NORTHFIELD BANCORP, INC.
(Exact name of registrant as specified in its charter)

United States of America
(State or other jurisdiction of incorporation)

42-1572539
(I.R.S. Employer Identification No.)

1410 St. Georges Avenue, Avenel, New Jersey
(Address of principal executive offices)

07001
(Zip Code)

Registrant's telephone number, including area code: (732) 499-7200

Not Applicable

(Former name, former address, and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No . Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for shorter period that the registrant was required and post such files). Yes No . Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No .

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date. 44,172,018 shares of Common Stock, par value \$0.01 per share, were issued and outstanding as of November 6,

2009.

Table of Contents**Note 1 Basis of Presentation**

The consolidated financial statements are comprised of the accounts of Northfield Bancorp, Inc., and its wholly owned subsidiary, Northfield Bank (the Bank) and the Bank's wholly-owned significant subsidiaries, NSB Services Corp. and NSB Realty Trust (collectively, the Company). All significant intercompany accounts and transactions have been eliminated in consolidation.

In the opinion of management, all adjustments (consisting of normal and recurring adjustments) necessary for the fair presentation of the consolidated financial condition and the consolidated results of operations for the unaudited periods presented have been included. The results of operations and other data presented for the three- and nine-month periods ended September 30, 2009, are not necessarily indicative of the results of operations that may be expected for the year ending December 31, 2009. Certain prior year amounts have been reclassified to conform to the current year presentation.

Certain information and note disclosures usually included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) for the preparation of interim financial statements. The consolidated financial statements presented should be read in conjunction with the audited consolidated financial statements and notes to consolidated financial statements included in the Annual Report on Form 10-K for the year ended December 31, 2008, of Northfield Bancorp, Inc. as filed with the SEC.

Subsequent events have been evaluated through November 9, 2009, which is the date the financial statements were issued.

Note 2 Securities Available-for-Sale

The following is a comparative summary of mortgage-backed securities and other securities available-for-sale at September 30, 2009, and December 31, 2008 (in thousands):

		September 30, 2009		
	Amortized cost	Gross unrealized gains	Gross unrealized losses	Estimated fair value

Total securities available-for-sale	\$ 957,257	17,482	17,154	957,585

The following is a summary of the expected maturity distribution of debt securities available-for-sale, other than mortgage-backed securities, at September 30, 2009 (in thousands):

Available-for-sale	Amortized cost	Estimated fair value
One through five years	\$ 213,404	215,225

For the nine months ended September 30, 2009, the Company had gross proceeds of \$2.0 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$7,000 and \$0, respectively. For the nine months ended September 30, 2008, the Company had gross proceeds of \$3.3 million on sales of securities available-for-sale with gross realized gains and gross realized losses of approximately \$10,000 and \$0, respectively. The Company recognized other-than-temporary impairment charges of \$1.4 million during the three and nine months ended September 30, 2009 related to one private label mortgage-backed security. The Company recognized the credit component of \$176,000 in earnings and the non-credit component of \$1.2 million as a component of accumulated other comprehensive income, net of tax. The Company did not record other-than-temporary impairment charges during the nine months ended September 30, 2008.

Activity related to the credit component recognized in earnings on debt securities for which a portion of other-than-temporary impairment was recognized in accumulated other comprehensive income for the three and nine months ended September 30, 2009 is as follows (in thousands):

Three Months	Nine Months Ended
-------------------------	------------------------------

	Ended September 30, 2009	September 30, 2009
Balance, beginning of period	\$	
Additions to the credit component on debt securities in which other-than-temporary impairment was not previously recognized	176	176
Balance, end of period	\$176	176

Gross unrealized losses on mortgage-backed securities, GSE bonds, and corporate bonds available-for-sale, and the estimated fair value of the related securities, aggregated by security category and length of time that individual securities have been in a continuous unrealized loss position, at September 30, 2009, and December 31, 2008, were as follows (in thousands):

7

Non-GSE	7,266	68,966			7,266	68,966
Corporate bonds	70	4,298			70	4,298
Total	\$ 10,088	110,455	7,066	37,852	17,154	148,307

At September 30, 2009, there were eight non-GSE mortgage-backed securities in an unrealized loss position. Only three securities with an estimated fair value of \$17.5 million are rated less than AAA at September 30, 2009. The first of these three securities had an estimated fair value of \$5.4 million (unrealized loss of \$1.4 million prior to impairment charge) and was rated CCC, the second had an estimated fair value of \$5.8 million (unrealized loss of \$2.6 million) and was rated Baa2, with the third having an estimated fair value of \$6.3 million (unrealized loss of \$1.0 million) and was rated AA. The Company continues to receive principal and interest payments in accordance with the contractual terms on each of the three securities. Management has evaluated, among other things, delinquency status, estimated prepayment speeds and the estimated default rates and loss severity in liquidating the underlying collateral for each of these three securities. As a result of management's evaluation of these securities, the Company recognized an other-than-temporary impairment charge of \$1.4 million on the \$5.4 million security that was rated CCC. The credit component of \$176,000 was recognized in earnings and the non-credit component of \$1.2 million was recorded as a component of accumulated other comprehensive income, net of tax. The Company has no intent to sell, nor is it more likely than not than the Company will be required to sell, the securities contained in the table above before the recovery of their amortized cost basis or, if necessary, maturity.

In evaluating the range of likely cash flows for the impaired private label security, the Company applied security specific, as well as market assumptions, based on the credit characteristics of the security to a cash flow model. Under certain stress scenarios estimated future losses may arise. For the security in which the Company recorded

other-than-temporary impairment, the average portfolio FICO score at origination was 740 and the weighted average loan to value ratio was 70.3%. Cash flow assumptions incorporated an expected constant default rate of 6.8% and an ultimate loss on disposition of underlying collateral of 47.4%. The security's cash flows were discounted at the security's effective interest rate (the yield expected to be earned at date of purchase). Although management recognized other-than-temporary impairment charges on this security, the security continues to receive principal and interest payments in accordance with its contractual terms.

Mortgage-backed securities issued or guaranteed by GSEs (eight securities) and GSE bonds (three securities) are investment grade securities. The declines in value are deemed to relate to the general interest rate environment and are considered temporary. The securities cannot be prepaid in a manner that would result in the Company not receiving substantially all of its amortized cost. The Company has no intent to sell, nor is it more likely than not that the Company will be required to sell, the securities contained in the table above before the recovery of their amortized cost basis or, if necessary, maturity.

Table of Contents

The fair values of our securities could decline in the future if the underlying performance of the collateral for the mortgage-backed securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result, there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

Note 3 Securities Held-to-Maturity

The following is a comparative summary of mortgage-backed securities held-to-maturity at September 30, 2009, and December 31, 2008 (in thousands):

	September 30, 2009			Estimated fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Mortgage-backed securities:				
Pass-through certificates:				
GSE	\$ 4,422	146		4,568
REMICs:				
GSE	6,561	166		6,727
Total securities held-to-maturity	\$ 10,983	312		11,295

	December 31, 2008			Estimated fair value
	Amortized cost	Gross unrealized gains	Gross unrealized losses	
Mortgage-backed securities:				
Pass-through certificates:				
GSE	\$ 6,132	141		6,273
REMICs:				
GSE	8,347	13	45	8,315
Total securities held-to-maturity	\$ 14,479	154	45	14,588

The Company did not sell any held-to-maturity securities during the nine months ended September 30, 2009 or 2008.

Gross unrealized losses on mortgage-backed securities held-to-maturity and the estimated fair value of the related securities, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, at December 31, 2008, were as follows (in thousands):

	Less than 12 months		December 31, 2008		Total	
	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value	Unrealized losses	Estimated fair value
REMICs:						
GSE	\$ 45	5,536			45	5,536
Total	\$ 45	5,536			45	5,536

Mortgage-backed securities issued or guaranteed by GSEs are investment grade securities. Any fluctuations in value are deemed to relate to the general interest rate environment and are considered temporary. The securities

Table of Contents

cannot be prepaid in a manner that would result in the Company not receiving substantially all of its amortized cost. At September 30, 2009, there are no securities held-to-maturity in an unrealized loss position.

The fair values of our securities could decline in the future if the underlying performance of the collateral for the mortgage-backed securities deteriorates and our credit enhancement levels do not provide sufficient protections to our contractual principal and interest. As a result, there is a risk that significant other-than-temporary impairments may occur in the future given the current economic environment.

