At August 31, 2009, the concentration of the Trust's investments in the various states, determined as a percentage of total investments, is as follows:

| | |
|---|-------|
| New York | 12.6% |
| California | 12.4% |
| Others, representing less than 10% individually | 75.0% |

The Trust invests primarily in debt securities issued by municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to

reduce the risk associated with such economic developments, at August 31, 2009, 31.8% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.0% to 13.5% of total investments.

- (1) Security represents the underlying municipal bond of an inverse floater.
- (2) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be sold in transactions exempt from registration, normally to qualified institutional buyers. At August 31, 2009, the aggregate value of these securities is \$15,980,114 or 7.0% of the Trust's net assets applicable to common shares.
- (3) Security (or a portion thereof) has been pledged as collateral for open swap contracts or inverse floating-rate security transactions.
- (4) Security is in default and is making only partial interest payments.
- (5) Defaulted matured bond.

Table of Contents

A summary of financial instruments outstanding at August 31, 2009 is as follows:

Interest Rate Swaps

| Counterparty | Notional Amount | Annual | Floating | Effective Date/ Termination Date | Net Unrealized Depreciation |
|--------------------|-----------------|-------------------------|---------------------------|--|-----------------------------|
| | | Fixed Rate Paid By Fund | Rate Paid To Fund | | |
| JPMorgan Chase Co. | \$ 6,712,500 | 4.743% | 3-month USD- LIBOR-BBA | September 14, 2009/ September 14, 2039 | \$ (759,671) |
| | | | | | \$ (759,671) |

The effective date represents the date on which the Trust and the counterparty to the interest rate swap contract begin interest payment accruals.

At August 31, 2009, the Trust had sufficient cash and/or securities to cover commitments under these contracts.

The Trust is subject to interest rate risk in the normal course of pursuing its investment objectives. Because the Trust holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To hedge against this risk, the Trust may enter into interest rate swap contracts.

At August 31, 2009, the aggregate fair value of derivative instruments (not accounted for as hedging instruments under Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 133) in a liability position and whose primary underlying risk exposure is interest rate risk was \$759,671.

The cost and unrealized appreciation (depreciation) of investments of the Trust at August 31, 2009, as determined on a federal income tax basis, were as follows:

| | |
|------------------------------------|------------------------|
| Aggregate cost | \$ 383,566,151 |
| Gross unrealized appreciation | \$ 13,712,152 |
| Gross unrealized depreciation | (52,846,186) |
| Net unrealized depreciation | \$ (39,134,034) |

FASB Statement of Financial Accounting Standards No. 157, Fair Value Measurements, established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

Table of Contents

At August 31, 2009, the inputs used in valuing the Trust's investments, which are carried at value, were as follows:

| Asset Description | Quoted Prices in Active Markets for Identical Assets (Level 1) | Significant Other Observable Inputs (Level 2) | Significant Unobservable Inputs (Level 3) | Total |
|------------------------------|--|---|---|-----------------------|
| Tax-Exempt Investments | \$ | \$ 421,367,117 | \$ | \$ 421,367,117 |
| Total Investments | \$ | \$ 421,367,117 | \$ | \$ 421,367,117 |
| Liability Description | | | | |
| Interest Rate Swaps | \$ | \$ (759,671) | \$ | \$ (759,671) |
| Total | \$ | \$ (759,671) | \$ | \$ (759,671) |

The Trust held no investments or other financial instruments as of November 30, 2008 whose fair value was determined using Level 3 inputs.

For information on the Trust's policy regarding the valuation of investments and other significant accounting policies, please refer to the Trust's most recent financial statements included in its semiannual or annual report to shareholders.
