, with the largest individual loss being \$0.7 million.

The following is an analysis of how long each of those securities with an unrealized loss at March 31, 2007 had been in a continual unrealized loss position:

(U.S. dollars in thousands)

Type of Securities	Length of time in a continual unrealized loss position	(Unaudited) Amount of unrealized loss at March 31, 2007	(Unaudited) Fair Value of Securities in an unrealized loss position at March 31, 2007
Fixed Income and Short-Term	Less than six months	\$ 120,526	\$ 10,326,234
	At least 6 months but less than 12 months	45,505	1,783,754
	At least 12 months but less than 2 years	90,448	5,083,642
	2 years and over	17,729	1,094,750
	Total	\$ 274,208	\$ 18,288,380
Equities	Less than six months	\$ 4,208	\$ 86,519
	At least 6 months but less than 12 months	1,035	6,229
	Total	\$ 5,243	\$ 92,748

The following is the maturity profile of the fixed income securities that were in a gross unrealized loss position at March 31, 2007:

(U.S. dollars in thousands)

Maturity profile in years of fixed income securities in a continual unrealized loss position	(Unaudited) Amount of unrealized loss at March 31, 2007	(Unaudited) Fair value of securities in an unrealized loss position at March 31, 2007
Less than 1 year remaining	\$ 17,569	\$ 956,695
At least 1 year but less than 5 years remaining	23,810	3,499,974
At least 5 years but less than 10 years remaining	51,404	3,190,796
At least 10 years but less than 20 years remaining	27,913	961,796
At least 20 years or more remaining	67,007	2,143,225
Mortgage and asset-backed securities	86,505	7,535,894
Total	\$ 274,208	\$ 18,288,380

The Company operates a risk asset portfolio that includes high yield (below investment grade) fixed income securities. These represented approximately 2.2% of the total fixed income portfolio market value at March 31, 2007. Fair values of these securities have a higher volatility than investment grade securities. Of the total gross unrealized losses in the Company's fixed income portfolio as at March 31, 2007, \$15.9 million related to securities that were below investment grade or not rated. The following is an analysis of how long each of these below investment grade and unrated securities had been in a continual unrealized loss position at the date indicated:

(U.S. dollars in thousands)

Length of time in a continual unrealized loss position	(Unaudited) Amount of unrealized loss at March 31, 2007	(Unaudited) Fair value of securities in an unrealized loss position at March 31, 2007
Less than six months	\$ 6,292	\$ 303,640
At least 6 months but less than 12 months	8,765	150,640
At least 12 months but less than 2 years	502	23,248
2 years and over	368	6,108
Total	\$ 15,927	\$ 483,636

Other Revenues and Expenses

The following table sets forth other revenues and expenses for the three months ended March 31, 2007 and 2006:

(U.S. dollars in thousands)

	(Unaudited) Three Months Ended March 31,		
	2007	2006	% Change
Net income (loss) from operating affiliates general operations (1)	\$ 45,193	\$ (7,450)	NM
Amortization of intangible assets	420	1,095	(61.6)%
Corporate operating expenses	31,006	49,142	(36.9)%
Interest expense general operations	50,614	50,350	0.5 %
Income tax expense (2)	72,676	66,621	9.1 %

(1) The Company records the income related to its operating affiliates on a three month lag in order for the Company to meet the accelerated filing deadlines as specified by the SEC.

(2) Income tax expense does not include SCA s income tax charge.

* NM Not Meaningful

Net income from operating affiliates was higher for the three months ended March 31, 2007, as compared to the same period in 2006. These results reflect strong returns from the Company's investments in investment manager companies during the three months ended March 31, 2007, which represents the fourth quarter 2006 earnings of the underlying affiliates due to the lag in reporting.

Corporate operating expenses in the three months ended March 31, 2007 decreased compared to the three months ended March 31, 2006 primarily reflecting lower consulting and legal fees and a higher allocation charge to the operating segments.

Interest expense for the three months ended March 31, 2007 as compared to the same period in 2006 was consistent, as the outstanding debt balance and associated interest rates were relatively unchanged. For more information on the Company's financial structure, see Liquidity and Capital Resources.

The increase in the Company's income taxes arose principally from the increase in the profitability of the Company's U.S. and European operations.

Balance Sheet Analysis

Investments

The primary objectives of the investment strategy are to support the liabilities arising from the operations of the Company, generate stable investment income and to build book value for the Company over the longer term. The strategy strives to maximize investment returns while taking into account market and credit risk. The Company's overall investment portfolio is structured to take into account a number of variables including local regulatory requirements, business needs, collateral management and risk tolerance.

At March 31, 2007 and December 31, 2006, total investments, cash and cash equivalents and net payable for investments purchased were \$45.8 billion and \$44.3 billion, respectively. The following table summarizes the composition of the Company's total investments and cash and cash equivalents:

(U.S. dollars in thousands)	(Unaudited) Fair Value at March 31, 2007	Percent of Total	Fair Value at December 31, 2006	Percent of Total
Cash and cash equivalents	\$ 3,370,799	7.4 %	\$ 2,223,748	5.0 %
Net payable for investments purchased	(550,000)	(1.1)%	(104,739)	(0.2)%
Short-term investments	1,898,587	4.1 %	2,338,487	5.3 %
Fixed maturities	36,988,922	80.8 %	36,121,358	81.6 %
Equity securities	908,379	2.0 %	891,138	2.0 %
Investments in affiliates	2,571,862	5.6 %	2,308,781	5.2 %
Other investments	566,517	1.2 %	476,889	1.1 %
Total investments and cash and cash equivalents	\$ 45,755,066	100.0 %	\$ 44,255,662	100.0 %

The Company reviews on a regular basis its corporate debt concentration, credit quality and compliance with established guidelines. At March 31, 2007 and December 31, 2006, the average credit quality of the Company's total fixed income portfolio was AA-. As at March 31, 2007, approximately 53.5% of the fixed income portfolio was rated AAA by one or more of the principal ratings agencies. Approximately 2.2% was below investment grade or not rated.

