Edgar Filing: Altra Holdings, Inc. - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the voting and non-voting common stock held by non-affiliates of the registrant based on the closing price (as reported by NASDAQ) of such common stock on the last business day of the registrant's most recently completed second fiscal quarter (July 3, 2010) was approximately \$320.3 million.

As of February 28, 2011, there were 26,866,698 shares of Common Stock, \$.001 par value per share, outstanding.

Item 1. *Business*

Our Company

Altra Holdings, Inc. is the parent company of Altra Industrial Motion, Inc. (Altra Industrial), and owns 100% of Altra Industrial's outstanding capital stock. Altra Industrial, directly or indirectly, owns 100% of the capital stock of its 52 subsidiaries. The following chart illustrates a summary of our corporate structure:

We are a leading global designer, producer and marketer of a wide range of mechanical power transmission, or MPT, and motion control products serving customers in a diverse group of industries, including energy, general industrial, material handling, mining, transportation, and turf and garden. Our product portfolio includes industrial clutches and brakes, enclosed gear drives, open gearing, belted drives, couplings, engineered bearing assemblies, linear components, electronic drives and other related products. Our products are used in a wide variety of high-volume manufacturing processes, where the reliability and accuracy of our products are critical in both avoiding costly down time and enhancing the overall efficiency of manufacturing operations. Our products are also used in non-manufacturing applications where product quality and reliability are especially critical, such as clutches and brakes for elevators and residential and commercial lawnmowers. For the year ended December 31, 2010, we had net sales of \$520.2 million and net income of \$24.5 million.

We market our products under well recognized and established brands, many of which have been in existence for over 50 years. We believe many of our brands, when taken together with our brands in the same product category have achieved the number one or number two position in terms of consolidated market share and brand awareness in their respective product categories. Our products are either incorporated into products sold by original equipment manufacturers, or OEMs, sold to end users directly or sold through industrial distributors.

We are led by a highly experienced management team that has established a proven track record of execution, successfully completing and integrating major strategic acquisitions and delivering significant growth in both revenue and profits. We employ a comprehensive business process called the Altra Business System, or ABS, which focuses on eliminating inefficiencies from every business process to improve quality, delivery and cost.

Unless the context requires otherwise, in this Annual Report on Form 10-K, the terms Altra Holdings, the Company, we, us and our refer to Altra Holdings, Inc. and its subsidiaries, except where the context otherwise requires or indicates.

We file reports and other documents with the Securities and Exchange Commission. You may read and copy documents we file at the SEC's Public Reference Room at 100 F Street, NE, Washington, D.C. 20549. You

should call 1-800-SEC-0330 for more information on the public reference room. Our SEC Filings are also available to you on the SEC's internet site at <http://www.sec.gov>.

Our internet address is www.altramotion.com. By following the link "Investor Relations" and then "SEC filings" on our Internet website, we make available, free of charge, our Annual Report on Form 10-K, our Quarterly Reports on Form 10-Q, our Current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (the "Exchange Act") as soon as reasonably practicable after such forms are filed with or furnished to the SEC. We are not including information contained on or available through our website as a part of, or incorporating such information by reference into, this Annual Report on Form 10-K.

History and Acquisitions

Although we were incorporated in Delaware in 2004, much of our current business has its roots with the prior acquisition by Colfax Corporation, or Colfax, of the MPT group of Zurn Technologies, Inc. in December 1996. Colfax subsequently acquired Industrial Clutch Corp. in May 1997, Nuttall Gear Corp. in July 1997 and the Boston Gear and Delroyd Worm Gear brands in August 1997 as part of Colfax's acquisition of Imo Industries, Inc. In February 2000, Colfax acquired Warner Electric, Inc., which sold products under the Warner Electric, Formsprag Clutch, Stieber and Wichita Clutch brands. Colfax formed Power Transmission Holding, LLC or PTH in June 2004 to serve as a holding company for all of these power transmission businesses. Boston Gear was established in 1877, Warner Electric, Inc. in 1927, and Wichita Clutch in 1949.

On November 30, 2004, we acquired our original core business through the acquisition of PTH from Colfax. We refer to this transaction as the PTH Acquisition.

On October 22, 2004, The Kilian Company, or Kilian, a company formed at the direction of Genstar Capital, the largest stockholder of Altra Holdings at the time, acquired Kilian Manufacturing Corporation from Timken U.S. Corporation. At the completion of the PTH Acquisition, (i) all of the outstanding shares of Kilian capital stock were exchanged for shares of our capital stock and Kilian and its subsidiaries were transferred to Altra Industrial.

On February 10, 2006, we purchased all of the outstanding share capital of Hay Hall Ltd, or Hay Hall. Hay Hall was a UK-based holding company established in 1996 that was focused primarily on the manufacture of couplings and clutch brakes. Hay Hall consisted of five main businesses that were niche focused and had strong brand names and established reputations within their primary markets.

Through Hay Hall, we acquired 15 strong brands in complementary product lines, improved customer leverage and expanded geographic presence in over 11 countries. Hay Hall's product offerings diversified our revenue base and strengthened our key product areas, such as electric clutches, brakes and couplings. Matrix International, Inertia Dynamics and Twiflex, three Hay Hall businesses, combined with Warner Electric, Wichita Clutch, Formsprag Clutch and Stieber, make the consolidated company one of the largest individual manufacturers of industrial clutches and brakes in the world.

On May 18, 2006, we acquired substantially all of the assets of Bear Linear Inc, or Warner Linear. Warner Linear manufactures high value-added linear actuators which are electromechanical power transmission devices designed to move and position loads linearly for mobile off-highway and industrial applications. Warner Linear's product design and engineering expertise, coupled with our sourcing alliance with a low cost country manufacturer, were critical components in our strategic expansion into the motion control market.

On April 5, 2007, the Company acquired all of the outstanding shares of TB Woods Corporation, or TB Woods. TB Woods is an established designer, manufacturer and marketer of mechanical and electronic industrial power transmission products.

On October 5, 2007, we acquired substantially all of the assets of All Power Transmission Manufacturing, Inc., or All Power.

Table of Contents

Divestitures

On December 31, 2007, we sold the TB Wood's adjustable speed drives business or Electronics Division to Vacon, Inc. for \$29.0 million. We sold the Electronics Division in order to continue our strategic focus on our core electro-mechanical power transmission business.

Initial Public Offering

In December 2006, the Company completed an initial public offering. The Company offered 3,333,334 of its own shares of common stock, \$0.001 par value per share. In addition, selling stockholders offered 6,666,666 shares of common stock. Proceeds to the Company after the underwriting discount were \$41.9 million.

Secondary Public Offering

In June 2007, we completed a secondary public offering of 12,650,000 shares of our common stock, which included 1,650,000 shares sold as a result of the underwriters' exercise of their overallotment option in full at closing. We received proceeds of \$48.9 million, net of issuance costs. In the offering, we sold 3,178,494 shares of common stock and certain selling stockholders sold 9,471,506 shares of common stock.

Our Industry

Based on industry data supplied by Penton Information Services, we estimate that industrial power transmission products generated sales in the United States of approximately \$31.8 billion in 2010. These products are used to generate, transmit, control and transform mechanical energy. The industrial power transmission industry can be divided into three areas: MPT products; motors and generators; and adjustable speed drives. We compete primarily in the MPT area which, based on industry data, we estimate was a \$16.1 billion market in the United States in 2010.

The global MPT market is highly fragmented, with over 1,000 small manufacturers. While smaller companies tend to focus on regional niche markets with narrow product lines, larger companies that generate annual sales of over \$100 million generally offer a much broader range of products and have global capabilities. Buyers of MPT products are broadly diversified across many sectors of the economy and typically place a premium on factors such as quality, reliability, availability and design and application engineering support. We believe the most successful industry participants are those that leverage their distribution network, their products' reputations for quality and reliability and their service and technical support capabilities to maintain attractive margins on products and gain market share.

Our Strengths

Leading Market Shares and Brand Names. We believe we hold the number one or number two market position in key products across many of our core platforms. We believe that over 50% of our sales are derived from products where we hold the number one or number two share and brand recognition, assuming our brands in the same product category are taken together, in the markets we serve. In addition, we believe we have recently captured additional market share in several product lines due to our innovative product development efforts and exceptional customer service.

Customized, Engineered Products Serving Niche Markets. We employ approximately 168 non-manufacturing engineers involved with product design, research and development, testing and technical customer support, and we often participate in lengthy design and qualification processes with our customers. Many of our product lines involve a large number of unique parts, are delivered in small order quantities with short lead times, and require varying levels of technical support and responsive customer service. As a result of these characteristics, as well as the essential

nature of our products to the efficient operations of our customers, we generate a significant amount of recurring sales with repeat customers.

Aftermarket Sales Supported by Large Installed Base. With a history dating back to 1857 with the formation of TB Woods, we believe we benefit from one of the largest installed customer bases in the

Table of Contents

industry. The moving, wearing nature of our products necessitates regular replacement and our large installed base of products generates significant aftermarket replacement demand. This has created a recurring revenue stream from a diversified group of end-user customers. For 2010, we estimate that approximately 44% of our revenues were derived from aftermarket sales.

Diversified End Markets. Our revenue base has a balanced exposure across a diverse mix of end-user industries, including energy, food processing, general industrial, material handling, mining, transportation, and turf and garden. We believe our diversified end markets insulate us from volatility in any single industry or type of end-user. In 2010, no single industry represented more than 9% of our total sales. In addition, we are geographically diversified with approximately 27% of our sales coming from outside North America during 2010.

Strong Relationships with Distributors and OEMs. We have over 1,000 direct OEM customers and enjoy established, long-term relationships with the leading industrial MPT distributors, critical factors that contribute to our high base of recurring aftermarket revenues. We sell our products through more than 3,000 distributor outlets worldwide. We believe our scale, expansive product lines and end-user preference for our products make our product portfolio attractive to both large and multi-branch distributors, as well as regional and independent distributors in our industry.

Experienced, High-Caliber Management Team. We are led by a highly experienced management team with over 250 years of cumulative industrial business experience and an average of 13 years with our companies. Our CEO, Carl Christenson, has over 29 years of experience in the MPT industry, while our CFO, Christian Storch, has approximately 23 years of experience. Our management team has established a proven track record of execution, successfully completing and integrating major strategic acquisitions and delivering significant growth and profitability.

The Altra Business System. We benefit from an established culture of lean management emphasizing quality, delivery and cost through the ABS. ABS is at the core of our performance-driven culture and drives both our strategic development and operational improvements. We continually evaluate every aspect of our business to identify productivity improvements and cost savings.

Our Business Strategy

Our long-term strategy is to increase our sales through organic growth, expand our geographic reach and product offerings through strategic acquisitions and improve our profitability through cost reduction initiatives. We seek to achieve these objectives through the following strategies:

Leverage Our Sales and Distribution Network. We intend to continue to leverage our established, long-term relationships with the industry's leading national and regional distributors to help maintain and grow our revenues. We seek to capitalize on customer brand preferences for our products to generate pull-through aftermarket demand from our distribution channel. We believe this strategy also allows our distributors to achieve higher profit margins, further enhancing our preferred position with them.

Focus Our Strategic Marketing on New Growth Opportunities. We intend to expand our emphasis on strategic marketing to focus on new growth opportunities in key end-user and OEM markets. Through a systematic process that leverages our core brands and products, we seek to identify attractive markets and product niches, collect customer and market data, identify market drivers, tailor product and service solutions to specific market and customer requirements, and deploy resources to gain market share and drive future sales growth.

Accelerate New Product and Technology Development. We focus on aggressively developing new products across our business in response to customer needs in various markets. Our extensive application-engineering know-how

drives both new and repeat sales and we have an established history of innovation with over 200 granted patents and pending patent applications worldwide. In total, new products developed by us during the past three years generated approximately \$52.0 million in revenues during 2010.

Table of Contents

Capitalize on Growth and Sourcing Opportunities in the Asia-Pacific Market. We intend to leverage our established sales offices in the Asia Pacific region and expand into regions where we currently do not have sales representation. We also intend to expand our manufacturing presence in Asia beyond our current plant in Shenzhen, China. During 2010, we sourced approximately 24% of our purchases from low-cost countries, resulting in average cost reductions of approximately 43% for these products. Within the next five years, we intend to utilize our sourcing office in Shanghai to significantly increase our current level of low-cost country sourced purchases. We may also consider additional opportunities to outsource some of our production from North American and Western European locations to Asia or lower cost regions.

Continue to Improve Operational and Manufacturing Efficiencies through ABS. We believe we can continue to improve profitability through cost control, overhead rationalization, global process optimization, continued implementation of lean manufacturing techniques and strategic pricing initiatives. Our operating plan, based on manufacturing centers of excellence, provides additional opportunities to consolidate purchasing processes and reduce costs by sharing best practices across geographies and business lines.

Selectively Pursue Strategic Acquisitions that Complement Our Strong Platform. We have a successful track record of identifying, acquiring and integrating acquisitions. We believe that in the future there may be a number of attractive potential acquisition candidates, in part due to the fragmented nature of the industry. We plan to continue our disciplined pursuit of strategic acquisitions to strengthen our product portfolio, enhance our industry leadership, leverage fixed costs, expand our global footprint, and create value in products and markets that we know and understand.

Products

We produce and market a wide variety of MPT products. Our product portfolio includes industrial clutches and brakes, open and enclosed gearing, couplings, engineered belted drives, engineered bearing assemblies and other related power transmission components which are sold across a wide variety of industries. Our products benefit from our industry leading brand names including Warner Electric, Boston Gear, TB Woods, Kilian, Nuttall Gear, Ameridrives, Wichita Clutch, Formsprag Clutch, Bibby Transmissions, Stieber, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Huco Dynatork, Marland Clutch, Delroyd, and Warner Linear. Our products serve a wide variety of end markets including aerospace, energy, food processing, general industrial, material handling, mining, petrochemical, transportation and turf and garden. We primarily sell our products to OEMs and through long-standing relationships with the industry's leading industrial distributors such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger. The following discussion of our products does not include detailed product category revenue because such information is not individually tracked by our financial reporting system and is not separately reported by our general purpose financial statements. Conducting a detailed product revenue internal assessment and audit would involve unreasonable effort and expense as revenue information by product line is not available. We maintain sales information by operating facility, but do not maintain any accounting sales data by product line.

Table of Contents

Our products, principal brands and markets and sample applications are set forth below:

Products	Principal Brands	Principal Markets	Sample Applications
Clutches and Brakes	Warner Electric, Wichita Clutch, Formsprag Clutch, Stieber Clutch, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Marland Clutch	Aerospace, energy, material handling, metals, turf and garden, mining	Elevators, forklifts, lawn mowers, oil well draw works, punch presses, conveyors
Gearing	Boston Gear, Nuttall Gear, Delroyd	Food processing, material handling, metals, transportation	Conveyors, ethanol mixers, packaging machinery, metal processing equipment
Engineered Couplings	Ameridrives, Bibby Transmissions, TB Wood s	Energy, metals, plastics, chemical	Extruders, turbines, steel strip mills, pumps
Engineered Bearing Assemblies	Kilian	Aerospace, material handling, transportation	Cargo rollers, seat storage systems, conveyors
Power Transmission Components	Warner Electric, Boston Gear, Huco Dynatork, Warner Linear, Matrix, TB Wood s	Material handling, metals, turf and garden	Conveyors, lawn mowers, machine tools
Engineered Belted Drives	TB Wood s	Aggregate, HVAC, material handling	Pumps, sand and gravel conveyors, industrial fans

Our products are used in a wide variety of high-volume manufacturing processes, where the reliability and accuracy of our products are critical in both avoiding costly down time and enhancing the overall efficiency of manufacturing operations. Our products are also used in non-manufacturing applications where product quality and reliability are especially critical, such as clutches and brakes for elevators and residential and commercial lawnmowers.

Clutches and Brakes. Clutches are devices which use mechanical, magnetic, hydraulic, pneumatic, or friction type connections to facilitate engaging or disengaging two rotating members. Brakes are combinations of interacting parts that work to slow or stop machinery. We manufacture a variety of clutches and brakes in three main product categories: electromagnetic, overrunning and heavy duty. Our core clutch and brake manufacturing facilities are located in Connecticut, Indiana, Illinois, Michigan, Texas, the United Kingdom, Germany, France and China.

Electromagnetic Clutches and Brakes. Our industrial products include clutches and brakes with specially designed controls for material handling, forklift, elevator, medical mobility, mobile off-highway, baggage handling and plant productivity applications. We also offer a line of clutch and brake products for walk-behind mowers, residential lawn tractors and commercial mowers. While industrial applications are predominant, we also manufacture several vehicular niche applications including on-road refrigeration compressor clutches and agricultural equipment clutches. We market our electromagnetic products under the Warner Electric, Inertia Dynamics and Matrix brand names.

Overrunning Clutches. Specific product lines include indexing and backstopping clutches. Primary industrial applications include conveyors, gear reducers, hoists and cranes, mining machinery, machine tools, paper machinery, packaging machinery, pumping equipment and

Table of Contents

other specialty machinery. We market and sell these products under the Formsprag, Marland and Stieber brand names.

Heavy Duty Clutches and Brakes. Our heavy duty clutch and brake product lines serve various markets including metal forming, off-shore and land-based oil and gas drilling platforms, mining, material handling, marine applications and various off-highway and construction equipment segments. Our line of heavy duty pneumatic, hydraulic and caliper clutches and brakes are marketed under the Wichita Clutch and Twiflex brand names.

Gearing. Gears reduce the output speed and increase the torque of an electric motor or engine to the level required to drive a particular piece of equipment. These products are used in various industrial, material handling, mixing, transportation and food processing applications. Specific product lines include vertical and horizontal gear drives, speed reducers and increasers, high-speed compressor drives, enclosed custom gear drives, various enclosed gear drive configurations and open gearing products such as spur, helical, worm and miter/bevel gears. We design and manufacture a broad range of gearing products under the Boston Gear, Nuttall Gear and Delroyd brand names. We manufacture our gearing products at our facilities in New York and North Carolina and sell to a variety of end markets.

Engineered Couplings. Couplings are the interface between two shafts, which enable power to be transmitted from one shaft to the other. Because shafts are often misaligned, we designed our couplings with a measure of flexibility that accommodates various degrees of misalignment. Our coupling product line includes gear couplings, high-speed disc and diaphragm couplings, elastomeric couplings, grid couplings, universal joints, jaw couplings and spindles. Our coupling products are used in a wide range of markets including power generation, steel and custom machinery industries. We manufacture a broad range of coupling products under the Ameridrives, Bibby and TB Wood's brand names. Our engineered couplings are manufactured in our facilities in Mexico, Michigan, Pennsylvania, Texas, the United Kingdom and Wisconsin.

Engineered Bearing Assemblies. Bearings are components that support, guide and reduce friction of motion between fixed and moving machine parts. Our engineered bearing assembly product line includes ball bearings, roller bearings, thrust bearings, track rollers, stainless steel bearings, polymer assemblies, housed units and custom assemblies. We manufacture a broad range of engineered bearing products under the Kilian brand name. We sell bearing products to a wide range of end markets, including the general industrial and automotive markets, with a particularly strong OEM customer focus. We manufacture our bearing products at our facilities in New York, Canada and China.

Power Transmission Components. Power transmission components are used in a number of industries to generate, transfer or control motion from a power source to an application requiring rotary or linear motion. Power transmission products are applicable in most industrial markets, including, but not limited to metals processing, turf and garden and material handling applications. Specific product lines include linear actuators, miniature and small precision couplings, air motors, friction materials, hydrostatic drives and other various items. We manufacture or market a broad array of power transmission components under several businesses including Warner Linear, Huco Dynatork, Boston Gear, Warner Electric, TB Wood's and Matrix. Our core power transmission component manufacturing facilities are located in Illinois, Michigan, North Carolina, the United Kingdom and China.

Warner Linear. Warner Linear is a designer and manufacturer of rugged service electromechanical linear actuators for off-highway vehicles, agriculture, turf care, special vehicles, medical equipment, industrial and marine applications.

Huco Dynatork. Huco Dynatork is a leading manufacturer and supplier of a complete range of precision couplings, universal joints, rod ends and linkages.

Other Accessories. Our Boston Gear, Warner Electric, Matrix and TB Wood s businesses make or market several other accessories such as sensors, sleeve bearings, AC/DC motors, shaft accessories, face tooth couplings, mechanical variable speed drives, and fluid power components that are used in numerous end markets.

Table of Contents

Engineered Belted Drives. Belted drives incorporate both a rubber-based belt and at least two sheaves or sprockets. Belted drives typically change the speed of an electric motor or engine to the level required for a particular piece of equipment. Our belted drive line includes three types of v-belts, three types of synchronous belts, standard and made-to-order sheaves and sprockets, and split taper bushings. We sell belted drives to a wide range of end markets, including aggregate, energy, chemical and material handling. Our engineered belted drives are primarily manufactured under the TB Wood's brand in our facilities in Pennsylvania and Mexico.

Research and Development and Product Engineering

We closely integrate new product development with marketing, manufacturing and product engineering in meeting the needs of our customers. We have product engineering teams that work to enhance our existing products and develop new product applications for our growing base of customers that require custom solutions. We believe these capabilities provide a significant competitive advantage in the development of high quality industrial power transmission products. Our product engineering teams focus on:

- lowering the cost of manufacturing our existing products;
- redesigning existing product lines to increase their efficiency or enhance their performance; and
- developing new product applications.

Our continued investment in new product development is intended to help drive customer growth as we address key customer needs.

Sales and Marketing

We sell our products in over 70 countries to over 1,000 direct OEM customers and over 3,000 distributor outlets. We offer our products through our direct sales force comprised of 101 company-employed sales associates as well as independent sales representatives. Our worldwide sales and distribution presence enables us to provide timely and responsive support and service to our customers, many of which operate globally, and to capitalize on growth opportunities in both developed and emerging markets around the world.

We employ an integrated sales and marketing strategy concentrated on both key industries and individual product lines. We believe this dual vertical market and horizontal product approach distinguishes us in the marketplace allowing us to quickly identify trends and customer growth opportunities and deploy resources accordingly. Within our key industries, we market to OEMs, encouraging them to incorporate our products into their equipment designs, to distributors and to end-users, helping to foster brand preference. With this strategy, we are able to leverage our industry experience and product breadth to sell MPT and motion control solutions for a host of industrial applications.

Distribution

Our MPT components are either incorporated into end products sold by OEMs or sold through industrial distributors as aftermarket products to end users and smaller OEMs. We operate a geographically diversified business. For the year ended December 31, 2010, we derived approximately 73% of our net sales from customers in North America, 21% from customers in Europe and 6% from customers in Asia and the rest of the world. Our global customer base is served by an extensive global sales network comprised of our sales staff as well as our network of over 3,000 distributor outlets.

Rather than serving as passive conduits for delivery of product, our industrial distributors are active participants in influencing product purchasing decisions in the MPT industry. In addition, distributors play a critical role through stocking inventory of our products, which amplifies the accessibility of our products to aftermarket buyers. It is for this reason that distributor partner relationships are so critical to the success of the business. We enjoy strong established relationships with the leading distributors as well as a broad, diversified base of specialty and regional distributors.

