Information contained herein is subject to completion or amendment. A registration statement relating to these securities has been filed with the Securities and Exchange Commission. These securities may not be sold nor may offers to buy be accepted prior to the time the registration statement becomes effective. This prospectus shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation or sale is not permitted or would be unlawful prior to registration or qualification under the securities laws of any such State.

PRELIMINARY DRAFT DATED SEPTEMBER 30, 2002, SUBJECT TO COMPLETION

*Solicitation of Written Consent of
General Motors Corporation
Common Stockholders*

*Information Statement for
EchoStar Communications Corporation
Common Stockholders*

PROSPECTUS OF

HEC HOLDINGS, INC.

*Class A Common Stock and Class C Common Stock,
par value \$0.01 per share*

The Separation of Hughes from GM and the Hughes/EchoStar Merger

GM is asking GM \$1 2/3 par value common stockholders and GM Class H common stockholders to approve certain matters relating to the following transactions:

the separation from GM of the business of Hughes Electronics by the distribution to GM Class H common stockholders of up to 1,046,014,137 shares of Class C common stock of a newly formed company, HEC Holdings, Inc., that will own all of the outstanding stock of Hughes; and

the combination of the businesses of Hughes and EchoStar Communications immediately after the separation by the merger of EchoStar with HEC Holdings, which will issue up to 427,605,611 shares of Class A common stock to EchoStar Class A common stockholders and up to 326,623,573 shares of Class B common stock to EchoStar Class B common stockholders. The combined company will be renamed EchoStar Communications Corporation.

The Hughes/EchoStar merger has already been approved by the stockholders of EchoStar. Therefore, EchoStar is not asking its stockholders to take any further action.

As a result of these transactions, GM Class H common stockholders will receive one share of Class C common stock of the new EchoStar in exchange for each share of GM Class H common stock they own and EchoStar Class A common stockholders will receive about 1.3699 shares of Class A common stock of the new EchoStar in exchange for each share of EchoStar Class A common stock they own. In addition, under certain limited circumstances, the GM \$1 2/3 par value common stockholders may receive a distribution of shares of Class C common stock of the new EchoStar as a result of the transactions. However, unless the market price of GM Class H common stock changes significantly between the date of this document and the time of the completion of the transactions, we do not currently anticipate that the GM \$1 2/3 par value common stockholders will receive any shares of Class C common stock of the new EchoStar.

The Class A common stock and Class C common stock offered by this document will be listed on the Nasdaq Stock Market under the symbols _____ and _____, respectively.

WE URGE YOU TO READ THIS DOCUMENT CAREFULLY, INCLUDING

THE SECTION ENTITLED RISK FACTORS THAT BEGINS ON PAGE 55.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these transactions or the securities to be issued in connection with these transactions. In addition, neither the Securities and Exchange Commission nor any state securities commission has passed upon the adequacy or accuracy of the disclosure in this document. Any representation to the contrary is a criminal offense.

This document, which is dated _____, 2002, is a combined Consent Solicitation Statement of GM and Information Statement of EchoStar, as well as a Prospectus of HEC Holdings, and is first being mailed to the stockholders of General Motors and EchoStar on or about _____, 2002.

[Letter for GM Consent Solicitation Statement]

To the GM \$1 2/3 par value common stockholders and the GM Class H common stockholders:

General Motors is proposing to separate the business of its Hughes Electronics subsidiary from GM by exchanging one share of Class C common stock of HEC Holdings, a newly formed subsidiary of GM that will own all of the outstanding stock of Hughes, for each outstanding share of GM Class H common stock. In addition, under certain limited circumstances, the GM \$1 2/3 par value common stockholders may receive a distribution of shares of Class C common stock of HEC Holdings. However, unless the market price of GM Class H common stock changes significantly between the date of this document and the time of the completion of the transactions, we do not currently anticipate that the GM \$1 2/3 par value common stockholders will receive any shares of Class C common stock of HEC Holdings.

Immediately after the separation, the businesses of Hughes and EchoStar will be combined by the merger of EchoStar with HEC Holdings, which will issue shares of Class A common stock and Class B common stock to EchoStar's common stockholders. The new company formed in the merger will be named EchoStar Communications Corporation. The new EchoStar formed by the merger will continue to provide multi-channel subscription television service under the DIRECTV brand name. The Hughes/ EchoStar merger will create one of the nation's largest subscription television platforms, with about 18.2 million subscribers based upon the combined number of subscribers of Hughes and EchoStar as of June 30, 2002.

As a result of the transactions, the GM Class H common stock will be eliminated and GM will no longer have tracking stock. The GM \$1 2/3 par value common stock will remain outstanding and will be GM's only class of common stock after the transactions. Immediately before the separation of Hughes, GM will receive a dividend from Hughes of up to \$4.2 billion, and GM's retained economic interest in the financial performance of Hughes, which is currently about 8%, will be reduced by an amount that reflects the dividend. If GM continues to hold any retained economic interest in Hughes after that reduction, it will receive a corresponding number of shares of the new EchoStar Class C common stock as part of the transactions.

Upon the completion of the Hughes/EchoStar merger, based on assumptions described in this document:

the new EchoStar Class A common stock would represent about 15% of the outstanding common stock of new EchoStar and about 15% of the total voting power of new EchoStar;

the new EchoStar Class B common stock would represent about 15% of the outstanding common stock of new EchoStar and about 15% of the total voting power of new EchoStar; and

the new EchoStar Class C common stock would represent about 15% of the outstanding common stock of new EchoStar and about 15% of the total voting power of new EchoStar.

THE BOARD OF DIRECTORS OF GENERAL MOTORS HAS UNANIMOUSLY APPROVED THE TRANSACTIONS AND RECOMMENDS THAT YOU VOTE TO APPROVE EACH OF THE PROPOSALS SUBMITTED FOR YOUR APPROVAL BY EXECUTING AND RETURNING THE ENCLOSED CONSENT CARD AS SOON AS POSSIBLE.

GM has already approved the Hughes/EchoStar merger as the sole stockholder of both Hughes and HEC Holdings. However, other aspects of the transactions require GM common stockholder approval and, accordingly, none of the transactions will be completed unless this approval is obtained. If the GM \$1 2/3 par value common stockholders and GM Class H common stockholders, each voting separately as a class and voting together as a single class based on their respective per share voting power, do not approve the transactions, Hughes will remain a wholly owned subsidiary of GM and neither the Hughes/ EchoStar merger nor the GM/ Hughes separation transactions will occur. Therefore, your vote on these matters is very important. This document contains important information about the GM/ Hughes separation transactions and the Hughes/ EchoStar merger. **We urge you to read this document carefully, including the section entitled Risk Factors that begins on page 55.**

We strongly support the separation of Hughes from GM and the combination of the Hughes and EchoStar businesses, and we join with the board of directors of General Motors in enthusiastically recommending that you vote in favor of the transactions.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

G. Richard Wagoner, Jr.
President and Chief Executive Officer
General Motors Corporation

Jack A. Shaw
President and Chief Executive Officer
Hughes Electronics Corporation

[Letter for EchoStar Information Statement]

To the common stockholders of EchoStar Communications Corporation:

We intend to combine our business with the business of Hughes Electronics pursuant to a merger that will be completed immediately following the separation of the business of Hughes from its current parent company, General Motors. The surviving corporation in the merger will be named EchoStar Communications Corporation and will be the issuer of the shares of Class A common stock and Class B common stock that EchoStar common stockholders will receive in the merger. The Hughes/ EchoStar merger will create one of the nation's largest subscription television platforms, with about 18.2 million subscribers based upon the combined number of subscribers of Hughes and EchoStar as of June 30, 2002.

In connection with the Hughes/ EchoStar merger, each of you who holds EchoStar Class A common stock will receive about 1.3699 shares of the new EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock you own and EchoStar Class B common stockholders will receive about 1.3699 shares of the new EchoStar Class B common stock in exchange for each share of EchoStar Class B common stock they own. You should understand that a trust which I control currently owns all of the outstanding shares of EchoStar Class B common stock. You should also understand that you will not receive any fractional share of common stock in the new EchoStar. Instead, you will receive a cash payment for your fractional share. Upon the completion of the Hughes/ EchoStar merger, based on assumptions described in this document:

the new EchoStar Class A common stock would represent about % of the outstanding common stock of new EchoStar and about % of the total voting power of new EchoStar;

the new EchoStar Class B common stock would represent about % of the outstanding common stock of new EchoStar and about % of the total voting power of new EchoStar; and

the new EchoStar Class C common stock would represent about % of the outstanding common stock of new EchoStar and about % of the total voting power of new EchoStar.

As the holder of all of the outstanding shares of EchoStar Class B common stock, the trust which I control will hold about % of the total voting power of new EchoStar.

The boards of directors of EchoStar, Hughes and HEC Holdings have already approved the Hughes/ EchoStar merger. In addition, General Motors, as the sole stockholder of both Hughes and HEC Holdings, and a trust controlled by me, as the holder of EchoStar Class B common stock representing about 90% of the voting power of EchoStar, have already approved the Hughes/ EchoStar merger. As a result, no further action on your part is required to approve the Hughes/ EchoStar merger. However, we believe that it is important for you to be informed about the Hughes/ EchoStar merger. Thus, this document is being sent to you for your information only.

THE HUGHES/ ECHOSTAR MERGER HAS ALREADY BEEN APPROVED BY THE STOCKHOLDERS OF ECHOSTAR THROUGH A WRITTEN CONSENT REPRESENTING ABOUT 90% OF THE VOTING POWER OF ECHOSTAR. AS A RESULT, WE ARE NOT ASKING YOU FOR A PROXY AND YOU ARE REQUESTED NOT TO SEND US A PROXY.

This document contains important information about the Hughes/ EchoStar merger. **We urge you to read this document carefully, including the section entitled Risk Factors that begins on page 55.**

I am excited about the opportunities that the Hughes/ EchoStar merger will create for us, for you and for our customers.

Charles W. Ergen
*Chairman of the Board of Directors and
Chief Executive Officer
EchoStar Communications Corporation*

ADDITIONAL INFORMATION

This document incorporates important business and financial information about GM, Hughes, PanAmSat Corporation (which is currently approximately 81% owned by certain subsidiaries of Hughes) and EchoStar from other documents that are not included in or delivered with this document. You may obtain these documents at the SEC's website, www.sec.gov, and you may also obtain certain of these documents at the following websites:

GM: Documents relating to GM are available at GM's website, www.gm.com by selecting Investor Information, then selecting Financial Data and finally selecting SEC Filings;

Hughes: Documents relating to Hughes are available at Hughes' website, www.hughes.com by selecting Investor Relations and then selecting SEC Filings;

PanAmSat: Documents relating to PanAmSat are available at PanAmSat's website, www.panamsat.com by selecting Investor Relations and then selecting SEC Filings/ Annual Report; and

EchoStar: Documents relating to EchoStar are available at EchoStar's website, www.echostar.com by selecting about us, then selecting Investor Relations and finally selecting SEC Filings.

We are not incorporating the contents of the websites of the SEC, GM, Hughes, PanAmSat, EchoStar or any other person into this document. We are only providing information about how you can obtain certain documents which are incorporated into this document by reference at these websites.

This information is available to you without charge upon your written or oral request as described below. Written and telephone requests by GM common stockholders for any of the documents about GM, Hughes, PanAmSat or EchoStar should be directed to GM as indicated below:

GM Fulfillment Center

MC 480-000-FC1
30200 Stephenson Hwy.
Madison Heights, Michigan 48071
Telephone: () -

Written and telephone requests by EchoStar common stockholders for any of the documents about EchoStar, GM, Hughes or PanAmSat should be directed to EchoStar as indicated below:

EchoStar Communications Corporation

5701 South Santa Fe Drive
Littleton, Colorado 80120
Attention: Kim Culig
Telephone: () -

If you would like to request copies of any documents, please do so no later than _____, 2002 in order to ensure timely delivery. This date is five business days prior to the end of the minimum 20 business day consent solicitation period required by the SEC because certain information has been incorporated into this document by reference.

For additional information about where to obtain copies of documents, see [Where You Can Find More Information](#) beginning on page 366.

QUESTIONS AND ANSWERS ABOUT THE TRANSACTIONS

Q1. What are the GM/Hughes separation transactions?

- A1. The GM/Hughes separation transactions are a series of proposed transactions involving General Motors and Hughes that are designed to separate Hughes from GM and prepare it to complete the proposed merger with EchoStar. There are two integral components to the GM/Hughes separation transactions:

Hughes Recapitalization. Currently, GM has a retained economic interest of about % in the financial performance of Hughes. The remaining about % represents the economic interest of GM Class H common stockholders in Hughes. Immediately before the separation of Hughes from GM, Hughes will distribute to General Motors a dividend of up to \$4.2 billion and GM's retained economic interest in Hughes will be reduced by an amount that reflects the dividend. After the payment of the dividend, an internal reorganization will occur so that HEC Holdings, a newly formed subsidiary of GM, will own all of the outstanding stock of Hughes.

Hughes Split-Off. Immediately after the Hughes recapitalization, HEC Holdings will be separated from General Motors by means of a split-off and will become an independent, publicly owned company. As a result of the split-off, the GM Class H common stockholders and, if applicable, GM and the GM \$1 2/3 par value common stockholders will become stockholders of HEC Holdings. The answers to Question 3 and Question 4 below describe what General Motors and its common stockholders will receive in the Hughes split-off.

After the GM/Hughes separation transactions, HEC Holdings will complete the proposed merger with EchoStar as described in the answer to Question 2 below.

For more information, see pages 10, 87 and 223.

Q2. What is the Hughes/ EchoStar merger?

- A2. The Hughes/EchoStar merger is the proposed transaction that will combine the businesses of Hughes and EchoStar. Immediately after the completion of the GM/Hughes separation transactions, EchoStar will merge with HEC Holdings, which will be the surviving corporation and will issue its Class A common stock and Class B common stock in the Hughes/EchoStar merger. HEC Holdings will be renamed EchoStar Communications Corporation, which we sometimes refer to as the new EchoStar. The answer to Question 3 below describes what EchoStar common stockholders will receive in the Hughes/EchoStar merger.

For more information, see pages 12, 94 and 229.

Q3. What will I receive if the transactions occur?

- A3. **GM Class H Common Stockholders.** As part of the GM/Hughes separation transactions, GM Class H common stockholders will receive one share of Class C common stock of HEC Holdings in exchange for each share of GM Class H common stock they own, and all outstanding shares of GM Class H common stock will be redeemed and canceled. After the Hughes/EchoStar merger, the shares of Class C common stock of HEC Holdings will remain outstanding and will then be shares of Class C common stock of the new EchoStar. Therefore, as a result of the transactions, GM Class H common stockholders will no longer be holders of the Class H tracking stock of General Motors, which is a stock of GM designed to provide holders with financial returns based on the financial performance of Hughes. Instead, the former GM Class H common stockholders will be holders of a more conventional common stock of the new EchoStar.

GM \$1 2/3 Par Value Common Stockholders. If and to the extent required in order to maintain the tax-free status of the Hughes split-off, GM may make a pro rata distribution to the GM \$1 2/3 par value common stockholders of a portion of the Class C common stock of HEC Holdings it receives in the Hughes recapitalization. If GM determines that a pro rata distribution is required in order to maintain the tax-free status of the Hughes split-off, then the number of shares of Class C common stock of

HEC Holdings to be distributed to the GM \$1 2/3 par value common stockholders and the record date for the distribution will be publicly announced by GM around the time of the completion of the Hughes split-off. However, unless the market price of GM Class H common stock changes significantly between the date of this document and the time of the completion of the transactions, we do not currently anticipate that the GM \$1 2/3 par value common stockholders will receive any shares of Class C common stock of HEC Holdings as a result of the transactions. In any event, GM \$1 2/3 par value common stockholders will retain their shares of GM \$1 2/3 par value common stock after the transactions. After the transactions, the GM \$1 2/3 par value common stock will be GM's only class of common stock, and GM will be a company primarily focused on its core automotive and related businesses. Regardless of whether they receive any shares of Class C common stock of HEC Holdings as a result of the transactions, GM \$1 2/3 par value common stockholders will have an indirect interest in the financial performance of Hughes to the extent of any ownership interest that GM may have in the new EchoStar after the transactions as described in the answer to Question 4 below.

EchoStar Common Stockholders. Common stockholders of EchoStar will receive the following in the Hughes/EchoStar merger:

EchoStar Class A common stockholders will receive 1/0.73, or about 1.3699, shares of the new EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock they own; and

EchoStar Class B common stockholders will receive 1/0.73, or about 1.3699, shares of the new EchoStar Class B common stock in exchange for each share of EchoStar Class B common stock they own. A trust controlled by Charles W. Ergen, the Chairman of the Board of Directors and Chief Executive Officer of EchoStar, currently owns all of the outstanding shares of EchoStar Class B common stock.

For more information, see pages 10, 90, 94, 182 and 183.

Q4. What will GM receive if the transactions occur?

- A4. The transactions are expected to provide significant value to GM and its common stockholders. The transactions offer a significant premium to GM and its common stockholders for their economic interests in Hughes, as described in greater detail elsewhere in this document. The transactions are also designed to provide significant liquidity to GM in respect of GM's current retained economic interest in Hughes. If the transactions occur:

GM will receive a dividend from Hughes of up to \$4.2 billion as part of the Hughes recapitalization;

GM may receive shares of Class C common stock of HEC Holdings, which would remain outstanding after the Hughes/EchoStar merger and would then be shares of Class C common stock of the new EchoStar. Any of these shares that are not disposed of by GM as described in the next bullet below would be retained by General Motors for up to five years following the completion of the GM/Hughes separation transactions; and

GM may dispose of up to an aggregate of 100 million shares of GM Class H common stock and/or new EchoStar Class C common stock in exchange for satisfaction of outstanding liabilities of GM to certain of GM's creditors between now and six months following the completion of the Hughes/EchoStar merger. To the extent that GM does not transfer all of these shares in debt-for-equity exchanges, GM may sell the shares for cash during the six months following the completion of the Hughes/EchoStar merger or may retain the shares for up to five years following the completion of the GM/Hughes separation transactions.

As described in greater detail elsewhere in this document, the amount of the dividend from Hughes and the number of shares of Class C common stock of HEC Holdings that GM would receive in the transactions, including the number of shares which could be used by GM in GM share dispositions described in the third bullet above, cannot be definitively determined until the time of the completion of the GM/Hughes separation transactions because each will depend upon certain factors that will not

be known until that time. The number of shares of Class C common stock of HEC Holdings that GM would receive in the GM/Hughes separation transactions will be determined based on the value of GM's retained economic interest in Hughes at the time of the Hughes split-off, as reduced to reflect the dividend from Hughes to be received by GM as part of the Hughes recapitalization. Therefore, only if and to the extent that the value of GM's retained economic interest in Hughes at that time is more than the amount of the dividend from Hughes would GM retain any shares of Class C common stock of HEC Holdings immediately following the completion of the GM/Hughes separation transactions.

For more information, see pages 20 and 85.

Q5. When will the transactions be completed?

A5. We are working diligently to complete the transactions as soon as reasonably possible. However, we will not complete the transactions unless certain important conditions are satisfied. These conditions include, among other things, the requisite GM common stockholder approval of the transactions and the receipt of important antitrust and other regulatory approvals of the transactions. Assuming that all of the conditions are satisfied within the time frame we currently anticipate, we expect to complete the transactions during the fourth quarter of 2002.

For more information, see page 83.

Q6. What are GM common stockholders being asked to approve?

A6. GM \$1 2/3 par value common stockholders and GM Class H common stockholders, each voting separately as a class and voting together as a single class based on their respective per share voting power, are being asked to approve an amendment to the GM restated certificate of incorporation and to ratify two matters relating to the transactions. The transactions will not take place unless each of these three matters is approved by GM \$1 2/3 par value common stockholders and GM Class H common stockholders. In addition, GM's common stockholders are being asked to approve a further amendment to the GM restated certificate of incorporation to reflect the elimination of the GM Class H common stock after the completion of the transactions, but the transactions are not conditioned upon approval of this further charter amendment.

Proposals 1 through 3, all of which relate to the transactions, are separate matters to be voted upon by GM common stockholders but are expressly conditioned upon the approval of each of the other of these three proposals (but not proposal 4). This means that ALL THREE of these proposals must be approved by GM \$1 2/3 par value common stockholders and GM Class H common stockholders in order for GM to obtain the requisite GM common stockholder approval of the transactions. The transactions described in this document will not be completed, even if all of the other conditions are satisfied or waived, if the requisite GM common stockholder approval of these three proposals is not received.

The proposals are as follows:

Proposal 1: Approval of GM Charter Amendment. This proposal is to approve an amendment to the GM restated certificate of incorporation that would be filed in order to give GM the ability to implement the GM/Hughes separation transactions. The amendment would add three important provisions to the GM restated certificate of incorporation and make certain other clarifying changes to facilitate the transactions. They would:

provide for the reduction by the GM board of directors of GM's retained economic interest in Hughes to reflect the dividend of up to \$4.2 billion to be received by GM in the GM/Hughes separation transactions;

provide for GM to split off HEC Holdings by exchanging one share of Class C common stock of HEC Holdings for each outstanding share of GM Class H common stock; and

provide that the provisions of the GM restated certificate of incorporation that provide for a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120%

exchange rate under certain circumstances will not apply to the GM/Hughes separation transactions.

These provisions will only have effect in the event that the transactions are completed.

Proposal 2: Ratification of the GM/Hughes Separation Transactions. This proposal is to ratify the GM/Hughes separation transactions as described in this document.

Proposal 3: Ratification of the Hughes/EchoStar Merger. This proposal is to ratify the Hughes/ EchoStar merger as described in this document.

Proposal 4: Approval of the Second GM Charter Amendment. This proposal is to approve a further amendment to the GM restated certificate of incorporation to eliminate certain provisions relating to the GM Class H common stock that will no longer be necessary after the completion of the transactions.

The completion of the transactions is NOT expressly conditioned upon the approval by GM \$1 2/3 par value common stockholders and GM Class H common stockholders of proposal 4. However, proposal 4 will not be implemented unless proposals 1 through 3 are approved and the transactions are completed.

For more information, see pages 178 and 347.

Q7. Will GM Class H common stockholders be forgoing any rights that they have now by approving the matters being submitted to them?

A7. Yes. By approving the proposals relating to the transactions, GM Class H common stockholders will be forgoing certain rights that might otherwise be available to them under certain circumstances:

First, GM Class H common stockholders as well as GM \$1 2/3 par value common stockholders will be approving transactions that do not give rise to the right of GM Class H common stockholders to have shares of GM Class H common stock exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances pursuant to provisions of the GM restated certificate of incorporation. If the 120% recapitalization provision had been applicable to the transactions described in this document, which would have been the case but for the transactions being made subject to the GM charter amendment which expressly provides that the 120% recapitalization provision shall not apply to the transactions, each share of GM Class H common stock they hold would have been exchanged for shares of GM \$1 2/3 par value common stock that would have been valued at \$, representing a premium of 20% to the GM Class H common stockholders based on the average of the closing prices of GM \$1 2/3 par value common stock and GM Class H common stock for the 15 consecutive trading days ending one trading day prior to October 28, 2001, the date of the public announcement of the transactions. As a result, each share of GM Class H common stock would have been exchanged for of a share of GM \$1 2/3 par value common stock.

Second, GM Class H common stockholders as well as GM \$1 2/3 par value common stockholders will be approving and consenting to an asset transfer consisting of the dividend of up to \$4.2 billion from Hughes to GM without the further distribution of a portion of that dividend from GM to the GM Class H common stockholders in accordance with their tracking stock interest in Hughes. If such an asset transfer from Hughes to GM were to be made without the consent of both classes of GM common stockholders (or other action by the GM board of directors), the transfer could, under certain circumstances pursuant to a policy statement of the GM board of directors, result in the distribution of a portion of the dividend of up to \$4.2 billion to GM Class H common stockholders. Assuming a dividend of \$4.2 billion and based on a calculation of the GM Class H common stockholders tracking stock interest in Hughes as of , 2002, such an asset transfer from Hughes to GM could have required a pro rata distribution of about \$ billion to the GM Class H common stockholders, or about \$ per share of GM Class H common stock, under a notional application of the GM board policy statement.

You should understand, however, that if the requisite GM common stockholder approval of the transactions is not obtained, the transactions will not occur and GM Class H common stockholders will similarly have no right to exchange their shares for shares of GM \$1 2/3 par value common stock at a 120% exchange rate or to receive any distribution from GM based on an asset transfer from Hughes to GM.

For more information, see pages 59, 114, 179, 181, 349 and 350.

Q8. What is the effect of ratification of certain matters as proposed in proposals 2 and 3?

A8. Ratification is an expression of approval by stockholders of one or more matters for which their approval is not required as a matter of law. In general, ratification by stockholders is effective to approve actions taken by a corporation and its board of directors, even if the actions are challenged by some of the stockholders, provided that such actions are not against public policy (such as actions involving fraud or similar egregious misconduct).

GM believes, therefore, that ratification by GM's common stockholders of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger should bar any claim (other than for fraud or similar egregious misconduct) against General Motors and its directors based on these transactions, including a claim alleging unfairness of these transactions to either or both classes of GM common stockholders or alleging any deficiency in the process of developing the terms of these transactions or the GM board of directors consideration or approval of these transactions.

You should understand that, as described in further detail in the answer to Question 7 above, by approving the proposals relating to the transactions, GM \$1 2/3 par value common stockholders and GM Class H common stockholders will be approving transactions that will not result in shares of GM Class H common stock being exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate as currently provided for under certain circumstances by the GM restated certificate of incorporation. In addition, by ratifying the GM/ Hughes separation transactions, which involve the distribution of a dividend of up to \$4.2 billion from Hughes to GM and the related reduction of GM's retained economic interest in Hughes by a commensurate amount, GM \$1 2/3 par value common stockholders and GM Class H common stockholders will be approving and consenting to, pursuant to the GM board policy statement, an asset transfer from Hughes to GM without a further distribution of a portion thereof from GM to GM Class H common stockholders in accordance with their tracking stock interest in Hughes, as described in further detail in the answer to Question 7 above.

For more information, see pages 21, 178 and 348.

Q9. What is the GM board of directors' recommendation regarding the proposals being submitted to GM common stockholders?

A9. The GM board of directors has unanimously approved the transactions and recommends that GM \$1 2/3 par value common stockholders and GM Class H common stockholders vote to approve each of the proposals described in this document by executing and returning the enclosed consent card as soon as possible.

For more information, see pages 21, 131, 182 and 352.

Q10. Which GM common stockholders are entitled to vote on the transactions?

A10. Only GM \$1 2/3 par value common stockholders and GM Class H common stockholders who held shares on the record date, August 9, 2002, are entitled to vote on the transactions.

For more information, see page 352.

Q11. Why are EchoStar common stockholders not being asked to vote on the proposed transactions?

A11. Approval of the Hughes/ EchoStar merger by EchoStar requires the approval of a majority of the voting power of all outstanding shares of EchoStar common stock. A trust controlled by Charles W. Ergen, the Chairman of the Board of Directors and Chief Executive Officer of EchoStar, as the holder of all of the outstanding shares of EchoStar Class B common stock, which represents about 90% of the voting power of all outstanding shares of EchoStar common stock, has already executed a written consent approving the Hughes/ EchoStar merger. This action alone was sufficient to obtain the vote of the EchoStar common stockholders necessary to approve the Hughes/ EchoStar merger. As a result, no further action is required on the part of any EchoStar stockholder, and the EchoStar stockholders are not being asked to vote on the Hughes/ EchoStar merger or any other matters, submit a proxy or take any other action. This document is being sent to EchoStar common stockholders for their information only.

For more information, see pages 189 and 358.

Q12. What should I do now?

A12. *GM Common Stockholders.* GM \$1 2/3 par value common stockholders and GM Class H common stockholders whose shares are not held in street name through a broker should complete, date, sign and return the enclosed consent card as directed in this document and in the related materials as soon as possible.

If you are a GM \$1 2/3 par value common stockholder or GM Class H common stockholder and you participate in certain employee savings plans identified elsewhere in this document, your consent will serve as a voting instruction for the plan trustees, plan committees or independent fiduciaries of those plans, who will vote your shares of GM common stock held in any of these employee savings plans in accordance with your instructions. You may submit your consent for shares held in any of these employee savings plans by executing and returning the enclosed consent card. You should understand that procedures differ among these employee savings plans with respect to the voting of shares for which no consent is received. These procedures are explained in greater detail elsewhere in this document.

If your shares of GM \$1 2/3 par value common stock and/or GM Class H common stock are held in street name by a broker, your broker will vote your shares only if you provide instructions to your broker on how to vote. You should follow the directions provided by your broker regarding how to instruct your broker to vote your shares. Without your instructions, your shares of GM common stock will not be voted in connection with the transactions, which will have the same effect as voting against the transactions.

Before submitting your consent or instructing your broker on how to vote, we urge all GM common stockholders to review and carefully consider the information contained in and incorporated by reference into this document, including the factors described in the section entitled *Risk Factors* beginning on page 55.

EchoStar Common Stockholders. EchoStar common stockholders do not need to take any action because, as explained in the answer to Question 11 above, the required EchoStar stockholder approval of the transactions has already been received. Accordingly, this document is being sent to EchoStar common stockholders for their information only. Nevertheless, this document contains important information about the Hughes/ EchoStar merger and we therefore urge EchoStar common stockholders to review it carefully.

For more information, see pages 347 and 358.

Q13. What happens if a GM common stockholder does not submit a consent?

A13. If a GM \$1 2/3 par value common stockholder or a GM Class H common stockholder does not submit a consent, it will have the same effect as a vote against the proposals relating to the transactions, which

approval is a condition to the completion of the transactions. Therefore, we urge all GM \$1 2/3 par value common stockholders and GM Class H common stockholders to please complete, date, sign and return the enclosed consent card as soon as possible. However, with respect to shares held through employee savings plans, procedures differ among the plans with respect to the voting of shares for which no consent is received. These procedures are explained in greater detail elsewhere in this document. Your vote is important regardless of the number of shares that you own.

For more information, see pages 352 and 353.

Q14. Can GM common stockholders revoke their approval once the consent is submitted?

A14. Yes. Any GM \$1 2/3 par value common stockholder or GM Class H common stockholder can revoke his or her consent, or any withholding of consent, at any time prior to the requisite GM common stockholder approval of the transactions. GM common stockholder approval of the proposals relating to the transactions will occur as soon as consents representing the requisite GM common stockholder approval described above in the answer to Question 6 are delivered to General Motors in accordance with Delaware corporation law, but no sooner than 20 business days after the date this document is mailed to GM common stockholders. However, if General Motors does not receive the number of consents required within 60 days of the earliest dated consent delivered to General Motors in accordance with Delaware corporation law, the requisite GM common stockholder approval of the proposals relating to the transactions will not have occurred.

You can revoke your consent by filing with the Secretary of General Motors a written notice stating that you would like to revoke your consent. You can also revoke your consent, or any withholding of consent, by filing with the Secretary of General Motors another consent bearing a later date. You should send any written revocations to the Secretary of General Motors at the following address:

**General Motors Corporation
Renaissance Center
P.O. Box 300
Mail Code 482-C38-B71
Detroit, Michigan 48265-3000
Attention: Secretary**

For more information, see page 352.

Q15. Should I send in my stock certificates now?

A15. No. You should NOT send in your stock certificates at this time. You will receive further correspondence regarding the exchange of shares after the transactions have been completed.

Q16. What should I do if I have other questions?

A16. If you are a GM \$1 2/3 par value common stockholder or GM Class H common stockholder and you have any questions about the GM/Hughes separation transactions or the Hughes/EchoStar merger, how to complete and submit your consent card, or if you would like to request additional copies of this document, please contact the GM consent solicitation agent as indicated below:

**Morrow & Co., Inc.
445 Park Avenue
5th Floor**

New York, New York 10022

() - (Toll-Free) for calls in the United States, Canada and Mexico
() - (Collect) for calls outside the United States, Canada and Mexico

If you are an EchoStar common stockholder and have any questions about the Hughes/ EchoStar merger, or if you would like to request additional copies of this document, please contact EchoStar as indicated below:

EchoStar Communications Corporation

5701 South Santa Fe Drive

Littleton, Colorado 80120

Telephone: () -

You may also obtain free copies of documents publicly filed by GM, Hughes, PanAmSat and EchoStar at the SEC's website at www.sec.gov, and you may also obtain certain of these documents at GM's website at www.gm.com or at Hughes' website at www.hughes.com or at PanAmSat's website at www.panamsat.com or at EchoStar's website at www.ehostar.com. We are not incorporating the contents of the websites of the SEC, GM, Hughes, PanAmSat, EchoStar or any other person into this document, but are providing this information for your convenience.

For more information on how to obtain copies of documents, see "Where You Can Find More Information" on page 366.

SUMMARY

In this summary, we highlight selected information which we describe in greater detail elsewhere in this document. This summary does not contain all of the important information contained in this document. You should read carefully this entire document and the other documents to which we refer for a more complete understanding of the GM/Hughes separation transactions, the Hughes/EchoStar merger and the other related transactions. In addition, we incorporate by reference into this document important business and financial information about GM, Hughes, PanAmSat and EchoStar that is set forth in other documents which these companies have filed publicly with the SEC. You may obtain the information incorporated by reference into this document without charge by following the instructions in the section entitled "Where You Can Find More Information" that begins on page 366.

The Companies

General Motors Corporation (See page 254)

General Motors is primarily engaged in the automotive and, through its wholly owned Hughes subsidiary, the telecommunications industries. Additional information about Hughes is included below. General Motors is the world's largest manufacturer of automotive vehicles. GM also has financing and insurance operations and, to a lesser extent, is engaged in other industries. GM's other operations include the designing, manufacturing and marketing of locomotives and other heavy-duty transmissions.

As a result of the GM/Hughes separation transactions, the Hughes business will be separated from GM.

GM's principal executive offices are located at 300 Renaissance Center, Detroit, Michigan 48265-3000 and GM's telephone number is (313) 556-5000.

Hughes Electronics Corporation (See page 269)

Hughes is a leading global provider of digital entertainment, information and communications services and satellite-based private business networks. Hughes has been a pioneer in many aspects of the satellite communications industry, and its technologies have driven the creation of new services and markets and have established Hughes as a leader in each of the markets it serves.

Hughes is currently a wholly owned subsidiary of General Motors. However, as a result of the GM/ Hughes separation transactions, the business of Hughes will be separated from GM and, as a result of the Hughes/ EchoStar merger, the business of Hughes will become part of New EchoStar.

Hughes' principal executive offices are located at 200 North Sepulveda Boulevard, El Segundo, California 90245 and Hughes' telephone number is (310) 662-9688.

EchoStar Communications Corporation (See page 288)

EchoStar operates two business units: the DISH Network and EchoStar Technologies Corporation. The DISH Network is a direct broadcast satellite subscription television service in the United States. EchoStar Technologies Corporation is engaged in the design, development, distribution and sale of direct broadcast satellite set-top boxes, antennae and other digital equipment for the DISH Network and the design, development and distribution of similar equipment for international satellite service providers.

As a result of the Hughes/ EchoStar merger, the business of EchoStar will become part of New EchoStar.

EchoStar's principal executive offices are located at 5701 South Santa Fe Drive, Littleton, Colorado 80120 and EchoStar's telephone number is (303) 723-1000.

New EchoStar

HEC Holdings will be the surviving corporation in the Hughes/ EchoStar merger and will become New EchoStar. HEC Holdings will be the company whose shares of Class C common stock will be distributed in the Hughes split-off and whose shares of Class A common stock and Class B common stock will be distributed in the Hughes/ EchoStar merger. HEC Holdings is a newly formed company that is currently a wholly owned subsidiary of General Motors. HEC Holdings has not yet conducted any significant activities other than those relating to its formation, matters relating to the GM/ Hughes separation transactions, the Hughes/ EchoStar merger and other related transactions and the preparation and filing of this document.

In the Hughes/ EchoStar merger, EchoStar will be merged with HEC Holdings and the name of HEC Holdings will be changed to EchoStar Communications Corporation. Immediately after the Hughes/ EchoStar merger, the business of New EchoStar will consist of the combined businesses currently conducted separately by Hughes and EchoStar. Hughes will then be a wholly owned subsidiary of New EchoStar.

HEC Holdings principal executive offices are currently located at 200 North Sepulveda Boulevard, El Segundo, California 90245 and HEC Holdings phone number is currently (310) 662-9688. After the completion of the Hughes/ EchoStar merger, New EchoStar s principal executive offices will be located at 5701 South Santa Fe Drive, Littleton, Colorado 80120 and New EchoStar s telephone number will be (303) 723-1000.

Description of the Transactions

(See pages 82 and 208)

The transactions that are the subject of this document principally consist of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger, but also include other related transactions contemplated by the agreements among GM, Hughes, HEC Holdings and EchoStar. The obligations of the companies to complete the transactions that are the subject of this document are subject to the satisfaction or waiver of certain conditions, which are discussed below at Conditions to Completing the Transactions. The transactions are structured so that the Hughes/ EchoStar merger will occur immediately after the completion of the GM/ Hughes separation transactions.

Let us tell you more about the transactions:

The GM/ Hughes Separation Transactions (See pages 87, 208 and 223)

The proposed GM/ Hughes separation transactions are designed to split off the Hughes business from GM and prepare it to complete the proposed combination with EchoStar. As a result of the GM/ Hughes separation transactions, HEC Holdings, which will be the parent company of Hughes at the time of the completion of the Hughes split-off, will become an independent, publicly owned company immediately prior to the Hughes/ EchoStar merger.

Hughes Recapitalization. Immediately before the split-off of Hughes from General Motors, Hughes will declare and pay a dividend of up to \$4.2 billion to General Motors. Upon receipt of this dividend, GM s retained economic interest in Hughes will be reduced by an amount that reflects the dividend. After its receipt of the Hughes dividend distribution, GM will contribute all of the outstanding stock of Hughes to HEC Holdings. As a result, HEC Holdings will be the parent company of Hughes. In exchange for the contribution of Hughes stock to HEC Holdings, General Motors will receive shares of HEC Holdings Class C common stock such that GM holds a number of shares of HEC Holdings Class C common stock equal to the number of outstanding shares of GM Class H common stock plus a number of shares representing the remaining portion of GM s retained economic interest in Hughes.

Hughes Split-Off. After the Hughes recapitalization, HEC Holdings will be separated from General Motors by means of a distribution of shares of HEC Holdings Class C common stock to the GM Class H common stockholders in exchange for and redemption of their shares of GM Class H common stock and, as a result, will become an independent, publicly owned company. Immediately following

the Hughes split-off, HEC Holdings will be owned entirely by the former GM Class H common stockholders and, if applicable, GM and the GM \$1 2/3 par value common stockholders.

If and to the extent required in order to maintain the tax-free status of the Hughes split-off, GM may make a pro rata distribution to the GM \$1 2/3 par value common stockholders of a portion of the HEC Holdings Class C common stock it receives in the Hughes recapitalization. GM currently estimates that it would make a distribution in order to maintain the tax-free status of the Hughes split-off only if the average market price of GM Class H common stock during the five trading days preceding the completion of the Hughes split-off were to be greater than \$ _____ per share or less than \$ _____ per share. This price calculation is based upon the number of shares of GM Class H common stock outstanding as of _____, 2002 and assumes that any shares of HEC Holdings Class C common stock transferred by GM in debt-for-equity exchanges do not count toward the satisfaction of the relevant tax test. The average market price of GM Class H common stock during the five trading days preceding _____, 2002 was \$ _____ per share. If GM determines that a pro rata distribution is required, then the number of shares of HEC Holdings Class C common stock to be distributed to the GM \$1 2/3 par value common stockholders and the record date for the distribution will be publicly announced by GM around the time of the completion of the Hughes split-off.

Other Separation-Related Arrangements. The GM/Hughes separation transactions include certain other arrangements related to the Hughes recapitalization and the Hughes split-off. As described in greater detail elsewhere in this document, these arrangements generally address matters relating to the separation of the Hughes business from General Motors pursuant to the Hughes split-off. Among other things, GM and Hughes have entered into arrangements with respect to indemnification matters, the allocation and sharing of taxes, intellectual property and the administration of certain employee matters.

Reduction in GM's Retained Economic Interest in Hughes (See pages 84 and 88)

The reduction of GM's retained economic interest in Hughes as part of the Hughes recapitalization as described above will occur by adjusting the allocation between the two classes of GM common stock based on the actual amount of the Hughes dividend distribution and the average market price of GM Class H common stock during a specified period preceding the time of the completion of the GM/Hughes separation transactions. The number of shares of HEC Holdings Class C common stock, if any, that GM will hold immediately after the completion of the Hughes split-off will be based on the amount of GM's retained economic interest in Hughes, if any, after that interest has been reduced to reflect the Hughes dividend distribution.

The GM restated certificate of incorporation allocates the earnings of Hughes between the two classes of GM common stock. The percentage of Hughes' earnings that is allocable to the GM \$1 2/3 par value common stock represents what we sometimes refer to as GM's retained economic interest in Hughes. We measure the value of GM's retained economic interest in Hughes with reference to the market value of the GM Class H common stock and the number of shares of GM Class H common stock outstanding. For illustrative purposes, the following table sets forth a range of hypothetical values for GM's retained economic interest in Hughes, after giving effect to the payment of the dividend from Hughes to GM as part of the Hughes recapitalization, based on the number of shares of GM Class H common stock outstanding on _____, 2002 and a range of hypothetical average market prices of GM Class H common stock, including \$ _____, which was the average market price of GM Class H common stock during the five trading days preceding _____, 2002. **You should note that, based on a number of assumptions described elsewhere in this document, at average market prices below \$ _____ per share, the transactions would not be completed unless GM elects voluntarily to reduce the number of shares subject to GM share dispositions and/or the amount of the Hughes dividend distribution to less than \$4.2 billion as discussed further below at Purposes of the Transactions Liquidity and Value Provided to GM and GM Common Stockholders. Among other things, the issuance of additional equity or equity-linked securities by EchoStar or an increase in the number of shares of EchoStar common stock issuable upon conversion of EchoStar convertible debt securities prior to the completion of the transactions could result in an increase in the average market price necessary to cause**

certain conditions to the transactions to be satisfied without GM electing to make such voluntary reductions. We further note that, in order to maintain the tax-free status of the Hughes split-off, GM is required to distribute at least 80% of the HEC Holdings Class C common stock in the Hughes split-off. Accordingly, to the extent necessary to satisfy this condition, GM could be required to distribute excess shares as described in further detail above and elsewhere in this document.

Illustrative Calculation of Effect of Hughes Recapitalization on Economic Interests in Hughes

Average GM Class H Common Stock Price	Amount of Hughes Dividend to GM	Economic Interests In Hughes After the Hughes Recapitalization	
		GM Class H Common Stockholders	GM
	(in billions)	(in billions, except percentages)	
\$	\$	\$ (%)	\$ (%)
\$	\$	\$ (%)	\$ (%)
\$	\$	\$ (%)	\$ (%)
\$	\$	\$ (%)	\$ (%)
\$	\$	\$ (%)	\$ (%)
\$	\$	\$ (%)	\$ (%)

The table above is intended to illustrate how the Hughes recapitalization may affect the retained economic interest of GM in Hughes and the interest of the GM Class H common stockholders in Hughes based on a range of hypothetical average market prices of GM Class H common stock. We have selected this range of hypothetical average market prices in an effort to provide helpful information to GM and EchoStar stockholders. However, you should understand that the actual average market price of GM Class H common stock at the time of the completion of the GM/Hughes separation transactions may differ materially from the prices shown in the table above (including by being outside the range of such prices set forth in the table). In addition, we will not know until immediately before the completion of the GM/ Hughes separation transactions, the actual amount of the Hughes dividend distribution, the corresponding reduction of GM's retained economic interest in Hughes, the interest of the GM Class H common stockholders in Hughes after the reduction and GM's retained economic interest, if any, in Hughes after the reduction. These amounts could vary materially from the amounts shown in the illustration due to differences between our assumptions and the actual facts and circumstances existing at the time the GM/ Hughes separation transactions are completed, including the average market price of GM Class H common stock during the specified period preceding the completion of the GM/Hughes separation transactions.

In addition, other factors may affect GM's retained economic interest in Hughes between now and the completion of the GM/ Hughes separation transactions. For instance, any debt-for-equity exchanges, as described below at GM Share Dispositions, completed by GM prior to the Hughes split-off would involve the issuance of new shares of GM Class H common stock by GM and would have the effect of reducing GM's retained economic interest in Hughes and increasing the number of outstanding shares of GM Class H common stock by the number of shares issued in the debt-for-equity exchanges.

The Hughes/ EchoStar Merger (See pages 94 and 229)

Immediately after the completion of the Hughes split-off, the businesses of Hughes and EchoStar will be combined pursuant to the merger of EchoStar and HEC Holdings, with HEC Holdings as the surviving corporation. In connection with the Hughes/ EchoStar merger, the name of HEC Holdings will be changed to EchoStar Communications Corporation.

GM Share Dispositions (See pages 102 and 212)

The transaction agreements permit GM to dispose of up to 100 million shares of GM Class H common stock and/or New EchoStar Class C common stock, in the aggregate, between now and the date that is six months after the completion of the Hughes/ EchoStar merger. During this period, GM may issue new shares

of GM Class H common stock, or distribute any shares of New EchoStar Class C common stock it holds after the Hughes/ EchoStar merger, as applicable, by exchanging such shares for the satisfaction of outstanding liabilities of GM to certain of GM's creditors. To the extent that GM does not transfer all of these shares in debt-for-equity exchanges, GM may sell the shares for cash during the six months following the completion of the Hughes/EchoStar merger or may retain the shares for up to five years following the completion of the GM/Hughes separation transactions. Any GM share dispositions would provide GM with liquidity and, if structured as debt-for-equity exchanges, would permit GM to benefit from debt reduction. However, any GM share dispositions will also reduce GM's retained economic interest in Hughes or its interest in New EchoStar, as the case may be.

The aggregate number of shares that GM may issue, sell or distribute in GM share dispositions is 100 million shares. However, this maximum number of shares is subject to reduction under certain circumstances in order to satisfy one of the conditions to the completion of the GM/Hughes separation transactions and Hughes/EchoStar merger as described below at Conditions to Completing the Transactions. Also, GM may not receive, and thus may not transfer in GM share dispositions, any shares of New EchoStar Class C common stock in excess of the value of GM's retained economic interest in Hughes as reduced to reflect the Hughes dividend distribution.

Financings and Related Matters (See pages 103 and 104)

The completion of the proposed Hughes/EchoStar merger and related transactions will require about \$7.025 billion of cash, of which:

up to \$2.7 billion will be needed in order to refinance the indebtedness to be incurred by Hughes to pay a portion of the \$4.2 billion Hughes dividend distribution to GM;

up to about \$4.125 billion will be needed in order to repay other obligations of Hughes (including a \$1.5 billion loan and other borrowings under credit facilities provided by GMAC) and to fund the operations of New EchoStar after the completion of the Hughes/EchoStar merger; and

the remainder of about \$0.2 billion will be needed in order to pay estimated fees and expenses in connection with the Hughes/EchoStar merger and related transactions.

At the time of the signing of the Hughes/EchoStar merger agreement, EchoStar had about \$1.5 billion of available cash on hand and, accordingly, EchoStar and Hughes obtained \$5.525 billion in bridge financing commitments for the Hughes/EchoStar merger and related transactions. These bridge financing commitments have been reduced to \$3.325 billion as a result of the sale of \$700 million of aggregate principal amount senior notes due 2009 issued by a wholly owned indirect subsidiary of EchoStar and the \$1.5 billion investment by Vivendi Universal in EchoStar Series D convertible preferred stock. Any other financings that EchoStar or, under certain circumstances, Hughes completes prior to the completion of the Hughes/EchoStar merger would further reduce the bridge financing commitments on a dollar-for-dollar basis. The remaining \$3.325 billion of cash required in connection with the Hughes/EchoStar merger, which we refer to as the Hughes/EchoStar merger financing, is expected to come from new cash to be raised by EchoStar, Hughes or a subsidiary of Hughes on or prior to the completion of the Hughes/EchoStar merger through public or private debt or equity offerings, bank debt or a combination thereof.

To the extent that such cash is not raised in these ways, the bridge financing commitments are designed to fund the amount of the shortfall. Under the bridge financing commitments, a number of major banks have committed to lend up to \$3.325 billion, which is the amount necessary for the remainder of the Hughes/EchoStar merger financing. Before the banks are obligated to lend this amount, however, Hughes, EchoStar and the banks must negotiate and finalize loan documents that would govern the loans. The banks currently are bound by a commitment letter. Whether or not final documents are entered into, the banks can terminate their commitment for a number of reasons, as described elsewhere in this document. As of the date of this document, we do not believe that any events have occurred that would allow any of the banks to terminate their commitments.

Hughes previously had the right to terminate the Hughes/ EchoStar merger agreement if the agreement or agreements documenting the remainder of the Hughes/ EchoStar merger financing had not been entered into, or the definitive terms of such agreement or agreements had not been agreed, by April 26, 2002. Hughes, EchoStar and GM agreed in April, however, to extend this date to June 25, 2002, and have agreed to further extend the June 25, 2002 date to a date not less than 45 calendar days after the filing of Amendment No. 4 to the registration statement of which this document is a part.

In addition, pursuant to the Hughes/ EchoStar merger agreement, EchoStar agreed that by a specified date it would take certain actions to address the triggering of change in control provisions under certain indentures of EchoStar or its subsidiaries, or submit to Hughes, for its good faith consideration, an alternative plan for otherwise addressing the change in control provisions. Subsequent to the signing of the Hughes/ EchoStar merger agreement, GM, Hughes and EchoStar agreed to extend to October 4, 2002 the deadline for EchoStar to take such actions or present Hughes with an alternative plan for addressing this issue. If any alternative plan suggested by EchoStar is rejected by Hughes, EchoStar will be required to take certain actions to promptly (and in any event within a specified period of time) address the triggering of such change in control provisions. For more information, see The Transactions Description of the Transactions Hughes/ EchoStar Merger Financings.

The amount of the Hughes/EchoStar merger financing that may be raised by EchoStar prior to the Hughes/EchoStar merger is severely restricted by the agreements among GM, Hughes and EchoStar and the terms of the bridge financing commitment.

Liquidity and Funding Needs of New EchoStar (See page 108 and the Risk Factors section beginning on page 55)

As discussed above at Financings and Related Matters, the completion of the proposed Hughes/ EchoStar merger and related transactions (including the up to \$4.2 billion Hughes dividend distribution to GM) will require about \$7.025 billion of cash, of which \$3.325 billion of cash remains to be raised. This remaining \$3.325 billion of cash is expected to be financed by debt or equity offerings by EchoStar, Hughes or a subsidiary of Hughes on or prior to the completion of the Hughes/EchoStar merger. New EchoStar or its subsidiaries, as applicable, will assume any new indebtedness incurred at EchoStar, Hughes and/or their respective subsidiaries. New EchoStar will also inherit the existing substantial indebtedness of EchoStar and its subsidiaries upon the completion of the Hughes/EchoStar merger.

Substantially all of the \$7.025 billion of Hughes/EchoStar merger financing is expected to be expended in connection with the completion of the Hughes/EchoStar merger. New EchoStar is currently expected to require substantial additional financing following the completion of the Hughes/EchoStar merger to fund capital expenditures and costs and expenses in connection with funding its operations, domestic and international investments and its growth strategy and the repayment of indebtedness, particularly in light of the significant cash requirements of certain parts of the Hughes business.

Among the capital expenditures that New EchoStar currently plans to undertake following the completion of the Hughes/EchoStar merger is the deployment of a new satellite that would enable New EchoStar to deliver local broadcast television in all 210 designated market areas in the United States. In the past, Hughes and EchoStar have typically been able to construct, launch and insure their satellites for a cost in the range of about \$175 million to about \$350 million.

In addition, New EchoStar is also expected to incur substantial expenses in connection with the integration of the businesses of Hughes and EchoStar, including up to \$2.5 billion over a two- to four-year period following the completion of the Hughes/EchoStar merger to standardize and update the set top box equipment used by customers to receive New EchoStar's direct broadcast satellite signals.

It is also expected that New EchoStar will become obligated to pay significant retention bonuses, severance benefits and pension enhancements to certain employees of Hughes as a result of the Hughes/ EchoStar merger. The retention bonus payments are expected to be up to about \$110 million, while the amount of severance benefits to be paid to executives of Hughes with change-in-control agreements could be up to \$41 million, depending on decisions to layoff such executives, if any. Additional amounts to be paid for severance benefits and pension enhancements will depend upon,

among other things, the number of Hughes employees that are terminated as a result of the Hughes/EchoStar merger, and could be material.

EchoStar or New EchoStar, as the case may be, may also require a significant amount of cash either to solicit consents from the holders of certain of its debt instruments and/or otherwise to comply with its obligations under the terms of the relevant indentures as a result of the Hughes/ EchoStar merger constituting a change in control under the relevant indentures.

Based on the above as well as other factors, we currently anticipate that New EchoStar will experience net losses through 2003, and could continue to experience net losses for years subsequent to 2003 for the reasons discussed elsewhere in this document.

New EchoStar will depend upon the earnings of its subsidiaries and the payment of funds by its subsidiaries to it (or a subsidiary obligor) in the form of loans, dividends or other payments in order to service its or such subsidiary's debt obligations, and we cannot assure you that these subsidiaries will be able to make such payments to New EchoStar or any such subsidiary in an amount sufficient to pay the principal of or interest on the indebtedness owed by New EchoStar or any such subsidiary, including the Hughes/ EchoStar merger financing. In addition, the terms of New EchoStar's and its subsidiaries' indebtedness, including the terms of the indebtedness incurred in connection with the Hughes/EchoStar merger financing, will contain restrictions and covenants that limit the operational and financial flexibility of New EchoStar and its subsidiaries, likely including severe limitations on the ability of New EchoStar's subsidiaries to pay dividends and make other distributions to New EchoStar or the relevant subsidiary obligor. These restrictions on the ability of New EchoStar's subsidiaries to make payments and other distributions to New EchoStar or the relevant subsidiary obligor will make it more difficult for New EchoStar to satisfy its expected significant funding needs, including the significant cash requirements of certain parts of the Hughes business.

In addition, under the agreements among EchoStar, Hughes, HEC Holdings and GM, New EchoStar's ability to issue any additional equity or equity-linked securities for two years following the completion of the Hughes/EchoStar merger will be severely restricted, absent possible favorable IRS rulings. The extent to which New EchoStar would raise additional funds and the timing of financing activities following the completion of the Hughes/ EchoStar merger would depend, among other things, upon New EchoStar's cash on hand and operating needs following completion of the merger, its strategic plans related to subscriber acquisition, satellite construction and launch and the realization of the expected merger synergies. In this regard, New EchoStar's strategic plans would also be influenced by the attractiveness and availability of financing and other general economic conditions affecting the business of New EchoStar at the time such strategic investment decisions are contemplated.

New EchoStar's additional funding requirements following the completion of the Hughes/ EchoStar merger are expected to vary based on the factors described above, but in any event are expected to be significant. To the extent that New EchoStar does not have sufficient income or other sources of cash to fund its operating needs following the completion of the merger, it will be necessary for New EchoStar to either reduce its operating costs, sell assets or, given that New EchoStar will be severely restricted in its ability to raise equity capital for two years following completion of the Hughes/ EchoStar merger, incur additional indebtedness to finance its activities. We currently believe that New EchoStar will be able to fund its operating activities from operating income and through a combination of one or more of cash on hand, asset sales, debt financing and, if favorable IRS rulings are obtained, equity financing.

PanAmSat Stock Sale (See pages 110 and 243)

If the Hughes/ EchoStar merger agreement is terminated because certain financing or regulatory-related conditions have not been satisfied, EchoStar and Hughes have agreed that, subject to the terms and conditions contained in the PanAmSat stock purchase agreement, EchoStar will purchase the approximately 81% interest in PanAmSat held by certain subsidiaries of Hughes for a purchase price of \$22.47 per share, or an aggregate amount of about \$2.7 billion. This purchase price was determined by valuing Hughes' indirect interest in PanAmSat on the basis of a 5% premium over the average market price of PanAmSat stock during a specified period preceding October 28, 2001, the date of the public announcement of the transactions. The purchase

price is payable, depending on the circumstances, either solely in cash or in a combination of cash and either debt or equity securities of EchoStar. Hughes agreed to the PanAmSat stock sale because it will provide near-term liquidity to Hughes in the event that the Hughes/ EchoStar merger cannot be completed because financing for the Hughes/ EchoStar merger or certain regulatory approvals of the Hughes/ EchoStar merger cannot be obtained. Hughes currently expects that the proceeds of any PanAmSat stock sale would be used to repay outstanding debt obligations of Hughes and to fund Hughes operations under circumstances in which the Hughes/ EchoStar merger was not completed.

The completion of the PanAmSat stock sale is subject to a number of conditions, including, among other things, the expiration or termination of the waiting period applicable to the PanAmSat stock sale under the Hart-Scott-Rodino Act, the absence of any effective injunction or order which prevents the completion of the PanAmSat stock sale, the receipt of Federal Communications Commission approval for the transfer of licenses in connection with the PanAmSat stock sale and that there will not have occurred and be continuing any material adverse effect with respect to PanAmSat, other than any material adverse effect that results from factors affecting the economy or financial markets as a whole or generally affecting the industries in which PanAmSat operates. If these conditions were not fulfilled in accordance with the terms of the PanAmSat stock purchase agreement, EchoStar would not be obligated to complete the PanAmSat stock sale.

EchoStar Regulatory Termination Fee (See pages 100 and 242)

EchoStar will be required to pay Hughes a \$600 million termination fee, in the circumstances described in greater detail elsewhere in this document, if:

EchoStar or Hughes terminates the Hughes/ EchoStar merger agreement as a result of a permanent injunction or final and nonappealable order prohibiting the Hughes/ EchoStar merger in an action brought by a federal, state or local authority under U.S. federal or state antitrust laws or FCC regulations; or

Hughes terminates the Hughes/ EchoStar merger agreement because the waiting period applicable to the Hughes/ EchoStar merger under the Hart-Scott-Rodino Act does not expire or terminate by late December 2002 or because of a failure to obtain FCC approval by early January 2003 (in each case, subject to extension under certain circumstances).

It is currently expected that any proceeds received by Hughes in payment of this fee would be used to repay outstanding debt obligations of Hughes and to fund Hughes operations.

GM/Hughes Termination Fee (See pages 100 and 242)

Hughes will be required to pay EchoStar a \$600 million termination fee, in the circumstances described in greater detail elsewhere in this document, if:

EchoStar terminates the Hughes/EchoStar merger agreement because GM fails to obtain the requisite GM common stockholder approval of the transactions, but only under certain circumstances where GM or Hughes enters into an agreement with respect to a competing transaction to the transactions, which generally refers to an alternative strategic transaction involving Hughes and any third party other than EchoStar; or

EchoStar or Hughes terminates the Hughes/ EchoStar merger agreement because GM enters into, or the GM board of directors approves or recommends to GM common stockholders for their approval, a competing transaction or because, under certain circumstances, the GM board of directors provides notice to EchoStar that it cannot or will not be able to recommend the transactions or is required to change or revoke its recommendation of the transactions to GM common stockholders for their approval.

Structure of the Transactions

In order to help you better understand the GM/ Hughes separation transactions and the Hughes/ EchoStar merger and how they will affect GM, HEC Holdings, Hughes and EchoStar, the charts below illustrate, in simplified form, the following:

BEFORE THE TRANSACTIONS: The organizational structures of GM, HEC Holdings, Hughes and EchoStar before the GM/ Hughes separation transactions and the Hughes/ EchoStar merger;

THE HUGHES RECAPITALIZATION: The steps involved in and the effects of the Hughes recapitalization on GM, HEC Holdings and Hughes; and

AFTER THE TRANSACTIONS: The organizational structures of GM, Hughes and New EchoStar (i.e., HEC Holdings) immediately after the GM/ Hughes separation transactions and the Hughes/ EchoStar merger.

BEFORE THE TRANSACTIONS

THE HUGHES RECAPITALIZATION

AFTER THE TRANSACTIONS

Purposes of the Transactions

(See pages 112 and 186)

There are two principal purposes of the transactions. First, the transactions are expected to better position the businesses of Hughes and EchoStar to compete in the multi-channel video programming distribution market and, overall, in the telecommunications industry. Second, the transactions are expected to provide significant liquidity and value to GM and its common stockholders.

New EchoStar Business Opportunities

After the transactions, New EchoStar will be one of the nation's largest subscription television platforms. The transactions are expected to provide New EchoStar with greater opportunities and financial resources to develop an expanded competitive business and an opportunity to realize significant economies of scale and generate substantial cost and revenue synergies. In particular, among other things, New EchoStar will seek to:

eliminate duplicate programming and utilize reclaimed broadcast spectrum to deliver more program and service offerings;

standardize the EchoStar and DIRECTV set-top boxes, which is expected to both reduce manufacturing costs and enable improved anti-piracy protection;

combine and improve the distribution networks of EchoStar and DIRECTV;

consolidate customer service and other facilities and infrastructure;

reduce subscriber acquisition costs, subscriber churn, programming costs and eliminate duplicative overhead;

introduce local-into-local broadcast channel service in all designated market areas;

expand two-way high-speed broadband;

expand high-definition television, video-on-demand, pay-per-view and educational programming offerings; and

generate new sources of local and national advertising revenue.

We believe that New EchoStar's broadband offerings could play an important role in spanning the digital divide between urban and suburban customers with multiple choices for high-speed Internet access and rural customers with limited choices for high-speed Internet access. Furthermore, on February 26, 2002, EchoStar and Hughes announced a new proposal that is designed to enable New EchoStar to deliver local broadcast television channels in all 210 designated market areas in the United States. We currently anticipate that this proposal would be implemented within about 24 to 36 months after the completion of the Hughes/ EchoStar merger. In their joint satellite application filed with the FCC, the companies detailed a technically and commercially feasible Local Channels, All Americans plan developed by EchoStar and DIRECTV engineers that is designed to allow New EchoStar to offer every consumer in the contiguous continental United States, Alaska and Hawaii access to satellite-delivered local television channels.

In the filing, the companies seek authority to launch and operate a new spot-beam satellite that, when combined with four existing and under-construction EchoStar and DIRECTV spot-beam satellites and spectrum efficiencies achieved by combining frequencies from three of the companies orbital locations, is designed to enable New EchoStar to broadcast local television channels in all 210 designated market areas, including full compliance with federal must carry requirements. Currently, EchoStar and DIRECTV deliver local broadcast channels via satellite to consumers in fewer than 60 metropolitan designated market areas. The Hughes/ EchoStar merger is expected to eliminate carriage of duplicative content a total of more than 500 identical channels from the EchoStar and DIRECTV satellites which, when coupled with advanced spot-beam satellites and efficiencies expected to be created by the Hughes/ EchoStar merger, would enable local channel delivery in all U.S. designated market areas.

Liquidity and Value Provided to GM and GM Common Stockholders (See pages 85 and 112)

The transactions offer a significant premium to GM and its common stockholders for their economic interests in Hughes, as described in greater detail elsewhere in this document. The transactions are also designed to provide significant liquidity to General Motors in respect of GM's current retained economic interest in Hughes, which will help to support the credit position of GM after the transactions. This liquidity will be provided by the dividend from Hughes of up to \$4.2 billion and, if applicable, from debt reduction or cash proceeds resulting from GM share dispositions. GM will also realize value to the extent of any shares of New EchoStar Class C common stock that it receives as a result of the transactions and does not dispose of within six months following the completion of the Hughes/EchoStar merger.

The amount of value and liquidity to be provided to GM will depend on the value of its retained economic interest in Hughes at the time that the GM/ Hughes separation transactions are completed. The amount of the dividend to be paid by Hughes to GM and the number of shares of New EchoStar Class C common stock that GM will hold as a result of the GM/ Hughes separation transactions will be based on the value of GM's retained economic interest in Hughes at that time, which will be determined by the average market price of GM Class H common stock during a specified period prior to the Hughes split-off and the number of shares of GM Class H common stock outstanding at that time.

For illustrative purposes, the following table sets forth a range of hypothetical average market prices of GM Class H common stock, including \$ _____, which was the average market price of GM Class H common stock during the five trading days preceding _____, 2002, and calculates the amount of the dividend to GM and the number of shares of New EchoStar Class C common stock, if any, that would be available for GM share dispositions or otherwise to be retained by GM. We have selected this range of hypothetical average market prices in an effort to provide helpful information to GM and EchoStar stockholders. However, you should understand that the actual average market price of GM Class H common stock at the time of the completion of the GM/ Hughes separation transactions may differ materially from the prices shown in the table below (including by being outside the range of such prices set forth in the table). In addition, these illustrative calculations are based on a number of assumptions described elsewhere in this document, including that GM shall not have disposed of any shares of GM Class H common stock in debt-for-equity exchanges and that EchoStar shall not have issued any additional equity or equity-linked securities or increased the number of shares of EchoStar common stock issuable upon conversion of EchoStar convertible debt securities prior to the completion of the transactions. The actual amounts could vary materially from the amounts shown in the illustration below due to differences between our assumptions and the actual facts and circumstances existing at the time that the GM/ Hughes separation transactions are completed.

Illustrative Calculation of Liquidity and Value to be Provided to GM in the Transactions

Average GM Class H Common Stock Price	Amount of Hughes Dividend to GM	Number of Shares of New EchoStar Class C Common Stock Available for GM Share Dispositions	Number of Shares of New EchoStar Class C Common Stock Retained by GM
	(in billions)	(in millions)	(in millions)
\$ _____	\$ _____		
\$ _____	\$ _____		
\$ _____	\$ _____		
\$ _____	\$ _____		
\$ _____	\$ _____		

In reviewing the table above, you should note the following:

at average market prices of GM Class H common stock that are less than \$ _____ per share, the dividend amounts shown in the table have been reduced to less than \$4.2 billion in order to satisfy the value condition described below at _____ Conditions to Completing the Transactions; and

at average market prices of GM Class H common stock that are less than \$ _____ per share, the number of shares subject to GM share dispositions shown in the table reflects reductions that GM could elect to make, and the corresponding increases to the number of shares retained by GM, to the extent necessary in order to satisfy the equity headroom condition described below at _____ Conditions to Completing the Transactions.

You should understand, however, that GM would not be required to proceed with the transactions if doing so would require GM to:

receive a dividend in an amount less than \$4.2 billion (except for a reduction of the dividend to as low as \$3.5 billion, but only if and to the extent that GM has previously disposed of more than 60 million shares of GM Class H common stock in debt-for-equity exchanges); or

reduce the number of shares subject to GM share dispositions to less than 60 million.

However, GM has the right, but not the obligation, to elect to reduce the amount of the dividend, or the number of shares of New EchoStar Class C common stock that would be subject to GM share dispositions, or both, to less than these amounts in order to satisfy the conditions to the transactions and permit the transactions to be completed. Any such reduction in the amount of the dividend would reduce the amount of liquidity and value to be provided to GM, and any such reduction in the number of shares subject to GM share dispositions would reduce the amount of liquidity to be provided to GM (but such shares would be retained by GM and would be available for other dispositions for up to five years).

We cannot assure you that GM would elect to make such voluntary reductions in order to complete the transactions. As of the date of this document, GM has not made any determination regarding whether or to what extent GM would be willing to make any such voluntary reductions. GM currently expects that it would make any determination regarding any such voluntary reductions immediately before the completion of the Hughes split-off, based on factors it determines to be relevant at that time.

Finally, we note that, in order to maintain the tax-free status of the Hughes split-off, GM is required to distribute at least 80% of the Class C common stock of HEC Holdings in the Hughes split-off. Accordingly, to the extent necessary to satisfy this condition, GM could be required to distribute excess shares as described elsewhere in this document.

**Fairness of the Transactions to GM Common Stockholders;
Recommendation of the GM Board of Directors**

(See pages 131, 182 and 352)

After careful consideration, based on the factors and other matters described elsewhere in this document, the GM board of directors has determined that the transactions that are the subject of this document are advisable and in the best interests of General Motors and its common stockholders and that those transactions as a whole, on the terms and conditions of the transaction agreements, are fair to the holders of GM \$1 2/3 par value common stock and to the holders of GM Class H common stock. By voting to approve the proposals relating to the transactions, GM common stockholders will be ratifying the GM/Hughes separation transactions and the Hughes/ EchoStar merger. As further described elsewhere in this document, GM believes that such ratification should bar any claim (other than for fraud or similar egregious misconduct) against General Motors and its directors based on these transactions, including a claim alleging unfairness of these transactions to the holders of either or both classes of GM common stock or alleging any deficiency in the process of developing the terms of these transactions or the GM board of directors' consideration or approval of these transactions.