Note 4 Net Loans Held-for-Investment

Net loans held-for-investment are as follows (in thousands):

	September 30, 2009	December 31, 2008
Real estate loans:		
Commercial mortgage	\$318,573	289,123
One- to four- family residential mortgage	90,382	103,128
Construction and land	43,981	52,158
Multifamily	166,957	108,534
Home equity and lines of credit	25,432	24,182
Total real estate loans	645,325	577,125
Commercial and industrial loans	19,494	11,025
Other loans	1,404	1,339
Total commercial and industrial and other loans	20,898	12,364
Total loans held-for-investment	666,223	589,489
Deferred loan cost, net	494	495
Loans held-for-investment, net	666,717	589,984
Allowance for loan losses	(14,196)	(8,778)
Net loans held-for-investment	\$652,521	581,206

Activity in the allowance for loan losses is as follows (in thousands):

	At or for the nine months ended September 30, 2009 2008	
Beginning balance	\$ 8,778	5,636
Provision for loan losses	7,466	3,114
Charge-offs, net	(2,048)	(1,014)
Ending balance	\$ 14,196	7,736

Table of Contents

The following table summarizes non-performing loans (in thousands):

	September 30, 2009	December 31, 2008
Non-accruing loans	\$ 15,997	8,552
Non-accruing loans subject to restructuring agreements	14,238	950
Total non-accruing loans	30,235	9,502
Loans 90 days or more past maturity and still accruing	5,487	137
Total non-performing loans	\$ 35,722	9,639

Loans subject to restructuring agreements and still accruing \$ 7,258

Loans 90 days or more past maturity are paying in accordance with their pre-maturity terms, and are considered well secured and in the process of collection. The Company has commitments of approximately \$375,000 to lend additional funds to borrowers whose loans are on non-accrual status or who are past due 90 days or more and still accruing interest. These commitments will be used to fund completion of construction developments. The funding will coincide with signed commitments for the purchase of completed homes.

Included in the above table are impaired loans of \$33.7 million at September 30, 2009. At September 30, 2009, \$14.8 million of these loans had allocated reserves of \$2.3 million. The remaining \$18.9 million had no allocated loan loss reserves. In addition, the Company recorded net charge-offs of \$1.3 million related to \$11.6 million of total outstanding impaired loans for the nine months ended September 30, 2009. The average balance of impaired loans was \$22.9 million for the nine months ending September 30, 2009. The Company recorded \$504,000 of interest income on impaired loans for the nine months ended September 30, 2009.

Included in the above table are impaired loans of \$6.6 million, at December 31, 2008. At December 31, 2008, the Company recorded \$310,000 in provisions for loan losses related to \$2.8 million of total outstanding impaired loans. Impaired loans outstanding for which there is no related allowance for loan losses amounted to \$3.8 million. The Company recorded \$0 of interest income on impaired loans for the nine months ending September 30, 2008.

Note 5 Deposits

Deposits are as follows (in thousands):

	September 30, 2009	December 31, 2008
Non-interest-bearing demand	\$ 101,462	93,170
Interest-bearing negotiable orders of withdrawal (NOW)	93,642	64,382
Savings-passbook, statement, tiered, and money market	507,863	449,302
Certificates of deposit	590,466	417,585
	\$ 1,293,433	1,024,439

Interest expense on deposit accounts is summarized for the periods indicated (in thousands):

Three months ended September 30,		Nine months ended September 30,	
2009	2008	2009	2008

Edgar Filing: Northfield Bancorp, Inc. - Form 10-Q

Negotiable order of withdrawal, savings-passbook, statement, tiered, and money market	\$ 1,484	1,503	4,589	3,649
Certificates of deposit	2,861	2,774	9,299	9,844
	\$4,345	4,277	13,888	13,493

Table of Contents**Note 6 Income Taxes**

The Company files income tax returns in the United States federal jurisdiction and in New York State and City jurisdictions. The Company and the Bank also file income tax returns in the State of New Jersey. With limited exceptions, the Company is no longer subject to federal, state, and local income tax examinations by tax authorities for years prior to 2004. The following is a reconciliation of the beginning and ending gross unrecognized tax benefits for the nine months ended September 30, 2008. The Company settled all its unrecognized tax benefits in the second quarter of 2008. The amounts have not been reduced by the federal deferred tax effects of unrecognized state benefits (in thousands).

Unrecognized tax benefits at January 1, 2008	\$ 2,700
Payments for tax positions of prior years	(2,700)
Unrecognized tax benefits at September 30, 2008	\$

The Company records interest accrued related to uncertain tax benefits as tax expense. During the three and nine months ended September 30, 2008, the Company expensed \$0 and \$69,000, respectively, in interest on uncertain tax positions. The Company records penalties accrued as other expenses. The Company has not accrued for penalties.

Note 7 Equity Incentive Plan

At the Special Meeting of the Stockholders of the Company (the Meeting) held on December 17, 2008, the stockholders of the Company approved the Northfield Bancorp, Inc. 2008 Equity Incentive Plan. On January 30, 2009, certain officers and employees of the Company were granted an aggregate of 1,478,900 stock options and 582,700 shares of restricted stock, and non-employee directors received an aggregate of 623,700 stock options and 249,750 shares of restricted stock. On May 29, 2009, an employee was granted 3,800 stock options and 4,200 restricted stock awards. All stock options and restricted stock vest in equal installments over a five year period beginning one year from the date of grant. The vesting of options and restricted stock awards may accelerate in accordance with terms of the plan. Stock options were granted at an exercise price equal to the fair value of the Company's common stock on the grant date based on quoted market prices and all have an expiration period of ten years. The fair value of stock options granted on January 30, 2009, was estimated utilizing the Black-Scholes option pricing model using the following assumptions: an expected life of 6.5 years utilizing the simplified method, risk-free rate of return of 2.17%, volatility of 35.33% and a dividend yield of 1.61%. The fair value of stock options granted on May 29, 2009, were estimated utilizing the Black-Scholes option pricing model using the following assumptions: an expected life of 6.5 years utilizing the simplified method, risk-free rate of return of 2.88%, volatility of 38.39% and a dividend yield of 1.50%. The Company is expensing the grant date fair value of all employee and director share-based compensation over the requisite service periods on a straight-line basis.

During the three and nine months ended September 30, 2009, the Company recorded \$835,000 and \$2.2 million of stock-based compensation, respectively. There was no stock based compensation during the three and nine months ended September 30, 2008.

The following table is a summary of the Company's non-vested stock options as of September 30, 2009, and changes therein during the nine months then ended:

Table of Contents

	Number of Stock Options	Weighted Average Grant Date Fair Value	Weighted Average Exercise Price	Weighted Average Contractual Life (years)
Outstanding- December 31, 2008				
Granted	2,106,400	\$ 3.22	\$ 9.94	10
Forfeited				
Outstanding- September 30, 2009	2,106,400	\$ 3.27	\$ 9.94	9.33
Exercisable- September 30, 2009				

Expected future stock option expense related to the non-vested options outstanding as of September 30, 2009 is \$5.9 million over an average period of 4.3 years.

The following is a summary of the status of the Company's restricted shares as of September 30, 2009, and changes therein during the nine months then ended.

	Number of Shares Awarded	Weighted Average Grant Date Fair Value
Non-vested at December 31, 2008		
Granted	836,650	\$ 9.94
Vested		
Forfeited		
Non-vested at September 30, 2009	836,650	\$ 10.04

Expected future stock award expense related to the non-vested restricted awards as of September 30, 2009 is \$7.2 million over an average period of 4.3 years.

Upon the exercise of stock options, management expects to utilize treasury stock as the source of issuance for these shares.

Note 8- Fair Value of Financial Instruments

Fair value estimates, methods, and assumptions are set forth below for the Company's financial instruments.

(a) Cash, Cash Equivalents, and Certificates of Deposit

Cash and cash equivalents are short-term in nature with original maturities of three months or less; the carrying amount approximates fair value. Certificates of deposit having original terms of six months or less; carrying value generally approximates fair value. Certificates of deposit with an original maturity of six months or greater the fair value is derived from discounted cash flows.

(b) Securities

The fair values for substantially all of our securities are obtained from an independent nationally recognized third-party pricing service. The independent pricing service utilizes market prices of same or similar securities

whenever such prices are available. Prices involving distressed sellers are not utilized in determining fair value. Where necessary, the independent third-party pricing service estimates fair value using models employing techniques such as discounted cash flow analyses. The assumptions used in these models typically include assumptions for interest rates, credit losses, and prepayments, utilizing market observable data where available.

Table of Contents

(c) Federal Home Loan Bank of New York Stock

The fair value for Federal Home Loan Bank of New York stock is its carrying value, since this is the amount for which it could be redeemed and there is no active market for this stock.

(d) Loans

Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as residential mortgage, construction, land, multifamily, commercial and consumer. Each loan category is further segmented into amortizing and non-amortizing and fixed and adjustable rate interest terms and by performing and nonperforming categories. The fair value of loans is estimated by discounting the future cash flows using current prepayment assumptions and current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Fair value for significant nonperforming loans is based on external appraisals of collateral securing such loans, adjusted for the timing of anticipated cash flows.

(e) Deposits

The fair value of deposits with no stated maturity, such as non-interest-bearing demand deposits, savings, and NOW and money market accounts, is equal to the amount payable on demand. The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar remaining maturities.

(f) Commitments to Extend Credit and Standby Letters of Credit

The fair value of commitments to extend credit and standby letters of credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates. The fair value of off-balance-sheet commitments is insignificant and therefore not included in the following table.

(g) Borrowings

The fair value of borrowings is estimated by discounting future cash flows based on rates currently available for debt with similar terms and remaining maturity.

(h) Advance Payments by Borrowers

Advance payments by borrowers for taxes and insurance have no stated maturity; the fair value is equal to the amount currently payable.

