SEMIANNUAL REVIEW AND REPORT TO STOCKHOLDERS

Royce Value Trust

Royce Micro-Cap Trust

Royce Focus Trust

A Few Words on Closed-End Funds

Royce & Associates, LLC manages three closed-end funds: Royce Value Trust, the first small-cap value closed-end fund offering; Royce Micro-Cap Trust, the only micro-cap closed-end fund; and Royce Focus Trust, a closed-end fund that invests in a limited number of primarily small-cap companies.

A closed-end fund is an investment company whose shares are listed and traded on a stock exchange. Like all investment companies, including open-end mutual funds, the assets of a closed-end fund are professionally managed in accordance with the investment objectives and policies approved by the Fund's Board of Directors. A closed-end fund raises cash for investment by issuing a fixed number of shares through initial and other public offerings that may include shelf offerings and periodic rights offerings. Proceeds from the offerings are invested in an actively managed portfolio of securities. Investors wanting to buy or sell shares of a publicly traded closed-end fund after the offerings must do so on a stock exchange, as with any publicly traded stock. This is in contrast to open-end mutual funds, in which the fund sells and redeems its shares on a continuous basis.

A Closed-End Fund Offers Several Distinct Advantages Not Available From an Open-End Fund Structure

Since a closed-end fund does not issue redeemable securities or offer its securities on a continuous basis, it does not need to liquidate securities or hold uninvested assets to meet investor demands for cash redemptions, as an open-end fund must.

In a closed-end fund, not having to meet investor redemption requests or invest at inopportune times is ideal for value managers who attempt to buy stocks when prices are depressed and sell securities when prices are high.

A closed-end fund may invest more freely in less liquid portfolio securities because it is not subject to potential stockholder redemption demands. This is particularly beneficial for Royce-managed closed-end funds, which invest in small- and micro-cap securities.

The fixed capital structure allows permanent leverage to be employed as a means to enhance capital appreciation potential.

Unlike Royce's open-end funds, our closed-end funds are able to distribute capital gains on a quarterly basis. Each of the Funds has adopted a quarterly distribution policy for its common stock. Please see page 16-18 for more details.

We believe that the closed-end fund structure is very suitable for the long-term investor who understands the benefits of a stable pool of capital.

Why Dividend Reinvestment Is Important

A very important component of an investor's total return comes from the reinvestment of distributions. By reinvesting distributions, our investors can maintain an undiluted investment in a Fund. To get a fair idea of the impact of reinvested distributions, please see the charts on pages 11, 13 and 15. For additional information on the Funds' Distribution Reinvestment and Cash Purchase Options and the benefits for stockholders, please see page 18 or visit our website at www.roycefunds.com.

For nearly 40 years, we have used a value approach to invest in small-cap securities. We focus primarily on the quality of a company's balance sheet, its ability to generate free cash flow and other measures of profitability or sound financial condition. We then use these factors to assess the company's current worth, basing the assessment on either what we believe a knowledgeable buyer might pay to acquire the entire company, or what we think the value of the company should be in the stock market.

Important Performance and Risk Information

All performance information in this *Review and Report* reflects past performance, is presented on a total return basis and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Investment return and principal value of an investment will fluctuate, so that shares may be worth more or less than their original cost when sold. Current performance may be higher or lower than performance quoted. Current month-end performance may be obtained at www.roycefunds.com. Investments in securities of micro-cap, small-cap and/or mid-cap companies may involve considerably more risk than investments in securities of larger-cap companies. The Russell 2000 Index is an unmanaged capitalization-weighted index of domestic small-cap stocks. The Russell 2500 is an index of 2,500 smallest publicly traded U.S. companies in the Russell 3000 Index.

Letter to Our Stockholders

I Read the News Today, Oh Boy.

Another dismal summer has dawned with spring having brought a wave of worries back to the market for the third consecutive year. Karl Marx – as canny an observer of the global scene as he was a checkered prognosticator of its future – wrote in 1852 that all events in history occur twice: the first time as tragedy, the second as farce. Allowing for the accuracy of this observation, what are we then to make of this third round of wobbly recovery, sluggish markets, panic-stuffed headlines, and the by now reflexive anxiety about the potential horrors of European debt for the world economy? What lies beyond farce, other than lousy returns, high correlation, and growing numbers of investors disenchanted with equities? To this kind of question, too many investors have no answer, having lost not only their belief in the viability of investing in stocks, but also in the prospects for the global economy.

Indeed, one unfortunate result of the contagion of uncertainty has been the erosion of confidence in the ability of equities to deliver returns that will beat inflation and build wealth over the long term. On May 7, a *USA Today* headline asked and answered, “Invest in stocks? Forget About It.” It was not quite as damning as the now infamous *Business Week* cover from August 1979 that proclaimed “The Death of Equities,” but the overall message was not much happier: “Wall Street’s long-running story about how stocks are the best way to build wealth seems tired, dated and less believable to many individual investors.” And the *USA Today* piece was published early in May, just before the current bear bit down most sharply. **The implicit assumption that the best days for the stock market may be (way) behind it seems to us to be the distinguishing feature of this third round of poor results for most equities. Panic has given way to a shrug of resignation.** This stance sees equity investing as a mug’s game, even if the alternatives – Treasuries, bonds, money markets, etc. – are not much more attractive or profitable.

Our collective experience tells us that this highly volatile, tightly correlated, range-bound market will be remembered as being as anomalous as it has been painful, one that tends to occur once or twice a century. It does not, in our view, change the fact that stocks remain the single best way of building wealth over the long run.

Charles M. Royce, President

We have often stressed the importance of capital preservation in asset management, arguing that not losing money is as critical as making it grow. Implicit in this belief is the idea that capital preservation is mostly synonymous with preserving purchasing power. However, we now find ourselves in a very non-traditional investment environment, an age marked by near-zero interest rates; regular, short-term bursts of volatility for equities; and relentless money printing on the part of the developed world's central banks.

While this has not altered our view of the significance of risk aversion, it has led us to ask if at this moment in history capital preservation and preservation of purchasing power should be defined differently. The answer approaches what we think is one of the most underappreciated risks to which investors are now subject: the potential for meaningful loss in the future purchasing power of investments. With so much attention being paid to preservation of capital, too little has been placed on what that capital, once returned, will actually be worth.

Continued on page 6...

Letter to Our Stockholders

Such a belief—as ultimately wrong-headed as we think it is—has the advantage that recent history, as far back as five years, is on its side. With a few exceptions, there is simply not much of a defense for equity investing as a whole since the respective index peaks in 2007. The explanation for why the market has been so troublesome and unprofitable seems simple: The world is still emerging from the most serious economic crisis since the Great Depression. Yet this account may be in equal parts true and unhelpful, at least to anyone who had been looking for a way to safely and effectively grow capital during the last few years, which helps to explain why panic and resignation are symptoms of the same fatalism that has gripped investors since the early days of the mortgage and banking crisis in 2008.

We understand the pessimism and the unwillingness to take risks on the part of so many investors today. **At the same time, we still see many of the same positive signs that have been inspiring our confidence about stocks and the economy as a whole since the spring of 2010. By taking the long view (a common perspective for us), we can offer, in addition to a *Nostra Culpa* for much recent fund performance, the benefit of nearly 40 years of small-cap value investing.** Our collective experience tells us that this highly volatile, tightly correlated, range-bound market will be remembered as being as anomalous as it has been painful, one that tends to occur once or twice a century. It does not, in our view, change the fact that stocks remain the single best way of building wealth over the long run. We know that in the current environment these words may sound hollow or even self-serving. We are more than willing to assume that risk in the hope that investors will

continue to look to equities (and to our portfolios) as effective and ultimately successful ways to invest in the years to come.

They've Been Going in and out of Style

The kind of dynamic rally that ushered out the first half of 2012 is always guaranteed to raise a smile, even if it could not completely erase earlier losses in the second quarter, losses that spoiled a promising upswing that lasted through most of the year's opening quarter. Indeed, lack of direction has arguably been the most distinguishing characteristic of the recent market. Still, the major U.S. indexes finished the year-to-date period ended June 30, 2012 in decent condition, as did their overseas counterparts. Domestic small-caps brought up the rear. **The Russell 2000 Index was up 8.5% in the first half, compared to respective gains of 9.4% and 9.5% for the large-cap Russell 1000 and S&P 500 Indexes and an electrifying 12.7% for the Nasdaq Composite.**

It was an interesting road for each index. The first quarter extended a rally that began following the October 2011 lows. Small-cap trailed, though its 12.4% gain was its best opening quarter since 2006. It was also not far behind its large-cap counterparts. The Russell 1000 rose 12.9%, and the S&P 500 gained 12.6%. The Nasdaq was especially impressive, notching an 18.7% increase for the quarter. We were among those hopeful souls who saw a nearly six-month bull run and thought that maybe the market was ready for some consistent recovery. Yet April and May were cruel months, the latter especially so, as the now-traditional spring downturn caused by concerns about European debt and the state of the American and Chinese economies spoiled the party and tamped down returns. (If not for the rally on the final trading day of June, that month

would also have been less solidly in the black.) That rally was welcome they always are but second-quarter returns were still negative. The Nasdaq led on the downside, falling 5.1%, while the Russell 2000 slipped 3.5%. Large-caps held their value a bit better, with the Russell 1000 losing 3.1% and the S&P 500 declining 2.8%. So the first half concluded with a bang, but still left investors whimpering about the future.

Looking at longer-term returns, this uncertainty has been well-earned. While three- and 10-year average annual total returns for the major indexes were solid-to-strong, one-, five-, and 12-year results for the periods ended June 30, 2012 were generally poor. The 12-year period not a period that we, or anyone else, usually discusses is instructive because it encompasses the Internet Bubble, the subsequent recovery, the recession that was followed by the financial crisis, and the market's herky-jerky, volatile aftermath. So we think it is worth pointing out that for the 12-year period ended December 31, 2011, the average annual total return for the S&P 500 was its lowest since the end of World War II (beginning with the period from the end of 1945 through the end of 1957). Small-cap returns for that same period ended December 31, 2011 for the Russell 2000 and the CRSP 6-10, a small-cap proxy that dates back to the 1920s, were among the worst for both since the launch of the Russell 2000 on December 31, 1978 and since the end of 1945 for the CRSP 6-10.

Recent performance for the two non-U.S. indexes that we track followed patterns similar to their domestic cousins, though with more muted results. This was not entirely surprising considering both Europe's ongoing travails and worries about the pace of growth in China. **Non-U.S. small-caps enjoyed an advantage over their large-cap siblings, with the Russell Global ex-U.S. Small Cap up 4.8% for the year-to-date period ended June 30, 2012 versus a 2.7% gain for the Russell Global ex-U.S. Large Cap Index.** Both indexes enjoyed strong first-quarter results. The Russell Global ex-U.S. Small Cap Index rose 14.4%, and the Russell Global ex-U.S. Large Cap Index was up 11.5% in the first three months of 2012. Each index's second quarter was far more difficult, as Europe's troubles registered more dramatically outside the U.S. Small-cap lost a bit more in the downturn, with the Russell Global ex-U.S. Small Cap Index falling 8.5%, while the Russell Global ex-U.S. Large Cap Index was down 7.9%.

