CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of our statements contained in, or incorporated by reference into, this Annual Report on Form 10-K are "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995 and are including this statement for purposes of invoking these safe harbor provisions. Forward-looking statements are not guarantees of performance or results. When we use words like "may," "plan," "contemplate," "anticipate," "believe," "intend," "continue," "expect," "project," "predict," "estimate," "target," "could," "is likely," "should," "would," "will," and similar expressions, you should consider them as identifying forward-looking statements, although we may use other phrasing. These forward-looking statements involve risks and uncertainties and are based on our beliefs and assumptions and on the information available to us at the time that these disclosures were prepared. These forward-looking statements involve risks and uncertainties and may not be realized due to a variety of factors, including, but not limited to, the following:

risks and uncertainties related to the Merger and Acquisition Agreement and the Chapter 11 Bankruptcy Filing as detailed in Item 1A of Part I of this Annual Report on Form 10-K;

our ability to continue to operate as a going concern;

- our ability to meet our liquidity needs;

our ability to raise sufficient capital to comply with the requirements of our regulators and for continued support of operations;

our ability to realize the benefits from our cost saving initiatives;

the failure of assumptions underlying the establishment of our allowance for loan losses that may prove to be materially incorrect or may not be borne out by subsequent events;

a reduction in the value of the collateral for loans made by us, especially real estate, which, in turn would likely reduce our customers' borrowing power and the value of assets and collateral associated with our existing loans;

increased loan delinquencies and/or an escalation in problem assets and foreclosures;

a reduction in the value of certain assets held by us;

the imposition of additional enforcement actions by bank regulatory authorities upon First Mariner Bank or First Mariner Bancorp;

the success and timing of our business strategies and our ability to effectively carry out our business and capital plans;

unanticipated regulatory or judicial proceedings;

our ability to effectively manage market risk, credit risk, and operational risk;

our ability to realize income through our mortgage-banking operations;

a decline in demand for our products and services;

our ability to attract and retain deposits;

the timely development of competitive new products and services and the acceptance of these products and services by new and existing customers;

changes in consumer spending and savings habits;

our ability to retain key employees;

3

our estimates of self-insurance accruals and future liability;

the effect of any mergers, acquisitions, or other transactions to which we or our subsidiary may from time to time be a party (see "Recent Developments" in Item 1 of Part I of this Annual Report on Form 10-K);

adverse changes in the securities' markets;

the risks of changes in interest rates on the level and composition of deposits, loan demand, and the values of loan collateral, securities, and interest-sensitive assets and liabilities;

the effects of competition from other commercial banks, thrifts, mortgage-banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds, and other financial institutions operating in our market area and elsewhere, including institutions operating regionally, nationally, and internationally, together with competitors offering banking products and services by mail, telephone, and the Internet;

costs and potential disruption or interruption of operations due to cyber-security incidents;

the effect of changes in accounting policies and practices, as may be adopted from time-to-time by bank regulatory agencies, the Securities and Exchange Commission, the Financial Accounting Standards Board, or other accounting standards setters;

the effects of, and changes in, trade, monetary, and fiscal policies and laws, including interest rate policies of the Federal Reserve Board, inflation, interest rate, market, and monetary fluctuations;

the strength of the United States economy in general, the strength of the local economies in which we conduct operations, and the unfavorable effects of future economic conditions, including inflation, recession, or decreases in real estate values; and

geopolitical conditions, including acts or threats of terrorism, actions taken by the United States or other governments in response to acts or threats of terrorism and/or military conflicts, which could impact business and economic conditions in the United States and abroad.

All written or oral forward-looking statements attributable to us are expressly qualified in their entirety by this Cautionary Note. Our actual results may differ significantly from those we discuss in these forward-looking statements. For other factors, risks, and uncertainties that could cause our actual results to differ materially from estimates and projections contained in these forward-looking statements, please read the "Risk Factors" in Item 1A of Part I of this Annual Report on Form 10-K. Any forward-looking statement speaks only as of the date which such statement was made, and, except as required by law, we expressly disclaim any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement to reflect events or circumstances after the date on which such statement is made or to reflect the occurrence of unanticipated events.

Table of Contents

PART I

ITEM 1 BUSINESS

General

First Mariner Bancorp ("First Mariner") is a bank holding company whose business is conducted primarily through its wholly owned operating subsidiary, First Mariner Bank (the "Bank"). First Mariner was established in 1995 and has total assets in excess of \$1.0 billion as of December 31, 2013. Our executive offices are located in the Canton area of Baltimore City at 1501 South Clinton Street, Baltimore, Maryland 21224. Our telephone number is (410) 342-2600. We maintain the following Internet sites: www.1stmarinerbank.com; www.1stmarinerbancorp.com; www.1stmarinermortgage.com; and www.vamortgage.com. Information on these websites is not part of, and is not incorporated herein by reference to, this Annual Report on Form 10-K. Our Annual Report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to these reports are available, free of charge, in the investor relations section of our Internet site at www.1stmarinerbancorp.com as soon as reasonably practicable after we have filed them with the Securities and Exchange Commission (the "SEC").

The Bank is currently our only operating subsidiary, with assets exceeding \$1.0 billion as of December 31, 2013, and is the largest bank headquartered in Baltimore, Maryland. The Bank was formed in 1995 through the merger of several small financial institutions. The Bank's primary market area for its core banking operations, which consist of traditional commercial and consumer lending, as well as retail and commercial deposit operations, is central Maryland, as well as portions of Maryland's eastern shore. First Mariner Bank is an independent community bank and its deposits are insured by the Federal Deposit Insurance Corporation ("FDIC").

The Bank is engaged in the general commercial banking business, with particular attention and emphasis on the needs of individuals and small to mid-sized businesses, and delivers a wide range of financial products and services that are offered by many larger competitors. Products and services include traditional deposit products, a variety of consumer and commercial loans, residential and commercial mortgage and construction loans, money transfer services, nondeposit investment products, and mobile and Internet banking and similar services. Most importantly, the Bank provides customers with access to local Bank officers who are empowered to act with flexibility to meet customers' needs in an effort to foster and develop long-term loan and deposit relationships.

First Mariner Mortgage, a division of the Bank, engages in mortgage-banking activities, providing mortgages and associated products to customers and selling most of those mortgages into the secondary market. First Mariner Mortgage has offices in Maryland, Delaware, Virginia, and North Carolina. See Item 7 in Part II of this Annual Report on Form 10-K and Note 21 to the Consolidated Financial Statements for more detailed information on the results of our mortgage-banking operations.

We do not conduct any foreign operations.

We operate in two business segments—commercial and consumer banking and mortgage-banking. Financial information related to our operations in these segments for each of the three years ended December 31, 2013 is provided in Note 21 to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report on Form 10-K.

Recent Developments

On February 7, 2014, the Company entered into a Merger and Acquisition Agreement ("M&A Agreement") with RKJS Bank ("RKJS"), a Maryland chartered trust company. Pursuant to the terms and subject to the conditions set forth in the M&A Agreement, RKJS has agreed to purchase all of the issued and outstanding shares of common stock of the Bank ("Acquired Stock") and certain other assets held in the name of the Company, but used in the business of the Bank (together with Acquired Stock, "Acquired Assets") for a cash purchase price of \$4.775 million ("Purchase Price"). If the Bank's Tier I Capital, calculated in accordance with FDIC regulations, but reduced for the cost of directors' and officers' liability insurance tail coverage, is less than \$29.0 million, the Purchase Price will be reduced on a dollar-for-dollar basis for each dollar that such Tier 1 Capital is less than \$29.0 million. The acquisition of the Acquired Stock will be accomplished by the merger of RKJS with and into the Bank, with the Bank being the surviving entity (the "Merger"). Upon completion of the Merger, RKJS has agreed to recapitalize the Bank with additional capital of between \$85.0 million and \$100.0 million, less the Purchase Price. RKJS will purchase the

Acquired Assets free and clear of all liens, claims, and encumbrances and will assume no liabilities of the Company.

Table of Contents

The M&A Agreement requires that the Company file a voluntary petition for relief under Chapter 11 of the United States ("U.S.") Bankruptcy Code ("Bankruptcy Code") in the U.S. Bankruptcy Court for the District of Maryland ("Bankruptcy Court") (which filing occurred on February 10, 2014 as described below) ("Chapter 11 Proceeding"). The M&A Agreement also contains covenants of the Company and RKJS, including, among others, an agreement by the Company and RKJS to use their commercially reasonable best efforts to obtain the entry of an order of the Bankruptcy Court approving certain auction and sale procedures with respect to the Acquired Assets ("Bidding Procedures Order").

The Merger will be conducted under the provisions of Section 363 of the Bankruptcy Code and will be subject to bidding procedures and the possible receipt of a higher and better bid at auction ("Auction") that will be conducted in accordance with the bidding procedures approved by the Bankruptcy Court ("Bidding Procedures"). The Bidding Procedures provide that RKJS is the "stalking-horse" bidder for the Acquired Assets at the Auction. The M&A Agreement calls for the Company to pay a stalking-horse bidder fee in certain circumstances, including the Bankruptcy Court's approval of the acquisition of the Acquired Assets by another bidder. The amount of the stalking-horse bidder fee is: (i) \$1.0 million, of which \$750,000 would be payable by the Bank and \$250,000 would be payable by the Company; and (ii) an expense reimbursement of all reasonable and documented fees and expenses incurred by RKJS and its investors in connection with the transactions contemplated by the M&A Agreement not to exceed \$1.75 million.

The Company and RKJS have made customary representations, warranties, and covenants in the M&A Agreement. Consummation of the sale of the Acquired Assets is subject to customary closing conditions, including, among other things: (i) the representations and warranties of the parties to the M&A Agreement being true and correct as of the closing; (ii) the Bankruptcy Court entering a final sale order relating to the Acquired Assets; and (iii) RKJS obtaining the requisite regulatory approvals for the purchase of the Acquired Stock.

Chapter 11 Voluntary Bankruptcy Filing

On February 10, 2014, the Company filed the Chapter 11 Proceeding in the Bankruptcy Court. The Company will continue to operate its business, as "debtor-in-possession" under the jurisdiction of the Bankruptcy Court and in accordance with the applicable provisions of the Bankruptcy Code and orders of the Bankruptcy Court. During the bankruptcy proceedings, the Bank's branches will remain open and will continue serving customers as usual. During the pendency of the Chapter 11 Proceeding, the Company's financial results may fluctuate as they reflect asset impairments, asset dispositions, contract terminations and rejections, and claims assessments. As a result, the Company's historical financial performance may not be indicative of its financial performance following the Chapter 11 Proceeding.

In addition, under the priority scheme established by the Bankruptcy Code, unless creditors agree otherwise, post-petition liabilities and pre-petition liabilities must be satisfied in full before shareholders are entitled to receive any distribution or retain any property under a Chapter 11 liquidation plan. The ultimate recovery to creditors and/or shareholders, if any, will not be determined until confirmation of a Chapter 11 liquidation plan. No assurance can be given as to what values, if any, will be ascribed in the Chapter 11 Proceeding to each of these constituencies or what types or amounts of distributions, if any, they would receive. A Chapter 11 liquidation plan will likely result in holders of equity interests in the Company having all such interests cancelled and extinguished. If certain requirements of the Bankruptcy Code are met, a plan can be confirmed notwithstanding its rejection by the Company's equity security holders and notwithstanding the fact that such equity security holders do not receive or retain any property on account of their equity interests under the plan. Accordingly, the Company urges that appropriate caution be exercised with respect to existing and future investments in any of these securities as their value and prospects are highly speculative.

Debtor-In-Possession Financing Facility

Also on February 10, 2014, as part of the Chapter 11 Proceeding, the Company and RKJS entered into a Debtor-in-Possession Credit Agreement ("DIP Credit Agreement"). Pursuant to the terms and subject to the conditions set forth in the DIP Credit Agreement, RKJS agreed to provide a debtor-in-possession financing facility ("DIP

Financing Facility") to the Company in an amount not to exceed \$2.5 million. The DIP Credit Agreement will provide a source of funds to the Company, enabling the Company to satisfy customary obligations associated with the bankruptcy process. The obligations under the DIP Financing Facility are secured by all assets of the Company, including without limitation a pledge of the stock of the Bank, which is the Company's principal operating subsidiary. All amounts outstanding under the DIP Financing Facility will become due and payable on the date that is four months from the first extension of credit under the DIP Financing Facility or, in certain circumstances, an earlier date (e.g., if another bidder is selected to purchase the Acquired Assets).

The Company and RKJS have made customary representations, warranties, and covenants in the DIP Credit Agreement.

Table of Contents

Default on the Junior Subordinated Debentures

The Company's filing of the Chapter 11 Proceeding in the Bankruptcy Court constituted an event of default under the indentures relating to its junior subordinated debt, causing the entire unpaid principal and accrued interest under each of the indentures to become immediately due and payable upon notice to the Company in writing from either the indenture trustee or holders of a specified aggregate principal amount of the junior subordinated debt outstanding under each such debenture. The Company believes that any efforts to enforce such payment obligations with respect to the junior subordinated debt are stayed as a result of the filing of the Chapter 11 Proceeding.

Our Business Strategy

As discussed under "Recent Developments" above, we have entered into the M&A Agreement and the Chapter 11 Proceeding. As a result, our main business strategy has changed from that of focusing on improving earnings, liquidity, capital adequacy, and controlling asset growth to that of successfully concluding the bankruptcy process, selling the Bank, and terminating Company operations.

In the event we are unable to consummate the transactions contemplated by the M&A Agreement, our business strategies would be the following:

- strengthen the capital position of the Company and the Bank;
- reduce our long-term debt;
- aggressively improve the quality of assets currently in our portfolio;
- adhere to rigorous credit standards in the origination of new loans;
- reduce our controllable operating expenses to improve our efficiency ratios;
- work towards obtaining termination of Regulatory Enforcement Actions (see discussions in Item 1A—"Risk Factors" later in Part I of this Annual Report on Form 10-K);
- review our branch performance to evaluate possible consolidations or relocations that may increase our efficiency;
- cross-sell our products and services to our existing customers to leverage relationships and enhance our profitability;
- capitalize on our personal relationship approach that we believe differentiates us from our larger competitors;
- provide our customers with access to local executives who make key credit and other decisions;
- maximize mortgage-banking opportunities;
- pursue commercial lending opportunities with small to mid-sized businesses that are underserved by our larger competitors; and
- develop innovative financial products and services to generate additional sources of revenue.

Financial Services We Provide

Commercial Banking

Our commercial loan unit focuses on loan originations from small and mid-sized businesses (generally up to \$20.0 million in annual sales) and such loans may be accompanied by significant related deposits. Our commercial loan products include commercial mortgage loans for the purchase or refinance of commercial properties; residential and commercial real estate construction and development loans; working capital loans and lines of credit; demand, term, and time loans; and equipment, inventory, and accounts receivable financing. We also offer an array of cash management services and deposit products to our commercial customers, including computerized on-line banking and remote deposit.

Retail Banking

Our retail banking activities emphasize consumer deposit and checking accounts. We offer an extensive range of services to meet the varied needs of our customers of all age demographics. In addition to traditional banking products and services, we offer contemporary products and services, such as debit cards, mutual funds, annuities, insurance products, Internet banking, electronic bill payment, mobile banking, and personal financial management services. Our consumer loan products include

Table of Contents

home equity lines of credit, fixed-rate second mortgages, new and used auto loans, new and used boat loans, overdraft protection, and unsecured personal credit lines.

Mortgage-Banking

Our mortgage-banking business is structured to provide a source of fee income largely from the process of originating residential mortgage loans for sale in the secondary market, as well as the origination of loans to be held in our loan portfolio. Mortgage-banking products include Federal Housing Administration ("FHA") and the Veterans Administration ("VA") loans, conventional and nonconforming first- and second-lien mortgages, and construction and permanent financing.

Our Lending Activities

Loan Portfolio Composition

At December 31, 2013, our loan portfolio totaled \$560.1 million, representing 55% of our total assets of \$1.0 billion. The majority of our lending activity is in the Mid-Atlantic region and our loans are generally secured by residential and commercial real estate. At December 31, 2013, approximately 89% of our total loans were secured by real estate.

Commercial Loans

The Bank originates a variety of loans for business purposes. The majority of our commercial loans are secured. The Bank makes loans to provide working capital to businesses in the form of lines of credit, which may be secured by real estate, accounts receivable, inventory, equipment, or other assets. The financial condition and cash flows of our commercial borrowers are closely monitored by the submission of corporate financial statements, personal financial statements, and income tax returns. The frequency of submissions of required financial information depends on the size and complexity of the credit and the collateral that secures the loan. It is our general policy to obtain personal guarantees from the principals of commercial loan borrowers.

Commercial Mortgage Loans

The Bank originates mortgage loans secured by commercial real estate. These loans are primarily secured by office buildings, retail buildings, warehouses, and general-purpose business space. Although terms may vary, these commercial mortgage loans generally have maturities of 10 years or less. It is our general policy to obtain personal guarantees from the principals of the borrowers and assignments of all leases related to the collateral.

Commercial and Consumer Construction Loans

The Bank provides interim real estate acquisition, development, and construction loans to builders, developers, and persons who will ultimately occupy their single-family dwellings. These loans are made within the Federal regulatory guidelines for maximum loan-to-value ("LTV") ratios. Generally, residential construction loans are made for up to 80% of the appraised value of the property for both individuals and developers. Residential construction loans to developers may be made for over 80% of the appraised value of the property with additional credit enhancements, such as additional collateral. Commercial real estate construction loans are generally made for 75% or less of the appraised value of the property. Development loans, made to improve raw land into lots on which structures may be built, are generally made for 75% or less of the appraised value of the property. The Bank's real estate development and construction loan funds are disbursed periodically at pre-specified stages of completion. We carefully monitor these loans with on-site inspections and control of disbursements. The Bank's real estate development and construction loans are typical debt obligations of the borrowers and do not provide for our participation in residual profits or losses of the projects or involve equity positions through partnerships, joint ventures, or other similar structures.

Loans to individuals for the construction of their primary residences are typically secured by the property under construction, frequently include additional collateral (such as a second mortgage on the borrower's present home), and commonly have maturities of nine to twelve months.

Loans to residential builders for the construction of residential homes require binding sales contracts on the property and pre-qualification of the prospective buyers for permanent mortgage financing. Development loans are made only to developers with a proven track record. Generally, these loans are extended only when the borrower provides evidence that the lots under development will be sold to builders satisfactory to us.

The Bank secures development and construction loans with the properties under development or construction and we typically obtain personal guarantees from the principals. Further, to assure that we do not place reliance solely in the value of the underlying property, we consider the financial condition and reputation of the borrower and any guarantors, the amount of

8

Table of Contents

the borrowers' equity in the project, independent appraisals, costs estimates, and pre-construction sales information. We have significantly limited our development lending activities over the past five years.

Residential Mortgage Loans

The Bank originates adjustable- and fixed-rate residential mortgage loans. These mortgage loans are generally originated under terms, conditions, and documentation acceptable to the secondary mortgage market. The Bank will place some of these loans into our portfolio, although the vast majority are ultimately sold to investors.

Consumer Loans

The Bank offers a variety of consumer loans, typically secured by residential real estate or personal property, including automobiles and boats. Our home equity loans (closed-end and lines of credit) are typically made up to 70% to 80% of the appraised value, less the amount of any existing prior liens on the property and generally have maximum terms of 15 years. The interest rates on our closed-end home equity loans are fixed, while interest rates on our home equity lines of credit are variable.

Community Reinvestment Act ("CRA")

We have a strong commitment to our responsibilities under the federal CRA and actively search for opportunities to meet the development needs of all members of the communities we serve, including persons of low to moderate income in a manner consistent with safe and sound banking practices. We currently fulfill this commitment primarily by participating in loan programs sponsored or guaranteed by the FHA, the VA, the federally funded Neighborhood Stabilization Program, the U.S. Department of Agriculture Rural Development Loans Program, the Federal Home Loan Bank of Atlanta ("FHLB") Closing Cost Assistance Program, the Section 8 to Home-Ownership Program, and the Settlement Expense Loan Program.

See Item 7 of Part II of this Annual Report on Form 10-K for more detailed information concerning our loan portfolio, the individual portfolio segments, and their effect on 2013 operations.

Our Credit Administration Process

Our lending activities are subject to written policies approved by the Bank's Board of Directors to ensure proper management of credit risk. We make loans that are subject to a well-defined credit process that includes credit evaluation of borrowers, risk-rating of credits, establishment of lending limits and application of lending procedures, including the holding of adequate collateral and the maintenance of compensating balances, as well as procedures for on-going identification and management of credit deterioration. We conduct regular portfolio reviews to identify potential underperforming credits, estimate loss exposure, geographic and industry concentrations, and to ascertain compliance with our policies. For significant problem loans, we review and evaluate the financial strengths of our borrower and any guarantor, the related collateral, and the effects of economic conditions.

The loan committee of the Bank's Board of Directors is authorized to approve loans up to the Bank's legal lending limit, which is approximately \$6.6 million as of December 31, 2013. We have established an in-house limit of \$5.0 million, which is reviewed periodically by the Board of Directors, but we do have loans to a limited number of customers with balances in excess of that amount.

We generally do not make loans to be held in our loan portfolio outside our market area unless the borrower has an established relationship with us and conducts its principal business operations within our market area. Consequently, we, and our borrowers, are affected by the economic conditions prevailing in our market area. Approximately 66% of our residential real estate development and construction loan portfolio consisted of loans to Maryland customers, 29% consisted of loans to customers in the surrounding states and the District of Columbia, and the remaining 5% consisted of loans to customers in other states in the country. Approximately 88% of our commercial loan portfolio (commercial, commercial mortgage, and commercial construction) consisted of loans to Maryland customers with an additional 11% consisting of loans to customers in the surrounding states and the District of Columbia. Commercial and commercial real estate loans to customers in other states in the country amounted to approximately 1% of our portfolio.

Market

We consider our core market area to be the communities within the Baltimore/Washington corridor, particularly Baltimore City and the Maryland counties of Baltimore, Anne Arundel, Carroll, Harford, and Howard, as well as the eastern shore of Maryland. Lending activities are broader and include areas outside of our core market area such as other Maryland counties, the District of Columbia, and certain markets in contiguous states, as well as certain regional and national markets.

Table of Contents

Our Competition

Banking

We operate in a highly competitive environment, competing for deposits and loans with commercial banks, thrifts, credit unions, mortgage companies, finance companies, Internet-based financial companies, and other financial entities. Our principal competitors include other community commercial banks and larger financial institutions with branches in our market area. Numerous mergers and consolidations involving financial entities in our market area have required us to compete with banks and finance companies with greater resources. Additionally, certain financial institutions received various amounts of government financial assistance in accordance with legislation passed in late 2008, giving those institutions greater resources with which to compete in our market. See "Supervision and Regulation" later in this Item for further information on government legislation.

The primary factors we face in competing for deposits are interest rates, personalized service, the quality and range of financial services, convenience of office locations, and office hours. Competition for deposits comes primarily from other commercial banks, savings associations, credit unions, money market funds, Internet based banks, and other investment alternatives. The primary factors in competing for loans are interest rates, loan origination fees, the quality and range of lending services, responsiveness, and personalized service. Competition for loans comes primarily from other commercial banks, savings associations, mortgage-banking firms (see discussion on mortgage-banking competition below), credit unions, finance companies, and other financial intermediaries. Many of the financial institutions operating in our market area offer certain services such as trust and international banking, which we do not offer, and have greater financial resources or have substantially higher lending limits.

To compete with other financial services providers, we principally rely upon local promotional activities, personal relationships established by our officers, directors, and employees with our customers, and specialized services tailored to meet our customers' needs. In those instances where we are unable to accommodate a customer's needs, we will arrange for those services to be provided by other financial institutions with which we have a relationship. Current banking laws facilitate interstate branching and merger activity among banks. This may result in an even greater degree of competition in the banking industry and we may be brought into competition with institutions with which we do not currently compete. As a result, intense competition in our market area may be expected to continue for the foreseeable future.

Mortgage-banking

Our mortgage-banking division also operates in an extremely competitive environment where we compete primarily with mortgage-banking divisions of other financial institutions, which may be larger than we are and have greater resources. Additionally, competition in the mortgage-banking industry comes from the continuing evolution of the secondary mortgage market, the proliferation of mortgage products, increasing interest rate volatility, compounded by homeowners' increasing tendency to refinance their mortgages as the refinance process becomes more efficient and cost effective. These swings in mortgage origination volume have placed significant operational and financial pressures on mortgage lenders.

To compete effectively in this environment, we maintain a very high level of operational, technological, and managerial expertise, consistently offer a wide selection of mortgage loans through all marketing channels on a regional scale, provide high-quality service, and price our mortgage loans at competitive rates.

Supervision and Regulation

General

First Mariner and the Bank are extensively regulated under federal and state law. As a registered bank holding company, First Mariner is subject to supervision and examination by and reporting to the Federal Reserve Board ("FRB" or "Federal Reserve").

The Bank is a member of the FHLB System and, with respect to deposit insurance, of the Deposit Insurance Fund ("DIF") managed by the FDIC. The Bank must file reports with the Maryland Commissioner of Financial Regulation ("Commissioner") and the FDIC concerning its activities and financial condition and obtain regulatory approvals prior to entering into certain transactions such as mergers with, or acquisitions of, other banks. The Commissioner and/or

the FDIC conduct periodic examinations to test the Bank's safety and soundness and compliance with various regulatory requirements. This regulation and supervision is intended primarily for the protection of the insurance fund and depositors. The regulatory structure also gives the regulatory authorities extensive discretion in connection with their supervisory and enforcement activities and examination policies, including with respect to the classification of assets and the establishment of adequate loan loss reserves for regulatory

Table of Contents

purposes. Any change in such regulatory requirements and policies, whether by the Commissioner, the FDIC, or other legislative bodies, could have a material adverse impact on First Mariner, the Bank, and their operations.

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2011 (the "Dodd-Frank Act") made extensive changes in the regulation of financial institutions and their holding companies. The Dodd-Frank Act requires various federal agencies to adopt a broad range of new implementing rules and regulations, and to prepare numerous studies and reports for Congress. The federal agencies are given significant discretion in drafting the implementing rules and regulations, and consequently, many of the details and much of the impact of the Dodd-Frank Act may not be known for many years.

Certain provisions of the Dodd-Frank Act are expected to have a near term impact on First Mariner and the Bank. For example, the Dodd-Frank Act created a new Consumer Financial Protection Bureau ("the "Bureau") as an independent bureau of the FRB. The Bureau assumed responsibility for the implementation of the federal financial consumer protection and fair lending laws and regulations and has authority to impose new requirements. However, institutions of less than \$10 billion in assets, such as the Bank, will continue to be examined for compliance with consumer protection and fair lending laws and regulations by, and be subject to the enforcement authority of, their primary regulator, although the Bureau will have back-up authority to examine and enforce consumer protection laws against all institutions, including institutions with less than \$10 billion in assets.

Certain regulatory requirements applicable to First Mariner and the Bank, including some of the changes made by the Dodd-Frank Act, are referred to below or elsewhere in this Annual Report on Form 10-K. The summary of statutory provisions and regulations set forth below or elsewhere does not purport to be a complete description of such statutes and regulations and their effects on First Mariner and the Bank.

Regulation of First Mariner

General

First Mariner, as the sole shareholder of the Bank, is a bank holding company and is registered as such with the FRB. Bank holding companies are subject to comprehensive regulation and examination by the FRB under the Bank Holding Company Act of 1956, as amended (the "BHCA"), and the regulations of the FRB. The FRB also has extensive enforcement authority over bank holding companies, including, among other things, the ability to assess civil money penalties, issue cease and desist or removal orders, and require that a holding company divest subsidiaries. In general, enforcement actions may be initiated for violations of law and regulations and unsafe or unsound practices. First Mariner has entered into a written agreement with the FRB. See Item 1A—"Risk Factors" later in Part I of this Annual Report on Form 10-K for additional information on the agreement with the FRB. See also "Capital Resources" in Item 7 of Part II of this Annual Report on Form 10-K.

Under the BHCA, a bank holding company must obtain Federal Reserve approval before: (i) acquiring, directly or indirectly, ownership or control of any voting shares of another bank or bank holding company if, after such acquisition, it would own or control more than 5% of such shares (unless it already owns or controls the majority of such shares); (ii) acquiring all or substantially all of the assets of another bank or bank holding company; or (iii) merging or consolidating with another bank holding company. In evaluating such applications, the FRB considers a variety of financial, managerial, and competitive factors and the convenience and needs of the communities involved.

The BHCA also prohibits a bank holding company, with certain exceptions, from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any company which is not a bank or bank holding company, or from engaging directly or indirectly in activities other than those of banking, managing, or controlling banks or providing services for its subsidiaries. The principal exceptions to these prohibitions involve certain nonbanking activities which, by statute or by FRB regulation or order, have been identified as activities closely related to the business of banking or managing or controlling banks. The list of activities includes, among others: operating a savings association, mortgage company, finance company, credit card company, or factoring company; performing certain data processing operations; providing certain investment and financial advice; real estate and personal property appraising; providing tax planning and preparation services; and, subject to certain limitations, providing securities

brokerage services for customers.

Dividends

The FRB has issued a policy statement on the payment of cash dividends by bank holding companies that expresses the FRB's view that a bank holding company should pay cash dividends only to the extent that the company's net income for the past year is sufficient to cover both the cash dividends and a rate of earnings retention that is consistent with the company's capital needs, asset quality, and overall financial condition. The FRB has indicated that it would be inappropriate for a company experiencing serious financial problems to borrow funds to pay dividends.

Furthermore, under the prompt corrective action regulations adopted by the Federal Reserve pursuant to the Federal Deposit Insurance Corporation Improvement Act of 1991

Table of Contents

("FDICIA"), the FRB may prohibit a bank holding company from paying any dividends if the holding company's bank subsidiary is classified as "undercapitalized." See "Regulation of the Bank—Prompt Corrective Regulatory Action" later in this section.

Capital Requirements

The Dodd-Frank Act requires the FRB to issue consolidated regulatory capital requirements for bank holding companies that are at least as stringent as those applicable to insured depository institutions. Such regulations, when finalized, will eliminate the use of certain instruments, such as cumulative preferred stock and trust preferred securities, as Tier I holding company capital. However, instruments issued before May 19, 2010 by bank holding companies with less than \$15 billion of consolidated assets are grandfathered. Such grandfathering applies to certain trust preferred securities issued by First Mariner, although at December 31, 2013, none of our trust preferred securities qualified for use in our capital calculations due to certain limitations.

Stock Repurchases

A bank holding company is required to give the FRB prior written notice of any purchase or redemption of its outstanding equity securities if the gross consideration for the purchase or redemption, when combined with the net consideration paid for all such purchases or redemptions during the preceding 12 months, is equal to 10% or more of the company's consolidated net worth. The FRB may disapprove such a purchase or redemption if it determines that the proposal would violate any law, regulation, FRB order, directive, or any condition imposed by, or written agreement with, the FRB. This requirement does not apply to bank holding companies that are "well capitalized," received one of the two highest examination ratings at their last examination, and are not the subject of any unresolved supervisory issues.

Source of Strength

Under FRB policy, a bank holding company is expected to act as a source of financial strength to its subsidiary banks and to make capital injections into a troubled subsidiary bank, and generally the FRB may charge the bank holding company with engaging in unsafe and unsound practices for failure to commit resources to a subsidiary bank when required. A required capital injection may be called for at a time when the holding company does not have the resources to provide it. The Dodd-Frank Act contained provisions codifying the source of strength doctrine and requiring the promulgation of regulations. It is not known when such regulations will be finalized.

In addition, depository institutions insured by the FDIC can be held liable for any losses incurred by, or reasonably anticipated to be incurred by, the FDIC in connection with the default of, or assistance provided to, a commonly controlled FDIC-insured depository institution. Accordingly, in the event that any insured subsidiary of First Mariner causes a loss to the FDIC, other insured subsidiaries could be required to compensate the FDIC by reimbursing it for the estimated amount of such loss. Such cross-guaranty liabilities generally are superior in priority to the obligations of the depository institution to its stockholders due solely to their status as stockholders and obligations to other affiliates. At December 31, 2013, the Bank was the only subsidiary depository institution of First Mariner.

Acquisitions of Bank Holding Companies and Banks

Under the BHCA, any company must obtain approval of the FRB prior to acquiring control of First Mariner or the Bank. For purposes of the BHCA, control is defined as ownership of more than 25% of any class of voting securities of First Mariner or the Bank, the ability to control the election of a majority of the directors, or the exercise of a controlling influence over management or policies of First Mariner or the Bank. Any bank holding company must secure FRB approval prior to acquiring 5% or more of the stock of First Mariner or the Bank.

The Change in Bank Control Act and the related regulations of the FRB require any person or persons acting in concert (except for companies required to make application under the BHCA), to file a written notice with, and review the nonobjection of, the FRB before such person or persons may acquire direct or indirect control of First Mariner. The Change in Bank Control Act implementing regulations presume control as the power, directly or indirectly, to vote 10% or more of any voting securities or to direct the management or policies of a bank holding company, such as First Mariner, that has securities registered under the Securities Exchange Act of 1934 (the "Exchange Act").

Maryland Bank Holding Company Regulation

Under Maryland law, acquisitions of 25% or more of the voting stock of a Maryland commercial bank or a Maryland bank holding company and other acquisitions of voting stock of such entities which affect the power to direct or to cause the direction of the management or policy of a commercial bank or a bank holding company must be approved in advance by the Commissioner. Any voting stock acquired without the approval required under the statute may not be voted for a period of five

12

Table of Contents

years. Certain acquisitions by bank holding companies of 5% or more of the stock of Maryland banks or Maryland bank holding companies are governed by Maryland's holding company statute and also require prior approval of the Commissioner. Also, a bank holding company and its Maryland chartered bank subsidiary, must generally obtain the prior approval of the Commissioner prior to, directly or indirectly, acquiring nonbanking subsidiaries or affiliates.

Regulation of the Bank

The Bank is a Maryland chartered trust company, with all the powers of a commercial bank, regulated and examined by the Commissioner and the FDIC.

Business Activities

Maryland law and the Commissioner regulate the Bank's internal organization as well as deposit, lending, and investment activities. In its lending activities, the maximum legal rate of interest, fees, and charges that may be charged on a particular loan depends on a variety of factors such as the type of borrower, the purpose of the loan, the amount of the loan, and the date the loan is made. Other laws tie the maximum amount that may be loaned to any one customer and related interests to a financial institution's capital levels. Additionally, Maryland law contains a parity statute by which Maryland institutions may, with the approval of the Commissioner, engage in any additional activity, service, or other practice that is permitted for national banks.

The FDIC also regulates many of the areas regulated by the Commissioner and federal law may limit some of the authority provided by Maryland law. Approval of the Commissioner and the FDIC is required for, among other things, business combinations and the establishment of branch offices.

Branching Activities

Any Maryland-chartered bank meeting certain requirements may, with the approval of the Commissioner and the FDIC, establish and operate branches anywhere in the state.

Interstate Branching

Federal law authorizes the responsible federal banking agencies to approve merger transactions between banks located in different states unless the state in which the target is located has opted out. Accordingly, a Maryland bank may acquire branches in a state other than Maryland unless the other state has enacted legislation opting out. Federal law also authorizes de novo branching into another state. The Dodd-Frank Act removed a requirement that host states enact a law expressly permitting out-of-state banks to establish such branches within its borders.

Activities and Investments

Since the enactment of FDICIA, all state-chartered FDIC insured banks have generally been limited to activities as principal to those authorized for national banks, notwithstanding any broader authority that may exist in state law. Additionally, FDICIA limits equity investments by state banks to the types and amounts permitted for national banks, subject to certain exceptions. For example, the FDIC is authorized to permit banks to engage in state-authorized activities or investments that are impermissible for national banks (other than nonsubsidiary equity investments) if the bank meets all applicable capital requirements and it is determined that the activities or investments do not pose a significant risk to the DIF.

Capital Requirements

The Bank is subject to the FDIC's regulatory capital requirements. The capital regulations currently require state banks to meet two minimum capital standards: a 4% Tier I (or "core") capital to adjusted average quarterly assets ("leverage") ratio (3% for institutions receiving the highest rating on the depository institution examination rating system) and an 8% total risk-based capital ratio.

Tier I capital is generally defined as common stockholders' equity (including retained earnings), certain noncumulative perpetual preferred stock, and related surplus and minority interests in equity accounts of consolidated subsidiaries, less certain deferred tax assets and intangibles other than certain mortgage-servicing rights ("MSRs") and credit card relationships.

The risk-based capital standard requires the maintenance of Tier I and total capital (which is defined as Tier I capital plus Tier II (or "supplementary") capital) to risk-weighted assets of at least 4% and 8%, respectively. In determining risk-weighted assets, all assets, including certain off-balance sheet items, recourse obligations, residual interests, and

direct credit substitutes, are multiplied by risk weightings of 0% to 200%, which are assigned by the FDIC capital regulation based on the risks believed inherent in the type of asset. The components of Tier II capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance

Table of Contents

for loan and lease losses (the "allowance") up to a maximum of 1.25% of risk-weighted assets, and up to 45% of unrealized gains on available-for-sale ("AFS") equity securities with readily determinable fair market values. Overall, the amount of Tier II capital included as total capital cannot exceed 100% of Tier I capital.

The FDIC also has authority to establish individual minimum capital requirements in appropriate cases upon a determination that an institution's capital level is or may become inadequate in light of the particular circumstances. The FDIC has done so in the case of the Bank. See Item 1A—"Risk Factors" later in Part I of this Annual Report on Form 10-K for additional information on the Bank's agreements with its various regulators. See also "Capital Resources" in Item 7 of Part II of this Annual Report on Form 10-K.