Table of Contents

Competition

We operate in highly fragmented and very competitive markets within the MPT market. Some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, such as helical gear drives, and some of our competitors are larger than us and have greater financial and other resources. In particular, we compete with Emerson Power Transmission Manufacturing LP, Rexnord LLC., Regal-Beloit Corporation and Baldor Electric, Inc. In addition, with respect to certain of our products, we compete with divisions of our OEM customers. Competition in our business lines is based on a number of considerations including quality, reliability, pricing, availability and design and application engineering support. Our customers increasingly demand a broad product range and we must continue to develop our expertise in order to manufacture and market these products successfully. To remain competitive, regular investment in manufacturing, customer service and support, marketing, sales, research and development and intellectual property protection is required. We may have to adjust the prices of some of our products to stay competitive. In addition, some of our larger, more sophisticated customers are attempting to reduce the number of vendors from which they purchase in order to increase their efficiency. There is substantial and continuing pressure on major OEMs and larger distributors to reduce costs, including the cost of products purchased from outside suppliers such as us. As a result of cost pressures from our customers, our ability to compete depends in part on our ability to generate production cost savings and, in turn, find reliable, cost-effective outside component suppliers or manufacturers for our products. See *Risk Factors Risks Related to our Business We operate in the highly competitive mechanical power transmission industry and if we are not able to compete successfully our business may be significantly harmed.*

Intellectual Property

We rely on a combination of patents, trademarks, copyright, and trade secret laws in the United States and other jurisdictions, as well as employee and third-party non-disclosure agreements, license arrangements, and domain name registrations to protect our intellectual property. We sell our products under a number of registered and unregistered trademarks, which we believe are widely recognized in the MPT industry. With the exception of Boston Gear, Warner Electric and TB Wood s, we do not believe any single patent, trademark or trade name is material to our business as a whole. Any issued patents that cover our proprietary technology and any of our other intellectual property rights may not provide us with adequate protection or be commercially beneficial to us and, patents applied for, may not be issued. The issuance of a patent is not conclusive as to its validity or its enforceability. Competitors may also be able to design around our patents. If we are unable to protect our patented technologies, our competitors could commercialize technologies or products which are substantially similar to ours.

With respect to proprietary know-how, we rely on trade secret laws in the United States and other jurisdictions and on confidentiality agreements. Monitoring the unauthorized use of our technology is difficult and the steps we have taken may not prevent unauthorized use of our technology. The disclosure or misappropriation of our intellectual property could harm our ability to protect our rights and our competitive position.

Some of our registered and unregistered trademarks include: Warner Electric, Boston Gear, TB Wood s, Kilian, Nuttall Gear, Ameridrives, Wichita Clutch, Formsprag, Bibby Transmissions, Stieber, Matrix, Inertia Dynamics, Twiflex, Industrial Clutch, Huco Dynatork, Marland, Delroyd, Warner Linear and Saftek.

Employees

As of December 31, 2010, we had 2,787 full-time employees, of whom approximately 65% were located in North America, 20% in Europe, and 15% in Asia. Approximately 6% of our full-time factory North American employees are represented by labor unions. In addition, approximately 350 employees or 63% of our European employees are represented by labor unions. Additionally, approximately 55 employees in the TB Wood s production facilities in

Mexico are unionized under collective bargaining agreements that are subject to annual renewals. We are a party to four U.S. collective bargaining agreements. Three of the agreements will expire on June 2011, September 2011, and October 2013, respectively. With respect to the

Table of Contents

fourth collective bargaining agreement, we have entered into a plant closing agreement with labor union employees at our South Beloit Manufacturing facility. The facility is substantially closed with the exception of one remaining product line which we expect to remain open until the third quarter of 2012.

One of the four U.S. collective bargaining agreements contains provisions for additional, potentially significant, lump-sum severance payments to all employees covered by that agreement who are terminated as the result of a plant closing and one of our collective bargaining agreements contains provisions restricting our ability to terminate or relocate operations. See *Risk Factors Risks Related to Our Business We may be subject to work stoppages at our facilities, or our customers may be subjected to work stoppages, which could seriously impact our operations and the profitability of our business.*

Our European facilities have employees who are generally represented by local and national social works councils which are common in Europe. Social works councils meet with employer industry associations every two to three years to discuss employee wages and working conditions. Our facilities in France and Germany often participate in such discussions and adhere to any agreements reached.

Suppliers and Raw Materials

We obtain raw materials, component parts and supplies from a variety of sources, generally from more than one supplier. Our suppliers and sources of raw materials are based in both the United States and other countries and we believe that our sources of raw materials are adequate for our needs for the foreseeable future. We do not believe the loss of any one supplier would have a material adverse effect on our business or results of operations. Our principal raw materials are steel, castings and copper. We generally purchase our materials on the open market, where certain commodities such as steel and copper have fluctuated in price significantly in recent years. We have not experienced any significant shortage of our key materials and have not historically engaged in hedging transactions for commodity suppliers.

Seasonality

We experience seasonality in our turf and garden business, which in recent years has represented approximately 11% of our net sales. As our large OEM customers prepare for the spring season, our shipments generally start increasing in December, peak in February and March, and begin to decline in April and May. This allows our customers to have inventory in place for the peak consumer purchasing periods for turf and garden products. The June-through-November period is typically the low season for us and our customers in the turf and garden market. Seasonality is also affected by weather and the level of housing starts.

Regulation

We are subject to a variety of government laws and regulations that apply to companies engaged in international operations. These include compliance with the Foreign Corrupt Practices Act, U.S. Department of Commerce export controls, local government regulations and procurement policies and practices (including regulations relating to import-export control, investments, exchange controls and repatriation of earnings). We maintain controls and procedures to comply with laws and regulations associated with our international operations. In the event we are unable to remain compliant with such laws and regulations, our business may be adversely affected.

Environmental and Health and Safety Matters

We are subject to a variety of federal, state, local, foreign and provincial environmental laws and regulations, including those governing health and safety requirements, the discharge of pollutants into the air or water, the

management and disposal of hazardous substances and wastes and the responsibility to investigate and cleanup contaminated sites that are or were owned, leased, operated or used by us or our predecessors. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines and penalties may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms

Table of Contents

and conditions of required permits. From time to time, our operations may not be in full compliance with the terms and conditions of our permits. We periodically review our procedures and policies for compliance with environmental laws and requirements. We believe that our operations generally are in material compliance with applicable environmental laws and requirements and that any non-compliance would not be expected to result in us incurring material liability or cost to achieve compliance. Historically, the costs of achieving and maintaining compliance with environmental laws and requirements have not been material.

Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release of hazardous substances occurred or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation. As a practical matter, however, the costs of investigation and remediation generally are allocated among the viable responsible parties on some form of equitable basis. Liability also may include damages to natural resources. We have not been notified that we are a potentially responsible party in connection with any sites we currently or formerly owned or operated or for liability at any off-site waste disposal facility.

However, there is contamination at some of our current facilities, primarily related to historical operations at those sites, for which we could be liable for the investigation and remediation under certain environmental laws. The potential for contamination also exists at other of our current or former sites, based on historical uses of those sites. We currently are not undertaking any remediation or investigations and our costs or liability in connection with potential contamination conditions at our facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements. Currently, other parties with contractual liability are addressing or have plans or obligations to address those contamination conditions that may pose a material risk to human health, safety or the environment. In addition, while we attempt to evaluate the risk of liability associated with our facilities at the time we acquire them, there may be environmental conditions currently unknown to us relating to our prior, existing or future sites or operations or those of predecessor companies whose liabilities we may have assumed or acquired which could have a material adverse effect on our business.

We are being indemnified, or expect to be indemnified by third parties subject to certain caps or limitations on the indemnification, for certain environmental costs and liabilities associated with certain owned or operated sites. Accordingly, based on the indemnification and the experience with similar sites of the environmental consultants who we have hired, we do not expect such costs and liabilities to have a material adverse effect on our business, operations or earnings. We cannot assure you, however, that those third parties will in fact satisfy their indemnification obligations. If those third parties become unable to, or otherwise do not, comply with their respective indemnity obligations, or if certain contamination or other liability for which we are obligated is not subject to these indemnities, we could become subject to significant liabilities.

Executive Officers of Registrant

The following sets forth certain information with regard to our executive officers as of February 24, 2011 (ages are as of December 31, 2010):

Michael L. Hurt (age 65), P.E. has been our Executive Chairman since January 2009, Prior to his current position, Mr. Hurt served as Chief Executive Officer and a director since our formation in 2004. In November 2006, Mr. Hurt was elected as chairman of our board. During 2004, prior to our formation, Mr. Hurt provided consulting services to Genstar Capital and was appointed Chairman and Chief Executive Officer of Kilian in October 2004. From January

1991 to November 2003, Mr. Hurt was the President and Chief Executive Officer of TB Woods Incorporated, a manufacturer of industrial power transmission products. Prior to TB Woods, Mr. Hurt spent 23 years in a variety of management positions at the Torrington Company, a major manufacturer of bearings and a subsidiary of Ingersoll Rand. Mr. Hurt holds a B.S. degree in Mechanical Engineering from Clemson University and an M.B.A. from Clemson-Furman University.

Table of Contents

Carl R. Christenson (age 51) has been our Chief Executive Officer since January 2009 and a director since July 2007. Prior to his current position, Mr. Christenson served as our President and Chief Operating Officer from January 2005 to December 2008. From 2001 to 2005, Mr. Christenson was the President of Kaydon Bearings, a manufacturer of custom-engineered bearings and a division of Kaydon Corporation. Prior to joining Kaydon, Mr. Christenson held a number of management positions at TB Woods Incorporated and several positions at the Torrington Company. Mr. Christenson holds a M.S. and B.S. degree in Mechanical Engineering from the University of Massachusetts and an M.B.A. from Rensselaer Polytechnic.

Christian Storch (age 51) has been our Chief Financial Officer since December 2007. From 2001 to 2007, Mr. Storch was the Vice President and Chief Financial Officer at Standex International Corporation. Mr. Storch also served on the Board of Directors of Standex International from October 2004 to December 2007. Mr. Storch also served as Standex International's Treasurer from 2003 to April 2006 and Manager of Corporate Audit and Assurance Services from July 1999 to 2001. Prior to Standex International, Mr. Storch was a Divisional Financial Director and Corporate Controller at Vossloh AG, a publicly held German transport technology company. Mr. Storch has also previously served as an Audit Manager with Deloitte & Touche, LLP. Mr. Storch holds a degree in business administration from the University of Passau, Germany.

Glenn Deegan (age 44) has been our Vice President, Legal and Human Resources, General Counsel and Secretary since June 2009. Prior to his current position, Mr. Deegan served as our General Counsel and Secretary since September 2008. From March 2007 to August 2008, Mr. Deegan served as Vice President, General Counsel and Secretary of Averion International Corp., a publicly held global provider of clinical research services. Prior to Averion, from June 2001 to March 2007, Mr. Deegan served as Director of Legal Affairs and then as Vice President, General Counsel and Secretary of MacroChem Corporation, a publicly held specialty pharmaceutical company. From 1999 to 2001, Mr. Deegan served as Assistant General Counsel of Summit Technology, Inc., a publicly held manufacturer of ophthalmic laser systems. Mr. Deegan previously spent over six years engaged in the private practice of law and also served as law clerk to the Honorable Francis J. Boyle in the United States District Court for the District of Rhode Island. Mr. Deegan holds a B.S. from Providence College and a J.D. from Boston College.

Gerald Ferris (age 61) has been our Vice President of Global Sales since May 2007 and held the same position with Power Transmission Holdings, LLC, our Predecessor, since March 2002. He is responsible for the worldwide sales of our broad product platform. Mr. Ferris joined our Predecessor in 1978 and since joining has held various positions. He became the Vice President of Sales for Boston Gear in 1991. Mr. Ferris holds a B.A. degree in Political Science from Stonehill College.

Todd B. Patriacca (age 41) has been our Vice President of Finance, Corporate Controller and Treasurer since February 2010. Prior to his current position, Mr. Patriacca served as our Vice President of Finance, Corporate Controller and Assistant Treasurer since October 2008 and previous to that, as Vice President of Finance and Corporate Controller since May 2007 and as Corporate Controller since May 2005. Prior to joining us, Mr. Patriacca was Corporate Finance Manager at MKS Instrument Inc., a semi-conductor equipment manufacturer since March 2002. Prior to MKS, Mr. Patriacca spent over ten years at Arthur Andersen LLP in the Assurance Advisory practice. Mr. Patriacca is a Certified Public Accountant and holds a B.A. in History from Colby College and an M.B.A. and an M.S. in Accounting from Northeastern University.

Craig Schuele (age 47) has been our Vice President of Marketing and Business Development since May 2007 and held the same position with our Predecessor since July 2004. Prior to his current position, Mr. Schuele has been Vice President of Marketing since March 2002, and previous to that he was a Director of Marketing. Mr. Schuele joined our Predecessor in 1986 and holds a B.S. degree in Management from Rhode Island College.

Table of Contents

Recent Developments

On February 25, 2011, we entered into a Sale and Purchase Agreement regarding the Gear Motor Business of Danfoss Bauer GmbH (the Purchase Agreement) with Danfoss Bauer GmbH (Bauer) and Danfoss A/S to acquire substantially all of the assets and liabilities of Bauer relating to its gear motor business (the Bauer Acquisition). Bauer, a privately-held company headquartered in Esslingen, Germany, manufactures and sells advanced high quality standard gear motors. Bauer has been a provider of engineered gear motor solutions for more than three quarters of a century. Bauer provides high quality products with a focus on flexible solutions and reliability, and has a strong market presence within the food and beverage, energy, waste water, steel and material handling industries. Bauer has production facilities in Germany and Slovakia, and has sales offices and assembly facilities around the world. We expect the Bauer Acquisition to close in the second quarter of 2011.

The purchase price of the Bauer Acquisition is approximately 43.1 million, or approximately \$58.2 million, in cash, payable at closing, subject to adjustment for working capital, pension accruals and petty cash.

The Purchase Agreement contains representations, warranties, and covenants that we believe are customary for a transaction of this size and type, as well as indemnification provisions subject to specified limitations. The closing of the Bauer Acquisition is subject to several customary conditions, including receipt of required regulatory approvals, and there can be no assurance that the Bauer Acquisition will be completed as contemplated, or at all. See Risk Factors Risks Related to the Bauer Acquisition.

We expect to realize several benefits from the Bauer Acquisition, including the following:

Further Diversification of Our Product Offering and Enhanced Scale. The Bauer Acquisition will significantly broaden our product portfolio to include a complete offering of gear motors, increase our cross-selling opportunities, provide global expansion opportunities for our gear business, and result in increased penetration of our products into a broader client base. We believe Bauer's manufacturing footprint and production efficiency will help us better serve our customers.

Accretive to Earnings. The Bauer Acquisition is anticipated to be accretive, excluding any one-time or acquisitions costs, to our earnings in 2011.

Strengthened Position as a Leader in the Gearing Business. By combining the Bauer product family with our existing gearing brands, including Boston Gear, Nuttall and Delroyd, we will become a larger, more balanced producer of gearing products. Bauer's product offering is complementary to our current gear business and we expect that the Bauer Acquisition will more than double our gearing revenues, including providing us with an immediate presence in the helical gear motor market.

Leveraging Our Strong Customer Relationships. The Bauer Acquisition will help us establish a broader combined customer base which will enable long-term opportunities for up-selling and cross-selling as we demonstrate the value of Bauer products to our customers. In addition, Bauer represents a well-recognized, leading brand name that will complement our existing brand family and facilitate the penetration of our combined products into a broader customer base.

Manufacturing, Operating and Product Capability. The Bauer Acquisition will enhance our geographic footprint through the addition of two manufacturing facilities in Europe. One of these facilities is a low-cost production operation in Slovakia that we expect will support our global manufacturing strategy.

Expanded Geographic Footprint. Bauer has a well-established sales network throughout Europe, in China and the U.S., and as a result the Bauer Acquisition will significantly enhance our position outside of North America, particularly in Western Europe. The Bauer Acquisition will also provide a footprint for us in Russia as well as several Eastern European countries.

Table of Contents

Item 1A. Risk Factors

Risks Related to Our Business

We operate in the highly competitive mechanical power transmission industry and if we are not able to compete successfully our business may be significantly harmed.

We operate in highly fragmented and very competitive markets in the MPT industry. Some of our competitors have achieved substantially more market penetration in certain of the markets in which we operate, such as helical gear drives, and some of our competitors are larger than us and have greater financial and other resources. With respect to certain of our products, we compete with divisions of our OEM customers. Competition in our business lines is based on a number of considerations, including quality, reliability, pricing, availability, and design and application engineering support. Our customers increasingly demand a broad product range and we must continue to develop our expertise in order to manufacture and market these products successfully. To remain competitive, regular investment in manufacturing, customer service and support, marketing, sales, research and development and intellectual property protection is required. In the future we may not have sufficient resources to continue to make such investments and may not be able to maintain our competitive position within each of the markets we serve. We may have to adjust the prices of some of our products to stay competitive.

Additionally, some of our larger, more sophisticated customers are attempting to reduce the number of vendors from which they purchase in order to increase their efficiency. If we are not selected to become one of these preferred providers, we may lose market share in some of the markets in which we compete.

There is substantial and continuing pressure on major OEMs and larger distributors to reduce costs, including the cost of products purchased from outside suppliers. As a result of cost pressures from our customers, our ability to compete depends in part on our ability to generate production cost savings and, in turn, find reliable, cost effective outside suppliers to source components or manufacture our products. If we are unable to generate sufficient cost savings in the future to offset price reductions, then our gross margin could be materially adversely affected.

Changes in or the cyclical nature of our markets could harm our operations and financial performance.

Our financial performance depends, in large part, on conditions in the markets that we serve and on the U.S. and global economies in general. Some of the markets we serve are highly cyclical, such as the metals, mining, industrial equipment and energy markets. In such an environment, expected cyclical activity or sales may not occur or may be delayed and may result in significant quarter-to-quarter variability in our performance. Any sustained weakness in demand, downturn or uncertainty in cyclical markets may reduce our sales and profitability.

We rely on independent distributors and the loss of these distributors could adversely affect our business.

In addition to our direct sales force and manufacturer sales representatives, we depend on the services of independent distributors to sell our products and provide service and aftermarket support to our customers. We support an extensive distribution network, with over 3,000 distributor locations worldwide. Rather than serving as passive conduits for delivery of product, our independent distributors are active participants in the overall competitive dynamics in the MPT industry. During the year ended December 31, 2010, approximately 37% of our net sales from continuing operations were generated through independent distributors. In particular, sales through our largest distributor accounted for approximately 9% of our net sales for the year ended December 31, 2010. Almost all of the distributors with whom we transact business offer competitive products and services to our customers. In addition, the distribution agreements we have are typically non-exclusive and cancelable by the distributor after a short notice period. The loss of any major distributor or a substantial number of smaller distributors or an increase in the

distributors sales of our competitors products to our customers could materially reduce our sales and profits.

Table of Contents

We must continue to invest in new technologies and manufacturing techniques; however, our ability to develop or adapt to changing technology and manufacturing techniques is uncertain and our failure to do so could place us at a competitive disadvantage.

The successful implementation of our business strategy requires us to continuously invest in new technologies and manufacturing techniques to evolve our existing products and introduce new products to meet our customers' needs in the industries we serve and want to serve. For example, motion control products offer more precise positioning and control compared to industrial clutches and brakes. If manufacturing processes are developed to make motion control products more price competitive and less complicated to operate, our customers may decrease their purchases of MPT products.

Our products are characterized by performance and specification requirements that mandate a high degree of manufacturing and engineering expertise. We believe that our customers rigorously evaluate their suppliers on the basis of a number of factors, including:

- product quality and availability;
- price competitiveness;
- technical expertise and development capability;
- reliability and timeliness of delivery;
- product design capability;
- manufacturing expertise; and
- sales support and customer service.

Our success depends on our ability to invest in new technologies and manufacturing techniques to continue to meet our customers' changing demands with respect to the above factors. We may not be able to make required capital expenditures and, even if we do so, we may be unsuccessful in addressing technological advances or introducing new products necessary to remain competitive within our markets. Furthermore, our own technological developments may not be able to produce a sustainable competitive advantage. If we fail to successfully invest in improvements to our technology and manufacturing techniques, our business may be materially adversely affected.

Our operations are subject to international risks that could affect our operating results.

Our net sales outside North America represented approximately 27% of our total net sales for the year ended December 31, 2010. In addition, we sell products to domestic customers for use in their products sold overseas. We also source a significant portion of our products and materials from overseas, a practice which is increasing. Our business is subject to risks associated with doing business internationally, and our future results could be materially adversely affected by a variety of factors, including:

- fluctuations in currency exchange rates;
- exchange rate controls;
- tariffs or other trade protection measures and import or export licensing requirements;

potentially negative consequences from changes in tax laws;

interest rates;

unexpected changes in regulatory requirements;

changes in foreign intellectual property law;

differing labor regulations;

requirements relating to withholding taxes on remittances and other payments by subsidiaries;

Table of Contents

restrictions on our ability to own or operate subsidiaries, make investments or acquire new businesses in various jurisdictions;

potential political instability and the actions of foreign governments; and

restrictions on our ability to repatriate dividends from our subsidiaries.

As we continue to expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these and other risks associated with our international operations. However, any of these factors could materially adversely affect our international operations and, consequently, our operating results.

Our operations depend on production facilities throughout the world, many of which are located outside the United States and are subject to increased risks of disrupted production causing delays in shipments and loss of customers and revenue.

We operate businesses with manufacturing facilities worldwide, many of which are located outside the United States including in Canada, China, France, Germany, Mexico and the United Kingdom. Serving a global customer base requires that we place more production in emerging markets to capitalize on market opportunities and cost efficiencies. Our international production facilities and operations could be disrupted by a natural disaster, labor strike, war, political unrest, terrorist activity or public health concerns, particularly in emerging countries that are not well-equipped to handle such occurrences. Any production disruptions could materially adversely affect our business.

We rely on estimated forecasts of our OEM customers' needs, and inaccuracies in such forecasts could materially adversely affect our business.

We generally sell our products pursuant to individual purchase orders instead of under long-term purchase commitments. Therefore, we rely on estimated demand forecasts, based upon input from our customers, to determine how much material to purchase and product to manufacture. Because our sales are based on purchase orders, our customers may cancel, delay or otherwise modify their purchase commitments with little or no consequence to them and with little or no notice to us. For these reasons, we generally have limited visibility regarding our customers' actual product needs. The quantities or timing required by our customers for our products could vary significantly. Whether in response to changes affecting the industry or a customer's specific business pressures, any cancellation, delay or other modification in our customers' orders could significantly reduce our revenue, impact our working capital, cause our operating results to fluctuate from period to period and make it more difficult for us to predict our revenue. In the event of a cancellation or reduction of an order, we may not have enough time to reduce operating expenses to minimize the effect of the lost revenue on our business and we may purchase too much inventory and spend more capital than expected, which may materially adversely affect our business.

From time to time, our customers may experience deterioration of their businesses. In addition, during periods of economic difficulty, our customers may not be able to accurately estimate demand forecasts and may scale back orders in an abundance of caution. As a result, existing or potential customers may delay or cancel plans to purchase our products and may not be able to fulfill their obligations to us in a timely fashion. Such cancellations, reductions or inability to fulfill obligations could significantly reduce our revenue, impact our working capital, cause our operating results to fluctuate adversely from period to period and make it more difficult for us to predict our revenue.

Disruption of our supply chain could have an adverse effect on our business, financial condition and results of operations.

