<u>Royce Focus Trust</u>

SEMIANNUAL REVIEW AND REPORT TO STOCKHOLDERS

www.roycefunds.com

A Few Words on Closed-End Funds

Royce & Associates, LLC manages three closed-end funds: Royce Value Trust, the first small-cap value closed-end fund offering; Royce Micro-Cap Trust, the only micro-cap closed-end fund; and Royce Focus Trust, a closed-end fund that invests in a limited number of primarily small-cap companies.

A closed-end fund is an investment company whose shares are listed and traded on a stock exchange. Like all investment companies, including open-end mutual funds, the assets of a closed-end fund are professionally managed in accordance with the investment objectives and policies approved by the fund s Board of Directors. A closed-end fund raises cash for investment by issuing a fixed number of shares through initial and other public offerings that may include shelf offerings and periodic rights offerings. Proceeds from the offerings are invested in an actively managed portfolio of securities. Investors wanting to buy or sell shares of a publicly traded closed-end fund after the offerings must do so on a stock exchange, as with any publicly traded stock. This is in contrast to open-end mutual funds, in which the fund sells and redeems its shares on a continuous basis.

A Closed-End Fund Offers Several Distinct Advantages Not Available From An Open-End Fund Structure

- n Since a closed-end fund does not issue redeemable securities or offer its securities on a continuous basis, it does not need to liquidate securities or hold uninvested assets to meet investor demands for cash redemptions, as an open-end fund must.
- n In a closed-end fund, not having to meet investor redemption requests or invest at inopportune times is ideal for value managers who attempt to buy stocks when prices are depressed and sell securities when prices are high.
- n A closed-end fund may invest more freely in less liquid portfolio securities because it is not subject to potential stockholder redemption demands. This is particularly beneficial for Royce-managed closed-end funds, which invest in small- and micro-cap securities.

- ⁿ The fixed capital structure allows permanent leverage to be employed as a means to enhance capital appreciation potential.
- Unlike Royce s open-end funds, our closed-end funds are able to distribute capital gains on a quarterly basis. Each of the Funds has adopted a quarterly distribution policy for its common stock.

We believe that the closed-end fund structure is very suitable for the long-term investor who understands the benefits of a stable pool of capital.

Why Dividend Reinvestment Is Important

A very important component of an investor s total return comes from the reinvestment of distributions. By reinvesting distributions, our investors can maintain an undiluted investment in a Fund. To get a fair idea of the impact of reinvested distributions, please see the charts on pages 13, 15 and 17. For additional information on the Funds Distribution Reinvestment and Cash Purchase Options and the benefits for stockholders, please see page 19 or visit our website at www.roycefunds.com.

Performance Table	2

For more than 30 years, we have used a value approach to invest in smaller-cap securities. We focus primarily on the quality of a company[]s balance sheet, its ability to generate free cash flow and other measures of profitability or sound financial condition. At times, we may also look at other factors, such as a company[]s unrecognized asset values, its future growth prospects or its turnaround potential following an earnings disappointment or other business difficulties. We then use these factors to assess the company[]s current worth, basing the assessment on either what we believe a knowledgeable buyer might pay to acquire the entire company, or what we think the value of the company should be in the stock market.

Important Performance and Risk Information

All performance information in this *Review and Report* reflects past performance, is presented on a total return basis and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate, so that shares may be worth more or less than their original cost when sold. Current performance may be higher or lower than performance quoted. Current month-end performance may be obtained at www.roycefunds.com. The Royce Funds invest primarily in securities of small-cap and/or micro-cap companies, which may involve considerably more risk than investments in securities of larger-cap companies.

The thoughts expressed in this *Review and Report to Stockholders* concerning recent market movements and future prospects for small-company stocks are solely the opinion of Royce at June 30, 2008, and, of course, historical market trends are not necessarily indicative of future market movements. Statements regarding the future prospects for particular securities held in the Funds portfolios and Royce is investment intentions with respect to those securities reflect Royce is opinions as of June 30, 2008 and are subject to change at any time without notice. There can be no assurance that securities mentioned in this *Review and Report to Stockholders* will be included in any Royce-managed portfolio in the future.

*Not annualized.

Letter to Our Stockholders

Ballad of a Thin Market

The first six months of 2008 gave even the most serene investor cause for anxiety, if Both domestically and internationally, not outright panic. First, a long list of worries ushered in the new year: the credit crisis, we housing bubble, subprime implosion, falling dollar, stumbling equity prices, and an have seen a large number of what we economy in either a full-blown recession or merely stalled. By the end of June, oncelieve could add to this list rapidly rising oil prices and associated energy costs. And we are superb values emerge in our would be remiss if we did not also mention that smaller-company stock prices, after asset class. rallying from mid- March through early June, spent most of that latter month As is often the case with value swooning. Indeed, share price declines throughout the market were so severe that on investing, July 1 several media outlets were trotting out comparisons to the 1930s, since June patience and discipline will be critical saw the worst respective one-month losses for both the Dow Jones Industrial Average as we and the S&P 500 since the Great Depression. wait for the markets to rebound. Each of the formidable problems besetting the economy and financial markets

remained unsolved as the year crept nervously to its midpoint, with little in the way of solutions on the immediate horizon. For anyone expecting good news soon about these matters, we can offer only sympathy. It will probably take some time before genuine improvement begins. We do not mean to imply that we like being where we are, only that a measured look at the current landscape suggests that most equities will need

Letter to Our Stockholders

We are contrarians. To us, the term has always been synonymous with value investor. Our research screens include searches for well-run businesses whose stock prices have fallen, which typically leads us to companies, and often entire industries, that others have recently fled or are otherwise happy to ignore.

Searching among the neglected and broken in the smaller-company world for new investment ideas not only helps us to find potential hidden gems, it also helps to lower portfolio risk. Companies whose stock prices have been beaten up by mass sell-offs often carry very low expectations (and price risk), especially once the smoke has cleared and former stockholders have moved on. Although there s always the risk of additional stock price erosion if a company[]s fortunes worsen or an industry s prospects grow dimmer, we try to use falling stock prices to our advantage; it is common for us to add to positions at such times to log a few more miles of volatility and poor short-term performance prior to a sustained recovery. The fact that this is not surprising does not make the news any easier to bear. What it does mean for smaller-company bargain-hunters such as ourselves is opportunity. Both domestically and internationally, we have seen a large number of what we believe are superb values emerge in our asset class. As is often the case with value investing, patience and discipline will be critical as we wait for the markets to rebound.