New Capital Rules

In July 2013, the FRB and the FDIC, approved final rules ("New Capital Rules") establishing a new comprehensive capital framework for U.S. banking organizations. The New Capital Rules generally implement the Basel Committee on Banking Supervision's ("Basel Committee") December 2010 final capital framework referred to as "Basel III" for strengthening international capital standards. The New Capital Rules substantially revise the risk-based capital requirements applicable to bank holding companies and their depository institution subsidiaries, including us and the Bank, as compared to the current U.S. general risk-based capital rules. The New Capital Rules revise the definitions and the components of regulatory capital, as well as address other issues affecting the numerator in banking institutions' regulatory capital ratios. The New Capital Rules also address asset risk weights and other matters affecting the denominator in banking institutions' regulatory capital ratios and replace the existing general risk-weighting approach, which was derived from the Basel Committee's 1988 "Basel I" capital accords, with a more risk-sensitive approach based, in part, on the "standardized approach" in the Basel Committee's 2004 "Basel II" capital accords. In addition, the New Capital Rules implement certain provisions of the Dodd-Frank Act, including the requirements of Section 939A to remove references to credit ratings from the federal agencies' rules. The New Capital Rules are effective for the Company and the Bank on January 1, 2015, subject to phase-in periods for certain of their components and other provisions.

Prompt Corrective Regulatory Action

Federal law requires the appropriate federal regulatory agency to take certain supervisory actions against undercapitalized institutions, the severity of which depends upon the institution's degree of undercapitalization. Generally, a bank that has a ratio of total capital to risk-weighted assets of less than 8%, a ratio of Tier I capital to risk-weighted assets of less than 4%, or a leverage ratio of less than 4% (3% or less for institutions with the highest examination rating) is considered to be "undercapitalized." A bank that has a total risk-based capital ratio of less than 6%, a Tier I capital ratio of less than 3%, or a leverage ratio that is less than 3% is considered to be "significantly undercapitalized" and a bank that has a tangible capital to assets ratio equal to or less than 2% is deemed to be "critically undercapitalized." Subject to a narrow exception, a receiver or conservator must be appointed within specified time frames for an institution that is "critically undercapitalized." The law also provides that an acceptable restoration plan must be filed within 45 days of the date a bank receives notice that it is "undercapitalized," "significantly undercapitalized," or "critically undercapitalized." Compliance with the plan must be guaranteed by any parent company up to the lesser of 5% of the Bank's total assets when deemed to be undercapitalized or the amount necessary to achieve compliance with all applicable capital requirements. In addition, certain mandatory supervisory actions become applicable to any undercapitalized institution including, but not limited to, increased monitoring by regulators and restrictions on growth, capital distributions (including dividends), and expansion. The FDIC can also take additional discretionary supervisory actions, including the issuance of a capital directive, requiring the sale of the institution, and the replacement of senior executive officers and directors. See Item 1A—"Risk Factors" later in Part I and "Capital Resources" in Item 7 of Part II of this Annual Report on Form 10-K for additional information on the Bank's agreements with its various regulators and our capital resources and noncompliance with directed capital requirements.

Safety and Soundness Guidelines

Federal law requires each federal banking agency to establish safety and soundness standards for institutions under its authority. The federal banking agencies, including the FDIC, have released Interagency Guidelines Establishing Standards for Safety and Soundness. The guidelines specify basic standards for matters such as internal controls and information systems, internal audit systems, loan documentation, credit underwriting, interest rate risk exposure and asset growth, asset quality, earnings, and employee compensation. If the appropriate federal banking agency determines that a depository institution is not in compliance with the safety and soundness guidelines, it may require the institution to submit an acceptable plan to achieve compliance with the guidelines. The institution must submit an acceptable compliance plan within 30 days of receipt of a request for such a plan. Failure to submit or implement a compliance plan may result in regulatory sanctions.

Table of Contents

Uniform Lending Standards

Under FDIC's regulations, state banks must adopt and maintain written policies that establish appropriate limits and standards for loans that are secured by interests in real estate or are made for the purpose of financing permanent improvements to real estate. The policies must establish loan portfolio diversification standards, prudent underwriting standards, including LTV limits that are clear and measurable, loan administration procedures and documentation, and loan approval and reporting requirements. Such real estate lending policies must reflect the Interagency Guidelines for Real Estate Lending Policies that have been adopted by the federal banking agencies.

Transactions with Related Parties

Transactions between a bank and any affiliate are governed by Sections 23A and 23B of the Federal Reserve Act. An affiliate is any company or entity, which controls, is controlled by or is under common control with the bank. For example, First Mariner is an affiliate of the Bank's for purposes of those laws. Generally, Sections 23A and 23B: (i) limit the extent to which an institution or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10% of such institution's capital stock and surplus, and contain an aggregate limit on all such transactions with all affiliates to an amount equal to 20% of such capital stock and surplus; (ii) impose collateral requirements on certain transactions with, including loans to, affiliates; and (iii) require that all such transactions be on terms substantially the same, or at least as favorable, to the institution or subsidiary as those provided to a nonaffiliate. The term "covered transaction" includes loans to, purchases of assets from, and the issuance of guarantees on behalf of an affiliate and certain other transactions.

Banks also are subject to the federal restrictions on loans to executive officers, directors, and greater than 10% stockholders (collectively, "insiders"). Generally, loans to insiders and certain related interests must be approved in advance by a majority of the board of directors of the institution, with any "interested" director not participating in the voting, if the loan exceeds the greater of \$25,000 or 5% of the bank's capital. Any loan which, combined with prior loans to the insider and their related interest, aggregates \$500,000 or more are subject to the board's approval requirements in all cases. Loans to insiders must be made on terms substantially the same as offered in comparable transactions to outside parties. There is an exception for extensions of credit made to officers and directors as part of a bank-wide compensation or benefit program that does not favor directors or officers over other employees. There are further restrictions on loans that can be made to executive officers.

Additionally, Maryland law imposes restrictions on loans to directors, officers, or employees of Maryland commercial banks. Generally, a director, officer, or employee of a commercial bank may not borrow, directly or indirectly, any money from the bank, unless the loan has been approved by the board of directors, or the executive committee of the bank, if that committee is authorized to approve loans. Commercial loans made to nonemployee directors of a bank and certain consumer loans made to nonofficer and nondirector employees of a bank are exempted.

Dividend Restrictions

A Maryland bank's ability to pay dividends is governed by Maryland law and the regulations of the FDIC. Under Maryland law, if the surplus of a commercial bank is less than 100% of its capital stock then, until the surplus equals at least 100% of the capital stock, the commercial bank: (i) must transfer to its surplus annually at least 10% of its net earnings and (ii) may not declare or pay any cash dividends that exceed 90% of its net earnings. Maryland law provides for dividends only out of undivided profits or, with the approval of the Commissioner, surplus in excess of 100% of required capital stock. Also, under FDIC regulations, no bank may pay a dividend if it would be "undercapitalized" within the meaning of the prompt corrective action laws, or if it is in default of any deposit insurance assessment. See also Item 1A—"Risk Factors—Our ability to pay cash dividends is limited" later in Part I of this Annual Report on Form 10-K.

Enforcement

The Commissioner has extensive enforcement authority over Maryland banks. Such authority includes the ability to issue cease and desist orders and civil money penalties and to remove directors or officers. The Commissioner may also take possession of a Maryland bank whose capital is impaired and seek to have a receiver appointed by a court.

The FDIC has primary federal enforcement responsibility over state banks under its jurisdiction, including the authority to bring enforcement action against all "institution-related parties," including stockholders and any attorneys, appraisers, and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an institution. Formal enforcement action may range from the issuance of a capital directive or cease and desist order to removal of officers and/or directors, receivership, conservatorship, or termination of deposit insurance. Civil money penalties cover a wide range of violations and actions and range up to \$25,000 per day or even up to \$1 million per day (in the most egregious cases). Criminal penalties for most financial institution crimes include fines of up to \$1 million and imprisonment for up to 30 years.

Table of Contents

The Bank has entered into a Consent Order with the FDIC and the Commissioner. See Item 1A—"Risk Factors" later in Part I and "Capital Resources" in Item 7 of Part II of this Annual Report on Form 10-K.

Community Reinvestment Act

Under the CRA, as implemented by FDIC regulations, a bank has a continuing and affirmative obligation, consistent with its safe and sound operation, to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions, nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community. The CRA requires the FDIC, in connection with its examination of a bank, to assess the institution's record of meeting the credit needs of its community and to take the record into account in its evaluation of certain applications by the institution.

Assessments

Maryland banks are required to pay annual assessments to the Commissioner's office to cover the cost of regulating Maryland institutions. The Bank's asset size determines the amount of the assessment.

Insurance of Deposit Accounts

The Bank's deposits are insured up to applicable limits by the DIF of the FDIC. Under the FDIC's risk-based assessment system, insured institutions are assigned to one of four risk categories based on supervisory evaluations, regulatory capital levels, and certain other factors, with less risky institutions paying lower assessments. An institution's assessment rate depends upon the category to which it is assigned. The Dodd-Frank Act required the FDIC to amend its procedures to base assessments on total assets less tangible equity rather than deposits and on February 7, 2011, the FDIC issued final rules, effective April 1, 2011, implementing resultant changes to the assessment rules. Initially, the base assessment rates range from 2.5 to 45 basis points. The rate schedules will automatically adjust in the future when the DIF reaches certain milestones. No institution may pay a dividend if in default of the federal deposit insurance assessment.

In order to cover losses to the DIF, the FDIC imposed on all insured institutions a special emergency assessment of five basis points of total assets minus Tier I capital, as of June 30, 2009 (capped at ten basis points of an institution's deposit assessment base). That special assessment was collected on September 30, 2009. In lieu of further special assessments, the FDIC required insured institutions to prepay estimated quarterly risk-based assessments for the fourth quarter of 2009 through the fourth quarter of 2012. The Bank received an automatic waiver of the prepayment requirement. These estimated assessments include an assumed annual assessment base increase of 5%.

Due to the recent difficult economic conditions, deposit insurance per account owner was raised to \$250,000 for all types of accounts. That coverage was made permanent by the Dodd-Frank Act. In addition, the FDIC adopted an optional Temporary Liquidity Guarantee Program by which, for a fee, noninterest bearing transaction accounts would receive unlimited insurance coverage until June 30, 2010, subsequently extended to December 31, 2010 and then to December 31, 2012 by the Dodd-Frank Act, and certain senior unsecured debt issued by institutions and their holding companies between October 13, 2008 and December 31, 2010 would be guaranteed by the FDIC through June 30, 2012, or in some cases, December 31, 2012. The Bank participated in the unlimited noninterest bearing transaction account coverage. The Bank and First Mariner opted to participate in the unsecured debt guarantee program.

In addition to the assessment for deposit insurance, institutions are required to make payments on bonds issued in the late 1980s by the Financing Corporation to recapitalize a predecessor deposit insurance fund.

The Dodd-Frank Act increased the minimum target DIF ratio from 1.15% of estimated insured deposits to 1.35% of estimated insured deposits. The FDIC must seek to achieve the 1.35% ratio by September 30, 2020. Insured institutions with assets of \$10 billion or more are supposed to fund the increase. The Dodd-Frank Act eliminated the 1.5% maximum fund ratio, instead leaving it to the discretion of the FDIC.

The FDIC has authority to increase insurance assessments. A significant increase in insurance premiums would likely have an adverse effect on the operating expenses and results of operations of the Company. Management cannot predict what insurance assessment rates will be in the future.

Insurance of deposits may be terminated by the FDIC upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC.

Table of Contents

Federal Reserve System

Federal Reserve regulations require depository institutions to maintain reserves against their transaction accounts (primarily NOW and regular checking accounts). The regulations currently provide that reserves be maintained against aggregate transaction accounts as follows: a 3% reserve ratio is assessed on net transaction accounts up to and including \$79.5 million; a 10% reserve ratio is applied above \$79.5 million. The first \$12.4 million of otherwise reservable balances are exempted from the reserve requirements. These amounts are adjusted annually. The Bank is in compliance with the foregoing requirements.

Mortgage Banking and Related Consumer Protection Regulations

The retail activities of banks, including our mortgage-banking operation, are subject to a variety of statutes and regulations designed to protect consumers. Interest and other charges collected or contracted for by banks are subject to state usury laws and federal laws concerning interest rates. Loan operations are also subject to federal laws applicable to credit transactions, such as:

- the federal Truth-In-Lending Act and Regulation Z administered by the Bureau, governing disclosures of credit terms to consumer borrowers;
- the Home Mortgage Disclosure Act and Regulation C administered by the Bureau, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;
- the Equal Credit Opportunity Act and Regulation B administered by the Bureau, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;
- the Fair Credit Reporting Act and Regulation V administered by the Bureau, governing the use and provision of information to consumer reporting agencies;
- the Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies; and
- the guidance of the various federal agencies charged with the responsibility of implementing such federal laws.

Deposit operations also are subject to:

- the Truth in Savings Act and Regulation DD issued by the FRB, which requires disclosure of deposit terms to consumers;
- Regulation CC issued by the FRB, which relates to the availability of deposit funds to consumers;
- the Right to Financial Privacy Act, which imposes a duty to maintain the confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records; and
- the Electronic Funds Transfer Act and Regulation E issued by the FRB, which governs automatic deposits to and withdrawals from deposit accounts and customers' rights and liabilities arising from the use of automated teller machines and other electronic banking services.

In addition, the Bank and its subsidiaries may also be subject to certain state laws and regulations designed to protect consumers.

Many of the foregoing laws and regulations are subject to change resulting from the provisions in the Dodd-Frank Act, which in many cases calls for revisions to implementing regulations. In addition, oversight responsibilities of these and other consumer protection laws and regulations will, to a certain extent, be subject to the oversight of not only the Bank's primary regulators, but also the Bureau. We cannot predict the effect of an additional regulatory authority focused on consumer financial protection, or any new implementing regulations or revisions to existing regulations that may result from the establishment of this new authority, will have on our businesses.

Federal Securities Laws

The shares of First Mariner common stock are registered with the SEC under Section 12(g) of the Exchange Act, as amended, and listed on the Over-The-Counter Bulletin Board ("OTCBB"). First Mariner is subject to information reporting requirements, proxy solicitation requirements, insider trading restrictions, and other requirements of the Exchange Act,

Table of Contents

including the requirements imposed under the federal Sarbanes-Oxley Act of 2002. Among other things, loans to and other transactions with insiders are subject to restrictions and heightened disclosure, directors and certain committees of the Board must satisfy certain independence requirements, and First Mariner is generally required to comply with certain corporate governance requirements.

Economic Monetary Policies and Economic Controls

We are affected by monetary policies of regulatory agencies, including the FRB, which regulates the national money supply in order to mitigate recessionary and inflationary pressures. Among the techniques available to the FRB are: engaging in open market transactions in U.S. Government securities; changing the discount rate on bank borrowings; changing reserve requirements against bank deposits; prohibiting the payment of interest on demand deposits; and imposing conditions on time and savings deposits. These techniques are used in varying combinations to influence the overall growth of bank loans, investments, and deposits. Their use may also affect interest rates charged on loans or paid on deposits. The effect of governmental policies on our earnings cannot be predicted. However, our earnings will be impacted by movement in interest rates, as discussed in Item 7A of Part II of this Annual Report on Form 10-K.

ITEM 1A RISK FACTORS

The Chapter 11 Proceeding creates uncertainty as to the disposition of the Company's assets and liabilities and is expected to result in the holders of equity interests in the Company having all such interests cancelled and extinguished.

On February 10, 2014, the Company filed a voluntary petition under Chapter 11 of the Bankruptcy Code in the Bankruptcy Court. As a result of this filing, there is uncertainty regarding the disposition of the Company's assets and liabilities. The holders of equity interests in the Company are not expected to receive or retain any property interest on account of their interests and all such interests are expected to be cancelled and extinguished.

The total principal and accrued interest owed by our holding company under the indentures governing our trust preferred securities (the "Trusts") was approximately \$60.6 million as of February 27, 2014. Pursuant to the M&A Agreement, we agreed to sell our interest in the Bank to RKJS for \$4.775 million, which amount is subject to possible downward, but not upward, adjustment. Pursuant to auction procedures approved by the Bankruptcy Court, other interested parties have an opportunity to submit bids to acquire the Bank. The proceeds from the sale of the Bank, together with other assets held at our holding company, will be available for the payment of bankruptcy expenses and distribution to our creditors, primarily the holders of our trust preferred securities. Thereafter, remaining proceeds, if any, would be available for distribution to holders of our common stock. If we consummate the sale of the Bank to RKJS, or if no other bidder is willing to offer a sufficiently high bid so as to enable us to pay our expenses and our creditors in full, we anticipate that our common stock will have no value.

The Company's operations are subject to the risks and uncertainties associated with the Chapter 11 Proceeding. For the duration of the Chapter 11 Proceeding, the Company's operations will be subject to the risks and uncertainties associated with bankruptcy. These risks include, among other things:

- the uncertainty regarding the eventual outcome of the Company's plan to sell the common stock of the Bank ("Sale"), which includes but is not limited to uncertainties related to the parties' ability to obtain regulatory approval of the Sale, the satisfaction of certain required conditions, and the effect of other adverse factors (whether such factors are known or unknown);
- the Company's ability to continue as a going concern;
- actions and decisions of the Company's creditors and other third parties who have interests in the Company's Chapter 11 Proceeding may be inconsistent with our plans;
- the Company's ability to develop, prosecute, confirm, and consummate a Chapter 11 liquidation plan with respect to the Chapter 11 Proceeding;
- the Company's ability to obtain Bankruptcy Court approval with respect to motions in the Chapter 11 Proceeding from time to time;
-

the Company's ability to retain and motivate management and other key employees through the bankruptcy process or to attract new employees;
the Company's ability to obtain and maintain normal terms with vendors and service providers;

18

Table of Contents

the Company's ability to maintain contracts that are critical to its operations;
the risks associated with transactions outside the ordinary course of business being subject to prior approval of the Bankruptcy Court; and
the risks associated with third parties seeking and obtaining court approval to terminate or shorten the exclusivity period for the Company to propose and confirm a Chapter 11 liquidation plan, to appoint a Chapter 11 trustee, or to convert the Chapter 11 bankruptcy to a chapter 7 proceeding.

These risks and uncertainties could affect the Company's business and operations in various ways. For example, negative events or publicity associated with the Chapter 11 Proceeding could adversely affect the Bank and its relationships with customers, as well as with vendors and employees, which in turn could adversely affect the Company's operations and financial condition, particularly if the Chapter 11 Proceeding is protracted. Also, transactions outside the ordinary course of business are subject to the prior approval of the Bankruptcy Court, which may limit the Company's ability to respond timely to certain events or take advantage of certain opportunities. Under the priority scheme established by the Bankruptcy Code, unless creditors agree otherwise in accordance with the Bankruptcy Code, pre-petition liabilities and post-petition liabilities must be satisfied in full before stockholders are entitled to receive any distribution or retain any property under a Chapter 11 liquidation plan. The ultimate recovery to creditors and/or stockholders, if any, will not be determined until confirmation of a plan. No assurance can be given as to what values, if any, will be ascribed in the Chapter 11 Proceeding to each of these constituencies or what types or amounts of distributions, if any, they would receive. If certain requirements of the Bankruptcy Code are met, a plan can be confirmed notwithstanding its rejection by equity holders and notwithstanding the fact that equity holders do not receive or retain any property on account of their equity interests under the plan. Accordingly, the Company urges that appropriate caution be exercised with respect to existing and future investments in any of these securities as their value and prospects are highly speculative.

During the pendency of the Company's Chapter 11 Proceeding, its financial results may be unstable and may not reflect historical trends.

During the pendency of the Chapter 11 Proceeding, the Company's financial results may fluctuate as they reflect asset impairments, asset dispositions, contract terminations and rejections, and claims assessments. As a result, the Company's historical financial performance may not be indicative of its financial performance following the Chapter 11 Proceeding.

The Company intends to sell the Bank in the Chapter 11 Proceeding. If the Company is successful in selling the Bank, it will have no operating assets. The Company does not expect to continue as a going concern.

The Company has agreed to sell to RKJS all of the shares of common stock of the Bank and other assets and contracts of the Company for \$4.775 million. The sale of the Acquired Assets will leave the Company with no established source of future revenue.

The sale of the Acquired Assets is subject to a bidding process that may be joined by parties not yet known to us. The bidding process may result in a purchase price that differs from that which was submitted to the Bankruptcy Court. The Company considers the value of its common stock to be highly speculative and strongly cautions its equity holders that its stock likely has no value. Accordingly, the Company urges that appropriate caution be exercised with respect to existing and future investments in its common stock or other equity securities.

If the Company is successful in selling the Acquired Assets, it will have no operating activities remaining and no source of income. The risk factors which follow are principally based on the risks inherent in operating and financing the Company's business in a manner which includes its current operations. The presentation of these risk factors is not meant to suggest that the Company expects to own and operate any of its current, or any other, operating business in the future.

We are subject to restrictions and conditions of a Cease and Desist Order issued by the FDIC and the Commissioner ("September Order"), and agreements with the FRB ("FRB Agreement" and "New FRB Agreement") (collectively, the "FRB Agreements") and have incurred and expect to continue to incur significant additional regulatory compliance expense in connection with these enforcement actions.

The FDIC and the Commissioner have issued Cease and Desist Orders against the Bank and the Company. The Bank and the Company have also entered into the FRB Agreements. The September Order contains a number of significant directives, including higher capital requirements, requirements to reduce the level of our classified assets, operating restrictions, and restrictions on dividend payments by the Bank. These restrictions may impede our ability to operate our business. If we continue to fail to comply with the terms and conditions of the September Order or the FRB Agreements, the appropriate

Table of Contents

regulatory authority could take additional enforcement action against us, including the imposition of further operating restrictions, monetary penalties, or possibly place the Bank in receivership. We could also be directed to seek a merger partner (notwithstanding the aforementioned M&A Agreement). We have incurred and expect to continue to incur significant additional regulatory compliance expense in connection with the enforcement actions and we will incur ongoing expenses attributable to compliance with the terms of the enforcement actions. Although we do not expect it, it is possible regulatory compliance expenses related to the enforcement actions could have a material adverse impact on us in the future. In addition, our ability to independently make certain changes to our business is restricted by the terms of the September Order and the FRB Agreements, which could negatively impact the scope and flexibility of our business activities. While we believe that we will be able to take actions that will result in the September Order and the FRB Agreements being terminated in the future, we cannot guarantee that such actions will result in the termination of the September Order and/or the FRB Agreements. Further, the imposition of the September Order and the FRB Agreements may make it more difficult to attract and retain qualified employees. Specifically, the significant terms of the September Order are as follows:

- increase capitalization;
- improve earnings;
- reduce nonperforming loans;
- strengthen management policies and practices; and
- reduce reliance on noncore funding.

The significant terms of the FRB Agreements are as follows:

develop and implement a strategic business plan that includes (a) actions that will be taken to improve operating performance and reduce the level of parent company leverage, (b) a comprehensive budget and an expanded budget review process, (c) a description of the operating assumptions that form the basis for major projected income and expense components and provisions needed to maintain an adequate loan loss reserve, and (d) a capital plan incorporating all capital needs, risks, and regulatory guidelines;

• submit plans to improve enterprise-wide risk management and effectiveness of internal audit programs;

prohibits First Mariner and the Bank from taking any of the following actions without the FRB's prior written approval: (i) declaring or paying any dividends; (ii) taking dividends from the Bank; (iii) making any distributions of interest, principal, or other sums on First Mariner's subordinated debentures or trust preferred securities;

(iv) incurring, increasing, or guaranteeing any debt; or (v) repurchasing or redeeming any shares of its stock; and

• adopt a plan to achieve and maintain a leverage capital ratio and a Tier I capital to risk-weighted assets ratio of at least 4.0% and a total risk-based capital ratio of at least 8%.

We have adopted all plans required by the FRB Agreements and have not taken any of the prohibited actions.

However, we continue not to meet the required capital ratios. As mentioned previously, we have entered into the M&A Agreement with the goal of recapitalization of the Bank. See more detailed information under "Recent Developments" in Item 1 above.

As of December 31, 2013, the Bank's and the Company's capital levels were not sufficient to achieve compliance with the higher capital requirements we were to have met by June 30, 2010. The failure to meet and maintain these capital requirements could result in further action by our regulators.

In the September Order, the FDIC and the Commissioner directed the Bank to raise its leverage and total risk-based capital ratios to 6.5% and 10%, respectively, by March 31, 2010 and to 7.5% and 11%, respectively, by June 30, 2010. We did not meet these requirements. We have been in regular communication with the staffs of the FDIC and the Commissioner regarding efforts to satisfy the higher capital requirements.

First Mariner currently does not have any material amounts of capital available to invest in the Bank and any further increases to our allowance for loan losses and operating losses would negatively impact our capital levels and make it more difficult to achieve the capital levels directed by the FDIC and the Commissioner.

Because we have not met all of the capital requirements set forth in the September Order within the prescribed timeframes, the FDIC and the Commissioner could take additional enforcement action against us, including the

imposition of monetary penalties, as well as further operating restrictions. The FDIC or the Commissioner could direct us to seek a merger partner (notwithstanding the aforementioned M&A Agreement) or possibly place the Bank in receivership.

20

Table of Contents

Additionally, in accordance with the requirements of the FRB Agreements, the Company submitted a written plan to maintain sufficient capital at the holding company level, such that First Mariner satisfies the FRB's minimum capital requirements. To satisfy these requirements, First Mariner's consolidated Tier I capital to average quarterly assets, Tier I capital to risk-weighted assets, and total capital to risk-weighted assets ratios must be at least 4.0%, 4.0%, and 8.0%, respectively. At December 31, 2013, those capital ratios were (2.4)%, (4.0)%, and (4.0)%, respectively, which were not in compliance with the minimum requirements. As further described above, the failure to meet all of the capital ratios could subject us to additional enforcement actions.

The Bank currently is classified as "undercapitalized" under prompt corrective action regulations. If a state bank is classified as "undercapitalized," "significantly undercapitalized," or "critically undercapitalized," the FDIC would be required to take one or more prompt corrective actions. These actions would include, among other things, requiring sales of new securities to bolster capital, improvements in management, limits on interest rates paid, prohibitions on transactions with affiliates, termination of certain risky activities, and restrictions on compensation paid to executive officers. If a bank is classified as "critically undercapitalized," FDICIA requires the bank to be placed into conservatorship or receivership within 90 days, unless the FDIC determines that other action would better achieve the purposes of FDICIA regarding prompt corrective action with respect to undercapitalized banks.

As mentioned previously, we have entered into the M&A Agreement with the goal of recapitalization of the Bank. See more detailed information under "Recent Developments" in Item 1 above.

There is doubt about our ability to continue as a going concern.

As discussed above, the Bank is subject to the September Order and the FRB Agreements, both of which require the Bank and the Company, respectively, to increase leverage and total risk-based capital ratios and, at December 31, 2013, the Company was below the required levels. Failure to increase the Company's capital ratios or further declines in the capital ratios expose the Company and the Bank to additional restrictions and regulatory actions, including potential receivership of the Bank. This uncertainty as to the Company's ability to meet existing or future regulatory requirements raises substantial doubt about our ability to continue as a going concern. Unless the Company is able to raise sufficient levels of capital in the near future, we may be unable to meet the capital ratio requirements. The Company's audited financial statements were prepared under the assumption that we will continue our operations on a going concern basis, which contemplates the realization of assets and the discharge of liabilities in the normal course of business. The Company's financial statements do not include any adjustments that might be necessary if the Company is unable to continue as a going concern. If the Company cannot continue as a going concern, our shareholders will lose some or all of their investment in the Company. In addition, the Bank's customers, employees, vendors, correspondent institutions, and others with whom the Bank does business may react negatively to the doubt about our ability to continue as a going concern. This negative reaction may lead to heightened concerns regarding the Bank's financial condition that could result in a significant loss in deposits and customer relationships, key employees, vendor relationships and our ability to do business with correspondent institutions upon which we rely.

As mentioned previously, we have entered into the M&A Agreement with the goal of recapitalization of the Bank, pending the Chapter 11 Proceeding. There can be no assurance that the Chapter 11 Proceeding will result in the sale of the Bank. Additionally, if the sale of the Bank does occur, the Company will no longer be a viable entity.

See more detailed information under "Recent Developments" in Item 1 above.

We have taken actions, and may take additional actions, to help us meet immediate needs for capital, including reducing our assets and liabilities. The disposition of our assets and liabilities could hurt our long-term profitability. On December 14, 2009, First Mariner consummated the sale of its equity interests in Mariner Finance, LLC ("Mariner Finance") to MF Raven Holdings, Inc. for a purchase price of approximately \$10.5 million. We retained a 5% ownership stake in the new Mariner Finance entity. We recorded a loss on the sale of \$11.1 million during 2009. We sold our remaining minority interest in Mariner Finance for \$4.0 million in 2013. The sale has resulted in the loss of revenue from Mariner Finance.

We have closed eight branches since 2009 in order to reduce overhead costs in support of our strategy of prudently reducing assets and liabilities.

Management expects to further evaluate its options for selling and/or closing additional branches as necessary. The Bank has not entered into any agreement to sell any branch office and no guarantee can be made that any such agreement will be entered into and if such agreement is entered into, whether such sale will be consummated. The approval of the FDIC and the Commissioner will also need to be obtained by any acquirer before purchasing any of our branch offices and there can be no guarantee that such approvals will be received. While branch sales and closures, if completed, will likely reduce our assets and

Table of Contents

liabilities and increase our Bank capital ratios, we expect that our net income in the future will be reduced as a result of the loss of income generated by these branches.

The Company and the Bank are deemed to be in "troubled condition" within the meaning of federal statutes and regulations.

The Company and Bank are deemed to be in "troubled condition" within the meaning of federal statutes and regulations. As a result, certain limitations and regulatory requirements apply to the Company and the Bank with respect to future changes to senior executive management and directors and the payment of, or the agreement to pay, certain severance payments to officers, directors, and employees. The Bank must also comply with specified recordkeeping requirements in connection with transactions involving certain securities contracts, commodities contracts, repurchase agreements, and certain other financial contracts.

There may be a limited market for our common stock, which may adversely affect our stock price.

Effective September 1, 2011, our stock was delisted from the NASDAQ Stock Market and is now quoted on the OTCBB. The market for our stock may become illiquid and our shares might not be actively traded in the future. If our common stock is not actively traded, you may not be able to sell all of your shares of common stock on short notice, and the sale of a large number of shares at one time could temporarily depress the market price. There may be a wide spread between the bid and ask price for our common stock. When there is a wide spread between the bid and ask price, the price at which you may be able to sell our common stock may be significantly lower than the price at which you could buy it at that time.

Due to the M&A Agreement and Chapter 11 Proceeding (see Item 1 — "Business - Recent Developments" above), we don't presently believe there is any recovery value in our stock.

Our mortgage-banking operations require a large volume of liquidity

The mortgage-banking operation utilizes investors in the secondary market to purchase residential loans from the Bank once they have settled with the customer. The cash collected through this process is used to fund mortgage-banking and other Bank operations on a daily basis. To the extent that the funding of loan purchases is delayed or cancelled by investors, the Bank must fund the mortgage-banking operations through other means and may cause the Bank to hold increased levels of mortgage loans, thereby negatively affecting regulatory capital ratios as well as liquidity. Prolonged periods of stress in the secondary mortgage market may adversely impact the Bank's ability to fund its daily operations, including, but not limited to, mortgage-banking, commercial loan closings, and deposit withdrawals.

Negative conditions in the general economy and financial services industry may limit our access to additional funding, adversely impact liquidity, impair our ability to fund operations, and jeopardize our financial viability.

Liquidity is essential to our business. We rely on customer deposits, advances from the FHLB, and lines of credit at other financial institutions to fund our operations. Although we have historically been able to replace maturing deposits and advances if desired, no assurance can be given that we would be able to replace such funds in the future. Our access to funding sources in amounts adequate to finance our activities could be impaired by factors that affect us specifically or the financial services industry in general. Factors that could further detrimentally impact our access to liquidity sources include a decrease in the level of our business activity due to a market downturn, the financial condition of the FHLB, adverse regulatory action against us, and factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole.

The FHLB has reduced our line of credit, which stands at a total of \$108.3 million at December 31, 2013 (with an outstanding balance of \$40.0 million as of December 31, 2013). As part of the September Order, we are not allowed to purchase brokered deposits without first obtaining a regulatory waiver. We are also required to comply with restrictions on deposit rates that we may offer. These factors could significantly affect our ability to fund normal operations. At December 31, 2013, we maintained a significant amount of cash and cash equivalents such that management considered the Bank's liquidity level to be sufficient for the purposes of meeting the Bank's cash flow requirements.

Our financial flexibility will be severely constrained and/or our cost of funds will increase if we are unable to maintain our access to funding or if financing necessary to accommodate future growth is not available at favorable interest rates. Finally, if we are required to rely more heavily on more expensive funding sources, our revenues may not increase proportionately to cover our costs. In this case, our profitability would be adversely affected.

Table of Contents

The large amount of liquidity on our balance sheet negatively impacts our ability to increase income. Because the FRB Agreements, the September Order, and our reduced borrowing capacity have limited our access to certain sources of funding, we have maintained significantly more liquidity on our balance sheet than we otherwise would. At December 31, 2013, the Bank's cash and cash equivalents amounted to \$165.7 million. The opportunity cost of maintaining liquidity at this level or at similar levels is substantial, because, at December 31, 2013, the cash and cash equivalents we have accumulated yielded substantially less than our other interest-earning assets. Until we raise capital to a level that satisfies the capital requirements of the FRB Agreements and the September Order, we will need to maintain significantly higher levels of liquidity which will, in turn, negatively impact our ability to increase income.

Declines in asset values may result in impairment charges and adversely impact the value of our investments, financial performance, and capital. If we conclude that the decline in value of any of our investment securities is other than temporary, we are required to write down the value of that security.

We maintain a securities portfolio that includes, but is not limited to, mortgage-backed securities and pooled trust preferred collateralized debt obligations. The market value of securities may be affected by factors other than the underlying performance of the issuer, such as adverse changes in business climate and lack of liquidity for the resale of certain securities. As of December 31, 2013, our entire securities portfolio was classified as AFS. Unrealized gains and losses in the estimated value of the AFS portfolio are "marked to market" and reflected as a separate item in stockholders' deficit as accumulated other comprehensive loss.

We periodically, but not less than quarterly, evaluate securities and other assets for impairment indicators. We may be required to record impairment charges if securities suffer a decline in value that is considered other than temporary. Changes in the expected cash flows, credit enhancement levels, or credit ratings of our securities and/or prolonged price declines may result in our concluding in future periods that the impairment of our securities is other than temporary. If we determine that a significant impairment has occurred, we would be required to charge against earnings the credit-related portion of the other-than-temporary impairment ("OTTI"), which could have a material adverse effect on results of operations in the period in which the write-off occurs. During the years ended December 31, 2012 and 2011, we recognized \$460,000 and \$838,000, respectively, in such charges. No OTTI charges were required for the year ended December 31, 2013.

Management believes that several factors will affect the market values of our securities portfolio. These include, but are not limited to, changes in interest rates or expectations of changes, the degree of volatility in the securities markets, inflation rates or expectations of inflation and the slope of the interest rate yield curve (the yield curve refers to the differences between shorter-term and longer-term interest rates; a positively sloped yield curve means shorter-term rates are lower than longer-term rates). Also, the passage of time will affect the market values of our securities, in that the closer they are to maturing, the closer the market price should be to par value. These and other factors may impact specific categories of the portfolio differently, and management cannot predict the effect these factors may have on any specific category.

There can be no assurance that future market performance of our securities portfolio will enable us to realize income from sales of securities. Stockholders' deficit will continue to reflect the unrealized gains and losses of these securities. There can be no assurance that the market value of our securities portfolio will not decline, causing a corresponding increase in our stockholders' deficit.

We are in default under the indentures governing our trust preferred securities. As a result, the holders of our trust preferred securities have the right to declare all principal and accrued interest, totaling \$60.6 million at February 7, 2014, due and payable. The Company has guaranteed each Trust's obligations under these Notes.

Upon expiration of the applicable 30-day grace period on February 6, 2014, with respect to Mariner Capital Trust ("MCT") III and VI and February 7 with respect to MCT V, these payment failures became defaults under the Indentures entered into by Trusts and certain financial institutions as trustees (the "Trustees") and the related Guarantee Agreements between the Company and the Trustees. Neither of MCT III or MCT VI nor the Company paid the delinquent interest amounts prior to or upon the expiration of the 30-day grace period on February 6, 2014, and

neither MCT V nor the Company paid the delinquent interest amounts prior to or upon the expiration of the 30-day grace period on February 7, 2014. As a result, the Trustees and holders of the outstanding trust preferred securities of the applicable Trusts have the right to accelerate all principal, accrued interest, and other obligations of the Trusts under the applicable Debentures and to demand payment of all such amounts from the Company under the related Guarantee Agreements. The Company has learned that on February 7, 2014, certain holders of \$5.0 million of trust preferred securities issued by MCT III filed suit in the U.S. District Court for the Southern District of New York seeking payment of the \$5.0 million principal amount due on their outstanding trust preferred securities plus costs and interest. The total principal and accrued interest owed under the Debentures issued to the Trusts was approximately \$60.6 million as of February 7, 2014. In addition, the Trusts and the Company are obligated to reimburse the trustees for all reasonable expenses, disbursements, and advances in connection with the exercise of rights under the Indentures.