In connection with its review of the transactions, the GM board of directors has received opinions from several investment banking firms. Two independent investment banking firms, Merrill Lynch and Bear Stearns, financial advisors to GM in connection with the GM/Hughes separation transactions, have provided opinions to the GM board of directors to the effect that, on the basis of and subject to the assumptions, conditions, limitations and other matters described in those opinions, as of the date of the opinions, taking into account all relevant financial aspects of the transactions taken as a whole, the consideration to be provided to

GM and its subsidiaries, to the holders of GM \$1 2/3 par value common stock, if applicable, and to the holders of GM Class H common stock in the GM/Hughes separation transactions is fair, from a financial point of view, to the holders of GM \$1 2/3 par value common stock, as a class, and the holders of GM Class H common stock as a class, respectively.

Both the Hughes board of directors and the GM board of directors have also received opinions from two other independent investment banking firms, Credit Suisse First Boston and Goldman Sachs, financial advisors to Hughes in connection with the Hughes/EchoStar merger, to the effect that, based upon and subject to the matters described in those opinions and based upon such other matters as Credit Suisse First Boston and Goldman Sachs considered relevant, as of the date of their opinions and based on market conditions as of that date, the exchange ratios set forth in the Hughes/EchoStar merger agreement are fair, from a financial point of view, to the holders of Hughes Class C common stock immediately prior to the Hughes/EchoStar merger, including GM and holders of GM \$1 2/3 par value common stock and GM Class H common stock, as applicable. We have included the full text of the fairness opinions received by the GM board of directors in Appendix C to this document. We urge you to read each of these opinions carefully. In addition, you should understand that a significant portion of the fees to be paid to the financial advisors of GM and Hughes is contingent upon the completion of the transactions.

The GM board of directors has unanimously approved the transactions and recommends that the GM \$1 2/3 par value common stockholders and GM Class H common stockholders vote to approve each of the proposals described in this document by executing and returning the enclosed consent card as soon as possible.

Recommendation of the EchoStar Board of Directors

(See page 189)

After careful consideration, the EchoStar board of directors has unanimously determined that the Hughes/EchoStar merger and the related transactions are advisable, fair to and in the best interests of EchoStar and the EchoStar stockholders. The EchoStar board of directors has received an opinion from an independent investment banking firm, Deutsche Banc Alex. Brown, as to the fairness, from a financial point of view, of the exchange ratio in the Hughes/EchoStar merger to the holders of EchoStar Class A common stock. We have included the full text of the financial advisor fairness opinion received by EchoStar in Appendix C to this document. We urge you to read this opinion carefully. The EchoStar board of directors unanimously approved the Hughes/EchoStar merger agreement and unanimously recommended that EchoStar stockholders approve the Hughes/EchoStar merger agreement.

Interests of Directors and Executive Officers of GM, Hughes and EchoStar

(See pages 356 and 361)

You should be aware that some of the directors and executive officers of GM, Hughes and EchoStar have interests in connection with the GM/Hughes separation transactions and the Hughes/EchoStar merger that are different from, or in addition to, the interests of other stockholders of GM and EchoStar. In particular, certain executive officers of Hughes are participants in some of the Hughes retention and key employee severance arrangements and certain directors and executive officers of Hughes will become directors of New EchoStar. With respect to EchoStar, certain long-term performance stock options may vest as a result of the Hughes/EchoStar merger and certain current directors and executive officers of EchoStar will become directors and executive officers of New EchoStar.

Based on the number of shares outstanding on August 31, 2002, the directors and officers of General Motors, individually and the group as a whole, held less than one percent of the outstanding shares and voting power of both classes of GM common stock.

The GM board of directors, the Hughes board of directors and the EchoStar board of directors were aware of these interests and considered them, among other matters, in approving the GM/Hughes separation transactions and the Hughes/EchoStar merger, as applicable.

Advantages and Disadvantages of the Transactions to GM Common Stockholders

(See page 182)

The following is a description of certain important advantages and disadvantages of the GM/Hughes separation transactions and the Hughes/ EchoStar merger to GM common stockholders. As described below, the transactions will have differing effects on, and consequences for, holders of GM \$1 2/3 par value common stock and holders of GM Class H common stock.

GM Class H Common Stockholders

As a result of the transactions, GM Class H common stockholders will no longer be holders of a tracking stock of General Motors. Rather, they will become New EchoStar Class C common stockholders, and will hold a more conventional common stock of New EchoStar. As a consequence, the GM Class H common stockholders will no longer have the right to have their shares of GM Class H common stock exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances pursuant to provisions of the GM restated certificate of incorporation. GM determined that such an exchange would not be in the best interests of GM and its common stockholders in connection with the proposed separation of Hughes from GM and, accordingly, GM structured the transactions so as not to result in such an exchange.

Further, GM Class H common stockholders will not receive any portion of the Hughes dividend distribution to GM. If the requisite GM common stockholder approval of the proposals relating to the transactions is obtained, GM common stockholders will be approving and consenting to an asset transfer consisting of the Hughes dividend distribution without the distribution of a portion of the Hughes dividend distribution to GM Class H common stockholders that is currently provided for under certain circumstances pursuant to a policy statement of the GM board of directors.

You should understand, however, that if the requisite GM common stockholder approval of the transactions is not obtained, the transactions will not occur and GM Class H common stockholders would similarly have no right to exchange their shares for shares of GM \$1 2/3 par value common stock at a 120% exchange rate or to receive any distribution from GM based on an asset transfer from Hughes to GM.

GM \$1 2/3 Par Value Common Stockholders

As a result of the GM/ Hughes separation transactions, General Motors will have only one class of outstanding common stock, the GM \$1 2/3 par value common stock. General Motors will then no longer have tracking stock and will be a company primarily focused on its core automotive and related businesses. Hughes will no longer be part of GM. After the GM/ Hughes separation transactions, GM \$1 2/3 par value common stock will reflect only the financial performance of the remaining GM businesses, which will not include the Hughes business, except to the extent of any GM ownership of New EchoStar Class C common stock. GM \$1 2/3 par value common stockholders will retain an indirect interest in New EchoStar to the extent of any continuing GM ownership of New EchoStar Class C common stock which, as a result of the Hughes recapitalization, will be significantly smaller than GM's current retained economic interest in Hughes.

If and to the extent required in order to maintain the tax-free status of the Hughes split-off, GM may make a pro rata distribution to the GM \$1 2/3 par value common stockholders of a portion of the HEC Holdings Class C common stock it receives in the Hughes recapitalization. As noted above, GM currently estimates that it would make a distribution in order to maintain the tax-free status of the Hughes split-off only if the average market price of GM Class H common stock during the five trading days preceding the completion of the Hughes split-off were to be greater than \$ _____ per share or less than \$ _____ per share. This price calculation is based upon the number of shares of GM Class H common stock outstanding as of _____, 2002 and assumes that any shares of HEC Holdings Class C common stock transferred by GM in debt-for-equity exchanges do not count toward the satisfaction of the relevant tax test. The average market price of GM Class H common stock during the five trading days preceding _____, 2002 was \$ _____ per share. If GM determines that a pro rata distribution is required, then the number of shares of HEC Holdings Class C

common stock to be distributed to the GM \$1 2/3 par value common stockholders and the record date for the distribution will be announced by GM around the time of the completion of the Hughes split-off.

Regulatory Requirements
(See page 200)

U.S. Antitrust Requirements

Under U.S. antitrust laws, the Hughes/ EchoStar merger may not be completed until GM, Hughes and EchoStar have notified the Antitrust Division of the Department of Justice and the Federal Trade Commission of the Hughes/EchoStar merger and filed the necessary report forms, and until the required waiting period has terminated or expired. We filed the notifications required by the Hart-Scott-Rodino Act in November 2001. The Department of Justice's Antitrust Division is currently conducting an investigation of the transactions, and, as anticipated, has requested additional information from the companies. We have provided the Department of Justice's Antitrust Division with a significant quantity of information and documents, and we are continuing to compile and provide information and documents in response to their requests. The Department of Justice's Antitrust Division may fail to permit the completion of the Hughes/EchoStar merger on a timely basis or it could bring an action seeking to prevent the Hughes/EchoStar merger or impose onerous conditions in connection with its clearance. The attorneys general of a number of states are also conducting an investigation of the transactions under federal and state antitrust laws and could bring an action seeking to prevent the Hughes/EchoStar merger or attempt to impose onerous conditions.

FCC Approval

To complete the Hughes/EchoStar merger, we must also obtain the approval of the FCC for the transfer of licenses in connection with the Hughes split-off and the Hughes/EchoStar merger. We filed an application for this FCC approval of the transfer of licenses in December 2001. Shortly following this filing, the FCC placed the application on public notice and invited petitions, oppositions and other comments by third parties in respect of the application. Numerous parties have filed petitions to deny the application or comments, and EchoStar and Hughes have filed a consolidated opposition. Currently, the application remains pending before the FCC. In addition, the FCC requested additional documents and information with respect to this application within a certain specified time period. The parties initially requested an extension of this time period, but the FCC rejected the parties' request and stopped its self-imposed 180-day clock for merger review. While the FCC restarted its 180-day clock for merger review on July 23, 2002, suggesting an FCC decision time of November 2002, we cannot be sure that the FCC will decide our application by that time or that there will not be further delays in processing and evaluating our application.

In addition, the parties filed an application in February 2002 on behalf of New EchoStar requesting authority to launch and operate a new direct broadcast satellite, which would allow New EchoStar to offer local broadcast channels in all 210 designated market areas. The FCC placed this satellite application on notice for public comment on April 19, 2002, and the comment period closed on June 4, 2002. The parties pending satellite application may delay the FCC's consideration of the Hughes/EchoStar merger application. As a result of these delays, the FCC may fail to approve the Hughes/EchoStar merger in a timely manner. In addition, the FCC may agree with the views of parties opposing the application and deny its approval of the Hughes/EchoStar merger or impose onerous conditions. Furthermore, the FCC may fail to grant, or may delay action on, the pending satellite application.

Foreign and Certain Other Regulatory Matters

The transactions may be subject to certain regulatory requirements of other state, federal and foreign governmental agencies and authorities, including clearances for the Hughes/EchoStar merger from competition and telecommunications authorities in certain foreign jurisdictions and requirements relating to the regulation of the offer and sale of securities. We are currently working to evaluate and comply in all

material respects with these requirements, as appropriate, and do not currently anticipate that they will hinder, delay or restrict completion of the transactions.

Although we currently expect to receive all governmental approvals and clearances required in order to complete the transactions, we cannot assure you that we will obtain all such governmental approvals and clearances or that the granting of these approvals and clearances will be timely or will not involve the imposition of conditions on the completion of the transactions or require changes to the terms of the transactions. These conditions or changes could result in the conditions to the transactions not being satisfied.

No Appraisal Rights

(See page 202)

Under applicable corporation law and the GM restated certificate of incorporation, GM stockholders are not entitled to appraisal rights in connection with the GM/Hughes separation transactions or the Hughes/EchoStar merger.

Under applicable corporation law and the EchoStar articles of incorporation, EchoStar stockholders are not entitled to appraisal rights in connection with the Hughes/EchoStar merger.

New EchoStar Common Stock

(See page 314)

Based on assumptions about certain variable factors described elsewhere in this document, we estimate that immediately after the completion of the Hughes/EchoStar merger:

the former GM Class H common stockholders and General Motors would together hold shares of New EchoStar Class C common stock equaling about % of the outstanding common stock of New EchoStar and about % of New EchoStar's total voting power;

the former EchoStar Class A common stockholders would hold shares of New EchoStar Class A common stock equaling about % of the outstanding common stock of New EchoStar and about % of New EchoStar's total voting power; and

the former EchoStar Class B common stockholders would hold shares of New EchoStar Class B common stock equaling about % of the outstanding common stock of New EchoStar and about % of New EchoStar's total voting power. Charles W. Ergen, the Chairman of the Board of Directors and Chief Executive Officer of EchoStar and the current beneficial owner of all of the outstanding shares of EchoStar Class B common stock, is expected to be the beneficial owner of all of the outstanding shares of New EchoStar Class B common stock after the Hughes/EchoStar merger. As a result, Mr. Ergen will have significant influence over actions of New EchoStar that require stockholder approval.

For a description of the assumptions on which these percentages are based, see "The Transactions - Description of the Transactions - The Hughes/EchoStar Merger - Assumptions Used in Calculating the Pro Forma Percentages of Outstanding Shares and Voting Power and the Minimum GM Class H Common Stock Price Necessary to Satisfy the Equity Headroom Condition."

Except as to voting rights, the New EchoStar Class A common stock and New EchoStar Class C common stock will be identical. The New EchoStar Class B common stock will have special voting rights, will be convertible into New EchoStar Class A common stock or New EchoStar Class C common stock and will be subject to certain transfer restrictions. However, in all respects other than voting rights, convertibility and transfer restrictions, the New EchoStar Class B common stock will be substantially the same as the New EchoStar Class A common stock and New EchoStar Class C common stock. The New EchoStar common stock will have the following voting rights:

Each share of New EchoStar Class A common stock will entitle the holder to one vote in the election of directors and all other matters submitted to stockholders for their approval;

Each share of New EchoStar Class B common stock initially will entitle the holder to 10 votes in the election of directors and all other matters submitted to stockholders for their approval, subject to reduction under certain circumstances during the first two years after the completion of the Hughes split-off (and possibly thereafter, in certain circumstances) to preserve the tax-free status to GM of the Hughes split-off. After the second anniversary of the completion of the Hughes split-off, the voting power of each share of New EchoStar Class B common stock outstanding at the conclusion of the two-year period, as a percentage of aggregate voting power, generally will be fixed at the same percentage of the aggregate voting power of all of the shares of the New EchoStar common stock then outstanding to which such share of New EchoStar Class B common stock was entitled at the end of the two-year period. As a result, the votes per share of New EchoStar Class B common stock generally will increase when certain additional shares of New EchoStar capital stock are issued; and

Each share of New EchoStar Class C common stock will entitle the holder to a number of votes in the election of directors and all other matters submitted to stockholders for their approval that will ensure that the shares of New EchoStar Class C common stock held by GM (other than shares that are subject to GM share dispositions) and the shares of New EchoStar Class C common stock that are issued to certain of GM's historical stockholders together possess 50.5% of the aggregate voting power of New EchoStar immediately following the completion of the Hughes/ EchoStar merger.

The calculation of the exact number of votes per share of New EchoStar Class C common stock will not be made until the time of the completion of the Hughes/ EchoStar merger because the calculation will be subject to certain variable factors that will be determined between now and that time. We estimate that the holders of New EchoStar Class C common stock would be entitled to between three and five votes per share. Once determined, the number of votes per share of New EchoStar Class C common stock will not change.

Directors of New EchoStar will be elected on the basis of cumulative voting. On all other matters, the shares of New EchoStar Class A common stock, New EchoStar Class B common stock and New EchoStar Class C common stock will vote together as a single class on the basis of their respective per share voting power. In addition, the holders of New EchoStar Class B common stock will be entitled to a separate class vote for approval of the following:

matters (other than the election and removal of directors) for which a stockholder vote is required under applicable corporation law, such as mergers, amendments to the New EchoStar certificate of incorporation and dissolution;

matters for which a stockholder vote will be required by the rules of the Nasdaq including, among other things, certain issuances of stock in excess of 20% of the total voting power of New EchoStar;

any sale or acquisition of a significant business of New EchoStar;

any amendment by stockholders to the bylaws of New EchoStar;

any issuance of common stock (or equivalents) of New EchoStar in excess of 10% of the average fully diluted shares over the prior 12 months; and

the adoption by New EchoStar of any equity-based benefit plan for directors and employees.

New EchoStar Board of Directors and Officers

(See page 295)

We have agreed that the New EchoStar board of directors will initially have 11 members, eight of whom are current directors and/or officers of EchoStar and three of whom are current directors and/or officers of Hughes. For the first three years following the completion of the Hughes/ EchoStar merger, at least six of the members of the New EchoStar board of directors will be independent directors as determined in accordance with the New EchoStar certificate of incorporation and bylaws.

Charles W. Ergen, the current Chairman of the Board of Directors and Chief Executive Officer of EchoStar, will be the Chairman of the Board of Directors and Chief Executive Officer of New EchoStar, and David K. Moskowitz, the current Senior Vice President, General Counsel and Secretary of EchoStar will be the Senior Vice President, General Counsel and Secretary of New EchoStar. The other officers of New EchoStar will be determined by a management transition committee prior to the completion of the Hughes/EchoStar merger.

Conditions to Completing the Transactions

(See pages 83, 226 and 236)

The obligations of the companies to complete the GM/ Hughes separation transactions and the Hughes/EchoStar merger are subject to a number of conditions which must be satisfied or waived before the transactions can be completed. One important condition is that GM and Hughes must complete the GM/ Hughes separation transactions before the Hughes/ EchoStar merger can be completed. In addition, unless the companies are prepared to complete the Hughes/ EchoStar merger immediately after the completion of the GM/ Hughes separation transactions, the Hughes business will not be separated from GM pursuant to the GM/ Hughes separation transactions. Other important conditions include the following:

the receipt of the requisite GM common stockholder approval of each of the three proposals relating to the transactions;

the expiration or termination of the waiting periods applicable to the Hughes/ EchoStar merger under the Hart-Scott-Rodino Act and any similar law of foreign jurisdictions;

the absence of any effective injunction or order which prevents the completion of the transactions;

the receipt of FCC approval for the transfer of licenses and other authorizations in connection with the Hughes/ EchoStar merger and the Hughes split-off;

the receipt of all other approvals of, or clearances from, or the making of all filings with, governmental authorities required to complete the transactions, other than approvals, clearances and filings, the absence of which, in the aggregate, are not reasonably likely to have a material adverse effect on New EchoStar;

the continued effectiveness of the ruling received by GM from the IRS to the effect that the Hughes split-off will be tax-free to GM and its stockholders for U.S. federal income tax purposes;

the availability of financing for the Hughes/ EchoStar merger;

the amount of the Hughes dividend distribution to GM may not exceed the value of GM's retained economic interest in Hughes at the time of the Hughes recapitalization. We sometimes refer to this condition as the "value" condition; and

the ability of New EchoStar, based on certain assumptions, to issue a minimum amount of equity immediately following the Hughes/ EchoStar merger. We sometimes refer to this condition as the "equity headroom" condition.

The equity headroom condition is designed to ensure that, after the completion of the Hughes/ EchoStar merger, New EchoStar will have the flexibility to issue a specified minimum amount of equity without violating certain agreements with GM that are designed to preserve the tax-free status of the Hughes split-off. Satisfaction of the equity headroom condition will depend upon a number of factors that will not be known until immediately before the completion of the transactions, including the average market price of GM Class H common stock during a specified period preceding such time. For more information, see "Purposes of the Transactions - Liquidity and Value Provided to GM and GM Common Stockholders."

If and to the extent necessary in order to satisfy the equity headroom condition, the terms of the transaction agreements require that the aggregate number of shares subject to GM share dispositions (which would otherwise be 100 million shares) be reduced by up to 40 million shares. In addition, if GM has already

completed debt-for-equity exchanges of more than 60 million shares of GM Class H common stock prior to the completion of the transactions, the dividend from Hughes of up to \$4.2 billion will be reduced by up to \$700 million if and to the extent required to satisfy either the value condition or the equity headroom condition, but in any event the reduction in the dividend will not exceed the amount of the proceeds received by GM from such debt-for-equity exchanges in excess of 60 million shares. As a result, based on the assumptions underlying the table set forth at Purposes of the Transactions Liquidity and Value Provided to GM and GM Common Stockholders Illustrative Calculation of Liquidity and Value to be Provided to GM in the Transactions, both the value condition and the equity headroom condition will be satisfied if the average market price of GM Class H common stock during the specified period is at least \$ per share. This average market price necessary to cause both the value condition and the equity headroom condition to be satisfied could be higher if, among other things, EchoStar issued any additional equity or equity-linked securities or increased the number of shares of EchoStar common stock issuable upon conversion of EchoStar convertible debt securities prior to the completion of the transactions.

GM has the right, but not the obligation, to elect to reduce the amount of the Hughes dividend distribution or the number of shares of New EchoStar Class C common stock that would be subject to GM share dispositions, or both, by more than the amount of the mandatory reductions described above in order to satisfy the equity headroom condition and/or the value condition. Any such voluntary reductions by GM would have the effect of permitting these conditions to be satisfied at a lower average market price for the GM Class H common stock than is set forth above. However, any such reduction in the amount of the Hughes dividend distribution would reduce the amount of liquidity and value to be provided to GM, and any such reduction in the number of shares subject to GM share dispositions would reduce the amount of liquidity to be provided to GM (but such shares would be retained by GM and would be available for other dispositions for up to five years). We cannot assure you that GM would make any such voluntary reductions, and a failure by GM to make such voluntary reductions could result in the transactions not being completed. As of the date of this document, GM has not made any determination regarding whether or to what extent GM would be willing to make any such voluntary reductions. GM currently expects that it would make any determination regarding any such voluntary reductions immediately before the completion of the Hughes split-off, based on factors it determines to be relevant at that time.

**Considerations Relating to the Time Interval Between GM Common Stockholder
Approval and Completion of the Transactions**

(See pages 101, 136 and 213)

The GM board of directors has determined that the transactions that are the subject of this document are in the best interests of GM and its common stockholders as a whole and fair to the holders of both classes of GM common stock and has unanimously approved the transactions and recommends that the GM common stockholders of each class vote to approve each of the proposals described in this document. However, if the proposals relating to the transactions were to receive the requisite GM common stockholder approval but all other applicable conditions to the transactions were not satisfied or waived as of that time, it is possible that the transactions would not be completed for a significant period of time after the requisite GM common stockholder approval. During any such time interval, it is possible that circumstances relating to the business or financial condition of EchoStar or Hughes or financial, economic or other circumstances could change significantly and in a manner not considered at the time that the GM board of directors approved the transactions. GM common stockholders should understand that, despite any such change in circumstances that might occur during this time interval, it is not a condition to completion of the transactions that the GM board of directors conclude that, at the time that the transactions are to be completed or at any other point during such time interval, the transactions will be fair to both classes of GM common stockholders.

Under the terms of the transaction agreements, General Motors and Hughes have agreed not to solicit any proposals from third parties, or engage in discussions with or furnish information to any third party, with respect to a broad range of competing transactions to the transactions, which generally refers to alternative strategic transactions involving Hughes and any third party other than EchoStar. However, until the requisite GM common stockholder approval of the proposals relating to the transactions has been received, GM and

Hughes are permitted to engage in such discussions and provide such information (but not solicit proposals) with regard to a superior proposal, subject to certain conditions described at Description of Principal Transaction Agreements Implementation Agreement Covenants of GM, Hughes and EchoStar No Solicitation of Competing Transactions Involving Hughes, if the GM board of directors determines that in order to comply with its fiduciary duties it is necessary for GM to do so. Similarly, subject to certain conditions, until the requisite GM common stockholder approval has been received, the GM board of directors may change or revoke its recommendation that GM common stockholders approve the proposals relating to the transactions, if it determines that it is required to do so in accordance with its fiduciary duties and based on a proposed competing transaction or any other factor that may affect its views regarding the transactions. In such event, GM, Hughes or EchoStar may terminate the transaction agreements (in which event Hughes would be required to pay EchoStar a \$600 million termination fee).

GM common stockholders should understand that, if they vote to approve the proposals recommended by the GM board of directors, that action will result in the termination of the ability of GM to pursue superior proposals in this manner, which would mean that GM would have no practical ability to enter into any agreement or arrangement with respect to a competing transaction without breaching the non-solicitation covenant. However, if GM common stockholders fail to approve the proposals recommended by the GM board of directors, the transactions could not be completed and GM common stockholders would not have the opportunity to participate in the benefits of the transactions as described in this document and, under certain circumstances in which GM or Hughes enters into or completes a competing transaction, EchoStar would be entitled to a \$600 million termination fee. Further, in either case, there can be no assurance that any proposal for a competing transaction would be available to Hughes and GM or, if available, would result in any agreement or arrangement for a competing transaction. Accordingly, for all of the reasons described elsewhere in this document, the GM board recommends that GM common stockholders vote to approve each of the proposals.

Material U.S. Federal Income Tax Considerations Relating to the Transactions

(See page 204)

General Motors has received an IRS ruling to the effect that the Hughes split-off will be treated as a tax-free reorganization and distribution for U.S. federal income tax purposes. If the ruling remains in effect, then, for U.S. federal income tax purposes, neither the GM Class H common stockholders nor, except as to certain prior intercompany transactions which will be taken into income, General Motors will recognize gain or loss as a result of the Hughes split-off. In addition, General Motors intends to request a supplemental ruling from the IRS to the effect that neither the GM \$1 2/3 par value common stockholders nor GM will recognize gain or loss as a result of a distribution by GM to the GM \$1 2/3 par value common stockholders of shares of HEC Holdings Class C common stock in connection with the Hughes split-off.

In addition, EchoStar has received, prior to or on the date of this document, an opinion from its outside tax counsel, Sullivan & Cromwell, to the effect that, among other things, the Hughes/EchoStar merger will be treated as a reorganization within the meaning of Section 368(a) of the Internal Revenue Code, EchoStar will not recognize gain or loss for U.S. federal income tax purposes as a result of the Hughes/EchoStar merger and the EchoStar common stockholders will recognize gain or loss for U.S. federal income tax purposes upon the exchange of their EchoStar common stock pursuant to the Hughes/EchoStar merger only in respect of cash received instead of fractional shares of New EchoStar common stock. Further, HEC Holdings has received, prior to or on the date of this document, an opinion from its outside tax counsel, Weil, Gotshal & Manges LLP, to the effect that the Hughes/EchoStar merger will be treated as a reorganization within the meaning of Section 368(a) of the Internal Revenue Code, HEC Holdings will not recognize gain or loss for U.S. federal income tax purposes by reason of the Hughes/EchoStar merger, and the former holders of GM Class H common stock will not recognize gain or loss for U.S. federal income tax purposes by reason of the Hughes/EchoStar merger with respect to their HEC Holdings Class C common stock. It is a condition to the completion of the transactions that each of EchoStar and HEC Holdings receive an opinion at the time of the completion of the transactions that the Hughes/ EchoStar merger will be treated as a reorganization within the meaning of Section 368(a) of the Internal Revenue Code. In rendering these opinions, counsel will rely on

certain assumptions and factual representations to be made by HEC Holdings and EchoStar, as applicable, and the opinions will be subject to the limitations and qualifications set forth in the opinions.

Accounting Treatment

(See page 203)

General Motors will record the Hughes dividend distribution of up to \$4.2 billion as a reduction in GM's investment in Hughes. GM will record the Hughes split-off at fair value at the time of the Hughes split-off. Based on the closing price of EchoStar Class A common stock on June 28, 2002 and certain other assumptions, the Hughes split-off would have resulted in an after-tax gain of about \$7.8 billion based on the net book value of Hughes at such date. As a result of the Hughes split-off, GM anticipates that there would be a net reduction to GM's stockholders equity reflecting adjustments based on the fair value and the net book value of Hughes at that time. The financial results of Hughes for all periods prior to the completion of the GM/Hughes separation transactions will be reported as discontinued operations in GM's consolidated financial statements. The Hughes/EchoStar merger will be accounted for using the purchase method of accounting, with EchoStar having acquired HEC Holdings.

Comparative Market Price Data

(See page 345)

Presented below are the per share closing prices for the GM \$1 2/3 par value common stock (symbol: GM), as quoted on the NYSE, GM Class H common stock (symbol: GMH), as quoted on the NYSE, and the EchoStar Class A common stock (symbol: DISH), as quoted on the Nasdaq National Market, on the following dates:

October 26, 2001, the last trading day before the public announcement of the signing of the transaction agreements among GM, Hughes and EchoStar relating to the transactions that are the subject of this document; and

September 26, 2002, the latest practicable date before the filing of this document.

The table below also presents implied equivalent per share values for:

shares of GM Class H common stock by multiplying the price per share of EchoStar Class A common stock on each of the two dates by the implied exchange ratio in the Hughes/ EchoStar merger of 0.73, which is the inverse of the actual exchange ratio in the Hughes/EchoStar merger of 1/0.73; and

shares of EchoStar Class A common stock by multiplying the price per share of GM Class H common stock on each of the two dates by the exchange ratio of 1/0.73.

	GM \$1 2/3 Par Value Common Stock Price	GM Class H Common Stock Price	EchoStar Class A Common Stock Price	Share Price Equivalent (EchoStar Class A Common Stock) for GM Class H Common Stock	Share Price Equivalent (GM Class H Common Stock) for EchoStar Class A Common Stock
October 26, 2001	\$ 45.40	\$ 15.35	\$ 25.26	\$ 18.44	\$ 21.03
September 26, 2002	\$ 41.52	\$ 9.20	\$ 17.47	\$ 12.75	\$ 12.60

SELECTED HISTORICAL AND PRO FORMA FINANCIAL DATA

GM Selected Historical Financial Data

The following statements of operations data for each of the three years in the period ended December 31, 2001 and the balance sheet data as of December 31, 2001 and 2000 have been derived from GM's consolidated financial statements incorporated into this document by reference, which have been audited by Deloitte & Touche LLP, independent auditors. The statement of operations data for the years ended December 31, 1998 and 1997 and the balance sheet data as of December 31, 1999, 1998 and 1997 have been derived from GM's audited consolidated financial statements which have not been incorporated into this document by reference.

The statements of operations data for each of the six-month periods ended June 30, 2002 and 2001 and the balance sheet data as of June 30, 2002 have been derived from GM's unaudited consolidated financial statements which have been incorporated into this document by reference.

You should read the data below in conjunction with GM's consolidated financial statements (including the notes thereto) and Management's Discussion and Analysis of Financial Condition and Results of Operations in the GM 2001 Form 10-K and GM's Quarterly Report on Form 10-Q for the quarter ended June 30, 2002, which are incorporated into this document by reference. Certain amounts for 2001 and prior years have been reclassified to conform with the 2002 classifications.

Adjusted	\$ (0.27)	\$ (0.15)	\$ (0.38)	\$ 0.71	\$ (0.12)

- (1) Earnings per share attributable to the GM Class H common stock are determined based on the relative amounts of Hughes net income available for the payment of dividends to holders of GM Class H common stock and to holders of GM \$1 2/3 par value common stock. The manner in which this allocation is made is described further at GM Capital Stock GM's Dual-Class Common Stock Capital Structure Dividends.
- (2) The amounts for GM Class H common stock have been adjusted to reflect the three-for-one stock split, in the form of a 200% stock dividend, paid on June 30, 2000.
- (3) The amounts for GM Class H common stock subsequent to its recapitalization, as part of the 1997 Hughes restructuring transactions, present the earnings attributable to GM Class H common stock subsequent to its recapitalization on December 17, 1997 related to Hughes, consisting principally of its digital entertainment services, satellite communications services and satellite-based private business networks businesses.

- (4) The amounts for GM Class H common stock prior to its recapitalization, as part of the 1997 Hughes restructuring transactions, present the earnings attributable to GM Class H common stock prior to its recapitalization on December 17, 1997 related to Hughes, consisting principally of its defense electronics, automotive electronics and telecommunications and space business.
- (5) Amounts represent GM's automotive, communications services and other operations only.

- (6) Pursuant to paragraph 61 of Statement of Financial Accounting Standards No. 142 Goodwill and Other Intangible Assets, referred to as SFAS 142, amounts shown are GM's reported net income exclusive of amortization expense recognized related to goodwill and amortization of intangibles with indefinite lives required under previous accounting standards, on an after-tax basis.

SFAS 142 changes the accounting for goodwill and indefinite lived intangible assets from an amortization method to an impairment-only approach. Goodwill, including goodwill recorded in past business combinations, is no longer amortized, but is tested for impairment at least annually at the reporting unit level. GM implemented SFAS 142 on January 1, 2002. GM then completed step one of the transitional impairment test in the second quarter of 2002. In step one of the two-part transitional impairment test, GM compared the fair value of each reporting unit (which are different from the reporting units of GM's wholly owned subsidiaries GMAC and Hughes) with its respective carrying amount, including goodwill as of January 1, 2002. Since the fair value of each reporting unit exceeded the respective carrying amount, goodwill was not considered impaired. Accordingly, completion of step two of the transitional impairment test is not necessary.

GM Selected Pro Forma Financial Data

The columns below entitled "GM/ Hughes Separation Transactions" present pro forma operating results for the six months ended June 30, 2002 and the year ended December 31, 2001 giving effect to the GM/ Hughes separation transactions as if they had occurred on January 1, 2001 and balance sheet data as of June 30, 2002 giving effect to the GM/ Hughes separation transactions as if they had occurred as of that date.

The column entitled "PanAmSat Stock Sale" presents pro forma operating results for the six months ended June 30, 2002 giving effect to the PanAmSat stock sale as if it had occurred on January 1, 2001 and balance sheet data as of June 30, 2002 giving effect to the PanAmSat stock sale as if it had occurred as of that date.

The column below entitled "PanAmSat Stock Sale and Telocity" presents pro forma operating results for the year ended December 31, 2001 giving effect to the PanAmSat stock sale and Hughes' acquisition of Telocity as of April 3, 2001, as if those transactions had occurred on January 1, 2001.

The pro forma financial data are not intended to be indicative of either future results of operations or results that might have been achieved had the GM/Hughes separation transactions, the PanAmSat stock sale or Hughes' acquisition of Telocity occurred on the dates specified. In the opinion of GM's management, all adjustments necessary to fairly present such pro forma condensed financial data have been made based upon the proposed terms of the GM/Hughes separation transactions or the PanAmSat stock sale and the terms of Hughes' acquisition of Telocity.

- (1) Earnings per share attributable to the GM Class H common stock are determined based on the relative amounts of Hughes net income available for the payment of dividends to holders of GM Class H common stock and to holders of GM \$1 2/3 par value common stock. The manner in which this allocation is made is described further at GM Capital Stock GM's Dual-Class Common Stock Capital Structure Dividends.
- (2) The amounts for GM Class H common stock have been adjusted to reflect the three-for-one stock split, in the form of a 200% stock dividend, paid on June 30, 2000.
- (3) The amounts for GM Class H common stock subsequent to its recapitalization, as part of the 1997 Hughes restructuring transactions, present the earnings attributable to GM Class H common stock subsequent to its recapitalization on December 17, 1997 related to Hughes, consisting principally of its digital entertainment services, satellite communications services and satellite-based private business networks businesses.
- (4) Amounts represent GM's automotive, communications services and other operations only.

Hughes Selected Historical Financial Data

The following selected historical financial data have been derived from, and should be read in conjunction with Hughes' consolidated financial statements (including the notes thereto) and Management's Discussion and Analysis of Financial Condition and Results of Operations in the Hughes 2001 Form 10-K and Hughes' Quarterly Report on Form 10-Q for the quarter ended June 30, 2002, which are incorporated into this document by reference. The following consolidated statements of operations data for each of the three years in the period ended December 31, 2001 and the balance sheet data as of December 31, 2001 and 2000 have been derived from Hughes' financial statements incorporated into this document by reference, which have been audited by Deloitte & Touche LLP, independent auditors. The consolidated statement of operations data for the years ended December 31, 1998 and 1997 and the balance sheet data as of December 31, 1999, 1998 and 1997 have been derived from Hughes' audited financial statements which have not been incorporated into this document by reference.

On December 17, 1997, Hughes' predecessor and GM completed the Hughes restructuring transactions, a series of transactions which restructured Hughes' predecessor and which were designed to address strategic challenges facing Hughes' three principal businesses. These transactions included:

the tax-free spin-off of Hughes' defense electronics business to holders of GM \$1 2/3 par value common stock and old GM Class H common stock;

the transfer of Delco Electronics Corporation, Hughes' automotive electronics business, to GM's Delphi Automotive Systems business sector, which is now a separate corporation; and

the recapitalization of the old GM Class H common stock into the GM Class H common stock that is currently outstanding.

These transactions were followed immediately by the merger of Hughes' defense electronics business with Raytheon Company.

In connection with the Hughes restructuring transactions, the telecommunications and space business of Hughes' predecessor, consisting principally of its digital direct-to-home broadcast, satellite services, network systems and satellite systems manufacturing businesses, were contributed to the recapitalized Hughes. These telecommunications and space businesses, both before and after the recapitalization, are referred to as Hughes. The financial information presented for Hughes, unless otherwise noted, represents the financial information of the recapitalized Hughes.

On October 6, 2000, Hughes completed the sale of its satellite systems manufacturing businesses to The Boeing Company. As a result, the financial results for those businesses are treated as discontinued operations for all periods presented herein through the date of sale. Consequently, revenues, operating costs and expenses, and other non-operating results for the satellite systems manufacturing businesses are excluded from Hughes' results from continuing operations.

Certain prior period amounts have been reclassified to conform to the current year presentation.

- (1) Earnings (Loss) Used for Computation of Available Separate Consolidated Net Income (Loss) is presented because this amount is used to determine the earnings per share of GM Class H common stock and the portion of GM's earnings out of which dividends on the GM Class H common stock may be paid. Earnings (Loss) Used for Computation of Available Separate Consolidated Net Income (Loss) is equal to the net income (loss) of Hughes, excluding the effects of the GM purchase accounting adjustment arising from GM's acquisition of Hughes, less the amount of dividends paid and/or payable to GM with respect to the Hughes Series A preferred stock. For a detailed description of the calculation of amounts available for dividends on GM Class H common stock, see GM Capital Stock GM's Dual-Class Common Stock Capital Structure Dividends Calculation of Amount Available for Dividends on GM Class H Common Stock.
- (2) For purposes of the Hughes selected historical financial data, Hughes defines EBITDA as operating profit (loss), plus depreciation and amortization. EBITDA is not presented as an alternative measure of operating results or cash flow from operations, as determined in accordance with accounting principles generally accepted in the United States of America. Hughes management uses EBITDA to evaluate the operating performance of Hughes and its business segments, to allocate resources and capital to its business segments and as a measure of performance for incentive compensation purposes. Hughes believes EBITDA is a measure of performance used by some investors, equity analysts and others to

make informed investment decisions. EBITDA is used as an analytical indicator of income generated to service debt and fund capital expenditures. In addition, multiples of current or projected EBITDA are used to estimate current or prospective enterprise value. Hughes management believes that EBITDA is a common measure used to compare Hughes' operating performance and enterprise value to other communications, entertainment and media service providers. EBITDA does not give effect to cash used for debt service requirements consisting of interest payments of \$218 million and \$133 million for the six months ended June 30, 2002 and 2001, respectively, and \$268 million in 2001, \$313 million in 2000, \$175 million in 1999, \$53 million in 1998 and \$157 million in 1997. As a result, EBITDA does not reflect funds available for investment in the business of Hughes, dividends or other discretionary uses. EBITDA as presented herein may not be comparable to similarly titled measures reported by other companies.

- (3) Hughes adopted Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, referred to as SFAS 142, on January 1, 2002. SFAS 142 requires that existing and future goodwill and intangible assets with indefinite lives not be amortized, but written down, as needed, based upon an impairment analysis that must occur at least annually, or sooner if an event occurs or circumstances change that would more likely than not result in an impairment loss. All other intangible assets are amortized over their estimated useful lives. SFAS 142 requires that Hughes perform step one of a two-part transitional impairment test to compare the fair value of each reportable unit with its respective carrying amount, including goodwill. If the carrying value exceeds its fair value, step two of the transitional impairment test must be performed to measure the amount of the impairment loss, if any. SFAS 142 also requires that intangible assets be reviewed as of the date of adoption to determine if they continue to qualify as intangible assets under the criteria established under Statement of Financial Accounting Standards No. 141, Business Combinations, referred to as SFAS 141, and to the extent previously recorded intangible assets do not meet the criteria that they be reclassified to goodwill. The section entitled Transitional Disclosures Under Statement of Financial Accounting Standards No. 142 portrays the effect of the discontinuance of goodwill amortization and intangible assets with indefinite lives amortization on net income as if Hughes adopted SFAS 142 on January 1, 1997.

As part of Hughes' acquisition of Primestar in 1999, Hughes identified and valued the dealer network and subscriber base intangible assets in accordance with APB No. 16. The dealer network intangible asset originally valued as part of Hughes' acquisition of Primestar was based on the established distribution, customer service and marketing capability that had been put in place by Primestar. The subscriber base intangible asset originally valued as part of Hughes' acquisition of Primestar was primarily based on the expected non-contractual future cash flows to be earned over the life of the Primestar subscribers converted to the DIRECTV service. In accordance with SFAS 142, Hughes completed a review of its intangible assets and determined that the previously recorded dealer network and subscriber base intangible assets established under APB No. 16, discussed above, did not meet the contractual or other legal rights and separability criteria as described in SFAS 141. The dealer network and subscriber base intangible assets were not contract-based and as a result did not meet the contractual or other legal rights criteria. The dealer network and subscriber base intangible assets also did not meet the separability criteria because the intangible assets could not be sold, transferred, licensed, rented or exchanged individually or in combination with other assets or liabilities, apart from selling the entire DIRECTV business. As a result, in the first quarter of 2002, Hughes reclassified \$210 million, net of \$146 million of accumulated amortization, of previously reported intangible assets to goodwill. Hughes also completed in the first quarter of 2002 the required transitional impairment test for intangible assets with indefinite lives, which consist of FCC licenses for direct-to-home broadcasting frequencies, referred to as orbital slots, and determined that no impairment existed because the fair value of these assets exceeded the carrying value as of January 1, 2002. In the second quarter of 2002, with the assistance of an independent valuation firm, Hughes completed step one of the transitional test to determine whether a potential impairment existed on goodwill recorded at January 1, 2002. Primarily based on the present value of expected future cash flows, it was determined that the fair values of DIRECTV U.S. and the satellite services segment exceeded their carrying values, therefore no further impairment test was required. It was also determined that the carrying value of DIRECTV Latin America, LLC and DIRECTV Broadband, Inc. exceeded their fair values, therefore requiring step two of the impairment test be performed. The

amount of goodwill recorded at January 1, 2002 for DIRECTV Latin America, LLC and DIRECTV Broadband, Inc. was \$622 million and \$108 million, respectively. No goodwill or intangible assets existed at the network systems segment, other than for equity method investments, and therefore no impairment test was required.

Because the carrying values of DIRECTV Latin America, LLC and DIRECTV Broadband, Inc. exceeded their fair values, Hughes must complete step two of the impairment test by December 31, 2002. Step two requires the comparison of the implied value of the reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss will be recognized in an amount equal to that excess. In the initial year of the adoption, the impairment loss, if any, is recorded as a cumulative effect of accounting change, net of taxes, and recorded in subsequent years as a pre-tax charge to operating income. Although the amount of any impairment loss related to the goodwill recorded at DIRECTV Latin America, LLC and DIRECTV Broadband, Inc. cannot be determined at this time, the amount of any such loss could be material to Hughes consolidated results of operations.

Hughes had \$6,715 million and \$6,497 million of goodwill at June 30, 2002 and December 31, 2001, respectively, net of accumulated amortization of \$838 million and \$700 million at June 30, 2002 and December 31, 2001, respectively. The changes in the carrying amounts of goodwill for the six months ended June 30, 2002 were as follows:

	<u>Direct-To-Home Broadcast</u>	<u>Satellite Services</u>	<u>Network Systems</u>	<u>Total</u>
	(in millions)			
Balance as of December 31, 2001	\$ 3,734	\$ 2,744	\$ 19	\$ 6,497
Reclassification from intangible assets	210			210
Other	25		(17)	8
Balance as of June 30, 2002	<u>\$ 3,969</u>	<u>\$ 2,744</u>	<u>\$ 2</u>	<u>\$ 6,715</u>

Hughes had \$448 million and \$660 million of intangible assets, net, at June 30, 2002 and December 31, 2001, respectively. Accumulated amortization for intangible assets was \$39 million and \$182 million at June 30, 2002 and December 31, 2001, respectively. Intangible assets at June 30, 2002 consist of \$432 million, net of \$31 million of accumulated amortization, of orbital slots which have indefinite useful lives and other intangible assets of \$16 million, net of \$8 million of accumulated amortization. Intangible assets, excluding intangible assets with indefinite useful lives, are amortized over three years. Amortization expense for intangible assets was \$3 million and \$71 million for the six months ended June 30, 2002 and the year ended December 31, 2001, respectively. Estimated amortization expense in each of the next five years is as follows: \$5 million in the remainder of 2002; \$6 million in 2003; \$1 million in 2004; and none thereafter.

Hughes Selected Pro Forma Financial Data

The pro forma operating results for the six months ended June 30, 2002 give effect to the PanAmSat stock sale as if it had occurred on January 1, 2001 and balance sheet data as of June 30, 2002 gives effect to the PanAmSat stock sale as if it had occurred as of that date.

The pro forma operating results for the year ended December 31, 2001 give effect to the PanAmSat stock sale and Hughes acquisition of Telocity as of April 3, 2001, as if those transactions had occurred on January 1, 2001.

The pro forma financial data are not intended to be indicative of either future results of operations or results that might have been achieved had the PanAmSat stock sale or Hughes acquisition of Telocity occurred on the dates specified. In the opinion of Hughes management, all adjustments necessary to fairly present such pro forma condensed financial data have been made based upon the proposed terms of the PanAmSat stock sale and the terms of Hughes acquisition of Telocity.

(1) Results for the year ended December 31, 1997 include financial data for PanAmSat International from May 16, 1997, the effective date of the merger of PanAmSat International and Galaxy.

- (2) Represents earnings before net interest expense, income tax expense, and depreciation and amortization. EBITDA in 1997 excludes the extraordinary item and minority interest that are applicable for 1997 only. EBITDA is commonly used in the fixed satellite services industry to analyze companies on the basis of operating performance, leverage and liquidity. EBITDA should not be considered as a measure of profitability or liquidity as determined in accordance with generally accepted accounting principles in the statements of income and cash flows. EBITDA margin is equal to EBITDA divided by total revenue, expressed as a percentage.
- (3) PanAmSat adopted Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*, referred to as SFAS 142, on January 1, 2002. SFAS 142 requires that existing and future goodwill and intangible assets with indefinite lives not be amortized, but written down, as needed, based upon an impairment analysis that must occur at least annually, or sooner if an event occurs or circumstances change that would more likely than not result in an impairment loss. All other intangible assets are amortized over their estimated useful lives. SFAS 142 requires that PanAmSat perform step one of a two-part transitional impairment test to compare the fair value of each reportable unit with its respective carrying amount, including goodwill. If the carrying value exceeds its fair value, step two of the transitional impairment test must be performed to measure the amount of the impairment loss, if any. Step two requires the comparison of the implied value of the reporting unit goodwill with the carrying amount of goodwill. If the carrying amount of the reported goodwill exceeds the implied fair value of that goodwill, an impairment loss would be recognized in an amount equal to the amount of that excess. In the initial year of adoption, the impairment loss, if any, is recorded as a cumulative effect of accounting change, net of taxes, and recorded in subsequent years as a pre-tax charge to operations. As of June 30, 2002, PanAmSat had goodwill of about \$2.24 billion and no intangible assets. PanAmSat has determined that for purposes of performing the impairment testing it has only one reporting unit, which is at the enterprise level.

The section entitled *Transitional Disclosures Under Statement of Financial Accounting Standards No. 142* portrays the effect of the discontinuance of goodwill amortization and intangible assets with indefinite lives amortization on net income and earnings per common share as if PanAmSat adopted SFAS 142 on January 1, 1997.

In the quarter ended June 30, 2002, PanAmSat completed its transitional assessment of the recoverability of its goodwill and has determined that the fair value of PanAmSat exceeds its carrying (book equity) value and therefore no further impairment testing is required.

EchoStar Selected Historical Financial Data

The following statements of operations data for each of the three years in the period ending December 31, 2001 and the balance sheet data as of December 31, 2001 and 2000 have been derived from EchoStar's audited consolidated financial statements incorporated into this document by reference. The statement of operations data for the years ended December 31, 1998 and 1997 and the balance sheet data as of December 31, 1999, 1998 and 1997 have been derived from EchoStar's audited consolidated financial statements which have not been incorporated into this document by reference.

The statements of operations data for each of the six-month periods ended June 30, 2002 and 2001 and the balance sheet data as of June 30, 2002 have been derived from EchoStar's unaudited consolidated financial statements which have been incorporated into this document by reference.

You should read the data below in conjunction with EchoStar's consolidated financial statements (including the notes thereto) and Management's Discussion and Analysis of Financial Condition and Results of Operations in the EchoStar 2001 Form 10-K and EchoStar's Quarterly Report on Form 10-Q for the six months ended June 30, 2002, which are incorporated into this document by reference.

- (1) In July 2001, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards No. 142, Goodwill and Other Intangible Assets, referred to as SFAS 142, which requires goodwill and intangible assets with indefinite useful lives to no longer be amortized but to be tested for impairment at least annually. Intangible assets that have finite lives will continue to be amortized over their estimated useful lives. The amortization and non-amortization provisions of SFAS 142 will be applied to all goodwill and intangible assets acquired after June 30, 2001. Effective January 1, 2002, EchoStar adopted the provisions of SFAS 142 and ceased amortization of its FCC authorizations, which were determined to have indefinite lives. In accordance with SFAS 142, EchoStar tested its FCC

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

authorizations for impairment as of the date of adoption and determined that there was no impairment. The following table reconciles previously reported loss before extraordinary items, net income and basic and diluted loss per common share as if the provisions of SFAS 142 were in effect for the three years in the period ended December 31, 2001 and for the six months ended June 30, 2001.

- (2) EchoStar believes it is common practice in the telecommunications industry for investment bankers and other investors to use various multiples of current or projected EBITDA (operating income (loss) plus depreciation and amortization, and non-cash, stock-based compensation) for purposes of estimating current or prospective enterprise value and as one of many measures of operating performance. Conceptually, EBITDA measures the amount of income generated each period that could be used to service debt, pay taxes and fund capital expenditures because EBITDA is independent of the actual leverage and capital expenditures employed by the business. EchoStar uses EBITDA, as defined above, as one of the key measurements of operating efficiency and overall financial performance and believes EBITDA can be a helpful measure for those evaluating companies in the multi-channel video programming distribution market. Some investment analysts track the relationship of EBITDA to total debt as one measure of financial strength. However, EBITDA does not purport to represent cash provided or used by operating activities and should not be considered in isolation or as a substitute for measures of performance prepared in accordance with generally accepted accounting principles.

EBITDA differs significantly from cash flows from operating activities reflected in the consolidated statement of cash flows. Cash flows from operating activities excludes interest and taxes paid and is a more comprehensive determination of periodic income on a cash (vs. accrual) basis, exclusive of non-cash items of income and expenses such as depreciation and amortization. In contrast, EBITDA is derived from accrual basis income and is not reduced for cash invested in working capital. Consequently, EBITDA is not affected by the timing of receivable collections or when accrued expenses are paid. EchoStar is not aware of any uniform standards for determining EBITDA and it believes presentations of EBITDA may not be calculated consistently by different entities in the same or similar businesses. EBITDA is shown before and after amortization of subscriber acquisition costs, which were deferred through September 1997 and amortized over one year. EBITDA for the years ended December 31, 1999, 2000 and 2001 and for the six months ended June 30, 2001 and 2002 also excludes approximately \$61 million, \$51 million, \$20 million, \$14 million and \$4 million, respectively, in non-cash, stock-based compensation expense resulting from significant post-grant appreciation of stock options granted to employees. In addition, EBITDA does not include the impact of amounts capitalized under EchoStar's Digital Home Plan of approximately \$65.4 million, \$338 million, \$63 million and \$77 million during the years ended December 31, 2000 and 2001 and for the six months ended June 30, 2001 and 2002, respectively.

EchoStar Selected Pro Forma Financial Data

The pro forma operating results for the six months ended June 30, 2002 and the year ended December 31, 2001 give effect to the PanAmSat stock sale as if it had occurred on January 1, 2001 and balance sheet data as of June 30, 2002 gives effect to the PanAmSat stock sale as if it had occurred as of that date.

The selected unaudited condensed pro forma financial data, which have been derived from EchoStar's Unaudited Pro Forma Condensed Consolidated Financial Statements included in this document, are not intended to be indicative of future results of operations or results that might have been achieved had the PanAmSat stock sale occurred on the dates specified. In the opinion of EchoStar's management, all adjustments necessary to fairly present such selected unaudited condensed pro forma financial data have been made based upon the proposed terms of the PanAmSat stock sale. You should read the data below in conjunction with EchoStar's Unaudited Pro Forma Condensed Consolidated Financial Statements included in this document beginning on page 289.

New EchoStar Selected Unaudited Pro Forma Condensed Consolidated Financial Data

In the table below, we provide you with selected unaudited pro forma condensed consolidated financial data for New EchoStar as if the Hughes/ EchoStar merger had been completed on January 1, 2001 for statement of operations purposes and on June 30, 2002 for balance sheet purposes.

For more information about the assumptions made in determining the pro forma data, see the notes to New EchoStar Unaudited Pro Forma Condensed Consolidated Financial Statements appearing later in this document.

The selected unaudited pro forma condensed consolidated financial data are derived from the more detailed unaudited pro forma financial statements appearing later in this document and should be read together with the separate historical financial statements and accompanying notes of Hughes and EchoStar, which we incorporate by reference in this document. The selected unaudited pro forma financial data are presented for comparative purposes only and are not necessarily indicative of the future financial position or results of operations of New EchoStar or of the financial position or the results of operations that would have been achieved had the Hughes/ EchoStar merger been completed during the periods or as of the dates for which the pro forma information is presented or after completion of the Hughes/ EchoStar merger. In the opinion of EchoStar's and Hughes' management, all adjustments necessary to fairly present such selected unaudited pro forma condensed consolidated financial data have been made based upon the proposed terms of the Hughes/ EchoStar merger.

RISK FACTORS

In addition to the other information contained in or incorporated by reference into this document (such as the 2001 Forms 10-K of GM, Hughes, PanAmSat and EchoStar), including the matters addressed at Disclosure Regarding Forward-Looking Statements, you should carefully consider each of the factors set forth below.

Risk Factors Relating to the Transactions

Risks Relating to New EchoStar

New EchoStar May Not Realize the Benefits Expected From the Hughes/ EchoStar Merger. The success of the Hughes/ EchoStar merger will depend, in part, upon the ability of New EchoStar to develop an expanded competitive business and realize significant economies of scale and substantial cost and revenue synergies from combining the businesses of Hughes and EchoStar. New EchoStar may not be able to successfully integrate these operations and realize the cost and revenue synergies it currently anticipates. The difficulties of combining the operations of two previously separate businesses include, among other things, the necessity of:

- coordinating geographically separated organizations;
- integrating technologies (including the development of a cost-effective integrated receiver);
- integrating personnel with diverse business backgrounds; and
- combining different corporate cultures.

The process of integrating operations could cause an interruption of, or loss of momentum in, the activities of New EchoStar's business and the loss of key personnel. If the attention of New EchoStar's management is diverted and any unexpected delays or difficulties are encountered in connection with the integration of Hughes' or EchoStar's operations, the benefits expected from the Hughes/EchoStar merger may not be realized. In particular, anticipated growth in revenues and improvements in earnings and cash flow may not be realized, which could have a material adverse impact on New EchoStar and the market prices of shares of New EchoStar Class A common stock and New EchoStar Class C common stock.

New EchoStar Is Expected to Incur Significant Expenses Related to the Integration of Hughes and EchoStar. New EchoStar is expected to incur substantial expenses in connection with the integration of the businesses of Hughes and EchoStar and their policies, procedures, operations, technologies and systems. There are a large number of systems that must be integrated, including management information, purchasing, accounting and finance, sales, billing, payroll and benefits and regulatory compliance. Among the other integration expenses to be incurred by New EchoStar, we currently estimate that up to \$2.5 billion would be required over a two- to four-year period following the completion of the Hughes/EchoStar merger to standardize and update the set-top box and outdoor equipment used by customers to receive New EchoStar's direct broadcast satellite signals. We are not currently in a position, however, to estimate reliably the total amount or the timing of all of the expected integration expenses because, among other reasons, constraints arising under the U.S. federal or state antitrust laws (for example, limitations on sharing of information) presently prevent or hinder Hughes and EchoStar from fully developing integration plans and many of the expenses, by their nature, are impracticable to estimate at the present time. These expenses could, particularly in the near term, exceed the savings that New EchoStar expects to achieve from the elimination of duplicative expenses and the realization of economies of scale and cost and revenue synergies related to the integration of the businesses following the completion of the Hughes/ EchoStar merger. We do expect that some or all of these integration expenses will likely result in New EchoStar taking substantial charges against earnings following the completion of the Hughes/EchoStar merger, but the amount and timing of such charges is uncertain at present.

Regulatory Approval of the Transactions May Require Hughes and/or EchoStar to Agree to Onerous Conditions. Under the U.S. antitrust laws, the Hughes/ EchoStar merger may not be completed until the required waiting period under the Hart-Scott-Rodino Act has terminated or expired. To complete the Hughes/ EchoStar merger, the companies must also obtain the approval of the FCC for the transfer of licenses

and other authorizations in connection with the GM/ Hughes separation transactions and the Hughes/ EchoStar merger. The transactions may also be subject to certain regulatory requirements of other governmental agencies and authorities, including clearances for the Hughes/ EchoStar merger from competition and telecommunications authorities in certain foreign jurisdictions and requirements relating to the regulation of the offer and sale of securities. Many of these governmental entities from which approvals and clearances are required may seek to condition their approval or clearance of the Hughes/ EchoStar merger, or of the transfer to New EchoStar of licenses and other entitlements, on the companies compliance with certain onerous conditions. These conditions could require Hughes and/or EchoStar to divest material assets or otherwise have the effect of imposing significant additional costs on New EchoStar or of limiting New EchoStar's revenues. Depending upon the nature and scope of such onerous conditions, rather than agreeing to such onerous conditions, the companies may determine to terminate the Hughes/ EchoStar merger agreement instead. For more information, see [The Transactions Regulatory Requirements](#).

Any Delay in Completing the Proposed Hughes/ EchoStar Merger May Reduce or Eliminate the Benefits Expected. In addition to the required regulatory clearances and approvals, the Hughes/ EchoStar merger is subject to a number of other conditions beyond the control of the companies that may prevent, delay or otherwise materially adversely affect the completion of the transactions that are the subject of this document. We cannot predict whether and when these clearances and approvals can be obtained. Further, the requirements for obtaining these clearances and approvals could delay the completion of the Hughes/ EchoStar merger for a significant period of time or prevent it from occurring. Any delay in completing the Hughes/ EchoStar merger could cause New EchoStar not to realize some or all of the economies of scale and cost and revenue synergies that New EchoStar expects to achieve if EchoStar successfully completes the Hughes/ EchoStar merger and integrates its business with the Hughes business.

A Potential Indemnity Liability to GM Could Materially Adversely Affect New EchoStar's Liquidity. Pursuant to the terms of the implementation agreement, New EchoStar has agreed to indemnify GM and its affiliates against any taxes resulting from the Hughes split-off if the taxes arise from actions or failures to act by New EchoStar that disqualify the Hughes split-off from being tax-free to GM. Specifically, New EchoStar is required to indemnify GM and its affiliates if New EchoStar enters into any transaction or series of transactions (or fails to take any action within its control) that causes the Hughes split-off to be taxable to GM by reason of the 50% limitation described at [Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar New EchoStar Will Be Subject to Significant Restrictions with Respect to Issuances of Its Equity Securities for Two Years Following the Hughes/EchoStar Merger](#). If New EchoStar does not abide by the terms of the implementation agreement, it may be subject to substantial liabilities under the indemnification provisions of the implementation agreement. For a more detailed discussion, see [Description of Principal Transaction Agreements Implementation Agreement Preservation of the Tax-Free Status of the Hughes Split-Off](#).

The indemnity of GM by New EchoStar is not subject to any cap or maximum amount. Based on the aggregate fair market value of Hughes on [October 1, 2002](#) (based on the closing price of GM Class H common stock on that date and the GM Class H dividend base as of such date) and assuming a Hughes dividend distribution in the amount of \$4.2 billion, GM estimates that its taxable gain would exceed \$ [1.5](#) billion if the Hughes split-off failed to qualify as a tax-free transaction. The actual amount of gain recognized by GM if the Hughes split-off is treated as a taxable transaction, and the amount of tax payable by GM on that gain, would depend upon a number of factors that cannot be determined at this time, including the aggregate fair market value of Hughes at the time of the Hughes split-off and the general tax position of GM, and the actual amount of gain recognized by GM could be materially higher than \$ [1.5](#) billion.

Risks Relating to Hughes and EchoStar

Payment of a Termination Fee by Either Hughes or EchoStar Could Materially Adversely Affect the Liquidity of Hughes or EchoStar and Their Ability to Raise New Capital. Under the terms of the Hughes/ EchoStar merger agreement, Hughes has agreed to pay a termination fee of \$600 million to EchoStar if the Hughes/ EchoStar merger is not completed for certain reasons. In addition, if the Hughes/ EchoStar merger is not completed for certain other reasons, EchoStar has agreed to pay a termination fee of \$600 million to Hughes. See [Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement](#)

Termination Fees; Expense Reimbursement. The financial burden that such a payment would have on Hughes or EchoStar could materially adversely affect that company's liquidity and its ability to raise new capital. In addition, each of Hughes and EchoStar will have incurred substantial transaction-related expenses and devoted substantial management resources to the transactions without realizing the anticipated benefits.

Some Credit Facilities of Hughes Mature Prior to the Termination Date of the Hughes/EchoStar Merger Agreement and Hughes May Have Difficulty Refinancing That Debt. The Hughes/EchoStar merger agreement contains a January 21, 2003 termination date, which may be extended in limited circumstances. Most of Hughes' credit facilities mature at the earlier of the completion of the Hughes/ EchoStar merger and December 2002. As of August 1, 2002, there was a total of about \$1,015 million outstanding under these credit facilities and about \$1,485 billion of available borrowing capacity. If the Hughes/ EchoStar merger has not been completed prior to December 2002, Hughes would likely seek to refinance, or obtain an extension of the maturity dates of, those facilities. There can be no assurance that Hughes would be able to refinance those facilities on acceptable terms or at all or that the lenders under those facilities would extend the maturity dates. In addition, Hughes' ability to refinance, and the cost and terms of any refinancing, may be materially adversely affected by recent downgrades in Hughes' credit rating by various rating agencies. As a general matter, lower ratings result in higher borrowing costs. Hughes could also attempt to obtain cash from asset sales or equity transactions to repay the borrowings under these credit facilities. However, we cannot assure you that acceptable asset sale or equity transactions would occur. In addition, there are certain limitations on Hughes' ability to conduct its business under the terms of the transaction agreements entered into with EchoStar. For a further discussion of these facilities, see the Hughes 2001 Form 10-K, which is incorporated into this document by reference.

EchoStar May Be Required to Acquire the Approximately 81% Interest Held by Certain Subsidiaries of Hughes in PanAmSat and Offer to Purchase the Remaining Minority Interest in PanAmSat under Certain Circumstances. If the Hughes/ EchoStar merger does not occur because certain financing or regulatory-related conditions have not been satisfied, EchoStar would be required to purchase the approximately 81% interest in PanAmSat held by certain subsidiaries of Hughes for a purchase price of \$22.47 per share, or an aggregate amount of about \$2.7 billion. EchoStar would also be required to offer to purchase the remaining publicly-traded shares of PanAmSat in an exchange offer at a price of \$22.47 per share payable, at the option of each holder of such remaining shares, either in cash or shares of EchoStar Class A common stock, unless EchoStar has previously entered into an agreement for the acquisition of PanAmSat by merger or commenced a tender offer for all of the outstanding shares of PanAmSat at an equivalent or greater price per share. The financial burden that such purchases would have on EchoStar could materially adversely affect its liquidity and its ability to raise new capital. In addition, under these circumstances, EchoStar will have incurred substantial transaction-related expenses and devoted substantial management resources to the proposed Hughes/ EchoStar merger without realizing the anticipated benefits. See Description of Principal Transaction Agreements PanAmSat Stock Purchase Agreement. Moreover, EchoStar would then have business interests that would be substantially subject to those risks disclosed in PanAmSat's 2001 Form 10-K, which is incorporated into this document by reference, and those risks related to international satellite business operations.

If the Conditions Obligating EchoStar to Acquire Hughes' Indirect Interest in PanAmSat Are Not Satisfied, Hughes' Liquidity Could be Materially Adversely Affected. If the Hughes/ EchoStar merger does not occur because certain financing or regulatory-related conditions have not been satisfied, EchoStar will be required to purchase the approximately 81% interest in PanAmSat held by certain subsidiaries of Hughes for a purchase price of \$22.47 per share, or an aggregate amount of about \$2.7 billion. The PanAmSat stock sale is intended to provide Hughes with near-term liquidity if the Hughes/EchoStar merger does not occur under certain circumstances.

The PanAmSat stock sale is subject to a number of conditions, several of which are beyond the control of GM, Hughes and EchoStar, which must be satisfied before the transaction could be completed. These conditions include, among other things:

the expiration or termination of the waiting period applicable to the PanAmSat stock sale under the Hart-Scott-Rodino Act;

the absence of any effective injunction or order which prevents the completion of the PanAmSat stock sale;

the receipt of FCC approval for the transfer of licenses in connection with the PanAmSat stock sale; and

there will not have occurred and be continuing any material adverse effect with respect to PanAmSat, other than any material adverse effect that results from factors affecting the economy or financial markets as a whole or generally affecting the industries in which PanAmSat operates.

If these conditions were not fulfilled in accordance with the terms of the PanAmSat stock purchase agreement, EchoStar would not be obligated to complete the purchase, even though the Hughes/ EchoStar merger was not completed. If this were to happen, Hughes would remain a wholly owned subsidiary of GM, and Hughes would not have the benefit of the near-term liquidity represented by the sale of Hughes' indirect interest in PanAmSat to EchoStar. See Description of Principal Transaction Agreements PanAmSat Stock Purchase Agreement.

Hughes and EchoStar Are Each Prohibited from Pursuing Certain Other Opportunities Prior to the Termination of the Transaction Agreements. The terms of the Hughes/ EchoStar merger agreement prohibit, subject to certain exceptions, certain transactions involving Hughes or EchoStar prior to the termination of the applicable transaction agreements among GM, HEC Holdings, Hughes and EchoStar. These prohibited transactions generally include any merger or consolidation of Hughes or EchoStar, which is material to it and its subsidiaries as a whole, with an entity other than EchoStar or Hughes, respectively. These prohibitions may prevent GM, Hughes and EchoStar from pursuing attractive strategic alliances or combinations in the event that such opportunities arise before the termination of the transaction agreements.

The Pendency of the Hughes/ EchoStar Merger Could Materially Adversely Affect the Future Business and Operations of Hughes and EchoStar. In connection with the pending Hughes/ EchoStar merger, some customers and strategic partners of each of Hughes and EchoStar may delay or defer decisions, which could negatively impact revenues, earnings and cash flow of Hughes and EchoStar, as well as the market prices of shares of GM Class H common stock and EchoStar Class A common stock, regardless of whether the Hughes/ EchoStar merger is completed. Similarly, current and prospective employees of Hughes and EchoStar may experience uncertainty about their future roles with New EchoStar, which may materially adversely affect the ability of each of Hughes and EchoStar to attract and retain key management, sales, marketing, technical and other personnel. In addition, some rating agencies that provide security ratings on Hughes' debt have also downgraded their ratings on Hughes' long-term debt since the announcement of the Hughes/EchoStar merger. A downgrade could materially adversely affect the ability of Hughes to finance its operations, including increasing the cost of obtaining financing. For information regarding security ratings on Hughes' debt, see the Hughes 2001 Form 10-K, which is incorporated into this document by reference. Finally, if the Hughes/ EchoStar merger is terminated and GM and Hughes determine to seek another transaction involving Hughes, we cannot assure you that they will be able to negotiate a transaction with another company on terms comparable to the terms of the transactions described in this document.

