Bion Environmental Technologies, Inc. and
Subsidiaries
Notes to Unaudited Consolidated Financial Statements

1. Accounting Policies

The accompanying unaudited financial statements and disclosures reflect all adjustments (all of which are normal recurring adjustments) in the ordinary course of business, which in the opinion of management are necessary for a fair presentation of the results of operations, financial positions, and cash flow. The results of operations for the periods indicated are not necessarily indicative of the results for a full year. It is suggested that these condensed financial statements be read in conjunction with the audited financial statements and accompanying notes for the year ended June 30, 2000.

Basic earnings (loss) per share are calculated as income (loss) available to common stockholders divided by the weighted average number of common shares outstanding. Diluted earnings per share are calculated as income (loss) divided by weighted average number of common shares and the assumed conversion of common stock equivalents. The common stock options and warrants listed at Note 7 were not included in diluted earnings (loss) per share for the nine months and three months ended March 31, 2001 and 2000, as the effect was antidilutive due to the Company recording a loss for these periods.

2. Liquidity

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

The consolidated financial statements have been prepared assuming the Company will continue as a going concern. Our independent CPA issued an opinion on our June 30, 2000 financial statements, which included a paragraph emphasizing the Company's ability to continue as a going concern. The Company incurred losses totaling \$13,466,377 during the nine months ended March 31, 2001 (including non-cash interest expense and other non-cash expenses of \$2,270,119 and \$7,450,765, respectively) and has a history of losses that has resulted in an accumulated deficit of \$37,293,254 at March 31, 2001.

During the year ended June 30, 2000, the Company successfully obtained external financing through private placements of debt and equity and the sale of its warrants. Additional external financing of \$1,016,750 was obtained during April 2001 through private placements of debt and the sale of its warrants. The Company also received financing from affiliated companies (see Note 5). The Company continues to explore sources of additional financing to satisfy its current operational requirements, and is currently attempting to place additional private placements of debt and equity under the most favorable terms available.

F-8

Bion Environmental Technologies, Inc. and
Subsidiaries
Notes to Unaudited Consolidated Financial Statements

There can be no assurance that any funds required during the next twelve months or thereafter can be generated from operations or that if such required funds are not internally generated that funds will be available from external sources such as debt or equity financings or other potential sources. The lack of additional capital resulting from the inability to generate cash flow from operations or to raise capital from external sources, would force the Company to substantially curtail or cease operations and would, therefore, have a material adverse effect on its business. Further, there can be no assurance that any such required funds, if available, will be available on attractive terms or that they will not have a significantly dilutive effect on the Company's existing shareholders.

To enhance the Company's longer term prospects, since January 2000, management has committed significant resources to develop the next generation Bion system design, which will include system monitoring and controls and possibly a clean water recycling loop; expanded its research program for BionSoil; and retained consultants to support these efforts. The expenditures related to these efforts are anticipated to continue until the next generation design is completed, which is anticipated during the fiscal year 2002. Management's decision to pursue these efforts is the result of both the increasing environmental and regulatory pressure on large dairy and swine farms and positive results of limited market tests of BionSoil products. There can be no assurance that the next generation Bion system design or the BionSoil program will be successful or that sufficient capital will be available to fund operations.

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

As noted earlier, there is substantial doubt about the Company's ability to continue as a going concern. The accompanying consolidated financial statements do not include any adjustments relating to the recoverability or classification of asset carrying amounts or the amounts and classification of liabilities that may result should the Company be unable to continue as a going concern.

F-9

Bion Environmental Technologies, Inc. and
Subsidiaries
Notes to Unaudited Consolidated Financial Statements

3. Convertible Bridge Notes Payable

On April 13, 2000, the Company completed a private offering of unsecured convertible bridge notes payable (the "Notes") in the principal original amount of \$4,095,000. On February 24, 2001 the due date of \$3,595,000 of these Notes was extended to April 30, 2002.

Notes totaling an original principal amount of \$500,000 for a current total, net of discount, of \$496,661, including accrued interest of \$51,233, at March 31, 2001 is included in short-term convertible bridge notes with interest accruing at 10% per annum and remaining due on July 1, 2001. At the discretion of the Company, on maturity, these short-term Notes will either be converted to common stock or repaid.

The balance of the original Notes totaling a principal of \$3,595,000 for a current total, net of discount, of \$3,340,215 and including accrued interest of \$380,728 at March 31, 2001 is included in long-term convertible bridge notes with interest accruing at 10% per annum due on April 30, 2002.