Table of Contents

The estimated fair values of the Company's significant financial instruments at September 30, 2009, and December 31, 2008, are presented in the following table (in thousands):

	September 30, 2009		December 31, 2008	
	Carrying value	Estimated Fair value	Carrying value	Estimated Fair value
Financial assets:				
Cash and cash equivalents	\$ 86,179	86,179	50,128	50,128
Certificates of deposit in other financial institutions			53,653	53,873
Trading securities	3,345	3,345	2,498	2,498
Securities available-for-sale	1,142,499	1,142,499	957,585	957,585
Securities held-to-maturity	10,983	11,295	14,479	14,588
Federal Home Loan Bank of New York stock, at cost	6,601	6,601	9,410	9,410
Net loans held-for-investment	652,521	670,478	581,206	610,713
Loans held-for-sale	357	367		
Financial liabilities:				
Deposits	\$1,293,433	1,296,977	1,024,439	1,027,896
Repurchase agreements and other borrowings	283,480	293,717	332,084	340,404
Advance payments by borrowers	2,463	2,463	3,823	3,823

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Company's financial instruments, fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Fair value estimates are based on existing on- and off-balance-sheet financial instruments without attempting to estimate the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in the estimates.

Note 9 Fair Value Measurements

The following table presents the assets reported on the consolidated balance sheet at their estimated fair value as of September 30, 2009, by level within the fair value hierarchy as required by the Fair Value Measurements and Disclosures Topic of the FASB Accounting Standards Codification (ASC). Financial assets and liabilities are classified in their entirety based on the level of input that is significant to the fair value measurement. The fair value hierarchy is as follows:

Table of Contents

Level 1 Inputs Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 Inputs Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability (for example, interest rates, volatilities, prepayment speeds, loss severities, credit risks and default rates) or inputs that are derived principally from or corroborated by observable market data by correlations or other means.

Level 3 Inputs Significant unobservable inputs that reflect the Company's own assumptions that market participants would use in pricing the assets or liabilities.

The following tables summarize financial assets and financial liabilities measured at fair value on a recurring basis as of September 30, 2009, and December 31, 2008, respectively, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value (in thousands):

		Fair Value Measurements at Reporting Date Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	September 30, 2009			
Assets:				
Investment securities:				
Available-for-sale:				
Mortgage-backed securities	\$ 900,170		900,170	
Corporate bonds	110,348		110,348	
GSE bonds	104,877		104,877	
Equities	27,104	27,104		
Total available-for-sale	1,142,499	27,104	1,115,395	
Trading securities	3,345	3,345		
Total	\$ 1,145,844	30,449	1,115,395	

		Fair Value Measurements at Reporting Date Using:		
		Quoted Prices in Active Markets for	Significant Other Observable	Significant Unobservable

	December 31, 2008	Identical Assets (Level 1)	Inputs (Level 2)	Inputs (Level 3)
Assets:				
Investment securities:				
Available-for-sale:				
Mortgage-backed securities	\$ 931,209		931,209	
Corporate bonds	17,351		17,351	
Equities	9,025	9,025		
Total available-for-sale	957,585	9,025	948,560	
Trading securities	2,498	2,498		
Total	\$ 960,083	11,523	948,560	

Available -for- Sale Securities: The estimated fair values for mortgage-backed, GSE and corporate securities are obtained from an independent nationally recognized third-party pricing service. The estimated fair values are derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and

Table of Contents

prepayment speeds. Broker/dealer quotes are utilized as well when such quotes are available and deemed representative of the market. The significant inputs utilized in the cash flow models are based on market data obtained from sources independent of the Company (Observable Inputs), and are therefore classified as Level 2 within the fair value hierarchy. The estimated fair values of equity securities, classified as Level 1, are derived from quoted market prices in active markets. Equity securities consist primarily of money market mutual funds.

Trading Securities: Fair values are derived from quoted market prices in active markets. The assets consist of publicly traded mutual funds.

Also, the Company may be required, from time to time, to measure the fair value of certain other financial assets on a nonrecurring basis in accordance with U.S. generally accepted accounting principles. The adjustments to fair value usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets.

Impaired Loans: At September 30, 2009, the Company had impaired loans with outstanding principal balances of \$26.4 million that were recorded at the estimated fair value of collateral, less cost to sell. The Company recorded net impairment charges of \$2.0 million and \$3.6 million for the three and nine months ended September 30, 2009, compared to \$0 and \$241,000 for the same prior periods, respectively, utilizing Level 3 inputs. Impaired assets are valued utilizing independent appraisals adjusted downward by management, as necessary, for changes in relevant valuation factors subsequent to the appraisal date and the present value of expected cash flows for non-collateral dependent loans and troubled debt restructurings.

Other Real Estate Owned: At September 30, 2009 the Company had assets acquired through or deed-in-lieu of foreclosure of \$933,000 recorded at estimated fair value, less estimated selling costs when acquired, thus establishing a new cost basis. Fair value is generally based on independent appraisals. These appraisals include adjustments to comparable assets based on the appraisers' market knowledge and experience, and are considered Level 3 inputs. When an asset is acquired, the excess of the loan balance over fair value, less estimated selling costs, is charged to the allowance for loan losses. If the estimated fair value of the asset declines, a write-down is recorded through expense. The valuation of foreclosed assets is subjective in nature and may be adjusted in the future because of changes in economic conditions. Subsequent valuation adjustments to other real estate owned totaled \$60,000 and \$138,000 for the three and nine months ended September 30, 2009, respectively, reflective of continued deterioration in estimated fair values. Operating costs after acquisition are generally expensed.

Note 10 Stock Repurchase Program

On February 13, 2009, the Board of Directors of the Company authorized a stock repurchase program pursuant to which the Company intends to repurchase up to 2,240,153 shares, representing approximately 5% of its outstanding shares. The timing of the repurchases depends on certain factors, including but not limited to, market conditions and prices, the Company's liquidity and capital requirements, and alternative uses of capital. Any repurchased shares are expected to be held as treasury stock and available for general corporate purposes. The Company is conducting such repurchases in accordance with a Rule 10b5-1 trading plan. As of September 30, 2009, a total of 1,175,050 shares were purchased under this repurchase plan at a weighted average cost of \$11.05.

Note 11 Earnings Per Share

Basic earnings per share is computed by dividing net income available to common stockholders by the weighted average number of shares outstanding during the period. For purposes of calculating basic earnings per share, weighted average common shares outstanding excludes unallocated employee stock ownership plan (ESOP) shares that have not been committed for release and unvested restricted stock.

Diluted earnings per share is computed using the same method as basic earnings per share, but reflects the potential dilution that could occur if stock options and unvested shares of restricted stock were exercised and converted into common stock. These potentially dilutive shares are included in the weighted average number of shares outstanding for the period using the treasury stock method. When applying the treasury stock method, we add: (1) the assumed proceeds from option exercises; (2) the tax benefit, if any, that would have been credited to additional paid-in capital assuming exercise of non-qualified stock options and vesting of shares of restricted stock; and (3) the average unamortized compensation costs related to unvested shares of restricted stock and stock options. We then divide this sum by our average stock price for the period to calculate assumed shares repurchased. The

Table of Contents

excess of the number of shares issuable over the number of shares assumed to be repurchased is added to basic weighted average common shares to calculate diluted earnings per share.

The following is a summary of the Company's earnings per share calculations and reconciliation of basic to diluted earnings per share for the periods indicated (dollars in thousands):

	For the three months ended		For the nine months ended	
	September 30,		September 30,	
	2009	2008	2009	2008
Net income available to common stockholders	\$ 3,187	3,275	8,044	12,445
Weighted average shares outstanding-basic	42,212,440	43,140,090	42,639,492	43,126,500
Effect of non-vested restricted stock and stock options outstanding	162,828		90,426	
Weighted average shares outstanding-diluted	42,375,268	43,140,090	42,729,918	43,126,500
Earnings per share-basic	\$ 0.08	0.08	0.19	0.29
Earnings per share-diluted	\$ 0.08	0.08	0.19	0.29

Note 12 Contingencies

On September 29, 2009, the Federal Deposit Insurance Corporation issued a proposed rule pursuant to which all insured depository institutions would be required to prepay their estimated assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012. Under the proposed rule, based on our deposits and assessment rate at September 30, 2009, we estimate that our prepayment amount will be approximately \$5.6 million. We expect that we will be able to make the prepayment from available cash on hand.

Note 13 Recent Accounting Pronouncements

In accordance with ASC 105, *Generally Accepted Accounting Principles*, the FASB established the ASC as the source of authoritative U. S. generally accepted accounting principles recognized by the FASB to be applied by nongovernmental entities. Rules and interpretative releases of the SEC under authority of federal securities laws are also sources of authoritative guidance for SEC registrants. All non-grandfathered, non-SEC accounting literature not included in the ASC will become nonauthoritative. ASC 105 is effective for the current period ended September 30, 2009 and did not have a significant effect on the Company's consolidated financial statements.