Failure to Complete the Hughes/EchoStar Merger Could Negatively Affect EchoStar's and Hughes' Ability to Compete with Certain Cable Television Operators. Certain cable television operators have a large, established customer base, and many cable operators have significant investments in, and access to, programming. According to the data collected by the FCC and published in a January 2002 report, about 69 million U.S. television households subscribe to cable. Cable television operators currently have advantages relative to EchoStar and Hughes by, among other things, providing service to multiple television sets within the same household at a lesser incremental cost to the consumer, being able to provide local and other programming in a larger number of geographic areas and bundling their analog video service with expanded

digital video services, efficient two-way high-speed Internet access and telephone service on upgraded cable systems. Cable television operators have been building on these advantages, including by utilizing some of these advantages to increase their capacity to offer programming and other services and by offering new services that EchoStar and Hughes have been unable to match because of the spectrum and other constraints that each company faces. If the proposed Hughes/EchoStar merger is not completed, it will be more difficult for EchoStar and Hughes to match the services provided by cable television operators. If EchoStar and Hughes are unable to match the services provided by cable television operators, each company believes that its churn and subscriber acquisition costs may increase significantly, that it will likely be more difficult to attract new subscribers, and that the capital markets may be less willing to provide financing to EchoStar and Hughes. As a result, each company would become a less effective competitor to the cable television operators that have large, established customer bases and/or significant investments in, and access to, programming. Even if the Hughes/ EchoStar merger is completed, these cable television operators will continue to have advantages relative to New EchoStar. See Risk Factors Relating to New EchoStar After the Transactions Risks Relating to the Business of New EchoStar New EchoStar Will Compete With Other Subscription Television Providers, Which Could Materially Adversely Affect New EchoStar's Ability to Grow and Increase Earnings.

Risks Relating to the Rights of GM Class H Common Stockholders

GM Class H Common Stockholders Will Forgo Any Recapitalization of GM Class H Common Stock Into GM \$1 2/3 Par Value Common Stock at a 120% Exchange Rate. Proposal 1 to amend the GM restated certificate of incorporation will, among other things, add a provision to expressly provide that the completion of the GM/ Hughes separation transactions as described in this document will not result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances pursuant to the provisions of the GM restated certificate of incorporation. Thus, by voting to approve the proposals relating to the transactions, GM Class H common stockholders as well as GM \$1 2/3 par value common stockholders will, in effect, be waiving any application of the recapitalization provision to these transactions that would have applied but for the provision of the GM charter amendment expressly providing that it shall not apply to the transactions. As described in greater detail elsewhere in this document, GM determined that, in the context of the proposed separation of Hughes from GM, such a recapitalization would not be in the best interests of GM and its common stockholders because such a recapitalization would likely produce substantial dilution in the value of the GM \$1 2/3 par value common stock and would change substantially the form and nature of the investment of the GM Class H common stockholders, who would give up their tracking stock investment in the Hughes business and would receive instead a more conventional common stock investment in all of GM's operations. Accordingly, GM structured the transactions so as not to result in such a recapitalization. For further information, see The Transactions GM Background and Considerations Alternatives to the Transactions.

GM Class H Common Stockholders Will Forgo Any Right to Receive Any Portion of the Up to \$4.2 Billion Dividend from Hughes to GM. The GM board of directors has previously adopted a policy statement that requires a proportionate distribution to be made to GM Class H common stockholders when GM receives certain transfers of assets from Hughes, subject to certain exceptions that include any asset transfer which shall have received the consent of the holders of a majority of the outstanding shares of GM Class H common stock, voting as a separate class, and GM \$1 2/3 par value common stock, voting as a separate class. Thus, by ratifying the GM/Hughes separation transactions, the GM Class H common stockholders will be forgoing any right to receive a proportionate distribution based on the dividend of up to \$4.2 billion to be paid from Hughes to GM. However, as provided in the proposed amendment to the GM restated certificate of incorporation, in connection with the proposed Hughes dividend distribution, GM's retained economic interest in Hughes will be commensurately reduced. It should be noted that, in accordance with the terms of the GM board policy statement, the GM board policy statement may at any time and from time to time be modified, rescinded and interpreted by the GM board of directors, and the GM board of directors may adopt additional or other policies or make exceptions with respect to the application of the current GM board policy statement in connection with particular facts and circumstances, as the GM board of directors may determine, consistent with its fiduciary duties to GM and all of its common stockholders, to be in the best interests of General

Motors and all of its common stockholders, and any such action may be taken with or without the approval of the stockholders of GM. For more information, see GM Capital Stock GM Board of Directors Policy Statement.

Risk Factors Relating to GM After the Transactions

GM's Credit Position May be Affected by the Amount of Liquidity Provided by the Transactions, Which Cannot be Determined at this Time. GM expects to receive liquidity in the transactions from the dividend of up to \$4.2 billion to be paid by Hughes and, if applicable, from the debt reduction or cash proceeds resulting from GM share dispositions of up to 100 million shares of GM Class H common stock or New EchoStar Class C common stock. However, the amount of liquidity will depend on, among other things, the value of GM's retained economic interest in Hughes at the time that the GM/Hughes separation transactions are completed and cannot be determined at this time. The amount of liquidity provided by the transactions will affect GM's credit position after the completion of the GM/Hughes separation transactions.

The transaction agreements provide that the aggregate number of shares that GM is permitted to transfer in GM share dispositions after completion of the Hughes/ EchoStar merger will be reduced, subject to certain limitations, to the extent necessary in order to satisfy the equity headroom condition. Any such reduction would reduce the liquidity provided to GM from GM share dispositions, but GM's credit position would continue to benefit from the economic value of any shares of New EchoStar Class C common stock retained by GM rather than transferred in GM share dispositions.

The transaction agreements provide that GM will receive a dividend of up to \$4.2 billion from Hughes. This amount will be reduced by up to \$700 million if and only to the extent required in order to satisfy either the value condition or the equity headroom condition, but such reduction will not exceed the amount of the proceeds from GM share dispositions of more than 60 million shares of GM Class H common stock prior to the completion of the Hughes/EchoStar merger. Thus, while such a mandatory reduction would reduce the liquidity provided to GM from the Hughes dividend distribution, GM would already have received liquidity from previously completed GM share dispositions. The transaction agreements further provide that the amount of the Hughes dividend distribution as so determined may not exceed the value of GM's retained economic interest in Hughes at the time of the Hughes dividend distribution, and GM is not required to complete the GM/Hughes separation transactions unless this value condition is satisfied.

GM has the right, but not the obligation, to elect to reduce the amount of the Hughes dividend distribution or the number of shares of New EchoStar Class C common stock that would be subject to GM share dispositions, or both, by more than the amount described above in order to satisfy the equity headroom condition and/or the value condition. Any such voluntary reductions by GM would have the effect of permitting these conditions to be satisfied at a lower average market price for the GM Class H common stock than would otherwise be required for the satisfaction of these conditions. However, any such reduction in the amount of the Hughes dividend distribution would reduce the amount of liquidity and value to be provided to GM, and any such reduction in the number of shares subject to GM share dispositions would reduce the amount of liquidity to be provided to GM (but such shares would be retained by GM and would be available for other dispositions for up to five years).

We cannot assure you that GM would make any such voluntary reductions, and a failure by GM to make such voluntary reductions could result in the transactions not being completed. As of the date of this document, GM has not made any determination regarding whether or to what extent GM would be willing to make any such voluntary reductions. GM currently expects that it would make any determination regarding any such voluntary reductions immediately before the completion of the Hughes split-off, based on factors it determines to be relevant at that time.

You should further understand that the amount of liquidity and value that GM may realize as a result of either GM share dispositions or the disposition of any other shares retained by GM after the transactions will depend upon, among other things, the trading price of the shares at the time of such disposition.

The Assets of Hughes Will Not Be Available to Support GM's Financial Position and Credit Ratings After the GM/Hughes Separation Transactions. Following the completion of the transactions, Hughes will no longer be a subsidiary of GM. Although the transactions are expected to provide General Motors with

significant liquidity and value as described in greater detail elsewhere in this document, after the Hughes split-off General Motors will be unable to rely upon the assets of Hughes to support its financial position and credit ratings, including in times of economic downturn or cyclical changes in the automotive industry. As a result of the Hughes split-off, GM anticipates that there would be a net reduction of GM's stockholders' equity, reflecting an increase based on the difference between the fair market value and the net book value of Hughes at the time of the Hughes split-off and a reduction based on the fair market value at such time of the shares distributed in the Hughes split-off. This reduction would have been about \$5.3 billion based on the EchoStar Class A common stock price on June 28, 2002 and the net book value of Hughes at June 30, 2002 and certain other assumptions. For additional information, see "The Transactions - Accounting Treatment" below. We cannot assure you that, after the GM/ Hughes separation transactions, operating results and market conditions will not result in lower credit ratings or a weaker financial condition for GM than if the GM/ Hughes separation transactions had not occurred.

Any Appreciation or Depreciation in the Value of the New EchoStar Class C Common Stock Will Affect the Level of GM's Pension Expense. As of September 30, 2002, about 19% of the outstanding GM Class H common stock was held by certain GM employee benefit plans. As GM Class H common stockholders, those GM employee benefit plans will receive shares of New EchoStar Class C common stock in the transactions. In connection with the transactions, those GM employee benefit plans agreed to some restrictions on their ability to sell their shares. See "Shares Eligible For Future Sale - GM Employee Benefit Plans." After the completion of the GM/ Hughes separation transactions, during any period in which those GM employee benefit plans continue to own New EchoStar Class C common stock, appreciation or depreciation in the value of New EchoStar Class C common stock will affect the level of GM's pension expense, which is actuarially determined and computed in accordance with accounting principles generally accepted in the United States. We can provide no assurance as to whether the trading value of New EchoStar Class C common stock after the GM/ Hughes separation transactions will be equal to or greater than the trading value of GM Class H common stock before the GM/ Hughes separation transactions or if the GM/ Hughes separation transactions had not occurred.

Risk Factors Relating to New EchoStar After the Transactions

Risks Relating to the Business of New EchoStar

New EchoStar Will Compete With Other Subscription Television Providers, Which Could Materially Adversely Affect New EchoStar's Ability to Grow and Increase Earnings. New EchoStar will compete in the highly competitive subscription television industry against cable television and other land-based and satellite-based system operators offering video, audio and data programming and entertainment services. Many of these competitors have substantially greater financial, marketing and other resources than New EchoStar will have. New EchoStar's ability to increase earnings will depend, in part, upon its ability to compete with these other operators.

Cable television operators have a large, established customer base, and many cable operators have significant investments in, and access to, programming. According to the data collected by the FCC and published in a January 2002 report, about 69 million U.S. television households subscribe to cable. Cable television operators have advantages relative to EchoStar and Hughes by, among other things:

- providing service to multiple television sets within the same household at a lesser incremental cost to the consumer;

- providing local and other programming in a larger number of geographic areas; and

- bundling their analog video service with expanded digital video services delivered terrestrially or via satellite, efficient two-way high-speed Internet access, and telephone service on upgraded cable systems.

As a result of these and other factors, New EchoStar may not be able to continue to expand its subscriber base or compete effectively against cable television operators.

New technologies also could have a material adverse effect on the demand for New EchoStar's direct broadcast satellite services. For example, new and advanced local multi-point distribution services are

currently being implemented. Other terrestrial wireless video and data distribution services have been proposed at the FCC. In addition, entities such as regional telephone companies, which are likely to have greater resources than New EchoStar will have, are implementing and supporting digital video compression over existing telephone lines. While these entities are not currently providing digital wireless cable, many have the capabilities for such services. Moreover, mergers, joint ventures, and alliances among franchise, wireless or private cable television operators, regional Bell operating companies and others may result in providers capable of offering bundled cable television and telecommunications services in competition with New EchoStar. As a result, New EchoStar may not be able to compete successfully with existing competitors or new entrants in the market for subscription television services.

Other companies in the United States have conditional permits or have leased transponders for direct broadcast satellite assignments that can be used to provide service to portions of the United States. Also, C-band satellite providers and other low and medium power satellite operators continue to compete in the market for subscription television services, particularly in rural areas.

In addition, the FCC has proposed to allocate additional spectrum for direct broadcast satellite services, which could create significant additional competition in the market for subscription television services.

New EchoStar Will Depend Upon Others to Produce Programming. New EchoStar will depend upon third parties to provide it with programming services. The programming agreements of DIRECTV and EchoStar generally have remaining terms ranging from less than one to up to 10 years and contain various renewal and cancellation provisions. New EchoStar may not be able to renew these agreements on favorable terms, or at all, or these agreements may be canceled prior to expiration of their original term. If New EchoStar were unable to renew any of these agreements or the other parties cancel the agreements, we cannot assure you that New EchoStar would be able to obtain substitute programming, or that such substitute programming would be comparable in quality or cost to the existing programming of DIRECTV and EchoStar. In addition, programming costs may continue to increase. New EchoStar may be unable to pass programming costs on to its customers which could have a material adverse impact on its cash flow and operating margins. New EchoStar's ability to compete successfully will depend upon its ability to continue to obtain desirable programming and offer it attractively to its customers at competitive prices.

Increased Subscriber Turnover Could Harm New EchoStar's Financial Performance. Turnover of customers, or churn, is a significant cost element for any subscription television provider. DIRECTV and EchoStar have historically had significant levels of churn. For more information about the historical levels of churn of Hughes, see page 7 of the Hughes 2001 Form 10-K, which is incorporated into this document by reference. EchoStar does not publicly disclose its churn. However, an approximation of EchoStar's level of churn can be calculated using EchoStar's net new subscribers numbers and its subscriber acquisition costs, both in the aggregate and on a per new subscriber basis, which can be found in the Results of Operations section of the Management's Discussion and Analysis of Financial Condition and Results of Operations, included in the EchoStar 2001 Form 10-K, which is incorporated into this document by reference. Any development which, among other things, increases costs to existing customers of New EchoStar, materially adversely impacts the quality of the product or service, increases the desirability of competing products or increases uncertainty about whether the Hughes/EchoStar merger will be completed may increase churn. Thus, any of the risks described in this document which potentially have a material adverse impact on cost or quality could also result in an increase in churn which would harm the financial performance of New EchoStar. Churn can also increase due to factors beyond the control of New EchoStar, including a slowing economy, significant signal compromise, a maturing subscriber base and competitive offers. We cannot assure you that New EchoStar will be able to manage its churn rates to achieve a reasonable level of financial performance.

Increased Subscriber Acquisition Costs Could Affect New EchoStar's Financial Performance. Both DIRECTV and EchoStar subsidize the cost and installation of their receiver systems in order to attract new subscribers. It is contemplated that New EchoStar will continue this practice. New EchoStar's subscriber acquisition costs, both in the aggregate and on a per new subscriber activation basis, may materially increase if it continues or expands current sales promotion activities, or introduces other more aggressive promotions. Any material increase in subscriber acquisition costs from current levels would negatively impact the earnings

of New EchoStar and could materially adversely impact New EchoStar, its financial condition and the market prices of shares of New EchoStar Class A common stock and New EchoStar Class C common stock.

Satellite Programming Signals Have Been Compromised, Which Could Cause New EchoStar to Lose Subscribers and Revenue. The delivery of subscription programming requires the use of encryption technology to assure that only those who pay can receive the programming. It is illegal to create, sell or otherwise distribute mechanisms or devices to circumvent that encryption. Theft of cable and satellite programming has been widely reported and DIRECTV's and EchoStar's signal encryption has been compromised and could be further compromised in the future. New EchoStar will respond to compromises of its encryption system with measures intended to make signal theft of its programming commercially uneconomical. We currently anticipate that New EchoStar will utilize a variety of tools to continue to accomplish this goal. Ultimately, if other measures are not successful, it could be necessary for New EchoStar to incur significant expense to replace the conditional access card that controls the security of each consumer set-top box. Even if we do replace the conditional access card, we cannot guarantee that the new card will prevent the theft of New EchoStar's satellite programming signals. Furthermore, we cannot assure you that other illegal methods which compromise satellite programming signals will not be developed in the future. If New EchoStar cannot promptly correct a compromise of its encryption technology, New EchoStar's revenue and its ability to contract for video and audio services provided by programmers could be materially adversely affected.

New EchoStar May Be Unable to Manage Rapidly Expanding Operations. If New EchoStar is unable to manage its growth effectively, its business and results of operations could be materially adversely affected. To manage its growth effectively, we believe that New EchoStar must continue to:

develop its internal and external sales forces;

develop installation capability;

develop customer service operations and information systems;

maintain the existing relationships of Hughes and EchoStar with third party vendors; and

expand, train and manage its employee base.

Furthermore, its management personnel must assume even greater levels of responsibility. If New EchoStar is unable to effectively manage growth, New EchoStar may experience a decrease in subscriber growth, an increase in churn, an increase in expenses or other adverse results, any one of which could have a material adverse effect on its business.

We Expect That New EchoStar Will Experience Net Losses Through at Least 2003 and We Cannot Be Certain That New EchoStar Will Achieve or Sustain Profitability. Hughes and EchoStar have sustained significant losses and have significant amounts of debt. In addition, New EchoStar will need to incur even more debt in connection with the Hughes/EchoStar merger financing and related transactions, and may need to incur substantial amounts of debt after the Hughes/EchoStar merger in order to operate its business. Further, if EchoStar's and Hughes's application for authority to launch and operate a new spot-beam satellite in connection with the delivery of local broadcast TV channels in all 210 designated market areas in the United States is approved by the FCC, New EchoStar is expected to expend substantial resources to construct and launch this satellite. If New EchoStar does not have sufficient income or other sources of cash, it could eventually affect its ability to service its debt and pay its other obligations. Improvements in New EchoStar's results of operations will depend largely upon its ability to successfully integrate the Hughes and EchoStar businesses while increasing its customer base, maintaining its price structure, effectively managing its costs and controlling churn. We cannot assure you that New EchoStar will be effective with regard to these matters. We currently anticipate that New EchoStar will experience net losses through 2003, and could continue to experience net losses for years subsequent to 2003 for the reasons described above and elsewhere in this document.

New EchoStar's Future Growth Will Depend Upon its Ability to Implement its Business Strategy. New EchoStar's business strategy will be focused on becoming a premier provider of integrated entertainment, information and communications services. We cannot assure you that the implementation of these initiatives will not be delayed, or that they will ever be successfully implemented. Even if implemented, we cannot assure

you that these initiatives will allow New EchoStar to successfully capitalize on the emerging communications services markets it will target.

Construction Delays on Satellites Could Materially Adversely Affect New EchoStar's Revenues and Earnings. The construction and launch of satellites are subject to certain delays, including delays in the construction of satellites and launch vehicles, the periodic unavailability of reliable launch opportunities, possible delays in obtaining regulatory approvals and launch failures, as discussed below. A significant delay in the future delivery of any satellite would materially adversely affect the marketing plan for, or use of, the satellite. If satellite construction schedules are not met, there can be no assurance that a launch opportunity will be available at the time a satellite is ready to be launched. Certain delays in satellite construction could also jeopardize satellite authorizations that are conditioned on timely construction and launch of the satellite. The failure to implement the New EchoStar satellite deployment plan on schedule could negatively impact New EchoStar's revenues and earnings.

New EchoStar's Satellites Will Be Subject to Risks Relating to Launch. Satellite launches are subject to significant risks, including launch failure, incorrect orbital placement or improper commercial operation. About 15% of all commercial geostationary satellite launches have resulted in a total or constructive total loss. Certain launch vehicles that may be used by New EchoStar have either unproven track records or have experienced launch failures in the past. The risks of launch delay and failure are usually greater when the launch vehicle does not have a track record of previous successful flights. Launch failures result in significant delays in the deployment of satellites because of the need both to construct replacement satellites, which can take up to 24 months, and obtain other launch opportunities. Such significant delays could materially adversely affect New EchoStar's ability to generate revenues. If New EchoStar were unable to obtain launch insurance, or obtain launch insurance at rates it deemed commercially reasonable, and a significant launch failure were to occur, it could have a material adverse effect on its ability to generate revenues and fund future satellite acquisitions and launch opportunities. In addition, the occurrence of future launch failures may materially adversely affect the ability of New EchoStar to insure the launch of its satellites at commercially reasonable premiums, if at all. See *The Cost of Obtaining Commercial Insurance Coverage on Certain of its Satellites or Self-Insuring Satellites, Rather Than Obtaining Traditional Commercial Insurance Coverage, Could Materially Adversely Affect New EchoStar's Earnings.*

New EchoStar's Satellites Will Be Subject to Significant Operational Risks. Satellites are subject to significant operational risks while in orbit. These risks include malfunctions, commonly referred to as anomalies, that have occurred in EchoStar, Hughes and PanAmSat satellites and the satellites of other operators as a result of various factors, such as satellite manufacturer's error, problems with the power systems or control systems of the satellites and general failures resulting from operating satellites in the harsh space environment.

Although New EchoStar will work closely with the satellite manufacturers to determine and eliminate the cause of anomalies in new satellites and provide for redundancies of critical components in the satellites, we cannot assure you that New EchoStar will not experience anomalies in the future, whether of the types described above or arising from the failure of other systems or components.

Any single anomaly or series of anomalies could materially adversely affect the operations and revenues of New EchoStar and its relationships with current customers, as well as its ability to attract new customers for its direct broadcast satellites and other satellite services. In particular, future anomalies may result in the loss of individual transponders on a satellite, a group of transponders on that satellite or the entire satellite, depending on the nature of the anomaly. Anomalies may also reduce the expected useful life of a satellite, thereby reducing the revenue that could be generated by that satellite, or create additional expenses due to the need to provide replacement or back-up satellites. Finally, the occurrence of anomalies may materially adversely affect the ability of New EchoStar to insure its satellites at commercially reasonable premiums, if at all. While some anomalies are currently covered by existing insurance policies, others are not now covered or may not be covered in the future. The initial capitalized cost of a satellite ranges from about \$175 million to about \$350 million, depending upon the design. Most of the satellites used by Hughes and EchoStar cost in the range of about \$200 million to about \$250 million. Typically, direct broadcast satellites have from 24 to 72 transponders on-board, and we expect that most of New EchoStar's satellites will have from 30 to 48

transponders. We believe that any new satellite acquired by New EchoStar will continue to fall within these ranges.

Meteoroid events pose a potential threat to all in-orbit satellites. The probability that meteoroids will damage those satellites increases significantly when the Earth passes through the particulate stream left behind by various comets. Due to the current peak in the 11-year solar cycle, increased solar activity is likely for the next year. Occasionally, increased solar activity poses a potential threat to all in-orbit satellites. The probability that the effects from this activity will damage New EchoStar's satellites or cause service interruptions is generally very small.

Some decommissioned spacecraft are in uncontrolled orbits which pass through the geostationary belt at various points, and present hazards to operational spacecraft, including New EchoStar's satellites. New EchoStar may be required to perform maneuvers to avoid collisions which may prove unsuccessful or could reduce the useful life of the satellite through the expenditure of fuel to perform these maneuvers. The loss, damage or destruction of any of New EchoStar's satellites as a result of an electrostatic storm, collision with space debris, malfunction or other event would have a material adverse effect on the business of New EchoStar. As is common in the industry, New EchoStar's in-orbit insurance, if any, will not cover damage to satellites that occurs as a result of collisions with meteoroids, decommissioned spacecraft or other space debris.

New EchoStar's Satellites Could Fail Earlier Than Their Expected Useful Lives. New EchoStar's ability to earn revenue will depend on the usefulness of its satellites. Each satellite has a limited useful life. A number of factors affect the useful lives of the satellites, including, among other things:

the quality of their construction;

the durability of their component parts;

the ability to continue to maintain proper orbit and control over the satellite's functions;

the efficiency of the launch vehicle used; and

the remaining on-board fuel following orbit insertion.

Generally, the minimum design life of the satellites in the New EchoStar fleet is 12 years. We can provide no assurance, however, as to the actual useful lives of the satellites.

In the event of a failure or loss of any of its satellites, New EchoStar may relocate another satellite and use it as a replacement for the failed or lost satellite. Such a relocation would require prior FCC approval and, among other things, a showing to the FCC that the replacement satellite would not cause additional interference compared to the failed or lost satellite. We cannot be certain that New EchoStar could obtain such FCC approval. If New EchoStar chooses to use a satellite in this manner, we cannot assure you that this use would not materially adversely affect its ability to meet the operation deadlines associated with its authorizations. Failure to meet those deadlines could result in the loss of such authorizations, which would have a material adverse effect on New EchoStar's ability to generate revenues.

The Cost of Obtaining Commercial Insurance Coverage on Certain of its Satellites or Self-Insuring Satellites, Rather Than Obtaining Traditional Commercial Insurance Coverage, Could Materially Adversely Affect New EchoStar's Earnings. The price, terms and availability of insurance fluctuate significantly. In the last several years, the cost of obtaining launch and in-orbit policies on satellites reached historic lows but the cost has recently begun to return to the higher levels for such policies that were common in the early 1990's. We currently expect the cost of obtaining insurance to continue to rise and the availability to be limited as a result of recent satellite failures and general conditions in the insurance industry, including the effects of the September 11, 2001 terrorist attacks. Launch and in-orbit policies on satellites may not continue to be available on commercially reasonable terms or at all. In addition to higher premiums, insurance policies may provide for higher deductibles, shorter coverage periods and additional satellite health-related policy exclusions.

The indentures related to certain of EchoStar's and its subsidiaries' outstanding notes contain restrictive covenants that require EchoStar to maintain satellite insurance with respect to specified numbers of the satellites it owns or leases. To date, EchoStar has been unable to obtain insurance on many of its satellites on

terms acceptable to EchoStar. As a result, EchoStar is currently self-insuring all of its satellites. To satisfy insurance covenants related to EchoStar's and its subsidiaries' outstanding notes, EchoStar has reclassified an amount equal to the depreciated cost of three of its satellites from cash and cash equivalents to cash reserved for satellite insurance on its balance sheet. As of June 30, 2002, cash reserved for satellite insurance totaled about \$168 million, which could be increased upon the occurrence of certain events as described in the EchoStar 2001 Form 10-K, which is incorporated into this document by reference. The reclassifications will continue until such time, if ever, as EchoStar can again insure its satellites on acceptable terms and for acceptable amounts. EchoStar believes that it has in-orbit satellite capacity sufficient to expeditiously recover transmission of most programming in the event one of its satellites fails. However, the cash reserved for satellite insurance is not adequate to fund the construction, launch and insurance for a replacement satellite in the event of a complete loss of a satellite. Programming continuity cannot be assured in the event of multiple satellite losses.

Hughes and PanAmSat use in-orbit and launch insurance to mitigate the potential financial impact of satellite fleet in-orbit and launch failures unless the premium costs are considered uneconomic relative to the risk of satellite failure. The insurance generally covers the unamortized book value of covered satellites. Although the insurance generally does not compensate for business interruption or loss of future revenues or customers, Hughes relies on in-orbit spare satellites and excess transponder capacity at key orbital slots to mitigate the impact of satellite failure on Hughes' ability to provide service. If Hughes' insurance policies contain a coverage exclusion for a satellite with known anomalies or insurance costs for a particular satellite are prohibitively expensive, Hughes self-insures with respect to those anomalies or satellites. The book value of satellites that were insured with coverage exclusions amounted to about \$663 million and the book value of the satellites that were not insured was about \$603 million at June 30, 2002. The instruments governing certain PanAmSat indebtedness also contain restrictive covenants that require it to maintain satellite insurance with respect to specified numbers of the satellites they own or lease.

If the Hughes/EchoStar merger is completed, New EchoStar may not be able to obtain commercial insurance covering the launch and/or in-orbit operation of new satellites or renew coverage on existing satellites, where applicable, at rates acceptable to it and for the full amount necessary to construct, launch and insure replacement satellites. In that event, New EchoStar will be forced to self-insure all or a portion of the launch and/or in-orbit operation of each affected satellite. This could require New EchoStar to reserve material amounts of additional cash on its balance sheet, which would reduce New EchoStar's stockholders' equity and could materially adversely affect New EchoStar's liquidity given the significant funding requirements New EchoStar is expected to have following the completion of the Hughes/EchoStar merger and the restrictions New EchoStar is expected to have on its ability to engage in equity and debt financings. See *Risks Relating to Liquidity and Financing Activities of New EchoStar - We Cannot Assure You That There Will Be Sufficient Funding for New EchoStar and New EchoStar Will Be Subject to Significant Restrictions with Respect to Issuances of Its Equity Securities for Two Years Following the Hughes/EchoStar Merger*. Any launch vehicle failure, or loss or destruction of any of New EchoStar's satellites for which it does not have commercial insurance for the full replacement cost of such satellites could have a material adverse effect on New EchoStar's revenues and earnings, its ability to comply with must-carry and other regulatory obligations and its ability to fund the acquisition of replacement satellites. In addition, higher premiums on insurance policies would increase New EchoStar's costs, thereby reducing its operating income.

New EchoStar's Ability to Maintain Leading Technological Capabilities is Uncertain. New EchoStar's operating results will depend to a significant extent upon its ability to continue to introduce new products and services on a timely basis and to reduce costs of its existing products and services. We cannot assure you that New EchoStar will successfully identify new product or service opportunities or develop and market these opportunities in a timely or cost-effective manner. The success of new product development depends on many factors, including proper identification of customer needs, cost, timely completion and introduction, differentiation from offerings of competitors and market acceptance.

Technology in the subscription television and satellite services industries changes rapidly as new technologies are developed, which could cause the services and products of New EchoStar to become

obsolete. We cannot assure you that New EchoStar and its suppliers will be able to keep pace with technological developments. If the new technologies on which New EchoStar intends to focus its research and development investments fail to achieve acceptance in the marketplace, New EchoStar could suffer a material adverse effect on its future competitive position that could cause a reduction in its revenues and earnings. For example, competitors of New EchoStar could be the first to obtain proprietary technologies that are perceived by the market as being superior. Further, after substantial research and development costs, one or more of the technologies under development by New EchoStar or any of its strategic partners could become obsolete prior to its introduction. In addition, delays in the delivery of components or other unforeseen problems in New EchoStar's direct broadcast satellite system or other satellite services may occur that could materially adversely affect its ability to generate revenue, offer new services and remain competitive.

Technological innovation is important to New EchoStar's success and depends, to a significant degree, on the work of technically skilled employees. Competition for the services of these types of employees is vigorous. We cannot assure you that New EchoStar will be able to attract and retain these employees. If New EchoStar were unable to attract and maintain technically skilled employees, its competitive position could be materially adversely affected.

The Benefits of Hughes' Subsidiary Relationship with GM Will Not Be Available to New EchoStar Following the Transactions. As a wholly owned subsidiary of GM, Hughes has been able to benefit from GM's extensive network of business relationships with companies and other contacts around the world. Hughes has historically drawn upon this resource in the course of developing its own contacts and business relationships. After the GM/Hughes separation transactions and the Hughes/EchoStar merger, New EchoStar will be an independent, publicly owned company, separate from GM, and thus will no longer be able to benefit from GM's relationships in the same manner.

New EchoStar Will Rely on Key Personnel. New EchoStar's future success will depend to a significant extent upon the performance of Charles W. Ergen, who will be the Chairman of the Board of Directors and Chief Executive Officer of New EchoStar. The loss of Mr. Ergen or of certain other key executives could have a material adverse effect on New EchoStar's ability to implement its business plan and achieve the benefits expected from the Hughes/EchoStar merger. New EchoStar does not currently expect to maintain key man insurance. Although all of its executives will execute agreements limiting their ability to work for or consult with competitors if they leave New EchoStar, New EchoStar is not expected to have any employment agreement with any executive upon the completion of the Hughes/EchoStar merger.

Risks Relating to Liquidity and Financing Activities of New EchoStar

New EchoStar Will Be Subject to Significant Restrictions with Respect to Issuances of Its Equity Securities for Two Years Following the Hughes/EchoStar Merger. In order to preserve the tax-free status of the Hughes split-off to General Motors, New EchoStar has agreed to be subject to certain restrictions on issuances of its stock and other securities that are convertible or exchangeable into its stock. Under applicable provisions of the Internal Revenue Code of 1986, as amended, which we sometimes refer to as the Code, the Hughes split-off will not be tax-free to General Motors if it is part of a plan under which one or more persons, other than General Motors and, in general, its historical stockholders, acquire stock possessing at least 50% of the voting power or at least 50% of the value of the outstanding stock of New EchoStar. We sometimes refer to the shares of New EchoStar stock that will count toward this 50% limitation as tainted stock. The New EchoStar Class A common stock and New EchoStar Class B common stock issued in the Hughes/EchoStar merger will be treated as tainted stock that counts toward the 50% limitation, as will shares of New EchoStar Class C common stock exchanged in the Hughes split-off for shares of GM Class H common stock issued in any debt-for-equity exchanges prior to the Hughes split-off and shares of New EchoStar Class C common stock transferred in any subsequent GM share dispositions. In addition, any stock that is issued by New EchoStar, other than, in general, stock issued upon the exercise of compensatory stock options, during the two-year period following the Hughes split-off generally will be presumed to be tainted stock absent an IRS ruling or tax opinion to the contrary. Under the implementation agreement, General Motors has broad rights to prevent New EchoStar from taking any action that might jeopardize the tax-free status of the Hughes split-off. As a result, New EchoStar's ability to issue any equity capital or other securities convertible or

exchangeable into equity capital in the two-year period following the Hughes/ EchoStar merger will be severely restricted, absent possible favorable IRS rulings. Because the funding requirements of the operations of New EchoStar after the completion of the Hughes/EchoStar merger are expected to be significant, as described at *The Transactions Description of the Transactions Hughes/EchoStar Merger Financings* and

Liquidity and Funding Needs of New EchoStar, these restrictions will likely cause New EchoStar to incur additional indebtedness to finance its activities. Any such additional indebtedness could materially increase New EchoStar's liabilities and, because of the increased debt expense, its operating costs. These equity restrictions also may prevent New EchoStar from entering into transactions that might be advantageous to its stockholders, such as issuing equity securities to satisfy its financing needs or issuing equity securities in connection with acquisitions of businesses or assets.

New EchoStar Will Have Substantial Indebtedness, Is Currently Expected to Require Substantial Additional Indebtedness and Will Depend Upon Its Subsidiaries' Earnings To Make Payments on Its Indebtedness. New EchoStar or its subsidiaries, as applicable, will assume any of the new indebtedness incurred at EchoStar, Hughes and/ or their respective subsidiaries in connection with financing the cash required to complete the Hughes/EchoStar merger, and New EchoStar will inherit the existing substantial indebtedness of EchoStar and its subsidiaries upon the completion of the Hughes/ EchoStar merger, which will make it vulnerable to changes in general economic conditions. An indication of the amount of the indebtedness is set forth in the New EchoStar Unaudited Pro Forma Condensed Consolidated Balance Sheet as of June 30, 2002, which indicates that New EchoStar would have had about \$11.4 billion of long-term debt had the Hughes/ EchoStar merger been completed as of such date based on the assumptions, estimates and qualifications described in the notes thereto. In addition, New EchoStar is currently expected to require substantial additional financing following completion of the Hughes/ EchoStar merger to fund capital expenditures and costs and expenses in connection with the integration of Hughes and EchoStar, the payment of retention bonuses, severance benefits and pension enhancements to employees of Hughes, funding its operations, domestic and international investments and its growth strategy and the repayment or repurchase of indebtedness, particularly in light of the significant cash requirements of certain parts of the Hughes business. Because New EchoStar's ability to raise equity capital for two years following completion of the Hughes/ EchoStar merger will (absent possible favorable IRS rulings) be severely restricted, it is currently expected that it will likely be necessary for New EchoStar to incur additional indebtedness to finance its activities. The indentures and other agreements governing the debt of New EchoStar's subsidiaries will restrict those subsidiaries' ability to incur additional debt. It is also possible that New EchoStar could be subject to restrictions on its ability to incur debt if EchoStar, Hughes or their respective subsidiaries or New EchoStar agrees to such restrictions in connection with an incurrence of debt as part of the Hughes/ EchoStar merger financing. Thus, it may be difficult for New EchoStar to obtain additional debt at all or on acceptable terms.

Moreover, because it is currently expected that New EchoStar will conduct substantially all of its operations through its subsidiaries, its ability to service its debt obligations will be dependent upon the earnings of its subsidiaries and the payment of funds by its subsidiaries to it in the form of loans, dividends or other payments. It is currently expected that New EchoStar will have few assets of significance other than the capital stock of its subsidiaries. New EchoStar's subsidiaries will be separate legal entities. Furthermore, New EchoStar's subsidiaries will not be obligated to make funds available to it, and creditors of New EchoStar's subsidiaries will have a superior claim to its subsidiaries' assets. In addition, New EchoStar's subsidiaries' ability to make any payments to it will depend upon their earnings, the terms of their indebtedness, business and tax considerations and legal restrictions. We cannot assure you that New EchoStar or its subsidiaries will be able to pay dividends or otherwise distribute funds to New EchoStar (or a subsidiary obligor) in an amount sufficient to pay the principal of or interest on the indebtedness owed by New EchoStar or any such subsidiary, including the Hughes/EchoStar merger financing described at *The Transactions Description of the Transactions Hughes/EchoStar Merger Financings*.

Any additional debt incurred by New EchoStar and its subsidiaries will subject it to higher interest costs and decrease its cash flows and earnings.

The Hughes/ EchoStar Merger May Constitute a Change in Control Under the Indentures Governing Certain Debt Securities of EchoStar and its Subsidiaries. If EchoStar does not obtain consents from the holders of certain of its debt instruments prior to the completion of the Hughes/EchoStar merger, EchoStar

believes that New EchoStar will be required to offer to repurchase debt instruments with an aggregate principal amount of \$ _____ billion at 101% of the principal amount thereof, together with accrued but unpaid interest. If New EchoStar has insufficient funds to repurchase all debt securities that holders tender for purchase upon the occurrence of the change in control, and New EchoStar is unable to raise additional capital, an event of default could occur under the relevant indentures. EchoStar believes that an event of default could cause an aggregate principal amount of about \$ _____ billion of other debt of New EchoStar to become automatically due, resulting in further deterioration in New EchoStar's financial condition. We cannot assure you that additional capital sufficient to prevent the occurrence of an event of default under the relevant indentures would be available on acceptable terms, or at all. See _____ Risks Relating to Liquidity and Financing Activities of New EchoStar.

We Cannot Assure You That There Will Be Sufficient Funding for New EchoStar. New EchoStar may not be able to raise adequate capital to fund some or all of its business and growth strategies on favorable terms, or at all, or to react rapidly to changes in technology, products, services or the competitive landscape. We believe that key success factors in the subscription television industry include superior access to capital and financial flexibility. Industry participants often face high capital requirements in order to take advantage of new market opportunities, respond to rigorous competitive pressures and react quickly to changes in technology. For example, as a result of the competitive environment in the subscription television industry, New EchoStar may have to incur increased subscriber acquisition costs.

New EchoStar expects the global subscription television industry to continue to grow due to the high demand for communications infrastructure and the opportunities created by industry deregulation. Many of New EchoStar's competitors are committing substantial capital and, in many instances, are forming alliances to acquire and maintain market leadership. New EchoStar's strategy will be to be a leader in providing entertainment, information and communications products and services by building on its experience in satellite technology and by making acquisitions and establishing, maintaining and restructuring strategic alliances as appropriate. This strategy will require substantial investments of capital over the next several years. In addition, the industry in which New EchoStar will compete is capital intensive requiring significant investment in, among other things, infrastructure, research and marketing. The construction, launch and insurance for new satellites and new satellite systems planned by Hughes, PanAmSat and EchoStar will generate significant capital requirements for New EchoStar. There can be no assurance that additional financing will be available on acceptable terms, or at all, if needed in the future. We cannot assure you that New EchoStar will be able to satisfy its capital requirements in the future, whether through lack of competitive access to capital markets, due to restrictions under agreements relating to the transactions that are the subject of this document or otherwise. See _____ New EchoStar Will Be Subject to Significant Restrictions with Respect to Issuances of its Equity Securities for Two Years Following the Hughes/ EchoStar Merger.

In addition, New EchoStar's ability to increase earnings and to make interest and principal payments on its outstanding debt will depend in part upon its ability to continue growing its business by maintaining and increasing its subscriber base, which in turn may require significant additional capital that may not be available to New EchoStar.

The Actual Amount of Funds Necessary to Implement New EchoStar's Strategy and Business Plan May Materially Exceed its Current Estimates. The actual amount of funds necessary to implement New EchoStar's strategy and business plan may materially exceed the current estimates of Hughes and EchoStar in the event of various factors including, among other things:

unanticipated additional financing requirements to fund capital expenditures and costs and expenses in connection with funding its operations, domestic and international investments and its growth strategy and the repayment or repurchase of indebtedness;

departures from Hughes' and EchoStar's respective current business plan;

unforeseen delays;

cost overruns;

unanticipated expenses;

regulatory developments; and

technological and other risks.

If actual costs do materially exceed Hughes and EchoStar's current estimates for these or other reasons, this could negatively impact New EchoStar's earnings, cash flow and financial condition and impact the market price of shares of New EchoStar Class A common stock and New EchoStar Class C common stock.

New EchoStar's Indebtedness May Contain Terms That Could Limit the Operational and Financial Flexibility of New EchoStar. New EchoStar or its subsidiaries, as applicable, will assume any of the new indebtedness incurred at EchoStar, Hughes and/or their respective subsidiaries in connection with financing the cash required to complete the Hughes/ EchoStar merger. New EchoStar will also inherit the existing substantial indebtedness of EchoStar and its subsidiaries upon the completion of the Hughes/ EchoStar merger and is currently expected to incur additional indebtedness in the future. The terms of the indebtedness assumed, inherited or incurred by New EchoStar or its subsidiaries in connection with, or following, the Hughes/ EchoStar merger will contain restrictions and covenants that limit the operational and financial flexibility of New EchoStar. These restrictions and covenants could prevent New EchoStar from taking advantage of strategic opportunities that it could have taken advantage of, or otherwise limit its financing or operational flexibility in a manner that would not otherwise be required, in the absence of those restrictions and covenants and could also limit the ability of New EchoStar and its subsidiaries to:

incur additional indebtedness;

issue preferred stock;

sell assets;

create, incur or assume liens;

merge, consolidate or sell assets;

determine not to self-insure certain of its satellites;

enter into transactions with affiliates; and

pay dividends and make other distributions.

The restrictions on the ability of New EchoStar's subsidiaries to make payments and other distributions to New EchoStar (or a subsidiary obligor) are expected to make it more difficult for New EchoStar to satisfy its expected significant funding needs, including the significant cash requirements of certain parts of the Hughes business. A more detailed description of the material covenants and restrictions relating to the indebtedness of EchoStar and its subsidiaries to be assumed by New EchoStar can be found in the Liquidity and Capital Resources section of the Management's Discussion and Analysis of Financial Condition and Results of Operations, and in the Notes to the Consolidated Financial Statements, included in the EchoStar 2001 Form 10-K, which is incorporated into this document by reference.

There May Be Risks Relating To EchoStar's Prior Use Of Arthur Andersen as Its Independent Public Accountant. The consolidated financial statements of EchoStar, which have been incorporated into this document by reference to the EchoStar 2001 Form 10-K, have been audited by Arthur Andersen LLP, independent public accountants as indicated in their report with respect to such financial statements. The audit partner and manager formerly in charge of the Arthur Andersen engagement with EchoStar are no longer associated with that firm and, as a result, the SEC will not allow the incorporation by reference of their report into this document. EchoStar is therefore permitted to dispense with the requirement to file an Arthur Andersen consent in reliance upon Rule 437a under the Securities Act of 1933. Since, as described above, the SEC will not allow the incorporation by reference of their report into this document, you will not be able to recover against Arthur Andersen under Section 11 of the Securities Act in the event of any future claims that any untrue statements of a material fact were contained in the EchoStar financial statements audited by Arthur Andersen, or that there were any omissions to state a material fact required to be stated therein.

Effective June 1, 2002, EchoStar determined not to renew the engagement of Arthur Andersen as its independent accountants and appointed KPMG LLP as its new independent accountants, effective immediately.

The conviction of Arthur Andersen on obstruction of justice charges may adversely affect Arthur Andersen's ability to satisfy any claims that might arise in the future from its prior provision of auditing services to EchoStar. Prospective investors in EchoStar's or New EchoStar's securities might consider such financial inability on the part of Arthur Andersen as a negative factor in considering an investment decision with respect to future securities offerings by EchoStar or New EchoStar. Should EchoStar seek to access the public capital markets, or should New EchoStar seek to access such markets after the completion of the Hughes/ EchoStar merger, SEC rules will generally require EchoStar or New EchoStar, as applicable, to include or incorporate by reference into any prospectus three years of audited financial statements. The SEC's current rules would require EchoStar or New EchoStar, as applicable, to present audited financial statements for one or more fiscal years audited by Arthur Andersen and obtain their consent or rely on Rule 437a until EchoStar's audited financial statements for the fiscal year ending December 31, 2004 become available in the first quarter of 2005. If prior to that time the SEC ceases accepting financial statements audited by Arthur Andersen, then EchoStar's available audited financial statements for the years ended December 31, 2001, December 31, 2000 and/or December 31, 1999 audited by Arthur Andersen would not satisfy the SEC's requirements. In that case, it may become necessary for EchoStar or New EchoStar, as applicable, to have KPMG, EchoStar's current independent accounting firm, or another independent accounting firm, audit the financial statements originally audited by Arthur Andersen—a process that could require an estimated four to six weeks or more.

Risks Relating to Regulatory Matters Affecting New EchoStar

Domestic and Foreign Regulations May Materially Adversely Affect New EchoStar's Business. New EchoStar will be subject to various regulations, including substantial regulation by the FCC. FCC rules and regulations are subject to change in response to industry developments, new technology and political considerations. In addition, New EchoStar will also be subject to the regulatory authority of the U.S. government and the national communications authorities of the countries in which it operates. These authorities regulate the construction, launch and operation of its satellites and the orbital slots planned for these satellites.

New EchoStar's business could be materially adversely affected by the adoption of new laws, policies and regulations or changes to existing regulations. In particular, we cannot assure you that New EchoStar will succeed in obtaining all requisite regulatory approvals for its operations without the imposition of restrictions on its business, which could have the effect of imposing additional costs on New EchoStar or of limiting New EchoStar's revenues.

The Ability to Maintain FCC Licenses and Other Regulatory Approvals is Critical to New EchoStar's Business. New EchoStar will be subject to the regulatory authority of the U.S. government, primarily the FCC, and the national communications authorities of the countries in which it will operate. If New EchoStar does not obtain all requisite regulatory approvals for the construction, launch and operation of any of its future satellites and for the orbital slots planned for these satellites, or the licenses obtained impose operational restrictions on New EchoStar, its ability to generate revenue and profits could be materially adversely affected. In addition, under certain circumstances, existing licenses are subject to revocation or modification and renewal of licenses that have an expiration date may not be granted. If existing licenses are not renewed, or are revoked or materially modified, New EchoStar's ability to generate revenue could be materially adversely affected.

Moreover, we cannot assure you that New EchoStar will continue to coordinate successfully any or all of its satellites under FCC procedures domestically and under procedures of the International Telecommunication Union internationally. This coordination is required in connection with domestic and

international procedures that are intended to avoid interference to or from other satellites. More specifically, the risks of government regulation include:

the relocation of satellites to different orbital locations if the FCC determines that re-location is in the public interest;

the rejection by the FCC of the replacement of an existing satellite with a new satellite;

regulation by governments, including the U.S. government, of satellite transmissions that have the potential to interfere with government operations, or other satellite or terrestrial commercial operations, which could interfere with New EchoStar's contractual obligations to customers or other business operations; and

revocation of currently unused orbital slots provided to New EchoStar if not utilized prior to certain expiration dates.

All of New EchoStar's FCC authorizations are subject to conditions imposed by the FCC in addition to the FCC's authority to modify, cancel or revoke them. Use of FCC licenses and conditional authorizations are often subject to certain technical and due diligence requirements, including the requirement to construct and launch satellites. EchoStar has not filed, or not timely filed, some of the required reports. The FCC has indicated that it may revoke, terminate, condition or decline to extend or renew such authorizations if EchoStar fails to comply with applicable Communications Act requirements. Failure to comply with such requirements, or comply in a timely manner, could lead to the revocation of authorizations and could have a material adverse effect on the ability of New EchoStar to generate revenue. Specifically, loss of a frequency authorization would reduce the amount of spectrum available to New EchoStar, potentially reducing the amount of programming and other services available to New EchoStar subscribers. The materiality of such a loss of authorizations would vary based upon, among other things, the orbital location at which the frequencies may be used. For example, a loss of frequencies at New EchoStar's core locations of 119° west longitude, 110° west longitude or 101° west longitude would have a greater impact on subscribers than a loss of frequencies at other locations.

At the completion of the Hughes/ EchoStar merger, New EchoStar will have pending at the FCC various matters, including the following:

potential loss of unbuilt satellite authorizations held by EchoStar, Hughes and PanAmSat, which would prevent New EchoStar from pursuing its service expansion plans;

potential loss of frequencies available pursuant to a special temporary authority granted for periods up to 180 days for certain EchoStar and PanAmSat satellites, which the FCC may refuse to grant or renew and that may be subject to restrictive conditions;

third party oppositions against some of New EchoStar's authorizations or pending and future requests to the FCC;

arguments from the states of Alaska and Hawaii that EchoStar's and DIRECTV's service to these states from various orbital locations does not comply with FCC-imposed obligations to serve those states, which, if successful, might require costly changes to New EchoStar's service offerings; and

required approvals from the FCC for the launch and/or operation of numerous satellites proposed to be launched by EchoStar, PanAmSat and Hughes, which, if not obtained, could delay or hamper New EchoStar's ability to provide new services. In particular, the FCC's delay or failure to approve New EchoStar's pending satellite application would hamper its ability to expand local-into-local services.

In addition, many of New EchoStar's authorizations and pending applications are subject to petitions and oppositions filed by several companies and we cannot be certain that New EchoStar's authorizations will not be cancelled, revoked or modified or that its applications will not be denied.

New EchoStar's projects to construct and launch Ku-band, extended Ku-band and Ka-band satellites are in the early stages of development and are currently being challenged by several companies with interests

adverse to New EchoStar's. Among other things, EchoStar holds a conditional license for a Ku-band satellite system at the 83 degrees and 121 degrees west longitude slots. We cannot assure you that the FCC will sustain these licenses, or grant the pending applications, or that New EchoStar will be able to successfully capitalize on any resulting business opportunities. In fact, by order released on July 1, 2002, the FCC's International Bureau cancelled EchoStar's Ka-band authorization for the 83 degrees and 121 degrees west longitude slots, on the grounds that EchoStar had not commenced construction of EchoStar's first Ka-band satellite by the January 2002 milestone. EchoStar disagrees with that conclusion and has requested reconsideration of the Bureau's decision, but EchoStar cannot be sure that this challenge will result in any change to the decision cancelling that license.

New EchoStar May Not Be Aware of Certain Foreign Government Regulations. Because regulatory schemes vary by country, New EchoStar may be subject to regulations in foreign countries of which New EchoStar is not presently aware. If that were to be the case, New EchoStar could be subject to sanctions by a foreign government that could materially adversely affect its ability to operate in that country. We cannot assure you that any current regulatory approvals held by New EchoStar are, or will remain, sufficient in the view of foreign regulatory authorities, or that any additional necessary approvals will be granted on a timely basis or at all, in all jurisdictions in which New EchoStar wishes to operate new satellites, or that applicable restrictions in those jurisdictions will not be unduly burdensome. The failure to obtain the authorizations necessary to operate satellites internationally could have a material adverse effect on New EchoStar's ability to generate revenue and its overall competitive position.

New EchoStar, its customers and companies with which it does business may be required to have authority from each country in which it provides services or provides its customers use of its satellites. Because regulations in each country are different, New EchoStar may not be aware if some of its customers and/or companies with which it does business do not hold the requisite licenses and approvals.

Foreign Ownership Restrictions Could Affect New EchoStar's Business Plans. The Communications Act and the FCC's implementing regulations provide that when subsidiaries of a holding company hold certain types of FCC licenses, foreign nationals or their representatives may not own or vote more than 25% of the total equity of the holding company, except upon an FCC public interest determination. On June 13, 2002, however, the FCC amended certain of its rules such that providers of subscription direct broadcast satellite services, like New EchoStar will be, are not subject to the foreign ownership limitation. New EchoStar cannot be certain that this decision will not be challenged at the FCC and in the courts.

The foreign ownership limitations will apply to New EchoStar's licenses for fixed satellite service if it holds itself out as a common carrier or if the FCC decides to treat New EchoStar as such a carrier. The FCC has noted that EchoStar has proposed to operate one of its authorized fixed satellite service systems on a common carrier as well as a non-common carrier basis. EchoStar has recently informed the FCC that it has no common carrier plans with respect to that system. If the FCC decides to treat New EchoStar as a common carrier for any of its operations or if it operates as one, New EchoStar cannot be sure that the FCC will grant any request for a public interest determination that may be needed to allow any indirect foreign investment in excess of 25%.

EchoStar believes that a subsidiary of The News Corporation Limited, a South Australia corporation, currently owns about 2.2% of EchoStar's total outstanding stock, representing less than one percent of EchoStar's total voting power. In addition, the recent investment by Vivendi Universal S.A., a company organized under the laws of France, in EchoStar Series D convertible preferred stock represents about 10.7% of EchoStar's total outstanding stock and about 2.2% of EchoStar's total voting power. While EchoStar believes that the current levels of foreign ownership are below any applicable limit, additional foreign ownership in New EchoStar may implicate these limits and require a prior FCC determination that such ownership is in the public interest.

New EchoStar Will Depend Upon the Cable Act For Access to Others' Programming. We currently anticipate that New EchoStar will purchase a substantial percentage of its programming from programmers that are affiliated with cable system operators. Any change in the Cable Act and the FCC's rules that would permit the cable industry or programmers that are affiliated with cable system operators to refuse to provide

such programming or impose detrimental terms or conditions could materially adversely affect New EchoStar's ability to acquire programming on a cost-effective basis, or at all. Currently, cable-affiliated programmers generally must offer programming they have developed to all multi-channel video programming distributors on non-discriminatory terms and conditions.

The Cable Act and the FCC's rules also prohibit some types of exclusive programming contracts involving programming from programmers that are affiliated with cable system operators. Although this provision was scheduled to expire this year, the FCC recently voted to extend the exclusivity restrictions for an additional five years. Upon expiration of that provision, many popular programs may become unavailable to New EchoStar, causing a loss of customers and adversely affecting New EchoStar's revenues and financial performance. This decision remains potentially subject to reconsideration and further administrative or judicial challenge.

Certain cable providers have denied access to certain sports programming provided by programmers that are affiliated with cable system operators. The cable providers are asserting that they are not required to provide such programming under the Cable Act. Challenges to this interpretation of the Cable Act have not been successful and New EchoStar may continue to be precluded from obtaining this regional sports programming which could materially adversely affect its ability to compete in regions serviced by these cable providers.

New EchoStar's Local Programming Strategy Will Face Uncertainty. The Satellite Home Viewer Improvement Act generally gives satellite companies a statutory copyright license to retransmit local-into-local broadcast channel programming, subject to obtaining the retransmission consent of the local broadcast station. Retransmission consent agreements will be important to New EchoStar because a failure to reach such agreements with broadcasters who elect retransmission consents instead of mandatory must carry carriage means it cannot carry these broadcasters' signals, and the absence of these channels could have a material adverse effect on its strategy to compete with cable, which provides local signals. While DIRECTV and EchoStar have been able to reach retransmission consent agreements with most of the local broadcast stations in areas where they provide local service, any additional roll-out of local channels in more cities will require additional agreements, especially in light of the current plan for New EchoStar to provide local television stations to all 210 designated market areas in the United States. We cannot be certain that New EchoStar will secure these agreements or new agreements upon the expiration of the current retransmission consent agreements, some of which are short term.

Must Carry Requirements May Negatively Affect New EchoStar's Ability to Offer Local Broadcast Stations. The Satellite Home Viewer Improvement Act includes the imposition of must carry requirements on direct broadcast satellite service providers. The constitutionality of these requirements has been upheld by the courts. The FCC has implemented the must carry requirement and adopted detailed must carry rules covering both commercial and non-commercial broadcast stations. These must carry rules generally require that satellite distributors carry all the local broadcast stations requesting carriage in a timely and appropriate manner in areas where they choose to offer any local programming. EchoStar and Hughes have announced that, contingent upon the launch of additional planned satellites, New EchoStar will carry local broadcast stations, and fully comply with must carry obligations, in every local television market in the United States. In the near term, following completion of the Hughes/EchoStar merger, however, New EchoStar will have limited capacity, and the projected number of markets in which it can offer local programming will continue to be constrained because of the must carry requirement and may be reduced depending on the FCC's interpretation of its rules in a pending proceeding. The legislation also includes provisions which could expose New EchoStar to federal copyright infringement lawsuits, material monetary penalties, and permanent prohibitions on the sale of all local and distant network channels, based on inadvertent violations of the legislation, prior law, or the FCC rules. Imposition of these penalties would have a material adverse effect on New EchoStar's business operations generally.

While Hughes' and EchoStar's proposal to provide local broadcast channels in all 210 designated market areas will improve New EchoStar's ability to comply with must carry requirements, New EchoStar's application for authority to launch and operate the spot-beam direct broadcast satellite may not be granted by

the FCC. Additionally, because the proposed satellite employs advanced spot-beam technology, the likelihood of performance reductions may be heightened. There can be no assurance that the technology and equipment will operate to anticipated performance levels. Such failures and reductions in performance levels could materially adversely affect New EchoStar's ability to meet its must carry requirements.

Several must carry complaints by broadcasters against DIRECTV and EchoStar have been filed at the FCC. We cannot be sure that the FCC will not rule against New EchoStar in those proceedings, resulting in carriage of many additional stations in the markets where it will offer local stations or cumbersome changes to its compliance plan. Furthermore, while we cannot be sure that the FCC will not interpret or implement its rules in such a manner as to inhibit New EchoStar's use of a two-dish solution to comply with the must carry requirements, New EchoStar plans to transition to a single-dish local-into-local solution for all designated market areas. In fact, the National Association of Broadcasters and Association of Local Television Stations filed an emergency petition January 4, 2002 asking the FCC to modify or clarify its rules to prohibit or hamper EchoStar's compliance plan. In response, on April 4, 2002, a bureau of the FCC issued a declaratory ruling and order finding that EchoStar's compliance plan violated certain provisions of the Satellite Home Viewer Improvement Act and the FCC's must carry regulations. The April 4 order required EchoStar to file compliance reports within 30 days, 90 days and 150 days of the order's issuance. EchoStar filed its first compliance report on May 6, 2002, the second report on July 3, 2002 and the third compliance report was filed on September 3, 2002. Challenges to the April 4 order have been filed by various parties, including EchoStar, and are presently pending. On April 15, 2002, the bureau issued an order granting in part numerous complaints filed against EchoStar by individual broadcast stations that claimed violations of the must carry requirements similar to those addressed in the April 4 order. The April 15 order also required EchoStar to submit a compliance report within 30 days. Depending upon the ultimate outcome of these proceedings (including the extent to which EchoStar's compliance reports are accepted), further orders by the bureau or by the FCC itself could result in a decrease in the number of local areas where New EchoStar will offer local network programming until new satellites are launched. This, in turn, could significantly increase the churn of subscribers in those areas where local network programming is no longer offered and impair New EchoStar's ability to gain new subscribers in those areas, which could materially adversely affect New EchoStar's financial performance. Under the must carry rules, New EchoStar could also be exposed to court actions and may be subject to damage claims if EchoStar is found by any court to have violated the must carry requirements, which could materially adversely affect New EchoStar's financial condition.

In addition, while the FCC has decided for now not to impose dual digital/analog carriage obligations (i.e., additional requirements in connection with the carriage of digital television stations that go beyond carriage of one signal, whether analog or digital, for each station), the FCC has also issued a further notice of proposed rulemaking on this matter. We cannot be sure that this rulemaking will not result in further signal carriage requirements.

New EchoStar's Retransmission of Distant Stations Will Be Subject to Considerable Litigation Risk. The Copyright Act, as amended by the Satellite Home Viewer Improvement Act, permits satellite retransmission of distant network stations those that originate outside of a satellite subscriber's local television only to unserved households. (An example of a distant station retransmission is a Los Angeles network station retransmitted by satellite to a subscriber in the state of Virginia. That subscriber qualifies as an unserved household if he or she cannot receive, over the air, a signal of sufficient intensity from a local station affiliated with the same network.) Interpretation and implementation of the Satellite Home Viewer Improvement Act by the FCC could hamper New EchoStar's ability to retransmit distant network and superstation signals, reduce the number of New EchoStar existing or future customers that can qualify for receipt of these signals and impose testing costs on New EchoStar in connection with the qualification process. In implementing the Satellite Home Viewer Improvement Act's directive, the FCC has also required satellite carriers to delete certain programming, including sports programming, from the signals of certain distant stations. These requirements have significantly hampered EchoStar's ability, and may further hamper New EchoStar's ability, to retransmit distant network and superstation signals, and the burdens from the rules upon EchoStar and New EchoStar may become so onerous that EchoStar and/or New EchoStar may be required to substantially alter, or stop retransmitting, many or all superstation signals. In addition, the FCC's sports

blackout requirements, which apply to all distant network signals, may require costly upgrades to New EchoStar's system.

Television Networks Oppose New EchoStar's Anticipated Strategy of Delivering Distant Network Stations. Until July 1998, EchoStar obtained distant network stations (ABC, NBC, CBS and FOX) for distribution to its customers through PrimeTime 24. In December 1998, the U.S. District Court for the Southern District of Florida entered a nationwide permanent injunction requiring PrimeTime 24 to shut off distant network channels to many of its customers, and to sell those channels to consumers in accordance with certain stipulations in the injunction.

In December 1998, the networks filed a motion for preliminary injunction directly against EchoStar. In September 2000, the District Court granted this motion and made several amendments to it. The injunction required EchoStar to terminate distant network programming to certain of its subscribers. The U.S. Court of Appeals for the Eleventh Circuit stayed the injunction pending EchoStar's appeal. In September 2001, the U.S. Court of Appeals for the Eleventh Circuit vacated the District Court's injunction, finding, among other things, that it was too broad and remanded the case back to the District Court for an evidentiary hearing. The U.S. Court of Appeals for the Eleventh Circuit also rejected EchoStar's argument that the unserved households restriction of the law is unconstitutional, and the U.S. Supreme Court recently declined to review that decision. If after the trial or an evidentiary hearing the injunction is reinstated, it could force EchoStar to terminate delivery of distant network channels to a substantial portion of its distant network subscriber base, which could also cause many of these subscribers to cancel their subscription to EchoStar's other services. EchoStar's management has determined that such termination would result in a reduction in EchoStar's reported average monthly revenue per subscriber and could result in a temporary increase in churn. If EchoStar loses the case at trial, the judge could, among other remedies, prohibit all future sales of distant network programming by EchoStar, which would have a material adverse effect on New EchoStar's business. In order, among other things, to plan for the potential re-implementation of the injunction, EchoStar may terminate the delivery of distant network channels to certain subscribers.

The Regulatory Regime Under Which New EchoStar Will Operate Could Change Materially Adversely. The FCC imposes different rules for subscription and broadcast services. We believe that because New EchoStar will offer a subscription programming service, it will not be subject to many of the regulatory obligations imposed upon broadcast licensees. However, we cannot be certain whether the FCC will find in the future that it should comply with regulatory obligations as a broadcast licensee with respect to its operations, and certain parties have requested that direct broadcast satellite service providers be treated as broadcasters. If the FCC determines that New EchoStar is a broadcast licensee, the FCC may require it to comply with all regulatory obligations imposed upon broadcast licensees, which are generally subject to more burdensome regulation than subscription service providers.

Under a requirement of the Cable Act, the FCC imposed public interest requirements on direct broadcast satellite licensees, such as EchoStar and DIRECTV, to set aside four percent of channel capacity exclusively for noncommercial programming for which EchoStar and DIRECTV must charge programmers below-cost rates and for which EchoStar and DIRECTV may not impose additional charges on subscribers. This could displace programming for which New EchoStar could earn commercial rates and could materially adversely affect its financial results. The FCC has not reviewed the methodology used by either EchoStar or DIRECTV for computing the channel capacity it must set aside or for determining the rates that it charges public interest programmers, and we cannot be sure that, if the FCC were to review these methodologies, it would find them in compliance with the public interest requirements.

The FCC has also commenced an inquiry into distribution of high-speed Internet access services and a rulemaking concerning interactive television services. In these proceedings, the FCC is considering whether to impose on distributors, including possibly satellite distributors like New EchoStar, various types of open access obligations, such as required carriage of independent content providers. New EchoStar cannot be sure that the FCC will not ultimately impose such obligations, which could be onerous, and could materially adversely impact its available capacity and ability to provide other services.

The FCC recently issued revised rules for direct broadcast satellite service operators relating to requirements to provide service to Alaska and Hawaii. While the FCC declined to establish specific requirements governing dish size or programming content for direct broadcast satellite services in Alaska and Hawaii, it required that such services be reasonably comparable to direct broadcast satellite offerings in the contiguous 48 states. While EchoStar and DIRECTV believe that the services they now provide satisfy that requirement, New EchoStar cannot be sure that the states of Alaska and Hawaii, or the FCC, will agree with that view, and the FCC will not require New EchoStar to make potentially cumbersome and costly changes to its offerings.

The FCC has adopted rules that allow non-geostationary orbit fixed satellite services to operate on a co-primary basis in the same frequency as direct broadcast satellite and Ku-band-based FSS services, and is currently finalizing rules to govern these services. These satellite operations could provide global high-speed data services. In the same rulemaking, the FCC authorized use of the same direct broadcast satellite spectrum that EchoStar and DIRECTV use by another terrestrial consumer service originally proposed by Northpoint Technology, Ltd.

Over the course of the proceeding, EchoStar submitted numerous pleadings jointly with DIRECTV to the FCC objecting to the Northpoint request, which may cause harmful and substantial interference to the service provided to direct broadcast satellite service customers. Furthermore, other entities filed applications similar to the one filed by Northpoint, and at least one other entity obtained a license from the FCC to conduct experimental operations.

On May 23, 2002, the FCC released a Memorandum Opinion and Order and Second Report and Order in this proceeding. The FCC denied petitions for reconsideration filed by DIRECTV and EchoStar and confirmed its earlier conclusion that the new terrestrial service could operate in the same spectrum with EchoStar's and DIRECTV's systems. The FCC also decided that it will issue licenses for this service by auction if there is more than one qualified applicant for a particular geographic area. In light of its decision to conduct an auction, the FCC dismissed without prejudice the pending applications of Northpoint and certain other companies. While the FCC also announced service and technical rules for the terrestrial service with the purpose of avoiding impermissible interference to the direct broadcast satellite service, our preliminary analysis of these rules shows that they are not sufficient to prevent impermissible interference to the direct broadcast satellite service. A number of aspects of the FCC's decisions and rules in this proceeding remain subject to administrative reconsideration and judicial review, and both EchoStar and DIRECTV have sought such reconsideration and review. If Northpoint or other entities become authorized to use New EchoStar's spectrum, they could cause harmful and substantial interference with its service. We cannot be sure when these processes will result in the licensing of Northpoint and/or companies proposing a similar service to operate in the spectrum licensed to New EchoStar or how significant the interference into New EchoStar's operations will be.

On February 28, 2002, the FCC initiated a proceeding to examine and revise its licensing process for orbital locations or spectrum used for the provision of international or global satellite communications services. The extent to which any changes in the satellite licensing process could affect New EchoStar is unclear.

On April 25, 2002, SES Americom, Inc. requested a declaratory ruling that it is in the public interest for SES Americom to offer satellite capacity for third party direct-to-home services to consumers in the United States and certain British Overseas Territories in the Caribbean. SES Americom proposes to employ a satellite licensed by the Government of Gibraltar to operate in the same uplink and downlink frequency bands as New EchoStar, from an orbital position located in between two orbital locations where EchoStar and DIRECTV have already positioned satellites. EchoStar and Hughes believe that SES Americom's proposal, if adopted in its current form, would cause interference with current direct broadcast satellite operations and a significant constraint on the further growth and expansion of U.S. direct broadcast satellite service.