In connection with the sale of the Notes, the Company issued stock purchase warrants exercisable for the purchase of up to 1,213,500 shares of the Company's common stock at \$2.375 per share through December 31, 2004. The warrants were originally valued at \$1,110,118 using the Black Scholes option-pricing model and are being amortized as additional interest expense over the term of the Notes.

Additional convertible bridge notes have been issued to D2 in lieu of payment for monthly management fees. For the calendar year 2000, \$20,000 per month was issued and for the calendar year 2001, \$41,667 per month is to be issued.

On September 15, 2000, following acceptance by the note-warrant holders on August 24, 2000, the Company amended the convertible bridge notes payable and associated warrants as follows:

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

- * adjusted the conversion rate to equal the market price of the Company's common stock at the date of conversion;
- * limited the conversion rate on the notes to \$5.00 per share;
- * adjusted the exercise price of the warrants from \$2.375 to \$2.00 per share; and,
- * provided for automatic conversion one year from date of note.

The reduction of the exercise price of the warrants to \$2.00 per share, resulted in an additional \$70,079, of value attributable to the warrants. Such amount has been reflected as an additional discount on the convertible bridge notes payable.

F-10

Bion Environmental Technologies, Inc. and Subsidiaries Notes to Unaudited Consolidated Financial Statements

On February 24, 2001, following acceptance by 87.80% of the holders of the convertible bridge notes payable and associated warrants for the holders who indicated acceptance the terms were amended as follows:

- * extended the maturity date to April 30, 2002;
- * requires automatic conversion of the notes (principal and interest) to our common stock on April 29, 2002, if not previously converted or paid;
- * reduced the maximum conversion price from \$5.00 to \$2.50 per share;
- * reduced the call price of the warrants to \$3.50; and,
- * reduced the warrant exercise price of the warrants from \$2.00 to \$1.50.

For holders who did not indicate acceptance:

- * the existing July 1, 2001 maturity date remains unchanged;
- * the maximum conversion price of \$5.00 remains unchanged;
- * the warrant exercise price of \$2.00 remains unchanged;
- * the notes will automatically convert to our common stock at June 30, 2001 if not previously paid or converted; and,
- * reduces the call price of the warrants to \$3.50.

The reduction of the exercise price of the warrants to \$1.50 resulted in an additional \$32,000 of value attributable to the warrants. Such amount has been reflected as an additional discount on the convertible bridge notes.

The Company recorded \$636,556 and \$174,000 of interest expense during the nine months and three months ended March 31, 2001 respectively for the amortization of the warrant discount. The unamortized warrant discount at March 31, 2001 of a total of approximately \$629,086 will be amortized to interest expense through June 30, 2001 for the current portion of the notes and through April 30, 2002 for the long-term portion of the notes.

F-11

Bion Environmental Technologies, Inc. and
Subsidiaries
Notes to Unaudited Consolidated Financial Statements

During the nine months ended March 31, 2001, the Company adopted Emerging Issues Task Force Issue No. 00-27 ("EITF 00-27"), "Application of EITF Issue No. 98-5, Accounting for Convertible Securities with Beneficial Conversion Features or Contingently Adjustable Conversion Ratios, to Certain Convertible Instruments", which is effective for all such instruments. This issue clarifies the accounting for instruments with beneficial conversion features or contingently adjustable conversion ratios. The Company has modified the previous calculation of the beneficial conversion features associated with previously issued Convertible Bridge Notes Payable. Based on further clarification, the beneficial conversion feature is now calculated by allocating the proceeds received in the financing to the convertible instruments and to any detachable warrants issued in the transaction, and measuring the intrinsic value based on the effective conversion price based on the allocated proceeds. The previous calculation was based on a comparison of the stated conversion price in the term of the instrument to the fair value of the issuer's stock at the commitment date.

As a result of the issuance of EITF 00-27, effective October 1, 2000, the Company has recorded an additional warrant discount on the Notes of \$1,050,000 due to the beneficial conversion feature calculated on the intrinsic value of the allocated proceeds received in the financing. The Company has recorded \$481,250 as a cumulative effect of change in accounting principle and \$ 69,107 as interest expense on the Notes for the nine months ended March 31, 2001, which represents the amortization of the warrant discount in that period. The remaining discount of \$237,143 will be amortized to interest expense through June 30, 2001 for the current portion of the notes and through April 30, 2002 for the long-term portion of the notes.

