Management Performance and Financial Conditions

1. Outline of Operations and Business Results

During the first six-month period (April 1 – September 30, 2009), world economies began to move away from the path toward a drastic economic recession thanks to economic and financial measures across advanced and many emerging economies. However, the overall economic environment, except for some countries such as China, remained sluggish. Under such an economic environment, Komatsu Ltd. and its subsidiaries (hereinafter “Komatsu”) continued to adjust production around the world in order to achieve an appropriate level of inventories as its top priority task. At the same time, Komatsu also reorganized production of both businesses of the Construction, Mining and Utility Equipment and the Industrial Machinery and Others, while realigning sales of construction equipment and forklift trucks in Japan. Komatsu also worked to cut down fixed costs. Meanwhile, Komatsu expanded production capacity for hybrid hydraulic excavators and their sales in order to ensure sales and profits. Nevertheless, consolidated net sales for the first six-month period totaled JPY645.9 billion (USD7,258 million, at USD1=JPY89), down 46.7% from the corresponding period a year ago. These sales were partly affected by the Japanese yen’s appreciation in addition to a sharp drop in demand worldwide, except for China. Profits for the six-month period also declined from the corresponding period a year ago. Specifically, operating income declined by 87.6% to JPY19.7 billion (USD222 million). Income before income taxes and equity in earnings of affiliated companies amounted to JPY18.4 billion (USD207 million), down 88.2%. Net income for the first six-month period attributable to Komatsu Ltd. decreased by 91.8% to JPY8.1 billion (USD92 million).

	Millions of yen

Note: Net income attributable to Komatsu Ltd. is equivalent to Net income for the fiscal year ended March 31, 2009 and preceding fiscal years.			

Business results by operation are described below.

Construction, Mining and Utility Equipment

While demand upturned in China in the first six-month period under review, overall demand dropped sharply from the corresponding period a year ago. The Japanese yen also appreciated. Against this backdrop, consolidated net sales of construction, mining and utility equipment totaled JPY569.6 billion (USD6,400 million), down 45.8% from the previous first six-month period.

As demand remained sluggish, Komatsu continued to carry out substantial production adjustment in order to attain an appropriate level of inventories, including those of distributors. As a result, Komatsu achieved the proper inventory level for current demand by the end of the second quarter period under review. Other efforts extended to optimization of production and sales structures and further improvement of operational efficiency, including reorganization of plants, consolidation/elimination of production lines and reorganization of distributors in Japan and overseas.

[Sales of Construction, Mining and Utility Equipment by Region]

	Millions of yen		
	Six months ended September 30, 2009 (A)	Six months ended September 30, 2008 (B)	Changes (A-B)/(B)
Japan	106,509	161,387	(34.0)%
Americas	143,277	270,030	(46.9)%
Europe & CIS	58,849	192,791	(69.5)%
China	104,556	101,566	2.9%
Asia & Oceania	117,362	194,396	(39.6)%
Middle East & Africa	39,052	130,055	(70.0)%
Total	569,605	1,050,225	(45.8)%

Japan

While public-sector investment was firm, resulting from the government's economic measures, private-sector and housing investments remained slack, considerably reducing demand for construction equipment from the corresponding period a year ago. Against this backdrop, Komatsu continued its efforts to reorganize production and sales, nevertheless, impacted by sluggish market conditions, the first six-month sales in Japan declined from the corresponding period a year ago. Komatsu also worked to establish a full-scale commercialization setup for hybrid hydraulic excavators and expand their sales. Komatsu expects strong sales for their outstanding reduction of fuel consumption and CO₂ emissions. Komatsu expanded the production capacity for electric motors and other key components at its Shonan Plant in Hiratsuka City, Kanagawa Prefecture. With respect to sales, Komatsu received orders for about 140 units as of September 30, 2009 (180 units targeted for the current fiscal year ending March 31, 2010).

Americas

North American demand dropped sharply from the corresponding period a year ago, as affected by sluggish housing starts and delaying recovery of the economy in the United States. In Latin America, demand for construction equipment for use in civil engineering declined reflecting sluggish economies, but demand for equipment for mining applications remained relatively firm. In North America, Komatsu focused its efforts on reorganizing production and sales, while reinforcing sales and product support capabilities for mining equipment. However, first six-month sales in the Americas declined sharply from the corresponding period a year ago, reflecting not only sluggish market conditions but also its efforts in production adjustment to attain an appropriate level of inventories.

Europe & CIS

Demand continued to decline markedly in Europe and CIS under sluggish economies. First six-month sales in Europe & CIS dropped sharply from the corresponding period a year ago, as affected by considerable declines of demand in both regions and partly due to Komatsu's proactive efforts to adjust production to promote an appropriate level of inventories at its distributors and narrow down the models produced by its European plants.