Our ability, including manufacturing or distribution capabilities, and that of our suppliers, business partners and contract manufacturers, to make, move and sell products is critical to our success. Damage or disruption to our or their manufacturing or distribution capabilities due to weather, natural disaster, fire or explosion, terrorism, pandemics, strikes, repairs or enhancements at our facilities, excessive demand, raw

Table of Contents

material shortages, or other reasons, could impair our ability, and that of our suppliers, to manufacture or sell our products. Failure to take adequate steps to mitigate the likelihood or potential impact of such events, or to effectively manage such events if they occur, could adversely affect our business, financial condition and results of operations, as well as require additional resources to restore our supply chain.

The materials used to produce our products are subject to price fluctuations that could increase costs of production and adversely affect our profitability.

The materials used to produce our products, especially copper and steel, are sourced on a global or regional basis and the prices of those materials are susceptible to price fluctuations due to supply and demand trends, transportation costs, government regulations and tariffs, changes in currency exchange rates, price controls, the economic climate and other unforeseen circumstances. From the first quarter of 2004 to the fourth quarter of 2010, the average price of copper and steel has increased approximately 195% and 83%, respectively. If we are unable to continue to pass a substantial portion of such price increases on to our customers on a timely basis, our future profitability may be materially adversely affected. In addition, passing through these costs to our customers may also limit our ability to increase our prices in the future.

We face potential product liability claims relating to products we manufacture or distribute, which could result in our having to expend significant time and expense to defend these claims and to pay material damages or settlement amounts.

We face a business risk of exposure to product liability claims in the event that the use of our products is alleged to have resulted in injury or other adverse effects. We currently have several product liability claims against us with respect to our products. Although we currently maintain product liability insurance coverage, we may not be able to obtain such insurance on acceptable terms in the future, if at all, or obtain insurance that will provide adequate coverage against potential claims. Product liability claims can be expensive to defend and can divert the attention of management and other personnel for long periods of time, regardless of the ultimate outcome. An unsuccessful product liability defense could exceed any insurance that we maintain and could have a material adverse effect on our business, financial condition, results of operations or our ability to make payments under our debt obligations when due. In addition, we believe our business depends on the strong brand reputation we have developed. In the event that our reputation is damaged, we may face difficulty in maintaining our pricing positions with respect to some of our products, which would reduce our sales and profitability.

We also risk exposure to product liability claims in connection with products sold by businesses that we acquire. Although in some cases third parties have retained responsibility for product liabilities relating to products manufactured or sold prior to our acquisition of the relevant business and in other cases the persons from whom we have acquired a business may be required to indemnify us for certain product liability claims subject to certain caps or limitations on indemnification, we cannot assure you that those third parties will in fact satisfy their obligations to us with respect to liabilities retained by them or their indemnification obligations. If those third parties become unable to or otherwise do not comply with their respective obligations including indemnity obligations, or if certain product liability claims for which we are obligated were not retained by third parties or are not subject to these indemnities, we could become subject to significant liabilities or other adverse consequences. Moreover, even in cases where third parties retain responsibility for product liabilities or are required to indemnify us, significant claims arising from products that we have acquired could have a material adverse effect on our ability to realize the benefits from an acquisition, could result in our reducing the value of goodwill that we have recorded in connection with an acquisition, or could otherwise have a material adverse effect on our business, financial condition, or operations.

We may be subject to work stoppages at our facilities, or our customers may be subjected to work stoppages, which could seriously impact our operations and the profitability of our business.

As of December 31, 2010, we had approximately 2,787 full time employees, of whom approximately 42% were employed outside the United States. Approximately 94 of our North American employees, and 350

Table of Contents

of our European employees are represented by labor unions. In addition, our employees in Europe are generally represented by local and national social works councils that hold discussions with employer industry associations regarding wage and work issues every two to three years. Our European facilities, particularly those in France and Germany, may participate in such discussions and be subject to any agreements reached with employees.

Additionally, approximately 55 employees in the TB Wood's production facilities in Mexico are unionized under collective bargaining agreements that are subject to annual renewals.

We are a party to four U.S. collective bargaining agreements. Three of the agreements will expire on, June 2011, September 2011, and October 2013, respectively. We have entered into a plant closing agreement with labor union employees at our South Beloit manufacturing facility. We expect the facility to close in the first quarter of 2011. We may be unable to renew these agreements on terms that are satisfactory to us, if at all. In addition, one of our four U.S. collective bargaining agreements contains provisions for additional, potentially significant, lump-sum severance payments to all employees covered by the agreements who are terminated as the result of a plant closing and one of our collective bargaining agreements contains provisions restricting our ability to terminate or relocate operations.

If our unionized workers or those represented by a works council were to engage in a strike, work stoppage or other slowdown in the future, we could experience a significant disruption of our operations. Such disruption could interfere with our ability to deliver products on a timely basis and could have other negative effects, including decreased productivity and increased labor costs. In addition, if a greater percentage of our work force becomes unionized, our business and financial results could be materially adversely affected. Many of our direct and indirect customers have unionized work forces. Strikes, work stoppages or slowdowns experienced by these customers or their suppliers could result in slowdowns or closures of assembly plants where our products are used and could cause cancellation of purchase orders with us or otherwise result in reduced revenues from these customers.

Changes in employment laws could increase our costs and may adversely affect our business.

Various federal, state and international labor laws govern our relationship with employees and affect operating costs. These laws include minimum wage requirements, overtime, unemployment tax rates, workers' compensation rates paid, leaves of absence, mandated health and other benefits, and citizenship requirements. Significant additional government-imposed increases or new requirements in these areas could materially affect our business, financial condition, operating results or cash flow.

In the event our employee-related costs rise significantly, we may have to curtail the number of our employees or shut down certain manufacturing facilities. Any such actions would not only be costly but could also materially adversely affect our business.

We depend on the services of key executives, the loss of whom could materially harm our business.

Our senior executives are important to our success because they are instrumental in setting our strategic direction, operating our business, maintaining and expanding relationships with distributors, identifying, recruiting and training key personnel, identifying expansion opportunities and arranging necessary financing. Losing the services of any of these individuals could adversely affect our business until a suitable replacement could be found. We believe that our senior executives could not easily be replaced with executives of equal experience and capabilities. Although we have entered into employment agreements with certain of our key domestic executives, we cannot prevent our key executives from terminating their employment with us. We do not maintain key person life insurance policies on any of our executives.

If we lose certain of our key sales, marketing or engineering personnel, our business may be adversely affected.

Our success depends on our ability to recruit, retain and motivate highly skilled sales, marketing and engineering personnel. Competition for these persons in our industry is intense and we may not be able to successfully recruit, train or retain qualified personnel. If we fail to retain and recruit the necessary personnel, our business and our ability to obtain new customers, develop new products and provide acceptable levels of

Table of Contents

customer service could suffer. If certain of these key personnel were to terminate their employment with us, we may experience difficulty replacing them, and our business could be harmed.

We are subject to environmental laws that could impose significant costs on us and the failure to comply with such laws could subject us to sanctions and material fines and expenses.

We are subject to a variety of federal, state, local, foreign and provincial environmental laws and regulations, including those governing the discharge of pollutants into the air or water, the management and disposal of hazardous substances and wastes and the responsibility to investigate and cleanup contaminated sites that are or were owned, leased, operated or used by us or our predecessors. Some of these laws and regulations require us to obtain permits, which contain terms and conditions that impose limitations on our ability to emit and discharge hazardous materials into the environment and periodically may be subject to modification, renewal and revocation by issuing authorities. Fines and penalties may be imposed for non-compliance with applicable environmental laws and regulations and the failure to have or to comply with the terms and conditions of required permits. From time to time, our operations may not be in full compliance with the terms and conditions of our permits. We periodically review our procedures and policies for compliance with environmental laws and requirements. We believe that our operations generally are in material compliance with applicable environmental laws, requirements and permits and that any lapses in compliance would not be expected to result in us incurring material liability or cost to achieve compliance. Historically, the costs of achieving and maintaining compliance with environmental laws, and requirements and permits have not been material; however, the operation of manufacturing plants entails risks in these areas, and a failure by us to comply with applicable environmental laws, regulations, or permits could result in civil or criminal fines, penalties, enforcement actions, third party claims for property damage and personal injury, requirements to clean up property or to pay for the costs of cleanup, or regulatory or judicial orders enjoining or curtailing operations or requiring corrective measures, including the installation of pollution control equipment or remedial actions. Moreover, if applicable environmental laws and regulations, or the interpretation or enforcement thereof, become more stringent in the future, we could incur capital or operating costs beyond those currently anticipated.

Certain environmental laws in the United States, such as the federal Superfund law and similar state laws, impose liability for the cost of investigation or remediation of contaminated sites upon the current or, in some cases, the former site owners or operators and upon parties who arranged for the disposal of wastes or transported or sent those wastes to an off-site facility for treatment or disposal, regardless of when the release of hazardous substances occurred or the lawfulness of the activities giving rise to the release. Such liability can be imposed without regard to fault and, under certain circumstances, can be joint and several, resulting in one party being held responsible for the entire obligation. As a practical matter, however, the costs of investigation and remediation generally are allocated among the viable responsible parties on some form of equitable basis. Liability also may include damages to natural resources. We have not been notified that we are a potentially responsible party in connection with any sites we currently or formerly owned or operated any liabilities relating to any off-site waste disposal facility.

However, there is contamination at some of our current facilities, primarily related to historical operations at those sites, for which we could be liable for the investigation and remediation under certain environmental laws. The potential for contamination also exists at other of our current or former sites, based on historical uses of those sites. We currently are not undertaking any remediation or investigations and our costs or liability in connection with potential contamination conditions at our facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements. Currently, other parties with contractual liability are addressing or have plans or obligations to address those contamination conditions that may pose a material risk to human health, safety or the environment. In addition, while we attempt to evaluate the risk of liability associated with our facilities at the time we acquire them, there may be environmental conditions currently unknown to us relating to our prior, existing or future sites or operations or those of predecessor companies whose liabilities we may have assumed or acquired which could have a material

adverse effect on our business.

Table of Contents

We are being indemnified, or expect to be indemnified by third parties subject to certain caps or limitations on the indemnification, for certain environmental costs and liabilities associated with certain owned or operated sites. Accordingly, based on the indemnification and the experience with similar sites of the environmental consultants who we have hired, we do not expect such costs and liabilities to have a material adverse effect on our business, operations or earnings. We cannot assure you, however, that those third parties will in fact satisfy their indemnification obligations. If those third parties become unable to, or otherwise do not, comply with their respective indemnity obligations, or if certain contamination or other liability for which we are obligated is not subject to these indemnities, we could become subject to significant liabilities.

We may face additional costs associated with our post-retirement and post-employment obligations to employees which could have an adverse effect on our financial condition.

As part of the acquisition of our original core business through the acquisition of PTH from Colfax Corporation, the PTH Acquisition, we agreed to assume pension plan liabilities for active U.S. employees under the Retirement Plan for Power Transmission Employees of Colfax and the Ameridrives International Pension Fund for Hourly Employees Represented by United Steelworkers of America, Local 3199-10, collectively referred to as the Prior Plans. We have established a defined benefit plan, the Altra Industrial Motion, Inc. Retirement Plan or New Plan, mirroring the benefits provided under the Prior Plans. The New Plan accepted a spin-off of assets and liabilities from the Prior Plans, in accordance with Section 414(l) of the Internal Revenue Code, or the Code, with such assets and liabilities relating to active U.S. employees as of the closing of the PTH Acquisition. Given the funded status of the Prior Plans and the asset allocation requirements of Code Section 414(l), liabilities under the New Plan greatly exceed the assets that were transferred from the Prior Plans. The accumulated benefit obligation (not including accumulated benefit obligations of non-U.S. pension plans in the amount of \$3.2 million) was approximately \$20.9 million as of December 31, 2010 while the fair value of plan assets associated with these U.S. plans was approximately \$13.3 million as of December 31, 2010. As the New Plan has a considerable funding deficit, the cash funding requirements are expected to be substantial over the next several years, and could have a material adverse effect on our financial condition. As of December 31, 2010, minimum funding requirements are estimated to be \$1.3 million in 2011, \$1.3 million in 2012, \$1.4 million in 2013, and \$1.3 million in 2014,. These amounts are based on actuarial assumptions and actual amounts could be materially different.

Additionally, as part of the PTH Acquisition, we agreed to assume all pension plan liabilities related to non-U.S. employees. The accumulated benefit obligations of non-U.S. pension plans were approximately \$3.2 million as of December 31, 2010. There are no assets associated with these plans.

Finally, as part of the PTH Acquisition, we also agreed to assume all post-employment and post-retirement welfare benefit obligations with respect to active U.S. employees. The benefit obligation for post-retirement benefits, which are not funded, was approximately \$0.3 million as of December 31, 2010.

For a description of the post-retirement and post-employment costs, see Note 8 to our audited financial statements included elsewhere in this Form 10-K.

Our future success depends on our ability to integrate acquired companies and manage our growth effectively.

Our growth through acquisitions has placed, and will continue to place, significant demands on our management, operational and financial resources. Realization of the benefits of acquisitions often requires integration of some or all of the acquired companies' sales and marketing, distribution, manufacturing, engineering, finance and administrative organizations. Integration of companies demands substantial attention from senior management and the management of the acquired companies. In addition, we will continue to pursue new acquisitions, some of which could be material to our business if completed. We may not be able to integrate successfully our recent acquisitions, or any future

acquisitions, operate these acquired companies profitably, or realize the potential benefits from these acquisitions.

Table of Contents

We may not be able to protect our intellectual property rights, brands or technology effectively, which could allow competitors to duplicate or replicate our technology and could adversely affect our ability to compete.

We rely on a combination of patent, trademark, copyright, and trade secret laws in the United States and other jurisdictions, as well as on license, non-disclosure, employee and consultant assignment and other agreements and domain names registrations in order to protect our proprietary technology and rights. Applications for protection of our intellectual property rights may not be allowed, and the rights, if granted, may not be maintained. In addition, third parties may infringe or challenge our intellectual property rights. In some cases, we rely on unpatented proprietary technology. It is possible that others will independently develop the same or similar technology or otherwise obtain access to our unpatented technology. In addition, in the ordinary course of our operations, we pursue potential claims from time to time relating to the protection of certain products and intellectual property rights, including with respect to some of our more profitable products. Such claims could be time consuming, expensive and divert resources. If we are unable to maintain the proprietary nature of our technologies or proprietary protection of our brands, our ability to market or be competitive with respect to some or all of our products may be affected, which could reduce our sales and profitability.

Goodwill and indefinite-lived intangibles comprises a significant portion of our total assets, and if we determine that goodwill or indefinite-lived intangible become impaired in the future, net income in such years may be materially and adversely affected.

Goodwill represents the excess of cost over the fair market value of net assets acquired in business combinations. Due to the acquisitions we have completed historically, goodwill comprises a significant portion of our total assets. We review goodwill and indefinite-lived intangibles annually for impairment and any excess in carrying value over the estimated fair value is charged to the results of operations. Our review of goodwill and indefinite-lived intangibles in December 2010 resulted in no reduction to the value of such assets in our financial statements. Future reviews of goodwill and indefinite-lived intangibles could result in reductions. Any reduction in net income resulting from the write down or impairment of goodwill and indefinite-lived intangibles could adversely affect our financial results. If economic conditions deteriorate we may be required to impair goodwill and indefinite-lived intangibles in future periods.

Unplanned repairs or equipment outages could interrupt production and reduce income or cash flow.

Unplanned repairs or equipment outages, including those due to natural disasters, could result in the disruption of our manufacturing processes. Any interruption in our manufacturing processes would interrupt our production of products, reduce our income and cash flow and could result in a material adverse effect on our business and financial condition.

Our operations are highly dependent on information technology infrastructure and failures could significantly affect our business.

We depend heavily on our information technology, or IT, infrastructure in order to achieve our business objectives. If we experience a problem that impairs this infrastructure, such as a computer virus, a problem with the functioning of an important IT application, or an intentional disruption of our IT systems by a third party, the resulting disruptions could impede our ability to record or process orders, manufacture and ship in a timely manner, or otherwise carry on our business in the ordinary course. Any such events could cause us to lose customers or revenue and could require us to incur significant expense to eliminate these problems and address related security concerns.

Computer viruses, malware, and other hacking programs and devices may cause significant damage, delays or interruptions to our systems and operations or to certain of the products that we sell resulting in damage to our reputation and brand names.

Computer viruses, malware, and other hacking programs and devices may attack our infrastructure, industrial machinery, software or hardware causing significant damage, delays or other service interruptions to

Table of Contents

our systems and operations. Hacking involves efforts to gain unauthorized access to information or systems or to cause intentional malfunctions, loss or corruption of data, software, hardware or other computer equipment. In addition, increasingly sophisticated malware may target real-world infrastructure or product components, including certain of the products that we currently or may in the future sell by attacking, disrupting, reconfiguring and/or reprogramming industrial control software. Hacking, computer viruses, and other malware could result in significant damage to our infrastructure, industrial machinery, systems, or databases. We may incur significant costs to protect our systems and equipment against the threat of, and to repair any damage caused by, computer viruses and hacking. Moreover, if a computer virus or hacking affects our systems or products, our reputation and brand names could be materially damaged and use of our products may decrease.

Our leverage could adversely affect our financial health and make us vulnerable to adverse economic and industry conditions.

We have incurred indebtedness that is substantial relative to our stockholders' investment. As of December 31, 2010, we had approximately \$218.9 million of indebtedness outstanding and \$39.9 million available under lines of credit. Our indebtedness has important consequences; for example, it could:

- make it more challenging for us to obtain additional financing to fund our business strategy and acquisitions, debt service requirements, capital expenditures and working capital;

- increase our vulnerability to interest rate changes and general adverse economic and industry conditions;

- require us to dedicate a substantial portion of our cash flow from operations to service our indebtedness, thereby reducing the availability of our cash flow to finance acquisitions and to fund working capital, capital expenditures, research and development efforts and other general corporate activities;

- make it difficult for us to fulfill our obligations under our credit and other debt agreements;

- limit our flexibility in planning for, or reacting to, changes in our business and our markets; and

- place us at a competitive disadvantage relative to our competitors that have less debt.

Substantially all of our assets have been pledged as collateral against any outstanding borrowings under the credit agreement governing Altra Industrial's Senior Revolving Credit Facility. In addition, the Credit Agreement requires us to maintain specified financial ratios and satisfy certain financial condition tests, which may require that we take action to reduce our debt or to act in a manner contrary to our business objectives. If an event of default were to occur under the Credit Agreements, then the lenders could declare all amounts outstanding under the senior revolving credit facility with accrued interest, to be immediately due and payable. In addition, our senior revolving credit facility and the indentures governing the 81/8% senior secured notes due 2016 (the Senior Secured Notes) have cross-default provisions such that a default under either one would constitute an event of default on the other.

The current economic conditions and severe tightening of credit markets may limit our access to additional capital. In particular, the cost of raising money in the credit markets has increased substantially while the availability of funds from those markets has diminished significantly. While currently these conditions have not impaired our ability to access capital under our credit facility and to finance our operations, there can be no assurance that there will not be a further deterioration in the credit markets, a deterioration in the financial condition of our lenders or their ability to fund their commitments or, if necessary, that we will be able to find replacement financing on similar or acceptable

terms. An inability to access sufficient capital could have an adverse impact on our operations and thus on our operating results and financial position.

Table of Contents

Our Senior Secured Notes impose significant operating and financial restrictions, which may prevent us from pursuing our business strategies or favorable business opportunities.

Subject to a number of important exceptions, the indenture governing our Senior Secured Notes and Altra Industrial's new senior secured credit facility may limit our and Altra Industrial's ability to:

- incur more debt;
- pay dividends or make other distributions;
- redeem stock;
- issue stock of subsidiaries;
- make certain investments;
- create liens;
- reorganize our corporate structure;
- enter into transactions with affiliates;
- merge or consolidate; and
- transfer or sell assets.

The restrictions contained in the indenture governing the Senior Secured Notes and Altra Industrial's new senior secured credit facility may prevent us from taking actions that we believe would be in the best interest of our business, and may make it difficult for us to successfully execute our business strategy or effectively compete with companies that are not similarly restricted. A breach of any of these covenants or the inability to comply with the required financial ratios could result in a default under the Senior Secured Notes, Altra Industrial's new senior secured credit facility, or the indenture governing the Senior Secured Notes, as applicable. If any such default occurs, the lenders under Altra Industrial's senior secured credit facility and the holders of our Senior Secured Notes may elect to declare all of their respective outstanding debt, together with accrued interest and other amounts payable thereunder, to be immediately due and payable. The lenders under Altra Industrial's new senior secured credit facility also have the right in these circumstances to terminate any commitments they have to provide further borrowings. In addition, following an event of default under Altra Industrial's new senior secured credit facility, the lenders under the facility will have the right to proceed against the collateral granted to them to secure the debt. If the debt under Altra Industrial's new senior secured credit facility or the Senior Secured Notes were to be accelerated, our assets may not be sufficient to repay in full the Senior Secured Notes and all of our other debt.

We are subject to tax laws and regulations in many jurisdictions and the inability to successfully defend claims from taxing authorities related to our current or acquired businesses could adversely affect our operating results and financial position.

We conduct business in many countries, which requires us to interpret the income tax laws and rulings in each of those taxing jurisdictions. Due to the subjectivity of tax laws between those jurisdictions as well as the subjectivity of factual interpretations, our estimates of income tax liabilities may differ from actual payments or assessments. Claims from taxing authorities related to these differences could have an adverse impact on our operating results and financial

position.

Continued extreme volatility and disruption in global financial markets could significantly impact our customers, suppliers, weaken the markets we serve and harm our operations and financial performance.

Our financial performance depends, in large part, on conditions in the markets that we serve and on the U.S. and global economies in general. As widely reported, U.S. and global financial markets have been experiencing extreme disruption in recent years, including, among other things, concerns regarding the stability and viability of major financial institutions, the declining state of the housing markets, a severe tightening in the credit markets, a low level of liquidity in many financial markets, and extreme volatility in credit and

Table of Contents

equity markets. Given the significance and widespread nature of these nearly unprecedented circumstances, the U.S. and global economies could remain significantly challenged in a recessionary state for an indeterminate period of time. While currently these conditions have not impaired our ability to access credit markets and finance our operations, there can be no assurance that there will not be a further deterioration in financial markets and confidence in major economies. In addition, the recent tightening of credit in financial markets may adversely affect the ability of our customers to obtain financing for significant purchases and operations and could result in a decrease in or cancellation of orders for our products and services as well as impact the ability of our customers to make payments. Similarly, this tightening of credit may adversely affect our supplier base and increase the potential for one or more of our suppliers to experience financial distress or bankruptcy. These conditions would harm our business by adversely affecting our sales, results of operations, profitability, cash flows, financial condition and long-term anticipated growth rate.

If we are unable to successfully implement our new ERP system across the company or such implementation is delayed, our operations may be disrupted or become less efficient.

We have begun the worldwide implementation of a new Enterprise Resource Planning system entitled SAP, with the aim of enabling management to achieve better control over the Company through: improved quality, reliability and timeliness of information; improved integration and visibility of information stemming from different management functions and countries; and optimization and global management of corporate processes. The adoption of the new SAP system, which will replace the existing accounting and management systems, poses several challenges relating to, among other things, training of personnel, communication of new rules and procedures, changes in corporate culture, migration of data, and the potential instability of the new system. In order to mitigate the impact of such critical issues, the Company decided to implement the new SAP system on a step-by-step basis, both geographically and in terms of processes. As a result, we expect the system implementation process to continue for the next 2 to 2.5 years. However, there can be no assurance that the new SAP system will be successfully implemented and failure to do so could have a material adverse effect on our operations. Further, if implementation of the SAP system is delayed, we would continue to use our current system which may not be sufficient to support our planned operations and significant upgrades to the current system may be warranted or required to meet our business needs pending SAP implementation. However, there can be no assurance that the new SAP system will be successfully implemented and failure to do so could have a material adverse effect on the Company's operations.