Table of Contents

In addition, the Company's Chapter 11 Proceeding, as discussed previously in Item 1 under "Recent Developments," constitutes an event of default under (i) the Junior Subordinated Indenture dated December 10, 2002 relating to the Company's \$6.0 million of Junior Subordinated Debentures due December 10, 2032, (ii) the Junior Subordinated Indenture dated June 18, 2003 relating to the Company's \$14.5 million of Junior Subordinated Debentures due July 7, 2033, (iii) the Junior Subordinated Indenture dated August 18, 2003 relating to the Company's \$5.0 million of Junior Subordinated Debentures due August 18, 2033, (iv) the Junior Subordinated Indenture dated September 25, 2003 relating to the Company's \$10.0 million of Junior Subordinated Debentures due October 8, 2033, (v) the Junior Subordinated Indenture dated October 21, 2004 relating to the Company's \$10.0 million of Junior Subordinated Debentures due January 7, 2035, and (vi) the Junior Subordinated Indenture dated August 18, 2005 relating to the Company's \$5.0 million of Junior Subordinated Debentures due September 15, 2035.

Upon such event of default, the entire unpaid principal and accrued interest became immediately due and payable by notice to the Company in writing from either the trustees of such trusts or holders of not less than a majority, or 25% in the case of MCT II and MCT IV, in aggregate principal amount of the outstanding Debentures. The Company believes that, as a result of the Chapter 11 Proceeding, all creditors are subject to an automatic stay imposed by Section 362 of the Bankruptcy Code of any action to collect, assert, or recover a claim against the Company as a result of the Chapter 11 Proceeding.

We have had losses in recent periods.

Although we realized net income of \$16.1 million during 2012, for the years ended December 31, 2013 and 2011, we incurred net losses of \$19.1 million and \$30.2 million, respectively. Our earnings in those periods were hurt by adverse economic conditions, including falling home prices, increasing foreclosures, and increasing unemployment in our markets. In addition, we had provisions for loan losses of \$1.3 million, \$2.6 million, and \$14.3 million for the years ended December 31, 2013, 2012, and 2011, respectively. Our ability to return to profitability will depend on whether we are able to continue to reduce credit losses in the future, which will depend, in part, on whether economic conditions in our markets continue to improve, as well as increasing our net interest income and controlling expenses. There is no assurance that we will be successful in executing our business plan or that even if we successfully implement our business plan, we will be able to achieve profitability. If we incur significant operating losses again in the future, our stock price may further decline. Even if we increase capital levels so as to meet the Bank and consolidated capital levels mandated by our regulators, if we incur further operating losses, we may in the future need to raise additional capital to maintain Bank and Company capital levels that meet or exceed the levels mandated by our regulators.

See "Recent Developments" in Item 1 above for more information on the M&A Agreement and Chapter 11 Proceeding.

Higher loan losses could require us to increase our allowance for loan losses through a charge to earnings.

When we loan money we incur the risk that our borrowers do not repay their loans. We reserve for loan losses by establishing an allowance through a charge to earnings. The amount of this allowance is based on our assessment of loan losses inherent in our loan portfolio. The process for determining the amount of the allowance is critical to our financial results and condition. It requires subjective and complex judgments about the future, including forecasts of economic or market conditions that might impair the ability of our borrowers to repay their loans. We might underestimate the loan losses inherent in our loan portfolio and have loan losses in excess of the amount reserved. We might increase the allowance because of changing economic conditions. For example, in a rising interest rate environment, borrowers with adjustable-rate loans could see their payments increase. There may be a significant increase in the number of borrowers who are unable or unwilling to repay their loans, resulting in our charging off more loans and increasing our allowance. In addition, when real estate values decline, the potential severity of loss on a real estate-secured loan can increase significantly, especially in the case of loans with high combined LTV ratios. The decline in the national economy and the local economies of the areas in which the loans are concentrated could result in an increase in loan delinquencies, foreclosures, or repossessions, resulting in increased charge-off amounts and the need for additional loan loss allowances in future periods. In addition, our determination as to the amount of

our allowance for loan losses is subject to review by regulatory authorities, as part of their examination process, which may result in the establishment of an additional allowance after a review of the information available at the time of their examination. Our allowance for loan losses amounted to \$8.6 million, or 1.5% of total loans outstanding and 23.5% of nonperforming assets ("NPAs") (\$36.1 million) and loans past-due 90 days or more and accruing (\$429,000), as of December 31, 2013. Our allowance for loan losses at December 31, 2013 may not be sufficient to cover future loan losses. A large loss could deplete the allowance and require increased provisions to replenish the allowance, which would decrease our earnings. As of December 31, 2013, we had outstanding loan balances of approximately \$511.1 million (91.3% of total loans) that were performing according to their original terms. However, the deterioration of one or more of these performing loans could result in a significant increase in our nonperforming loans and our provision for loan losses, which would negatively impact our results of operations.

Table of Contents

We have a high percentage of commercial real estate and real estate construction loans in relation to our total loans. At December 31, 2013, we had \$201.8 million in mortgage loans secured by commercial real estate and \$57.2 million in real estate construction loans, which included \$40.7 million in commercial construction loans and \$16.5 million in consumer construction loans. Commercial mortgage loans and total construction loans represented 36.0% and 10.2%, respectively, of our net loan portfolio. While commercial real estate and construction loans are generally more interest rate sensitive and carry higher yields than do residential mortgage loans, these types of loans generally expose a lender to greater risk of nonpayment and loss than single-family residential mortgage loans because repayment of the loans often depends on the successful operation of the property, the income stream of the borrowers, and, for construction loans, the accuracy of the estimate of the property's value at completion of construction and the estimated cost of construction. Such loans typically involve larger loan balances to single borrowers or groups of related borrowers compared to single-family residential mortgage loans.

Current regulatory guidance suggests that institutions whose commercial real estate loans exceed certain percentages of capital should implement heightened risk management practices appropriate to their concentration risk and may be required to maintain higher capital ratios than institutions with lower concentrations in commercial real estate lending. Based on our commercial real estate concentration as of December 31, 2013, we may be subject to further supervisory analysis during future examinations. Although we continuously evaluate our concentration and risk management strategies, we cannot guarantee that any risk management practices we implement will be effective to prevent losses relating to our commercial real estate portfolio. Management cannot predict the extent to which this guidance will impact our operations or capital requirements.

Mortgage-banking activities generate a significant portion of our noninterest income.

A significant portion of our business involves originating residential mortgage loans through our mortgage division. Mortgage-banking revenue amounted to \$51.8 million, \$82.9 million, and \$29.4 million for 2013, 2012, and 2011, respectively, which accounted for approximately 82.3%, 93.5%, and 75.3% of our noninterest income for those years, respectively. Real estate loan origination activity, including refinancing, is generally greater during periods of low or declining interest rates and favorable economic conditions. Adverse changes in market conditions and/or higher interest rates could have an adverse impact on our earnings through lower origination volumes. Mortgage-banking revenue decreased significantly from 2012 to 2013, and further declines in mortgage-banking revenue would significantly affect our profitability.

We face interest rate risk on our loans held for sale ("LHFS") portfolio.

We are exposed to interest rate risk in both our pipeline of mortgage originations (loans that have yet to close with the borrower) and in our warehouse loans (those loans that have closed with the borrower but have yet to be funded by investors). We have managed this interest rate risk through hedging strategies. We hedge a portion of our mortgage loan pipeline and warehouse utilizing derivatives in the form of forward sales of mortgage-backed securities. We expect that these derivative financial instruments will experience changes in fair value opposite to the change in fair value of the derivative loan commitments and our warehouse. However, the process of selling loans and the use of forward sales of mortgage-backed securities to hedge interest rate risk associated with customer interest rate lock commitments ("IRLC" or "IRLCs") involves greater risk than selling loans on an individual basis through forward delivery commitments. Hedging interest rate risk requires management to estimate the expected "fallout" (rate lock commitments with customers that do not complete the loan process). Additionally, the fair value of the hedge may not correlate precisely with the change in fair value of the rate lock commitments with the customer due to changes in market conditions, such as demand for loan products, or prices paid for differing types of loan products. Variances from management's estimates for customer fallout or market changes making the forward sale of mortgage-backed securities ineffective may result in higher volatility in our profits from selling mortgage loans originated for sale. We engage an experienced third party to assist us in managing our activities in hedging and marketing sales strategy, however, there is always the risk that a hedge will not be successful.

We face credit risk related to our residential mortgage production activities.

Credit risk is the potential for financial loss resulting from the failure of a borrower or an institution to honor its contractual obligations to us. We manage mortgage credit risk principally by selling substantially all of the mortgage loans that we produce, limiting credit recourse to the Bank in those transactions, and by retaining high credit quality mortgages in our loan portfolio. We also limit our risk of loss on mortgage loan sales by establishing limits on activity to any one investor and by entering into contractual relationships with only those financial institutions that are approved by our secondary marketing committee. The period of time between closing on a loan commitment with the borrower and funding by the investor ranges from between 15 and 90 days.

Table of Contents

Secondary mortgage market conditions could have a material impact on our financial condition and results of operations.

In addition to being affected by interest rates, the secondary mortgage markets are also subject to investor demand for residential mortgage loans. These conditions may fluctuate or even worsen in the future. In light of current conditions, there is a higher risk to retaining a larger portion of mortgage loans than we would in other environments until they are sold to investors. As a result, a prolonged period of secondary market illiquidity may reduce our loan production volumes and could have a material adverse effect on our financial condition and results of operations.

We face risk related to covenants in our loan sales agreements with investors.

Our sales agreements with investors who purchase our loans generally contain covenants which may require us to repurchase loans under certain provisions, including delinquencies. Any loans we are required to repurchase may be considered impaired loans, with the potential for charge-offs and/or loss provision charges. The addition of these repurchased loans to our portfolio could adversely affect our earnings and asset quality ratios.

There may be certain loans in our portfolio that were originated for sale, but for various reasons, are unable to be sold. These loans are transferred to our loan portfolio at fair value, with any deterioration in value charged against mortgage-banking revenue. Any deterioration in value of the loan during the period held in the portfolio is charged to the allowance.

Increased and/or special FDIC assessments will hurt our earnings.

Beginning in late 2008, the economic environment caused higher levels of bank failures, which dramatically increased FDIC resolution costs and led to a significant reduction in the DIF. As a result, the FDIC significantly increased the initial base assessment rates paid by financial institutions for deposit insurance. The increase in the base assessment rate has increased our deposit insurance costs and negatively impacted our earnings. See "Regulation of the Bank—Insurance of Deposit Accounts" under "Supervision and Regulation" in Item 1 above for more information on FDIC assessments.

The FDIC may impose additional emergency special assessments if necessary to maintain public confidence in federal deposit insurance or as a result of deterioration in the DIF reserve ratio due to institution failures. Any emergency special assessment imposed by the FDIC will negatively impact our earnings.

We currently hold a significant amount of bank owned life insurance ("BOLI").

We currently hold a significant amount of BOLI on key employees and executives that have cash surrender values of \$39.6 million as of December 31, 2013. The eventual repayment of the cash surrender value is subject to the ability of various insurance companies to pay benefits in the event of the death of an insured employee or return the cash surrender value to us in the event of our need for liquidity. We continuously monitor the financial strength of the various insurance companies with whom we carry policies. However, there is no assurance that one or more of these companies will not experience a decline in financial strength, which could impair its ability to pay benefits or return our cash surrender value. Additionally, should we need to liquidate these policies for liquidity needs, we would be subject to taxation on the increase in cash surrender value as well as penalties for early termination of the insurance contracts. These events would have a negative impact on our earnings.

Fluctuating interest rates may adversely affect our profitability.

Our profitability is dependent to a large extent upon net interest income, which is the difference, or spread, between the interest earned on loans, securities, and other interest-earning assets and the interest paid on deposits, borrowings, and other interest-bearing liabilities. Because of the differences in maturities and repricing characteristics of our interest-earning assets and interest-bearing liabilities, changes in interest rates do not produce equivalent changes in interest income earned on interest-earning assets and interest paid on interest-bearing liabilities. We principally manage interest rate risk by managing our volume and mix of our earning assets and funding liabilities. In a rapidly changing interest rate environment, we may not be able to manage this risk effectively. Changes in interest rates can also affect: (1) our ability to originate and/or sell loans; (2) the value of our interest-earning assets, which would negatively impact shareholders' deficit and our ability to realize gains from the sale of such assets; (3) our ability to obtain and retain deposits in competition with other available investment alternatives; and (4) the ability of our

borrowers to repay adjustable- or variable-rate loans. Interest rates are highly sensitive to many factors, including government monetary policies, domestic and international economic and political conditions, and other factors beyond our control. If we are unable to manage interest rate risk effectively, our business, financial condition, and results of operations could be materially adversely affected.

Table of Contents

Our litigation related costs may continue to increase.

The Bank is subject to a variety of legal proceedings that have arisen in the ordinary course of the Bank's business. In the current economic environment the Bank's involvement in litigation has increased, primarily as a result of defaulted borrowers asserting claims in order to defeat or delay foreclosure proceedings. The Bank believes that it has meritorious defenses in legal actions where it has been named as a defendant and is vigorously defending these suits. Although management, based on discussion with litigation counsel, believes that such proceedings will not have a material adverse effect on the financial condition or operations of the Bank, there can be no assurance that a resolution of any such legal matters will not result in significant liability to the Bank nor have a material adverse impact on its financial condition and results of operations or the Bank's ability to meet applicable regulatory requirements. The expenses of pending legal proceedings will adversely affect the Bank's results of operations until they are resolved. There can be no assurance that the Bank's loan workout and other activities will not expose the Bank to additional legal actions, including lender liability or environmental claims.

In addition, the Chapter 11 Proceeding (see "Recent Developments" in Item 1 above) and the default on the Junior Subordinated Deferrable Interest Debentures (see above), will likely increase our litigation costs.

The soundness of other financial institutions could adversely affect us.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services institutions are interrelated as a result of trading, clearing, counterparty, or other relationships. As a result, defaults by, or even rumors or questions about, one or more financial services institutions, or the financial services industry in general, could lead to market-wide liquidity problems and losses or defaults by us or by other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the value of the collateral held by us cannot be realized upon liquidation or is liquidated at prices not sufficient to recover the full amount of the financial instrument exposure. There is no assurance that any such losses would not materially and adversely affect our results of operations.

We operate in a highly regulated environment and may be adversely affected by changes in federal and state laws and regulations.

We are subject to extensive regulation, supervision, and examination by federal and state banking authorities. Any change in applicable regulations or laws could have a substantial impact on us and our operations. Additional legislation and regulations that could significantly affect our powers, authority, and operations may be enacted or adopted in the future, which could have a material adverse effect on our financial condition and results of operations. Legislation related to bankruptcy rules and courts and/or foreclosure proceedings to the benefit of borrowers and the detriment of lenders could be enacted by either Congress or the state of Maryland in the future. Any such laws may further restrict our collection efforts on residential mortgage loans.

See detailed information on our regulatory environment under "Supervision and Regulation" in Item 1 above.

We face significant operational risks.

We operate in many different businesses in diverse markets and rely on the ability of our employees and systems to process a high number of transactions. Operational risk is the risk of loss resulting from our operations, including, but not limited to, the risk of fraud by employees or persons outside of the Company and the Bank, the execution of unauthorized transactions by employees, errors relating to transaction processing and technology, catastrophic failures resulting from terrorist acts or natural disasters, breaches of the internal control system, compliance requirements, and business continuation and disaster recovery. This risk of loss also includes the potential legal actions that could arise as a result of an operational deficiency or as a result of noncompliance with applicable regulatory standards, adverse business decisions or their implementation, and customer attrition due to potential negative publicity. We maintain a system of internal controls to mitigate against such occurrences and maintain insurance coverage for such risks that are insurable, but should such an event occur that results in a breakdown in the internal control system, improper operation of systems, or improper employee actions, we could suffer financial loss, face regulatory action, and suffer damage to our reputation.

Additionally, the financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological

Table of Contents

change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

Severe weather, natural disasters, acts of war or terrorism, and other adverse external events could have a significant impact on our ability to conduct business. Such events could affect the stability of our deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue, and/or cause us to incur additional expenses. Operations in several of our markets could be disrupted by both the evacuation of large portions of the population as well as damage and/or lack of access to our banking and operation facilities. Although we have not experienced such an occurrence to date, severe weather or natural disasters, acts of war or terrorism, or other adverse external events may occur in the future. Although management has established disaster recovery policies and procedures, the occurrence of any such event could have a material adverse effect on our business, which, in turn, could have a material adverse effect on our financial condition and results of operations.

If we do not maintain the privacy and security of customer-related information, we could damage our reputation, incur substantial additional costs, and become subject to litigation.

We receive, retain, and transmit certain personal information about our customers. In addition, our online operations rely on the secure transmission of confidential information over public networks. A compromise of our physical and network security systems through a cyber-security attack, including those of our business partners, may threaten our customers' personal information being obtained by unauthorized persons, which could adversely affect our reputation, as well as negatively impact our business, results of operations, financial position, and liquidity, and could result in the imposition of penalties or litigation against us. In addition, a cyber-security breach could require that we expend significant additional resources related to the security of information systems which could result in a disruption of our operations.

The loss of senior management could hurt our operations.

We rely heavily on our senior officer team. The loss of any of our senior officers could have an adverse effect on us because we have been operating with as small a staff as possible to reduce expenses. In 2011, the then Chairman of the Board and Chief Executive Officer ("CEO") of the Company and the Bank retired and the then President of the Bank resigned to pursue another opportunity. Such individuals have not been replaced and their duties have been assumed by other officers. Moreover, as a result of our capital levels and the September Order, we are subject to regulations that limit our flexibility in offering compensation arrangements that would better enable us to retain our senior officers, and we may find it difficult to attract replacement officers in the event we were to lose existing senior officers. In addition, as a community bank, we have fewer management-level personnel who are in a position to assume the responsibilities of our senior officers.

A continuation or worsening of economic conditions could result in increases in the Company's level of nonperforming loans and/or reduced demand for our products and services, which could lead to lower revenue, higher loan losses, and lower earnings.

The Company's business activities and earnings are affected by general business conditions in the U.S. and in the Company's primary market area. These conditions include the level of short-term and long-term interest rates, inflation, deflation, unemployment levels, real estate values, monetary supply, consumer confidence and spending, fluctuations in both debt and equity capital markets, and the strength of the economy in the U.S. generally and in the Company's market area in particular. The national economy experienced a recession from December 2007 to June 2009, with rising unemployment levels, declines in real estate values and an erosion in consumer confidence. The economic recovery since the end of the recession has been weak. Dramatic declines in the U.S. housing market over the past few years, with decreasing home prices and increasing foreclosures, have negatively affected the credit performance of mortgage loans and other loans and investments tied to the residential housing market and have resulted in significant write-downs of asset values by many financial institutions. Our local economy has experienced similar economic conditions, although the deterioration may not be as severe in some respects as the national economy overall. A prolonged or more severe economic downturn, continued elevated levels of unemployment,

declines in the values of real estate, or other events that affect household and/or corporate incomes could impair the ability of borrowers to repay their loans in accordance with their terms. Nearly all of the Company's loans are secured by real estate, and a majority of our loans are made to individuals and businesses in the localities in which we have offices. As a result of this concentration, a prolonged or more severe downturn in the local economy could result in significant increases in nonperforming loans, which would negatively affect the Company's interest income and result in higher provisions for loan losses, which would hurt the Company's earnings. The economic downturn could also result in reduced demand for credit, which would hurt the Company's revenues.

Table of Contents

We are a community bank and our ability to maintain our reputation is critical to the success of our business and the failure to do so may materially adversely affect our performance.

We are a community bank, and our reputation is one of the most valuable components of our business. As such, we strive to conduct our business in a manner that enhances our reputation. This is done, in part, by recruiting, hiring, and retaining employees who share our core values of being an integral part of the communities we serve, delivering superior service to our customers and caring about our customers and associates. If our reputation is negatively affected, by the actions of our employees or otherwise, our business and, therefore, our operating results may be materially adversely affected.

Our ability to pay cash dividends is limited.

Holders of shares of our common stock are entitled to dividends if declared by our board of directors out of funds legally available for that purpose. In general, future dividend policy is subject to the discretion of the board of directors and will depend upon our future earnings, capital requirements, regulatory constraints, and our financial condition, as well as that of the Bank.

Although the board of directors has declared cash dividends in the past, it has discontinued such payments to conserve cash and capital resources and does not intend to declare cash dividends for the foreseeable future. Moreover, the FRB Agreements prohibit the payment of dividends to our stockholders. Our future ability to pay dividends will be largely dependent upon the receipt of dividends from the Bank. Both federal and state laws impose restrictions on the ability of the Bank to pay dividends. Federal law prohibits the payment of a dividend by an insured depository institution if the depository institution is considered "undercapitalized" or if the payment of the dividend would make the institution "undercapitalized." For a Maryland commercial bank, dividends may be paid out of undivided profits or, with the prior approval of the Commissioner, from surplus in excess of 100% of required capital stock. If, however, the surplus of a Maryland bank is less than 100% of its required capital stock, then cash dividends may not be paid in excess of 90% of net earnings.

Our ability to pay dividends is further subject to our ability to make payments of interest under junior subordinated debentures due through 2035 held by our statutory trusts, MCT II, III, IV, V, VI, and VII (collectively, the "MCT Trusts"). As mentioned previously, we did not pay the accrued interest on these debentures at the end of the deferral period and as of January, 2014, are in technical default with respect to these borrowings.. Under the terms of the Trust Preferred Securities, we are not permitted to pay dividends to our stockholders while we are deferring interest payments on the debentures.

Finally, First Mariner and the Bank have entered into regulatory agreements with our regulators which, among other things, require us to seek prior regulatory approval before the Bank pays dividends to First Mariner and/or before First Mariner pays dividends on its common stock.

Contracts with our officers may discourage a takeover or adversely affect our takeover value.

We have entered into change in control agreements with certain senior officers. These agreements provide for a payment to each officer of a multiple of his or her salary and bonus upon the occurrence of either a change in control that results in the loss of employment or a significant change in his or her employment. Thus, we may be required to make significant payments in the event that the rights under these agreements are triggered by a change in control. As a result, these contracts may discourage a takeover or adversely affect the consideration payable to stockholders in the event of a takeover. Notwithstanding the foregoing, because the Company and the Bank are considered to be in "troubled condition" for regulatory purposes, payments made under any change of control agreement are subject to certain regulatory restrictions and limitations. The Company and the Bank must apply for and receive the approval of the FRB and the FDIC, respectively, in order to make payments under these agreements.

Our Articles and Bylaws and Maryland law may discourage a corporate takeover.

Our Articles and Amended and Restated Bylaws ("Bylaws") contain certain provisions designed to enhance the ability of the board of directors to deal with attempts to acquire control of the Company. These provisions provide for the classification of our board of directors into three classes; directors of each class serve for staggered three year periods. The Articles also provide for supermajority voting provisions for the approval of certain business combinations.

Maryland law also contains anti-takeover provisions that apply to us. The Maryland Business Combination Act generally prohibits, subject to certain limited exceptions, corporations from being involved in any "business combination" (defined as a variety of transactions, including a merger, consolidation, share exchange, asset transfer, or issuance or reclassification of equity securities) with any "interested shareholder" for a period of five years following the most recent date on which the interested shareholder became an interested shareholder. An interested shareholder is defined generally as a person who is the beneficial owner of 10% or more of the voting power of the outstanding voting stock of the corporation after the date on which

Table of Contents

the corporation had 100 or more beneficial owners of its stock or who is an affiliate or associate of the corporation and was the beneficial owner, directly or indirectly, of 10% or more of the voting power of the then outstanding stock of the corporation at any time within the two-year period immediately prior to the date in question and after the date on which the corporation had 100 or more beneficial owners of its stock.

Although these provisions do not preclude a takeover, they may have the effect of discouraging a future takeover attempt which would not be approved by our board of directors, but pursuant to which stockholders might receive a substantial premium for their shares over then-current market prices. As a result, stockholders who might desire to participate in such a transaction might not have the opportunity to do so. Such provisions will also render the removal of our board of directors and of management more difficult and, therefore, may serve to perpetuate current management. Further, such provisions could potentially adversely affect the market price of our common stock. See information on the M&A Agreement under "Recent Developments" in Item 1 above.

The Bank's branches generally range in total size from 2,000 to 4,000 square feet and mortgage offices generally range in size from 1,200 to 2,000 square feet. We believe that all of our locations are suitable and adequate to conduct business and support growth in customer and transaction volume.

For more information on our lease commitments and costs, see Note 7 of the Notes to Consolidated Financial Statements, included in Item 8 of Part II of this Annual Report on Form 10-K.

ITEM 3 LEGAL PROCEEDINGS

The Company has learned that on February 7, 2014, certain holders of \$5.0 million of trust preferred securities issued by MCT III filed suit in the U.S. District Court for the Southern District of New York seeking payment of the \$5.0 million principal amount due on their outstanding trust preferred securities plus costs and interest. The Company believes that, as a result of the Chapter 11 Proceeding, this lawsuit is subject to an automatic stay imposed by Section 362 of the Bankruptcy Code of any action to collect, assert, or recover a claim against the Company as a result of the Chapter 11 Proceeding.

We are also party to certain legal actions that are routine and incidental to our business. In management's opinion, the outcome of these matters, individually or in the aggregate, will not have a material effect on our results of operations or financial position.

ITEM 4 MINE SAFETY DISCLOSURES

Not Applicable.

Table of Contents

PART II

ITEM MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS
5 AND ISSUER PURCHASES OF EQUITY SECURITIES

Market for Common Stock

First Mariner's common stock is quoted on the OTCBB under the symbol "FMAR" ("FMARQ" since the Chapter 11 Proceeding). Currently, there are approximately 895 holders of record of First Mariner common stock. On March 14, 2014, the closing sales price of First Mariner common stock was \$0.06 per share.

The table below sets forth for the periods indicated the low and high per share market prices of the common stock:

	Low	High
2013 Quarter Ended		
Fourth quarter	\$0.37	\$1.07
Third quarter	0.74	2.80
Second quarter	0.85	2.97
First quarter	0.79	1.05
2012 Quarter Ended		
Fourth quarter	\$0.46	\$1.11
Third quarter	0.43	0.64
Second quarter	0.38	0.70
First quarter	0.14	0.61

We do not pay cash dividends on our shares of common stock. Currently, we have no plans to pay cash dividends on our common stock. For a discussion of the limitations on First Mariner's ability to pay dividends, see Item 1 of Part I under the heading "Supervision and Regulation" and "Our ability to pay cash dividends is limited" in Item 1A of Part I of this Annual Report on Form 10-K.

As mentioned under "Recent Developments" in Item 1 of Part I of this Annual Report on Form 10-K, we have entered into the M&A Agreement and the Chapter 11 Proceeding. At the anticipated conclusion of the Chapter 11 Proceeding and with the anticipated sale of the Bank, we do not expect the Company's equity securities to retain any value.

Accordingly, the Company urges that appropriate caution be exercised with respect to existing and future investments in any of these securities as their value and prospects are highly speculative.

Equity Compensation Plan Information

The following table sets forth the securities authorized for issuance under the Company's equity compensation plans as of December 31, 2013:

Plan Category	(A) Number of securities to be issued upon exercise of outstanding options, warrants, and rights	(B) Weighted-average exercise price of outstanding options, warrants, and rights	(C) Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (A))
Equity compensation plans approved by security holders	526,128	\$5.36	871,352
Equity compensation plans not approved by security holders	—	—	—
Total	526,128	\$5.36	871,352

Issuer Purchases of Equity Securities

None.

ITEM MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS
7 OF OPERATIONS

The Company

First Mariner Bancorp is a bank holding company incorporated under the laws of Maryland and registered under the federal Bank Holding Company Act of 1956, as amended. First Mariner Bancorp's business is conducted primarily through its wholly-owned subsidiary, First Mariner Bank. The Company had over 480 employees (approximately 472 full-time equivalent employees) as of December 31, 2013.

The Bank, with assets exceeding \$1.0 billion as of December 31, 2013, is engaged in the general commercial banking business, with particular attention and emphasis on the needs of individuals and small to mid-sized businesses, and delivers a wide range of financial products and services that are offered by many larger competitors. The Bank's primary market area for its core banking operations, which consist of traditional commercial and consumer lending, as well as retail and commercial deposit operations, is central Maryland and portions of Maryland's eastern shore.

Products and services of the Bank include traditional deposit products, a variety of consumer and commercial loans, residential and commercial mortgage and construction loans, wire transfer services, nondeposit investment products, and Internet banking and similar services. Most importantly, the Bank provides customers with access to local Bank officers who are empowered to act with flexibility to meet customers' needs in an effort to foster and develop long-term loan and deposit relationships. The Bank is an independent community bank and its deposits are insured by the FDIC.

First Mariner Mortgage, a division of the Bank, engages in mortgage-banking activities, providing mortgages and associated products to customers and selling most of those mortgages into the secondary market. First Mariner Mortgage had assets of \$60.8 million and \$404.3 million as of December 31, 2013 and December 31, 2012, respectively, and generated revenue of \$58.9 million and \$93.2 million, respectively, for the years ended December 31, 2013 and 2012. It recognized a loss before income taxes of \$3.2 million during 2013 and income before income taxes of \$37.8 million in 2012. Origination volume during 2013 was \$2.0 billion compared to \$2.5 billion in 2012. During 2013, 54% of the originations were made in the state of Maryland, 23% in the immediately surrounding states and the District of Columbia, and the remaining 23% in other states throughout the country. First Mariner Mortgage has offices in Maryland, Delaware, Virginia, and North Carolina. See Note 21 to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report on Form 10-K for more detailed information on the results of our mortgage-banking operations.

Recent Developments

On February 7, 2014, the Company entered into the M&A Agreement with RKJS, a Maryland chartered trust company, and filed the Chapter 11 Proceeding. See "Recent Developments" in Item 1 of Part I of this Annual Report on 10-K for detailed information on these developments.

Critical Accounting Policies

The Company's consolidated financial statements are prepared in accordance with accounting principles generally accepted in the U.S. ("GAAP") and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the consolidated financial statements; accordingly, as this information changes, the consolidated financial statements could reflect different estimates, assumptions, and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and, as such, have a greater possibility of producing results that could be materially different than originally reported. Estimates, assumptions, and judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the value of an asset not carried on the consolidated financial statements at fair value warrants an impairment write-down or valuation reserve to be established, or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. When applying accounting policies in such areas that are subjective in nature, management must

use its best judgment to arrive at the carrying value of certain assets and liabilities. Below is a discussion of our critical accounting policies.

Securities

We have designated all securities as available for sale, reported at estimated fair value, with unrealized gains and losses reported as a separate component of stockholders' deficit, net of tax effects, in accumulated other comprehensive loss.

35

Table of Contents

Gains or losses on the sales of securities are calculated using a specific-identification basis and are determined on a trade-date basis. Premiums and discounts on securities are amortized (accreted) over the term of the security using methods that approximate the interest method.

OTTI

AFS securities are evaluated periodically to determine whether a decline in their value is other than temporary. The term "other than temporary" is not intended to indicate a permanent decline in value. Rather, it means that the prospects for near-term recovery of value are not necessarily favorable, or that there is a lack of evidence to support fair values equal to, or greater than, the carrying value of the security.

The initial indications of OTTI for both debt and equity securities are a decline in the market value below the amount recorded for a security and the severity and duration of the decline. In determining whether an impairment is other than temporary, we consider the length of time and the extent to which the market value has been below cost, recent events specific to the issuer, including investment downgrades by rating agencies and economic conditions of its industry, our intent to sell the security, and if it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis. For marketable equity securities, we also consider the issuer's financial condition, capital strength, and near-term prospects. For debt securities and for perpetual preferred securities that are treated as debt securities for the purpose of OTTI analysis, we also consider the cause of the price decline (general level of interest rates and industry- and issuer-specific factors), the issuer's financial condition, near-term prospects and current ability to make future payments in a timely manner, the issuer's ability to service debt, and any change in agencies' ratings at evaluation date from acquisition date and any likely imminent action. Once a decline in value is determined to be other than temporary, the security is segmented into credit- and noncredit-related components. Any impairment adjustment due to identified credit-related components is recorded as an adjustment to current period earnings, while noncredit-related fair value adjustments are recorded through accumulated other comprehensive loss. In situations where we intend to sell or it is more likely than not that we will be required to sell the security, the entire OTTI loss is recognized in earnings.

Loans

Allowance for loan losses

Our allowance for loan losses represents an estimated amount that, in management's judgment, will be adequate to absorb probable incurred losses on existing loans. Management uses a disciplined process and methodology to establish the allowance each quarter. To determine the total allowance for loan losses, we estimate the allowance requirements for each loan class, including loans analyzed individually and loans analyzed on a pooled basis.

To determine the allocated component of the allowance account, loans are pooled by loan class and losses are modeled using historical experience over the loss emergence period. Additionally, environmental factors are applied to each loan class and is based upon management's evaluation of various conditions that are not directly measured in the determination of the formula and other allocated allowances. The models and assumptions used to determine the allowance are validated and reviewed to ensure that their theoretical foundation, assumptions, data integrity, computational processes, reporting practices, and end-user controls are appropriate and properly documented.

The establishment of the allowance for loan losses relies on a consistent process that requires multiple layers of management review and judgment and responds timely to changes in economic conditions and other influences. From time to time, events or economic factors may affect the loan portfolio, causing management to provide additional amounts to or release balances from the allowance for loan losses.

We monitor differences between estimated and actual incurred loan losses utilizing charge-off history. Loans deemed uncollectible are charged against, while recoveries are credited to, the allowance. Management adjusts the level of the allowance through the provision for loan losses, which is recorded as a current period operating expense.

Commercial (including commercial mortgages) and construction loans (including both commercial and consumer) are generally evaluated for impairment when the loan becomes 90 days past due and/or is rated as substandard. The difference between the fair value of the collateral, less estimated selling costs and the carrying value of the loan is charged off at that time. Residential mortgage loans are generally charged down to their fair value when the loan

becomes 120 days past due or is placed in nonaccrual status, whichever is earlier. Consumer loans are generally charged off when the loan becomes 120 days past due or when it is determined that the amounts due are uncollectible (whichever is earlier). The above charge-off guidelines may not apply if the loan is both well secured and in the process of collection. These charge-off policies have not changed in the last three years.

Table of Contents

As an additional portion of the allowance for loan losses, we also estimate probable losses related to unfunded loan commitments. These commitments are subject to individual review and are analyzed for impairment the same as a correspondent loan.

Impairment

We determine a loan to be impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. In general, impaired loans consist of nonaccrual loans and troubled debt restructures ("TDR" or "TDRs"). We do not consider a loan impaired during a period of delay in payment if we expect to collect all amounts due, including interest past due. Generally we consider a period of delay in payment to include delinquency up to 90 days, but may extend this period if the loan is collateralized by residential or commercial real estate with a low LTV ratio and where collection and repayment efforts are progressing. We evaluate our commercial, commercial mortgage, commercial construction, and consumer construction classes of loans individually for impairment. We evaluate larger groups of smaller-balance homogeneous loans, which include our residential mortgage, home equity and second mortgage, and other consumer classes of loans, collectively for impairment.

We identify impaired loans and measure impairment (1) at the present value of expected cash flows discounted at the loan's effective interest rate, (2) at the observable market price, or (3) at the fair value of the collateral if the loan is collateral dependent. If our measure of the impaired loan is less than the recorded investment in the loan, we record a charge-off for the deficiency unless it's a TDR, for which we recognize an impairment loss through an allocated portion of the allowance for loan losses.

When the ultimate collectability of an impaired loan's principal is in doubt, wholly or partially, all cash receipts are applied to principal. Once the recorded principal balance has been reduced to an amount deemed to be fully collectible, cash receipts may be applied to previously foregone or current interest, and then recorded as recoveries of any amounts previously charged off. When all doubt about the full collectability of the loan is removed, cash receipts are applied under the contractual terms of the loan agreement.

Nonaccrual status

For smaller consumer loans, we place loans in nonaccrual status when they are contractually past due 90 days as to either principal or interest, unless the loan is well secured and in the process of collection, or earlier, when, in the opinion of management, the collection of principal and interest is in doubt. For all commercial loans, larger loans, and certain mortgage loans, management applies Financial Accounting Standards Board ("FASB") guidance on impaired loan accounting to determine accrual status. Under that guidance, when it is probable that we will be unable to collect all payments due, including interest, we place the loan in nonaccrual status. A loan remains in nonaccrual status until the loan is current as to payment of both principal and interest and the borrower demonstrates the ability to pay and remain current. Specifically, in order for a nonaccrual loan to be returned to accrual status, a borrower must make six consecutive monthly payments and the borrower must demonstrate the ability to keep the loan current going forward. When a loan is partially charged off, the remaining balance remains in nonaccrual status.

As a result of our ongoing review of the loan portfolio, we may classify loans as nonaccrual even though the presence of collateral or the borrower's financial strength may be sufficient to provide for ultimate repayment. In general, loans are charged off when a loan or a portion thereof is considered uncollectible. We determine that the entire balance of a loan is contractually delinquent for all classes if the minimum payment is not received by the specified due date.

Interest and fees continue to accrue on past due loans until the date the loan goes in nonaccrual status.

Income recognition

Interest income on loans is accrued at the contractual rate based on the principal outstanding. Loan origination fees and certain direct loan origination costs are deferred and amortized as a yield adjustment over the contractual loan terms or until the date of sale or disposition. Accrual of interest is discontinued when its receipt is in doubt, which typically occurs when a loan becomes impaired. Any interest accrued to income in the year when interest accruals are discontinued is generally reversed. Management may elect to continue the accrual of interest when a loan is in the process of collection and the estimated fair value of the collateral is sufficient to satisfy the principal balance and

accrued interest. See additional information on loan impairment, nonaccrual status, and related interest recognition above.

