Commission File No. 1-14771
MicroFinancial Incorporated
(Exact name of Registrant as Specified in its Charter)

Massachusetts
*(State or other jurisdiction of
incorporation or organization)*

04-2962824
*(I.R.S. Employer
Identification No.)*

16 New England Executive Park, Suite 200, Burlington,
MA
(Address of Principal Executive Offices)

01803
(Zip Code)

Registrant s telephone number, including area code:
(781) 994-4800

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Common Shares, \$0.01 par value per share	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act. Yes No

Edgar Filing: MICROFINANCIAL INC - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark if the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the registrant's voting and non-voting common equity held by non-affiliates of the registrant as of June 30, 2010 the last day of the registrant's most recently completed second fiscal quarter, was approximately \$30,718,027 computed by reference to the closing price of such stock as of such date.

As of March 16, 2011, 14,239,842 shares of the registrant's common stock were outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's proxy statement to be filed pursuant to Regulation 14A within 120 days after the Registrant's fiscal year end of December 31, 2010, are incorporated by reference in Part III hereof.

PART I

Item 1. *Business*

General

MicroFinancial Incorporated (referred to as MicroFinancial, we, us or our) was formed as a Massachusetts corporation on January 27, 1987. We operate primarily through our wholly-owned subsidiaries, TimePayment Corp. (TimePayment) and Leasecomm Corporation (Leasecomm). TimePayment is a specialized commercial finance company that leases and rents microticket equipment and provides other financing services. Leasecomm started originating leases in January 1986 and in October 2002 suspended virtually all originations due to an interruption in financing. TimePayment commenced originating leases in July 2004. The average amount financed by TimePayment in 2010 was approximately \$5,800 while Leasecomm historically financed contracts averaging approximately \$1,900. We have used proprietary software in developing a sophisticated, multi-level pricing model and in automating our credit approval and collection systems, including a fully-automated Internet-based application, credit scoring and approval process.

We provide financing alternatives to a wide range of lessees ranging from start-up businesses to established enterprises. We primarily lease and rent low-priced commercial equipment, which is used by these lessees in their daily operations. We do not market our services directly to lessees. We primarily source our originations through a nationwide network of independent equipment vendors, sales organizations, brokers and other dealer-based origination networks. We fund our operations through cash provided by operating activities and borrowings under our revolving line of credit.

TimePayment finances a wide variety of products with water filtration systems representing approximately 23% of the amount financed in its portfolio as of December 31, 2010. No other single product represents more than 20% of the amount financed in its portfolio as of December 31, 2010.

We depend heavily on external financing to fund new leases and contracts. On August 2, 2007, we entered into a three-year revolving line of credit with a bank syndicate led by Sovereign Bank (Sovereign) based on qualified TimePayment lease receivables. The total commitment under the facility was originally \$30 million, and was subsequently increased to \$60 million in July 2008, to \$85 million in February 2009, and most recently to \$100 million in connection with a July 28, 2010 amendment. Outstanding borrowings are collateralized by eligible lease contracts and a security interest in all of our other assets. Prior to the July 2010 amendment, outstanding borrowings bore interest at Prime plus 1.75% or at a London Interbank Offered Rate (LIBOR) plus 3.75%, in each case subject to a minimum rate of 5.00%. Following the July 2010 amendment, outstanding borrowings bear interest at Prime plus 1.25% or LIBOR plus 3.25%, without being subject to any minimum rate. Under the terms of the facility, loans are Prime Rate Loans, unless we elect LIBOR Loans. If a LIBOR Loan is not renewed at maturity it automatically converts to a Prime Rate Loan.

As a part of the July 2010 amendment, the maturity date of the facility was extended to August 2, 2013. At our option upon maturity, the unpaid principal balance may be converted to a six-month term loan.

Leasing, Servicing and Financing Programs

We originate leases for products that typically have limited distribution channels and high selling costs. We facilitate sales of such products by allowing dealers to make them available to their customers for a small monthly lease

payment rather than a higher initial purchase price. We primarily lease and rent low-priced commercial equipment to small merchants. We currently lease a wide variety of equipment including, but not limited to, water filtration systems, food service equipment, security equipment, POS cash registers, salon equipment, health care and fitness equipment and automotive equipment. In addition, in the past we have acquired service contracts and contracts in certain other financing markets, and continue to look for opportunities to invest in these types of assets. Our current portfolio also includes consumer financings which consist of service contracts from dealers that primarily provide residential security monitoring services, as well as consumer leases for a wide range of consumer products.

Table of Contents

Since resuming originations in June 2004 we have originated and continue to service contracts in all 50 states and the District of Columbia. The concentration of leases in certain states as of the end of each of the past three years, as a percentage of our total portfolio, is reflected below. No other state accounted for more than five percent of such total.

Year Ended

December 31,	Florida	California	Texas	New York
2008	13%	12%	8%	7%
2009	13%	12%	8%	7%
2010	13%	11%	8%	8%

Terms of Equipment Leases

Substantially all equipment leases originated or acquired by us are non-cancelable. We generally originate leases on transactions referred to us by a dealer where we buy the underlying equipment from the referring dealer upon funding the approved application. Leases are structured with limited recourse to the dealer, with risk of loss in the event of default by the lessee residing with us in most cases. We perform all the processing, billing and collection functions under our leases.

During the term of a typical lease, we receive payments sufficient, in the aggregate, to cover our borrowing cost and the cost of the underlying equipment, and to provide us with an appropriate profit. Throughout the term of the lease, we charge late fees, prepayment penalties, loss and damage waiver fees and other service fees, when applicable. Initial terms of the leases we funded in 2010 generally range from 12 to 60 months, with an average initial term of 45 months.

The terms and conditions of all of our leases are substantially similar. In most cases, the contracts require lessees to: (i) maintain, service and operate the equipment in accordance with the manufacturer's and government-mandated procedures; (ii) insure the equipment against property and casualty loss; (iii) pay all taxes associated with the equipment; and (iv) make all scheduled contract payments regardless of the performance of the equipment. Our standard lease forms provide that in the event of a default by the lessee, we can require payment of liquidated damages and can seize and remove the equipment for sale, refinancing or other disposal at our discretion. Any additions, modifications or upgrades to the equipment, regardless of the source of payment, are automatically incorporated into, and deemed a part of, the equipment financed.

We seek to protect ourselves from credit exposure relating to dealers by entering into limited recourse agreements with our dealers, under which the dealer agrees to reimburse us for defaulted contracts under certain circumstances, primarily upon evidence of dealer errors or misrepresentations in originating a lease or contract.

Residual Interests in Underlying Equipment

We typically own a residual interest in the equipment covered by our leases. The value of such interest is estimated at inception of the lease based upon our estimate of the fair market value of the asset at lease maturity. At the end of the lease term, the lessee has the option to buy the equipment at the fair market value, return the equipment or continue to rent the equipment on a month-to-month basis. If the equipment is returned, we may either sell the equipment, or place it into our used equipment rental or leasing program.

Dealers

We provide financing to obligors under microticket leases and contracts through a nationwide network of equipment vendors, independent sales organizations and brokers (to whom we refer collectively in this report as "dealers"). We do not sign exclusive agreements with our dealers. Dealers interact directly with potential lessees and typically market not only their products and services, but also the financing arrangements offered through us. During the year ended 2010 we had over 1,000 different dealers originating leases and contracts.

During the year ended December 31, 2008 our top dealer accounted for 4.5% of the leases originated. During the year ended December 31, 2009 our top dealer accounted for 3.6% of the leases originated. During the year ended December 31, 2010 our top dealer accounted for 3.2% of the leases originated.

Table of Contents

Use of Technology

Our business is operationally intensive, due in part to the small average amount financed. Accordingly, technology and automated processes are critical in keeping servicing costs to a minimum while providing quality customer service.

We have developed TimePaymentDirect, an Internet-based application processing, credit approval and dealer information tool. Using TimePaymentDirect, a dealer can input an application and obtain an almost instantaneous credit decision automatically over the Internet, all without any contact with our employees. We also offer Instalease®, a program that allows a dealer to submit applications to us by telephone, telecopy or e-mail, receive approval, and complete a sale from a lessee's location. By assisting the dealers in providing timely, convenient and competitive financing for their equipment contracts and offering dealers a variety of value-added services, we simultaneously promote equipment contract sales and the utilization of TimePayment as the preferred finance provider, thus differentiating us from our competitors.

We have used our proprietary software to develop a multidimensional credit-scoring model which generates pricing of our leases and contracts commensurate with the risk assumed. This software does not produce a binary yes or no decision, but rather, for a yes decision, determines the price at which the lease or contract might be profitably underwritten. We use this credit scoring model in most, but not all, of our credit decisions.

Underwriting

The nature of our business requires that the underwriting process perform two levels of review: the first focused on the ultimate end-user of the equipment or service and the second focused on the dealer. The approval process begins with the submission by telephone, facsimile or electronic transmission of a credit application by the dealer. Upon submission, we either manually or through TimePaymentDirect conduct our own independent credit investigation of the lessee using our proprietary database. In order to facilitate this process we will use recognized commercial credit reporting agencies such as Dun & Bradstreet, Paynet and Experian. Our software evaluates this information on a two-dimensional scale, examining both credit depth (how much information exists on an applicant) and credit quality (credit performance, including past payment history). We use this information to underwrite a broad range of credit risks and provide financing in situations where our competitors may be unwilling to provide such financing. The credit-scoring model is complex and automatically adjusts for different transactions. In situations where the amount financed is over \$10,000 we may go beyond our own database and recognized commercial credit reporting agencies to obtain information from less readily available sources such as banks. In certain instances, we will require the lessee to provide verification of employment and salary.

The second aspect of the credit decision involves an assessment of the originating dealer. Dealers undergo both an initial screening process and ongoing evaluation, including an examination of dealer portfolio credit quality and performance, lessee complaints, cases of fraud or misrepresentation, aging studies, application activity and conversion rates for applications. This ongoing assessment enables us to manage our dealer relationships, and in some instances, may result in ending our relationships with poorly performing dealers.

Upon credit approval, we require receipt of a signed lease on our standard or other pre-approved lease form. After the equipment is shipped and installed, the dealer invoices us and we verify that the lessee has received and accepted the equipment. Upon the completion of a satisfactory verification with the lessee, the lease is forwarded to our funding and documentation department for payment to the dealer and the establishment of the accounting and billing procedures for the transaction.

Service Contracts

In the past we have also from time to time acquired service contracts, under which a homeowner purchases a security system and simultaneously signs a contract with the dealer for the monitoring of that system for a monthly fee. Upon approval of the monitoring application and verification with the homeowner that the system is installed, we would purchase the right to the payment stream under the monitoring contract from the dealer at a negotiated multiple of the monthly payments. We have not purchased any new security service contracts since 2004, although

Table of Contents

we do originate security equipment leases that include monitoring provided by a third party. Our service contract portfolio represents a less significant portion of our revenue stream over time.

Bulk and Portfolio Acquisitions

In addition to originating leases through our dealer relationships, from time to time we have also purchased lease portfolios from dealers or other sources. While certain of these leases may not have met our underwriting standards at inception, we will purchase the leases once the lessee demonstrates a satisfactory payment history. We prefer to acquire these smaller lease portfolios in situations where the seller will continue to act as a dealer following the acquisition. We did not purchase any material portfolios in 2010, 2009 or 2008.

Servicing and Collections

We perform all the servicing functions on our leases and contracts through our automated servicing and collection system. Servicing responsibilities generally include billing, processing payments, remitting payments to dealers, paying taxes and insurance and performing collection and liquidation functions.

Our automated lease administration system handles application tracking, invoicing, payment processing, automated collection queuing, portfolio evaluation and report writing. The system is linked with our bank accounts for payment processing and also provides for direct withdrawal of lease and contract payments from a lessee's bank account. We monitor delinquent accounts using our automated collection process. We use several computerized processes in our customer service and collection efforts, including the generation of daily priority call lists and scrolling for daily delinquent account servicing, generation and mailing of delinquency letters, and routing of incoming customer service calls to appropriate employees with instant computerized access to account details. Our collection efforts include sending collection letters, making collection calls, reporting delinquent accounts to credit reporting agencies, and litigating delinquent accounts when necessary to obtain and enforce judgments.

Competition

The microticket leasing and financing industry is highly competitive. We compete for customers with a number of national, regional and local banks and finance companies. Our competitors also include equipment manufacturers that lease or finance the sale of their own products. While the market for microticket financing has traditionally been fragmented, we could also be faced with competition from small or large-ticket leasing companies that could use their expertise in those markets to enter and compete in the microticket financing market. Our competitors include larger, more established companies, some of which may possess substantially greater financial, marketing and operational resources than us, including a lower cost of funds and access to capital markets and other funding sources which may be unavailable to us.

Employees

As of December 31, 2010, we had 118 full-time employees, of whom 40 were engaged in sales and underwriting activities and dealer service, 49 were engaged in servicing and collection activities, and 29 were engaged in general administrative activities. We believe that our relationship with our employees is good. None of our employees are members of a collective bargaining unit in connection with their employment with us.

Backgrounds of Executive Officers

Richard F. Latour has served as our President, Chief Executive Officer, Treasurer, Clerk and Secretary since October 2002 and as President, Chief Operating Officer, Treasurer, Clerk and Secretary, as well as a director of the Corporation, since February 2002. From 1995 to January 2002, he served as Executive Vice President, Chief Operating Officer, Chief Financial Officer, Treasurer, Clerk and Secretary. From 1986 to 1995 Mr. Latour served as Vice President of Finance and Chief Financial Officer. Prior to joining us, Mr. Latour was Vice President of Finance with Trak Incorporated, an international manufacturer and distributor of consumer goods, where he was responsible for all financial and operational functions. Mr. Latour earned a B.S. in accounting from Bentley College in Waltham, Massachusetts.

James R. Jackson Jr. has served as our Vice President and Chief Financial Officer since April 2002. Prior to joining us, from 1999 to 2001, Mr. Jackson was Vice President of Finance for Deutsche Financial Services Technology Leasing Group. From 1992 to 1999, Mr. Jackson held positions as Manager of Pricing and Structured Finance and Manager of Business Planning with AT&T Capital Corporation.

Steven J. LaCreta has served as our Vice President, Lessee Relations and Legal since May 2005. From May 2000 to May 2005, Mr. LaCreta served as Vice President, Lessee Relations. From November 1996 to May 2000, Mr. LaCreta served as our Director of Lessee Relations. Prior to joining us, Mr. LaCreta was a Leasing Collection Manager with Bayer Corporation.

Stephen J. Constantino has served as our Vice President, Human Resources since May 2000. From 1994 to May 2000, Mr. Constantino served as our Director of Human Resources. From 1992 to 1994, Mr. Constantino served as our Controller. From 1991 to 1992, Mr. Constantino served as our Accounting Manager.