Unpaid Losses and Loss Expenses

The Company establishes reserves to provide for estimated claims, the general expenses of administering the claims adjustment process and for losses incurred but not reported. These reserves are calculated using actuarial and other reserving techniques to project the estimated ultimate net liability for losses and loss expenses. The Company's reserving practices and the establishment of any particular reserve reflects management's judgment concerning sound financial practice and do not represent any admission of liability with respect to any claims made against the Company.

Unpaid losses and loss expenses totaled \$22.8 billion at March 31, 2007, and \$22.9 billion at December 31, 2006.

The table below represents a reconciliation of the Company's unpaid losses and loss expenses for the three months ended March 31, 2007:

(U.S. dollars in thousands)	(Unaudited) Gross unpaid losses and loss expenses	(Unaudited) Unpaid losses and loss expenses recoverable	(Unaudited) Net unpaid losses and loss expenses
Balance as at December 31, 2006	\$ 22,895,021	\$ (4,995,373)	\$ 17,899,648
Losses and loss expenses incurred	1,252,407	(257,620)	994,787
Losses and loss expenses paid/recovered	1,384,815	(397,229)	987,586
Foreign exchange and other	43,410	11,305	54,715
Balance as at March 31, 2007	\$ 22,806,023	\$ (4,844,459)	\$ 17,961,564

While the Company reviews the adequacy of established reserves for unpaid losses and loss expenses regularly, no assurance can be given that actual claims made and payments related thereto will not be in excess of the amounts reserved. In the future, if such reserves develop adversely, such deficiency would have a negative impact on future results of operations. See *Unpaid Losses and Loss Expenses* in Item 1, *Critical Accounting Policies and Estimates* in Item 7 and Item 8, Note 10 to the Consolidated Financial Statements, each in the Company's Form 10-K for the year ended December 31, 2006 for further discussion.

Unpaid Losses and Loss Expenses Recoverable and Reinsurance Balances Receivable

As a significant portion of the Company's net premiums written incept in the first three months of the year, certain assets and liabilities have increased at March 31, 2007 compared to December 31, 2006. This includes deferred acquisition costs, unearned premiums, premiums receivable and prepaid reinsurance premiums.

In the normal course of business, the Company seeks to reduce the potential amount of loss arising from claims events by reinsuring certain levels of risk assumed in various areas of exposure with other insurers or reinsurers. While reinsurance agreements are designed to limit the Company's losses from large exposures and permit recovery of a portion of direct unpaid losses, reinsurance does not relieve the Company of its ultimate liability to its insureds. Accordingly, the loss and loss expense reserves on the balance sheet represent the Company's total unpaid gross losses. Unpaid losses and loss expenses recoverable relate to estimated reinsurance recoveries on the unpaid loss and loss expense reserves.

Unpaid losses and loss expenses recoverables were \$4.9 billion at March 31, 2007 and \$5.0 billion at December 31, 2006.

Edgar Filing: XL CAPITAL LTD - Form 10-Q

The table below presents the Company's net paid and unpaid losses and loss expenses recoverable and reinsurance balances receivable at March 31, 2007 and December 31, 2006.

(U.S. dollars in thousands)	(Unaudited)	
	March 31,	December 31,
	2007	2006
Reinsurance balances receivable	\$ 1,041,562	\$ 1,128,721
Reinsurance recoverable on future policy benefits	31,666	32,399
Unpaid losses and loss expenses recoverable	5,027,278	5,191,646
Bad debt reserve on unpaid losses and loss expenses and reinsurance balances recoverable	(206,403)	(218,343)
Net paid and unpaid losses and loss expenses recoverable and reinsurance balances receivable	\$ 5,894,103	\$ 6,134,423

Liquidity and Capital Resources

As a holding company, the Company's assets consist primarily of its investments in subsidiaries, and the Company's future cash flows depend on the availability of dividends or other statutorily permissible payments from its subsidiaries. The ability to pay such dividends is limited by the applicable laws and regulations of the various countries the Company operates in including, among others, Bermuda, the United States, Ireland, Switzerland and the United Kingdom, and those of the Society of Lloyd's and certain contractual provisions. No assurance can be given that the Company or its subsidiaries will be permitted to pay dividends in the future.

The Company and its subsidiaries provide no guarantees or other commitments (express or implied) of financial support to the Company's subsidiaries or affiliates, except for express written financial support provided by XL Insurance (Bermuda) Ltd in connection with the Company's financial guaranty subsidiaries and where other express written guaranty or other financial support arrangements are in place.

Liquidity

Liquidity is a measure of the Company's ability to generate sufficient cash flows to meet the short and long term cash requirements of the Company's business operations.

The Company's operating subsidiaries provide liquidity in that premiums are generally received months or even years before losses are paid under the policies related to such premiums. Historically, cash receipts from operations, consisting of premiums and investment income, have provided more than sufficient funds to pay losses, operating expenses and dividends to the Company.

Net cash from operations was \$547.4 million in the first three months of 2007 compared with \$490.2 million in the same period in 2006.

Capital Resources

At March 31, 2007, the Company had total shareholders' equity of \$11.3 billion. In addition to ordinary and preferred share capital, the Company depends on external sources of financing such as debt, credit facilities and contingent capital to support its underwriting activities.

On February 23, 2007, the Board of Directors of the Company approved a new share repurchase program, authorizing the Company to repurchase up to \$1.0 billion of its Class A ordinary shares. Purchases are made from time to time in the open market or in privately negotiated transactions, and such repurchases are funded from cash and/or the proceeds from the issuance of securities such as the Series E Perpetual Non-Cumulative Preference Ordinary Shares (the Series E

Preference Shares) described below. The timing and amount of the share repurchases under the program depends on a variety of factors, including market conditions, legal requirements and other factors. The new share repurchase program includes the unused \$135.4 million allocated to the share repurchase program authorized by the Board of Directors in January of 2000. During the three months ended March 31, 2007, the Company repurchased and cancelled approximately 3.2 million Class A ordinary shares for \$221.2 million. Subsequent to March 31, 2007 through May 9, 2007, the Company repurchased an additional 3.9 million shares for \$284.3 million.