Upon issuance of its capital stock in a public or private offering, with gross proceeds greater than \$5,000,000, the Company, at its option, must either prepay the notes without penalty or convert the notes into shares of common stock, at a conversion rate equal to the market price of the Company's common stock on the date of conversion, not to exceed \$2.50 per share.

Of the original convertible bridge notes payable issued, \$50,000 was purchased by a director and \$100,000 was purchased by D2 Co., LLC (Note 5). An additional \$386,083 was accrued as management fees to D2 and added to the balance of the convertible bridge notes payable.

4. Notes Payable, Related Parties

Notes payable, related parties, consisted of the following:

March 31, 2001

Unsecured notes payable to Mark A. Smith - Rollover IRA, Kelly Smith - Rollover IRA and Dublin Holding, Ltd., entities controlled by a stockholder/director, principal amount of \$3,075,798 plus accrued interest of \$507,779, net of unamortized warrant discount of \$1,411,532. All outstanding principal and accrued interest due is immediately convertible into shares of the Company's common stock at a price of \$1.80 per share. Upon certain events the company may convert these notes into the number of shares into which they would be convertible upon maturity. During the nine months and three months ended March 31, 2001, the Company amortized \$604,944 and \$201,648 of the warrant discount to interest expense. All outstanding principal and interest, computed at 1% per month, is due and payable on or before December 31, 2002. \$ 2,172,045

Unsecured notes payable to a stockholder, principal amount of \$308,114 plus accrued interest of \$68,183. All outstanding principal and interest, computed at 1% per month, is due and payable on or before December 31, 2001. The outstanding principal and accrued interest due, is convertible into shares of the Company's common stock at a price of \$1.80 per share, under certain agreed upon conditions. 376,297

Subsidiaries
Notes to Unaudited Consolidated Financial Statements

5. Related Party Transactions

The Company's equity and notes payable transactions with stockholders and other related parties are included in Notes 3 and 4, respectively.

In December 1999 the Company entered into a three year agreement for management and consulting services with D2 Co., LLC ("D2"). The agreement required total annual consideration of \$240,000 payable in common stock of Bion or cash, at the option of the Company. In January 2000, D2 agreed to add the monthly fees, aggregating to \$386,083 at March 31, 2001, to the balance of their convertible bridge notes payable (Note 3). In connection with the agreement the Company granted warrants exercisable into 2,500,000 shares of the Company's common stock at \$2.50 per share through June 30, 2004 and D2 purchased 2,500,000 warrants exercisable at \$1.75 per share for \$500,000 cash and a \$500,000 promissory note. The warrants were valued at \$2,333,687 using the Black Scholes option-pricing model and have been reflected as deferred consulting expense in the accompanying Consolidated Statement of Stockholders' Deficit and were amortized to consulting expense.

During August 2000, the Company amended the management agreement with D2, whereby the Company extended the consulting services for an additional year and issued 1,500,000 additional warrants (1,000,000 warrants exercisable at \$3.50 per share and 500,000 exercisable at \$6.00 share, both from January 1, 2002 until August 10, 2005). The Company valued the warrants issued under the Black-Scholes option-pricing model and has added the value of \$737,005 to the deferred consulting expense. During the nine months ended March 31, 2001, the Company recorded \$320,591 to consulting expense as a result of amortizing the deferred consulting expense.

In August 2000, the Company granted stock options and issued warrants to three members of the Company's Board of Directors for additional services to be performed by the directors. In total, options were granted to purchase 160,000 shares of common stock at \$2.25 per share, exercisable immediately until December 31, 2003 and warrants were issued to purchase 100,000 shares of common stock at \$2.375 per share, exercisable immediately until December 31, 2003. During the nine months and three months ended March 31, 2001, the Company recorded \$45,664 and \$22,832 as consulting expense related to the options and warrants.

Effective December 1, 2000, the Company amended the D2 management and consulting agreement as follows:

- * extended the term of the agreement by another 18 months;
- * cancelled all outstanding warrants owned by D2 by agreeing to repay to D2 \$1,000,000 with \$500,000 cash and cancellation of the existing \$500,000 non-recourse promissory note receivable and accrued interest;

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

Bion Environmental Technologies, Inc. and
Subsidiaries
Notes to Unaudited Consolidated Financial Statements

* increased the annual base consideration from \$240,000 to: calendar year 2001 - \$500,000; calendar year 2002 - \$600,000; and calendar year 2003 - \$750,000.