While we wait, it is worth noting that many observers, including some for whom we have enormous respect, are arguing that the events of the past year particularly the housing crisis, the credit crunch and the slowing economy signal the end of the era of low interest rates and low-to-moderate inflation that began following the 1982 recession and ran, with some notable interruptions, through the stock market peaks in 2007. We agree in large part with this assessment. It seems plain to us that we have entered a period that will be characterized by higher inflation and rising interest rates. However, there is little agreement as to how pronounced an effect these changes will have on the U.S. economy and stock markets. So these recent travails put all of us in the position of Dylan s Mr. Jones: there is something happening here, but we don t know what it is. **Our take is that the short term will be challenging at best, but that solid recoveries for both the economy and equities will come in the next three to five years.** As is our habit, we first look at history for future direction. In a Royce Fund 1989 *Annual Report*, we recalled a full-blown recession that led to a robust economic expansion, an epic crash in 1987 and mini-crash in 1989, and a market that saw speculative binges in oil, precious metals and real estate as well as stocks. In other words, it seems to us that nothing about the 90s or the current decade is unprecedented.

Subterranean Small-Cap Blues

As might be expected in such a tumultuous period, the current market leadership question also looks unsettled. Domestic small-caps, as measured by the Russell 2000 index, finished the year-to-date period ended 6/30/08 with a loss of 9.4%, which was better than the large-cap S&P 500 index (-11.9%), the more tech-laden Nasdaq Composite (-13.6%) and the global MSCI EAFE (Europe, Australasia and Far East) index (-11.0%). Small-cap s performance advantage over large-cap stocks thus far in 2008 was primarily attributable to its advantage in the second quarter, in particular its strong relative showing in May, when the Russell 2000 gained 4.6% versus 1.3% for the S&P 500. (Smaller stocks finished the second quarter just barely in positive territory, up 0.6% versus -2.7% for their large-cap peers.) The strong rally from the current small-cap trough on 3/10/08 was followed by an almost equally strong decline in June that collapsed share prices across the globe. During the month, the Russell 2000 lost 7.7%, the S&P 500 fell 8.4%, the Nasdaq Composite was down 9.1% and the MSCI EAFE declined 8.2%.

The relative resilience of smaller companies during June was a welcome development. Although it did not decisively shift market leadership back to our chosen asset class, it certainly helped the Russell 2000 lose less during the highly volatile first half of 2008.

(provided, of course, that our long-term outlook for the company remains positive).

While our hope is that any subsequent drops in share prices are temporary, it is also why we look for companies

Continued on page 6...

4 | This page is not part of the 2008 Semiannual Report to Stockholders

However, the S&P 500 was slightly ahead of its small-cap counterpart in the first quarter of 2008 (-9.5% versus -9.9%) and decidedly better in the second half of 2007. These outperformance periods allowed the S&P 500 to stay ahead of the Russell 2000 for both the one-year (-13.1% versus -16.2%) and three-year (+4.4% versus +3.8%) periods ended 6/30/08, while over longer-term periods, smaller stocks held serve; the Russell 2000 beat the S&P 500 for the five-, 10- and 15-year periods ended 6/30/08.

While large-cap stocks had to wait until early July to officially enter a bear market (traditionally defined as a price decline of 20% or more from a previous peak), the seeming inevitability of its arrival put the phrase bear market on the lips of most investors before the end of June. The Dowthat quality-oriented Jones Industrial Average finished the second quarter with a price 19.9% below its 10/9/07 all-time peak. After making a cyclical high in May, the S&P 500 fell more than 10% to close the quarter of market cap, shoul outperform and that cyclical high in early June before it fell 9.5% by the end of the quarter. However, the small-cap index also managed to retain more of its gain, staying 7.6% above its current cycle low on 3/10/08.

We expect more volatility and lower, possibly negative returns for much of the market in the coming months. Although we once believed that large-cap would have an advantage, we now believe that quality-oriented companies, regardless of market cap, should outperform and that smaller companies may provide an edge during short-term market upswings. We also suspect that smaller stocks should lead when share prices eventually show some sustained recovery. This, however, is likely to take some time before materializing. Putting aside for a moment the challenges that must be worked through in the economy as well as in the credit and housing markets, the Russell 2000 also enjoyed a mostly uninterrupted run from its trough on 10/9/02 through its most recent peak on 7/13/07. Nearly five years of primarily rising stock prices does not correct itself quickly or, unfortunately, without pain. (For more on recent small-cap market cycles, see page 10).

Tangled up in Value

Small-cap value stocks, as measured by the Russell 2000 Value index, have felt more than their share of pain recently after dominating the Russell 2000 Growth index during the first seven years of the current decade. During the last full small-cap market cycle, which lasted from 3/9/00 until 7/13/07, the Russell 2000 Value index substantially outperformed the Russell 2000 Growth index (+189.5% versus -14.8%). The small-cap value index also outpaced the small-cap growth index from the small-cap market trough on 10/9/02 through 7/13/07, up 183.9% versus 169.7%. However, the small-cap growth index began to chip away at this lead during 2007, when it beat small-cap value in each of that year]s four quarters.

Small-cap growth hung on to its advantage through the year-to-date period ended 6/30/08 (-8.9% versus -9.8% for the small-cap value index), as well as from the recent small-cap peak on 7/13/07. Results for both small-cap style indices were close from

Although we once believed that large-cap would have an advantage, we now believe companies, regardless of market cap, should outperform and that smaller companies may provide an edge during short-term market upswings. We also suspect that smaller stocks should lead when share prices eventually show some sustained recovery.

This page is not part of the 2008 Semiannual Report to Stockholders | 5

that have the financial strength to survive difficult times for their industry or sector. This remains a cornerstone of our approach because, despite our best intelligence, trouble sometimes lasts longer than we anticipate. Just as we attempt to be opportunistic from a purchase-price standpoint, we like companies that view opportunity through a similar prism. Businesses with strong balance sheets will at times act in a similar fashion, using their financial position to acquire lesser competitors.