On March 15, 2007, the Company issued 1,000,000 Fixed/Floating Series E Perpetual Non-Cumulative Preference Ordinary Shares, par value \$0.01 each, with liquidation preference US\$1,000 per share (the Series E Preference Shares). The Company received net proceeds of approximately \$983 million from the offering. Until April 15, 2017, dividends on the Series E Preference Shares are payable semiannually on a non-cumulative basis, when, as and if declared by the Company s Board of Directors, on April 15 and October 15 of each year at a fixed rate equal to 6.5% per annum on the liquidation preference. From and after April 15, 2017, dividends on the Series E Preference Shares are payable quarterly on a non-cumulative basis, when, as and if declared by the Company s Board of Directors, on January 15, April 15, July 15 and October 15 of each year at a floating rate equal to three-month LIBOR plus 2.4575% on the liquidation preference. Dividends on the Series E Preference Shares, if declared, will be payable commencing on October 15, 2007. The Series E Preference Shares are perpetual securities with no fixed maturity date and are not convertible into any of the Company s other securities.

On March 15, 2007, in connection with the sale of the Series E Preference Shares, the Company entered into a Replacement Capital Covenant (the Replacement Capital Covenant), whereby the Company agreed for the initial benefit of the holders of the Company s 6.375% senior notes due 2024 (the Senior Notes) that all or any part of the Series E Preference Shares will not be redeemed or purchased by the Company on or before April 15, 2047, unless during the six months on or prior to the date of that redemption or purchase, the Company receives a specified amount of proceeds from the sale of ordinary shares and certain other securities that have characteristics that are the same as, or more equity-like than, the applicable characteristics of the Series E Preference Shares being redeemed or purchased at that time.

As at March 31, 2007, the Company had revolving loan facilities from a variety of sources, including commercial banks, totaling \$4.8 billion of which \$3.4 billion in debt was outstanding. In addition, the Company had letter of credit facilities amounting to \$6.3 billion of which \$3.8 billion was utilized to provide letters of credit in issue at March 31, 2007, 4.3% of which were collateralized by the Company s investment portfolio. Such letters of credit principally support the Company s U.S. non-admitted business and the Company s capital requirements at Lloyd s.

On May 2, 2007, the Company issued \$325.0 million aggregate principal amount of 6.25% Senior Notes due 2027, (2027 Senior Notes). The 2027 Senior Notes were issued at 99.805% and gross proceeds were \$324.4 million. Related expenses of the offering, including underwriting discounts, amounted to approximately \$2.5 million. Interest on the 2027 Senior Notes is payable on May 15, and November 15 of each year, beginning November 15, 2007. The Company may redeem the 2027 Senior Notes in whole at any time, or in part from time to time, at a make-whole redemption price. The Company may also redeem the Senior Notes in whole, but not in part, at any time upon the occurrence of certain tax events. The 2027 Senior Notes are unsecured and rank equally with all the Company s existing and future unsecured senior debt.

Debt

The following table presents the Company's indebtedness under outstanding debt securities and lenders' commitments as at March 31, 2007:

Notes Payable and Debt (U.S. dollars in thousands)	Commitment	In Use	Year of Expiry	Payments Due by Period			
				Less than 1 Year	1 to 3 Years	3 to 5 Years	After 5 Years
364-day revolver	\$ 100,000	\$	2007	\$	\$	\$	\$
5 and 3-year revolvers	1,000,000		2007/10				
5-year revolver	100,000		2010				
5-year revolver (1)	250,000		2011				
2.53% Senior Notes	825,000	825,000	2009		825,000		
5.25% Senior Notes	745,000	745,000	2011			745,000	
6.58% Guaranteed Senior Notes	255,000	255,000	2011			255,000	
6.50% Guaranteed Senior Notes	598,476	598,476	2012				60
5.25% Senior Notes	595,139	595,139	2014				60
6.375% Senior Notes	350,000	350,000	2024				35
Total	\$ 4,818,615	\$ 3,368,615		\$	\$ 825,000	\$ 1,000,000	\$ 1,55

Commitment and In Use data represent March 31, 2007 accreted values. Payments Due by Period data represent ultimate redemption values.

notes
payable
and debt.

The Company has several letter of credit facilities provided on a syndicated and bilateral basis from commercial banks. These facilities are principally utilized to support non-admitted insurance and reinsurance operations in the United States and capital requirements at Lloyd's. In addition to letters of credit, the Company has established insurance trusts in the U.S. that provide cedants with statutory relief under state insurance regulations in the U.S. It is anticipated that the commercial facilities will be renewed on expiry but such renewals are subject to the availability of credit from banks utilized by the Company. In the event that such credit support is insufficient, the Company could be required to provide alternative security to cedants. This could take the form of additional insurance trusts supported by the Company's investment portfolio or funds withheld using the Company's cash resources. The value of letters of credit required is driven by, among other things, loss development of existing reserves, the payment pattern of such reserves, the expansion of business written by the Company and loss experience of such business.

In addition to funded debt transactions, the Company and an indirect majority-owned subsidiary XLFA have entered into contingent capital transactions. No up-front proceeds were received by the Company or XLFA under these transactions, however, in the event that the associated irrevocable put option agreements are exercised, proceeds previously raised from investors from the issuance of pass-through trust securities would be received in return for the issuance of preferred shares by the Company or XLFA, as applicable.

Ratings

The Company's ability to underwrite business is dependent upon the quality of its claims paying and financial strength ratings as evaluated by independent rating agencies. As a result, in the event that the Company is downgraded, its ability to write business may be adversely affected. The Company regularly evaluates its capital needs to support the volume of business written in order to maintain its claims paying and financial strength ratings. The Company regularly provides financial information to rating agencies to both maintain and enhance existing ratings.