ASC 810, *Consolidation*, replaces the quantitative-based risks and rewards calculation for determining which enterprise, if any, has a controlling financial interest in a variable interest entity with an approach focused on identifying which enterprise has the power to direct the activities of a variable interest entity that most significantly effect the entity's economic performance and (i) the obligation to absorb losses of the entity or (ii) the right to receive benefits from the entity. The pronouncement is effective January 1, 2010, and is not expected to have a significant effect on the Company's consolidated financial statements.

ASC 860, *Transfers and Servicing*, improves the information a reporting entity provides in its financial statements about a transfer of financial assets, including the effect of a transfer on an entity's financial position, financial performance and cash flows and the transferor's continuing involvement in the transferred assets. ASC 860 eliminates the concept of a qualifying special-purpose entity and changes the guidance for evaluation for consolidation. This pronouncement is effective January 1, 2010, and is not expected to have a significant effect on the Company's consolidated financial statements.

ASC 855, *Subsequent Events*, establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before financial statements are issued or available to be issued. ASC 855 sets forth (i) the period after the balance sheet date during which management of a reporting entity should evaluate events or

transactions that may occur for potential recognition or disclosure in the financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its financial statements and (iii) the disclosures that an entity should make about events or transactions that

Table of Contents

occurred after the balance sheet date. ASC 855 was effective for the period ended June 30, 2009, and did not have a significant effect on the Company's consolidated financial statements.

These following three ASC's (ASC 820, ASC 825 and ASC 320) were effective for the period ended June 30, 2009, and did not have a significant effect on the Company's consolidated financial statements other than additional disclosures.

ASC 820, *Fair Value Measurements and Disclosures*, provides guidance for estimating fair value in accordance when the volume and level of activity for the asset or liability have decreased significantly. ASC 820 also provides guidance on identifying circumstances that indicate a transaction is not orderly.

ASC 825, *Financial Instruments*, requires disclosures about fair value of financial instruments in interim reporting periods of publicly traded companies that were previously only required to be disclosed in annual financial statements.

ASC 320, *Investments - Debt and Equity Securities*, amends previous other-than-temporary impairment guidance in generally accepted accounting principles (GAAP) for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This ASC does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Cautionary Statement Regarding Forward-Looking Information

Forward Looking Statements

This Quarterly Report contains forward-looking statements, which can be identified by the use of words such as estimate, project, believe, intend, anticipate, plan, seek, and similar expressions. These forward looking statements include:

statements of our goals, intentions, and expectations;

statements regarding our business plans, prospects, growth, and operating strategies;

statements regarding the asset quality of our loan and investment portfolios; and

estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including, among other things, the following important factors that could affect the actual outcome of future events:

significantly increased competition among depository and other financial institutions;

inflation and changes in the interest rate environment or other changes that reduce our interest margins or reduce the fair value of financial instruments;

general economic conditions, either nationally or in our market areas, that are worse than expected;

adverse changes in the securities markets;

legislative or regulatory changes that adversely affect our business;

our ability to enter new markets successfully and take advantage of growth opportunities, and the possible dilutive effect of potential acquisitions or *de novo* branches, if any;

changes in consumer spending, borrowing and savings habits;

changes in accounting policies and practices, as may be adopted by bank regulatory agencies, the Financial Accounting Standards Board, the Public Company Accounting Oversight Board and other promulgating

authorities;

inability of third-party providers to perform their obligations to us;

the effect of current governmental effort to restructure the U.S. financial and regulatory system;

the effect of developments in the secondary market affecting our loan pricing;

the level of future deposit insurance premiums

changes in our organization, compensation and benefit plans; and

Table of Contents

the effect of the current financial crisis on our loan portfolio, investment portfolio, and deposit and other customers.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements.

Critical Accounting Policies

Note 1 to the Company's Audited Consolidated Financial Statements for the year ended December 31, 2008, included in the Company's Annual Report on Form 10-K, as supplemented by this report, contains a summary of significant accounting policies. Various elements of these accounting policies, by their nature, are inherently subject to estimation techniques, valuation assumptions and other subjective assessments. Certain assets are carried in the consolidated Balance Sheets at estimated fair value or the lower of cost or estimated fair value. Policies with respect to the methodologies used to determine the allowance for loan losses and judgments regarding the valuation of intangible assets and securities as well as the valuation allowance against deferred tax assets are the most critical accounting policies because they are important to the presentation of the Company's financial condition and results of operations, involve a higher degree of complexity, and require management to make difficult and subjective judgments which often require assumptions or estimates about highly uncertain matters. The use of different judgments, assumptions, and estimates could result in material differences in the results of operations or financial condition. These critical accounting policies and their application are reviewed periodically and, at least annually, with the Audit Committee of the Board of Directors. For a further discussion of the critical accounting policies of the Company, see Management's Discussion and Analysis of Financial Condition and Results of Operations in the Company's Annual Report on Form 10-K, for the year ended December 31, 2008.

Overview

This overview highlights selected information and may not contain all the information that is important to you in understanding our performance during the period. For a more complete understanding of trends, events, commitments, uncertainties, liquidity, capital resources, and critical accounting estimates, you should read this entire document carefully, as well as our Annual Report on Form 10-K for the year ended December 31, 2008.

Net income was \$3.2 million for the quarter ended September 30, 2009, compared to \$3.3 million for the quarter ended September 30, 2008. Basic and diluted earnings per share were \$0.08 for both quarters ended September 30, 2009 and 2008. Return on average assets and return on average equity were 0.66% and 3.23%, respectively, for the quarter ended September 30, 2009, as compared to 0.82% and 3.48% for the quarter ended September 30, 2008, respectively.

The quarter ended September 30, 2009, was highlighted by the following items:

Total assets increased \$230.4 million to \$2.0 billion at September 30, 2009, from \$1.8 billion at December 31, 2008.

- o Interest-bearing deposits in other financial institutions increased \$35.5 million.
- o Securities increased \$182.3 million.
- o Loans held-for-investment, net increased \$76.7 million.
- o Purchased certificates of deposit decreased \$53.7 million.

Allowance for loan losses increased to \$14.2 million, or 2.13% of total loans at September 30, 2009, from \$8.8 million, or 1.49% of total loans at December 31, 2008.

Total liabilities increased \$220.7 million to \$1.6 billion at September 30, 2009, from \$1.4 billion at December 31, 2008.

- o Deposits increased \$269.0 million.
- o Borrowed funds decreased \$48.6 million.

Table of Contents

Stockholders' equity increased to \$396.3 million at September 30, 2009, from \$386.6 million at December 31, 2008.

Net interest income increased \$2.5 million to \$14.8 million for the quarter ended September 30, 2009, as compared to \$12.2 million for the quarter ended September 30, 2008.

- o Average interest-earning assets increased \$318.0 million, or 21.0%, to \$1.8 billion for the quarter ended September 30, 2009, from \$1.5 billion for the quarter ended September 30, 2008.

- o The net interest margin decreased two basis points to 3.20% for the quarter ended September 30, 2009, as compared to 3.22% for the quarter ended September 30, 2008.

The provision for loan losses was \$2.7 million for the quarter ended September 30, 2009, compared to \$1.3 million for the quarter ended September 30, 2008.

Non-interest expense increased \$1.7 million for the quarter ended September 30, 2009, compared to \$6.7 million for the quarter ended September 30, 2008.

Comparison of Financial Condition at September 30, 2009, and December 31, 2008

Cash and cash equivalents increased \$36.1 million, or 71.9%, to \$86.2 million at September 30, 2009, from \$50.1 million at December 31, 2008. The Company has been maintaining increased balances in other financial institutions while it evaluates opportunities to deploy funds into higher yielding investments such as loans and securities with acceptable risk characteristics.

Certificates of deposit in other financial institutions decreased to \$0 at September 30, 2009, from \$53.7 million at December 31, 2008. The decrease was attributable to maturities. When opportunities exist, the Company has deployed a strategy to fund investments in certificates of deposit in other financial institutions (fully insured by the FDIC) with similar term borrowings. Such opportunities did not exist in 2009.

Bank owned life insurance increased \$1.3 million, or 3.1%, to \$43.3 million at September 30, 2009, from \$42.0 million December 31, 2008. The increase was attributable to earnings on the policies for the nine months ended September 30, 2009.

Securities available-for-sale increased \$184.9 million, or 19.3%, to \$1.1 billion at September 30, 2009, from \$957.6 million at December 31, 2008. The increase was primarily attributable to purchases of \$470.3 million, partially offset by maturities and paydowns of \$309.5 million. The securities available-for-sale portfolio at September 30, 2009, included \$708.7 million in mortgage-backed debt securities issued or guaranteed by Fannie Mae, Freddie Mac, or Ginnie Mae.

Securities held-to-maturity decreased \$3.5 million, or 24.2%, to \$11.0 million at September 30, 2009, from \$14.5 million at December 31, 2008. The decrease was attributable to maturities and paydowns during the year.

Loans held-for-investment, net, totaled \$666.7 million at September 30, 2009, as compared to \$590.0 million at December 31, 2008. The increase was primarily in multifamily real estate loans which increased \$58.4 million, or 53.8%, to \$167.0 million, from \$108.5 million at December 31, 2008. Loans held-for-investment, net also increased due to an increase in commercial real estate loans of \$29.5 million, or 10.2%, to \$318.6 million, as well as an increase in commercial and industrial loans of \$8.5 million, or 76.8%, to \$19.5 million. In addition, home equity loans and lines of credit also increased \$1.3 million, or 5.2%, from \$24.2 million at December 31, 2008. These increases were partially offset by decreases in one-to four-family residential mortgage loans, and construction and land loans.

