**Our Company**

Medix Resources, Inc., a Colorado corporation ("Medix" or the "Company"), is an information technology company with its principal executive office in New York, New York. The Company also maintains offices in Agoura Hills, California, Greenwood Village, Colorado and Marietta, Georgia. We specialize in the development, marketing and management of connectivity solutions for clinical and business transactions within the healthcare industry. Through our wholly owned subsidiary, Cymedix Lynx Corporation, a Colorado

## Edgar Filing: MEDIX RESOURCES INC - Form 10-K/A

corporation ("Cymedix"), we have developed the Cymedix(R) suite of service products as a toolkit to help modernize physician and healthcare communication technology and facilitate transaction productivity. We continue to enhance and refine our products to enable the many disparate information systems within the healthcare industry to communicate with one another and to expand the scope of healthcare transaction automation.

The Cymedix(R) suite of products enables the transmission of critical clinical, financial and administrative information between healthcare information systems, and provides healthcare institutions (such as health plans, insurers, hospitals and practicing physicians) with non-invasive connectivity products that can be integrated with their existing software applications to provide Internet-enabled transaction capability between all parties. This approach is significant because it offers substantial utility to physicians who are cautious about making major adjustments to their practice disciplines or reluctant to invest heavily in new, administrative technologies.

The implementation of Cymedix(R) service products targets improved efficacy of daily interactions between health caregivers and their staffs, ancillary providers such as laboratories and pharmacy benefit managers (PBMs), insurance companies, hospitals, Integrated Delivery Networks (IDNs) and Health Maintenance Organizations (HMOs). Recent State and Federal legislative actions, as well as industry mandates to promote quality and the privacy of patient information while controlling costs, have created fertile ground for effective technology solutions that unite systems and enable digital communication. The market for robust and practical healthcare solutions will grow rapidly, and that growth will continue to accelerate as the joined emphases of consumer choice, quality, administrative service and cost-containment ratchet up the demand for more efficient and user-friendly methods of delivering quality healthcare.

Moreover, Medix understands the essentially local nature of healthcare and will deploy Cymedix(R) service products only in regions where we can guarantee that each installed physician can use our technologies to serve most of his or her patients. This disciplined market approach, combined with the Cymedix(R) suite of physician-centric products, provides a foundation for rapid adoption, ongoing utilization and stable, recurring revenue streams. Our regional strategy and focus on authentic physician adoption is what differentiates us from most eHealth companies, including those who have survived the rough justice of today's market, as well as the many who have perished.

Medix was incorporated in the State of Colorado in 1988. For the next decade, the Company operated as a temporary healthcare staffing company, with offices at various times in Colorado, New York, Texas and California. Medix disposed of its remaining healthcare staffing operations in February 2000. In January 1998, the Company acquired Cymedix Corporation, a California corporation, which was merged into our wholly owned healthcare technology subsidiary, Cymedix Lynx Corporation.