As a result of the cancellation of the D2 warrants, the Company reversed unamortized the remaining deferred consulting expense of \$2,361,153 to consulting expense as of December 1, 2000, recorded a payable to D2 and cancelled the non-recourse promissory note.

Effective January 8, 2001, Southview, Inc. ("Southview"), a corporation wholly owned by David J. Mitchell, CEO and President of the Company, agreed to purchase warrants to purchase 6,500,000 shares of the Company's common stock for the sum of \$500,000 cash payable on or before February 16, 2001. On February 16, 2001, Southview closed the purchase. Warrants to purchase 3,250,000 shares of common stock are exercisable at \$1.00 per share and warrants to purchase another 3,250,000 shares of common stock are exercisable at varying prices between \$1.00 and \$2.00 per share, depending on the market price of the Company's common stock. All warrants purchased are exercisable from February 16, 2001 to February 16, 2006. The 6,500,000 warrants were valued using the Black-Scholes model at \$2,730,000, \$2,230,000 of which was charged to expense in the three months ended March 31, 2001.

The Company reported in the December 31, 2000 financial statements a subsequent event valuing the above mentioned 6,500,000 warrants at \$1,600,000. That valuation was adjusted to \$2,730,000 for the 9 months ended March 31, 2001. The change in valuation was due to the use of more appropriate Black-Scholes assumptions.

In February 2001, in accordance with the amended management and consulting agreement with D2, the Company repaid \$500,000 to D2 and cancelled a \$500,000 unsecured promissory note for the cancellation of all of the D2 outstanding warrants.

During the three months ended March 31, 2001 Southview advanced the Company \$871,000 under a promissory note accruing interest at 8% per annum and due on July 30, 2001.

6. Stockholders' Deficit

Exchange of Warrants for Common Stock

Effective August 3, 2000, certain holders of Class X warrants and Class Z warrants exchanged 165,198 Class X warrants and 5,425,440 Class Z warrants for 863,399 shares of restricted common stock. For the nine months and three months ended March 31, 2001, the Company recorded \$1,662,340 and \$0, respectively, as additional expense related to the beneficial value of the consideration received over the value of warrants surrendered.

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

Bion Environmental Technologies, Inc. and
Subsidiaries
Notes to Unaudited Consolidated Financial Statements

Effective August 23, 2000, certain holders of the Class X warrants and Class Z warrants, including certain officers, employees and stockholders exchanged, in aggregate, 469,458 Class X warrants and 898,444 Class Z warrants for 275,617 shares of restricted common stock. For the nine months and three months ended March 31, 2001, the Company recorded \$511,120 and \$0, respectively, as additional expense related to the beneficial value of the consideration received over the value of warrants surrendered.

On November 13, 2000, an unaffiliated investor purchased, pursuant to a preemptive right which has since been terminated, warrants to purchase 24,550 shares of Bion common stock at \$2.50 per share, exercisable from October 30, 2000 to June 30, 2004, for \$2,700 cash.

On November 16, 2000, the Company issued 25,000 shares of common stock valued at \$42,175 to an individual in return for consulting services performed and termination of a preemptive right.

On November 29, 2000, an individual holder exchanged 20,373 Class X Warrants for 6,112 shares of restricted Bion common stock. The warrants had an exercise price of \$8.00 per share and were issued on January 1, 2000, with an expiration date of December 31, 2001. For the nine months ended March 31, 2001, the Company recorded \$5,722 as additional expense related to the beneficial value of the consideration received over the value of warrants surrendered.

On December 4, 2000, the Company hired George Bloom to fill the position of Senior Technical Officer of Bion. As partial consideration for Mr. Bloom's services, Bion granted him stock options to purchase 80,000 shares of common stock exercisable at \$1.50 per share until 12/31/03. One-third of these options (26,667) vest on 12/4/00, 11/1/01 and 11/1/02, respectively.

On February 28, 2001, in accordance with the termination agreement with Carla Seeliger, the Company vested 2,310 non-vested options and cancelled 9,231 non-vested options. Additionally, the company will issue 800 shares of stock earned as compensation and cancel 7,200 shares remaining as authorized but unearned. Prior to termination, on February 1, 2001, an additional 4,000 shares were earned as compensation.

On February 28, 2001, in accordance with the termination agreement with Barbara Greenspahn, the Company vested 2,886 non-vested options and cancelled 11,540 non-vested options. Additionally, the company will issue 1,000 shares of stock earned as compensation and cancel 9,000 shares remaining as authorized but unearned.