Real estate acquired through foreclosure

We record real estate acquired through foreclosure at the lower of cost or market value ("LCM") on the acquisition date and at the lower of such initial amount or estimated fair value less estimated selling costs thereafter. Estimated fair value is

37

Table of Contents

based upon many subjective factors, including location and condition of the property and current economic conditions, among other things. Because the calculation of fair value relies on estimates and judgments relating to inherently uncertain events, results may differ from our estimates.

Write-downs at the time of transfer are made through the allowance for loan losses. Write-downs subsequent to transfer are included in our noninterest expenses, along with operating income, net of related expenses of such properties and gains or losses realized upon disposition.

Income taxes

Deferred income taxes are recognized for the tax consequences of temporary differences between financial statement carrying amounts and the tax bases of assets and liabilities. Deferred income taxes are provided on income and expense items when they are reported for financial statement purposes in periods different from the periods in which these items are recognized in the income tax returns. Deferred tax assets are recognized only to the extent that it is more likely than not that such amounts will be realized based upon consideration of available evidence, including tax planning strategies and other factors.

The calculation of tax liabilities is complex and requires the use of estimates and judgment since it involves the application of complex tax laws that are subject to different interpretations by us and the various tax authorities. These interpretations are subject to challenge by the tax authorities upon audit or to reinterpretation based on management's ongoing assessment of facts and evolving case law.

Periodically and in the ordinary course of business, we are involved in inquiries and reviews by tax authorities that normally require management to provide supplemental information to support certain tax positions we take in our tax returns. Uncertain tax positions are initially recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are initially and subsequently measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and all relevant facts. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. As of December 31, 2013 and 2012, we maintained a valuation allowance against the full amount of our deferred tax assets. Management believes it has taken appropriate positions on its tax returns, although the ultimate outcome of any tax review cannot be predicted with certainty. No assurance can be given that the final outcome of these matters will not be different than what is reflected in the current and historical financial statements.

We recognize interest and penalties related to income tax matters in income tax expense.

As described under "Recent Developments" in Item 1 of Part I of this Annual Report on Form 10-K, we have entered into the M&A Agreement with the intention of selling the Bank. The sale of the Bank could trigger "change of control" rules which may place a limitation on the amount of deferred taxes that may be utilized in future years.

Other financial instruments carried at fair value

We record certain financial instruments at fair value (other than those described above), which inherently require assumptions and judgments in their valuation. Such financial instruments include LHFS, IRLCs, forward sales of mortgage-backed securities, and warrants.

LHFS

Loans originated for sale are carried at fair value. Fair value is determined based on outstanding investor commitments or, in the absence of such commitments, on current investor yield requirements or third party pricing models. Gains and losses on loan sales are determined using the specific-identification method and are recognized through mortgage-banking revenue in the Consolidated Statement of Operations.

IRLCs

We engage an experienced third party to estimate the fair market value of our IRLCs, which are valued based upon mandatory pricing quotes from correspondent lenders less estimated costs to process and settle the loan. Fair value is adjusted for the estimated probability of the loan closing with the borrower. Gains and losses are recognized through mortgage-banking revenue in the Consolidated Statements of Operations.

Table of Contents

Forward sales of mortgage-backed securities

Fair value for forward sales of mortgage-backed securities is determined based upon the quoted market values of the securities. Gains and losses are recognized through mortgage-banking revenue in the Consolidated Statements of Operations.

Warrants

The fair value of warrants is calculated using the Black-Scholes-Merton option-pricing model.

Risk Management

Managing risk is an essential component of successfully operating a financial services company. The risks we face include, but are not limited to, credit, market, liquidity, operational, regulatory compliance, legal, reputational, and strategic. Risk management starts at the top with the Board of Directors who set the tone and culture towards effective risk management and provides oversight and guidance to management regarding corporate goals, strategic planning, risk assessment, management, and bank-wide performance. As a result, our risk management approach includes processes for identifying, assessing, managing, monitoring, and reporting risks. An Enterprise Risk Management (“ERM”) Committee, whose membership includes a broad cross-section of line of business and support representatives, has been implemented to ensure the consistency and adequacy of our risk management approach. In addition, our Internal Audit division provides an independent assessment of our internal control structure and related systems and processes.

The assumption of risk requires robust and active risk management practices that comprise an integrated and comprehensive set of activities, measures, and strategies that apply to the entire organization. We are working on establishing a risk framework that provides the foundations of corporate risk capacity, risk appetite, and risk tolerances. Our risk capacity is represented by our available financial resources. Risk capacity sets an absolute limit on risk-assumption in our annual and strategic plans. Consideration must be given to planned or foreseeable events that would reduce risk capacity.

Risk appetite is the aggregate amount of risk we are willing to accept in pursuit of our strategic and financial objectives. By establishing boundaries around risk taking and business decisions and by incorporating the needs and goals of our stockholders, regulators, rating agencies, and customers, our risk appetite is aligned with our priorities and goals. Risk tolerance is expressed primarily in qualitative terms. Our risk appetite and risk tolerances are supported by appropriate risk targets and risk limits that are used to monitor the amount of risk assumed at a granular level.

While overall risk management oversight and governance is provided by the ERM Committee, this is supplemented by other key management governance committees that specifically monitor ongoing credit, asset/liability, mortgage-banking risk, and regulatory compliance risk. The ERM Committee has also put into place processes for new products and initiatives applicable to every line of business to ensure an appropriate standard readiness assessment is performed before launching a new product or initiative.

Results of Operations and Financial Condition

The following discussion compares our financial condition at December 31, 2013 to the financial condition at December 31, 2012 and results of operations for the years ended December 31, 2013, 2012, and 2011. This discussion should be read in conjunction with our accompanying financial statements and related notes as well as statistical information included elsewhere in this Annual Report on Form 10-K.

Performance Overview

We recorded a net loss of \$19.1 million for 2013 compared to net income of \$16.1 million for 2012, with diluted losses per share totaling \$0.98 for 2013 compared to diluted earnings per share of \$0.85 in 2012.

We experienced significant declines in our mortgage-banking operations during 2013. Volume significantly decreased as did the spreads we realized on loan sales, primarily due to the slightly higher interest rate environment.

Our total classified assets and delinquencies improved during 2013, which reduced the required amount of our allowance for loan losses from \$11.4 million at December 31, 2012 to \$8.6 million at December 31, 2013. Our volume of charge-offs and foreclosures remained high during 2013 as we continued to reduce our level of troubled

assets.

In general, a bank's primary source of revenue is net interest income which, in our case, decreased \$6.3 million in 2013 compared to 2012, primarily due to both a lower volume of and lower yields on interest-earning assets.

39

Table of Contents

Noninterest income decreased \$25.8 million due primarily to decreased mortgage-banking revenue during 2013. Net OTTI charges decreased by \$460,000 from 2012 to 2013. We recognized a \$2.9 million gain on the sale of our minority interest in the former Mariner Finance entity and recognized \$194,000 in gains on the sale of AFS securities. Total expenses increased primarily due to additional compensation, occupancy, and other expenses related to mortgage-banking operations and to an increase in corporate insurance as renewal rates increased in 2013. Additionally, we experienced higher data processing costs due to the conversion of our core processing system to a new system in October of 2012 .

Return on average assets, the quotient of net income divided by total average assets, measures how effectively we utilize the Company's assets to produce income. Our return on average assets was (1.59)% for 2013 compared to 1.31% for 2012.

Our total assets decreased by \$361.7 million, or 26.3%, during 2013, primarily a result of decreased LHFS. Earning assets decreased \$301.4 million, or 27.5%, from \$1.1 billion in 2012 to \$794.6 million in 2013. Deposits decreased by \$261.8 million and short- and long-term borrowings decreased by \$82.0 million from December 31, 2012 to December 31, 2013. Stockholders' deficit increased \$18.5 million, reflecting the 2013 loss, changes in the fair value of warrants, and the issuance of officer stock incentives.

Our asset quality showed improvement from 2012 to 2013 as our level of NPAs decreased from \$56.5 million at December 31, 2012 to \$36.1 million at December 31, 2013. At December 31, 2013, our allowance for loan losses amounted to \$8.6 million, which totaled 23.5% of NPAs plus loans past due 90 days or more as of December 31, 2013 compared to 20.2% as of December 31, 2012. Our level of NPAs amounted to 3.6% of total assets at December 31, 2013 compared to 4.1% of total assets at December 31, 2012. Our ratio of net charge-offs to average total loans was 0.7% in both 2013 and 2012.

Bank capital adequacy levels (as defined by banking regulation) declined from 2012 to 2013, reflecting the 2013 loss; the Bank was considered "undercapitalized" at both December 31, 2013 and December 31, 2012. As of December 31, 2013, the Bank's leverage, Tier I capital to risk-weighted assets, and total capital to risk-weighted assets ratios were 3.3%, 5.6%, and 6.9%, respectively, compared to 3.8%, 6.1%, and 7.3%, respectively, at December 31, 2012. As a result of being below "well capitalized" levels, the Bank is under various operating restrictions and mandates in accordance with agreements with regulators as described in additional detail later in this Item under "Capital Resources."

Results of Operations

Net Interest Income/Margins

Our primary source of earnings is net interest income, which is the difference between the interest income we earn on interest-earning assets, such as loans and securities, and the interest expense we pay on interest-bearing sources of funds, such as deposits and borrowings. Net interest income is a function of several factors, including changes in the volume and mix of interest-earning assets and funding sources, and market interest rates. While management policies influence these factors, external forces, including customer needs and demands, competition, the economic policies of the federal government, and the monetary policies of the FRB, are also determining factors.

Net interest income for 2013 decreased by \$6.3 million to \$25.6 million compared to \$31.9 million for 2012 primarily due to both the decreased volume of and decreased yields on interest-earning assets.

The net interest margin is the key performance measure for our net interest income. Our net interest margin is affected by our loan pricing, our mix of earning assets, levels of NPAs, and our distribution and pricing of deposits and borrowings. Our net interest margin (net interest income divided by average earning assets) decreased to 2.82% for 2013, compared to 3.14% for 2012.

Interest income

Total interest income decreased by \$8.0 million from 2012 to 2013 due primarily to a decrease in the level of average earning assets of \$107.2 million and a decrease in the yields on earning assets from 4.70% to 4.37%. Yields on earning assets continue to be affected by the level of NPAs and corresponding interest reversals.

Average loans outstanding decreased by \$81.7 million. We experienced decreases in all loan segments, with the exception of consumer construction, which increased \$1.5 million, due primarily to our continued efforts to improve the quality of our loan portfolio.

Average LHFS decreased \$72.5 million, due to significantly lower origination volumes. Average securities increased by \$53.4 million. During 2013, we purchased \$102.0 million in securities in order to better utilize our liquidity.

Table of Contents

Interest expense

Interest expense decreased by \$1.7 million to \$14.1 million for 2013 compared to \$15.8 million for 2012. We experienced a decrease in the average rate paid on interest-bearing liabilities, from 1.40% for 2012 to 1.28% for 2013. The decrease in the average rate paid was primarily a result of a decrease in the rate paid on time deposits from 1.45% to 1.22% due to our reduction in rates offered due to our high level of liquidity, as well as a \$66.9 million decrease in average borrowings.

Average interest-bearing deposits increased by \$37.5 million due primarily to an increase in money market and savings accounts and a slight increase in time deposits from our national nonbrokered time deposit program (see description later in this Item under "Deposits"), partially offset by a decrease in NOW accounts. We experienced an increase in the costs of borrowed funds from 2.21% in 2012 to 3.79% in 2013 due to the change in the mix of types of average borrowed funds during 2013. We paid off a significant amount of our FHLB advances and our mortgage loan during 2013.

41

Table of Contents

The table below sets forth the average balances, net interest income and expense, and average yields and rates for our interest-earning assets and interest-bearing liabilities for 2013, 2012, and 2011.

	2013			2012			2011		
	Average Balance	Interest(1)	Yield/ Rate	Average Balance	Interest(1)	Yield/ Rate	Average Balance	Interest(1)	Yield/ Rate
(dollars in thousands)									
ASSETS

The average balances of nonaccrual loans for the years ended December 31, 2013, 2012, and 2011, which are

(2) included in the average loan balances for these years, were \$24.3 million, \$36.4 million, and \$40.1 million, respectively.

(3) Net interest margin is calculated as net interest income divided by average earning assets

Table of Contents

The "Rate/Volume Analysis" (1) below indicates the changes in our net interest income as a result of changes in volume and rates. We maintain an asset and liability management policy designed to provide a proper balance between rate-sensitive assets and rate-sensitive liabilities to attempt to optimize interest margins while providing adequate liquidity for our anticipated needs.

(1) Changes in interest income and interest expense that result from variances in both volume and rates have been allocated to rate and volume changes in proportion to the absolute dollar amounts of the change in each.

Noninterest Income

We derive noninterest income principally from mortgage-banking activities, service fees on our deposit accounts, ATM fees, commissions on sales of nondeposit investment products ("brokerage fees"), and income from BOLI. Our noninterest income for the year ended December 31, 2013 totaled \$62.9 million, compared to \$88.7 million for the year ended December 31, 2012, a decrease of \$25.8 million.

Mortgage-banking revenue decreased from \$82.9 million in 2012 to \$51.8 million in 2013 due primarily to lower pricing on loan sales due to higher mortgage rates. Application volume also decreased in 2013 to \$2.0 billion from \$3.1 billion in 2012.

During 2012, we recognized \$460,000 in net OTTI charges. We did not recognize any such charges during 2013. Noninterest income for 2013 includes a gain on the sale of our minority interest in the former Mariner Finance entity. Noninterest income for 2012 includes write-offs of furniture, fixtures, and leasehold improvements related to the

relocation of a significant portion of our operations.

43

Table of Contents

The following table shows the detail of our noninterest income for the years ended December 31:

	2013	2012	2011
	(dollars in thousands)		
Net OTTI charges on AFS securities	\$—	\$ (460) \$ (838)
Mortgage-banking revenue	51,799	82,905	29,415

Service fees on deposits	2,653	2,563	2,945
Gain on sale of AFS securities, net	194	—	758
Gain (loss) on disposal of premises and equipment	1	(1,271) —
Commissions on sales of nondeposit investment products	278	256	437
Gain on sale of minority interest in Mariner Finance	2,885	—	—
Income from BOLI	994	1,122	1,291
Other	1,852	977	2,015
	\$ 62,910	\$ 88,709	\$ 39,069

Noninterest Expense

Our noninterest expense increased \$4.8 million, or 4.7%, to \$106.6 million compared to \$101.8 million in 2012. Additional compensation, occupancy costs, furniture and fixture expense, and advertising expense were incurred during the period in connection with mortgage-banking activities. We continue to incur significant professional fees for regulatory compliance and capital raise efforts. Write-downs, losses, and costs of real estate acquired through foreclosure decreased \$1.4 million although we continued to take write-downs and aggressively dispose of foreclosed assets. Corporate insurance expense increased as the renewal rates increased in late 2012. ATM servicing expenses decreased as certain ATMs were removed from service. Marketing/promotion costs decreased in 2013 due to cost saving measures. Data processing costs increased due to expenses incurred with our new core processing system.

The following table shows the detail of our other noninterest expense for the years ended December 31:

	2013	2012	2011
	(dollars in thousands)		
Office supplies	\$ 608	\$ 573	\$ 440
Printing	260	406	308

Travel and entertainment	271	289	237
Other	2,208	1,805	1,853
	\$ 6,282	\$ 6,312	\$ 5,966

Income Tax (Benefit) Expense

Due to prior period operating losses and the uncertainty surrounding future profitability, we have established a valuation allowance against the full amount of our deferred taxes. The establishment of the valuation allowance does not preclude the company from realizing these assets in the future.

Table of Contents

As described under "Recent Developments" in Item 1 of Part I of this Annual Report on Form 10-K, we have entered into the M&A Agreement with the intention of selling the Bank. The sale of the Bank could trigger "change of control" rules which may place a limitation on the amount of deferred taxes that may be utilized in future years. We recorded an income tax benefit of \$204,000 on a net loss before taxes of \$19.3 million, which resulted in an effective tax rate of (1.1)% for 2013. We recorded income tax expense of \$163,000 on net income before taxes of \$16.3 million, resulting in an effective tax rate of 1.0% for 2012. The tax benefit in 2013 was the result of a refundable income tax credit.

Financial Condition

At December 31, 2013, our total assets were \$1.0 billion compared to \$1.4 billion at December 31, 2012, a decrease of 26.3%, primarily a result of decreased LHFS. Earning assets decreased \$301.4 million, or 27.5%, from \$1.1 billion in 2012 to \$794.6 million in 2013. Deposits decreased by \$261.8 million and short- and long-term borrowings decreased by \$82.0 million from December 31, 2012 to December 31, 2013. Stockholders' deficit increased \$18.5 million, reflecting the 2013 loss, changes in the fair value of warrants, and the issuance of officer stock incentives.

Securities

We utilize the securities portfolio as part of our overall asset/liability management practices to enhance interest revenue while providing necessary liquidity for the funding of loan growth or deposit withdrawals. We continually monitor the credit risk associated with investments and diversify the risk in the securities portfolios. As of December 31, 2013 and 2012, we held \$123.5 million and \$57.7 million, respectively, in securities classified as AFS. Our securities portfolio at December 31, 2013 was comprised of marketable securities. The maturity structure of our securities portfolio is significantly influenced by the level of prepayment activity on mortgage-backed securities. At December 31, 2013, the average duration of our securities portfolio was 2.0 years, slightly shorter than the average duration of 2.3 years at December 31, 2012, primarily due to the purchase of shorter-term securities in 2013.

AFS securities increased \$65.9 million from December 31, 2012. During 2013, we purchased \$102.0 million in AFS securities in order to utilize some of our excess liquidity. Overall market values of securities have deteriorated slightly as evidenced by a net unrealized loss on securities classified as AFS of \$2.2 million at December 31, 2013 compared to a net unrealized loss of \$1.9 million at December 31, 2012.

Changes in current market conditions, such as interest rates and the economic uncertainties in the mortgage, housing, and banking industries have severely impacted the securities market. The secondary market for various types of securities has been limited and has negatively impacted security values. Quarterly, we review each security in our AFS portfolio to determine the nature of any decline in value and evaluate if any impairment should be classified as OTTI. As of December 31, 2012, we determined that OTTI had occurred with respect to four of our pooled trust preferred securities in the amount of \$460,000. Three of those securities were sold in 2013 for a \$33,000 net gain. No additional OTTI charges were required during 2013.

The trust preferred securities we hold in our securities portfolio were issued by other banks, bank holding companies, and insurance companies. As mentioned above, certain of these securities have experienced declines in credit ratings from credit rating firms, which have devalued these specific securities. While some of these issuers have reported weaker financial performance since acquisition of these securities, in management's opinion, they continue to possess acceptable credit risk. We monitor the actual default rates and interest deferrals for possible losses and contractual shortfalls of interest or principal, which could warrant further recognition of impairment.

All of the remaining securities that are impaired are so due to declines in fair values resulting from changes in interest rates or increased credit/liquidity spreads compared to the time they were purchased. We have the intent to hold these securities to maturity and it is more likely than not that we will not be required to sell the securities before recovery of value. As such, management considers the impairments to be temporary.

Our total investment in trust preferred securities, corporate obligations, common equity securities, and mutual funds totaled \$5.0 million and \$11.2 million as of December 31, 2013 and 2012, respectively.

Table of Contents

Our AFS securities portfolio composition was as follows as of December 31:

	2013	2012	2011	2010	2009
	(dollars in thousands)				
Mortgage-backed securities	\$60,329	\$7,134	\$1,959	\$2,325	\$11,742
Trust preferred securities	3,467	9,181	10,268	10,464	13,338
U.S. government agency notes	56,437	33,537	8,518	12,071	—
U.S. Treasury securities	1,759	5,781	1,004	1,001	1,003
Corporate obligations	—	—	—	1,010	930
Equity securities—banks	804	1,256	151	197	162
Equity securities—mutual funds	742	787	782	758	750
Foreign government bonds	—	—	—	—	350
	\$123,538	\$57,676	\$22,682	\$27,826	\$28,275

The amortized cost, estimated fair values, and weighted average yields of debt securities at December 31, 2013, by contractual maturity, are shown below. Actual maturities may differ from contractual maturities because issuers have the right to call or prepay obligations. Equity securities are excluded as they have no stated maturity.

	Amortized Cost	Unrealized		Estimated Fair Value	Weighted- Average Yield
		Gains	Losses		
	(dollars in thousands)				
Mortgage-backed securities:					
Due after ten years	\$61,541	\$99	\$1,311	\$60,329	2.54%
Trust preferred securities:					
Due after ten years	3,286	210	29	3,467	7.79%
U.S. government agency notes:					
Due within one year	31,528	18	493	31,053	1.40%
Due one to five years	25,749	6	371	25,384	1.13%
U.S. Treasury securities:					
Due within one year	1,758	1	—	1,759	1.40%
	\$123,862	\$334	\$2,204	\$121,992	2.08%

Weighted yields are based on amortized cost. Mortgage-backed securities are assigned to maturity categories based on their final maturity.

LHFS

We originate residential mortgage loans for sale on the secondary market. At December 31, 2013 and 2012, such LHFS amounted to \$60.8 million and \$404.3 million, respectively.

When we sell mortgage loans we make certain representations to the purchaser related to loan ownership, loan compliance and legality, and accurate documentation, among other things. If a loan is found to be out of compliance with any of the representations subsequent to the date of purchase, we may be required to repurchase the loan or indemnify the purchaser for losses related to the loan, depending on the agreement with the purchaser. In addition other factors may cause us to be required to repurchase or "make-whole" a loan previously sold.

The most common reason for a loan repurchase is due to a documentation error or disagreement with an investor or on rare occasions for fraud. Repurchase requests are negotiated with each investor at the time we are notified of the demand and an appropriate reserve is taken at that time. Repurchase and or "make-whole" requests are initially negotiated by the secondary marketing department and monitored by the secondary marketing committee where most disagreements are resolved with no reserve requirement or loss to the Company. In the event there is an unresolved repurchase or "make-whole" request, the loan is managed by the secondary marketing committee and is elevated to be monitored by the mortgage overview committee to determine the final settlement terms with the investor. Repurchases

amounted to \$1.3 million and \$1.6 million during 2013 and 2012, respectively. Our reserve for potential repurchase losses was \$707,000 and \$484,000 as of December 31, 2013 and 2012,

Table of Contents

respectively. We do not expect increases in repurchases or related losses to be a growing trend nor do we see it having a significant impact on our financial results.

Loans

Our loan portfolio is expected to produce higher yields than investment securities and other interest-earning assets; the absolute volume and mix of loans and the volume and mix of loans as a percentage of total earning assets is an important determinant of our net interest margin.

Approximately 87% of our loans receivable are to customers located in the state of Maryland. Loans are extended only after evaluation of customers' creditworthiness and other relevant factors using mortgage industry standard underwriting criteria. For residential mortgage loans, we generally follow Federal National Mortgage Association ("FNMA"), Federal Home Loan Mortgage Corporation ("FHLMC"), FHA, VA, or other secondary marketing standard underwriting guidelines. Conventional mortgage loans with an LTV ratio greater than 80% generally require mortgage insurance. Loans underwritten to FHA or VA guidelines generally have LTV's greater than 95% and have Mortgage Insurance Guarantees from the U.S. Government. For all other loans with real estate collateral, we generally do not lend more than 90% of the appraised value of a property at origination. In addition, we generally obtain personal guarantees of repayment from our borrowers and/or others for commercial (including commercial mortgage) and construction (both commercial and consumer) loans and disburse the proceeds of construction and similar loans only as work progresses on the related projects.

We consider our residential lending to generally involve less risk than other forms of lending, although our payment experience on these loans is dependent, to some extent, on economic and market conditions in our primary lending area. In 2013 and 2012, loss levels on residential mortgage, home equity, and second mortgage loans were significant due to the declines in residential real estate values and higher defaults experienced in these portfolios. Commercial (including commercial mortgage) and construction (both commercial and consumer) loan repayments are generally dependent on the operations of the related properties or the financial condition of the borrower or guarantor.

Accordingly, repayment of such loans can be more susceptible to adverse conditions in the real estate market and the regional economy. We experienced significant losses in both 2013 and 2012 in these loan segments as well.

The following table sets forth the composition of our loan portfolio as of December 31:

	2013	Percent of Total	2012	Percent of Total	2011	Percent of Total	
	(dollars in thousands)						
Commercial	\$45,153	8.1	% \$47,907	7.9	% \$52,842	7.5	%
Commercial mortgage	201,831	36.0	% 263,714	43.2	% 326,530	46.5	%
Commercial construction	40,687	7.3	% 49,902	8.2	% 54,349	7.8	%
Consumer construction	16,489	2.9	% 18,837	3.1	% 16,280	2.3	%
Residential mortgage	146,973	26.2	% 111,345	18.2	% 121,119	17.3	%
Consumer	108,940	19.5	% 118,691	19.4	% 130,631	18.6	%
Total loans	\$560,073	100.0	% \$610,396	100.0	% \$701,751	100.0	%
	2010	Percent of Total	2009	Percent of Total			
	(dollars in thousands)						
Commercial	\$78,801	9.7	% \$77,634	8.7	%		
Commercial mortgage	349,411	43.1	% 339,794	38.1	%		
Commercial construction	58,764	7.2	% 99,490	11.2	%		
Consumer construction	30,792	3.8	% 47,379	5.3	%		
Residential mortgage	144,209	17.8	% 176,159	19.8	%		
Consumer	149,710	18.4	% 150,495	16.9	%		

Total loans \$ 811,687 100.0 % \$ 890,951 100.0 %

Total loans decreased \$50.3 million during 2013. We experienced lower balances in all loan types, with the exception of residential mortgage loans, which increased \$35.6 million. We remained focused on improving asset quality to improve our capital ratios.

Table of Contents

Approximately 45.5% and 41.0% of our loans had adjustable rates (including adjustable-rate first mortgage loans indexed to either U.S. Treasury obligations or LIBOR and variable home equity lines of credit tied to the Prime interest rate) as of December 31, 2013 and 2012, respectively. Our variable-rate loans adjust to the current interest rate environment, whereas fixed rates do not allow this flexibility. If interest rates were to increase in the future, our interest earned on the variable-rate loans would improve, and if rates were to fall, the interest we earn on such loans would decline, thus impacting our interest income. Some variable-rate loans have rate floors and/or ceilings which may delay and/or limit changes in interest income in a period of changing rates. See our discussion in "Interest Rate Sensitivity" later in this Item for more information on interest rate fluctuations.

The following table sets forth the maturity distribution for our loan portfolio at December 31, 2013. Some of our loans may be renewed or repaid prior to maturity. Therefore, the following table should not be used as a forecast of our future cash collections.

	Maturing		After 1 through		After 5 years		Total
	In one year or less		5 years				
	Fixed	Variable	Fixed	Variable	Fixed	Variable	
	(dollars in thousands)						
Commercial	\$24,486	\$3,595	\$13,693	\$2,436	\$411	\$532	\$45,153
Commercial mortgage	91,279	22,863	48,264	22,808	4,653	11,964	201,831
Commercial construction	14,766	4,189	10,187	5,814	2,983	2,748	40,687
Consumer construction	13,456	—	1,112	—	1,921	—	16,489
Residential mortgage	990	2,083	4,545	9,888	42,308	87,159	146,973
Consumer	350	8,726	1,655	48,799	28,307	21,103	108,940
Total loans	\$145,327	\$41,456	\$79,456	\$89,745	\$80,583	\$123,506	\$560,073

Commercial Construction Portfolio

Our commercial construction portfolio consists of construction and development loans for commercial purposes and includes loans made to builders and developers of residential real estate projects. Of the total included above as of December 31, 2013, \$32.4 million represents loans made to borrowers for the development of residential real estate. This segment of the portfolio has exhibited greater weakness (relative to our other loan portfolios) in recent years due to weakness in the residential housing sector.

The breakdown of the portion of the commercial construction portfolio made to borrowers for residential real estate is as follows as of December 31:

	2013	2012
	(dollars in thousands)	
Raw residential land	\$9,791	\$12,126
Residential subdivisions	3,905	4,420
Single residential lots	2,308	3,877
Single family construction	9,929	7,108
Townhome construction	—	685
Multi-family unit construction	6,431	11,109
	\$32,364	\$39,325

Transferred Loans

In accordance with FASB guidance on accounting for certain mortgage-banking activities, any loans which are originally originated for sale into the secondary market and which we subsequently transfer into the Company's loan portfolio are valued at LCM at the time of the transfer with any decline in value recorded as a charge to operating expense. We maintained \$52.4 million and \$17.3 million, respectively, in mortgage loans that were transferred from LHFS to our residential mortgage and consumer loan portfolios at December 31, 2013 and 2012.

Table of Contents

Credit Risk Management

Credit risk is the risk of loss arising from the inability of a borrower to meet his or her obligations and entails both general risks, which are inherent in the process of lending, and risks specific to individual borrowers. Our credit risk is mitigated through portfolio diversification, which limits exposure to any single customer, industry, or collateral type.

We manage credit risk by evaluating the risk profile of the borrower, repayment sources, the nature of the underlying collateral, and other support given current events, conditions, and expectations. We attempt to manage the risk characteristics of our loan portfolio through various control processes, such as credit evaluation of borrowers, establishment of lending limits, and application of lending procedures, including the holding of adequate collateral and the maintenance of compensating balances. However, we seek to rely primarily on the cash flow of our borrowers as the principal source of repayment. Although credit policies and evaluation processes are designed to minimize our risk, management recognizes that loan losses will occur and the amount of these losses will fluctuate depending on the risk characteristics of our loan portfolio, as well as general and regional economic conditions.

Management has an established methodology to determine the adequacy of the allowance for loan losses that assesses the risks and losses inherent in the loan portfolio. Our allowance methodology employs management's assessment as to the level of future losses on existing loans based on our internal review of the loan portfolio, including an analysis of the borrowers' current financial position, and the consideration of current and anticipated economic conditions and their potential effects on specific borrowers and/or lines of business. In determining our ability to collect certain loans, we also consider the fair value of any underlying collateral. In addition, we evaluate credit risk concentrations, including trends in large dollar exposures to related borrowers, industry and geographic concentrations, and economic and environmental factors.

For purposes of determining the allowance for loan losses, we have segmented our loan portfolio by product type. Our loan segments are commercial, commercial mortgage, commercial construction, consumer construction, residential mortgage, and consumer. We have looked at all segments to determine if subcategorization into classes is warranted based upon our credit review methodology and have divided consumer loans into two classes, (1) home equity and second mortgage loans and (2) other consumer loans. For each class of loan, significant judgment is exercised to determine the estimation method that fits the credit risk characteristics of its portfolio segment. We use internally developed models in this process. Management must use judgment in establishing additional input metrics for the modeling processes. The models and assumptions used to determine the allowance are independently validated and reviewed to ensure that their theoretical foundation, assumptions, data integrity, computational processes, reporting practices, and end-user controls are appropriate and properly documented.

To establish the allocated portion of the allowance for loan losses, which we do on a quarterly basis, loans are pooled by portfolio class and an historical loss percentage is applied to each class. The historical loss percentage is based upon a rolling 24-month history, which gives us the most current and relevant charge-off data. The result of that calculation for each loan class is then applied to the current loan portfolio balances to determine the required allocated portion of the allowance for loan loss level per loan class. We then apply additional loss multipliers to the different classes of loans to reflect various environmental factors. Such factors include general economic and business conditions affecting key lending areas, credit quality trends (including trends in delinquencies and nonperforming loans expected to result from existing conditions), loan volumes, loan concentrations by class and geography and any changes in such concentrations, specific industry conditions within portfolio categories, duration of the current business cycle, bank regulatory examination results, and management's judgment with respect to various other conditions including changes in management, including credit, loan administration, and origination staff, changes in underwriting standards, lending policies, and procedures, the impact of any new or modified lines of business, level and trends in nonaccrual and delinquent loans and charge-offs, changes in underlying collateral for collateral dependent loans, and management and the quality of risk identification systems. Management reviews these conditions quarterly. Economic factors are an important consideration in determining the adequacy of the loan loss allowance. A strong regional and national economy will reduce the probability of losses. Weaker regional and

national economies will usually result in higher unemployment, higher vacancies in commercial real estate, and declining values on both commercial and residential properties, which will gradually increase the probability of losses. Key measures of economic strength or weakness are unemployment levels, interest rates, and economic growth and confidence.

For individually evaluated loans (impaired loans), we do additional analyses to determine the impairment amount (see below for more detail on impaired loans). In general, this impairment amount is included as an allocated portion of the allowance for loan losses for TDRs and is charged off for all other impaired loans. These loss estimates are performed under multiple economic scenarios to establish a range of potential outcomes for each criterion.

Management applies judgment to develop its own view of loss probability within that range, using external and internal parameters with the objective of establishing an allowance for loss inherent within these portfolios as of the reporting date.

See our charge-off policies under "Critical Accounting Policies — Allowance for loan losses" above.

Table of Contents

See information on partial charge-offs later in this section.

Commercial

Credit risk in commercial lending, which includes commercial, commercial mortgage, commercial construction, and consumer construction loans, can vary significantly, as losses as a percentage of outstanding loans can shift widely during economic cycles and are particularly sensitive to changing economic conditions.

The risks associated with each portfolio class are as follows:

Commercial and Commercial Mortgage - The primary loan-specific risks in commercial and commercial mortgage loans are: deterioration of the business and/or collateral values, deterioration of the financial condition of the borrowers and/or guarantors, which creates a risk of default, and the risk that real estate collateral values determined through appraisals are not reflective of the true property values.

Portfolio risk includes condition of the economy, changing demand for these types of loans, large concentration of these types of loans, and geographic concentrations of these types of loans.

Commercial and Consumer Construction — loan-specific and portfolio risks related to commercial and consumer construction loans also carry the loan-specific and portfolio risks of commercial and commercial mortgage loans as described above. Additional loan-specific risks include project budget overruns and performance variables related to the contractor and subcontractors. An additional loan-specific risk for commercial construction of residential developments is the risk that the builder has a geographical concentration of developments.

In general, improving economic conditions result in improved operating results on the part of commercial customers, enhancing their ability to meet debt service requirements. However, any improvements in operating cash flows can be offset by the impact of rising interest rates that could occur during improved economic times. Declining economic conditions have an adverse effect on the operating results of commercial customers, reducing their ability to meet debt service obligations.

Our commercial loans are generally reviewed individually, in accordance with FASB guidance on accounting for loan impairment, to determine impairment, accrual status, and the need for an allocated allowance. We use creditworthiness categories to grade commercial loans. Our internal grading system is based on experiences with similarly graded loans and incorporates a variety of risk considerations, both qualitative and quantitative (see definitions of our various grades and the composition of our loan portfolio within those grades in Note 6 to the Consolidated Financial Statements). Quantitative factors include collateral values, financial condition of borrowers, and other factors. Qualitative factors include judgments concerning general economic conditions that may affect credit quality, credit concentrations, the pace of portfolio growth, and delinquency levels; these qualitative factors are evaluated in connection with the unallocated portion of our allowance for loan losses (see below). We periodically engage outside firms and experts to independently assess our methodology and perform various loan review functions.

Consumer

Our consumer portfolio includes first- and second-lien mortgage loans and other loans to individuals. The risks associated with each portfolio class are as follows:

Residential Mortgage, Home Equity, and 2nd Mortgage — The primary loan-specific risks related to residential mortgage, home equity, and 2nd mortgage lending include: unemployment, deterioration in real estate values, our ability to assess the creditworthiness of the customer, deterioration in the borrowers financial condition, whether the result of personal issues or a general economic downturn, and the risk that property values determined through appraisals are not reflective of the true property values. The portfolio risks for these types of loans are the same as for commercial and commercial mortgages as described above.

Other Consumer - The primary loan-specific risks of consumer loans are: unemployment, deterioration of the borrower's financial condition, whether the result of personal issues or a general economic downturn, and for certain consumer loans such as auto loans and boat loans, there is also a risk of deterioration in the value of the collateral. The portfolio risks for these types of loans are the same as for commercial and commercial mortgages as described above.

Generally, consumer loans are segregated into homogeneous pools with similar risk characteristics. We do not individually grade consumer loans. Such loans are classified as performing or nonperforming. Trends such as delinquency and loss and current economic conditions in consumer loan pools are analyzed and historical loss experience is adjusted accordingly. Quantitative and qualitative adjustment factors for the different consumer portfolios are consistent with those for the commercial portfolios.

Table of Contents

In calculating the environmental factor portion of our allowance, we apply certain basis points to the respective portfolios. The addition of these factors represents the top range for the required reserves for the respective portfolios and are shown in the following tables as of December 31, 2013 and 2012:

	2013					
	Commercial	Commercial	Commercial	Consumer	Residential	Consumer
	(in basis points)	Mortgage	Construction	Construction	Mortgage	
Concentration of credit and changes in level of concentration	—	5	5	8	10	—
Nature and volume of portfolio	—	25	25	4	4	—
Changes in lines of business	5	—	—	—	—	5
Trends of past due and classified loans	11	10	10	8	7	—
Economic factors	22	22	22	12	12	46
Value of underlying collateral for collateral dependent loans	—	25	25	23	23	5
	38	87	87	55	56	56
	2012					
	Commercial	Commercial	Commercial	Consumer	Residential	Consumer
	(in basis points)	Mortgage	Construction	Construction	Mortgage	
Concentration of credit and changes in level of concentration	—	5	5	8	10	—
Nature and volume of portfolio	—	25	25	4	4	—
Trends of past due and classified loans	15	17	17	8	8	—
Economic factors	24	24	24	14	14	48
Value of underlying collateral for collateral dependent loans	—	25	25	23	23	5
	39	96	96	57	59	53

Each of the above factors is evaluated quarterly. The factors applied to most loan segments were decreased in 2013 based primarily upon our evaluation of the trends of delinquencies, classified loans, and the economic environment over the past few years. We added factors for changes in lines of business in 2013 to reflect our goal of reducing real estate concentration risk exposure, and correspondingly, increase production of commercial and consumer loans. We have risk management practices designed to ensure timely identification of changes in loan risk profiles; however, undetected losses may inherently exist within the loan portfolio. The assessments aspects involved in analyzing the quality of individual loans and assessing collateral values can also contribute to undetected, but probable, losses. See additional detail on our allowance methodology and risk rating system in Note 6 to the Consolidated Financial Statements in Item 8 of Part II of this Annual Report on Form 10-K.