The following are the current financial strength and claims paying ratings from internationally recognized rating agencies in relation to the Company's principal insurance and reinsurance subsidiaries and pools:

Rating agency	Rating
Standard & Poor's	A+ (Stable)
Fitch	AA (Stable)
A.M. Best	A+ (Stable)
Moody's Investor Services	Aa3 (Stable)

The following are the current financial strength ratings from internationally recognized rating agencies in relation to the Company's principal financial guaranty insurance and reinsurance subsidiaries:

Rating agency	Rating
Standard & Poor's	AAA
Fitch	AAA
Moody's Investor Services	Aaa

In addition, XL Capital Ltd had the following long term debt ratings as at March 31, 2007: a (Stable) from A.M. Best, A (Stable) from Standard and Poor's, A3 (Stable) from Moody's and A (Stable) from Fitch.

Other

For information regarding cross-default and certain other provisions in the Company's debt and convertible securities documents, see Item 7 of the Company's Form 10-K for the year ended December 31, 2006.

The Company has had several share repurchase programs in the past as part of its capital management strategy. On January 9, 2000, the Board of Directors authorized a program for the repurchase of shares up to \$500.0 million. On February 23, 2007, the Board of Directors of the Company approved a new share repurchase program, authorizing the Company to repurchase up to \$1.0 billion of its Class A ordinary shares. Purchases are made from time to time in the open market or in privately negotiated transactions, and those repurchases are funded from cash and/or the proceeds from the issuance of securities such as the Series E Perpetual Non-Cumulative Preference Ordinary Shares (the "Series E Preference Shares") described above. The timing and amount of the share repurchases under the program depends on a variety of factors, including market conditions, legal requirements and other factors. The new share repurchase program includes the unused \$135.4 million allocated to the share repurchase program authorized by the Board of Directors in January of 2000. During the three months ended March 31, 2007 the Company repurchased and cancelled approximately 3.2 million Class A ordinary shares for \$221.2 million. Subsequent to March 31, 2007, through May 9, 2007 the Company repurchased an additional 3.9 million shares for \$284.3 million. The Company has also repurchased shares from employees and directors in relation to withholding tax on restricted stock.

See Part II, Item 2 "Unregistered Sales of Equity Securities and Use of Proceeds," below.

CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

The Private Securities Litigation Reform Act of 1995 ("PSLRA") provides a "safe harbor" for forward-looking statements. Any prospectus, prospectus supplement, the Company's Annual Report to ordinary shareholders, any proxy statement, any other Form 10-K, Form 10-Q or Form 8-K of the Company or any other written or oral statements made by or on behalf of the Company may include forward-looking statements that reflect the Company's current views with respect to future events and financial performance. Such statements include forward-looking statements both with respect to the Company in general, and to the insurance, reinsurance and financial products and services sectors in particular (both as to underwriting and investment matters). Statements that include the words "expect", "intend", "plan", "believe", "project", "anticipate", "will", "may", and similar statements of a future or forward-looking nature identify forward-looking statements for purposes of the PSLRA or otherwise. All forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause actual results to differ materially from those indicated in such statements. The Company believes that these factors include, but are not limited to, the following: (i) the adequacy of rates and terms and conditions may not be as sustainable as the Company is currently projecting; (ii) changes to the size of the Company's claims relating to natural catastrophes; (iii) the Company's ability to realize the expected benefits of the collateralized quota share reinsurance treaty that it entered into in the fourth quarter of 2006 with respect to specified portions of its property catastrophe and retrocessional lines of business; (iv) the timely and full recoverability of reinsurance placed by the Company with third parties, or other amounts due to the Company; (v) the projected amount of ceded reinsurance recoverables and the ratings and creditworthiness of reinsurers may change; (vi) the timing of claims payments being faster or the receipt of reinsurance recoverables being slower than anticipated by the Company; (vii) ineffectiveness or obsolescence of the Company's business strategy due to changes in current or future market conditions; (viii) increased competition on the basis of pricing, capacity, coverage terms or other factors; (ix) greater frequency or severity of claims and loss activity, including as a result of natural or man-made catastrophic events, than the

Company's underwriting, reserving or investment practices anticipate based on historical experience or industry data; (x) developments in the world's financial and capital markets that adversely affect the performance of the Company's investments and the Company's access to such markets; (xi) the potential impact on the Company from government-mandated insurance coverage for acts of terrorism; (xii) the potential impact of variable interest entities or other off-balance sheet arrangements on the Company; (xiii) developments in bankruptcy proceedings or other developments related to bankruptcies of companies insofar as they affect property and casualty insurance and reinsurance coverages or claims that the Company may have as a counterparty; (xiv) availability of borrowings and letters of credit under the Company's credit facilities; (xv) changes in regulation or tax laws applicable to the Company or its subsidiaries, brokers or customers; (xvi) acceptance of the Company's products and services, including new products and services; (xvii) changes in the availability, cost or quality of reinsurance; (xviii) changes in the distribution or placement of risks due to increased consolidation of insurance and reinsurance brokers; (xix) loss of key personnel; (xx) the effects of mergers, acquisitions and divestitures; (xxi) changes in ratings, rating agency policies or practices; (xxii) changes in accounting policies or practices or the application thereof; (xxiii) legislative or regulatory developments; (xxiv) changes in general economic conditions, including inflation, foreign currency exchange rates and other factors; (xxv) the effects of business disruption or economic contraction due to war, terrorism or other hostilities; and (xxvi) the other factors set forth in the Company's other documents on file with the United States Securities and Exchange Commission (the "SEC"). The foregoing review of important factors should not be construed as exhaustive and should be read in conjunction with the other cautionary statements that are included herein or elsewhere. The Company undertakes no obligation to update publicly or revise any forward-looking statement, whether as a result of new information, future developments or otherwise.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Except as described below, there have been no material changes in the Company's market risk exposures or how those exposures are managed, since December 31, 2006. The following discussion should be read in conjunction with

Quantitative and Qualitative Disclosures about Market Risk, presented under Item 7A of the Company's Form 10-K for the year ended December 31, 2006.