U.S. mid-caps performed well on an absolute basis, though they were behind the domestic micro-cap, small-cap, and large-cap indexes in the first half. The Russell Midcap Index gained 8.0% through the end of June. Like the domestic indexes, they enjoyed a strong first quarter, up 12.9%, before slipping in the second quarter with a loss of 4.4%. **Considering both the significant volatility and the unpopularity of stocks, the strength of micro-cap stocks was something of a surprise in the first half. Year-to-date through June 30, 2012, the Russell Microcap Index gained an impressive 13.0%.** That the index accomplished this feat with stronger and steadier quarterly performances was equally notable: the Russell Microcap climbed 15.3% in the first quarter and fell only 2.0% in the bearish second.

Our expectation is for a less extreme, more historically normal phase, without so many of the stomach-churning drops followed by equally steep upticks that we saw last summer and fall and have seen so far in 2012. It is worth noting that a more historically normal range is one in which we think our funds can generate strong absolute and relative performance over the long run.

For more than three decades, an investment vehicle provided highly consistent returns with such low volatility that they were nearly devoid of risk U.S. government bonds, specifically Treasury securities. They were the instruments that possessed that highly desired standard, the risk-free rate of return. The currently volatile investment climate has greatly expanded the appeal of this designation. Investors trying to cope with the economic uncertainty and asset-price volatility caused by the bursting credit bubble have grown increasingly sensitive to the possibilities of capital loss.

Yet if history is any proxy and we believe that it is a healthy degree of skepticism should greet the notion that Treasuries remain risk free or provide an acceptable rate of return. If nothing else, the lens through which we see them needs to be adjusted to include the growing uncertainty of ultimate purchasing power (of real goods and services) of the currency in which they are denominated. This risk, one for which we have a healthy respect over the intermediate term, is the ominous combination of ongoing currency debasement and acceleration in inflationary pressures. These could erode the purchasing power of non-productive assets. Central banks around the world, with the U.S. Federal Reserve a primary contributor, have been pumping liquidity into the capital markets through a combination of historically low interest rates and quantitative easing or, more simply stated, money printing.

Continued on page 8...

Letter to Our Stockholders

The Act You've Known for all these Years...

If only our own portfolios had done as well. On an absolute basis, our three closed-end funds posted results that ranged from uninspiring to strong in the first half, but relative performance was a more significant issue. Normally, this does not trouble us. Long ago, we accepted that our disciplined approaches to stock selection would result in out-of-sync moments against our portfolios' respective benchmarks. **Our goal has always been strong absolute performance over long-term periods. If we met that standard, then relative results would most likely not be an issue, at least over long-term time spans. We have also been glad to accept the historical trade-off in which underperformance was more**

common for our Funds during short-term periods of 18 months or less, while outperformance was more typical over full market cycle and other long-term periods of three years or more. For too many time periods ended June 30, 2012, however, that history has become too exclusively long-term, even for us, with strong relative and absolute results coming only in periods of 10 years or longer. Three-year results were fine on an absolute basis, but trailed on a relative score, while the five-year returns were disappointing on both an absolute and relative basis. With significant investments in all three closed-end portfolios, we share our investors' frustrations with recent results.

2012 NAV YEAR-TO-DATE TOTAL RETURNS FOR THE ROYCE FUNDS VS. RUSSELL 2000 AND THE RUSSELL 2500 as of 6/30/12

Those areas of the market in which we have seen both high quality and compelling valuations during the last three-to-five years—energy and mining companies, in particular—were among the worst performers in the first half, with net losses in some cases stretching back even further. Many of these stocks remain in our portfolios, as their attractive valuations and our ongoing high regard have combined to keep turnover low. In many cases, we have been building or at least maintaining positions in those businesses in which we have the highest conviction. **As has been our practice since the 1970s, we are keeping our focus on company fundamentals. We seek companies that look capable of surviving adversity.**

and flourishing when their fortunes change. Those that generate free cash via high returns on capital can give investors a return in the form of dividends, take advantage of their low valuation by buying back stock, or make acquisitions to grow their business when organic growth is harder to come by. Strong fundamentals mean these companies have the necessary tools to make it through difficult periods and emerge stronger. While many of our recent efforts have not been successful, nothing about the way that we select stocks has changed, including our insistence on rock-solid fundamentals in the companies that we choose. Selectiveness, patience, and discipline remain our watchwords.

Getting Better

We do not know how much longer markets and economies will remain so uncertain. The fiscal turmoil that continues to haunt Europe has been hampering equity markets across the globe and contributing to the tight range of returns that have nonetheless demonstrated ample levels of volatility. The fragile recovery here in the U.S. has also played a role, as has the recent deceleration of the Chinese economy. These major macro events, which have been the dominant influence on investors' behavior over the last three years, largely account for why stocks have struggled to create any direction for longer than a few months. Instead, markets have been mired in a pattern of short-term swings in which they have moved straight up or straight down, and for no longer than a few months at a time.

One consequence of this closely correlated, range-bound cycle is that our Funds have not had the time to create the spread that we would usually seek to build through a full market cycle. However, we think that as Europe meets its challenges and as the U.S. begins to get its own fiscal house in order, which is not likely to happen until after the election, we will escape this range and move toward a more lasting upswing. Our expectation is for a less extreme, more historically normal phase, without so many of the stomach-churning drops followed by equally steep upticks that we saw last summer and fall and have seen so far in 2012. It is worth noting that a more historically normal range is one in which we think our Funds can generate strong absolute and relative performance over the long run. We would like to think that long-term history is on our side in this assessment.

Through all manner of markets many of which were thought to establish a New Normal we have never wavered in our convictions. We still believe that equities remain the best way maybe the only way to beat inflation and build wealth over the long term.

Good Morning, Good Morning

Obviously, we would all like to reach a more hospitable market climate soon. As always, patience is critical. Indeed, the ability to be patient is probably the single most important quality that an investor who seeks strong long-term returns can possess. It is easy to talk about the importance of patience and discipline when markets are solid and portfolios are doing well. Yet at some point, these things will change, and both will be tested, as they have been in this market. It has been a very difficult time, but we believe it will pass. When it does, our disciplined approach will remain and, we believe, be effective.

Headline inflation numbers have remained subdued due to the continuing struggles in the labor market and stubbornly weak housing markets, but commodity inflation has been on the rise. With the recent uptick in U.S. leading economic indicators and encouraging signs of stability and improvement in the housing market, it would not take much to see a more broad-based uptick in inflation.

So while U.S. government bonds are likely to continue to pay their meager coupons and return principal on schedule, the value of what is being returned to investors will be declining. For the first time in almost 30 years, we think that investors risk meaningful losses in that portion of their investment portfolio they deem to be the safest.

Commodities offer one possible way to protect against the loss of purchasing power caused by currency debasement. Unsurprisingly, however, we prefer assets that are inherently productive and flexible and can adjust quickly to changing pricing environments. To us, investments in quality companies that possess embedded pricing power and high returns on their invested capital look to be some of the best investments to protect, and grow, purchasing power. We believe they need much broader representation in investors' asset allocation.

Letter to Our Stockholders

As we approach our 40th anniversary as a firm this coming November, we look back at what we have seen the Nifty Fifty market of the 70s, Black Friday in the 80s, the first stirrings of the Internet boom in the 90s, the horrific events of 9/11, our current era of uncertainty, and much, much more. Through all manner of markets many of which were thought to establish a New Normal we have never wavered in our convictions. We still believe that equities remain the best way maybe the only way to beat inflation and build wealth over the long term. (We also think that equities are capable of beating the fixed income markets over the next five years.) **Our guess is that stocks can deliver returns in the mid- to upper-single digits, which we think would be respectable on an absolute basis and, equally important, higher than the rate of inflation. When things are working well, the underlying parts of an equity portfolio, the companies themselves, can act as compounding machines compounding book value.** We are confident that we can create portfolios that can grow commendably, especially in the more historically typical market climate that we believe we will eventually see.

Sincerely,

| | | |

Manager's Discussion

Difficulties continued for Royce Value Trust (RVT) in the first half. **The Fund gained 4.1% on an NAV (net asset value) basis and 4.5% on a market price basis for the year-to-date period ended June 30, 2012, in both cases trailing its unleveraged small-cap benchmarks, the Russell 2000 Index, which gained 8.5%, and the S&P SmallCap 600 Index, which rose 8.0%, for the same period.** So while RVT's semiannual performance was solid on an absolute basis, it was disappointing on a relative score. Our dissatisfaction with the portfolio's first-half showing was exacerbated by the fact that, combined with a poor showing compared to its benchmarks in 2011, it was a factor in erasing once-pronounced relative advantages, especially on an NAV basis, for several intermediate- and long-term periods, to say nothing of the deleterious effect it had on absolute results for the same periods.

During the more bullish first quarter, all was well. The Fund gained 13.9% on an NAV basis and 14.7% on a market price basis for the quarter, in both cases ahead of its small-cap benchmarks, the Russell 2000 Index (+12.4%), and the S&P SmallCap 600 (+12.0%). This advantage proved as short-lived as the rally that helped to produce it. A recurring wave of worry about European debt, decelerating growth in China, and the pace of economic recovery here in the U.S. conspired to throw the bull off course following the first-half small-cap high on March 26. The result was a dismal second quarter that featured a brutal May, though it was admittedly a worse month for RVT (down 9.7% on an NAV basis) than it was for the small-cap indexes. For the second quarter as a whole, RVT fell 8.6% on an NAV basis and 8.9% based on its market price, behind both the Russell 2000, which declined 3.5%, and the S&P SmallCap 600, which lost 3.6%.

As mentioned, current intermediate- and long-term results were not much better until one goes back 15 years or longer. Market cycle results were also underwhelming, though the Fund did remain ahead of both benchmarks on an NAV and market price basis from the small-cap bottom on March 9, 2009 through June 30, 2012. During this period, RVT gained 159.0% on an NAV basis and 176.1% on a market price basis versus respective gains of 143.4% and 155.0% for the Russell 2000 and S&P SmallCap 600 Indexes. On an NAV basis, the Fund outpaced each benchmark for the 15-, 25-year, and since inception (11/26/86) periods ended June 30, 2012. (RVT was also ahead of the Russell 2000 for the 20-year span on an NAV and market price basis.) **The Fund's NAV average annual total return since inception was 10.1%.**

¹ Includes dividends**Important Performance and Risk Information**

All performance information reflects past performance, is presented on a total return basis and reflects the reinvestment of distributions. Past performance is no guarantee of future results. Current performance may be higher or lower than performance quoted. Returns as of the most recent month-end may be obtained at www.roycefunds.com. The market price of the Fund's shares will fluctuate, so that shares may be worth more or less than their original cost when sold. The Fund invests primarily in securities of small- and micro-cap companies, which may involve considerably more risk than investing in a more diversified portfolio of larger-cap companies. Regarding the two Good Ideas tables shown above, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's year-to-date performance for 2012.