Availability of Information

We maintain an Internet website at <http://www.microfinancial.com>. Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to such reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934, as well as Section 16 reports on Form 3, 4, or 5, are available free of charge on this site as soon as is reasonably practicable after they are filed or furnished with the Securities and Exchange Commission (SEC). Our Guidelines on Corporate Governance, our Code of Business Conduct and Ethics and the charters for the Audit Committee, Nominating and Corporate Governance Committee, Compensation and Benefits Committee, Credit Policy Committee and Strategic Planning Committee of our Board of Directors are also available on our Internet site. The Guidelines, Code of Ethics and charters are also available in print to any shareholder upon request. Requests for such documents should be directed to Richard F. Latour, Chief Executive Officer, at 16 New England Executive Park Suite 200, Burlington, MA, 01803. Our Internet site and the information contained therein or connected thereto are not incorporated by reference into this Form 10-K. Our filings with the SEC are also available on the SEC's website at <http://www.sec.gov>.

Item 1A. Risk Factors

Set forth below and elsewhere in this report and in other documents we file with the Securities and Exchange Commission are risks and uncertainties that could cause our actual results to differ materially from the results contemplated by the forward-looking statements contained in this report and other periodic statements we make.

We depend on external financing to fund leases and contracts, and adequate financing may not be available to us in amounts that are sufficient, together with our cash flow, to originate new leases.

Our lease and finance business is capital intensive and requires access to substantial short-term and long-term credit to fund leases and contracts. We will continue to require significant additional capital to maintain and expand our funding of leases and contracts, as well as to fund any future acquisitions of leasing companies or portfolios. Our uses of cash include the origination and acquisition of leases and contracts, payment of interest and principal on borrowings, payment of selling, general and administrative expenses, income taxes, capital expenditures and dividends.

Table of Contents

Since August 2007, we have had a revolving line of credit with a bank syndicate led by Sovereign Bank (Sovereign) based on qualified TimePayment lease receivables. Following an amendment to the facility in July 2010 the total commitment under the facility is \$100 million and the maturity date is August 2, 2013. Outstanding borrowings are collateralized by eligible lease contracts and a security interest in all of our other assets.

Our ability to draw down amounts under our credit facility is potentially restricted by a borrowing base calculated with respect to our eligible receivables, and our revolving line of credit has financial covenants that we must comply with to obtain funding and avoid an event of default. Our credit facility contains certain provisions which limit our ability to incur indebtedness from other sources. Any credit facility we enter into upon renewal or replacement of our existing credit facility may have similar or additional financial covenants or restrictions. Any default or other interruption of our external funding could have a material negative effect on our ability to fund new leases and contracts, and could, as a consequence, have an adverse effect on our financial results.

A protracted economic downturn may cause an increase in defaults under our leases and lower demand for the commercial equipment we lease.

A protracted economic downturn such as the one the United States and other nations are currently experiencing could result in a decline in the demand for some of the types of equipment or services we finance, which could lead to a decline in originations. A protracted economic downturn may slow the development and continued operation of small commercial businesses, which are the primary market for the commercial equipment leased by us. Such a downturn could also adversely affect our ability to obtain capital to fund lease and contract originations or acquisitions, or to complete securitizations. In addition, a protracted downturn could result in an increase in delinquencies and defaults by our lessees and other obligors, which could have an adverse effect on our cash flow and earnings, as well as on our ability to securitize leases. These factors could have a material adverse effect on our business, financial condition and results of operations.

Additionally, as of December 31, 2010, 2009 and 2008 leases in the states of Florida, California, Texas and New York accounted for approximately 40% of our portfolio. Economic conditions in these states may affect the level of collections from, as well as delinquencies and defaults by, these obligors and may thus have a disproportionate effect on our operations compared to economic conditions in other states or regions.

We experience a significant rate of default under our leases, and a higher than expected default rate would have an adverse effect on our cash flow and earnings.

Even in times of general economic growth, the credit characteristics of our lessee base correspond to a high incidence of delinquencies, which in turn may lead to significant levels of defaults. The credit profile of our lessees heightens the importance of both pricing our leases and contracts for the risk assumed, as well as maintaining an adequate allowance for losses. Our lessees, moreover, have been affected by the current economic downturn like almost all small businesses. Significant defaults by lessees in excess of those we anticipate in setting our prices and allowance levels may adversely affect our cash flow and earnings. Reduced cash flow and earnings could limit our ability to repay debt and obtain financing, which could have a material adverse effect on our business, financial condition and results of operations.

In addition to our usual practice of originating leases through our dealer relationships, from time to time we have purchased lease portfolios from dealers. While certain of these leases at inception would not have met our underwriting standards, we will purchase leases once the lessee demonstrates a payment history. We prefer to acquire these smaller lease portfolios in situations where the company selling the portfolio will continue to act as a dealer following the acquisition. Despite the demonstrated payment history, such leases may experience a higher rate of default than leases that meet our origination standards.

Our allowance for credit losses may prove to be inadequate to cover future credit losses.

We maintain an allowance for credit losses on our investments in leases, service contracts and rental contracts at an amount we believe is sufficient to provide adequate protection against losses in our portfolio. We cannot be sure that our allowance for credit losses will be adequate over time to cover losses caused by adverse economic factors, or unfavorable events affecting specific leases, industries or geographic areas. Losses in excess of our

Table of Contents

allowance for credit losses may have a material adverse effect on our business, financial condition and results of operations.

We are vulnerable to changes in the demand for the types of equipment we lease or price reductions in such equipment.

Our portfolio is comprised of a wide variety of equipment including advertising and display equipment, ATM machines, automotive repair equipment, copiers, security equipment, phone systems, water filtration systems, restaurant equipment and card based payment authorization systems. In particular as of December 31, 2010, water filtration systems represented approximately 23% of the amount financed by Timepayment. Reduced demand for financing of the types of equipment we lease could adversely affect our lease origination volume, which in turn could have a material adverse effect on our business, financial condition and results of operations. Technological advances may lead to a decrease in the price of these types of systems or equipment and a consequent decline in the need for financing of such equipment. These changes could reduce the need for outside financing sources that would reduce our lease financing opportunities and origination volume in such products. These types of equipment are often leased by small commercial businesses which may be particularly susceptible to the current economic downturn, which may also affect demand for these products.

In the event that demand for financing the types of equipment that we lease declines, we will need to expand our efforts to provide lease financing for other products. There can be no assurance, however, that we will be able to do so successfully. Because many dealers specialize in particular products, we may not be able to capitalize on our current dealer relationships in the event we shift our business focus to originating leases of other products. Our failure to successfully enter into new relationships with dealers of other products or to extend existing relationships with such dealers in the event of reduced demand for financing of the systems and equipment we currently lease would have a material adverse effect on us.

We may face adverse consequences of litigation, including consequences of using litigation as part of our collection policy.

Our use of litigation as a means of collection of unpaid receivables exposes us to counterclaims on our suits for collection, to class action lawsuits and to negative publicity surrounding our leasing and collection policies. We have been a defendant in attempted class action suits as well as counterclaims filed by individual obligors in attempts to dispute the enforceability of the lease or contract. This type of litigation may be time consuming and expensive to defend, even if not meritorious, may result in the diversion of management's time and attention, and may subject us to significant liability for damages or result in invalidation of our proprietary rights. We believe our collection policies and use of litigation comply fully with all applicable laws. Because of our persistent enforcement of our leases and contracts through the use of litigation, we may have created ill will toward us on the part of certain lessees and other obligors who were defendants in such lawsuits. Our litigation strategy has also generated adverse publicity in certain circumstances. Adverse publicity could negatively impact public perception of our business and may materially impact the price of our common stock. In addition to legal proceedings that may arise out of our collection activities, we may face other litigation arising in the ordinary course of business. Any of these factors could adversely affect our business, financial condition and results of operations.

Increased interest rates may make our leases or contracts less profitable.

Since we generally fund our leases and contracts through our credit facilities or from working capital, our operating margins could be adversely affected by an increase in interest rates. For example, borrowings under our amended credit facility currently bear interest either at Prime plus 1.25% or at LIBOR plus 3.25%. The implicit yield on all of our leases and contracts is fixed due to the leases and contracts having scheduled payments that are fixed at the time of

origination. When we originate or acquire leases or contracts, we base our pricing in part on the spread we expect to achieve between the implicit yield on each lease or contract and the effective interest cost we expect to pay when we finance such leases and contracts. Increases in interest rates during the term of each lease or contract could narrow or eliminate the spread, or result in a negative spread, to the extent such lease or contract was financed with variable-rate funding. We may undertake to hedge against the risk of interest rate increases, based on the size and interest rate profile of our portfolio. Such hedging activities, however, would limit our ability to

Table of Contents

participate in the benefits of lower interest rates with respect to the hedged portfolio. In addition, our hedging activities may not protect us from interest rate-related risks in all interest rate environments. Adverse developments resulting from changes in interest rates or hedging transactions could have a material adverse effect on our business, financial condition and results of operations. We do not currently have any hedging arrangements with respect to interest rate changes.

We may not be able to realize our entire investment in the residual interests in the equipment covered by our leases.

At the inception of a lease we record a residual value for the lease equipment as an asset based upon an estimate of the fair market value of the equipment at lease maturity. There can be no assurance that our estimated residual values will be realized due to technological or economic obsolescence, unusual wear or tear on the equipment, or other factors. Failures to realize the recorded residual values may have a material adverse effect on our business, financial condition and results of operations.

We face intense competition, which could cause us to lower our lease rates, hurt our origination volume and strategic position and adversely affect our financial results.

The microticket leasing and financing industry is highly competitive. We compete for customers with a number of national, regional and local banks and finance companies. Our competitors also include equipment manufacturers that lease or finance the sale of their own products. While the market for microticket financing has traditionally been fragmented, we could also be faced with competition from small or large-ticket leasing companies that could use their expertise in those markets to enter and compete in the microticket financing market. Our competitors include larger, more established companies, some of which may possess substantially greater financial, marketing and operational resources than us, including lower cost of funds and access to capital markets and other funding sources which may be unavailable to us. If a competitor were to lower its lease rates, we could be forced to follow suit or be unable to regain origination volume, either of which would have a material adverse effect on our business, financial condition and results of operations. In addition, competitors may seek to replicate the automated processes used by us to monitor dealer performance, evaluate lessee credit information, appropriately apply risk-adjusted pricing, and efficiently service a nationwide portfolio. The development of computer software similar to that developed by us may jeopardize our strategic position and allow our competitors to operate more efficiently than we do.

Recently proposed accounting changes may negatively impact the demand for equipment leases.

On August 17, 2010, the International Accounting Standards Board (IASB) and Financial Accounting Standards Board (FASB) released a joint exposure draft that would dramatically change lease accounting for both lessees and lessors by requiring balance sheet recognition of all leases. Lessors would account for leases under two very different accounting models: the performance obligation approach, which would apply if the lessor retains significant risks and benefits associated with the underlying property; or the derecognition approach, which would apply to all other leases. These proposed changes could impact the demand for equipment leases by lessees who view it as a less attractive form of financing. If these accounting changes are adopted in a form that makes equipment leasing less attractive to small business owners the reduced demand for equipment leases could have an adverse effect on our results of operations and financial condition.

Government regulation could restrict our business.

Our leasing business is not currently subject to extensive federal or state regulation. While we are not aware of any proposed legislation, the enactment of, or a change in the interpretation of, certain federal or state laws affecting our ability to price, originate or collect on receivables (such as the application of usury laws to our leases and contracts) could negatively affect the collection of income on our leases and contracts, as well as the collection of fee income.

Any such legislation or change in interpretation, particularly in Massachusetts, whose laws govern the majority of our leases and contracts, could have a material adverse effect on our ability to originate leases and contracts at current levels of profitability, which in turn could have a material adverse effect on our business,

Table of Contents

financial condition or results of operations. Changes to the bankruptcy laws that would make it easier for lessees to file for bankruptcy could increase delinquency and defaults on the existing portfolio.

We may face risks in acquiring other portfolios and companies, including risks relating to how we finance any such acquisition or how we are able to assimilate any portfolios or operations we acquire.

In addition to organic growth a portion of our growth strategy may involve acquisitions of leasing companies or portfolios from time to time. Our inability to identify suitable acquisition candidates or portfolios, or to complete acquisitions on favorable terms, could limit our ability to grow our business. Any major acquisition would require a significant portion of our resources. The timing, size and success, if at all, of our acquisition efforts and any associated capital commitments cannot be readily predicted. We may finance future acquisitions by using shares of our common stock, cash or a combination of the two. Any acquisition we make using common stock would result in dilution to existing stockholders. If the common stock does not maintain a sufficient market value, or if potential acquisition candidates are otherwise unwilling to accept common stock as part or all of the consideration for the sale of their businesses, we may be required to utilize more of our cash resources, if available, or to incur additional indebtedness in order to initiate and complete acquisitions. Additional debt, or intangible assets incurred as a result of any such acquisition, could have a material adverse effect on our business, financial condition or results of operations. In addition, our credit facilities contain covenants that place significant restrictions on our ability to acquire all or substantially all of the assets or securities of another company, including a limit on the aggregate dollar amount of such acquisitions of \$10 million over the term of the facility. These provisions could prevent us from making an acquisition we may otherwise see as attractive, whether by using shares of our common stock as consideration or by using cash.

We also may experience difficulties in the assimilation of the operations, services, products and personnel of acquired companies, an inability to sustain or improve the historical revenue levels of acquired companies, the diversion of management's attention from ongoing business operations, and the potential loss of key employees of such acquired companies. Any of the foregoing could have a material adverse effect on our business, financial condition or results of operations.

If we were to lose key personnel, our operating results may suffer or it may cause a default under our debt facilities.

Our success depends to a large extent upon the abilities and continued efforts of Richard Latour, President and Chief Executive Officer and James R. Jackson, Jr., Vice President and Chief Financial Officer, and our other senior management. We have entered into employment agreements with Mr. Latour and Mr. Jackson, as well as other members of our senior management. The loss of the services of one or more of the key members of our senior management before we are able to attract and retain qualified replacement personnel could have a material adverse effect on our financial condition and results of operations. In addition, under our Sovereign credit facility, an event of default would arise if Mr. Latour or Mr. Jackson were to leave their positions as our Chief Executive Officer or Chief Financial Officer, respectively, unless a suitable replacement were appointed within 90 days. Our failure to comply with these provisions could have a material adverse effect on our business, financial condition or results of operations.

Certain provisions of our articles and bylaws may have the effect of discouraging a change in control or acquisition of the company.

Our restated articles of organization and restated bylaws contain certain provisions that may have the effect of discouraging, delaying or preventing a change in control or unsolicited acquisition proposals that a stockholder might consider favorable, including: (i) provisions authorizing the issuance of blank check preferred stock; (ii) providing for a Board of Directors with staggered terms; (iii) requiring super-majority or class voting to effect certain amendments to the articles and bylaws and to approve certain business combinations; (iv) limiting the persons who may call special

stockholders meetings and; (v) establishing advance notice requirements for nominations for election to the Board of Directors or for proposing matters that can be acted upon at stockholders meetings. In addition, certain provisions of Massachusetts law to which we are subject may have the effect of discouraging, delaying or preventing a change in control or an unsolicited acquisition proposal.