Federal Home Loan Bank of New York stock, at cost, decreased \$2.8 million, or 29.9%, from \$9.4 million at December 31, 2008 to \$6.6 million at September 30, 2009. This decrease is attributable to a decrease in borrowings outstanding with the FHLB over the same time period.

Table of Contents

Premises and equipment, net, increased \$2.6 million, or 29.3%, to \$11.5 million at September 30, 2009, from \$8.9 million at December 31, 2008. The increase in premises and equipment, net, is attributable to the addition of two new branch locations and related increases in construction-in-process.

Other assets decreased \$6.5 million, or 52.4%, to \$5.9 million at September 30, 2009, from \$12.4 million at December 31, 2008. The decrease in other assets is attributable to a decrease in deferred tax assets which resulted from an increase in net unrealized gains on the Company's securities portfolio from December 31, 2008, to September 30, 2009.

Deposits increased \$269.0 million, or 26.3%, to \$1.3 billion at September 30, 2009, from \$1.0 billion at December 31, 2008. The increase in deposits in 2009 was primarily due to an increase of \$172.9 million in certificates of deposit and an increase of \$96.1 million in other deposit categories (interest bearing negotiable orders of withdrawal, savings-passbook, statement, tiered and money market).

Borrowings decreased \$48.6 million, or 14.6%, to \$283.5 million at September 30, 2009, from \$332.1 million at December 31, 2008. The decrease in borrowings is primarily attributable to maturities during the year and the Company utilizing increased deposits to fund operations.

Total stockholders' equity increased to \$396.3 million at September 30, 2009, from \$386.6 million at December 31, 2008. The increase was primarily attributable to net income of \$8.0 million for the nine months ended September 30, 2009, and an increase in other comprehensive income of \$14.3 million, related primarily to a decrease in market interest rates that resulted in an increase in the estimated fair values of our securities available-for-sale portfolio. These increases were partially offset by \$13.0 million in stock repurchases and approximately \$2.3 million of dividends declared for the nine months ended September 30, 2009.

Comparison of Operating Results for the Three Months Ended September 30, 2009, and 2008

Net income. Net income remained relatively flat for the quarter ended September 30, 2009 as compared to the quarter ended September 30, 2008, decreasing \$88,000 between the two periods. Net interest income increased \$2.5 million, or 20.7%, which was more than offset by an increase of \$1.4 million, or 113.4%, in provision for loan losses coupled with an increase of non-interest expense of \$1.7 million, or 25.8%, which was attributable, in part, to an increase of \$525,000 in compensation expense related to equity awards granted in January 2009, an increase of approximately \$774,000 related to deferred compensation expense, and an increase of \$379,000 in FDIC deposit insurance expense.

Interest income. Interest income increased \$2.8 million, or 14.8%, to \$21.9 million for the three months ended September 30, 2009, from \$19.0 million for the three months ended September 30, 2008. The increase in interest income was primarily the result of an increase in average interest-earning assets of \$318.0 million, or 21.0%. The increase in average interest-earning assets was primarily attributable to an increase in average loans of \$124.7 million, or 23.3%, an increase in securities (other than mortgage-backed securities) of \$116.7 million, or 358.7%, and an increase in average mortgage-backed securities of \$83.7 million, or 10.0%. The effect of the increase in average interest-earning assets was partially offset by a decrease in the yield earned from 5.01% for the three months ended September 30, 2008, to 4.74% for the three months ended September 30, 2009. The rates earned on all asset categories other than FHLB stock decreased due to the general decline in market interest rates for these asset types. The rate earned on Federal Home Loan Bank of New York stock, increased from 6.25% for the quarter ended September 30, 2008, to 6.35% for the quarter ended September 30, 2009.

Interest expense. Interest expense increased \$286,000, or 4.2%, to \$7.1 million for the three months ended September 30, 2009, from \$6.8 million for the three months ended September 30, 2008. The increase was attributable to an increase in interest expense on deposits of \$68,000, or 1.6%, and an increase in interest expense on borrowings of \$218,000, or 8.7%. The increase in interest expense on deposits was attributable to average interest-bearing deposits increasing \$296.9 million, or 36.3%, to \$1.1 billion for the three months ended September 30, 2009, as compared to \$817.0 million for the three months ended September 30, 2008. The increase in average interest-bearing deposits was partially offset by a decrease in cost of 53 basis points, or 25.5%, to 1.55%, reflecting lower market interest rates for short-term deposits. The increase in interest expense on borrowings was attributable to the average balance of borrowings increasing \$7.0 million, or 2.3%, to \$306.3 million for the three months ended September 30, 2009, from \$299.4 million for the three months ended September 30, 2008, and an increase in the cost of borrowings

of 20 basis points to 3.54% as a result of extending borrowings.

Table of Contents

Net Interest Income. Net interest income was \$14.8 million for the quarter ended September 30, 2009, an increase of \$2.5 million, or 20.7%, from \$12.2 million for the quarter ended September 30, 2008. The increase in net interest income was primarily due to an increase in total average interest-earning assets of \$318.0 million, or 21.0%, partially offset by a decrease in the net interest margin of two basis points.

Provision for Loan Losses. We establish a provision for loan losses, which is charged to operations, in order to maintain the allowance for loan losses at a level we consider necessary to absorb credit losses incurred in the loan portfolio that are both probable and reasonably estimable at the balance sheet date. In determining the level of the allowance for loan losses, we consider, among other things, past and current loss experience, evaluations of real estate collateral, current economic conditions, volume and type of lending, adverse situations that may affect a borrower's ability to repay a loan, and the levels of delinquent loans. The Company generally obtains an independent appraisal on properties that it takes a mortgage on. When a loan exhibits significant credit weaknesses, or is placed on non-accrual status, we evaluate the original appraisal and make a determination if obtaining an updated appraisal is meaningful at that time. Factors considered in that determination include date of original appraisal and the ability of the appraiser to enter the property to adequately perform an evaluation. If it is determined that it is not meaningful to obtain a new appraisal appropriate adjustments are made to the original appraisal for declines in real estate values. Additionally, management adjusts the appraised values whether or not a new appraisal is obtained for other downward adjustments which include quick sale discounts and estimated costs to sell. The Company generally obtains updated appraisals immediately prior to foreclosure sale. The amount of the allowance is based on estimates and the ultimate losses may vary from such estimates as information becomes available or conditions change. We assess the allowance for loan losses and make provisions for loan losses on a quarterly basis.

The provision for loan losses for the quarter ended September 30, 2009, was \$2.7 million, as compared to \$1.3 million for the quarter ended September 30, 2008. The increase related to an increase in total loans outstanding, an increase in non-performing loans, impairment losses on specific loans, including non-performing loans, as well as increases in general loss factors utilized in management's estimate of credit losses inherent in the loan portfolio in recognition of the current economic environment and real estate market, as well as charge-off and non-performing experience in the Company's loan portfolio. We recorded net charge-offs of \$600,000 and \$1.0 million for the three months ended September 30, 2009, and 2008, respectively. The allowance for loan losses was \$14.2 million, or 2.13% of loans held for investment, net at September 30, 2009, compared to \$8.8 million, or 1.49% of loans held for investment, net at December 31, 2008.

Nonperforming loans totaled \$35.7 million (5.36% of total loans) at September 30, 2009, \$31.0 million (4.71% of total loans) at June 30, 2009, \$24.1 million (3.86% of total loans) at March 31, 2009, and \$9.6 million, (1.63% of total loans) at December 31, 2008. The following table also shows for the same dates troubled debt restructurings on which interest is accruing.

(in thousands)

	September 30, 2009	June 30, 2009	March 31, 2009	December 31, 2008
Non-accruing loans	\$ 15,997	16,016	13,166	8,552
Non-accruing loans subject to restructuring agreements	14,238	11,494	9,650	950
Total non-accruing loans	30,235	27,510	22,816	9,502
Loans 90 days or more past maturity and still accruing	5,487	3,483	1,281	137
Total non-performing loans	35,722	30,993	24,097	9,639
Other real estate owned	933	993	1,071	1,071

Edgar Filing: Northfield Bancorp, Inc. - Form 10-Q

Total non-performing assets	\$	36,655	31,986	25,168	10,710
Loans subject to restructuring agreements and still accruing	\$	7,258	6,838	2,414	

Non-accruing loans subject to restructuring agreements increased to \$14.2 million at September 30, 2009. These related primarily to loans that were accruing but were demonstrating weaknesses that management believed warranted formal restructurings, with the objective of maximizing the ultimate collectability of the loans. Based on a borrower's payment performance prior to the restructuring and various other uncertainties, including changes in the current economic environment, management deemed it appropriate to place certain of these loans on a non-

Table of Contents

accrual status, and recognize interest income on a cash basis, as appropriate, until the borrowers demonstrate sustained performance under the restructured terms. At September 30, 2009, total non-accruing loans subject to restructuring agreements that were performing in accordance with the restructured terms amounted to \$10.1 million, or 70.2%, of the \$14.2 million outstanding. In addition, loans 90 days or more past maturity and still accruing interest increased to \$5.5 million. These loans are current as to the original contractual interest payment terms, are considered well secured, and are currently in the process of renewal.