Performance and Portfolio Review

Three equity sectors—Financials, Health Care, and Information Technology—posted solid net gains in the first half, while four others made smaller contributions. Three sectors detracted from performance, though only Energy posted net losses beyond a modest measure. At the individual company level, the largest net losses were clustered mostly in the otherwise-solid Industrials and Information Technology sectors. Shares of PMFG, a business we have owned since 1990, fell more than 70% between early February and the end of June, mostly driven by the issuing of a secondary offering priced at a sizable discount to its stock. As a manufacturer of custom products primarily for the natural gas industry, the company was also adversely affected by declining energy prices in the second quarter. Fond of its growing business and attractive valuation, we increased our stake in the first half. We were similarly optimistic about the long-term prospects for old favorite and top-ten position Coherent. The company makes precision optics and other laser-based products. An earnings miss for its fiscal second quarter was announced in April, which kept its share price on a downward trajectory for the remainder of the first half. Although the company faces increased competition from fiber-optic laser makers, we like its long history of business success and potential to rebound. Sapient Corporation is a top-25 holding that specializes in tech-based management consulting services. Its share price was trending downward in a slow but not alarming fashion until the company announced disappointing quarterly results in early May. Higher operating costs ate into revenues and earnings, prompting investors to flee.

RVT's two largest holdings at the end of June were also its two biggest contributors to first-half returns. The share price of Carter's suffered when cotton prices were on the rise and began to grow in the first quarter when the cost of cotton declined. The company, which markets branded children's wear, then reaped the benefit of investors cottoning to its growing revenues and solid financials. The Fund's top gainer in 2011, The Advisory Board, offers programs, services, and software focused on best practices research services while also providing management and advisory services. Strong execution and innovative technology, bolstered by growing revenues and steady earnings, appeared to boost the health of its stock price through the first half.

Manager's Discussion

The diversified portfolio of Royce Micro-Cap Trust (RMT) was up 6.5% on an NAV (net asset value) basis and 4.7% on a market price basis for the year-to-date period ended June 30, 2012 compared to gains of 8.5% for its unleveraged benchmark, the Russell 2000 Index, and 13.0% for the unleveraged Russell Microcap Index for the same period. Following the rally that began off the most recent small-cap low on October 3, 2011, the Fund lagged in the bullish first quarter. For the quarter, the Fund rose 11.4% on an NAV basis and 8.8% on a market price basis, compared to a 12.4% increase for its benchmark and a gain of 15.3% for the microcap index.

The rally slackened after small-caps reached a first-half high on March 26, only to be thrown off course for the third straight year by the same three worries – sovereign debt in Europe and the pace of economic growth in the U.S. and China. These anxieties drove share prices down through most of the second quarter, with May seeing the largest losses. RMT fell 4.4% on an NAV basis and 3.8% based on its market price in the second quarter. That same period saw the Russell 2000 down 3.5%, while the Russell Microcap lost 2.0%. Three consecutive quarters of relative underperformance have eroded some of the portfolio's recent market cycle advantage, though RMT remained ahead of both indexes from the last small-cap low on March 9, 2009 through June 30, 2012, up 170.2% on an NAV basis and 189.1% on a market price basis. During the same period, the Russell 2000 was up 143.4%, and the Russell Microcap rose 145.7%. For the periods ended June 30, 2012, RMT outpaced the micro-cap index (for which data only goes back to 2000) on an NAV basis for the five- and 10-year periods. On an NAV basis, the Fund also outperformed the Russell 2000 for the 10-, 15-year and since inception (12/14/93) periods ended June 30, 2012. **The Fund's NAV average annual total return since inception was 10.1%.**

Correlation and a relatively narrow performance range have hindered recent results for equities in general, but RMT's poor relative performance had less to do with those phenomena and more to do with two other factors. First, two areas that helped to drive the terrific results for the Russell Microcap Index during the first half were areas that the Fund has avoided through its long history: utilities, banks, and REITs (real estate investment trusts). Utilities by and large fail to meet our disciplined value criteria. Many bank stocks were beaten down to very low valuations during late 2008 and early 2009, but the lack of balance sheet strength and other fundamental factors led us to avoid making any significant investments in the industry. Similarly, REITs often boast attractive yields, which was a key driver of first-half results, but do not offer much else in the way of strong business fundamentals, so we have

Regarding the two Good Ideas tables shown above, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's year-to-date performance for 2012.

Performance and Portfolio Review

generally stayed away. A more important reason is that many of those companies in which we have been seeing attractive valuations and excellent potential over the last year fell further out of favor in a market that has been largely indifferent to quality and uninterested in those sectors in which we have seen the most compelling bargains.

Energy was the only equity sector that detracted from first-half results, though its net losses were slight. Financials led portfolio contributors by a wide margin. The sector was boosted by strong results from holdings in the real estate management & development group, capital markets stocks, insurance companies, and commercial banks. Kennedy-Wilson Holdings, RMT's largest position on June 30, manages and invests in real estate in the U.S. and Japan. As banks continue to shed troubled real estate from their portfolios, the company has been acting in our view like a value investor, taking on low-priced properties and waiting for a rebound. While its stock price was volatile during the first half, the company ended the half on a high note. In May, we finished selling our shares of women's apparel retailer Charming Shoppes shortly after the announcement of its acquisition by Ascena Retail Group (a stock that we own in other Royce-managed portfolios). We first bought shares of Charming Shoppes in RMT's portfolio in 2003 and repurchased shares in 2008.

Shares of PMFG, a business we have owned since 1994, plummeted more than 70% between early February and the end of June, mostly driven by the issuing of a secondary offering priced at a sizable discount to its stock. As a manufacturer of custom products primarily for the natural gas industry, the company was also adversely affected by declining energy prices in the second quarter. Fond of its growing business and attractive valuation, we increased our stake in the first half. Sapien Corporation is a top-10 holding that specializes in tech-based management consulting services. Its share price was trending downward in a slow but not alarming fashion until the company announced disappointing quarterly results in early May. Higher operating costs ate into revenues and earnings, prompting investors to flee, though we were content to hold a good-sized position.

Manager's Discussion

Although correlation has been the order of the day for most stocks recently, the limited portfolio of Royce Focus Trust (FUND) proved an unhappy exception to the rule in the first half. **The Fund was down 0.1% on an NAV (net asset value) basis and gained 2.7% on a market price basis,**

in each case trailing both its new unleveraged benchmark, the Russell 2500 Index, which climbed 8.3%, and the small-cap Russell 2000 Index, which was up 8.5%, for the same period.

Coming in the aftermath of a dismal performance in 2011, these were disappointing results on both an absolute and relative basis.

The year began with a continuation of the rally that began off the small-cap low on October 3, 2011, making the first quarter of 2012 a highly rewarding one for stocks across asset classes and around the globe. FUND gained 11.0% on an NAV basis and 12.0% on a market price basis in the first quarter. While this was a strong absolute showing, the Fund trailed both the Russell 2500, which was up 13.0%, and the Russell 2000, which rose 12.4%. Coupled with improving U.S. economic numbers, we were cheered by these strong quarterly results, thinking that both the market and economy were establishing more lasting and positive directions.

However, spring brought a spate of negative news centered on European debt, concerns over the pace and strength of the U.S. recovery, and fears of decelerating growth in China for the third consecutive year. The effects on share prices were slightly less damaging than what they were in 2010 and 2011, but negative all the same. There was also the unfortunate reality that many more economically sensitive areas of the stock market including energy and materials companies were among the hardest hit in the first half. These are the sectors in which we have been seeing especially compelling valuations in what we deem to be high-quality businesses, so their punishment by investors led to a significant second-quarter tailspin for the portfolio, which declined 10.0% on an NAV basis and 8.3% on a market price basis from the beginning of April through the end of June. FUND's investments in non-U.S. companies also made an outsized contribution to its second-quarter loss. During the same period, the Fund's new benchmark lost 4.1%, and the Russell 2000 fell 3.5%.

Market cycle and long-term results were better, though for periods ended June 30, 2012 the long term means going back 10 years or more. During the most recent full market cycle period from the previous small-cap peak on July 13, 2007 through the small-cap peak on April 29, 2011 the Fund gained 10.2% on an NAV basis versus 9.2% for its new benchmark and 6.6% for the Russell 2000. On both an NAV and market price basis, FUND outperformed the Russell 2500 and the Russell 2000 for the 10-, 15-year, and since inception of our management (11/1/96) periods ended June 30, 2012. **The Fund's NAV average annual total return since inception was 9.6%.**

Regarding the two Good Ideas tables shown above, the sum of all contributors to, and all detractors from, performance for all securities in the portfolio would approximate the Fund's year-to-date performance for 2012.

Performance and Portfolio Review

Information Technology and Financials led all sectors in net gains for the period. Top contributor Veeco Instruments was one of 2011's largest detractors, and its then-declining share price led us to re-initiate and then bolster our position in the second half of last year. The company manufactures equipment used to make high brightness light emitting diodes (HB LEDs), solar panels, hard-disk drives, and other devices. The combination of its strong balance sheet and high-growth potential businesses first drew us to the company. Its shares began to rebound in 2012 on signs that MOCVD – a key piece of equipment used to make LEDs – had bottomed. The company has been gaining market share, LED manufacturer utilization rates have been improving, and there is a growing tailwind for the early adoption phase of LEDs into the \$100 billion general lighting market. We think these events have all set the stage for second-half momentum and renewed sales and profit growth in 2013. Apple continues to be the favorite of many investors otherwise disinclined to buy stocks. Its towering success with such ubiquitous devices as the iPad and iPhone makes it easy to see why. After adding shares in January, we took some gains in April.

The Energy and Materials sectors detracted most from first-half results. A growing business, talented management, and a pristine balance sheet helped to draw us to Trican Well Service, which we first purchased in the portfolio in 2004. The company provides specialized equipment and services for drilling, completion, and reworking oil and gas wells. Confident in its long-term prospects and secure in the belief that the market was punishing it disproportionately, we were happy to hold a good-sized position at the end of the period. We have also owned shares of steel and scrap metal recycler Schnitzer Steel Industries since 2004. Demand for recycled metals slackened amid the slow pace of growth in the U.S. Along with lower-than-normal spring scrap flows and margins compressed from increases in raw materials and transport costs, this helped keep investors selling, while we continued to hold our shares in anticipation of a rebound in industrial activity that should help to spark demand.

History Since Inception

The following table details the share accumulations by an initial investor in the Funds who reinvested all distributions and participated fully in primary subscriptions for each of the rights offerings. Full participation in distribution reinvestments and rights offerings can maximize the returns available to a long-term investor. This table should be read in conjunction with the Performance and Portfolio Reviews of the Funds.

¹ The purchase price used for annual distribution totals is a weighted average of the distribution reinvestment prices for the year.

² Other than for initial purchase, values are stated as of December 31 of the year indicated, after reinvestment of distributions.

³ Includes a return of capital.

Distribution Reinvestment and Cash Purchase Options

Why should I reinvest my distributions?