Table of Contents

The following table summarizes the activities in our allowance for loan losses by portfolio segment for the years ended December 31:

	2013	2012	2011	2010	2009	
	(dollars in thousands)					
Allowance for loan losses, beginning of year	\$ 11,434	\$ 13,801	\$ 14,115	\$ 11,639	\$ 16,777

Based upon management's evaluation, provisions are made to maintain the allowance as a best estimate of inherent losses within the portfolio. The allowance for loan losses totaled \$8.6 million and \$11.4 million as of December 31, 2013 and 2012, respectively. Any changes in the allowance from period to period reflect management's ongoing application of its methodologies to establish the allowance, which, in 2013, included increases in the allowance for the commercial construction and consumer construction loan segments. Recent economic conditions have had a broad impact on our loan portfolio as a whole. The changes in the allowances for the respective loan segments were primarily a function of the changes in the corresponding loan balances and asset quality.

The provision for loan losses recognized to maintain the allowance was \$1.3 million for 2013 compared to \$2.6 million for 2012. Our allowance as a percentage of outstanding loans has decreased from 1.9% as of December 31, 2012 to 1.5% as of December 31, 2013 as our overall level of delinquencies and classified assets decreased. We recorded net charge-offs of \$4.1 million during 2013 compared to net charge-offs of \$4.9 million during 2012. Net charge-offs as compared to average loans remained stable at 0.7% for both 2013 and 2012. We still recorded a significant amount of charge-offs as a result of our policy to charge off all fair value deficiencies instead of carrying an allocated reserve (except with respect to nonaccrual TDRs). Partial charge-offs of nonaccrual loans decrease the

amount of nonperforming and impaired loans, as well as any allocated allowance attributable to that loan. They decrease our allowance for loan losses, as well as our allowance for loan losses to nonperforming loans ratio and our allowance for loan losses to total loans ratio. Partial charge-offs increase our net charge-offs to average loans ratio. Total partial charge-offs of nonaccrual loans for 2013 and 2012 amounted to \$1.2 million and \$2.0 million, respectively. The total amount of nonaccrual loans (prior to charge-offs) for which we recorded partial charge-offs for 2013 and 2012 amounted to \$19.1 million and \$15.1 million, respectively.

Table of Contents

In addition to the significant amount of charge-offs, transfers to real estate acquired through foreclosure continued to be significant during 2013.

Although management uses available information to establish the appropriate level of the allowance for loan losses, future additions or reductions to the allowance may be necessary based on estimates that are susceptible to change as a result of changes in economic conditions and other factors. As a result, our allowance for loan losses may not be sufficient to cover actual loan losses, and future provisions for loan losses could materially adversely affect our operating results. In addition, various regulatory agencies, as an integral part of their examination process, periodically review our allowance for loan losses and related methodology. Such agencies may require us to recognize adjustments to the allowance based on their judgments about information available to them at the time of their examination.

Management believes the allowance for loan losses is adequate as of December 31, 2013 and is sufficient to address the credit losses inherent in the current loan portfolio. We based this determination on several factors:

- we maintain appropriate oversight committees to track deteriorating credits thereby timely identifying potential problems and noting when current appraisals are due;
- we individually analyze all NPAs and all credits risk rated 8 or above for impairment and we immediately charge off any deficiencies in collateral value that is identified in the impairment analysis (thus, placing all NPAs and risk-ratings ("RR") of RR8 at fair value) (see additional detail related to risk ratings in Note 6 to the Consolidated Financial Statements);
- we calculate our required allocated reserves based upon a rolling 24-month average of actual charge-offs, thereby utilizing current trend data of actual losses and apply these calculated loss percentages to our current loan balance by loan class to determine the required allocated reserves;
- we apply environmental factors to each loan segment, which is meant to cover any negative economic and business trends that may develop; and

the combination of the required reserve calculated using trend data plus application of the environmental factors results in a total range for our allowance for loan losses and our allowance for loan losses has been within the estimated ranges.

Our determination of the appropriate allowance level is based upon a number of assumptions we make about future events, which we believe are reasonable, but which may or may not prove valid. Thus, there can be no assurance that our charge-offs in future periods will not exceed our allowance for loan losses or that we will not need to make additional increases in our allowance for loan losses.

NPAs and Loans 90 Days Past Due and Still Accruing

Given the volatility of the real estate market, it is very important for us to have current appraisals on our NPAs. Generally, we annually obtain appraisals on NPAs. In addition, as part of our asset monitoring activities, we maintain a Workout Committee that meets three times per month. During these Workout Committee meetings, all NPAs and loan delinquencies are reviewed. We also produce an NPA report which is distributed weekly to senior management and is also discussed and reviewed at the Workout Committee meetings. This report contains all relevant data on the NPAs, including the latest appraised value and valuation date. Accordingly, these reports identify which assets will require an updated appraisal. As a result, we have not experienced any internal delays in identifying which loans/credits require appraisals. With respect to the ordering process of the appraisals, we have not experienced any delays in turnaround time nor has this been an issue over the past three years. Furthermore, we have not had any delays in turnaround time or variances thereof in our specific loan operating markets.

NPAs, expressed as a percentage of total assets, totaled 3.6% at December 31, 2013 and 4.1% at December 31, 2012. The ratio of allowance for loan losses to nonperforming loans was 39.9% at December 31, 2013 and 29.7% at December 31, 2012. The increase in this ratio from 2012 to 2013 was a reflection of the decrease in the amount of nonperforming loans. Part of the decrease in nonperforming loans was due to full and partial charge-offs of nonperforming loans that existed at December 31, 2012. We record a significant amount of charge-offs as it is our policy to charge off all fair value deficiencies instead of carrying an allocated reserve (except with respect to nonaccrual TDRs).

Table of Contents

The distribution of our NPAs and loans greater than 90 days past due and accruing is illustrated in the following table at December 31:

	2013	2012	2011	2010	2009
Nonaccruing loans:	(dollars in thousands)				
Commercial	\$289	\$2,110	\$4,566	\$1,501	\$535
Commercial mortgage	7,744	21,269	16,955	26,991	9,773

Consumer construction	214	403	2,768	3,553	4,203
Residential mortgage	2,503	4,540	5,655	7,154	2,098
Consumer	—	88	—	67	1,870
	14,596	18,058	25,235	21,185	21,630
Total nonperforming assets	\$36,139	\$56,518	\$61,913	\$71,744	\$57,429
Loans past-due 90 days or more and accruing:					
Commercial	\$—	\$—	\$30	\$—	\$499
Commercial mortgage	125	—	1,272	1,952	3,886
Commercial construction	—	—	2,032	250	—
Consumer construction	—	—	238	—	—
Residential mortgage	303	222	2,500	776	4,651
Consumer	1	—	244	—	188
	\$429	\$222	\$6,316	\$2,978	\$9,224

For information on nonaccruing TDRs, see table under "TDRs" later in this section.

Nonaccrual loans decreased \$16.9 million from December 31, 2012 to \$21.5 million at December 31, 2013. The commercial loan nonaccrual balance consisted of three loans, with the largest balance amounting to \$113,000. All of the nonaccrual commercial loans as of December 31, 2013 were also in nonaccrual status as of December 31, 2012. Of the \$2.1 million in nonaccrual commercial loans as of December 31, 2012, one loan for \$736,000 was transferred to real estate acquired through foreclosure, one loan in the amount of \$35,000 was charged off, two loans in the amount of \$762,000 were placed back in accrual status, and three loans in the amount of \$258,000 were paid off during 2013. The commercial mortgage loan nonaccrual balance consisted of 15 loans, with the largest balance amounting to \$2.7 million. Of the \$7.7 million commercial mortgage balance in nonaccrual status as of December 31, 2013, five loans totaling \$3.6 million were placed on nonaccrual status during 2013. All of the remaining nonaccrual commercial mortgage loans were in nonaccrual status as of December 31, 2012. Of the balance at December 31, 2012, \$10.6 million in commercial mortgage loans were transferred to real estate acquired through foreclosure during 2013, \$431,000 were charged off, one loan in the amount of \$322,000 was placed back in accrual status, and \$5.5 million were paid off in 2013.

The commercial construction nonaccrual balance consisted of six loans, with the largest balance amounting to \$2.6 million, which was also the only commercial construction loan placed in nonaccrual status in 2013. All of the remaining nonaccrual commercial construction loans were in nonaccrual status as of December 31, 2012. Of the \$4.6 million in commercial construction loans in nonaccrual status as of December 31, 2012, \$515,000 were paid off, \$134,000 were charged off, and \$276,000 were transferred to real estate acquired through foreclosure during 2013.

Table of Contents

The consumer construction nonaccrual balance consisted of one loan, which was placed in nonaccrual status during 2013. Of the \$645,000 in consumer construction loans in nonaccrual status at December 31, 2012, four loans in the amount of \$563,000 were paid off in 2013 and three loans in the amount of \$82,000 were charged off in 2013. The residential mortgage nonaccrual balance consisted of 24 loans, with the largest balance amounting to \$690,000. We placed \$2.9 million of these loans in nonaccrual status during 2013. Of the \$8.8 million balance of nonaccrual residential mortgage loans at December 31, 2012, we transferred \$1.6 million to real estate acquired through foreclosure, received pay offs of \$3.1 million, returned \$84,000 to accrual status, and charged off \$548,000 in 2013. The consumer loan nonaccrual balance consisted of 14 loans, six of which were placed in nonaccrual status during 2013. These loans are well secured and we have determined that they do not require charge off as of December 31, 2013.

The interest which would have been recorded on nonaccrual loans if those loans had been performing in accordance with their contractual terms was approximately \$651,000, \$1.7 million, and \$2.2 million in 2013, 2012, and 2011, respectively. The actual interest income recorded on those loans in 2013, 2012, and 2011 was approximately \$307,000, \$552,000, and \$827,000, respectively.

Real estate acquired through foreclosure decreased \$3.5 million when compared to December 31, 2012. The activity in our real estate acquired through foreclosure was as follows for the years ended December 31:

	2013	2012	2011
	(dollars in thousands)		
Balance at beginning of period	\$ 18,058	\$ 25,235	\$ 21,185
Real estate acquired in satisfaction of loans	12,977	7,565	18,699
Write-downs and losses on real estate acquired through foreclosure	(4,015) (4,032) (6,976
Proceeds from sales of real estate acquired through foreclosure	(12,445) (10,710) (8,802
Additional funds disbursed on real estate acquired through foreclosure	21	—	1,754
Other	—	—	(625
Balance at end of period	\$ 14,596	\$ 18,058	\$ 25,235

Loans 90 days delinquent and accruing, which are loans that are well secured and in the process of collection, increased from \$222,000 at December 31, 2012 to \$429,000 as of December 31, 2013. At December 31, 2013, we held two commercial mortgage loans in the amount of \$125,000, two residential mortgage loans in the amount of \$303,000, and two consumer loans in the amount of \$1,000 that were greater than 90 days past due and still accruing. We held \$222,000 (residential mortgage) in such loans at December 31, 2012.

Not all of the loans newly classified as nonaccrual since December 31, 2012 required impairment reserves, as some of the loans' collateral had estimated fair values greater than the carrying amount of the loan or the loan has been written down to its estimated fair value. Additionally, in general, we charge off all impairment amounts immediately for all loans that are not TDRs.

TDRs

In situations where, for economic or legal reasons related to a borrower's financial difficulties, management may grant a concession for other than an insignificant period of time to the borrower that would not otherwise be considered, the related loan is classified as a TDR. Such concessions could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance, or other actions. These loans are excluded from pooled loss forecasts and a separate allocated portion of the allowance is provided under the accounting guidance for loan impairment. At the time that a loan is modified, management evaluates any possible impairment based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan agreement, except when the sole remaining source of repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. Any impairment amount is then set up as an allocated portion of the allowance.

Table of Contents

The composition of our TDRs is illustrated in the following table at December 31:

	2013	2012	2011	2010	2009
Commercial:	(dollars in thousands)				
Nonaccrual	\$—	\$—	\$22	\$—	\$—

90 days or more and accruing	\$—	\$—	\$2,164	\$450	\$638
< 90 days past due/current	\$37,875	\$37,450	\$23,178	\$20,961	\$12,410
	\$43,764	\$45,964	\$27,847	\$24,177	\$15,258

The interest income which would have been recorded on TDRs if those loans had been performing in accordance with their original contractual terms was approximately \$1.5 million in 2013, \$1.8 million in 2012, and \$1.2 million in 2011 and the actual interest income recorded on these loans in 2013, 2012, and 2011 was approximately \$914,000, \$1.0 million, and \$713,000, respectively.

Table of Contents

The following tables show the breakdown of loans modified during the years ended December 31:

	2013			2012		
	Number of Modifications	Recorded Investment Prior to Modification	Recorded Investment After Modification	Number of Modifications	Recorded Investment Prior to Modification	Recorded Investment After Modification
	(dollars in thousands)

Not all of the loans newly classified as impaired since December 31, 2012 required impairment reserves, as some of the loans' collateral had estimated fair values greater than the carrying amount of the loan or the loan has been written down to its estimated fair value. Additionally, in general, we charge off all impairment amounts immediately for all loans that are not TDRs.

Deposits

We use deposits as the primary source of funding of our loans. We offer individuals and businesses a wide variety of deposit accounts. These accounts include checking, NOW, savings, money market, and certificates of deposit (time deposits) and are obtained primarily from communities we serve.

Deposits totaled \$925.0 million at December 31, 2013, a decrease of \$261.8 million, or 22.1%, from the December 31, 2012 level. We experienced decreases in all deposit categories, with the exception of NOW accounts, which increased \$9.6 million, and savings accounts, which increased \$1.8 million. Increases in NOW and savings accounts were the result of successful marketing campaigns. The decrease in time deposits was primarily a result of maturities within our nonbrokered national time deposit portfolio, which time deposits are derived from a program whereby the Bank utilizes several nonbrokered rate listing services to provide incremental funding as needed. We pay an annual subscription fee for the privilege of posting rates on their websites. The subscription-based services allow the Bank to place or receive funds from other subscribers. Requests to invest are placed through the listing website and the account is funded by wire. At the present time, only financial institutions are allowed to place funds with the Bank.

Table of Contents

The following table details the average amount and the average rate paid for each category of deposits for the years ended December 31:

	2013		2012		2011			
	Average Balance	Average Rate	Average Balance	Average Rate	Average Balance	Average Rate		
	(dollars in thousands)							
NOW	\$4,337	0.16	% \$5,567	0.83	% \$6,182	0.27	%	
Savings	63,188	0.15	% 58,453	0.43	% 57,450	0.19	%	
Money market	164,969	0.40	% 138,764	0.55	% 127,584	0.56	%	
Time	761,387	1.22	% 753,580	1.45	% 743,309	1.99	%	
Total interest-bearing deposits	993,881	1.01	% 956,364	1.25	% 934,525	1.68	%	
Noninterest-bearing demand deposits	101,510		101,727		103,201			
Total deposits	\$1,095,391	0.92	% \$1,058,091	1.13	% \$1,037,726	1.51	%	

The following table provides the maturities of certificates of deposit in amounts of \$100,000 or more at December 31:

	2013	2012
	(dollars in thousands)	
Maturing in:		
3 months or less	\$60,533	\$62,327
Over 3 months through 6 months	46,563	53,486
Over 6 months through 12 months	184,323	269,029
Over 12 months	128,814	243,547
	\$420,233	\$628,389

Core deposits represent deposits which we believe will not be affected by changes in interest rates and, therefore, will be retained regardless of the movement of interest rates. We consider our core deposits to be all noninterest-bearing, NOW, money market's less than \$100,000, and saving deposits, as well as all time deposits less than \$100,000 that mature in greater than one year. At December 31, 2013 and 2012, our core deposits were \$341.8 million and \$358.9 million, respectively. The remainder of our deposits could be susceptible to attrition due to interest rate movements.

Borrowings

Our borrowings consist of short-term promissory notes issued to certain qualified investors, short-term and long-term advances from the FHLB, and a mortgage loan. Our short-term promissory notes are in the form of commercial paper, which reprice daily and have maturities of 270 days or less. Our advances from the FHLB may be in the form of short-term or long-term obligations. Short-term advances have maturities for one year or less and may contain prepayment penalties. Long-term borrowings through the FHLB have original maturities up to 15 years and generally contain prepayment penalties.

The FHLB advances are available under a specific collateral pledge and security agreement, which requires that we maintain collateral for all of our borrowings equal to 125% of advances. We may pledge as collateral specific first- and second-lien mortgage loans or commercial mortgages up to 10% of the Bank's total assets. Long-term FHLB advances are fixed-rate instruments with various call provisions. Generally, short-term advances are in the form of overnight borrowings with rates changing daily. At December 31, 2013, our total available credit line with the FHLB was \$108.3 million. Our outstanding FHLB advance balance at December 31, 2013 and 2012 was \$40.0 million and \$117.0 million, respectively.

Long-term borrowings, which totaled \$25.0 million at December 31, 2013, consist of long-term advances from the FHLB. At December 31, 2012, long-term borrowings consisted of a mortgage loan on our former headquarters building (\$8.5 million) that was paid off during 2013 and \$65.0 million in long-term FHLB advances.

Short-term borrowings consist of short-term promissory notes and short-term advances from the FHLB. These borrowings decreased from \$53.5 million at December 31, 2012 to \$20.0 million at December 31, 2013 due to the payoff of a significant amount of our FHLB advances in 2013. We held \$52.0 million in short-term FHLB advances at December 31, 2012.

In the past, to further our funding and capital needs, we raised capital by issuing the MCT Trusts, which are wholly-owned by First Mariner. The MCT Trusts used the proceeds from the sales of the Trust Preferred Securities, combined with First Mariner's equity investment in these MCT Trusts, to purchase subordinated deferrable interest debentures from First Mariner.

Table of Contents

The debentures are the sole assets of the MCT Trusts. Aggregate debentures outstanding as of both December 31, 2013 and 2012 totaled \$52.1 million.

The Trust Preferred Securities are mandatorily redeemable, in whole or in part, upon repayment of their underlying subordinated debentures at their respective maturities or their earlier redemption date at our option. As of December 31, 2013, all redemption dates have passed.

In 2009, we elected to defer interest payments on the debentures. This deferral was permitted by the terms of the debentures and did not constitute an event of default thereunder at the time of the initial deferral. Interest on the debentures and dividends on the related Trust Preferred Securities continued to accrue and was due to be paid in full prior to the expiration of the deferral period in January of 2014. However, due to our agreements with the regulators (see details under "Capital Resources" below), we are not currently permitted to make such interest payments and as of January, 2014 are in default with respect to these borrowings. See additional information regarding these debentures and the Chapter 11 Proceeding under "Recent Developments" in Item 1 of Part I of this Annual Report on Form 10-K.

First Mariner has fully and unconditionally guaranteed all of the obligations of the MCT Trusts.

Under applicable regulatory guidelines, a portion of the Trust Preferred Securities may qualify as Tier I capital, and the remaining portion may qualify as Tier II capital, with certain limitations. At December 31, 2013, none of our outstanding Trust Preferred Securities qualify as either Tier I or Tier II capital due to limitations.

See Notes 9 and 10 to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report on Form 10-K for further details about our borrowings.

Capital Resources

Stockholders' deficit increased \$18.5 million in 2013 to a deficit of \$26.9 million from a deficit of \$8.4 million as of December 31, 2012.

Common stock and additional paid-in-capital increased by \$1.0 million due primarily to the change in the value of the outstanding warrants and the issuance of stock to certain officers. Accumulated other comprehensive loss, which is derived from the fair value calculations for AFS securities, increased by \$386,000. Accumulated deficit increased by the net loss of \$19.1 million for 2013.

Banking regulatory authorities have implemented strict capital guidelines directly related to the credit risk associated with an institution's assets. Banks and bank holding companies are required to maintain capital levels based on their "risk-adjusted" assets so that categories of assets with higher "defined" credit risks will require more capital support than assets with lower risk. Additionally, capital must be maintained to support certain off-balance sheet instruments. Capital is classified as Tier I capital (common stockholders' deficit) less certain intangible assets plus a portion of the Trust Preferred Securities) and Total Capital (Tier I plus the allowed portion of the allowance for loan losses plus any off-balance sheet reserves and the allowable portion of Trust Preferred Securities not included in Tier I capital).

Minimum required levels must at least equal 4% for Tier I capital and 8% for Total Capital. In addition, institutions must maintain a minimum 4% leverage capital ratio (Tier I capital to average quarterly assets).

We regularly monitor the Company's capital adequacy ratios to assure that the Bank meets its regulatory capital requirements. As of both December 31, 2013 and 2012, the Bank was "undercapitalized" under the regulatory framework for prompt corrective action, although, as of both December 31, 2013 and 2012, the Bank's Tier I capital ratio met minimal adequacy requirements.

Table of Contents

The regulatory capital ratios are shown below at December 31:

	2013	2012	2011	Minimum Requirements for Capital Adequacy Purposes	To be Well Capitalized Under Prompt Corrective Action Provision
Leverage:					
Consolidated	(2.4)%	(0.5)%	(1.9)%	4.0	% 5.0
Bank	3.3 %	3.8 %	3.0 %	4.0	% 5.0
Tier I capital to risk-weighted assets:					
Consolidated	(4.0)%	(0.8)%	(2.6)%	4.0	% 6.0
Bank	5.6 %	6.1 %	4.2 %	4.0	% 6.0
Total capital to risk-weighted assets:					
Consolidated	(4.0)%	(0.8)%	(2.6)%	8.0	% 10.0
Bank	6.9 %	7.3 %	5.5 %	8.0	% 10.0

On September 18, 2009, the Bank entered into the September Order with the FDIC and the Commissioner, which directs the Bank to (i) increase its capitalization, (ii) improve earnings, (iii) reduce nonperforming loans, (iv) strengthen management policies and practices, and (v) reduce reliance on noncore funding. The September Order required the Bank to adopt a plan to achieve and maintain a leverage capital ratio of at least 7.5% and a total risk-based capital ratio of at least 11% by June 30, 2010. We did not meet the requirements at June 30, 2010, and have continued not to meet such capital requirements. The failure to achieve these capital requirements could result in further action by our regulators.

As part of the September Order, within 30 days after the end of each calendar year, the Bank must submit an annual budget and profit plan and a plan that takes into account the Bank's pricing structure, the Bank's cost of funds and how this can be reduced, and the level of provision expense for adversely classified loans. To address reliance on noncore funding, the Bank has adopted and submitted a liquidity plan to reduce the Bank's reliance on noncore funding, wholesale funding sources, and high-cost rate-sensitive deposits. While the September Order is in effect, the Bank may not pay dividends or management fees without the FDIC's prior consent, may not accept, renew, or roll over any brokered deposits, and is restricted in the yields that it may pay on deposits. As of December 31, 2013, we have met substantially all provisions of the September Order with the exception of the capital requirements.

First Mariner is also a party to the FRB Agreements which require it to: (i) develop and implement a strategic business plan that includes (a) actions that will be taken to improve our operating performance and reduce the level of parent company leverage, (b) a comprehensive budget and an expanded budget review process, (c) a description of the operating assumptions that form the basis for major projected income and expense components and provisions needed to maintain an adequate loan loss reserve, and (d) a capital plan incorporating all capital needs, risks, and regulatory guidelines; and (ii) submit plans to improve enterprise-wide risk management and effectiveness of internal audit programs. First Mariner has also agreed to provide the FRB with advance notice of any significant capital transactions. The FRB Agreements also prohibit First Mariner and the Bank from taking any of the following actions without the FRB's prior written approval: (i) declaring or paying any dividends; (ii) taking dividends from the Bank; (iii) making any distributions of interest, principal, or other sums on First Mariner's subordinated debentures or trust preferred securities; (iv) incurring, increasing, or guaranteeing any debt; or (v) repurchasing or redeeming any shares of its stock. To satisfy the FRB's minimum capital requirements, First Mariner's consolidated leverage, Tier I capital to risk-weighted assets, and total capital to risk-weighted assets ratios at each quarter end must be at least 4.0%, 4.0%, and 8.0%, respectively. At December 31, 2013, those capital ratios were (2.4)%, (4.0)%, and (4.0)%, respectively, which were not in compliance with the minimum requirements. The failure to achieve these capital requirements could result in further action by our regulators.

The foregoing will subject us to increased regulatory scrutiny and may have an adverse impact on our business operations. Failure to comply with the provisions of these regulatory requirements may result in more restrictive actions from our regulators, including more severe and restrictive enforcement actions.

See information on the M&A Agreement and Chapter 11 Proceeding under "Recent Developments" in Item 1 of Part I of this Annual Report on Form 10-K.

Table of Contents

New Capital Rules

In July 2013, the FRB and the FDIC, approved final rules establishing a new comprehensive capital framework for U.S. banking organizations. The New Capital Rules generally implement the Basel Committee's December 2010 final capital framework referred to as "Basel III" for strengthening international capital standards. The New Capital Rules substantially revise the risk-based capital requirements applicable to bank holding companies and their depository institution subsidiaries, including us and the Bank, as compared to the current U.S. general risk-based capital rules. The New Capital Rules revise the definitions and the components of regulatory capital, as well as address other issues affecting the numerator in banking institutions' regulatory capital ratios. The New Capital Rules also address asset risk weights and other matters affecting the denominator in banking institutions' regulatory capital ratios and replace the existing general risk-weighting approach, which was derived from the Basel Committee's 1988 "Basel I" capital accords, with a more risk-sensitive approach based, in part, on the "standardized approach" in the Basel Committee's 2004 "Basel II" capital accords. In addition, the New Capital Rules implement certain provisions of the Dodd-Frank Act, including the requirements of Section 939A to remove references to credit ratings from the federal agencies' rules. The New Capital Rules are effective for the Company and the Bank on January 1, 2015, subject to phase-in periods for certain of their components and other provisions. Management is currently evaluating the provisions of the final rules and their expected impact.

Liquidity

Liquidity describes our ability to meet financial obligations, including lending commitments and contingencies, which arise during the normal course of business. Liquidity is primarily needed to meet the borrowing and deposit withdrawal requirements of our customers, to fund the operations of our mortgage-banking business, as well as to meet current and planned expenditures. These cash requirements are met on a daily basis through the inflow of deposit funds, the maintenance of short-term overnight investments, maturities and calls in our securities portfolio, and available lines of credit with the FHLB, which require pledged collateral. Fluctuations in deposit and short-term borrowing balances may be influenced by the interest rates paid, general consumer confidence, and the overall economic environment. There can be no assurances that deposit withdrawals and loan fundings will not exceed all available sources of liquidity on a short-term basis. Such a situation would have an adverse effect on our ability to originate new loans and maintain reasonable loan and deposit interest rates, which would negatively impact earnings. The Bank's liquidity is represented by its cash and cash equivalents (which are cash on hand or amounts due from financial institutions, federal funds sold, money market mutual funds, and interest bearing deposits) and AFS securities, the sources of which are deposit accounts and borrowings. The level of liquidity is dependent on the Bank's operating, financing, and investing activities at any given time. We attempt to primarily rely on core deposits from customers to provide stable and cost-effective sources of funding to support our loan growth. We also seek to augment such deposits with longer term and higher yielding certificates of deposit. Cash and cash equivalents, which totaled \$165.7 million at December 31, 2013, have immediate availability to meet our short-term funding needs. Our entire securities portfolio is classified as AFS, is highly marketable (excluding our holdings of pooled trust preferred securities), and is available to meet our liquidity needs. Additional sources of liquidity include LHFS, which totaled \$60.8 million at December 31, 2013, are committed to be sold into the secondary market, and generally are funded within 60 days and our residential real estate portfolio, which includes loans that are underwritten to secondary market criteria. Additionally, our residential construction loan portfolio provides a source of liquidity as construction periods generally range from 9-12 months, and these loans are subsequently refinanced with permanent first-lien mortgages and sold into the secondary market. We may also, from time to time, sell commercial or consumer loans to enhance our liquidity position. Our loan to deposit ratio stood at 60.5% at December 31, 2013 and 51.4% at December 31, 2012.

The borrowing requirements of customers include commitments to extend credit and the unused portion of lines of credit (collectively "commitments"), which totaled \$130.0 million at December 31, 2013. Historically, many of the commitments expire without being fully drawn; therefore, the total commitment amounts do not necessarily represent future cash requirements. Commitments for real estate development and construction, which totaled \$6.8 million, are

generally short-term in nature, satisfying cash requirements with principal repayments as construction properties financed are generally repaid with permanent financing. Available credit lines represent the unused portion of credit previously extended and available to the customer as long as there is no violation of material contractual conditions. Commitments to extend credit for residential mortgage loans of \$54.9 million at December 31, 2013 generally expire within 60 days. Commercial commitments to extend credit and unused lines of credit of \$3.6 million at December 31, 2013 generally do not extend for more than 12 months. Consumer commitments to extend credit and unused lines of credit of \$10.4 million at December 31, 2013 are generally open ended. At December 31, 2013, available home equity lines totaled \$54.3 million. Home equity credit lines generally extend for a period of 10 years. Capital expenditures for various branch locations and equipment can be a significant use of liquidity. As of December 31, 2013, we plan on expending approximately \$1.7 million on our premises and equipment over the next 12 months.

Table of Contents

Customer withdrawals are also a principal use of liquidity, but are generally mitigated by growth in customer funding sources, such as deposits and short-term borrowings. Such balances may fluctuate up and down in any given period. We also have the ability to utilize established credit lines with the FHLB and the FRB as additional sources of liquidity. To utilize the vast majority of our credit lines, we must pledge certain loans and/or securities before advances can be obtained.

We are not permitted to purchase brokered deposits without first obtaining a regulatory waiver. We are also required to comply with restrictions on deposit rates that we may offer. These factors could significantly affect our ability to fund normal operations. Our ability to acquire deposits or borrow could also be impaired by factors that are not specific to us, such as a severe disruption of the financial markets or negative views and expectations about the prospects for the financial services industry as a whole. At December 31, 2013, management considered the Bank's liquidity level to be sufficient for the purposes of meeting the Bank's cash flow requirements.

First Mariner Bancorp is a separate entity and apart from First Mariner Bank and must provide for its own liquidity. In addition to its operating expenses, First Mariner Bancorp is responsible for the payment of any dividends that may be declared for its shareholders and interest and principal on outstanding debt. A significant amount of First Mariner Bancorp's revenues are obtained from subsidiary service fees and dividends. Payment of such dividends to First Mariner Bancorp by First Mariner Bank is limited under Maryland law. As noted earlier, First Mariner and its bank subsidiary have entered into agreements with the FRB, FDIC, and the Commissioner that, among other things, require First Mariner and the Bank to obtain the prior approval of regulators before paying a dividend or otherwise making a distribution on stock. In addition, First Mariner elected to defer regularly scheduled quarterly interest payments on its junior subordinated debentures issued in connection with its Trust Preferred Securities offerings. First Mariner is prohibited from paying any dividends or making any other distribution on its common stock for so long as interest payments are being deferred.

We are not aware of any undisclosed known trends, demands, commitments, or uncertainties that are reasonably likely to result in material changes in our liquidity.

Interest Rate Sensitivity

Interest rate sensitivity is an important factor in the management of the composition and maturity configurations of our earning assets and our funding sources. The primary objective of our asset/liability management is to ensure the steady growth of our primary earnings component, net interest income. Our net interest income can fluctuate with significant interest rate movements. We may attempt to structure the statement of financial condition so that repricing opportunities exist for both assets and liabilities in roughly equivalent amounts at approximately the same time intervals. However, imbalances in these repricing opportunities at any point in time may be appropriate to mitigate risks from fee income subject to interest rate risk, such as mortgage-banking activities.

The measurement of our interest rate sensitivity, or "gap," is one of the techniques used in asset/liability management. Interest sensitive gap is the dollar difference between our assets and liabilities which are subject to interest rate pricing within a given time period, including both floating-rate or adjustable-rate instruments and instruments which are approaching maturity. More assets repricing or maturing than liabilities over a given time period is considered asset-sensitive and is reflected as a positive gap, and more liabilities repricing or maturing than assets over a given time period is considered liability-sensitive and is reflected as negative gap. An asset-sensitive position (i.e., a positive gap) will generally enhance earnings in a rising interest rate environment and will negatively impact earnings in a falling interest rate environment, while a liability-sensitive position (i.e., a negative gap) will generally enhance earnings in a falling interest rate environment and negatively impact earnings in a rising interest rate environment. Fluctuations in interest rates are not predictable or controllable.

Our management and our board of directors oversee the asset/liability management function and meet periodically to monitor and manage the statement of financial condition, control interest rate exposure, and evaluate pricing strategies. We evaluate the asset mix of the statement of financial condition continually in terms of several variables: yield, credit quality, funding sources, and liquidity. Our management of the liability mix of the statement of financial condition focuses on expanding our various funding sources and promotion of deposit products with desirable

repricing or maturity characteristics.

In theory, we can diminish interest rate risk through maintaining a nominal level of interest rate sensitivity. In practice, this is made difficult by a number of factors including cyclical variation in loan demand, different impacts on our interest-sensitive assets and liabilities when interest rates change, and the availability of our funding sources. Accordingly, we strive to manage the interest rate sensitivity gap by adjusting the maturity of and establishing rates on the earning-asset portfolio and certain interest-bearing liabilities commensurate with our expectations relative to market interest rates. Additionally, we may employ the use of off-balance sheet instruments, such as interest rate swaps or caps, to manage our exposure to interest rate movements. Generally, we attempt to maintain a balance between rate-sensitive assets and liabilities that is appropriate to minimize our overall interest rate risk, not just our net interest margin.

Table of Contents

Our interest rate sensitivity position as of December 31, 2013 is presented in the following table. Our assets and liabilities are scheduled based on maturity or repricing data except for mortgage loans and mortgage-backed securities that are based on prevailing prepayment assumptions and core deposits which are based on core deposit studies done for banks in the Mid-Atlantic region. These assumptions are validated periodically by management. The difference between our rate-sensitive assets and rate-sensitive liabilities, or the interest rate sensitivity gap, is shown at the bottom of the table. As of December 31, 2013, we had a one-year cumulative negative gap of \$150.7 million compared to a one-year cumulative positive gap of \$5.0 million at December 31, 2012.

	180 days or less	181 days - one year	One - five years	> 5 years or non- sensitive	Total
Interest-earning assets: (dollars in thousands)

Borrowings and junior subordinated debentures	97,050	—	—	—	97,050
Total interest-bearing liabilities	\$447,603	\$216,008	\$241,420	\$26,265	\$931,296
Interest rate sensitive gap position:					
Period	\$(33,655)	\$(117,008)	\$(9,098)	\$23,053	
% of assets	(3.31)%	(11.52)%	(0.90)%	2.27 %	
Cumulative	\$(33,655)	\$(150,663)	\$(159,761)	\$(136,708)	
% of assets	(3.31)%	(14.83)%	(15.73)%	(13.46)%	
Cumulative risk sensitive assets to risk sensitive liabilities	92.48 %	77.30 %	82.35 %	85.32 %	

While we monitor interest rate sensitivity gap reports, we primarily test our interest rate sensitivity through the deployment of simulation analysis. We use earnings simulation models to estimate what effect specific interest rate changes would have on our net interest income. Simulation analysis provides us with a more rigorous and dynamic measure of interest sensitivity. Changes in prepayments have been included where changes in behavior patterns are assumed to be significant to the simulation, particularly mortgage-related assets. Call features on certain securities and borrowings are based on their call probability in view of the projected rate change, and pricing features such as interest rate floors are incorporated. We attempt to structure our asset and liability management strategies to mitigate the impact on net interest income by changes in market interest rates. However, there can be no assurance that we will be able to manage interest rate risk so as to avoid significant adverse effects on net interest income. At December 31, 2013, the simulation model provided the following profile of our interest rate risk measured over a one-year time horizon, assuming a parallel shift in the yield curve based off the U.S. dollar forward swap curve adjusted for certain pricing assumptions:

Immediate Rate Change	
+200BP	-200BP

Net interest income 0.70 % (6.26)%

Both of the above tools used to assess interest rate risk have strengths and weaknesses. Because the gap analysis reflects a static position at a single point in time, it is limited in quantifying the total impact of market rate changes which do not affect all earning assets and interest-bearing liabilities equally or simultaneously. In addition, gap reports depict the existing structure, excluding exposure arising from new business. While the simulation process is a powerful tool in analyzing interest rate

Table of Contents

sensitivity, many of the assumptions used in the process are highly qualitative and subjective, and are subject to the risk that past historical activity may not generate accurate predictions of the future. The model also assumes parallel movements in interest rates, which means both short-term and long-term rates will change equally. Nonparallel changes in interest rates (short-term rates changing differently from long-term rates) could result in significant differences in projected income amounts when compared to parallel tests. Both measurement tools taken together, however, provide an effective evaluation of our exposure to changes in interest rates, enabling management to better control the volatility of earnings.

We are party to mortgage rate lock commitments to fund mortgage loans at interest rates previously agreed (locked) by both us and the borrower for specified periods of time. When the borrower locks an interest rate, we effectively extend a put option to the borrower, whereby the borrower is not obligated to enter into the loan agreement, but we must honor the interest rate for the specified time period. We are exposed to interest rate risk during the accumulation of IRLCs and loans prior to sale. We utilize forward sales commitments to economically hedge the changes in fair value of the loan due to changes in market interest rates.