Table of Contents

Our stock price may be volatile, which could limit our access to the equity markets and could cause you to incur losses on your investment.

If our revenues do not grow or grow more slowly than we anticipate, or if operating expenditures exceed our expectations or cannot be adjusted accordingly, the market price of our common stock could be materially and adversely affected. In addition, the market price of our common stock has been in the past and could in the future be materially and adversely affected for reasons unrelated to our specific business or results of operations. General market price declines or volatility in the future could adversely affect the price of our common stock. In addition, short-term trading strategies of certain investors can also have a significant effect on the price of specific securities. In addition, the trading price of the common stock may be influenced by a number of factors, including the liquidity of the market for the common stock, investor perceptions of us and the equipment financing industry in general, variations in our quarterly operating results, interest rate fluctuations and general economic and other conditions. Moreover, the stock market has experienced significant price and value fluctuations, which have not necessarily been related to corporate operating performance. The volatility of the stock market could adversely affect the market price of our common stock and our ability to raise funds in the public markets.

There is no assurance that we will continue to pay dividends on our common stock in the future.

During 2010 and 2008, we declared dividends of \$0.20 per share. During 2009, we declared dividends of \$0.15 per share. Future dividend payments are subject to ongoing review and evaluation by our Board of Directors. The decision as to the amount and timing of future dividends we may pay, if any, will be made in light of our financial condition, capital requirements and growth plans, as well as our external financing arrangements and any other factors our Board of Directors may deem relevant. We can give no assurance as to the amount and timing of the payment of future dividends.

Item 2. *Properties*

At December 31, 2010, our corporate headquarters and operations center occupied approximately 24,400 square feet of office space at 10M Commerce Way, Woburn, Massachusetts 01801. The lease for this space expired on January 31, 2011.

On September 20, 2010 we entered into an office lease agreement for approximately 23,834 square feet of office space located at 16 New England Executive Park in Burlington, Massachusetts 01803. We moved our corporate headquarters to the premises in January 2011. The lease for this space expires on July 31, 2017.

Item 3. *Legal Proceedings*

We are involved from time to time in litigation incidental to the conduct of our business. Although we do not expect that the outcome of any of these matters, individually or collectively, will have a material adverse effect on our financial condition or results of operations, litigation is inherently unpredictable. Therefore, judgments could be rendered or settlements entered, that could adversely affect our operating results or cash flows in a particular period. We routinely assess all of our litigation and threatened litigation as to the probability of ultimately incurring a liability, and record our best estimate of the ultimate loss in situations where we assess the likelihood of loss as probable.

Item 4. *(Removed and Reserved)*

Table of Contents**PART II****Item 5. *Market For Registrant's Common Equity, Related Stockholder Matters And Issuer Purchases Of Equity Securities*****Market Information**

Our common stock, par value \$0.01 per share is currently listed on the Nasdaq Global Market under the symbol MFI. The following chart shows the high and low sales price of our common stock in each quarter over the past two fiscal years.

	2010				2009			
	First Quarter	Second Quarter	Third Quarter	Fourth Quarter	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
Stock Price								
High	\$ 4.14	\$ 4.20	\$ 4.01	\$ 4.74	\$ 2.80	\$ 3.98	\$ 3.75	\$ 3.47
Low	\$ 2.95	\$ 3.32	\$ 3.31	\$ 3.75	\$ 1.55	\$ 1.72	\$ 2.85	\$ 2.49

Holders

We believe there were approximately 725 stockholders of MicroFinancial, Inc. as of March 15, 2011, including beneficial owners who hold through a broker or other nominee.

Dividends

During 2008, we declared dividends of \$0.05 per share payable to shareholders of record on each of May 15, 2008, August 15, 2008, November 14, 2008 and January 19, 2009. The dividend payable on January 19, 2009 was declared on December 24, 2008.

During 2009 we declared dividends of \$0.05 per share payable to shareholders of record on each of April 30, 2009, July 30, 2009 and October 30, 2009.

During 2010 we declared dividends of \$0.05 per share payable to shareholders of record on each of February 1, 2010, May 3, 2010, July 29, 2010 and November 1, 2010.

On January 21, 2011 we declared a dividend of \$0.05 per share payable on February 15, 2011 to shareholders of record of MicroFinancial Incorporated stock as of February 1, 2011.

Future dividend payments are subject to ongoing review and evaluation by our Board of Directors. The decision as to the amount and timing of future dividends, if any, will be made in light of our financial condition, capital requirements and growth plans, as well as our external financing arrangements and any other factors our Board of Directors may deem relevant. We can give no assurance as to the amount and timing of future dividends.

Our credit facility also restricts the amount of cash that TimePayment can dividend up to MicroFinancial during any year, to 50% of consolidated net income for the immediately preceding year.

Repurchases

On August 10, 2010, our Board of Directors approved a common stock repurchase program under which we are authorized to purchase up to 250,000 of our outstanding shares from time to time. The repurchases may take place in either the open market or through block trades. The repurchase program will be funded by our working capital and may be suspended or discontinued at anytime.

Table of Contents

During the fourth quarter of fiscal year 2010 we repurchased and retired 34,412 shares of our common stock under our stock buyback program. The following table shows details of these repurchases:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Program (1)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (2)
October 1 to October 31, 2010				
November 1 to November 30, 2010	11,864	\$ 4.11	11,864	
December 1 to December 31, 2010	22,548	\$ 4.04	22,548	
Total	34,412	\$ 4.06	34,412	\$ 868,800

(1) All repurchases were made pursuant to the publicly announced repurchase program described above, which was publicly announced on August 11, 2010.

(2) Based on the maximum number of shares remaining to be repurchased under the program, and the closing price of our common stock of \$4.03 on December 31, 2010.

Provision for credit losses as a percentage of average gross investment(7)	11.36	12.49	11.76	10.67	17.56
Allowance for credit losses as a percentage of gross investment(8)	6.17	7.12	7.41	5.59	11.63

- (1) Includes loss and damage waiver fees, service fees, interest income, and miscellaneous revenue.
- (2) Consists of receivables due in installments and estimated residual value.
- (3) Represents the amount paid to dealers upon funding of leases plus the associated unearned income.
- (4) Represents the net amount paid to dealers upon funding of leases and contracts.

Table of Contents

- (5) Represents the aggregate of the implied interest rate on each lease originated during the period weighted by the amount funded.
- (6) Represents income before provision (benefit) for income taxes and provision for credit losses as a percentage of total revenues.
- (7) Represents a percentage of average gross investment in leases and net investment in service contracts.
- (8) Represents allowance for credit losses as a percentage of gross investment in leases and net investment in service contracts.

Item 7. *Management's Discussion And Analysis Of Financial Condition And Results Of Operations, Including Selected Quarterly Financial Data (Unaudited)*

The following discussion includes forward-looking statements (as such term is defined in the Private Securities Litigation Reform Act of 1995). When used in this discussion, the words may, will, expect, intend, anticipate, estimate, continue, plan and similar expressions are intended to identify forward-looking statements. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause our actual results, performance or achievements to differ materially from any future results, performance or achievements expressed or implied by such forward-looking statements. The forward-looking statements are subject to risks, uncertainties and assumptions, including, among other things, those associated with:

the demand for the equipment types we finance;

our significant capital requirements;

our ability or inability to obtain the financing we need, or to use internally generated funds, in order to continue originating contracts;

the risks of defaults on our leases;

our provision for credit losses;

our residual interests in underlying equipment;

possible adverse consequences associated with our collection policy;

the effect of higher interest rates on our portfolio;

increasing competition;

increased governmental regulation of the rates and methods we use in financing and collecting on our leases and contracts;

acquiring other portfolios or companies;

dependence on key personnel;

changes to accounting standards for equipment leases;

adverse results in litigation and regulatory matters, or promulgation of new or enhanced legislation or regulations; and

general economic and business conditions.

The risk factors above and those under **Risk Factors** beginning on page 7, as well as any other cautionary language included herein, provide examples of risks, uncertainties and events that may cause our actual results to differ materially from the expectations we described in our forward-looking statements. Many of these factors are significantly beyond our control. We expressly disclaim any obligation or undertaking to disseminate any updates or revisions to any forward-looking statement contained herein to reflect any change in our expectations with regard thereto or any change in events, conditions or circumstances on which any such statement is based. In light of these risks and uncertainties, there can be no assurance that the forward-looking information contained herein will in fact transpire.

Table of Contents

Overview

We are a specialized commercial finance company that provides microticket equipment leasing and other financing services. In June 2004 we established a new wholly-owned operating subsidiary, TimePayment Corp. The average amount financed by TimePayment during 2010 was approximately \$5,800 while Leasecomm historically financed contracts averaging approximately \$1,900. Our portfolio consists of water filtration systems, security equipment, automotive repair equipment, restaurant equipment and other business equipment leased to commercial enterprises.

We derive the majority of our revenues from leases originated and held by us, payments on service contracts, rental contracts and fee income. Historically, we have funded the majority of our leases and contracts through our revolving-credit loans, term loans, cash from operations and on-balance sheet securitizations, and to a lesser extent our subordinated debt programs.

On August 2, 2007, we entered into a three-year revolving line of credit with a bank syndicate led by Sovereign Bank (Sovereign) based on qualified TimePayment lease receivables. The total commitment under the facility was originally \$30 million, and was subsequently increased to \$60 million in July 2008, to \$85 million in February 2009, and most recently to \$100 million in connection with a July 28, 2010 amendment. Outstanding borrowings are collateralized by eligible lease contracts and a security interest in all of our other assets. Prior to the July 2010 amendment, outstanding borrowings bore interest at Prime plus 1.75% or at a London Interbank Offered Rate (LIBOR) plus 3.75%, in each case subject to a minimum rate of 5.00%. Following the July 2010 amendment, outstanding borrowings bear interest at Prime plus 1.25% or LIBOR plus 3.25%, without being subject to any minimum rate. Under the terms of the facility, loans are Prime Rate Loans, unless we elect LIBOR Loans. If a LIBOR Loan is not renewed at maturity it automatically converts to a Prime Rate Loan.

As a part of the July 2010 amendment, the maturity date of the facility was extended to August 2, 2013. At our option upon maturity, the unpaid principal balance may be converted to a six-month term loan.

In a typical lease transaction, we originate a lease through our nationwide network of equipment vendors, independent sales organizations and brokers. Upon our approval of a lease application and verification that the lessee has received the equipment and signed the lease, we pay the dealer for the cost of the equipment, plus the dealer's profit margin.

Substantially all leases originated or acquired by us are non-cancelable. During the term of the lease, we are scheduled to receive payments sufficient to cover our borrowing costs and the cost of the underlying equipment and to provide us with an appropriate profit. We pass along some of the costs of our leases and contracts by charging collection fees, loss and damage waiver fees, late fees and other service fees, when applicable. The initial non-cancelable term of the lease is equal to or less than the equipment's estimated economic life and often provides us with additional revenues based on the residual value of the equipment at the end of the lease. Initial terms of the leases in our portfolio generally range from 12 to 60 months, with an average initial term of 45 months as of December 31, 2010.

In the past, we have also from time to time acquired service contracts under which a homeowner purchases a security system and simultaneously signs a contract with the dealer for the monitoring of that system for a monthly fee. Upon approval of the monitoring application and verification with the homeowner that the system is installed, we would purchase the right to the payment stream under the monitoring contract from the dealer at a negotiated multiple of the monthly payments. We have not purchased any new security monitoring contracts since 2004, although we do originate security equipment leases that include monitoring. Our service contract portfolio has represented a less significant portion of our revenue stream over time.

Critical Accounting Policies

We consider certain of our accounting policies to be the most critical to our financial condition and results of operations in the sense that they involve the most complex or subjective decisions or assessments. We have identified our most critical accounting policies as those policies related to revenue recognition, the allowance for credit losses, income taxes and accounting for share-based compensation. These accounting policies are discussed below as well as within the notes to our consolidated financial statements.

Table of Contents

Revenue Recognition

Our lease contracts are accounted for as financing leases. At origination, we record the gross lease receivable, the estimated residual value of the leased equipment, initial direct costs incurred and the unearned lease income. Unearned lease income is the amount by which the gross lease receivable plus the estimated residual value exceeds the cost of the equipment. Unearned lease income and initial direct costs incurred are amortized over the related lease term using the interest method. Amortization of unearned lease income and initial direct costs is suspended if, in our opinion, full payment of the contractual amount due under the lease agreement is doubtful. In conjunction with the origination of leases, we may retain a residual interest in the underlying equipment upon termination of the lease. The value of such interest is estimated at inception of the lease and evaluated periodically for impairment. At the end of the lease term, the lessee has the option to buy the equipment at the fair market value, return the equipment or continue to rent the equipment on a month-to-month basis. If the lessee continues to rent the equipment, we record our investment in the rental contract at its estimated residual value. Rental revenue and depreciation are recognized based on the methodology described below. Other revenues such as loss and damage waiver fees and service fees relating to the leases and contracts are recognized as they are earned.

Our investments in cancelable service contracts are recorded at cost and amortized over the expected life of the contract. Income on service contracts from monthly billings is recognized as the related services are provided. Our investment in rental contracts is either recorded at estimated residual value and depreciated using the straight-line method over a period of 12 months or at the acquisition cost and depreciated using the straight line method over a period of 36 months. Rental income from monthly billings is recognized as the customer continues to rent the equipment. We periodically evaluate whether events or circumstances have occurred that may affect the estimated useful life or recoverability of our investments in service and rental contracts.

Allowance for Credit Losses

We maintain an allowance for credit losses on our investment in leases, service contracts and rental contracts at an amount that we believe is sufficient to provide adequate protection against losses in our portfolio. Given the nature of the microticket market and the individual size of each transaction, we do not have a formal credit review committee to review individual transactions. Rather, we developed a sophisticated, multi-tiered pricing model and have automated the credit scoring, approval and collection processes. We believe that with the proper pricing model, we can grant credit to a wide range of applicants provided we have priced appropriately for the associated risk. As a result of approving a wide range of credits, we experience a relatively high level of delinquency and write-offs in our portfolio. We periodically review the credit scoring and approval process to ensure that the automated system is making appropriate credit decisions. Given the nature of the microticket market and the individual size of each transaction, we do not evaluate transactions individually for the purpose of developing and determining the adequacy of the allowance for credit losses. Contracts in our portfolio are not re-graded subsequent to the initial extension of credit and the allowance is not allocated to specific contracts. Rather, we view the contracts as having common characteristics and maintain a general allowance against our entire portfolio utilizing historical collection statistics and an assessment of current credit risk in the portfolio as the basis for the amount.