Risks Relating to the Capital Stock of New EchoStar

New EchoStar's Principal Stockholder's Voting Power Will Entitle Him to Have Significant Influence Over Actions Requiring Stockholder Approval. We expect that all of the outstanding shares of New

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

EchoStar Class B common stock will be held initially by a trust controlled by Charles W. Ergen, who will also be the Chairman of the Board of Directors and Chief Executive Officer of New EchoStar. Based on assumptions about certain variable factors described elsewhere in the document, we expect that Mr. Ergen would hold about % of the outstanding common stock of New EchoStar, which would represent about % of the total voting power of New EchoStar. As a result, Mr. Ergen will have significant influence over actions of New EchoStar that require stockholder approval.

In addition, the holders of New EchoStar Class B common stock will be entitled to a separate class vote for approval of matters (other than the election or removal of directors) for which a stockholder vote is required under state law (such as mergers, charter amendments, including changes in the rights of the shares of New EchoStar Class B common stock and any increase in the authorized number of shares of New EchoStar Class B common stock or New EchoStar Class C common stock, and dissolution) or under the rules of the Nasdaq, any sale or acquisition of a significant business of New EchoStar, any amendment by stockholders to the bylaws of New EchoStar, certain issuances of New EchoStar common stock (or equivalents) and the adoption of certain equity-based benefit plans. As a result, Mr. Ergen will have the right to veto these matters, which may be favored by a majority of stockholders. The interests of Mr. Ergen may not always coincide with the interests of other stockholders, and these veto rights will effectively grant Mr. Ergen a greater degree of control over New EchoStar than might otherwise be the case.

The extent of Mr. Ergen's control over New EchoStar may have the effect of discouraging offers to acquire control of New EchoStar and may preclude holders of New EchoStar common stock from receiving any premium above market price for their shares that may be offered in connection with any attempt to acquire control of New EchoStar.

For more information about the voting rights of the three classes of New EchoStar common stock, see [New EchoStar Capital Stock Common Stock Voting Rights](#).

New EchoStar Does Not Expect to Pay Dividends on its Common Stock in the Foreseeable Future. The New EchoStar board of directors will determine whether to pay dividends on the New EchoStar Class A common stock, New EchoStar Class B common stock and New EchoStar Class C common stock primarily based upon its financial condition, results of operations and business requirements. We do not currently anticipate that New EchoStar will pay dividends on the New EchoStar Class A common stock, New EchoStar Class B common stock or New EchoStar Class C common stock for the foreseeable future.

You May Receive Shares of New EchoStar Common Stock Having a Market Value Different Than Expected. After the completion of the transactions, GM Class H common stockholders will hold one share of New EchoStar Class C common stock for each share of GM Class H common stock that they previously held, EchoStar Class A common stockholders will receive 1/0.73, or about 1.3699, shares of New EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock that they previously held and EchoStar Class B common stockholders will receive 1/0.73, or about 1.3699, shares of New EchoStar Class B common stock in exchange for each share of EchoStar Class B common stock that they previously held.

Under the terms of the transaction agreements, the number of shares of New EchoStar common stock to be received by each of the GM Class H common stockholders and EchoStar common stockholders for each share of GM Class H common stock or EchoStar common stock, as applicable, will not change even if there are significant changes in the market prices of GM Class H common stock or EchoStar Class A common stock prior to the completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger. However, any change in the price of GM Class H common stock or EchoStar Class A common stock will directly affect the relative value that GM Class H common stockholders and EchoStar common stockholders will receive in the transactions. Stock price changes may result from a variety of factors that are either within or beyond the control of GM, Hughes and EchoStar, including changes in their respective businesses, operations and prospects, regulatory considerations and general market and economic conditions.

It Is Not Possible to Predict the Relative Trading Prices of the Different Classes of New EchoStar Common Stock. We are not able to predict the relative trading prices of New EchoStar Class A common

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

stock and New EchoStar Class C common stock. Although the New EchoStar Class A common stock and New EchoStar Class C common stock will have substantially identical rights except with respect to voting, the two classes are expected generally to trade at different prices and such differences in trading prices could be material. Many factors may affect the differences in the trading prices of the New EchoStar Class A common stock and New EchoStar Class C common stock, including, among other things, the differences in voting power between the two classes.

The Trading Prices of New EchoStar Class A Common Stock and New EchoStar Class C Common Stock May be Volatile. The prices at which New EchoStar Class A common stock and New EchoStar Class C common stock trade may be volatile and may fluctuate substantially due to, among other things:

competition and changes in the subscription television industry;

regulatory changes;

launch and satellite failures;

operating results below expectations;

New EchoStar's strategic investments and acquisitions; and

other factors.

In addition, price and volume fluctuations in the stock market may affect market prices for New EchoStar Class A common stock and New EchoStar Class C common stock for reasons unrelated to New EchoStar's operating performance.

Future Re-Sales of New EchoStar Common Stock Could Materially Adversely Affect the Market Prices of New EchoStar's Common Stock and its Ability to Raise Capital in the Future. New EchoStar will have several significant stockholders, including Charles W. Ergen, certain GM employee benefit plans and Vivendi Universal and, potentially, General Motors. Sales or other monetizations of substantial amounts of any class of New EchoStar common stock, or even the possibility that such sales or monetizations could occur, could materially adversely affect the market prices of New EchoStar Class A common stock and New EchoStar Class C common stock. Significant sales could also materially adversely affect New EchoStar's ability to raise capital in the future. While the shares issued in the GM/Hughes separation transactions and the Hughes/ EchoStar merger and registered with the SEC pursuant to the registration statement of which this document is a part are generally freely tradable without restriction under the Securities Act of 1933 by persons other than affiliates, as defined under the Securities Act, of the parties, some of New EchoStar's significant stockholders will have the right to require New EchoStar to register their shares under the Securities Act and assist in the sale of those shares to the public. See *Shares Eligible For Future Sale*.

The Conversion of the New EchoStar Class B Common Stock in the Future May Materially Adversely Affect the Market Prices of the New EchoStar Common Stock. Shares of New EchoStar Class B common stock may be converted by the holders of such stock at any time into shares of New EchoStar Class A common stock or New EchoStar Class C common stock on a one-for-one basis. The conversion of the New EchoStar Class B common stock could affect the trading prices of either or both of the New EchoStar Class A common stock and New EchoStar Class C common stock. We cannot predict the impact on the market prices of the New EchoStar Class A common stock or New EchoStar Class C common stock if such a conversion into either class were to occur.

The Numbers of Shares of New EchoStar Common Stock to be Issued in the Transactions Could be Different Than the Numbers of Shares Indicated on the Cover of this Document. The numbers of shares of New EchoStar Class A common stock, New EchoStar Class B common stock and New EchoStar Class C common stock to be issued or distributed in the GM/Hughes separation transactions and the Hughes/ EchoStar merger, as indicated on the cover of this document, are estimates of the maximum numbers of shares to be issued or distributed to the holders of EchoStar Class A common stock, EchoStar Class B common stock and GM Class H common stock, as applicable. The number of shares of New EchoStar Class C common stock indicated on the cover of this document does not reflect the number of shares that may be distributed to the GM \$1 2/3 par value common stockholders if GM determines to make a pro rata

distribution to the GM \$1 2/3 par value common stockholders in order to maintain the tax-free status of the Hughes split-off. Whether such a distribution will be made, as well as the number of shares of New EchoStar Class C common stock to be distributed, will depend on, among other things, the average market price of GM Class H common stock during the five trading days preceding the completion of the Hughes split-off. As such, the number of shares of New EchoStar Class C common stock which may be distributed to the GM \$1 2/3 par value common stockholders is not determinable at this time. In addition, the number of shares of New EchoStar Class C common stock indicated on the cover of this document does not reflect the number of shares that may be held by GM immediately after the completion of the transactions because that number is not determinable at this time. The maximum numbers of shares indicated on the cover of this document are based on various assumptions and the actual numbers of shares to be issued or distributed in the GM/Hughes separation transactions and the Hughes/ EchoStar merger could be different than these numbers.

Other Significant Risks

New EchoStar Will Have Significant Equity Investments That May Not Be Profitable. Both Hughes and EchoStar have significant equity investments and may make additional strategic investments in debt and equity securities of unrelated third parties that may be non-marketable or difficult to liquidate or may only be liquidated at a significant discount to current trading values or not at all. At June 30, 2002, the combined book value of such investments was about \$621 million. Unless liquidated prior to the completion of the Hughes/ EchoStar merger, these investments and any additional investments that may be made by Hughes or EchoStar prior to the completion of the Hughes/ EchoStar merger will become assets of New EchoStar. Because the companies in which Hughes and EchoStar have invested generally have limited access to the capital markets and other funding sources, there is greater risk that those companies will be unable to raise sufficient funds to fully execute their business plans. There is also an increased risk that New EchoStar will not realize the full value of its investments in these businesses. In addition, New EchoStar, and prior to the Hughes/EchoStar merger, Hughes and EchoStar, may have to write down these investments in their respective financial statements, which could have a material adverse effect on their respective profits.

New EchoStar's Business May Inadvertently Infringe Patents and Proprietary Rights of Third Parties. Many entities, including some of New EchoStar's competitors, have or may in the future obtain patents and other intellectual property rights that cover or affect products or services related to those that New EchoStar will offer. In general, if a court determines that one or more of New EchoStar's products infringes on intellectual property held by others, New EchoStar may be required to cease developing or marketing those products, to obtain licenses from the holders of the intellectual property, or to redesign those products in such a way as to avoid infringing the patent claims. If a competitor holds intellectual property rights, it may not allow New EchoStar to use its intellectual property at any price, which would hurt New EchoStar's competitive position.

We cannot assure you that New EchoStar will be aware of all intellectual property rights that its products may potentially infringe. In addition, patent applications in the United States are confidential until the Patent and Trademark Office issues a patent. Therefore, we cannot evaluate the extent to which New EchoStar's products may infringe claims contained in pending patent applications. Further, without lengthy litigation, it is often not possible to determine definitively whether a claim of infringement is valid.

We cannot estimate the extent to which New EchoStar may be required in the future to obtain intellectual property licenses or the availability and cost of any such licenses. Those costs, and their impact on net income, could be material. Damages in patent infringement cases may also include treble damages in certain circumstances. If New EchoStar is required to pay royalties to third parties to whom it is not then making payments, these increased costs of doing business could negatively affect its liquidity and operating results. Each of DIRECTV and EchoStar is currently being sued in patent infringement actions related to use of technologies in their direct broadcast satellite businesses. We cannot assure you that the courts will conclude that New EchoStar's products do not infringe on the rights of third parties, that New EchoStar would be able to obtain licenses from these persons on commercially reasonable terms or, if it were unable to obtain those licenses, that it would be able to redesign its products to avoid infringement. Some of these actions involve claims for damages in excess of \$100 million and claims for injunctive relief.

The September 11, 2001 Attacks Have Harmed the U.S. Economy and May Materially Adversely Affect New EchoStar's Operations and Profitability. In addition to the tragic loss of life and suffering occasioned by the September 11, 2001 terrorist attacks, there has been a disruption of commercial and leisure activities across the United States. The terrorist attacks and subsequent uncertainty surrounding the continuing conflict have negatively affected, and are expected to continue to negatively affect, the U.S. economy generally, resulting in reduced consumer spending which could negatively affect New EchoStar's industry and its business. While the precise effects of this instability on New EchoStar's industry and its business are difficult to determine, it may materially adversely affect New EchoStar's revenues and, as a result, negatively impact New EchoStar's financial condition, profitability and cash flows.

The Potential Purchase Price Adjustment Related to the Sale of Hughes' Satellite Manufacturing Operations to Boeing Could Result in a Material Payment by New EchoStar. In connection with the sale by Hughes of its satellite businesses to Boeing, the terms of the stock purchase agreement provide for a potential adjustment to the purchase price based upon the final closing date financial statements of those businesses. Based upon the final closing date financial statements of the satellite systems manufacturing businesses that were prepared by Hughes, Hughes has acknowledged that it owes to Boeing about \$164 million plus interest as a result of the adjustment mechanism. However, Boeing has submitted additional proposed adjustments, of which about \$750 million remain unresolved, that Hughes is contesting. Hughes and Boeing are pursuing the arbitration process, which will result in a binding decision unless the matter is otherwise settled. Although Hughes believes it has adequately provided for the disposition of this matter, the impact of its disposition cannot be determined at this time. It is possible that the final resolution of this matter could result in Hughes making a cash payment to Boeing that could materially adversely affect New EchoStar's cash flow.

THE TRANSACTIONS

The following section highlights certain important matters that you should review and consider carefully in connection with your review and consideration of the transactions. This section provides for all stockholders a description of the transactions, including:

the GM/Hughes separation transactions;

the Hughes/EchoStar merger;

the PanAmSat stock sale;

the GM share dispositions; and

certain related transactions.

In addition, because the transactions involve significant changes to GM's capital structure, including the elimination of GM Class H common stock, we describe in this section certain matters, including the following, that may be of principal importance to GM common stockholders:

GM's reasons for the transactions;

alternative transactions involving Hughes which have been considered by GM and Hughes in connection with developing the proposed transactions;

background information relating to the development by GM and Hughes of the proposed transactions; and

the recommendation of the GM board of directors; and

certain advantages and disadvantages of the transactions.

The discussion of these matters is generally set forth at GM Background and Considerations below.

Certain information which may be of principal importance to EchoStar common stockholders, including, among other things, information regarding EchoStar's reasons for the Hughes/EchoStar merger, background information relating to EchoStar's consideration of the Hughes/EchoStar merger and the recommendation of the EchoStar board of directors with respect to the Hughes/EchoStar merger, is set forth below at EchoStar Background and Considerations.

Finally, this section addresses certain other important matters relating to the transactions, such as regulatory requirements relating to the transactions, the lack of appraisal rights for stockholders in connection with the transactions, stockholder litigation relating to the transactions, accounting treatment of the transactions and U.S. federal income tax considerations relating to the transactions.

Description of the Transactions

Introduction

The proposed transactions described in this document principally consist of:

the GM/ Hughes separation transactions, which will separate the Hughes business from GM by means of a split-off of HEC Holdings to GM Class H common stockholders; and

the Hughes/ EchoStar merger, which will combine the businesses of Hughes and EchoStar by merging EchoStar with HEC Holdings to create New EchoStar.

Certain aspects of the GM/Hughes separation transactions require the approval of GM common stockholders. Specifically, GM common stockholder approval is required for an amendment of the GM restated certificate of incorporation that will provide GM with the ability to implement certain aspects of the GM/Hughes separation transactions as proposed. Neither the approval of GM common stockholders nor any

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

further approval of the EchoStar common stockholders is legally required for the Hughes/ EchoStar merger. General Motors, as the sole stockholder of both Hughes and HEC Holdings, has already approved the

Hughes/ EchoStar merger for Hughes and HEC Holdings. In addition, a trust controlled by Charles W. Ergen, the Chairman of the Board of Directors and Chief Executive Officer of EchoStar, as the holder of all of the outstanding shares of EchoStar Class B common stock, which represents about 90% of the voting power of EchoStar, has approved the Hughes/ EchoStar merger for EchoStar. Also, the respective boards of directors of GM, Hughes, HEC Holdings and EchoStar have unanimously approved the Hughes/ EchoStar merger.

However, even though such approval is not legally required, GM is submitting the GM/Hughes separation transactions and the Hughes/EchoStar merger to GM common stockholders for ratification. As further described elsewhere in this document, GM believes that ratification by GM's common stockholders of the GM/Hughes separation transactions and the Hughes/EchoStar merger should bar any claim (other than for fraud or similar egregious conduct) against General Motors and its directors based on these transactions, including a claim alleging unfairness of these transactions to either or both classes of GM common stockholders or alleging any deficiency in the process of developing the terms of these transactions or the GM board of directors' consideration or approval of these transactions. For more information regarding the proposals being submitted to GM common stockholders for their approval, see GM Background and Considerations Requisite GM Common Stockholder Approval of the Transactions. By approving these proposals, GM \$1 2/3 par value common stockholders and GM Class H common stockholders will be approving a transaction that will not result in shares of GM Class H common stock being exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances pursuant to provisions of the GM restated certificate of incorporation. In addition, GM common stockholders will be approving and consenting to an asset transfer consisting of the Hughes dividend distribution without a further distribution of a portion of that dividend from GM to the GM Class H common stockholders in accordance with their tracking stock interest in Hughes, as currently provided for under certain circumstances pursuant to a policy statement of the GM board of directors. Notwithstanding these matters, the GM board of directors has unanimously approved the transactions and recommends that the GM common stockholders vote to approve the transactions.

As used in this document, the term transactions includes the GM/ Hughes separation transactions and the Hughes/ EchoStar merger, as well as various other transactions that are related to the separation and the merger. These other transactions include the right of GM to issue new shares of GM Class H common stock, or distribute any shares of New EchoStar Class C common stock that it may hold after the Hughes/ EchoStar merger, as the case may be, by exchanging such shares in debt-for-equity exchanges or, after the completion of the Hughes/ EchoStar merger, selling such shares for cash, in one or more GM share disposition transactions. In addition, GM, Hughes and EchoStar have also agreed that, subject to certain conditions, if the Hughes/ EchoStar merger does not occur because certain specified conditions have not been satisfied, EchoStar would purchase the approximately 81% interest in PanAmSat held by certain subsidiaries of Hughes. These transactions, as well as the GM/Hughes separation transactions and the Hughes/EchoStar merger, are described in greater detail below.

In order to help you better understand the proposed transactions and how they will impact General Motors, Hughes and EchoStar, see the charts set forth at Summary Structure of the Transactions.

We are working diligently to complete the GM/ Hughes separation transactions and the Hughes/ EchoStar merger as soon as reasonably possible. However, the obligations of the companies to complete the GM/Hughes separation transactions and the Hughes/EchoStar merger are subject to a number of conditions which must be satisfied or waived before the transactions can be completed. Assuming that these conditions are satisfied within the time frame we currently anticipate, we expect to complete the GM/ Hughes separation transactions and the Hughes/ EchoStar merger during the fourth quarter of 2002.

One important condition to the companies' obligations to complete the Hughes/ EchoStar merger is that GM and Hughes must complete the GM/Hughes separation transactions. In addition, unless the companies are prepared to complete the Hughes/EchoStar merger immediately after the completion of the GM/Hughes

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

separation transactions, the GM/Hughes separation transactions will not occur. Other important conditions include, among others:

the receipt of the requisite GM common stockholder approval of each of the three proposals relating to the transactions;

the expiration or termination of the waiting periods applicable to the Hughes/EchoStar merger under the Hart-Scott-Rodino Act and any similar law of foreign jurisdictions;

the absence of any effective injunction or order which prevents the completion of the transactions;

the receipt of FCC approval for the transfer of licenses and other authorizations in connection with the Hughes/ EchoStar merger and the Hughes split-off;

the receipt of all other approvals of, or the making of all other filings with, governmental authorities required to complete the transactions, other than approvals and filings, the absence of which, in the aggregate, are not reasonably likely to have a material adverse effect on New EchoStar;

the continued effectiveness of the ruling received by GM from the IRS to the effect that the Hughes split-off will be tax-free to GM and its stockholders for U.S. federal income tax purposes;

the availability of financing for the Hughes/ EchoStar merger;

the approval for listing on the Nasdaq of the New EchoStar Class A common stock and New EchoStar Class C common stock that will be outstanding following the completion of the transactions;

the amount of the Hughes dividend distribution to GM may not exceed the value of GM's retained economic interest in Hughes at the time of the Hughes recapitalization. We sometimes refer to this condition as the "value" condition; and

the ability of New EchoStar, based on certain assumptions, to issue a minimum amount of equity immediately following the Hughes/EchoStar merger without violating certain agreements with General Motors that are designed to preserve the tax-free status of the Hughes split-off to GM. We sometimes refer to this condition as the "equity headroom" condition.

For more information about these conditions, see "Description of Principal Transaction Agreements" GM/Hughes Separation Agreement, Hughes Recapitalization Closing Conditions and Hughes/ EchoStar Merger Agreement Conditions.

Background Regarding GM's Retained Economic Interest in Hughes

Certain aspects of the GM/ Hughes separation transactions will involve a reduction of GM's current retained economic interest in Hughes so that GM may realize some of the value arising from its ownership of Hughes. In order to understand and evaluate these aspects of the transactions, it is important for you to understand GM's current dual-class common stock capital structure and the methodology for allocating the earnings of Hughes for earnings per share and for dividend purposes under the terms of GM's restated certificate of incorporation. These are described briefly below.

Currently, GM has two classes of common stock:

GM \$1 2/3 par value common stock; and

GM Class H common stock.

GM Class H common stock is a "tracking stock" of GM designed to provide holders with financial returns based on the financial performance of Hughes. The earnings per share and the amounts available for the payment of dividends on the GM Class H common stock are determined by a fraction set forth in GM's restated certificate of incorporation. This fraction reflects the portion of Hughes' earnings that is allocated to the amount available for dividends on the GM Class H common stock. We sometimes refer to this fraction as the "GM Class H fraction." The numerator and denominator of the GM Class H fraction are determined as follows:

The numerator of the GM Class H fraction is the weighted average number of shares of GM Class H common stock that is outstanding during the applicable period.

The denominator of the GM Class H fraction is the number of notional shares of GM Class H common stock which, if outstanding, would result in 100% of the earnings of Hughes being allocated to the GM Class H common stock. We sometimes refer to the denominator of the GM Class H fraction as the GM Class H dividend base.

For the calculation of Hughes' earnings used to compute the amount available for dividends on the GM Class H common stock, see Selected Historical and Pro Forma Financial Data Hughes Selected Historical Financial Data.

The remaining portion of Hughes' earnings is allocated to earnings per share and the amount available for dividends on the other class of GM common stock, the GM \$1 2/3 par value common stock. We sometimes refer to the percentage representing this remaining portion of Hughes' earnings as representing GM's retained economic interest in Hughes. GM's retained economic interest in Hughes can also be described by reference to the difference between the numerator and the denominator of the GM Class H fraction, which can be thought of in terms of a number of notional shares representing GM's retained economic interest in Hughes.

By operation of the provisions of GM's restated certificate of incorporation, GM's retained economic interest in Hughes may be reduced or increased by adjusting the numerator or the denominator of the GM Class H fraction. The provisions of the GM restated certificate of incorporation establish the circumstances under which the GM Class H fraction currently may be adjusted by the GM board of directors. For more information about GM's current dual-class common stock capital structure, the GM Class H common stock and the relevant provisions of the GM restated certificate of incorporation, see GM Capital Stock GM's Dual-Class Common Stock Capital Structure Dividends. In order to accomplish the Hughes recapitalization, GM is proposing an amendment to the GM restated certificate of incorporation as described below at Amendments to the GM Restated Certificate of Incorporation.

Liquidity and Value to be Provided to GM

The transactions are designed to permit General Motors to benefit from its current about % retained economic interest in Hughes. Among other things, the transactions are expected to provide significant liquidity and value to General Motors in respect of its retained economic interest in Hughes, which will help to support GM's credit position after the transactions. This anticipated liquidity and value will derive from the following sources:

GM's receipt of the Hughes dividend distribution of up to \$4.2 billion as part of the Hughes recapitalization;

as and to the extent applicable, GM share dispositions involving up to 100 million shares of GM Class H common stock and/or New EchoStar Class C common stock; and

as and to the extent applicable, GM's retention of shares of New EchoStar Class C common stock for up to five years after the Hughes split-off.

Between now and the time of the completion of the Hughes split-off, GM has the ability to achieve liquidity in connection with debt-for-equity exchanges by issuing up to 100 million shares of GM Class H common stock to certain of GM's creditors in satisfaction of outstanding liabilities. These debt-for-equity exchanges would permit GM to benefit from debt reduction. These debt-for-equity exchanges would also reduce the number of notional shares representing GM's retained economic interest in Hughes by the number of shares of GM Class H common stock that GM issues in connection with any such debt-for-equity exchanges. Thus, to the extent that GM benefits from debt reduction through GM debt-for-equity exchanges before the Hughes split-off, GM would have a smaller retained economic interest in Hughes at the time of the Hughes split-off. The amount of liquidity that GM would receive in connection with any such debt-for-equity exchanges would depend upon, among other things, the trading prices of GM Class H common stock at the time of the completion of any such transactions.

GM will also receive liquidity and value in connection with the completion of the GM/ Hughes separation transactions. The amount of liquidity and value to be provided to GM at the time of the completion of the GM/Hughes separation transactions will depend upon the value of GM's retained economic interest at that time. The value of GM's retained economic interest will be based on the number of notional shares representing GM's retained economic interest in Hughes multiplied by the average market price of GM Class H common stock during a specified period preceding the completion of the GM/ Hughes separation transactions.

As part of the Hughes recapitalization, GM will receive a dividend from Hughes in an amount up to \$4.2 billion. The amount of the dividend will be limited by the aggregate value of GM's retained economic interest in Hughes at the time of the payment of the dividend. In other words, the amount of the dividend may not exceed the value of GM's retained economic interest in Hughes at that time, based on the average market price of GM Class H common stock during a specified period preceding the completion of the GM/ Hughes separation transactions.

To the extent that GM holds any shares of New EchoStar Class C common stock immediately after the completion of the Hughes/ EchoStar merger, GM will receive additional liquidity and value from its ability to use a portion of such shares in GM share dispositions and its retention of any remaining shares for up to five years. As explained further below at The GM/ Hughes Separation Transactions, as part of the Hughes recapitalization, GM's retained economic interest in Hughes will be reduced by an amount equal to the amount of the Hughes dividend distribution. If and to the extent that GM continues to have any retained economic interest after such reduction, GM would hold, immediately after the GM/ Hughes separation transactions, a number of shares of HEC Holdings Class C common stock equal to the value of its reduced economic interest in Hughes divided by the average market price of GM Class H common stock during a specified period preceding the completion of the GM/ Hughes separation transactions. Up to 100 million of such shares (less the number of shares of GM Class H common stock issued pursuant to any GM debt-for-equity exchanges completed before the completion of the GM/ Hughes separation transactions) may be distributed by GM in debt-for-equity exchanges or sold by GM for cash during the six months after the completion of the Hughes/ EchoStar merger. These GM share dispositions would provide GM liquidity and, if structured as debt-for-equity exchanges, would permit GM to benefit from debt reduction. Any remaining portion of the shares of New EchoStar Class C common stock held by GM which are not used in the GM share dispositions will be retained by GM for up to five years, which would provide GM with a continued ownership interest in New EchoStar and liquidity upon the disposition of those shares.

You should understand that, depending upon the value of GM's retained economic interest in Hughes after the payment of the Hughes dividend distribution and the related reduction of GM's retained economic interest in Hughes, GM may hold fewer than 100 million shares of New EchoStar Class C common stock. Under such circumstances, GM's ability to generate additional liquidity pursuant to GM share dispositions or other dispositions after the GM/ Hughes separation transactions would necessarily be limited based on the number of such shares, if any, then held by GM. Moreover, under circumstances where the value of GM's retained economic interest in Hughes is exactly equal to the amount of the Hughes dividend distribution, GM would not hold any shares of New EchoStar Class C common stock after the GM/ Hughes separation transactions.

The exact amount of the Hughes dividend distribution, the exact number of shares, if any, of New EchoStar Class C common stock available for use by GM in GM share dispositions after the completion of the GM/ Hughes separation transactions and the exact number of shares, if any, of New EchoStar Class C common stock which GM may retain following the completion of the GM/ Hughes separation transactions are not currently known. As a result, we do not know the aggregate amount of liquidity and value that GM will receive in the GM/ Hughes separation transactions. This aggregate amount will depend upon:

the value of GM's retained economic interest in Hughes at the time of the completion of the GM/ Hughes separation transactions;

whether the number of shares of New EchoStar Class C common stock that GM may transfer in GM share dispositions and/or the amount of the Hughes dividend distribution are subject to mandatory

reduction pursuant to the transaction agreements in order to satisfy the value condition or the equity headroom condition;

whether GM elects to further reduce the number of shares of New EchoStar Class C common stock that GM may transfer in GM share dispositions and/or the amount of the Hughes dividend distribution in order to satisfy the value condition or the equity headroom condition; and

whether GM is required to distribute excess shares to the GM \$1 2/3 par value common stockholders as described elsewhere in this document in order to maintain the tax-free status of the Hughes split-off.

For an illustration of a range of hypothetical average market prices for GM Class H common stock during the specified period preceding the GM/Hughes separation transactions and how, together with associated required or voluntary reductions to the number of shares that may be transferred by GM in GM share dispositions and/or the amount of the Hughes dividend distribution, these average market prices would affect the amount of the Hughes dividend distribution and the number of shares of New EchoStar Class C common stock that GM would hold as a result of the GM/Hughes separation transactions, see Summary Purposes of the Transactions Liquidity and Value Provided to GM and GM Common Stockholders.

After the completion of the transactions, the amount of liquidity and value that GM would receive with respect to any shares of New EchoStar Class C common stock that it holds, whether such shares are transferred in GM share dispositions within six months following the completion of the Hughes/ EchoStar merger or are retained thereafter by GM as an ownership interest in New EchoStar, would generally depend upon, among other things, the market price of shares of New EchoStar Class C common stock at the time of GM's disposition of any such shares.

In addition, you should understand that GM currently expects to incur up to about \$100 million of fees and expenses in connection with the transactions, including financial advisory, legal and accounting fees. Of this amount, up to about \$48 million is expected to constitute investment advisor fees (not including expenses) and the payment of up to about \$17 million to \$45 million of these financial advisor fees is contingent upon the completion of the transactions. For more information about the fees payable by GM to its financial advisors, see GM Background and Considerations Fairness Opinions of GM's Financial Advisors Merrill Lynch Fairness Opinion and Bear Stearns Fairness Opinion.

The GM/ Hughes Separation Transactions

The GM/ Hughes separation transactions consist of several transactions involving General Motors and Hughes, principally the Hughes recapitalization and the Hughes split-off. These transactions are generally designed to separate the Hughes business from General Motors in order to prepare Hughes to complete the proposed merger with EchoStar. As a result of the GM/ Hughes separation transactions, HEC Holdings will become an independent, publicly owned company immediately prior to the Hughes/ EchoStar merger.

The GM/ Hughes separation transactions will not occur unless and until all of the conditions to the completion of the Hughes/ EchoStar merger, other than the completion of the Hughes recapitalization and Hughes split-off, have been satisfied or waived. This means that unless the companies are prepared to complete the Hughes/ EchoStar merger immediately following the GM/ Hughes separation transactions, the Hughes business will not be separated from General Motors pursuant to the GM/ Hughes separation transactions.

The Hughes Recapitalization

The Hughes recapitalization consists of a number of preliminary transactions which are designed to prepare the Hughes business to be separated from General Motors pursuant to the Hughes split-off. The Hughes recapitalization primarily involves a dividend distribution from Hughes to GM and an associated reduction of GM's retained economic interest in Hughes in an amount that reflects the dividend. This will allow GM to realize a portion of the value of its retained economic interest in Hughes prior to the Hughes split-off by receiving cash instead of shares of HEC Holdings Class C common stock in connection with the Hughes split-off. The Hughes recapitalization also involves a contribution by GM of the stock of Hughes to HEC Holdings so that HEC Holdings will be the parent company of Hughes at the time of the Hughes split-off. The GM/Hughes

separation agreement, the implementation agreement and the other agreements contemplated by those agreements are the primary transaction agreements that establish the terms of the Hughes recapitalization. In order to accomplish the Hughes recapitalization, GM is proposing an amendment to the GM restated certificate of incorporation as described below at Amendments to the GM Restated Certificate of Incorporation, for which the approval of the GM \$1 2/3 par value common stockholders and GM Class H common stockholders is being sought pursuant to proposal 1 of this consent solicitation.

Hughes Dividend Distribution. Hughes will declare and pay a dividend of up to \$4.2 billion to GM. We currently expect that the amount of the Hughes dividend distribution will be \$4.2 billion. However, if GM has completed debt-for-equity exchanges with respect to more than 60 million shares prior to the completion of the GM/Hughes separation transactions, the transaction agreements require the Hughes dividend distribution to be reduced by up to the amount of the proceeds of such exchanges in excess of 60 million shares:

if and to the extent that the value of GM's retained economic interest in Hughes is less than \$4.2 billion at the time of the Hughes recapitalization; or

if and to the extent that the equity headroom condition set forth in the Hughes/ EchoStar merger agreement will not be satisfied at the time of the Hughes/ EchoStar merger.

In any event, the Hughes dividend distribution is not required to be reduced to less than \$3.5 billion. However, in order to cause these conditions to be satisfied, GM may voluntarily elect to further reduce the Hughes dividend distribution in order to proceed with the completion of the transactions as proposed. For more information, see Description of Principal Transaction Agreements GM/ Hughes Separation Agreement The Hughes Recapitalization.

If Hughes does not have sufficient funds available to pay the total amount of the Hughes dividend distribution in cash, Hughes will pay the Hughes dividend distribution in cash to the extent of its available funds and will issue a promissory note for the remaining amount. If issued, this promissory note would be payable at the time the Hughes/ EchoStar merger is completed, which will be immediately after the Hughes split-off.

Reduction in GM's Retained Economic Interest in Hughes. In connection with GM's receipt of the Hughes dividend distribution, GM's retained economic interest in Hughes will be reduced by an amount that reflects the Hughes dividend distribution. The exact amount of this reduction will be calculated as follows:

$$\frac{\text{The dollar amount of the Hughes dividend distribution}}{\text{The average GM Class H common stock price}} = \text{The number of notional shares by which GM's retained economic interest in Hughes will be reduced}$$

For the purpose of the Hughes recapitalization, the average GM Class H common stock price will be determined as the average of the volume weighted average trading prices of GM Class H common stock for each of the five trading days (or, if less, the number of trading days following the public announcement by GM or Hughes that certain specified regulatory consents or approvals have been obtained) ending on and including the trading day immediately before the date that the Hughes split-off is completed.

Under the current GM restated certificate of incorporation, GM's retained economic interest in Hughes could not be reduced as described above. One of the effects of the proposed amendment to the GM restated certificate of incorporation that GM common stockholders are being asked to approve pursuant to this consent solicitation is to specifically authorize this reduction in connection with the dividend distribution from Hughes. For more information about this proposed amendment to GM's restated certificate of incorporation, see Amendments to the GM Restated Certificate of Incorporation.

You should note that the actual amount of the reduction in GM's retained economic interest in Hughes will depend on a number of factors that will not be known until immediately before the completion of the GM/ Hughes separation transactions and is extremely sensitive to the average GM Class H common stock price. This sensitivity is illustrated by the figures presented in the table that is included at Summary Description of the Transactions Reduction in GM's Retained Economic Interest in Hughes.

To further illustrate the effect of the Hughes recapitalization on the interest of the GM Class H common stockholders in the financial performance of Hughes and on GM's retained economic interest in Hughes we provide the example below which shows this effect as if the Hughes recapitalization had occurred on _____, 2002. GM's retained economic interest represents the portion of Hughes' earnings allocated to earnings per share and the amount available for dividends on GM \$1 2/3 par value common stock. In the example, the number of outstanding shares of GM Class H common stock presented is equal to the number of shares of GM Class H common stock outstanding as of _____, 2002.

As shown in the example below, as a result of the Hughes recapitalization, the portion of Hughes' earnings allocable to the GM Class H common stockholders would have increased by _____ percentage points and GM's retained economic interest in Hughes would have decreased by the same number of percentage points. In addition, while the number of outstanding shares of GM Class H common stock would have remained the same both before and after the Hughes recapitalization, the notional shares representing GM's retained economic interest in Hughes would have decreased by _____ million shares.

Before the Hughes Recapitalization

The portion of Hughes' earnings allocable to the outstanding GM Class H common stock would have been calculated as of _____, 2002 as follows:

$$\frac{\text{(The number of shares of outstanding GM Class H common stock)}}{\text{(The GM Class H dividend base)}} = \text{\% (The portion of Hughes' earnings allocable to the GM Class H common stock)}$$

The remaining portion of Hughes' earnings, about _____%, would have been allocable to GM's retained economic interest in Hughes. The number of notional shares representing GM's retained economic interest in Hughes would have been calculated at that time as follows:

$$\frac{\text{(The GM Class H dividend base)}}{\text{(The number of shares of GM Class H common stock outstanding)}} = \text{(The number of notional shares representing GM's retained economic interest in Hughes)}$$

After the Hughes Recapitalization

As a result of the Hughes recapitalization, assuming a Hughes dividend distribution to GM in the amount of \$4.2 billion and an average GM Class H common stock price of \$ _____, which was the average market price of GM Class H common stock during the five trading days preceding _____, 2002, the number of notional shares representing GM's retained economic interest in Hughes would have been decreased by the following amount:

$$\frac{\$4.2 \text{ billion (The dollar amount of the Hughes dividend distribution)}}{\text{\$ (The average GM Class H common stock price)}} = \text{(The number of notional shares by which GM's retained economic interest in Hughes would be reduced)}$$

Therefore, after the Hughes recapitalization, the number of notional shares representing GM's retained economic interest in Hughes would have been _____.

Because the GM Class H dividend base is equal to the number of shares of outstanding GM Class H common stock plus the number of notional shares representing GM's retained economic interest in Hughes, the GM Class H dividend base would have also decreased by _____ million as a result of the Hughes recapitalization. After the Hughes recapitalization, the portion of Hughes' earnings allocable to the GM Class H common stockholders would have been as follows:

$$\frac{\text{(The number of shares of outstanding GM Class H common stock)}}{\text{(The GM Class H dividend base)}} = \% \text{ (The portion of Hughes earnings allocable to the GM Class H common stock)}$$

The remaining portion of Hughes earnings, about % , would have been allocable to GM's retained economic interest in Hughes.

The example above is provided for illustrative purposes only. We will not know the actual percentages and the number of notional shares representing GM's retained economic interest in Hughes until immediately prior to the time of the completion of the Hughes split-off. These actual amounts will depend upon, among other things, the average market price of GM Class H common stock during a specified period preceding the time of the completion of the Hughes split-off and the amount of the Hughes dividend distribution.

Contribution of Hughes Stock to HEC Holdings. GM currently owns 100% of the issued and outstanding shares of common stock and preferred stock of Hughes. Immediately after the Hughes dividend distribution but before the Hughes split-off, GM will contribute all of the capital stock of Hughes to HEC Holdings, which is currently a wholly owned subsidiary of GM. This contribution will result in HEC Holdings becoming the parent company of Hughes, owning 100% of its capital stock, immediately prior to the Hughes split-off.

In exchange for this contribution, HEC Holdings will issue to GM (by means of a reclassification) shares of its Class C common stock such that GM will hold a number of shares of HEC Holdings Class C common stock equal to the GM Class H dividend base after it has been reduced as part of the Hughes recapitalization as described above. Using the example provided above at Reduction in GM's Retained Economic Interest in Hughes After the Hughes Recapitalization and based on the assumptions described in that section, after the contribution, GM would have held million shares of HEC Holdings Class C common stock.

For more information regarding the terms of the Hughes recapitalization, see Description of Principal Transaction Agreements GM/Hughes Separation Agreement The Hughes Recapitalization.

Hughes Split-Off

After the Hughes recapitalization has been completed, the Hughes business will be separated from General Motors pursuant to the Hughes split-off. The Hughes split-off principally consists of the exchange of shares of HEC Holdings stock on a one-for-one basis for shares of GM Class H common stock. As a result of the Hughes split-off, HEC Holdings, which will then hold all of the outstanding capital stock of Hughes, will become an independent, publicly owned company. The implementation agreement and the other agreements contemplated by that agreement are the primary transaction agreements that establish the terms of the Hughes split-off.

Redemption of GM Class H Common Stock. Promptly after the completion of the Hughes recapitalization, GM will distribute one share of HEC Holdings Class C common stock that it holds after the contribution described above at The Hughes Recapitalization Contribution of Hughes Stock to HEC Holdings to the holders of GM Class H common stock in exchange for and in redemption of each outstanding share of GM Class H common stock. Using the example provided above at Reduction in GM's Retained Economic Interest in Hughes After the Hughes Recapitalization and based on the assumptions described in that section, GM would have distributed a total of million shares of HEC Holdings Class C common stock in the Hughes split-off to GM Class H common stockholders, which is equal to the number of outstanding shares of GM Class H common stock in that example. As part of the Hughes split-off, all of the formerly outstanding shares of GM Class H common stock will be cancelled, and no shares of GM Class H common stock will be outstanding after the Hughes split-off. See GM Capital Stock GM's Dual-Class Common Stock Capital Structure Redemption, for a more complete description of the mechanics of the redemption.

Potential Distribution of HEC Holdings Class C Common Stock to GM \$1 2/3 Par Value Common Stockholders. In order to maintain the tax-free status of the Hughes split-off to GM and its stockholders, GM must distribute to its stockholders (in respect of their shares of GM common stock) and/or its securityholders (in respect of their GM securities) 80% or more of the shares of HEC Holdings Class C common stock. GM currently estimates that it would make a distribution in order to maintain the tax-free

status of the Hughes split-off only if the average market price of GM Class H common stock over a specified period preceding the completion of the Hughes split-off (which is the price that is used to determine the reduction in GM's retained economic interest in Hughes as part of the Hughes recapitalization) were to be greater than \$ _____ per share or less than \$ _____ per share. Under such circumstances, to the extent necessary to maintain the tax-free status of the Hughes split-off to GM and its stockholders, GM may distribute to the GM \$1 2/3 par value common stockholders a number of shares of HEC Holdings Class C common stock (which would otherwise be retained by GM) necessary so that, in the aggregate, GM would distribute 80% or more of the shares of HEC Holdings Class C common stock. The foregoing price calculation is based upon the number of shares of GM Class H common stock outstanding as of _____, 2002 and assumes that any shares of HEC Holdings Class C common stock transferred by GM in debt-for-equity exchanges are not transferred to GM securityholders that would count toward the satisfaction of the requirement that GM distribute 80% or more of the shares of HEC Holdings Class C common stock.

If GM determines to make a pro rata distribution in order to maintain the tax-free status of the Hughes split-off, then the number of shares of HEC Holdings Class C common stock to be distributed to the GM \$1 2/3 par value common stockholders for each share held would be determined using the following formula:

the number of shares of HEC Holdings Class C common stock that GM determines to distribute to its stockholders in order to maintain the tax-free status of the Hughes split-off;

divided by

the number of shares of GM \$1 2/3 par value common stock outstanding on the record date for the distribution.

If GM determines to make a pro rata distribution, then the actual distribution ratio as well as the record date for the pro rata distribution will be publicly announced by GM around the time of the completion of the Hughes split-off.

After the distribution of HEC Holdings Class C common stock to the holders of GM Class H common stock (and, if applicable, the GM \$1 2/3 par value common stockholders) in the Hughes split-off, GM will continue to hold any remaining shares of HEC Holdings Class C common stock received by GM in exchange for its contribution of Hughes stock to HEC Holdings as described above at _____ The Hughes Recapitalization Contribution of Hughes Stock to HEC Holdings. The number of shares of HEC Holdings Class C common stock that will be held by GM at that time will be equal to the number of notional shares representing its retained economic interest in Hughes, if any, after giving effect to the reduction of that interest as part of the Hughes recapitalization less the number of shares (if any) distributed to the GM \$1 2/3 par value common stockholders as part of the Hughes split-off. Using the example provided above at _____ Reduction in GM's Retained Economic Interest in Hughes After the Hughes Recapitalization and based on the assumptions described in that section, immediately after the Hughes split-off, GM would hold _____ million shares of HEC Holdings Class C common stock. GM's ownership of any such shares is designed to provide value to GM in an amount reflecting the value of GM's retained economic interest in Hughes immediately after the Hughes recapitalization. A portion of any such shares may be subject to GM share dispositions after the Hughes/EchoStar merger, as described at _____ GM Share Dispositions below, and any remaining portion of these shares would be retained by General Motors after the Hughes split-off for up to five years.

GM does not currently have the ability to exchange shares of HEC Holdings Class C common stock in redemption of shares of GM Class H common stock. One of the effects of the amendment to the GM restated certificate of incorporation that GM common stockholders are being asked to approve pursuant to this consent solicitation is to authorize the GM board of directors to make this exchange on the terms described in this document. For more information about this proposed amendment to GM's restated certificate of incorporation, see _____ Amendments to the GM Restated Certificate of Incorporation and _____ GM Capital Stock GM's Dual-Class Common Stock Capital Structure Redemption.

Prior to the completion of the Hughes split-off, HEC Holdings intends to adopt a stockholder protection rights agreement. After the Hughes/EchoStar merger, this will become the stockholder protection rights

agreement of New EchoStar. For more information regarding this stockholder protection rights agreement, see [New EchoStar Capital Stock Stockholder Protection Rights Agreement](#).

Immediately following the completion of the Hughes split-off, EchoStar will merge with HEC Holdings to form New EchoStar as described at [The Hughes/ EchoStar Merger](#) and [Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement](#) below.

No 120% Recapitalization of GM Class H Common Stock into GM \$1 2/3 Par Value Common Stock. If GM common stockholders approve the proposals relating to the transactions, the completion of the GM/ Hughes separation transactions will not result in a recapitalization of the GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances pursuant to provisions of the GM restated certificate of incorporation. As part of the GM/ Hughes separation transactions, the GM restated certificate of incorporation will be amended to expressly provide that this provision will not apply to the GM/Hughes separation transactions. By approving the proposals relating to the transactions, GM \$1 2/3 par value common stockholders and GM Class H common stockholders will, in effect, be waiving any application of the recapitalization provision to the GM/ Hughes separation transactions. For more information, see [GM Capital Stock GM s Dual-Class Common Stock Capital Structure Recapitalization and Certain Other Transactions](#). As described in greater detail below at [GM Background and Considerations Alternatives to the Transactions](#), GM determined that, in the context of the proposed separation of Hughes from GM, a recapitalization of the GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate would not be in the best interests of GM and its common stockholders and, accordingly, GM structured the transactions so as not to result in such a recapitalization.

No Pro Rata Distribution of the Hughes Dividend Distribution. If GM common stockholders approve the proposals relating to the transactions, GM will retain the entire amount of the dividend distributed to it by Hughes in the Hughes recapitalization, and will not distribute any portion of that dividend to the holders of GM Class H common stock. Therefore, the GM Class H common stockholders will not receive the pro rata share of the Hughes dividend distribution in accordance with their economic interest in the financial performance of Hughes that is currently provided for under certain circumstances pursuant to the GM board policy statement regarding certain capital stock matters. By approving the proposals relating to the transactions being submitted to GM common stockholders pursuant to this consent solicitation, GM common stockholders will be approving and consenting to an asset transfer consisting of the Hughes dividend distribution to GM, as contemplated by the terms of the GM board policy statement. For more information, see [GM Capital Stock GM Board of Directors Policy Statement](#).

For more information regarding the Hughes split-off, including the redemption of the GM Class H common stock as contemplated by the terms of the implementation agreement, see [Description of Principal Transaction Agreements Implementation Agreement Hughes Split-Off](#).

Other Separation-Related Arrangements

The GM/Hughes separation transactions include certain other arrangements related to the Hughes recapitalization and the Hughes split-off. These arrangements generally address matters relating to the separation of the Hughes business from General Motors pursuant to the Hughes split-off:

GM, Hughes and HEC Holdings have agreed to indemnification arrangements in connection with the transactions, including with respect to certain existing disputes between Hughes and Boeing related to the sale by Hughes of its satellite manufacturing business to Boeing in 2000. GM has agreed to be responsible for liability from a purchase price adjustment claim of Boeing to the extent that such liability, if any, exceeds \$670 million. In addition, among other things, GM and Hughes have agreed generally to indemnify each other against losses arising out of the other company s businesses.

GM, Hughes and HEC Holdings have agreed to new income tax allocation arrangements, which will become effective upon completion of the Hughes/ EchoStar merger. These arrangements will modify the income tax allocation arrangements currently in place between GM and Hughes. Among other

things, the new income tax allocation arrangements will govern the allocation of U.S. income tax liabilities among the companies for taxable periods ending on or prior to the completion of the transactions.

GM and Hughes have agreed to intellectual property arrangements concerning certain intellectual property and ongoing activities of the companies. Among other things, the intellectual property arrangements provide that before transferring its rights to certain Hughes bandwidth to any third party, Hughes will offer the Hughes bandwidth to GM on the same terms. Similarly, GM has agreed that before transferring its rights to certain OnStar bandwidth to a third party, it will offer the OnStar bandwidth to Hughes on the same terms.

GM, Hughes and HEC Holdings have also agreed to certain arrangements pertaining to employee matters. GM has agreed to provide certain service and salary credits under certain GM retirement plans for GM employees who transfer to Hughes, and Hughes has agreed to provide certain service and salary credits under the Hughes defined benefit pension plan for Hughes employees who transfer to GM.

For more information regarding the terms of these and other related arrangements, see Description of Principal Transaction Agreements Implementation Agreement Other General Indemnification and GM/ Hughes Separation Agreement Ancillary Separation Agreements.

Amendments to the GM Restated Certificate of Incorporation

In order to implement the GM/ Hughes separation transactions as described in this document, we will need to amend Article Fourth of the GM restated certificate of incorporation. In particular, in connection with the GM/ Hughes separation transactions, GM is proposing to amend Article Fourth of the GM restated certificate of incorporation to:

provide for the reduction by the GM board of directors of GM's retained economic interest in Hughes to reflect the Hughes dividend distribution of up to \$4.2 billion to be received by GM in connection with the Hughes recapitalization. This would be accomplished by reducing the denominator of the GM Class H fraction by an amount that reflects the Hughes dividend distribution;

provide for GM to split off HEC Holdings by exchanging one share of HEC Holdings Class C common stock for each outstanding share of GM Class H common stock. This would be accomplished by adding a redemption feature to the terms of the GM Class H common stock that will make the GM Class H common stock redeemable in exchange for shares of HEC Holdings Class C common stock on a share-for-share basis; and

provide that the current provisions of the GM restated certificate of incorporation that provide for a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate under certain circumstances will not be applicable to the GM/Hughes separation transactions. This would be accomplished by adding a provision to expressly provide that the completion of the GM/ Hughes separation transactions as described in this document will not result in a recapitalization of the GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate.

Without this amendment to Article Fourth of the GM restated certificate of incorporation, the GM/Hughes separation transactions cannot be completed as proposed. In its current form, the GM restated certificate of incorporation does not permit the GM board of directors to reduce the denominator of the GM Class H fraction in connection with the receipt by GM of the Hughes dividend distribution. In addition, the current provisions of Article Fourth of the GM restated certificate of incorporation do not permit the redemption of GM Class H common stock in exchange for shares of HEC Holdings Class C common stock.

Also, under the GM restated certificate of incorporation in its current form, the separation of Hughes from GM pursuant to the Hughes split-off would result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate but for the provision of the GM charter

amendment that will expressly provide that the 120% recapitalization provision shall not apply to the transactions. However, as described in greater detail below at GM Background and Considerations Alternatives to the Transactions, GM determined that, in the context of the proposed separation of Hughes from GM, such a result would not be in the best interests of GM and its common stockholders and, accordingly, GM structured the transactions so as not to result in such a recapitalization.

Article Fourth of the GM restated certificate of incorporation, in the form proposed to be amended as described above, is included in Appendix A of this document. **We urge GM common stockholders to review the form of this proposed amendment to Article Fourth carefully before voting with respect to the proposals relating to the transactions.** Completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger is conditioned upon the requisite GM common stockholder approval of this proposed amendment to the GM restated certificate of incorporation (as well as the requisite GM common stockholder approval of the two related ratification matters).

GM is also proposing a further amendment to Article Fourth of the GM restated certificate of incorporation after the completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger in order to eliminate certain provisions relating to the GM Class H common stock that would no longer be necessary because it will no longer be outstanding after the GM/Hughes separation transactions. This is a technical amendment to the GM restated certificate of incorporation, which is necessary in order to reflect the completion of the GM/ Hughes separation transactions and the elimination of the GM Class H common stock and GM's current dual-class common stock capital structure as a result of these transactions.

Article Fourth of the GM restated certificate of incorporation, in the form proposed to be further amended to eliminate certain provisions relating to the GM Class H common stock, is included in Appendix B of this document. **We urge GM common stockholders to review the form of this proposed amendment to Article Fourth carefully before voting with respect to this additional proposal.** Completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger is not conditioned upon the requisite GM common stockholder approval of this further proposed amendment to the GM restated certificate of incorporation.

GM does not currently expect to amend its bylaws in connection with the GM/ Hughes separation transactions, except to the extent necessary or appropriate to reflect the completion of the GM/ Hughes separation transactions and the elimination of the GM Class H common stock.

For more information regarding the terms of the GM/ Hughes separation transactions, including the Hughes recapitalization, the Hughes split-off and other related transactions, see Description of Principal Transaction Agreements Implementation Agreement and GM/ Hughes Separation Agreement below.

The Hughes/ EchoStar Merger

Overview. The combination of the businesses of Hughes and EchoStar pursuant to the Hughes/ EchoStar merger will be completed immediately following the completion of the GM/ Hughes separation transactions. As part of the Hughes/ EchoStar merger, EchoStar will merge with HEC Holdings, which will be the parent company of Hughes at the time of the merger, and HEC Holdings will be the surviving corporation. In connection with the Hughes/ EchoStar merger, the surviving corporation, which we sometimes refer to as New EchoStar, will be renamed EchoStar Communications Corporation. As a result of the Hughes/ EchoStar merger, Hughes will become a wholly owned subsidiary of New EchoStar. The Hughes/ EchoStar merger agreement is the primary transaction agreement that establishes the terms of the Hughes/ EchoStar merger.

As part of the Hughes/ EchoStar merger, among other things:

Each share of HEC Holdings Class C common stock distributed to GM Class H common stockholders in connection with the Hughes split-off will remain outstanding as a share of Class C common stock of New EchoStar and will be unchanged. Similarly, each share of HEC Holdings Class C common stock held by GM after the Hughes split-off will remain outstanding as a share of Class C common stock of

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

New EchoStar and will be unchanged. As a result, former GM Class H common stockholders and General Motors will be Class C common stockholders of New EchoStar.

EchoStar Class A common stockholders will receive 1/0.73, or about 1.3699, shares of New EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock they own, or cash in lieu of fractional shares of New EchoStar Class A common stock that they would otherwise receive. As a result, former EchoStar Class A common stockholders will become Class A common stockholders of New EchoStar.

EchoStar Class B common stockholders will receive 1/0.73, or about 1.3699, shares of New EchoStar Class B common stock in exchange for each share of EchoStar Class B common stock they own, or cash in lieu of fractional shares of New EchoStar Class B common stock that they would otherwise receive. As a result, former EchoStar Class B common stockholders will become Class B common stockholders of New EchoStar. A trust controlled by Charles W. Ergen, the Chairman of the Board of Directors and Chief Executive Officer of EchoStar, currently owns all of the outstanding shares of EchoStar Class B common stock and is expected to become the owner of all outstanding shares of New EchoStar Class B common stock as a result of the Hughes/ EchoStar merger.

Shares Outstanding and Voting Power of New EchoStar. Based on the assumptions about certain variable factors described below, we estimate that, immediately following the completion of the Hughes/ EchoStar merger:

the New EchoStar Class A common stock would represent about % of the outstanding common stock of New EchoStar and about % of the total voting power of New EchoStar;

the New EchoStar Class B common stock would represent about % of the outstanding common stock of New EchoStar and about % of the total voting power of New EchoStar; and

the New EchoStar Class C common stock would represent about % of the outstanding common stock of New EchoStar and about % of the total voting power of New EchoStar.

The pro forma percentages of outstanding shares and voting power set forth above and throughout this document are presented for illustrative purposes only and are sensitive to their underlying assumptions. We will not know the actual percentages of outstanding shares and voting power of shares of New EchoStar common stock until immediately before the Hughes/ EchoStar merger. These calculations are based on a number of assumptions, including the average market price of GM Class H common stock during the specified period preceding the completion of the GM/Hughes separation transactions, which we discuss at Assumptions Used in Calculating the Pro Forma Percentages of Outstanding Shares and Voting Power and the Minimum GM Class H Common Stock Price Necessary to Satisfy the Equity Headroom Condition.

Except as to voting rights, the New EchoStar Class A common stock and New EchoStar Class C common stock will be identical. The New EchoStar Class B common stock will have special voting rights, will be convertible into New EchoStar Class A common stock or New EchoStar Class C common stock and will be subject to certain transfer restrictions. However, in all respects other than voting rights, convertibility and the transfer restrictions, the New EchoStar Class B common stock will be substantially the same as the New EchoStar Class A common stock and New EchoStar Class C common stock. The New EchoStar common stock will have the voting rights described below at New EchoStar Capital Stock Common Stock.

New EchoStar will have three different classes of common stock, with each class having different voting powers, in order to address two important objectives with respect to the transactions:

to preserve the tax-free status of the Hughes split-off to GM for U.S. federal income tax purposes; and

to preserve at least to some degree the greater voting power that the EchoStar Class B common stock currently has relative to the EchoStar Class A common stock.

GM and Hughes would not agree to complete the transactions unless they were assured that the Hughes split-off would be tax-free to GM and its stockholders for U.S. federal income tax purposes. GM has received a ruling from the IRS confirming the tax-free nature of the Hughes split-off, and the continued effectiveness

of this ruling is a condition to the obligation of GM and Hughes to complete the transactions. The Hughes split-off will be tax-free to GM for these purposes only if, among other things, General Motors and certain of its historical stockholders acquire stock possessing more than 50% of the aggregate voting power of the stock of New EchoStar in the transactions. Accordingly, the terms of the various classes of common stock of New EchoStar are designed to ensure that the shares of New EchoStar Class C common stock held by GM (other than shares that are subject to GM share dispositions) immediately after the Hughes split-off and the shares of New EchoStar Class C common stock that are issued to certain of GM's historical stockholders in the Hughes split-off (which we refer to collectively as "GM group shares") and certain shares of New EchoStar common stock issued after the Hughes split-off (which, together with the GM group shares, we refer to as "qualifying shares") together possess at least 50.5% of the aggregate voting power of New EchoStar at all times during the first two years following the completion of the Hughes split-off (and possibly thereafter, in certain circumstances).

At the same time, EchoStar wanted to preserve at least to some degree the greater voting power that the EchoStar Class B common stock currently has relative to the EchoStar Class A common stock. This was particularly important given that Mr. Ergen, as the beneficial owner of all of the EchoStar Class B common stock and about 90% of the total voting power of EchoStar, was required to reduce substantially his current voting power in EchoStar in order to address the tax objectives of GM and Hughes with respect to the transactions. Mr. Ergen agreed to such a substantial reduction of his own voting power, including giving up voting control of New EchoStar, in order to provide the holders of EchoStar Class A common stock the opportunity to participate in the potential benefits expected to accrue to them as a result of the completion of the Hughes/ EchoStar merger.

In order to ensure that the qualifying shares possess at least 50.5% of the aggregate voting power of New EchoStar at all times during the first two years following the completion of the Hughes split-off (and possibly thereafter, in certain circumstances), the number of votes per share of New EchoStar Class B common stock will be reduced as necessary. After the second anniversary of the Hughes split-off, the number of votes per share of New EchoStar Class B common stock will no longer be subject to downward adjustment, except as described at New EchoStar Capital Stock Common Stock Voting Rights. Further, from and after the end of this two-year period, the voting power of each share of New EchoStar Class B common stock outstanding at the conclusion of the two-year period, as a percentage of aggregate voting power, generally will be fixed at the percentage of the aggregate voting power of all of the shares of New EchoStar common stock then outstanding to which such share of New EchoStar Class B common stock was entitled at the end of the two-year period. In order to maintain the per share percentage voting power of the New EchoStar Class B common stock as fixed at the end of the two-year period, the votes per share of New EchoStar Class B common stock will increase when certain additional shares of capital stock of New EchoStar are issued, except as described at New EchoStar Common Stock Common Stock Voting Rights. Thus, in general, the voting power of the New EchoStar Class B common stock will not be diluted by issuances of additional stock by New EchoStar after the end of the two-year period.

In order to preserve the relatively greater voting power that shares of EchoStar Class B common stock currently have compared to shares of EchoStar Class A common stock, each share of New EchoStar Class A common stock will entitle the holder thereof to one vote per share in the election of directors and on all other matters submitted to the stockholders of New EchoStar for approval and each share of New EchoStar Class B common stock initially will entitle the holder thereof to 10 votes per share on those same matters, subject to reduction during the first two years following the completion of the Hughes/ EchoStar merger and subject to the specified protection against dilution after the two-year period, in each case as described immediately above. In addition, the holders of New EchoStar Class B common stock are entitled to a separate class vote for approval of certain specified matters. For more information see New EchoStar Capital Stock Common Stock.

As a result of his expected ownership of all of the New EchoStar Class B common stock after the Hughes/EchoStar merger, Mr. Ergen, who will also be the Chairman of the Board of Directors and the Chief Executive Officer of New EchoStar, will have substantial influence over actions of New EchoStar that require stockholder approval.

Satisfaction of the Equity Headroom Condition. An important condition to the obligations of GM, Hughes, HEC Holdings and EchoStar to complete the Hughes/ EchoStar merger is that New EchoStar must have the ability, based on certain assumptions, to issue a specified minimum amount of equity as of the completion of the Hughes/ EchoStar merger without causing the GM group shares to possess 50% or less of the aggregate value of the outstanding stock of New EchoStar. This minimum amount is the greater of:

\$1.0 billion *minus* the fair market value of the capital stock of HEC Holdings into which any equity and certain equity-linked securities issued by EchoStar after October 28, 2001 and before the completion of the transactions would convert at the completion of the Hughes/ EchoStar merger; and

\$250 million.

As a result of Vivendi Universal's \$1.5 billion investment in EchoStar Series D convertible preferred stock in January 2002, the parties currently anticipate that the minimum amount would be \$250 million. The equity headroom condition is designed to ensure that, based on the assumptions used in the calculations, New EchoStar will have the ability to issue the minimum amount of new equity after the Hughes/ EchoStar merger without violating certain agreements with GM designed to preserve the tax-free status of the Hughes split-off to GM.

We cannot determine whether the equity headroom condition will be satisfied until immediately before the completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger because the satisfaction of this condition will depend on the facts and circumstances existing at that time, including the average market price of GM Class H common stock during a specified period preceding the completion of the GM/Hughes separation transactions. We will determine whether the equity headroom condition is satisfied at such time by applying certain presumptions and making determinations as to certain variables pursuant to the methodology set forth in the Hughes/ EchoStar merger agreement. For further information regarding this methodology, see Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement Conditions. We will first determine whether the equity headroom condition will be satisfied in the event that GM receives a Hughes dividend distribution of \$4.2 billion and is allowed to make share dispositions involving the full 100 million shares. If the equity headroom condition would not be satisfied under those circumstances, then:

first, the number of shares that GM may transfer pursuant to GM share dispositions after the completion of the Hughes/EchoStar merger would be mandatorily reduced to the extent necessary to satisfy the equity headroom condition, but not by more than 40 million shares; and

second, if GM has issued more than 60 million shares of GM Class H common stock in debt-for-equity exchanges prior to the completion of the GM/Hughes separation transactions, the amount of the Hughes dividend distribution would be mandatorily reduced to the extent necessary to satisfy the equity headroom condition by up to the amount of the proceeds received by GM from such debt-for-equity exchanges in excess of 60 million shares, but not by more than \$700 million (from \$4.2 billion down to \$3.5 billion).

For a more detailed description of these mandatory reductions, see Description of Principal Transaction Agreements GM/Hughes Separation Agreement The Hughes Recapitalization Reduction in the Shares Subject to GM Share Dispositions; Reduction of the Hughes Recapitalization Amount. Any mandatory reductions in the amount of the Hughes dividend distribution or the number of shares in GM share dispositions would have the effect of reducing the amount of liquidity provided to GM in connection with the transactions. See Risk Factors Risk Factors Relating to GM After the Transactions GM's Credit Position May be Affected by the Amount of Liquidity Provided by the Transactions, Which Cannot be Determined at this Time.

Although we cannot determine at this time whether the equity headroom condition will be satisfied at the time that we propose to complete the GM/Hughes separation transactions and the Hughes/ EchoStar merger, for illustrative purposes only, we can estimate the minimum average market price for the GM Class H common stock determined over the period of time specified by the transaction agreements that would be needed to satisfy the equity headroom condition. To estimate this price, we must make certain assumptions

which are described at Assumptions Used in Calculating the Pro Forma Percentages of Outstanding Shares and Voting Power and Minimum GM Class H Common Stock Price Necessary to Satisfy the Equity Headroom Condition and follow the methodology set forth in the Hughes/ EchoStar merger agreement. Based on those assumptions, the application of the Hughes/ EchoStar merger agreement methodology and assuming that the number of shares subject to GM share dispositions were reduced by the full amount to 60 million shares, we currently estimate that the equity headroom condition would be satisfied if the price of GM Class H common stock determined over the period of time specified by the transaction agreements were equal to at least \$ per share. **This calculation is provided for illustrative purposes only. The minimum GM Class H common stock price determined as described above that actually will be required in order to satisfy the equity headroom condition will vary to the extent that the facts and circumstances existing at the time of the Hughes/ EchoStar merger differ from the assumptions underlying this calculation. Some of these assumptions are discussed below. We will not know this actual minimum price until immediately before the completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger.**

In considering potential market prices of the GM Class H common stock during the period specified by the transaction agreements for the purpose of determining whether the equity headroom condition will be satisfied, one factor to consider, among others, is the product of the implied exchange ratio multiplied by the EchoStar Class A common stock price. The implied exchange ratio, 0.73, is equal to the inverse of the exchange ratio in the Hughes/ EchoStar merger of 1/0.73 shares of New EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock. We believe it is possible that, prior to the time of the completion of the Hughes/ EchoStar merger, the market prices of shares of GM Class H common stock may be about 0.73 of the market prices of shares of EchoStar Class A common stock at such time. However, we cannot provide you any assurances with respect to any relationship between the market prices of GM Class H common stock and the market prices of EchoStar Class A common stock during the period with respect to which the price per share of GM Class H common stock would be determined for the purpose of determining whether the equity headroom condition will be satisfied. Further, we cannot provide you any assurances with respect to the impact, if any, that any such relationships would have on the price per share of GM Class H common stock during the period specified by the transaction agreements.

If the equity headroom condition would not be satisfied even after the mandatory reductions to the number of shares subject to GM share dispositions and/or the amount of the Hughes dividend distribution as described above, GM would have the right, but not the obligation, to cause the condition to be satisfied by electing to reduce the number of shares subject to GM share dispositions and to the amount of the Hughes dividend distribution. See Description of Principal Transaction Agreements GM/Hughes Separation Agreement The Hughes Recapitalization. We cannot assure you that GM would determine to make any such voluntary reductions. Any such voluntary reductions would reduce the amount of liquidity to be provided to GM in connection with the transactions. See Risk Factors Risk Factors Relating to GM After the Transactions GM's Credit Position May be Affected by the Amount of Liquidity Provided by the Transactions, Which Cannot be Determined at this Time. As of the date of this document, GM has not made any determination regarding whether or to what extent GM would be willing to make any voluntary reductions in the number of shares subject to GM share dispositions and/or the amount of the Hughes dividend distribution in order to ensure that the minimum headroom condition and value condition would be satisfied. GM currently expects that it would make any determination regarding any such voluntary reductions immediately before the completion of the Hughes split-off, based on factors it determines to be relevant as of such time.

Any such determinations would necessarily be based on the facts and circumstances existing at such time, which are not known at this time. We further note that, as described in greater detail elsewhere in this document, in the event that the GM board of directors were to consider taking any action that would change in any material respect the terms on which the transactions are to be completed from the terms provided by the transaction agreements, such as, among other things, making any voluntary reduction to the number of shares subject to GM share dispositions and/or the amount of the Hughes dividend distribution, the GM board of directors in considering such matters would consider, among other factors, the fairness of the transactions (as to be so revised) to the holders of both classes of common stock in accordance with the GM board policy statement regarding certain capital stock matters. See Recommendations of the Hughes Board of Directors, the GM Capital Stock Committee and the GM Board of Directors; Fairness of the Transactions. If GM were to

determine not to make any such voluntary reductions, which determination would be within GM's sole discretion, such that this condition would not be satisfied, then the Hughes split-off and the Hughes/ EchoStar merger would not occur unless each of GM, Hughes and EchoStar agrees to waive this condition.