Our practice of purchasing low-expectation companies often involves going against the grain of Wall Street. Five years ago, for example, oil was trading at a then-high of \$30 per barrel. The Wall Street consensus was that the price of oil had reached a peak and would soon begin to decline. We began to look closely at energy services companies as well as oil and gas businesses because expectations were driving investors away to the point that share prices began to look more and more attractive to us. This, combined with many years of industry consolidation, gave us the conviction to start building positions within the sector.

We were not making a call on the prospects for oil prices or thinking that we knew better than the analysts who devote their careers to the study of energy[]we simply saw an industry in which we had enjoyed success in the past once again looking attractively undervalued to us.

Continued on page 8...

Letter to Our Stockholders

7/13/07 through the new small-cap trough on 3/10/08, a period in which the Russell 2000 Value index fell 25.4% and its small-cap growth sibling lost 23.0%, reversing small-cap value s usual edge during downturns. From the small-cap market peak on 7/13/07 through 6/30/08, the small-cap growth index enjoyed a larger performance edge, falling 13.8% versus a loss of 23.1% for the small-cap value index.

While neither index has been exempt from the market[s troubles over the past year, investors may be wondering what became of small-cap value[s typical performance edge in down-market periods. We think that the current reversal is not entirely a surprise when one considers just how thoroughly the Russell 2000 Value index prevailed over the Russell 2000 Growth index both from the previous small-cap market peak on 3/9/00 and from the small-cap market trough on 10/9/02 through the end of the last full market cycle in July 2007. That small-cap value has been struggling of late is therefore not unexpected, both in the context of reversion to the mean and in the context of an indiscriminate bear market. Of course, just as we spent much of the first several years of the decade looking for high-quality bargains in areas usually populated by smaller-company growth managers, we have spent much of the last year scrutinizing those places where value managers are thought to roam.

Our Back Pages

Performance during the first half of 2008 for our three closed-end portfolios was decidedly mixed on both an absolute and relative basis, with a particularly wide margin separating the terrific NAV (net asset value) results of Royce Focus Trust and the less inspiring showings for both Royce Value Trust and Royce Micro-Cap Trust (see the chart below). Each Fund looks at a slightly different area of the smaller-company universe: Royce Focus Trust typically holds fewer positions, most of which are selected from the upper tier of the smaller-company world, where market capitalizations run from \$500 million to \$2.5 billion. Royce Value Trust and Royce Micro-Cap Trust are more diversified and make most of their respective selections

from the micro- and small-cap area (market caps up to \$2.5 billion) and micro-cap area (market caps up to \$500 million). Thus, we view a certain divergence as a healthy

6 | This page is not part of the 2008 Semiannual Report to Stockholders

development. Still, we were very disappointed in our two portfolios that struggled on a relative and absolute basis during both the six-month and one-year periods ended 6/30/08.

Much of the strength of Royce Focus Trust s first-half performance came from its greater exposure to both energy and steel companies. These areas did well in all three portfolios, but both Royce Value Trust and Royce Micro-Cap Trust were comparatively underweight in their respective exposure and thus paid the price. They also suffered from having relatively larger exposures to sectors that struggled, such as consumer, technology and financial stocks. Indeed, financials continued to be a drag across the entire equity market. On average, the financial components of the Dow declined 26.6% in the second quarter, versus a 7.4% decline for the index. Within the S&P 500, banking and related industries declined 24.9% on average, versus a 2.7% decline for the index. The Financial Services sector of the Russell 2000 was that index[]s worst performer, losing 13.4%, while the index gained 0.6%.

The Times They Are A-Changin[]

As much as the current bearish period has convinced us that major changes are working their way through the market, it seems to us that there is a significant element to the story that has not received as much attention, namely, the shift in the status of the U.S. in the global economy. **The U.S. has gone from being by far the most dominant force, perhaps the only truly dominant force, to being first among a small group of leading players, which includes the European Union, China, Japan and India.** The first sign of this change can be traced back to late 2000, when the U.S. dollar first began to decline versus the Euro, a decline that has lasted more than seven years and counting. Other factors also contributed[]the bursting Internet bubble, the events of 9/11, a war that has made the U.S. unpopular abroad, the surging economies of China and India, and our own recent struggles with housing, credit and an overall stalled economy. Each is a piece of a larger puzzle that shows the global economy undergoing major changes, and we believe that the shifting role of the U.S. within this system is the critical event.

We have sought to meet the challenges these changes present by exporting our investment approach over the past decade. Our initial forays into international smaller companies generally involved those with a strong domestic presence, while more recently we have been expanding our scope to include companies whose activities are more international or centered in a particular overseas region such as Western Europe. **Our evolution to international investing is rooted in the Royce tradition of attempting to capitalize on market inefficiencies to generate strong absolute returns, while always keeping a close eye on managing risk. We are focusing primarily on developed economies, where we see ample inefficiencies that could translate into opportunities to find attractively priced securities. Interestingly, the degree of inefficiency that we are seeing today in many international smaller companies reminds us of the small-cap market in the United States 15 to 20 years ago. It is possible that we may be in the early phases of a long-term outperformance cycle for smaller companies on a global** Interestingly, the degree of inefficiency that we are seeing today in many international smaller companies reminds us of the small-cap market in the United States 15 to 20 years ago.

This page is not part of the 2008 Semiannual Report to Stockholders | 7

Our thinking was that the industry was both significant and robust enough to eventually recover, though we set no specific time table as to when.

More recently, certain industries in the consumer sectors appear to us to have been suffering from a similar dearth of positive expectations. The slowing economy, the credit crunch. the housing bubble and. somewhat ironically, rising energy costs have all convinced many observers that the American consumer is too financially challenged for consumer stocks to do anything more than languish at best. As was the case with energy earlier in the decade, we see a traditionally cyclical area at what looks to us like a potential low point in its business cycle.

Our practice in the past several months has been to root around various consumer industries looking for smaller-cap businesses that boast sterling

Letter to Our Stockholders

scale, as international smaller companies follow their U.S. peers and potentially evolve into a professional asset class.