On March 1, 2001, the Company hired Gerard W. Ferrentino to fill the position of Director of Product Development of BionSoil. As partial consideration for Mr. Ferrentino's services, the Company granted him stock options to purchase 40,000 shares of common stock exercisable at \$1.50 per share (which is greater than the market value of the shares on March 1, 2001) until 12/31/03. One-third (13,333) of these options vests on 3/1/01, 12/1/01 and 9/1/02, respectively.

7. Capital Structure

Because the Company has a relatively complex capital structure the following capital structure details are set forth:

Common Stock

As of May 9, 2001 the Company had 13,056,597 shares of common stock issued and outstanding.

Options

On August 10, 2000, the Company initiated an exchange offer with holders (current and former employees and consultants) of certain classes of options issued under the Company's existing option plans, which was completed on August 31, 2000. In aggregate, the Company issued 404,107 new options, exercisable at \$2.00 per share until December 31, 2002 and canceled 775,772 existing options with various exercise prices between \$3.60 to \$13.50 and expiration dates from October 31, 2000 to June 30, 2003. There are no immediate accounting implications related to the option exchange, as the Company's stock price was less than the new exercise price as of March 31, 2001. The Company will monitor the changing stock price each quarter and record additional compensation expense if applicable.

8. Office Lease Agreement

On August 28, 2000, the Company entered into a lease agreement for office facilities in New York City. The term of the lease is eleven years and the aggregate cost is approximately \$2.8 million. The Company also entered into a sublease for a portion of the facilities with an unrelated party for an

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

aggregate rent of approximately \$576,000 over the eleven-year term. The Company entered into an additional sublease agreement for a portion of the facilities with an unrelated party for an aggregate rent of \$30,000 over 5 months beginning January 1, 2001. The sublease can be renewed at the discretion of the Company.

9. Segment Information

The Company operates in two business segments as follows:

Systems: The Company designs, markets, installs and manages waste, wastewater and storm water systems, primarily in the agricultural and food processing industries.

Soil: The Company produces and markets BionSoil products such as organic fertilizers, potting soils and soil amendments which are produced from the nutrient rich Bion Solids harvested from certain types of agricultural systems installed on large dairy and hog farms.

The Company's reportable operating segments have been determined in accordance with the Company's internal management structure, which is organized based on operating activities. The accounting policies of the operating segments are the same as those described in the summary of accounting policies. The Company evaluates performance based upon several factors, of which the primary financial measure is segment-operating results.

10. Subsequent Events

On April 13, 2001, the Company received proceeds of \$1,001,000 in long-term convertible bridge debt and \$15,750 in equity for the purchase of 300,450 warrants. The value of the warrants of \$100,000 will be recorded as a warrant discount on the convertible bridge notes payable, to be amortized over the life of the notes.

On April 13, 2001, the Company paid \$371,000 on the Promissory Note due Southview.

On April 15, 2001, in accordance with the termination agreement with Craig Scott the expiration date on 187,445 vested was extended to 10/15/02.

F-26

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion should be read in conjunction with our Consolidated Financial Statements and accompanying notes.

Going Concern

The financial statements contained in this Form 10-QSB show \$28,597,176 being invested in or contributed to Bion as of March 31, 2001. We have a shareholder deficit of \$8,696,078, accumulated deficit of \$37,293,254, limited current revenues and substantial current operating losses. (Note that \$4,762,876 of the related parties notes payable, approximately 55% of the negative net worth, is convertible into our restricted and legended Common Stock.) Our operations are not currently profitable; therefore, readers are further cautioned that our continued existence is uncertain if we are not successful in obtaining outside funding in an amount sufficient for us to meet our operating expenses at our current level. Management plans to continue raising additional capital to fund operations until Bion system and BionSoil(R) sales are sufficient to fund operations.

Bion NMS system and BionSoil(R) sales require additional expenditures. Our system sales require additional personnel and significant capital expenditures, which will generally increase our overhead. BionSoil(R) product

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

sales and marketing require wholesaler and retailer distribution networks (which may require permitting in some locations) and additional expenditures for personnel and equipment to harvest, process, package, sell and deliver our products. We are in the process of obtaining the necessary additional funding from independent third parties and related parties. Although management believes that there is a reasonable basis to remain optimistic, no assumption can be made that we will be able to attain profitable operations and/or raise sufficient capital to sustain operations.