Off-Balance Sheet Arrangements

We enter into off-balance sheet arrangements in the normal course of business. These arrangements consist primarily of commitments to extend credit, lines of credit, and letters of credit. In addition, the Company has certain operating lease obligations.

Credit Commitments

Credit commitments are agreements to lend to a customer as long as there is no violation of any condition to the contract. Loan commitments generally have interest rates fixed at current market amounts, fixed expiration dates, and may require payment of a fee. Lines of credit generally have variable interest rates. Such lines do not represent future cash requirements because it is unlikely that all customers will draw upon their lines in full at any time. Letters of credit are commitments issued to guarantee the performance of a customer to a third party.

Our exposure to credit loss in the event of nonperformance by the borrower is the contract amount of the commitment. Loan commitments, lines of credit, and letters of credit are made on the same terms, including collateral, as outstanding loans. We are not aware of any accounting loss we would incur by funding our commitments.

See detailed information on credit commitments above under "Liquidity."

Contractual Obligations

First Mariner has certain obligations to make future payments under contract. At December 31, 2013, the aggregate contractual obligations and commitments are:

	Payments Due by Period				
	Total	Less than one year	Over 1 - 3 Years	Over 3 - 5 years	After 5 years
	(dollars in thousands)				
Certificates of deposit	\$604,886	\$389,866	\$180,941	\$34,079	\$—
Borrowings and junior subordinated debentures	44,982	19,982	—	—	25,000
Annual rental commitments under noncancelable leases	12,662	4,357	6,883	1,267	155
	\$662,530	\$414,205	\$187,824	\$35,346	\$25,155

Derivatives

We maintain and account for derivatives, in the form of IRLCs and forward sales commitments, in accordance with FASB guidance on accounting for derivative instruments and hedging activities. We recognize gains and losses on IRLCs and forward sales commitments on the loan pipeline through mortgage-banking revenue in the Consolidated Statements of Operations.

The Bank, through First Mariner Mortgage, enters into IRLCs, under which we originate residential mortgage loans with interest rates determined prior to funding. IRLCs on mortgage loans that we intend to sell in the secondary

market are considered derivatives. The period of time between issuance of a loan commitment and closing and sale of the loan generally

67

Table of Contents

ranges from 14 days to 60 days. For these IRLCs, we protect the Company from changes in interest rates through the use of forward sales of to be issued ("TBA") mortgage-backed securities.

We are exposed to price risk from the time a mortgage loan closes until the time the loan is sold. To manage this risk, we also utilize forward sales of TBA mortgage-backed securities. During the period of the rate lock commitment and from the time a loan is closed with the borrowers and sold to investors, we remain exposed to basis (execution, timing, and/or volatility) risk in that the changes in value of our forward sales commitments may not equal or completely offset the changes in value of the rate commitments. This can result due to changes in the market demand for our mortgage loans brought about by supply and demand considerations and perceptions about credit risk relative to the agency securities. We also mitigate counterparty risk by entering into commitments with proven counterparties and pre-approved financial intermediaries.

The market value of IRLCs is not readily ascertainable with precision because they are not actively traded in stand-alone markets. The Bank determines the fair value of IRLCs by measuring the change in the value of the underlying asset, while taking into consideration the probability that the IRLCs will close.

Information pertaining to the carrying amounts of our derivative financial instruments follows as of December 31:

	2013		2012	
	Notional Amount	Estimated Fair Value	Notional Amount	Estimated Fair Value
	(dollars in thousands)			
IRLCs	\$54,917	\$55,313	\$404,645	\$410,192
Forward contracts to sell mortgage-backed securities	46,480	46,323	308,067	306,682

Changes in interest rates could materially affect the fair value of the IRLCs or the forward commitments. In the case of the loan related derivatives, fair value is also impacted by the probability that the rate lock commitment will close ("fallout factor"). In addition, changes in interest rates could result in changes in the fallout factor, which might magnify or counteract the sensitivities. This is because the impact of an interest rate shift on the fallout ratio is nonsymmetrical and nonlinear.

Contingencies

On July 1, 2013, we became self-insured with respect to employee-related health insurance claims. We use commercial insurance above our self-insured retentions to reduce our risk of catastrophic loss. Our reserves for self-insured losses are estimated based on employee claim history. Our self-insurance reserves totaled \$185,000 as of December 31, 2013.

Impact of Inflation and Changing Prices

The consolidated financial statements and related consolidated financial data presented herein have been prepared in accordance with GAAP and practices within the banking industry, which generally require the measurement of financial condition and operating results in terms of historical dollars, without considering the changes in the relative purchasing power of money over time due to inflation. As a financial institution, virtually all of our assets and liabilities are monetary in nature and interest rates have a more significant impact on our performance than the effects of general levels of inflation. A prolonged period of inflation could cause interest rates, wages, and other costs to increase and could adversely affect our results of operations unless mitigated by increases in our revenues correspondingly. However, we believe that the impact of inflation on our operations was not material for 2013 or 2012.

Recent Accounting Pronouncements

See Note 25 to our Consolidated Financial Statements included in Item 8 of Part II of this Annual Report on Form 10-K for discussion of recent accounting pronouncements.

Financial Review 2012/2011

We recorded net income of \$16.1 million for 2012 compared to a net loss of \$30.2 million for 2011, with diluted earnings per share totaling \$0.85 for 2012 compared to diluted losses per share of \$1.62 in 2011.

We realized significant improvement in our mortgage-banking operations during 2012. Volume significantly increased as did the spreads we realized on loan sales.

Our total classified assets and delinquencies improved during 2012, which reduced the required amount of our allowance for loan losses from \$13.8 million at December 31, 2011 to \$11.4 million at December 31, 2012. We experienced significantly

Table of Contents

fewer charge-offs in real estate loans as real estate collateral values improved during 2012. We also experienced fewer foreclosures in 2012.

In general, a bank's primary source of revenue is net interest income which, in our case, increased \$3.8 million in 2012 compared to 2011, primarily due a decrease in the rates paid on time deposits.

Noninterest income increased \$49.6 million due primarily to our robust mortgage-banking operations during 2012. Net OTTI improved by \$378,000 from 2011 to 2012. We recognized a \$1.3 million loss on the disposal of premises and equipment when we restructured our office space. We experienced decreases in all other noninterest income categories.

Total expenses increased primarily due to compensation expense related to mortgage-banking operations and to an increase in corporate insurance as renewal rates increased in 2012. Additionally, we converted our core processing system to a new system in October of 2012 and mailing to customers regarding the conversion contributed to increased postage expense. These increases were significantly offset by reductions in other expenses that were the result of cost-cutting measures taken in 2012. Our return on average assets was 1.31% for 2012 compared to (2.50)% for 2011.

Our total assets increased by \$198.5 million, or 16.8%, during 2012, primarily a result of increased LHFS. Earning assets increased \$136.9 million, or 14.3%, from \$959.1 million in 2011 to \$1.1 billion in 2012. Deposits increased by \$172.1 million and short- and long-term borrowings increased by \$5.3 million from December 31, 2011 to December 31, 2012. Stockholders' deficit decreased \$17.0 million, reflecting the 2012 earnings and improvements in other comprehensive losses.

Our asset quality showed some improvement from 2011 to 2012 as our level of NPAs decreased from \$61.9 million at December 31, 2011 to \$56.5 million at December 31, 2012. At December 31, 2012, our allowance for loan losses amounted to \$11.4 million, which totaled 20.2% of NPAs plus loans past due 90 days or more as of December 31, 2012, the same as that as of December 31, 2011. Our level of NPAs amounted to 4.1% of total assets at December 31, 2012 compared to 5.3% of total assets at December 31, 2011. Our ratio of net charge-offs to average total loans was 0.7% in 2012 compared to 1.9% in 2011.

Bank capital adequacy levels (as defined by banking regulation) improved from 2011 to 2012, reflecting the 2012 earnings; the Bank was considered "undercapitalized" at December 31, 2012 as opposed to "significantly undercapitalized" as of December 31, 2011. As of December 31, 2012, the Bank's leverage, Tier I capital to risk-weighted assets, and total capital to risk-weighted assets ratios were 3.8%, 6.1%, and 7.3%, respectively, compared to 3.0%, 4.2%, and 5.5%, respectively, at December 31, 2011.

ITEM 7A QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

For a discussion of interest rate risk, see Item 7 of Part II of this Annual Report on Form 10-K under the heading "Interest Rate Sensitivity."

ITEM 8 FINANCIAL STATEMENTS AND
SUPPLEMENTARY DATA
Report of Independent Registered Public Accounting Firm

Board of Directors and Stockholders

First Mariner Bancorp

Baltimore, Maryland

We have audited the accompanying consolidated statements of financial condition of First Mariner Bancorp and Subsidiary (the "Company") as of December 31, 2013 and 2012, and the related consolidated statements of operations, comprehensive (loss) income, changes in stockholders' (deficit) equity, and cash flows for each of the years in the three-year period ended December 31, 2013. The Company's management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of their internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2013 and 2012, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. On February 10, 2014, the Company filed a voluntary petition in the United States Bankruptcy Court under Chapter 11 of the United States Bankruptcy Code. As a result, there is no assurance that the carrying amounts of assets will be realized or that liabilities will be settled for amounts recorded. Also, the Company has insufficient capital per regulatory guidelines and has failed to reach capital levels required in the Cease and Desist Order issued by the Federal Deposit Insurance Corporation in September 2009. These matters raise substantial doubt about the Company's ability to continue as a going concern. Management's plans in regard to these matters are described in Note 3 of the consolidated financial statements. The 2013 consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements

Years Ended December 31, 2013, 2012, and 2011

(1) Summary of Significant Accounting Policies

Organization, Basis of Presentation, and Use of Estimates

First Mariner Bancorp ("First Mariner," on a parent only basis and "we," "our," or "us" on a consolidated basis) is a bank holding company incorporated under the laws of the state of Maryland. First Mariner is headquartered in Baltimore, Maryland, and was originally established as "MarylandsBank Corp." in May 1994. MarylandsBank Corp.'s name was changed to "First Mariner Bancorp" in May 1995. First Mariner Bancorp owns 100% of common stock of First Mariner Bank (the "Bank").

Most of our activities are with customers within the Central Maryland region. A portion of activities related to mortgage lending are more dispersed and cover parts of the Mid-Atlantic region and other regions outside of the state of Maryland. Note 5 describes the types of securities that we invest in and Note 6 discusses our lending activities. We do not have any concentrations to any one industry or customer.

Our consolidated financial statements include the accounts of First Mariner and the Bank. All significant intercompany accounts and transactions have been eliminated in consolidation. Events occurring after the date of the financial statements were considered in the preparation of the financial statements. Certain reclassifications have been made to amounts previously reported to conform to classifications made in 2013.

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States of America ("U.S.") ("GAAP") requires management to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses (the "allowance"), loan repurchases and related valuations, real estate acquired through foreclosure, impairment of AFS securities, valuations of financial instruments, and deferred income taxes. In connection with these determinations, management evaluates historical trends and ratios and, where appropriate, obtains independent appraisals for significant properties and prepares fair value analyses. Actual results could differ significantly from those estimates.

Chapter 11 Proceeding

On February 10, 2014, in response to the Company's current financial condition and business prospects, and to effect the sale of the stock of the Bank, the Company filed a voluntary petition in the U.S. Bankruptcy Court ("Bankruptcy Court") under Chapter 11 of the U.S. Bankruptcy Code ("Bankruptcy Code") ("Chapter 11 Proceeding"). See Note 26 for further information about the Chapter 11 Proceeding.

Following the filing of the Chapter 11 Proceeding, there is no assurance that the carrying amounts of assets will be realized or that liabilities will be settled for amounts recorded. The Company has not finalized any plans of reorganization, restructuring, or liquidation, although it is anticipated that any such plans would change the amounts reported in the accompanying consolidated financial statements and cause a material change in the carrying amount of assets and liabilities. Future financial statements will be prepared in accordance with the accounting guidance which requires, under certain circumstances, that entities adopt fresh-start reporting upon emergence from Chapter 11 reorganization. Fresh-start reporting involves allocating the reorganization value of the entity (which generally approximates fair value) to the entity's assets and liabilities. The guidance also requires the debtor to segregate pre-petition liabilities that are subject to compromise and identify all transactions and events that are directly associated with the reorganization of the debtor. A portion of the liabilities recorded at December 31, 2013 are expected to be subject to compromise. Also in accordance with the guidance, after the filing date, interest will no longer be accrued on any secured or unsecured debt that will not be paid during the proceeding or for which it is

probable that it will not be an allowed priority. The Company expects to sell the Bank through the Chapter 11 Proceeding (see Note 26) and, if the Company does so, it will have no significant remaining assets to continue in business. The Company expects all proceeds from the sale of such business to be used to pay creditors and the expenses of the Chapter 11 Proceeding.

Under the priority scheme established by the Bankruptcy Code, unless creditors agree otherwise in accordance with the Bankruptcy Code, pre-petition liabilities and post-petition liabilities must be satisfied in full before stockholders are entitled to receive any distribution or retain any property under a Chapter 11 liquidation plan. The ultimate recovery to creditors and/or stockholders, if any, will not be determined until confirmation of a plan. No assurance can be given as to what values, if any,

(1) Summary of Significant Accounting Policies (Continued)

will be ascribed in the Chapter 11 Proceeding to each of these constituencies or what types or amounts of distributions, if any, they would receive. If certain requirements of the Bankruptcy Code are met, a plan can be confirmed notwithstanding its rejection by equity holders and notwithstanding the fact that equity holders do not receive or retain any property on account of their equity interests under the plan. The Company does not presently believe that there will be any meaningful recovery, or any recovery at all, for holders of its common stock.

Cash and Cash Equivalents

We consider all highly liquid securities with original maturities of three months or less to be cash equivalents. For reporting purposes, assets grouped in the Consolidated Statements of Financial Condition under the captions "Cash and due from banks" and "Federal funds sold and interest-bearing deposits" are considered cash or cash equivalents. For financial statement purposes, these assets are carried at cost. Federal funds sold and interest-bearing deposits have overnight maturities and are generally in excess of amounts that would be recoverable under FDIC insurance.

Securities

We have designated all securities as available for sale, reported at estimated fair value, with unrealized gains and losses reported as a separate component of stockholders' deficit, net of tax effects, in accumulated other comprehensive loss.

Gains or losses on the sales of securities are calculated using a specific-identification basis and are determined on a trade-date basis. Premiums and discounts on securities are amortized (accreted) over the term of the security using methods that approximate the interest method.

OTTI

AFS securities are evaluated periodically to determine whether a decline in their value is other than temporary. The term "other than temporary" is not intended to indicate a permanent decline in value. Rather, it means that the prospects for near-term recovery of value are not necessarily favorable, or that there is a lack of evidence to support fair values equal to, or greater than, the carrying value of the security.

The initial indications of OTTI for both debt and equity securities are a decline in the market value below the amount recorded for a security and the severity and duration of the decline. In determining whether an impairment is other than temporary, we consider the length of time and the extent to which the market value has been below cost, recent events specific to the issuer, including investment downgrades by rating agencies and economic conditions of its industry, our intent to sell the security, and if it is more likely than not that we will be required to sell the security before recovery of its amortized cost basis. For marketable equity securities, we also consider the issuer's financial condition, capital strength, and near-term prospects. For debt securities and for perpetual preferred securities that are treated as debt securities for the purpose of OTTI analysis, we also consider the cause of the price decline (general level of interest rates and industry- and issuer-specific factors), the issuer's financial condition, near-term prospects and current ability to make future payments in a timely manner, the issuer's ability to service debt, and any change in agencies' ratings at evaluation date from acquisition date and any likely imminent action. Once a decline in value is determined to be other than temporary, the security is segmented into credit- and noncredit-related components. Any impairment adjustment due to identified credit-related components is recorded as an adjustment to current period earnings, while noncredit-related fair value adjustments are recorded through accumulated other comprehensive loss. In situations where we intend to sell or it is more likely than not that we will be required to sell the security, the entire OTTI loss is recognized in earnings.

LHFS

Loans originated for sale are carried at fair value. Fair value is determined based on outstanding investor commitments or, in the absence of such commitments, on current investor yield requirements or third party pricing models. Gains and losses on loan sales are determined using the specific-identification method and are recognized through mortgage-banking revenue in the Consolidated Statement of Operations.

Loans Receivable

Our loans receivable are stated at their principal balance outstanding, net of related deferred fees and costs.

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(1) Summary of Significant Accounting Policies (Continued)

Income recognition

Interest income on loans is accrued at the contractual rate based on the principal outstanding. Loan origination fees and certain direct loan origination costs are deferred and amortized as a yield adjustment over the contractual loan terms or until the date of sale or disposition. Accrual of interest is discontinued when its receipt is in doubt, which typically occurs when a loan becomes impaired. Any interest accrued to income in the year when interest accruals are discontinued is generally reversed. Management may elect to continue the accrual of interest when a loan is in the process of collection and the estimated fair value of the collateral is sufficient to satisfy the principal balance and accrued interest. See additional information on loan impairment and nonaccrual status below.

Nonaccrual status

For smaller consumer loans, we place loans in nonaccrual status when they are contractually past due 90 days as to either principal or interest, unless the loan is well secured and in the process of collection, or earlier, when, in the opinion of management, the collection of principal and interest is in doubt. For all commercial loans, larger loans, and certain mortgage loans, management applies Financial Accounting Standards Board ("FASB") guidance on impaired loan accounting to determine accrual status. Under that guidance, when it is probable that we will be unable to collect all payments due, including interest, we place the loan in nonaccrual status. A loan remains in nonaccrual status until the loan is current as to payment of both principal and interest and the borrower demonstrates the ability to pay and remain current. Specifically, in order for a nonaccrual loan to be returned to accrual status, a borrower must make six consecutive monthly payments and the borrower must demonstrate the ability to keep the loan current going forward. When a loan is partially charged off, the remaining balance remains in nonaccrual status.

As a result of our ongoing review of the loan portfolio, we may classify loans as nonaccrual even though the presence of collateral or the borrower's financial strength may be sufficient to provide for ultimate repayment. In general, loans are charged off when a loan or a portion thereof is considered uncollectible. We determine that the entire balance of a loan is contractually delinquent for all classes if the minimum payment is not received by the specified due date.

Interest and fees continue to accrue on past due loans until the date the loan goes in nonaccrual status.

Impairment

We determine a loan to be impaired when, based on current information and events, it is probable that we will be unable to collect all amounts due according to the contractual terms of the loan agreement. In general, impaired loans consist of nonaccrual loans and troubled debt restructures ("TDR" or "TDRs"). We do not consider a loan impaired during a period of delay in payment if we expect to collect all amounts due, including interest past due. Generally we consider a period of delay in payment to include delinquency up to 90 days, but may extend this period if the loan is collateralized by residential or commercial real estate with a low loan-to-value ("LTV") ratio and where collection and repayment efforts are progressing. We evaluate our commercial, commercial mortgage, commercial construction, and consumer construction classes of loans individually for impairment. We evaluate larger groups of smaller-balance homogeneous loans, which include our residential mortgage, home equity and second mortgage, and other consumer classes of loans, collectively for impairment.

We identify impaired loans and measure impairment (1) at the present value of expected cash flows discounted at the loan's effective interest rate, (2) at the observable market price, or (3) at the fair value of the collateral if the loan is collateral dependent. If our measure of the impaired loan is less than the recorded investment in the loan, we record a charge-off for the deficiency unless it's a TDR, for which we recognize an impairment loss through an allocated portion of the allowance for loan losses.

When the ultimate collectability of an impaired loan's principal is in doubt, wholly or partially, all cash receipts are applied to principal. Once the recorded principal balance has been reduced to an amount deemed to be fully collectible, cash receipts may be applied to previously foregone or current interest, and then recorded as recoveries of any amounts previously charged off. When all doubt about the full collectability of the loan is removed, cash receipts

are applied under the contractual terms of the loan agreement.

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(1) Summary of Significant Accounting Policies (Continued)

Fees and costs

Origination and commitment fees and direct origination costs on loans held for investment generally are deferred and amortized to income over the contractual lives of the related loans using the interest method. Under certain circumstances, commitment fees are recognized over the commitment period or upon expiration of the commitment. Fees to extend loans three months or less are recognized in income upon receipt. Unamortized loan fees are recognized in income when the related loans are sold or prepaid.

Transfers of LHFS

In accordance with FASB guidance on mortgage-banking activities, any loans which are originally originated for sale into the secondary market and which we subsequently elect to transfer into the Company's loan portfolio are valued at lower of cost or market value ("LCM") at the time of the transfer with any decline in value recorded as a charge against mortgage-banking revenue.

TDRs

We strive to identify borrowers in financial difficulty early and work with them to modify to more affordable terms before their loan reaches nonaccrual status. In situations where, for economic or legal reasons related to a borrower's financial difficulties, we may grant a concession for other than an insignificant period of time to the borrower that would not otherwise be considered, the related now-modified loan is classified as a TDR. These modified terms may include rate reductions, principal forgiveness, payment extensions, payment forbearance, and/or other actions intended to minimize the economic loss and to avoid foreclosure or repossession of the collateral. These loans are excluded from pooled loss forecasts and a separate reserve is provided under the accounting guidance for loan impairment. At the time that a loan is modified, we evaluate any possible impairment based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan agreement, except when the sole remaining source of repayment for the loan is the liquidation of the collateral. In these cases, we use the current fair value of the collateral, less selling costs, instead of discounted cash flows. Any impairment amount is then set up as an allocated portion of the allowance.

Allowance for Loan Losses

Our allowance for loan losses represents an estimated amount that, in management's judgment, will be adequate to absorb probable incurred losses on existing loans. Management uses a disciplined process and methodology to establish the allowance each quarter. To determine the total allowance for loan losses, we estimate the allowance requirements for each loan class, including loans analyzed individually and loans analyzed on a pooled basis.

To determine the allocated component of the allowance account, loans are pooled by loan class and losses are modeled using historical experience over the loss emergence period. Additionally, environmental factors are applied to each loan class and are based upon management's evaluation of various conditions that are not directly measured in the determination of the formula and other allocated allowances. The models and assumptions used to determine the allowance are validated and reviewed to ensure that their theoretical foundation, assumptions, data integrity, computational processes, reporting practices, and end-user controls are appropriate and properly documented.

The establishment of the allowance for loan losses relies on a consistent process that requires multiple layers of management review and judgment and responds timely to changes in economic conditions and other influences. From time to time, events or economic factors may affect the loan portfolio, causing management to provide additional amounts to or release balances from the allowance for loan losses.

We monitor differences between estimated and actual incurred loan losses utilizing charge-off history. Loans deemed uncollectible are charged against, while recoveries are credited to, the allowance. Management adjusts the level of the allowance through the provision for loan losses, which is recorded as a current period operating expense.

Commercial (including commercial mortgages) and construction loans (including both commercial and consumer) are generally evaluated for impairment when the loan becomes 90 days past due and/or is rated as substandard. The

difference between the fair value of the collateral, less estimated selling costs and the carrying value of the loan is charged off at that time. Residential mortgage loans are generally charged down to their fair value when the loan becomes 120 days past due or is placed in nonaccrual status, whichever is earlier. Consumer loans are generally charged off when the loan becomes 120 days past due

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(1) Summary of Significant Accounting Policies (Continued)

or when it is determined that the amounts due are uncollectible (whichever is earlier). The above charge-off guidelines may not apply if the loan is both well secured and in the process of collection. These charge-off policies have not changed in the last three years.

As an additional portion of the allowance for loan losses, we also estimate probable losses related to unfunded loan commitments. These commitments are subject to individual review and are analyzed for impairment the same as a correspondent loan.

Real Estate Acquired Through Foreclosure

We record real estate acquired through foreclosure at LCM on the acquisition date and at the lower of such initial amount or estimated fair value less estimated selling costs thereafter. Estimated fair value is based upon many subjective factors, including location and condition of the property and current economic conditions, among other things. Because the calculation of fair value relies on estimates and judgments relating to inherently uncertain events, results may differ from our estimates.

Write-downs at the time of transfer are made through the allowance for loan losses. Write-downs subsequent to transfer are included in our noninterest expenses, along with operating income, net of related expenses of such properties and gains or losses realized upon disposition.

Restricted Stock Investments

The Bank, as a member of the Federal Home Loan Bank System, is required to maintain an investment in capital stock of the Federal Home Loan Bank of Atlanta ("FHLB") in varying amounts based on asset size and on amounts borrowed from the FHLB. Because no ready market exists for this stock and it has no quoted market value, the Bank's investment in this stock is carried at cost.

The Bank maintains an investment in capital stock of several bankers' banks. Because no ready market exists for these stocks and they have no quoted market values, the Bank's investment in these stocks is carried at cost.

Premises and Equipment

Our premises and equipment are stated at cost less accumulated depreciation and amortization. Depreciation and amortization are accumulated using straight-line and accelerated methods over the estimated useful lives of the assets. Additions and betterments are capitalized and charges for repairs and maintenance are expensed when incurred. The cost and accumulated depreciation or amortization is eliminated from the accounts when an asset is sold or retired and the resultant gain or loss is credited or charged to income. Premises and equipment have estimated useful lives ranging from 3 to 39 years.

BOLI

BOLI is carried at the aggregate cash surrender value of life insurance policies owned where the Company or its subsidiary is named beneficiary. Increases in cash surrender value derived from crediting rates for underlying insurance policies is credited to noninterest income.

Transfers of Financial Assets

Transfers of financial assets are accounted for as sales when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through a requirement to repurchase them before their maturity.

Income Taxes

Deferred income taxes are recognized for the tax consequences of temporary differences between financial statement carrying amounts and the tax bases of assets and liabilities. Deferred income taxes are provided on income and expense items when they are reported for financial statement purposes in periods different from the periods in which these items are recognized in the income tax returns. Deferred tax assets are recognized only to the extent that it is

more likely than not that

80

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(1) Summary of Significant Accounting Policies (Continued)

such amounts will be realized based upon consideration of available evidence, including tax planning strategies and other factors.

The calculation of tax liabilities is complex and requires the use of estimates and judgment since it involves the application of complex tax laws that are subject to different interpretations by us and the various tax authorities. These interpretations are subject to challenge by the tax authorities upon audit or to reinterpretation based on management's ongoing assessment of facts and evolving case law.

Periodically and in the ordinary course of business, we are involved in inquiries and reviews by tax authorities that normally require management to provide supplemental information to support certain tax positions we take in our tax returns. Uncertain tax positions are initially recognized in the financial statements when it is more likely than not the position will be sustained upon examination by the tax authorities. Such tax positions are initially and subsequently measured as the largest amount of tax benefit that is greater than 50% likely of being realized upon ultimate settlement with the tax authority assuming full knowledge of the position and all relevant facts. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. As of December 31, 2013 and 2012, we maintained a valuation allowance against the full amount of our deferred tax assets. Management believes it has taken appropriate positions on its tax returns, although the ultimate outcome of any tax review cannot be predicted with certainty. No assurance can be given that the final outcome of these matters will not be different than what is reflected in the current and historical financial statements.

We recognize interest and penalties related to income tax matters in income tax expense.

Advertising

We expense our advertising costs as incurred, except payments for major sponsorships which are amortized over an estimated life not to exceed one year. Advertising expenses were \$1.5 million, \$870,000, and \$663,000 for the years ended December 31, 2013, 2012, and 2011, respectively.

Derivatives and Hedging Activities

We account for derivatives in accordance with FASB literature on accounting for derivative instruments and hedging activities. When we enter into the derivative contract, we designate a derivative as held for trading, an economic hedge, or a qualifying hedge as detailed in the literature. The designation may change based upon management's reassessment or changing circumstances. Derivatives utilized by the Company include interest rate lock commitments ("IRLC" or "IRLCs") and forward settlement contracts. IRLCs occur when we originate mortgage loans with interest rates determined prior to funding. Forward settlement contracts are agreements to buy or sell a quantity of a financial instrument, index, currency, or commodity at a predetermined future date, and rate or price.

We designate at inception whether a derivative contract is considered hedging or nonhedging. All of our derivatives are nonexchange traded contracts, and as such, their fair value is based on dealer quotes, pricing models, discounted cash flow methodologies, or similar techniques for which the determination of fair value may require significant management judgment or estimation.

For qualifying hedges, we formally document at inception all relationships between hedging instruments and hedged items, as well as risk management objectives and strategies for undertaking various accounting hedges. We utilize derivatives to manage interest rate sensitivity in certain cases.

At December 31, 2013 and 2012, we did not have any designated hedges as we do not designate IRLCs or forward sales commitments on residential mortgage originations as hedges. We recognize any gains and losses on IRLCs and forward sales commitments on residential mortgage originations through mortgage-banking revenue in the Consolidated Statements of Operations.

(2) Reclassification

Prior to the last quarter of 2013, we classified origination fees related to LHFS as a reduction of both mortgage-banking revenue (deferred cost) and salaries and employee benefits. During 2013, we determined that this deferred classification was not in accordance with Accounting Standards Codification ("ASC") 825-10 and have therefore reclassified such costs for 2012

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(2) Reclassification (Continued)

and 2011 as an increase to both mortgage-banking revenue and salaries and employee benefits as follows for the years ended December 31:

	2012	2011
	(dollars in thousands)	
Original mortgage-banking revenue	\$49,682	\$13,595
Reclassification of deferred costs	33,223	15,820
Final mortgage-banking revenue	\$82,905	\$29,415
Original salaries and employee benefits	\$24,408	\$23,520
Reclassification of deferred costs	33,223	15,820
Final salaries and employee benefits	\$57,631	\$39,340

This reclassification had no impact on the Company's balances, net (loss) income, net (loss) income per share, cash flows, or regulatory capital ratios.

(3) Going Concern Consideration

Due to the conditions and events discussed later in Note 11, there is substantial doubt regarding our ability to continue as a going concern. Management is taking various steps designed to improve the Company's and the Bank's capital position. The Bank has developed a written alternative capital plan designed to improve the Bank's capital ratios. Such plan is dependent upon a capital infusion to meet the capital requirements of the various regulatory agreements (see Note 11 for more information on the agreements). The Company continues to work with its advisors in an attempt to improve capital ratios. See Note 26 for additional information on subsequent events.

We have entered into a Merger and Acquisition Agreement ("M&A Agreement") (see details in Note 26) with the goal of recapitalization of the Bank, pending the Chapter 11 Proceeding. There can be no assurance that the Chapter 11 Proceeding will result in the sale of the Bank. Additionally, if the sale of the Bank does occur, the Company will no longer be a viable entity.

The consolidated financial statements presented above and the accompanying Notes have been prepared on a going concern basis, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future, and does not include any adjustment to reflect the possible future effects on the recoverability and classification of assets, or the amounts and classification of liabilities that may result from the outcome of any extraordinary regulatory action, which would affect our ability to continue as a going concern.

(4) Restrictions on Cash and Due From Banks

The Bank is required by the Federal Reserve Board ("FRB") to maintain certain cash reserve balances based principally on deposit liabilities. Due to large vault cash amounts at both December 31, 2013 and December 31, 2012, no additional reserves were required at the FRB. The Bank pledged \$1.7 million and \$1.9 million in cash for exposure on debit card transactions as of December 31, 2013 and 2012, respectively.

(5) Securities

The composition of our securities portfolio is as follows at December 31:

Equity securities—banks	1,035	47	123	1	1,158	48
	\$ 13,726	\$ 127	\$ 5,150	\$ 2,145	\$ 18,876	\$ 2,272

For AFS securities, gross unrealized losses totaled \$2.6 million as of December 31, 2013 and equaled 2.6% of the fair value of securities with unrealized losses as of that date. A total of 49 securities were in an unrealized loss position as of December 31, 2013, with the largest single unrealized loss in any one security totaling \$361,000. Five securities were in an unrealized loss position for twelve months or more.

The trust preferred securities that we hold in our securities portfolio are issued by other banks, bank holding companies, and insurance companies. Certain of these securities have experienced declines in value since acquisition. These declines have occurred due to changes in the market which has limited the demand for these securities and reduced their liquidity. In 2012 and 2011, we considered the decline in value for four pooled trust preferred securities to be other than temporary and recorded the credit-related portion of the impairment as net OTTI of \$460,000 and \$838,000 during 2012 and 2011, respectively. During 2013, we sold three of the aforementioned securities. The remaining security did not require any additional OTTI charges during 2013. See additional information on the pooled trust preferred securities in Note 17.

The following shows the activity in OTTI related to credit losses for the years ended December 31:

	2013	2012	2011
	(dollars in thousands)		
Balance at beginning of year	\$ 9,190	\$ 8,730	\$ 7,892
Additional net OTTI recorded for credit losses	—	460	838
Balance at end of year	\$ 9,190	\$ 9,190	\$ 8,730

All of the remaining securities that are impaired are so due to declines in fair values resulting from changes in interest rates or increased credit/liquidity spreads since the time they were purchased. We have the intent to hold these debt

securities to maturity, and, for debt and equity securities in a loss position, for the foreseeable future and do not intend, nor do we believe it is more likely than not, that we will be required to sell the securities before anticipated recovery. We expect these securities will be repaid in full, with no losses realized. As such, management considers the impairments to be temporary.

84

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(5) Securities (Continued)

During 2013 and 2011, we recognized gross losses on the sale of AFS securities of \$108,000 and \$23,000, respectively. During 2013 and 2011, we recognized gross gains on sale of AFS securities of \$302,000 and \$781,000, respectively. We did not recognize any gains or losses during 2012.

At December 31, 2013, we held securities with an aggregate carrying value (fair value) of \$54.2 million that we have pledged as collateral for certain mortgage-banking and hedging activities, borrowings, and government deposits.

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses

Loans receivable represent our only form of financing receivables and are summarized as follows at December 31:

	2013	2012
	(dollars in thousands)	
Commercial	\$45,264	\$47,976
Commercial mortgage	201,998	263,666
Commercial construction	40,725	49,872
Consumer construction	16,675	19,005
Residential mortgage	147,052	111,314
Consumer	109,885	119,802
Total loans	561,599	611,635
Unearned loan fees, net	(1,526)	(1,239)
	\$560,073	\$610,396

Included in consumer loan totals in the above table are overdrawn commercial and retail checking accounts totaling \$394,000 and \$919,000 as of December 31, 2013 and 2012, respectively.

At December 31, 2013, we had pledged loans with a carrying value of \$93.6 million as collateral for FHLB advances.

Transferred Loans

Information on the activity in transferred loans and related accretable yield is as follows for the years ended December 31:

	Loan Balance		Accretable Yield		Total	
	2013	2012	2013	2012	2013	2012
	(dollars in thousands)					
Beginning balance	\$17,501	\$14,008	\$220	\$266	\$17,281	\$13,742
Loans transferred	44,180	10,006	110	207	44,070	9,799
Charge-offs	(703)	(1,435)	(13)	(21)	(690)	(1,414)
Sales/payments/amortization	(8,400)	(5,078)	(97)	(232)	(8,303)	(4,846)
Ending balance	\$52,578	\$17,501	\$220	\$220	\$52,358	\$17,281

Credit Quality

Management has an established methodology to determine the adequacy of the allowance for loan losses that assesses the risks and losses inherent in the loan portfolio. For purposes of determining the allowance for loan losses, we have segmented our loan portfolio by product type. Our portfolio loan segments are commercial, commercial mortgage, commercial construction, consumer construction, residential mortgage, and consumer. We have looked at all segments to determine if subcategorization into classes is warranted based upon our credit review methodology and have divided consumer loans into two classes, (1) home equity and second mortgage loans and (2) other consumer loans.

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses (Continued)

To establish the the allowance for loan losses, loans are pooled by portfolio class and an historical loss percentage is applied to each class. The historical loss percentage is based upon a rolling 24-month history, which gives us the most relevant charge-off data. The result of that calculation for each loan class is then applied to the current loan portfolio balances to determine the required portion of the allowance for loan loss level per loan class. We then apply additional loss multipliers to the different classes of loans to reflect various environmental factors. These factors capture any changes in economic trends, portfolio composition, real estate trends, as well as other factors and are meant to supplement the required allocated allowance. For individually evaluated loans (impaired loans), we do additional analyses to determine the impairment amount. In general, this impairment is included as part of the allowance for loan losses for TDRs and is charged off for all other impaired loans. These loss estimates are performed under multiple economic scenarios to establish a range of potential outcomes for each criterion. Management applies judgment to develop its own view of loss probability within that range, using external and internal parameters with the objective of establishing an allowance for loss inherent within these portfolios as of the reporting date.

The following tables present by portfolio segment, the changes in the allowance for loan losses, and the recorded investment in loans:

As of and for the year ended December 31, 2013:

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses (Continued)

We use creditworthiness categories to grade commercial loans. Our internal grading system is based on experiences with similarly graded loans. Category ratings are reviewed each quarter. Our internal risk ratings are as follows:

Superior Credit Quality ("RR1")—This category includes credits that are secured by up to 95% advance against cash balances, municipal or corporate bonds carrying an A rating or better (subject to maturity), U.S. Government securities (subject to maturity), and fully marketable securities of companies with an A or better debt rating. In addition, the borrower must have a reasonable financial condition evidenced by complete financial statements.

High Credit Quality ("RR2")—This category includes credits that are secured by up to 70% advance against municipal or corporate bonds carrying an A rating or better, U.S. Government securities, and marketable securities of companies with an A or better debt rating. For individual credits, the credit must be secured by any of the aforementioned items or first deed of trust on residential owner-occupied property with an LTV ratio of 80% or less and adequate cash flow to service the debt. Permanent real estate loans on fully leased properties with A-rated tenants and a 70% or less LTV ratio with income coverage of 1.25 times or higher may qualify for this rating, with confirmation of tenants' financial condition. No commercial construction loans may carry this rating at inception. At December 31, 2013 and 2012, none of our loans carried this risk rating.