The Company enters into derivatives and other financial instruments primarily for risk management purposes. The Company's derivative transactions can expose the Company to credit default swap risk, weather and energy risk, investment market risk and foreign currency exchange rate risk. The Company attempts to manage these risks based on guidelines established by senior management. Derivative instruments are carried at fair value with resulting changes in fair value recognized in income in the period in which they occur.

Value-at-risk (VaR) is one of the tools used by management to estimate potential losses in fair values using historical rates, market movements and credit spreads to estimate the volatility and correlation of these factors to calculate the potential loss that could occur over a defined period of time given a certain probability.

This risk management discussion and the estimated amounts generated from the sensitivity and VaR analyses presented in this document are forward-looking statements of market risk assuming certain adverse market conditions occur. Actual results in the future may differ materially from these estimated results due to, among other things, actual developments in the global financial markets. The results of analysis used by the Company to assess and mitigate risk should not be considered projections of future events or losses. See generally Cautionary Note Regarding Forward-Looking Statements in Item 2.

Investment Market Risks

The Company's investment portfolio consists of exposures to fixed income securities, equities, alternative investments, derivatives, business and other investments and cash. These securities and investments are denominated in both U.S. dollars and foreign currencies.

Through the structure of the Company's investment portfolio, the Company's earnings and book value are directly affected by changes in the valuations of the securities and investments held in the investment portfolio. These valuation changes reflect changes in interest rates (e.g., changes in the level, slope and curvature of the yield curves, volatility of interest rates, mortgage prepayment speeds and credit spreads), credit quality, equity prices (e.g., changes in prices and volatilities of individual securities, equity baskets and equity indices) and foreign currency exchange rates (e.g., changes in spot prices, forward prices and volatilities of currency rates). Market risk therefore arises due to the uncertainty surrounding the future valuations of these different assets, the factors that impact their values and the impact that this could have on the Company's earnings and book value.

The Company seeks to manage the risks of the investment portfolio through a combination of asset class, country, industry and security level diversification and investment manager allocations. These allocation decisions are made relative to the liability profile of the Company and the Company's surplus. Further, individual security and issuer exposures are generally controlled and monitored at the investment portfolio level, via specific investment constraints outlined in investment guidelines and agreed with the Company's external investment professionals. Additional constraints are generally agreed with the external investment professionals which may address exposures to eligible securities, prohibited investments/transactions, credit quality and general concentration limits.

The Company's direct use of investment derivatives includes futures, forwards, swaps and option contracts that derive their value from underlying assets, indices, reference rates or a combination of these factors. When investment guidelines allow for the use of derivatives, these can generally only be used for the purposes of managing interest rate risk, foreign exchange risk, credit risk and replicating permitted investments, provided the use of such instruments is incorporated in the overall portfolio duration, spread, convexity and other relevant portfolio metrics. The direct use of derivatives is generally not permitted to economically leverage the portfolio outside of the stated guidelines. Derivatives may also be used to add value to the investment portfolio where market inefficiencies are perceived to exist, to utilize cash holdings to purchase equity indexed derivatives and to adjust the duration of a portfolio of fixed income securities to match the duration of related deposit liabilities.

Investment Value-at-Risk (VaR)

The VaR of the investment portfolio at March 31, 2007, based on a 95% confidence level with a one month holding period was approximately \$486 million as compared to \$602 million at December 31, 2006. The VaR of all investment relative derivatives excluding investments in affiliates and other investments was approximately \$16 million as compared to \$13 million at December 31, 2006. The Company's investment portfolio VaR as at March 31, 2007 is not necessarily indicative of future VaR levels.

To complement the VaR analysis based on normal market environments, the Company considers the impact on the investment portfolio of several different historical stress periods to analyze the effect of unusual market conditions. The Company establishes certain historical stress test scenarios which are applied to the actual investment portfolio. As these stress tests and estimated gains and losses are based on historical events, they will not necessarily reflect future stress events or gains and losses from such events. The results of the stress test scenarios are

reviewed on a regular basis to ensure they are appropriate, based on current shareholders equity, market conditions and the Company's total risk tolerance.

Given the investment portfolio allocations as at March 31, 2007, the Company would expect to lose approximately 5.3% of the portfolio if the most damaging event stress tested was repeated, all other things held equal, as compared to 5.3% at December 31, 2006. Given the investment portfolio allocations as at March 31, 2007, the Company would expect to gain approximately 16.7% of the portfolio if the most favorable event stress tested was repeated, all other things held equal, as compared to 16.5% at December 31, 2006. The Company assumes that no action is taken during the stress period to either liquidate or rebalance the portfolio. The Company believes that this fairly reflects the potential decreased liquidity that is often associated with stressed market environments.

Fixed Income Portfolio

The Company's fixed income portfolio is exposed to credit and interest rate risk through its portfolio of debt securities, and includes fixed maturities and short-term investments. The fixed income portfolio includes fixed maturities, short-term investments, cash and cash equivalents and net payable for investments purchased.

As at March 31, 2007, the value of the Company's fixed income portfolio including cash and cash equivalents and net payable for investments purchased was \$41.7 billion as compared to \$40.6 billion at December 31, 2006. As at March 31, 2007, the fixed income portfolio consisted of approximately 90.3% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased) as compared to approximately 90.8% as at December 31, 2006.

The table below shows the Company's fixed income portfolio by credit rating in percentage terms of the Company's total fixed income exposure (including fixed maturities, short-term investments, cash and cash equivalents and net payable for investments purchased) as at March 31, 2007:

	Total
AAA	53.5 %
AA	17.0 %
A	16.7 %
BBB	10.6 %
BB & below	2.2 %
NR	0.0 %
Total	100.0 %

At March 31, 2007, the average credit quality of the Company's total fixed income portfolio was AA.