GM does not currently believe that it would be required to, and does not currently intend to, resolicit the approval of GM common stockholders if the equity headroom condition is waived by the parties or if GM causes the condition to be satisfied by voluntarily electing to make any such reductions. You should be aware, however, that if the equity headroom condition is waived and the Hughes/ EchoStar merger is completed, then New EchoStar's already restricted ability to raise capital by selling equity securities as described below could be further diminished. As a result, the risks that New EchoStar will face regarding liquidity and financing, as described further at Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar, could be intensified. We cannot assure you whether or not the parties would waive the equity headroom condition. We would make that determination immediately before the completion of the Hughes split-off based on factors that we determine to be relevant at that time.

You should understand that the satisfaction of the equity headroom condition will not ensure that New EchoStar actually will be able to issue equity at any time after the completion of the Hughes/ EchoStar merger or, if so, on what terms any such equity issuances could be completed. The transaction agreements contain provisions that severely restrict New EchoStar's ability to issue additional equity or equity-linked securities for two years after the Hughes/ EchoStar merger, absent possible favorable IRS rulings, and New EchoStar's ability to issue any additional equity will be subject to these transaction agreements and general market conditions. The determination as to whether a proposed equity issuance by New EchoStar is permitted under these restrictions will be made under the facts and applicable law at or around the time of the proposed issuance, which may result in more restrictive limitations than the parties anticipated at the time of completion of the Hughes/EchoStar merger. We can provide no assurances in this regard. See Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar New EchoStar Will Be Subject to Significant Restrictions with Respect to Issuances of Its Equity Securities for Two Years Following the Hughes/ EchoStar Merger.

For more information about the equity headroom condition, see Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement Conditions.

Assumptions Used in Calculating the Pro Forma Percentages of Outstanding Shares and Voting Power and the Minimum GM Class H Common Stock Price Necessary to Satisfy the Equity Headroom Condition. We have applied the methodology set forth in the Hughes/ EchoStar merger agreement for determining whether the equity headroom condition is satisfied and have made assumptions about certain variables in calculating:

the amounts set forth throughout this document with respect to pro forma percentages of outstanding shares and voting power of shares of New EchoStar common stock upon the completion of the Hughes/ EchoStar merger; and

the estimated minimum average market price of GM Class H common stock set forth in this document that would be necessary for the equity headroom condition to be satisfied.

We have made assumptions about the relative fair market value of the various classes of New EchoStar common stock and have assumed that, among other things:

there will be no material changes in the number of shares of GM Class H common stock, PanAmSat common stock and EchoStar common stock currently outstanding other than issuances upon conversion of EchoStar Series D convertible preferred stock (to which we have given full effect for purposes of this calculation) or in the number of shares of EchoStar common stock issuable upon conversion of EchoStar convertible debt securities;

the IRS ruling received by GM with respect to the treatment of certain transactions involving GM and New EchoStar securities under Section 355(e) of the Code remains in effect;

no GM debt-for-equity exchanges will be completed prior to the completion of the Hughes/ EchoStar merger, which means that the amount of the Hughes dividend is not subject to mandatory reduction under the terms of the transaction agreements; and

the Hughes dividend distribution to GM will be \$4.2 billion.

In addition, in calculating the pro forma percentages of outstanding shares and voting power of shares of New EchoStar common stock, we have assumed an average market price of GM Class H common stock over the specified period preceding the GM/Hughes separation transactions of \$, which was the average market price of GM Class H common stock during the five trading days preceding , 2002, and we have assumed that the number of shares of New EchoStar Class C common stock available to be distributed in connection with GM share dispositions following the completion of the Hughes/ EchoStar merger is million.

Changes in the above-described assumptions and other factors could materially affect the minimum average GM Class H common stock price required in order for the equity headroom condition to be satisfied as of any particular time and/or the actual outstanding shares and voting power percentages immediately after the completion of the Hughes/ EchoStar merger. Such other factors include, among other things:

the exercise of stock options with respect to GM Class H common stock, PanAmSat common stock or EchoStar common stock prior to the completion of the Hughes/ EchoStar merger; and

additional equity or equity-linked issuances by EchoStar or an increase in the number of shares of EchoStar common stock issuable upon conversion of EchoStar convertible debt securities prior to the completion of the Hughes/ EchoStar merger.

Certain Covenants and Other Matters Relating to the Hughes/ EchoStar Merger. GM, Hughes, HEC Holdings and EchoStar have agreed that they will cooperate with each other to obtain prompt termination of the waiting period applicable to the Hughes/ EchoStar merger under the Hart-Scott Rodino Act and in the process of obtaining required governmental approvals, including FCC approval. Hughes and EchoStar may be required, if necessary, to enter into settlements with certain regulatory agencies that require them to divest assets. Divestiture will not be required, however, if those actions would result in the expected synergies of the Hughes/ EchoStar merger being reduced to an amount that is no longer meaningful.

Hughes, HEC Holdings and EchoStar also agreed that, upon the completion of the Hughes/ EchoStar merger, New EchoStar will offer multi-channel subscription television service under the DIRECTV brand name.

In addition, EchoStar will be required to pay Hughes a \$600 million termination fee, as described in greater detail at Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement Termination Fees; Expense Reimbursement, if:

the GM/ Hughes separation transactions and the Hughes/ EchoStar merger do not occur because EchoStar or Hughes terminates the merger agreement as a result of a permanent injunction or final and nonappealable order prohibiting the Hughes/ EchoStar merger in an action brought by a federal, state or local authority under U.S. antitrust laws or FCC regulations; or

Hughes terminates the merger agreement because the waiting period applicable to the Hughes/EchoStar merger under the Hart-Scott-Rodino Act does not expire or terminate by late December 2002, or because of a failure to obtain FCC approval by early January 2003 (in each case, subject to extension under certain circumstances).

It is currently expected that the proceeds received by Hughes in payment of this fee would be used to repay outstanding debt obligations of Hughes and to fund Hughes operations. However, EchoStar will not be obligated to pay this fee if it is willing to accept a settlement with federal, state or local authorities under U.S. federal or state antitrust laws or the FCC but Hughes is not willing to accept such settlement and instead terminates the Hughes/ EchoStar merger agreement. If the termination of the Hughes/ EchoStar merger agreement was caused by or was the result of Hughes failure to comply with its obligations to use its best efforts to satisfy specified conditions in the Hughes/ EchoStar merger agreement relating to antitrust requirements and governmental approvals, EchoStar is obligated to pay to Hughes only \$300 million of the

termination fee at the time of termination and the parties may elect to resolve the dispute over the remaining \$300 million in accordance with the Hughes/EchoStar merger agreement.

Furthermore, as described in greater detail at [Description of Principal Transaction Agreements Hughes/EchoStar Merger Agreement Termination Fees; Expense Reimbursement](#) :

if the GM/Hughes separation transactions and the Hughes/ EchoStar merger do not occur because EchoStar terminates the Hughes/ EchoStar merger agreement because GM fails to obtain the requisite GM common stockholder approval of the proposals relating to the transactions and under certain circumstances enters into an agreement with respect to, or completes, a competing transaction to the Hughes/ EchoStar merger, in either case within 15 months of such termination, Hughes will be required to pay to EchoStar a \$600 million termination fee on the date the definitive agreement with respect to the competing transaction is executed; or

if EchoStar or Hughes terminates the Hughes/ EchoStar merger agreement because GM enters into or the GM board of directors approves or recommends to GM common stockholders a competing transaction or because, under certain circumstances the GM board of directors provides notice to EchoStar that it cannot or will not recommend the transactions or is required to change or revoke its recommendation of the transactions to GM common stockholders for their approval, Hughes will be required to pay to EchoStar a \$600 million termination fee at the same time as the termination if the Hughes/ EchoStar merger agreement is terminated by Hughes or one business day after the termination if the Hughes/ EchoStar merger agreement is terminated by EchoStar.

For more information regarding the terms of the Hughes/ EchoStar merger, see [Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement](#) below.

Restrictions on Consideration of Competing Transactions and the Fiduciary Out Exception

Under the terms of the transaction agreements, General Motors and Hughes have agreed not to solicit any proposals from third parties with respect to any merger, consolidation or other business combination involving Hughes or any acquisition of any capital stock or material portion of the assets, subject to certain exceptions, of Hughes or its subsidiaries, any acquisition of any GM Class H common stock or any combination of the foregoing, each of which we sometimes refer to as a competing transaction. In addition, GM and Hughes have agreed not to participate in discussions with or furnish information to any third party with respect to any competing transaction, subject to a fiduciary out exception described below. We sometimes refer to these agreements together as the non-solicitation covenant. General Motors and Hughes believe that it was necessary and appropriate to enter into the non-solicitation covenant and related provisions in order to reach agreement with EchoStar on the terms of the transactions, particularly in light of the thorough process in which GM and Hughes had engaged of exploring and negotiating alternative transactions involving Hughes prior to entering into the transaction agreements.

The fiduciary out exception to the non-solicitation covenant applies until the receipt of the requisite GM common stockholder approval of the proposals relating to the transactions, which may occur a significant period of time before the transactions would be completed. Pursuant to this exception, GM and Hughes may, subject to certain conditions, participate in discussions with and furnish information to a third party (but not solicit proposals) with respect to a competing transaction. One of the conditions for such actions is that GM shall have received a bona fide, written proposal by the third party for a competing transaction that is on terms that the GM board of directors determines in good faith, after consultation with its financial advisors and counsel, would, if completed, result in a transaction that would be more favorable to GM and its stockholders than the transactions, taking into account such factors as the GM board in good faith deems to be relevant, including the identity of the third party and all legal, financial, regulatory and other aspects of the proposal, such as the terms of any financing and the likelihood that the transaction will be completed, and the GM board of directors, after consultation with counsel, determines in good faith that it is required to do so in order to comply with its fiduciary duties. We sometimes refer to a proposal described in the preceding sentence as a superior proposal. For a more complete description of the non-solicitation covenant, see [Description of Principal Transaction Agreements Implementation Agreement Covenants of GM, Hughes and EchoStar No Solicitation of Competing Transactions Involving Hughes](#).

Hughes has the right to terminate the Hughes/EchoStar merger agreement if GM proposes to enter into an agreement or arrangement with respect to a competing transaction, but only if GM is not in breach of certain provisions of the non-solicitation covenant and only if Hughes concurrently pays a termination fee of \$600 million to EchoStar. GM common stockholders should understand that, if they vote to approve the proposals recommended by the GM board of directors, that action will result in the termination of the fiduciary out, which would mean that GM would have no practical ability to enter into any agreement or arrangement with respect to a competing transaction without breaching the non-solicitation covenant. However, if GM common stockholders fail to approve the proposals recommended by the GM board of directors, the transactions could not be completed and GM common stockholders would not have the opportunity to participate in the benefits of the transactions as described in this document and, under certain circumstances in which GM or Hughes enters into or completes a competing transaction, EchoStar would be entitled to a \$600 million termination fee. Further, you should understand that, in either case, there can be no assurance that any proposal for a competing transaction would be available to Hughes and GM or, if available, would result in any agreement or arrangement for a competing transaction. Accordingly, for all of the reasons described elsewhere in this document, the GM board recommends that GM common stockholders vote to approve each of the proposals described in this document.

GM Share Dispositions

Between now and the date that is six months after the completion of the Hughes/ EchoStar merger, GM has the right under the transaction documents to issue new shares of GM Class H common stock and/or shares of New EchoStar Class C common stock that it holds after the Hughes/ EchoStar merger, as the case may be, by exchanging such shares for the satisfaction of outstanding GM liabilities held by certain of GM's creditors, in debt-for-equity exchanges. To the extent that GM does not transfer all of such shares in these debt-for-equity exchanges, GM may also sell such shares for cash during the six months following the completion of the Hughes/ EchoStar merger. We sometimes refer to these transactions as GM share dispositions. The GM share dispositions would provide additional liquidity to General Motors and, if structured as debt-for-equity exchanges, would provide GM the benefit of debt reduction which will help to support its credit position after the completion of the transactions.

Any GM share dispositions completed prior to the Hughes split-off would be completed by GM issuing new shares of GM Class H common stock. Any such GM share dispositions before the Hughes split-off would have the effect of reducing GM's retained economic interest in Hughes and increasing the number of outstanding shares of GM Class H common stock by the amount of shares issued in the transaction. After the Hughes split-off, any GM share dispositions would be completed by GM selling or distributing a portion of any shares of New EchoStar Class C common stock that GM holds after the completion of the Hughes/ EchoStar merger. Any GM share dispositions after the Hughes split-off would have the effect of reducing GM's ownership interest in New EchoStar by the amount of shares distributed in the transaction. GM has agreed with EchoStar that it will in no event issue, sell or distribute more than an aggregate of 100 million shares of GM Class H common stock or New EchoStar Class C common stock, as the case may be, pursuant to GM share dispositions during the specified period. In addition, you should understand that the number of shares of New EchoStar Class C common stock that will be available for use in GM share dispositions after the completion of the Hughes/EchoStar merger will depend upon, among other things, the value of GM's remaining retained economic interest in Hughes after the Hughes recapitalization, as described further at Liquidity and Value to be Provided to GM.

Based upon the average market price of GM Class H common stock during the five trading days preceding _____, 2002, of \$ per share and assuming General Motors had exchanged _____ million shares on that date in exchange for outstanding GM liabilities, General Motors would have reduced its outstanding debt by a total of about \$ _____ million. You should understand that the amount by which GM will be able to reduce its outstanding debt will depend upon the price of a share of GM Class H common stock or New EchoStar Class C common stock on the date or dates that the GM share dispositions are completed, which may be different than \$ _____. You should also understand that this estimate of GM's debt reduction does not take into account any transaction expenses which General Motors would have to bear in connection with GM share dispositions. GM is not obligated to engage in any GM share dispositions and, therefore, may

not transfer the maximum 100 million shares in GM share dispositions. In addition, the aggregate number of shares which may be issued, distributed or sold by GM in GM share dispositions is subject to reduction under certain circumstances.

If and to the extent necessary in order to satisfy the equity headroom condition, the aggregate number of shares that GM may distribute pursuant to GM share dispositions after the Hughes split-off will be mandatorily reduced to as low as 60 million shares pursuant to the terms of the GM/ Hughes separation agreement. For more information, see Description of Principal Transaction Agreements GM/ Hughes Separation Agreement The Hughes Recapitalization.

GM, Hughes, HEC Holdings and EchoStar have agreed to cooperate with each other in connection with the execution of any GM share dispositions. In addition, the parties have agreed that certain securities issuances by EchoStar would have priority over GM share dispositions during the period beginning upon the receipt of the requisite GM common stockholder approval and concluding immediately prior to the Hughes/ EchoStar merger. During the EchoStar priority period, GM will not commence or effect any GM share dispositions if EchoStar provides GM with a lockout notice in which EchoStar informs GM that it has a good faith intention to make an underwritten offering of shares of its Class A common stock. Any lockout period applicable to GM in connection with an EchoStar offering will not last longer than 90 days and will not extend for more than 60 days past the date of completion of the Hughes/ EchoStar merger.

During the period beginning with the date of completion of the Hughes/ EchoStar merger and concluding on the earlier of the six-month anniversary of the Hughes/ EchoStar merger and the date on which the maximum permitted number of shares will have been transferred, the parties have agreed that any GM share dispositions will have priority over securities issuances by New EchoStar. During this GM priority period, if GM provides New EchoStar with a lockout notice, New EchoStar will not commence or effect any offering of its Class A common stock or Class C common stock or any securities convertible into or exchangeable therefor. Any lockout period applicable to New EchoStar in connection with any GM share dispositions during the GM priority period will not last longer than 90 days. However, New EchoStar may, under certain circumstances, prevent GM from participating in any GM share dispositions during the GM priority period for up to 30 days in the aggregate.

GM has agreed to consult with EchoStar regarding the material terms of any GM share dispositions, other than pricing, during the pre-merger EchoStar priority period described above. EchoStar has the right to object to any of such terms that it reasonably determines is either inconsistent with the IRS ruling or would otherwise be reasonably likely to materially impair or delay the completion of the Hughes/ EchoStar merger or any of the GM/ Hughes separation transactions, in which case the applicable terms would not be included in the GM share disposition. All expenses of any GM share dispositions will be borne by GM.

For more information regarding the terms of the GM share dispositions, see Description of Principal Transaction Agreements Implementation Agreement GM Share Dispositions below.

Hughes Business and Dividend Financings

Hughes has completed certain financings, and expects to engage in additional financings and related activities, intended to enable it to pay the Hughes dividend distribution of up to \$4.2 billion to General Motors and to fund its business during the period prior to the completion of the Hughes split-off.

To this end, Hughes exercised a contractual right to request PanAmSat to refinance a \$1.725 billion loan from Hughes to PanAmSat. In February 2002, PanAmSat repaid this loan using cash on hand at PanAmSat, proceeds from PanAmSat's issuance of \$800 million of PanAmSat Senior Notes and \$1.0 billion of borrowings under new credit facilities provided to PanAmSat by third party lenders. Hughes deposited \$1.5 billion of the proceeds of the PanAmSat loan repayment into a segregated cash collateral account with GMAC. GMAC has committed to lend to Hughes up to \$1.5 billion, secured by the funds deposited into the cash collateral account with GMAC, and about \$500 million secured by certain other assets of Hughes. Hughes has borrowed an aggregate of about \$1.875 billion under these GMAC facilities and used the proceeds to repay borrowings under certain of Hughes' other credit facilities. Hughes retired certain of the credit facilities that were repaid. Hughes existing \$750 million revolving credit facility was repaid and was amended and increased to \$1.235 billion. In addition, Hughes entered into a new term loan facility of \$765 million in March 2002.

Certain of Hughes' borrowings, including the GMAC facilities, the revolving credit facility and the term loan facility described above, are required to be repaid on the earlier of the completion of the Hughes split-off and December 2002. If the Hughes/EchoStar merger is not completed prior to December 2002, Hughes would likely seek to refinance or obtain an extension of the maturity dates of those facilities. See Risk Factors Risk Factors Relating to the Transactions Risks Relating to Hughes and EchoStar Some Credit Facilities of Hughes Mature Prior to the Termination Date of the Hughes/EchoStar Merger Agreement and Hughes May Have Difficulty Refinancing That Debt. If any failure to complete the Hughes/EchoStar merger results in the payment of a termination fee from EchoStar and/or a sale of PanAmSat to EchoStar, it is currently expected that Hughes would utilize the cash proceeds received to repay certain outstanding debt obligations of Hughes and to fund Hughes' business.

Prior to the completion of the Hughes split-off, Hughes also plans to obtain additional financing of up to \$2.7 billion pursuant to a committed bank credit facility, public or private debt offerings or a combination thereof. On the day of the completion of the Hughes split-off, Hughes and GMAC will offset against each other the \$1.5 billion segregated cash collateral account and the \$1.5 billion loan owed to GMAC. GMAC will immediately thereafter renew its \$1.5 billion loan to Hughes. Hughes will then pay the dividend to GM of up to \$4.2 billion, with the funds coming from the credit facilities and financing arrangements described above.

Hughes/EchoStar Merger Financings

The completion of the proposed Hughes/ EchoStar merger and related transactions will require about \$7.025 billion of cash, of which:

up to \$2.7 billion will be required to refinance the indebtedness to be incurred by Hughes described above at Hughes Business and Dividend Financings in order to pay a portion of the \$4.2 billion Hughes dividend distribution to GM in connection with the Hughes recapitalization;

up to about \$4.125 billion will be required to repay other obligations of Hughes (including the \$1.5 billion loan and other borrowings under the GMAC credit facilities described above at Hughes Business and Dividend Financings) and to fund the operations of New EchoStar after the completion of the transactions; and

the remainder of about \$0.2 billion will be required to pay estimated fees and expenses in connection with the transactions.

At the time of the signing of the Hughes/ EchoStar merger agreement, EchoStar had about \$1.5 billion of available cash on hand and, accordingly, EchoStar and Hughes obtained \$5.525 billion in bridge financing commitments for the Hughes/ EchoStar merger and related transactions.

Since the signing of the Hughes/EchoStar merger agreement, EchoStar has raised a total of about \$2.2 billion of additional cash through the sale of \$700 million of aggregate principal amount 9 1/8% Senior Notes due 2009 issued by EchoStar's wholly owned indirect subsidiary, EchoStar DBS Corporation, on December 20, 2001, which we sometimes refer to as the EchoStar DBS Senior Notes, and the \$1.5 billion investment by Vivendi Universal in EchoStar Series D convertible preferred stock, increasing its cash on hand available to satisfy the financing required to complete the Hughes/ EchoStar merger to at least \$3.7 billion. For more information, see Certain Completed EchoStar Financings. The bridge financing commitments have been reduced by the total amount of these financings (to \$3.325 billion). Any other financings that EchoStar or, under certain circumstances, Hughes completes prior to the closing of the Hughes/ EchoStar merger will further reduce the bridge financing commitments on a dollar-for-dollar basis.

The remaining \$3.325 billion of cash required in connection with the Hughes/EchoStar merger, which we refer to as the Hughes/ EchoStar merger financing, is expected to come from new cash to be raised by EchoStar, Hughes or a subsidiary of Hughes on or prior to the completion of the Hughes/EchoStar merger through public or private debt or equity offerings, bank debt or a combination thereof.

To the extent that such cash is not raised in these ways, the bridge financing commitments are designed to fund the amount of the shortfall. Under the bridge financing commitments, a number of major banks are committed to lend up to \$3.325 billion, which is the amount necessary for the remainder of the Hughes/ EchoStar merger financing. Before the banks are obligated to lend this amount, however, Hughes, EchoStar and the banks must negotiate and finalize loan documents that would govern the loans.

The banks currently are bound by a commitment letter. Whether or not final loan documents are entered into, the banks can terminate their commitment if:

There has been a material and adverse change, as determined by the banks, to the structure, terms or conditions of the transactions described in this document.

There has been any development, change or pending or threatened litigation or other proceeding that is reasonably likely to have a material and adverse effect, as determined by the banks, on the business, operations, assets, liabilities or financial condition of the borrowers.

In the 16-day period before the completion of the Hughes/ EchoStar merger, there has been, as determined by the banks, any change or disruption that is material to the financial, banking or capital markets generally and that has had a material and adverse effect on the ability to market the financing to other prospective lending banks.

The proposed capital structures of the borrowers are not satisfactory to the banks.

If any of Hughes' material agreements or contracts would be terminated, altered or modified in a manner that would have a material and adverse effect on Hughes and its subsidiaries, or would require the payment of a material fee if terminated under certain circumstances, when the transactions described in this document are completed.

Final documents for the loans are not entered into by January 28, 2003.

In addition, the commitment letter contains other conditions typical of a commitment of this type, including requirements that Hughes and EchoStar cooperate with the banks' marketing efforts to bring in other banks, that all agreements and representations have been complied with, and other similar conditions. As of the date of this document, we do not believe that any events have occurred that would allow any of the committed banks to terminate their commitments.

Hughes previously had the right to terminate the Hughes/ EchoStar merger agreement if the agreement or agreements documenting the remainder of the Hughes/ EchoStar merger financing had not been entered into, or the definitive terms of such agreement or agreements had not been agreed, by April 26, 2002. Hughes, EchoStar and GM agreed in April, however, to extend this date to June 25, 2002, and have agreed to further extend the June 25, 2002 date to a date not less than 45 calendar days after the filing of amendment No. 4 to the registration statement of which this document is a part.

In addition, pursuant to the Hughes/ EchoStar merger agreement, EchoStar agreed to do one of the following by May 26, 2002:

Use commercially reasonable efforts to cause certain of its indentures to be amended to provide that the completion of the Hughes/ EchoStar merger will not constitute a change in control under the relevant indentures, including the offering by EchoStar of a reasonable and customary consent fee or interest payment modification;

Obtain additional committed financing in an amount sufficient to refinance all indebtedness outstanding under those indentures to which an amendment to the relevant change in control provision was not obtained; or

Present Hughes with a plan under which, after completion of the Hughes/ EchoStar merger, New EchoStar will not be in breach of its obligations under, and will be able to comply with its obligations under the terms of, the relevant indentures. If Hughes rejects the plan after considering the plan in good faith, EchoStar will be required to promptly (and in any event within 20 business days after such rejection) adopt one of the other two options discussed above.

GM, Hughes and EchoStar agreed, however, to extend the May 26, 2002 deadline to October 4, 2002. If the cost to obtain all of the requisite consents from holders of the relevant obligations could not be fully funded from EchoStar's cash on hand, it is probable that EchoStar would have to agree to unfavorable amendments to the terms of those obligations—for example, to the applicable interest or redemption provisions—as a further inducement to holders of one or more of the relevant obligations to provide their consents.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

The amount of the Hughes/EchoStar merger financing that may be raised by EchoStar prior to the Hughes/ EchoStar merger is severely restricted by the terms of various transaction agreements among GM, Hughes and EchoStar and the terms of the bridge financing commitments.

We currently expect that a portion of the proceeds of the Hughes/ EchoStar merger financing will be used to refinance up to \$2.7 billion of indebtedness expected to be incurred by Hughes to pay a portion of the up to \$4.2 billion Hughes dividend distribution to GM in connection with the Hughes recapitalization. The remainder of the Hughes/ EchoStar merger financing, together with about \$3.7 billion or more from EchoStar's available cash on hand, will be used to pay off other obligations of Hughes (including the \$1.5 billion loan and other borrowings under the GMAC credit facilities described above at Hughes Business and Dividend Financings), to pay the estimated fees and expenses in connection with the transactions and to fund the operations of New EchoStar after the completion of the Hughes/ EchoStar merger. The availability of the Hughes/ EchoStar merger financing is a condition to the obligations of the companies to complete the Hughes/ EchoStar merger.

The table below summarizes the information above relating to the sources and uses of the \$7.025 billion of financing required for the completion of the Hughes/ EchoStar merger.

Financing Required to Complete the Hughes/EchoStar Merger

Sources:

at least \$3.7 billion of cash on hand at EchoStar which consists of:

\$1.5 billion of cash on hand at EchoStar at the time of signing of the Hughes/ EchoStar merger agreement;

\$0.7 billion raised by EchoStar through sale of EchoStar DBS Senior Notes; and

\$1.5 billion raised by EchoStar through investment by Vivendi Universal in EchoStar Series D convertible preferred stock; and

\$3.325 billion of cash, which is expected to come from new cash to be raised by EchoStar, Hughes or a subsidiary of Hughes on or prior to the completion of the Hughes/ EchoStar merger through public or private debt or equity offerings, bank debt or a combination thereof; and

to the extent that such cash is not raised in these ways, the bridge financing commitments are designed to fund the amount of the shortfall.

Total Sources: \$7.025 billion

Uses:

up to \$2.7 billion to refinance the indebtedness to be incurred by Hughes in order to pay a portion of the up to \$4.2 billion Hughes dividend distribution to GM in connection with the Hughes recapitalization;

up to about \$4.125 billion to repay other obligations of Hughes (including the \$1.5 billion loan and other borrowings under the GMAC credit facilities described above at Hughes Business and Dividend Financing) and to fund the operations of New EchoStar after the completion of the Hughes/ EchoStar merger; and

the remainder of about \$0.2 billion in estimated fees and expenses in connection with the transactions.

Total Uses: \$7.025 billion

In addition, you should understand that of the about \$200 million of estimated fees and expenses that Hughes and EchoStar are expected to incur in connection with the transactions, up to about \$120 million is expected to constitute fees of investment advisors (not including expenses) and the payment of up to about \$70 million of these fees to investment advisors is contingent upon the completion of the Hughes/ EchoStar merger. See GM Background and Considerations Fairness Opinions of Hughes Financial Advisors Credit Suisse First Boston Fairness Opinion,

Goldman Sachs Fairness Opinion and EchoStar Background and Considerations Opinion of EchoStar's Financial Advisor. The \$200 million of estimated fees and expenses does not include up to about \$100 million of fees and expenses already incurred, primarily related to the Vivendi Universal investment transaction and the bridge commitment fees, which are reflected in EchoStar's historical financial statements.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Certain Completed EchoStar Financings. On December 20, 2001, EchoStar's wholly owned indirect subsidiary, EchoStar DBS Corporation, issued \$700 million aggregate principal amount of EchoStar DBS Senior Notes, which will provide funding for EchoStar and, after the Hughes/ EchoStar merger, for New EchoStar. If the Hughes/ EchoStar merger is not completed under certain circumstances, a portion of the proceeds from the EchoStar DBS Senior Notes may be used for EchoStar's purchase of the approximately 81% interest held by Hughes' subsidiaries in PanAmSat.

On January 22, 2002, Vivendi Universal made a \$1.5 billion equity investment in EchoStar, which will provide funding for EchoStar and, after the Hughes/ EchoStar merger, for New EchoStar. In addition, EchoStar and Vivendi Universal entered into an eight-year strategic alliance in which Vivendi Universal will develop and provide EchoStar's DISH Network customers, and customers of New EchoStar after completion of the Hughes/ EchoStar merger, with a variety of programming and interactive television services. In exchange for this equity investment, EchoStar issued to a subsidiary of Vivendi Universal 5,760,479 shares of EchoStar Series D convertible preferred stock. Each share of EchoStar Series D convertible preferred stock is convertible into 10 shares of EchoStar Class A common stock and has the same economic rights (other than liquidation rights) and voting rights as shares of EchoStar Class A common stock. The shares of EchoStar Series D convertible preferred stock, which are convertible into an aggregate of 57,604,790 shares of EchoStar Class A common stock, will convert into shares of EchoStar Class A common stock:

at the option of the holder at any time and from time to time; and

unless previously converted, automatically:

immediately prior to the effectiveness of Hughes/EchoStar merger:

on the first date on which the sum of (x) the number of shares of EchoStar Class A common stock into which the shares of Series D convertible preferred stock then held by Vivendi Universal are convertible on such date and (y) the number of shares of EchoStar Class A common stock then held by Vivendi Universal and which Vivendi Universal received upon prior conversion of EchoStar Series D convertible preferred stock, is less than 29,378,443 (as such number may be adjusted from time to time as necessary to reflect appropriately any stock splits, subdivisions, combinations and similar changes to EchoStar's capital stock);

upon any purported sale, assignment, transfer or disposition of a share of EchoStar Series D convertible preferred stock or the beneficial ownership thereof to any person other than Vivendi Universal or any wholly owned subsidiary of Vivendi Universal; or

on January 22, 2007.

In addition, in connection with its investment in EchoStar, Vivendi Universal received certain contingent value rights that are intended to provide protection against any downward movements in the price of the EchoStar Class A common stock to be issued upon conversion of the EchoStar Series D convertible preferred stock. Vivendi Universal received 57,604,790 contingent value rights, which is the number of shares of EchoStar Class A common stock to be issued to Vivendi Universal upon conversion of the EchoStar Series D convertible preferred stock. If, on any of the settlement dates specified below, the volume weighted average price of EchoStar Class A common stock or New EchoStar Class A common stock during a 20-trading day period preceding the specified settlement dates is below the reference price of \$26.0395 at which the contingent value rights were originally issued (as such price may be adjusted from time to time, including to reflect the Hughes/EchoStar merger), which we refer to as the reference price, and unless the contingent value rights were earlier terminated as described below, a payment obligation is triggered for each outstanding contingent value right at that time equal to the difference between the volume weighted average price and the reference price.

The maximum payment under the contingent value rights is \$225 million if the Hughes/ EchoStar merger is completed, or \$525 million if the Hughes/ EchoStar merger is not completed. In general, any amount owing under these contingent value rights would be settled by New EchoStar three years after the completion of the Hughes/ EchoStar merger except under certain limited circumstances, including if at any time during the

30-month period beginning on the date that is six months after the date of the completion of the Hughes/EchoStar merger and ending three years after the completion of the Hughes/EchoStar merger the volume weighted-average price of the New EchoStar Class A common stock exceeds 120% of the reference price on each trading day for 90 consecutive calendar days, in which case the contingent value rights will automatically terminate. In addition, if the Hughes/ EchoStar merger is not completed, these contingent value rights will be settled by EchoStar 30 months after the completion of the PanAmSat stock sale or the termination of each of the PanAmSat stock purchase agreement and the Hughes/ EchoStar merger agreement except under certain limited circumstances, including if at any time during these 30 months the volume weighted-average price of the EchoStar Class A common stock exceeds 120% of the reference price on each trading day for 90 consecutive calendar days, in which case the contingent value rights will automatically terminate. Although the contingent value rights were issued to Vivendi Universal by EchoStar, New EchoStar will be responsible for this obligation after the completion of the Hughes/ EchoStar merger. Any settlement of these contingent value rights would be paid in cash or common stock at the option of EchoStar or New EchoStar, as the case may be, but if the Hughes/ EchoStar merger has been completed then these contingent value rights could be settled in common stock of New EchoStar only if certain tax-related conditions are satisfied.

For a more complete description of the EchoStar Series D convertible preferred stock, see [EchoStar Capital Stock](#) [EchoStar Preferred Stock](#) [EchoStar Series D Convertible Preferred Stock](#). EchoStar filed copies of or the forms of certain of the definitive agreements relating to the Vivendi Universal investment with the SEC on a Current Report on Form 8-K on December 21, 2001. For more information about how you can obtain copies of these agreements, see [Where You Can Find More Information](#) below.

Liquidity and Funding Needs of New EchoStar

As discussed above at [Hughes/ EchoStar Merger Financings](#), the completion of the proposed Hughes/ EchoStar merger and related transactions (including the up to \$4.2 billion Hughes dividend distribution to GM) will require about \$7.025 billion of cash, of which \$3.325 billion of cash remains to be raised. This remaining \$3.325 billion of cash is expected to be financed by debt or equity offerings by EchoStar, Hughes or a subsidiary of Hughes on or prior to the completion of the Hughes/ EchoStar merger. New EchoStar or its subsidiaries, as applicable, will assume any new indebtedness incurred at EchoStar, Hughes and/or their respective subsidiaries. New EchoStar will also inherit the existing substantial indebtedness of EchoStar and its subsidiaries upon the completion of the Hughes/ EchoStar merger.

Substantially all of the \$7.025 billion of Hughes/ EchoStar merger financing is expected to be expended in connection with the completion of the Hughes/ EchoStar merger. As discussed at [Risk Factors](#) [Risk Factors Relating to New EchoStar After the Transactions](#) [Risks Relating to Liquidity and Financing Activities of New EchoStar](#) [New EchoStar Will Have Substantial Indebtedness, Is Currently Expected to Require Substantial Additional Indebtedness and Will Depend Upon Its Subsidiaries](#) [Earnings To Make Payments on Its Indebtedness](#), New EchoStar is currently expected to require substantial additional financing following the completion of the Hughes/ EchoStar merger to fund capital expenditures and costs and expenses in connection with funding its operations, domestic and international investments and its growth strategy and the repayment of indebtedness, particularly in light of the significant cash requirements of certain parts of the Hughes business.

Among the capital expenditures that New EchoStar currently plans to undertake following the completion of the Hughes/ EchoStar merger is the deployment of a new satellite that would enable New EchoStar to deliver local broadcast television in all 210 designated market areas in the United States. In the past, Hughes and EchoStar have typically been able to construct, launch and insure their satellites for a cost in the range of about \$175 million to about \$350 million.

In addition, New EchoStar is also expected to incur substantial expenses in connection with the integration of the businesses of Hughes and EchoStar, including up to \$2.5 billion over a two- to four-year period following the completion of the Hughes/ EchoStar merger to standardize and update the set top box equipment used by customers to receive New EchoStar's direct broadcast satellite signals. See [Risk Factors](#) [Risk Factors Relating to the Transactions](#) [Risks Relating to New EchoStar](#)

New EchoStar is Expected to Incur Significant Expenses Related to the Integration of Hughes and EchoStar.

It is also expected that New EchoStar will become obligated to pay significant retention bonuses, severance benefits and pension enhancements to certain employees of Hughes as a result of the Hughes/ EchoStar merger. The retention bonus payments are expected to be up to about \$110 million, while the amount of severance benefits to be paid to executives of Hughes with change-in-control agreements could be up to \$41 million, depending on decisions to layoff such executives, if any. Additional amounts to be paid for severance benefits and pension enhancements will depend upon, among other things, the number of Hughes employees that are terminated as a result of the Hughes/ EchoStar merger, and could be material.

Finally, certain of the indentures governing EchoStar's debt and convertible debt instruments contain change in control provisions which, as a result of the Hughes/EchoStar merger, would require New EchoStar to make an offer to re-purchase those obligations at 101% of the principal amount thereof, together with accrued but unpaid interest on the obligations. While there can be no assurance, EchoStar currently believes that it can obtain the consent of the holders of those obligations in order to avoid implementation of the change in control offer. A successful consent solicitation could require EchoStar to make cash payments to the holders and/or to make amendments to certain terms of the relevant indentures for the benefit of the holders, potentially including terms relating to the maturity of the obligations, the interest payable on the obligations, or to provide other similar inducements to the holders. The amounts and significance of those payments or inducements would depend in large part upon the prices at which EchoStar's debt and convertible debt instruments are trading at the time of the solicitations. These trading prices depend on investors' continuing assessment of the prospects for EchoStar and New EchoStar and the credit rating on those instruments, and upon prevailing interest rates and other broad factors which impact the markets or the industry segments in which EchoStar operates.

EchoStar has not yet determined whether or when to undertake those solicitations or whether to pursue a different resolution. Depending on the controlling instrument, the consent of the holders of either a majority or 66 2/3% in principal amount of those obligations is required in order to avoid a change in control offer. If EchoStar were required to conduct these solicitations on or about the date of this document, EchoStar believes that the cost to obtain all of the requisite consents would be substantial. If such consent payments could not be fully funded from EchoStar's cash on hand, it is probable that EchoStar would have to agree to unfavorable amendments to the terms of those obligations—for example, to the applicable interest or redemption provisions—as a further inducement to holders of one of more of the relevant obligations to provide their consents. Any such amendments could also have an adverse affect on EchoStar's or New EchoStar's financial position.

Based on the above as well as other factors, we currently anticipate that New EchoStar will experience net losses through 2003, and could continue to experience net losses for years subsequent to 2003 for the reasons discussed elsewhere in this document. See Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to the Business of New EchoStar We Expect That New EchoStar Will Experience Net Losses Through At Least 2003 and We Cannot Be Certain That New EchoStar Will Achieve or Sustain Profitability.

As discussed at Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar New EchoStar Will Have Substantial Indebtedness, Is Currently Expected to Require Substantial Additional Indebtedness and Will Depend Upon Its Subsidiaries' Earnings To Make Payments on Its Indebtedness, New EchoStar will depend upon the earnings of its subsidiaries and the payment of funds by its subsidiaries to it (or a subsidiary obligor) in the form of loans, dividends or other payments in order to service its or such subsidiary's debt obligations, and we cannot assure you that these subsidiaries will be able to make such payments to New EchoStar or any such subsidiary in an amount sufficient to pay the principal of or interest on the indebtedness owed by New EchoStar or any such subsidiary, including the Hughes/ EchoStar merger financing. In addition, the terms of New EchoStar's and its subsidiaries indebtedness, including the terms of the indebtedness incurred in connection with the Hughes/ EchoStar merger financing, will contain restrictions and covenants that limit the operational and financial

flexibility of New EchoStar and its subsidiaries, likely including severe limitations on the ability of New EchoStar's subsidiaries to pay dividends and make other distributions to New EchoStar or the relevant subsidiary obligor. See Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar New EchoStar's Indebtedness May Contain Terms That Could Limit the Operational and Financial Flexibility of New EchoStar. These restrictions on the ability of New EchoStar's subsidiaries to make payments and other distributions to New EchoStar or the relevant subsidiary obligor will make it more difficult for New EchoStar to satisfy its expected significant funding needs, including the significant cash requirements of certain parts of the Hughes business.

In addition, under the agreements among EchoStar, Hughes, HEC Holdings and GM, New EchoStar's ability to issue any additional equity or equity-linked securities for two years following the completion of the Hughes/ EchoStar merger will be severely restricted, absent possible favorable IRS rulings. See Description of Principal Transaction Agreements Implementation Agreement Preservation of the Tax-Free Status of the Hughes Split-Off and Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar New EchoStar Will be Subject to Significant Restrictions with Respect to Issuances of its Equity Securities for Two Years Following the Hughes/ EchoStar Merger.

The extent to which New EchoStar would raise additional funds and the timing of financing activities following the completion of the Hughes/ EchoStar merger would depend, among other things, upon New EchoStar's cash on hand and operating needs following the completion of the Hughes/ EchoStar merger, its strategic plans related to subscriber acquisition, satellite construction and launch and the realization of the expected merger synergies. In this regard, New EchoStar's strategic plans would also be influenced by the attractiveness and availability of financing and other general economic conditions affecting the business of New EchoStar at the time such strategic investment decisions are contemplated.

New EchoStar's additional funding requirements following the completion of the Hughes/ EchoStar merger are expected to vary based on the factors described above, but in any event are expected to be significant. To the extent that New EchoStar does not have sufficient income or other sources of cash to fund its operating needs following the completion of the merger, it will be necessary for New EchoStar to either reduce its operating costs, sell assets or, given that New EchoStar will be severely restricted in its ability to raise equity capital for two years following completion of the Hughes/ EchoStar merger, incur additional indebtedness to finance its activities. As discussed at Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar New EchoStar Will Have Substantial Indebtedness, Is Currently Expected to Require Substantial Additional Indebtedness and Will Depend Upon its Subsidiaries Earnings to Make Payments on Its Indebtedness, there can be no assurance that additional debt financing will be available to New EchoStar on acceptable terms or at all. Although we cannot assure you that there will be sufficient funding for New EchoStar's operating needs after the completion of the Hughes/ EchoStar merger for the reasons discussed at Risk Factors Risk Factors Relating to New EchoStar After the Transactions Risks Relating to Liquidity and Financing Activities of New EchoStar We Cannot Assure You That There Will Be Sufficient Funding for New EchoStar, we currently believe that New EchoStar will be able to fund its operating activities from operating income and through a combination of one or more of cash on hand, asset sales, debt financing and, if favorable IRS rulings are received, equity financing.

PanAmSat Stock Sale

GM, Hughes, and EchoStar have agreed that, in the event that the Hughes/ EchoStar merger does not occur due to the failure by EchoStar to satisfy certain financing requirements for the Hughes/ EchoStar merger or due to the fact that certain regulatory-related conditions have not been satisfied, EchoStar will be required, subject to the terms and conditions contained in the PanAmSat stock purchase agreement, to purchase the approximately 81% interest in PanAmSat held by certain subsidiaries of Hughes at a purchase price of \$22.47 per share. This purchase price was determined by valuing Hughes' indirect interest in PanAmSat on the basis of a 5% premium over the average market price of PanAmSat stock over a specified period preceding the time that GM, Hughes and EchoStar agreed to the PanAmSat stock sale. The

PanAmSat stock sale is intended to provide Hughes with near-term liquidity if the Hughes/ EchoStar merger does not occur under certain circumstances. GM and Hughes currently expect that the proceeds of any PanAmSat stock sale would be used to repay outstanding debt obligations of Hughes and to fund Hughes' operations under circumstances in which the Hughes/ EchoStar merger was not completed.

EchoStar has the option to structure its purchase of Hughes' subsidiaries interest as a merger or tender offer so that it can attempt to acquire 100% of PanAmSat in one transaction, in which case Hughes must receive at least the same amount of consideration that it would have received in the PanAmSat stock sale. EchoStar has agreed that, unless it has previously entered into an agreement for the acquisition of PanAmSat by merger or commenced a tender offer for all of the outstanding PanAmSat shares, it will commence an exchange offer promptly following the completion of the PanAmSat stock sale for all PanAmSat shares that remain outstanding following the completion of the PanAmSat stock sale for a purchase price of at least \$22.47 per share payable, at the option of the holder, either in cash or shares of EchoStar Class A common stock. If the Hughes/EchoStar merger does occur, New EchoStar will indirectly hold the approximately 81% interest in PanAmSat.

Based on the purchase price of \$22.47 per share, the proceeds of the PanAmSat stock sale would be about \$2.7 billion. This purchase price would be payable either:

100% in cash, if a private party brings suit under antitrust laws or FCC regulations and obtains a final and non-appealable permanent injunction or other order preventing the Hughes/ EchoStar merger;

up to \$600 million in shares of EchoStar common stock (with EchoStar having the option to determine the exact amount of shares to be issued up to that amount) and the remainder in cash, if Hughes or EchoStar terminates the Hughes/ EchoStar merger agreement because a federal, state or local governmental authority brings suit under U.S. federal or state antitrust laws or FCC regulations and obtains a final and non-appealable permanent injunction or other order preventing the Hughes/ EchoStar merger or if Hughes terminates the Hughes/ EchoStar merger agreement because the waiting period applicable to the Hughes/ EchoStar merger under the Hart-Scott- Rodino Act does not expire or terminate by late December 2002 or because of a failure to obtain FCC approval by early January 2003 (in each case, subject to extension under certain circumstances); or

at least \$1.5 billion in cash, with EchoStar required to use commercially reasonable efforts to pay the remaining \$1.2 billion in cash and, if it is unable to do so, in a combination of notes and EchoStar common stock, if the Hughes/ EchoStar merger agreement is terminated because EchoStar fails to satisfy certain financing requirements for the Hughes/ EchoStar merger financing.

If EchoStar purchases all of the common stock of PanAmSat held by Hughes' subsidiaries, Hughes would remain a wholly owned subsidiary of General Motors, but would no longer have its indirect interest in PanAmSat, and GM Class H common stockholders would remain stockholders of GM. It is currently expected that the proceeds of a PanAmSat stock sale, about \$2.7 billion, would be used to repay certain outstanding debt obligations of Hughes and to fund Hughes' business.

The PanAmSat stock sale is subject to a number of conditions which must be satisfied before the transaction could be completed. These conditions include, among other things:

the expiration or termination of the waiting period applicable to the PanAmSat stock sale under the Hart-Scott-Rodino Act;

the absence of any effective injunction or order which prevents the completion of the PanAmSat stock sale;

the receipt of FCC approval for the transfer of licenses in connection with the PanAmSat stock sale; and

there will not have occurred and be continuing any material adverse effect with respect to PanAmSat, other than any material adverse effect that results from factors affecting the economy or financial markets as a whole or generally affecting the industries in which PanAmSat operates.

If these conditions were not fulfilled in accordance with the terms of the PanAmSat stock purchase agreement, EchoStar would not be obligated to complete the PanAmSat stock sale.

Subject to the satisfaction or waiver of all conditions in the PanAmSat stock purchase agreement, the parties have agreed that the completion of the PanAmSat stock sale would take place within 60 days of the termination of the Hughes/ EchoStar merger agreement for the specified reasons. For more information regarding the terms of the PanAmSat stock sale, see Description of Principal Transaction Agreements PanAmSat Stock Purchase Agreement below.

GM Background and Considerations

GM's Reasons for the Transactions

There are two principal purposes of the transactions from the perspective of General Motors and Hughes. First, the transactions are expected to better position Hughes to compete in the multi-channel video programming distribution market and, overall, in the telecommunications industry, and to provide Hughes with greater opportunities and financial resources to develop an expanded competitive business and an opportunity to achieve business synergies from its combination with EchoStar that will be beneficial to New EchoStar, its stockholders and its customers and employees. Second, the transactions are expected to provide significant value to GM and its common stockholders. The transactions offer a significant premium to GM and its common stockholders for their economic interests in Hughes, as described in greater detail elsewhere in this document. The transactions are also expected to provide significant liquidity to General Motors in respect of its current retained economic interest in Hughes.

Cable television companies currently account for about 80 percent of the multi-channel video programming distribution market. The telecommunications industry also has recently experienced a trend toward consolidation through transactions which in many cases seek to combine content assets with distribution assets and increase the size of the parties to the transaction in order to improve competitive position and drive economies of scale. This consolidation trend has been evidenced by a significant number of recent mergers and acquisitions, including America Online's merger with Time Warner in 2001, AT&T's acquisition of Tele-Communications, Inc. in 1999 and Media One in 2000, US West's acquisition of Continental Cablevision in 1996 and Qwest's subsequent acquisition of US West in 2000, and several other potential transactions, including the pending combination of the cable businesses of AT&T and Comcast. AOL Time Warner, AT&T and Comcast, the cable television industry leaders, are well-capitalized and have increasingly directed their marketing and advertising efforts directly against the businesses of Hughes and EchoStar. This industry consolidation and heightened competitive environment led to an increased focus by General Motors and Hughes on responding to the competitive challenges facing Hughes and its business and sparked the desire of both GM and Hughes to capitalize on the opportunities potentially available to Hughes in an environment of increasing industry consolidation.

The transactions are intended to enable Hughes to maintain a strong position in the increasingly competitive multi-channel video programming distribution market and to provide it with a significant opportunity to develop an expanded business and to enhance its position in a consolidating telecommunications industry. We believe that the combined businesses of Hughes and EchoStar will represent a strong competitor in the market which can achieve significant business synergies for the benefit of New EchoStar, its stockholders, its customers and employees. Based on analysis and discussions that have taken place since October of 2001 between Hughes and EchoStar concerning their transition plans, GM and Hughes management currently believe that New EchoStar could achieve as much as \$5 billion in annual EBITDA improvements by 2007.

GM and Hughes expect the potential synergies to come from a combination of cost savings and revenue growth opportunities. The principal elements of the expected cost savings include:

reductions in subscriber acquisition costs;

reduced customer turnover;

lower programming costs; and

elimination of duplicative overhead costs.

The principal elements of the expected revenue growth opportunities include:

greater availability of less expensive broadband services;

local programming in all 210 markets;

greater advertising and interactive services revenues; and

new high definition television and specialty programming and expanded video-on-demand and pay-per-view programming.

You should understand that these estimated potential synergies are forward-looking statements subject to the risks and uncertainties described at Disclosure Regarding Forward-Looking Statements. These estimates of synergies are based on numerous estimates, assumptions and judgments and are subject to significant uncertainties. We cannot assure you that any particular amount of synergies will be realized by New EchoStar in connection with the Hughes/ EchoStar merger. See also Risk Factors Risk Factors Relating to the Transactions Risks Relating to New EchoStar New EchoStar May Not Realize the Benefits Expected From the Hughes/ EchoStar Merger.

We further believe that the Hughes/ EchoStar merger will provide Hughes with the increased financial capacity to facilitate Hughes strategic plans and fund Hughes growth initiatives. The Hughes split-off will provide the GM Class H common stockholders the ability to benefit from the expected increase in value resulting from the Hughes/ EchoStar merger and will provide them a more conventional stock interest in New EchoStar in place of their current tracking stock interest in the business of Hughes.

Compounding the competitive situation facing Hughes was the impact that continued ownership of Hughes by General Motors was expected to have on GM's other businesses, including its core automotive and related businesses. Hughes projected significant financing requirements over the next few years to support its key growth initiatives, including the expansion of the DIRECTV subscriber base and the development of new services. The increase in the aggregate level of debt of GM and its consolidated subsidiaries that would be required in order to meet these financing requirements was expected to result in downward pressure on GM's credit ratings, which are an important element to GM's business success. General Motors, including its wholly owned subsidiary, GMAC, is the world's largest non-governmental borrower. General Motors sells its vehicles through a dealer network, and GMAC typically provides the financing for dealers to acquire their inventory. In turn, when dealers sell automotive vehicles to retail customers, those sales are often financed through GMAC. As a result of this business model, GMAC is continuously engaged in debt financings in the capital markets, and often has nearly \$100 billion in debt outstanding. Even a slight decline in GM's overall credit ratings could have a negative impact on GMAC's ability to borrow on a cost-effective basis. Second, net losses were projected for Hughes in order for it to sustain its investments aimed at increasing its subscriber levels. These projected net losses were expected to adversely impact reported earnings attributable to GM \$1 2/3 par value common stock and the related earnings per share.

From GM's perspective, the transactions present an opportunity to meet its own liquidity objectives over the near term and support its credit rating. As part of the transactions, GM will restructure its retained economic interest in Hughes in order to realize some of the value arising from GM's ownership of Hughes prior to the Hughes split-off by receiving cash instead of shares of HEC Holdings Class C common stock in connection with Hughes split-off. To accomplish this objective, prior to the Hughes split-off, GM will receive a dividend from Hughes of up to \$4.2 billion and its retained economic interest in Hughes will be reduced by an amount that reflects the dividend. For more information about the Hughes dividend distribution, see Description of the Transactions The GM/ Hughes Separation Transactions The Hughes Recapitalization and Description of Principal Transaction Agreements GM/ Hughes Separation Agreement The Hughes Recapitalization. In addition, in connection with the transactions, GM may have the ability to conduct GM share dispositions, as described in greater detail at Description of the Transactions GM Share Dispositions and Description of Principal Transaction Agreements Implementation Agreement GM Share Dispositions. Any GM share dispositions would provide GM liquidity in respect of a portion of its retained economic interest in Hughes or, after the Hughes/ EchoStar merger, a portion of its ownership interest in New EchoStar, if any. GM may retain any such ownership

interest in New EchoStar Class C common stock for up to five years following the completion of the Hughes split-off, which would permit GM to benefit from any increase in value resulting from the Hughes/ EchoStar merger or the operation of the New EchoStar business following the completion of the Hughes/ EchoStar merger. For more information regarding the factors that will affect whether GM will have any such ownership interest and, if so, the size of that ownership interest, see Description of the Transactions The GM/Hughes Separation Transactions The Hughes Recapitalization Reduction in GM's Retained Economic Interest in Hughes. GM's receipt of the Hughes dividend distribution, liquidity resulting from any GM share dispositions and any retention by General Motors of an ownership interest in New EchoStar after the transactions are currently expected to provide GM with significant liquidity and value, which would help to support its credit position after the completion of the Hughes split-off.

Further, in the context of increasing competition and consolidation by competitors of Hughes, General Motors has been required during the last several years to spend increasing amounts of board of directors, management and staff time and other resources to address the strategic challenges facing Hughes and its businesses. The GM/ Hughes separation transactions and the Hughes/ EchoStar merger will allow General Motors to allocate resources currently devoted to those matters to GM's core automotive and other businesses.

Alternatives to the Transactions

Before determining to proceed with the GM/ Hughes separation transactions and the Hughes/ EchoStar merger, General Motors and Hughes carefully considered several strategic alternatives involving Hughes. In considering these strategic alternatives, General Motors and Hughes focused on the effect of such alternatives on the holders of each class of GM common stock, the effect of such alternatives on both classes of GM's common stockholders, taken together, and the potential of such alternatives to maximize value for GM common stockholders, for the businesses of GM and Hughes and for their employees.

As a preliminary matter, General Motors determined that any strategic transaction involving Hughes could result in a level of corporate and stockholder tax so significant that it would make the transaction uneconomic unless it were accomplished on a tax-free basis. Accordingly, General Motors determined that any potential strategic transactions involving Hughes should be structured to be tax-free for U.S. federal income tax purposes to General Motors and its stockholders. GM has received a ruling from the IRS regarding the tax-free status of the Hughes split-off and the continued effectiveness of that ruling is a condition to the completion of the transactions. For more information, see Material U.S. Federal Income Tax Considerations Relating to the Transactions below.

In addition, General Motors considered the effects of a potential transaction if it were structured in a manner that would result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances in accordance with the provisions of the GM restated certificate of incorporation. GM considered the substantial dilution that would likely reduce the value of the GM \$1 2/3 par value common stock as well as the substantial change that would result in the form and nature of the investment of GM Class H common stockholders, who under such provisions would have their tracking stock investment in the Hughes business replaced with GM \$1 2/3 par value common stock representing a more conventional investment in all of GM's operations. General Motors believed that most GM Class H common stockholders had purchased their stock in order to make an investment based on the businesses of Hughes rather than an investment based on all of GM's businesses, and considered that the frustration of that investment objective that would be caused by a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock would likely result in substantial adverse trading activity that would exacerbate the anticipated adverse effect on the trading value of the stock to the detriment of both classes of investors. GM also determined that a potential transaction should not be structured in a manner that would result in the holders of GM Class H common stock receiving both Hughes stock (representing their proportionate economic interest in Hughes) and GM \$1 2/3 par value common stock (pursuant to the recapitalization provision) as this would have the effect of compensating GM Class H common stockholders twice for the exchange of their stock, to the detriment of GM \$1 2/3 par value common stockholders. Accordingly, and in light of the substantial benefits that the contemplated strategic transactions would be expected to have for the holders of both classes of GM common stock, General Motors determined

that it would be in the best interests of all of GM's common stockholders to structure the contemplated strategic transactions involving Hughes so as not to result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock. Accordingly, the proposed amendment of the GM restated certificate of incorporation will, among other things, expressly provide that the transactions will not result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock. For more information, see Description of the Transactions The GM/Hughes Separation Transactions Hughes Split-Off No 120% Recapitalization of GM Class H Common Stock into GM \$1 2/3 Par Value Common Stock and Description of the Transactions The GM/Hughes Separation Transactions Amendments to the GM Restated Certificate of Incorporation.

General Motors and Hughes determined that, in order to address the strategic challenges facing Hughes and its businesses, to facilitate its planned strategic growth initiatives and to preserve and enhance stockholder value for GM common stockholders, General Motors and Hughes should pursue a transaction which would separate Hughes from General Motors and position it to engage in a business combination with another company in the telecommunications industry. In reaching that determination, General Motors and Hughes considered the following principal alternatives to such a transaction:

continuation of the existing business strategy by maintaining Hughes as a wholly owned subsidiary of General Motors, while maintaining the GM Class H common stock as a tracking stock of GM reflecting the financial performance of Hughes;

an initial public offering, spin-off or split-off of a portion or various portions of the Hughes business, such as its DIRECTV business, either with or without a pre-arranged business combination; and

a separation of Hughes from General Motors in the absence of a pre-arranged strategic combination, together with a significant investment by a strategic investor or additional debt financing.

After careful consideration, General Motors and Hughes determined that maintaining Hughes' current status as a wholly owned subsidiary of General Motors would limit Hughes' ability to achieve its strategic objectives and risk degrading its competitive position, particularly in view of the increasing consolidation within the industry. In addition, as described further at GM's Reasons for the Transactions above, maintaining Hughes as General Motors' wholly owned subsidiary was expected to have adverse effects on GM's credit rating and financial position, which in turn would adversely affect reported earnings attributable to GM \$1 2/3 par value common stock and the related earnings per share and its ability to finance its core automotive and related businesses, resulting in an adverse effect on GM common stockholders. Further, General Motors and Hughes anticipated that the market reaction to the announcement of maintaining Hughes' current status would be negative in view of the strategic challenges currently facing Hughes.

General Motors and Hughes evaluated the possibility that a substantial portion of the Hughes business, such as its DIRECTV business, might be divested on more attractive terms as part of a strategic business combination with another company. If a portion of the Hughes business were separated from General Motors, the remaining Hughes business could either be retained by General Motors or disposed of through a spin-off or split-off or similar transaction, an initial public offering or a sale to a strategic partner, or some combination of several of these transactions. After giving careful consideration to a variety of potential alternative transaction structures, both General Motors and Hughes realized that the separation of a portion of the Hughes business might be inconsistent with Hughes' overall strategic objectives and would result in a loss of the various synergies currently enjoyed by the various Hughes businesses. If GM Class H common stock were to remain in existence as a tracking stock of GM and continue to reflect the financial performance of the retained Hughes business, this option could also give rise to complex issues relating to the valuation of the DIRECTV and other Hughes assets. Moreover, under any scenario involving the separation of a portion of the Hughes business, General Motors and Hughes expected that General Motors would receive less liquidity in respect of its retained economic interest in Hughes, and while the retained business could potentially represent a source of growth and value in the future, the financing needs of the retained business would likely exert unfavorable pressure on the financial position of General Motors in the near term. In addition, General Motors and Hughes were advised that any structure involving a separation of a portion or portions of the Hughes business would likely be less tax efficient.

A separation of Hughes from GM in the absence of a pre-arranged business combination could better position Hughes to obtain financing for Hughes' near-term operations through an investment by a strategic investor or the incurrence of additional debt. In addition, this alternative would allow General Motors to focus its board of directors, management, staff time and other resources on GM's core automotive and other businesses. However, General Motors and Hughes determined that a separation of Hughes in the absence of a pre-arranged business combination would be unlikely to provide the financial resources to permit Hughes to expand its business and provide GM with the liquidity it desired in respect of its retained economic interest in Hughes. Further, because of the time required in order to implement the separation of Hughes from General Motors, there was a significant risk that the parties suitable to combine with the free-standing Hughes would undertake to pursue other strategic transactions while General Motors and Hughes implemented the separation of Hughes from General Motors and, as a result, be unwilling or unable to enter into a strategic transaction with Hughes after such time as it became a free-standing entity.

Coupling the Hughes split-off pursuant to the GM/ Hughes separation transactions with the Hughes/ EchoStar merger offered the same benefits as a separation in the absence of a pre-arranged business combination but also enhanced the likelihood that Hughes could meet its strategic objectives by providing Hughes with greater opportunities and financial resources to expand its business than might otherwise be possible if Hughes were separated from GM in the absence of a pre-arranged business combination. In addition, General Motors and Hughes believed that the Hughes split-off combined with the Hughes/ EchoStar merger would enable the combined company to achieve significant business synergies for its benefit and the benefit of its stockholders and customers.

After carefully considering each of the alternatives described above, General Motors and Hughes made the judgment that the transactions, taken as a whole, offered the best solution to the strategic challenges and business objectives of General Motors and Hughes as described further above at GM's Reasons for the Transactions.

GM's Development of the Transactions

The proposed GM/ Hughes separation transactions and the Hughes/ EchoStar merger arise from the long-standing desire of both General Motors and Hughes to expand the business of Hughes while enhancing the value of the Hughes business to General Motors and its stockholders.

From time to time, General Motors and Hughes have reviewed Hughes' business strategy and engaged in discussions with industry participants about possible business combinations or other strategic transactions involving Hughes. As part of these efforts, Hughes and EchoStar engaged in preliminary discussions regarding the possibility of pursuing a strategic transaction between the two companies. However, those discussions did not result in any workable arrangements for both Hughes and EchoStar that warranted further exploration.

Beginning in mid-2000, following the completion in June of the restructuring of GM's retained economic interest in Hughes pursuant to an exchange offer of newly issued shares of GM Class H common stock for then outstanding shares of GM \$1 2/3 par value common stock and the contributions by GM of newly issued shares of GM Class H common stock to certain of its employee benefit plans, General Motors and Hughes management and their respective financial, legal, tax, accounting and other advisors initiated an intensive assessment of the strategic objectives of Hughes and the financial, legal, tax, accounting and other issues relating to Hughes' strategic position and alternatives. Consistent with this approach, Hughes completed the sale of its satellite manufacturing operations to Boeing in October 2000, thereby concentrating its activities on the multi-channel video programming distribution marketplace and related telecommunications businesses.

In connection with this review, General Motors and Hughes analyzed and compared the benefits of a strategic combination involving Hughes and another company in the telecommunications industry with significant distribution and/or content production capabilities to other strategic alternatives, including expanding the business of Hughes under continued GM ownership while addressing the financing needs of the Hughes businesses and of GM's other businesses and maximizing stockholder value. General Motors and Hughes carefully considered several strategic alternatives which are discussed in greater detail at Alternatives to the Transactions above. However, for the reasons described at Alternatives to the Transactions above, General Motors and Hughes over time determined that pursuing a combination of

Hughes' business with another company in the telecommunications industry represented the best alternative for achieving their objectives.

In conjunction with the ongoing assessment of the alternatives potentially available to Hughes, in the fall of 2000 Hughes met with various telecommunications companies in an effort to assess their potential interest in a business combination involving Hughes. While most of these companies expressed some degree of interest in pursuing discussions about a possible alliance with Hughes, the scope and terms of alliance in which they were interested varied largely from one company to another. Based on their indications of interest, a handful of parties, including EchoStar and Sky Global Networks (a subsidiary of The News Corporation Limited), appeared interested in exploring a potential merger transaction with Hughes following its separation from General Motors. Other companies indicated an interest in making a minority equity investment in Hughes following a separation of Hughes from General Motors. A few of the companies approached by Hughes indicated interest in acquiring only Hughes' indirect interest in PanAmSat. Each of these options was considered by management of GM and Hughes in view of the strategic objectives discussed above and at GM's Reasons for the Transactions.

After considering the indications of interest, General Motors and Hughes determined to postpone discussions with parties only interested in minority investments until a later stage due to the fact that several of them expressed a further interest in participating as a minority investor in a transaction involving a combination of Hughes' business with that of another industry participant. In addition, as a result of their assessment of the relative merits of the strategic alternatives available with respect to Hughes, General Motors and Hughes decided to focus principally on a transaction involving all of Hughes and decided that potential discussions with buyers interested only in Hughes' indirect interest in PanAmSat would be handled as a separate process. This separate process resulted in some expressions of interest in acquiring Hughes' indirect interest in PanAmSat, although no agreement was reached with any party as to an appropriate value for this interest.

Over time, several of the parties indicated that they had no interest in pursuing further discussions regarding a strategic transaction involving Hughes. As a result, by late November 2000, General Motors and Hughes were engaged in serious discussions about a merger with only three potential strategic partners, including Sky Global Networks. In addition, while EchoStar was also considered a potential strategic partner, at this point in time General Motors and Hughes had reservations regarding the extent to which EchoStar and Hughes would have difficulty in obtaining the regulatory clearance that would be needed for a merger of Hughes and EchoStar. In particular, EchoStar had commenced in February 2000 a lawsuit against Hughes (and other parties) alleging antitrust violations by Hughes and others, premised in part on satellite television representing a separate competitive market (or a separate submarket of the multi-channel video distribution market). Although General Motors and Hughes considered these allegations to be without merit, they were concerned that obtaining regulatory clearance for a merger of Hughes and EchoStar might be more difficult, regardless of the parties' true competitive circumstances, if EchoStar were to continue to maintain the view of the competitive marketplace that it had presented in this lawsuit. Accordingly, at that point in time EchoStar was not considered the most promising candidate with which Hughes could negotiate and consummate a business combination and, based on the indication of interest EchoStar had expressed, only preliminary discussions with it were pursued.

As the process of pursuing a strategic transaction involving Hughes continued, GM and Hughes management, with the assistance of their respective advisors, continued to evaluate the financial, legal, tax and accounting issues that would be presented in connection with such a transaction, and the Hughes board of directors, GM capital stock committee and GM board of directors similarly considered these matters in progressively greater detail. In this regard, the key meetings of the Hughes board of directors, GM capital stock committee and GM board of directors are described below. In connection with these and other meetings, certain members of the GM board of directors, including George M.C. Fisher, Nobuyuki Idei and Lloyd D. Ward, recused themselves from the discussions regarding potential transactions due to potential conflicts of interest resulting from their positions with other parties involved or potentially involved in discussions or negotiations with Hughes. Each of the meetings described below was attended by internal counsel of GM and/or Hughes and, in many cases, by outside counsel representing GM and Hughes in connection with the potential transactions.

December 5, 2000 General Motors Board Meeting. At the December 5, 2000 meeting of the GM board of directors, GM management presented a report, prepared by Mr. Eric A. Feldstein, Vice President and Treasurer of GM, which reviewed the status of the discussions that had been held relating to a Hughes strategic transaction and GM management's preliminary evaluation of the benefits that could be obtained from any transaction with the various potential parties. In addition, at this meeting, GM management and legal counsel presented a report outlining a process for oversight by the Hughes and GM boards of directors of the development of a specific transaction that would address substantive and procedural fairness considerations between the two classes of GM common stock that were likely to arise in the development of such a transaction. Ms. Roxanne S. Austin, then Corporate Senior Vice President and Chief Financial Officer of Hughes, also presented a report on the Hughes business plan. This meeting followed a meeting of the Hughes board of directors on November 29, 2000 which had reviewed the same subjects and had endorsed Hughes pursuing further the strategic opportunities reported to be available to it.