By reinvesting distributions, a stockholder can maintain an undiluted investment in the Fund. The regular reinvestment of distributions has a significant impact on stockholder returns. In contrast, the stockholder who takes distributions in cash is penalized when shares are issued below net asset value to other stockholders.

How does the reinvestment of distributions from the Royce closed-end funds work?

The Funds automatically issue shares in payment of distributions unless you indicate otherwise. The shares are generally issued at the lower of the market price or net asset value on the valuation date.

How does this apply to registered stockholders?

If your shares are registered directly with a Fund, your distributions are automatically reinvested unless you have otherwise instructed the Funds' transfer agent, Computershare, in writing. A registered stockholder also has the option to receive the distribution in the form of a stock certificate or in cash if Computershare is properly notified.

What if my shares are held by a brokerage firm or a bank?

If your shares are held by a brokerage firm, bank, or other intermediary as the stockholder of record, you should contact your brokerage firm or bank to be certain that it is automatically reinvesting distributions on your behalf. If they are unable to reinvest distributions on your behalf, you should have your shares registered in your name in order to participate.

What other features are available for registered stockholders?

The Distribution Reinvestment and Cash Purchase Plans also allow registered stockholders to make optional cash purchases of shares of a Fund's common stock directly through Computershare on a monthly basis, and to deposit certificates representing your Fund shares with Computershare for safekeeping. The Funds' investment adviser is absorbing all commissions on optional cash purchases under the Plans through December 31, 2012.

How do the Plans work for registered stockholders?

Computershare maintains the accounts for registered stockholders in the Plans and sends written confirmation of all transactions in the account. Shares in the account of each participant will be held by Computershare in non-certificated form in the name of the participant, and each participant will be able to vote those shares at a stockholder meeting or by proxy. A participant may also send other stock certificates held by them to Computershare to be held in non-certificated form. There is no service fee charged to participants for reinvesting distributions. If a participant elects to sell shares from a Plan account, Computershare will deduct a \$2.50 fee plus brokerage commissions from the sale transaction. If a nominee is the registered owner of your shares, the nominee will maintain the accounts on your behalf.

How can I get more information on the Plans?

You can call an Investor Services Representative at (800) 221-4268 or you can request a copy of the Plan for your Fund from Computershare. All correspondence (including notifications) should be directed to: [Name of Fund] Distribution Reinvestment and Cash Purchase Plan, c/o Computershare, PO Box 43010, Providence, RI 02940-3010, telephone (800) 426-5523.

New additions in 2012.

¹ All or a portion of these securities were on loan at June 30, 2012. Total market value of loaned securities at June 30, 2012, was \$34,221,501.

² Non-income producing.

³ Securities for which market quotations are not readily available represent 0.2% of net assets. These securities have been valued at their fair value under procedures approved by the Fund's Board of Directors. These securities are defined as Level 3 securities due to the use of significant unobservable inputs in the determination of fair value. See Notes to Financial Statements.

⁴ These securities are defined as Level 2 securities due to fair value being based on quoted prices for similar securities. See Notes to Financial Statements.

⁵ At June 30, 2012, the Fund owned 5% or more of the Company's outstanding voting securities thereby making the Company an Affiliated Company as that term is defined in the Investment Company Act of 1940. See Notes to Financial Statements.

⁶ Includes securities first acquired in 2012 and less than 1% of net assets applicable to Common Stockholders.

Bold indicates the Fund's 20 largest equity holdings in terms of June 30, 2012, market value.

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$1,050,543,499. At June 30, 2012, net unrealized appreciation for all securities was \$175,522,224, consisting of aggregate gross unrealized appreciation of \$302,938,768 and aggregate gross unrealized depreciation of \$127,416,544. The primary difference between book and tax basis cost is the timing of the recognition of losses on securities sold.

¹ To be allocated to net investment income, net realized gains and/or return of capital at year end.

² The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund's Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund's net asset value is used on the purchase and sale dates instead of market value.

³ Not annualized

⁴ The investment advisory fee is calculated based on average net assets over a rolling 60-month basis, while the above ratios of investment advisory fee expenses are based on the average net assets applicable to Common Stockholders over a 12-month basis.

⁵ Annualized

⁶ Expense ratios based on total average net assets including liquidation value of Preferred Stock were 0.56%, 0.82%, 0.18%, 0.12%, 1.13% and 1.17% for the periods ended June 30, 2012, and December 31, 2011, 2010, 2009, 2008 and 2007, respectively.

Stockholders | 29

Royce Value Trust

Notes to Financial Statements (unaudited)

Summary of Significant Accounting Policies:

Royce Value Trust, Inc. (the Fund), was incorporated under the laws of the State of Maryland on July 1, 1986, as a diversified closed-end investment company. The Fund commenced operations on November 26, 1986.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Under the Fund's organizational documents, the officers and directors are indemnified against certain liabilities that may arise out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq's Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund's Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund's investments, as noted above. These inputs are summarized in the three broad levels below:

- Level 1 quoted prices in active markets for identical securities.
- Level 2 other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Level 2 securities with values based on quoted prices for similar securities are noted in the Schedule of Investments.
- Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of June 30, 2012. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

| | Level 1 | Level 2 | Level 3 | Total |
|------------------|----------------|----------------|--------------|------------------|
| Common Stocks | \$ 887,712,798 | \$ 222,567,352 | \$ 1,026,124 | \$ 1,111,306,274 |
| Preferred Stocks | | | 1,331,550 | 1,331,550 |
| Corporate Bonds | | 252,314 | | 252,314 |
| Cash Equivalents | 34,162,585 | 79,013,000 | | 113,175,585 |

Royce Value Trust

Notes to Financial Statements (unaudited) (continued)

Valuation of Investments (continued):

Level 3 Reconciliation:

| | Balance as of 12/31/11 | Purchases | Realized and Unrealized Gain (Loss) ¹ | Balance as of 6/30/12 |
|------------------|------------------------|-----------|---|-----------------------|
| Common Stocks | \$ 1,701,029 | \$17,052 | \$ (691,957) | \$ 1,026,124 |
| Preferred Stocks | 1,278,090 | | 53,460 | 1,331,550 |

¹The net change in unrealized appreciation (depreciation) is included in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized. Net realized gain (loss) from investments and foreign currency transactions is included in the accompanying Statement of Operations.

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

Foreign Currency:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

Securities Lending:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund's securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information.

Distributions:

The Fund pays quarterly distributions on the Fund's Common Stock at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund's Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly and distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income are first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income are allocated to both Preferred and Common Stockholders, the tax character of such allocations is proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax

differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Royce Value Trust

Notes to Financial Statements (unaudited) (continued)

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund's operations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Royce Funds are allocated by Royce & Associates, LLC (Royce) under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors' fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 999,484 and 2,076,969 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2012 and the year ended December 31, 2011, respectively.

At June 30, 2012, 8,800,000 shares of 5.90% Cumulative Preferred Stock were outstanding. The Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets applicable to Common Stockholders) in the accompanying financial statements in accordance with accounting for redeemable equity instruments, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody's, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund's ability to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce receives a fee comprised of a Basic Fee (Basic Fee) and an adjustment to the Basic Fee based on the investment performance of the Fund in relation to the investment record of the S&P SmallCap 600 Index (S&P 600).

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund's month-end net assets applicable to Common Stockholders, plus the liquidation value of Preferred Stock, for the rolling 60-month period ending with such month (the performance period). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the S&P 600 for the performance period by more than two percentage points. The performance period for each such month is a rolling 60-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the S&P 600 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the S&P 600 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

Notwithstanding the foregoing, Royce is not entitled to receive any fee for any month when the investment performance of the Fund for the rolling 36-month period ending with such month is negative. In the event that the Fund's investment performance for such a performance period is less than zero, Royce will not be required to refund to the Fund any fee earned in respect of any prior performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund's Preferred Stock for any month in which the Fund's average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock's dividend rate.

Royce Value Trust

Notes to Financial Statements (unaudited) (continued)

Investment Advisory Agreement (continued):

For the six rolling 60-month periods ended June 2012, the Fund's investment performance ranged from 12% to 19% below the investment performance of the S&P 600. Accordingly, the net investment advisory fee consisted of a Basic Fee of \$5,897,741 and a net downward adjustment of \$2,948,869 for the performance of the Fund relative to that of the S&P 600. Additionally, Royce voluntarily waived a portion of its investment advisory fee (\$25,000) attributable to issues of the Fund's Preferred Stock for those months in which the Fund's average annual NAV total return failed to exceed the applicable Preferred Stock's dividend rate. For the six months ended June 30, 2012, the Fund accrued and paid Royce investment advisory fees totaling \$2,923,872.

Purchases and Sales of Investment Securities:

For the six months ended June 30, 2012, the costs of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$152,181,404 and \$185,889,472, respectively.

Transactions in Affiliated Companies:

An Affiliated Company as defined in the Investment Company Act of 1940, is a company in which a fund owns 5% or more of the company's outstanding voting securities at any time during the period. The Fund effected the following transactions in shares of such companies for the six months ended June 30, 2012:

| Affiliated Company | Shares 12/31/11 | Market Value 12/31/11 | Cost of Purchases | Cost of Sales | Realized Gain (Loss) | Dividend Income | Shares 6/30/12 | Market Value 6/30/12 |
|--------------------|--------------------|--------------------------|----------------------|------------------|-------------------------|--------------------|-------------------|-------------------------|

New additions in 2012.

¹ All or a portion of these securities were on loan at June 30, 2012. Total market value of loaned securities at June 30, 2012, was \$11,927,021.

² Non-income producing.

³ These securities are defined as Level 2 securities due to fair value being based on quoted prices for similar securities. See Notes to Financial Statements.

⁴ Securities for which market quotations are not readily available represent 0.1% of net assets. These securities have been valued at their fair value under procedures approved by the Fund's Board of Directors. These securities are defined as Level 3 securities due to the use of significant unobservable inputs in the determination of fair value. See Notes to Financial Statements.

⁵ At June 30, 2012, the Fund owned 5% or more of the Company's outstanding voting securities thereby making the Company an Affiliated Company as that term is defined in the Investment Company Act of 1940. See Notes to Financial Statements.

⁶ Includes securities first acquired in 2012 and less than 1% of net assets applicable to Common Stockholders.

Bold indicates the Fund's 20 largest equity holdings in terms of June 30, 2012, market value.

TAX INFORMATION: The cost of total investments for Federal income tax purposes was \$302,399,108. At June 30, 2012, net unrealized appreciation for all securities was \$63,431,062, consisting of aggregate gross unrealized appreciation of \$92,492,956 and aggregate gross unrealized depreciation of \$29,061,894. The primary difference between book and tax basis cost is the timing of the recognition of losses on securities sold.