We have adopted a consistent, systematic procedure for establishing and maintaining an appropriate allowance for credit losses for our microticket transactions. We estimate the likelihood of credit losses net of recoveries in the portfolio at each reporting period based upon a combination of the lessee's bureau reported credit score at lease inception and the current delinquency status of the account. In addition to these elements, we also consider other relevant factors including general economic trends, trends in delinquencies and credit losses, static pool analysis of our portfolio, trends in recoveries made on charged off accounts, and other relevant factors which might affect the performance of our portfolio. This combination of historical experience, credit scores, delinquency levels, trends in credit losses, and the review of current factors provide the basis for our analysis of the adequacy of the allowance for

credit losses. We take charge-offs against our receivables when such receivables are deemed uncollectible. In general a receivable is uncollectable when it is 360 days past due or earlier, if other adverse events occur with respect to an account. Historically, the typical monthly payment under our microticket leases has been small and as a result, our experience is that lessees will pay past due amounts later in the process because of the relatively small amount necessary to bring an account current.

Table of Contents*Income Taxes*

Significant judgment is required in determining the provision for income taxes, deferred tax assets and liabilities, and the valuation allowance recorded against net deferred tax assets. The process involves summarizing temporary differences resulting from the different treatment of items, such as leases, for tax and accounting purposes. In addition, our income tax calculations involve the application of complex tax regulations in a multitude of jurisdictions. Differences between the basis of assets and liabilities result in deferred tax assets and liabilities, which are recorded on the balance sheet. We must then assess the likelihood that deferred tax assets will be recovered from future taxable income or tax carry-back availability and to the extent management believes recovery is more likely than not, a valuation allowance is unnecessary.

In accordance with U.S. GAAP, uncertain tax positions taken or expected to be taken in a tax return are subject to potential financial statement recognition based on prescribed recognition and measurement criteria. Based on our evaluation, we concluded that there are no significant uncertain tax positions requiring recognition in our financial statements. At December 31, 2010, there have been no material changes to the liability for uncertain tax positions and there are no significant unrecognized tax benefits. We do not expect our unrecognized tax positions to change significantly over the next twelve months.

Share-Based Compensation

We follow the provisions of Financial Accounting Standards Board (FASB) Accounting Standard Codification (ASC) Topic 718, Compensation – Stock Compensation, which requires the measurement of compensation cost for all outstanding unvested share-based awards at fair value and recognition of compensation over the service period for awards expected to vest. The estimation of stock awards that will ultimately vest requires judgment, and to the extent actual results differ from our estimates, such amounts will be recorded as a cumulative adjustment in the period estimates are revised. We estimate the fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of ASC Topic 718 and Securities and Exchange Commission, (SEC) Staff Accounting Bulletin No. 107 – Share Based Payments. Key input assumptions used to estimate the fair value of stock options include the expected option term, volatility of our stock, the risk-free interest rate and our dividend yield. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by employees who receive equity awards, and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by us under ASC Topic 718.

Results of Operations*Revenues*

	2010	Change	2009	Change	2008
	(In thousands)				
Income on financing leases	\$ 34,398	16.9%	\$ 29,415	27.4%	\$ 23,095
Rental income	7,773	(9.4)	8,584	(12.7)	9,829
Income on service contracts	512	(24.3)	676	(26.9)	925
Loss and damage waiver fees	4,555	10.1	4,136	27.8	3,236
Service fees and other	3,690	10.5	3,340	45.2	2,300
Interest income	1	(92.9)	14	(90.0)	140
Total revenues	\$ 50,929	10.3%	\$ 46,165	16.8%	\$ 39,525

Our lease contracts are accounted for as financing leases. At origination, we record the gross lease receivable, the estimated residual value of the leased equipment, initial direct costs incurred and the unearned lease income. Unearned lease income is the amount by which the gross lease receivable plus the estimated residual value exceeds the cost of the equipment. Unearned lease income and initial direct costs incurred are amortized over the related lease term using the interest method. Other revenues such as loss and damage waiver fees, service fees relating to the leases and contracts, and rental revenues are recognized as they are earned.

Table of Contents

Total revenues for the year ended December 31, 2010 were \$50.9 million, an increase of \$4.8 million or 10.3% from the year ended December 31, 2009. Revenue from leases was \$34.4 million, up \$5.0 million from the previous year as a result of the increased originations. Rental income was \$7.8 million, down \$0.8 million from 2009. Other revenue components contributed \$8.7 million, up \$0.6 million from the previous year in connection with the increased size in our portfolio, despite a decline in service contracts of \$164,000 during the year. The decline in rental income is primarily explained by attrition rates in the two sources of rental income. One source is rental agreements that are originated and cancellable on a monthly basis. We have not originated any new rental contracts since 2004. The other is the rental income that is recognized at the end of the lease term when a lessee chooses to keep the equipment and rents it on a monthly basis. The decline in rental contracts is the result of attrition of Leasecomm rental contracts which is partially offset by Timepayment lease contracts coming to term and converting to rentals. We have not funded any new service contracts since 2004; therefore this segment of revenue continues to decline.

Total revenues for the year ended December 31, 2009 were \$46.2 million, an increase of \$6.6 million or 16.8% from the year ended December 31, 2008. Revenue from leases was \$29.4 million, up \$6.3 million from the previous year as a result of the increased originations. Rental income was \$8.6 million, down \$1.2 million from 2008. Other revenue components contributed \$8.2 million, up \$1.5 million from the previous year in connection with the increased size in our portfolio, despite a decline in service contracts of \$249,000 during the year. The decline in income from service contracts is consistent with the lack of new service contract originations since we resumed funding in 2004.

Selling, General and Administrative

	2010	Change	2009	Change	2008
	(Dollars in thousands)				
Selling, general and administrative	\$ 13,839	3.5%	\$ 13,371	2.4%	\$ 13,060
As a percent of revenue	27.1%		29.0%		33.0%

Our selling, general and administrative (SG&A) expenses include costs of maintaining corporate functions such as accounting, finance, collections, legal, human resources, sales and underwriting, and information systems. SG&A expenses also include commissions, service fees and other marketing costs associated with our portfolio of leases and rental contracts. SG&A expenses increased by \$468,000 or 3.5%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009. Significant factors in the increase of the SG&A expense include increases in payroll and employee benefits of \$481,000 due to the increase in headcount, an increase in consulting and contract labor of \$131,000 and an increase in bank service fees of \$130,000. These increases were offset in part by decreases in marketing expenses of \$186,000 and collection expenses of \$166,000.

SG&A expenses increased by \$311,000 or 2.4%, for the year ended December 31, 2009, as compared to the year ended December 31, 2008. Significant factors in the increase of the SG&A expense include increases in payroll and employee benefits of \$842,000 due to the increase in headcount and an increase in cost of equipment sold of \$162,000. These increases were offset in part by decreases in: professional fees of \$231,000; recruiting expenses of \$222,000; and collection expenses of \$131,000.

Provision for Credit Losses

	2010	Change	2009	Change	2008
	(Dollars in thousands)				

Edgar Filing: MICROFINANCIAL INC - Form 10-K

Provision for credit losses	\$ 23,148	5.0%	\$ 22,039	43.9%	\$ 15,313
As a percent of revenue	45.5%		47.7%		38.7%

We maintain an allowance for credit losses on our investment in leases, service contracts and rental contracts at an amount that we believe is sufficient to provide adequate protection against losses in our portfolio. Our provision for credit losses increased \$1.1 million or 5.0%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009. Net charge-offs increased \$4.0 million to \$23.9 million, or 19.9%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009. The provision was based on providing a

Table of Contents

general allowance against leases funded during the year and our analysis of actual and expected losses in our portfolio as a whole.

Our provision for credit losses increased \$6.7 million or 43.9%, for the year ended December 31, 2009, as compared to the year ended December 31, 2008. Net charge-offs increased \$10.6 million to \$19.9 million, or 113.8%, for the year ended December 31, 2009, as compared to the year ended December 31, 2008. The provision was based on providing a general allowance against leases funded during the year and our analysis of actual and expected losses in our portfolio as a whole. The increase in the allowance reflects the growth in lease receivables associated with new lease originations, increased delinquency levels, and the current economic climate in 2009.

Depreciation and Amortization

	2010	Change	2009	Change	2008
	(Dollars in thousands)				
Depreciation fixed assets	\$ 615	43.4%	\$ 429	12.0%	\$ 383
Depreciation rental equipment	1,597	36.5	1,170	181.9	415
Amortization service contracts		(100.0)	29	(83.7)	178
Total depreciation and amortization	\$ 2,212	35.9%	\$ 1,628	66.8%	\$ 976
As a percent of revenue	4.3%		3.5%		2.5%

Depreciation and amortization expense consists of depreciation on fixed assets and rental equipment, and the amortization of service contracts. Fixed assets are recorded at cost and depreciated over their expected useful lives. Certain rental contracts are originated as a result of the renewal provisions of our lease agreements where at the end of the lease term, the customer may elect to continue to rent the leased equipment on a month-to-month basis. The rental equipment is recorded at its residual value and depreciated over a term of 12 months. This term represents the estimated life of a previously leased piece of equipment and is based upon our historical experience. In the event the contract terminates prior to the end of the 12 month period, the remaining net book value is expensed.

Service contracts were recorded at cost and amortized over their estimated life of 84 months. In a typical service contract acquisition, a homeowner will purchase a home security system and simultaneously sign a contract with the security dealer for monthly monitoring of the system. The security dealer would then sell the rights to that monthly payment to us. We perform all of the processing, billing, collection and administrative work on the service contract. The estimated life is based upon the expected life of such contracts in the security monitoring industry and our historical experience. In the event the contract terminates prior to the end of the 84 month term, the remaining net book value is expensed. We have not originated any new service contracts since 2004.

Depreciation expense on rentals increased by \$427,000 or 36.5% in connection with the TimePayment rental portfolio, and amortization of service contracts decreased by \$29,000 or 100.0%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009. The carrying value of our rental equipment increased from \$379,000 at December 31, 2009 to \$461,000 at December 31, 2010. The carrying value of our service contracts was \$0 at December 31, 2009 and December 31, 2010. Depreciation on property and equipment increased by \$186,000 or 43.4% for the year ended December 31, 2010, as compared to the year ended December 31, 2009. The increase in depreciation on property and equipment was primarily due to the abandonment of a proposed software platform and the related depreciation of costs capitalized in connection with that project.

Depreciation expense on rentals increased by \$755,000 or 181.9% in connection with the increase in the TimePayment rental portfolio, and amortization of service contracts decreased by \$149,000 or 83.7%, for the year ended December 31, 2009, as compared to the year ended December 31, 2008. The carrying value of our rental equipment increased from \$240,000 at December 31, 2008 to \$379,000 at December 31, 2009. The carrying value of our service contracts decreased from \$32,000 at December 31, 2008 to \$0 at December 31, 2009. Depreciation on property and equipment increased by \$46,000 or 12.0% for the year ended December 31, 2009, as compared to the year ended December 31, 2008.

Table of Contents*Interest Expense*

	2010	Change	2009	Change	2008
	(Dollars in thousands)				
Interest	\$ 3,150	13.8%	\$ 2,769	171.5%	\$ 1,020
As a percent of revenue	6.2%		6.0%		2.6%

We pay interest on borrowings under our revolving line of credit. Interest expense increased by \$381,000 or 13.8% for the year ended December 31, 2010, as compared to the year ended December 31, 2009. At December 31, 2010, we had outstanding borrowings under our revolving line of credit of \$62.7 million compared to \$51.9 million at December 31, 2009. The effect of higher average outstanding debt balances on our interest expense was partially offset by lower interest costs on our revolving line of credit.

Interest expense increased by \$1.7 million or 171.5% for the year ended December 31, 2009, as compared to the year ended December 31, 2008. This increase resulted primarily from the increased borrowings as well as higher rates of interest on our revolving line of credit. At December 31, 2009, we had notes payable of \$51.9 million compared to notes payable of \$33.3 million at December 31, 2008. The interest rate on our revolving line of credit was 5.0% at December 31, 2009 compared to 3.25% at December 31, 2008.

Provision for Income Taxes

	2010	Change	2009	Change	2008
	(In thousands)				
Provision for income taxes	\$ 3,284	47.2%	\$ 2,231	(30.4)%	\$ 3,206
As a percent of revenue	6.4%		4.8%		8.1%

The provision for income taxes, deferred tax assets and liabilities and any necessary valuation allowance recorded against net deferred tax assets, involves summarizing temporary differences resulting from the different treatment of items, such as leases, for tax and accounting purposes. These differences result in deferred tax assets and liabilities which are recorded on the balance sheet. We must then assess the likelihood that deferred tax assets will be recovered from future taxable income or tax carry-back availability and to the extent we believe recovery is more likely than not, a valuation allowance is unnecessary.

The provision for income taxes increased by \$1.1 million, or 47.2%, for the year ended December 31, 2010, as compared to the year ended December 31, 2009. This increase resulted primarily from the \$2.2 million increase in income before income taxes. The effective tax rate for the year ended December 31, 2010 was 38.3% compared to 35.1% for the year ended December 31, 2009.

The provision for income taxes decreased by \$975,000, or 30.4%, for the year ended December 31, 2009, as compared to the year ended December 31, 2008. This decrease resulted primarily from the \$2.8 million decrease in income before income taxes and the release of reserves for uncertain tax positions of \$445,000 due to the expiration of the statute of limitations of certain states. The effective tax rate for the year ended December 31, 2009 was 35.1% compared to 35.0% for the year ended December 31, 2008.

Other Operating Data

Dealer fundings were \$78.2 million during the year ended December 31, 2010, an increase of \$1.3 million or 1.7%, compared to the year ended December 31, 2009. This increase is a result of our continuing business development efforts that include increasing the size of our vendor base and sourcing a larger number of applications from our vendors. We funded these contracts using cash provided by operating activities as well as net borrowings of \$10.7 million against our revolving line of credit. Receivables due in installments, estimated residual values, net investment in service contracts, and investment in rental equipment increased from \$197.9 million at December 31, 2009 to \$215.7 million at December 31, 2010, an increase of \$17.8 million, or 9.0%. Unearned income increased by \$3.4 million, or 6.1%, from \$55.8 million at December 31, 2009 to \$59.2 million at December 31, 2010. This increase was due to the \$78.2 million in originations in 2010. Net cash provided by operating activities increased by \$15.8 million, or 27.3%, to \$73.7 million during the year ended December 31, 2010, from the year ended December 31, 2009, due primarily to the increase in originations.

Table of Contents

Dealer fundings were \$76.9 million during the year ended December 31, 2009, an increase of \$7.8 million or 11.3%, compared to the year ended December 31, 2008. This increase is a result of our continuing business development efforts that include increasing the size of our vendor base and sourcing a larger number of applications from our vendors. We funded these contracts using cash provided by operating activities as well as net borrowings of \$18.6 million against our revolving line of credit. Receivables due in installments, estimated residual values, net investment in service contracts, and investment in rental equipment increased from \$162.1 million at December 31, 2008 to \$197.9 million at December 31, 2009, an increase of \$35.8 million, or 22.1%. Unearned income increased by \$6.4 million, or 13.0%, from \$49.4 million at December 31, 2008 to \$55.8 million at December 31, 2009. This increase was due to the \$76.9 million in originations in 2009, representing a substantial increase over 2008. Net cash provided by operating activities increased by \$14.6 million, or 33.7%, to \$57.9 million during the year ended December 31, 2009, from the year ended December 31, 2008, due primarily to the increase in originations.