The level of funding required to accomplish our objectives is ultimately dependent on the success of our research and development efforts, which at this time, are unknown. Currently, we estimate that an additional \$2,000,000 will be required during the period ending September 30, 2001. We anticipate spending \$600,000 on research and development efforts and the balance on compensation and general business overhead.

Financial Condition and Results of Operations

Liquidity and Capital Resources

Our Consolidated Balance Sheet as of March 31, 2001 shows Current assets of \$281,809 and Total assets of \$646,024. Our current and total liabilities as of March 31, 2001 are \$3,377,673 and \$9,342,102, respectively. Total assets decreased by \$2,289,225 from June 30, 2000. The change is primarily attributable to the \$2,489,983 decrease in cash and cash equivalents primarily

3

as a result of net cash used in operating activities. Our current ratio is 0.08:1 as of March 31, 2001 as compared to 15.1:1 as of June 30, 2000. The reduction in the current ratio results from the classification of a portion of the convertible bridge notes payable of \$496,661 as a current liability, the classification of \$1,713,219 of notes payable to related parties as current as the notes are due on December 31, 2001, and the \$877,612 due Southview also classified as notes payable to related parties. Deposits and other assets increased \$126,872 during the nine months ended March 31, 2001 of which \$120,561 was for a letter of credit on the New York City office lease.

Total liabilities increased by \$2,816,607 in the nine month period ended March 31, 2001. This increase was due to an addition to the convertible bridge notes and related parties notes payable of \$766,118 for accrued interest, a further increase on the convertible bridge notes of \$263,250 for management fee and interest due D2, an increase on the amortization of the debt discount by \$1,241,501, the amortization of the beneficial conversion feature increasing the convertible bridge notes by \$262,500, the beneficial conversion feature recorded as cumulative effect of change in accounting increasing the convertible bridge notes by \$481,250, an increase of \$877,612 due to Southview, and accounts payable increasing by \$120,828. These amounts were reduced by an additional discount of \$1,050,000 on the convertible bridge notes and a reduction in the convertible bridge notes of \$102,079 due to the change in the exercise price of the related warrants.

Our Stockholders' Equity account reflects a total of 1,170,128 shares of restricted common stock issued in the nine months ended March 31, 2001. We issued the restricted common stock primarily in the exchange of 634,656 Class X warrants and 6,323,884 Class Z warrants. We valued the warrants in accordance with the Black-Scholes model and recorded \$2,173,460 of additional non-cash expense related to the beneficial value of the consideration received over the value of the warrants surrendered. We cancelled 16,200 shares of

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

common stock due as unearned compensation to employees.

We believe that during the balance of the fiscal year ending June 30, 2001, we will not generate sufficient operating cash flow to meet our needs without additional external financing. We are in the process of obtaining such financing but there is no assurance that our efforts will be successful. Any failure on our part to do so will have a material adverse impact on us and may cause us to cease operations.

Results of Operations

Comparison of the Nine Months Ended March 31, 2001 with the Nine Months Ended March 31, 2000

We recorded \$43,244 of BionSoil(R) sales during the nine months ended March 31, 2001. This compares to \$78,771 BionSoil(R) sales during the nine months ended March 31, 2000. The decrease of \$35,527 is attributable to lower BionSoil(R) sales to customers, as a larger quantity of BionSoil(R) was used for testing and turf trials. We have been in the design and testing phase of the second-generation system that will include computerized real-time

4

monitoring and controls and will also reduce the size of the system. We have now moved to the 2nd phase of the second generation system with the installation of the fully contained system. The focus on the new system design has had a short-term negative effect on system sales. Cost of goods sold increased \$92,818 for the soil sales primarily as a result of payments to subcontractors (\$68,266) and equipment rental (\$51,053) for the harvest of materials not sold during the nine months ended March 31, 2001.

We incurred gross losses of \$320,476 and \$176,131 during the nine months ended March 31, 2001 and 2000, respectively. The increase in gross loss results from the inefficiencies associated with the disproportionate relationship between harvesting costs and revenues associated with a technological growth-oriented company. We believe that this trend will reverse as revenues increase.

General and administrative expenses increased \$5,228,416 (121%) for the nine months ended March 31, 2001 as compared to the nine months ended March 31, 2000. The increase is primarily attributable to the excess non-cash expense related to the amortization of the remaining deferred consulting expense to D2 and consulting expense to Southview in the nine months ended March 31, 2001 for a total increase of \$4,911,709 compared to the consulting fees incurred in the nine months ended March 31, 2000 and the excess amount of the beneficial value of the warrants surrendered in connection with Warrant/stock exchange transactions in the nine months ended March 31, 2001 over the intrinsic value of the D2 warrants purchased in the nine months ended March 31, 2000 (\$701,856), offset by lower investor relations expense in the nine months ended March 31, 2001 (\$410,284).