Following discussion of these matters, the GM board of directors authorized and directed GM and Hughes management to explore and develop jointly the terms of possible specific transactions involving Hughes and the retention of independent investment banking firms separately by General Motors and Hughes to assist in these efforts. Also as part of this effort, and consistent with established governance policies of GM and Hughes, the Hughes board of directors was to review and to make recommendations to the GM board of directors with regard to any such transaction that might be proposed by management. The GM board of directors further delegated to the GM capital stock committee the responsibility to oversee the activities to be undertaken by management of General Motors and of Hughes in developing the terms of a possible transaction involving Hughes and the responsibility to review and make recommendations to the GM board of directors with regard to any such transaction that might be proposed by Hughes or GM management, including the fairness to the holders of both classes of GM common stock of the process for determining the terms of a transaction, any conditions to approval or completion of such a transaction that should be imposed in order to protect the interests of the holders of either class of GM common stock and the fairness to the holders of each such class of stock of any transaction proposed. Also, the GM board of directors directed GM and Hughes management and the appropriate financial, legal, tax, accounting and other advisors to General Motors and Hughes to carry out their responsibilities with respect to the potential transactions in accordance with the purposes and within the framework of the above-described process. As part of the GM capital stock committee's oversight activities, outside counsel to the GM capital stock committee briefed GM capital stock committee members on a regular basis on the status of the discussions and the development of transaction terms and participated in the reports given at all of the meetings referred to below.

By February 2001, two potential strategic partners for Hughes had emerged from its discussions about a strategic transaction. One of these companies was Sky Global Networks and the other was a third party in the telecommunications industry that is not involved in the transactions that are the subject of this document. During this period, representatives of Sky Global Networks and its parent company, The News Corporation, met with representatives of General Motors and Hughes and developed parameters for a potential split-off of Hughes and subsequent merger of Hughes and Sky Global Networks. Preliminary discussions with the other potential strategic partner were also pursued but by the end of this period these discussions terminated because the parties were unable to reach a common understanding on fundamental terms for a transaction.

In March 2001, General Motors and Hughes suspended their discussions with Sky Global Networks and The News Corporation in order to assess certain concerns that had emerged about a possible combination of Hughes and Sky Global Networks. As more detailed information was exchanged in these discussions, senior management of Hughes expressed reservations about the commitment of Sky Global Networks to achieving substantial synergies from a combination with Hughes. In addition, following public speculation regarding a possible Hughes/ Sky Global Networks transaction, based upon certain press accounts and communications by some GM Class H common stockholders to GM and Hughes, GM and Hughes believed that many holders of GM Class H common stock would have concerns about the capability for such a transaction to create sufficient value for stockholders of the combined businesses and about the sufficiency of the premium to the market price of the GM Class H common stock that could be expected by GM common stockholders from a transaction with Sky Global Networks. In light of these concerns, General Motors and Hughes began to reconsider alternative strategic transactions involving Hughes which did not include a combination with a

strategic partner, including separation transactions involving stand-alone strategic investments in Hughes or debt financing at a higher level of leverage than that customarily used by Hughes in its business. Hughes also re-engaged in discussions with EchoStar, the only company of those approached in the fall of 2000, other than The News Corporation and Sky Global Networks, that remained interested in pursuing discussions about a potential business combination with Hughes, to explore whether it was feasible to reach agreement upon the terms of such a transaction. Various structures for such a transaction were considered at this time and General Motors' and Hughes' reservations relating to the pending EchoStar lawsuit were discussed.

In April 2001, Sky Global Networks and The News Corporation proposed economic terms for a strategic combination of Hughes and Sky Global Networks that were more attractive to GM and Hughes than the terms previously proposed, including a greater interest for GM and GM stockholders in a merged Hughes/Sky Global Networks entity (before taking into account the reduction in GM's retained economic interest in Hughes) and an opportunity for GM to receive greater liquidity in respect of its retained economic interest in Hughes. As a result, discussions began again regarding a possible transaction involving Hughes and Sky Global Networks. To facilitate further discussions, in mid-April 2001, General Motors and Hughes developed and presented to Sky Global Networks an outline of acceptable parameters for a split-off of Hughes and combination of Hughes and Sky Global Networks. This outline specified the objectives of General Motors and Hughes, which consisted of maximizing the value to be provided to GM and its common stockholders, structuring the transaction in a manner that would be tax-free to GM and its common stockholders, ensuring that the combined company would have sufficient access to financing to fund its ongoing business needs and providing GM with liquidity and value in respect of a significant portion of GM's retained economic interest in Hughes. In addition, GM and Hughes specified certain terms in the outline that they would expect to be included as a component of any proposal to be received from The News Corporation and Sky Global Networks with respect to a transaction, including a distribution to GM of not less than \$5 billion in cash and up to \$2.2 billion in securities and an associated reduction in GM's retained economic interest in Hughes and the receipt of stock appreciation rights that would allow GM to benefit from any increase in the share price of the merged Hughes/ Sky Global entity. In response to the outline, Sky Global Networks and The News Corporation presented specific proposed transaction terms at a meeting of senior executives of The News Corporation with GM and Hughes senior executives and their financial and legal advisors. These proposed transaction terms included a distribution to GM of \$5 billion in cash and \$2.2 billion in the form of one or more promissory notes and an associated reduction of GM's retained economic interest in Hughes, as well as stock appreciation rights which would allow GM to benefit from any increase in the share price of the merged Hughes/ Sky Global entity. The proposed transaction terms also contemplated that, without taking into account the reduction in GM's retained economic interest in Hughes, GM and the GM common stockholders would own about 70% of the merged Hughes/ Sky Global entity.

From time to time during February, March and April, 2001, the GM capital stock committee, the Hughes board of directors and the GM board of directors received information and updates regarding the status of the discussions. For example, at the February 6, 2001 meeting of the GM board of directors, Mr. John M. Devine, Vice Chairman and Chief Financial Officer of GM, presented a status report and answered questions relating to the discussions with The News Corporation and Sky Global Networks, as well as the discussions with the other potential strategic partner at that time referred to above, regarding the possibility of a strategic transaction involving Hughes. Similarly, at the March 5, 2001 meeting of the GM board of directors, Mr. Devine presented a status report and answered questions regarding the discussions with The News Corporation and Sky Global Networks, as well as EchoStar, relating to the possibility of a strategic transaction involving Hughes. Also, at the March 6, 2001 special meeting of the Hughes board of directors, Mr. Michael T. Smith presented a report regarding these matters. Other updates were provided to the Hughes board of directors at its March 27, 2001 and April 30, 2001 meetings.

At its March 23, 2001 meeting, the GM capital stock committee accepted the determination of Mr. John F. Smith, Jr., Chairman of the Board of Directors of General Motors, that, in view of the fact that he and Mr. Michael T. Smith, then Chairman of the Board of Directors and Chief Executive Officer of Hughes, are brothers, Mr. John F. Smith, Jr. should recuse himself from participation as a member of General Motors management and of the General Motors and Hughes boards of directors in consideration of a potential strategic transaction involving Hughes. It was determined that Mr. G. Richard Wagoner, Jr., President and

Chief Executive Officer of GM, would participate directly in coordinating the development by GM and Hughes management of a strategic transaction relating to Hughes and would report to the committee on a periodic basis on the matter. Mr. John F. Smith, Jr. subsequently played no role in GM's consideration of a potential strategic transaction involving Hughes, and did not participate in the meetings of the Hughes board of directors, the GM capital stock committee and the General Motors board of directors discussed below, until October 2001, roughly two months after Mr. Michael Smith's retirement from Hughes (as discussed below). Also at its March 23, 2001 meeting the GM capital stock committee reviewed the issues that might arise in developing a strategic transaction involving Hughes as to which the interests of GM's two classes of common stockholders might diverge and the processes that should be followed by GM and Hughes to assure fair consideration of the interests of both classes of common stockholders.

April 30, 2001 Hughes Board Meeting. At the April 30, 2001 meeting of the Hughes board of directors, the Hughes board of directors discussed the proposal made by Sky Global Networks and The News Corporation and Hughes management provided an update regarding other alternatives for a strategic transaction involving Hughes, including transactions not involving a combination with a strategic partner such as a separation transaction involving a stand-alone strategic investment in Hughes or debt financing at a higher level of leverage than customarily used by Hughes in its business. At this meeting, based largely upon the fact that The News Corporation and Sky Global Networks had acknowledged the objectives of GM and Hughes and, in principle, accepted the parameters outlined by GM and Hughes in mid-April, 2001, including the distribution to GM of not less than \$5 billion in cash and up to \$2.2 billion in securities and an associated reduction of GM's retained economic interest in Hughes, as well as stock appreciation rights, the Hughes board of directors recommended that Hughes management, working together with GM management, focus principally on the proposal made by Sky Global Networks and The News Corporation. The Hughes board of directors, however, did not believe that further negotiations with Sky Global Networks and The News Corporation should be conducted on an exclusive basis, and directed that the process remain open to proposals from other parties.

May 1, 2001 General Motors Board Meeting. At the May 1, 2001 meeting of the GM board of directors, GM and Hughes management updated the GM board of directors regarding the status of the discussions relating to a possible transaction involving Hughes and the transaction proposal made by Sky Global Networks and The News Corporation. The GM board of directors also reviewed and considered the results of the Hughes board meeting on the prior day. Mr. Wagoner led a discussion of these matters and answered questions, with input from Ms. Austin, Mr. Warren G. Andersen, Assistant General Counsel of GM, Mr. Feldstein, Mr. Eddy W. Hartenstein, Corporate Senior Executive Vice President of Hughes, and Mr. Joseph A. Walker, Senior Advisor to GM.

Following discussion of these matters, based largely upon the fact that The News Corporation and Sky Global Networks had acknowledged the objectives of GM and Hughes and, in principle, accepted the parameters outlined by GM and Hughes in mid-April, 2001, including the distribution to GM of not less than \$5 billion in cash and up to \$2.2 billion in securities and an associated reduction of GM's retained economic interest in Hughes, as well as stock appreciation rights, GM and Hughes management recommended to the GM board of directors that General Motors and Hughes take further steps to pursue, on a non-exclusive basis, the possibility of a transaction involving a split-off of Hughes and subsequent merger of Hughes and Sky Global Networks based upon the proposal made by Sky Global Networks and The News Corporation. Based on, among other things, the assessment that a combination of Sky Global Networks and Hughes would create a strong global media group, involving content, distribution and emerging technology capabilities and meaningful operating synergies, and that the combination would provide both the capital necessary to finance ongoing Hughes business strategies and adequate liquidity to General Motors in the context of a separation of Hughes from GM, the GM board of directors approved this recommendation of management. The GM board of directors authorized representatives of General Motors and of Hughes to engage in further discussions and negotiations with Sky Global Networks and The News Corporation with the goal of seeing if definitive agreements could be reached based on their proposal. This decision to proceed with the negotiation of definitive documentation for a Hughes/ Sky Global Networks business combination was subject to the resolution of certain issues and concerns raised by management with respect to the proposal made by

Sky Global Networks and The News Corporation, primarily the resolution of the terms of commercial arrangements between the merged entity and certain strategic investors, the resolution of the terms of the governance arrangements for the merged entity, the determination of any financial responsibility GM might have as part of the proposed transaction with respect to certain liabilities of Hughes and the completion of due diligence. Immediately following the May 1, 2001 meeting of the GM board of directors, General Motors issued a press release describing the actions taken at the meeting with respect to the further pursuit of discussions and negotiations with Sky Global Networks and The News Corporation.

On May 14, 2001, General Motors received a letter from EchoStar's Chairman of the Board of Directors and Chief Executive Officer, Charles W. Ergen, indicating EchoStar's desire to pursue a transaction involving the combination of Hughes with EchoStar. This letter was followed on May 17, 2001 by a formal proposal by EchoStar relating to a split-off of Hughes from General Motors and subsequent merger of Hughes and EchoStar involving a cash distribution by Hughes to GM in connection with the split-off and a stock-for-stock exchange in the merger.

During the second half of May and June 2001, General Motors and Hughes management evaluated this EchoStar proposal and met with representatives of EchoStar to further develop and refine their understanding of the proposal. In these discussions, EchoStar proposed that the parties consider agreeing to a joint operating agreement under which they would share satellite capacity in the event that a merger of their operations was not permitted. This alternative was analyzed and rejected by the parties as impractical due to a number of issues, including the need to agree on compatible technologies, the possible competitive disadvantages that conversion to compatibility could cause one or both parties during the conversion process, the difficulties of placing the most important assets of their respective businesses under joint control, concerns about investing in new technologies without long-term unitary control of the fruits of the investment and resolving the problems that could occur upon termination of any joint operating arrangement. In addition to the joint operating agreement in the event that a merger was not permitted, the transaction terms proposed by EchoStar included a distribution to GM of \$5.5 billion in cash and \$1.7 billion in the form of a promissory note and an associated reduction of GM's retained economic interest in Hughes and contemplated that Hughes and EchoStar would merge in a transaction in which the GM Class H common stock and the common stock of EchoStar would be valued on the basis of market prices. Another alternative proposal included the sale of Hughes' indirect interest in PanAmSat to EchoStar in the event that the merger was not permitted and in the event that the joint operating agreement was entered into between the parties. At this time, the basic terms of the proposal by The News Corporation and Sky Global Networks remained substantially the same as those presented to the senior executives of GM and Hughes and their financial, legal and other advisors in April 2001.

In late June, General Motors and Hughes concluded that, despite the significant synergies and value expected to be created by a merger of Hughes and EchoStar, a transaction with EchoStar on the terms presented was not as attractive an alternative as the transaction then being proposed by Sky Global Networks and The News Corporation. This judgment was based primarily on the determinations that the economic terms then proposed by EchoStar were less desirable to GM, Hughes and the GM common stockholders, that the Sky Global Networks transaction had a potential for future value creation that was not provided by the transaction proposed by EchoStar because, among other things, the Sky Global Networks transaction provided an alignment with a content provider with a global presence and that the merged Hughes/ Sky Global Networks entity would have greater financial strength than a merged Hughes/ EchoStar entity, as well as the belief that the transaction proposed by Sky Global Networks had a greater certainty of completion and continuing concerns regarding the regulatory issues involved in a transaction with EchoStar. On July 9, 2001, General Motors and Hughes expressed their concerns to EchoStar in a written response to the EchoStar proposal.

From May through July 2001, General Motors and Hughes, with the assistance of their respective financial, legal, tax, accounting and other advisors, continued their discussions with Sky Global Networks and The News Corporation and their advisors regarding the possibility of a combination of Hughes and Sky Global Networks following a separation of Hughes from GM. During this period of May through July 2001, GM and Hughes management provided periodic updates and information to the GM capital stock committee, the Hughes board of directors and the GM board of directors regarding the status of potential transactions

involving the combination of Hughes with Sky Global Networks or EchoStar. In particular, at the May 21, 2001 and May 31, 2001 meetings of the Hughes board of directors and the June 25, 2001 and July 5, 2001 joint meetings of the Hughes board of directors and the GM capital stock committee, Hughes and GM management provided reports regarding the status of these discussions. On May 25, 2001, Mr. Michael T. Smith retired as Chairman of the Board of Directors and Chief Executive Officer of Hughes. Mr. Harry J. Pearce was elected as the new Chairman of the Board of Directors of Hughes, and Mr. Jack A. Shaw was appointed as the new Chief Executive Officer of Hughes. In addition, at the June 5, 2001 meeting of the GM board of directors, Mr. Devine, Mr. Feldstein and Mr. Shaw reported to the GM board of directors regarding the status of the discussions with Sky Global Networks and The News Corporation and the discussions with EchoStar.

EchoStar Public Proposal. On August 5, 2001, EchoStar publicly disclosed a proposal to merge Hughes into EchoStar in an all-stock transaction. A letter from EchoStar outlining the proposal was sent to the GM board of directors and simultaneously publicly released. The terms of the proposed merger included the distribution of 0.75 shares of EchoStar common stock in exchange for each share of GM Class H common stock. The proposal was reviewed at an August 7, 2001 meeting of the General Motors board of directors. General Motors and Hughes determined that the terms of the transaction, as then proposed by EchoStar, did not address certain of the key objectives of GM and Hughes with respect to such a transaction, including the lack of a cash liquidity component for GM in respect of its retained economic interest in Hughes, assurance of a tax-free transaction for GM and its stockholders and a means for protecting the interests of General Motors and Hughes in the event that a merger of Hughes and EchoStar could not be completed due to regulatory difficulties. As such, GM and Hughes determined that the terms as then proposed by EchoStar were, considered as a whole, inferior to the terms previously proposed by EchoStar. However, due to the significant potential synergies and value expected to be created by a merger of Hughes and EchoStar, General Motors and Hughes determined to continue discussions with EchoStar regarding the possibility of a combination of Hughes and EchoStar, in parallel with the ongoing discussions relating to a combination of Hughes with Sky Global Networks. In these continuing discussions, General Motors, Hughes and EchoStar discussed alternative deal structures and explored additional means of adequately protecting General Motors and Hughes in the event that regulatory clearance for a merger of Hughes and EchoStar could not be obtained.

On August 19, 2001, EchoStar proposed to General Motors and Hughes two alternative transaction structures designed to address some of the concerns previously expressed by GM and Hughes. The first alternative was structured as a single-step combination of Hughes' business with EchoStar's and consisted of a reduction of \$6.7 billion of GM's retained economic interest in Hughes in exchange for \$5.0 billion of cash and a \$1.7 billion promissory note to be followed by a separation of Hughes from General Motors and a merger of Hughes into EchoStar in which 0.75 shares of EchoStar common stock would be exchanged for each share of GM Class H common stock. The second alternative was structured as a two-step combination of Hughes' business with EchoStar's and was designed to provide funding for the Hughes business in the near term, before regulatory clearance could be achieved for a merger of Hughes and EchoStar. It consisted of the initial purchase by EchoStar of Hughes' interest in PanAmSat for \$3.7 billion of cash and \$0.3 billion of EchoStar common stock and the subsequent merger of PanAmSat into EchoStar, providing the public holders of PanAmSat common stock with EchoStar common stock at the same valuation as EchoStar's purchase of Hughes' indirect interest in PanAmSat. The second option also involved a reduction of GM's retained economic interest in Hughes and a separation and merger transaction on the same terms as the first option, with these transactions being executed at a later time following the receipt of all applicable stockholder and regulatory approvals. Both options provided for a \$600 million mutual break-up fee under certain circumstances in the event that certain regulatory clearances for the proposed transaction were not received.

Throughout August, September and October 2001, while simultaneously continuing discussions with Sky Global Networks and The News Corporation, General Motors, Hughes and EchoStar, with assistance from their respective advisors, continued their discussions, in conjunction with proposals and counter-proposals between the parties, regarding the possibility of a strategic transaction along the lines EchoStar had proposed. Among the matters discussed were the availability of financing for the contemplated transactions and the regulatory issues that would be faced in obtaining clearance for a merger of Hughes and EchoStar. Analysis of the regulatory issues associated with a merger of EchoStar and Hughes continued. As part of this

effort, Hughes and EchoStar exchanged information regarding recent developments and trends in their competitive environment, including the increase in competition each of Hughes and EchoStar were encountering from cable television companies and other competitors due to technological advancements and the growing implementation by cable companies of newer technology in 2001, including the growth of digital cable. This significant evolution and expansion of competition in the market for multi-channel voice distribution and the fact that a merger between Hughes and EchoStar would increase competition in that market caused EchoStar to agree in these discussions that it was prepared to withdraw its suit. These developments lessened the concerns of General Motors and Hughes regarding the regulatory issues that might be involved in a transaction between EchoStar and Hughes.

During this time, GM and Hughes management provided periodic updates to the GM capital stock committee, the Hughes board of directors and the GM board of directors, including, among other things, information regarding the status of potential transactions involving Sky Global Networks and EchoStar. In these updates, GM and Hughes management reported on the status of the development of a possible transaction involving Hughes, including the status of discussions with Sky Global Networks and The News Corporation and the status of discussions with EchoStar, and described various open issues associated with each of the potential transactions.

At the August 29, 2001 joint meeting of the Hughes board of directors and the GM capital stock committee, management of GM and Hughes reported on the EchoStar proposals and discussed potential regulatory issues associated with a combination of Hughes with EchoStar. At this meeting, Mr. Feldstein, Mr. Hartenstein and Mr. Walker provided an update regarding various aspects of the negotiations with both parties. On September 5, 2001, at another joint meeting of the Hughes board of directors and the GM capital stock committee, Mr. Feldstein and Mr. Walker presented an update on the status of discussions with both Sky Global Networks, The News Corporation and EchoStar.

At additional joint sessions of the Hughes board of directors and the GM capital stock committee on September 26 and September 28, 2001, Mr. Devine, Mr. Shaw, Mr. Feldstein and Mr. Walker, among others, provided further status reports regarding the negotiations relating to both potential transactions. In addition, concerns on the part of General Motors and Hughes with the financing arrangements available for an EchoStar transaction and with the antitrust issues that would be faced in completing a transaction were discussed. At the September 28, 2001 meeting, the Hughes board of directors and the GM capital stock committee, after a discussion of the merits and risks of both proposed transactions, authorized the management of General Motors and Hughes to proceed with final negotiations with Sky Global Networks and The News Corporation to resolve all of the open issues in connection with a transaction involving Hughes and Sky Global Networks, subject to board approval of the final terms and conditions. At the same time, the Hughes board of directors, with the endorsement of the GM capital stock committee, authorized Hughes management to continue discussions with EchoStar with a view towards providing EchoStar an opportunity to submit a final offer with respect to a transaction involving Hughes that would address the concerns which General Motors and Hughes had with EchoStar's previous proposal. At the October 2, 2001 meeting of the GM board of directors, Mr. Devine and Mr. Walker provided an update on both potential transactions to the GM board of directors.

October 19, 2001 Hughes Board and GM Capital Stock Committee Meeting. At the October 19, 2001 meeting of the Hughes board of directors and the GM capital stock committee, GM and Hughes management presented a further update regarding the status of the development of a possible transaction involving Hughes, including the status of discussions with Sky Global Networks and The News Corporation regarding a combination of Hughes with Sky Global Networks and the status of discussions with EchoStar regarding a combination of Hughes with EchoStar. Management of GM and Hughes described the proposed terms of each of the transactions, including the relative advantages and disadvantages of each such transaction, and identified the remaining open issues associated with each transaction. After discussion, the Hughes board of directors and GM capital stock committee determined that GM and Hughes should inform Sky Global Networks, The News Corporation and EchoStar that their final proposals for a transaction with Hughes should be submitted to GM and Hughes by October 24 so that the Hughes board of directors, GM capital stock committee and GM board of directors would be positioned to consider both proposals and make a final decision about Hughes pursuing a strategic transaction. The Hughes board of directors and the GM capital

stock committee determined to reconvene, together with the GM board of directors, on October 27, 2001 for this purpose.

Following the October 19, 2001 meeting, GM and Hughes, with the assistance of their respective financial, legal, tax, accounting and other advisors, continued discussions and negotiations with Sky Global Networks and The News Corporation and with EchoStar, in each case with their respective advisors, regarding the terms of, and definitive documentation relating to, a possible transaction involving a combination of Hughes with each of these companies following the separation of Hughes from GM pursuant to a split-off.

As a result of the negotiations during this period among GM, Hughes, Sky Global Networks and The News Corporation, the terms of a transaction involving the combination of Hughes with Sky Global Networks following the separation of Hughes from GM pursuant to a split-off that would be presented by the parties to their boards of directors were agreed upon. At this time, Sky Global Networks and The News Corporation informed GM and Hughes of their determination to withdraw their proposal in the event that the proposed transaction involving Hughes and Sky Global Networks was not approved by the GM board of directors at its meeting scheduled for October 27, 2001. At this time, the basic terms of the transaction proposed by The News Corporation and Sky Global Networks consisted of:

Hughes paying a dividend to GM of up to \$3.5 billion in cash and \$1.0 billion in the form of a promissory note and an associated reduction of GM's retained economic interest in Hughes;

the merged entity providing GM stock appreciation rights with respect to a notional amount of shares equivalent to the reduction in GM's retained economic interest which would allow GM to benefit from any increase in the share price of the merged Hughes/Sky Global entity;

the split-off of Hughes from GM;

the merger of Hughes and Sky Global Networks, with each share of Hughes common stock outstanding after the split-off of Hughes from GM being converted into one share of common stock of Sky Global Networks. As a result, without taking into account the reduction in GM's retained economic interest in Hughes or any strategic investments in the merged entity, GM and the GM common stockholders would own 72% of the merged Hughes/Sky Global entity;

financing for the merger transaction in the amount of \$5.0 billion in committed bank facilities and investments by two strategic investors of a total of \$3.5 billion in cash in the merged entity as well as \$400 million in contributed assets;

commercial arrangements proposed to DIRECTV by two strategic investors in connection with their investments. In addition, the merged entity would enter into commercial arrangements with The News Corporation and other related parties, and GM would enter into commercial arrangements with The News Corporation; and

indemnification by GM to the merged entity for certain contingent liabilities of Hughes.

As a result of the negotiations during this period among GM, Hughes and EchoStar, the terms of a transaction involving the combination of Hughes with EchoStar following the separation of Hughes from GM pursuant to a split-off that would be presented by the parties to their boards of directors were agreed upon. However, during the evening of October 26, 2001, discussions with EchoStar's commercial banks regarding the terms of the financing commitments from one of EchoStar's two commercial banks faltered and, as a result, it appeared that EchoStar would be unable before the upcoming meeting of the GM board of directors and Hughes board of directors to obtain the commitments for the full amount of the financing required in order to complete the transaction that the parties had contemplated presenting to their boards of directors. At this time, the basic terms of the transaction proposed by EchoStar consisted of the following, as described in greater detail elsewhere in this document:

the Hughes dividend distribution of up to \$4.2 billion in cash and an associated reduction of GM's retained economic interest in Hughes;

the right of GM to engage in debt-for-equity exchanges involving up to 100 million shares to permit GM to obtain additional liquidity;

the split-off of Hughes from GM;

the Hughes/ EchoStar merger, with each share of EchoStar Class A common stock and each share of EchoStar Class B common stock being converted into 1/0.73, or about 1.3699, shares of the Class A common stock and Class B common stock of New EchoStar, respectively;

financing for the merger transaction in the amount of \$5.525 billion from bank facilities which, as described above, were not committed in full at that time, and \$1.5 billion in cash from EchoStar;

the PanAmSat stock sale; and

payment by EchoStar of a \$600 million regulatory termination fee under the circumstances described elsewhere in this document.

October 27, 2001 Hughes Board, GM Capital Stock Committee and General Motors Board Meeting. On October 27, 2001, there was a joint meeting of the Hughes board of directors, the GM capital stock committee and the GM board of directors. All members of the Hughes board of directors were present at or participated by teleconference in the meeting and all except four members of the GM board of directors were present at or participated by teleconference in the meeting. The meeting was also attended by representatives of Kirkland & Ellis, legal counsel to GM, Weil, Gotshal & Manges LLP, legal counsel to Hughes, and Latham & Watkins, special counsel to the management and directors of Hughes, in connection with the proposed transactions.

Mr. John F. Smith, Jr. opened the meeting by noting the long history of board activity in prior meetings in which it had reviewed potential strategic transactions involving Hughes and commenting on the necessity of the meeting for reaching a resolution regarding the ultimate structure of a transaction which would provide for the separation of Hughes from GM and its subsequent merger with either Sky Global Networks or EchoStar.

Mr. Wagoner, Mr. Eckhard Pfeiffer, as Chairman of the GM capital stock committee, Mr. Pearce and Mr. Shaw added further introductory comments, and each of them commented briefly on the purposes of the meeting, and the interests of stockholders, employees, customers and the general public that were to be addressed by the potential transactions.

Mr. Devine then discussed the immediate issues regarding a potential transaction involving Hughes. Mr. Devine explained that, after many months of negotiations, two alternative transactions regarding Hughes had been developed to a stage at which it was appropriate for the GM board of directors and the Hughes board of directors to consider a decision between them. Mr. Devine noted that the principal objective of any transaction involving Hughes was to enhance the value of Hughes and General Motors for the benefit of GM stockholders. Other important aspects included achieving increased liquidity for General Motors in the context of a separation of Hughes from General Motors and attaining reasonable certainty that the transaction, which was expected to take about a year to complete, would be completed. He noted that each of the potential transactions with Sky Global Networks and EchoStar would address the principal objective, albeit in different ways.

Mr. Devine informed the directors that, while all elements of the potential transaction with Sky Global Networks had been negotiated and documented including committed financing arrangements, certain aspects of the EchoStar transaction relating to its financing had not been finalized. In particular, Mr. Devine noted that commitments for only half of the financing needed for a transaction between Hughes and EchoStar was then available, although EchoStar was confident that it could obtain the necessary commitments in the near term. Mr. Devine also stated that GM's and Hughes' financial advisors expected that, in time, satisfactory financing for a transaction between Hughes and EchoStar could likely be arranged.

Mr. Devine stated that representatives of Sky Global Networks and The News Corporation had informed him that its proposed transaction would not continue to be available unless it was approved at that meeting. Accordingly, both potential transactions as they then existed were being presented to the directors for their consideration.

Mr. Devine noted that briefing materials describing the two alternative potential transactions had been distributed to the directors in advance of the meeting and confirmed that these materials had been received by all such directors. He added that negotiations regarding various terms, particularly the financing of the EchoStar transaction, had continued until a few hours before the commencement of the meeting and that the most recent developments would be discussed at the meeting.

Mr. Walker then discussed the two alternative transactions involving Hughes. He provided, first, a summary of the potential transaction with Sky Global Networks, including the common structural aspects of the Sky Global Networks transaction and the EchoStar transaction. Both transactions essentially consisted of a split-off of Hughes from General Motors pursuant to a redemption of the outstanding GM Class H common stock in exchange for stock of the split-off company, immediately followed by a combination of the Hughes business with the other party by means of a merger. Generally speaking, the proposed terms of separation of Hughes from General Motors were similar in both transactions. It was noted that the transaction with Sky Global Networks involved certain strategic investors, including certain commercial arrangements between the combined company and these investors.

Mr. Walker outlined the financing that would be involved in the Sky Global Networks transaction, the market and regulatory contingencies involved in the transaction and the stockholder approval requirements for the transaction. During this presentation, legal counsel commented on the tax aspects of the potential transaction with Sky Global Networks, including the rulings that would be sought from the IRS regarding the tax-free nature of the separation of Hughes from GM, receipt of which was a condition to the completion of the transaction and noted that essentially the same requirements would apply to the EchoStar transaction.

At the end of Mr. Walker's discussion of the terms of the Sky Global Networks transaction, a discussion commenced regarding the financing available for that transaction in comparison with that available for the EchoStar transaction and related matters. This discussion led to a more general discussion of the relative advantages and disadvantages of the EchoStar transaction and the Sky Global Networks transaction. During this discussion, Mr. Devine reported that a letter had just been received from Mr. Ergen concerning potential revisions to the financing terms for the proposed EchoStar transaction. A discussion of how to respond to this development ensued, after which there was a brief recess of the meeting in order to facilitate review and consideration among management of GM and Hughes and their respective financial and legal advisors concerning Mr. Ergen's letter, including possible discussions with EchoStar and its investment bankers.

When the meeting reconvened, Mr. Devine reviewed further the content of the letter from Mr. Ergen, copies of which were made available to the persons present at the meeting, and certain additional telephone discussions with representatives of EchoStar and its investment bankers held during the recess. The letter emphasized the high degree of confidence which EchoStar and its financial advisors had that committed financing needed for their proposed transaction could be obtained within a short period and contained an offer from Mr. Ergen to satisfy any potential concerns of GM and Hughes regarding EchoStar's ability to obtain financing commitments for the transaction by pledging a significant amount of Mr. Ergen's personal stake in the common stock of EchoStar to demonstrate his confidence that the needed financing commitments would be attained. The letter and the alternatives available to GM and Hughes in light of Mr. Ergen's offer were commented on by various directors, Mr. Devine, Mr. Walker and by the representatives of the financial advisors to GM and Hughes and the legal counsel to GM and Hughes.

After this discussion, Mr. Walker reviewed the transaction terms that had developed through the most recent negotiations with EchoStar and its potential lenders, which had continued until a few hours before the meeting commenced. He explained the concerns of GM and Hughes with respect to the financing of the EchoStar transaction, which EchoStar and its financial advisors and potential lenders had not at the point those negotiations had ended been able to satisfactorily address.

Mr. Walker then reviewed the conditions to the completion of the alternative transactions. Legal counsel commented on the antitrust reviews to which the transactions would be subject, assessed the antitrust analysis of the transactions and compared the analysis of the EchoStar transaction to the analysis of the Sky Global Networks transaction. A discussion followed of the arrangements that had been negotiated with EchoStar in the event that antitrust clearance for a merger between Hughes and EchoStar was not achieved, including

EchoStar's purchase of Hughes' interest in PanAmSat and payment of a significant termination fee to Hughes under certain circumstances. The consequences for Hughes' competitive position of such a development were also discussed. Mr. Walker then discussed the comparative merits (including potential synergies), risks and opportunities associated with each of the alternative transactions. The risks and benefits from the perspective of both the GM Class H common stockholders and the GM \$1 2/3 par value common stockholders were discussed. Because the two alternative transactions were structured in a similar manner, the risks and benefits to the GM Class H common stockholders and the GM \$1 2/3 par value common stockholders were substantially the same with respect to both transactions, except to the extent of the differences in the potential synergies, the liquidity to be provided to General Motors in respect of its retained economic interest in Hughes and the obligations of GM with respect to certain Hughes contingent liabilities in the two proposed transactions. The risks and benefits of the transaction proposed by EchoStar are more fully described below at Advantages and Disadvantages of the Transactions to GM Common Stockholders. On the basis of all relevant factors (including the differences noted above), it was determined that, on balance, the transaction proposed by EchoStar was more favorable to both classes of GM common stockholders than the transaction proposed by Sky Global Networks and The News Corporation. The two alternative transactions were also compared to the prospect of a Hughes stand-alone strategy. Also discussed were the actions that EchoStar might take if Hughes and GM pursued a transaction with Sky Global Networks and the actions that Sky Global Networks and The News Corporation might take if Hughes and GM pursued a transaction with EchoStar. Members of Hughes management and others present commented on these matters in the course of these presentations and numerous questions about the matters presented were asked by the directors and answered.

Representatives of Merrill Lynch, together with representatives of Bear Stearns, and representatives of Credit Suisse First Boston, together with representatives of Goldman Sachs, made presentations at this time with respect to the proposed transaction involving Sky Global Networks. During the presentations, questions from the directors were asked and answered. Counsel to the independent directors then reviewed the fiduciary duties of the directors of GM and Hughes in relation to the potential transactions under consideration. The long history of deliberation by the GM board of directors, the GM capital stock committee and the Hughes board of directors regarding a strategic transaction involving Hughes was reviewed, as was the information which had been delivered to the directors concerning the subject over the period of such deliberation and the role played by the directors in overseeing management's development of the transactions now being considered by the directors. The detailed information that had been provided to the directors in preparation for the meeting was also noted. Finally, the process for consideration of the proposed transactions by the Hughes board of directors, the GM capital stock committee and the GM board of directors that was being undertaken at the meeting was reviewed and counsel provided advice on the proper discharge of the directors' role relating to the potential transactions.

At this time, management of Hughes and GM were asked to discuss their views concerning the relative merits of the alternative proposals of Sky Global Networks and EchoStar. A discussion of the relative terms, risks and benefits of the alternative transactions then ensued among management and the directors, as well as the financial and legal advisors present at the meeting. The meeting then briefly recessed.

After the recess, Mr. Wagoner outlined the conclusions of GM senior management regarding the alternatives facing the directors. Mr. Wagoner expressed the view that, although resolution of significant antitrust issues would apparently be necessary in order to complete the potential EchoStar transaction, the assessment of the risks that would be involved in doing so and of the other risks to successful completion of the EchoStar transaction was not out of line with the assessment of the overall risks to successful completion of the Sky Global Networks transaction. In contrast, he noted the consensus judgment which had emerged in the discussions during the meeting to the effect that the financial terms of the EchoStar transaction, most notably the higher implied premium to be received by GM and its common stockholders in the transaction, were more favorable than those of the Sky Global Networks transaction and that the synergies and upside potential for all GM common stockholders seemed to be significantly greater if GM and Hughes were able to complete the EchoStar transaction than would be the case if the Sky Global Networks transaction were completed.

Mr. Wagoner concluded that, given the recent proposal from Mr. Ergen, further effort to achieve a final agreement on a potential EchoStar transaction was warranted and he then proposed that the meeting be

recessed until October 28, 2001 with directions to the GM and Hughes teams working on the matter to negotiate with the EchoStar team in order to develop definitive agreements which could form a basis for management and the financial advisors to GM and Hughes recommending to the directors that a transaction with EchoStar be authorized. The risk that the Sky Global Networks transaction would no longer be available if GM and Hughes proceeded in this manner was noted. Mr. Wagoner's proposal was discussed by the directors and accepted by all members of the GM board of directors and the Hughes board of directors present and the meeting was recessed until the afternoon of October 28, 2001.

Following the recess of the GM board of directors meeting on October 27, 2001, Sky Global Networks and The News Corporation publicly announced the withdrawal of their proposal to enter into a strategic transaction involving Hughes.

Also following the recess of the meeting, GM and Hughes management, with the assistance of their respective financial, legal, tax, accounting and other advisors, finalized the terms of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger with EchoStar's management and its advisors, resolved all outstanding issues, including the terms of an interim GM financing commitment to be secured by the EchoStar stock beneficially held by Mr. Ergen, and finalized all terms of the definitive agreements relating to these transactions.

October 28, 2001 Hughes Board Meeting. On October 28, 2001, the Hughes board of directors met, in a continuation of the joint session with the GM board of directors and the GM capital stock committee that had been convened on October 27, 2001, to discuss and consider the definitive terms of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger. All members of the Hughes board of directors were present at or participated by teleconference in the meeting. The presentations made, including the joint presentation from representatives of Credit Suisse First Boston and Goldman Sachs, financial advisors to Hughes in connection with the Hughes/ EchoStar merger, and other matters discussed at this meeting are described below as part of the description of the October 28, 2001 meeting of the GM board of directors, which was held concurrently.

After receiving the recommendations of Hughes management and considering the other presentations made and information delivered at the meeting, as further described below, and the information and advice previously provided to and the previous deliberations of the Hughes board of directors, the Hughes board of directors unanimously determined that the transactions, including the execution, delivery and performance of the Hughes/ EchoStar merger agreement, the implementation agreement and the GM/Hughes separation agreement, were advisable, desirable and in the best interests of Hughes and its stockholder and approved all elements of the GM/ Hughes separation transactions, the Hughes/ EchoStar merger and related transactions requiring its approval and recommended to the GM board of directors that it approve the Hughes/ EchoStar merger.

October 28, 2001 GM Capital Stock Committee Meeting. On October 28, 2001, the GM capital stock committee met, in a continuation of a joint session with the GM board of directors and the Hughes board of directors that had been convened on October 27, 2001, to discuss and consider the definitive terms of the GM/Hughes separation transactions and the Hughes/ EchoStar merger and related transactions. All members of the committee were in attendance at this meeting.

The GM capital stock committee reviewed and considered the matters discussed at the meeting, as discussed above and below, and the recommendation of GM and Hughes management and the Hughes board of directors that the GM board of directors approve the GM/ Hughes separation transactions and the Hughes/ EchoStar merger and related transactions as proposed. After considering the presentations made and information delivered at the meeting and the information and advice previously provided to and reviewed by the committee and its prior deliberations, the committee unanimously concluded that the GM/ Hughes separation transactions and Hughes/ EchoStar merger and related transactions, on the terms and conditions presented, were as of such date advisable, desirable and in the best interests of GM and its common stockholders and fair to each class of GM common stockholders and recommended to the GM board of directors that General Motors enter into the agreements relating to the transactions.

October 28, 2001 General Motors Board Meeting. On October 28, 2001, the GM board of directors met, in a continuation of a joint session with the GM capital stock committee and Hughes board of directors that had been convened on October 27, 2001, to discuss and consider the definitive terms of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger and related transactions. All except three members of the GM board of directors were present at or participated by teleconference in the meeting.

At the October 28, 2001 meeting, Mr. Feldstein provided a report of the developments since the meeting recessed. He noted the withdrawal by Sky Global Networks of its proposal and reported on the resolution which had been reached on each of the items that had remained open with EchoStar when the meeting had recessed. Referencing briefing material that had previously been sent to the directors, Mr. Feldstein explained that the financing issues identified in the previous day's discussion had been addressed on an interim basis pursuant to an arrangement involving the pledge of \$2.7625 billion of EchoStar Class B common stock beneficially held by Mr. Ergen. Under this arrangement, General Motors would agree to fund \$2.7625 billion of the financing required for the transaction with EchoStar, with the expectation that its commitment would be replaced by alternative financing sources as soon as possible following announcement of the transaction. If such alternative financing were not obtained prior to the time when the transaction was to close, General Motors would provide the necessary financing and receive a promissory note collateralized with the stock of Mr. Ergen. Mr. Feldstein noted that all other aspects of the transaction were the same as previously presented to the directors.

Mr. Michael Gaines, Vice President and Chief Financial Officer of Hughes, then provided a report on Hughes' plan for funding its operations from October 28, 2001 through the anticipated closing date of a transaction between Hughes and EchoStar. Various questions were then asked and answered.

At this time, Mr. Pfeiffer on behalf of the non-management directors asked senior management of both GM and Hughes to present their conclusions concerning the proposed transaction and the previously identified strategic objectives for a transaction involving Hughes. Mr. Shaw enthusiastically recommended that General Motors and Hughes enter into the proposed transaction with EchoStar. Mr. Wagoner, with similar enthusiasm, supported the proposed EchoStar transaction as the means of best enhancing stockholder value and the interests of GM and Hughes.

The GM board of directors also received the joint presentation from representatives of Credit Suisse First Boston and Goldman Sachs, financial advisors to Hughes in connection with the Hughes/ EchoStar merger, and oral opinions, later confirmed in writing, from each of them to the effect that, based upon and subject to the matters described in the opinions and based upon such other matters as such financial advisors considered relevant, as of the date of that opinion and based on market conditions on that date, the exchange ratios set forth in the Hughes/ EchoStar merger agreement were fair from a financial point of view to the holders of Hughes Class C common stock immediately prior to the Hughes/ EchoStar merger, including General Motors, the holders of GM \$1 2/3 par value common stock and the holders of GM Class H common stock, as applicable. The fairness opinions from the Hughes financial advisors were also addressed to the Hughes board of directors. For more information about the fairness opinions received from the Hughes financial advisors, see Fairness Opinions of Hughes' Financial Advisors.

In addition, the GM board of directors received presentations from representatives of Merrill Lynch and Bear Stearns, financial advisors to General Motors in connection with the proposed transactions, and oral opinions, later confirmed in writing, from each of them to the effect that, on the basis of and subject to the assumptions, conditions, limitations and other matters described therein, as of that date, taking into account all relevant financial aspects of the transactions taken as a whole, the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock, if applicable, and the holders of the GM Class H common stock in the GM/ Hughes separation transactions was fair, from a financial point of view, to the holders of the GM \$1 2/3 par value common stock as a class and the holders of the GM Class H common stock as a class, respectively. For more information about the fairness opinions received from the GM financial advisors, see Fairness Opinions of GM's Financial Advisors.

After receiving the recommendations of Hughes management, the Hughes board of directors, GM management and the GM capital stock committee and considering the other presentations made and

information delivered at the meeting and the information and advice previously provided to and reviewed by the board of directors and its prior deliberations, the GM board of directors, by unanimous vote of the directors present, determined that the transactions, including the execution of the implementation agreement, the contribution of the stock of Hughes to a newly formed holding company which would become the parent company of Hughes at the time of the Hughes split-off and the amendments to GM's restated certificate of incorporation in connection with the transactions, were advisable, desirable and in the best interests of General Motors and its stockholders. In addition, the GM board of directors, by the same vote, determined that, as of October 28, 2001, the GM/Hughes separation transactions, on the terms and subject to the conditions presented, would be fair to the GM \$1 2/3 par value common stockholders and the GM Class H common stockholders. On such date, the GM board of directors further determined, by the same vote, that, subject to its fiduciary duties under applicable law, the GM board of directors would recommend the GM/Hughes separation transactions for approval by the GM common stockholders. Accordingly, the GM board of directors approved and authorized the GM/ Hughes separation transactions, the Hughes/ EchoStar merger and related transactions.

On October 28, 2001, General Motors, Hughes and EchoStar signed definitive agreements relating to the transactions and jointly issued a press release announcing their agreement to enter into the transactions.

On November 1, 2001, the lawsuit filed by EchoStar against Hughes and certain other parties in February, 2000 was dismissed with prejudice. In addition, all counterclaims made by Hughes in connection with that lawsuit were dismissed with prejudice.

On November 5, 2001, EchoStar succeeded in obtaining a commitment from an alternative financing source, Credit Suisse First Boston, for the \$2.7625 billion financing commitment provided by General Motors in connection with the transactions. Accordingly, the GM interim financing commitment, and the related pledge of EchoStar stock by Mr. Ergen, were terminated.

From time to time since October 28, 2001, the GM board of directors and the Hughes board of directors have received information and updates regarding the status of the transactions.

Further Discussions with EchoStar; Restatement of Transaction Agreements. From time to time after the execution of the definitive agreements with EchoStar on October 28, 2001, representatives of GM, Hughes and EchoStar, and their respective advisors, have engaged in discussions regarding various matters relating to the transactions.

On December 14, 2001, General Motors and Hughes provided their written consent to EchoStar's execution of agreements relating to a \$1.5 billion investment by Vivendi Universal in preferred stock of EchoStar and the issuance of \$700 million of EchoStar DBS Senior Notes. For a description of the Vivendi Universal investment and the EchoStar DBS Senior Notes offering, see Description of the Transactions Hughes/ EchoStar Merger Financings. On December 14, 2001, General Motors, Hughes and EchoStar also amended several provisions of the implementation agreement and the Hughes/ EchoStar merger agreement to reflect certain of the terms of the investment by Vivendi Universal.

At the time of the signing in October 2001, General Motors, Hughes and EchoStar had anticipated that certain modifications to the structure of the transactions might become appropriate. As a result, the parties agreed to appropriately amend and restate certain of the transaction agreements upon the final determination of the nature and scope of such structural modifications. On _____, 2002, the parties amended and restated the transaction agreements entered into at the signing to reflect, among other things, the creation of a holding company which would become the parent company of Hughes at the time of the Hughes split-off and Hughes/ EchoStar merger and the corporate entity into which EchoStar would be merged pursuant to the Hughes/ EchoStar merger.

In addition, as contemplated by the terms of a letter agreement entered into at the time of the signing in October 2001, as amended and restated on _____, 2002 relating to registration rights to be provided by New EchoStar to certain parties, the parties continued negotiations relating to the terms of registration rights agreements. For more information about these registration rights, see Shares Eligible For Future Sale.

Negotiations among GM, Hughes and EchoStar also continued with respect to the terms of the certificate of incorporation, bylaws and stockholder protection rights agreement for New EchoStar. For more information about these arrangements, see New EchoStar Capital Stock.

Recommendations of the Hughes Board of Directors, the GM Capital Stock Committee and the GM Board of Directors; Fairness of the Transactions

As described above, the managements and boards of directors of General Motors and Hughes considered over a significant period of time the strategic challenges facing Hughes and reviewed and assessed various alternatives for a strategic transaction involving Hughes that would meet those challenges, including holding exploratory discussions with numerous telecommunications companies and detailed negotiations over proposals submitted by Sky Global Networks and The News Corporation and proposals submitted by EchoStar. See Alternatives to the Transactions and GM's Development of the Transactions above. Based on this lengthy consideration, at meetings held on October 28, 2001, the Hughes board of directors, the GM capital stock committee and the GM board of directors acted on the transactions.

The Hughes board of directors has unanimously approved the transactions, and recommended to the GM board of directors that it approve the Hughes/ EchoStar merger.

The GM capital stock committee also unanimously recommended to the GM board of directors that General Motors enter into the agreements relating to the transactions. The GM board of directors, upon the recommendation of GM management and the GM capital stock committee, as well as the recommendation of Hughes management and the Hughes board of directors, unanimously determined that the transactions, including the execution of the implementation agreement, the contribution of the stock of Hughes to a newly formed holding company and the amendments to GM's restated certificate of incorporation in connection with the transactions, were advisable, desirable and in the best interests of General Motors and its stockholders and approved these matters. In addition, the GM board of directors, upon recommendation of the GM capital stock committee, has unanimously determined that the transactions, on the terms and subject to the conditions of the transaction agreements, would be fair to the GM \$1 2/3 par value common stockholders and the GM Class H common stockholders and recommends the GM/Hughes separation transactions for approval by the GM common stockholders.

In considering the transactions, the GM board of directors concluded that a potential strategic transaction involving the separation of the Hughes business from GM that would result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances in accordance with provisions of the GM restated certificate of incorporation, would not be in the best interests of GM and its common stockholders. A recapitalization under such provisions, although it would provide a 20% premium to the GM Class H common stockholders in comparison to the trading price of the GM Class H common stock at the time the exchange rate would be set under these provisions, would likely produce substantial dilution in the value of the GM \$1 2/3 par value common stock and would change substantially the form and nature of the investment of the GM Class H common stockholders, who, instead of having a tracking stock investment in the Hughes business, would then have a more conventional investment in all of GM's operations. Accordingly, in light of the substantial benefits which the transactions are expected to provide to the holders of both classes of GM common stock, the GM board of directors determined that the transactions should be structured so as not to result in a recapitalization under the relevant provisions of the GM restated certificate of incorporation and, for this purpose, determined to recommend to the GM common stockholders the proposed amendment of the GM restated certificate of incorporation.

In granting their approvals and making their recommendations, the Hughes board of directors, GM capital stock committee, and GM board of directors each considered the following as material positive aspects of the transactions assuming the completion of the transactions:

Enhanced Competitive Position of Hughes. The Hughes/ EchoStar merger is expected to better position New EchoStar to compete in the multi-channel video programming distribution market and, overall, in the telecommunications industry than Hughes (or EchoStar) alone. The combination of Hughes and EchoStar would create one of the largest subscription television platforms, enabling New EchoStar to compete more

effectively with cable television providers (who currently account for about 80 percent of the multi-channel video programming distribution market) and would provide New EchoStar with a significant opportunity to develop an expanded business in the consolidating telecommunications industry.

Potential Cost and Revenue Synergies. The combination of Hughes and EchoStar is expected to provide New EchoStar with an opportunity to realize significant economies of scale and generate substantial cost and revenue synergies. The principal elements of the expected cost savings include reductions in subscriber acquisition costs, reduced customer turnover, lower programming costs and elimination of duplicative overhead costs. The principal elements of the expected revenue growth opportunities include greater availability of less expensive broadband services, penetration of more local markets with access to local programming, expansion of high definition television, specialty programming, video-on-demand and pay-per-view programming. Based on analyses provided by Hughes management (which were, in turn, based on certain assumptions and qualifications), the total net present value of these revenue and cost synergies netted against the implementation costs were estimated at the time of the October 28, 2001 meeting to range from about \$16.7 billion to \$23.4 billion. In addition, in considering this aspect of the transactions, the Hughes board of directors, the GM capital stock committee and the GM board of directors considered the estimated cost and revenue synergies and related analyses of the GM and Hughes financial advisors presented at the October 28, 2001 meeting as described at Fairness Opinions of GM's Financial Advisors and Fairness Opinions of Hughes' Financial Advisors below.

Premium Valuation of Hughes. The transactions, as negotiated with EchoStar, would provide a premium valuation to GM and GM common stockholders for their interests in Hughes. Specifically, based on the exchange ratios of GM Class H common stock and EchoStar Class A common stock, respectively, for common stock of New EchoStar in the Hughes/EchoStar merger and on the closing stock price of the GM Class H common stock and EchoStar Class A common stock, respectively, on October 26, 2001, the last trading day before the announcement of the transactions, the transactions would provide an implied premium of about 20% to GM and GM stockholders for their interests in Hughes. In considering this aspect of the transactions, the Hughes board of directors, the GM capital stock committee and the GM board of directors also considered the premium valuation and related analyses of the GM and Hughes financial advisors presented at the October 28, 2001 meeting as described at Fairness Opinions of GM's Financial Advisors and Fairness Opinions of Hughes' Financial Advisors below.

Liquidity for GM; Credit Rating Support. The transactions are expected to provide significant liquidity to General Motors in respect of its retained economic interest in Hughes, which will help to support the credit position of GM after the transactions. The anticipated liquidity will result primarily from:

GM's receipt of a dividend of up to \$4.2 billion in cash from Hughes as part of the Hughes recapitalization;

as and to the extent applicable, the reduction in GM indebtedness and/or the receipt of cash proceeds that may result from any GM share dispositions, as described in greater detail elsewhere in this document; and

as and to the extent applicable, GM's retention of shares of New EchoStar Class C common stock for up to five years after the Hughes split-off.

The liquidity that GM would receive from the Hughes dividend distribution and the associated reduction of its retained economic interest in Hughes would be provided based on the trading price of the GM Class H common stock after receipt of the necessary approvals for the transactions and determined during a specified period preceding the completion of the transactions.

Tax-Free Transaction. Neither the GM common stockholders nor, except as to certain prior intercompany transactions which will be taken into income, General Motors will recognize gain or loss for U.S. federal income tax purposes as a result of the Hughes split-off, and neither HEC Holdings nor the holders of HEC Holdings Class C common stock will recognize gain or loss for U.S. federal income tax purposes as a result of the Hughes/EchoStar merger. Any strategic transaction involving Hughes that would have been taxable likely would have resulted in an amount of corporate and stockholder tax such that the transaction would be considered uneconomic in comparison to GM's continued ownership of Hughes.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

In granting their approvals and making their recommendations, the Hughes board of directors, the GM capital stock committee, and the GM board of directors also considered a number of potentially material negative factors of pursuing the transactions, including the following:

Regulatory Concerns. There is a risk that the Hughes/ EchoStar merger might not receive required regulatory approvals or clearances from competition authorities in the United States and certain other countries, the FCC and telecommunications regulatory authorities in certain other countries and numerous state and local authorities, or that certain of these governmental authorities could bring an action seeking to prevent the Hughes/ EchoStar merger. There is also a risk that certain of these governmental authorities may attempt to impose onerous conditions on their approval or clearance of the transactions.

Competitive Risks During Pendency. The pendency of the Hughes/ EchoStar merger for many months following the announcement of the execution of the transaction agreements could have an adverse impact on Hughes' ability to attract and retain customers and employees and otherwise weaken the competitive position of Hughes.

Preclusion of Other Potential Opportunities. Entering into the transaction agreements and pursuing the transactions would preclude Hughes and GM from pursuing other opportunities that were potentially available to them, including the alternative transactions that had been negotiated with Sky Global Networks and The News Corporation, and other opportunities that might become available during the period of many months during which the transactions would be pending.

In addition, in initially acting on the transactions at their October 28, 2001 meetings, the Hughes board of directors, the GM capital stock committee and the GM board of directors also considered the availability of the financing needed by EchoStar to complete the transactions. At that time, EchoStar did not have the full financing needed for the transactions available or committed by third parties, presenting a material risk to GM that the possible unavailability of third-party financing commitments might require recourse to financing provided by GM. Subsequently, EchoStar obtained the necessary third party financing commitments.

In addition to the positive and negative factors described above, in connection with its decisions, the GM board of directors (as well as the Hughes board of directors and the GM capital stock committee, as pertinent) considered:

the reports, presentations and recommendations of Hughes' executive management and the approvals and recommendations of the Hughes/ EchoStar merger and the related GM/ Hughes separation transactions by the Hughes board of directors;

the reports, presentations and recommendations of GM's executive management regarding the GM/ Hughes separation transactions, the Hughes/ EchoStar merger and the other related transactions;

that some of the directors and executive officers of Hughes have or may have interests in connection with the transactions that are different from, or in addition to, the interests of the stockholders of GM;

the advice, presentation and written fairness opinions of Credit Suisse First Boston and Goldman Sachs regarding the Hughes/ EchoStar merger;

the advice, presentations and written fairness opinions of Merrill Lynch and Bear Stearns regarding the transactions;

legal advice received with respect to the transactions, including the tax consequences of the transactions, the issues and prospects concerning needed regulatory approvals, the fiduciary duties of the officers and directors of GM and Hughes to GM, Hughes and both classes of GM common stockholders and the consequences of the exchange of shares of GM Series H preference stock for shares of Hughes preference stock in connection with the transactions in the event that any GM Series H preference stock were outstanding at the time of the completion of the transactions;

the oversight by the GM capital stock committee of the development of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger, its prior deliberations concerning the strategic alternatives available with respect to Hughes and concerning the interests of the GM Class H common stockholders and the GM \$1 2/3 par value common stockholders, its determination that, on the terms

and subject to the conditions of the transaction agreements, the transactions, taken as a whole, would be fair to both the GM Class H common stockholders and the GM \$1 2/3 par value common stockholders and in the best interests of GM and its common stockholders and its recommendation that GM enter into the agreements relating to the transactions;

the information previously provided to and reviewed by the GM board of directors and the prior deliberations of the GM board of directors concerning the transactions and the possibility of alternative strategic transactions and business strategies involving the business of Hughes, including the alternative transaction that had been negotiated involving the combination of the business of Hughes and the business of Sky Global Networks following a split-off of Hughes from General Motors; and

related matters reported on at the October 28, 2001 meeting and other previous meetings of the GM board of directors.

See GM's Development of the Transactions above and Fairness Opinions of Hughes Financial Advisors and Fairness Opinions of GM's Financial Advisors below.

The GM board of directors also recognized that the existence of two classes of GM common stock having separate dividend and other rights could give rise to potential divergences between the interests of the two classes of GM common stock in connection with the contemplated transactions, and gave consideration to this potential divergence of interests in its deliberations. In December 2000, the GM board of directors, consistent with established governance policies of GM, had delegated to the GM capital stock committee (which consists solely of independent directors of GM) the responsibility to oversee the activities to be undertaken by management of General Motors and of Hughes in developing the terms of a possible transaction involving Hughes. This responsibility included reviewing and making recommendations to the GM board with regard to any such transaction that might be proposed by Hughes or GM management, including the fairness to the holders of both classes of GM common stock of the process for determining the terms of a transaction, any conditions to approval or completion of such transaction that should be imposed in order to protect the interests of the holders of either class of GM common stock and the fairness of such transaction to the holders of each such class of stock.

At the outset, the GM capital stock committee considered the processes that should be followed by GM and Hughes in pursuing a possible strategic transaction involving Hughes. The GM capital stock committee considered establishing separate, formal negotiating teams to represent the interests of the two different classes of GM common stockholders in formulating the terms of the transactions but ultimately determined that, under the circumstances, formal teams were unnecessary, given the nature of the transactions proposed by Sky Global Networks and The News Corporation and by EchoStar, the potential divergences between the interests of GM's two classes of common stockholders, the autonomy of Hughes management and the Hughes board of directors and the significant oversight role that the GM capital stock committee would play with respect to the activities of the management of General Motors and of Hughes in connection with the possible transactions. In this regard, the GM capital stock committee considered, as the form and terms of the transactions evolved, that with respect to the aspects of the transactions as to which there might be a material divergence between the interests of GM's two classes of common stockholders there would be little practical benefit in having such separate, formal negotiating teams. In negotiating with Sky Global Networks and The News Corporation, in the one case, or EchoStar, in the other case, regarding the terms for a combination with Hughes, particularly with respect to the form of consideration to be received by GM common stockholders and GM and the exchange ratio, the interests of GM's two classes of common stockholders did not diverge in any material respect. Insofar as the transactions would result in a cash dividend by Hughes to GM and, accordingly, have different consequences for GM's two classes of common stockholders, the interests of the GM Class H common stockholders would be congruent with the interests of Sky Global Networks and The News Corporation, in the one case, or EchoStar, in the other case, each of whom was an independent third party dealing with GM and Hughes at arms' length, while the interests of GM and GM \$1 2/3 par value common stockholders would be adequately addressed by GM management so that the involvement of such independent parties would help assure a fair outcome. In addition, the GM capital stock committee considered the autonomy of Hughes management and the Hughes board of directors and the significant oversight role of the

GM capital stock committee as a substitute for the procedural protection that would be provided by separate, formal negotiating teams.

In concluding that the transactions are fair to both classes of GM common stockholders, the GM capital stock committee initially and, then, the GM board of directors placed substantial reliance on its determination that fair processes had been followed in the development of the definitive terms of the Hughes/ EchoStar merger and GM/ Hughes separation transactions. In this regard, the GM capital stock committee and the full GM board of directors confirmed the full participation of Hughes and Hughes management, along with their financial, accounting, tax, legal and other professional advisors (who were separate from those advising GM and its management), in the process of developing the terms of the Hughes/ EchoStar merger, the GM/ Hughes separation transactions and related transactions, and the similar participation of GM and GM management. During this process, both Hughes management and GM management had been provided full and confidential access to the GM capital stock committee and their recommendations, as well as those of the Hughes board of directors, regarding the proposed transactions, the alternative transactions negotiated with Sky Global Networks and The News Corporation and other possible strategic alternatives for Hughes that were sought and considered. See GM's Development of the Transactions above. In addition, the GM board of directors considered that, consistent with the GM restated certificate of incorporation and the GM board policy statement on capital stock matters, the GM/ Hughes separation transactions would be subject to the approval of the holders of a majority of the outstanding shares of GM Class H common stock and the holders of a majority of the GM \$1 2/3 par value common stock, each voting as a separate class, and also voting together as a single class based on their respective per share voting power in accordance with the GM restated certificate of incorporation.

In reviewing the fairness of the transactions, the GM capital stock committee and the GM board of directors considered, among other things, that GM would receive from Hughes prior to the Hughes split-off a dividend of up to \$4.2 billion. The GM capital stock committee and the GM board considered the Hughes dividend distribution and the associated reduction of GM's retained economic interest in Hughes as important elements of the transactions from the standpoint of GM's strategic objectives and the interests of GM \$1 2/3 par value common stockholders and attributed substantial importance to the provision that GM's retained economic interest in Hughes would be reduced on market-based terms, as the amount of the reduction in the number of notional shares representing GM's retained economic interest in Hughes would be equal to the dollar amount of the Hughes dividend distribution divided by the trading price of GM Class H common stock over a specified period preceding the completion of the Hughes split-off. See The Transactions Description of the Transactions The Hughes Recapitalization. The GM capital stock committee and the GM board of directors concluded that these market-based terms were a fair basis for the reduction of GM's retained economic interest in Hughes and the consequent reduced interest in New EchoStar. The GM capital stock committee and the GM board of directors also considered the importance of New EchoStar having adequate financial resources to fund its on-going operations after Hughes funded the Hughes dividend distribution and completed the other transactions. The financing available for these purposes was a major subject of negotiation with Sky Global Networks and The News Corporation, in the one case, and EchoStar, in the other case, and a showing that adequate financing was available for both purposes was established as a requirement for concluding the negotiations, as discussed above. Based on the financing arrangements made for New EchoStar and its projected sources and uses of funds, it was determined that New EchoStar would have adequate financing and other resources available for these purposes and, accordingly, in this respect, the interests of both classes of GM common stockholders were fairly dealt with. See Description of the Transactions Liquidity and Funding Needs of New EchoStar.

In addition, the GM board of directors relied upon the opinions delivered by Merrill Lynch and Bear Stearns with respect to the fairness, from a financial point of view, to the holders of GM \$1 2/3 par value common stock as a class and the holders of GM Class H common stock as a class, respectively, of the consideration to be provided to General Motors and its subsidiaries, the holders of GM \$1 2/3 par value common stock, if applicable, and the holders of GM Class H common stock in the GM/ Hughes separation transactions, and the presentations by representatives of Merrill Lynch and representatives of Bear Stearns to the GM board of directors relating to their respective fairness opinions. General Motors asked each of Merrill

Lynch and Bear Stearns to consider whether, taking into account all relevant financial aspects of the transactions, taken as a whole, the consideration to be provided to General Motors and its subsidiaries, the holders of GM \$1 2/3 par value common stock, if applicable, and the holders of GM Class H common stock in the GM/ Hughes separation transactions was fair from a financial point of view to the holders of GM \$1 2/3 par value common stock as a class and the holders of GM Class H common stock as a class, respectively (rather than asking one financial advisor to consider the fairness issues only from the perspective of the holders of GM \$1 2/3 par value common stock and the other financial advisor to consider the fairness issues only from the perspective of the holders of GM Class H common stock), because, among other things, General Motors believed that such an approach and standard was consistent with and would best satisfy the fiduciary duties which the GM board of directors has to the holders of each class of GM common stock. See Fairness Opinions of GM's Financial Advisors below.

In approving the transactions, including determining the fairness of the transactions as a whole, on the terms and conditions of the transaction agreements, to the holders of each class of GM common stock, the GM capital stock committee and the GM board of directors considered each of the foregoing factors, without formally assigning weights to any specific factor, and reached its conclusions considering all the factors together.

Based on the foregoing, among other considerations, the GM board of directors has determined that the transactions are advisable and in the best interests of General Motors and its common stockholders and that the transactions as a whole, on the terms and conditions of the transaction agreements, are fair to the holders of GM \$1 2/3 par value common stock and to the holders of GM Class H common stock. The GM board of directors has unanimously approved the transactions and recommends that the GM common stockholders vote to approve each of the proposals described in this document by executing and returning the enclosed consent card as soon as possible.

Pursuant to this consent solicitation, GM \$1 2/3 par value common stockholders and GM Class H common stockholders are being asked, among other things, to ratify the GM/Hughes separation transactions and the Hughes/ EchoStar merger. As further described elsewhere in this document, GM believes that ratification by GM's common stockholders of the GM/Hughes separation transactions and the Hughes/EchoStar merger should bar any claim (other than for fraud or similar egregious misconduct) against General Motors and its directors based on these transactions, including a claim alleging unfairness of these transactions to the holders of either or both classes of GM common stock or alleging any deficiency in the process of developing the terms of these transactions or the GM board's consideration or approval of these transactions.

If the proposals relating to the transactions were to receive the requisite GM common stockholder approval, we currently believe that certain of the other applicable conditions to the completion of the transactions, including the receipt of certain requisite regulatory approvals, would not be satisfied (if satisfied at all) for some period of time after the time of the receipt of the requisite GM common stockholder approval. Accordingly, it is possible that the transactions would not be completed for a significant period of time after the time of the receipt of the requisite GM common stockholder approval. During any such time interval between the receipt of the requisite GM common stockholder approval and the satisfaction or waiver of all other conditions to the completion of the transactions, it is possible that circumstances relating to the business or financial condition of EchoStar or Hughes or financial, economic or other circumstances could change significantly and in a manner not considered at the time that the GM board of directors approved the transactions. GM common stockholders should understand that, despite any such change in circumstances that might occur during this period, it is not a condition to the completion of the transactions that the GM board of directors conclude that, at the time the transactions are to be completed or at any earlier time during such period, the transactions will be fair to both classes of GM common stockholders. The GM board of directors will not make any further determination with regard to the fairness of the transactions to both classes of GM common stockholders during this period unless the GM board of directors considers taking any action that would change in any material respect the terms on which the transactions are to be completed from the terms provided by the transaction agreements, such as agreeing to waive a condition to the completion of the transactions or making any voluntary reduction to either the number of shares subject to GM share dispositions or the amount of the Hughes dividend distribution, in which case the GM board of directors in

considering such matters would consider, among other factors, the fairness of the transactions (as to be so revised) to the holders of both classes of GM common stock in accordance with the GM board policy statement regarding certain capital stock matters.

Fairness Opinions of GM's Financial Advisors

Descriptions of the fairness opinions of GM's financial advisors in connection with the transactions, Merrill Lynch and Bear Stearns, are set forth below. These descriptions are qualified in their entirety by reference to the full text of the opinions included in Appendix C to this document.

The fairness opinions described below relate to the GM/ Hughes separation transactions, which consist of several transactions involving General Motors and Hughes that are generally designed to separate the Hughes business from General Motors in order to prepare Hughes to complete the proposed merger with EchoStar. There are two principal components to the GM/ Hughes separation transactions:

the Hughes recapitalization, which primarily involves a dividend distribution of up to \$4.2 billion from Hughes to GM and an associated reduction of GM's retained economic interest in Hughes in an amount that reflects the dividend; and

the separation of the Hughes business from GM pursuant to the Hughes split-off, which primarily consists of the exchange of shares of HEC Holdings Class C common stock on a one-for-one basis for shares of GM Class H common stock.

The GM/ Hughes separation transactions do not include the Hughes/ EchoStar merger. For a more detailed description of the GM/Hughes separation transactions, see [The Transactions](#) [Description of the Transactions](#) [The GM/ Hughes Separation Transactions](#).