Risks related to the Bauer Acquisition

Failure to complete the Bauer Acquisition could negatively impact our stock price and our future business and financial results.

Consummation of the Bauer Acquisition is subject to customary closing conditions. If the Bauer Acquisition is not completed for any reason, our ongoing business and financial results may be adversely affected, and we will be subject to a number of risks, including the following:

we may be required, under certain circumstances, to pay damages to Bauer in connection with a termination of the purchase agreement;

we will be required to pay certain other costs relating to the Bauer Acquisition, whether or not the Bauer Acquisition is completed, such as legal, accounting, and financial advisor fees; and

matters relating to the Bauer Acquisition (including integration planning) may require substantial commitments of time and resources by our management, whether or not the Bauer Acquisition is completed, which could otherwise have been devoted to other opportunities that may have been

beneficial to us.

We may also be subject to litigation related to any failure to complete the Bauer Acquisition. If the Bauer Acquisition is not completed, these risks may materialize and may adversely affect our business, financial results and financial condition, as well as the price of our common stock, which will cause the value of your investment to decline. We cannot provide any assurance that the Bauer Acquisition will be completed,

Table of Contents

that there will not be a delay in the completion of the Bauer Acquisition or that all or any of the anticipated benefits of the Bauer Acquisition will be obtained. In the event the Bauer Acquisition is materially delayed for any reason, the price of our common stock may decline.

We may not realize the expected benefits of the Bauer Acquisition because of integration difficulties and other challenges.

The success of the Bauer Acquisition will depend, in part, on our ability to realize the anticipated benefits from integrating Bauer's business with our existing businesses. The integration process may be complex, costly and time-consuming. The difficulties of integrating the operations of Bauer's business include, among others:

- failure to implement our business plan for the combined business;
- unanticipated issues in integrating manufacturing, logistics, information, communications and other systems;
- possible inconsistencies in standards, controls, procedures and policies, and compensation structures between Bauer's structure and our structure;
- unanticipated changes in applicable laws and regulations;
- failure to retain key employees;
- failure to retain key customers;
- operating risks inherent in Bauer's business and our business;
- the impact on our internal controls and compliance with the regulatory requirements under the Sarbanes-Oxley Act of 2002; and
- unanticipated issues, expenses and liabilities.

We may not be able to maintain the levels of revenue, earnings or operating efficiency that each of Altra and Bauer had achieved or might achieve separately. In addition, we may not accomplish the integration of Bauer's business smoothly, successfully or within the anticipated costs or timeframe.

We face risks associated with the Purchase Agreement in connection with the Bauer Acquisition.

In connection with the Bauer Acquisition, we will be subject to substantially all the liabilities of Bauer related to the gear motor business we plan to acquire that are not satisfied on or prior to the closing date. There may be liabilities that we underestimated or did not discover in the course of performing our due diligence investigation of Bauer. Under the Purchase Agreement, the seller has agreed to provide us with a limited set of representations and warranties, including with respect to outstanding and potential liabilities. However, our remedy from the seller for any breach of certain of those representations and warranties is an action for indemnification, not to exceed \$14.1 million. This cap on damages does not apply to breaches of representations and warranties relating to incorporation, power and authority, insolvency, title to assets, taxes, environmental matters and certain pension claims. Damages resulting from a breach of a representation or warranty could have a material and adverse effect on our financial condition and results of operations, and there is no guarantee that we would actually be able to recover all or any portion of the sums payable to us in connection with such breach.

As a private company, Bauer may not have in place an adequate system of internal control over financial reporting that we will need to manage that business effectively as part of a public company.

Pursuant to the Purchase Agreement, we will acquire certain assets and liabilities of Bauer related to its gear motor business. Bauer has not previously been subject to periodic reporting as a public company or otherwise prepared separate financial statements relating to the business we are acquiring. There can be no assurance that Bauer has in place a system of internal control over financial reporting that is required for

Table of Contents

public companies, which will be required of us with respect to Bauer when the Bauer Acquisition is completed. Establishing, testing and maintaining an effective system of internal control over financial reporting requires significant resources and time commitments on the part of our management and our finance and accounting staff, may require additional staffing and infrastructure investments, and would increase our costs of doing business. Moreover, if we discover aspects of Bauer's internal controls that need improvement, we cannot be certain that our remedial measures will be effective. Any failure to implement required new or improved controls, or difficulties encountered in their implementation, could harm our operating results or increase our risk of material weaknesses in internal controls.

We will incur significant transaction and acquisition-related costs in connection with the Bauer Acquisition.

We will incur significant costs in connection with the Bauer Acquisition. The substantial majority of these costs will be non-recurring transaction expenses and costs. We may incur, among other things, additional costs to maintain employee morale and to retain key employees.

The market price of our common stock may decline as a result of the Bauer Acquisition.

The market price of our common stock may decline as a result of the Bauer Acquisition if, among other things, we are unable to achieve the expected growth in earnings, or if the operational cost savings estimates in connection with the integration of Bauer's business are not realized, or if the transaction costs related to the Bauer Acquisition are greater than expected. The market price of our common stock also may decline if we do not achieve the perceived benefits of the Bauer Acquisition as rapidly or to the extent anticipated by financial or industry analysts or if the effect of the Bauer Acquisition on our financial results is not consistent with the expectations of financial or industry analysts.

We have a significant amount of goodwill and intangible assets on our consolidated financial statements (which will be increased following the Bauer Acquisition) that is subject to impairment based upon future adverse changes in our business or prospects.

At December 31, 2010, the carrying values of goodwill and identifiable intangible assets on our balance sheet were \$76.9 million and \$69.3 million, respectively. We evaluate indefinite lived intangible assets and goodwill for impairment annually in the fourth quarter, or more frequently if events or changes in circumstances indicate that the asset might be impaired. Indefinite lived intangible assets are impaired and goodwill impairment is indicated when their book value exceeds fair value. The value of goodwill and intangible assets from the allocation of purchase price from the Bauer Acquisition will be derived from our business operating plans and is susceptible to an adverse change in demand, input costs or general changes in our business or industry and could require an impairment charge in the future.

Item 1B. *Unresolved Staff Comments.*

None.

Table of Contents**Item 2. Properties.**

In addition to our leased headquarters in Braintree, Massachusetts, we maintain 25 production facilities, thirteen of which are located in the United States, one in Canada, nine in Europe and one each in China and Mexico. The following table lists all of our facilities, other than sales offices and distribution centers, as of December 31, 2010, indicating the location, principal use and whether the facilities are owned or leased.

Table of Contents**Item 3. *Legal Proceedings.***

We are, from time to time, party to various legal proceedings arising out of our business. These proceedings primarily involve commercial claims, product liability claims, intellectual property claims, environmental claims, personal injury claims and workers' compensation claims. We cannot predict the outcome of these lawsuits, legal proceedings and claims with certainty. Nevertheless, we believe that the outcome of any currently existing proceedings should not have a material adverse effect on our business, financial condition and results of operations.

Item 4. *Removed and Reserved.***PART II****Item 5. *Market for Registrant's Common Equity and Related Stockholder Matters and Issuer Purchases of Equity Securities*****Market Information**

Our common stock trades on the NASDAQ Global Market under the symbol **AIMC**. As of February 28, 2011, the number of holders of record of our common stock was approximately 39.

The following table sets forth, for the periods indicated, the high and low sales price for our common stock as reported on The NASDAQ Global Market. Our common stock commenced trading on the NASDAQ Global Market on December 15, 2006.

	U.S. Dollars	
	High	Low
Fiscal year ended December 31, 2010		
Fourth Quarter	\$ 21.19	\$ 14.22
Third Quarter	\$ 15.40	\$ 11.76
Second Quarter	\$ 15.90	\$ 11.59
First Quarter	\$ 14.00	\$ 9.81
Fiscal year ended December 31, 2009		
Fourth quarter	\$ 12.79	\$ 8.45
Third quarter	\$ 11.74	\$ 7.02
Second quarter	\$ 8.64	\$ 3.82
First quarter	\$ 9.21	\$ 3.07

Dividends

We have never declared or paid any cash dividends on our common stock. We currently intend to retain any earnings for use in the operation and expansion of our business and, therefore do not anticipate paying any cash dividends in the foreseeable future. In addition, the Credit Agreement governing the senior revolving credit facility and the indenture governing the Senior Secured Notes limit our ability to pay dividends or other distributions on our common stock. See Note 9 to the consolidated financial statements.

Table of Contents**Securities Authorized for Issuance Under Equity Compensation Plans**

The following table presents information concerning our equity compensation plans:

Plan category	Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights(a)	Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights(b)	Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))(c)
Equity compensation plans approved by security holders(1)		\$-	408,227
Equity compensation plans not approved by security holders	n/a	n/a	n/a
Total		\$-	408,227

(1) The equity compensation plans were approved by the Company's shareholders prior to the initial public offering.

Issuer Repurchases of Equity Securities

None.

Comparability of the information included in the selected financial data has been impacted by the acquisitions of Hay Hall and Warner Linear in 2006 and TB Woods and All Power in 2007.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.**Cautionary Note Regarding Forward-Looking Statements**

This Annual Report on Form 10-K contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, which reflect the Company's current estimates, expectations and projections about the Company's future results, performance, prospects and opportunities. Forward-looking statements include, among other things, the information concerning the Company's possible future results of operations including revenue, costs of goods sold, and gross margin, future profitability, future economic improvement, business and growth strategies, financing plans, the Company's competitive position and the effects of competition, the projected growth of the industries in which we operate, and the Company's ability to consummate strategic acquisitions and other transactions. Forward-looking statements include statements that are not historical facts and can be identified by forward-looking words such as anticipate, believe, could, estimate, expect, intend, plan, may, should, will, would, project, and similar expressions. Forward-looking statements are based upon information currently available to the Company and are subject to a number of risks, uncertainties, and other factors that could cause the Company's actual results, performance, prospects, or opportunities to differ materially from those expressed in, or implied by, these forward-looking statements. Important factors that could cause the Corporation's actual results to differ materially from the results referred to in the forward-looking statements the Corporation makes in this report include:

the Company's access to capital, credit ratings, indebtedness, and ability to raise additional capital and operate under the terms of the Company's debt obligations;

the risks associated with our debt;

the effects of intense competition in the markets in which we operate;

our ability to successfully execute, manage and integrate key acquisitions and mergers, including the Bauer Acquisition;

the Company's ability to obtain or protect intellectual property rights;

the Company's ability to retain existing customers and our ability to attract new customers for growth of our business;

the effects of the loss or bankruptcy of or default by any significant customer, suppliers, or other entity relevant to the Company's operations;

the Company's ability to successfully pursue the Company's development activities and successfully integrate new operations and systems, including the realization of revenues, economies of scale, cost savings, and productivity gains associated with such operations;

the Company's ability to complete cost reduction actions and risks associated with such actions;

the Company's ability to control costs;

Table of Contents

failure of the Company's operating equipment or information technology infrastructure;

the Company's ability to achieve its business plans, including with respect to an uncertain economic environment;

changes in employment, environmental, tax and other laws and changes in the enforcement of laws;

the accuracy of estimated forecasts of OEM customers and the impact of the current global economic environment on our customers;

fluctuations in the costs of raw materials used in our products;

the Company's ability to attract and retain key executives and other personnel;

work stoppages and other labor issues;

changes in the Company's pension and retirement liabilities;

the Company's risk of loss not covered by insurance;

the outcome of litigation to which the Company is a party from time to time, including product liability claims;

changes in accounting rules and standards, audits, compliance with the Sarbanes-Oxley Act, and regulatory investigations;

changes in market conditions that would result in the impairment of goodwill or other assets of the Company;

changes in market conditions in which we operate that would influence the value of the Company's stock;

the effects of changes to critical accounting estimates; changes in volatility of the Company's stock price and the risk of litigation following a decline in the price of the Company's stock;

the cyclical nature of the markets in which we operate;

the risks associated with the global recession and volatility and disruption in the global financial markets;

political and economic conditions nationally, regionally, and in the markets in which we operate;

natural disasters, war, civil unrest, terrorism, fire, floods, tornadoes, earthquakes, hurricanes, or other matters beyond the Company's control;

the risks associated with international operations, including currency risks; and

other factors, risks, and uncertainties referenced in the Company's filings with the Securities and Exchange Commission, including the Risk Factors set forth in this document

ALL FORWARD-LOOKING STATEMENTS SPEAK ONLY AS OF THE DATE OF THIS REPORT. EXCEPT AS REQUIRED BY LAW, WE UNDERTAKE NO OBLIGATION TO PUBLICLY UPDATE OR RELEASE ANY REVISIONS TO THESE FORWARD-LOOKING STATEMENTS TO REFLECT ANY EVENTS OR CIRCUMSTANCES AFTER THE DATE OF THIS REPORT OR TO REFLECT THE OCCURRENCE OF UNANTICIPATED EVENTS. ALL SUBSEQUENT WRITTEN AND ORAL FORWARD-LOOKING STATEMENTS ATTRIBUTABLE TO US OR ANY PERSON ACTING ON THE COMPANY'S BEHALF ARE EXPRESSLY QUALIFIED IN THEIR ENTIRETY BY THE CAUTIONARY STATEMENTS CONTAINED OR REFERRED TO IN THIS SECTION AND IN OUR RISK FACTORS SET FORTH IN PART I, ITEM 1A OF THIS FORM 10-K AND IN OTHER REPORTS FILED WITH THE SEC BY THE COMPANY.

Table of Contents

The following discussion of the financial condition and results of income(loss) of Altra Holdings, Inc. and its subsidiaries should be read together with the Selected Historical Financial Data, and the consolidated financial statements of Altra Holdings, Inc. and its subsidiaries and related notes included elsewhere in this Form 10-K. The following discussion includes forward-looking statements. For a discussion of important factors that could cause actual results to differ materially from the results referred to in the forward-looking statements, see Forward-Looking Statements and Risk Factors . Unless the context requires otherwise, the terms Altra Holdings, the Company, we, and our refer to Altra Holdings, Inc. and its subsidiaries, except where the context otherwise requires or indicates.

General

We are a leading global designer, producer and marketer of a wide range of MPT and motion control products with a presence in over 70 countries. Our global sales and marketing network includes over 1,000 direct OEM customers and over 3,000 distributor outlets. Our product portfolio includes industrial clutches and brakes, enclosed gear drives, open gearing, couplings, engineered bearing assemblies, linear components and other related products. Our products serve a wide variety of end markets including energy, general industrial, material handling, mining, transportation and turf and garden. We primarily sell our products to a wide range of OEMs and through long-standing relationships with industrial distributors such as Motion Industries, Applied Industrial Technologies, Kaman Industrial Technologies and W.W. Grainger.

While the power transmission industry has undergone some consolidation, we estimate that in 2010 the top five broad-based MPT companies represented approximately 20% of the U.S. power transmission market. The remainder of the power transmission industry remains fragmented with many small and family-owned companies that cater to a specific market niche often due to their narrow product offerings. We believe that consolidation in our industry will continue because of the increasing demand for global distribution channels, broader product mixes and better brand recognition to compete in this industry.

Business Outlook

Our future financial performance depends, in large part, on conditions in the markets that we serve and on the U.S. and global economies in general. During 2010, we began to see an overall strengthening of the U.S. and global economies. This has manifested itself in continued strength from our early-cycle markets and demand from certain of our late-cycle business is beginning to make a meaningful impact on our sales as long-lead time items are beginning to ship.

In response to the challenging economic conditions of 2009, we took swift and aggressive actions to reduce our expenses and maximize cash flow. Our cost-reduction initiatives were centered on three areas: workforce cutbacks, reduced work schedules, plant consolidations and procurement and other cost reductions. Throughout 2010, we demonstrated the significant operating leverage that we had gained as a result of our cost reduction efforts and productivity initiatives. As a result, we reinstated our Company contributions to our 401(k) plan starting in July 2010, lifted the hiring freeze, and resumed normal production schedules. During 2010, we incurred an additional \$2.7 million of restructuring costs related to plant consolidation efforts primarily at our South Beloit and Twickenham facilities.

During 2010, we made significant progress on our growth strategy and we plan to build on this success in 2011. Our strategy focuses on capitalizing on growth opportunities in new and existing markets, increasing our presence in key underpenetrated geographic regions, entering new high-growth markets and pursuing strategic acquisitions. In addition, we forecast higher profitability in 2011 as we plan to invest in higher growth emerging markets, continue to take advantage of operating leverage in our business model, and as our sales continue to grow as a result of improving demand trends in our end-markets.

Critical Accounting Policies

The methods, estimates and judgments we use in applying our critical accounting policies have a significant impact on the results we report in our financial statements. We evaluate our estimates and judgments on an on-going basis. Our estimates are based upon historical experience and assumptions that we

Table of Contents

believe are reasonable under the circumstances. Our experience and assumptions form the basis for our judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may vary from what our management anticipates and different assumptions or estimates about the future could change our reported results.

We believe the following accounting policies are the most critical in that they are important to the financial statements and they require the most difficult, subjective or complex judgments in the preparation of the financial statements.

Inventory. Inventories are stated at the lower of cost or market using the first-in, first-out (FIFO) method for all of our subsidiaries except TB Wood s. TB Wood s inventory is stated at the lower of current cost or market, principally using the last-in, first-out (LIFO) method. Inventory stated using the LIFO method approximates 12% of total inventory. We state inventories acquired by us through acquisitions at their fair values at the date of acquisition as determined by us based on the replacement cost of raw materials, the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts, and for work-in-process the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts and costs to complete.

We periodically review our quantities of inventories on hand and compare these amounts to the historical and expected usage of each particular product or product line. We record as a charge to cost of sales any amounts required to reduce the carrying value of inventories to net realizable value.

Goodwill, Intangibles and other long-lived assets. In connection with our acquisitions, goodwill and intangible assets were identified and recorded at their fair value. We recorded intangible assets for customer relationships, trade names and trademarks, product technology, patents and goodwill. In valuing the customer relationships, trade names, and trademarks, we utilized variations of the income approach. The income approach was considered the most appropriate valuation technique because the inherent value of these assets is their ability to generate current and future income. The income approach relies on historical financial and qualitative information, as well as assumptions and estimates for projected financial information. Projected financial information is subject to risk if our estimates are incorrect. The most significant estimate relates to our projected revenues and profitability. If we do not meet the projected revenues and profitability used in the valuation calculations then the intangible assets could be impaired. In determining the value of customer relationships, we reviewed historical customer attrition rates which were determined to be approximately 5% per year. Most of our customers tend to be long-term customers with very little turnover. While we do not typically have long-term contracts with customers, we have established long-term relationships with customers which make it difficult for competitors to displace us. Additionally, we assessed historical revenue growth within our industry and customers' industries in determining the value of customer relationships. The value of our customer relationships intangible asset could become impaired if future results differ significantly from any of the underlying assumptions. This could include a higher customer attrition rate or a change in industry trends such as the use of long-term contracts which we may not be able to obtain successfully. Customer relationships and product technology and patents are considered finite-lived assets, with estimated lives ranging from 8 years to 16 years. The estimated lives were determined by calculating the number of years necessary to obtain 95% of the value of the discounted cash flows of the respective intangible asset. Goodwill and trade names and trademarks are considered indefinite lived assets. Trade names and trademarks were determined to be indefinite lived assets. Other intangible assets include trade names and trademarks that identify us and differentiate us from competitors, and therefore competition does not limit the useful life of these assets. Additionally, we believe that our trade names and trademarks will continue to generate product sales for an indefinite period.

As a result of the December 31, 2008 goodwill impairment analysis, we recorded a goodwill impairment charge of \$31.8 million

During 2009, the Company appointed a new Chief Operating Decision Maker (CODM) and went through an extensive restructuring plan. As a result of the change in the CODM and our restructuring activities, we re-evaluated our operating segments and reporting unit structure. We identified five operating segments and concluded that the five operating segments can be aggregated into one reportable segment. We

Table of Contents

also identified twenty-one reporting units. Our reporting units have common manufacturing and production processes. Each unit includes a machine shop which uses similar equipment and manufacturing techniques. Each of our segments uses common raw materials, such as aluminum, steel and copper. The materials are purchased and procurement contracts are negotiated by one global purchasing function. Based on similar long-term average gross profit margins and the fact that all of our products are sold by one global sales force and are marketed by one global marketing function, we have concluded that the reporting units could be aggregated into five reporting units when performing the goodwill impairment analysis.

As part of the annual goodwill impairment assessment we estimated the fair value of each of our reporting units using an income approach. We forecasted future cash flows by reporting unit for each of the next five years and applied a long term growth rate to the final year of forecasted cash flows. The cash flows were then discounted using our estimated discount rate. The forecasts of revenue and profitability growth for use in the long-range plan and the discount rate were the key assumptions in our intangible fair value analysis

We review the difference between the estimated fair value and net book value of each reporting unit. If the excess is less than \$1.0 million, the reporting unit could be required to perform a step two goodwill impairment analysis to determine what amount of goodwill is potentially impaired. As of December 31, 2010, each of our reporting units had estimated fair values that were at least \$1.0 million greater than the net book value.

We consider whether the sum of the fair value of all of our reporting units was reasonable when compared to our market capitalization on the date of the goodwill impairment analysis. As of December 31, 2010 and 2009, our estimated enterprise fair value was \$583.1 million and \$413.6 million, respectively. As of December 31, 2010 and 2009, our market capitalization was \$531.3 million and \$328.8 million, respectively. The difference between the fair value of the enterprise and our market capitalization represented a control market premium of between 25% and 35%. We determined that a control market premium of between 25% and 35% was appropriate based on historical experience with purchase and sales transactions, the historical market trends based on our industry and the control market premium paid in relation to these transactions.

Management believes the preparation of revenue and profitability growth rates for use in the long-range plan and the discount rate requires significant use of judgment. If any of our aggregated reporting units do not meet our forecasted revenue and/or profitability estimates, we could be required to perform an interim goodwill impairment analysis in future periods. In addition, if our discount rate increases, we could be required to perform an interim goodwill impairment analysis. We performed a sensitivity analysis on the estimated fair value of our reporting units by decreasing profitability by 5%, 10% and 15% leaving all other assumptions constant and increasing the discount rate by 5% and 10% leaving all other assumptions constant. We did not identify any reporting units that would be required to perform an interim goodwill impairment analysis as the fair value of our reporting units is substantially in excess of their carrying value.

For our indefinite lived intangible assets, mainly trademarks, we estimated the fair value first by estimating the total revenue attributable to the trademarks for each of the reporting units. Second, we estimated an appropriate royalty rate using the return on assets method by estimating the required financial return on our assets, excluding trademarks, less the overall return generated by our total asset base. The return as a percentage of revenue provides an indication of our royalty rate (between 1.5% and 2%). We compared the estimated fair value of our trademarks with the carrying value of the trademarks and did not identify any impairment.

Long-lived assets, including definite-lived intangible assets, are reviewed for impairment when events or circumstances indicate that the carrying amount of a long-lived asset may not be recovered. Long-lived assets are considered to be impaired if the carrying amount of the asset exceeds the undiscounted future cash flows expected to be generated by the asset over its remaining useful life. If an asset is considered to be impaired, the impairment is

measured by the amount by which the carrying amount of the asset exceeds its fair value, and is charged to results of operations at that time. No impairment indicators were noted in either 2009 or 2010.