Total non-accruing loans of \$30.2 million, consist of the following categories at September 30, 2009: \$18.6 million in commercial real estate loans, \$6.4 million in construction and land loans, \$1.9 million in one- to four-family real estate loans, \$1.7 million in multifamily real estate loans, \$1.6 million in commercial and industrial loans, and \$98,000 in home equity and lines of credit. Included in the \$16.0 million of non-accruing loans is a \$5.1 million commercial real estate loan that was performing in accordance with its original contractual terms at September 30, 2009 that was placed on non-accrual status due to sustained financial weakness of the borrower.

Non-interest Income. Non-interest income increased \$537,000, or 65.5%, to \$1.4 million for the three months ended September 30, 2009, from \$820,000 for the three months ended September 30, 2008. The increase was primarily due to an increase of \$774,000 in gain on securities transactions, net, to \$337,000 for the three months ended September 30, 2009, from a loss of \$437,000 for the three months ended September 30, 2008. The \$337,000 gain on securities transactions, net is related to an increase in gains on trading securities related to our deferred compensation plan with a corresponding offset to compensation expense, resulting in no effect on net income. This increase was partially offset by an other-than-temporary impairment charge of \$176,000 recorded in connection with the credit related impairment of a private-label mortgage-backed security during the quarter ended September 30, 2009.

Non-interest Expense. Total non-interest expense increased \$1.7 million, or 25.8%, to \$8.4 million at September 30, 2009, as compared to \$6.7 million for the quarter ended September 30, 2008. The increase was caused, in part, by higher employee compensation and benefits of \$1.6 million, due primarily to an increase of \$585,000 associated with equity awards granted on January 30, 2009 and an increase of approximately \$774,000 related to deferred compensation expense, coupled with higher health care costs, and merit and market salary adjustments effective January 1, 2009. Non-interest expense also was higher due to increased FDIC insurance costs of \$372,000 due to higher insurance rates and increased deposit balances subject to these rates.

Income Tax Expense. The Company recorded income tax expense of \$1.8 million for both quarters ended September 30, 2009, and 2008. The effective tax rate for the quarter ended September 30, 2009 was 36.0% as compared to 35.6% for the quarter ended September 30, 2008. The increase in the effective tax rate was the result of a higher level of taxable income in 2009, as compared to 2008 due to non-deductible compensation expense related to the Company's incentive stock options granted in January 2009.

Net interest income	\$ 14,777	\$ 12,242
Net interest rate spread (2)	2.76	2.59
Net interest-earning assets (3)	\$ 410,032	\$ 395,886
Net interest margin (4)	3.20	3.22
Average interest-earning assets to interest-bearing liabilities	128.87	135.46

(1) Average yields and rates for the quarter ended September 30, 2009 and 2008, are annualized.

(2) Net interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities.

(3) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average total interest-earning assets.

Table of Contents**Comparison of Operating Results for the Nine Months Ended September 30, 2009, and 2008**

Net income. Net income for the nine months ended September 30, 2009, decreased \$4.4 million, or 35.4%, as compared to the same prior year period. The decrease in net income for the nine months ended September 30, 2009, was due primarily to a \$2.5 million, nontaxable, death benefit realized on bank owned life insurance during the nine months ended September 30, 2008, and an increase in the provision for loan losses of \$4.4 million, from \$3.1 million for nine months ended September 30, 2008, to \$7.5 million for the nine months ended September 30, 2009. The increases in the provision for loan losses in the current year were due primarily to an increase in total loans outstanding, an increase in non-performing loans, impairment losses on specific loans, including non-performing loans, as well as increases in general loss factors utilized in management's estimate of credit losses inherent in the loan portfolio in recognition of the current economic environment and real estate market, as well as charge-off and non-performing experience in the Company's loan portfolio.

Net income for the nine months ended September 30, 2009, was also negatively affected by an increase in non-interest expense of \$6.6 million. FDIC deposit insurance expense increased \$1.8 million for the nine months ended September 30, 2009, of which approximately \$770,000 related to the FDIC's special assessment recognized in the second quarter of 2009. Non-interest expense also increased in 2009 due to an increase of \$3.6 million in compensation and employee benefits expense, which included \$1.6 million for equity awards and an increase of approximately \$1.3 million related to deferred compensation expense. Non-interest expense also increased in 2009 due to higher levels of professional fees associated with loan restructurings and collection efforts, increases in personnel, and higher premises and equipment costs associated with additional back office operation leasehold improvements, branch improvements, and lease payments on future branch locations. These increases in expense were partially offset by an increase in net interest income of \$7.0 million, or 20.4%, from \$34.4 million for the nine months ended September 30, 2008, to \$41.4 million for the nine months ended September 30, 2009.

Interest income. Interest income increased \$8.9 million, or 16.4%, to \$63.4 million for the nine months ended September 30, 2009, from \$54.4 million for the nine months ended September 30, 2008. The increase in interest income was primarily the result of an increase in average interest-earning assets of \$297.6 million, or 20.6%. The increase in average interest-earning assets was primarily attributable to an increase in average loans of \$154.7 million, or 32.3%, an increase in average mortgage-backed securities of \$114.1 million, or 14.0%, and an increase in other investment securities of \$43.5 million, or 109.5%. The effect of the increase in average interest-earning assets was partially offset by a decrease in the yield earned from 5.02% for the nine months ended September 30, 2008, to 4.85% for the nine months ended September 30, 2009. The rate earned on the Company's loan portfolio, interest-earning deposits in other financial institutions, and corporate bonds, GSE bonds, and money market mutual funds, decreased due to the general decline in market interest rates for these asset types. These decreases were partially offset by a 21 basis point increase in the rate earned on mortgage-backed securities, from 4.47% for the nine months ended September 30, 2008, to 4.68% for the nine months ended September 30, 2009, due to the purchase of higher yielding private label securities.

Interest expense. Interest expense increased \$1.9 million or 9.5%, to \$22.0 million for the nine months ended September 30, 2009, from \$20.1 million for the nine months ended September 30, 2008. The increase was attributable to an increase in interest expense on deposits of \$395,000, or 2.9%, and an increase in interest expense on borrowings of \$1.5 million, or 23.0%. The increase in interest expense on deposits was attributable to average interest-bearing deposits increasing \$242.4 million, or 30.6%, to \$1.0 billion for the nine months ended September 30, 2009, as compared to \$791.4 million for the nine months ended September 30, 2008. The increase in interest expense, due to an increase in average interest-bearing deposits, was partially offset by a decrease in cost of funds of 48 basis points, or 21.1%, to 1.80%, reflecting lower market interest rates. The increase in interest expense on borrowings was attributable to the average balance of borrowings increasing \$47.1 million, or 18.6%, to \$301.1 million for the nine months ended September 30, 2009, from \$254.0 million for the nine months ended September 30, 2008, and an increased cost of borrowings of 13 basis points to 3.59% as a result of extending borrowing terms.

Net Interest Income. Net interest income increased \$7.0 million, or 20.4%, to \$41.4 million for the nine months ended September 30, 2009, from \$34.4 million for the nine months ended September 30, 2008. The increase in net interest income was primarily the result of an increase in total average interest-earning assets of \$297.6 million, or

20.6%, as the net interest margin at 3.17% was unchanged for the nine months ended September 30, 2009 and 2008.

Table of Contents

Provision for Loan Losses. The provision for loan losses for the nine months ended September 30, 2009, was \$7.5 million, as compared to \$3.1 million for the prior year period. The increase related to an increase in total loans outstanding, an increase in non-performing loans, impairment losses on specific loans, including non-performing loans, as well as increases in general loss factors utilized in management's estimate of credit losses inherent in the loan portfolio in recognition of the current economic environment and real estate market. We recorded net charge-offs of \$2.0 million and \$1.0 million for the nine months ended September 30, 2009 and 2008, respectively.

Non-interest Income. Non-interest income decreased \$1.6 million, or 29.1%, to \$3.9 million for the nine months ended September 30, 2009, from \$5.4 million for the nine months ended September 30, 2008. The decrease in non-interest income was due primarily to a \$2.5 million, nontaxable, death benefit realized on bank owned life insurance during the nine months ended September 30, 2008, partially offset by an increase of \$1.3 million in gain on securities, net, to \$477,000 for the nine months ended September 30, 2009, from a loss of \$780,000 for the nine months ended September 30, 2008, related to gains on trading securities associated with the Company's deferred compensation plan.