China

Recovery of demand became evident with record-high monthly demand being renewed since June as the Chinese government implemented economic stimulus measures for large-scale public works such as railway and highway construction projects in addition to the post-earthquake reconstruction projects in Sichuan Province. As a result, first six-month sales in China increased over the corresponding period a year ago.

In August this year, Komatsu embarked on the pilot market introduction of its hybrid hydraulic excavators to China ahead of other overseas markets.

Asia & Oceania

Demand declined in Asia & Oceania from the corresponding period a year ago, as affected by economic slowdown. However, signs of recovery began to emerge in the mining and agricultural sectors of Indonesia and mining and infrastructure development sectors of India. In this environment, Komatsu continued its efforts to strengthen sales and product support capabilities. However, first six-month sales decreased from the corresponding period a year ago, as partly affected by production adjustment made to reduce distributors' inventories to an appropriate level.

Middle East & Africa

While commodity prices showed upturning signs, demand remained sluggish in the Middle East & Africa as affected by economic recession. In this environment, Komatsu worked to strengthen its product support capabilities, for example, by opening a new training center in Dakar, Senegal. However, first six-month sales declined from the corresponding period a year ago, reflecting a drop in demand in the Middle East in addition to production adjustment made to reduce inventories to an appropriate level.

Industrial Machinery and Others

Consolidated sales of industrial machinery and other operations for the first six-month period totaled JPY76.3 billion (USD858 million), down 52.6% from the corresponding period a year ago, as the automobile and many other client industries continued to restrain from making capital investment. This resulted in a sizable drop in new orders for industrial machinery.

As a challenging environment remained, Komatsu continued to advance structural reforms such as the reorganization of production, and reinforced its sales and product support capabilities in China which has strong potential for market growth. In Japan, Komatsu applied KOMTRAX to industrial machinery, getting ready for market introduction in the second half period of the current fiscal year. KOMTRAX, a Komatsu-original monitoring system for construction equipment, is a market-proven, pacesetting system for the industry.

2. Financial Conditions

As of September 30 2009, total assets had decreased by JPY57.2 billion from the previous fiscal year-end, to JPY1,911.7 billion (USD21,481 million), largely due to a decrease in inventories resulting from our proactive efforts to reduce inventories to an appropriate level. Interest-bearing debt increased by JPY46.6 billion from the previous fiscal year-end, to JPY646.4 billion (USD7,264 million). This increase is mainly attributable to the inclusion of a retail finance company in Australia as a consolidated subsidiary. Komatsu Ltd. shareholders' equity amounted to JPY801.8 billion (USD9,009 million), a decline of JPY13.1 billion from the previous fiscal year-end. As a result, Komatsu Ltd. shareholders' equity ratio increased to 41.9%, up 0.5 percentage points from the previous fiscal year-end. Net debt-to-equity ratio* was 0.69 compared to 0.62 as of the previous fiscal year-end.

For the first six-month period under review, net cash provided by operating activities amounted to JPY87.4 billion (USD983 million), an increase of JPY29.0 billion from the corresponding period a year ago, mainly due to a decrease in working capital. Net cash used in investing activities declined by JPY25.4 billion from the corresponding period a year ago, to JPY45.0 billion (USD507 million), due to restrained investments in Japan and overseas. Net cash used in financing activities amounted to JPY38.2 billion (USD430 million), an increase of JPY24.5 billion from the previous first-six month period. As a result, cash and cash equivalents, as of September 30, 2009, increased by JPY1.1 billion from the previous fiscal year-end, to JPY91.6 billion (USD1,030 million).

3. Projections for the Fiscal Year Ending March 31, 2010

(From April 1, 2009 to March 31, 2010)

In the construction, mining and utility equipment business, Komatsu is going to shift to production which is in tune with market demand. We achieved the proper inventory level for current demand by the end of the second quarter period after our proactive, large-scale production adjustment efforts. In terms of the market environment, while recovery of the Chinese market became clearly evident and signs of market recovery began to emerge in Indonesia and India, we are estimating that market conditions in Japan, North America and Europe will remain more sluggish than we had earlier anticipated. In the industrial machinery and others business, as we cannot look forward to capital investment by the automobile manufacturing industry, our main client, we are projecting that a challenging environment for presses, sheet metal machines and machine tools will remain. By considering these conditions, we have revised our projection of consolidated net sales for the current fiscal year ending March 31, 2010 as follows. With respect to profits, we should be able to keep the same figures as projected as we continue to work together as the entire Komatsu Group to reduce fixed and production costs.