Royce Micro-Cap Trust

Notes to Financial Statements (unaudited)

Summary of Significant Accounting Policies:

Royce Micro-Cap Trust, Inc. (the Fund), was incorporated under the laws of the State of Maryland on September 9, 1993, as a diversified closed-end investment company. The Fund commenced operations on December 14, 1993.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Under the Fund's organizational documents, the officers and directors are indemnified against certain liabilities that may arise out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq's Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund's Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund's investments, as noted above. These inputs are summarized in the three broad levels below:

- Level 1 quoted prices in active markets for identical securities.
- Level 2 other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Level 2 securities with values based on quoted prices for similar securities are noted in the Schedule of Investments.
- Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of June 30, 2012. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

| | Level 1 | Level 2 | Level 3 | Total |
|------------------|----------------|---------------|------------|----------------|
| Common Stocks | \$ 288,966,924 | \$ 31,072,318 | \$ 193,490 | \$ 320,232,732 |
| Preferred Stocks | | 1,163,379 | | 1,163,379 |
| Cash Equivalents | 12,358,059 | 32,076,000 | | 44,434,059 |

Royce Micro-Cap Trust

Notes to Financial Statements (unaudited) (continued)

Valuation of Investments (continued):

Level 3 Reconciliation:

| | Balance as of 12/31/11 | Realized and Unrealized Gain (Loss) ¹ | Balance as of 6/30/12 |
|---------------|------------------------|---|-----------------------|
| Common Stocks | \$347,895 | \$(154,405) | \$193,490 |

¹ The net change in unrealized appreciation (depreciation) is included in the accompanying Statement of Operations. Change in unrealized appreciation (depreciation) includes net unrealized appreciation (depreciation) resulting from changes in investment values during the reporting period and the reversal of previously recorded unrealized appreciation (depreciation) when gains or losses are realized. Net realized gain (loss) from investments and foreign currency transactions is included in the accompanying Statement of Operations.

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

Foreign Currency:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

Securities Lending:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund's securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information.

Distributions:

The Fund pays quarterly distributions on the Fund's Common Stock at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund's Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly and distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income are first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income are allocated to both Preferred and Common Stockholders, the tax character of such allocations is proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net

short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Royce Micro-Cap Trust

Notes to Financial Statements (unaudited) (continued)

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund's operations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Royce Funds are allocated by Royce & Associates, LLC ("Royce") under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors' fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 395,771 and 881,817 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2012, and the year ended December 31, 2011, respectively.

At June 30, 2012, 2,400,000 shares of 6.00% Cumulative Preferred Stock were outstanding. The Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets applicable to Common Stockholders) in the accompanying financial statements in accordance with accounting for redeemable equity instruments, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody's, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund's ability to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock.

Investment Advisory Agreement:

As compensation for its services under the Investment Advisory Agreement, Royce receives a fee comprised of a Basic Fee ("Basic Fee") and an adjustment to the Basic Fee based on the investment performance of the Fund in relation to the investment record of the Russell 2000.

The Basic Fee is a monthly fee equal to 1/12 of 1% (1% on an annualized basis) of the average of the Fund's month-end net assets applicable to Common Stockholders, plus the liquidation value of Preferred Stock, for the rolling 36-month period ending with such month (the "performance period"). The Basic Fee for each month is increased or decreased at the rate of 1/12 of .05% for each percentage point that the investment performance of the Fund exceeds, or is exceeded by, the percentage change in the investment record of the Russell 2000 for the performance period by more than two percentage points. The performance period for each such month is a rolling 36-month period ending with such month. The maximum increase or decrease in the Basic Fee for any month may not exceed 1/12 of .5%. Accordingly, for each month, the maximum monthly fee rate as adjusted for performance is 1/12 of 1.5% and is payable if the investment performance of the Fund exceeds the percentage change in the investment record of the Russell 2000 by 12 or more percentage points for the performance period, and the minimum monthly fee rate as adjusted for performance is 1/12 of .5% and is payable if the percentage change in the investment record of the Russell 2000 exceeds the investment performance of the Fund by 12 or more percentage points for the performance period.

Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund's Preferred Stock for any month in which the Fund's average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock's dividend rate.

For the six rolling 36-month periods ended June 2012, the Fund's investment performance ranged from 25% above to 9% below the investment performance of the Russell 2000. Accordingly, the net investment advisory fee consisted of a Basic Fee of

Edgar Filing: ROYCE VALUE TRUST INC - Form N-CSRS

\$1,639,531 and a net upward adjustment of \$387,604 for the performance of the Fund relative to that of the Russell 2000. Additionally, Royce voluntarily waived a portion of its investment advisory fee (\$26,666) attributable to issues of the Fund's Preferred Stock for those months in which the Fund's average annual NAV total return failed to exceed the applicable Preferred Stock's dividend rate. For the six months ended June 30, 2012, the Fund accrued and paid Royce investment advisory fees totaling \$2,000,469.

2012 Semiannual Report to Stockholders | 45

Royce Micro-Cap Trust

Notes to Financial Statements (unaudited) (continued)

Purchases and Sales of Investment Securities:

For the six months ended June 30, 2012, the costs of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$49,054,019 and \$40,632,743, respectively.

Transactions in Affiliated Companies:

An Affiliated Company as defined in the Investment Company Act of 1940, is a company in which a fund owns 5% or more of the company's outstanding voting securities at any time during the period. The Fund effected the following transactions in shares of such companies for the six months ended June 30, 2012:

| | Shares | Market Value | Cost of | Cost of | Realized Gain | Dividend | Shares | Market Value |
|--------------------------------|-----------|--------------|-----------|---------|---------------|----------|-----------|--------------|
| Affiliated Company | 12/31/11 | 12/31/11 | Purchases | Sales | (Loss) | Income | 6/30/12 | 6/30/12 |

¹ To be allocated to net investment income, net realized gains and/or return of capital at year end.² The Market Value Total Return is calculated assuming a purchase of Common Stock on the opening of the first business day and a sale on the closing of the last business day of each period. Dividends and distributions are assumed for the purposes of this calculation to be reinvested at prices obtained under the Fund's Distribution Reinvestment and Cash Purchase Plan. Net Asset Value Total Return is calculated on the same basis, except that the Fund's net asset value is used on the purchase and sale dates instead of market value.³ Not annualized⁴ Annualized⁵ Expense ratios based on total average net assets including liquidation value of Preferred Stock were 1.16%, 1.16%, 1.17%, 1.16%, 1.14% and 1.15% for the periods ended June 30, 2012, and December 31, 2011, 2010, 2009, 2008 and 2007, respectively.

Royce Focus Trust

Notes to Financial Statements (unaudited)

Summary of Significant Accounting Policies:

Royce Focus Trust, Inc. (the Fund), is a diversified closed-end investment company incorporated under the laws of the State of Maryland. The Fund commenced operations on March 2, 1988, and Royce & Associates, LLC (Royce) assumed investment management responsibility for the Fund on November 1, 1996.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

Under the Fund's organizational documents, the officers and directors are indemnified against certain liabilities that may arise out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses.

At June 30, 2012, officers, employees of Royce, Fund directors, the Royce retirement plans and other affiliates owned 25% of the Fund.

Valuation of Investments:

Securities are valued as of the close of trading on the New York Stock Exchange (NYSE) (generally 4:00 p.m. Eastern time) on the valuation date. Securities that trade on an exchange, and securities traded on Nasdaq's Electronic Bulletin Board, are valued at their last reported sales price or Nasdaq official closing price taken from the primary market in which each security trades or, if no sale is reported for such day, at their bid price. Other over-the-counter securities for which market quotations are readily available are valued at their highest bid price, except in the case of some bonds and other fixed income securities which may be valued by reference to other securities with comparable ratings, interest rates and maturities, using established independent pricing services. The Fund values its non-U.S. dollar denominated securities in U.S. dollars daily at the prevailing foreign currency exchange rates as quoted by a major bank. Securities for which market quotations are not readily available are valued at their fair value in accordance with the provisions of the 1940 Act, under procedures approved by the Fund's Board of Directors, and are reported as Level 3 securities. As a general principle, the fair value of a security is the amount which the Fund might reasonably expect to receive for the security upon its current sale. However, in light of the judgment involved in fair valuations, there can be no assurance that a fair value assigned to a particular security will be the amount which the Fund might be able to receive upon its current sale. In addition, if, between the time trading ends on a particular security and the close of the customary trading session on the NYSE, events occur that are significant and may make the closing price unreliable, the Fund may fair value the security. The Fund uses an independent pricing service to provide fair value estimates for relevant non-U.S. equity securities on days when the U.S. market volatility exceeds a certain threshold. This pricing service uses proprietary correlations it has developed between the movement of prices of non-U.S. equity securities and indices of U.S.-traded securities, futures contracts and other indications to estimate the fair value of relevant non-U.S. securities. When fair value pricing is employed, the prices of securities used by the Fund may differ from quoted or published prices for the same security. Investments in money market funds are valued at net asset value per share.

Various inputs are used in determining the value of the Fund's investments, as noted above. These inputs are summarized in the three broad levels below:

- Level 1 quoted prices in active markets for identical securities.
- Level 2 other significant observable inputs (including quoted prices for similar securities, foreign securities that may be fair valued and repurchase agreements). The table below includes all Level 2 securities. Any Level 2 securities with values based on quoted prices for similar securities would be noted in the Schedule of Investments.
- Level 3 significant unobservable inputs (including last trade price before trading was suspended, or at a discount thereto for lack of marketability or otherwise, market price information regarding other securities, information received from the company and/or published documents, including SEC filings and financial statements, or other publicly available information).

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used to value the Fund's investments as of June 30, 2012. For a detailed breakout of common stocks by sector classification, please refer to the Schedule of Investments.

| | Level 1 | Level 2 | Level 3 | Total |
|---------------|---------------|--------------|---------|---------------|
| Common Stocks | \$120,265,290 | \$28,347,229 | \$ | \$148,612,519 |

Edgar Filing: ROYCE VALUE TRUST INC - Form N-CSRS

| | | | |
|------------------|-----------|------------|------------|
| Cash Equivalents | 4,229,011 | 25,251,000 | 29,480,011 |
|------------------|-----------|------------|------------|

Repurchase Agreements:

The Fund may enter into repurchase agreements with institutions that the Fund's investment adviser has determined are creditworthy. The Fund restricts repurchase agreements to maturities of no more than seven days. Securities pledged as collateral for repurchase agreements, which are held until maturity of the repurchase agreements, are marked-to-market daily and maintained at a value at least equal to the principal amount of the repurchase agreement (including accrued interest). Repurchase agreements could involve certain risks in the event of default or insolvency of the counter-party, including possible delays or restrictions upon the ability of the Fund to dispose of its underlying securities.

2012 Semiannual Report to Stockholders | 53

Royce Focus Trust

Notes to Financial Statements (unaudited) (continued)

Foreign Currency:

Net realized foreign exchange gains or losses arise from sales and maturities of short-term securities, sales of foreign currencies, expiration of currency forward contracts, currency gains or losses realized between the trade and settlement dates on securities transactions, and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in the value of assets and liabilities, including investments in securities at the end of the reporting period, as a result of changes in foreign currency exchange rates.