The number of opportunities in international investing is vast. There are more companies from which to choose and greater total market capitalization. Our research indicates that there are three times as many micro-cap companies those with market capitalizations up to \$500 million in the developed international universe, with roughly twice the total market capitalization of the U.S. micro-cap universe. Similarly, in the upper tier of the international small-cap world market caps of \$500 million to \$2.5 billion there are more total companies (2,091 versus 1,119) and greater total market capitalization (\$2.4 trillion versus \$1.3 trillion domestically). However, average market caps tend to be smaller in the international market. For example, according to Reuters the international micro-cap market has a weighted average market cap of \$219, compared to \$257 domestically. Liquidity issues, therefore, tend to increase as we move down the market-cap scale, which contributes to greater pricing inefficiencies. Independent research is difficult to come by (when it is available at all). We believe that these differences give us the opportunity to find quality businesses that are not properly priced. In addition, a counter-weight to the liquidity challenges is a marketplace with generally higher yields. As of 6/30/08, the

financial characteristics in the form of strong balance sheets, established records of earnings and the ability to generate free cash flow.

The contrarian habit of scouring beaten-down industries that others are avoiding or ignoring is a hallmark of our time-tested value approach. By closely examining industries for which expectations are at a minimum, we stay true to our goal of trying to lower risk, which is a critical part of building strong, long-term returns for The Royce Funds.

8 | This page is not part of the 2008 Semiannual Report to Stockholders

weighted average yield of the international small-cap universe was more than a percentage point higher than its domestic equivalent, 3.5% versus 2.1%.

Most importantly, we have found that quality is a truly international concept, an idea that recognizes no borders. The same attributes that attract us to domestic companies strong balance sheets, an established record of earnings, the ability to generate free cash flow and excellent growth prospects are readily found in international businesses. It really is a small world after all.

Bringing It all Back Home

However promising the future for global opportunities in smaller companies, we think that far too much uncertainty currently exists here at home for the equity markets to settle down and establish a consistent, forward-looking direction. Although there have been plenty of pleasant surprises, we do not think the profit picture is strong enough to outweigh the anxiety that so many investors are feeling, especially about inflation. We see the next year or so being a very volatile period as the market continues to sort out the effects of the housing and credit bubbles and adjusts to a more inflationary environment.

It seems plain to us that investors will therefore be looking for lower risk in the form of company quality, especially if the bond markets begin to struggle, as many seem to expect. We see the next year or two as a time to prepare and position our portfolios for a market and economic rebound that looks at least a year or two away. We think that three to five years from now, investors will be mostly pleased with returns because we expect the economy to recover and think that the market will see it coming first. So while smaller companies should be all right in the short term, we suspect that the real action lies further ahead. In any case, we keep doing what we have always done buying what we think are high-quality smaller companies trading at attractive prices. A volatile stock market has historically been a boon to value investors, and the current period will hopefully be no exception. Certain areas continue to offer what look to us like compelling bargains, both here and abroad. In addition, some industries have been doing very well, so we have been taking gains in some cases, holding in others and even building positions in companies that are managing their growth most effectively. Wide divergence in sector performance is something that we anticipate will be with us for a while, so we see ample opportunity out there on a global scale.

We see the next year or two as a time to prepare and position our portfolios for a market and economic rebound that looks at least a year or two away. We think that three to five years from now, investors will be mostly pleased with returns because we expect the economy to recover and think that the market will see it coming first.

Sincerely,

Charles M. Royce President W. Whitney George Vice President Jack E. Fockler, Jr. Vice President

Small-Cap Market Cycle Performance

We believe strongly in the idea that a long-term investment perspective is crucial for determining the success of a particular investment approach. Flourishing in an up market is wonderful. Surviving a bear market by losing less (or not at all) is at least as good. However, the true test of a portfolio s mettle is performance over full market cycle periods, which include both up and down market periods. We believe that providing full market cycle results is more appropriate even than showing three- to five-year standardized returns because the latter periods may not include the up and down phases that constitute a full market cycle.

Since the Russell 2000 s inception on 12/31/78, value as measured by the Russell 2000 Value Index outperformed growth as measured by the Russell 2000 Growth Index in six of the small-cap index s eight full market cycles. The most recently concluded cycle, which ran from 3/9/00 through 7/13/07, was the longest in the index s history, and represented what we believe was a return to more historically typical performance in that value provided a significant advantage during its downturn (3/9/00 10/9/02) and for the full cycle. In contrast, the new market cycle that began on 7/13/07 has so far favored growth over value, an unsurprising development when one considers how thoroughly value dominated growth in the previous full cycle.

Peak-to-Peak

For the full cycle, value provided a sizeable margin over growth, which finished the period with a loss. Each of our closed-end funds held a sizeable performance advantage over the Russell 2000 on both an NAV (net asset value) and market price basis. On an NAV basis, Royce Focus Trust (+264.2%) was our best performer by a wide margin, followed by Royce Micro-Cap Trust (+175.9%) and Royce Value Trust (+161.3%).

Peak-to-Trough

In the new cycle s somewhat brief peak-to-trough period, growth was ahead of value, though its advantage was slight and neither style index managed to provide positive performance during the downdraft. All of our closed-end funds outperformed the Russell 2000 in this period, with Royce Focus Trust again providing the best (albeit negative) performance for the period, followed by Royce Value Trust.

Trough-to-Current

We would caution against reading too much into a period that has lasted only slightly longer than a calendar quarter, but it is still worth noting that growth s return more than tripled that of the value index. Only Royce Focus Trust outpaced the Russell 2000 during this period, with Royce Value Trust and Royce Micro-Cap Trust both underperforming.

Peak-to-Current

During this nearly year-long period, both value and growth posted negative returns, though growth lost less by a comfortable margin. Once again, Royce Focus Trust distinguished itself. Both it and Royce Value Trust outperformed the Russell 2000, while Royce Micro-Cap Trust lagged the small-cap index.

Royce Value Trust

Manager[]s Discussion

During the first half of 2008, Royce Value Trust (RVT) lagged each of its small-cap benchmarks in a bear market environment. The Fund declined 11.7% on a net asset value (NAV) basis, and 10.7% on a market price basis, for the year-to-date period ended 6/30/08, compared with losses of 9.4% for the Russell 2000 and 7.1% for the S&P SmallCap 600 for the same period. In the first quarter downturn, RVT was down 10.7% on an NAV basis while its market price fell 13.0%, versus a decline of 9.9% for the Russell 2000 and 7.5% for the S&P 600. The second quarter was equally frustrating. After establishing a market trough on 3/10/08, smaller companies enjoyed a strong short-term rally that lasted into early June, when stock prices again dropped throughout most of the market. In the thus-volatile second quarter, RVT again underperformed its benchmarks on an NAV basis, declining 1.1% versus respective gains of 0.6% and 0.4% for the Russell 2000 and for the S&P 600, while outgaining each index on a market price basis, up 2.7%.