Non-interest Expense. Total non-interest expense increased \$6.6 million, or 35.7%, to \$25.3 million for the nine months ended September 30, 2009, as compared to \$18.6 million for the nine months ended September 30, 2008. The increase was caused, in part, by higher employee compensation and benefits of \$3.6 million, which included \$1.6 million for equity awards granted on January 30, 2009 and an increase of approximately \$1.3 million related to deferred compensation expense, coupled with higher health care costs, and merit and market salary adjustments effective January 1, 2009. Non-interest expense also was higher due to increased FDIC insurance costs of \$1.8 million, due to higher insurance rates, increased deposit balances subject to these rates, and a special assessment levied on all FDIC-insured institutions, which for us was \$770,000. Occupancy, and furniture and equipment costs also increased \$727,000, and were associated with the Company's new operations center, leases on two new branch locations, and depreciation related to premises renovations, as well as increased maintenance and repairs.

Income Tax Expense. The Company recorded income tax expense of \$4.4 million and \$5.6 million for the nine months ended September 30, 2009, and 2008, respectively. The effective tax rate for the nine months ended September 30, 2009, was 35.6%, as compared to 31.1% for the nine months ended September 30, 2008. The increase in the effective tax rate was the result of a higher level of taxable income in 2009, as compared to 2008. The nine months ended September 30, 2008, included \$3.8 million of income from bank owned life insurance as compared to \$1.3 million for the nine months ended September 30, 2009. Income on bank owned life insurance in 2008 included a \$2.5 million, nontaxable, death benefit. In addition, non-deductible compensation expense related to the Company's incentive stock options granted in January 2009.

Interest-earning deposits in financial institutions	93,857	727	1.04	104,227	2,806	3.60
Total interest-earning assets	1,745,150	63,350	4.85	1,447,552	54,446	5.02
Non-interest-earning assets	92,182			81,880		
Total assets	\$ 1,837,332			\$ 1,529,432		
Interest-bearing liabilities:						
Savings, NOW, and money market accounts	\$ 551,009	4,589	1.11	\$ 418,256	3,649	1.17
Certificates of deposit	482,796	9,299	2.58	373,149	9,844	3.52
Total interest-bearing deposits	1,033,805	13,888	1.80	791,405	13,493	2.28
Borrowed funds	301,110	8,087	3.59	253,974	6,573	3.46
Total interest-bearing liabilities	1,334,915	21,975	2.20	1,045,379	20,066	2.56
Non-interest bearing deposit accounts	97,980			95,855		
Accrued expenses and other liabilities	14,425			13,779		
Total liabilities	1,447,320			1,155,013		
Stockholders equity	390,012			374,419		
Total liabilities and stockholders equity	\$ 1,837,332			\$ 1,529,432		

Net interest income	\$ 41,375		\$ 34,380
Net interest rate spread (2)		2.65	2.46
Net interest-earning assets (3)	\$ 410,235		\$ 402,173
Net interest margin (4)		3.17	3.17
Average interest-earning assets to interest-bearing liabilities		130.73	138.47

(1) Average yields and rates for the nine months ended September 30, 2009 and 2008, are annualized.

(2) Net interest rate spread represents the difference between the weighted average yield on interest-earning assets and the weighted average cost of interest-bearing liabilities.

(3) Net interest-earning assets represent total interest-earning assets less total interest-bearing liabilities.

(4) Net interest margin represents net interest income divided by average total interest-earning assets.

Table of Contents**Liquidity and Capital Resources**

Liquidity. The overall objective of our liquidity management is to ensure the availability of sufficient funds to meet financial commitments and to take advantage of lending and investment opportunities. We manage liquidity in order to meet deposit withdrawals on demand or at contractual maturity, to repay borrowings as they mature, and to fund new loans and investments as opportunities arise.

Our primary sources of funds are deposits, principal and interest payments on loans and securities, borrowed funds, the proceeds from maturing securities and short-term investments, and to a lesser extent the proceeds from the sales of loans and securities and wholesale borrowings. The scheduled amortizations of loans and securities, as well as proceeds from borrowed funds, are predictable sources of funds. Other funding sources, however, such as deposit inflows and loan prepayments are greatly influenced by market interest rates, economic conditions, and competition. Northfield Bank is a member of the Federal Home Loan Bank of New York (FHLB), which provides an additional source of short-term and long-term funding. Northfield Bank also has borrowing capabilities with the Federal Reserve on a short-term basis. The Bank's borrowed funds, excluding capitalized lease obligations, were \$281.3 million at September 30, 2009, at a weighted average interest rate of 3.67%. A total of \$55.0 million of these borrowings will mature in less than one year. Borrowed funds, excluding capitalized lease obligations, were \$329.8 million at December 31, 2008. The Company has two lines of credit with the FHLB. Each line has a limit of \$100.0 million. At September 30, 2009, the Company has \$200.0 million available for use. Additionally, the Company has the ability to obtain additional funding from the FHLB and Federal Reserve Bank discount window utilizing unencumbered securities of approximately \$290 million at September 30, 2009. The Company expects to have sufficient funds available to meet current commitments in the normal course of business.

Capital Resources. At September 30, 2009 and December 31, 2008, Northfield Bank exceeded all regulatory capital requirements to which it is subject.

	Actual Ratio	Minimum Required for Capital Adequacy Purposes	Minimum Required to Be Well Capitalized under Prompt Corrective Action Provisions
As of September 30, 2009:			
Tangible capital to tangible assets	14.36%	1.50%	NA%
Tier 1 capital (core) (to adjusted assets)	14.36	4.00	5.00
Total capital (to risk-weighted assets)	29.73	8.00	10.00
As of December 31, 2008:			
Tangible capital to tangible assets	15.98%	1.50%	NA%
Tier 1 capital (core) (to adjusted assets)	15.98	4.00	5.00
Total capital (to risk-weighted assets)	34.81	8.00	10.00

During the quarter ended September 30, 2009, Northfield Bank paid a dividend of \$14.0 million to Northfield Bancorp, Inc.

Off-Balance Sheet Arrangements and Contractual Obligations

In the normal course of operations, the Company engages in a variety of financial transactions that, in accordance with U.S. generally accepted accounting principles, are not recorded in the financial statements. These transactions primarily relate to lending commitments.

Table of Contents

The following table shows the contractual obligations of the Company by expected payment period as of September 30, 2009:

Contractual Obligation	Total	Less than	One to less	Three to	Five
		One Year	than Three	less than	Years
			Years	Five Years	and
			(in thousands)		greater
Debt obligations (excluding capitalized leases)	\$281,300	55,000	75,000	148,800	2,500
Commitments to originate loans	\$ 38,811	38,811			
Commitments to fund unused lines of credit	\$ 21,383	21,383			

Commitments to originate loans and commitments to fund unused lines of credit are agreements to lend additional funds to customers as long as there have been no violations of any of the conditions established in the agreements. Commitments generally have a fixed expiration or other termination clauses which may or may not require payment of a fee. Since some of these loan commitments are expected to expire without being drawn upon, total commitments do not necessarily represent future cash requirements.

For further information regarding our off-balance sheet arrangements and contractual obligations, see Management's Discussion and Analysis of Financial Condition and Operating Results in the Company's Annual Report on Form 10-K for the year ended December 31, 2008.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

The majority of our assets and liabilities are monetary in nature. Consequently, our most significant form of market risk is interest rate risk. Our assets, consisting primarily of mortgage-related assets, have longer maturities than our liabilities, consisting primarily of deposits. As a result, a principal part of our business strategy is to manage interest rate risk and limit the exposure of our net interest income to changes in market interest rates. Accordingly, our board of directors has established an Asset Liability Committee (ALCO) and a Management Asset/Liability Committee (MALCO). The MALCO is comprised of our Treasurer, who chairs this Committee, our Chief Executive Officer, our Chief Financial Officer, our Chief Lending Officer, and our Executive Vice President of Operations. The MALCO committee reports to the ALCO committee, which is comprised of four outside directors. These committees are responsible for evaluating the interest rate risk inherent in our assets and liabilities, for recommending to our board of directors the level of risk that is appropriate, given our business strategy, operating environment, capital, liquidity and performance objectives, and for managing this risk consistent with the guidelines approved by the board of directors.

We seek to manage our interest rate risk in order to minimize the exposure of our earnings and capital to changes in interest rates. As part of our ongoing asset-liability management, we currently use the following strategies to manage our interest rate risk:

originating commercial real estate loans and multifamily loans that generally tend to have shorter maturities and higher interest rates that generally reset at five years;

investing in shorter term investment grade corporate securities and mortgage-backed securities; and

obtaining general financing through lower-cost deposits and longer-term Federal Home Loan Bank advances and repurchase agreements.

Shortening the average term of our interest-earning assets by increasing our investments in shorter-term assets, as well as loans with variable interest rates, helps to better match the maturities and interest rates of our assets and liabilities, thereby reducing the exposure of our net interest income to changes in market interest rates.

Net Portfolio Value Analysis. We compute amounts by which the net present value of our assets and liabilities (net portfolio value or NPV) would change in the event market interest rates changed over an assumed range of rates. Our simulation model uses a discounted cash flow analysis to measure the interest rate sensitivity of NPV. Depending on current market interest rates we estimate the economic value of these assets and liabilities under the assumption that interest rates experience an instantaneous and sustained increase or decrease of 100, 200, or 300 basis points. A basis point equals one-hundredth of one percent, and 100 basis points equals one percent. For example an increase in interest rates from 3% to 4% would mean, a 100 basis point increase in the Change in Interest Rates column below.