Merrill Lynch and Bear Stearns, in opining as to the fairness, from a financial point of view, of the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock, if applicable, and to the holders of the GM Class H common stock in the GM/ Hughes separation transactions, did take into account the relevant financial aspects of the Hughes/ EchoStar merger and certain related transactions. Merrill Lynch and Bear Stearns took such aspects into account because of the underlying assumption of each of their respective opinions that the Hughes/ EchoStar merger and certain related transactions would each be completed in a timely manner and in accordance with its terms. For a more detailed discussion of each of the transactions relevant to the respective opinions of Merrill Lynch and Bear Stearns, see [Description of the Transactions](#) [The GM/Hughes Separation Transactions](#), [The Hughes/EchoStar Merger](#), [GM Share Dispositions](#), [Hughes Business and Dividend Financings](#), and [Hughes/ EchoStar Merger Financings](#).

You should understand that, because the fairness opinions of Merrill Lynch and Bear Stearns were delivered prior to the final determination of the necessary structural modifications to the transactions described at [GM's Development of the Transactions](#) [Further Discussions with EchoStar](#); [Restatement of Transaction Agreements](#), the following descriptions do not reflect the fact that HEC Holdings will become the parent company of Hughes in connection with the GM/ Hughes separation transactions and the corporate entity into which EchoStar will be merged in the Hughes/ EchoStar merger.

Merrill Lynch Fairness Opinion

On October 28, 2001, at a meeting of the GM board of directors held to consider the transactions, Merrill Lynch delivered to the GM board of directors its oral opinion, which opinion was later confirmed by delivery of a written opinion, that, as of such date and based upon and subject to the assumptions, conditions, limitations and other matters set forth in that opinion, taking into account all relevant financial aspects of the transactions taken as a whole, the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock, if applicable, and to the holders of the GM Class H common stock in the GM/ Hughes separation transactions is fair, from a financial point of view, to the holders of the GM \$1 2/3 par value common stock as a class and to the holders of the GM Class H common stock as a class, respectively.

The full text of the Merrill Lynch written opinion, which sets forth the assumptions made, matters considered, and qualifications and limitations on the review undertaken, is included in Appendix C to this document and is incorporated into this document by reference. The summary of the opinion set forth in this document is qualified in its entirety by reference to the full text of the opinion. You are urged to read the Merrill Lynch opinion in its entirety. No limitations were imposed by General Motors or the GM board of directors with respect to the investigations made or procedures followed by Merrill Lynch in rendering its opinion.

The Merrill Lynch opinion was provided to the GM board of directors for its use and benefit and is directed only to the fairness, from a financial point of view, to the holders of GM \$1 2/3 par value common stock as a class and to the holders of GM Class H common stock as a class, respectively, taking into account all relevant financial aspects of the transactions, taken as a whole, of the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock, if applicable, and to the holders of the GM Class H common stock in the GM/ Hughes separation transactions. The opinion of Merrill Lynch does not constitute a recommendation to any GM common stockholder as to whether such stockholder should vote to approve any of the proposals described in this document. The terms of the GM/ Hughes separation transactions were developed by the management of General Motors and Hughes and were approved by the GM board of directors.

The summary set forth below does not purport to be a complete description of the analyses underlying the opinion of Merrill Lynch. The preparation of a fairness opinion is a complex analytic process involving various determinations as to the most appropriate and relevant methods of financial analysis and the application of those methods to the particular circumstances and, therefore, such an opinion is not readily susceptible to partial analysis or summary description. In arriving at its opinion, Merrill Lynch did not attribute any particular weight to any analysis or factor considered by it, but rather made qualitative judgments as to the significance and relevance of each analysis and factor. Accordingly, Merrill Lynch believes that its analyses must be considered as a whole and that selecting portions of its analyses, without considering all analyses, would create an incomplete view of the process underlying its opinion.

In performing its analyses, Merrill Lynch made numerous assumptions with respect to industry performance, general business, economic, market and financial conditions and other matters, many of which are beyond the control of General Motors. Any estimates contained in the analyses performed by Merrill Lynch are not necessarily indicative of actual values or future results, which may be significantly more or less favorable than suggested by such analyses. In addition, estimates of the value of businesses or securities do not purport to be appraisals or to reflect the prices at which such businesses or securities might actually be sold. Accordingly, such analyses and estimates are inherently subject to substantial uncertainty. The opinion of Merrill Lynch was one of several factors taken into consideration by the GM board of directors in making its determination to approve the GM/ Hughes separation transactions. Consequently, the Merrill Lynch analyses described below should not be viewed as determinative of the decision of the GM board of directors with respect to the fairness from a financial point of a view to the holders of GM \$1 2/3 par value common stock as a class and to the holders of GM Class H common stock as a class, respectively, of the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock as a class and to the holders of GM Class H common stock as a class.

In preparing its opinion, Merrill Lynch, among other things:

reviewed GM's restated certificate of incorporation and bylaws, each as of the date of the fairness opinion of Merrill Lynch;

reviewed GM's annual reports, Forms 10-K and related financial information for the three fiscal years ended December 31, 2000 and GM's Forms 10-Q and the related unaudited financial information for the quarterly periods ended March 31, 2001 and June 30, 2001;

reviewed Hughes' annual reports, Forms 10-K and related financial information for the three fiscal years ended December 31, 2000 and Hughes' Forms 10-Q and the related unaudited financial information for the quarterly periods ended March 31, 2001, June 30, 2001 and September 30, 2001;

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

reviewed PanAmSat's annual reports, Forms 10-K and related financial information for the three fiscal years ended December 31, 2000 and PanAmSat's Forms 10-Q and the related unaudited financial information for the quarterly periods ended March 31, 2001, June 30, 2001 and September 30, 2001;

reviewed EchoStar's annual reports, Forms 10-K and related financial information for the three fiscal years ended December 31, 2000 and EchoStar's Forms 10-Q and the related unaudited financial information for the quarterly periods ended March 31, 2001 and June 30, 2001;

reviewed certain information, including historical financial data and financial projections, relating to the business, earnings, cash flow, assets, liabilities and prospects of General Motors, Hughes and EchoStar furnished to Merrill Lynch by General Motors, Hughes and EchoStar, as the case may be;

conducted discussions with members of senior management of General Motors, Hughes and EchoStar concerning their respective businesses and prospects and their views regarding the strategic rationale for, and the financial effects on General Motors, Hughes and EchoStar, as the case may be, of, the transactions;

reviewed certain information, including financial projections relating to the amount and timing of the revenue and cost savings synergies and related expenses expected to result from the transactions, which Merrill Lynch refers to herein as the expected synergies of the transactions, furnished to Merrill Lynch by General Motors, Hughes and EchoStar, as the case may be;

reviewed the pro forma financial results, financial condition and capitalization of each of General Motors and Hughes and of the pro forma combined company, in each case after giving effect to the transactions;

conducted discussions with members of senior management of General Motors, Hughes and EchoStar concerning the expected synergies of the transactions;

conducted discussions with members of senior management of Hughes concerning their views regarding the strategic rationale for, and the financial effects on Hughes of, the transactions and various strategic alternatives available to Hughes;

compared the results of operations of Hughes and EchoStar with those of certain companies that Merrill Lynch deemed to be reasonably similar to Hughes and EchoStar, respectively;

reviewed the following, including any exhibits and attachments or schedules thereto:

the implementation agreement;

the Hughes/ EchoStar merger agreement;

the GM/ Hughes separation agreement;

the proposed amendments to Article Fourth of the GM restated certificate of incorporation;

the proposed amendments to the amended and restated certificate of incorporation of Hughes;

the contribution and transfer agreement by and between General Motors and United States Trust Company of New York;

the supplemental agreement and guaranty; and

the pledge agreement and certain related agreements thereto;

reviewed the commitment letters related to the financing by EchoStar and Hughes of the Hughes/ EchoStar merger; and

reviewed such other financial studies and analyses and performed such other investigations and took into account such other matters as Merrill Lynch deemed necessary, including Merrill Lynch's assessment of general economic, market and monetary conditions.

In preparing its opinion, Merrill Lynch relied on the accuracy and completeness of all information supplied or otherwise made available to it, discussed with or reviewed by or for it, or publicly available, and Merrill Lynch did not assume any responsibility for independently verifying such information or undertake an independent evaluation or appraisal of the assets or liabilities of General Motors, Hughes or EchoStar, and was not furnished with any such evaluation or appraisal. In addition, Merrill Lynch did not assume any obligation to conduct, nor did Merrill Lynch conduct, any physical inspection of the properties or facilities of General Motors, Hughes or EchoStar. With respect to the financial projections and the analyses of the expected synergies of the transactions furnished to or discussed with Merrill Lynch by General Motors, Hughes or EchoStar, as the case may be, Merrill Lynch assumed that they were reasonably prepared and reflected the best currently available estimates and judgments of the managements of General Motors, Hughes or EchoStar as to the expected future financial performance of General Motors, Hughes, EchoStar and the pro forma combined company, and as to the expected synergies of the transactions.

Furthermore, in preparing its opinion, Merrill Lynch assumed that in the course of obtaining the necessary consents or approvals, including contractual, governmental or otherwise, for the transactions no restrictions, including any divestiture requirements or amendments or modifications, will be imposed that would have a material adverse effect on the contemplated benefits of the transactions. In addition, Merrill Lynch assumed that each of the transactions will be consummated in a timely manner and in accordance with their terms as contemplated by the various agreements and other documents referred to in the Merrill Lynch opinion. Merrill Lynch was advised by General Motors, and it assumed, that:

as a result of the amendment to Article Fourth of the GM restated certificate of incorporation, the provisions of Article Fourth, Division I, Section (c) of the GM restated certificate of incorporation should not apply to the transactions; and

General Motors would be responsible for no contingent liabilities of Hughes which are material in the aggregate as a result of the completion of the transactions.

Merrill Lynch also assumed that the average GM Class H common stock price used to effect the reduction of GM's retained economic interest in Hughes would be determined by the GM board of directors in accordance with the terms set forth in the GM/ Hughes separation agreement. Merrill Lynch further assumed that there will be no material adverse effect on General Motors, Hughes or the pro forma combined company resulting from the accounting treatment of the transactions. The opinion of Merrill Lynch is necessarily based upon market, economic, financial and other conditions as they existed and could be evaluated as of the date of the Merrill Lynch opinion. During the course of its engagement, Merrill Lynch was asked by the GM board of directors to solicit indications of interest from various third parties regarding a transaction with Hughes and Merrill Lynch considered the results of such solicitation in rendering its opinion. Merrill Lynch expressed no opinion as to the prices at which the Hughes Class C common stock, the Hughes preference stock or the GM \$1 2/3 par value common stock will trade subsequent to the completion of the transactions. In addition, Merrill Lynch was not requested to opine as to, and its opinion does not in any manner address, GM's or Hughes' underlying business decision to proceed with or effect the transactions, the relative merits of the transactions as compared to any alternative business strategies or transactions that might exist for GM or Hughes or the effects of any other transaction in which GM or Hughes might engage. Furthermore, Merrill Lynch was not requested to opine as to, and its opinion does not in any manner address, the PanAmSat stock sale.

In preparing its opinion, Merrill Lynch also assumed that the separation of Hughes from GM will be treated as a tax-free distribution under Section 355 and the related provisions of the Code and Merrill Lynch has further assumed that the Hughes/ EchoStar merger will qualify as a tax-free reorganization within the meaning of Section 368(a) of the Code.

As part of its investment banking business, Merrill Lynch is engaged continually in the valuation of businesses and their securities in connection with mergers and acquisitions and strategic transactions and for other purposes. Merrill Lynch was retained by General Motors because Merrill Lynch is an internationally recognized investment banking firm, with substantial experience in complex strategic transactions, and

because Merrill Lynch was familiar with General Motors, including its capital structure, and Hughes. Pursuant to an engagement letter, General Motors agreed to pay Merrill Lynch fees of:

\$1,000,000 on the date of such engagement letter (which amount is credited towards the amount payable under the third bullet below);

\$500,000 payable upon delivery of its fairness opinion (which amount is credited towards the amount payable under the third bullet below); and

between \$10,000,000 and \$24,000,000 after the completion of the transactions, such amount to be determined based upon the difference in the value of the interests of the GM \$1 2/3 par value common stockholders and GM Class H common stockholders in Hughes at the time of announcement and those interests around the time of the completion of the transactions.

General Motors also agreed to reimburse Merrill Lynch for its reasonable out-of-pocket expenses incurred in connection with Merrill Lynch's activities under the engagement letter, including the reasonable fees and disbursements of its legal counsel and to indemnify Merrill Lynch and certain related persons and entities for certain liabilities, including liabilities under securities laws, related to or arising out of its engagement.

Merrill Lynch has, in the past, provided financial advisory and financing services to GM and its affiliates and may continue to do so, and Merrill Lynch has received, and may receive, fees for the rendering of such services. In addition, in the ordinary course of its business, Merrill Lynch may actively trade shares of the GM \$1 2/3 par value common stock, the GM Class H common stock, and other securities of GM for its own account and for the accounts of its customers and, accordingly, may at any time hold a long or short position in such securities.

Set forth below is a summary of the material financial analyses performed by Merrill Lynch in connection with the preparation of the opinion of Merrill Lynch dated October 28, 2001. **The financial analyses summarized below include information presented in tabular format. In order to understand fully Merrill Lynch's financial analyses, the tables must be read together with the text of each summary. The tables alone do not constitute a complete description of the financial analyses. Considering the data in the tables below without considering the full narrative description of the financial analyses, including the methodologies and assumptions underlying the analyses, could create a misleading or incomplete view of Merrill Lynch's analyses.**

As part of the transactions, the holders of GM Class H common stock will receive shares of New EchoStar Class C common stock in exchange for their shares of GM Class H common stock. In addition, General Motors may be a significant holder of New EchoStar Class C common stock upon the completion of the transactions. Therefore, although Merrill Lynch's opinion addresses the fairness, from a financial point of view, of the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock, if applicable, and to the holders of the GM Class H common stock in the GM/ Hughes separation transactions, Merrill Lynch performed its analyses giving effect not only to the GM/ Hughes separation transactions, but also to the Hughes/ EchoStar merger and certain other related transactions, all of which were deemed to be relevant by Merrill Lynch to holders of the GM \$1 2/3 par value common stock and to holders of the GM Class H common stock.

Merrill Lynch performed a variety of analyses detailed below related to the Hughes/EchoStar merger which were deemed to be relevant by Merrill Lynch to both the holders of the GM \$1 2/3 par value common stock and the holders of the GM Class H common stock.

Merrill Lynch performed analyses to evaluate the value of GM Class H common stock on October 25, 2001 compared with the value of the New EchoStar Class C common stock after giving effect to the transactions. See Hughes Analysis, EchoStar Analysis, Expected Synergies Valuation Analysis and Premium to GM Class H Common Stockholders and GM \$1 2/3 Par Value Common Stockholders.

Merrill Lynch also performed analyses that examined whether the exchange ratio in the Hughes/ EchoStar merger was higher or lower than the historical ratio of the trading prices of EchoStar Class A common stock and the GM Class H common stock. See Historical Exchange Ratio Analysis.

Merrill Lynch also performed analyses that examined whether the implied valuations for Hughes' principal assets on a stand-alone basis were higher or lower than the valuations for those assets based on the implied transaction offer price per share in the Hughes/ EchoStar merger. See [Relative Valuation of Direct Broadcast Satellite Assets](#).

In the case of the holders of the GM Class H common stock, upon the completion of the transactions they would own only New EchoStar Class C common stock. In the case of the holders of the GM \$1 2/3 par value common stock, GM's retained economic interest in Hughes would be reduced and GM would correspondingly receive a distribution from Hughes on the basis of the average market price of the GM Class H common stock over a specified period preceding the completion of the GM/Hughes separation transactions. After completion of the transactions, the holders of the GM \$1 2/3 par value common stock may have an indirect interest in New EchoStar by virtue of GM's expected ownership of shares of New EchoStar Class C common stock. Merrill Lynch performed the analyses detailed below with respect to the impact of the transactions on GM's credit rating and earnings per share which were deemed to be relevant by Merrill Lynch to the holders of the GM \$1 2/3 par value common stock because of their continued ownership in General Motors after the completion of the transactions.

Merrill Lynch examined the impact of the reduction of GM's retained economic interest in Hughes and the corresponding dividend distribution by Hughes to GM in the GM/Hughes separation transactions and whether such transactions would improve the credit profile of General Motors and whether and by how much the earnings per share of General Motors would increase or decrease because of the GM/Hughes separation transactions. See [Credit Rating Impact Considerations for General Motors](#) and [Earnings Impact Considerations for General Motors](#).

Merrill Lynch did not attribute any particular weight to any analysis or factor considered by it, but rather made qualitative judgments as to the significance and relevance of each analysis and factor. Accordingly, Merrill Lynch believes that its analyses must be considered as a whole and that selecting portions of its analyses, without considering all analyses, would create an incomplete view of the process underlying its opinion.

Hughes Analysis. Merrill Lynch performed a sum-of-the-parts valuation of each of Hughes' principal businesses and significant investments in order to derive an implied per share equity value for Hughes. Merrill Lynch examined and independently valued DIRECTV, DIRECTV Latin America, PanAmSat, Hughes Network Systems, Spaceway, Telocity, Hughes' public investments and Hughes' corporate reserve allocation. The corporate reserve allocation represents an estimate by Hughes management of future cash expenses which are not otherwise directly allocated to any of the business units of Hughes.

Using the sum-of-the parts valuation analyses described below for each of Hughes' principal businesses and significant investments, Merrill Lynch estimated the per share value of Hughes, on a consolidated basis, to be:

	<u>Low</u>	<u>High</u>
Implied Equity Value per Share	\$12.66	\$ 17.10

DIRECTV. Merrill Lynch performed a discounted cash flow, or DCF, analysis of DIRECTV using projections provided by Hughes management.

The DCF for DIRECTV, which includes the cash flow associated with National Rural Telecommunications Cooperative subscribers, was calculated assuming discount rates ranging from 12.0% to 14.0% and was comprised of the sum of the present values of:

the projected cash flows for the third quarter of 2001 through the fiscal year ended December 31, 2005, and

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

the 2005 terminal value based upon a range of multiples of estimated 2005 earnings before interest, taxes, depreciation and amortization, which is referred to as EBITDA, from 9.0x to 11.0x.

	Low	High
	(in millions)	
DCF Value of DIRECTV	\$ 14,530	\$ 19,240

Using publicly available information, Merrill Lynch compared selected historical stock, financial and operating data and ratios for DIRECTV with corresponding data and ratios of similar publicly traded companies. DIRECTV is not a publicly traded company. However, Merrill Lynch inferred a public trading value for DIRECTV by:

calculating total enterprise value for Hughes based on public market values at October 25, 2001; and

subtracting therefrom the estimated sum-of-the-parts enterprise value for all non-DIRECTV related assets.

These companies were selected by Merrill Lynch based upon Merrill Lynch's views as to the comparability of the financial and operating characteristics of these companies to DIRECTV.

The companies included in the DIRECTV comparable company analysis were:

British Sky Broadcasting Group PLC;

EchoStar Communications Corporation; and

Pegasus Communications Corporation.

Merrill Lynch derived an estimated valuation range for DIRECTV by comparing estimated current enterprise value as a multiple of estimated 2001 subscribers and as a multiple of estimated 2002 EBITDA. The results of these analyses were as follows:

Comparable Company Analysis	Low	High
Estimated 2001 Subscriber Multiple	\$ 1,316	\$ 2,129
Estimated 2002 EBITDA Multiple	25.7x	34.4x

Using these analyses, and applying a range of \$1,600 to \$1,900 per estimated 2001 subscriber and an estimated 2002 EBITDA multiple range of 25.0x to 30.0x, Merrill Lynch estimated the following ranges of value for DIRECTV as of September 30, 2001:

Implied Value of DIRECTV	Low	High
	(in millions)	
Estimated 2001 Subscriber Multiple	\$ 14,794	\$ 17,625
Estimated 2002 EBITDA Multiple	\$ 14,234	\$ 17,125

Based on the DCF valuation and comparable company analysis Merrill Lynch assigned the following reference range of values to the DIRECTV segment:

Low	High
(in millions)	

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Reference Range Value	\$ 14,500	\$ 18,500
-----------------------	-----------	-----------

DIRECTV Latin America. Merrill Lynch derived an estimated equity valuation range for Hughes' interest in DIRECTV Latin America through an estimated current enterprise value as a multiple of current subscribers. The results of this analysis are as follows:

	<u>Low</u>	<u>High</u>
Current Subscriber Multiple	\$800	\$1,200

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

The net equity valuation of Hughes investment assumes 1.3 million current Latin American subscribers, \$1,017 million of net debt attributable to DIRECTV Latin America and 78% ownership by Hughes. The results of these analyses were as follows:

Implied Value of Hughes Interest in DIRECTV Latin America	Low	High
	(in millions)	
Current Subscriber Multiple	\$0	\$390

Based upon the implied subscriber valuation, Merrill Lynch assigned the following current reference range of values to the DIRECTV Latin America segment:

	Low	High
	(in millions)	
Reference Range	\$(100)	\$300

PanAmSat. Merrill Lynch performed a DCF analysis of PanAmSat using projections provided by Hughes management.

The DCF value of the approximately 81% indirect interest of Hughes in PanAmSat, or about 120.8 million shares, was calculated assuming discount rates ranging from 10.0% to 12.0%, \$2,162 million of net debt attributable to PanAmSat and was comprised of the sum of the present values of:

the projected cash flows for the third quarter of 2001 through the fiscal year ended December 31, 2005; and

the 2005 terminal value based upon a range of multiples of estimated 2005 EBITDA, from 8.5x to 10.5x.

	Low	High
	(in millions)	
DCF Value of Hughes Indirect Interest in PanAmSat	\$2,048	\$3,275

Using publicly available information, Merrill Lynch compared selected historical stock, financial and operating data and ratios for PanAmSat with corresponding data and ratios of similar publicly traded companies. These companies were selected by Merrill Lynch based upon Merrill Lynch's views as to the comparability of the financial and operating characteristics of these companies to PanAmSat.

The companies included in the PanAmSat comparable company analysis were:

APT Satellite Holdings LTD;

Asia Satellite Telecommunications Holdings Limited;

JSAT Corporation;

New Skies Satellites N.V.; and

Societe Europeenne des Satellites SA.

Merrill Lynch derived an estimated value of the approximately 81% indirect interest of Hughes in PanAmSat by comparing estimated current enterprise value as a multiple of estimated 2001 revenue and also as a multiple of estimated 2001 EBITDA. The results of these analyses were as follows:

Comparable Company Analysis	Low	High
Estimated 2001 Revenue Multiple	0.73x	8.32x
Estimated 2001 EBITDA Multiple	1.1x	11.9x

Using these analyses, and applying an estimated 2001 revenue multiple range of 6.0x to 8.0x and an estimated 2001 EBITDA multiple range of 8.5x to 10.5x, Merrill Lynch estimated the following ranges of

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

value for the approximately 81% indirect interest of Hughes in PanAmSat, based on \$2,215 million of total net debt at PanAmSat as of September 30, 2001:

Implied Value of Hughes Indirect Interest in PanAmSat	Low	High
	(in millions)	
Estimated 2001 Revenue Multiple	\$2,221	\$3,556
Estimated 2001 EBITDA Multiple	\$2,025	\$2,922

In addition, Merrill Lynch considered both the 52-week trading range of PanAmSat's common shares and the range of price targets published by Wall Street equity research analysts as of October 25, 2001. The resulting values of Hughes' investment are based on Hughes' approximately 81% indirect interest in PanAmSat:

	Low	High
	(in millions)	
52-Week Trading Range	\$2,196	\$5,232
Research Analyst Price Targets	\$2,779	\$4,832

Using these analyses, Merrill Lynch believed the current public market value of Hughes' indirect stake in PanAmSat to be reasonably proximate to its theoretical intrinsic value. Based on about 120.8 million, approximately 81%, of PanAmSat shares owned by Hughes subsidiaries and the October 25, 2001 closing price of \$23.03, the public market value of Hughes' indirect stake in PanAmSat, as of October 25, 2001, is calculated to be \$2,782 million.

Hughes Network Systems. Merrill Lynch performed a DCF analysis of Hughes Network Systems using projections provided by Hughes management.

The DCF for Hughes Network Systems was calculated assuming discount rates ranging from 12.0% to 14.0% and was comprised of the sum of the present values of:

the projected cash flows for the third quarter of 2001 through the fiscal year ended December 31, 2005; and

the 2005 terminal value based upon a range of multiples of estimated 2005 EBITDA from 4.0x to 5.0x.

	Low	High
	(in millions)	
DCF Value of Hughes Network Systems	\$1,926	\$2,814

Using this analysis, Merrill Lynch estimated the value of Hughes Network Systems to be between \$1,500 million and \$2,800 million as of September 30, 2001.

Spaceway. Merrill Lynch estimated the value of Hughes' investment in Spaceway to be between 0.0x and 1.0x the estimated invested capital of \$940 million, resulting in a range of value from \$0 to \$940 million.

Telocity. Merrill Lynch estimated the value of Hughes' investment in Telocity to be between 0.0x and 0.5x the estimated acquisition cost of \$180 million, resulting in a range of value from \$0 to \$90 million.

Public Investments. Merrill Lynch valued Hughes' aggregate investments in the publicly traded common shares of the following companies at \$595 million based on their respective closing prices and applicable currency exchange rates as of October 25, 2001:

Crown Media Holdings;

TiVo Inc.;

GlobeComm Systems Inc.;

Hughes Software Systems Ltd.;

Hughes Tele.com (India) Limited;

Motient Corporation;

Nippon Avionics Co., Ltd.;

P.T. Pasifik Satelit Nusantara;

Quokka Sports, Inc.;

Sky Perfect Communications Inc.;

THOMSON multimedia SA;

Wink Communications, Inc.; and

XM Satellite Radio Holdings Inc.

Corporate Reserve Allocation. Merrill Lynch performed a DCF analysis of the net cash flow effect of the corporate reserve allocations of Hughes using projections provided by Hughes' management.

The DCF for corporate contingency was calculated assuming discount rates ranging from 16.0% to 18.0% and was comprised of the sum of the present values of:

the projected cash flows for the third quarter of 2001 through the fiscal year ended December 31, 2005; and

the 2005 terminal value based upon a range of assumed perpetual growth rates for the net cash flow effect from 1.0% to 2.0%.

	<u>Low</u>	<u>High</u>
	(in millions)	
DCF Value of Corporate Contingency	\$2,931	\$ 3,493

Using the analysis, Merrill Lynch estimated the value of corporate reserve allocations to be between \$3,000 million and \$3,500 million, as of September 30, 2001.

Hughes on a Consolidated Basis. Using the analyses described above for each of Hughes' principal businesses and significant investments, Merrill Lynch estimated the range of per share value of the consolidated Hughes based on 1,300.7 million basic outstanding shares of GM Class H common stock, options to acquire 21.8 million shares of GM Class H common stock with a weighted average exercise price of \$10.75, options to acquire 12.1 million shares of GM Class H common stock with a weighted average exercise price of \$17.00, 80.1 million shares of GM Class H common stock reserved for issuance upon conversion of the GM Series H preference stock, \$1,565 million of net cash and \$325 million estimated value of contingent liabilities as of September 30, 2001:

	<u>Low</u>	<u>High</u>
Implied Equity Value per Share	\$12.66	\$ 17.10

EchoStar Analysis. Merrill Lynch performed a sum-of-the-parts valuation in order to derive an implied per share equity value for EchoStar. Merrill Lynch examined and independently valued EchoStar's DISH Network, EchoStar's other businesses, which include EchoStar Technology Corporation and EchoStar Satellite Services, EchoStar's investments in privately held companies and its investments in publicly traded securities.

Using the sum-of-the-parts valuation analysis described below for each of EchoStar's principal businesses and significant investments, Merrill Lynch estimated the per share value of EchoStar, on a consolidated basis, to be:

	<u>Low</u>	<u>High</u>
Implied Equity Value per Share	\$22.53	\$ 31.43

DISH Network. Merrill Lynch performed a DCF analysis of EchoStar's DISH Network using projections provided by EchoStar's management.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

The DCF value for EchoStar's DISH Network was calculated assuming discount rates ranging from 12.0% to 14.0% and was comprised of the sum of the present values of:

the projected cash flows for the third quarter of 2001 through the fiscal year ended December 31, 2005; and

the 2005 terminal value based upon a range of multiples of estimated 2005 EBITDA from 9.0x to 11.0x.

	Low	High
(in millions)		
DCF Value of DISH Network	\$13,601	\$ 19,125

Using publicly available information, Merrill Lynch compared selected historical stock, financial and operating data and ratios for EchoStar's DISH Network with corresponding data and ratios of similar publicly traded companies. These companies were selected by Merrill Lynch based upon Merrill Lynch's views as to the comparability of the financial and operating characteristics of these companies to EchoStar's DISH Network.

The companies included in the DISH Network comparable company analysis were:

British Sky Broadcasting Group PLC;

Hughes; and

Pegasus Communications Corporation.

Merrill Lynch derived an estimated valuation range for EchoStar's DISH Network by comparing estimated current enterprise value as a multiple of estimated 2001 subscribers and as a multiple of estimated 2002 EBITDA. The results of these analyses were as follows:

Comparable Company Analysis	Low	High
Estimated 2001 Subscriber Multiple	\$ 1,316	\$ 2,049
Estimated 2002 EBITDA Multiple	27.6x	34.4x

Using these analyses and based on Merrill Lynch's judgment as to the perceived prospects of EchoStar relative to comparable companies, Merrill Lynch applied a range of \$2,000 to \$2,400 per estimated 2001 subscriber and an estimated 2002 EBITDA multiple range of 25.0x to 30.0x, such that Merrill Lynch estimated the following ranges of value for EchoStar's DISH Network as of September 30, 2001:

Implied Value of DISH Network	Low	High
(in millions)		
Estimated 2001 Subscriber Multiple	\$ 14,000	\$ 16,800
Estimated 2002 EBITDA Multiple	\$ 23,775	\$ 28,530

Based on the DCF valuation and comparable company analysis, Merrill Lynch assigned the following reference range of values to the DISH Network segment.

Low	High
-----	------

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

	(in millions)	
Reference Value Range	\$ 13,500	\$ 17,800

Using publicly available information, Merrill Lynch compared selected historical stock, financial and operating data and ratios for EchoStar Technology Corporation with corresponding data and ratios of similar publicly traded companies. These companies were selected by Merrill Lynch based upon Merrill Lynch's views as to the comparability of the financial and operating characteristics of these companies to EchoStar Technology Corporation.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

The companies included in the EchoStar Technology Corporation comparable company analysis were:

Scientific-Atlanta, Inc.;

Pace Micro Technology PLC; and

THOMSON multimedia SA.

Merrill Lynch derived an estimated valuation range for EchoStar Technology Corporation by comparing estimated current enterprise value as a multiple of estimated 2002 EBITDA. The results of these analyses were as follows:

Comparable Company Analysis	Low	High
Estimated 2002 EBITDA Multiple	5.6x	16.3x

Using these analyses, and applying an estimated 2002 EBITDA multiple range of 5.0x to 6.0x, Merrill Lynch estimated the following ranges of value for EchoStar Technology Corporation as of September 30, 2001:

Implied Value of EchoStar Technology Corporation	Low	High
(in millions)		
Estimated 2002 EBITDA Multiple	\$ 240	\$ 288

EchoStar Satellite Services. Using publicly available information, Merrill Lynch compared selected historical stock, financial and operating data and ratios for EchoStar Satellite Services with corresponding data and ratios of similar publicly traded companies. These companies were selected by Merrill Lynch based upon Merrill Lynch's views as to the comparability of the financial and operating characteristics of these companies to EchoStar Satellite Services.

The companies included in the EchoStar Satellite Services comparable company analysis were:

ViaSat, Inc.; and

Gilat Satellite Networks LTD.

Merrill Lynch derived an estimated valuation range for EchoStar Satellite Services by comparing estimated current enterprise value as a multiple of estimated 2002 EBITDA. The results of these analyses were as follows:

Comparable Company Analysis	Low	High
Estimated 2002 EBITDA Multiple	7.1x	9.8x

Using these analyses, and applying an estimated 2002 EBITDA multiple range of 7.5x to 8.5x, Merrill Lynch estimated the following ranges of value for EchoStar Satellite Services as of September 30, 2001:

Implied Value of EchoStar Satellite Services	Low	High
(in millions)		
Estimated 2002 EBITDA Multiple	\$ 255	\$ 289

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Based on the comparable company analysis, Merrill Lynch assigned the following reference range of values, in the aggregate, for EchoStar's other businesses:

	<u>Low</u>	<u>High</u>
	(in millions)	
Reference Value Range	\$ 495	\$ 577

Private Investments. Merrill Lynch estimated the value of EchoStar's investment in privately held companies to be between 0.0x and 0.5x the estimated invested capital of \$166 million, resulting in a range of value of \$0 to \$83 million.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Public Investments. Merrill Lynch valued EchoStar's investment in the publicly traded common shares of OpenTV Corp. to be \$20 million, based on the 2.25 million shares held and the October 25, 2001 closing price of \$9.05 per share.

EchoStar on a Consolidated Basis. Using sum-of-the parts valuation analyses described above, Merrill Lynch estimated the range of per share value of the consolidated EchoStar common stock, based on 240.8 million shares of EchoStar Class A common stock, 238.4 million shares of EchoStar Class B common stock, options to acquire 22.1 million shares of EchoStar Class A common stock at a weighted average exercise price of \$5.93, options to acquire 0.3 million shares of EchoStar Class A common stock at a weighted average exercise price of \$22.72, \$5,026 million of debt and \$2,172 million of cash as of September 30, 2001:

	Low	High
Implied Equity Value per Share	\$ 22.53	\$ 31.43

Expected Synergies Valuation Analysis. Merrill Lynch performed a DCF analysis of the estimated synergies resulting from the proposed combination of Hughes and EchoStar using two sets of projections provided by Hughes' management, referred to as the High case and the Low case. The expected synergies are projected to be a result of increased number of subscribers, reduced subscriber turnover, increased advertising revenue, reduced subscriber acquisition costs, reduced programming costs and other cost reductions and incremental revenues. These synergy estimates were netted against the implementation costs.

The DCF for the synergy estimates was calculated assuming a discount rate of 12.5% and was comprised of the sum of the present values of:

the projected cash flows for the years 2002 through the fiscal year ended December 31, 2005; and

the 2005 terminal value based upon a 10.0x multiple of estimated 2005 EBITDA.

	Low	High
(in billions)		
DCF Value of Expected Synergies of the Transactions	\$ 16.6	\$ 23.4

Historical Exchange Ratio Analysis. Merrill Lynch reviewed the per share daily closing market price movements of GM Class H common stock and EchoStar Class A common stock for the one-year period ending on October 25, 2001, and calculated the historical exchange ratios during this period implied by dividing the daily per share closing prices of GM Class H common stock by those of EchoStar Class A common stock. Merrill Lynch calculated a range of implied exchange ratios of between 0.528x and 1.091x. Merrill Lynch also calculated the averages of those historical trading ratios for the one-week, one-month, three-month, six-month, and one-year periods ending October 25, 2001. The analysis resulted in the following average historical trading ratios for the periods indicated, rounded to the nearest thousandth, compared to an implied exchange ratio in the Hughes/ EchoStar merger of 0.73 shares of EchoStar Class A common stock in exchange for each share of GM Class H common stock, which is the inverse of the exchange ratio in the Hughes/ EchoStar merger of 1/0.73, or about 1.3699, shares of New EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock and 1/0.73, or about 1.3699, shares of New EchoStar Class B common stock in exchange for each share of EchoStar Class B common stock:

Period ending October 25, 2001	Average Implied Exchange Ratio
October 24, 2001	0.583x
Last 1 Week	0.591x
Last 1 Month	0.572x
Last 3 Months	0.638x
Last 6 Months	0.666x

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

The implied exchange ratio in the Hughes/EchoStar merger is higher than the average implied exchange ratio in each case, except for the last one year.

Implied Exchange Ratio Analysis. Based on a comparison of the midpoint of the range of implied per share equity values of Hughes and EchoStar that were estimated on a consolidated sum-of-the-parts basis using the methodologies described above, Merrill Lynch calculated an implied equity ownership split of 60.6% for Hughes and 39.4% for EchoStar. This implied equity ownership split was compared with the proposed pre-Hughes recapitalization equity ownership split, based on the exchange ratio in the Hughes/EchoStar merger, of 67.1% for Hughes and 32.9% for EchoStar. The level of Hughes ownership based upon the exchange ratio in the Hughes/EchoStar merger is higher than that implied by a comparison of the equity values of Hughes and EchoStar.

Relative Valuation of Direct Broadcast Satellite Assets. Merrill Lynch compared the appropriate public enterprise valuation multiples of EchoStar's core direct broadcast satellite assets, the DISH Network, versus Hughes' core direct broadcast satellite assets, DIRECTV. EchoStar's core direct broadcast satellite assets were valued by taking EchoStar's publicly traded enterprise value as of October 25, 2001 and subtracting the estimated sum-of-the-parts value of the non-direct broadcast satellite assets. Hughes' core direct broadcast satellite assets were valued using two separate methodologies:

by taking Hughes' publicly traded enterprise value as of October 25, 2001 and subtracting the estimated sum-of-the-parts value of the non-direct broadcast satellite assets; and

by taking Hughes' enterprise valuation using the implied transaction offer price per share and subtracting the estimated sum-of-the-parts value of the non-direct broadcast satellite assets.

Direct Broadcast Satellite Asset Value as a Multiple of:	EchoStar at Market	Hughes at Market	Hughes at Deal Value
Estimated 2001 Subscribers	\$ 2,226	\$ 1,894	\$ 2,525
Estimated 2002 Subscribers	\$ 1,807	\$ 1,645	\$ 2,193
Estimated 2001 Pre-SAC Direct Broadcast Satellite EBITDA	9.8x	10.1x	13.4x
Estimated 2002 Pre-SAC Direct Broadcast Satellite EBITDA	7.3x	8.0x	10.7x
Estimated 2002 Direct Broadcast Satellite EBITDA	16.1x	30.8x	41.1x

This analysis indicates that the implied multiples for Hughes based on the implied transaction offer price in the Hughes/EchoStar merger were higher than both the implied multiples for Hughes on a stand-alone basis based on its publicly traded value and the implied multiples for EchoStar on a stand-alone basis based on its publicly traded value, both as of October 25, 2001.

Premium to GM Class H Common Stockholders and GM \$1 2/3 Par Value Common Stockholders. Merrill Lynch analyzed the valuation impact and implied premium to the GM Class H common stockholders and GM \$1 2/3 par value common stockholders at various levels of value attributed to synergies assuming a pro forma trading value that gives effect to the proposed \$4.2 billion reduction of GM's retained economic interest in Hughes and assumes the October 25, 2001 closing share price of \$15.40 for the GM Class H common stock and an implied exchange ratio in the Hughes/ EchoStar merger of 0.73 shares of EchoStar Class A common stock in exchange for each share of GM Class H common stock. Merrill Lynch calculated the pro forma implied trading price per share of New EchoStar Class C common stock by dividing the sum of stand-alone market values plus assumed synergy value, if any, by the total pro forma shares outstanding (based on the exchange ratio). The pro forma implied price per share of New EchoStar Class C common stock assuming no synergies was \$16.67 per share, implying an 8.3% premium to holders of GM Class H common stock over the prevailing market price. Merrill Lynch assumed that the \$4.2 billion reduction of GM's retained economic interest in Hughes was based on the same implied trading price of \$16.67. The table below sets forth these and

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

other premia based on various pro forma implied prices per share of New EchoStar Class C common stock and implied premia based on various levels of assumed synergy value.

Synergy Assumption	Implied Price	Implied Premium
No Synergies	\$ 16.67	8.3%
\$5.4 Billion of Assumed Synergy Value	\$ 19.26	25.0%
\$10.0 Billion of Assumed Synergy Value	\$ 21.52	39.7%
\$20.0 Billion of Assumed Synergy Value	\$ 26.31	70.9%

In each case, the pro forma implied price per share of New EchoStar Class C common stock was higher than the October 25, 2001 closing share price of \$15.40 for GM Class H common stock.

Credit Rating Impact Considerations for General Motors. Merrill Lynch evaluated the potential impact to the financial position and credit rating of General Motors resulting from the proposed transactions. The appropriate credit statistics of General Motors are compared before and after giving effect to the proposed \$4.2 billion reduction of GM's retained economic interest in Hughes and the exchange of 100 million shares of GM Class H common stock or New EchoStar Class C common stock, as the case may be, in GM share dispositions and assuming the transactions closed on June 30, 2001. General Motors was analyzed excluding the financial results of GMAC. For a more complete description of the GM/ Hughes separation transactions, see Description of the Transactions The GM/ Hughes Separation Transactions.

	GM Excluding GMAC	
	Last 12 Months as of June 2001	Pro Forma GM (Excluding Hughes)
EBITDA/ Gross Interest Expense	12.4x	16.4x
Total Debt/ EBITDA	1.5x	1.3x
Total Debt/ Book Capitalization	47.5%	38.7%
EBITDA-Capital Expenditures/Interest	(0.7x)	1.5x
Net Liquidity (\$ billion)	\$ (0.5)	\$4.5

This analysis indicates that GM's credit statistics would improve on a pro forma basis after giving effect to the GM/Hughes separation transactions.

Earnings Impact Considerations for General Motors. Merrill Lynch examined the pro forma impact to General Motors' earnings per share, or EPS, calculation for the GM \$1 2/3 par value common stockholders after giving effect to the proposed \$4.2 billion reduction of GM's retained economic interest in Hughes and exchange of 100 million shares of GM Class H common stock or New EchoStar Class C common stock, as the case may be, in GM share dispositions.

Projected EPS	Estimated 2001	Estimated 2002
GM(a)	\$ 3.08	\$ 1.77
Add Back Attributable GM Class H Common Stock Loss(a)	0.38	0.20
Plus: Saved Interest Expense(b)	0.20	0.20
Pro Forma EPS	\$ 3.66	\$ 2.16
Accretion (\$)	\$ 0.58	\$ 0.39
Accretion (%)	18.7%	22.2%

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

- (a) **Source:** First Call earnings estimates for GM and Hughes as of October 19, 2001. 32.6% of Hughes' projected loss excluded from GM's earnings, after adjusting for the dividend paid to the holders of GM Series H preference stock.
- (b) Assumes cash received in \$4.2 billion reduction of GM's retained economic interest in Hughes and \$1.9 billion accounts payable reduction from GM share dispositions are invested at 3.0% pre-tax

return and, tax-effected at the marginal rate of 38.0% in 2001 and 2002, using Wall Street consensus shares of 562 million and 563 million for 2001 and 2002, respectively.

This analysis indicates that General Motors' earnings per share for the GM \$1 2/3 par value common stock would be higher on a pro forma basis after giving effect to the GM/ Hughes separation transactions.

Bear Stearns Fairness Opinion

General Motors retained Bear Stearns as a financial advisor in connection with the proposed transactions in accordance with the terms of an engagement letter between General Motors and Bear Stearns. General Motors selected Bear Stearns to act as one of its financial advisors and to render its opinion in connection with the GM/ Hughes separation transactions based on Bear Stearns' qualifications, expertise and reputation in providing advice to companies in the media and communications industries as well as its prior investment banking relationship and familiarity with GM.

At the October 28, 2001 meeting of the GM board of directors, Bear Stearns delivered its oral opinion, which opinion was later confirmed by delivery of a written opinion, to the effect that, as of the date of the opinion and based upon and subject to the various conditions, assumptions, limitations, and other matters set forth in the opinion, taking into account all relevant financial aspects of the transactions taken as a whole, the consideration to be provided to General Motors and its subsidiaries, to the holders of GM \$1 2/3 par value common stock, if applicable, and to the holders of GM Class H common stock in the GM/ Hughes separation transactions is fair from a financial point of view, to the holders of the GM \$1 2/3 par value common stock as a class and to the holders of GM Class H common stock as a class, respectively.

The full text of the Bear Stearns fairness opinion is included in Appendix C hereto. You are urged to read the Bear Stearns fairness opinion in its entirety for assumptions made, matters considered and limits of the review by Bear Stearns in arriving at its opinion. The Bear Stearns fairness opinion was directed to the GM board of directors and relates only to the fairness, from a financial point of view, to the holders of GM \$1 2/3 par value common stock as a class and to the holders of GM Class H common stock, as a class, respectively, taking into account all relevant factors and aspects of the transactions taken as a whole, of the consideration to be provided to GM and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock and to the holders of GM Class H common stock in the GM/Hughes separation transactions, and does not address any other aspect of the proposed Hughes/ EchoStar merger or any related transactions and does not constitute a recommendation to any stockholder as to whether such stockholder should vote to approve any of the proposals described in this document. The summary of the Bear Stearns fairness opinion set forth in this document is qualified in its entirety by reference to the full text of the opinion.

In connection with rendering its opinion at the October 28, 2001 GM board of directors meeting, Bear Stearns, among other things:

reviewed the Hughes/ EchoStar merger agreement; the GM/ Hughes separation agreement; the implementation agreement; the contribution and transfer agreement entered into by and between the United States Trust Company of New York and General Motors; the supplemental agreement and guaranty entered into by and among General Motors, Hughes, EchoStar and The Samburu Warrior Revocable Trust; and the pledge agreement entered into by and between General Motors and The Samburu Warrior Revocable Trust (each as amended through the date of the Bear Stearns fairness opinions) and certain other agreements contemplated thereby;

reviewed the commitment letters related to the Hughes/ EchoStar merger financing;

reviewed GM's restated certificate of incorporation and GM's bylaws, each as of the date of the Bear Stearns fairness opinion, General Motors' annual reports to stockholders and annual reports on Forms 10-K for each of the years ended December 31, 1998 through 2000, quarterly reports on Forms 10-Q for the periods ended March 31, 2001 and June 30, 2001 and GM's reports on Forms 8-K for the three years ended as of the date of the Bear Stearns fairness opinion;

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

reviewed Hughes' annual reports to stockholders and annual reports on Forms 10-K for each of the years ended December 31, 1998 through 2000, quarterly reports on Forms 10-Q for the periods ended March 31, 2001 and June 30, 2001 and Hughes' reports on Forms 8-K for the three years ended as of the date of the Bear Stearns fairness opinion;

reviewed PanAmSat's annual reports to stockholders and annual reports on Forms 10-K for each of the years ended December 31, 1998 through 2000, quarterly reports on Forms 10-Q for the periods ended March 31, 2001 and June 30, 2001 and PanAmSat's reports on Forms 8-K for the three years ended as of the date of the Bear Stearns fairness opinion;

reviewed EchoStar's annual reports to stockholders and annual reports on Forms 10-K for each of the years ended December 31, 1998 through 2000, quarterly reports on Forms 10-Q for the periods ended March 31, 2001, June 30, 2001 and September 30, 2001 and EchoStar's reports on Forms 8-K for the three years ended as of the date of the Bear Stearns fairness opinion;

reviewed certain operating and financial information, including projections for the five years ended 2005, provided to Bear Stearns by management of Hughes, EchoStar and their related affiliates relating to their respective businesses and business prospects;

discussed with management of GM, Hughes and EchoStar concerning the current business landscape related to Hughes' and EchoStar's businesses and the competitive environment of the media and satellite communications sectors and the strategic benefits of pursuing the transactions;

reviewed certain estimates of revenue enhancements, cost saving and other combination benefits expected to result from the transactions, prepared and provided to Bear Stearns by Hughes;

performed sum-of-the parts valuation analysis of Hughes, EchoStar and New EchoStar based upon, among other things: historical prices, trading multiples and trading volumes of the shares of GM Class H common stock and EchoStar Class A common stock, financial data, stock market performance data and trading multiples of companies which Bear Stearns deemed generally comparable to Hughes' significant businesses, that is DIRECTV, DIRECTV Latin America, PanAmSat and Hughes Network Systems entities, and to EchoStar. Discounted cash flow analysis based on financial projections with respect to Hughes' significant businesses, that is DIRECTV, DIRECTV Latin America, PanAmSat and Hughes Network Systems and to EchoStar's businesses, in each case furnished to Bear Stearns by General Motors and Hughes and discounted cash flow analysis of synergy estimates for New EchoStar furnished to Bear Stearns by General Motors and Hughes;

reviewed the pro forma financial results, financial condition and capitalization of General Motors, Hughes and New EchoStar, after giving effect to the transactions; and

conducted other studies, analyses, inquiries and investigations as Bear Stearns deemed appropriate.

In the course of its review, Bear Stearns relied upon and assumed, without independent verification, the accuracy and completeness of the financial and other information, including without limitation, the projections and synergy estimates provided to Bear Stearns by General Motors, Hughes and EchoStar. With respect to the projected financial results of the constituent businesses and the potential synergies that could be achieved upon completion of the transactions, Bear Stearns assumed that they had been reasonably prepared on bases reflecting the best currently available estimates and judgments of the senior managements of General Motors, Hughes and EchoStar as to the expected future performance of General Motors, Hughes and New EchoStar. Bear Stearns did not assume any responsibility for independent verification of the information or of the projections and synergy estimates provided by General Motors, Hughes and EchoStar and further relied upon the assurances of the senior managements of General Motors, Hughes and EchoStar that such senior managements were not aware of any facts that would make the information, projections and synergy estimates provided to Bear Stearns incomplete or misleading. In arriving at its opinion, Bear Stearns did not perform or obtain any independent appraisal of the assets or liabilities, contingent or otherwise, of Hughes, EchoStar or New EchoStar nor was it furnished with any such appraisals.

Furthermore, Bear Stearns has assumed that the Hughes split-off will qualify as a tax-free distribution under Section 355 of the Code and that the Hughes/ EchoStar merger will qualify as a reorganization within the meaning of Section 368(a) of the Code. General Motors also advised Bear Stearns and Bear Stearns assumed, that:

as a result of the GM charter amendment, the provisions of Article Fourth, Division I, Section (c) of the GM restated certificate of incorporation will not apply to the transactions; and

that General Motors will be responsible for no contingent liabilities of Hughes which are material in the aggregate as a result of the completion of the transactions.

Bear Stearns has also assumed that the GM/ Hughes separation transactions will be completed in a timely manner and in accordance with the term of the applicable agreements, as amended, without any limitations, restrictions, conditions, amendments or modifications, regulatory or otherwise, that collectively would have a material adverse effect on General Motors, Hughes or EchoStar. Bear Stearns has further assumed that there will be no material adverse effect on General Motors, Hughes or New EchoStar resulting from the accounting treatment of the transactions.

Bear Stearns was asked by the GM board of directors to solicit indications of interest from various third parties regarding a transaction with Hughes, and Bear Stearns considered such results when rendering its fairness opinion.

The summary of certain of these analyses set forth below does not purport to be a complete description of the analyses underlying the fairness opinion of Bear Stearns. The preparation of a fairness opinion is a complex process and is not necessarily susceptible to summary description. Bear Stearns believes that all of its analyses must be considered together, and that selecting any one valuation analysis could create an incomplete view of the processes underlying its opinion. Moreover, the estimates contained in such analyses are not necessarily indicative of actual values or predictive of future results or values, which may be significantly more or less favorable than those suggested by such analyses. In addition, analyses relating to the value of businesses or securities do not purport to be appraisals or necessarily reflect the prices at which businesses or securities actually may be sold. Furthermore, no opinion is being expressed as to the prices at which shares of GM \$1 2/3 par value common stock, GM Class H common stock or GM Series H preference stock may trade at any future time.

Bear Stearns' financial opinions are necessarily based on economic, market and other conditions, and the information made available to Bear Stearns, as of the date of its fairness opinion.

The following is a brief summary of the material analyses performed by Bear Stearns in connection with its fairness opinion. Some of the summaries of financial analyses include information presented in tabular format. In order to fully understand the financial analyses used by Bear Stearns, the tables must be read together with the text of each summary. The tables alone do not represent a complete description of the financial analyses.

As part of the transactions, the current holders of GM Class H common stock will receive shares of New EchoStar Class C common stock in exchange for their shares of GM Class H common stock. In addition, General Motors may be a significant holder of New EchoStar Class C common stock upon the completion of the transactions. Therefore, although Bear Stearns' opinion addresses the fairness, from a financial point of view, of the consideration to be provided to General Motors and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock, if applicable, and to the holders of the GM Class H common stock in the GM/Hughes separation transactions, Bear Stearns performed its analyses giving effect not only to the GM/Hughes separation transactions, but also to the Hughes/EchoStar merger and certain other related transactions, all of which were deemed to be relevant by Bear Stearns to holders of the GM \$1 2/3 par value common stock and to holders of the GM Class H common stock.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Bear Stearns performed a variety of analyses detailed below related to the Hughes/EchoStar merger which were deemed to be relevant by Bear Stearns to both the holders of the GM \$1 2/3 par value common stock and the holders of the GM Class H common stock.

Bear Stearns performed analyses to evaluate the value of GM Class H common stock on October 25, 2001 compared with the value of the New EchoStar Class C common stock after giving effect to the transactions. See *Hughes Analysis*, *EchoStar Analysis*, *Expected Synergies Valuation Analysis* and *Premium to GM Class H Common Stockholders and GM \$1 2/3 Par Value Common Stockholders*.

Bear Stearns also performed analyses that examined whether the exchange ratio in the Hughes/EchoStar merger was higher or lower than the historical ratio of the trading prices of EchoStar Class A common stock and the GM Class H common stock. See *Historical Exchange Ratio Analysis*.

Bear Stearns also performed analyses that examined whether the percentage ownership in New EchoStar of the GM Class H common stockholders based upon the exchange ratio in the Hughes/EchoStar merger was greater or lesser than the ratio that is implied by a comparison of the equity values of Hughes and EchoStar as of October 25, 2001. See *Implied Exchange Ratio Analysis*. In the case of the holders of the GM Class H common stock, upon the completion of the transactions they would own only New EchoStar Class C common stock. In the case of the holders of the GM \$1 2/3 par value common stock, GM's retained economic interest in Hughes would be reduced and GM would correspondingly receive a distribution from Hughes on the basis of the average market price of the GM Class H common stock over a specified period preceding the completion of the GM/Hughes separation transactions. After completion of the transactions, the holders of the GM \$1 2/3 par value common stock may have an indirect interest in New EchoStar by virtue of GM's expected ownership of shares of New EchoStar Class C common stock. Bear Stearns performed the analyses detailed below with respect to the impact of the transactions on GM's credit rating and earnings per share which were deemed to be relevant by Bear Stearns to the holders of the GM \$1 2/3 par value common stock because of their continued ownership in General Motors after the completion of the transactions.

Bear Stearns examined the impact of the reduction of GM's retained economic interest in Hughes and the corresponding dividend distribution by Hughes to GM in the GM/Hughes separation transactions and whether such transactions would improve the credit profile of General Motors and whether and by how much the earnings per share of General Motors would increase or decrease because of the GM/Hughes separation transactions. See *Credit Rating Impact Considerations for General Motors* and *Earnings Impact Considerations for General Motors*.

Hughes Analysis. Bear Stearns performed a sum-of-the-parts valuation of each of Hughes' principal businesses and significant investments in order to derive an implied per share equity value for Hughes. Bear Stearns examined and independently valued DIRECTV, DIRECTV Latin America, PanAmSat, Hughes Network Systems, Spaceway, Telocity, Hughes' public investments and Hughes' corporate reserve allocation. The corporate reserve allocation represents an estimate by Hughes management of future cash expenses which are not otherwise directly allocated to any of the business units of Hughes.

Using the sum-of-the-parts valuation analyses described below for each of Hughes' principal businesses and significant investments, Bear Stearns estimated the per share value of Hughes, on a consolidated basis, to be:

	<u>Low</u>	<u>High</u>
Implied Equity Value per Share	\$12.66	\$17.10

DIRECTV. Bear Stearns performed a discounted cash flow, or DCF, analysis of DIRECTV using projections provided by Hughes management.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

The DCF for DIRECTV, which includes the after-tax unlevered free cash flow associated with National Rural Telecommunications Cooperative subscribers, was calculated assuming discount rates ranging from 12.5% to 16.5% and was comprised of the sum of the present values of:

the projected after-tax unlevered free cash flows for the fourth quarter of 2001 through the fiscal year ended December 31, 2005; and

the December 31, 2005 terminal value based upon a range of multiples of estimated 2005 earnings before interest, taxes, depreciation and amortization, which is referred to as EBITDA, from 8.0x to 12.0x.

	Low	High
	(in millions)	
Reference Value Range(a)	\$ 14,500	\$ 18,500

(a) Reference Value Range, as used herein, represents Bear Stearns' estimate of the range of value that the entity contributes to aggregate firm value.

Using publicly available information, Bear Stearns compared selected historical stock, financial and operating data and ratios for DIRECTV with corresponding data and ratios of EchoStar. DIRECTV is not a separate publicly traded company. However, Bear Stearns inferred a public trading value for DIRECTV by:

calculating total enterprise value for Hughes based on public market values at October 25, 2001; and

subtracting the estimated sum-of-the-parts enterprise value for all non-DIRECTV related assets.

EchoStar was selected by Bear Stearns based upon Bear Stearns' views as to the comparability of the financial and operating characteristics of EchoStar to DIRECTV.

Bear Stearns calculated the direct broadcast satellite enterprise value as a multiple of current subscribers from October 25, 2000 through October 25, 2001 for both DIRECTV and EchoStar's DISH Network. Enterprise value, as used herein, is the market value of equity, plus debt, plus minority interests, minus cash and minus the value of any unconsolidated investments. Bear Stearns compared the projected growth, margins and other operating statistics for these two companies, as well as the current and historical direct broadcast satellite enterprise value to subscriber multiples. Over this time period, DIRECTV's enterprise value to subscriber multiple on average traded between a 20% and 25% discount to EchoStar's. EchoStar trades at a premium due to higher projected margins and growth in subscribers, revenue and EBITDA. EchoStar's per subscriber multiple of \$2,378 as of October 25, 2001 compared to DIRECTV's DCF implied enterprise value to current subscriber multiples of \$1,700 to \$2,100, representing a discount consistent with the historical trading relationship noted above.

DIRECTV Latin America. Bear Stearns performed a DCF analysis of DIRECTV Latin America using projections provided by Hughes management. The DCF values represent the net equity value of Hughes' 78% ownership stake in DIRECTV Latin America, assuming \$1,017 million of net debt.

The DCF for DIRECTV Latin America was calculated assuming discount rates ranging from 20.0% to 30.0% and was comprised of the sum of the present values of:

the projected after-tax unlevered free cash flows for the fourth quarter of 2001 through the fiscal year ended December 31, 2005; and

the December 31, 2005 terminal value based upon a range of multiples of estimated 2005 EBITDA, from 3.5x to 5.5x.

	Low	High
	(in millions)	
Reference Value Range	\$ (100)	\$ 300

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Using publicly available information, Bear Stearns compared selected historical stock, financial and operating data and ratios for DIRECTV Latin America with corresponding data and ratios for Globo Cabo S.A., the only publicly traded pay television company in Latin America.

Bear Stearns calculated the enterprise value as a multiple of current subscribers for Globo Cabo as of October 25, 2001. Globo Cabo's \$1,018 enterprise value per subscriber multiple is higher than the \$600 to \$900 enterprise value to subscriber multiple range implied by the DIRECTV Latin America DCF. This is due to the fact that DIRECTV Latin America has substantially higher capital requirements and is not projected to reach cash flow break-even until 2005 versus 2003 for Globo Cabo.

PanAmSat. Bear Stearns performed a DCF analysis of PanAmSat using projections provided by Hughes' management.

The DCF value of the approximately 81% indirect interest of Hughes in PanAmSat, or about 120.8 million shares, was calculated assuming discount rates ranging from 7.0% to 11.0%, \$2,162 million of net debt attributable to PanAmSat and was comprised of the sum of the present values of:

the projected after-tax unlevered free cash flows for the fourth quarter of 2001 through the fiscal year ended December 31, 2005; and

the December 31, 2005 terminal value based upon a range of multiples of estimated 2005 EBITDA from 7.0x to 9.0x.

	Low	High
	(in millions)	
Reference Value Range of Hughes' Indirect Interest in PanAmSat (excluding value of intercompany note due to Hughes)(a)	\$ 2,780	\$ 2,780

(a) Based on PanAmSat closing price of \$23.03 as of October 25, 2001.

The DCF value per share range of \$18.00 to \$23.00 compared to PanAmSat's closing price and 20-day average price as of October 25, 2001 of \$23.03 and \$21.47, respectively. Bear Stearns also considered the 52-week trading range of PanAmSat of \$18.18 to \$43.31 as of October 25, 2001. The DCF value per share range translated into a \$2,175 million to \$2,780 million value range for the approximately 81% indirect interest of Hughes in PanAmSat, excluding the intercompany note due to Hughes.

Using publicly available information, Bear Stearns compared selected historical stock, financial and operating data and ratios for PanAmSat with corresponding data and ratios of similar publicly traded companies. These companies were selected by Bear Stearns based upon Bear Stearns' views as to the comparability of the financial and operating characteristics of these companies to PanAmSat, with particular emphasis on Societe Europeenne des Satellites S.A., which we sometimes refer to as SES Global. Bear Stearns viewed SES Global as most similar to PanAmSat due to similar size, scale, and global reach.

The companies included in the PanAmSat comparable company analysis were:

Comparable Company Analysis	Enterprise Value/ 2001 Revenue	Enterprise Value/ 2001 EBITDA
Asia Satellite Telecommunications Holdings Limited	3.40x	4.0x
New Skies Satellites N.V.	3.02x	5.5x
Societe Europeenne des Satellites S.A.	6.90x	8.4x

PanAmSat's DCF implied enterprise value to 2001 EBITDA multiple range of 8.8x to 10.2x compared to SES Global's enterprise value to 2001 EBITDA multiple of 8.4x as of October 25, 2001. PanAmSat's DCF implied EBITDA multiples are higher than SES Global's trading multiples due to higher projected revenue and EBITDA growth rates.

Hughes Network Systems. Bear Stearns performed a DCF analysis of Hughes Network Systems (excluding Spaceway) using projections provided by Hughes management.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

The DCF for Hughes Network Systems was calculated assuming discount rates ranging from 18.0% to 22.0% and was comprised of the sum of the present values of:

the projected after-tax unlevered free cash flows for the fourth quarter of 2001 through the fiscal year ended December 31, 2005; and

the 2005 terminal value based upon a range of multiples of estimated 2005 revenue from 1.0x to 2.0x.

	<u>Low</u>	<u>High</u>
	(in millions)	
Reference Range Value	\$ 1,500	\$ 2,800

Spaceway. Bear Stearns estimated the value of Hughes' investment in Spaceway to be between 0% and 100% of the estimated invested capital of \$940 million, resulting in a range of value from \$0 to \$940 million.

Telocity. Bear Stearns estimated the value of Hughes' investment in Telocity to be between 0% and 50% of the estimated acquisition cost of \$180 million, resulting in a range of value from \$0 to \$90 million. Bear Stearns observed that the public market values of other digital subscriber line service providers have declined substantially since the date Hughes acquired Telocity.

Public Investments. Bear Stearns valued Hughes' aggregate investments in the publicly traded common shares of the following companies at \$595 million based on their respective closing prices and applicable currency exchange rates as of October 25, 2001:

Crown Media Holdings;

TiVo Inc.;

GlobeComm Systems Inc.;

Hughes Software Systems Ltd.;

Hughes Tele.com (India) Limited;

Motient Corporation;

Nippon Avionics Co., Ltd.;

P.T. Pasifik Satelit Nusantara;

Quokka Sports, Inc.;

Sky Perfect Communications Inc.;

THOMSON multimedia SA;

Wink Communications, Inc.; and

XM Satellite Radio Holdings Inc.

Corporate Contingency. Bear Stearns performed a DCF analysis of the net cash flow effect of the corporate reserve allocations of Hughes using projections provided by Hughes' management.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

The DCF for corporate contingency was calculated assuming discount rates ranging from 13.5% to 15.5% and was comprised of the sum of the present values of:

the projected after-tax unlevered free cash flows for the fourth quarter of 2001 through the fiscal year ended December 31, 2005; and

the December 31, 2005 terminal value based upon a range of assumed perpetual growth rates for the net cash flow effect from 2.5% to 3.5%.

	<u>Low</u>	<u>High</u>
	(in millions)	
Reference Range Value	\$ (3,000)	\$ (3,500)

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Hughes on a Consolidated Basis. Using these analyses, Bear Stearns estimated the range of per share value of the consolidated Hughes based on 1,300.7 million outstanding shares of GM Class H common stock, options to acquire 21.8 million shares of GM Class H common stock with a weighted average exercise price of \$10.75, options to acquire 12.1 million shares of GM Class H common stock with a weighted average exercise price of \$17.00, 80.1 million shares of GM Class H common stock reserved for issuance upon conversion of the GM Series H preference stock, \$1,565 million of net cash, which includes Hughes \$1,725 million intercompany note receivable from PanAmSat, and \$325 million estimated value of contingent liabilities as of September 30, 2001:

	Low	High
Implied Equity Value per Share	\$12.66	\$17.10

EchoStar Analysis. Bear Stearns performed a sum-of-the-parts valuation in order to derive an implied per share equity value for EchoStar. Bear Stearns examined and independently valued EchoStar's consolidated businesses including DISH Network, EchoStar Technology Corporation and EchoStar Satellite Services, which we sometimes refer to as EchoStar's consolidated businesses, EchoStar's investments in privately held companies and its investments in publicly traded securities.

Using the sum-of-the-parts valuation analysis described below for each of EchoStar's consolidated businesses and significant investments, Bear Stearns estimated the per share value of EchoStar, on a consolidated basis, to be:

	Low	High
Implied Equity Value per Share	\$22.54	\$31.48

Consolidated Businesses. Bear Stearns performed a DCF analysis of EchoStar's consolidated businesses using projections provided by EchoStar's management.

The DCF value for EchoStar's consolidated businesses was calculated assuming discount rates ranging from 12.5% to 16.5% and was comprised of the sum of the present values of:

the projected after-tax unlevered free cash flows for the fourth quarter of 2001 through fiscal year ended December 31, 2005; and

the December 31, 2005 terminal value based upon a range of multiples of estimated 2005 EBITDA from 8.0x to 12.0x.

	Low	High
(in millions)		
Reference Range Value	\$ 14,000	\$ 18,400

Using publicly available information, Bear Stearns compared selected historical stock, financial and operating data and ratios for EchoStar's DISH Network with corresponding data and ratios of DIRECTV. DIRECTV was selected by Bear Stearns based upon Bear Stearns' views as to the comparability of the financial and operating characteristics of DIRECTV to EchoStar's DISH Network.

Bear Stearns calculated the direct broadcast satellite enterprise value as a multiple of current subscribers from October 25, 2000 through October 25, 2001 for both DIRECTV and EchoStar. Bear Stearns compared the projected growth, margins and other operating statistics for these two companies, as well as the current and historical direct broadcast satellite enterprise value to subscriber multiples. Over this time period, DIRECTV's enterprise value to subscriber multiple on average traded between a 20% and 25% discount to EchoStar's. EchoStar trades at a premium due to higher projected margins and growth in subscribers, revenue and EBITDA. EchoStar's DCF implied enterprise value to current subscriber multiples for the DISH Network of \$2,075 to \$2,760 compared to DIRECTV's per subscriber multiple of \$1,669 as of October 25, 2001, representing a discount consistent with the historical trading relationship noted above. In calculating enterprise value to subscriber multiples for the DISH Network, Bear Stearns subtracted an estimated \$658

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

million for non-direct broadcast satellite consolidated assets based on Wall Street research consensus estimates.

Private Investments. Bear Stearns estimated the value of EchoStar's investment in privately held companies to be between 0% and 50% of the estimated invested capital of \$166 million, resulting in a range of value of \$0 to \$83 million.

Public Investments. Bear Stearns valued EchoStar's investment in the publicly traded common shares of OpenTV Corp. to be \$20 million, based on the 2.25 million shares held and the October 25, 2001 closing price of \$9.05 per share.