As preconditions for our current projections, we are assuming the foreign exchange rates in the third and fourth quarters to be as follows: USD1 = JPY95 and EUR1 = JPY125. With respect to the average rates for the full year, we are keeping the same figure for the U.S. dollar as our earlier projection (USD1 = JPY95), but for the euro, we have changed to EUR1 = JPY129 from our earlier projection of JPY125.

	Earlier projection (A)	Current projection (B)	Millions of yen Changes Increase (Decrease) (B)-(A)		Results for FY ended Mar. 31, 2009
Net sales	1,530,000	1,430,000	(100,000)	(6.5)%	2,021,743
Operating income	72,000	72,000			151,948
Income before income taxes and equity in earnings of affiliated companies	62,000	62,000			128,782
Net income attributable to Komatsu Ltd.	35,000	35,000			78,797
Note: Net income attributable to Komatsu Ltd. is equivalent to Net income for the fiscal year ended March 31, 2009 and preceding fiscal years.					

[Reference]**Projections of the Parent Company for the Fiscal Year Ending March 31, 2010**

Similar to the projections for consolidated business results, we are projecting that non-consolidated net sales will decline from our projection of April 2009. With respect to profits, we are also estimating that they will decrease from our projections, because our efforts in reducing fixed and production costs on a non-consolidated basis won't be able to make up for a decline in sales.

	Earlier projection (A)	Current projection (B)	Millions of yen Changes Increase (Decrease) (B)-(A)		Results for FY ended Mar. 31, 2009
Net sales	520,000	430,000	(90,000)	(17.3)%	787,028
Operating profit	(20,000)	(35,000)	(15,000)		26,746
Ordinary profit	0	(10,000)	(10,000)		40,034
Net income	5,000	0	(5,000)	(100.0)%	9,317

4. Others

(1) Changes in important subsidiaries during the first six-month period ended September 30, 2009: None

(2) Used of simplified accounting procedures and of specific accounting procedures for the preparation of consolidated quarterly financial statements: None

(3) Changes in accounting standards, procedures and presentations for the preparation of consolidated quarterly financial statements

1) Changes resulting from revisions in accounting standards, etc.: Applicable

Komatsu adopted the FASB Accounting Standards Codification™ (ASC) 105, Generally Accepted Accounting Principles (Formerly SFAS No.168, The FASB Accounting Standards Codification™ and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB Statement No.162) in September 2009. ASC 105 prescribes that FASB Accounting Standard Codification™ (Codification) is the single official source of authoritative U.S. generally accepted accounting principle, doing away with the previous four-level hierarchy.

The financial statements that adopted ASC 105 should follow the Codification in place of legacy accounting pronouncements. SFAS No.168 is superseded by ASC 105. The adoption of ASC 105 did not have a material impact on our consolidated result of operations and financial condition.

Specific standard number of FASB statement is referred in () hereinafter.

Starting in the fiscal year which began April 1, 2009, Komatsu adopted ASC 805, Business Combinations (Formerly SFAS No.141R, Business Combinations). ASC 805 establishes principles and requirements for how an acquirer recognizes and measures in its financial statements the identifiable assets acquired, the liabilities assumed, any noncontrolling interest in the acquiree and the goodwill acquired or gain from a bargain purchase. ASC 805 also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. The adoption of ASC 805 did not have a material impact on our consolidated result of operations and financial condition.

Starting in the fiscal year which began April 1, 2009, Komatsu adopted ASC 810, Consolidation (Formerly SFAS No.160, Noncontrolling Interests in Consolidated Financial Statements – an amendment of ARB No.51). ASC 810 establishes accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. ASC 810 also establishes disclosure requirements that clearly identify and distinguish between the controlling and noncontrolling interests, and requires the separate disclosure of income attributable to controlling and noncontrolling interests. Previously reported amounts have been reclassified accordingly.

2) Change in other matters except for 1) above: None

Cautionary Statement

The announcement set forth herein contains forward-looking statements which reflect management's current views with respect to certain future events, including expected financial position, operating results, and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects and similar terms expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured. Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated cost or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; and, the impact of regulatory changes and accounting principles and practices.

**Announcement Concerning the Change from Projected Business Results
 (Consolidated)**

Komatsu Ltd. (President & CEO: Kunio Noji) announces that there are changes in actual consolidated business results for six months of the fiscal year ending March 31, 2010 from the projections of April 27, 2009 as follows.

