5.1 FULL DESCRIPTION OF MATERIAL CHANGE

Methanex Corporation announced that its Board of Directors had approved a normal course issuer bid under which it may repurchase up to 7,909,393 common shares of the Company representing not more than 10% of the public float of the total shares issued and outstanding as at May 2, 2008. As of May 2, 2008 there were 94,646,917 Methanex common shares issued and outstanding.

The normal course issuer bid repurchase program was filed and accepted by the Toronto Stock Exchange (TSX) on May 6, 2008. The program will be carried out through the facilities of the TSX. Purchases under the program may commence on May 20, 2007 and will terminate on the earlier of May 19, 2009 and the date upon which the Company has acquired the maximum number of common shares permitted under the purchase program or otherwise decided not to make further purchases. Purchases will be made from time to time at the then current market price of the Company's common shares as traded on the TSX and the common shares purchased will be cancelled. Daily repurchases under the program will not exceed 102,841 shares per day (which is 25% of the Company's average daily trading volume for the six month period ending April 30, 2008), subject to purchases made in

accordance with the block purchase exception under the TSX rules. The Company has entered into an automatic securities purchase plan with its broker in connection with purchases to be made under this program.

Methanex believes that purchasing its shares under the normal course issuer bid is in the best interest of its shareholders and represents an effective use of the company's financial resources. The planned share repurchase is consistent with Methanex's balanced approach to the utilization of cash and reflects the Company's ongoing commitment to returning excess cash to shareholders. At the closing price of Methanex's common shares on the TSX on May 6, 2008, the planned share repurchase represents a potential financial expenditure of approximately Cdn \$217 Million (approximately US \$216 Million). As at March 31, 2008, Methanex had approximately US \$465 million in cash, an undrawn US \$250 million credit facility and continued strong cash generation capability. Methanex intends to finance the purchase of common shares under the bid with cash on hand.