Net Interest Income Analysis. In addition to NPV calculations, we analyze our sensitivity to changes in interest rates through our net interest income model. Net interest income is the difference between the interest income we earn on our interest-earning assets, such as loans and securities, and the interest we pay on our interest-bearing liabilities, such as deposits and borrowings. In our model, we estimate what our net interest income would be for a twelve-month period. Depending on current market interest rates we then calculate what the net interest income would be for the same period under the assumption that interest rates experience an instantaneous and sustained increase or decrease of 100, 200, or 300 basis points.

Table of Contents

The tables below set forth, as of September 30, 2009, our calculation of the estimated changes in our NPV and net interest income that would result from the designated instantaneous and sustained changes in interest rates. Computations of prospective effects of hypothetical interest rate changes are based on numerous assumptions, including relative levels of market interest rates, loan prepayments and deposit decay, and should not be relied on as indicative of actual results (in thousands).

Change in Interest Rates (basis points)	Estimated Present Value of Assets	Estimated Present Value of Liabilities	NPV		Estimated	Net Interest
			Estimated NPV	Estimated Change In NPV	NPV/Present Value of Assets Ratio	Income Percent Change
+300	\$1,853,891	\$1,487,076	\$366,815	\$(79,722)	19.79%	(4.75)%
+200	1,903,184	1,510,122	393,062	(53,475)	20.65%	(2.71)%
+100	1,954,026	1,533,941	420,085	(26,452)	21.50%	(0.81)%
0	2,005,108	1,558,571	446,537		22.27%	
-100	2,037,583	1,582,693	454,890	8,353	22.32%	(1.28)%

The table above indicates that at September 30, 2009, in the event of a 300 basis point increase in interest rates, we would experience a 248 basis point decrease in NPV ratio (19.79% less 22.27%), and a 4.75% decrease in net interest income. In the event of a 100 basis point decrease in interest rates, we would experience a 5 basis point increase in NPV ratio (22.32% less 22.27%) and a 1.28% decrease in net interest income. Our internal policies provide that, in the event of a 300 basis point increase in interest rates, our NPV as a percentage of total market assets should decrease by no more than 400 basis points and our projected net interest income should decrease by no more than 20%. Additionally, our internal policy states that our NPV is targeted to be at least 8.5% of estimated present value of assets. As of September 30, 2009, we were within the Board approved policy.

Certain shortcomings are inherent in the methodologies used in determining interest rate risk through changes in NPV and net interest income. Modeling requires making certain assumptions that may or may not reflect the manner in which actual yields and costs respond to changes in market interest rates. In this regard, the NPV and net interest income information presented assume that the composition of our interest-sensitive assets and liabilities existing at the beginning of a period remains constant over the period being measured and assume that a particular change in interest rates is reflected uniformly across the yield curve regardless of the duration or repricing of specific assets and liabilities. Accordingly, although interest rate risk calculations provide an indication of our interest rate risk exposure at a particular point in time, such measurements are not intended to and do not provide a precise forecast of the effect of changes in market interest rates on our net interest income and will differ from actual results.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

An evaluation was performed under the supervision and with the participation of the Company's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) promulgated under the Securities and Exchange Act of 1934, as amended) as of September 30, 2009. Based on that evaluation, the Company's management, including the Chief Executive Officer and the Chief Financial Officer, concluded that the Company's disclosure controls and procedures were effective.

During the quarter ended September 30, 2009, there were no changes in the Company's internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 4T. CONTROLS AND PROCEDURES

Registrant is an accelerated filer and reports under Item 4.

PART II

ITEM 1. LEGAL PROCEEDINGS

The Company and subsidiaries are subject to various legal actions arising in the normal course of business. In the opinion of management, the resolution of these legal actions is not expected to have a material adverse effect on the Company's financial condition or results of operations.

ITEM 1A. RISK FACTORS

In addition to the other information contained in this Quarterly Report on Form 10-Q, the following risk factors represent material updates and additions to the risk factors previously disclosed in the Company's Annual Report on Form 10-K for the Fiscal Year Ended December 31, 2008, as filed with the Securities and Exchange Commission. Additional risks not presently known to us, or that we currently deem immaterial, may also adversely affect our business, financial condition or results of operations. Further, to the extent that any of the information contained in this Quarterly Report on Form 10-Q constitutes forward-looking statements, the risk factor set forth below also is a cautionary statement identifying important factors that could cause our actual results to differ materially from those expressed in any forward-looking statements made by or on behalf of us.

The FDIC Has Proposed Regulations that Would Require Us To Pre-Pay Our Federal Deposit Insurance Premiums.

On September 29, 2009, the Federal Deposit Insurance Corporation issued a proposed rule pursuant to which all insured depository institutions would be required to prepay their estimated assessments for the fourth quarter of 2009, and for all of 2010, 2011 and 2012. Under the proposed rule, based on our deposits and assessment rate at September 30, 2009, we estimate that our prepayment amount will be approximately \$5.6 million. We expect that we will be able to make the prepayment from available cash on hand.

A Legislative Proposal Has Been Introduced that Would Eliminate Our Primary Federal Regulator, Require the Bank To Convert to a National Bank or State Bank, and Require Northfield Bancorp, MHC and the Company To Become Bank Holding Companies.

The House Financial Services Committee has released a draft of proposed restructuring legislation that would implement sweeping changes to the current bank regulatory structure. The proposed legislation, developed in conjunction with the U.S. Treasury Department, would establish a Financial Services Oversight Council and merge our primary regulator, the Office of Thrift Supervision, into the Office of the Comptroller of the Currency, the primary federal regulator for national banks. The proposal also contemplates that a division of thrift supervision within the Office of the Comptroller of the Currency would regulate federal thrifts. The proposal, if adopted, also would subject all holding companies of thrifts such as Northfield Bancorp, Inc. and Northfield Bancorp, MHC to regulation by the Federal Reserve to be regulated as bank holding companies, as opposed to regulation by the Office of Thrift Supervision as savings and loan holding companies.

As previously reported, the Federal Reserve's current policy is to prohibit mutual holding companies from waiving the receipt of dividends so long as the subsidiary savings bank is well capitalized. Moreover, Office of Thrift Supervision regulations provide that it will not take into account the amount of waived dividends in determining an appropriate exchange ratio for minority shares in the event of the conversion of a mutual holding company to stock form. If the Office of Thrift Supervision is eliminated, the Federal Reserve becomes the exclusive regulator of mutual holding companies, and the Federal Reserve retains its current policy regarding dividend waivers by mutual holding companies, Northfield Bancorp, MHC would not be permitted to waive the receipt of dividends declared by the Company. This could have an adverse impact on the Company's financial condition and, consequently, could have an adverse impact on the value of our common stock.

Continued or Further Declines in the Value of Certain Investment Securities Could Require Write-Downs, Which Would Reduce Our Earnings

Our securities portfolio includes securities that have declined in value due to negative perceptions about the health of the financial sector in general and the lack of liquidity for securities that are real estate related. These securities include private label mortgage-backed securities. A prolonged decline in the value of these securities could result in an other-than-temporary impairment write-down which would reduce our earnings.

Table of Contents**A Legislative Proposal Has Been Introduced that Would Limit Fees Banks Could Charge for Overdrafts.**

Congress has introduced legislation that would limit the fees Banks could charge for overdrafts which could have an impact on our financial position. For the nine months ended September 30, 2009, the Company recorded approximately \$1.0 million in fees from overdrafts.

We Hold Certain Intangible Assets that Could Be Classified as Impaired in The Future. If These Assets Are Considered To Be Either Partially or Fully Impaired in the Future, Our Earnings and the Book Values of These Assets Would Decrease

Pursuant to ASC 350, *Intangibles – Goodwill and Other*, we are required to test our goodwill and core deposit intangible assets for impairment on a periodic basis. The impairment testing process considers a variety of factors, including the current market price of our common shares, the estimated net present value of our assets and liabilities and information concerning the terminal valuation of similarly situated insured depository institutions. It is possible that future impairment testing could result in a partial or full impairment of the value of our goodwill or core deposit intangible assets, or both. If an impairment determination is made in a future reporting period, our earnings and the book value of these intangible assets will be reduced by the amount of the impairment. If an impairment loss is recorded, it will have little or no impact on the tangible book value of our shares of common stock or our regulatory capital levels.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

- (a) **Unregistered Sale of Equity Securities.** There were no sales of unregistered securities during the period covered by this report.
- (b) **Use of Proceeds.** Not applicable
- (c) **Repurchases of Our Equity Securities.**

The following table shows the Company's repurchase of its common stock for each calendar month in the three months ended September 30, 2009.

Period	Total Number of Shares Repurchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan
July	96,700	\$ 11.48	96,700
August	220,500	12.26	220,500
September	85,500	12.40	85,500
	402,700	\$ 12.10	402,700

- (1) On February 13, 2009, the Board of Directors of the Company authorized a stock repurchase program pursuant to which the Company intends to repurchase up to

2,240,153
shares,
representing
approximately
5% of its
outstanding
shares. This
program has no
expiration date
and has
1,065,103
shares yet to be
purchased at
September 30,
2009.