Table of Contents

In both 2009 and 2010, the Company did not identify any impairments related to goodwill, definite lived intangible assets or indefinite lived intangible assets as the fair value of our reporting units and definite lived intangible assets were substantially in excess of their carrying value.

Income Taxes. We record income taxes using the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. We evaluate the realizability of our net deferred tax assets and assess the need for a valuation allowance on a quarterly basis. The future benefit to be derived from our deferred tax assets is dependent upon our ability to generate sufficient future taxable income to realize the assets. We record a valuation allowance to reduce our net deferred tax assets to the amount that may be more likely than not to be realized. To the extent we establish a valuation allowance, an expense will be recorded within the provision for income taxes line on the statement of operations. In periods subsequent to establishing a valuation allowance, if we were to determine that we would be able to realize our net deferred tax assets in excess of our net recorded amount, an adjustment to the valuation allowance would be recorded as a reduction to income tax expense in the period such determination was made.

Results of Operations.

	Amounts in thousands		
	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008

Goodwill impairment			31,810
Gain on curtailment of post-retirement benefit plan		(1,467)	(925)
Restructuring costs	2,726	7,286	2,310
Loss on sale/disposal of assets		545	1,584
Income from operations	55,076	29,279	45,539
Interest expense, net	19,638	32,976	28,339
Other non-operating (income) expense, net	909	981	(6,249)
Income (loss) from continuing operations before income taxes	34,529	(4,678)	23,449
Provision (benefit) for income taxes	10,004	(2,364)	16,731
Income (loss) from continuing operations	24,525	(2,314)	6,718
Loss from discontinued operations, net of income taxes of \$43 in 2008			(224)
Net income (loss)	\$ 24,525	\$ (2,314)	\$ 6,494

Table of Contents**Year Ended December 31, 2010 Compared with Year Ended December 31, 2009**

	Amounts in thousands, except percentage data			
	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Net sales</i>	\$ 520,162	\$ 452,846	\$ 67,316	14.9%

Net sales. The majority of the increase in sales in 2010 was due to improvement in the end markets we serve. All of our operating segments had increased sales in 2010 when compared to 2009 except the Heavy Duty Clutch Brake operating segment. This operating segment serves late cycle markets and was not impacted by the economic recovery until mid 2010. We forecast Heavy Duty Clutch Brake to have increased sales in 2011. We forecast that demand in all of our end markets will remain strong into 2011. The effect of foreign currency translation did not affect the increase in sales year over year.

	Amounts in thousands, except percentage data			
	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Gross Profit</i>	\$ 154,011	\$ 123,021	\$ 30,990	25.2%
<i>Gross Profit as a percent of sales</i>	29.6%	27.2%		

Gross profit. The increase in gross profit as a percentage of sales was primarily due to the impact of cost saving measures put into place in 2009, productivity improvements we have implemented, as well as better overhead absorption as a result of higher production levels. This was partially offset by increases in material costs in the later part of 2010. In addition, we recorded a one time inventory charge for \$2.2 million in 2009 related to the economic downturn. All of our operating segments generated increased gross profit and gross profit as a percentage of sales. We forecast 2011 gross profit as a percentage of sales to increase modestly when compared to 2010. The effect of foreign currency translation did not affect the increase in gross profit year over year.

	Amounts in thousands, except percentage data			
	Year Ended		Change	%
	December 31, 2010	December 31, 2009		
<i>Selling, general and administrative expense</i> (SG&A)	\$ 89,478	\$ 81,117	\$ 8,361	10.3%
<i>SG&A as a percent of sales</i>	17.2%	17.9%		

Selling, general and administrative expenses. SG&A increased due to the reinstatement of certain employee benefits that were temporarily suspended during 2009 as well as an increase in variable operating costs as a result of increased demand, a one-time healthcare charge and \$0.8 million of acquisition related expenses included within SG&A. However, due to our cost reduction efforts in 2009 that were focused on headcount reduction and the elimination of non-critical expenses, SG&A as a percentage of sales decreased in 2010 when compared to 2009. We forecast modest

increases to our SG&A costs and plan to leverage them on increased sales and as we invest in resources to enable us to grow faster in emerging markets in 2011.

	December 31, 2010	December 31, 2009	Change	%
<i>Interest Expense, net</i>	\$ 19,638	\$ 32,976	\$ (13,338)	(40.4)%

Interest expense. Net interest expense decreased primarily due to the redemption of our 9% Senior Secured Notes in 2009. In 2009, we incurred a \$5.3 million prepayment premium and we wrote off all unamortized deferred financing costs and original issue discount of \$5.8 million. In addition, in 2010 there is a lower average outstanding debt balance and a lower interest rate. For a more detailed description of the redemption of the 9% Senior Secured Notes and the pay down of the 11.25% Senior Notes, please see Note 9 to our Consolidated Financial Statements in this Form 10-K.

<i>Other non-operating (income) expense, net</i>	\$ 909	\$ 981	\$ (72)	(7)%

Other non-operating (income) expense. We recorded \$0.8 million of realized foreign exchange loss and \$0.3 million of unrealized foreign exchange loss during 2010, mainly due to the Euro weakening when compared to the British Pound Sterling. We recorded \$1.0 million of other expense in 2009 which was primarily related to \$1.1 million of foreign exchange losses recorded during 2009, mainly due to the U.S. Dollar weakening when compared to the British Pound Sterling and Euro.

**Amounts in thousands, except percentage data
Year Ended**

	December 31, 2010	December 31, 2009	Change	%
<i>Restructuring Expense</i>	\$ 2,726	\$ 7,286	\$ (4,560)	(62.6)%

Restructuring In March 2009, we adopted a new restructuring plan (the 2009 Altra Plan) to improve the utilization of our manufacturing infrastructure and to realign our business with the current economic conditions. The 2009 Altra Plan was intended to improve operational efficiency by reducing headcount and consolidating certain facilities.

During 2010, we recorded \$2.7 million of restructuring expenses related to the 2009 Altra Plan, of which \$1.2 million was related to severance, \$0.5 million related to moving and relocation, \$0.7 million to other restructuring charges and \$0.3 million was non cash impairment charges. We forecast that we will incur between an additional \$0.2 and \$0.5 million of expenses associated with workforce reduction and consolidation of facilities in 2011.

During 2009, we recorded \$7.3 million of restructuring expenses related to the 2009 Alta Plan, of which \$4.2 million was related to severance, \$0.6 million was related to other restructuring charges (primarily moving and relocation costs), and \$2.5 million was non-cash impairment charges.

Other post employment benefit plan settlement gain. In March 2009, we reached a new collective bargaining agreement with the union at our Erie, Pennsylvania facility. One of the provisions of the new agreement eliminated the benefits that employees were entitled to receive through the existing other post employment benefit plan (OPEB). OPEB benefits will no longer be available for retired and active employees. This resulted in a non-cash OPEB settlement gain of \$1.5 million in 2009.

Table of Contents

Loss on disposal of assets. During 2009, we entered into a lease agreement at a new facility in China. As of December 31, 2009, we have exited our previous facility and moved into the new location. We recorded a loss of \$0.3 million to dispose of the leasehold improvements associated with the old location.

	Amounts in thousands, except percentage data			
	Year Ended			
	December 31, 2010	December 31, 2009	Change	%
<i>Provision (benefit) for income taxes, continuing operations</i>	\$ 10,004	\$ (2,364)	\$ 12,368	(523.2)%
<i>Provision (benefit) for income taxes as a % of income before taxes</i>	29.0%	(50.5)%		

Provision for income taxes. Income tax expense was \$10.0 million for the year ended December 31, 2010, compared to a benefit of \$2.4 million for the year ended December 31, 2009. Our effective tax rate was 29.0% and (50.5%) for the years ended December 31, 2010 and December 31, 2009, respectively. The increase in the tax rate was primarily driven by the increase in taxable earnings in 2010 as we recovered from the impact of the recession in 2009. The tax rate was partially reduced due to the release of a non-U.S valuation allowance in the third quarter of 2010.

Year Ended December 31, 2009 Compared with Year Ended December 31, 2008

	Amounts in thousands, except percentage data			
	Year Ended			
	December 31, 2009	December 31, 2008	Change	%
<i>Net sales</i>	\$ 452,846	\$ 635,336	\$ (182,490)	(28.7)%

Net sales The decrease in sales was almost exclusively due to overall economic decline which has impacted all of our end markets and industries. All of our operating segments saw double digit decreases in sales during 2009. During the fourth quarter of 2009, we began to see modest increases in our order rates, mainly related to our distribution customers. If the 2009 foreign exchange rates had remained constant when compared to 2008, sales would have decreased \$163.6 million or 25.8%.

	Amounts in thousands, except percentage data			
	Year Ended			
	December 31, 2009	December 31, 2008	Change	%
<i>Gross Profit</i>	\$ 123,021	\$ 186,092	\$ (63,071)	(33.9)%
<i>Gross Profit as a percent of sales</i>	27.2%	29.3%		

Gross profit. The decrease in gross profit was due to the significant decrease in sales. We took aggressive actions, including workforce and payroll reductions, facility consolidations and procurement savings to reduce our expenses and maximize near-term profitability. If the 2009 foreign exchange rates had remained constant when compared to

2008, gross profit would have decreased \$56.2 million or 30.2%. Our Gearings and Belted Drives operating segment's gross profit as a percentage of sales decreased 5.3% in 2009 when compared to 2008. Gearings and Belted Drives sells into early cycle markets and began to see a large decrease in sales in November 2008. The decrease in sales volume impacted the Gearings and Belted Drives operating segment for almost all of 2009 and impacted that operating segment's profitability. Our two operating segments that sell into late cycle markets, Global Couplings and Heavy Duty Clutch Brake, did not see a decrease in gross profit percentages in 2009 when compared to 2008. These two operating segments were not impacted by the global economic downturn until the middle of 2009.

Table of Contents**Amounts in thousands, except percentage data

<i>Selling, general and administrative expense</i> (SG&A)	\$ 81,117	\$ 99,185	\$ (18,068)	(18.2)%
<i>SG&A as a percent of sales</i>	17.9%	15.6%		

Selling, general and administrative expenses. The decrease in SG&A was due to our cost reduction efforts which began in the fourth quarter of 2008. Our cost reduction efforts were focused on headcount reductions and the elimination of non-critical expenses which decreased our overall SG&A costs. As a result of decreased sales volume, we have seen a reduction in outside sales representative commission costs. In addition, during the year, we required certain U.S. personnel to take furloughs. Also, we suspended the Company's 401(k) match and Company contributions and also temporarily reduced wages for the executive management and fees for Board of Director members. However, due to the significant decrease in sales, SG&A as a percent of sales increased despite our cost reduction efforts.

	December 31, 2009	December 31, 2008	Change	%
<i>Other non-operating (income) expense, net</i>	\$ 981	\$ (6,249)	\$ 7,230	(116)%

Other non-operating (income) expense. The \$1.0 million of other expense in 2009 is primarily related to \$1.1 million of foreign exchange losses recorded during 2009, mainly due to the U.S. Dollar weakening when compared to the British Pound Sterling and Euro. In 2008, the Company recorded \$5.0 million of foreign exchange gains due to the significant strengthening of the U.S. Dollar when compared to the British Pound Sterling, Euro and Canadian Dollar. During 2008, we recorded rental income of \$0.6 million for facility rentals under lease agreements which were part of the sale of TB Wood's Electronics

Table of Contents

Division and have a term of two years, with annual extensions thereafter at the lessee's, or the Company's option. In addition, we received \$0.3 million in securities as part of a bankruptcy settlement.

	Amounts in thousands, except percentage data			
	Year Ended			
	December 31, 2009	December 31, 2008	Change	%
<i>Restructuring Expense</i>	\$ 7,286	\$ 2,310	\$ 4,976	215.4%

Restructuring. During 2007, we adopted two restructuring programs. The first was intended to improve operational efficiency by reducing headcount, consolidating our operating facilities and relocating manufacturing to lower cost areas (the 2007 Altra Plan). The second was related to the acquisition of TB Woods and was intended to reduce duplicative staffing and consolidate facilities (the TB Woods Plan). We recorded approximately \$2.3 million of restructuring expenses in 2008 for moving and relocation, severance and non-cash asset impairment. There were no costs related to the 2007 Altra Plan or the TB Woods Plan incurred in 2009.

In March 2009, we adopted a new restructuring plan (the 2009 Altra Plan) to improve the utilization of our manufacturing infrastructure and to realign our business with the current economic conditions. The 2009 Altra Plan was intended to improve operational efficiency by reducing headcount and consolidating certain facilities. During 2009, we recorded \$7.3 million of restructuring expenses, of which \$4.2 million was related to severance, \$0.6 million was related to other restructuring charges (primarily moving and relocation costs), and \$2.5 million was non-cash impairment charges.

Other post employment benefit plan settlement gain. In March 2009, we reached a new collective bargaining agreement with the union at our Erie, Pennsylvania facility. One of the provisions of the new agreement eliminated the benefits that employees were entitled to receive through the existing other post employment benefit plan (OPEB). OPEB benefits will no longer be available for retired and active employees. This resulted in a non-cash OPEB settlement gain of \$1.5 million in 2009.

Loss on disposal of assets. During 2009, we entered into a lease agreement at a new facility in China. As of December 31, 2009, we have exited our previous facility and moved into the new location. We recorded a loss of \$0.3 million to dispose of the leasehold improvements associated with the old location.

	Year Ended			
	December 31,			
	2009	2008	Change	%
<i>Provision for income taxes, continuing operations</i>	\$ (2,364)	\$ 16,731	\$ (19,095)	(114.1)%
<i>Provision for income taxes as a % of income before taxes</i>	(50.5)%	71.4%		

Provision for income taxes. The 2009 benefit for income taxes was primarily due to our loss before income taxes. Additionally, the benefit further increased as a result of changing certain tax elections during 2009 and amending certain prior year returns to reflect those election changes. This benefit was partially offset by the establishment of reserves for uncertain tax positions and interest expense on previously reserved amounts. In 2008, we recorded

additional tax expense due to the non-tax deductible portion of our goodwill impairment charge. For further discussion, refer to Note 7 in our consolidated financial statements.

Discontinued Operations. Loss from discontinued operations in the year to date period ended December 31, 2008, was comprised of a purchase price working capital adjustment, an adjustment to deferred taxes and an adjustment to the tax provision. The tax provision is comprised of taxes on the working capital adjustment and a revision of tax estimates made during 2007 based on the actual amounts filed on the Company's tax return in 2008.

Table of Contents**Liquidity and Capital Resources***Overview*

We finance our capital and working capital requirements through a combination of cash flows from operating activities and borrowings under our senior secured revolving credit facility. We expect that our primary ongoing requirements for cash will be for working capital, debt service, capital expenditures, expenditures in connection with restructuring activities and pension plan funding. In the event additional funds are needed, we could borrow additional funds under our senior secured revolving credit facility, attempt to secure new debt, attempt to refinance our 81/8% Senior Notes due December 2016 (the Senior Secured Notes), or attempt to raise capital in equity markets. Presently, we have capacity under our senior secured revolving credit facility to borrow \$50.0 million. Of this total capacity, we can borrow up to \$27.4 million without being required to comply with any financial covenants under the agreement. In order to refinance the existing 8 1/8% Senior Secured Notes, we would incur a pre-payment premium. There can be no assurance however that additional debt financing will be available on commercially acceptable terms, if at all. Similarly, there can be no assurance that equity financing will be available on commercially acceptable terms, if at all.

During 2009, Altra Industrial retired the remaining principal balance of the 111/4% Senior Notes (the Old Senior Notes), of £3.3 million or \$5.0 million of principal amount, plus accrued and unpaid interest. In connection with the redemption, Altra Industrial incurred \$0.2 million of pre-payment premium and wrote-off the entire remaining balance of \$0.2 million of deferred financing fees, which is recorded as interest expense in the Consolidated Statement of Income (loss).

Senior Secured Notes

In 2009, we issued \$210 million of Senior Secured Notes. The Senior Secured Notes are guaranteed by the Company's U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing our senior secured revolving credit facility, on substantially all of our assets and those of our domestic subsidiaries. Interest on the Senior Secured Notes is payable in arrears, semiannually on June 1 and December 1 of each year, commencing on June 1, 2010. The indenture governing the Senior Secured Notes contains covenants which restrict our subsidiaries. These restrictions limit or prohibit, among other things, their ability to incur additional indebtedness; repay subordinated indebtedness prior to stated maturities; pay dividends on or redeem or repurchase stock or make other distributions; make investments or acquisitions; sell certain assets or merge with or into other companies; sell stock in our subsidiaries; and create liens on their assets. We were in compliance with all covenants of the indenture governing the Senior Secured Notes at both December 31, 2010 and 2009, respectively.

We used the proceeds of the offering of the Senior Secured Notes to repurchase or redeem Altra Industrial's 9% Old Senior Secured Notes.

Table of Contents***Senior Secured Credit Facility***

Concurrently with the closing of the offering of the Senior Secured Notes, Altra Industrial entered into a new Senior Secured Credit Facility (the *Revolving Credit Agreement*), that provides for borrowing capacity in an initial amount of up to \$50.0 million (subject to adjustment pursuant to a borrowing base and subject to increase from time to time in accordance with the terms of the credit facility). The *Revolving Credit Agreement* replaced Altra Industrial's then existing senior secured credit facility (the *Old Revolving Credit Agreement*), and the TB Wood's existing credit facility (the *Old TB Wood's Revolving Credit Agreement*).

Altra Industrial and all of its domestic subsidiaries are borrowers, or *Borrowers* , under the *Revolving Credit Agreement*. Certain of our existing and subsequently acquired or organized domestic subsidiaries which are not *Borrowers* do and will guarantee (on a senior secured basis) the *Revolving Credit Agreement*. Obligations of the other *Borrowers* under the *Revolving Credit Agreement* and the guarantees are secured by substantially all of *Borrowers* assets and the assets of each of our existing and subsequently acquired or organized domestic subsidiaries that is a guarantor of our obligations under the *Revolving Credit Agreement* (with such subsidiaries being referred to as the *U.S. subsidiary guarantors*), including but not limited to: (a) a first-priority pledge of all the capital stock of subsidiaries held by *Borrowers* or any U.S. subsidiary guarantor (which pledge, in the case of any foreign subsidiary, will be limited to 100% of any non-voting stock and 65% of the voting stock of such foreign subsidiary) and (b) perfected first-priority security interests in and mortgages on substantially all tangible and intangible assets of each *Borrower* and U.S. subsidiary guarantor, including accounts receivable, inventory, equipment, general intangibles, investment property, intellectual property, certain real property, cash and proceeds of the foregoing (in each case subject to materiality thresholds and other exceptions).

An event of default under the *Revolving Credit Agreement* would occur in connection with a change of control, among other things, if: (i) Altra Industrial ceases to own or control 100% of each of its borrower subsidiaries, or (ii) a change of control occurs under the Senior Secured Notes, or any other subordinated indebtedness.

An event of default under the *Revolving Credit Agreement* would also occur if an event of default occurs under the indentures governing the Senior Secured Notes or if there is a default under any other indebtedness that any borrower may have involving an aggregate amount of \$10 million or more and such default: (i) occurs at final maturity of such debt, (ii) allows the lender there under to accelerate such debt or (iii) causes such debt to be required to be repaid prior to its stated maturity. An event of default would also occur under the *Revolving Credit Agreement* if any of the indebtedness under the *Revolving Credit Agreement* ceases with limited exception to be secured by a full lien of the assets of *Borrowers* and guarantors.

As of December 31, 2010 and 2009, we were in compliance with all covenant requirements associated with all of our borrowings. As of December 31, 2010, we had no borrowing, \$10.1 million in letters of credit outstanding, and \$39.9 million available under the *Revolving Credit Agreement*.

Old TB Wood's Revolving Credit Agreement

As part of the TB Wood's acquisition in 2007, the Company refinanced \$13.0 million of debt associated with TB Wood's line of credit. In connection with the *Revolving Credit Agreement* described above, the *Old TB Wood's Revolving Credit Agreement* was paid in full.

Old Revolving Credit Agreement

In connection with the PTH Acquisition, we incurred substantial indebtedness. To partially fund the PTH acquisition, Altra Industrial issued \$165.0 million of Old Senior Secured Notes and Altra Industrial entered into the *Old Revolving*

Credit Agreement, a \$30.0 million senior revolving credit facility. The Old Revolving Credit Agreement provided for senior secured financing of up to \$30.0 million, including \$10.0 million available for letters of credit. As of the date of refinancing, we were in compliance with all covenant requirements associated with all of our borrowings. The Old Revolving Credit Agreement was terminated in connection with the entering into of the Revolving Credit Agreement.

Table of Contents

In connection with our acquisition of Hay Hall in February 2006, Altra Industrial issued £33.0 million of Old Senior Notes. Based on an exchange rate of 1.7462 U.S. Dollars to U.K. pounds sterling (as of February 8, 2006), the proceeds from these notes were approximately \$57.6 million. The notes were unsecured and were due in 2013. Interest on the Old Senior Notes was payable in U.K. pounds sterling semiannually in arrears on February 15 and August 15 of each year, commencing August 15, 2006. In connection with our acquisition of TB Woods in April 2007, Altra Industrial issued an additional \$105.0 million of its Old Senior Secured Notes. During 2009, the outstanding Old Senior Notes were redeemed.

Net Cash

	December 31, 2010	December 31, 2009
	(In thousands)	
<i>Cash and cash equivalents</i>	\$ 72,723	\$ 51,497

Cash Flows for 2010

The primary source of funds for our fiscal year 2010 was cash provided by operating activities of \$42.8 million. Net cash used in investing activities of \$17.8 million for purchases of property, plant and equipment primarily for investment in manufacturing equipment and our new ERP system. Net cash used in financing activities of \$3.4 million for 2010 consisted primarily of payment of debt costs and shares repurchased in lieu of taxes in connection with the vesting of restricted stock awards.

We intend to use our remaining existing cash and cash equivalents and cash flow from operations to provide for our working capital needs and to fund potential future acquisitions, debt service, capital expenditures, and pension funding. We believe our future operating cash flows will be sufficient to meet our future operating and capital expenditure cash needs. Furthermore, the existing cash balances and the availability of additional borrowings under our Revolving Credit Agreement provide additional potential sources of liquidity should they be required.

Cash Flows for 2009

The primary source of funds for our fiscal year 2009 was cash provided by operating activities of \$59.4 million. Net cash used in investing activities of \$9.2 million for purchases of property, plant and equipment primarily for investment in manufacturing equipment. Net cash used in financing activities of \$54.0 million for 2009 consisted primarily of \$242.5 million of payments on the 9% Old Senior Secured Notes, and \$5.0 million of payments on the 11 1/4% Old Senior Notes, offset by \$207.3 million of proceeds from the issuance of the 8 1/8% Senior Secured Notes.

Capital Expenditures

We made capital expenditures of approximately \$17.3 million and \$9.2 million in the years ended December 31, 2010 and December 31, 2009, respectively. These capital expenditures will support on-going business needs. In 2011, we forecast capital expenditures to be in the range of \$16.0 million to \$20.0 million.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that provide liquidity, capital resources, market or credit risk support that expose us to any liability that is not reflected in our consolidated financial statements.