As at March 31, 2007, the top 10 corporate holdings, which exclude government guaranteed and government sponsored enterprises, represented approximately 4.0% of the total fixed income portfolio and approximately 11.5% of all corporate holdings. The top 10 corporate holdings listed below represent the direct exposure to the corporations listed below, including their subsidiaries, and excludes any securitized, credit enhanced and collateralized asset or mortgage backed securities, cash and cash equivalents, and excludes any reduction to this exposure through credit default swaps, if applicable.

Top 10 Corporate Holdings	Percentage of Total Fixed Income Portfolio (1)
General Electric Company	0.5 %
Citigroup Inc.	0.5 %
Goldman Sachs Group, Inc.	0.4 %
Bank of America Corporation	0.4 %
Morgan Stanley	0.4 %
Wachovia Corporation	0.4 %
Lehman Brothers Holdings Inc.	0.4 %
Lloyds TSB Group plc	0.4 %
HSBC Holdings plc	0.3 %
Vodafone Group plc	0.3 %

- (1) Including fixed maturities, short-term investments, cash and cash equivalents and net payable for investments purchased.

The Company's fixed income portfolio is exposed to interest rate risk. Interest rate risk is the price sensitivity of a fixed income security to changes in interest rates. The hypothetical case of an immediate 100 basis point adverse parallel shift in global bond curves as at March 31, 2007, would decrease the fair value of the Company's fixed income portfolio by approximately 4.2% or \$1.8 billion. Based on historical observations, it is unlikely that all global yield curves would shift uniformly in the same direction and at the same time.

Equity Portfolio

As at March 31, 2007, the Company's equity portfolio was \$702 million as compared to \$699 million as at December 31, 2006. This excludes fixed income fund investments and publicly traded alternative funds that generally do not have the risk characteristics of equity investments. As at March 31, 2007, the Company's allocation to equity securities was approximately 1.5% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased) as compared to approximately 1.6% as at December 31, 2006.

As at March 31, 2007 and December 31, 2006, approximately 45% of the equity holdings were invested in U.S. companies. As at March 31, 2007, the top ten equity holdings represented approximately 5.1% of the Company's total equity portfolio as compared to approximately 7.9% as at December 31, 2006.

The Company's equity portfolio is exposed to equity price risk. Equity price risk is the potential loss arising from decreases in the market value of equities. An immediate hypothetical 10% change in the value of each equity position would affect the fair value of the portfolio by approximately \$70.2 million as compared to \$69.9 million as at December 31, 2006.

Alternative Investment Portfolio

The Company's alternative investment portfolio had approximately 100 separate investments in different funds at March 31, 2007 with a total exposure of \$2.1 billion making up approximately 4.5% of total investments compared to December 31, 2006, where the Company had approximately 80 separate fund investments with a total exposure of \$1.9 billion representing approximately 4.3% of total investments.

At March 31, 2007, the alternative investment style allocation was 49% in Directional/tactical strategies, 22% in Event driven strategies, 22% in Arbitrage strategies, and 7% in Multi-strategy strategies. At December 31, 2006, the alternative investment style allocation was 44% in

Directional/tactical strategies, 24% in Event driven strategies, 24% in Arbitrage strategies, and 8% in Multi-strategy strategies.

Private Investment Portfolio

As at March 31, 2007, the Company's exposure to private investments was \$364.7 million compared to \$330.2 million as at December 31, 2006. As at March 31, 2007, the Company's exposure to private investments consisted of approximately 0.8% of the total investment portfolio (including cash and cash equivalents, accrued investment income and net payable for investments purchased), compared to approximately 0.7% as at December 31, 2006.

Bond and Stock Index Futures Exposure

At March 31, 2007, bond and stock index futures outstanding had a net long position of \$8.5 million as compared to \$23.8 million at December 31, 2006. A 10% appreciation or depreciation of the underlying exposure to these derivative instruments would have resulted in realized gains or realized losses of \$0.9 million as at March 31, 2007 and \$2.4 million as at December 31, 2006, respectively. The Company may reduce its exposure to these futures through offsetting transactions, including options and forwards.

Other Market Risks

Credit Default Swap and Financial Guaranty Credit Risk

Credit derivatives are entered into in both financial operations and the Company's investment portfolio and are recorded at fair value. Valuation of investment related credit derivatives is based on portfolio manager valuations. In determining the fair value of credit derivatives written within financial operations, management differentiates between investment and non-investment grade exposures and models them separately. Management estimates fair value for investment grade exposures by monitoring changes in credit quality and selecting appropriate market indices to determine credit spread movements over the life of the contracts. The determination of the credit spread movements is the basis for calculating the fair value. For credit derivatives that are non-investment grade appropriate market indices are not readily available. Accordingly, the Company uses an alternative fair value methodology.

Under this methodology, the fair value is determined using a cash flow model developed by the Company which is dependent upon a number of factors, including changes in interest rates, future default rates, credit spreads, changes in credit quality, future expected recovery rates and other market factors. In general, the Company holds credit derivatives to maturity.

Unpaid Losses and Loss Expenses Recoverable and Reinsurance Balances Receivable Credit Risk

With regards to unpaid losses and loss expenses recoverable and reinsurance balances receivable, the Company has credit risk should any of its reinsurers be unable or unwilling to settle amounts due to the Company.

Counterparty Risk

The Company is exposed to credit risk in the event of non-performance by the other parties to its derivative instruments in general, however the Company does not anticipate non-performance. The difference between the notional principal amounts and the associated market value is the Company's maximum credit exposure.

Foreign Currency Exchange Risk

The Company has exposure to foreign currency exchange rate fluctuations through its operations, unpaid losses and loss expenses and in its investment portfolio. The Company's net payable on foreign exchange contracts as at March 31, 2007 was \$322.4 million as compared to a net receivable of \$211.5 million as at December 31, 2006, with a net unrealized loss of \$4.6 million as compared to a net unrealized gain of \$15.5 million as at December 31, 2006.

