U-Haul Investors Club Investing made easier About us The U-Haul Investors Club was founded by AMERCO® and U-Haul International, Inc., the leader in the do-it-yourself moving and self-storage business. Traditionally, U-Haul assets were purchased with capital raised from lenders or through security issuance. Throughout the years, there has been a reliance on banks and intermediaries for funding. As a do-it-yourself company, we have developed an alternative measure to provide investors with the ability to invest directly with U-Haul affiliates through the U-Haul Investors Club. Our goal is to provide our investors with a fair return. The idea of the U-Haul Investors Club was inspired by social lending, where individuals gather funds and lend to others with minimum involvement from intermediaries. Based on this concept, we have brought social lending to the corporate level. Our system gives individuals a simple and inexpensive way to invest directly in asset-backed securities. As a result, U-Notes are a hybrid of a traditional corporate note and social lending with a strong asset-backed feature. All investments by U-Haul Investors Club members are done in a self-direct manner, as we do not provide investment advice to our members.

U-Haul has been in operation since 1945. You may have seen one of our self-storage centers in your neighborhood, or you may have driven one of our rental trucks. In the U-Haul Investors Club you have the choice to invest in a specific group of assets, not relying on an investment broker, but investing directly through this website. Together, we can all benefit through this value-based investing platform. Why are we doing this?

Who is the type of person that we would like to see join the U-Haul Investors Club? Well, hopefully it's someone who has seen or used or knows about U-Haul. Possibly a U-Haul employee; a U-Haul dealer; a vendor to U-Haul; a U-Haul customer. People that know who U-Haul is. This is a social lending atmosphere. We're wanting to borrow money from people who we do business with. So by having this U-Haul Investors Club we're able to offer participation in these debt securities in increments as low as \$100. This allows nearly every individual investor who would like to participate to participate in the U-Haul Investors Club, earn a fair return and have a relatively secure asset-backed investment.

Collateral

One of the key features of the U-Haul Investors Club is that all of these investments are backed by an asset. That's called collateral. Collateral would be like your home. If you have a mortgage, the bank or the lender has collateral. It's your house. You get a loan on your car, the lender on that has your car, your vehicle as collateral. That's a very important differentiation in investing. If you happen to be looking at other investments, ask yourself or your investment advisor, "What is the collateral on this? What happens if something goes bad? Do I have any recourse?" U-Haul Investor Club notes that are issued are all collateralized by some asset. A typical asset would be a U-Haul truck, a U-Haul trailer, a U-Haul facility. It could be a U-Haul rental center, a U-Haul storage center. It might be a U-Haul shop or a manufacturing plant. But in all cases they are collateralized by an asset that's free and clear and the investors in this have a first position on that asset.

Assets

The assets that are collateralizing these notes through the U-Haul Investors Club are assets that hopefully you are comfortable with, that you've seen before and that you know where they're at essentially. You can go right down to any U-Haul center or dealer and look at most of these assets so you have an idea of what it is that's securing your investment.

Lending money

What is investing? Investing can be broken down into two major categories. There is lending of money and then there is purchasing interest in a business. That would be debt or equity. That would be kind of the technical terms for it. The U-Haul Investors Club is where you would be lending money. The money would be lent at a rate and a term that is specified in the offering. And the issuer, AMERCO, is agreeing to pay you back your interest and your capital over a certain time period. The U-Haul Investors Club allows you to pick the type of investment that you're most comfortable with. You can pick an investment that is a shorter term or you can pick an investment that's a longer term. You can pick an investment that may be, for instance, rental equipment trucks or trailers or maybe you're more comfortable with the real estate backed type of investment. In any case there's many different choices. And at any given time there should be multiple choices available to you. Some investors may want to put some of their money in one type of investment and some in another investment. Or if you're looking more long term or short term, the length of the investment may matter to you.

What is a fair return? A fair return is an amount that a corporation can pay for borrowing money from someone. It's a rate at which the customers of the corporation are also willing to pay. So with U-Haul Investor Club, we're not necessarily paying the highest return that you might find somewhere else, but we're paying a return that we can afford and that hopefully will be satisfactory for you as an investor.