Table of Contents**Contractual Obligations**

The following table is a summary of our contractual cash obligations as of December 31, 2010 (in millions):

	Payments Due by Period						Total
	2011	2012	2013	2014	2015	Thereafter	
Senior Secured Notes ⁽¹⁾	\$	\$	\$	\$	\$	\$ 210.0	\$ 210.0
Operating leases	4.1	3.5	2.6	2.0	1.0	4.7	17.9
Capital leases	0.9	0.4					1.3
Mortgage ⁽²⁾	0.3	1.1	0.4	0.4	0.2		2.4
Variable Rate Demand Revenue Bonds ⁽³⁾	2.3					3.0	5.3
Revolving Credit Agreement ⁽⁴⁾							
Total contractual cash obligations	\$ 7.6	\$ 5.0	\$ 3.0	\$ 2.4	\$ 1.2	\$ 217.7	\$ 236.9

- (1) We have semi-annual cash interest requirements due on the Senior Secured Notes with \$17.1 million payable in 2011 through 2015, and \$15.6 million due in 2016 which are not included in the above table.
- (2) In June, 2006, our German subsidiary entered into a mortgage on its building in Heidelberg, Germany, with a local bank. The mortgage has a principal of 1.8 million as of December 31, 2010, an interest rate of 2.9% and is payable in monthly installments over the next 5 years.
- (3) In April 2007, as part of the TB Wood's acquisition, we assumed obligation for payment of interest and principal on the Variable Rate Demand Revenue Bonds. These bonds bear variable interest rates and mature in April 2022 and April 2024. In October 2010, the Company entered into a purchase and sale agreement to sell the Chattanooga facility, as such, the bonds associated with this facility have been reclassified to current as of December 31, 2010.
- (4) We have up to \$50.0 million of borrowing capacity, through November 2012, under our Revolving Credit Agreement (including \$30 million available for use for letters of credit). As of December 31, 2010, there were no outstanding borrowings and \$10.1 million of outstanding letters of credit under our Revolving Credit Agreement.

We have cash funding requirements associated with our pension plan. As of December 31, 2010, these requirements were estimated to, \$1.3 million for 2011, \$1.3 million for 2012, \$1.4 million for 2013, and \$1.3 million for 2014 which are not included in the above table.

We may be required to make cash outlays related to our unrecognized tax benefits. However, due to the uncertainty of the timing of future cash flows associated with our unrecognized tax benefits, we are unable to make reasonably reliable estimates of the period of cash settlement, if any, with the respective taxing authorities. Accordingly, unrecognized tax benefits of \$9.0 million as of December 31, 2010, have been excluded from the contractual obligations table above. For further information on unrecognized tax benefits, see Note 7 to the consolidated financial statements.

Reconciliation of Non-GAAP Financial Measures

As used in this report, non-GAAP sales and gross profit are each calculated using either sales or gross profit that excludes changes in foreign currency exchange rates that management does not consider to be directly related to the Company's core operating performance. Non-GAAP sales and gross profit are calculated as sales and gross profit, respectively, plus foreign currency translation loss or minus foreign currency translation gain over the applicable period. The Company believes that this presentation of non-GAAP sales and gross profit provides important supplemental information to management and investors regarding financial and business trends relating to the Company's financial condition and results of operations.

Table of Contents

The following table is a reconciliation of our sales to non-GAAP sales:

Foreign exchange impact to net sales in 2010 was minimal and therefore not included in the table below

	December 31, 2009	Year To Date Period Ended December 31, 2008	Change	%
<i>Net Sales per Financial Statements</i>	\$ 452,846	\$ 635,336	\$ (182,490)	(28.7)%

The following table is a reconciliation of our gross profit to non-GAAP gross profit:

Foreign exchange impact to gross profit in 2010 was minimal and therefore not included in the table below

	December 31, 2009	Year To Date Period Ended December 31, 2008	Change	%
<i>Gross Profit per Financial Statements</i>	\$ 123,021	\$ 186,092	\$ (63,071)	(33.9)%
<i>Less: Foreign Currency Translation Gain</i>	\$ 6,920			
<i>Non-GAAP Adjusted Gross Profit</i>	\$ 129,941	\$ 186,092	\$ (56,151)	30.2%

Stock-based Compensation

In January 2005, we established the 2004 Equity Incentive Plan that provides for various forms of stock based compensation to our officers and senior level employees.

As of December 31, 2010, there were 287,586 shares of unvested restricted stock outstanding under the plan. The remaining compensation cost to be recognized through 2012 is \$2.3 million. Based on the stock price at December 31, 2010, of \$19.86 per share, the intrinsic value of these awards as of December 31, 2010, was \$5.7 million.

Income Taxes

We are subject to taxation in multiple jurisdictions throughout the world. Our effective tax rate and tax liability will be affected by a number of factors, such as the amount of taxable income in particular jurisdictions, the tax rates in such jurisdictions, tax treaties between jurisdictions, the extent to which we transfer funds between jurisdictions and repatriate income, and changes in law. Generally, the tax liability for each legal entity is determined either (a) on a non-consolidated and non-combined basis or (b) on a consolidated and combined basis only with other eligible entities subject to tax in the same jurisdiction, in either case without regard to the taxable losses of non-consolidated and non-combined affiliated entities. As a result, we may pay income taxes to some jurisdictions even though on an overall basis we incur a net loss for the period.

Seasonality

We experience seasonality in our turf and garden business, which in recent years has represented approximately 11% of our net sales. As our large OEM customers prepare for the spring season, our shipments generally start increasing in December, peak in February and March, and begin to decline in April and May. This allows our customers to have inventory in place for the peak consumer purchasing periods for turf and garden products. The June-through-November period is typically the low season for us and our customers in the turf and garden market. Seasonality is also affected by weather and the level of housing starts.

Table of Contents

Inflation

Inflation can affect the costs of goods and services we use. The majority of the countries that are of significance to us, from either a manufacturing or sales viewpoint, have in recent years enjoyed relatively low inflation. The competitive environment in which we operate inevitably creates pressure on us to provide our customers with cost-effective products and services.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

We are exposed to various market risk factors such as fluctuating interest rates, changes in foreign currency rates and changes in commodity prices. At present, we do not utilize derivative instruments to manage these risks.

Currency translation. The results of operations of our foreign subsidiaries are translated into U.S. Dollars at the average exchange rates for each period concerned. The balance sheets of foreign subsidiaries are translated into U.S. Dollars at the exchange rates in effect at the end of each period. Any adjustments resulting from the translation are recorded as other comprehensive income. As of December 31, 2010 and 2009, the aggregate total assets (based on book value) of foreign subsidiaries were \$152.4 million and \$142.5 million, respectively, representing approximately 30.0% and 30.6%, respectively, of our total assets (based on book value). Our foreign currency exchange rate exposure is primarily with respect to the Euro and British Pound Sterling. The approximate exchange rates in effect at December 31, 2010 and 2009, were \$1.32 and \$1.43, respectively to the Euro. The approximate exchange rates in effect at December 31, 2010 and 2009 were \$1.55 and \$1.59, respectively to the British Pound Sterling.

Currency transaction exposure. Currency transaction exposure arises where actual sales, purchases and financing transactions are made by a business or company in a currency other than its own functional currency. Any transactional differences at an international location are recorded in net income on a monthly basis.

Interest rate risk. The majority of our debt is fixed rate debt, however we are subject to market exposure to changes in interest rates on some of our financing activities. This exposure relates to borrowings under our Revolving Credit Agreement, and our Variable Rate Demand Revenue Bonds. Our Revolving Credit Agreement is payable at prime rate plus 0.25% in the case of prime rate loans, or LIBOR rate plus an applicable spread of 2.75% to 3.25%, in the case of LIBOR rate loans. The applicable spread varies depending on the average amount that is unavailable under the Revolving Credit Agreement during the most recent quarter. As of December 31, 2010, we had no borrowings under our Revolving Credit Agreement and \$10.1 million of outstanding letters of credit under our Revolving Credit Agreement. The Variable Rate Demand Revenue Bonds have a variable interest rate that was less than 1% as of December 31, 2010. Due to the minimal amounts of outstanding variable rate debt a hypothetical change in interest rates of 1% would not have a material effect on our near-term financial condition or results of operations.

Commodity Price Exposure. We have exposure to changes in commodity prices principally related to metals including steel, copper and aluminum. We primarily manage our risk associated with such increases through the use of surcharges or general pricing increases for the related products. We do not engage in the use of financial instruments to hedge our commodities price exposure.

Item 8. *Financial Statements and Supplementary Data*

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Altra Holdings, Inc.
Braintree, Massachusetts

We have audited the accompanying consolidated balance sheets of Altra Holdings, Inc. and subsidiaries (the Company) as of December 31, 2010 and 2009, and the related consolidated statements of operations and comprehensive income (loss), stockholders' equity and cash flows for the years then ended. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Altra Holdings, Inc. and subsidiaries at December 31, 2010 and 2009, and the results of their operations and their cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company's internal control over financial reporting as of December 31, 2010, based on the criteria established in *Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission* and our report dated February 28, 2011 expressed an unqualified opinion on the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
of Altra Holdings, Inc.

We have audited the accompanying consolidated statements of operations and comprehensive income (loss), stockholders' equity, and cash flows for the year ended December 31, 2008. Our audit also included the consolidated financial statement schedule listed in the index at Item 15 (a) (2) for the year ended December 31, 2008. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated results of operations and cash flows of Altra Holdings, Inc. for the year ended December 31, 2008, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related consolidated financial statement schedule for the year ended December 31, 2008, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements**
Amounts in thousands (unless otherwise noted)**1. Description of Business and Summary of Significant Accounting Policies*****Basis of Preparation and Description of Business***

Headquartered in Braintree, Massachusetts, Altra Holdings, Inc. (the Company), through its wholly-owned subsidiary Altra Industrial Motion, Inc. (Altra Industrial) is a leading multi-national designer, producer and marketer of a wide range of mechanical power transmission products. The Company brings together brands covering over 40 product lines with production facilities in eight countries and sales coverage in over 70 countries. The Company s brands include Boston Gear, Warner Electric, TB Wood s, Formsprag Clutch, Ameridrives Couplings, Industrial Clutch, Kilian Manufacturing, Marland Clutch, Nuttall Gear, Stieber Clutch, Wichita Clutch, Twiflex Limited, Bibby Transmissions, Matrix International, Inertia Dynamics, Huco Dynatork and Warner Linear.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation.

Net Income Per Share

Basic earnings per share is based on the weighted average number of common shares outstanding, and diluted earnings per share is based on the weighted average number of common shares outstanding and all dilutive potential common equivalent shares outstanding. Common equivalent shares are included in the per share calculations when the effect of their inclusion would be dilutive.

The following is a reconciliation of basic to diluted net income (loss) per share:

	Year Ended December 31,		
	2010	2009	2008
Net income (loss) from continuing operations	24,525	(2,314)	\$ 6,718
Net loss from discontinued operations			(224)
Net income (loss)	\$ 24,525	\$ (2,314)	\$ 6,494
Shares used in net income per common share basic	26,399	25,945	25,496
Incremental shares of unvested restricted common stock	136		599
Shares used in net income per common share diluted	26,535	25,945	26,095
Earnings per share Basic:			
Net income (loss) from continuing operations	\$ 0.93	\$ (0.09)	\$ 0.26
Net loss from discontinued operations	\$	\$	\$ (0.01)
Net income (loss)	\$ 0.93	\$ (0.09)	\$ 0.25

Earnings per share Diluted:

Net income (loss) from continuing operations	\$ 0.92	\$ (0.09)	\$ 0.26
Net loss from discontinued operations	\$	\$	\$ (0.01)
Net income (loss)	\$ 0.92	\$ (0.09)	\$ 0.25

Fair Value of Financial Instruments

The carrying values of financial instruments, including accounts receivable, accounts payable and other accrued liabilities, approximate their fair values due to their short-term maturities. The carrying amount

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

of the 81/8% Senior Secured Notes (Senior Secured Notes) was \$210.0 million as of December 31, 2010 and 2009. The estimated fair value of the Senior Secured Notes at December 31, 2010 and 2009 was \$221.0 and \$215.5 million, respectively.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the financial statements. Actual results could differ from those estimates.

Foreign currency translation

Assets and liabilities of subsidiaries operating outside of the United States with a functional currency other than the U.S. Dollar are translated into U.S. Dollars using exchange rates at the end of the respective period. Revenues and expenses are translated at average exchange rates effective during the respective period.

Foreign currency translation adjustments are included in accumulated other comprehensive income (loss) as a separate component of stockholders' equity. Net foreign currency transaction gains and losses are included in the results of operations in the period incurred and included in other non-operating expense (income), net in the accompanying statement of operations and comprehensive income (loss).

Cash and Cash Equivalents

Cash and cash equivalents include all financial instruments purchased with an initial maturity of three months or less. Cash equivalents are stated at cost, which approximates fair value.

Trade Receivables

An allowance for doubtful accounts is recorded for estimated collection losses that will be incurred in the collection of receivables. Estimated losses are based on historical collection experience, as well as a review by management of the status of all receivables. Collection losses have been within the Company's expectations.

Inventories

Inventories are stated at the lower of cost or market using the first-in, first-out (FIFO) method for all entities excluding one of the Company's subsidiaries, TB Wood's. TB Wood's inventory is stated at the lower of cost or market, principally using the last-in, first-out (LIFO) method. Inventory stated using the LIFO method approximates 12% of total inventory. The cost of inventories acquired by the Company in its acquisitions reflect their fair values at the date of acquisition as determined by the Company based on the replacement cost of raw materials, the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts, and for work-in-process the sales price of the finished goods less an appropriate amount representing the expected profitability from selling efforts and costs to complete.

The Company periodically reviews its quantities of inventories on hand and compares these amounts to the expected usage of each particular product or product line. The Company records a charge to cost of sales for any amounts required to reduce the carrying value of inventories to its estimated net realizable value.

Property, Plant and Equipment

Property, plant, and equipment are stated at cost, net of accumulated depreciation.

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

Depreciation of property, plant, and equipment, including capital leases is provided using the straight-line method over the estimated useful life of the asset, as follows:

Buildings and improvements	15 to 45 years
Machinery and equipment	2 to 15 years
Capital lease	Life of lease

Improvements and replacements are capitalized to the extent that they increase the useful economic life or increase the expected economic benefit of the underlying asset. Repairs and maintenance expenditures are charged to expense as incurred.

Intangible Assets

Intangibles represent product technology, patents, tradenames, trademarks and customer relationships. Product technology, patents and customer relationships are amortized on a straight-line basis over 8 to 16 years, which approximates the period of economic benefit. The tradenames and trademarks are considered indefinite-lived assets and are not being amortized. Intangibles are stated at fair value on the date of acquisition. At December 31, 2010 and 2009, intangibles are stated net of accumulated amortization incurred since the date of acquisition and any impairment charges.

Goodwill

Goodwill represents the excess of the purchase price paid by the Company for Power Transmission Holding, Inc. (PTH), The Kilian Company (Kilian), Hay Hall Holdings Ltd. (Hay Hall), Bear Linear Inc. (Warner Linear), TB Wood s Corporation (TB Wood s), and All Power Transmission Manufacturing, Inc. (All Power) over the fair value of the net assets acquired in each of the acquisitions. Goodwill can be attributed to the value placed on the Company being an industry leader through the development and manufacturing of innovative products.

Impairment of Goodwill and Indefinite-Lived Intangible Assets

The Company conducts an annual impairment review of goodwill and indefinite lived intangible assets in December of each year, unless events occur which trigger the need for an interim impairment review. In connection with the Company s annual impairment review, goodwill and indefinite lived intangible assets are assessed for impairment by comparing the fair value of the reporting unit to the carrying value using a two step approach. In the first step, the Company estimates future cash flows based upon historical results and current market projections, discounted at a market comparable rate. If the carrying amount of the reporting unit exceeds the estimated fair value, impairment may be present, the Company would then be required to perform a second step in its impairment analysis. In the second step, the Company would evaluate impairment losses based upon the fair value of the underlying assets and liabilities of the reporting unit, including any unrecognized intangible assets, and estimate the implied fair value of the goodwill. An impairment loss is recognized to the extent that a reporting unit s recorded value of the goodwill asset exceeded its calculated fair value. In addition, to the extent the implied fair value of any indefinite-lived intangible asset is less than the assets carrying value, an impairment loss is recognized on those assets.

As a result of the annual goodwill impairment review in the fourth quarter of 2008, the Company determined that goodwill was impaired at three of its reporting units and therefore recorded a pre-tax charge of \$31.8 million in the consolidated statement of operations. Significant declines in macroeconomic market conditions, substantial declines in global equity valuations and the Company's market capitalization were the main causes of the goodwill impairment.

The Company did not identify any impairment of goodwill in either 2010 or 2009.

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

Preparation of forecasts of revenue and profitability growth for use in the long-range plan and the discount rate require significant use of judgment. Changes to the discount rate and the forecasted profitability could affect the estimated fair value of one or more of the Company's reporting units and could result in a goodwill impairment charge in a future period.

Impairment of Long-Lived Assets Other Than Goodwill and Indefinite-Lived Intangible Assets

Long-lived assets, including definite-lived intangible assets, are reviewed for impairment when events or circumstances indicate that the carrying amount of a long-lived asset may not be recovered. Long-lived assets are considered to be impaired if the carrying amount of the asset exceeds the undiscounted future cash flows expected to be generated by the asset over its remaining useful life. If an asset is considered to be impaired, the impairment is measured by the amount by which the carrying amount of the asset exceeds its fair value, and is charged to results of operations at that time.

During the fourth quarter of 2008, a goodwill impairment was identified and recorded at three of our reporting units. This indicated that there could be an impairment of long-lived assets at those reporting units. The Company performed an impairment analysis of our long-lived assets at the three reporting units that recorded a goodwill impairment charge. The undiscounted cash flows relating to the definite-lived assets exceeded the carrying value of those assets and therefore no impairment charge was recorded.

The Company did not identify any impairment of long-lived assets in 2009. In relation to the sale of the Chattanooga facility, the Company identified and recorded an impairment of the facility of \$0.1 million based on fair market value.

Determining fair values based on discounted cash flows requires management to make significant estimates and assumptions, including forecasting of revenue and profitability growth for use in the long-range plan and estimating appropriate discount rates. Changes to the discount rate and the forecasted profitability could affect the estimated fair value of one or more of the Company's reporting units and could result in an impairment charge in a future period.

Debt Issuance Costs

Costs directly related to the issuance of debt are capitalized, included in other long-term assets and amortized using the effective interest method over the term of the related debt obligation. The net carrying value of debt issuance costs was approximately \$6.9 million and \$7.6 million at December 31, 2010 and 2009, respectively.

Revenue Recognition

Product revenues are recognized, net of sales tax collected, at the time title and risk of loss pass to the customer, which generally occurs upon shipment to the customer. Product return reserves are accrued at the time of sale based on the historical relationship between shipments and returns, and are recorded as a reduction of net sales.

Certain large distribution customers receive quantity discounts which are recognized at the time the sale is recorded.

Shipping and Handling Costs

Shipping and handling costs associated with sales are classified as a component of cost of sales.

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

Warranty Costs

Estimated expenses related to product warranties are accrued at the time products are sold to customers. Estimates are established using historical information as to the nature, frequency, and average costs of warranty claims. See Note 6 to the consolidated financial statements.

Self-Insurance

Certain exposures are self-insured up to pre-determined amounts, above which third-party insurance applies, for medical claims, workers' compensation, vehicle insurance, product liability costs and general liability exposure. The accompanying balance sheets include reserves for the estimated costs associated with these self-insured risks, based on historic experience factors and management's estimates for known and anticipated claims. A portion of medical insurance costs are offset by charging employees a premium equivalent to group insurance rates.

Research and Development

Research and development costs are expensed as incurred.

Advertising

Advertising costs are charged to selling, general, and administrative expenses as incurred and amounted to approximately \$1.1 million, \$1.3 million and \$2.3 million, for the years ended December 31, 2010, 2009, and 2008, respectively.

Stock-Based Compensation

The Company established the 2004 Equity Incentive Plan, as amended that provides for various forms of stock-based compensation to officers, directors, key employees and others who make significant contributions to the success of the Company. Expense associated with equity awards is recognized on a straight-line basis over the requisite service period which typically coincides with the vesting period of the grant.

Income Taxes

The Company records income taxes using the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective income tax bases, and operating loss and tax credit carryforwards. The Company evaluates the realizability of its net deferred tax assets and assesses the need for a valuation allowance on a quarterly basis. The future benefit to be derived from its deferred tax assets is dependent upon the Company's ability to generate sufficient future taxable income to realize the assets. The Company records a valuation allowance to reduce its net deferred tax assets to the amount that may be more likely than not to be realized.

To the extent the Company establishes a valuation allowance on net deferred tax assets generated from operations, an expense will be recorded within the provision for income taxes. In periods subsequent to establishing a valuation allowance on net deferred assets from operations, if the Company were to determine that it would be able to realize its

net deferred tax assets in excess of their net recorded amount, an adjustment to the valuation allowance would be recorded as a reduction to income tax expense in the period such determination was made.

We assess our income tax positions and record tax benefits for all years subject to examination, based upon our evaluation of the facts, circumstances and information available at the reporting date. For those tax

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

positions for which it is more likely than not that a tax benefit will be sustained, we record the amount that has a greater than 50% likelihood of being realized upon settlement with the taxing authority that has full knowledge of all relevant information. Interest and penalties are accrued, where applicable. If we do not believe that it is more likely than not that a tax benefit will be sustained, no tax benefit is recognized.

Accumulated Other Comprehensive Income (Loss)

The Company's total accumulated other comprehensive income (loss) is comprised of the following:

	Minimum Pension Asset/(liability)	Cumulative Foreign Currency Translation Adjustment	Accumulated Other Comprehensive Income (Loss)
Balance at December 31, 2008	\$ 554	\$ (24,644)	\$ (24,090)
Balance at December 31, 2009	\$ 1,068	\$ (15,714)	\$ (14,646)
Balance at December 31, 2010	\$ (882)	\$ (13,789)	\$ (14,671)

2. Discontinued Operations

On December 31, 2007, the Company completed the divestiture of its TB Wood's adjustable speed drives business (Electronics Division) to Finland-based Vacon for \$29.0 million. The decision to sell the Electronics Division was made to allow the Company to continue its strategic focus on its core electro-mechanical power transmission business.

The Company entered into a transition services agreement to provide services such as sales support, warehousing, accounting and IT services to Vacon. The Company has recorded the income received as an offset to the related expense of providing the service. During 2008, the Company recorded \$0.3 million against cost of sales, \$1.1 million against SG&A and \$0.6 million in other income related to lease payments for the rental of buildings. During 2009, the Company recorded \$0.6 million in other income related to lease payments for the rental of buildings.

Loss from discontinued operations in the year ended December 31, 2008, was comprised of a purchase price working capital adjustment, net of tax and a revision of tax estimates made in 2007 based on the actual amounts filed on the Company's tax return in 2008.

3. Inventories

Inventories located at certain subsidiaries acquired in connection with the TB Wood's acquisition are stated at the lower of current cost or market, principally using the last-in, first-out (LIFO) method. All of the Company's remaining subsidiaries are stated at the lower of cost or market, using the first-in, first-out (FIFO) method. The cost of inventory includes direct materials, direct labor and production overhead. Market is defined as net realizable value. Inventories at December 31, 2010 and 2009 consisted of the following:

	December 31, 2010	December 31, 2009
Raw Materials	\$ 32,826	\$ 28,539
Work in process	16,223	13,711
Finished goods	39,168	29,603
Inventories	\$ 88,217	\$ 71,853

Approximately 12% of total inventories at December 31, 2010, were valued using the LIFO method. The Company recorded as a component of cost of sales, a \$0.2 million provision and a benefit of \$0.1 million

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

in the year ended December 31, 2010 and 2009, respectively. If the LIFO inventory was accounted for using the FIFO method, the inventory balance at December 31, 2010 and 2009, would be \$0.2 million and \$0.4 million lower, respectively.