Securities Lending:

The Fund loans securities through a lending agent to qualified institutional investors for the purpose of realizing additional income. Collateral for the Fund on all securities loaned is accepted in cash and cash equivalents and invested temporarily by the custodian. The collateral maintained is at least 100% of the current market value of the loaned securities. The market value of the loaned securities is determined at the close of business of the Fund and any additional required collateral is delivered to the Fund on the next business day. The Fund retains the risk of any loss on the securities on loan as well as incurring the potential loss on investments purchased with cash collateral received for securities lending. The Fund's securities lending income consists of the income earned on investing cash collateral, plus any premium payments received for lending certain securities, less any rebates paid to borrowers and lending agent fees associated with the loan. The lending agent is not affiliated with Royce.

Taxes:

As a qualified regulated investment company under Subchapter M of the Internal Revenue Code, the Fund is not subject to income taxes to the extent that it distributes substantially all of its taxable income for its fiscal year. The Schedule of Investments includes information regarding income taxes under the caption Tax Information .

Distributions:

The Fund pays quarterly distributions on the Fund's Common Stock at the annual rate of 5% of the rolling average of the prior four calendar quarter-end NAVs of the Fund's Common Stock, with the fourth quarter distribution being the greater of 1.25% of the rolling average or the distribution required by IRS regulations. Distributions to Preferred Stockholders are accrued daily and paid quarterly and distributions to Common Stockholders are recorded on ex-dividend date. Distributable capital gains and/or net investment income are first allocated to Preferred Stockholder distributions, with any excess allocable to Common Stockholders. If capital gains and/or net investment income are allocated to both Preferred and Common Stockholders, the tax character of such allocations is proportional. To the extent that distributions are not paid from long-term capital gains, net investment income or net short-term capital gains, they will represent a return of capital. Distributions are determined in accordance with income tax regulations that may differ from accounting principles generally accepted in the United States of America. Permanent book and tax differences relating to stockholder distributions will result in reclassifications within the capital accounts. Undistributed net investment income may include temporary book and tax basis differences, which will reverse in a subsequent period. Any taxable income or gain remaining undistributed at fiscal year end is distributed in the following year.

Investment Transactions and Related Investment Income:

Investment transactions are accounted for on the trade date. Dividend income is recorded on the ex-dividend date. Non-cash dividend income is recorded at the fair market value of the securities received. Interest income is recorded on an accrual basis. Premium and discounts on debt securities are amortized using the effective yield-to-maturity method. Realized gains and losses from investment transactions are determined on the basis of identified cost for book and tax purposes.

Expenses:

The Fund incurs direct and indirect expenses. Expenses directly attributable to the Fund are charged to the Fund's operations, while expenses applicable to more than one of the Royce Funds are allocated equitably. Certain personnel, occupancy costs and other administrative expenses related to the Royce Funds are allocated by Royce under an administration agreement and are included in administrative and office facilities and professional fees. The Fund has adopted a deferred fee agreement that allows the Directors to defer the receipt of all or a portion of directors' fees otherwise payable. The deferred fees are invested in certain Royce Funds until distributed in accordance with the agreement.

Compensating Balance Credits:

Edgar Filing: ROYCE VALUE TRUST INC - Form N-CSRS

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments. Conversely, the Fund pays interest to the custodian on any cash overdrafts, to the extent they are not offset by credits earned on positive cash balances.

Capital Stock:

The Fund issued 365,203 and 735,388 shares of Common Stock as reinvestment of distributions by Common Stockholders for the six months ended June 30, 2012, and the year ended December 31, 2011, respectively.

At June 30, 2012, 1,000,000 shares of 6.00% Cumulative Preferred Stock were outstanding. The Fund, at its option, may redeem the Cumulative Preferred Stock, in whole or in part, at the redemption price. The Cumulative Preferred Stock is classified outside of permanent equity (net assets)

Royce Focus Trust

Notes to Financial Statements (unaudited) (continued)

Capital Stock (continued):

applicable to Common Stockholders) in the accompanying financial statements in accordance with accounting for redeemable equity instruments, that requires preferred securities that are redeemable for cash or other assets to be classified outside of permanent equity to the extent that the redemption is at a fixed or determinable price and at the option of the holder or upon the occurrence of an event that is not solely within the control of the issuer.

The Fund is required to meet certain asset coverage tests with respect to the Cumulative Preferred Stock as required by the 1940 Act. In addition, pursuant to the Rating Agency Guidelines established by Moody's, the Fund is required to maintain a certain discounted asset coverage. If the Fund fails to meet these requirements and does not correct such failure, the Fund may be required to redeem, in part or in full, the Cumulative Preferred Stock at a redemption price of \$25.00 per share, plus an amount equal to the accumulated and unpaid dividends, whether or not declared on such shares, in order to meet these requirements. Additionally, failure to meet the foregoing asset coverage requirements could restrict the Fund's ability to pay dividends to Common Stockholders and could lead to sales of portfolio securities at inopportune times. The Fund has met these requirements since issuing the Cumulative Preferred Stock.

Investment Advisory Agreement:

The Investment Advisory Agreement between Royce and the Fund provides for fees to be paid at an annual rate of 1.0% of the Fund's average daily net assets applicable to Common Stockholders plus the liquidation value of Preferred Stock. Royce has voluntarily committed to waive the portion of its investment advisory fee attributable to an issue of the Fund's Preferred Stock for any month in which the Fund's average annual NAV total return since issuance of the Preferred Stock fails to exceed the applicable Preferred Stock's dividend rate. For the six months ended June 30, 2012, the Fund accrued and paid Royce investment advisory fees totaling \$916,882.

Purchases and Sales of Investment Securities:

For the six months ended June 30, 2012, the costs of purchases and proceeds from sales of investment securities, other than short-term securities and collateral received for securities loaned, amounted to \$16,868,377 and \$23,375,045, respectively.

Directors and Officers

All Directors and Officers may be reached c/o The Royce Funds, 745 Fifth Avenue, New York, NY 10151

Charles M. Royce, Director¹, President

Age: 72 | Number of Funds Overseen: 35 | Tenure: Since 1982

David L. Meister, Director

Age: 72 | Number of Funds Overseen: 35 | Tenure: Since 1982

Edgar Filing: ROYCE VALUE TRUST INC - Form N-CSRS

Non-Royce Directorships: None

Principal Occupation(s) During Past Five Years: Consultant. Chairman and Chief Executive Officer of The Tennis Channel (from June 2000 to March 2005). Mr. Meister's prior business experience includes having served as Chief Executive Officer of Seniorlife.com, a consultant to the communications industry, President of Financial News Network, Senior Vice President of HBO, President of Time-Life Films and Head of Broadcasting for Major League Baseball.

G. Peter O Brien, Director

Age: 66 | Number of Funds Overseen: 49 | Tenure: Since 2001

Non-Royce Directorships: Director/Trustee of registered investment companies constituting the 14 Legg Mason Funds; Director of TICC Capital Corp.

Principal Occupation(s) During Past Five Years: Trustee Emeritus of Colgate University (since 2005); Board Member of Hill House, Inc. (since 1999); Formerly: Trustee of Colgate University (from 1996 to 2005), President of Hill House, Inc. (from 2001 to 2005) and Managing Director/Equity Capital Markets Group of Merrill Lynch & Co. (from 1971 to 1999).

John D. Diederich, Vice President and Treasurer

Age: 60 | Tenure: Since 2001

Principal Occupation(s) During Past Five Years: Chief Operating Officer, Managing Director and member of the Board of Managers of Royce; Chief Financial Officer of Royce; Director of Administration of *The Royce Funds*; and President of Royce Fund Services, Inc. (RFS), having been employed by Royce since April 1993.

Jack E. Fockler, Jr., Vice President

Age: 53 | Tenure: Since 1995

Principal Occupation(s) During Past Five Years: Managing Director and Vice President of Royce, and Vice President of RFS, having been employed by Royce since October 1989.

W. Whitney George, Vice President

Age: 54 | Tenure: Since 1995

Principal Occupation(s) During Past Five Years: Co-Chief Investment Officer, Managing Director and Vice President of Royce, having been employed by Royce since October 1991.

Daniel A. O Byrne, Vice President and Assistant Secretary

Age: 50 | Tenure: Since 1994

Principal Occupation(s) During Past Five Years: Principal and Vice President of Royce, having been employed by Royce since October 1986.

John E. Denneen, Secretary and Chief Legal Officer

Age: 45 | Tenure: 1996-2001 and Since April 2002

Principal Occupation(s) During Past Five Years: General Counsel, Principal, Chief Legal and Compliance Officer and Secretary of Royce; Secretary and Chief Legal Officer of *The Royce Funds*.

Lisa Curcio, Chief Compliance Officer

Age: 52 | Tenure: Since 2004

Principal Occupation(s) During Past Five Years: Chief Compliance Officer of *The Royce Funds* (since October 2004) and Compliance Officer of Royce (since June 2004).

¹ Interested Director.

Directors will hold office until their successors have been duly elected and qualified or until their earlier resignation or removal.

Notes to Performance and Other Important Information

The thoughts expressed in this *Review and Report* concerning recent market movements and future prospects for small company stocks are solely the opinion of Royce at June 30, 2012, and, of course, historical market trends are not necessarily indicative of future market movements. Statements regarding the future prospects for particular securities held in the Funds' portfolios and Royce's investment intentions with respect to those securities reflect Royce's opinions as of June 30, 2012 and are subject to change at any time without notice. There can be no assurance that securities mentioned in this *Review and Report* will be included in any Royce-managed portfolio in the future. Investments in securities of micro-cap, small-cap and/or mid-cap companies may involve considerably more risk than investments in securities of larger-cap companies. All publicly released material information is always disclosed by the Funds on the website at www.roycefunds.com.

Sector weightings are determined using the Global Industry Classification Standard (GICS). GICS was developed by, and is the exclusive property of, Standard & Poor's Financial Services LLC (S&P) and MSCI Inc. (MSCI). GICS is the trademark of S&P and MSCI. Global Industry Classification Standard (GICS) and GICS Direct are service marks of S&P and MSCI.

All indexes referred to are unmanaged and capitalization weighted. Each index's returns include net reinvested dividends and/or interest income. Russell Investment Group is the source and owner of the trademarks, service marks and copyrights related to the Russell Indexes. Russell® is a trademark of Russell Investment Group. The Russell 2000 Index is an index of domestic small-cap stocks. It measures the performance of the 2,000 smallest publicly traded U.S. companies in the Russell 3000 Index. The Russell 2500 is an index of 2,500 smallest publicly traded U.S. companies in the Russell 3000 Index. The Russell Microcap Index includes 1,000 of the smallest securities in the Russell 2000 Index. The Russell 1000 Index is an index of domestic large-cap stocks. It measures the performance of the 1,000 largest publicly traded companies in the Russell 3000 Index. The Russell Midcap Index measures the performance of the mid-cap segment of the U.S. equity universe. It includes approximately 800 of the smallest securities in the Russell 1000 Index. The Russell Global ex-U.S. Large Cap Index is an index of global large-cap stocks, excluding the United States. The Russell Global ex-U.S. Small Cap Index is an index of global small-cap stocks, excluding the United States. The S&P 500 and SmallCap 600 are indexes of U.S. large- and small-cap stocks, respectively, selected by Standard & Poor's based on market size, liquidity and industry grouping, among other factors. The Nasdaq Composite is an index of the more than 3,000 common equities listed on the Nasdaq stock exchange. Returns for the market indexes used in this report were based on information supplied to Royce by Russell Investments. The CRSP (Center for Research in Security Pricing) equally divides the companies listed on the NYSE into 10 deciles based on market capitalization. Deciles 1-5 represent the largest domestic equity companies and Deciles 6-10 represent the smallest. CRSP then sorts all listed domestic equity companies based on these market cap ranges. By way of comparison, the CRSP 1-5 would have similar capitalization parameters to the S&P 500 Index and the CRSP 6-10 would have similar capitalization parameters to those of the Russell 2000 Index. Royce has not independently verified the above described information.