Selected Quarterly Data

The following is a summary of our unaudited quarterly results of operations for 2010 and 2009. This unaudited quarterly information was prepared on the same basis as the audited Consolidated Financial Statements and, in the opinion of our management, reflects all necessary adjustments, consisting only of normal recurring items, necessary for a fair presentation of the information for the periods presented. The quarterly operating results are not necessarily indicative of future results of operations, and you should read them in conjunction with the audited Consolidated Financial Statements and Notes thereto included elsewhere in this Annual Report on Form 10-K.

Table of Contents**Exposure to Credit Losses**

The amounts in the table below represent the balance of delinquent receivables on an exposure basis for all leases, rental contracts and service contracts in our portfolio as of December 31, 2010, 2009 and 2008. An exposure basis aging classifies the entire receivable based on the invoice that is the most delinquent. For example, in the case of a rental or service contract, if a receivable is 90 days past due, all amounts billed and unpaid are placed in the over 90 days past due category. In the case of lease receivables, where the minimum contractual obligation of the lessee is booked as a receivable at the inception of the lease, if a receivable is 90 days past due, the entire receivable, including all amounts billed and unpaid as well as the minimum contractual obligation yet to be billed, will be placed in the over 90 days past due category.

	December 31, 2010		December 31, 2009		December 31, 2008	
	(Dollars in thousands)					
Current	\$ 160,674	84.1%	\$ 140,000	79.7%	\$ 110,423	77.3%

Over 90 days past due	19,882	10.4	24,046	13.7	20,438	14.3
Receivables due in installments	\$ 191,067	100.0%	\$ 175,615	100.0%	\$ 142,881	100.0%

Liquidity and Capital Resources*General*

Our lease and finance business is capital-intensive and requires access to substantial short-term and long-term credit to fund lease originations. Since our inception, we have funded our operations primarily through borrowings under our credit facilities, on-balance sheet securitizations, the issuance of subordinated debt, free cash flow and the proceeds from our initial public offering completed in February 1999. We will continue to require significant additional capital to maintain and expand our funding of leases and contracts, as well as to fund any future acquisitions of leasing companies or portfolios. In the near term, we expect to finance our business utilizing cash from operations, cash on hand and our revolving line of credit which matures in August 2013. Additionally, our uses of cash include the payment of interest and principal on borrowings, selling, general and administrative expenses, income taxes, payment of dividends, and capital expenditures.

We generated cash flow from operations of \$73.7 million for the year ended December 31, 2010, \$57.9 million for the year ended December 31, 2009, and \$43.3 million for the year ended December 31, 2008.

Net cash used in investing activities was \$79.6 million for the year ended December 31, 2010, \$78.0 million for the year ended December 31, 2009 and \$69.4 million for the year ended December 31, 2008. Investing activities primarily relate to the origination of leases with investments in lease contracts, direct costs, property, and equipment.

Net cash provided by financing activities was \$7.1 million for the year ended December 31, 2010, \$15.4 million for the year ended December 31, 2009 and \$24.0 million for the year ended December 31, 2008. Financing activities includes borrowings from and repayments on our various financing sources. During 2010 we borrowed \$103.3 million and repaid \$92.5 million. During 2009 we borrowed \$91.1 million and repaid \$72.6 million. During 2008 we borrowed \$87.5 million and repaid \$60.7 million. In addition, we paid dividends of \$2.8 million in each of 2010, 2009

and 2008.

We believe that cash flows from our existing portfolio, cash on hand, available borrowings on the existing credit facility which matures August 2013, and additional financing as required will be sufficient to support our operations and lease origination activity in the near term.

Table of Contents*Borrowings*

We utilize our revolving line of credit to fund the origination and acquisition of leases. Borrowings outstanding under our revolving line of credit consist of the following:

	December 31, 2010			December 31, 2009			Maximum Facility Amount (Dollars in 000)
	Amounts Outstanding	Interest Rate	Unused Capacity	Amounts Outstanding	Interest Rate	Unused Capacity	
Revolving credit facility(1)	\$ 62,650	3.52-4.50%	\$ 37,350	\$ 51,906	5.00%	\$ 33,094	\$ 100,000
		%					\$ 85,000

(1) The unused capacity is subject to limitations based on lease eligibility and the borrowing base formula.

On August 2, 2007, we entered into a three-year revolving line of credit with a bank syndicate led by Sovereign Bank (Sovereign) based on qualified TimePayment lease receivables. The total commitment under the facility was originally \$30 million, and was subsequently increased to \$60 million in July 2008, to \$85 million in February 2009, and most recently to \$100 million in connection with a July 28, 2010 amendment. Outstanding borrowings are collateralized by eligible lease contracts and a security interest in all of our other assets. Prior to the July 2010 amendment, outstanding borrowings bore interest at Prime plus 1.75% or at a London Interbank Offered Rate (LIBOR) plus 3.75%, in each case subject to a minimum rate of 5.00%. Following the July 2010 amendment, outstanding borrowings bear interest at Prime plus 1.25% or LIBOR plus 3.25%, without being subject to any minimum rate. Under the terms of the facility, loans are Prime Rate Loans, unless we elect LIBOR Loans. If a LIBOR Loan is not renewed at maturity it automatically converts to a Prime Rate Loan. As a part of the July 2010 amendment, the maturity date of the facility was extended to August 2, 2013. At our option upon maturity, the unpaid principal balance may be converted to a six-month term loan. At December 31, 2010 \$57.0 million of our loans were LIBOR Loans and \$5.7 million of our loans were Prime Rate Loans. The interest rate on the revolving line of credit was between 3.52% and 4.5% at December 31, 2010. As of December 31, 2010 the qualified lease receivables eligible under the borrowing base exceeded the \$100 million revolving line of credit.

Financial Covenants

Our Sovereign revolving line of credit, like our prior facilities, has financial covenants that we must comply with in order to obtain funding through the facility and to avoid an event of default. These include requirements that we (i) maintain a ratio of our consolidated net earnings before interest, taxes and non-recurring non-cash items, as calculated under the agreement, to our consolidated interest expense of not less than 1.4:1 as of the end of any fiscal quarter; (ii) maintain consolidated tangible capital base (defined to mean our consolidated tangible net worth, as calculated under the agreement, plus subordinated debt) at minimum levels, which are increased from quarter to quarter in relation to our net income and any equity capital we receive; (iii) maintain a leverage ratio (defined to mean the ratio of consolidated total liabilities, less subordinated debt, to consolidated tangible net worth, plus subordinated debt) at any time to exceed 4.0 to 1.0; and (iv) not permit the amount of receivables over 90 days past due to exceed 18.75% of gross lease installments. The revolving line of credit also contains other affirmative and negative covenants, including a restriction on our ability to incur or guaranty indebtedness, dispose of or acquire assets or

engage in a merger transaction, or make certain restricted payments. As of December 31, 2010, we were in compliance with all covenants in our borrowing relationships.

Table of Contents**Contractual Obligations and Lease Commitments**

The following table summarizes our contractual cash obligations at December 31, 2010 and the effect such obligations are expected to have on our liquidity and cash flow in future periods (in thousands):

Contractual Obligations	Total	Payments Due			
		Less than 1 Year	Due 1-3 Years	Due 4-5 Years	Due After 5 Years
Revolving line of credit	\$ 62,650	\$ 62,650	\$	\$	\$
Operating lease obligations	4,207	313	1,712	1,202	980
Capital lease obligations	26	25	1		
Total	\$ 66,883	\$ 62,988	\$ 1,713	\$ 1,202	\$ 980

Contractual Obligations

We have entered into various agreements, such as debt and operating lease agreements that require future payments. During the year ended December 31, 2010 we had net borrowings of \$10.7 million against our revolving line of credit. The \$62.7 million of outstanding borrowings under our revolving line of credit as of December 31, 2010 will be repaid by the daily application of TimePayment receipts to our outstanding balance. Our future minimum lease payments under non-cancelable operating leases are \$313,000, \$558,000 and \$571,000 for the years ended December 31, 2011, 2012 and 2013 respectively. Our future minimum lease payments under capital leases are \$25,000 and \$1,000 for the years ended December 31, 2011 and 2012 respectively.

Lease Commitments

We accept lease applications on daily basis and have a pipeline of applications that have been approved, where a lease has not been originated. Our commitment to lend does not become binding until all of the steps in the lease origination process have been completed, including but not limited to the receipt of a complete and accurate lease document, all required supporting information and successful verification with the lessee. Since we fund on the same day a lease is successfully verified, we have no firm outstanding commitments to lend.

Market Risk and Financial Instruments

The following discussion about our risk management activities includes forward-looking statements that involve risk and uncertainties. Actual results could differ materially from those projected in the forward-looking statements. In the normal course of operations, we also face risks that are either non-financial or non-quantifiable. Such risks principally include credit risk and legal risk, and are not represented in the analysis that follows.

The implicit yield on all of our leases and contracts is on a fixed interest rate basis due to the leases and contracts having scheduled payments that are fixed at the time of origination. When we originate or acquire leases or contracts, we base our pricing in part on the spread we expect to achieve between the implicit yield on each lease or contract and the effective interest rate we expect to incur in financing such lease or contract through our credit facility. Increases in interest rates during the term of each lease or contract could narrow or eliminate the spread, or result in a negative

spread.

Given the relatively short average life of our leases and contracts, our goal is to maintain a blend of fixed and variable interest rate obligations which limits our interest rate risk. As of December 31, 2010, we have repaid all of our fixed-rate debt and have \$62.7 million of outstanding variable interest rate obligations under our Sovereign revolving line of credit.

Our Sovereign line of credit bears interest at rates which fluctuate with changes in the Prime or the LIBOR; therefore, our interest expense is sensitive to changes in market interest rates. The effect of a 10% adverse change in market interest rates, sustained for one year, on our interest expense would be immaterial.

We maintain an investment portfolio in accordance with our investment policy guidelines. The primary objectives of the investment guidelines are to preserve capital, maintain sufficient liquidity to meet our operating needs, and to maximize return. We minimize investment risk by limiting the amount invested in any single security

Table of Contents

and by focusing on conservative investment choices with short terms and high credit quality standards. We do not use derivative financial instruments or invest for speculative trading purposes. Investment activity in 2010 and 2009 was very limited given the lack of cash on hand to invest and the relatively low investment rates being offered.

Recently Issued Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards (SFAS) No. 166, Accounting for Transfers of Financial Assets an amendment of FASB Statement No. 140 (SFAS 166), codified as FASB Accounting Standard Codification (ASC) 860 Transfers and Servicing. This topic requires entities to provide more information regarding sales of securitized financial assets and similar transactions, particularly if the entity has continuing exposure to the risks related to transferred financial assets. FASB ASC 860 eliminates the concept of a qualifying special-purpose entity, changes the requirements for derecognizing financial assets and requires additional disclosures. FASB ASC 860 is effective for fiscal years beginning after November 15, 2009. On January 1, 2010 we adopted the new content of FASB ASC 860 which did not have an impact on our consolidated financial position or results of operations.

In June 2009, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R) (SFAS 167), codified as FASB ASC 810-10 Consolidation. This topic modifies how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB ASC 810-10 clarifies that the determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. FASB ASC 810-10 requires an ongoing reassessment of whether a company is the primary beneficiary of a variable interest entity. FASB ASC 810-10 also requires additional disclosures about a company's involvement in variable interest entities and any significant changes in risk exposure due to that involvement. FASB ASC 810-10 is effective for fiscal years beginning after November 15, 2009. On January 1, 2010 we adopted the new content of FASB ASC 810-10 which did not have an impact on our consolidated financial position or results of operations.

In January 2010, the FASB issued Accounting Standard Update (ASU) No. 2010-06, Fair Value Measurements and Disclosures. This update provides amendments to FASB 820-10 Fair Value Measurements and Disclosures that require new disclosures as follows:

Transfers in and out of Levels 1 and 2. A reporting entry should disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers.

Activity in level 3 fair value measurements

A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities.

In the reconciliation for fair value measurements using significant unobservable inputs (Level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number). The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. We adopted the provisions of ASU 2010-6 which are required for the current year and the adoption did not have a material effect on our consolidated financial position or results of operations. The provisions of ASU 2010-6 which are effective for fiscal years beginning after December 15, 2010 are not expected to have a material impact on our future financial statements.

In July 2010, the FASB issued ASU 2010-20 Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses. This guidance expands the disclosures pertaining to the credit quality of loans and should provide users of the financial statements with a better overall understanding of the credit risk in the loan portfolio. This guidance is effective for interim and annual periods ending after December 15, 2010. The provisions of ASU 2010-10 did not have a material effect on our financial statements but requires significant additional disclosures.

Item 7A. *Quantitative and Qualitative Disclosures About Market Risk*

See Item 7, under the caption Market Risk and Financial Instruments.

Item 8. *Financial Statements and Supplementary Data*

Our Financial Statements, together with the related report of our Independent Registered Public Accounting Firm, appear on pages F-1 through F-26 of this Form 10-K.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

Not applicable.

Item 9A. *Controls and Procedures*

Disclosure controls and procedures

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15 under the Exchange Act. Based upon the evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective. Disclosure controls and procedures are controls and procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Rule 13a-15(f) under the Exchange Act. Internal control over financial reporting is defined as a process designed by, or under the supervision of, our executive officers and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Under the supervision and with the participation of our management, including our executive officers, we assessed as of December 31, 2010, the effectiveness of our internal control over financial reporting. This assessment was based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our assessment using those criteria, our management concluded that our internal control over financial reporting as of December 31, 2010 was effective.

This annual report does not include an attestation report of our registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by our registered public accounting firm pursuant to the rules of the Securities and Exchange Commission that permit us to provide only management's report in this annual report.

Change in Internal Control over Financial Reporting

During the fourth quarter of our fiscal year ended December 31, 2010, no changes were made in our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information*

Not applicable.

