CHICAGO RIVET & MACHINE CO.

(Exact Name of Registrant as Specified in Its Charter)

Illinois

(State or Other Jurisdiction
of Incorporation or Organization)

36-0904920

(I.R.S. Employer
Identification No.)

901 Frontenac Road, Naperville, Illinois

(Address of Principal Executive Offices)

60563

(Zip Code)

Registrant's Telephone Number, Including Area Code **(630) 357-8500**

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate website, if any, every interactive data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T (section 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of September 30, 2010, 966,132 shares of the registrant's common stock were outstanding.

CHICAGO RIVET & MACHINE CO.
 NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

1. In the opinion of the Company, the accompanying unaudited interim financial statements contain all adjustments necessary to present fairly the financial position of the Company as of September 30, 2010 (unaudited) and December 31, 2009 (audited) and the results of operations and changes in cash flows for the indicated periods. Certain information and note disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been omitted from these unaudited financial statements in accordance with applicable rules. Please refer to the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2009.

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

2. The results of operations for the three and nine-month period ending September 30, 2010 are not necessarily indicative of the results to be expected for the year.

3. The Company extends credit on the basis of terms that are customary within our markets to various companies doing business primarily in the automotive industry. The Company has a concentration of credit risk primarily within the automotive industry and in the Midwestern United States.

4. The Company is, from time to time, involved in litigation, including environmental claims and contract disputes, in the normal course of business. While it is not possible at this time to establish the ultimate amount of liability with respect to contingent liabilities, including those related to legal proceedings, management is of the opinion that the aggregate amount of any such liabilities, for which provision has not been made, will not have a material adverse effect on the Company's financial position.

5. The Company's federal income tax returns for the 2008 and 2009 tax years are subject to examination by the Internal Revenue Service (IRS). While it may be possible that a reduction could occur with respect to the Company's unrecognized tax benefits as an outcome of an IRS examination, management does not anticipate any adjustments that would result in a material change to the results of operations or financial condition of the Company. The 2006 and 2007 federal income tax returns were examined by the IRS and no adjustments were made as a result of these examinations. No statutes have been extended on any of the Company's federal income tax filings. The statute of limitations on the Company's 2008 and 2009 federal income tax returns will expire on September 15, 2012 and 2013, respectively.

The Company's state income tax returns for the 2007 through 2009 tax years remain subject to examination by various state authorities with the latest closing period on October 31, 2013. The Company is currently not under examination by any state authority for income tax purposes and no statutes for state income tax filings have been extended.

6. Inventories are stated at the lower of cost or net realizable value, cost being determined by the first-in, first-out method. A summary of inventories is as follows:

	September 30, 2010	December 31, 2009
Raw material	\$ 1,524,749	\$ 1,324,614
Work-in-process	1,695,595	1,500,723
Finished goods	1,542,982	1,493,099
	4,763,326	4,318,436
Valuation reserves	(559,500)	(564,500)
	\$ 4,203,826	\$ 3,753,936

CHICAGO RIVET & MACHINE CO.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Results for the third quarter of 2010, as well as those of the current year to date, reflect significant improvement over the same periods in 2009 when business conditions were at their weakest due to the economic crisis. Net sales for the third quarter this year totaled \$6,950,274, an increase of \$1,460,127, or 26.6%, compared to the year earlier quarter. As of September 30, 2010, year to date sales totaled \$21,650,200, an improvement of \$6,720,940, or 45%, compared to the same period in 2009. The increase in revenue, combined with previously instituted cost control measures, has resulted in a net profit of \$105,993, or \$.11 per share, in the third quarter of the current year compared with a net loss of \$246,814, or \$.26 per share, in the third quarter of 2009. For the first nine months of 2010, net income was \$559,922, or \$.58 per share, compared with a net loss of \$1,310,132, or \$1.36 per share, reported in 2009.

During the third quarter, the fastener segment continued its rebound from the depressed levels of one year earlier. Fastener segment revenues improved to \$6,073,599 for the quarter, from \$4,742,053 last year, an increase of \$1,331,546, or 28.1%. This marks the fourth consecutive quarter to exceed the year earlier quarterly sales figure. For the first three quarters of the year, fastener segment revenues have increased \$6,603,688, or 52.9%, from \$12,476,654 in 2009 to \$19,080,342 in the current year. With the majority of such revenues derived from the automotive industry, the segment has benefited from a rebound in domestic auto and truck production during the current year, as well as new customers and certain high-volume parts added in the last year. As we have increased production to meet the improved demand, segment payroll was increased by \$447,000 for the quarter and \$1,485,000 for the year to date. Nevertheless, increased production allowed for more optimal utilization of resources, so that while higher on an absolute dollar basis, overall payroll and plant overhead comprised a smaller percentage of net sales than a year ago. The only notable exception is state unemployment taxes that increased by approximately \$107,000 during the first three quarters of the year due to higher tax rates. The combination of higher sales, better utilization of resources brought about by improved customer demand, and an ongoing emphasis on efficiency, contributed to an increase in fastener segment gross margin in the third quarter of approximately \$468,000 and an increase of \$2,627,000 in the year to date amount, compared with the year earlier periods.