Research and development costs increased \$640,656 during the nine months ended March 31, 2001. This increase is due to the design and testing of the second-generation system and increased BionSoil(R) research and testing expenses.

Interest expense increased \$650,793, of which \$897,290 was for non-cash expenses associated with certain promissory notes, \$262,500 additional interest required under the change of accounting principle resulting from the

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

issuance of EITF 00-27 (see Note 3 to the financial statements), partially offset by other individually insignificant decreases.

We had an increase in interest income (\$44,501) due to higher average cash balances associated with cash flow generated from financing activities.

We sold the two mortgages we received from the LTLK Defined Benefit Plan during the nine months ended March 31, 2000. We incurred a non-recurring loss of \$57,250 on the sale of the two mortgages.

The net loss and comprehensive loss increased \$7,025,950 (109%) during the nine months ended March 31, 2001. The increase primarily related to the increase of \$5,228,416 of general and administrative expenses (for the amortization of the remaining deferred consulting expense and the issuance of stock and warrants associated with various transactions discussed above), the

5

increase of \$650,793 of interest expense, the \$640,656 increase in Research and Development expense, and the \$481,250 cumulative effect of change in accounting principle resulting from the issuance of EITF 00-27 incurred during the nine months ended March 31 2001, partially offset by other individually insignificant decreases.

Basic and diluted loss per common share is increased by \$0.45, from \$0.59 to \$1.04. The increase in the loss per share is attributable to the aforementioned increase in the net loss.

Comparison of the Three Months Ended March 31, 2001 with the Three Months Ended March 31, 2000

We recorded \$1,268 of BionSoil(R) sales during the three months ended March 31, 2001. This compares to \$23,509 BionSoil(R) sales during the three months ended March 31, 2000. We have been in the design and testing phase of the second-generation system that will include computerized real-time monitoring and controls and will also reduce the size of the system. The focus on the new system design has had a short-term negative effect on system sales. Cost of goods sold decreased \$42,579 primarily as a result more testing and research of BionSoil(R).

We incurred gross losses of \$65,860 and \$86,198 during the three months ended March 31, 2001 and 2000, respectively. The gross losses result from inefficiencies associated with the disproportionate relationship between cost of good sold and revenues associated with a technological growth-oriented company. We believe that this trend will reverse as revenues increase.

General and administrative expenses increased \$2,022,668 (198%) for the three months ended March 31, 2001 as compared to the three months ended March 31, 2000. Of the increase, consulting fee increased by \$2,469,396 and rent increased by a total of \$45,319. These increases were partially offset by a decrease in compensation and supplemental compensation for a total of 177,991.

Research and development costs increased \$167,574 during the three months ended March 31, 2001. This increase is due to the design and testing of the second-generation system and increased BionSoil(R) research and testing expenses.

Interest expense increased \$270,351 due to the expenses of amendment of the first parties note payable plus interest on convertible notes in the three months ended March 31, 2000 exceeding the interest on convertible notes in the

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

three months ended March 31, 2001. Non-cash interest expense for the three months ended March 31, 2001 and 2000 was \$639,002 and \$367,310, respectively.

We had a decrease in interest income (\$17,567) due to lower cash balances associated with cash flow generated from financing activities.

The net loss and comprehensive loss increased \$2,424,815 (152%) during the three months ended March 31, 2001. The increase primarily related to increase in general and administrative expenses of \$2,022,668, increase in research and development costs of \$167,574, and increased in interest expense of \$270,351.

6

Basic and diluted loss per common share is increased by \$0.17 from \$0.14 to \$0.31. The increase in loss per share is attributable to the aforementioned increase in net loss.

Seasonality

Our system sales and installation business is not seasonal in nature, except to the extent that weather conditions at certain times of the year in certain geographic areas may temporarily affect construction and installation of our systems. However, our projects and markets are geographically spread so that when weather conditions limit construction activity in southern market areas, projects in northern markets can proceed, and when northern area weather is inappropriate, southern projects can proceed. BionSoil(R) and BionSoil(R) product sales are expected to exhibit a somewhat seasonal sales pattern with emphasis on spring, summer and fall sales.