During the short-term period from the recent small-cap market trough on 3/10/08 through 6/30/08[a span nearly coterminus with the second quarter[RVT]s market price performance was strong on a relative basis, but the Fund underperformed on an NAV basis. From 3/10/08 through 6/30/08, RVT gained 3.9% on an NAV basis and was up 9.7% on a market price basis, compared with a 7.6% gain for the Russell 2000 and a 6.3% gain for the S&P 600. The Fund[]s performance pattern since the beginning of the new small-cap market cycle on 7/13/07 has been disappointing so far in that

we would expect the Fund to better hold its value during down-market period. From the July 2007 peak through 6/30/08, RVT was down 17.8% on an NAV basis, and 20.0% on a market price basis, compared to the Russell 2000∏s 18.4% loss and the S&P 600∏s decline of 17.1% during the

Energy Conversion Devices	\$4,292,218
Cimarex Energy	3,448,987

same period.

Helmerich & Payne

2,586,241

*Includes dividends

Over full market cycle and other longer-term periods, positive performances were more common, as was strong absolute and relative performance. RVT held a large advantage over both the Russell 2000 and the S&P 600 from the previous small-cap market peak on 3/9/00 through 6/30/08, gaining 114.7% on an NAV basis and 148.2% on a market price basis, while the Russell was up 26.4%, and the S&P 600 was up 76.2%. The Fund outperformed each of its benchmarks on an NAV basis for the three-, five-, 10-, 15-, 20-year and since inception (11/26/86) periods ended 6/30/08 and on a market price basis for each period except the three- and five-year intervals. **RVTS** NAV average annual total return since inception was 11.7%.

Important Performance and Risk Information

All performance information reflects past performance, is presented on a total return basis and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the recent month-end may be obtained at www.roycefunds.com. The market price of the Fund[]s shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund invests primarily in securities of small- and micro-cap companies, which may involve considerably more risk than investing in a more diversified portfolio of larger-cap companies. Standard deviation is a statistical measure within which a fund s total returns have varied over time. The greater the standard deviation, the greater a fund s volatility.

12 | 2008 Semiannual Report to Stockholders

Performance and Portfolio Review

Natural Resources was not only the Fund_s best-performing sector on a dollar basis in the first half, it was the only notable positive contributor to performance. The oil and gas industry and energy services group were the sector s strongest areas, home to three of the Fund⊓s best-performing stocks. Cimarex Energy is an oil and gas exploration and production company that tapped a benefit from the record-shattering price of oil and a recovery in natural gas prices. CARBO Ceramics manufactures ceramic proppants used in hydraulic fracturing of natural gas and oil wells. We have long admired its strong niche, clean balance sheet and history of profitability. We were happy to see other investors catch on in the first half. We classify the Fund_s top gainer, Energy Conversion Devices, as a Technology holding, but, as its name suggests, it does much of its business supplying products and processes for alternative energy generation and storage. The firm∏s new CEO concentrated efforts on its solar-energy production segments, which helped the firm generate positive earnings.

The Financial Services sector was home to the two holdings with the largest negative impact on first-half performance. AllianceBernstein Holding remains a healthy dividend payer and, in our view, a very well-run business. Its stock disappointed after the firm revised its earnings guidance for fiscal 2007 early in 2008. It was the Fund[s largest holding at the end of June. The share price of MoneyGram International was beaten down in 2007 as the result of exposure to subprime mortgages in its investment portfolio.

GOOD IDEAS AT THE TIME Net Realized and Unrealized Inv Loss <u>*</u> Year-to-Date Through 6/30/08	vestment
AllianceBernstein Holding L.P.	\$6,222,308

Advent Software	3,950,988

*Net of dividends

Matters grew worse n January 2008 when the company announced, after re-valuing the portfolio, that it had experienced additional losses due to the subprime contagion. Its already-plummeting share price fell precipitously through June. We increased our stake n January and February because we think that the firm[]s various money transfer businesses are strong enough to help it eventually overcome its formidable problems. We were also somewhat encouraged by a

Manager S Discussion

During the first half of 2008, Royce Micro-Cap Trust (RMT) disappointed on both an absolute and relative basis. For the year-to-date period ended 6/30/08, the Fund was down 11.7% on a net asset value (NAV) basis and lost 7.9% on a market price basis, compared with a decline of 9.4% for its small-cap benchmark, the Russell 2000. RMT did outperform the Russell Microcap index, which was down 15.5% during the first half. In the first guarter downturn, RMT fell 10.6% on an NAV basis and 8.6% on a market price basis versus a decline of 9.9% for the small-cap index and 12.4% for the Russell Microcap index. After the recent small-cap trough on 3/10/08, share prices roared back throughout the market, then swooned again in the last several weeks of June. Although the Fund enjoyed strong performance on a market price basis during this mini-rally, it could not keep pace on an NAV basis. The Fund then proceeded to endure a miserable June on both an NAV and market price basis, while also underperforming the small-cap index. The upshot was a volatile second guarter in which RMT again underperformed its benchmark on an NAV basis, declining 1.2% versus a 0.6% gain for the Russell 2000 and 3.5% decline for the Russell Microcap index. Meanwhile, the Fund was up 0.7% on a market price basis in the second quarter.

The Fund∏s performance from the beginning of the new small-cap market cycle on 7/13/07 was also disappointing. From the July 2007 peak through 6/30/08, RMT fell 20.4% on an NAV basis and 25.5% based on market price, in both cases lagging its benchmark⊓s 18.4% loss for the same period, while beating the Russell Microcap index∏s 26.8% decline. In addition, RMT trailed its benchmark from the recent small-cap trough on 3/10/08, up 2.8% on an NAV basis and 5.6% on a market value basis, compared with a 7.6% gain for the Russell 2000 and a 2.3% gain for the Russell Microcap index.