Above Average Credit Quality ("RR3")—This category includes business loans to publicly traded companies with a B rating or better, commercial construction loans with a contingent-free take-out or substantial pre-leasing (75% or more of leasable space) with an LTV ratio of 70% or less, residential construction loans with pre-sold units and an LTV ratio of 70% or less as long as sales are on a noncontingent basis and the overall project is progressing on schedule as originally determined, loans to individuals with liquid assets and strong net worth and the additional ability to service the debt from sources unrelated to the purpose of the credit extension, and monitored credits to borrowers of sound financial condition with approved advance rates providing adequate margin so that collateral can be easily liquidated within 90 days or less.

Average/Satisfactory Credit Quality ("RR4")—In general, this category includes small-to-medium sized companies with satisfactory financial condition, cash flow, profitability, and balance sheet and income statement ratios, term loans and revolving credits with annual clean-up requirements, the majority of retail commercial credits, loans to partnerships or small businesses, most wholesale sales finance lines, wholesale distributors whose capital position and profitability are at Risk Management Association averages, and loans to individuals with acceptable financial condition and sufficient net cash flow to service the debt as long as the source of repayment is identifiable and sufficient to liquidate the debt within an acceptable period of time and a secondary source of repayment is evident.

Acceptable With Care ("RR5")—This category includes secured loans to small or medium sized companies which have suffered a financial setback where a convincing plan for correction demonstrates the deficiency is temporary in nature, loans with debt service coverage ratios below or LTV ratios above policy guidelines, most construction and development loans, permanent loans underwritten based on pro forma rents as opposed to historical or actual rents, real estate loans where the project is moderately off the original projections as to cost estimates or absorption, and loans where the interest reserve is no longer adequate, but the customer or guarantor has a proven ability to carry the interest expense out of pocket for an extended time period without undue financial strain. These credits require additional attention by the account officer and/or loan administration.

Watch Credits ("RR6")—This category includes loans to borrowers who have experienced a temporary setback or deterioration in financial condition that should correct itself during the next twelve months, companies whose financial condition has been marginally acceptable for a period of time and prospects for significant improvement are limited, loans to individuals with marginal financial condition, and most credits for start-up operations. Also included in this category are real estate loans where the project is moderately off original projections, interest reserve may be depleted, with the borrower or guarantor having a questionable or unproved ability to pay interest out of pocket. Such loans may have modest cost overruns that will cause a shortage in the budget, raising question as to how the project will be completed. These loans may have a good collateral position, additional collateral, or strong guarantors to

mitigate the risk. These credits are considered marginally acceptable, and greater than usual attention is warranted by the account officer and/or loan operations.

Special Mention ("RR7")—special mention credits are characterized as adequately covered by collateral (if any) and/or the paying capacity of the borrower, but are subject to one or more deteriorating trends. These credits constitute an undue and unwarranted credit risk, but not to the point of justifying a classification of substandard. These credits have potential

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses (Continued)

weaknesses which, if not examined and corrected, may weaken the asset or inadequately protect the Bank's credit position at some future date. This category should not be used to list assets that bear risks usually associated with the particular type of financing. Assets with this rating may have the potential for significant weakness. Loans where weaknesses are evident and significant must be considered for more serious criticism. Examples of credits carried in special mention may include the following:

- loans which are fully covered by collateral and cash flow, but where margins are inadequate;
- loans to borrowers with a strong capital base, who are experiencing modest losses;
- loans to borrowers with very strong cash flows, but experiencing modest losses;
- credits that are subject to manageable, but excessive, leverage;
- credits with material collateral documentation exceptions, but which appear to be strong credits;
 - credits to customers who have not provided the Bank with current or satisfactory financial data (unless the credit is secured by liquid marketable collateral or guaranteed by financially sound parties);
 - credits that the account officer may be unable to supervise properly because of a lack of expertise or lack of control over the collateral and/or its condition;
- loans with deficient documentation or other deviations from prudent lending practices; and
- loans with strong guarantors and/or secondary sources of cash flow are the support for repayment.

Substandard ("RR8")—Substandard loans are inadequately protected by the current sound worth and paying capacity of the obligor or the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses, which jeopardize the orderly liquidation of the debt. They are characterized by the distinct possibility that the Bank will sustain some loss if the deficiencies are not corrected. The borrower's financial condition indicates an inability to repay, even if restructured. Prospects for improvement in the borrower's financial condition are poor. Primary repayment source appears to be shifting from cash flow to liquidation of collateral. Examples of substandard credits may include the following:

- credits adequately covered by collateral value, where repayment is dependent upon the sale of nonliquid collateral, nontrading assets, or from guarantors;
- loans secured by collateral greater than the amount of the credit, but where cash flow is inadequate to amortize the debt over a reasonable period of time;
- credits with negative financial trends coupled with material collateral documentation deficiencies or where there is a high potential for loss of principal;
- unsecured loans to borrowers whose financial condition does not warrant unsecured advances;
- credits where the borrower is in bankruptcy or the work out effort is proceeding toward legal remedies including foreclosure; and
- all nonaccrual loans.

Doubtful ("RR9")—Doubtful classifications have all the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses make collection or liquidation in full on the basis of currently known facts, conditions, and values highly questionable and improbable. A doubtful classification may be appropriate in cases where significant risk exposures are perceived, but loss cannot be determined because of specific, reasonable, and pending factors which may strengthen and work to the advantage of the credit in the near term. Account officers attempt to identify any principal loss in the credit, where possible, thereby limiting the excessive use of the doubtful classification. The classification is a deferral of the estimated loss until its more exact status may be determined. Pending factors include proposed mergers, acquisition or liquidation procedures, new capital injection, perfecting liens on additional collateral, and refinancing plans. At December 31, 2013 and 2012, none of our loans carried this risk rating.

Years Ended December 31, 2013, 2012, and 2011

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses (Continued)

Loss ("RR10")—Losses must be taken as soon as they are realized. In some instances and on a temporary basis, a portion of a loan may receive this rating (split rating) when the actual loss cannot be currently identified. In these instances, additional facts or information is necessary to determine the final amount to be charged against the loan loss reserve. When applied for these purposes, this risk rating may be used for a period not to exceed nine months.

Subsequent to the identification of this split rating, the remaining balance will be risk rated substandard. This category includes advances in excess of calculated current fair value which are considered uncollectible and do not warrant continuance as bankable assets. This classification does not mean that the loan has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this basically worthless asset even though partial recovery may occur in the future. Credits to distressed borrowers lacking an identifiable and realistic source of repayment are generally charged off. Loans where repayment is dependent upon events that are not predictable in terms of result or timing (such as protracted litigation) are generally charged off. At December 31, 2013 and 2012, none of our loans carried this risk rating.

Insufficient Information to Rate ("RRX") — This rating is designed to be a temporary rating until sufficient information is provided to properly evaluate the risk and assign a permanent rating. If adequate information is not provided in a timely manner, this credit will receive a minimum rating of RR6, requiring quarterly reporting go the Watch Committee. At December 31, 2013 and 2012, none of our loans carried this risk rating.

The following table shows the credit quality breakdown of our commercial loan portfolio by class as of December 31:

	Commercial		Commercial Mortgage		Commercial Construction		Consumer Construction		Total

The following table shows loans in nonaccrual status by class as of December 31:

	2013	2012
	(dollars in thousands)	
Commercial	\$289	\$2,110
Commercial mortgage	7,744	21,269
Commercial construction	5,796	4,637
Consumer construction	230	645
Residential mortgage	6,065	8,826
Consumer	1,419	973
	\$21,543	\$38,460

The interest which would have been recorded on nonaccrual loans if those loans had been performing in accordance with their contractual terms was approximately \$651,000, \$1.7 million, and \$2.2 million in 2013, 2012, and 2011, respectively. The actual interest income recorded on those loans in 2013, 2012, and 2011 was approximately \$307,000, \$552,000, and \$827,000, respectively.

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses (Continued)

The following table shows the breakdown of TDRs by portfolio segment:

	2013	2012
	(dollars in thousands)	
Commercial	\$11,883	\$7,708
Commercial mortgage	13,985	19,443
Commercial construction	3,487	7,156
Consumer construction	4,435	—
Residential mortgage	9,974	11,657
	\$43,764	\$45,964
Nonaccrual TDRs (included in above totals)	\$5,889	\$8,514

The following table shows the breakdown of loans we modified during the years ended December 31:

	2013		2012		2011	
	Number of Modifications	Recorded Investment Prior to Modification	Recorded Investment After Modification	Number of Modifications	Recorded Investment Prior to Modification	Recorded Investment After Modification
	(dollars in thousands)					
Commercial	2	\$5,369	\$5,369	3	\$7,336	\$7,336
Commercial mortgage	7	1,686	1,720	10	4,668	4,676
Commercial construction	1	2,576	2,576	3	7,427	7,427
Residential mortgage	1	339	339	1	863	863
	11	\$9,970	\$10,004	17	\$20,294	\$20,302
	2011					
	Number of Modifications	Recorded Investment Prior to Modification	Recorded Investment After Modification			
	(dollars in thousands)					
Commercial	4	\$699	\$424			
Commercial mortgage	10	7,821	7,821			
Residential mortgage	1	566	579			
	15	\$9,086	\$8,824			

The majority of our TDRs are the result of renewals where the only concession is that the interest rate is not considered to be a market rate. As such, the best illustration of the financial impact of the TDRs is the effect on the allowance for loan losses.

During the year ended December 31, 2013, we reduced the allowance for loan losses for TDRs by a total of \$120,000 (\$49,000 for commercial and \$75,000 for residential mortgage, partially offset by additions of \$4,000 for commercial mortgage). During the year ended December 31, 2012, we increased the allowance for loan losses for TDRs by a total of \$44,000 (\$129,000 for commercial, partially offset by reductions of \$34,000 for commercial mortgage and \$51,000 for residential mortgage). During the year ended December 31, 2011, we reduced the allowance for loan losses for TDRs by a total of \$305,000 (\$31,000 for commercial mortgage, \$14,000 for commercial construction, and \$264,000 for residential mortgage, partially offset by an increase of \$4,000 for commercial).

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(6) Loans Receivable (Financing Receivables) and Allowance for Loan Losses (Continued)

Additionally, during the year ended December 31, 2013, we charged-off approximately \$199,000 in residential mortgage TDRs, \$77,000 in commercial construction TDRs, and \$25,000 in commercial mortgage TDRs. During the year ended December 31, 2012, we charged-off approximately \$312,000 in residential mortgage TDRs, \$136,000 in commercial construction TDRs, and \$137,000 in commercial mortgage TDRs. During the year ended December 31, 2011, we charged off approximately \$673,000 in residential mortgage TDRs and \$130,000 in commercial mortgage TDRs.

The following table shows modifications made during the years ended December 31, 2013, 2012, and 2011 that defaulted in the subsequent year:

	2013		2012		2011	
	Number of	Recorded	Number of	Recorded	Number of	Recorded
	Modifications	Investment	Modifications	Investment	Modifications	Investment
	(dollars in thousands)					
Commercial	—	\$—	1	\$22	—	\$—

(7) Premises and Equipment

We own property and equipment as follows at December 31:

	2013	2012
	(dollars in thousands)	
Land	\$ 11,068	\$ 11,350
Buildings and improvements	27,339	27,783
Leasehold improvements	7,391	7,145
Furniture, fixtures, automobiles, and equipment	29,414	27,508
Total, at cost	75,212	73,786
Less: accumulated depreciation and amortization	(38,081)	(36,135)
Net premises and equipment	\$ 37,131	\$ 37,651

Depreciation and amortization expense for the years ended December 31, 2013, 2012, and 2011 was \$2.9 million, \$2.7 million, and \$3.2 million, respectively.

We lease various branch and general office facilities to conduct our operations. The leases have remaining terms which range from a period of less than one year to six years. Most leases contain renewal options which are generally exercisable at increased rates. Some of the leases provide for increases in the rental rates at specified times during the lease terms, prior to the expiration dates.

The leases generally provide for payment of property taxes, insurance, and maintenance costs by the Company. The total rental expense for all real property leases amounted to \$4.7 million, \$4.7 million, and \$5.1 million for 2013, 2012, and 2011, respectively.

Our minimum lease payments due for each of the next five years are as follows (dollars in thousands):

2014	\$4,357
2015	4,051
2016	2,832
2017	866
2018	401
Thereafter	155
	\$ 12,662

Over 24 months - 36 months	27,474	4.5	% 43,427	5.1	%	
Over 36 months - 48 months	15,782	2.6	% 13,344	1.5	%	
Over 48 months	18,297	3.0	% 17,771	2.1	%	
	\$ 604,886	100.0	% \$ 857,698	100.0	%	

The Bank offers certain certificate products that provide customers a "one-time" withdrawal option that the customer may exercise at any time without penalty. As of December 31, 2013, certificates that permitted early withdrawal totaled \$87.7 million.

Certificates of deposit of \$100,000 or more totaled \$420.2 million and \$628.4 million at December 31, 2013 and 2012, respectively.

At December 31, 2013, we had pledged securities with an aggregate carrying value (fair value) of \$499,000 for certain government deposits.

(9) Borrowings

Our borrowings consist of short-term promissory notes, short-term and long-term advances from the FHLB, and a mortgage loan.

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(9) Borrowings (Continued)

The FHLB advances are available under a specific collateral pledge and security agreement, which requires that we maintain collateral for all of our borrowings equal to 125% of advances. We may pledge as collateral specific first- and second-lien mortgage loans or commercial mortgages up to 10% of the Bank's total assets. Long-term FHLB advances are fixed-rate instruments with various call provisions. Short-term advances are in the form of overnight borrowings with rates changing daily. As of December 31, 2013, our total available credit line with the FHLB was \$108.3 million. The outstanding balance at December 31, 2013 and 2012 was \$40.0 million and \$117.0 million, respectively.

The mortgage loan on our former headquarters building was with a commercial bank on which we paid a fixed rate of 5.58% until we paid it off during 2013.

Certain information regarding our borrowings is as follows as of December 31:

	2013	2012	2011	
Amount outstanding at year-end:	(dollars in thousands)			
FHLB short-term advances	\$ 15,000	\$ 52,000	\$ 46,000	
Short-term promissory notes	4,982	1,466	1,981	
FHLB long-term advances	25,000	65,000	65,000	
Mortgage loan	—	8,515	8,698	
Weighted-average interest rate at year-end:				
FHLB short-term advances	1.65	% 0.21	% 0.27	%
Short-term promissory notes	0.45	% 0.59	% 0.56	%
FHLB long-term advances	4.00	% 2.25	% 2.25	%
Mortgage loan	—	% 5.58	% 5.58	%
Maximum outstanding at any month-end:

Mortgage loan	2,739	8,607	8,800	
Weighted-average interest rate during the year:				
FHLB short-term advances	1.55	% 0.26	% 0.40	%
Short-term promissory notes	0.52	% 0.58	% 0.56	%
FHLB long-term advances	3.30	% 2.28	% 2.94	%
Mortgage loan	5.66	% 5.66	% 5.66	%

\$15.0 million of our borrowings mature in 2014 and \$25.0 million mature in 2020, but are callable immediately at the option of the issuer.

At December 31, 2013, we had pledged securities with an aggregate carrying value (fair value) of \$16.7 million and loans with a carrying value of \$93.6 million as collateral for FHLB advances. We had also pledged securities with an aggregate carrying value (fair value) of \$28.0 million as collateral for short-term promissory notes.

(10) Junior Subordinated Deferrable Interest Debentures

The following table shows the subordinated debt issued by First Mariner Bancorp and the related Trust Preferred Securities issued at both December 31, 2013 and 2012 (dollars in thousands):

Trust	Subordinated Debt Issued to Trust	Trust Preferred Securities Issued by Trust	Date of Original Issue	Stated Maturity
MCT II	\$6,186	\$6,000	December 10, 2002	December 10, 2032
MCT III	14,949	14,500	June 18, 2003	July 7, 2033
MCT IV	5,158	5,000	August 18, 2003	August 18, 2033
MCT V	10,310	10,000	September 25, 2003	October 8, 2033
MCT VI	10,310	10,000	October 21, 2004	January 7, 2035
MCT VII	5,155	5,000	August 18, 2005	September 15, 2035
	\$52,068	\$50,500		

First Mariner issued junior subordinated deferrable interest debentures to six statutory trust subsidiaries, Mariner Capital Trust ("MCT") II, MCT III, MCT IV, MCT V, MCT VI, and MCT VII (collectively, the "Trusts"). The Trusts are Delaware business trusts for which all the common securities are owned by First Mariner and which were formed for the purpose of issuing trust preferred securities. In accordance with FASB guidance, we have deconsolidated the Trusts, and their financial position and results of operations are not included in our consolidated financial position and results of operations. The payment and redemption terms of the debentures and related Trust Preferred Securities are substantially identical.

The Trust Preferred Securities are mandatorily redeemable, in whole or in part, upon repayment of their underlying subordinated debt at their respective maturities or their earlier redemption date at our option. All redemption dates have passed and we have not opted to redeem any of the junior subordinated deferrable interest debentures.

As of December 31, 2013, all of the Trust Preferred Securities are Floating Rate Trust Preferred Securities, which accrue interest equal to the 3-month LIBOR rate plus varying basis points as follows: MCT II—335 basis points; MCT III—325 basis points; MCT IV—305 basis points; MCT V—310 basis points; MCT VI—205 basis points; and MCT VII—195 basis points.

The interest expense (including amortization of the cost of issuance) on junior subordinated deferrable interest debentures was \$2.4 million in 2013, \$1.7 million in 2012, and \$1.6 million in 2011. In 2009, we elected to defer interest payments on the debentures. This deferral was permitted by the terms of the debentures and did not constitute an event of default thereunder at the time of the initial deferral. Interest on the debentures and dividends on the related Trust Preferred Securities continued to accrue and was due to be paid in full prior to the expiration of the deferral period in January of 2014. However, due to our agreements with the regulators (see details under "Capital Resources" below), we are not currently permitted to make such interest payments and as of January, 2014, we are in technical default with respect to these borrowings. See additional information regarding these debentures and the Chapter 11 Proceeding in Note 26.

The junior subordinated deferrable interest debentures are the sole assets of the Trusts. First Mariner has fully and unconditionally guaranteed all of the obligations of the Trusts.

The Company has learned that on February 7, 2014, certain holders of \$5.0 million of trust preferred securities issued by MCT III filed suit in the U.S. District Court for the Southern District of New York seeking payment of the \$5.0 million principal amount due on their outstanding trust preferred securities plus costs and interest. The Company believes that, as a result of the Chapter 11 Proceeding, this lawsuit is subject to an automatic stay imposed by Section 362 of the Bankruptcy Code of any action to collect, assert, or recover a claim against the Company as a result of the

Chapter 11 Proceeding.

Under applicable regulatory guidelines, a portion of the Trust Preferred Securities may qualify as Tier I capital and the remaining portion may qualify as Tier II capital, with certain limitations. At December 31, 2013, none of our outstanding Trust Preferred Securities qualify as either Tier I or Tier II capital due to limitations.

(11) Regulatory Matters, Capital Adequacy, and Liquidity

Regulatory matters and capital adequacy

Various regulatory capital requirements administered by the federal banking agencies apply to First Mariner and the Bank. Failure to meet minimum capital requirements can initiate certain mandatory, and possibly additional discretionary, actions by regulators that, if undertaken, could have a direct material effect on our financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Bank must meet specific capital guidelines that involve quantitative measures of assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Bank's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings, and other factors.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios of total and Tier I capital to risk-weighted assets, and of Tier I capital to average quarterly assets ("leverage"). As of both December 31, 2013 and 2012, the Bank was "undercapitalized" under the regulatory framework for prompt corrective action. Our regulatory capital amounts and ratios as of December 31, 2013 and 2012 were as follows:

	Actual		Minimum Requirements for Capital Adequacy Purposes		To be Well Capitalized Under Prompt Corrective Action Provision	
	Amount	Ratio	Amount	Ratio	Amount	Ratio
December 31, 2013	(dollars in thousands)					
Total capital (to risk-weighted assets):						
Consolidated	\$ (24,852)	(4.0)%	\$ 49,652	8.0	\$ 62,065	10.0 %
Bank	42,299	6.9 %	49,391	8.0 %	61,739	10.0 %
Tier I capital (to risk-weighted assets):						
Consolidated	(24,852)	(4.0)%	24,826	4.0	37,239	6.0 %
Bank	34,562	5.6 %	24,696	4.0 %	37,043	6.0 %
Tier I capital (to average quarterly assets):						
Consolidated	(24,852)	(2.4)%	42,260	4.0	52,826	5.0 %
Bank	34,562	3.3 %	42,179	4.0 %	52,724	5.0 %
December 31, 2012						
Total capital (to risk-weighted assets):						
Consolidated	\$ (6,525)	(0.8)%	\$ 67,262	8.0	\$ 84,078	10.0 %
Bank	61,292	7.3 %	67,073	8.0 %	83,841	10.0 %
Tier I capital (to risk-weighted assets):						
Consolidated	(6,525)	(0.8)%	33,631	4.0	50,447	6.0 %
Bank	50,777	6.1 %	33,536	4.0 %	50,304	6.0 %
Tier I capital (to average quarterly assets):						
Consolidated	(6,525)	(0.5)%	52,932	4.0	66,165	5.0 %
Bank	50,777	3.8 %	52,873	4.0 %	66,091	5.0 %

The FDIC, through the Deposit Insurance Fund, insures deposits of account holders up to \$250,000. The Bank pays an annual premium to provide for this insurance.

The Bank is a member of the FHLB System and is required to maintain an investment in the stock of the FHLB based on specific percentages of outstanding mortgages, total assets, or FHLB advances. Purchases and sales of stock are made directly with the Bank at par value.

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(11) Regulatory Matters, Capital Adequacy, and Liquidity (Continued)

On September 18, 2009, the Bank entered into an Agreement with the FDIC and the Commissioner of Financial Regulation for the state of Maryland (the "Commissioner"), pursuant to which it consented to the entry of an Order to Cease and Desist ("the September Order"), which directs the Bank to (i) increase its capitalization, (ii) improve earnings, (iii) reduce nonperforming loans, (iv) strengthen management policies and practices, and (v) reduce reliance on noncore funding. The September Order required the Bank to adopt a plan to achieve and maintain a leverage capital ratio of at least 7.5% and a total risk-based capital ratio of at least 11% by June 30, 2010. We did not meet the requirements at June 30, 2010 and have continued not to meet such capital requirements. The failure to achieve these capital requirements could result in further action by our regulators.

As part of the September Order, within 30 days after the end of each calendar year, the Bank must submit an annual budget and profit plan and a plan that takes into account the Bank's pricing structure, the Bank's cost of funds and how this can be reduced, and the level of provision expense for adversely classified loans. To address reliance on noncore funding, the Bank has adopted and submitted a liquidity plan to reduce the Bank's reliance on noncore funding, wholesale funding sources, and high-cost rate-sensitive deposits. While the September Order is in effect, the Bank may not pay dividends or management fees without the FDIC's prior consent, may not accept, renew, or roll over any brokered deposits, and is restricted in the yields that it may pay on deposits. As of December 31, 2013, we have met substantially all provisions of the September Order, with the exception of the capital requirements.

First Mariner Bancorp is also a party to agreements with the FRB (the "FRB Agreements"), which, together, require it to: (i) develop and implement a strategic business plan that includes (a) actions that will be taken to improve our operating performance and reduce the level of parent company leverage, (b) a comprehensive budget and an expanded budget review process, (c) a description of the operating assumptions that form the basis for major projected income and expense components and provisions needed to maintain an adequate loan loss reserve, and (d) a capital plan incorporating all capital needs, risks, and regulatory guidelines; and (ii) submit plans to improve enterprise-wide risk management and effectiveness of internal audit programs. First Mariner Bancorp has also agreed to provide the FRB with advance notice of any significant capital transactions. The FRB Agreements also prohibit First Mariner and the Bank from taking any of the following actions without the FRB's prior written approval: (i) declaring or paying any dividends; (ii) taking dividends from the Bank; (iii) making any distributions of interest, principal, or other sums on First Mariner's subordinated debentures or trust preferred securities; (iv) incurring, increasing, or guaranteeing any debt; or (v) repurchasing or redeeming any shares of its stock. To satisfy the FRB's minimum capital requirements, First Mariner's consolidated Tier I capital to average quarterly assets, Tier I capital to risk-weighted assets, and total capital to risk-weighted assets ratios at each quarter end must be at least 4.0%, 4.0%, and 8.0%, respectively. At December 31, 2013, those capital ratios were (2.4)%, (4.0)%, and (4.0)%, respectively, which were not in compliance with the minimum requirements. The failure to achieve these capital requirements could result in further action by our regulators.

The foregoing will subject us to increased regulatory scrutiny and may have an adverse impact on our business operations. Failure to comply with the provisions of these regulatory requirements may result in more restrictive actions from our regulators, including more severe and restrictive enforcement actions.

Liquidity

The Bank's principal sources of liquidity are cash and cash equivalents (which are cash on hand and amounts due from financial institutions, federal funds sold, money market mutual funds, and interest bearing deposits), AFS securities, deposit accounts, and borrowings. The levels of such sources are dependent on the Bank's operating, financing, and investing activities at any given time. We attempt to primarily rely on core deposits from customers to provide stable and cost-effective sources of funding to support our loan growth. We also seek to augment such deposits with longer term and higher yielding certificates of deposit. Cash and cash equivalents, which totaled \$165.7 million at December 31, 2013, have immediate availability to meet our short-term funding needs. Our entire securities portfolio is classified as AFS, is highly marketable (excluding our holdings of pooled trust preferred securities), and is available

to meet our liquidity needs. Additional sources of liquidity include LHFS, which totaled \$60.8 million at December 31, 2013, are committed to be sold into the secondary market, and generally are funded within 60 days and our residential real estate portfolio, which includes loans that are underwritten to secondary market criteria. Additionally, our residential construction loan portfolio provides a source of liquidity as construction periods generally range from 9-12 months, and these loans are subsequently refinanced with permanent first-lien mortgages and sold into the secondary market. We may also, from time to time, sell commercial or consumer loans to enhance our liquidity position.

(12) Stock Options, Warrants, and Stock Incentives

We have stock option plans, which provide for the granting of options to acquire First Mariner common stock to our directors and key employees. Option exercise prices are equal to or greater than the fair market value of the common stock on the date of the grant.

We account for stock options issued under our stockholder-approved Long-Term Incentive Plan (the "Plan") and warrants in accordance with FASB guidance on share-based payments. The plan permits the granting of share options and shares to our directors and key employees. As of December 31, 2013, all options and warrants were fully vested and all compensation expense related to currently outstanding options and warrants had been recognized.

All options expire 10 years after the date of grant. The warrants expire five years after date of issuance.

Information with respect to stock options and warrants is as follows for the years ended December 31:

	2013				2012			
	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding at beginning of year	589,478	\$ 6.12			836,228	\$ 7.98		
Forfeited/cancelled	(63,350)	12.42			(246,750)	12.45

19.30	6,050	2.3
	526,128	

* less than 30 days weighted average remaining contractual life

(13) (Loss) Income Per Share

Basic (loss) income per share is computed by dividing (loss) income available to common stockholders by the weighted-average number of common shares outstanding. Diluted (loss) income per share is computed after adjusting the denominator of the basic (loss) income per share computation for the effects of all dilutive potential common shares outstanding during the period. The dilutive effects of options, warrants, and their equivalents are computed using the "treasury stock" method. For the years ended December 31, 2013, 2012, and 2011, all options and warrants were antidilutive and excluded from the computations.

Information relating to the calculations of our net (loss) income per common share is summarized as follows for the years ended December 31:

	2013	2012	2011
	(dollars in thousands, except for per share data)		
Weighted-average shares outstanding—basic and diluted	19,457,673	18,860,482	18,693,779
Net (loss) income	\$(19,104)	\$16,117	\$(30,244)
Basic and diluted net (loss) income per share	\$(0.98)	\$0.85	\$(1.62)

(16) Income Taxes (Continued)

The tax effects of temporary differences between the financial reporting basis and income tax basis of assets and liabilities relate to the following at December 31:

	2013	2012
Deferred tax assets:		
	(dollars in thousands)	
Allowance for losses on loans	\$ 3,490	\$ 4,645
Amortization of intangible assets	29	42
Real estate acquired through foreclosure	3,374	3,692
State net operating loss carryforward	7,434	5,930
Federal net operating loss carryforward	27,650	16,956
OTTI	1,064	3,310
Nonaccrual interest	140	453
Depreciation	193	259
Federal AMT credit carryforward	247	500
Other	—	84
Total gross deferred tax assets	43,621	35,871
Less: valuation allowance	(44,528)	(36,553)
Net deferred tax asset attributable to operations	(907)	(682)
Unrealized loss on investments charged to other comprehensive loss	907	682
Net deferred tax assets	\$—	\$—

As of both December 31, 2013 and 2012, we maintained a valuation allowance for the full amount of our net deferred tax assets.

Our income tax returns are subject to review and examination by federal and state taxing authorities. We are currently open to audit under the applicable statutes of limitations by the Internal Revenue Service for the years ended December 31, 2010 through 2012. The years open to examination by state taxing authorities vary by jurisdiction.

(17) Fair Value of Financial Instruments

We group financial assets and financial liabilities measured at fair value in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are:

- Level 1 Valuations for assets and liabilities traded in active exchange markets. Valuations are obtained from readily available pricing sources for market transactions involving identical assets or liabilities.
- Level 2 Valuations for assets and liabilities traded in less active dealer or broker markets. Valuations are obtained from third party pricing services for identical or comparable assets or liabilities which use observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities.
- Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

We record transfers between levels at the end of the reporting period in which the change in significant inputs occurs.

Financial Instruments Measured on a Recurring Basis

The following tables present fair value measurements for assets, liabilities, and off-balance sheet items that are measured at fair value on a recurring basis as of and for the years ended December 31:

2013

	Carrying Value	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Changes In Fair Values Included In Period Loss

Level 3 Financial Instruments

Financial instruments are considered Level 3 when their values are determined using pricing models, discounted cash flow methodologies, or similar techniques and at least one significant model assumption or input is unobservable.

Level 3 financial instruments also include those for which the determination of fair value requires significant management judgment or estimation.

AFS Securities

The fair value of AFS securities is based on bid quotations received from securities dealers, bid prices received from an external pricing service, or modeling utilizing estimated cash flows, depending on the circumstances of the individual security.

As of December 31, 2013, one pooled trust preferred security in the amount of \$407,000 (\$2.5 million par value) was classified as Level 3. The market environment has continued to be inactive for this security type and made fair value pricing more subjective. The fair value of this security is primarily a function of the credit quality of the issuer, although there is some sensitivity to interest rate changes. A change in the rating of the security will affect its value.

As of December 31, 2012, \$955,000 (\$10.9 million par value) of our AFS securities (four securities) were classified as Level 3. During 2013, we sold three of the Level 3 securities for a \$33,000 net gain.

The following table details the Level 3 security:

		Remaining	Current			
	Class	Par	Rating/	Outlook(2)	Maturity	(3)
		Value(1)	Moody's	Fitch		Index
MM Community Funding	B	\$2,500	Ca	D	8/1/2031	6ML + 3.1%

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(17) Fair Value of Financial Instruments (Continued)

Classification of Level 3 indicates that significant valuation assumptions are not consistently observable in the market and, as such, fair values are derived using the best available data. We calculated fair value for the security by using a present value of future cash flows model, which incorporated assumptions as follows as of December 31, 2013:

Key Model Assumptions Used In Pricing

	Credit MTM (1)(4)	Liquidity Premium (2)	Liquidity MTM Adj (3)(4)
MM Community Funding	\$39.08	11.0	% \$22.80

(1) The credit mark to market ("MTM") represents the discounted value of future cash flows after the assumption of current and future defaults discounted at the book rate of interest on the security.

(2) The risk of being unable to sell the instrument for cash at short notice without significant costs, usually indicative of the level of trading activity for a specific security or class of securities.

(3) The liquidity MTM adjustment on the security represents the difference between the value of the discounted cash flows based on the book interest rate and the value discounted at the liquidity premium. The credit MTM less the liquidity MTM equals the estimated fair value price of the security.

(4) Price per \$100

Fair values were as follows at December 31:

	2013		2012	
	Model Result(1)	Fair Value (in thousands)	Model Result(1)(2)	Fair Value (in thousands)
ALESCO Preferred Funding VII	\$—	\$—	\$2.72	\$27
ALESCO Preferred Funding XI	—	—	11.84	585
MM Community Funding	16.28	407	5.86	146
MM Community Funding IX	—	—	8.14	197
		\$407		\$955

(1) Price per \$100

(2) Based on December 31, 2012 assumptions

During the years ended December 31, 2012 and 2011, we determined that, based on our most recent estimate of cash flows at the time, OTTI had occurred in our pooled trust preferred security portfolio. The amount of OTTI that is recognized through earnings is determined by comparing the present value of the expected cash flows to the amortized cost of the security. The discount rate used to determine the credit loss is the expected book yield on the security. The credit loss estimated under the aforementioned method that was charged to operating earnings totaled \$460,000 and \$838,000 for the years ended December 31, 2012 and 2011, respectively. No OTTI charges were required for the year ended December 31, 2013

Warrants

Warrants were classified as Level 3. See Note 12 for information related to the calculation of fair value of the warrants.

The table below presents a reconciliation of financial instruments measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the years ended December 31:

There were no transfers between any of Levels 1, 2, and 3 for the years ended December 31, 2013, 2012 or 2011.

Other Financial Instruments Measured on a Recurring Basis

LHFS

LHFS are carried at fair value, which is determined based on outstanding investor commitments or, in the absence of such commitments, based on current investor yield requirements or third party pricing models.

IRLCs

We engage an experienced third party to estimate the fair market value of our IRLCs, which are valued based upon mandatory pricing quotes from correspondent lenders less estimated costs to process and settle the loan. Fair value is adjusted for the estimated probability of the loan closing with the borrower.

Forward Contracts to Sell Mortgage-Backed Securities

Fair value of these commitments is determined based upon the quoted market values of the securities.

Financial Instruments Measured on a Nonrecurring Basis

We may be required, from time to time, to measure certain other financial assets and liabilities at fair value on a nonrecurring basis. These adjustments to fair value usually result from application of LCM accounting or write-downs of individual assets. For assets measured at fair value on a nonrecurring basis, the following tables provide the level of valuation assumptions used to determine each adjustment and the carrying value of the assets as of December 31:

	2013			
	Carrying Value	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(dollars in thousands)			
Impaired loans	\$59,418	\$—	\$—	\$59,418
Real estate acquired through foreclosure	14,596	—	—	14,596

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(17) Fair Value of Financial Instruments (Continued)

	2012			
	Carrying Value	Quoted Prices (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	(dollars in thousands)			
Impaired loans	\$75,910	\$—	\$—	\$75,910
Real estate acquired through foreclosure	18,058	—	—	18,058

Impaired Loans

Allowable methods for estimating fair value for impaired loans include using the fair value of the collateral for collateral dependent loans or, where a loan is determined not to be collateral dependent, using the discounted cash flow method.

If the impaired loan is identified as collateral dependent, then the fair value method of measuring the amount of impairment is utilized. This method requires obtaining a current independent appraisal or utilizing some other method of valuation for the collateral and applying a discount factor to the value based on our loan review policy and procedures.

If the impaired loan is determined not to be collateral dependent, then the discounted cash flow method is used. This method requires the impaired loan to be recorded at the present value of expected future cash flows discounted at the loan's effective interest rate. The effective interest rate of a loan is the contractual interest rate adjusted for any net deferred loan fees or costs, premiums, or discounts existing at origination or acquisition of the loan.

For all loans other than TDRs, a partial charge-off is recorded to reduce the carrying amount of the loan to its fair value. For TDRs that have an estimated fair value that is below the carrying value, an allocation of the loan loss allowance is established and remains part of the allowance until such time that it is determined the loan will proceed to foreclosure or is paid off. Total impaired loans had a carrying value of \$59.4 million and \$75.9 million as of December 31, 2013 and 2012 respectively, with allocated reserves of \$207,000 and \$327,000 as of December 31, 2013 and 2012, respectively.

See Note 6 for more detailed information about impaired loans by loan class

Real Estate Acquired Through Foreclosure

We record foreclosed real estate assets at the LCM on their acquisition dates and at the lower of such initial amount or estimated fair value less estimated selling costs thereafter. Estimated fair value is generally based upon independent appraisal of the collateral or listing prices supported by broker recommendation. We consider these collateral values to be estimated using Level 3 inputs. We held real estate acquired through foreclosure of \$14.6 million as of December 31, 2013 and \$18.1 million as of December 31, 2012. During 2013 and 2012, we added \$13.0 million and \$7.6 million, respectively, net of reserves, to real estate acquired through foreclosure and recorded write-downs and losses on sales, included in noninterest expense, of \$4.0 million in both years. We disposed of \$12.4 million and \$10.7 million of foreclosed properties in 2013 and 2012, respectively.

Pricing or valuation models are applied using current market information to estimate fair value. In some cases considerable judgment is required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a current market exchange. The use of different market assumptions and/or estimation methods may have a material effect on the estimated fair value amounts.

Cash and Cash Equivalents

The carrying amount for cash and cash equivalents approximates fair value due to the short maturity of these instruments.

Loans Receivable

Loans were segmented into portfolios with similar financial characteristics. Loans were also segmented by type such as residential, multifamily, residential and nonresidential construction and land, home equity and second mortgage loans, commercial, and consumer. Each loan category was further segmented by fixed- and adjustable-rate interest terms and performing and nonperforming categories. The fair value of each loan category was calculated by discounting anticipated cash flows based on weighted-average contractual maturity, weighted-average coupon, and discount rate.