1. Differences between Projections and Results for Six Months of the Fiscal Year Ending March 31, 2010

Consolidated (U.S.GAAP)

	Millions of yen				Six months ended September 30, 2008
	Projections (A)	Results (B)	Changes Increase (decrease) (B)-(A)		
Net sales	700,000	645,963	(54,037)	(7.7)%	1,211,288
Operating income	15,000	19,785	4,785	31.9%	159,654
Income before income taxes and equity in earnings of affiliated companies	10,000	18,452	8,452	84.5%	156,728
Net income attributable to Komatsu Ltd.	4,000	8,198	4,198	105.0%	100,341

Note: Net income attributable to Komatsu Ltd. is equivalent to Net income for the fiscal year ended March 31, 2009 and preceding fiscal year.

2. Reasons for the Differences

In the construction, mining and utility equipment business, while recovery of the Chinese market became clearly evident, market conditions in Japan, North America and Europe deteriorated more than we had earlier anticipated. As a result, sales for the first six-month period (April 1 – September 30, 2009) were smaller than our projection of April 27, 2009. Meanwhile, profits were larger than our projections, mainly because we made more efforts to reduce fixed costs in light of the challenging business environment, and recorded a reversal of allowance for doubtful accounts in the industrial machinery and others business.

(end)

**Revision of Projections for the Fiscal Year Ending March 31, 2010
 (Consolidated and Non-consolidated)**

Komatsu Ltd. (President & CEO: Kunio Noji) has revised the projections for consolidated and non-consolidated results for the fiscal year ending March 31, 2010, which the Company announced on April 27, 2009.

1. Revision of Projections for the Fiscal Year Ending March 31, 2010

1) Consolidated (U.S.GAAP)

	Earlier projection (A)	Current projection (B)	Millions of yen Changes Increase (Decrease) (B)-(A)		Results for FY ended Mar. 31, 2009
Net sales	1,530,000	1,430,000	(100,000)	(6.5)%	2,021,743
Operating income	72,000	72,000			151,948
Income before income taxes and equity in earnings of affiliated companies	62,000	62,000			128,782
Net income attributable to Komatsu Ltd.	35,000	35,000			78,797

Note: Net income attributable to Komatsu Ltd. is equivalent to Net income for the fiscal year ended March 31, 2009 and preceding fiscal year.

< Reasons for the Revision >

In the construction, mining and utility equipment business, recovery of the Chinese market became clearly evident and signs of market recovery began to emerge in Indonesia and India. Meanwhile, we are assuming that market conditions in Japan, North America and Europe will become more challenging than we estimated earlier. All combined, we are projecting that net sales for the fiscal year ending March 31, 2010 will be smaller than our projection of April 27, 2009. With respect to profits, we are anticipating that we should be able to keep the same figures as projected by working harder as the entire Komatsu Group to reduce fixed and production costs.

As preconditions for our current projections, we are assuming the foreign exchange rates in the third and fourth quarters as follows: USD1 = JPY95 and EUR1 = JPY125. With respect to the average rates for the full year, we are keeping the same figure for the U.S. dollar as our earlier projection (USD1 = JPY95), but for the euro, we have changed to EUR1 = JPY129 from our earlier projection of JPY125.

2) Non-consolidated

	Earlier projection (A)	Current projection (B)	Millions of yen Changes Increase (Decrease) (B)-(A)		Results for FY ended Mar. 31, 2009
Net sales	520,000	430,000	(90,000)	(17.3)%	787,028
Operating profit	(20,000)	(35,000)	(15,000)		26,746
Ordinary profit	0	(10,000)	(10,000)		40,034
Net income	5,000	0	(5,000)	(100.0)%	9,317

< Reasons for the Revision >

Similar to the projections for consolidated business results, we are projecting that non-consolidated net sales will decline from our projection of April 2009. With respect to profits, we are also estimating that they will decrease from our projections, because our efforts in reducing fixed and production costs on a non-consolidated basis won't be able to make up for a decline in sales.

(end)

Cautionary Statement

The announcement set forth herein contains forward-looking statements which reflect management's current views with respect to certain future events, including expected financial position, operating results, and business strategies. These statements can be identified by the use of terms such as will, believes, should, projects and similar terms or expressions that identify future events or expectations. Actual results may differ materially from those projected, and the events and results of such forward-looking assumptions cannot be assured.

Factors that may cause actual results to differ materially from those predicted by such forward-looking statements include, but are not limited to, unanticipated changes in demand for the Company's principal products, owing to changes in the economic conditions in the Company's principal markets; changes in exchange rates or the impact of increased competition; unanticipated cost or delays encountered in achieving the Company's objectives with respect to globalized product sourcing and new Information Technology tools; uncertainties as to the results of the Company's research and development efforts and its ability to access and protect certain intellectual property rights; and, the impact of regulatory changes and accounting principles and practices.