GOOD IDEAS THAT WORKED

eResearch Technology	984,316
PharMerica Corporation	871,000
Trex Company	805,000
Pason Systems	755,100

*Includes dividends

Positive performances were more common over previous market cycle and other long-term periods. RMT held a large advantage over the Russell 2000 from the previous small-cap market peak on 3/9/00 through 6/30/08, gaining 119.7% on an NAV basis and 143.3% based on its market price, while its benchmark was up 26.4%. (Data for the Russell Microcap index only goes back to 2002.) While its recent performance was disappointing, we were pleased with the Fund[]s longer-term record. On an NAV basis, RMT outperformed the Russell 2000 for the three-, five-, 10-year and since inception (12/14/93) periods ended 6/30/08 and beat the small-cap index in each of those time spans save the three-year period on a market price basis. **The Fund[]s NAV average annual total return since inception was 12.1%.**

Important Performance and Risk Information

Standard deviation is a statistical measure within which a fund[]s total returns have varied over time. The greater the standard deviation, the greater a fund[]s volatility.

14 | 2008 Semiannual Report to Stockholders

Performance and Portfolio Review

Natural Resources was by far the Fund⊓s best performing sector on a dollar basis during the first half, led by the energy services group and the oil and gas industry. Pason Systems benefited from increased demand for its specialized oilfield drilling instrumentation systems for use on land-based drilling rigs. The Diversified Investment Companies sector also made a positive dollar-based contribution, primarily the result of strong results from holdings in closed-end funds. In the otherwise dismal Consumer Services sector, automotive retailer America∏s Car-Mart was the Fund∏s best performer on a dollar basis in the first half. Specializing in low-end cars drove its success in a distressed auto market especially sensitive to gas-price increases. Its earnings tripled in the second guarter, putting its stock price in the fast lane. We took gains in May and June, but still held a good-sized position at the end of June.

Making the largest dollar-based negative impact on first-half performance was TravelCenters of America, which primarily operates truck stops, gas stations and restaurants along U.S. interstates. We first purchased shares in RMT[]s portfolio in February 2008. The company acquired its chief rival in May 2007, and its stock price mostly fell from around that time through the end of June 2008. Ongoing losses over the last several quarters, as well as reduced highway traffic[]the result of soaring gas prices[]probably also had an effect on its stalled share price during the first half of 2008. We liked the strong balance sheet and positive earnings history of Medical Action Industries, which manufactures disposable medical products primarily in the U.S.

*Net of dividends

Although still posting positive earnings, it endured manufacturing inefficiencies that the firm expected to continue through 2008, as well as the increased cost of resin (necessarv in the manufacture of plastic products), and increased shipping costs for its products made in China. The Technology sector posted significant net osses on a dollar basis from the telecommunications group and the aerospace and defense industry. Sapient Corporation,

which offers brand and marketing strategies, as well as business and IT services, was among the biggest disappointments for the period. In J a n u a r y, lower-than-expected earnings helped its stock price to plunge.

Royce Focus Trust

Manager s Discussion

The first half of 2008 was a good time for the contrarian approach we use in Royce Focus Trust (FUND). For the year-to-date period ended 6/30/08, the Fund was up

2.3% on a net asset value (NAV) basis and 1.4% on a market price basis, in both cases ahead of the 9.4% loss for its small-cap benchmark, the Russell 2000, during the same period. While the Russell 2000 fell 9.9% in the difficult first guarter, the Fund held up well, down 5.3% on an NAV basis and 8.4% on a market price basis. Following the small-cap market trough on 3/10/08, equities rallied through the beginning of June. After losing less in the first guarter, FUND was also able to build on its advantage during April and May. When share prices tumbled again in June, the Fund followed suit, though its NAV performance was better than that of its benchmark (-5.0% versus -7.7%). The end result for the volatile second quarter was both significant relative outperformance and strong absolute performance[]FUND gained 8.0% on an NAV basis and 10.6% on a market price basis during the second quarter, compared to a gain of 0.6% for the Russell 2000.

Smaller stocks established a new peak on 7/13/07. With this new peak, the previous small-cap cycle that began with the peak on 3/9/00 came to a close and a new cycle, which has been marked by high volatility and mostly negative returns, got under way. From 7/13/07 through 6/30/08, the Fund was down 5.3% on

fell 6.5% on a market price basis 18.4% for its small-cap benchmark. In the short-term period from the recent small-cap market trough on 3/10/08 through 6/30/08, FUND gained 11.8% on an NAV basis and 14.0% on a market price basis versus a 7.6% gain for the Russell 2000. We were very pleased with the Fund∏s recent results, especially in the more volatile, downward-trending market that began with the new small-cap market cycle in July 2007 when the portfolio held its value well.

an NAV basis and fell 6.5% on a market price basis versus a loss of 18.4% for its

\$4,128,841
3,298,213
2,309,000
2,241,024
1,633,792

d its value well. *Includes dividends

These results were consistent with FUND[]s performance over longer-term periods, which offer a more meaningful gauge of its merits. From the previous small-cap market peak on 3/9/00 through 6/30/08, the Fund significantly outpaced its benchmark on both an NAV and market price basis. During this period, FUND gained 244.9% on an NAV basis and 310.8% on a market price basis compared to the Russell 2000[]s 26.4% gain. This was a critical factor in the Fund \Box s outperformance of the small-cap index for the one-, three-, five, 10-year and since inception of our management (11/1/96) periods ended 6/30/08. FUND \Box s NAV average annual total return since inception was 13.7%.

The most significant dollar-based net losses during the first half came from the Consumer Products sector, home to RV (recreational vehicle) makers Thor Industries and Winnebago

Standard deviation is a statistical measure within which a fund s total returns have varied over time. The greater the standard deviation, the greater a fund s volatility.

16 | 2008 Semiannual Report to Stockholders

Performance and Portfolio Review

Industries. (Thor also makes small- and mid-sized buses, while Winnebago focuses solely on motor homes.) Although energy stocks were terrific performers in FUND_¬s portfolio, rising energy prices also contributed to each company∏s dismal performance. Both have struggled in an inhospitable environment for their industry. We increased our stake in Thor Industries a bit in January and chose to hold on to Winnebago. At the end of June, we thought that both were capable of an eventual rebound. Elsewhere in the portfolio, Fronteer Development Group posted a sizeable net loss. The firm is a gold mining company with what we believe are several promising projects. Investors opted for a different point of view in the form of a mass exodus from its stock in February. At issue was the ownership of a uranium mine in which the firm holds an equity stake. We built our position in January and March before trimming it in June. At the end of the first half, we remained confident in the firm⊓s long-term prospects.