The fair value for nonperforming loans was determined utilizing FASB guidance on loan impairment.

Restricted Stock Investments

The carrying value of restricted stock investments is a reasonable estimate of fair value as these investments do not have a readily available market.

Deposits

The fair value of deposits with no stated maturity, such as noninterest-bearing deposits, interest-bearing NOW accounts, money market, and savings accounts, is deemed to be equal to the carrying amounts. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate for certificates of

deposit was estimated using the rate currently offered for deposits of similar remaining maturities.

Table of Contents

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(17) Fair Value of Financial Instruments (Continued)

Long- and Short-Term Borrowings and Junior Subordinated Deferrable Interest Debentures

Long- and short-term borrowings and junior subordinated notes were segmented into categories with similar financial characteristics. Carrying values were discounted using a cash flow approach based on market rates.

Other Off-Balance Sheet Financial Instruments

The disclosure of fair value amounts does not include the fair values of any intangibles, including core deposit intangibles. Core deposit intangibles represent the value attributable to total deposits based on an expected duration of customer relationships.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about financial instruments. These estimates do not reflect any premium or discount that could result from a one-time sale of our total holdings of a particular financial instrument. Because no market exists for a significant portion of our financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect estimates.

(18) Credit Commitments

Commitments to extend credit are agreements to lend to customers, provided that terms and conditions established in the related contracts are met. At December 31, 2013 and 2012, we had commitments to originate first mortgage loans on real estate of approximately \$54.9 million and \$404.6 million, respectively, most of which were committed for sale in the secondary market.

At December 31, 2013 and 2012, we also had commitments to loan funds under unused home equity lines of credit aggregating approximately \$54.3 million and \$56.7 million, respectively, and unused commercial lines of credit, retail checking lines of credit, as well as unfunded construction, commercial, and consumer commitments aggregating approximately \$20.8 million and \$26.2 million, respectively. Such commitments generally carry a fixed rate of interest, while home equity lines of credit are generally variable.

Commitments for first mortgage loans generally expire within 60 days and are normally funded with loan principal repayments, excess liquidity, and deposits. Since certain commitments may expire without being drawn upon, the total commitment amounts do not necessarily represent our future cash requirements.

Substantially all outstanding commitments at December 31, 2013 and 2012 are for loans to be secured by real estate with appraised values in excess of the commitment amounts. Our exposure to credit loss under these contracts in the event of nonperformance by the other parties is represented by the commitment amounts, assuming the collateral has no value.

Letters of credit are commitments issued to guarantee the performance of a customer to a third party. At December 31, 2013 and 2012, letters of credit totaled \$1.0 million and \$1.6 million, respectively.

(19) Derivatives and Hedging

We maintain and account for derivatives, in the form of IRLCs and forward sales commitments, in accordance with FASB guidance on accounting for derivative instruments and hedging activities. We recognize gains and losses on IRLCs and forward sales commitments on the loan pipeline through mortgage-banking revenue in the Consolidated Statements of Operations.

At December 31, 2013, we had pledged securities with an aggregate carrying value (fair value) of \$9.0 million as collateral for hedging activities.

See Note 17 for carrying value and fair value information on our derivatives and hedges.

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(20) Related Party Transactions

During the ordinary course of business, we make loans to our directors and their affiliates and several of our policy making officers on substantially the same terms, including interest rates and collateral, as those prevailing for comparable transactions with other customers. During the years ended December 31, 2013, 2012, and 2011, transactions in related party loans were as follows:

	2013	2012	2011	
	(dollars in thousands)			
Beginning balance	\$ 986	\$ 2,006	\$ 3,402	
Additions	—	—	15	
Repayments	(482) (1,020) (1,167)
Change in officers/directors	—	—	(244)
	\$ 504	\$ 986	\$ 2,006	

Unused loan commitments to directors and policy making officers totaled \$1.0 million as of December 31, 2013 and \$1.6 million as of December 31, 2012.

The Bank sponsors the activities of the Baltimore Blast, a professional soccer team owned by Edwin F. Hale, Sr., former Chief Executive Officer ("CEO") of the Company. The Bank paid approximately \$25,000 in 2013, \$50,000 in 2012, and \$175,000 in 2011 for a sponsorship package which includes printed material and Bank banners displayed at Baltimore Blast games, prize giveaways, free tickets, and employee recognition nights.

Additionally, First Mariner Bank has periodically advertised on a billboard owned by Mr. Hale. The Bank paid \$30,000 and \$45,000 in 2012 and 2011, respectively, for advertising on the billboard.

All related party transactions are subject to review by management and the audit committee and approved by the full Board of Directors. We believe that the terms for all related party transactions are at least as favorable as those that could be obtained from a third party.

(21) Segment Information

We are in the business of providing financial services, and we operate in two business segments—commercial and consumer banking and mortgage-banking. Commercial and consumer banking is conducted through the Bank and involves delivering a broad range of financial services, including lending and deposit taking, to individuals and commercial enterprises. This segment also includes our treasury and administrative functions. Mortgage-banking is conducted through First Mariner Mortgage, a division of the Bank, and involves originating first- and second-lien residential mortgages for sale in the secondary market and to the Bank.

(24) Self-Insurance

On July 1, 2013, we became self-insured with respect to employee-related health insurance claims. We use commercial insurance above our self-insured retentions to reduce our risk of catastrophic loss. Our reserves for self-insured losses are estimated based on employee claim history. Our self-insurance reserves totaled \$185,000 as of December 31, 2013.

(25) Recent Accounting Pronouncements

Pronouncement Adopted

In February 2013, FASB issued Accounting Standards Update ("ASU") No. 2013-02, Comprehensive Income (Topic 220)—Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income. ASU No. 2013-02 requires companies to report either on the income statement or disclose in the footnotes to the financial statements the effects on earnings from items that are reclassified out of the category of shareholder equity called other comprehensive income and is effective for fiscal years and interim periods within such years beginning after December 15, 2012. We adopted this disclosure-only pronouncement effective January 1, 2013.

Pronouncement Issued

In March 2013, FASB issued ASU No. 2013-04, Liabilities (Topic 405)—Obligations Resulting From Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date. ASU No. 2013-04 establishes guidance for the recognition, measurement, and disclosure of obligations arising from joint and several liability arrangements for which the total amount under the arrangement is fixed at the reporting date (e.g., debt arrangements, other contractual obligations, settled litigation, and judicial rulings) and is effective for fiscal years and interim periods within such years beginning after December 15, 2013. We do not anticipate this pronouncement will have a material effect on our consolidated financial statements.

(26) Subsequent Event

On February 7, 2014, the Company entered into the M&A Agreement with RKJS Bank ("RKJS"), a Maryland chartered trust company. Pursuant to the terms and subject to the conditions set forth in the M&A Agreement, RKJS has agreed to purchase all of the issued and outstanding shares of common stock of the Bank ("Acquired Stock") and certain other assets held in the name of the Company, but used in the business of the Bank (together with Acquired Stock, "Acquired Assets") for a cash purchase price of \$4.775 million ("Purchase Price"). If the Bank's Tier I Capital, calculated in accordance with FDIC regulations, but reduced for the cost of directors' and officers' liability insurance tail coverage, is less than \$29.0 million, the Purchase Price will be reduced on a dollar-for-dollar basis for each dollar that such Tier 1 Capital is less than \$29.0 million. The acquisition of the Acquired Stock will be accomplished by the merger of RKJS with and into the Bank, with the Bank being the surviving entity (the "Merger"). Upon completion of the Merger, RKJS has agreed to recapitalize the Bank with additional capital of between \$85.0 million and \$100.0 million, less the Purchase Price. RKJS will purchase the Acquired Assets free and clear of all liens, claims, and encumbrances and will assume no liabilities of the Company.

The M&A Agreement requires that the Company file the Chapter 11 Proceeding (which occurred on February 10, 2014). The M&A Agreement also contains covenants of the Company and RKJS, including, among others, an agreement by the Company and RKJS to use their commercially reasonable best efforts to obtain the entry of an order of the Bankruptcy Court approving certain auction and sale procedures with respect to the Acquired Assets ("Bidding Procedures Order").

The Merger will be conducted under the provisions of Section 363 of the Bankruptcy Code and will be subject to bidding procedures and the possible receipt of a higher and better bid at auction ("Auction") that will be conducted in accordance with the bidding procedures approved by the Bankruptcy Court ("Bidding Procedures"). The Bidding Procedures provide that RKJS is the "stalking-horse" bidder for the Acquired Assets at the Auction. The M&A Agreement calls for the Company to pay a stalking-horse bidder fee in certain circumstances, including the Bankruptcy Court's approval of the acquisition of the Acquired Assets by another bidder. The amount of the stalking-horse bidder fee is: (i) \$1.0 million, of which \$750,000 would be payable by the Bank and \$250,000 would be payable by the Company; and (ii) an expense reimbursement of all reasonable and documented fees and expenses incurred by RKJS and its investors in connection with the transactions contemplated by the M&A Agreement not to exceed \$1.75 million.

The Company and RKJS have made customary representations, warranties, and covenants in the M&A Agreement.

Consummation of the sale of the Acquired Assets is subject to customary closing conditions, including, among other things: (i) the representations and warranties of the parties to the M&A Agreement being true and correct as of the closing; (ii) the Bankruptcy Court entering a final sale order relating to the Acquired Assets; and (iii) RKJS obtaining the requisite regulatory approvals for the purchase of the Acquired Stock.

FIRST MARINER BANCORP AND SUBSIDIARY

Notes to Consolidated Financial Statements (Continued)

Years Ended December 31, 2013, 2012, and 2011

(26) Subsequent Event (Continued)

Chapter 11 Voluntary Bankruptcy Filing

On February 10, 2014, the Company filed the Chapter 11 Proceeding in the Bankruptcy Court. The Company will continue to operate its business, as "debtor-in-possession" under the jurisdiction of the Bankruptcy Court and in accordance with the applicable provisions of the Bankruptcy Code and orders of the Bankruptcy Court. During the bankruptcy proceedings, the Bank's branches will remain open and will continue serving customers as usual. During the pendency of the Chapter 11 Proceeding, the Company's financial results may fluctuate as they reflect asset impairments, asset dispositions, contract terminations and rejections, and claims assessments. As a result, the Company's historical financial performance may not be indicative of its financial performance following the Chapter 11 Proceeding.

In addition, under the priority scheme established by the Bankruptcy Code, unless creditors agree otherwise, post-petition liabilities and pre-petition liabilities must be satisfied in full before shareholders are entitled to receive any distribution or retain any property under a Chapter 11 liquidation plan. The ultimate recovery to creditors and/or shareholders, if any, will not be determined until confirmation of a Chapter 11 liquidation plan. No assurance can be given as to what values, if any, will be ascribed in the Chapter 11 Proceeding to each of these constituencies or what types or amounts of distributions, if any, they would receive. A Chapter 11 liquidation plan will likely result in holders of equity interests in the Company having all such interests cancelled and extinguished. If certain requirements of the Bankruptcy Code are met, a plan can be confirmed notwithstanding its rejection by the Company's equity security holders and notwithstanding the fact that such equity security holders do not receive or retain any property on account of their equity interests under the plan.

Debtor-In-Possession Financing Facility

Also on February 10, 2014, as part of the Chapter 11 Proceeding, the Company and RKJS entered into a Debtor-in-Possession Credit Agreement ("DIP Credit Agreement"). Pursuant to the terms and subject to the conditions set forth in the DIP Credit Agreement, RKJS agreed to provide a debtor-in-possession financing facility ("DIP Financing Facility") to the Company in an amount not to exceed \$2.5 million. The DIP Credit Agreement will provide a source of funds to the Company, enabling the Company to satisfy customary obligations associated with the bankruptcy process. The obligations under the DIP Financing Facility are secured by all assets of the Company, including without limitation a pledge of the stock of the Bank, which is the Company's principal operating subsidiary. All amounts outstanding under the DIP Financing Facility will become due and payable on the date that is four months from the first extension of credit under the DIP Financing Facility or, in certain circumstances, an earlier date (e.g., if another bidder is selected to purchase the Acquired Assets).

The Company and RKJS have made customary representations, warranties, and covenants in the DIP Credit Agreement.

Default on the Junior Subordinated Debentures

The Company's filing of the Chapter 11 Proceeding in the Bankruptcy Court constituted an event of default under the indentures relating to its junior subordinated debt, causing the entire unpaid principal and accrued interest under each of the indentures to become immediately due and payable upon notice to the Company in writing from either the indenture trustee or holders of a specified aggregate principal amount of the junior subordinated debt outstanding under each such debenture. The Company believes that any efforts to enforce such payment obligations with respect to the junior subordinated debt are stayed as a result of the filing of the Chapter 11 Proceeding.

ITEM 9 CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A CONTROLS AND PROCEDURES

Senior management maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in our Exchange Act reports is recorded, processed, summarized, and reported within the time periods provided in the SEC rules and forms, and that such information is accumulated and communicated to our management, including the interim CEO and Chief Financial Officer ("CFO"), as appropriate, to allow timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, senior management has recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control

121

Table of Contents

objectives, and therefore has been required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

In accordance with Rule 13a-15(b) of the Exchange Act, as of the end of the fiscal year ended December 31, 2013, we carried out an evaluation under the supervision and with the participation of our management, including our interim CEO and CFO, of the effectiveness of the design and operation of our disclosure controls and procedures as defined in rule 13a-15(e) and 15d-15(e) under the Exchange Act. Based on that evaluation, our interim CEO and CFO have concluded that our disclosure controls and procedures are, in fact, effective at the reasonable assurance level.

There were no changes in our internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

As required by Section 404 of the Sarbanes-Oxley Act of 2002, management has performed an evaluation and testing of the Company's internal control over financial reporting as of December 31, 2013. Management's report on the Company's internal control over financial reporting is set forth as follows:

Management's Report On Internal Control Over Financial Reporting

Management of First Mariner Bancorp is responsible for establishing and maintaining adequate internal control over financial reporting. The internal control process has been designed under management's supervision to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's consolidated financial statements for external reporting purposes in accordance with GAAP.

Management of the Company has conducted an assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2013, utilizing the framework established in the 1992 Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on this assessment, management has determined that, as of December 31, 2013, the Company's internal control over financial reporting is effective.

The Company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Any internal control system, no matter how well designed, will have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

This annual report does not include an attestation report of the Company's registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's registered public accounting firm pursuant to rules of the SEC that permit the Company to provide only management's report in this annual report.

ITEM 9B OTHER INFORMATION

None.

PART III

ITEM 10 DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

Directors

Term to Expire in 2014

Name	Age	Director Since
Barry B. Bondroff	65	1995
Patricia Schmoke, MD	60	1999
John Brown III	66	2002
Anirban Basu	45	2008

Barry B. Bondroff became a partner in the certified public accounting firm of Gorfine, Schiller & Gardyn, P.A. on July 1, 2008. He was the former managing partner for the certified public accounting firm of Smart & Associates in Baltimore, MD. Prior to that, he was the managing officer of Grabush, Newman & Co., P.A., a certified public accounting firm, since 1982. Mr. Bondroff is a member of the American Institute of Certified Public Accountants and is a former member of the Board of Directors of Baltimore Bancorp. Mr. Bondroff is a member of the Board of Directors of Medifast, Inc. (NYSE: MED). Mr. Bondroff is a certified public accountant and has the financial background to qualify as an audit committee financial expert. Mr. Bondroff provides expertise with regard to tax, financial, and accounting matters.

Patricia Schmoke, MD has been a practicing ophthalmologist since 1982. She is also the president of Metropolitan Eye Care Associates, providing eye care with Baltimore Medical System. Dr. Schmoke's strong ties to the community, through her medical practice and involvement in civic and professional organizations, provides the Board with valuable insight regarding the local business and consumer environment.

John Brown III is President of M.B.K. Enterprises, Inc. (R. J. Bentley's Restaurant) and managing partner of the College Park Professional Office Building, LLC. Mr. Brown is also the former Chairman of the Maryland Stadium Authority. As President of M.B.K. Enterprises, Inc. and managing partner of the College Park Professional Office Building, LLC, Mr. Brown provides the Board with essential business and finance experience, as well as valuable leadership capability.

Anirban Basu is the founder, Chairman, and CEO of Sage Policy Group, Inc., an economic and policy consulting firm in Baltimore, Maryland since 2004. He has a Bachelor of Science Degree from Georgetown University, and Master's Degrees from Harvard University and The University of Maryland as well as a J.D. from the University of Maryland School of Law. As an entrepreneur and as Chairman and CEO of Sage Policy Group, Inc., Mr. Basu brings significant business and management level experience from a setting outside of the financial services industry. In addition, through his business and education experience, Mr. Basu has gained significant technological knowledge, adding additional value to the board.

Term to Expire in 2015

Name	Age	Director Since
John J. Oliver, Jr.	68	1997
Robert Caret	66	2006
Mark A. Keidel	52	2009

John J. Oliver, Jr. has been the CEO and Publisher of the Afro-American Publishing, Co. since 1996. Mr. Oliver's experience as CEO and Publisher of the Afro-American Publishing, Co. provides the Board valuable management level experience. In addition, Mr. Oliver's continued involvement in community organizations and local political matters is a vital component of a well-rounded board.

Robert Caret is the President of the University of Massachusetts. He was the President of Towson University from 2003-2011, the President of San Jose State University from 1995-2003, and Provost and Executive Vice President of Towson State University from 1991-1995. He is currently a member of the Board of Directors for CollegeBound

Foundation and the Governor's Workforce Investment Board. He is also on the Board of Governors and the American Flag Foundation Board of

123

Table of Contents

the Center Club of Baltimore. As the leader of a complex organization with hundreds of employees, Mr. Caret brings significant executive experience to board deliberations. Mr. Caret serves on the board of directors of several major area not-for-profit organizations and his extensive knowledge of community affairs helps to ensure that the Company is able to reach out to meet community needs where appropriate.

Mark A. Keidel was appointed as the principal executive officer of the Company and the Bank on an interim basis in December 2011. Mr. Keidel became President of the Bank in November 2011 and President and Chief Operating Officer of the Company and Chief Operating Officer of the Bank in May 2009. He joined the Bank as Executive Vice President and CFO in 2000. Prior to that, he served as the CFO of Carroll County Bank and Mason Dixon Bancshares, Inc. Mason Dixon Bancshares, Inc. was a \$1.2 billion multibank holding company headquartered in Westminster, Maryland that was acquired by BB and T Corporation in 1999. Mr. Keidel passed the Maryland Certified Public Accountant examination in 1992 and graduated from the Bank Administration Institute Financial School in 1991. As a result of Mr. Keidel's tenure with the Company and the Bank, he affords the Board the opportunity to utilize his deep knowledge of and insight into the institution, its market areas, and operational risks. Mr. Keidel provides expertise with regard to tax, financial, and accounting matters.

Term to Expire in 2016

Name	Age	Director Since
George H. Mantakos	71	1994
Michael R. Watson	71	1998
Hector Torres	62	2003
Gregory A. Devou	62	2008

George H. Mantakos, currently retired, was formerly an Executive Vice President of the Company. Mr. Mantakos previously served as President of the Company and President and CEO of the Bank. Prior thereto, Mr. Mantakos was a founder and organizer of Maryland'sBank, FSB, the predecessor of the Bank. As a result of Mr. Mantakos' tenure with the Company and the Bank, he affords the Board the opportunity to utilize his deep knowledge of and insight into the institution, its market areas, and operational risks.

Michael R. Watson is the interim Chairman of the Board of the Company and the Bank. Mr. Watson is the President of the International Pilots Association and the former President of the American Pilots Association. Mr. Watson has served as a member of the Federal Reserve Board. Mr. Watson has extensive management level experience both inside and outside of the financial services industry. Such management experience in regulated industries has exposed Mr. Watson to many of the issues facing public companies today, particularly regulated entities, making Mr. Watson a valued component of a well-rounded board.

Hector Torres is President of Prosaber Consulting, an Emergency Management Consulting Company. He was the former Executive Director of the Governor's Commission on Hispanic Affairs. He was formerly the Battalion Chief and Public Information Officer of the Baltimore City Fire Department. Mr. Torres is an entrepreneur and is active in both the business and civic communities in the Baltimore area. Mr. Torres is one of the area's most visible minority leaders.

Gregory A. Devou, currently retired, was formerly the Executive Vice President and Chief Marketing Officer for CareFirst Blue Cross BlueShield, a healthcare payor since 1996. Prior to that, Mr. Devou served for a year as CareFirst Senior Vice President for Corporate Marketing. Mr. Devou brings significant business and management level experience from a setting outside of the financial services industry. In addition, through his local business experience, Mr. Devou has gained significant local marketing knowledge, adding additional value to the board.

Executive Officers Who Are Not Directors

Paul B. Susie, age 47, has been the CFO and Principal Accounting Officer of the Bank since May 2009. Mr. Susie began his career as an accountant with Coopers and Lybrand (now PriceWaterHouseCoopers), a public accounting firm, and thereafter served in several senior financial positions, including as the Controller of Baltimore Marine Industries, which owned and operated a full-service shipyard, Vice President of Administration and Controller of Earthshell Corporation, a disposable packaging manufacturer, and Corporate Controller and later Chief Accounting

Officer at Celsion Corporation, an oncology drug development company. A graduate of the University of Baltimore, Mr. Susie has over 20 years of experience in both public and corporate accounting. Mr. Susie passed the Maryland Certified Public Accountant examination in 1995.

Table of Contents

Section 16(A) Beneficial Ownership Reporting Compliance

The Company's directors and executive officers, and persons who own more than 10% of the Company's Common Stock, are required to file with the SEC initial reports of beneficial ownership and reports of changes in beneficial ownership of any securities of the Company. To the Company's knowledge, based solely on a review of the copies of such reports furnished to the Company and written representations that no other reports were required, all of the Company's directors, executive officers, and beneficial owners of greater than 10% of the Company's Common Stock made all required filings during the fiscal year ended December 31, 2013.

Audit Committee

The Board of Directors has a separately designated Audit Committee established in accordance with Section 3(a)(58)(A) of the Securities Exchange Act of 1934, as amended. The Company's Audit Committee consists of Messrs. Watson, Bondroff, Brown, Caret, Devou, and Mantakos. The Board of Directors has determined that Mr. Bondroff qualifies as an "audit committee financial expert" under the rules of the SEC. Mr. Bondroff is "independent," as such term is defined in Item 7(d)(3)(iv)(A) of Schedule 14A under the Exchange Act.

Code of Ethics

We have a Code of Conduct and Ethics that applies to our employees, officers, and directors, including our principal executive officer and principal financial and accounting officer. A copy of this Code of Conduct and Ethics is available on our website at www.1stmarinerbancorp.com (investor relations section), or a written copy can be obtained by request. We intend to disclose any changes in or waivers from our code by posting such information on our website. We also have adopted an Executive Code of Conduct and Ethics Policy that addresses (i) trading prohibitions during a "blackout period;" (ii) prohibitions against insider trading; (iii) corporate opportunities; and (iv) loans to insiders.

ITEM 11 EXECUTIVE
COMPENSATION

Directors' Compensation

Directors who are not employees of the Company receive fees for their services and are reimbursed for expenses incurred in connection with their service as directors. Directors currently receive \$1,000 for each Board meeting attended (\$250 for Board meetings attended via teleconference), \$1,000 for each meeting of the Mortgage Oversight Committee, \$250 for each meeting of the Investment Committee, \$250 for attending the meeting of the Bank's Loan Committee, which includes one outside director (Barry B. Bondroff), and \$1,000 for each committee meeting other than those listed. The members of the Audit Committee currently receive \$2,000 for each Audit Committee meeting attended. Directors receive no other compensation for attending meetings and receive no annual retainer. The following table provides information about the compensation paid to or earned by the Company's directors during 2013 who are not named executive officers (as defined below):

Name	Fees Earned or Paid in Cash	Options Awarded (1)	Total
Anirban Basu	\$27,250	\$—	\$27,250
Barry B. Bondroff	53,500	—	53,500
John Brown, III	32,000	—	32,000
Robert L. Caret	35,000	—	35,000
Gregory A. Devou	57,250	—	57,250
John J. Oliver, Jr.	18,750	—	18,750
Patricia L. Schmoke	10,250	—	10,250
Hector Torres	17,000	—	17,000
Michael R. Watson	39,250	—	39,250

Table of Contents

(1) The number of stock options outstanding for each director as of December 31, 2013, all of which are exercisable, are set forth in the table below:

Director	Stock Options
Anirban Basu	500
Barry B. Bondroff	8,500
John Brown, III	5,550
Robert L. Caret	1,950
Gregory A. Devou	600
John J. Oliver, Jr.	4,750
Patricia L. Schmoke	4,000
Hector Torres	4,100
Michael R. Watson	8,000

Executive Compensation

The following table sets forth for the last two fiscal years the total remuneration for services in all capacities awarded to, earned by, or paid to the Company's principal executive officer and the two other most highly compensated executive officers of the Company at December 31, 2013. These three officers are referred to as the named executive officers.

Name and Principal Position	Year	Salary (1)	Bonus	All Other Compensation	Total
Mark A. Keidel	2013	\$300,000	\$72,000	\$8,586 ⁽²⁾	\$380,586
President, Chief Operating Officer, and Principal Executive Officer of the Company	2012	235,000	251,340	9,022	495,362
George H. Mantakos (5)	2013	185,625	—	3,708 ⁽³⁾	189,333
Executive Vice President	2012	247,500	—	10,910	258,410
Paul B. Susie	2013	185,000	33,000	6,270 ⁽⁴⁾	224,270
CFO and Principal Accounting Officer	2012	150,000	67,000	6,270	223,270

(1) Messrs. Mantakos and Keidel also serve on the Board of Directors of the Company and the Bank but receive no director's fees for such service.

(2) For Mr. Keidel in 2013: auto allowance-\$6,000; imputed value of life insurance benefits under an endorsement split dollar arrangement-\$414; and Company paid premiums for long-term care insurance-\$2,172.

(3) For Mr. Mantakos in 2013, imputed value of life insurance benefits under an endorsement split dollar arrangement-\$3,708.

(4) For Mr. Susie in 2013: auto allowance-\$6,000 and imputed value of life insurance benefits under an endorsement split dollar arrangement-\$270.

(5) Mr. Mantakos retired in 2013.

Employment Arrangements and Agreements

Each of the currently serving named executive officers of the Company is employed on an at-will basis and is entitled to an annual salary, to participate in the Company's incentive and equity compensation programs, and to participate in retirement, fringe, and other benefits generally available to other officers and employees.

The salaries scheduled to be paid in 2014 to the Company's currently serving named executive officers are as follows: Mr. Keidel, \$300,000 and Mr. Susie, \$185,000.

The following table shows outstanding stock options held by the named executive officers at December 31, 2013. All options were granted at the then existing market price for a term of 10 years. All outstanding equity awards were issued under the Company's 1996, 1998, and 2002 stock option plans and 2004 long-term incentive plan. All awards

are fully vested at December 31, 2013 and any future awards would vest upon a change in control of the Company or the Bank.

126

Table of Contents

Name	Number of Securities Underlying Unexercised Options Exercisable	Number of Securities Underlying Unexercised Options Unexercisable	Option Exercise Price	Option Expiration Date
Mark A. Keidel	15,000 6,000	— —	\$17.77 5.70	1/24/2015 3/25/2018
George H. Mantakos	22,500 7,500	— —	17.77 5.70	1/24/2015 3/25/2018
Paul B. Susie	—	—	—	—

No options were exercised by the named executive officers during 2013.

The Bank has entered into Retention and Success Bonus Agreements (the "Agreements") with Mark A. Keidel, President, Chief Operating Officer and interim CEO of the Company and the Bank, and Paul B. Susie, CFO of the Company and the Bank. As incentive for continued employment with the Bank, the Agreements provided Messrs. Keidel and Susie with twelve (12) monthly payments of \$5,000 and \$3,000, respectively, beginning on or about April 15, 2013. In the event that either executive voluntarily terminates his employment with the Bank prior to April 1, 2014 or the Bank terminates the executive's employment with just cause prior to April 1, 2014, the executives would be responsible for repaying the amounts previously paid under the Agreements. If the executive's employment terminates without cause prior to April 1, 2014, the full retention bonus amount would be become immediately due and payable in full. The Agreements also provide that Messrs. Keidel and Susie will qualify for success bonus payments of \$350,000 and \$185,000, respectively, if the Bank achieves the minimum capital ratios set forth in the September Order.

Potential Payments Upon Termination

The Company has entered into a Change in Control Agreement with Mr. Keidel. The agreement provides for severance payments to him should a change in control occur and he experiences an involuntary loss of employment or a voluntary termination for "good reason" in connection with the change in control under the agreements. Mr. Keidel has grounds to terminate his employment for "good reason" following a material reduction in the authority, responsibilities, duties, or scope of the executive's position from those that existed before the change in control, a reduction in Mr. Keidel's salary from the rate that existed before the change in control, or a requirement that Mr. Keidel relocate to an office that is more than 35 miles distant from the City of Baltimore. Under the agreement, Mr. Keidel would be entitled to benefits equal to 2 times his base compensation. Base compensation means the sum of (i) the greater of (a) Mr. Keidel's annual salary computed at the annual rate in effect immediately before the change in control or (b) the amount paid to Mr. Keidel during the 12-month period preceding the change in control plus (ii) the average bonus paid over the past three years under the Company's short-term incentive program. Due to the fact that we're under the September Order and the FRB Agreements (see "Capital Resources" in Item 7 of Part II of this Annual Report on Form 10-K), the Company and the Bank must apply for and receive the approval of the FRB and the FDIC in order to make payments under these agreements.

Retirement Savings

The Company maintains a defined contribution plan, which was established in 1997. The plan covers the Company's employees meeting a certain age and service eligibility requirements. The plan provides for cash deferrals qualifying under Section 401(k). Prior to 2009, the Company made matching contributions to the plan, consisting of a 50% matching for the first two percent contributed by the employee and 25% matching for the next four percent contributed by the employee. The matching contributions have been suspended since 2008.

Other Benefits

BOLI

The Company also offers pre- and post-retirement life insurance benefits to two of the Named Executive Officers, Mr. Keidel and Mr. Mantakos, in the form of a split dollar plan. In 2002, the Compensation Committee of the Bank recommended and approved a Group Term Carve Out Plan to provide pre- and post-retirement life insurance benefits to the senior officer group utilizing BOLI, which is insurance on the lives of those officers. Messrs. Keidel and Mantakos are included within this group. Each BOLI policy is owned by the Bank, with a portion of the death benefit endorsed to the insured officer through a

127

Table of Contents

split dollar agreement. The pre-retirement current death benefits payable to the beneficiaries of Messrs. Keidel and Mantakos is an amount equal to 2 times their base annual salaries during their employment up to a maximum of \$300,000, less \$50,000, which is the amount of life insurance coverage provided under the Bank's group term life insurance plan. The post-retirement life insurance benefits for the two aforementioned Named Executive Officers whose employment terminates for any reason other than for cause is an amount equal to 1 times the final base salary up to \$100,000, subject to a pre-determined vesting schedule of attaining the normal retirement age of 62 or having completed five years of service with the Bank. The imputed benefits received by each of the named executive officers are set forth in the footnotes to the "All Other Compensation" column of the Executive Compensation Table above.

Long Term Care Insurance

The Company has obtained long-term care insurance for two of the Named Executive Officers, Mr. Keidel and Mr. Mantakos. The benefit includes the payment by the Company of the annual premium for 10 years (provided the executive remains employed in good standing).

**ITEM SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND
12 RELATED STOCKHOLDER MATTERS**

Stock Ownership

The following table provides information as of March 1, 2014 with respect to persons and entities known to the Company to be the beneficial owner of more than 5% of the Company's outstanding common stock. A person or entity may be considered to beneficially own any shares of common stock over which the person or entity has, directly or indirectly, sole or shared voting or investing power.

Name and Address of Beneficial Owner	Amount and Nature of Beneficial Ownership (1)	Percent of Shares of Common Stock Outstanding	
Edwin F. Hale, Sr. c/o D. Scott Freed, Esq. Whiteford, Taylor & Preston, L.L.P. Seven Saint Paul Street Baltimore, MD 21202	1,785,409	8.8	%

(1) Based solely on a Form 4 filed by Mr. Hale on October 15, 2013. Mr. Hale, the Company's and the Bank's former Chairman and CEO retired effective December 22, 2011.

Table of Contents

The following table sets forth, as of March 1, 2014, certain information as to the common stock beneficially owned by each of the Company's directors and by all executive officers and directors of the Company as a group:

Name and Address of Beneficial Owner(1)	Amount and Nature of Beneficial Ownership(2)	Percent of Shares of Common Stock Outstanding(3)
Directors and Executive Officers:		
Barry B. Bondroff(4)	125,911	*
John Brown, III(5)	69,060	*
Robert Caret(6)	68,505	*
George H. Mantakos(7)	106,773	*
John J. Oliver, Jr.(8)	26,895	*

Hector Torres(10)	25,055	*
Michael R. Watson(11)	67,344	*
Anirban Basu(12)	33,093	*
Gregory A. Devou(13)	50,104	*
Mark A. Keidel(14)	158,877	*
Paul B. Susie	30,000	*
All directors, executive officers, and beneficial owners as a group (12 persons)(15)	775,277	3.7%

*Less than 1%.

(1) All executive officers and directors of the Company have the Company's address: 1501 S. Clinton Street, Baltimore, Maryland 21224.

(2) In accordance with Rule 13d-3 under the Exchange Act, a person is deemed to be the beneficial owner, for purposes of this table, of any shares of common stock if he has or shares voting or investment power with respect to such common stock or has a right to acquire beneficial ownership at any time within 60 days from March 1, 2014. As used herein, "voting power" is the power to vote or direct the voting of shares and "investment power" is the power to dispose or direct the disposition of shares. Unless otherwise indicated, the beneficial owner has sole voting and investment power with respect to the listed shares.

(3) Based on 19,705,896 shares outstanding, plus the number of shares of Company common stock which such person or group of persons has the right to acquire within 60 days after March 1, 2014 by the exercise of stock options and warrants.

(4) Includes 39,242 shares in his Individual Retirement Account, and 10,450 shares held jointly with his wife, and options to purchase 8,500 shares.

(5) Includes options to purchase 5,550 shares.

(6) Includes options to purchase 1,950 shares.

(7) Includes 30,500 shares held in his Individual Retirement Account, 7,550 held jointly with his wife, and options to purchase 30,000 shares.

(8) Includes options to purchase 4,750 shares.

(9) Includes options to purchase 4,000 shares.

(10) Includes options to purchase 4,100 shares.

(11) Includes 1,435 shares held jointly with his wife and options to purchase 8,000 shares.

(12) Includes options to purchase 500 shares.

(13) Includes options to purchase 600 shares.

(14) Includes options to purchase 21,000 shares.

(15) Includes options to purchase 88,950 shares.

The information required by this item with respect to our equity compensation plans is incorporated herein by reference to the section entitled "Equity Compensation Plan Information" contained in Item 5 of Part II of this Annual Report on Form 10-K.

ITEM 13 CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

Director Independence

The Board of Directors has determined that all of its members are independent under the listing standards of The NASDAQ Stock Market, except for the management directors, Mark A. Keidel and George H. Mantakos, who are each executive officers of the Company. In determining the independence of its directors, the Board of Directors considered transactions, relationships, and arrangements between the Company and its directors that are not required to be disclosed under

Table of Contents

the heading "Transactions with Certain Related Persons," including loans or lines of credit that the Bank has directly or indirectly made to Directors Basu, Caret, Devou, and Schmoke.

Certain Relationships and Related Transactions

The information required by this item with respect to related party transactions is incorporated herein by reference to Note 20 to the Consolidated Financial Statements included in Item 8 of Part II of this Annual Report on Form 10-K. All loans to related parties were made in the ordinary course of business and on substantially the same terms, including interest rate and collateral, as those prevailing at the time for comparable loans with persons not related to the Company and did not involve more than the normal risk of collectability or present other unfavorable features. None of the loans made to our directors, executive officers, or other related parties are in nonaccrual status, past-due, or have been restructured.

ITEM 14 PRINCIPAL ACCOUNTING FEES AND SERVICES**Approval of Services by the Independent Auditor**

The Audit Committee's policy is to pre-approve all audit and nonaudit services provided by the Company's independent registered public accounting firm. These services may include audit services, audit-related services, tax services, and other services. Pre-approval is generally provided for up to one year and any pre-approval is detailed as to particular service or category of services and is generally subject to a specific budget. The Audit Committee has delegated pre-approval authority to its Chairman when expedition of services is necessary. The independent registered public accounting firm and management are required to periodically report to the full Audit Committee regarding the extent of services provided by the independent registered public accounting firm in accordance with this pre-approval and the fees for the services performed to date. No fees were paid to the independent registered public accounting firm pursuant to the de minimis exception to the foregoing pre-approval policy.

During the year ended December 31, 2013, 100% of the Audit Related Fees, Tax Fees, and All Other Fees set forth above were approved by the Audit Committee.

Audit and NonAudit Fees

The following table shows the fees paid or accrued by the Company for the audit and other services provided by Stegman & Company in 2013 and 2012:

Services Performed	2013	2012
Audit fees	\$198,250	\$193,250
Audit-related fees(1)	27,000	25,500
Tax fees(2)	21,500	21,500
All other fees	—	—
Total fees	\$246,750	\$240,250

Audit related fees are fees for services performed by Stegman & Company that are reasonably related to the (1) performance of the audit or review of the Company's financial statements. This includes auditing the Company's 401(k) plan and review of various registration statements.

(2) Tax fees are fees for professional services performed by Stegman & Company with respect to tax compliance, tax preparation, tax advice, and tax planning.