Forward-Looking Statements

This material contains forward-looking statements within the meaning of the Securities Exchange Act of 1934, as amended (the Exchange Act), that involve risks and uncertainties, including, among others, statements as to:

- the Funds' future operating results
- the prospects of the Funds' portfolio companies
- the impact of investments that the Funds have made or may make
- the dependence of the Funds' future success on the general economy and its impact on the companies and industries in which the Funds invest, and
- the ability of the Funds' portfolio companies to achieve their objectives.

This *Review and Report* uses words such as anticipates, believes, expects, future, intends, and similar expressions to identify forward-looking statements. Actual results may differ materially from those projected in the forward-looking statements for any reason.

The Royce Funds have based the forward-looking statements included in this *Review and Report* on information available to us on the date of the report, and we assume no obligation to update any such forward-looking statements. Although The Royce Funds undertake no obligation to revise or update any forward-looking statements, whether as a result of new information, future events or otherwise, you are advised to consult any additional disclosures that we may make through future stockholder communications or reports.

Authorized Share Transactions

Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust may each repurchase up to 5% of the issued and outstanding shares of its respective common stock and up to 10% of the issued and outstanding shares of its respective preferred stock during the year ending December 31, 2012. Any such repurchases would take place at then prevailing prices in the open market or in other transactions. Common stock repurchases would be effected at a price per share that is less than the share's then current net

asset value, and preferred stock repurchases would be effected at a price per share that is less than the share's liquidation value.

Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust are also authorized to offer their common stockholders an opportunity to subscribe for additional shares of their common stock through rights offerings at a price per share that may be less than the share's then current net asset value. The timing and terms of any such offerings are within each Board's discretion.

Annual Certifications

As required, the Funds have submitted to the New York Stock Exchange (NYSE) for Royce Value Trust and Royce Micro-Cap Trust and to Nasdaq for Royce Focus Trust, respectively, the annual certification of the Funds' Chief Executive Officer that he is not aware of any violation of the NYSE's or Nasdaq's Corporate Governance listing standards. The Funds also have included the certification of the Funds' Chief Executive Officer and Chief Financial Officer required by section 302 of the Sarbanes-Oxley Act of 2002 as exhibits to the Funds' form N-CSR for the period ended December 31, 2011, filed with the Securities and Exchange Commission.

Proxy Voting

A copy of the policies and procedures that The Royce Funds use to determine how to vote proxies relating to portfolio securities and information regarding how each of The Royce Funds voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available, without charge, on The Royce Funds' website at www.roycefunds.com, by calling (800) 221-4268 (toll-free) and on the website of the Securities and Exchange Commission (SEC), at www.sec.gov.

Form N-Q Filing

The Funds file their complete schedules of investments with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Funds' Forms N-Q are available on the SEC's website at www.sec.gov. The Royce Funds' holdings are also on the Funds' website approximately 15 to 20 days after each calendar quarter end and remain available until the next quarter's holdings are posted. The Funds' Forms N-Q may also be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. To find out more about this public service, call the SEC at (800) 732-0330. The Funds' complete schedules of investments are updated quarterly, and are available at www.roycefunds.com.

Board Approval of Investment Advisory Agreements

At meetings held on June 6-7, 2012, each of the Funds' respective Boards of Directors, including all of the non-interested directors, approved the continuance of the Investment Advisory Agreements between Royce & Associates, LLC (R&A) and each of Royce Value Trust, Royce Micro-Cap Trust and Royce Focus Trust (the Funds). In reaching these decisions, the Board reviewed the materials provided by R&A, which included, among other things, information prepared internally by R&A and independently by Morningstar Associates, LLC (Morningstar) containing detailed expense ratio and investment performance comparisons for the Funds with other funds in their peer group , information regarding the past performance of the Funds and other registered investment companies managed by R&A and a memorandum outlining the legal duties of the Board prepared by independent counsel to the non-interested directors. R&A also provided the directors with an analysis of its profitability with respect to providing investment advisory services to each of the Funds. In addition, the Board took into account information furnished throughout the year at regular Board meetings, including reports on investment performance, stockholder services, regulatory compliance, brokerage commissions and research, and brokerage and execution products and services provided to the Funds. The Board also considered other matters they deemed important to the approval process such as allocation of Fund brokerage commissions, soft dollar research services R&A receives and other direct and indirect benefits to R&A and its affiliates, from their relationship with the Fund. The directors also met throughout the year with investment advisory personnel from R&A. The Board, in its deliberations, recognized that, for many of the Funds' stockholders, the decision to purchase Fund shares included a decision to select R&A as the investment adviser and that there was a strong association in the minds of Fund stockholders between R&A and each Fund. In considering factors relating to the approval of the continuance of the Investment Advisory Agreements, the non-interested directors received assistance and advice from, and met separately with, their independent counsel. While the Investment Advisory Agreements were considered at the same Board meetings, the Board dealt with each agreement separately. Among other factors, the directors considered the following:

The nature, extent and quality of services provided by R&A: The Board considered the following factors to be of fundamental importance to their consideration of whether to approve the continuance of the Funds' Investment Advisory Agreements: (i) R&A's more than 35 years of value investing experience and track record; (ii) the history of long-tenured R&A portfolio managers managing the Funds; (iii) R&A's focus on mid-cap, small-cap and micro-cap value investing; (iv) the consistency of R&A's approach to managing both the Funds and open-end mutual funds over more than 35 years; (v) the integrity and high ethical standards adhered to at RA (vi) R&A's specialized experience in the area of trading small- and micro-cap securities; (vii) R&A's historical ability to attract and retain portfolio management talent and (viii) R&A's focus on stockholder interests as exemplified by its voluntary fee waiver policy on preferred stock assets in certain circumstances where the Funds' total return performance from the issuance of the preferred does not exceed the coupon rate on the preferred, and expansive stockholder reporting and communications. The Board reviewed the services that R&A provides to the Funds, including, but not limited to, managing each Fund's investments in accordance with the stated policies of each Fund. The Board considered the fact that R&A provided certain administrative services to the Funds at cost pursuant to the Administration Agreement between the Funds and R&A which went into effect on January 1, 2008. The Board determined that the services to be provided to each Fund by R&A would be the same as those it previously provided to the Funds. They also took into consideration the histories, reputations and backgrounds of R&A's portfolio managers for the Funds, finding that these would likely have an impact on the continued success of the Funds. Lastly, the Board noted R&A's ability to attract and retain quality and experienced personnel. The directors concluded that the investment advisory services provided by R&A to each Fund compared favorably to services provided by R&A to other R&A client accounts, including other funds, in both nature and quality, and that the scope of services provided by R&A would continue to be suitable for the Funds.

Investment performance of the Funds and R&A: In light of R&A's risk-averse approach to investing, the Board believes that risk-adjusted performance continues to be an appropriate measure of each Fund's investment performance. One measure of risk-adjusted performance the Board has historically used in its review of the Funds' performance is the Sharpe Ratio. The Sharpe Ratio is a risk-adjusted measure of performance developed by Nobel Laureate William Sharpe. It is calculated by dividing a fund's annualized excess returns by its annualized standard deviation to determine reward per unit of risk. The higher the Sharpe Ratio, the better a fund's historical risk-adjusted performance. The Board attaches primary importance to risk-adjusted performance over relatively long periods of time, typically three to ten years. Using Morningstar data, Royce Value Trust's Sharpe Ratio placed in the middle quintile within the Small Blend category assigned by Morningstar for the three-, five- and 10-year periods ended December 31, 2011, as the Fund's use of leverage through preferred stock created higher volatility and, for the five-year period, brought down market performance. Using Morningstar data, as measured against its open-end peers, Royce Micro-Cap Trust's Sharpe Ratio placed in the 2nd quartile within the Small Blend category assigned by Morningstar for the three- and 10-year periods ended December 31, 2011 and at the 62nd percentile for the five-year period within its category, as the Fund's use of leverage through preferred stock created higher volatility and brought down market performance.

Finally, using Morningstar data, Royce Focus Trust's concentrated portfolio led to its middle quintile performance in its category as measured by Sharpe Ratio for the three-year period, 2nd quartile for the five-year period and top quartile for the 10-year period ended December 31, 2011.

The Board noted that R&A manages a number of funds that invest in small-cap and micro-cap issuers, many of which were outperforming their benchmark indexes and their competitors. Although the Board recognized that past performance is not necessarily an indicator of future results, they found that R&A had the necessary qualifications, experience and track record in

managing small-cap and micro-cap securities to manage the Funds. The directors determined that R&A continued to be an appropriate investment adviser for the Funds and concluded that each Fund's performance supported the continuation of its Investment Advisory Agreement.

Cost of the services provided and profits realized by R&A from its relationship with the Funds: The Board considered the cost of the services provided by R&A and profits realized by R&A from its relationship with each Fund. As part of the analysis, the Board discussed with R&A its methodology in allocating its costs to each Fund and concluded that its allocations were reasonable. The Board concluded that R&A's profits were reasonable in relation to the nature and quality of services provided.

The extent to which economies of scale would be realized as the Funds grow and whether fee levels would reflect such economies of scale: The Board considered whether there have been economies of scale in respect of the management of the Funds, whether the Funds have appropriately benefited from any economies of scale and whether there is potential for realization of any further economies of scale. The Board noted the time and effort involved in managing portfolios of small- and micro-cap stocks and

that they did not involve the same efficiencies as do portfolios of large cap stocks. The Board concluded that the current fee structure for each Fund was reasonable, that stockholders sufficiently participated in economies of scale and that no changes were currently necessary.