Unit Corporation is primarily a contract drilling company, but also runs its own oil and natural gas exploration business. The record-shattering price of oil and its own growing businesses helped its share price to climb during the first half. Although we took some gains in May, Unit was the Fund[s fourth-largest position at the end of June. Steel companies from the Industrial Products sector, such as Australian firm Sims Group, Reliance Steel & Aluminum and Schnitzer Steel Industries, continued to benefit from the weak U.S. dollar, which has made domestic steel and scrap metal attractively priced to BRIC (Brazil, Russia, India and China) and other developing countries.

gement d with calian -metal ss Sims n March e price of moved up iably, no eaping a from its resence in easingly ational Reliance Aluminum s metals processing services and distributor of metal products. Following a volatile 2007, the company∏s stock price rose more or

Metal

less steadily through the first six months of 2008 as investors took notice of its improved earnings. As with Sims, the firm [] s global footprint seemed to boost its business.

FUND INFORMATION AND PORTFOLIO DIAGNOSTICS

Average Market Capitalization <u>*</u>	\$1,386 million
Weighted Average P/E Ratio <u>**</u>	13.0x
Weighted Average P/B Ratio	2.2x
Weighted Average Portfolio Yield	1.4%
Fund Net Assets	\$193 million
Net Leverage	9%
Turnover Rate	62%
Symbol Market Price NAV	FUND XFUNX

*Geometrically calculated

** The Fund s P/E ratio calculation excludes companies with zero or negative earnings (10% of portfolio holdings as of 6/30/08).

Net leverage is the percentage, in excess of 100%, of the total value of equity type investments, divided by net assets, excluding preferred stock.

CAPITAL STRUCTURE

Publicly Traded Securities Outstanding at 6/30/08 at NAV or Liquidation Value

18.9 million shares of Common Stock	\$168 million
6.00% Cumulative Preferred Stock	\$25 million

RISK/RETURN COMPARISON Five-Year Period Ended 6/30/08			
Average Annual Standard Return Total Return Deviation Efficiency			
FUND (NAV)	20.52%	15.16	1.35
Russell 2000	10.29	14.38	0.72

*Return Efficiency is the average annual total return divided by the annualized standard deviation over a designated time period.

2008 Semiannual Report to Stockholders | 17

History Since Inception

The following table details the share accumulations by an initial investor in the Funds who reinvested all distributions (including fractional shares) and participated fully in primary subscriptions for each of the rights offerings. Full participation in distribution reinvestments and rights offerings can maximize the returns available to a long-term investor. This table should be read in conjunction with the Performance and Portfolio Reviews of the Funds.

6/30/08

* Beginning with the 1997 (RVT), 2002 (RMT) and 2004 (FUND) distributions, the purchase price of distributions is a weighted average of the distribution reinvestment prices for the year.

3,195

\$ 28,308

\$ 7,044

** Other than for initial purchase and June 30, 2008, values are stated as of December 31 of the year indicated, after reinvestment of distributions.

\$ 28,212

18 | 2008 Semiannual Report to Stockholders

Distribution Reinvestment and Cash Purchase Options

Why should I reinvest my distributions?

By reinvesting distributions, a stockholder can maintain an undiluted investment in the Fund. The regular reinvestment of distributions has a significant impact on stockholder returns. In contrast, the stockholder who takes distributions in cash is penalized when shares are issued below net asset value to other stockholders.

How does the reinvestment of distributions from the Royce closed-end funds work?

The Funds automatically issue shares in payment of distributions unless you indicate otherwise. The shares are generally issued at the lower of the market price or net asset value on the valuation date.

How does this apply to registered stockholders?

If your shares are registered directly with a Fund, your distributions are automatically reinvested unless you have otherwise instructed the Funds transfer agent, Computershare, in writing. A registered stockholder also has the option to receive the distribution in the form of a stock certificate or in cash if Computershare is properly notified.

What if my shares are held by a brokerage firm or a bank?

If your shares are held by a brokerage firm, bank, or other intermediary as the stockholder of record, you should contact your brokerage firm or bank to be certain that it is automatically reinvesting distributions on your behalf. If they are unable to reinvest distributions on your behalf, you should have your shares registered in your name in order to participate.

What other features are available for registered stockholders?

The Distribution Reinvestment and Cash Purchase Plans also allow registered stockholders to make optional cash purchases of shares of a Fund[]s common stock directly through Computershare on a monthly basis, and to deposit certificates representing your Fund shares with Computershare for safekeeping. The Funds[] investment adviser is absorbing all commissions on optional cash purchases under the Plans through December 31, 2008.

How do the Plans work for registered stockholders?

Computershare maintains the accounts for registered stockholders in the Plans and sends written confirmation of all transactions in the account. Shares in the account of each participant will be held by Computershare in non-certificated form in the name of the participant, and each participant will be able to vote those shares at a stockholder meeting or by proxy. A participant may also send other stock certificates held by them to Computershare to be held in non-certificated form. There is no service fee charged to participants for reinvesting distributions. If a participant elects to sell shares from a Plan account, Computershare will deduct a \$2.50 fee plus brokerage commissions from the sale transaction. If a nominee is the registered owner of your shares, the nominee will maintain the accounts on your behalf.

How can I get more information on the Plans?

You can call an Investor Services Representative at (800) 221-4268 or you can request a copy of the Plan for your Fund from Computershare. All correspondence (including notifications) should be directed to: [Name of Fund] Distribution Reinvestment and Cash Purchase Plan, c/o Computershare, PO Box 43010, Providence, RI 02940-3010, telephone (800) 426-5523.

- New additions in 2008.
- ^a At June 30, 2008, the Fund owned 5% or more of the Company soutstanding voting securities thereby making the Company an Affiliated Company as that term is defined in the Investment Company Act of 1940.
- ^b All or a portion of these securities were on loan at June 30, 2008. Total market value of loaned securities at June 30, 2008 was \$112,828,640.
- ^c Non-income producing.
- ^d Securities for which market quotations are not readily available represent 0.2% of net assets. These securities have been valued at their fair value under procedures established by the Fund B Board of Directors.
- ^e Includes securities first acquired in 2008 and less than 1% of net assets applicable to Common Stockholders.

Bold indicates the Fund s 20 largest equity holdings in terms of June 30, 2008 market value.