4. Property, Plant and Equipment

Property, plant and equipment at December 31, 2010 and 2009, consisted of the following:

	2010	2009
Land	\$ 13,037	\$ 13,363
Buildings and improvements	34,302	35,030
Machinery and equipment	131,238	118,804
	178,577	167,197
Less-Accumulated depreciation	(73,279)	(61,594)
	\$ 105,298	\$ 105,603

As of December 31, 2008, management planned to exit two buildings, one in Scotland, Pennsylvania and one in Chattanooga, Tennessee. The two buildings were previously the operating facilities for the Electronics Division which was divested on December 31, 2007. In the first quarter of 2009, due to real estate market conditions in Scotland, Pennsylvania and Chattanooga, Tennessee, the Company reevaluated the classification of these buildings as assets held for sale and reclassified the buildings, with a net book value of \$3.5 million, to held and used. As a result of the change in classification, the Company recorded a catch-up depreciation adjustment of \$0.2 million in 2009.

In October 2010, the Company entered into a purchase and sale agreement for the Chattanooga facility. The Company recorded a \$0.1 million impairment of the Chattanooga facility in 2010. The Company estimated the fair value based on the quoted price listed in the purchase and sale agreement (level 2). The building is classified as an asset held for sale and the associated debt of \$2.3 million is classified as current in the condensed consolidated balance sheet.

Currently, the Company owns a vacant building in Stratford, Canada which the Company is attempting to sell. The facility was classified as held for use as of December 31, 2010. The facility continues to be assessed for impairment, but no impairment has been recognized in 2010.

5. Goodwill and Intangible Assets

Changes in goodwill during the year ended December 31, 2010 and 2009, were as follows:

2010	2009
-------------	-------------

Edgar Filing: Altra Holdings, Inc. - Form 10-K

Gross goodwill balance as of January 1	\$ 110,642	\$ 109,307
Adjustments related to additional purchase price paid	532	
Impact of changes in foreign currency and other	(2,467)	1,335
Gross goodwill balance as of December 31	108,707	110,642
Accumulated impairment, January 1	(31,810)	(31,810)
Impairment charge during period		
Accumulated impairment, December 31	(31,810)	(31,810)
Net goodwill balance December 31	\$ 76,897	\$ 78,832

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

Other intangibles and related accumulated amortization consisted of the following:

	December 31, 2010		December 31, 2009	
	Cost	Accumulated Amortization	Cost	Accumulated Amortization
Other Intangible Assets				
Intangible assets not subject to amortization:				
Tradenames and trademarks	\$ 30,730	\$	\$ 30,730	\$
Intangible assets subject to amortization:				
Customer relationships	62,038	23,821	62,038	19,655
Product technology and patents	5,435	4,919	5,435	4,059
Impact of changes in foreign currency	(213)		416	
Total intangible assets	\$ 97,990	\$ 28,740	\$ 98,619	\$ 23,714

The Company recorded \$5.0 million, \$5.5 million, and \$5.7 million of amortization for the years ended December 31, 2010, 2009 and 2008, respectively.

Customer relationships, product technology and patents are amortized over their useful lives ranging from 8 to 16 years. The weighted average estimated useful life of intangible assets subject to amortization is approximately 11 years.

The estimated amortization expense for intangible assets is approximately \$5.5 million in each of the next five years and then \$11.2 million thereafter.

6. Warranty Costs

The wholly-owned subsidiaries of Altra Industrial Motion manufacture various products. The contractual warranty period generally ranges from three months to thirty-six months based on the product and application of the product. Estimated expenses related to product warranties are accrued at the time products are sold to customers and are recorded in the consolidated balance sheet. Estimates are established using historical information as to the nature, frequency and average costs of warranty claims. Changes in the carrying amount of accrued product warranty costs for the year ended December 31, 2010 and 2009 are as follows:

	December 31, 2010	December 31, 2009	December 31, 2008
Balance at beginning of period	\$ 4,047	\$ 4,254	\$ 4,098
Accrued current period warranty costs	1,626	1,894	2,919
Payments and adjustments	(2,090)	(2,101)	(2,763)

Balance at end of period	\$	3,583	\$	4,047	\$	4,254
--------------------------	----	-------	----	-------	----	-------

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)****7. Income Taxes**

Income (loss) from continuing operations before taxes by domestic and foreign locations consists of the following:

	December 31, 2010	December 31, 2009	December 31, 2008
Domestic	\$ 19,812	\$ (5,711)	\$ 2,324
Foreign	14,717	1,033	21,125
Total	\$ 34,529	\$ (4,678)	\$ 23,449

The components of the provision (benefit) for income taxes consist of the following:

	December 31, 2010	December 31, 2009	December 31, 2008
Current:			
Federal	\$ 20	\$ (2,182)	\$ 8,511
State	251	\$ 314	\$ 212
Non-U.S.	3,076	1,308	6,607
	\$ 3,347	\$ (560)	\$ 15,330
Deferred:			
Federal	7,643	(1,279)	128
State	815	(528)	200
Non-U.S.	(1,801)	3	1,073
	6,657	(1,804)	1,401
Provision (benefit) for income taxes	\$ 10,004	\$ (2,364)	\$ 16,731

A reconciliation from the federal statutory rate to the Company's effective tax rate for income taxes from continuing operations is as follows:

	December 31, 2010	December 31, 2009	December 31, 2008
Tax at U.S. federal income tax rate	\$ 12,085	\$ (1,637)	\$ 8,209

Edgar Filing: Altra Holdings, Inc. - Form 10-K

State taxes, net of federal income tax effect	1,010	(617)	486
Change in tax rate	(283)	(19)	9
Foreign Taxes	1,033	975	1,091
Adjustments to accrued income tax liabilities and uncertain tax positions	(1,045)	(1,487)	505
Valuation allowance	(943)	1,726	316
Intercompany interest	(1,103)	(1,434)	(1,831)
Goodwill impairment			8,061
Tax credits and incentives	(466)	(170)	(491)
Other	(284)	299	376
Provision (benefit) for income taxes	\$ 10,004	\$ (2,364)	\$ 16,731

The Company and its subsidiaries file consolidated and separate income tax returns in the U.S. and federal jurisdiction as well as in various state and non-U.S. jurisdictions. In the normal course of business, the

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

Company is subject to examination by taxing authorities in all of these jurisdictions. Generally, for U.S. income tax purposes, the Company is no longer subject to income tax examinations for the tax years prior to 2007. For the Company's major non-U.S. jurisdictions, France, Germany, and the United Kingdom, the Company is no longer subject to income tax examinations prior to 2007. Additionally, the Company has indemnification agreements with the sellers of the Colfax PTH, Kilian and Hay Hall entities, which provides for reimbursement to the Company for payments made in satisfaction of tax liabilities relating to pre-acquisition periods.

A reconciliation of the gross amount of unrecognized tax benefits excluding accrued interest and penalties is as follows:

	December 31, 2010	December 31, 2009	December 31, 2008
Balance at beginning of period	\$ 7,376	\$ 6,213	\$ 5,583
Increases related to prior year tax positions	353	1,767	2,134
Decreases related to prior year tax positions			(46)
Increases related to current year tax positions	277	87	72
Settlements	(363)	(33)	(398)
Lapse of statute of limitations	(1,305)	(658)	(1,132)
Balance at end of period	\$ 6,338	\$ 7,376	\$ 6,213

At December 31, 2010, the Company had \$9.0 million of net unrecognized tax benefits. If recognized, \$8.3 million would reduce the Company's effective tax rate and \$0.7 million would reduce deferred tax assets resulting in no impact to the effective tax rate.

The Company recognizes interest and penalties related to unrecognized tax benefits in income tax expense in the consolidated statement of operations. The Company accrued interest and penalties of \$0.3 million, \$0.4 million, and \$1.4 million during the years ended December 31, 2010, 2009 and 2008, respectively. The total amount of interest and penalties related to uncertain tax positions at December 31, 2010, 2009, and 2008 was \$3.8 million, \$3.5 million, and \$3.1 million, respectively. We do not expect the amount of unrecognized tax benefit disclosed above to change significantly over the next 12 months.

During 2010, the Company determined that the deferred tax impact of unrealized gains and losses on foreign exchange translation related to an inter-company loan had not been recognized in prior years. As a result, the net deferred tax liability was over-stated and the cumulative foreign currency translation adjustment was under-stated by \$5.3 million at December 31, 2009 and \$4.9 million at December 31, 2008. Additionally, the currency translation adjustment included in the statement of comprehensive income (loss) was overstated by \$0.4 million for 2009 and \$4.7 million in 2008. This non-cash adjustment did not impact any prior statements of operations, and the Company determined that the amounts were not material to its financial statements. The correction of the balances was made in 2010 by increasing other comprehensive income by \$4.1 million with an offset to deferred income taxes.

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

purposes. Significant components of the deferred tax assets and liabilities as of December 31, 2010 and 2009 are as follows:

	2010	2009
Deferred tax assets:		
Post-retirement obligations	\$ 2,512	\$ 2,502
Goodwill	1,739	3,550
Tax credits	2,557	2,781
Expenses not currently deductible	9,768	3,585
Net operating loss carryover	5,551	11,369
Other	1,094	1,034
Total deferred tax assets	23,221	24,821
Valuation allowance for deferred tax assets	(7,279)	(8,692)
Net deferred tax assets	15,942	16,129
Deferred tax liabilities:		
Property, plant and equipment	15,939	16,257
Intangible assets	15,800	16,927
Other	324	1,327
Total deferred tax liabilities	32,063	34,511
Net deferred tax liabilities	\$ 16,121	\$ 18,382

At December 31, 2010 the Company had state net operating loss (NOL) carry forwards of \$26.1 million, which expire between 2014 and 2030, and non U.S. NOL carryforwards of \$15.4 million, of which \$14.8 million have an unlimited carryforward period and the remaining \$0.6 million expire between 2019 and 2027. The NOL carryforwards available are subject to limitations on their annual usage. The Company also has federal and state tax credits of \$2.6 million available to reduce future income taxes that expire between 2013 and 2029.

Valuation allowances are established for a deferred tax asset that management believes may not be realized. The Company continually reviews the adequacy of the valuation allowance and recognizes tax benefits only as reassessments indicate that it is more likely than not the benefits will be realized. A valuation allowance of \$7.3 million and \$8.7 million as of December 31, 2010 and December 31, 2009, respectively, has been established due to the uncertainty of realizing the benefits of these net operating losses, tax credits, and other tax attributes. The valuation allowances are primarily related to certain non-U.S. NOL carryforwards, capital loss carryforwards, and state NOL carryforwards.

A provision has not been made for U.S. or additional non-U.S. taxes on \$26.1 million of undistributed earnings of international subsidiaries that could be subject to taxation if remitted to the U.S. because the Company plans to keep

these amounts permanently reinvested outside the U.S. except for instances where the Company has already been subject to tax in the U.S.

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)**

Amounts in thousands (unless otherwise noted)

8. Pension and Other Employee Benefits**Defined Benefit (Pension) and Postretirement Benefit Plans**

The Company sponsors various defined benefit (pension) and postretirement (medical and life insurance coverage) plans for certain, primarily unionized, active employees (those in the employment of the Company at or hired since November 30, 2004).

The following tables represent the reconciliation of the benefit obligation, fair value of plan assets and funded status of the respective defined benefit (pension) and postretirement benefit plans as of December 31, 2010 and 2009:

	Pension Benefits		Other Benefits	
	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2010	Year Ended December 31, 2009
Change in benefit obligation:				
Obligation at beginning of period	\$ 25,563	\$ 26,676	\$ 513	\$ 2,583
Service cost	156	111	2	39
Interest cost	1,442	1,418	20	118
Curtailments, settlements and special termination benefits	189			(1,467)
Actuarial (gains) losses	2,640	(1,681)	(117)	(623)
Foreign exchange effect	(289)	66		
Benefits paid	(5,603)	(1,027)	(82)	(137)
Obligation at end of period	\$ 24,098	\$ 25,563	\$ 336	\$ 513
Change in plan assets:				
Fair value of plan assets, beginning of period	\$ 15,701	\$ 14,822	\$	\$
Actual return on plan assets	1,516	785		
Employer contributions	1,676	1,121	82	137
Benefits paid	(5,603)	(1,027)	(82)	(137)
Fair value of plan assets, end of period	\$ 13,290	\$ 15,701	\$	\$
Funded status	\$ (10,808)	\$ (9,862)	\$ (336)	\$ (513)
Amounts Recognized in the balance sheet consist of:				
Non current assets	\$	\$		
Current liabilities			(113)	(108)

Edgar Filing: Altra Holdings, Inc. - Form 10-K

Non-current liabilities	(10,808)	(9,862)	(223)	(405)
Total	\$ (10,808)	\$ (9,862)	\$ (336)	\$ (513)

For all pension plans presented above, the accumulated and projected benefit obligations exceed the fair value of plan assets. The accumulated benefit obligation at December 31, 2010 and 2009 was \$24.1 million

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

and \$25.6 million, respectively. Non-U.S. pension liabilities recognized in the amounts presented above are \$3.2 million and \$3.3 million at December 31, 2010 and 2009, respectively.

Included in accumulated other comprehensive loss at December 31, 2010 and 2009, is \$2.0 million (net of \$1.1 million in taxes) and \$0.5 million (net of \$0.3 million in taxes), respectively, of unrecognized actuarial losses that have not yet been recognized in net periodic pension cost.

The discount rate used in the computation of the respective benefit obligations at December 31, 2010 and 2009, presented above are as follows:

	2010	2009
Pension benefits	5.50%	5.75%
Other postretirement benefits	5.75%	5.75%

The following table represents the components of the net periodic benefit cost associated with the respective plans:

	Pension Benefits			Other Benefits		
	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008	Year Ended December 31, 2010	Year Ended December 31, 2009	Year Ended December 31, 2008
Service cost	\$ 156	\$ 111	\$ 239	\$ 2	\$ 39	\$ 58
Interest cost	1,442	1,418	1,561	20	118	213
Recognized net actuarial loss				(160)	(80)	(25)
Expected return on plan assets	(1,228)	(1,254)	(1,374)			
Settlement/Curtailment/Special Termination Benefit	189				(1,467)	(924)
Amortization	(2)	(22)	(35)	(686)	(939)	(975)
Net periodic benefit (income) cost	\$ 557	\$ 253	\$ 391	\$ (824)	\$ (2,329)	\$ (1,653)

The key economic assumptions used in the computation of the respective net periodic benefit cost for the periods presented above are as follows:

Pension Benefits			Postretirement Benefits		
Year Ended December 31,	Year Ended December 31,	Year Ended December 31,	Year Ended December 31,	Year Ended December 31,	Year Ended December 31,

Edgar Filing: Altra Holdings, Inc. - Form 10-K

	2010	2009	2008	2010	2009	2008
Discount rate	5.75%	6.25%	6.25%	5.75%	6.25%	6.25%
Expected return on plan assets	7.75%	8.5%	8.5%	N/A	N/A	N/A
Compensation rate increase	N/A	N/A	N/A	N/A	N/A	N/A

The expected long-term rate of return on assets assumption is 7.75%. The assumption represents the average rate of earnings expected on the funds invested or to be invested to provide for the benefits included in the benefit obligation. The assumption reflects expectations regarding future rates of return for the investment portfolio, with consideration given to the distribution of investments by asset class and historical rates of return for each individual asset class.

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)**

Amounts in thousands (unless otherwise noted)

Fair Value of Plan Assets

The fair value of the Company's pension plan assets at December 31, 2010 and 2009 by asset category is as follows:

Asset Category	2010	2009
	Quoted Prices in Active Markets for Identical Assets (Level 1)	Quoted Prices in Active Markets for Identical Assets (Level 1)
Equity		
U.S. companies	\$ 3,407	\$ 2,749
International companies	1,010	397
Total equity	\$ 4,417	\$ 3,146
Fixed income		
U.S. government	409	570
Mutual Funds		
Investment grade	5,093	8,182
High yield	1,107	1,121
Other credit	2,099	2,114
Total fixed income	\$ 8,708	\$ 11,987
Cash and cash equivalents	165	568
Total assets at fair value	\$ 13,290	\$ 15,701

The asset allocations for the Company's funded retirement plan at December 31, 2010 and 2009, respectively, and the target allocation for 2010, by asset category, are as follows:

Asset Category	Allocation Percentage of Plan Assets at Year-End		
	2010 Actual	2010 Target	2009 Actual
Global Equity	25%	15% - 65%	29%
Investment Grade Mutual Funds	46%	10% - 60%	18%
High Yield Mutual Funds	8%	0% - 30%	10%
Emerging Market Debt	4%	0% - 20%	5%

Government Bonds	3%	0% - 40%	
Dynamic Asset Allocation	13%	0% - 50%	31%
Cash	1%	0% - 20%	7%

The investment strategy is to achieve a rate of return on the plan's assets that, over the long-term, will fund the plan's benefit payments and will provide for other required amounts in a manner that satisfies all fiduciary responsibilities. A determinant of the plan's return is the asset allocation policy. The plan's asset mix will be reviewed by the Company periodically, but at least quarterly, to rebalance within the target guidelines. The Company will also periodically review investment managers to determine if the respective manager has performed satisfactorily when compared to the defined objectives, similarly invested portfolios, and specific market indices.

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

For measurement of the postretirement benefit obligations and net periodic benefit costs, an annual rate of increase in the per capita cost of covered health care benefits of approximately 9.0% was assumed. This rate was assumed to decrease gradually to 5%. The assumed health care trends are a significant component of the postretirement benefit costs. A one-percentage-point change in assumed health care cost trend rates would have the following effects:

	1-Percentage- Point Increase	1-Percentage- Point Decrease
Effect on the December 31, 2010 service and interest cost components	\$ 99	\$ (98)
Effect on the December 31, 2010 post-retirement benefit obligation	\$ 1,811	\$ (1,799)

Expected cash flows

The following table provides the amounts of expected benefit payments, which are made from the plans' assets and includes the participants' share of the costs, which is funded by participant contributions. The amounts in the table are actuarially determined and reflect the Company's best estimate given its current knowledge; actual amounts could be materially different.

	Pension Benefits	Postretirement Benefits
Expected benefit payments (from plan assets)		
2011	\$ 944	\$ 83
2012	975	57
2013	1,077	14
2014	1,173	5
2015	1,305	6
Thereafter	7,280	45

The Company contributed \$1.5 million to its pension plan in 2010. The Company has minimum cash funding requirements associated with its pension plan which are estimated to be \$1.3 million in 2011, \$1.3 million in 2012, \$1.4 million in 2013, and \$1.3 million in 2014.

One of the Company's four U.S. collective bargaining agreements expired in September 2007. In October 2007, negotiations with the union covered by that agreement resulted in a provision to close the Erie, Pennsylvania plant by December 2008 through the transfer of manufacturing equipment to other existing facilities and a ratable reduction in headcount. The plant closure triggered a special retirement pension feature and plan curtailment.

Under the special retirement pension feature, plan participants became eligible for pension benefits at an age earlier than the normal retirement feature would allow, provided that service is broken by permanent shutdown, layoff or disability. The pension benefit was increased by a special supplemental benefit payment on a monthly basis and a

special one time payment at the time of retirement. The curtailment and special termination benefits were approximately \$2.9 million for the year ended December 31, 2007.

In August 2008, an announcement was made that the Company would no longer close the plant in Erie, Pennsylvania, and would continue to employ those employees that had not previously been terminated and begin to negotiate a new collective bargaining agreement for the remaining employees. As a result of this announcement, the remaining employees were no longer eligible for the special retirement pension feature under the pension plan. An adjustment to the minimum pension liability was recorded in accumulated other

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

comprehensive income, and will be amortized over the average expected remaining life expectancy of the participants of the plan.

Also, in connection with the union renegotiation, the post retirement benefit plan for employees at that location have been terminated for all eligible employees who had not retired, or given notice to retire in 2007. As employees terminated their employment, the Company recognized a non-cash gain of \$0.3 million and \$0.2 million in the year ended 2008 and 2007, respectively.

In September 2008, the Company reached a new collective bargaining agreement with the labor union at the manufacturing facility in Warren, Michigan. The new collective bargaining agreement eliminated post-retirement healthcare benefits for all employees and retirees. This resulted in a settlement gain of \$0.6 million in the year ended 2008.

In March 2009, the Company reached a new collective bargaining agreement with the union at its Erie, Pennsylvania facility. One of the provisions of the new agreement eliminates benefits that employees were entitled to receive through the applicable other post employment benefit plan (OPEB). OPEB benefits will no longer be available to retired or active employees. This resulted in an OPEB settlement gain of \$1.5 million in the year ended December 31, 2009. In addition, no additional years of credited service will be accrued on the defined benefit pension plan effective February 28, 2009. There was no curtailment gain or loss as a result of the change in the pension plan.

Defined Contribution Plans

Under the terms of the Company's defined contribution plans, eligible employees may contribute up to seventy-five percent of their compensation to the plan on a pre-tax basis. During 2009, the Company made matching contributions equal to half of the first six percent of salary contributed by each employee and makes a unilateral contribution (including for non-contributing employees). Effective February 2009, the Company's matching contribution was temporarily suspended and effective July 2009, the Company's unilateral contribution was suspended. The Company reinstated both the matching and unilateral contributions by July 2010. The Company's expense associated with the defined contribution plans was \$2.4 million and \$1.0 million during the years ended December 31, 2010 and 2009, respectively.

9. Long-Term Debt

	December 31, 2010	December 31, 2009
Debt:

Total long-term debt	\$	213,109	\$	216,490

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

Senior Secured Notes

In 2009, the Company issued 81/8% Senior Secured Notes (the "Senior Secured Notes") with a face value of \$210 million. Interest on the Senior Secured Notes is payable semiannually in arrears, on June 1 and December 1 of each year, commencing on June 1, 2010 at an annual rate of 81/8%. The effective interest rate of the Senior Secured Notes was approximately 8.75% after consideration of the \$6.7 million of deferred financing costs (included in other assets). The principal balance of the Senior Secured Notes matures on December 1, 2016.

The Senior Secured Notes are guaranteed by the Company's U.S. domestic subsidiaries and are secured by a second priority lien, subject to first priority liens securing the Revolving Credit Agreement, on substantially all of the Company's assets and those of its domestic subsidiaries. The indenture governing the Senior Secured Notes contains covenants which restrict our subsidiaries. These restrictions limit or prohibit, among other things, their ability to incur additional indebtedness; repay subordinated indebtedness prior to stated maturities; pay cash dividends on or redeem or repurchase stock or make other distributions; make investments or acquisitions; sell certain assets or merge with or into other companies; sell stock in our subsidiaries; and create liens on their assets. There are no financial covenants associated with the Senior Secured Notes.

Tender Offer

The Company used the proceeds of the offering of the Senior Secured Notes to repurchase or redeem the Company's 9% Senior Secured Notes (the "Old Senior Secured Notes"). On November 10, 2009, the Company commenced a cash tender offer to repurchase any and all of its outstanding Old Senior Secured Notes as of the date thereof at a price equal to \$1,000.00 per \$1,000 principal amount of notes tendered, plus an early tender premium of \$25.00 per \$1,000 principal amount of notes tendered, payable on notes tendered before the early tender deadline. Holders who tendered their Old Senior Secured Notes also agreed to waive any rights to written notice of redemption. With respect to any Old Senior Secured Notes that were not tendered, Altra Holdings redeemed all Old Senior Secured Notes that remained outstanding after the expiration of the tender offer by issuing a notice of redemption on the early tender deadline. On the early tender deadline, Altra Holdings satisfied and discharged all of its obligations under the indenture governing the Old Senior Secured Notes by depositing funds with the depository in an amount sufficient to pay and discharge any remaining indebtedness on the Old Senior Secured Notes upon the consummation of the tender offer.