Table of Contents**PART III****Item 10. *Directors, Executive Officers and Corporate Governance***

The information appearing in our proxy statement for the 2010 Special Meeting in Lieu of Annual Meeting of Stockholders to be filed on or before April 30, 2011 (the 2011 Proxy Statement) under the headings, Section 16(a) Beneficial Ownership Reporting Compliance, Governance of the Corporation and Proposal 1 Election of Directors, included in our proxy statement for the 2011 Special Meeting in Lieu of Annual Meeting of Stockholders to be filed with the Securities and Exchange Commission on or before May 2, 2011, is hereby incorporated by reference. The information under the heading Executive Officers in Part I, Item 1 of this Annual Report on Form 10-K is also incorporated by reference in this item.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
MicroFinancial Incorporated:
Burlington, Massachusetts

We have audited the accompanying consolidated balance sheet of MicroFinancial Incorporated and subsidiaries as of December 31, 2010, and the related consolidated statements of operations, stockholders' equity, and cash flows for the year then ended. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of MicroFinancial Incorporated and subsidiaries as of December 31, 2010, and the results of its operations and its cash flows for the year then ended in conformity with U.S. generally accepted accounting principles.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
MicroFinancial Incorporated:
Burlington, Massachusetts

We have audited the accompanying consolidated balance sheet of MicroFinancial Incorporated and its subsidiaries (the Company) as of December 31, 2009, and the related consolidated statements of operations, stockholders' equity and cash flows for the years ended December 31, 2009 and 2008. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company was not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2009, and the results of its operations, and its cash flows for the years ended December 31, 2009 and 2008 in conformity with accounting principles generally accepted in the United States of America.

Table of Contents

MICROFINANCIAL INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Tables in thousands, except share and per share data)

A. Nature of Business

MicroFinancial Incorporated (referred to as MicroFinancial, we, us or our) operates primarily through its wholly-owned subsidiaries, TimePayment Corp. and Leasecomm Corporation. TimePayment is a specialized commercial finance company that leases and rents microticket equipment and provides other financing services. The average amount financed by TimePayment during 2010 was approximately \$5,800 while Leasecomm historically financed contracts of approximately \$1,900. We primarily source our originations through a nationwide network of independent equipment vendors, sales organizations and other dealer-based origination networks. We fund our operations through cash provided by operating activities and borrowings under our line of credit.

B. Summary of Significant Accounting Policies

Basis of Presentation

The consolidated financial statements include the accounts of MicroFinancial and its wholly owned subsidiaries. Intercompany accounts and transactions have been eliminated in consolidation. We operate in one principal business segment, the leasing and renting of equipment and other financing services.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reported period. Significant areas requiring the use of management estimates are revenue recognition, the allowance for credit losses, share-based payments and income taxes. Actual results could differ from those estimates.

Cash and Cash Equivalents

We consider all highly liquid instruments purchased with original maturities of less than three months to be cash equivalents. Cash equivalents consist principally of overnight investments, collateralized repurchase agreements, commercial paper, certificates of deposit and US government and agency securities. As of December 31, 2010, our cash equivalents consisted of overnight investments.

Restricted Cash

Our line of credit requires that all TimePayment cash receipts be deposited into a cash collateral account held by Sovereign Bank. These funds are applied directly to amounts outstanding under the line of credit as they clear. Those funds, which are pending clearance and application against the line of credit, are deemed to be restricted.

Leases and Revenue Recognition

Our lease contracts are accounted for as financing leases. At origination, we record the gross lease receivable, the estimated residual value of the leased equipment, initial direct costs incurred and the unearned lease income. Unearned

lease income is the amount by which the gross lease receivable plus the estimated residual value exceeds the cost of the equipment. Unearned lease income and initial direct costs incurred are amortized over the related lease term using the interest method. Amortization of unearned lease income and initial direct costs is suspended if, in our opinion, full payment of the contractual amount due under the lease agreement is doubtful. In conjunction with the origination of leases, we may retain a residual interest in the underlying equipment upon termination of the lease. The value of such interest is estimated at inception of the lease and evaluated periodically for impairment. At the end of the lease term, the lessee has the option to buy the equipment at the fair market value, return the equipment or continue to rent the equipment on a month-to-month basis. If the lessee continues to rent the

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

equipment, we record our investment in the rental contract at its estimated residual value. Rental revenue and depreciation are recognized based on the methodology described below. Other revenues such as loss and damage waiver fees and service fees relating to the leases and contracts are recognized as they are earned.

Allowance for Credit Losses

We maintain an allowance for credit losses on our investment in leases, service contracts and rental contracts at an amount that we believe is sufficient to provide adequate protection against losses on our portfolio. Given the nature of the microticket market and the individual size of each transaction, the business does not warrant the creation of a formal credit review committee to review individual transactions. As a result of approving a wide range of credits, we experience a relatively high level of delinquency and write-offs in our portfolio. We periodically review the credit scoring and approval process to ensure that the automated system is making appropriate credit decisions. Given the nature of the microticket market and the individual size of each transaction, we do not evaluate transactions individually for the purpose of determining the adequacy of the allowance for credit losses. Contracts in our portfolio are not re-graded subsequent to the initial extension of credit and the allowance is not allocated to specific contracts. Rather, we view the contracts as having common characteristics and we maintain a general allowance against our entire portfolio utilizing historical collection statistics and an assessment of current credit risk in the portfolio as the basis for the amount.

We have adopted a consistent, systematic procedure for establishing and maintaining an appropriate allowance for credit losses for our microticket transactions. We estimate the likelihood of credit losses net of recoveries in the portfolio at each reporting period based upon a combination of the lessee's bureau reported credit score at lease inception and the current delinquency status of the account. In addition to these elements, we also consider other relevant factors including general economic trends, trends in delinquencies and credit losses, static pool analysis of our portfolio, trends in recoveries made on charged off accounts, and other relevant factors which might affect the performance of our portfolio. This combination of historical experience, credit scores, delinquency levels, trends in credit losses, and the review of current factors provide the basis for our analysis of the adequacy of the allowance for credit losses. We take charge-offs against our receivables when such receivables are deemed uncollectible. In general, a receivable is deemed uncollectible when it is 360 days past due or earlier, if other adverse events occur with respect to an account. Historically, the typical monthly payment under our microticket leases has been small and as a result, our experience is that lessees will pay past due amounts later in the process because of the small amount necessary to bring an account current.

Investment in Service Contracts

Our investments in cancelable service contracts are recorded at cost and amortized over the expected life of the contract. Income on service contracts from monthly billings is recognized as the related services are provided.

At December 31, 2010 and 2009, our investment in service contracts consisted of the following:

	December 31,	
	2010	2009
Investment in service contracts	\$ 1,047	\$ 1,350

Less accumulated amortization	(1,047)	(1,350)
Investment in service contracts, net	\$	\$

Amortization expense on service contracts totaled \$0, \$29,000 and \$178,000 for the years ended December 31, 2010, 2009 and 2008, respectively. Upon retirement or other disposition, the cost and related accumulated amortization are removed from the accounts and any resulting gain or loss is reflected in income. We periodically evaluate whether events or circumstances have occurred that may affect the estimated useful life or recoverability of our investment in service contracts.

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)***Investment in Rental Contracts*

Our investment in rental contracts is either recorded at estimated residual value for converted leases and depreciated using the straight-line method over a period of twelve months or at the acquisition cost and depreciated using the straight line method over an estimated life of three years. Rental equipment consists of low-priced commercial equipment, including point-of-sale authorization systems and a wide variety of other equipment with similar characteristics.

At December 31, 2010 and 2009, our investment in rental contracts consisted of the following:

	December 31,	
	2010	2009
Investment in rental contracts	\$ 2,808	\$ 3,262
Less accumulated depreciation	(2,347)	(2,883)
Investment in rental contracts, net	\$ 461	\$ 379

Depreciation expense on rental contracts totaled \$1,596,000, \$1,170,000 and \$415,000 for the years ended December 31, 2010, 2009 and 2008, respectively. Upon retirement or other disposition, the cost and related accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in income. We periodically evaluate whether events or circumstances have occurred that may affect the estimated useful life or recoverability of the investment in rental contracts.

Property and Equipment

Office and computer equipment are recorded at cost and depreciated using the straight-line method over estimated lives of three to five years. Leasehold improvements are amortized over the shorter of the life of the lease or the estimated life of the improvement. Upon retirement or other disposition, the cost and related accumulated depreciation of the assets are removed from the accounts and any resulting gain or loss is reflected in income.

Fair Value of Financial Instruments

For financial instruments including cash and cash equivalents, restricted cash, accounts payable, and other liabilities, we believe that the carrying amount approximates fair value due to their short-term nature. The fair value of the revolving line of credit is calculated based on the incremental borrowing rates currently available on loans with similar terms and maturities. The fair value of our revolving line of credit at December 31, 2010 approximates its carrying value.

Debt Issue Costs

Costs incurred in securing financing are capitalized in other assets and amortized over the term of the financing. We incurred amortization expense, of \$399,000, \$482,000, and \$195,000 for the years ended December 31, 2010, 2009

and 2008, respectively which is included in interest expense.

Income Taxes

The Company accounts for income taxes in accordance with Financial Accounting Standard Board (FASB) Accounting Standards Codification (ASC) 740, *Income Taxes*. FASB ASC 740 prescribes the use of the liability method whereby deferred tax asset and liability account balances are determined based on differences between the financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value.

F-10

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

FASB ASC Topic 740-10 clarifies the accounting for income taxes, by prescribing a minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. It also provides guidance on derecognition, measurement and classification of amounts relating to uncertain tax positions, accounting for and disclosure of interest and penalties, accounting in interim periods, disclosures and transition relating to the adoption of the new accounting standard.

Net Income Per Common Share

Basic net income per common share is computed based on the weighted-average number of common shares outstanding during the period. Diluted net income per common share gives effect to all potentially dilutive common shares outstanding during the period. The computation of diluted net income per share does not assume the issuance of common shares that have an antidilutive effect on net income per common share. At December 31, 2010, 2009 and 2008, 499,305 options, 849,305 options, and 1,292,067 options, respectively, were excluded from the computation of diluted net income per share because their effect was antidilutive.

	Year Ended December 31,		
	2010	2009	2008
Net income	\$ 5,296	\$ 4,127	\$ 5,950
Weighted-average shares outstanding used in computation of net income per share basic	14,240,308	14,147,436	14,002,045
Dilutive effect of options, warrants and restricted stock	225,958	114,208	202,060
Shares used in computation of net income per common share assuming dilution	14,466,266	14,261,644	14,204,105
Net income per common share basic	\$ 0.37	\$ 0.29	\$ 0.42
Net income per common share diluted	\$ 0.37	\$ 0.29	\$ 0.42

Stock-Based Employee Compensation

We have adopted the fair value recognition provisions of FASB, ASC Topic 718 Compensation – Stock Compensation (formerly Statement of Financial Accounting Standards, (SFAS) No. 123(R), *Share-Based Payment*.) FASB, ASC Topic 718 requires us to recognize the compensation cost related to share-based payment transactions with employees in the financial statements. The compensation cost is measured based upon the fair value of the instrument issued. Share-based compensation transactions with employees covered by FASB ASC Topic 718 include share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans.

Recent Accounting Pronouncements

In June 2009, the FASB issued SFAS No. 166, Accounting for Transfers of Financial Assets - an amendment of FASB Statement No. 140 (SFAS 166), codified as FASB Accounting Standard Codification (ASC) 860 Transfers and Servicing. This topic requires entities to provide more information regarding sales of securitized financial assets and similar transactions, particularly if the entity has continuing exposure to the risks related to transferred financial assets. FASB ASC 860 eliminates the concept of a qualifying special-purpose entity, changes the requirements for derecognizing financial assets and requires additional disclosures. FASB ASC 860 is effective for fiscal years beginning after November 15, 2009. On January 1, 2010 we adopted the new content of FASB ASC 860 which did not have an impact on our consolidated financial position or results of operations.

Table of Contents

MICROFINANCIAL INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In June 2009, the FASB issued SFAS No. 167, Amendments to FASB Interpretation No. 46(R) (SFAS 167), codified as FASB ASC 810-10 Consolidation. This topic modifies how a company determines when an entity that is insufficiently capitalized or is not controlled through voting (or similar rights) should be consolidated. FASB ASC 810-10 clarifies that the determination of whether a company is required to consolidate an entity is based on, among other things, an entity's purpose and design and a company's ability to direct the activities of the entity that most significantly impact the entity's economic performance. FASB ASC 810-10 requires an ongoing reassessment of whether a company is the primary beneficiary of a variable interest entity. FASB ASC 810-10 also requires additional disclosures about a company's involvement in variable interest entities and any significant changes in risk exposure due to that involvement. FASB ASC 810-10 is effective for fiscal years beginning after November 15, 2009. On January 1, 2010 we adopted the new content of FASB ASC 810-10 which did not have an impact on our consolidated financial position or results of operations.

In January 2010, the FASB issued Accounting Standard Update (ASU) No. 2010-06, Fair Value Measurements and Disclosures. This update provides amendments to FASB 820-10 Fair Value Measurements and Disclosures that require new disclosures as follows:

1. Transfers in and out of Levels 1 and 2. A reporting entry should disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers.
2. Activity in level 3 fair value measurements
3. A reporting entity should provide fair value measurement disclosures for each class of assets and liabilities.

In the reconciliation for fair value measurements using significant unobservable inputs (Level 3), a reporting entity should present separately information about purchases, sales, issuances, and settlements (that is, on a gross basis rather than as one net number). The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the rollforward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. We adopted the provisions of ASU 2010-6 which are required for the current year and the adoption did not have a material effect on our consolidated financial position or results of operations. The provisions of ASU 2010-6 which are effective for fiscal years beginning after December 15, 2010 are currently being evaluated by management and are not expected to have a material impact on the Company's future financial statements.

In July 2010, the FASB issued ASU 2010-20 Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses. This guidance expands the disclosures pertaining to the credit quality of loans and should provide users of the financial statements with a better overall understanding of the credit risk in the loan portfolio. This guidance is effective for interim and annual periods ending after December 15, 2010. The provisions of ASU 2010-10 did not have a material effect on our financial statements but requires significant additional disclosures.

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****C. Net Investment in Leases**

At December 31, 2010, future minimum payments due on our lease receivables are as follows:

Year Ending December 31,

2011	\$ 86,495
2012	56,314
2013	31,476
2014	13,334
2015	3,448
Total	\$ 191,067

At December 31, 2010, the weighted-average remaining life of the leases in our portfolio is approximately 31 months and the weighted-average implicit rate of interest is approximately 26.9%.

Allowance for Loan Losses and Credit Quality of Loans

In 2010, the FASB issued ASU 2010-20 requiring us to provide detailed disclosures about the nature of credit risk inherent in our financing receivables, how we analyze that risk in estimating its allowance for credit losses, and the changes in the allowance for credit losses.

We segregate our lease portfolio between TimePayment Corp. and LeaseComm Corp. to perform the calculation and analysis of the allowance for loan losses. Each company consists of a single portfolio segment – microticket equipment. We take charge-offs against our receivables when such receivables are deemed uncollectible. In general a receivable is uncollectible when it is 360 days past due or earlier, if other adverse events occur with respect to an account. None of our receivables are placed on nonaccrual status as they are charged off when deemed uncollectible.