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$1,126,378,186. At June 30, 2008, net unrealized appreciation for all securities was \$222,507,090, consisting of aggregate gross unrealized appreciation of \$376,486,271 and aggregate gross unrealized depreciation of \$153,979,181. The primary difference in book and tax basis cost is the timing of the recognition of losses on securities sold.

(a) The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period reported. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund Is Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund Is net asset value is used on the purchase and sale dates instead of market value.

(b) Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.48%, 1.17%, 1.08%, 1.22%, 1.21% and 1.19% for the periods ended June 30, 2008 and December 31, 2007, 2006, 2005, 2004 and 2003, respectively.

(c) Expense ratios based on average net assets applicable to Common Stockholders before waiver of fees by the investment adviser would have been 1.62% for the year ended December 31, 2003; before waiver of fees and earnings credits would have been 1.79%, 1.38%, 1.29%, 1.49%, 1.51% and 1.62% for the periods ended June 30, 2008 and December 31, 2007, 2006, 2005, 2004 and 2003, respectively.

(d) The management fee is calculated based on average net assets over a rolling 60-month basis, while the above ratios of management fee expenses are based on the average net assets applicable to Common Stockholders over a 12-month basis.

(e) The average of month-end market values during the period that the Preferred Stock was outstanding.

* To be allocated to net investment income and capital gains at year end.

** Annualized.

*** Not annualized.

32 2008 Semiannual Report to Stockholders THE ACCOMPANYING NOTES ARE AN INTEGRAL PART OF THESE FINANC

Summary of Significant Accounting Policies:

Royce Value Trust, Inc. (the [Fund]), was incorporated under the laws of the State of Maryland on July 1, 1986 as a diversified closed-end investment company. The Fund commenced operations on November 26, 1986.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdag Electronic Bulletin Board, are valued at their last reported sales price or Nasdag official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price. Securities for which market guotations are not readily available are valued at their fair value under procedures established by the Fund Is Board of Directors. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the price of securities used by the Fund may differ from quoted or published prices for the same security. Bonds and other fixed income securities may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund s investments. These inputs are summarized in the three broad levels below:

Level 1 🛛 quoted prices in active markets for identical securities

Level 2 distribution observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements)

Level 3 [] significant observable inputs (including the Fund[]s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund is investments as of June 30, 2008:

Level 1	Level 2	Level 3	Total
\$1,018,972,228	\$328,318,023	\$1,595,025	\$1,348,885,276

Level 3 Reconciliation:

Balance as of 12/31/07	Change in unrealized appreciation (depreciation)	Balance as of 6/30/08
\$1,816,875	\$(221,850)	\$1,595,025

The Fund may enter into repurchase agreements with institutions that the Fund s investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

Foreign Currency:

The Fund values its non-U.S. securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. The effects of changes in foreign exchange rates on investments and other assets and liabilities are included with net realized and unrealized gains and losses on investments.

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund is books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

2008 Semiannual Report to Stockholders | 33

Notes to Financial Statements (unaudited) (continued)

Securities Lending:

The Fund loans securities to qualified institutional investors for the purpose of realizing additional income. Collateral on all securities loaned for the Fund is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral is equal to at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption []Income Tax Information [].

Distributions:

The Fund currently has a policy of paying quarterly distributions on the Fund S Common Stock. Distributions are currently being made at the annual rate of 9% of the rolling average of the prior four calendar quarter-end NAVs of the Fund S Common Stock, with the fourth quarter distribution being the greater of 2.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly and distributions to Common Stockholders are recorded on ex-dividend date. The Fund is required to allocate long-term capital gain distributions and other types of income proportionately to distributions made to holders of shares of Common Stock and Preferred Stock. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund soperations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Allocated personnel and occupancy costs related to The Royce Funds are included in administrative and office facilities expenses. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of Directors Fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian is fee is paid indirectly by credits earned on the Fund is cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 1,768,501 and 2,749,591 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2008 and the year ended December 31, 2007, respectively.

At June 30, 2008, 8,800,000 shares of 5.90% Cumulative Preferred Stock were outstanding. Commencing October 9, 2008 and thereafter, the Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in

part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets applicable to Common Stockholders) in the accompanying financial statements in accordance with Emerging Issues Task Force (EITF) Topic D-98, Classification and Measurement of Redeemable Securities, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody[]s, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund[]s ability to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock.

34 | 2008 Semiannual Report to Stockholders

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce & Associates, LLC ([Royce]) receives a fee comprised of a Basic Fee ([Basic Fee]) and an adjustment to the Basic Fee based on the investment performance of the Fund in relation to the investment record of the S&P SmallCap 600 Index ([S&P 600]).

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund s month-end net assets applicable to Common Stockholders, plus the liquidation value of Preferred Stock, for the rolling 60-month period ending with such month (the [performance period]). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the S&P 600 for the performance period by more than two percentage points. The performance period for each such month is a rolling 60-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the S&P 600 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the investment performance of the Fund by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the S&P 600 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment performance of the Fund by 12 or more percentage points for the performance period.

Notwithstanding the foregoing, Royce is not entitled to receive any fee for any month when the investment performance of the Fund for the rolling 36-month period ending with such month is negative. In the event that the Fund s investment performance for such a performance period is less than zero, Royce will not be required to refund to the Fund any fee earned in respect of any prior performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund s Preferred Stock for any month in which the Fund s average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock s dividend rate.

For the six rolling 60-month periods ended June 2008, the investment performance of the Fund exceeded the investment performance of the S&P 600 by 8% to 18%. Accordingly, the investment advisory fee consisted of a Basic Fee of \$6,165,173 and an upward adjustment of \$2,769,965 for performance of the Fund above that of the S&P 600. For the six months ended June 30, 2008, the Fund accrued and paid Royce advisory fees totaling \$8,935,138.

Purchases and Sales of Investment Securities:

For the six months ended June 30, 2008, the cost of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$166,070,505 and \$214,722,026, respectively.

Transactions in Shares of Affiliated Companies:

An [Affiliated Company] as defined in the Investment Company Act of 1940, is a company in which a Fund owns 5% or more of the company]s outstanding voting securities at any time during the period. The Fund effected the following transactions in shares of such companies for the six months ended June 30, 2008:

Affiliated	Shares	Market Value	Cost of		Realized Gain	Dividend	Shares	Market Value
Company								6/30/08