Weather and Energy Risk

The Company offers weather and contingent energy risk management products in insurance or derivative form to end-users, while managing the risks in the over-the-counter and exchange traded derivatives markets or through the use of quota share or excess of loss arrangements.

Fair values for the Company's natural gas derivative contracts are determined through the use of quoted market prices. As quoted market prices are not widely available in the weather derivative market, management uses available market data and internal pricing models based upon consistent statistical methodologies to estimate fair values. Estimating fair value of instruments that do not have quoted market prices, requires management's judgment in determining amounts that could reasonably be expected to be received from, or paid to, a third party in respect of the contracts. The amounts could be materially different from the amounts that might be realized in an actual sale transaction. Fair values are subject to change in the near-term and reflect management's best estimate based on various factors including, but not limited to, realized and forecasted weather conditions, changes in interest rates and other market factors.

The Company manages its weather and energy risk portfolio through the employment of a variety of strategies. These include geographical and directional diversification of risk exposures and direct hedging within the capital and reinsurance markets. Risk management is undertaken on a portfolio-wide basis, to maintain a portfolio that the Company believes is well diversified and which remains within the aggregate risk tolerance established by the Company's senior management. At present the Company's VaR related to these risks does not exceed \$20.0 million in any one season.

ITEM 4. CONTROLS AND PROCEDURES

Conclusion Regarding the Effectiveness of Disclosure Controls and Procedures

The Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of disclosure controls and procedures pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934, as amended, as of the end of the period covered by this report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures are effective to provide reasonable assurance that all material information relating to the Company required to be filed in this report has been made known to them in a timely fashion.

Changes in Internal Control Over Financial Reporting

There have been no changes in internal control over financial reporting identified in connection with the Company's evaluation required pursuant to Rules 13a-15 and 15d-15 promulgated under the Securities Exchange Act of 1934, as amended, that occurred during the most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

On June 21, 2004, a consolidated and amended class action complaint (the Amended Complaint) was served on the Company and certain of its present and former directors and officers as defendants in a putative class action (Malin et al. v. XL Capital Ltd et al.) filed in United States District Court, District of Connecticut (the Malin Action). The Malin Action purports to be on behalf of purchasers of the Company s common stock between November 1, 2001 and October 16, 2003, and alleges claims under Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 promulgated thereunder (the Securities Laws). The Amended Complaint alleged that the defendants violated the Securities Laws by, among other things, failing to disclose in various public and shareholder and investor reports and other communications the alleged inadequacy of the Company s loss reserves for its NAC Re subsidiary (now known as XL Reinsurance America, Inc.) and that, as a consequence, the Company s earnings and assets were materially overstated. On August 26, 2005, the Court dismissed the Amended Complaint owing to its failure adequately to allege loss causation, but provided leave for the plaintiffs to file a further amended complaint. The plaintiffs thereafter filed a second amended complaint (the Second Amended Complaint), which is similar to the Amended Complaint in its substantive allegations. On December 31, 2005, the defendants filed a motion to dismiss the Second Amended Complaint. The plaintiffs opposed the motion. In addition, the plaintiffs filed a motion to strike certain documents and exhibits that the XL defendants had proffered in support of the motion to dismiss. By Order dated December 15, 2006, the Judge granted in part and denied in part plaintiffs motion to strike and allowed limited discovery through March 2, 2007. The Judge denied defendants motion to dismiss without prejudice to its renewal at the conclusion of such discovery. On March 22, 2007, the Company filed a renewed motion to dismiss the Amended Complaint. Plaintiffs are required to serve their opposition to this motion by May 9, 2007. The Company and the defendant present and former officers and directors intend to vigorously defend the claims asserted against them.

The Company is also subject to litigation and arbitration in the normal course of its business. These lawsuits and arbitrations principally involve claims on policies of insurance and contracts of reinsurance and are typical for the Company and for the property and casualty insurance and reinsurance industry in general. Such legal proceedings are considered in connection with the Company s loss and loss expense reserves. Reserves in varying amounts may or may not be established in respect of particular claims proceedings based on many factors, including the legal merits thereof. In addition to claims litigation, the Company and its subsidiaries are subject to lawsuits in the normal course of business that do not arise from or directly relate to claims on policies of insurance or contracts of reinsurance.

In May 2005, the Company received a subpoena from the SEC and, in June 2005, a grand jury subpoena from the U.S. Attorney s Office for the Southern District of New York, both of which sought documents and information relating to certain finite risk and loss mitigation insurance products. The Company provided the requested documents and information in 2005, and will continue to cooperate with any additional requests that may be received.

In November 2006, a subsidiary of the Company received a grand jury subpoena from the Antitrust Division of the U.S. Department of Justice and a subpoena from the SEC, both of which seek documents in connection with an investigation into the municipal guaranteed investment contract (GIC) market and related products. The Company is fully cooperating with these investigations.

From time to time, the Company has also received and responded to additional requests from Attorneys General and state insurance regulators for information relating to the Company s

contingent commission arrangements with brokers and agents and the Company's insurance and reinsurance practices in connection with certain finite-risk and loss mitigation products. Similarly, the Company's affiliates outside the United States have, from time to time, received and responded to requests from regulators relating to the Company's insurance and reinsurance practices regarding contingent commissions or finite-risk and loss mitigation products. The Company has fully cooperated with the regulators in these matters.