Activity in the allowance for credit losses for the years ended December 31, 2010, 2009 and 2008 was as follows:

	2010	2009	2008
Allowance for Credit Losses:			
Beginning Balance	\$ 13,856	\$ 11,722	\$ 5,722
Charge-offs	(28,435)	(24,181)	(13,641)
Recoveries	4,563	4,276	4,328
Provision	23,148	22,039	15,313
Ending Balance	\$ 13,132	\$ 13,856	\$ 11,722

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following table reconciles the activity in the allowance for credit losses by portfolio segment at December 31, 2010:

	LeaseComm Microticket Equipment	TimePayment Microticket Equipment	Total
Allowance for Credit Losses:			
Beginning Balance	\$ 381	\$ 13,475	\$ 13,856
Charge-Offs	(1,123)	(27,312)	(28,435)
Recoveries	1,264	3,299	4,563
Provisions	(291)	23,439	23,148
Ending Balance	\$ 231	\$ 12,901	\$ 13,132
Ending Balance: Individually evaluated for impairment			
Ending Balance: Collectively evaluated for impairment	231	12,901	13,132
Ending Balance: contracts acquired with deteriorated credit quality			
Financing Receivables:			
Ending Balance	531	151,134	151,665
Ending Balance: Individually evaluated for impairment			
Ending Balance: Collectively evaluated for impairment	531	151,134	151,665 ⁽¹⁾
Ending Balance: contracts acquired with deteriorated credit quality			

(1) Total financing receivables include net investment in leases. For purposes of asset quality and allowance calculations, the allowance for credit losses is excluded.

Each period the provision for credit losses in the income statement results from the combination of an estimate by Management of credit losses that occurred during the current period and the ongoing adjustment of prior estimates of losses occurring in prior periods.

To serve as a basis for making this provision, we maintain an internally developed proprietary scoring model that considers several factors including the lessee's bureau reported credit score at lease inception. We also consider other relevant factors including general economic trends, trends in delinquencies and credit losses, static pool analysis of our portfolio, trends in recoveries made on charged off accounts, and other relevant factors which might affect the performance of our portfolio. The combination of historical experience, credit scores, delinquency levels, trends in credit losses, and the review of current factors provide the basis for our analysis of the adequacy of the allowance for credit losses.

We assign internal risk ratings for all lessees and determine the credit worthiness of each lease based upon this internally developed proprietary scoring model. The LeaseComm portfolio is evaluated in total with a reserve of 50%

of the outstanding amount greater than 90 days plus 25% of the amount outstanding from 1 to 89 days as that portfolio is decreasing. The scoring model generates one of nine acceptable risk ratings based upon the credit worthiness of each lease or it rejects the lease application. The scores are assigned at lease inception and these scores are maintained over the lease term regardless of payment performance. To facilitate review and reporting, management aggregates these nine scores into one of three categories with similar risk profiles and delinquency characteristics identified as Gold, Silver or Bronze.

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Leases assigned a gold rating represent those transactions which exhibit the highest risk rating based on our internal credit scores. They are considered of sufficient quality to preclude an otherwise adverse rating. Gold rated leases are typically represented by lessees with high bureau reported credit scores at lease inception or are supported by established businesses for those transactions which are not personally guaranteed by the lessee.

Leases assigned a silver rating fall in the middle range of the nine acceptable scores generated by the scoring model. These transactions possess a reasonable amount of risk based on their profile and may exhibit vulnerability to deterioration if adverse factors are encountered. These accounts typically demonstrate adequate coverage but warrant a higher level of monitoring by management to ensure that weaknesses do not advance.

A bronze rating applies to leases at the lower end of the nine acceptable scores generated by the scoring model whereby the lessee may have difficulty meeting the lease obligation if adverse factors are encountered. Bronze rated transactions typically have lower reported credit scores at lease inception and will typically have other less desirable credit attributes.

The following table presents the aging of the recorded investment in leases as of December 31, 2010:

Credit Risk Profile by Internally Scored Grade

	Current	Past Due	Total
TimePayment Corp.			
Grade			
Gold	\$ 42,786	\$ 3,533	\$ 46,319
Silver	77,758	19,688	97,446
Bronze	4,542	2,827	7,369
Total	125,086	26,048	151,134
LeaseComm	230	301	531
Total	\$ 125,316	\$ 26,349	\$ 151,665

The following table presents the aged analysis of past due financing receivables by our internally developed proprietary scoring model in leases as of December 31, 2010:

Age Analysis of Past Due Financing Receivables

As of December 31, 2010

Current	31 to 60 Days	61 to 90 Days	Over 90 Days Past Due	Total	Over 90 Days Accruing

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

A summary of the changes in estimated residual value is as follows:

	Year Ended December 31,		
	2010	2009	2008
Estimated residual value, beginning	\$ 19,014	\$ 15,257	\$ 9,814
Lease originations	8,765	8,747	8,221
Terminations	(5,947)	(4,990)	(2,778)
Estimated residual value, ending	\$ 21,832	\$ 19,014	\$ 15,257

Originations represent the residual value capitalized upon origination of leases and terminations represent the residual value deducted upon the termination of a lease that (i) is bought out during or at the end of the lease term, (ii) has completed its original lease term and converted to an extended rental contract, (iii) has been charged off by us, or (iv) has been returned to us and recorded as inventory.

D. Property and Equipment

At December 31, 2010 and 2009, our property and equipment consisted of the following:

	December 31,	
	2010	2009
Computer equipment	\$ 3,996	\$ 4,136
Office equipment	749	742
Leasehold improvements	592	263
Total	5,337	5,141
Less accumulated depreciation and amortization	(4,537)	(4,442)
Net	\$ 800	\$ 699

Depreciation and amortization expense on property and equipment totaled \$616,000, \$429,000 and \$383,000 for the years ended December 31, 2010, 2009 and 2008, respectively. Total depreciation and amortization expense for property and equipment, service contracts and rental contracts was \$2,212,000, \$1,628,000 and \$976,000 for the years ended December 31, 2010, 2009 and 2008, respectively.

E. Revolving Line of Credit

At December 31, 2010 and 2009, our revolving line of credit consisted of the following:

	December 31,	
	2010	2009
Revolving line of credit-Sovereign	\$ 62,650	\$ 51,906

On August 2, 2007, we entered into a three-year revolving line of credit with a bank syndicate led by Sovereign Bank (Sovereign) based on qualified TimePayment lease receivables. The total commitment under the facility was originally \$30 million, and was subsequently increased to \$60 million in July 2008, to \$85 million in February 2009, and most recently to \$100 million in connection with a July 28, 2010 amendment. Outstanding borrowings are collateralized by eligible lease contracts and a security interest in all of our other assets. Prior to the July 2010 amendment, outstanding borrowings bore interest at Prime plus 1.75% or at a London Interbank Offered Rate (LIBOR) plus 3.75%, in each case subject to a minimum rate of 5.00%. Following the July 2010 amendment, outstanding borrowings bear interest at Prime plus 1.25% or LIBOR plus 3.25%, without being subject to any minimum rate. Under the terms of the facility, loans are Prime Rate Loans, unless we elect LIBOR Loans. If a LIBOR Loan is not renewed at maturity it automatically converts to a Prime Rate Loan.

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

As a part of the July 2010 amendment, the maturity date of the facility was extended to August 2, 2013. At our option upon maturity, the unpaid principal balance may be converted to a six-month term loan.

At December 31, 2010 \$57.0 million of our loans were LIBOR loans and \$5.7 million of our loans were Prime Rate Loans. The interest rate on our loans at December 31, 2010 was between 3.52% and 4.5%. The amount available on our revolving line of credit at December 31, 2010 was \$37,350,000. The amount available is subject to limitations based on lease eligibility and a borrowing base formula. The revolving line of credit has financial covenants that we must comply with to obtain funding and avoid an event of default. As of December 31, 2010, we were in compliance with all covenants under the revolving line of credit.

F. Stockholders Equity*Warrants*

On April 14, 2003, we issued warrants to purchase an aggregate of 268,199 shares of our common stock at an exercise price of \$0.825 per share. The warrants were issued to the lenders in connection with the waiver of the covenant defaults and the extension of our loan. The warrant holders have certain rights and privileges that provide them with anti-dilution protection in the event that the Company issues stock at a price below the then current market price of the company's common stock. During the year ended December 31, 2009 the Company adopted the provisions of ASC Topic 815, (*Derivatives and Hedging*). The Company has determined that these warrants are considered indexed to the Company's own stock and in accordance with ASC Topic 815 the warrants continue to be accounted for as a component of equity. Due to the anti-dilutive rights contained in the warrant agreement, on June 10, 2004, an additional 2,207 warrants were issued to the lenders and all of the warrants were re-priced to \$0.815 per share. The warrants held by the lenders became 50% exercisable on June 30, 2004. Since all of our obligations to the lenders were paid in full prior to September 30, 2004, the remaining 50% of the warrants were automatically canceled. In September 2004 we issued warrants to purchase an aggregate of 490 shares of our common stock at an exercise price of \$0.815 per share. During the year ended December 31, 2005, the cashless exercise of 24,736 warrants resulted in the issuance of 20,596 shares. During the year ended December 31, 2006, the cashless exercise of 17,668 warrants resulted in the issuance of 13,983 shares. The remaining 93,289 warrants expire on September 30, 2014. The \$77,000 fair market value of the warrants as determined using the Black-Scholes option-pricing model was accounted for as additional paid in capital and was being amortized to interest expense under the effective interest method. As of December 31, 2004, because the debt had been repaid in full, the entire \$77,000 had been amortized to interest expense. The resulting effective interest rate on the senior credit facility was Prime plus 2.09%.

Stock Options and Restricted Stock

The MicroFinancial 2008 Equity Incentive Plan (the 2008 Plan) permits the Compensation and Benefits Committee of our Board of Directors to grant stock options, restricted stock, restricted stock units, shares of common stock without restrictions, and any other right to receive payment from the corporation based in whole or in part on the value of common stock. We reserved 1,000,000 shares of common stock for issuance pursuant to the 2008 Plan. All employees and directors of the Corporation or any of its affiliates are eligible to receive awards under the 2008 Plan. For purposes of calculating the shares remaining for grant under the 2008 Plan, grants of stock options or stock appreciation rights to any participant will reduce that reserve by one share for each share subject to the option or the settled portion of the stock appreciation right. Grants of restricted stock, restricted stock units and any other full share award will reduce the reserve by three shares for each share of common stock subject to the award, in the case of

awards to employees, or by one share for each share of common stock subject to the award, in the case of awards to non-employee directors. Stock options under the 2008 Plan may be incentive stock options or nonstatutory stock options. The maximum cumulative number of shares available for grants of incentive stock options under the Plan is 1,000,000 shares. The committee determines the term of the option, including the amount, exercise price, vesting schedule and term, which may not exceed ten years. The per share exercise price of the option

F-17

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

may not be less than 100% of the fair market value of the common stock on the grant date. No stock option granted to an employee under the 2008 Plan shall become fully vested within one year of grant date and no restricted stock or other awards made to an employee without any performance-based criteria other than the employee's continued service will have a restricted period of less than one year. We may not in any fiscal year grant to any participant options or other awards covering more than 200,000 shares.

The 1998 Equity Incentive Plan (the 1998 Plan) permitted the Compensation and Benefits Committee of our Board of Directors to make various long-term incentive awards, generally equity-based, to eligible persons. We reserved 4,120,380 shares of our common stock for issuance pursuant to the 1998 Plan. Qualified stock options, which are intended to qualify as incentive stock options under the Internal Revenue Code, could be issued to employees at an exercise price per share not less than the fair value of our common stock on the date of grant. Nonqualified stock options could be issued to our officers, employees and directors, as well as our consultants and agents, at an exercise price per share not less than fifty percent of the fair value of our common stock on the date of grant. The vesting periods and expiration dates of the grants were determined by the Compensation and Benefits Committee. The option period term could not exceed ten years. The 1998 Plan expired in 2008 and was replaced by the 2008 Plan.

On February 4, 2004, a new non-employee director was granted 25,000 shares of restricted stock with a fair value of \$3.17 per share. On August 15, 2006, a second new non-employee director was granted 25,000 shares of restricted stock with a fair value of \$3.35 per share. In each case, the restricted stock vested 20% upon grant, and vests 5% on the first day of each quarter after the grant date. As vesting occurred, compensation expense is recognized. The following table summarizes non-employee directors' non-vested restricted stock activity:

	Number of Shares	Amortized Compensation Expense
Non-vested at December 31, 2007	15,000	
Granted		
Vested	(6,250)	\$ 19
Non-vested at December 31, 2008	8,750	
Granted		
Vested	(5,000)	\$ 14
Non-vested at December 31, 2009	3,750	
Granted		
Vested	(3,750)	\$ 10
Non-vested at December 31, 2010		

The final unvested portion of these grants vested on the first day of our third fiscal quarter of 2010. As of December 31, 2010, there are no unvested restricted shares under these grants.

Edgar Filing: MICROFINANCIAL INC - Form 10-K

In February 2007, we granted ten year options to our executive officers to purchase 40,188 shares of common stock at an exercise price of \$5.77 per share. The options vest on the fifth anniversary of their grant. The total 2010, 2009 and 2008 expense related to these options was \$13,000, \$7,000 and \$16,000 respectively.

In February 2008, we granted 10 year options to our executive officers to purchase 176,879 shares of common stock at an exercise price of \$5.85 per share. The options vest over five years beginning on the second anniversary of the grant date. The total 2010, 2009 and 2008 expense related to the grant was \$51,000, \$39,000 and \$58,000 respectively.

F-18

MICROFINANCIAL INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In February 2008, we granted our non-employee directors a total of 23,000 shares of stock with a fair value of \$5.55 per share in accordance with our directors' compensation policy. The total 2008 expense related to the grant of these shares was \$127,000. These shares were fully vested on the date of issuance.

In July 2008, we granted our non-employee directors a total of 30,729 shares of stock with a fair value of \$3.71 per share in accordance with our directors' compensation policy. The total 2008 expense related to the grant of these shares was \$114,000. These shares were fully vested on the date of issuance.

In February 2009, under our 2008 Equity Incentive Plan, we granted 10 year options to our executive officers to purchase 321,058 shares of common stock at an exercise price of \$2.30 per share. The options vest over five years beginning on the second anniversary of the grant date. The total 2010 and 2009 expense related to these options was \$29,000 and \$27,000 respectively.

In February 2009, we granted our non-employee directors a total of 100,435 shares of stock with a fair value of \$2.30 per share in accordance with our directors' compensation policy. The total 2009 expense related to the grant of these shares was \$231,000. These shares were fully vested on the date of issuance.

In July 2009, we granted our non-employee directors a total of 30,634 shares of stock with a fair value of \$3.46 per share in accordance with our directors' compensation policy. The total 2009 expense related to the grant of these shares was \$107,000. These shares were fully vested on the date of issuance.

In February 2010, under our 2008 Equity Incentive Plan, we granted 33,518 restricted stock units valued at \$3.15 per share. The restricted stock units vest over five years beginning on the second anniversary of the grant date. The total 2010 expense related to these restricted stock units was \$19,000.