Impact of Recently Issued Accounting Pronouncements

During the three months ended December 31, 2000 we adopted Emerging Issues Task Force Issue No. 00-27 ("EITF 00-27"), "Application of EITF Issue No. 98-5, Accounting for Convertible Securities with Beneficial Conversion Features or Contingency Adjustable Conversion Ratios, to Certain Convertible Instruments", which is effective for all such instruments, and which clarifies the accounting for instruments with beneficial conversion features or contingently adjustable conversion ratios. We have modified previous calculations of the beneficial features associated with previously issued Convertible Bridge Notes Payable.

SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities," required companies to record derivatives on the balance sheet as assets or liabilities, measured at fair market value. Gains or losses resulting from changes in the values of those derivatives are accounted for depending on the use of the derivative and whether it qualifies for hedge accounting. The key criterion for hedge accounting is that the hedging relationship must be highly effective in achieving offsetting changes in fair value or cash flows. SFAS No. 133 was effective for the Company's 2000 fiscal year. The adoption of SFAS No. 133 will have no material effect on our financial statements.

Inflation and Changes in Prices

We are unable to predict the impact of inflation on our activities; however, at this time we believe it is minimal.

PART II

ITEM 1. Legal Proceedings

We are not a party to any pending legal proceeding that is material to our business.

ITEM 2. Changes in Securities and Use of Proceeds

The following securities were sold in the quarter ended March 31, 2001 without registration under the Securities Act of 1933, as amended:

Warrants

We issued 3,250,000 SV-1 Warrants on February 16, 2001 to Southview to purchase restricted and legended stock at \$1.00 per share. These warrants are exercisable from February 16, 2001 to February 16, 2006. The warrants were purchased for \$250,000 of cash.

We issued 3,250,000 SV-1 Warrants on February 16, 2001 to Southview to purchase restricted and legended stock at prices ranging between \$1.00-\$2.00 per share. These warrants are exercisable from February 16, 2001 to February 16, 2006. The warrants were purchased for \$250,000 of cash.

Convertible Notes

We added \$125,000 of management fee due D2 to the convertible bridge notes listed in Note 3 of the financial statements during the three months ended March 31, 2001.

The securities, which were issued pursuant to the transactions set forth above, were issued in reliance upon the exemptions from registration afforded by Sections 3(b), 4(2), and/or other provisions of the Securities Act of 1933, as amended. Each of the persons to whom such securities were issued made an informed investment decision based upon negotiation with us and was provided with appropriate offering documents and/or access to material information regarding Bion. We believe that such persons had knowledge and experience in financial and business matters such that they were capable of evaluating the merits and risks of the acquisition of our Common Stock in connection with these transactions. All certificates representing such common shares bear an appropriate legend restricting the transfer of such securities, except in accordance with the Securities Act of 1933, as amended, and stop transfer instructions have been provided to our transfer agent in accordance therewith.

ITEM 3. Defaults Upon Senior Securities. None

Edgar Filing: BION ENVIRONMENTAL TECHNOLOGIES INC - Form 10QSB

ITEM 4. Submission of Matters to a Vote of Security Holders. None

ITEM 5. Other Information.

On March 1, 2001 the Company hired David Fuller to fill the position of Principal Accounting Officer. As partial consideration for Mr. Fuller's services, the Company subsequently granted him stock options on May 2, 2001, to purchase 2,500 shares of common stock exercisable at \$1.50 per share (which is greater than the market value of the shares on May 2, 2001) until May 2, 2005. One-third (833) of these options vests on May 2, 2001, one-third (833) on May 2, 2002 and one-third (833) on May 2, 2003.

On May 2, 2001 the Company hired Bart Chilton to fill the position of Senior Vice-President. As partial consideration for Mr. Chilton's services, the Company granted him stock options to purchase 100,000 shares of common stock exercisable at \$1.50 per share (which is greater than the market value of the shares on May 2, 2001) until May 2, 2005. One-third (33,333) of these options vests on May 2, 2001, one-third (33,333) on May 2, 2002 and one-third (33,333) on May 2, 2003. Prior to his employment, Mr. Chilton was granted options for 10,000 shares of common stock as of March 10, 2001 as part of a consulting arrangement exercisable at \$1.50 per share (which is greater than the market value of the shares on March 10, 2001) until March 10, 2005. One-third (3,333) of these options vests on March 10, 2001, one-third (3,333) on March 10, 2002 and one-third (3,333) on March 10, 2003.