Revolving Credit Agreement

Concurrently with the closing of the offering of the Senior Secured Notes, Altra Industrial entered into a new senior secured credit facility, (the "Revolving Credit Agreement"), that provides for borrowing capacity in an initial amount of up to \$50.0 million (subject to adjustment pursuant to a borrowing base and subject to increase from time to time in accordance with the terms of the credit facility). The Revolving Credit Agreement replaced Altra Industrial's then existing senior secured credit facility, (the "Old Revolving Credit Agreement"), and the TB Wood's existing credit facility, (the "Old TB Wood's Revolving Credit Agreement"). The Company can borrow up to \$37.5 million under the Revolving Credit Agreement without being required to comply with any financial covenants under the agreement. The Company may use up to \$30.0 million of its availability under the Revolving Credit Agreement for standby letters of credit issued on its behalf, the issuance of which will reduce the amount of borrowings that would otherwise be available to the Company. The Company may re-borrow any amounts paid to reduce the amount of outstanding

borrowings; however, all borrowings under the Revolving Credit Agreement must be repaid in full as of November 25, 2012.

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

There were no borrowings under the Revolving Credit Agreement at December 31, 2010 and 2009, however, the lender had issued \$10.1 million and \$10.4 million of outstanding letters of credit on behalf of the Company as of December 31, 2010 and 2009, respectively.

Altra Industrial and all of its domestic subsidiaries are borrowers, or Borrowers, under the Revolving Credit Agreement. Certain of our existing and subsequently acquired or organized domestic subsidiaries which are not Borrowers do and will guarantee (on a senior secured basis) the Revolving Credit Agreement. Obligations of the other Borrowers under the Revolving Credit Agreement and the guarantees are secured by substantially all of Borrowers assets and the assets of each of our existing and subsequently acquired or organized domestic subsidiaries that is a guarantor of our obligations under the Revolving Credit Agreement (with such subsidiaries being referred to as the U.S. subsidiary guarantors), including but not limited to: (a) a first-priority pledge of all the capital stock of subsidiaries held by Borrowers or any U.S. subsidiary guarantor (which pledge, in the case of any foreign subsidiary, will be limited to 100% of any non-voting stock and 65% of the voting stock of such foreign subsidiary) and (b) perfected first-priority security interests in and mortgages on substantially all tangible and intangible assets of each Borrower and U.S. subsidiary guarantor, including accounts receivable, inventory, equipment, general intangibles, investment property, intellectual property, certain real property, and cash and proceeds of the foregoing (in each case subject to materiality thresholds and other exceptions).

An event of default under the Revolving Credit Agreement would occur in connection with a change of control, among other things, if: (i) Altra Industrial ceases to own or control 100% of each of its borrower subsidiaries, or (ii) a change of control occurs under the Senior Secured Notes, or any other subordinated indebtedness.

An event of default under the Revolving Credit Agreement would also occur if an event of default occurs under the indentures governing the Senior Secured Notes or if there is a default under any other indebtedness of any borrower may have involving an aggregate amount of \$10 million or more and such default: (i) occurs at final maturity of such debt, (ii) allows the lender there under to accelerate such debt or (iii) causes such debt to be required to be repaid prior to its stated maturity. An event of default would also occur under the Revolving Credit Agreement if any of the indebtedness under the Revolving Credit Agreement ceases with limited exception to be secured by a full lien on the assets of Borrowers and guarantors.

Variable Rate Demand Revenue Bonds

In connection with the acquisition of TB Woods, the Company assumed obligations for certain Variable Rate Demand Revenue Bonds outstanding as of the acquisition date. TB Woods had assumed obligations for approximately \$3.0 million and \$2.3 million of Variable Rate Demand Revenue Bonds issued under the authority of the industrial development corporations of the City of San Marcos, Texas and City of Chattanooga, Tennessee, respectively. These bonds bear variable interest rates (less than 1% as of December 31, 2010) and mature in April 2024 and April 2022, respectively. The bonds were issued to finance production facilities for TB Woods manufacturing operations in those cities, and are secured by letters of credit issued under the terms of the Revolving Credit Agreement. The Company currently is in the process of trying to sell the Chattanooga facility and has classified these Variable Rate Demand Revenue Bonds as current in the accompanying balance sheet.

Mortgage

In June 2006, the Company entered into a mortgage on its building in Heidelberg, Germany with a local bank. In 2009, the Company re-financed the mortgage. The Company borrowed an additional 1.0 million. The new mortgage has an interest rate of 2.9% and is payable in monthly installments over the next six years. As of December 31, 2010 and 2009, the mortgage has a remaining principal of 1.8 million or

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

\$2.4 million, and 2.2 million or \$3.1 million, respectively and an interest rate of 2.9% and is payable in monthly installments over the next six years.

Capital Leases

The Company leases certain equipment under capital lease arrangements, whose obligations are included in both short-term and long-term debt. Capital lease obligations amounted to approximately \$1.3 million and \$1.8 million at December 31, 2010 and 2009, respectively. Assets under capital leases are included in property, plant and equipment with the related amortization recorded as depreciation expense.

Old Revolving Credit Agreement

Prior to entering into the Revolving Credit Agreement, the Company maintained the Old Revolving Credit Agreement, a \$30 million revolving borrowings facility with a commercial through its wholly owned subsidiary Altra Industrial. The Old Revolving Credit Agreement was subject to certain limitations resulting from the requirement of Altra Industrial to maintain certain levels of collateralized assets, as defined in the Old Revolving Credit Agreement. Altra Industrial was in compliance with all covenant requirements associated with the Old Revolving Credit Agreement as of the date of refinancing.

Overdraft Agreements

Certain of our foreign subsidiaries maintain overdraft agreements with financial institutions. There were no borrowings as of December 31, 2010, 2009, or 2008 under any of the overdraft agreements.

Old Senior Secured Notes

On November 30, 2004, Altra Industrial issued the Old Senior Secured Notes, with a face value of \$165.0 million. Interest on the Old Senior Secured Notes was payable semiannually, in arrears, on June 1 and December 1 of each year, beginning June 1, 2005, at an annual rate of 9%.

In connection with the acquisition of TB Woods on April 5, 2007, Altra Industrial completed a follow-on offering issuing an additional \$105.0 million of the Old Senior Secured Notes. The additional \$105.0 million had the same terms and conditions as the previously issued Old Senior Secured Notes. The effective interest rate on the Old Senior Secured Notes, after the follow-on offering was approximately 9.6% after consideration of the amortization of \$5.6 million net discount and \$6.5 million of deferred financing costs.

During 2008, the Company retired \$27.5 million aggregate principal amount of the outstanding Old Senior Secured Notes at redemption prices between 102.0% and 104.4% of the principal amount of the Senior Secured Notes, plus accrued and unpaid interest. In connection with the redemption, the Company incurred \$0.8 million of pre-payment premium. In addition, the Company wrote-off \$0.4 million of deferred financing costs and \$0.3 million of discount/premium.

During 2009, Altra Industrial retired all of the outstanding Old Senior Secured Notes. In connection with the pay-down, Altra Industrial incurred \$5.1 million of pre-payment premiums and wrote-off \$3.2 million of deferred

financing costs, and \$1.9 million of discount/premium which was recorded as a component of interest expense.

The Old Senior Secured Notes were guaranteed by Altra Industrial's U.S. domestic subsidiaries and were secured by a second priority lien, subject to first priority liens securing the Old Revolving Credit Agreement, on substantially all of Altra Industrial's assets. The Old Senior Secured Notes contained numerous terms, covenants and conditions, which imposed substantial limitations on Altra Industrial.

Table of Contents

ALTRA HOLDINGS, INC.

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

Old Senior Notes

On February 8, 2006, Altra Industrial issued the Old Senior Notes, with a face value of £33 million. Interest on the Old Senior Notes was payable semiannually, in arrears, on August 15 and February 15 of each year, beginning August 15, 2006, at an annual rate of 11.25%. The effective interest rate on the Old Senior Notes was approximately 12.7%, after consideration of the \$0.7 million of deferred financing costs (included in other assets). The Old Senior Notes were to mature on February 13, 2013.

During 2008, Altra Industrial retired £0.7 million, or \$1.3 million, aggregate principal amount of the outstanding Old Senior Notes at a redemption price of 106.0% of the principal amount of the Old Senior Notes, plus accrued and unpaid interest. In connection with the redemption, Altra Industrial incurred \$0.1 million of pre-payment premium and wrote-off \$0.1 million of deferred financing costs.

During 2009, Altra Industrial retired the remaining principal balance of the Old Senior Notes, of £3.3 million or \$5.0 million of principal amount, plus accrued and unpaid interest. In connection with the redemption, Altra Industrial incurred \$0.2 million of pre-payment premium and wrote-off the entire remaining balance of \$0.2 million of deferred financing fees, which is recorded as interest expense in the condensed consolidated statement of income (loss). The Old Senior Notes were guaranteed on a senior unsecured basis by Altra Industrial's U.S. domestic subsidiaries. The Old Senior Notes contained numerous terms, covenants and conditions, which imposed substantial limitations on the Company.

10. Stockholders Equity

Common Stock

In December 2006, the Company completed its initial public offering. The Company offered 3,333,334 shares of its common stock, \$0.001 par value per share and selling stockholders offered 6,666,666 shares of common stock. Proceeds to the Company after the underwriting discount and issuance cost were \$39.3 million.

In June 2007, the Company closed its secondary public offering of 12,650,000 shares of its common stock, which included 1,650,000 shares sold as a result of the underwriters' exercise of their overallotment option in full at closing. The Company received proceeds of \$48.7 million, net of issuance costs. In the offering the Company sold 3,178,494 shares and certain selling stockholders, including Genstar Capital, the Company's largest stockholder, sold an aggregate of 9,471,506 shares.

As of December 31, 2010, there were 90,000,000 shares of common stock authorized and 26,466,216 outstanding.

Preferred Stock

On December 20, 2006, the Company amended and restated its certificate of incorporation authorizing 10,000,000 shares of undesignated Preferred Stock (Preferred Stock). The Preferred Stock may be issued from time to time in one or more classes or series, the shares of each class or series to have such designations and powers, preferences, and rights, and qualifications, limitations and restrictions as determined by the Company's Board of Directors. There was no Preferred Stock issued or outstanding at December 31, 2010 or 2009.

Restricted Common Stock

The Company's Board of Directors established the 2004 Equity Incentive Plan (as amended, the Plan) that provides for various forms of stock based compensation to independent directors, officers and senior-level employees of the Company. The restricted shares issued pursuant to the plan generally vest ratably over a period ranging from immediately to five years from the date of grant, provided, that the vesting of the

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

restricted shares may accelerate upon the occurrence of certain liquidity events, if approved by the Board of Directors in connection with the transactions. Common stock awarded under the Plan is generally subject to restrictions on transfer, repurchase rights, and other limitations and rights as set forth in the applicable award agreements. The shares are valued based on the share price on the date of grant.

The Plan permits the Company to grant restricted stock to key employees and other persons who make significant contributions to the success of the Company. The restrictions and vesting schedule for restricted stock granted under the Plan are determined by the Personnel and Compensation Committee of the Board of Directors. Compensation expense recorded (in selling, general, and administrative expense) during the year ended December 31, 2010, 2009 and 2008 was \$2.1 million (\$1.4 million, net of tax), \$3.2 million (\$2.2 million, net of tax), and \$2.0 million (\$1.3 million, net of tax), respectively. Compensation expense is recognized on a straight-line basis over the service period.

The following table sets forth the activity of the Company's restricted stock grants to date:

	Shares		Weighted- Average Grant Date Fair Value
Restricted shares unvested January 1, 2010	560,081	\$	6.55
Shares granted	211,125	\$	10.57
Shares forfeited	(4,817)	\$	9.55
Shares for which restrictions lapsed	(478,803)	\$	6.42
Restricted shares unvested December 31, 2010	287,586	\$	9.66

Total remaining unrecognized compensation cost is approximately \$2.3 million as of December 31, 2010, and will be recognized over a weighted average remaining period of two years. The fair market value of the shares in which the restrictions have lapsed during 2010 was \$6.3 million.

11. Concentrations of Credit, Segment Data and Workforce

Financial instruments, which are potentially subject to counter party performance and concentrations of credit risk, consist primarily of trade accounts receivable. The Company manages these risks by conducting credit evaluations of customers prior to delivery or commencement of services. When the Company enters into a sales contract, collateral is normally not required from the customer. Payments are typically due within thirty days of billing. An allowance for potential credit losses is maintained, and losses have historically been within management's expectations. No customer represented greater than 10% of total sales for the year ended December 31, 2010, 2009 and 2008.

The Company is also subject to counter party performance risk of loss in the event of non-performance by counterparties to financial instruments, such as cash and investments. Cash and investments are held by international and well established financial institutions.

The Company has five operating segments that are regularly reviewed by our chief operating decision maker. Each of these operating segments represents a unit that produces mechanical power transmission products. The Company aggregates all of the operating segments into one reportable segment. The five operating segments have similar long-term average gross profit margins. All of our products are sold by one global sales force and we have one global marketing function. Strategic markets and industries are determined for the entire company and then targeted by the brands. All of our operating segments have common manufacturing and production processes. Each segment includes a machine shop which uses similar equipment and manufacturing techniques. Each of our segments uses common raw materials, such as aluminum, steel and

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

copper. The materials are purchased and procurement contracts are negotiated by one global purchasing function.

We serve the general industrial market by selling to original equipment manufacturers (OEM) and distributors. Our OEM and distributor customers serve the general industrial market. Resource allocation decisions such as capital expenditure requirements and headcount requirements are made at a consolidated level and allocated to the individual operating segments.

Discrete financial information is not available by product line at the level necessary for management to assess performance or make resource allocation decisions.

Net sales to third parties and property, plant and equipment by geographic region are as follows:

	Net Sales			Property, Plant and Equipment	
	Year Ended		December 31, 2008	December 31, 2010	December 31, 2009
	December 31, 2010	December 31, 2009			
North America (primarily U.S.)	\$ 380,588	\$ 326,872	\$ 451,235	\$ 80,395	\$ 79,816
Europe	109,749	100,345	154,463	21,392	22,904
Asia and other	29,825	25,629	29,638	3,511	2,883
Total	\$ 520,162	\$ 452,846	\$ 635,336	\$ 105,298	\$ 105,603

Net sales to third parties are attributed to the geographic regions based on the country in which the shipment originates. Amounts attributed to the geographic regions for property, plant and equipment are based on the location of the entity, which holds such assets. The net assets of our foreign subsidiaries at December 31, 2010 and 2009 were \$92.3 million and \$76.8 million, respectively.

The Company has not provided specific product line sales as our current ERP accounting systems do not allow us to readily determine groups of similar product sales.

Approximately 17.9% of the Company's labor force (5.8% and 62.8% in the United States and Europe, respectively) is represented by collective bargaining agreements. The Company is a party to four U.S. collective bargaining agreements. Three of the agreements will expire on, June 2011, September 2011, and October 2013, respectively. The Company intends to renegotiate these contracts as they become due, though there is no assurance that this effort will be successful.

12. Restructuring, Asset Impairment and Transition Expenses

During 2007, the Company adopted two restructuring programs. The first was intended to improve operational efficiency by reducing headcount, consolidating its operating facilities and relocating manufacturing to lower cost

areas (the 2007 Altra Plan). The second was related to the acquisition of TB Wood s and was intended to reduce duplicate staffing and consolidate facilities (the TB Wood s Plan). The TB Wood s Plan was initially formulated at the time of the TB Wood s acquisition and therefore an accrual was recorded as part of purchase price accounting. The total restructuring charges for the year ended December 31, 2008 for the TB Wood s Plan and the 2007 Altra Plan were \$2.3 million, primarily comprised of costs associated with the termination of certain individuals whose positions with the Company were determined to be redundant. These moving and relocation costs are recognized in the period in which the liability is incurred. There were no costs incurred in 2009 or 2010 under the 2007 Altra Plan or the TB Wood s Plan.

In 2009, the Company adopted a new restructuring plan (2009 Altra Plan) to improve the utilization of the manufacturing infrastructure and to realign the business with the current economic conditions. The 2009 Altra Plan is intended to improve operational efficiency by reducing headcount and consolidating facilities.

Table of Contents**ALTRA HOLDINGS, INC.****Notes to Consolidated Financial Statements (Continued)****Amounts in thousands (unless otherwise noted)**

The Company recorded \$2.7 million and \$7.3 million in restructuring charges associated with the 2009 Altra Plan in 2010 and 2009, respectively. In 2010 and 2009, the Company recorded \$1.2 million and \$4.2 million of severance charges associated with the announcement of certain plant closings and the reduction of the workforce due to the economic conditions at the time. In addition, the Company recorded two asset impairments.

The first was associated with the announcement that the Company would be closing its facility in Mt. Pleasant, Michigan and relocating the manufacturing to certain of the Company's other facilities. In connection with this decision, the Company completed an impairment analysis. The facility which had a carrying value of \$1.4 million was written down to the fair value of \$0.7 million, resulting in an impairment charge of \$0.7 million. The Company estimated the fair value using observable inputs (level 2) by reviewing sale prices of comparable buildings in the Mt. Pleasant, Michigan area. The relocation was completed at the end of 2009.

The second was associated with the announcement that the Company would be closing its manufacturing facility in South Beloit, Illinois and relocating the manufacturing operations to certain of the Company's other facilities. In connection with this decision, the Company completed an impairment analysis. The facility which had a carrying value of \$2.1 million was written down to the fair value of \$1.5 million, resulting in an impairment charge of \$0.6 million. The Company estimated the fair value using observable inputs (level 2). The Company reviewed sales prices of comparable buildings in the South Beloit, Illinois area. The Company considers the facility to be substantially closed with the exception of the one remaining production line which is expected to remain open until the third quarter of 2012. In September 2009, the Company negotiated a plant closing agreement with the local union at the South Beloit facility. The Company agreed to pay approximately \$0.7 million in severance and performance bonuses to those employees who remain employed through their termination date. The Company paid those amounts in the fourth quarter of 2009 through the first quarter of 2010.

The Company's total restructuring expense, by major component for the years ended December 31, 2010, 2009 and 2008, were as follows:

	Year Ended December 31, 2010 2009 Altra Plan	Year Ended December 31, 2009 2009 Altra Plan	Year Ended December 31, 2008		
			Altra Plan	TB Wood's Plan	Total
Expenses

	All Plans
Balance at December 31, 2008	\$ 1,321
Restructuring expense incurred	7,286
Cash payments	(5,183)
Non-cash loss on impairment of fixed assets	(2,509)
Balance at December 31, 2009	\$ 915
Restructuring expense incurred	2,726
Cash payments	(3,141)
Non-cash loss on impairment of fixed assets	(341)
Balance at December 31, 2010	\$ 159

The Company expects to incur between \$0.2 million and \$0.5 million of additional restructuring expense in 2011.

13. Commitments and Contingencies***Minimum Lease Obligations***

The Company leases certain offices, warehouses, manufacturing facilities, automobiles and equipment with various terms that range from a month to month basis to ten year terms and which, generally, include renewal provisions. Future minimum rent obligations under non-cancelable operating and capital leases are as follows:

Year ending December 31:	Operating Leases	Capital Leases
2011	\$ 4,127	\$ 855
2012	3,517	393
2013	2,574	26
2014	1,979	
2015	1,013	
Thereafter	4,715	
Total lease obligations	\$ 17,925	\$ 1,274
Less amounts representing interest		(17)
Present value of minimum capital lease obligations		\$ 1,257

Net rent expense under operating leases for the years ended December 31, 2010, 2009, and 2008 was approximately \$4.9 million, \$4.8 million, and \$5.5 million, respectively.

General Litigation

The Company is involved in various pending legal proceedings arising out of the ordinary course of business. These proceedings primarily involve commercial claims, product liability claims, personal injury claims, and workers compensation claims. None of these legal proceedings are expected to have a material adverse effect on the results of operations, cash flows, or financial condition of the Company. With respect to these proceedings, management believes that it will prevail, has adequate insurance coverage or has established appropriate reserves to cover potential liabilities. Any costs that management estimates may be paid related to these proceedings or claims are accrued when the liability is considered probable and the amount can be

Table of Contents

Notes to Consolidated Financial Statements (Continued)

Amounts in thousands (unless otherwise noted)

reasonably estimated. There can be no assurance, however, as to the ultimate outcome of any of these matters, and if all or substantially all of these legal proceedings were to be determined adversely to the Company, there could be a material adverse effect on the results of operations, cash flows, or financial condition of the Company. As of December 31, 2010 and 2009, the Company cannot estimate the likelihood or potential amount of the liability related to these proceedings. As a result, no amounts were accrued in the accompanying consolidated balance sheets for product liability losses at those dates.

The Company also risks exposure to product liability claims in connection with products it has sold and those sold by businesses that the Company acquired. Although in some cases third parties have retained responsibility for product liabilities relating to products manufactured or sold prior to the acquisition of the relevant business and in other cases the persons from whom the Company has acquired a business may be required to indemnify the Company for certain product liability claims subject to certain caps or limitations on indemnification, the Company cannot assure that those third parties will in fact satisfy their obligations with respect to liabilities retained by them or their indemnification obligations. If those third parties become unable to or otherwise do not comply with their respective obligations including indemnity obligations, or if certain product liability claims for which the Company is obligated were not retained by third parties or are not subject to these indemnities, the Company could become subject to significant liabilities or other adverse consequences. Moreover, even in cases where third parties retain responsibility for product liabilities or are required to indemnify the Company, significant claims arising from products that have been acquired could have a material adverse effect on the Company's ability to realize the benefits from an acquisition, could result in the reduction of the value of goodwill that the Company recorded in connection with an acquisition, or could otherwise have a material adverse effect on the Company's business, financial condition, or operations.

Environmental

Currently, the Company is not undertaking any remediation or investigations and the costs or liability in connection with potential contamination conditions at the Company's facilities cannot be predicted at this time because the potential existence of contamination has not been investigated or not enough is known about the environmental conditions or likely remedial requirements.

Other Matters

The state of New York Workers' Compensation Board (the Board) has demanded payment from one of the Company's business units of certain amounts the Board alleges are owed in connection with that business unit's past participation in a workers' compensation insurance trust. The amount claimed is currently immaterial and is subject to further adjustment and proceedings. The total amount of potential liability cannot be reasonably estimated as of December 31, 2010.

15. Guarantor Subsidiaries

All of the Company's direct or indirect 100% owned U.S. domestic subsidiaries are guarantors of the Company's Senior Secured Notes. The following condensed consolidating financial statements present separately the financial position, results of operations, and cash flows for (a) the Company, as parent, (b) the guarantor subsidiaries of the Company consisting of all of the, directly or indirectly, 100% owned U.S. domestic subsidiaries of the Company, (c) the non-guarantor subsidiaries of the Company consisting of all non-domestic subsidiaries of the Company, and (d) eliminations necessary to arrive at the Company's information on a consolidated basis. These statements are presented in accordance with the disclosure requirements under the Securities and Exchange Commission's Regulation S-X, Rule 3-10. Separate financial statements of the Guarantor Subsidiaries are not presented because their guarantees are full and unconditional and joint and several.