Revenues within the assembly equipment segment were \$876,675 in the third quarter of 2010, an increase of \$128,581, or 17.2%, compared to the third quarter of 2009, when revenues were \$748,094. While this increase is primarily due to greater machine sales, the number of machines shipped in the quarter experienced a decline compared to last year as demand for capital items continues to be constrained. Year to date revenues of \$2,569,858 represent a \$117,252, or 4.8%, increase compared to the \$2,452,606 reported in 2009. While the overall improvement in domestic manufacturing activity has resulted in increased sales of parts and tools compared to 2009, machine sales are particularly sensitive to economic conditions, and the lingering uncertainty regarding the economic recovery has contributed to keeping unit shipments relatively unchanged from a year earlier. With manufacturing costs held near levels at or below the prior year, the increase in revenue has resulted in a \$65,000 improvement in assembly equipment segment gross margin for the third quarter and brings the year to date improvement to \$274,000.

Selling and administrative expenses for the third quarter of 2010 were \$1,139,115, which was slightly higher than the third quarter of 2009 total of \$1,134,805. The change for the quarter is primarily related to a \$20,000 increase in commissions, due to higher sales, and an increase in accrued profit sharing of \$18,000 related to improved profitability. These items are partially offset by smaller declines during the quarter in various administrative expenses, including payroll, as a result of ongoing cost control efforts. For the first nine months of the year, selling and administrative expenses have increased \$38,861, from \$3,649,790 in 2009 to \$3,688,651 in 2010. Commissions have increased approximately \$95,000 for the year compared to the first three quarters of 2009 due to improved sales, while accrued profit sharing has increased by \$31,000. Various other items combine to partially offset these increases, resulting in a net increase in selling and administrative expenses for the year of only 1.1%.

Working capital at September 30, 2010 was \$14.7 million, an increase of approximately \$.7 million from the beginning of the year. Most of the net increase relates to a greater accounts receivable balance of \$.9 million, related to the increase in sales during the third quarter, compared to the fourth quarter of 2009. Inventories have increased by \$.4 million, or 12%, since the beginning of the year, as greater quantities on hand are maintained for the higher level of activity in the current year, and raw material prices have increased. Offsetting increases in these current assets is a

net decline in prepaid income taxes of \$.5 million, primarily related to the receipt of federal income tax refunds for prior year loss carryback claims. Increases in current liabilities are reflective of the current level of operations compared to that as of the end of the prior year and reflect normal operating patterns. The net result of these changes and other cash flow items on cash, cash equivalents and certificates of deposit was a \$.5 million increase to \$7.5 million as of September 30, 2010.

Table of Contents

Management believes that current cash, cash equivalents and operating cash flow will provide adequate working capital for the foreseeable future.

We are encouraged by the strong recovery in sales over the first three quarters of 2010 compared with the same period last year, when our results were negatively impacted by the worst economic crisis in half a century. While the economy has been in a period of very low growth for most of the year, we have experienced improved customer demand that, combined with the adjustments we have made to our operations, has resulted in positive earnings for the quarter and year to date. Overall economic conditions remain relatively weak due to high unemployment and a lack of confidence, however, amid this uncertainty, we will continue to look for opportunities to profitably grow our revenues and improve our bottom line. We believe our sound financial condition leaves us well positioned to take advantage of opportunities that this environment creates, and we will continue working to make adjustments necessary to improve our operations.

This discussion contains certain forward-looking statements which are inherently subject to risks and uncertainties that may cause actual events to differ materially from those discussed herein. Factors which may cause such differences in events include, those disclosed under Risk Factors in our Annual Report on Form 10-K and in the other filings we make with the United States Securities and Exchange Commission. These factors, include among other things: conditions in the domestic automotive industry, upon which we rely for sales revenue, the intense competition in our markets, the concentration of our sales to two major customers, the price and availability of raw materials, labor relations issues, losses related to product liability, warranty and recall claims, costs relating to environmental laws and regulations, the loss of the services of our key employees and difficulties in achieving expected cost savings. Many of these factors are beyond our ability to control or predict. Readers are cautioned not to place undue reliance on these forward-looking statements. We undertake no obligation to publish revised forward-looking statements to reflect events or circumstances after the date hereof or to reflect the occurrence of unanticipated events.

Item 4. Controls and Procedures.

(a) Disclosure Controls and Procedures. The Company's management, with the participation of the Company's Chief Executive Officer and President, Chief Operating Officer and Treasurer (the Company's principal financial officer), has evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and President, Chief Operating Officer and Treasurer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective in recording, processing, summarizing and reporting, on a timely basis, information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act.

(b) Internal Control Over Financial Reporting. There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