In August 2005, plaintiffs in a proposed class action multi-district lawsuit, captioned *In re Insurance Brokerage Antitrust Litigation*, MDL No. 1663, Civil Action No. 04-5184 (FSH) (the MDL), filed a consolidated amended complaint (the Amended Complaint), which named as new defendants in the pending action approximately 30 entities, including Greenwich Insurance Company, Indian Harbor Insurance Company and XL Capital Ltd. In the MDL, named plaintiffs asserted various claims purportedly on behalf of a class of commercial insureds against approximately 113 insurance companies and insurance brokers through which the named plaintiffs allegedly purchased insurance. The Amended Complaint alleged that the defendant insurance companies and insurance brokers conspired to manipulate bidding practices for insurance policies in certain insurance lines and failed to disclose certain commission arrangements. The named plaintiffs asserted statutory claims under the Sherman Act, various state antitrust laws and the Racketeer Influenced and Corrupt Organizations Act (RICO), as well as common law claims alleging breach of fiduciary duty, aiding and abetting a breach of fiduciary duty and unjust enrichment. Discovery in the MDL commenced in the latter part of 2005. Defendants filed motions to dismiss the Amended Complaint in late November 2005. On February 1, 2006, plaintiffs filed a motion seeking leave to further amend their Amended Complaint to, among other things, add additional defendants, including X.L. America, Inc. and XL Insurance America, Inc. That motion was denied without prejudice. By Opinion and Order dated October 3, 2006, the Court ruled on defendants' motions to dismiss the Amended Complaint, holding that plaintiffs' RICO and antitrust claims were deficient as pled and directing plaintiffs to file a supplemental RICO case statement and a supplemental statement of particularity as to their Sherman Act claims. Plaintiffs filed their supplemental pleadings on October 25, 2006 and on November 30, 2006, defendants filed motions to dismiss plaintiffs' supplemental pleadings.

By Order dated February 16, 2007, the MDL was reassigned from Judge Faith Hochberg to Chief Judge Garrett Brown. By Order dated April 5, 2007, the Court dismissed plaintiffs' Sherman Act and RICO claims without prejudice to their filing final amended pleadings. By Order dated April 11, 2007, the Court stayed all proceedings in the MDL, including discovery, pending the disposition of defendants' anticipated motions to dismiss the final amended pleadings that are to be filed by plaintiffs in accordance with the Court's April 5, 2007 Order. It is anticipated that, by May 2007, the Court will set a briefing schedule in connection with defendants' motions to dismiss plaintiffs' final amended pleadings.

On or about February 13, 2006, plaintiffs filed a motion seeking class certification. Defendants filed an opposition to the class certification motion, as well as a separate motion seeking to exclude the testimony of the expert witness upon whom plaintiffs have relied in seeking class certification. In accordance with the Court's April 11, 2007 Order, consideration of plaintiffs' class-certification motion is stayed pending disposition of defendants' motions to dismiss plaintiffs' final amended pleadings.

On April 4, 2006, a complaint was filed in the U.S. District Court for the Northern District of Georgia on behalf of New Cingular Wireless Headquarters LLC and several other corporations against approximately 100 defendants, including Greenwich Insurance Company, XL Specialty Insurance Company, XL Insurance America, Inc., XL Insurance Company Limited, Lloyd's syndicates 861, 588 and 1209 and XL Capital Ltd. (the New Cingular Lawsuit). The New Cingular Lawsuit is a tag-along action that does not purport to be a class action. The New Cingular

Complaint, which made the same basic allegations as those alleged in the MDL Amended Complaint, asserted statutory claims under the Sherman Act, the Racketeer Influenced and Corrupt Organizations Act, as well as common law claims alleging breach of fiduciary duty, inducement to breach fiduciary duty, unjust enrichment and fraud. The New Cingular Lawsuit has been consolidated with the MDL for pretrial purposes. In or about December 2006, the three Lloyds Syndicates managed by a subsidiary of the Company including a Company-owned syndicate, were dismissed from the New Cingular Lawsuit in connection with a settlement reached between the plaintiffs and several of the Lloyds syndicates that were named as defendants therein. On January 5, 2007, the plaintiffs in the New Cingular Lawsuit filed an Amended Complaint, a RICO Statement and a memorandum of law. In accordance with the Court's April 11, 2007 Order, all proceedings in the New Cingular Lawsuit, including discovery and motions by defendants to dismiss the New Cingular Amended Complaint, are currently stayed. No schedule has yet been set by the Court for the briefing of motions by defendants to dismiss the Amended Complaint.

The Company believes that the ultimate outcome of all outstanding litigation and arbitration will not have a material adverse effect on its consolidated financial condition, operating results and/or liquidity, although an adverse resolution of one or more of these items could have a material adverse effect on the Company's results of operations in a particular fiscal quarter or year.

ITEM 1A. RISK FACTORS

Refer to Item 1A. Risk Factors in our Annual Report on form 10-K for the period year December 31, 2006 for further information.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) Purchases of Equity Securities by the Issuer and Affiliate Purchasers

The following table provides information about purchases by the Company during the three months ended March 31, 2007 of equity securities that are registered by the Company pursuant to Section 12 of the Exchange Act:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (2)
January 1-31, 2007	190	69.00		\$ 135.4 million
February 1-28, 2007				\$ 1.0 billion
March 1-31, 2007	3,318,421	69.84	3,167,800	\$ 778.8 million
Total	3,318,611	69.84	3,167,800	\$ 778.8 million

(1)

All of the shares included in January and February and a portion of those repurchased in March were purchased in connection with the vesting of restricted shares granted under the Company's restricted stock plan. All of these purchases were made in connection with satisfying tax withholding obligations of those employees. These shares were not purchased as part of the Company's publicly announced share repurchase program.

- (2) On January 9, 2000, the Board of Directors previously authorized a \$500.0 million share repurchase program. On February 23,

2007, the Board of Directors of the Company approved a new share repurchase program authorizing the Company to repurchase up to \$1.0 billion of its Class A ordinary shares. The new program included the unused amounts allocated to the share repurchase program authorized in January 2000. As of March 31, 2007, the Company could repurchase up to approximately \$778.8 million of its equity securities under the share repurchase program.

ITEM 6. EXHIBITS

- 4.1 Form of Series E Preference Share Certificate, incorporated by reference to Exhibit 4.1 to the Company's Current Report on Form 8-K filed on March 15, 2007.