In February 2010, we granted our non-employee directors a total of 53,844 shares of stock with a fair value of \$3.15 per share in accordance with our directors' compensation policy. The total 2010 expense related to the grant of these shares was \$169,000. These shares were fully vested on the date of issuance.

In July 2010, we granted our non-employee directors a total of 34,425 shares of stock with a fair value of \$3.66 per share in accordance with our directors' compensation policy. The total 2010 expense related to the grant of these shares was \$126,000. These shares were fully vested on the date of issuance.

During the year ended December 31, 2010, 350,000 options originally granted to members of the Board of Directors in 2000 expired. During the year ended December 31, 2009, 400,000 options originally granted to members of the Board of Directors in February 1999 expired. In addition, 105,097 options granted to the former VP of Sales were forfeited upon his last date of employment in May 2009.

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following summarizes stock option activity for the years ended December 31, 2010, 2009 and December 31, 2008:

	Shares	Price Per Share	Weighted Average Exercise Price
Outstanding at December 31, 2007	1,282,688	\$1.585 to \$13.544	\$ 9.08
Granted	176,879	\$5.85	\$ 5.85
Exercised	(17,500)	\$1.585	\$ 1.585
Outstanding at December 31, 2008	1,442,067	\$1.585 to \$13.544	\$ 8.78

Expired	(400,000)	\$12.31 to \$13.544	\$ 8.78
Forfeited	(105,097)	\$2.30 to \$5.85	\$ 3.74
Outstanding at December 31, 2009	1,258,028	\$1.585 to \$13.10	\$ 6.38
Granted			\$ \$
Expired	(350,000)	\$9.78	\$ 9.78
Outstanding at December 31, 2010	908,028	\$1.585 to 13.10	\$ 5.07

The options granted prior to and including 2007 vest over five years based solely on service and are exercisable only after they become vested. At December 31, 2010, 2009 and 2008, 510,596, 825,000 and 1,225,000, respectively, of the outstanding options were fully vested. The total intrinsic value of all options exercised during the year ended December 31, 2008 was \$8,000.

Information relating to our outstanding stock options at December 31, 2010 is as follows:

Exercise Price	Shares	Outstanding Weighted- Average Life (Years)	Intrinsic Value	Weighted- Average Exercise Price	Exercisable Shares	Intrinsic Value
\$13.10	90,000	0.14		\$ 13.10	90,000	
6.70	235,000	1.16		6.70	235,000	
1.59	150,000	1.91	\$ 367	1.59	150,000	\$ 367
5.77	31,923	6.17		5.77		
5.85	142,382	7.08		5.85	35,596

908,028	4.28	\$	815	6.27	510,596	\$	367
---------	------	----	-----	------	---------	----	-----

We estimate the fair value of stock options using a Black-Scholes valuation model, consistent with the provisions of topic ASC Topic 718 and Securities and Exchange Commission (SEC) Staff Accounting Bulletin No. 107 Share Based Payments. Key input assumptions used to estimate the fair value of stock options include the expected option term, volatility of the stock, the risk-free interest rate and the dividend yield.

During the year ended December 31, 2010, 33,518 shares of restricted stock units were granted. The restricted stock units were valued at the date of grant using a fair value of \$3.15 per share. The restricted stock units vest over five years beginning on the second anniversary of the grant date. As of December 31, 2010 we had approximately \$86,000 of total unrecognized costs related to these options. The remaining cost is expected to be recognized over a period of 4 years.

During the year ended December 31, 2009, 321,058 options were granted with an exercise price of \$2.30 per share. The fair value of these awards was \$0.55 per share. The options were valued at the date of grant using the

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

following assumptions: expected life in years of 6.50, annualized volatility of 55.54%, expected dividend yield of 8.70%, and a risk free interest rate of 2.28%. The options vest over five years beginning on the second anniversary of the grant date. As of December 31, 2010 we had approximately \$88,000 of total unrecognized costs related to these options. The remaining cost is expected to be recognized over a period of 3 years.

During the year ended December 31, 2008, 176,879 options were granted with an exercise price of \$5.85 per share. The fair value of these awards was \$1.78 per share. The options were valued at the date of grant using the following assumptions: expected life in years of 6.25, annualized volatility of 41.30%, expected dividend yield of 3.70%, and a risk free interest rate of 2.66%. The options vest over five years beginning on the second anniversary of the grant date. As of December 31, 2010 we had approximately \$106,000 of total unrecognized costs related to these options. The remaining cost is expected to be recognized over a period of 2 years.

During the year ended December 31, 2007, 40,188 options were granted with an exercise price of \$5.77. The fair value of these awards was \$2.08 per share. The options were valued at the date of grant using the following assumptions; expected life in years of 7, annualized volatility of 43.62%, expected dividend yield of 3.47%, and a risk free interest rate of 4.62%. As of December 31, 2010 we had approximately \$15,000 of total unrecognized costs related to these options. The remaining cost is expected to be recognized over a period of 1 year.

The expected life represents the average period of time that the options are expected to be outstanding given consideration to vesting schedules; annualized volatility is based on historical volatilities of our common stock; dividend yield represents the current dividend yield expressed as a constant percentage of our stock price and the risk-free interest rate is based on the U.S. Treasury yield curve in effect on the measurement date for periods corresponding to the expected life of the option.

Common Stock Reserved

At December 31, 2010, 908,028 shares of common stock were reserved for common stock option exercises. At December 31, 2009, 1,258,028 shares of common stock were reserved for common stock option exercises. At December 31, 2008, 1,442,067 shares of common stock were reserved for common stock option exercises. At December 31, 2010, 2009, and 2008, 390,656, 579,479 and 969,271 shares of common stock were reserved for future grants, respectively.

We reserved shares of common stock at December 31, 2010 as follows:

Warrants	93,289
Stock options	908,028
Restricted stock units	33,518
Reserved for future grants under 2008 Equity Incentive Plan	390,656
Total	1,425,491

Repurchases

During the fourth quarter of fiscal year 2010 we repurchased and retired 34,412 shares of our common stock under our stock buyback program announced on August 10, 2010 at an average price paid per share of \$4.06. The total cost of shares purchased as part of our share repurchase program was \$139,000.

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****G. Income Taxes**

The provision for income taxes consists of the following:

	Year Ended December 31,		
	2010	2009	2008
Current:			
Federal	\$ 76	\$	\$
State	444	764	358
	520	764	358
Deferred:			
Federal	2,816	1,699	2,988
State	(52)	(232)	(140)
	2,764	1,467	2,848
Total	\$ 3,284	\$ 2,231	\$ 3,206

At December 31, 2010 and 2009, the components of the net deferred tax liability were as follows:

	2010	2009
Deferred tax assets:		
Allowance for credit losses	\$ 5,253	\$ 5,542
Depreciation and amortization	19,709	18,318
Federal alternative minimum tax credit	884	808
Federal NOL carryforward	4,580	5,877
State NOL and other state attributes	3,524	3,792
State valuation allowance	(384)	(948)
Total deferred tax assets	33,566	33,389
Deferred tax liabilities:		
Lease receivable and unearned income	(32,206)	(30,248)
Residual value	(8,733)	(7,605)
Initial direct costs	(254)	(399)
Reserve for contingencies		
Total deferred tax liabilities	(41,193)	(38,252)

Net deferred tax liability	\$ (7,627)	\$ (4,863)
----------------------------	------------	------------

At December 31, 2010, we had federal loss carry-forwards of \$13.1 million which may be used to offset future income. At December 31, 2009, we had state net operating loss carry-forwards of \$17.3 million which may be used to offset future income. The state NOL s have restrictions and expire in approximately one to twenty years. We recorded a valuation allowance against some of our state deferred tax assets as it is unlikely that these deferred tax assets will be fully realized.

F-22

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The following is reconciliation between the effective income tax rate and the applicable statutory federal income tax rate:

	Year Ended December 31,		
	2010	2009	2008
Federal statutory rate	35.00%	35.00%	35.00%
State income taxes, net of federal benefit	7.10	7.43	4.33
State valuation allowance	(4.27)	(3.48)	(3.33)
Reversal of state income tax reserve		(4.33)	(1.17)
Nondeductible expenses and other	0.44	0.47	0.18
Effective income tax rate	38.27%	35.09%	35.01%

The calculation of our tax liabilities involves dealing with estimates in the application of complex tax regulations in a multitude of jurisdictions. We record liabilities for estimated tax obligations for federal and state purposes. For the years ended December 31, 2010, 2009 and 2008, the nondeductible expenses and other rate of 0.44%, 0.47% and 0.18% respectively, includes certain non-deductible stock-based compensation.

Uncertain Tax Positions

As of December 31, 2010, we had a liability of \$15,000 and a liability of \$6,000 for accrued interest and penalties related to various state income tax matters. Of these amounts, approximately \$14,000 would impact our effective tax rate after a \$7,000 federal tax benefit for state income taxes. As of December 31, 2009 we had a liability of \$32,000 and a liability of \$8,000 for accrued interest and penalties related to various state income tax matters. Of these amounts, approximately \$26,000 would impact our effective tax rate after a \$14,000 federal tax benefit for state income taxes. As of December 31, 2008, we had a liability of \$289,000 for unrecognized tax benefits and a liability of \$152,000 for accrued interest and penalties related to various state income tax matters. It is reasonably possible that the total amount of unrecognized tax benefits may change significantly within the next 12 months; however at this time we are unable to estimate the change. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

Balance at January 1, 2009	\$ 445
Additions for tax positions related to current year	40
Reductions for tax positions as a result of:	
Lapse of statute of limitations	(445)
Balance at December 31, 2009	40
Additions for tax positions related to current year	
Reductions for tax positions as a result of:	
Lapse of statute of limitations	(19)

Balance at December 31, 2010

\$ 21

Our federal income tax returns are subject to examination for tax years ended on or after December 31, 2006 and our state income tax returns are subject to examination for tax years ended on or after December 31, 2005.

F-23

Table of Contents**MICROFINANCIAL INCORPORATED****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****H. Commitments and Contingencies***Operating Leases*

At December 31, 2010, our corporate headquarters and operations center occupied approximately 24,400 square feet of office space at 10M Commerce Way, Woburn, Massachusetts 01801. The lease for this space expired on January 31, 2011.

On September 20, 2010 we entered into an office lease agreement for approximately 23,834 square feet of office space located at 16 New England Executive Park in Burlington, Massachusetts 01803. We moved our corporate headquarters to the premises in January 2011. The lease for our facility in Burlington, Massachusetts expires in 2017. At December 31, 2010, future minimum lease payments under non-cancelable operating leases are:

For the years ended December 31,	
2011	\$ 313
2012	558
2013	571
2014	583
2015	594
Thereafter	1,588
Total	\$ 4,207

Rental expense under operating leases totaled \$318,000, \$303,000 and \$296,000 for the years ended December 31, 2010, 2009 and 2008, respectively.

Capital Leases

At December 31, 2010 future minimum lease payments under our capital leases were as follows:

For the years ended December 31,	
2011	\$ 26
2012	1
Total minimum payments	27
Less amounts representing interest	(1)
Total	\$ 26

Legal Matters

We are involved from time to time in litigation incidental to the conduct of our business. Although we do not expect that the outcome of any of these matters, individually or collectively, will have a material adverse effect on our financial condition or results of operations, litigation is inherently unpredictable. Therefore, judgments could be rendered or settlements entered, that could adversely affect our operating results or cash flows in a particular period. We routinely assess all of our litigation and threatened litigation as to the probability of ultimately incurring a liability, and record our best estimate of the ultimate loss in situations where we assess the likelihood of loss as probable.

Lease Commitments

We accept lease applications on a daily basis and, as a result, we have a pipeline of applications that have been approved, where a lease has not been originated. Our commitment to lend does not become binding until all of the

Table of Contents

MICROFINANCIAL INCORPORATED

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

steps in the origination process have been completed, including the receipt of the lease, supporting documentation and verification with the lessee. Since we fund on the same day a lease is verified, we have no outstanding commitments to lend.

I. Employee Benefit Plan

We have a defined contribution plan under Section 401(k) of the Internal Revenue Code to provide retirement and profit sharing benefits covering substantially all full-time employees. Employees are eligible to contribute up to 100% of their gross salary until they reach the maximum annual contribution amount allowed under the Internal Revenue Code. We match \$0.50 for every \$1.00 contributed by an employee up to 6% of the employee's salary; the maximum match is 3%. Vesting of our contributions is over a five-year period at 20% per year. Our payments on behalf of the defined contribution plan were \$96,000, \$100,000 and \$83,000 in the years ended December 31, 2010, 2009, and 2008 respectively.

J. Concentration of Credit Risk

Our financial instruments that are exposed to concentration of credit risk consist primarily of lease and rental receivables and cash and cash equivalent balances. To reduce our risk, credit policies are in place for approving leases and lease pools are monitored by us. In addition, cash and cash equivalents are maintained at high-quality financial institutions.

Financial instruments that subject us to concentrations of credit risk principally consist of cash equivalents and deposits in bank accounts. We deposit our cash and invest in short-term investments primarily through a national commercial bank. Deposits in excess of amounts insured by the Federal Deposit Insurance Corporation (FDIC) are exposed to loss in the event of nonperformance by the institution. The Company has had cash deposits in excess of the FDIC insurance coverage.

During the year ended December 31, 2010, 2009 and 2008 our top dealer accounted for 3.2%, 3.6% and 4.5% respectively of all leases originated. No dealer accounted for more than 5% of all leases originated in 2010, 2009 and 2008.

We service leases and rental contracts in all 50 states of the United States and its territories. As of December 31, 2010, leases in California, Florida, Texas and New York accounted for approximately 11%, 13%, 8%, and 8%, respectively, of the total portfolio. As of December 31, 2009, leases in California, Florida, Texas and New York accounted for approximately 12%, 13%, 8%, and 7%, respectively, of the total portfolio. As of December 31, 2008, California, Florida, Texas, and New York accounted for approximately 12%, 13%, 8%, and 7%, respectively, of the total portfolio. No other states accounted for more than 5% of the total portfolio as of the end of any of the years 2010, 2009 or 2008.

K. Subsequent Events

On January 21, 2011 we declared a dividend of \$0.05 per share payable on February 15, 2011 to shareholders of record of MicroFinancial Incorporated stock on February 1, 2011.

On March 25, 2011 we entered into an office lease agreement for approximately 2,267 square feet of office space located at 2801 Townsgate Road, Thousand Oaks, CA 91361. We plan to move in to the premises in May 2011. The base rent payable under the lease will be approximately \$2,801 monthly through the first nine months and increases annually in increments until it reaches a monthly base rent of approximately \$6,120 from the 36th to the 40th month.

We have evaluated all events or transactions that occurred through the date on which we issued these financial statements. During this period, we did not have any material subsequent events that impacted our consolidated financial statements other than the declaration of dividends, amendment of the revolving line of credit and stock repurchase program.