Comparison of services to be rendered and fees to be paid to those under other investment advisory contracts, such as contracts of the same and other investment advisers or other clients: The Board reviewed the investment advisory fee paid by each Fund and compared both the services to be rendered and the fees to be paid under the Investment Advisory Agreements to other contracts of R&A and to contracts of other investment advisers to registered investment companies investing in small- and micro-cap stocks, as provided by Morningstar. The Board noted that, in the case of Royce Value Trust, the Fund had a 1.00% basic fee that is subject to adjustment up or down (up to 0.50% in either direction) based on the Fund's performance versus the S&P 600 SmallCap Index over a rolling period of sixty months. The fee is charged on average net assets over that rolling period. As a result, in a rising market, the fee will be smaller than a fee calculated on the current year's average net assets, and vice versa. The Board determined that the performance adjustment feature continued to serve as an appropriate incentive to R&A to manage the Fund for the benefit of its long-term common stockholders. The Board noted that R&A had also agreed to waive its management fee on that portion of the Fund's assets equal to the liquidation preference of the Fund's outstanding preferred stock if the Fund's total return from issuance of the preferred on such amount is less than the preferred's fixed dividend rate. The Board also noted that the fee arrangement, which also includes a provision for no fee in periods where the Fund's trailing three-year performance is negative, requires R&A to measure the Fund's performance monthly against the S&P 600, an unmanaged index. Instead of receiving a set fee regardless of its performance, R&A is penalized for poor performance. The Board noted that the Fund's performance earned R&A no fee during the period January 1, 2011 through November 30, 2011.

In the case of Royce Micro-Cap Trust, the Board noted that the Fund had a 1.00% basic fee subject to adjustment up or down based on the Fund's performance versus the Russell 2000 Index over a rolling 36 month period. The fee is charged on average net assets over that rolling period. As a result, in a rising market, the fee will be smaller than a fee calculated on the current year's average net assets, and visa versa. The Board determined that the performance adjustment feature continued to serve as an incentive to R&A to manage the Fund for the benefit of its long-term stockholders. The Board also noted R&A's voluntary waiver of its fee on the liquidation value of the outstanding preferred stock in circumstances where the Fund's total return performance from the issuance of the preferred is less than the fixed dividend rate on the preferred for each month during the year. The Board noted that if the Fund's expense ratio were based on total average net assets including net assets applicable to Preferred Stock, it would rank in the second quartile when compared against its Morningstar-assigned open-end peer group.

Finally, in the case of Royce Focus Trust, the Board noted that R&A had agreed to waive its management fee on the liquidation value of outstanding preferred stock if the Fund's total return from issuance of the preferred is less than the preferred's fixed dividend rate. The Board noted that if the Fund's expense ratio were based on total average net assets including net assets applicable to Preferred Stock, it would place within four basis points of the median of its Morningstar-assigned open-end peer group.

The Board also considered fees charged by R&A to institutional and other clients and noted that, given the greater levels of services that R&A provides to registered investment companies such as the Funds as compared to other accounts, the Funds' base advisory fees compared favorably to the advisory fees charged to those other accounts.

It was noted that no single factor was cited as determinative to the decision of the directors. Rather, after weighing all of considerations and conclusions discussed above, the entire Board, including all the non-interested directors, approved the continuation of the existing Investment Advisory Agreements, concluding that a contract continuation on the existing terms was in the best interest of the stockholders of each Fund and that each investment advisory fee rate was reasonable in relation to the services provided.

2012: In Quotes

We don't have to be smarter than the rest. We have to be more disciplined than the rest.
Warren Buffet, 2012

Points To Ponder

Dividend-payers stand to benefit in coming decades from an event that has only just begun, the retirement of the baby boomers.
Savita Subramanian, *WSJ.com*, January 4, 2012

Do not trust financial market risk models. Despite the predilection of some analysts to model the financial markets using sophisticated mathematics, the markets are governed by behavioral science, not physical science.
Seth Klarman

No matter how diversified you are, you probably aren't as diversified as you think. As recently as 1997, it took 20 stocks to eliminate most of the likelihood of enduring more risk than the market as a whole; today it takes 40. If you hold the same number of stocks that you used to, you are about half as diversified as you were. You need to spread your bets wider.
Jason Zweig, *The Wall Street Journal*, February 18, 2012

Leverage reduces the investor's critical asset: patience.
Jeremy Grantham, *GMO Letter*, February 2012

In Absolute Agreement

In the fourth quarter of 1984, there were 32 FDIC-insured banks with assets greater than \$10 billion, and they controlled 27.5% of the nation's banking assets. In the fourth quarter of 2011, there were 107 banks with assets greater than \$10 billion, and they controlled 79.6% of the nation's banking assets.
Jim Grant, *Grant's Interest Rate Observer*, May 18, 2012

The disruptive technologies and government policies have created an extremely highly correlated environment with all financial markets and all financial institutions. The risks were manifest in 2008, but rather than defuse them, government policies have since increased the interconnectedness.
Simon Mikhailovich, *Barron's*, June 2, 2012

We don't try to predict (the stock market)... That's folly. We are looking at the macro picture, but it is best to focus on forward risk-adjusted returns at individual securities. We have learned that over and over again.
Don Yackman, *Barron's*, May 8, 2012

The public will only consider equities once they start to lose money in bonds. In an era of financial repression, this might take a long time but this moment will arrive just the same.
Jason Trennert, *Strategas Investment Strategy Viewpoint*, May 25, 2012

It is important to recognize that results in the short term reflect a lot of randomness. Even skillful managers will slump, and unskillful managers will shine. But over the long haul, good process wins.
Michael Mauboussin, *Daily News & Analysis*, June 4, 2012

It's never as good as you think it is when it's great, and never as bad as you think it is when it's bad.
Preston Athey, *Barron's*, June 16, 2012

Cocktail Conversation

Stocks were losers to bonds in 2011. But don't invest with a rear view mirror... Emerging markets offer the best prospects for both equity and bond returns over the next 10 years.
Burton Malkiel, *The Wall Street Journal*, January 6, 2012

Apple's iPhone business alone is now bigger than Microsoft. Not Windows. Not Office. Microsoft. Think about that. The iPhone did not exist five years ago. And now it's bigger than a company that, 15 years ago, was dragged into court and threatened with forcible break-up because it had amassed an unassailable and unthinkable profitable monopoly...In the December quarter, Apple's iPhone business generated \$24.4 billion of revenue. Microsoft's whole company, meanwhile, from Windows to Office to servers to Xbox, generated \$20.9 billion.
Henry Blodget, *BusinessInsider*, February 7, 2012

Adjusted for inflation, current oil prices are below the levels that existed thirty years ago.
William Strauss, *Economic Outlook*, April 26, 2012

Timeless Tidbits

It is amazing what you can accomplish if you do not care who gets the credit.
Harry S. Truman

In any moment of decision, the best thing you can do is the right thing. The worst thing you can do is nothing.
Theodore Roosevelt

The thoughts expressed above represent solely the opinions of the persons quoted and, of course, there can be no assurance of future market trends or performance.

Is the Business Cycle Dead?

Plus ça change, plus c'est la même chose.
(*The more things change, the more they stay the same.*)
Alphonse Karr

One striking effect of the financial crisis has been the apparent disappearance of the traditional business cycle. The world's developed economies heavily indebted, still deleveraging, and in some cases in the midst of painful austerity are being supported by periodic and unconventional interventions from increasingly leveraged central banks. The result has been an anemic, albeit steady, pace of economic activity marked by fits and starts that are increasingly difficult for investors to interpret.

It makes sense, then, that market cycles have followed suit, with equities showing sudden, at times violent, moves that have alternated between strong rallies and steep declines over relatively short periods, each driven by marginal changes in the trajectory of economic expectations. Single-stock correlation remains high due to this uncertainty, with more cyclical market sectors the most disadvantaged.

Several factors are at work: Deleveraging associated with the housing bust is a persistent and long-term headwind; personal savings remain elusive; rising commodity prices have affected consumer purchasing power and sentiment; unemployment remains stubbornly high; and, importantly, the primary source of economic stimulus is coming from central bank programs instead of traditional private business investment.

As if all this were not enough, there is the backdrop of the sovereign debt crises in Europe and slower growth in the all-important emerging economies, especially China. Interestingly, none of these issues are new. They have been part of the landscape for several years now, and distinct patterns have developed around them that have been repeated in each of the last three years, giving investors the sense that cycles of economic activity have compressed dramatically. Previously marked in years, moves up and down in business momentum are now counted in months, if not weeks.

Which leads to two questions: Has the business cycle fundamentally changed? Should traditionally cyclical businesses carry lower multiples as a result? It appears to us that in the short term, the market has answered with a resounding yes. Cyclical sectors, such as Industrials, Energy, Technology, and Materials, have become increasingly volatile and have borne the brunt of the selling during market downturns.

Within these areas, even high-quality businesses (as measured by balance sheet strength and returns on invested capital) are suffering from the altered preferences of investors who once flocked to the perceived safety of more stable vehicles. Investors continue to abandon equities, gravitating instead toward fixed income securities even as they recognize the inevitable loss of purchasing power that comes with them. Today, it seems that we have a bubble in fear, which is manifesting itself in ways that have our contrarian pulses racing.

We are finding what we think are excellent values in currently unpopular pro-cyclical businesses. Cycles have certainly become shorter over the past three years, but we hold the view that these are anomalous times and that the traditional business cycle will reemerge before long.

The economy does not yet have sufficient self-sustaining business momentum that will allow it to be weaned off the artificial support currently being provided by central banks. The opportunity from our standpoint lies in looking where others are not while holding fast to our time-tested investment approach governed by absolute standards for valuation and return.

In the short term, our interest in cyclical businesses has been putting us out of sync with the return patterns of the market. While unpleasant, it is a by-product of our contrarian nature. In fact, this period is somewhat reminiscent of the late '90s when investors were citing the demise of traditional value investing because of the emergence of the internet and the technology revolution. What was then a bubble in greed has become today's bubble in fear.

Investing is a perennially dynamic endeavor requiring both patience and conviction. Those tenets are being sorely tested in the current market. Although business cycles have looked different of late, and the market has been reacting accordingly, our belief is that they will ultimately revert to the mean, benefiting higher-quality companies in cyclical sectors. We take heart from the timeless wisdom of Alphonse Karr, for indeed, the more things change, the more they stay the same.

The thoughts in this essay concerning the stock market are solely those of Royce & Associates and, of course, there can be no assurance with regard to future market movements.

About The Royce Funds

Wealth Of Experience

With approximately \$36 billion in total assets under management, Royce & Associates is committed to the same small-company investing principles that have served us well for nearly 40 years. Charles M. Royce, our President and Co-Chief Investment Officer, enjoys one of the longest tenures of any active mutual fund manager. Royce's investment staff also includes Co-Chief Investment Officer W. Whitney George, 18 Portfolio Managers, five assistant portfolio managers and analysts, and nine traders.

Multiple Funds, Common Focus

Our goal is to offer both individual and institutional investors the best available smaller-cap portfolios. Unlike a lot of mutual fund groups with broad product offerings, we have chosen to concentrate on smaller-company investing by providing investors with a range of funds that take full advantage of this large and diverse sector.

Consistent Discipline

Our approach emphasizes paying close attention to risk and maintaining the same discipline, regardless of market movements and trends. The price we pay for a security must be significantly below our appraisal of its current worth. This requires a thorough analysis of the financial and business dynamics of an enterprise, as though we were purchasing the entire company.

Co-Ownership Of Funds

It is important that our employees and shareholders share a common financial goal; our officers, employees and their families currently have approximately \$136 million invested in *The Royce Funds*.