EchoStar on a Consolidated Basis. Using these analyses, Bear Stearns estimated the range of per share value of the consolidated EchoStar common stock, based on 240.8 million shares of EchoStar Class A common stock, 238.4 million shares of EchoStar Class B common stock, 22.1 million options to acquire shares of EchoStar Class A common stock at a weighted average exercise price of \$5.93, 0.3 million options to acquire shares of EchoStar Class A common stock at a weighted average exercise price of \$22.72, \$5,026 million of debt and \$2,172 million of cash as of September 30, 2001:

	Low	High
Implied Equity Value per Share	\$ 22.54	\$ 31.48

Expected Synergies Valuation Analysis. Bear Stearns performed a DCF analysis of the estimated synergies resulting from the proposed combination of Hughes and EchoStar using the mid-point of two sets of projections provided by Hughes' management, referred to as the high case and the low case. The expected synergies are projected to be a result of increased number of subscribers, reduced subscriber turnover, or churn, increased advertising revenue, reduced subscriber acquisition costs, reduced programming costs and other cost reductions and incremental revenues. These synergy estimates were netted against the implementation costs.

The DCF for the synergy estimates was calculated assuming a discount rate of 11% to 15% and was comprised of the sum of the present values of:

the projected cash flows for the years 2002 through the fiscal year ended December 31, 2005; and

the December 31, 2005 terminal value based upon a range of multiples of estimated terminal EBITDA from 8.0x to 12.0x.

	Low	High
(in billions)		
DCF Value of Expected Synergies	\$ 16.6	\$ 23.4

Historical Exchange Ratio Analysis. Bear Stearns reviewed the per share daily closing market price movements of GM Class H common stock and EchoStar Class A common stock for the one-year period ending on October 25, 2001, and calculated the historical exchange ratios during this period implied by dividing the daily per share closing prices of GM Class H common stock by those of EchoStar Class A common stock. Bear Stearns calculated a range of implied exchange ratios of between 0.528x and 1.091x. Bear Stearns also calculated the averages of those historical trading ratios for the one-week, one-month, three-month, six-month, and one-year periods ending October 25, 2001. The analysis resulted in the following average historical trading ratios for the periods indicated, rounded to the nearest thousandth, compared to an implied exchange ratio in the Hughes/ EchoStar merger of 0.73 shares of EchoStar Class A common stock for each share of GM Class H common stock, which is the inverse of the exchange ratio in the Hughes/ EchoStar merger of 1/0.73, or about 1.3699, shares of New EchoStar Class A common stock in exchange for each share

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

of EchoStar Class A common stock and 1/0.73, or about 1.3699, shares of New EchoStar Class B common stock in exchange for each share of EchoStar Class B common stock:

Period ending October 25, 2001	Average Implied Exchange Ratio
October 25, 2001	0.583x
Last 1 Week	0.591x
Last 1 Month	0.572x
Last 3 Months	0.638x
Last 6 Months	0.666x
Last 1 Year	0.732x

The implied exchange ratio in the Hughes/ EchoStar merger is higher than the average implied exchange ratio in each case, except for the last one year.

Implied Exchange Ratio Analysis. Based upon the per share equity values of Hughes and EchoStar as of October 25, 2001, Bear Stearns calculated an implied pre-Hughes recapitalization equity ownership split of 62.1% for Hughes and 37.9% for EchoStar. This compares to the proposed pre-Hughes recapitalization equity ownership split of 67.1% for Hughes and 32.9% for EchoStar, based on the agreed-to exchange ratio. The percentage ownership in New EchoStar of the GM Class H common stockholders based upon the exchange ratio in the Hughes/EchoStar merger is greater than the ratio that is implied by a comparison of the equity values of Hughes and EchoStar as of October 25, 2001. Using the revenue figures provided to Bear Stearns by General Motors, Hughes and EchoStar, Bear Stearns calculated the percentage of revenue contributed to the combined entity for the years 2001 to 2005 by both Hughes and EchoStar to be 67.8% to 69.2% and 32.2% to 30.8%, respectively. Using the EBITDA figures provided to Bear Stearns by General Motors, Hughes and EchoStar, Bear Stearns calculated the percentage of EBITDA contributed to the combined entity for the years 2001 to 2005 by both Hughes and EchoStar to be 51.1% to 67.7% and 48.9% to 32.3%, respectively.

Premium to GM Class H Common Stockholders and GM \$1 2/3 Par Value Common Stockholders. Bear Stearns analyzed the valuation impact and implied premium to GM Class H common stockholders and GM \$1 2/3 par value common stockholders at various levels of value attributed to synergies assuming a pro forma trading value that gives effect to the proposed \$4.2 billion reduction of GM's retained economic interest in Hughes and assumes the October 25, 2001 closing share price of \$15.40 for the GM Class H common stock and an implied exchange ratio in the Hughes/EchoStar merger of 0.73 shares of EchoStar Class A common stock in exchange for each share of GM Class H common stock. Bear Stearns calculated the pro forma implied trading price per New EchoStar Class C share by dividing the sum of stand-alone market value plus capitalized synergy value, if any, by pro forma shares outstanding (based on the exchange ratio). The implied pro forma price per share of New EchoStar Class C common stock assuming no synergies was \$16.67 per share, implying an 8.3% premium to the GM Class H common stockholders over the prevailing market price. Bear Stearns assumed that the \$4.2 billion reduction of GM's retained economic interest in Hughes was based on the same implied trading price of \$16.67. The table below sets forth these and other premiums based on various implied pro forma prices per share of New EchoStar Class C common stock and implied premiums based on various levels of assumed synergy value.

Synergy Assumption	Implied Price	Implied Premium
No Synergies	\$ 16.67	8.3%
\$5.4 Billion of Assumed Synergy Value	\$ 19.26	25.0%
\$10.0 Billion of Assumed Synergy Value	\$ 21.52	39.7%
\$20.0 Billion of Assumed Synergy Value	\$ 26.31	70.9%

In each case, the pro forma implied price per share of New EchoStar Class C common stock was higher than the October 25, 2001 closing share price of \$15.40 for GM Class H common stock.

Credit Rating Impact Considerations for General Motors. Bear Stearns evaluated the potential impact to the financial position and credit rating of General Motors resulting from the proposed transactions. The appropriate credit statistics of General Motors are compared before and after giving effect to the proposed \$4.2 billion reduction of GM's retained economic interest in Hughes and the exchange of 100 million shares of GM Class H common stock or New EchoStar Class C common stock, as the case may be, in GM share dispositions and assuming the transactions closed on June 30, 2001. General Motors was analyzed excluding the financial results of GMAC. For a more complete description of the GM/ Hughes separation transactions, see Description of the Transactions The GM/Hughes Separation Transactions.

GM Excluding GMAC		
	Last 12 Months as of June 2001	Pro Forma GM (Excluding Hughes)
EBITDA/ Gross Interest Expense	12.4x	16.4x
Total Debt/ EBITDA	1.5x	1.3x
Total Debt/ Book Capitalization	47.5%	38.7%
EBITDA-Capital Expenditures/ Interest	(0.7x)	1.5x
Net Liquidity (in billions)	\$ (0.5)	\$ 4.5

This analysis indicates that GM's credit statistics would improve on a pro forma basis after giving effect to the GM/ Hughes separation transactions.

Earnings Impact Considerations for General Motors. Bear Stearns examined the pro forma impact to General Motors' earnings per share, or EPS, calculation for the GM \$1 2/3 par value common stockholders after giving effect to the proposed \$4.2 billion reduction of GM's retained economic interest in Hughes and exchange of 100 million shares of GM Class H common stock or New EchoStar Class C common stock, as the case may be, in GM share dispositions.

Projected EPS	2001 Estimated	2002 Estimated
GM(a)	\$ 3.08	\$ 1.77
Add Back Attributable GM Class H Common Stock Loss(a)	0.38	0.20
Plus: Saved Interest Expense(b)	0.20	0.20
Pro Forma EPS	\$ 3.66	\$ 2.16
Accretion(\$)	\$ 0.58	\$ 0.39
Accretion(%)	18.7%	22.2%

- (a) **Source:** First Call earnings estimates for GM and Hughes as of October 19, 2001. 32.6% of Hughes' loss excluded from GM's earnings, after adjusting for the dividend paid to the holders of GM Series H preference stock.
- (b) Assumes cash received in \$4.2 billion reduction of GM's retained economic interest in Hughes and \$1.9 billion accounts payable reduction from GM share dispositions are invested at 3.0% pre-tax return and, tax-effected at the marginal rate of 38.0% in 2001 and 2002, using Wall Street consensus shares of 562 million and 563 million for 2001 and 2002, respectively.

This analysis indicates that General Motors' earnings per share for the GM \$1 2/3 par value common stock would be higher on a pro forma basis after giving effect to the GM/ Hughes separation transactions.

Pursuant to the engagement letter with respect to Bear Stearns, GM agreed to pay Bear Stearns fees of:

\$1,000,000 on the date of such engagement letter (which amount is credited towards the amount payable under the third bullet below);

\$500,000 payable upon delivery of its fairness opinion (which amount is credited towards the amount payable under the third bullet below); and

between \$10,000,000 and \$24,000,000 after the completion of the transactions, such amount to be determined based upon the difference in the value of the interests of the GM \$1 2/3 par value common stockholders and GM Class H common stockholders in Hughes at the time of announcement and those interests around the time of the completion of the transactions.

GM has also agreed to reimburse Bear Stearns for its reasonable out-of-pocket expenses, including the reasonable fees and expenses of its counsel, and to indemnify Bear Stearns and certain related persons against certain liabilities in connection with its engagement, including certain liabilities under the federal securities laws.

Bear Stearns has in the past performed certain investment banking services for General Motors and affiliates of General Motors, for which services Bear Stearns has received compensation. As part of its investment banking business, Bear Stearns regularly is engaged in the valuation of businesses and securities in connection with mergers and acquisitions, negotiated underwritings, competitive biddings, secondary distributions of listed and unlisted securities, private placements and valuations for estate, corporate and other purposes.

In the ordinary course of its business, Bear Stearns may actively trade the equity and debt securities of General Motors, Hughes, EchoStar or their public affiliates for its own account and for the accounts of customers and, accordingly, may at any time hold a long or short position in such securities.

Fairness Opinions of Hughes Financial Advisors

Descriptions of the fairness opinions of Hughes financial advisors in connection with the Hughes/EchoStar merger, Credit Suisse First Boston and Goldman Sachs, are set forth below. These descriptions are qualified in their entirety by reference to the full text of the opinions included in Appendix C to this document.

The fairness opinions described below relate to the Hughes/ EchoStar merger, which will be completed immediately following the completion of the GM/Hughes separation transactions. As part of the Hughes/ EchoStar merger, EchoStar will merge with HEC Holdings, the parent company of Hughes at the time of the merger, and HEC Holdings will be the surviving corporation. For a more detailed description of the Hughes/ EchoStar merger, see The Transactions Description of the Transactions The Hughes/ EchoStar Merger.

You should understand that, because the fairness opinions of Credit Suisse First Boston and Goldman Sachs were delivered prior to the final determination of the necessary structural modifications to the transactions described at GM s Development of the Transactions Further Discussions with EchoStar; Restatement of Transaction Agreements, the following descriptions do not reflect the fact that HEC Holdings will become the parent company of Hughes in connection with the GM/ Hughes separation transactions and the corporate entity into which EchoStar will be merged in the Hughes/ EchoStar merger.

Credit Suisse First Boston Fairness Opinion

Credit Suisse First Boston has acted as financial advisor for GM and Hughes in connection with the Hughes/ EchoStar merger. Hughes selected Credit Suisse First Boston based on Credit Suisse First Boston s experience, expertise, reputation and its familiarity with GM and Hughes and their respective businesses. Credit Suisse First Boston is an internationally recognized investment banking firm and is regularly engaged in the valuation of businesses and securities in connection with mergers and acquisitions, leveraged buyouts, negotiated underwritings, competitive biddings, secondary distributions of listed and unlisted securities, private placements and valuations for corporate and other purposes.

In connection with Credit Suisse First Boston s engagement, GM and Hughes requested that Credit Suisse First Boston evaluate the fairness, from a financial point of view, to the holders of Hughes Class C common stock immediately prior to the Hughes/ EchoStar merger, including, in such capacity, GM and holders of GM \$1 2/3 par value common stock and GM Class H common stock, as applicable, of the exchange ratios pursuant to the Hughes/ EchoStar merger. On October 28, 2001, at a meeting of the GM board of directors and the Hughes board of directors held to consider the Hughes/ EchoStar merger, Credit Suisse First

Boston rendered to the GM board of directors and the Hughes board of directors an oral opinion, which opinion was later confirmed by delivery of a written opinion, to the effect that, as of the date of the opinion and based on and subject to the assumptions, limitations and qualifications described in the opinion, the exchange ratios pursuant to the Hughes/ EchoStar merger were fair, from a financial point of view, to the holders of Hughes Class C common stock immediately prior to the Hughes/ EchoStar merger, including GM and holders of GM \$1 2/3 par value common stock and GM Class H common stock, as applicable.

The full text of Credit Suisse First Boston's written opinion, dated as of October 28, 2001, to the GM board of directors and the Hughes board of directors, which sets forth the procedures followed, assumptions made, matters considered and limitations on the review undertaken, is attached hereto in Appendix C and is incorporated into this document by reference. Holders of Hughes Class C common stock immediately prior to the Hughes/ EchoStar merger, including, in such capacity, holders of GM \$1 2/3 par value common stock and GM Class H common stock, are urged to, and should read this opinion carefully and in its entirety. Credit Suisse First Boston's opinion is addressed and delivered to the GM board of directors and the Hughes board of directors in connection with their consideration of the Hughes/ EchoStar merger and does not constitute a recommendation with respect to how any stockholder of GM should vote or act on any matter relating to the transactions or any other proposals described in this document. This summary of Credit Suisse First Boston's opinion in this document is qualified in its entirety by reference to the full text of the opinion.

In arriving at its opinion Credit Suisse First Boston reviewed:

certain publicly available business and financial information relating to Hughes and EchoStar;

execution versions of the Hughes/ EchoStar merger agreement, the GM/ Hughes separation agreement, the commitment letter relating to the Hughes/ EchoStar merger financing, the commitment letter relating to the PanAmSat stock sale financing, the implementation agreement, the PanAmSat stock purchase agreement, the supplemental agreement and guaranty entered into by and among GM, Hughes, EchoStar and The Samburu Warrior Revocable Trust, the pledge agreement entered into by and between GM and The Samburu Warrior Revocable Trust, the proposed amendments to the certificate of incorporation of Hughes relating to the classes of shares of Hughes common stock to be issued by Hughes in the GM/ Hughes separation transactions and the Hughes/ EchoStar merger and certain related documents;

certain financial forecasts prepared and provided to Credit Suisse First Boston by Hughes and EchoStar with respect to Hughes and EchoStar, respectively;

certain financial forecasts prepared and provided to Credit Suisse First Boston by the management of Hughes with respect to the pro forma combined entity resulting from the Hughes/ EchoStar merger, including estimates prepared and provided to Credit Suisse First Boston by the management of Hughes as to the cost savings and other potential synergies anticipated to result from the Hughes/ EchoStar merger, and Credit Suisse First Boston met with members of the management of Hughes and EchoStar to discuss the business and prospects of Hughes and EchoStar;

certain financial data of Hughes and EchoStar and certain stock market data relating to shares of GM Class H common stock and EchoStar Class A common stock, and Credit Suisse First Boston compared those data with similar data for publicly held companies in businesses similar to Hughes and EchoStar;

the financial terms of certain business combinations and other transactions which have been effected or announced; and

such other information, financial studies, analyses and investigations and financial, economic and market criteria which Credit Suisse First Boston deemed relevant.

In connection with its review, Credit Suisse First Boston did not assume any responsibility for independent verification of any of the information that was provided to or otherwise reviewed by it and relied on that information being complete and accurate in all material respects. With respect to the Hughes and

EchoStar forecasts, Credit Suisse First Boston was advised and assumed that they had been reasonably prepared on bases reflecting the best currently available estimates and judgments of Hughes and EchoStar's managements as to the future financial performance of Hughes and EchoStar, respectively. Credit Suisse First Boston also assumed that the pro forma forecasts had been reasonably prepared on bases reflecting the best currently available estimates and judgments of Hughes' management as to the cost savings and other potential synergies anticipated to result from the Hughes/ EchoStar merger, including the amount, timing and achievability thereof. For purposes of its analyses, Credit Suisse First Boston was advised and assumed, and was advised that for purposes of preparing the pro forma forecasts, the management of Hughes assumed, that:

the GM/ Hughes separation transactions, the Hughes/ EchoStar merger financing and the Hughes/ EchoStar merger will be completed or effected in accordance with the terms of the principal transaction agreements, without waiver, amendment or modification of any material representation, warranty, covenant, condition or other agreement contained therein;

in the course of obtaining any necessary regulatory or third party approvals for such transactions, no delay, condition or restriction will be imposed that will have an adverse effect on the contemplated benefits of such transactions to Hughes and EchoStar;

any adjustment (pursuant to the GM/ Hughes separation agreement or implementation agreement) to the number of shares of GM Class H common stock that may be issued by GM pursuant to GM share dispositions will not have any adverse effect on the contemplated benefits of such transactions to the holders of Hughes Class C common stock; and

neither the completion of the GM/ Hughes separation transactions, the financing related to the PanAmSat stock sale, the Hughes/ EchoStar merger financing, the GM share dispositions or the Hughes/ EchoStar merger nor the existence or occurrence of any past or future events and circumstances will have an adverse effect on the contemplated tax treatment of any such transactions. For purposes of its opinion, Credit Suisse First Boston has, with the consent of the GM board of directors and the Hughes board of directors, also assumed that all of the principal transaction agreements conform to the forms reviewed by it in all respects material to its analyses, and that the definitive loan agreements with respect to the financing related to the PanAmSat stock sale and the Hughes/ EchoStar merger financing, when executed, will not contain any material terms other than those set forth in the commitment letter relating to the PanAmSat stock sale financing or the commitment letter relating to the Hughes/ EchoStar merger financing, as the case may be.

Credit Suisse First Boston was advised by the GM board of directors and the Hughes board of directors, and Credit Suisse First Boston assumed, that the Hughes/ EchoStar merger will be treated as a tax-free reorganization for federal income tax purposes. In addition, Credit Suisse First Boston was not requested to make, and did not make, an independent evaluation or appraisal of the assets and liabilities (contingent or otherwise) of Hughes or EchoStar, nor was Credit Suisse First Boston furnished with any such evaluation or appraisal. Credit Suisse First Boston's opinion is necessarily based upon information available to it and financial, economic, market and other conditions as they exist and can be evaluated on the date of its opinion. Credit Suisse First Boston did not express any opinion as to the actual value of the shares of Hughes Class C common stock or the prices at which such shares would trade at any time.

Hughes has agreed to pay Credit Suisse First Boston for its financial advisory services in connection with the Hughes/ EchoStar merger an aggregate fee of \$25 million upon the completion of the Hughes/ EchoStar merger. Hughes has also agreed to reimburse Credit Suisse First Boston for all reasonable out-of-pocket expenses, including reasonable fees and expenses of legal counsel of Credit Suisse First Boston if approved in advance by Hughes, and any other advisor retained by Credit Suisse First Boston, and to indemnify Credit Suisse First Boston and related parties against liabilities, including liabilities under the federal securities laws arising out of this engagement. Also in connection with the Hughes/ EchoStar merger, EchoStar has agreed to pay Credit Suisse First Boston customary fees for certain financial services in connection with the Hughes/ EchoStar merger financing and for financial services in connection with Vivendi Universal's \$1.5 billion equity investment in EchoStar, but unrelated to this opinion and to the engagement of Credit Suisse First Boston to render this opinion. Hughes has separately agreed to pay Credit Suisse First Boston for its financial advisory

services in connection with a potential sale of PanAmSat. PanAmSat has also separately agreed to pay Credit Suisse First Boston for its financial services in connection with the refinancing of the \$1.725 billion loan from Hughes to PanAmSat. In addition, Credit Suisse First Boston and its affiliates have in the past provided, and may in the future provide, investment banking and financial services to Hughes, GM, EchoStar and/or certain of their affiliates unrelated to the Hughes/ EchoStar merger, for which services Credit Suisse First Boston has received, and expects to receive, customary compensation. Credit Suisse First Boston did not advise GM in connection with the GM/ Hughes separation transactions, the financing related to the PanAmSat stock sale, the Hughes/ EchoStar merger financing, the GM share dispositions or the Hughes/ EchoStar merger, other than by providing this opinion to the GM board of directors, in consideration of which GM indemnified Credit Suisse First Boston and certain related persons for losses arising in connection with or as a result of its opinion and related matters. Furthermore, in the ordinary course of business, Credit Suisse First Boston and its affiliates may actively trade the debt and equity securities of Hughes, GM, EchoStar, PanAmSat and/or certain of their affiliates for their own accounts and for the accounts of customers, and, accordingly, may at any time hold a long or short position in those securities.

In preparing its opinion to the GM board of directors and the Hughes board of directors, Credit Suisse First Boston performed a variety of financial and comparative analyses, including those described below. The preparation of a fairness opinion is a complex analytical process involving various determinations as to the most appropriate and relevant methods of financial analysis and the application of those methods to the particular circumstances and, therefore, a fairness opinion is not readily susceptible to summary description. In arriving at its opinion, Credit Suisse First Boston made qualitative judgments as to the significance and relevance of each analysis and factor that it considered. Accordingly, Credit Suisse First Boston believes that its analyses must be considered as a whole and that selecting portions of its analyses and factors or focusing on information presented in tabular format, without considering all analyses and factors or the narrative description of the analyses, could create a misleading or incomplete view of the processes underlying its analyses and opinion.

In its analyses, Credit Suisse First Boston considered industry performance, regulatory, general business, economic, market and financial conditions and other matters, many of which are beyond the control of GM and Hughes. No company, transaction or business used in Credit Suisse First Boston's analyses as a comparison is identical to Hughes or EchoStar, or any business segment thereof, or the Hughes/ EchoStar merger, and an evaluation of those analyses is not entirely mathematical. Rather, the analyses involve complex considerations and judgments concerning financial and operating characteristics and other factors that could affect the acquisition, public trading or other values of the companies, business segments or transactions being analyzed. The estimates contained in Credit Suisse First Boston's analyses and the ranges of valuations resulting from any particular analysis are not necessarily indicative of actual values or predictive of future results or values, which may be significantly more or less favorable than those suggested by the analyses. In addition, the analyses relating to the value of businesses or securities do not purport to be appraisals or to reflect the prices at which businesses or securities actually may be sold. Accordingly, Credit Suisse First Boston's analyses and estimates are inherently subject to substantial uncertainty.

Credit Suisse First Boston's opinion and financial analyses were only one of many factors considered by the GM board of directors and the Hughes board of directors in their evaluation of the Hughes/ EchoStar merger and should not be viewed as determinative of the views of the GM board of directors and the Hughes board of directors or their respective managements with respect to the Hughes/ EchoStar merger or the exchange ratios pursuant to the Hughes/ EchoStar merger agreement. The summary set forth below at Joint Presentation of Hughes' Financial Advisors does not purport to be a complete description of the analyses performed by Credit Suisse First Boston.

Goldman Sachs Fairness Opinion

On October 28, 2001, Goldman Sachs delivered its oral opinion, later confirmed in writing, to the GM board of directors and the Hughes board of directors that, based upon and subject to the matters described in the opinion and based upon such other matters as Goldman Sachs considered relevant, as of the date of that opinion and based on market conditions on that date, the exchange ratios set forth in the Hughes/ EchoStar

merger agreement were fair from a financial point of view to the holders of Hughes Class C common stock immediately prior to the Hughes/ EchoStar merger, including GM, the holders of GM \$1 2/3 par value common stock and GM Class H common stock, as applicable.

The full text of the written opinion of Goldman Sachs, dated October 28, 2001, which sets forth assumptions made, matters considered and limitations on the review undertaken in connection with the opinion, is attached to this document in Appendix C and is incorporated herein by reference. Goldman Sachs provided its opinion for the information and assistance of the GM board of directors and the Hughes board of directors in connection with their consideration of the Hughes/ EchoStar merger and certain related transactions. The Goldman Sachs opinion does not in any respect address GM's or Hughes' underlying business decision to effect the Hughes/ EchoStar merger, the GM/ Hughes separation transactions or the GM share dispositions, or constitute a recommendation as to how any holders of the GM \$1 2/3 par value common stock and GM Class H common stock should vote with respect to any of the proposals relating to the transactions or any other proposal described in this document. The Goldman Sachs opinion is necessarily based upon information available to Goldman Sachs and financial, economic, market and other conditions as they exist and can be evaluated as of the date of its opinion. We urge you to read the Goldman Sachs opinion in its entirety.

In connection with its opinion, Goldman Sachs reviewed, among other things:

the Hughes/ EchoStar merger agreement;

the implementation agreement;

the GM/ Hughes separation agreement;

the supplemental agreement and guaranty among GM, Hughes, EchoStar and The Samburu Warrior Revocable Trust;

the pledge agreement between GM and The Samburu Warrior Revocable Trust;

the commitment letter relating to the Hughes/ EchoStar merger financing;

the commitment letter relating to the PanAmSat stock sale financing;

the PanAmSat stock purchase agreement;

the annual reports to stockholders of GM for each of the five years ended December 31, 2000;

the annual reports to stockholders of PanAmSat on Form 10-K for each of the three years ended December 31, 2000;

the annual reports to stockholders of EchoStar on Form 10-K for each of the five years ended December 31, 2000;

certain quarterly reports to stockholders of EchoStar on Form 10-Q;

various prospectuses and offering memoranda of EchoStar with respect to certain EchoStar public debt securities;

certain other communications from GM and EchoStar to their respective stockholders; and

certain internal financial analyses and forecasts for Hughes and EchoStar (and certain of their affiliates) prepared by their managements, including certain other estimates prepared by Hughes management as to cost savings and other potential synergies expected to result from the Hughes/ EchoStar merger.

Goldman Sachs also held discussions with members of the senior managements of Hughes, PanAmSat and EchoStar regarding their assessment of the past and current business operations, financial condition, and future prospects of their respective companies including, in the case of Hughes and EchoStar, discussions of

the strategic rationale for and the potential benefits of the Hughes/ EchoStar merger and related transactions, including the synergies. In addition, Goldman Sachs:

reviewed the reported price and trading activity for the shares of GM Class H common stock and EchoStar Class A common stock;

compared certain financial information for Hughes and EchoStar and certain stock market information for EchoStar with similar information for certain other companies, the securities of which are publicly traded; and

reviewed the financial terms of certain recent business combinations in the communications, direct-to-home satellite broadcast and media industries, specifically, and in other industries, generally, and performed such other studies and analyses as it considered appropriate.

Goldman Sachs relied upon the accuracy and completeness of all of the financial, accounting and other information discussed with or reviewed by it and assumed such accuracy and completeness for purposes of rendering its opinion. In that regard, Goldman Sachs assumed, with the consent of the GM board of directors and the Hughes board of directors, that the financial forecasts provided to Goldman Sachs, including the synergies, had been reasonably prepared on a basis reflecting the best currently available judgments and estimates of the managements of Hughes and EchoStar (and certain of their affiliates), as applicable, and that such forecasts will be realized in the amounts and at the time contemplated thereby. Goldman Sachs also assumed that all material governmental, regulatory or other consents and approvals necessary for the completion of the transactions contemplated by the Hughes/ EchoStar merger agreement and the implementation agreement will be obtained without any adverse effect on Hughes, GM, EchoStar or the combined company following the Hughes/ EchoStar merger or the contemplated benefits thereof reflected in such financial forecasts. In addition, Goldman Sachs did not make an independent evaluation or appraisal of the assets and liabilities of Hughes or EchoStar or any of their subsidiaries and has not been furnished with any such evaluation or appraisal.

In addition, Goldman Sachs assumed:

the GM/ Hughes separation transactions, the GM share dispositions, any financing relating to the PanAmSat stock sale, the Hughes/ EchoStar merger financing and certain related transactions will be completed as contemplated by the Hughes/ EchoStar merger agreement, the implementation agreement, the GM/ Hughes separation agreement and certain related agreements contemplated thereby (including with respect to the tax treatment of each of such transactions) and Goldman Sachs took into account the terms of such transactions, among other things, in its analyses; and

the Hughes/ EchoStar merger will be treated as a tax-free reorganization for U.S. federal income tax purposes.

Goldman Sachs expressed no opinion whatsoever as to:

the GM/ Hughes separation transactions, the GM share dispositions, any financing relating to the PanAmSat stock sale, the Hughes/ EchoStar merger financing and certain related transactions or the likelihood of their completion;

the fairness of the GM/Hughes separation transactions or the GM share dispositions, or the fairness to, or as between, each of the holders of the GM \$1 2/3 par value common stock and GM Class H common stock, respectively, of the consideration to be provided to GM and its subsidiaries, to the holders of the GM \$1 2/3 par value common stock and to the holders of the GM Class H common stock in the GM/Hughes separation transactions or the GM share dispositions;

the prices at which the shares of Hughes Class C common stock may trade if and when they trade publicly; or

the relative merits of the Hughes/ EchoStar merger and alternative potential transactions.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Set forth below at Joint Presentation of Hughes Financial Advisors is a summary of the material financial analyses used by Goldman Sachs in connection with providing its October 28, 2001 written opinion to the boards of directors of GM and Hughes.

The preparation of a fairness opinion is a complex process and is not necessarily susceptible to partial analysis or summary description. Selecting portions of the analyses or of the summary set forth below, without considering the analyses as a whole, could create an incomplete view of the processes underlying the opinion of Goldman Sachs. In arriving at its opinion, Goldman Sachs considered the results of all these analyses and did not attribute any particular weight to any factor or analysis considered by it; rather, Goldman Sachs made its determination as to fairness on the basis of its experience and professional judgment after considering the results of all such analyses. No company or transaction used by Goldman Sachs in its analyses as a comparison is directly comparable to Hughes or EchoStar or the proposed Hughes/ EchoStar merger. The analyses were prepared solely for purposes of Goldman Sachs providing its opinion to the GM board of directors and the Hughes board of directors as to the fairness from a financial point of view of the exchange ratios set forth in the Hughes/ EchoStar merger agreement to the holders of Hughes Class C common stock immediately prior to the Hughes/ EchoStar merger, including GM, the holders of GM \$1 2/3 par value common stock and GM Class H common stock, as applicable. These analyses do not purport to be appraisals or necessarily reflect the prices at which businesses or securities actually may be sold. Analyses based upon forecasts of future results are not necessarily indicative of actual future results, which may be significantly more or less favorable than suggested by such analyses. Because such analyses are inherently subject to uncertainty, being based upon numerous factors or events beyond the control of the parties or their respective advisors, none of GM, Hughes, EchoStar, Goldman Sachs or any other person assumes responsibility if future results are materially different from those forecast.

As described above, Goldman Sachs opinion to the GM board of directors and the Hughes board of directors was one of many factors taken into consideration by the GM board of directors and the Hughes board of directors in making their determination to approve the Hughes/ EchoStar merger and certain related transactions. The summary set forth below at Joint Presentation of Hughes Financial Advisors does not purport to be a complete description of the analyses performed by Goldman Sachs.

Goldman Sachs, as part of its investment banking business, is continually engaged in the valuation of businesses and their securities in connection with mergers and acquisitions, negotiated underwritings, competitive biddings, secondary distributions of listed and unlisted securities, private placements, and valuations for estate, corporate and other purposes. Goldman Sachs is familiar with Hughes and GM, having provided certain investment banking services to Hughes and GM from time to time, including:

having advised Hughes in its purchase of an equity interest in Thomson multimedia in December 1998;

having acted as underwriter with respect to the initial public offering of 100 million shares of common stock of Delphi Automotive Systems Corporation, a wholly owned subsidiary of GM at the time of the transaction in February 1999;

having acted as financial advisor to Hughes in connection with its acquisition of the medium power direct broadcast satellite business of PRIMESTAR Inc. in April 1999;

having acted as underwriter in connection with the Delphi Automotive Systems Corporation offering of aggregate principal amount \$500 million of 6.15% Notes due May 2004 in April 1999, of aggregate principal amount \$500 million of 6.50% Notes due May 2009 in April 1999, and of aggregate principal amount \$500 million of 7.125% Notes due May 2029 in April 1999;

having acted as underwriter with respect to certain GMAC mortgage securitizations of aggregate principal amount \$1.0 billion in June 1998, aggregate principal amount \$1.362 billion in February 1999, aggregate principal amount \$1.0 billion in June 1999 and of aggregate principal amount \$1.150 billion in October 1999;

having acted as bookrunner with respect to the Delphi Automotive Systems Corporation Stock Repurchase Program in May 2000; and

having acted as bookrunner in connection with the GM Nova Scotia Finance Company offering of aggregate principal amount \$750 million of 6.85% Notes due October 2008 in October 2001.

Goldman Sachs has also acted as financial advisor to Hughes in connection with, and has participated in certain of the negotiations leading up to, the definitive agreements relating to the Hughes/ EchoStar merger and certain related transactions.

Goldman Sachs has also provided certain investment banking services to EchoStar and its affiliates from time to time. Goldman Sachs may also provide investment banking and advisory services to GM, Hughes, EchoStar and their respective affiliates in the future.

Hughes selected Goldman Sachs as its financial advisor because it is a nationally recognized investment banking firm that has substantial experience in transactions similar to the Hughes/ EchoStar merger.

Goldman Sachs provides a full range of financial, advisory and securities services and, in the course of its normal trading activities, may from time to time effect transactions and hold securities, including derivative securities, of Hughes (after the Hughes split-off), GM, EchoStar or their respective affiliates, for its own account or the accounts of customers.

Pursuant to a letter agreement, Hughes engaged Goldman Sachs to act as its financial advisor in connection with the contemplated transaction. Pursuant to the terms of this engagement letter, Hughes has agreed to pay Goldman Sachs a fee of \$25 million upon the completion of the Hughes/ EchoStar merger. In addition, Hughes has agreed to reimburse Goldman Sachs for its reasonable out-of-pocket expenses, including attorneys' fees, and to indemnify Goldman Sachs against certain liabilities, including certain liabilities under the federal securities laws. GM has also agreed to indemnify Goldman Sachs against certain liabilities, including certain liabilities under the federal securities laws, pursuant to a letter agreement.

Joint Presentation of Hughes' Financial Advisors

On October 28, 2001, Credit Suisse First Boston and Goldman Sachs made a joint presentation to the boards of directors of GM and Hughes. A description of the analyses of Credit Suisse First Boston and Goldman Sachs presented to the boards of directors of GM and Hughes is set forth below. Some of the summaries of the financial analyses include information presented in tabular format. In order to more fully understand the financial analyses used by Credit Suisse First Boston and Goldman Sachs, the tables must be read together with the full text of each summary. The tables alone are not a complete description of the financial analyses of Credit Suisse First Boston and Goldman Sachs.

Pro Forma Combination Analysis

Pro Forma Ownership. Credit Suisse First Boston and Goldman Sachs reviewed the pro forma ownership of New EchoStar, based on the estimated economics and voting power, for:

current holders of GM Class H common stock;

current holders of GM \$1 2/3 par value common stock;

former GM debtholders/other interests;

current holders of EchoStar Class A common stock; and

Charles W. Ergen, the beneficial owner of all outstanding shares of EchoStar Class B common stock.

For the purpose of this analysis, Credit Suisse First Boston and Goldman Sachs assumed that GM will exchange 100 million shares of its GM Class H common stock for outstanding GM liabilities, resulting in current GM debtholders owning shares of GM Class H common stock. Based on these assumptions, the analysis indicated that the holders of GM Class H common stock would receive about 52.8% of the outstanding common equity of New EchoStar and the holders of GM \$1 2/3 par value common stock would receive about 2.8% of the outstanding common equity of New EchoStar. For the purposes of analyzing the pro forma ownership of voting interest in the equity of New EchoStar, Credit Suisse First Boston and Goldman Sachs assumed, for indicative purposes, that New EchoStar Class A common stockholders (currently EchoStar Class A common stockholders) have one vote per share, New EchoStar Class B common

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

stockholders (currently EchoStar Class B common stock owned by Charles W. Ergen) have 10 votes per share, and New EchoStar Class C common stockholders (currently holders of GM Class H common stock and other interests) have 4.5 votes per share. Based on these assumptions, the analysis indicated that the holders of GM Class H common stock would receive about 48.9% of the voting interest in the equity of New EchoStar and the holders of GM \$1 2/3 par value common stock would receive about 2.6% of the voting interest in the equity of New EchoStar. The following table shows the results of this analysis.

	<u>Current Hughes Economic</u>	<u>Hughes/EchoStar Economic</u>	<u>Pro Forma Voting</u>
Current GM Class H common stockholders	69.5%	52.8%	48.9%
Current GM \$1 2/3 par value common stockholders	30.5%	2.8%	2.6%
Former GM debtholders/other interests	NA	8.0%	7.4%
Current EchoStar Class A common stockholders	NA	18.3%	3.8%
Charles W. Ergen, the beneficial owner of all outstanding shares of EchoStar Class B common stock	NA	18.0%	37.3%
Total	100.0%	100.0%	100.0%

Pro Forma Credit Analysis. Credit Suisse First Boston and Goldman Sachs reviewed certain estimated future operating and financial information, including, among other things, revenues, EBITDA, total pre-subscriber acquisition cost, or pre-SAC, EBITDA, total debt and total cash, for the pro forma combined entity, including synergies, based on Hughes and EchoStar management estimates. Based on these estimates, Credit Suisse First Boston and Goldman Sachs analyzed:

the total debt per subscriber;

the total debt/ EBITDA ratio; and

the total debt/ pre-SAC EBITDA ratio.

The following table shows the results of this analysis.

<u>Credit Statistics</u>	<u>2001</u>	<u>Closing</u>	<u>2002</u>	<u>2003</u>	<u>2004</u>	<u>2005</u>
Total Debt/ Subscriber	\$ 390	\$ 785	\$ 684	\$ 588	\$ 441	\$ 339
Total Debt/ EBITDA	7.2x	8.8x	7.2x	3.4x	1.8x	0.9x
Total Debt/ Pre-SAC EBITDA	1.9x	3.2x	2.9x	2.0x	1.3x	0.7x

Based on the pro forma credit analysis, the ratios of the pro forma combined company were generally consistent with the ratios that typically exist for companies that have a BB- rating by Standard and Poor's Ratings Services.

Relative Valuation of Hughes and EchoStar

Valuation Summary. Based on the valuations of Hughes and EchoStar as derived by Credit Suisse First Boston and Goldman Sachs as set forth below, Credit Suisse First Boston and Goldman Sachs calculated the implied exchange ratio of GM Class H common stock shares per EchoStar share. The following table shows the results of this analysis.

<u>Hughes</u>		<u>EchoStar</u>		<u>Implied</u>
<u>Equity Value</u>	<u>Per Share Value</u>	<u>Equity Value</u>	<u>Per Share Value</u>	<u>Exchange Ratio</u>

(in billions, except per share data)

Transaction Exchange Ratio	1.37x
----------------------------	-------

Valuation

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Low	\$ 19.3	\$ 13.90	\$ 13.8	\$ 28.75	2.07x
High	26.0	18.70	18.6	38.55	2.06

171

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

The implied exchange ratios, ranging from 2.06x to 2.07x, of shares of GM Class H common stock per EchoStar share derived from the valuation analyses described below were higher than the transaction exchange ratio of 1.37x, and, as a consequence, holders of EchoStar common stock will receive a smaller percentage of the New EchoStar equity than is suggested by the relative valuation analysis.

Hughes Sum-of-the-Parts Valuation Analyses. Credit Suisse First Boston and Goldman Sachs analyzed the value of each of the business units of Hughes based on certain financial projections for Hughes prepared by the management of Hughes, and by utilizing several valuation methodologies, including a DCF valuation, an analysis of comparable transaction multiples, an analysis of the trading multiples of comparable companies to Hughes business units and other valuation methodologies as Credit Suisse First Boston or Goldman Sachs believed were appropriate. In the DCF analyses of the respective business units of Hughes, Credit Suisse First Boston and Goldman Sachs, collectively, used the following range of discount rates:

Assets	
DIRECTV	12% - 15%
PanAmSat	8% - 11.5%
DIRECTV Latin America	18% - 21%
Hughes Network Systems	12% - 16.5%
Corporate/Other	9% - 14%

The comparable transactions considered by Credit Suisse First Boston and Goldman Sachs, collectively, for the respective business units of Hughes are listed below (target company name is listed second).

In respect of DIRECTV:

- Pegasus Communications Corporation/ Golden Sky Holdings, Inc.

- Pegasus Communications Corporation/ selected independent National Rural Telecommunications Cooperative entities

- Vivendi S.A./ Canal Plus S.A.

- Hughes/ United States Satellite Broadcasting Corporation

- Hughes/ Primestar, Inc.

- TCI Satellite Entertainment, Inc./ Primestar Partners L.P.

- Hughes/ Telocity Delaware, Inc.

- Charter Communications, Inc./ High Speed Access Network Corporation

- SKY PerfecTV/ DIRECTV Japan

In respect of PanAmSat:

- SES Astra S.A./ GE American Communications Inc.

- SES Astra S.A./ 20% stake in Embratel Participacoes S.A.

- SES Astra S.A./ 50% stake in Nordic Satellite Company

- SES Astra S.A./ 34% stake in Asia Satellite Telecommunications Company Limited

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Lockheed Martin Corporation/ COMSAT Corporation

Hughes/ PanAmSat

Loral Space & Communications Ltd./ Satelites Mexicanos, S.A. de C.V.

Loral Space & Communications Ltd./ AT&T s Skynet Satellite Services

Hughes/ 9.5% of PanAmSat

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

China International Trust & Investment Corporation (CITIC)/ 10.3% of Asia Satellite Telecommunications Company Limited
In respect of DIRECTV Latin America:

Liberty Media Corporation and Hicks, Muse, Tate & Furst Inc. / Cablevision S.A.

Globo Cabo S.A./ Net Sul S.A.

Cordillera Comunicaciones Ltda./ Metropolis-Intercom S.A.

Globo Cabo S.A./ Unicabo Participacoes

Microsoft Corporation/ 10% interest in Globo Cabo S.A.

SKY PerfecTV/ DIRECTV Japan

In respect of Hughes Network Systems:

EchoStar Communications Corporation/ 12% stake in StarBand Communications Inc.

Charter Communications, Inc./ High Speed Access Corporation

No particular attempt was made to assign specific weights to particular comparable transactions, but rather, Credit Suisse First Boston and Goldman Sachs, as the case may be, made qualitative judgments as to the significance and relevance of the comparable transactions considered.

The comparable companies considered by Credit Suisse First Boston and Goldman Sachs, collectively, for the respective business units of Hughes are listed below.

In respect of DIRECTV:

EchoStar Communications Corporation

Pegasus Communications Corporation

British Sky Broadcasting Group plc

In respect of PanAmSat:

SES Astra S.A.

New Skies Satellites N.V.

JSAT Corp.

Loral Space & Communications Ltd.

Prodigy Communications Corporation

Earthlink, Inc.

Thomson multimedia S.A.

No particular attempt was made to assign specific weights to particular comparable companies, but rather, Credit Suisse First Boston and Goldman Sachs, as the case may be, made qualitative judgments as to the significance and relevance of the comparable companies considered.

Credit Suisse First Boston and Goldman Sachs, based upon their judgment as experienced financial advisors, jointly derived a range of valuations for each of the business units of Hughes as set forth in the table below. This valuation methodology indicated a range of equity values for Hughes of \$19.3 billion to \$26.0 billion, or \$13.90 to \$18.70 per share. In their valuation of the Corporate/ Other assets of Hughes, Credit Suisse First Boston and Goldman Sachs have included the DCF value of Hughes reserves and other corporate expenses incorporated in the projections provided to Credit Suisse First Boston and Goldman Sachs by Hughes management.

Asset	Ownership	Value	
		Low	High
(in billions, except per share data)			
DIRECTV, INC.	100%	\$ 17.3	\$ 22.1
PanAmSat	81%	4.3	4.5

Hughes Network Systems	100%	0.9	2.2
Broadband	100%	0.2	0.2
Equity Investments/ Other	NA	0.6	0.6
Corporate/ Other	100%	(3.3)	(3.2)
Sum-of-the-Parts Value		20.2	26.9
Corporate Adjusted Net Debt		(0.9)	(0.9)
Equity Value		19.3	26.0
Equity Value per Share		\$ 13.90	\$ 18.70

EchoStar Valuation Analyses. Credit Suisse First Boston and Goldman Sachs analyzed the value of EchoStar based on certain financial projections for EchoStar prepared by the management of EchoStar, and by utilizing several valuation methodologies, including a DCF valuation, an analysis of comparable transaction multiples, an analysis of the trading multiples of comparable companies to EchoStar and other valuation methodologies as Credit Suisse First Boston or Goldman Sachs believed were appropriate. In the DCF analyses of EchoStar, Credit Suisse First Boston and Goldman Sachs, collectively, used discount rates ranging from 10.0% to 14.0%.

The comparable transactions considered by Credit Suisse First Boston and Goldman Sachs, collectively, were (target company name is listed second):

Pegasus Communications Corporation/ Golden Sky Holdings, Inc.

Pegasus Communications Corporation/ selected independent National Rural Telecommunications Cooperative entities

Vivendi S.A./ Canal Plus S.A.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Hughes/ Primestar, Inc.

TCI Satellite Entertainment Inc./ Primestar Partners L.P.

The comparable companies considered by Credit Suisse First Boston and Goldman Sachs, collectively, were:

Hughes

Pegasus Communications Corporation

British Sky Broadcasting Group plc

No particular attempt was made to assign specific weights to particular comparable companies, but rather, Credit Suisse First Boston and Goldman Sachs, as the case may be, made qualitative judgments as to the significance and relevance of the comparable companies considered.

Credit Suisse First Boston and Goldman Sachs, based upon their judgment as experienced financial advisors, jointly derived a range of valuations for EchoStar as set forth in the table below. This valuation methodology indicated a range of equity values for EchoStar of \$13.8 billion to \$18.6 billion, or \$28.75 to \$38.55 per share.

Asset	Value	
	Low	High
	(in billions, except per share data)	
Enterprise Value	\$ 16.7	\$ 21.5
Adjusted Net Debt	(2.9)	(2.9)
Equity Value	13.8	18.6
Value per Share	\$ 28.75	\$ 38.55

Public Market Valuation. Credit Suisse First Boston and Goldman Sachs derived implied historical exchange ratios by dividing the closing price per share of EchoStar Class A common stock by the closing price per share of GM Class H common stock for each trading day in the period from October 25, 2000 through October 25, 2001. Credit Suisse First Boston and Goldman Sachs calculated that the implied exchange ratio as of October 25, 2001 was 1.71. Credit Suisse First Boston and Goldman Sachs also calculated the average implied exchange ratios for each of the following periods ending on October 25, 2001:

Period	Implied Exchange Ratio
1 Week	1.69
1 Month	1.75
3 Month	1.56
6 Month	1.50
12 Month	1.37

In each case described above, the implied exchange ratio derived by Credit Suisse First Boston and Goldman Sachs was equal to or higher than the transaction exchange ratio of 1.37x.

Contribution Analysis. Credit Suisse First Boston and Goldman Sachs analyzed the relative contribution of Hughes and EchoStar to New EchoStar on a pro forma basis, including, among other things, revenues, pre-SAC EBITDA, EBITDA and subscribers, before taking into

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

account any of the possible benefits that may be realized following the Hughes/ EchoStar merger based on estimated 2001, 2002 and 2003 results and based on financial data and on the assumptions provided to Credit Suisse First Boston and Goldman Sachs by Hughes and EchoStar's managements. In performing this analysis, Credit Suisse First

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Boston and Goldman Sachs adjusted the relative income statement contribution of Hughes and EchoStar by the leverage, or net debt, that each company had as of December 31, 2001. Credit Suisse First Boston and Goldman Sachs calculated the relative income statement contribution of Hughes and EchoStar by subtracting the net debt of New EchoStar from the product of the unadjusted ownership and the pro forma enterprise value, and divided the resulting number by the pro forma equity value of New EchoStar. Based on these calculations, Credit Suisse First Boston and Goldman Sachs derived the implied exchange ratio of shares of GM Class H common stock per share of EchoStar Class A common stock. The following table shows the results of this analysis.

	<u>Hughes Contribution</u>	<u>Hughes Implied Ownership</u>	<u>Implied Exchange Ratio</u>
Transaction Exchange Ratio			1.37x
Estimated 2001			
Revenue	67.9%	70.5%	1.20x
Pre-SAC EBITDA	59.4%	60.4%	1.89
EBITDA	50.3%	49.6%	2.93
Subscribers	56.5%	57.0%	2.17
Estimated 2002			
Revenue	67.0%	69.4%	1.27x
Pre-SAC EBITDA	60.8%	62.1%	1.76
EBITDA	40.0%	37.3%	4.84
Subscribers	55.9%	56.3%	2.24
Estimated 2003			
Revenue	67.9%	70.5%	1.21x
Pre-SAC EBITDA	61.9%	63.3%	1.67
EBITDA	50.0%	49.2%	2.98
Subscribers	55.9%	56.2%	2.24

In each case described above, other than with respect to the estimated contributed revenue in 2001, 2002 and 2003, the implied exchange ratio of shares of GM Class H common stock per share of EchoStar Class A common stock derived by Credit Suisse First Boston and Goldman Sachs was higher than the transaction exchange ratio of 1.37x.

Potential Synergies Valuation Analysis. Credit Suisse First Boston and Goldman Sachs performed a DCF analysis of the estimated synergies resulting from the proposed combination of Hughes and EchoStar using two sets of projections provided by Hughes management, referred to as the high case and low case. The expected synergies are projected to be a result of increased number of subscribers, reduced subscriber turnover, increased advertising income, reduced subscriber acquisition costs, reduced programming costs and other cost reductions and incremental revenues. These synergy estimates are offset by implementation costs and higher subscriber acquisition costs associated with the increased number of subscribers.

Credit Suisse First Boston and Goldman Sachs estimated the present value for each cost synergy and revenue synergy by calculating a discounted cash flow valuation assuming a discount rate of 12.5% on the sum of:

the projected cash flows for the fiscal years ended December 31, 2002 through the final year of the projections for each cost synergy and revenue synergy ranging from 2005 to 2008; and

the terminal value based upon a 10.0x terminal multiple applied to the EBITDA in the final year of the projections for each cost synergy and revenue synergy, except for certain implementation costs which Hughes did not expect to continue after 2007.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Credit Suisse First Boston and Goldman Sachs then calculated the sum of the present values of both the low and high case synergy estimates as shown in the table below:

	<u>Low</u>	<u>High</u>
	(in billions)	
DCF Value of Potential Synergies	\$ 17.8	\$ 24.8

Analysis of Synergy on Implied Trading Price. Credit Suisse First Boston and Goldman Sachs analyzed the implied premium on the current, one-month average and two-month average closing price of GM Class H common stock based on the implied share price of New EchoStar and assuming certain amounts of the net present value of potential synergies resulting from the combination of the two companies. Credit Suisse First Boston and Goldman Sachs calculated the implied share price of New EchoStar by dividing (1) the sum of the current equity market capitalization of Hughes and EchoStar (based on closing prices as of October 25, 2001) and the various assumed net present values of potential synergies by (2) the number of shares outstanding of New EchoStar. The following table shows the results of this analysis.

Assumed Net Present Value of Synergies	Implied Premium		
	Current \$15.40	One Month \$13.95	Two Month \$14.85
\$ 0.0	8.2%	19.4%	12.2%
2.5	16.1%	28.2%	20.4%
5.0	24.0%	36.9%	28.6%
7.5	32.0%	45.7%	36.8%
10.0	39.9%	54.4%	45.1%
12.5	47.8%	63.2%	53.3%
15.0	55.7%	71.9%	61.5%

Based on assumed net present values of potential synergies of \$0 to \$15 billion, this analysis indicates a range of implied premiums to GM Class H common stock of 8.2% to 55.7% based on the current closing price (as of October 25, 2001), 19.4% to 71.9% based on the one-month closing price (for the period ending October 25, 2001) and 12.2% to 61.5% based on the two-month closing price (for the period ending on October 25, 2001).

Gives/Gets Analysis. Credit Suisse First Boston and Goldman Sachs analyzed the impact of the Hughes/ EchoStar merger on the equity value of Hughes before and after the Hughes/ EchoStar merger, assuming a 50% realization of the assumed net present value of potential synergies. The following table shows the results of this analysis.

	Equity Value		Per Share		Accretion/ (Dilution)	
	Low	High	Low	High	Low	High
	(in billions, except per share data)					
Current	\$21.4		\$15.40			
Total Impact of Hughes Recapitalization	\$ (4.2)	\$ (3.2)	\$ (0.28)	\$ 0.63	NA	NA
Post-Hughes Recapitalization Equity Value Merger	\$ 17.2	\$ 18.2	\$ 15.12	\$ 16.03	NA	NA
Market Value of EchoStar	\$ 12.7	\$ 12.7	\$ 1.52	\$ 1.19	10.1%	7.4%
Synergies Recognized by Market	8.9	12.4	4.96	6.91	32.8%	43.1%
Transaction Fees	(0.2)	(0.2)	(0.11)	(0.11)	(0.7)%	(0.7)%
Total Impact of Hughes/ EchoStar Merger	\$ 21.4	\$ 24.9	\$ 6.38	\$ 7.99	42.2%	49.8%
Post-Transactions	\$ 38.6	\$ 43.1	\$ 21.50	\$ 24.02	42.2%	49.8%

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Based on this analysis, the proposed transaction would increase the equity value of Hughes from \$21.4 billion, or \$15.40 per share, to a range of \$38.6 billion to \$43.1 billion, or a range of \$21.50 to \$24.02 per share, and would be accretive to the share price of Hughes.

Requisite GM Common Stockholder Approval of the Transactions

GM \$1 2/3 par value common stockholders and GM Class H common stockholders, each voting separately as a class and voting together as a single class based on their respective per share voting power, are being asked to approve an amendment to Article Fourth of the GM restated certificate of incorporation and to ratify two matters relating to the transactions. The transactions will not occur unless these three matters are approved by GM \$1 2/3 par value common stockholders and GM Class H common stockholders. Accordingly, we sometimes refer to these three proposals as the proposals relating to the transactions. In addition, GM common stockholders are being asked to approve a further amendment to the GM restated certificate of incorporation to reflect the elimination of the GM Class H common stock after the completion of the GM/ Hughes separation transactions, but the completion of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger is not conditioned on approval of this further charter amendment.

The three proposals relating to the transactions are described below:

Proposal 1: Approval of GM Charter Amendment. This proposal is to approve an amendment to Article Fourth of the GM restated certificate of incorporation that would be filed in order to provide GM the ability to implement certain aspects of the GM/ Hughes separation transactions. The amendment would add three important provisions to the GM restated certificate of incorporation and make certain other clarifying changes to facilitate the implementation of the transactions. They would:

provide for the reduction by the GM board of directors of GM's retained economic interest in Hughes to reflect the Hughes dividend distribution of up to \$4.2 billion to be received by GM in connection with the Hughes recapitalization. This would be accomplished by reducing the denominator of the GM Class H fraction by an amount that reflects the Hughes dividend distribution;

provide for GM to split off HEC Holdings by exchanging one share of HEC Holdings Class C common stock for each outstanding share of GM Class H common stock. This would be accomplished by adding a redemption feature to the terms of the GM Class H common stock that will make the GM Class H common stock redeemable in exchange for shares of HEC Holdings Class C common stock on a share-for-share-basis; and

provide that the current provisions of the GM restated certificate of incorporation that provide for a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate under certain circumstances will not apply to the GM/Hughes separation transactions. This would be accomplished by adding a provision to expressly provide that the completion of the GM/Hughes separation transactions as described in this document will not result in a recapitalization of the GM Class H common stock into GM \$1 2/3 par value common stock at a 120% exchange rate.

This amendment to Article Fourth of the GM restated certificate of incorporation is required in order to enable GM to complete the GM/Hughes separation transactions on the proposed terms as described in this document.

Proposal 2: Ratification of the GM/Hughes Separation Transactions. This proposal is to ratify the GM/Hughes separation transactions as described in this document. The GM/Hughes separation transactions consist of the Hughes recapitalization, including the Hughes dividend distribution of up to \$4.2 billion to GM and the corresponding reduction of GM's retained economic interest in Hughes, and the Hughes split-off, which will result in the separation of HEC Holdings from GM, as well as certain separation-related arrangements.

Proposal 3: Ratification of the Hughes/ EchoStar Merger. This proposal is to ratify the Hughes/EchoStar merger as described in this document. This transaction will result in the combination of the businesses of Hughes and EchoStar by means of a merger.

Proposals 2 and 3 seek ratification by GM common stockholders of certain matters relating to the transactions. In this context, ratification refers to the process of seeking GM common stockholder

approval of certain matters relating to the transactions which do not, as a matter of corporation law, require GM common stockholder approval. Even though it is not required to do so, General Motors is submitting these matters to GM common stockholders for their approval pursuant to this consent solicitation because GM believes that it is appropriate to give its common stockholders an opportunity to consider and approve these important matters that will affect their investment in GM in significant ways. Unless GM common stockholders ratify these matters, GM will not complete the transactions, even if the other proposal relating to the transactions (proposal 1 relating to the GM charter amendment) receives the requisite GM common stockholder approval.

As further described elsewhere in this document, GM believes that ratification by GM's common stockholders of the GM/Hughes separation transactions and the Hughes/ EchoStar merger should bar any claim (other than for fraud or similar egregious misconduct) against General Motors and its directors based on these transactions, including a claim alleging unfairness of these transactions to either or both classes of GM common stockholders or alleging any deficiency in the process of developing the terms of these transactions or the GM board of directors' consideration or approval of these transactions. In addition, by ratifying the terms of the GM/Hughes separation transactions, which involve the distribution of the up to \$4.2 billion dividend from Hughes to GM and the related reduction of GM's retained economic interest in Hughes by a commensurate amount, GM \$1 2/3 par value common stockholders and GM Class H common stockholders will be approving and consenting to an asset transfer from Hughes to GM. This will have the effect, pursuant to the terms of the GM board policy statement regarding certain capital stock matters, of permitting the dividend to be paid by Hughes to GM without a further proportionate distribution of a portion thereof from GM to GM Class H common stockholders in accordance with their tracking stock interest in Hughes, as described in greater detail below.

Proposals 1 through 3, all of which relate to the transactions, are separate matters to be voted upon by GM common stockholders but are expressly conditioned upon the approval of each of the other of these three proposals. This means that ALL THREE of these proposals must be approved by GM \$1 2/3 par value common stockholders and GM Class H common stockholders in order for GM to obtain the requisite GM common stockholder approval of the proposals relating to the transactions. The transactions described in this document will not be completed, even if all of the other conditions are satisfied or waived, if the requisite GM common stockholder approval is not received.

In addition to the proposals relating to the transactions, GM \$1 2/3 par value common stockholders and GM Class H common stockholders are also being asked to approve a fourth proposal, which is to approve a further amendment to the GM restated certificate of incorporation to eliminate certain provisions relating to the GM Class H common stock after the completion of the GM/ Hughes separation transactions. GM believes that this proposal will appropriately simplify its restated certificate of incorporation after the completion of the GM/ Hughes separation transactions. However, the completion of the transactions is NOT conditioned on the approval by GM common stockholders of this fourth proposal. For more information about this fourth proposal, see "GM Consent Solicitation Matters" Solicitation of Written Consent of GM Common Stockholders Matters to Be Approved.

By approving the proposals relating to the transactions, GM Class H common stockholders will be forgoing certain rights that might otherwise be available to them under certain circumstances. We briefly describe these matters below.

No Recapitalization of GM Class H Common Stock into GM \$1 2/3 Par Value Common Stock at a 120% Exchange Rate. GM Class H common stockholders as well as GM \$1 2/3 par value common stockholders will be approving transactions that will not result in shares of GM Class H common stock being exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate, as currently provided for under certain circumstances pursuant to the GM restated certificate of incorporation. The GM restated certificate of incorporation currently provides that in the event of the sale, transfer, assignment or other disposition by GM of substantially all of the business of Hughes to a person, entity or group of which GM is not a majority owner, whether this occurs by means of merger, consolidation,

sale of assets or stock, liquidation, dissolution, winding up or otherwise, effective automatically upon the completion of such transaction, GM will be recapitalized and all of the outstanding shares of GM Class H common stock will be exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate in accordance with the valuation methodology specified in the GM restated certificate of incorporation. For this purpose, substantially all of the business of Hughes means 80% or more of the business of Hughes, based on the fair market value of the assets, tangible and intangible, of Hughes as of the time that the proposed transaction is approved by the GM board of directors.

Although the transactions involve the disposition of substantially all of the business of Hughes to a group of which GM is not the majority owner, you should understand that the transactions will not result in a recapitalization of GM Class H common stock into GM \$1 2/3 par value common stock at the 120% exchange rate. This is because the proposed amendment to Article Fourth of the GM restated certificate of incorporation will, among other things, add a provision to expressly provide that the completion of the GM/ Hughes separation transactions as described in this document will not result in such a recapitalization. By voting to approve the proposals relating to the transactions, GM \$1 2/3 par value common stockholders and GM Class H common stockholders will be approving a transaction that will not result in shares of GM Class H common stock being exchanged for shares of GM \$1 2/3 par value common stock at the 120% exchange rate.

As described in greater detail elsewhere in this document, GM determined that, in the context of the proposed separation of Hughes from GM, such a recapitalization would not be in the best interests of GM and its common stockholders because such a recapitalization would likely produce substantial dilution in the value of the GM \$1 2/3 par value common stock and would change substantially the form and nature of the investment of the GM Class H common stockholders, who, instead of holding a tracking stock investment in the Hughes business, would then have a more conventional investment in all of GM's operations. In addition, GM determined that the transactions should not be structured in a manner that would result in the holders of GM Class H common stock receiving both Hughes stock (representing their proportionate economic interest in Hughes) and GM \$1 2/3 par value common stock (pursuant to the recapitalization provision) as this would have the effect of compensating GM Class H common stockholders twice for the exchange of their stock, to the detriment of GM \$1 2/3 par value common stockholders. Accordingly, GM structured the transactions so as not to result in such a recapitalization. For more information, see The Transactions GM Background and Considerations Alternatives to the Transactions.

If the 120% recapitalization provision had been applicable to the GM/ Hughes separation transactions, which would have been the case but for the transactions being made subject to the GM charter amendment which expressly provides that the 120% recapitalization provision shall not apply to the transactions, upon completion of the GM/Hughes separation transactions, each share of GM Class H common stock would have been cancelled in exchange for the issuance of a number of shares of GM \$1 2/3 par value common stock that had a market value equal to 120% of the market value of the GM Class H common stock, based on the average of the closing prices of GM \$1 2/3 par value common stock and GM Class H common stock for the 15 consecutive trading days ending one trading day prior to October 28, 2001, the date of the public announcement of the transactions. For illustrative purposes, based on the applicable market prices for the specified period prior to October 28, 2001, the date of the public announcement of the transactions, each share of GM Class H common stock would have been exchanged for of a share of GM \$1 2/3 par value common stock that would have been so valued at \$, representing a premium of 20% to the GM Class H common stockholders. As a result, each share of GM Class H common stock would have been exchanged for of a share of GM \$1 2/3 par value common stock. However, due to the period of time between the public announcement and the completion of the GM/Hughes separation transactions, and due to market factors such as the dilution that would occur with respect to the GM \$1 2/3 par value common stock and the possible trading volatility in connection with such issuance, there could be no assurance as to the relative market value of of a share of GM \$1 2/3 par value common stock after such issuance in comparison to the market value of one share of GM Class H common stock before such issuance.

No Pro Rata Distribution of a Portion of the Dividend from Hughes to GM Class H Common Stockholders. GM Class H common stockholders and GM \$1 2/3 par value common stockholders will be approving and consenting to an asset transfer consisting of the dividend of up to \$4.2 billion from Hughes to GM without the further proportionate distribution of a portion of that dividend from GM to the GM Class H common stockholders in accordance with their tracking stock interest in Hughes. The GM board policy statement regarding certain capital stock matters requires under certain circumstances that GM make a pro rata distribution, in accordance with the GM Class H fraction, to GM Class H common stockholders of a portion of certain asset transfers from Hughes to GM, unless such transfer is approved by a requisite vote of the GM common stockholders (including the consent of the holders of a majority of the outstanding shares of GM Class H common stock, voting as a separate class, and GM \$1 2/3 par value common stock, voting as a separate class). As a result of the consent and approval of GM's common stockholders as described herein, the GM board policy statement will not require any proportionate distribution of a portion of the Hughes dividend distribution will be made to GM Class H common stockholders based on the GM Class H fraction.

In the absence of this consent and approval by the GM \$1 2/3 par value common stockholders and GM Class H common stockholders and assuming that the GM board did not otherwise, modify, rescind or interpret its policy statement, such an asset transfer from Hughes to GM could have resulted in the distribution of a portion of the Hughes dividend distribution to GM Class H common stockholders pursuant to the terms of the GM board policy statement. Assuming a Hughes dividend distribution of \$4.2 billion and based on the calculation of the GM Class H fraction as of [redacted], 2002, such a distribution to GM Class H common stockholders would have been about \$ [redacted] billion, or about \$ [redacted] per share of GM Class H common stock. However, if such a pro rata distribution to the GM Class H common stockholders were to occur as contemplated by the GM board policy statement, GM's retained economic interest in Hughes would not be reduced as contemplated by the transactions. Under these circumstances, an important purpose of the transactions providing significant liquidity to GM in respect of its retained economic interest in Hughes would not be accomplished. The GM board policy statement may at any time and from time to time be modified, rescinded and interpreted by the GM board of directors, and the GM board of directors may adopt additional or other policies or make exceptions with respect to the application of the current GM board policy statement in connection with particular facts and circumstances, all as the GM board of directors may determine, consistent with its fiduciary duties to GM and all of its common stockholders, to be in the best interests of General Motors and all of its common stockholders, and any such action may be taken with or without the approval of the stockholders of GM. For more information, see GM Capital Stock GM Board of Directors Policy Statement.

If the requisite GM common stockholder approval of the transactions is not obtained, the transactions will not occur and GM Class H common stockholders will similarly have no right to exchange their shares for shares of GM \$1 2/3 par value common stock at a 120% exchange rate as described above or to receive any distribution from GM based on an asset transfer from Hughes to GM as described above.

GM will not complete the GM/ Hughes separation transactions unless it obtains approval of the three proposals relating to the transactions by the holders of:

a majority of the outstanding shares of GM \$1 2/3 par value common stock, voting as a separate class;

a majority of the outstanding shares of GM Class H common stock, voting as a separate class; and

a majority of the voting power of the outstanding shares of GM \$1 2/3 par value common stock and GM Class H common stock, voting together as a single class, based on their respective per share voting power pursuant to the provisions set forth in the GM restated certificate of incorporation.

When voting together as a single class with respect to any proposal, holders of record of GM \$1 2/3 par value common stock are entitled to one vote per share and holders of record of GM Class H common stock are entitled to 0.20 of a vote per share. If General Motors obtains both of the first two GM common stockholder approvals described above, it will also have obtained the third GM common stockholder approval described

above: the approval of a majority of the outstanding shares of GM \$1 2/3 par value common stock and GM Class H common stock, voting together as a single class, based on their respective per share voting power pursuant to the provisions set forth in the GM restated certificate of incorporation. If these approvals are obtained for each proposal described above, such proposals will have received the requisite GM common stockholder approval.

If the three proposals relating to the transactions are not approved by the GM common stockholders, neither the GM/ Hughes separation transactions nor the Hughes/ EchoStar merger will be completed. In addition, if the proposals relating to the transactions are not approved by the GM common stockholders under certain circumstances in which GM or Hughes enters into or completes a competing transaction, Hughes would be required to make certain payments to EchoStar under the terms of the Hughes/ EchoStar merger agreement. For more information, see Description of Principal Transaction Agreements Hughes/ EchoStar Merger Agreement Termination Fees; Expense Reimbursement below.

The GM board of directors has unanimously approved the transactions and has determined that the transactions are advisable and in the best interests of General Motors and the GM common stockholders. The GM board of directors also has determined that the transactions as a whole, on the terms and conditions of the transaction agreements, are fair to the holders of GM \$1 2/3 par value common stock and to the holders of GM Class H common stock. The GM board of directors recommends that GM common stockholders vote to APPROVE EACH OF THE FOUR PROPOSALS described in this document.

For more information regarding the matters being submitted to GM common stockholder for their approval, see GM Consent Solicitation Matters Solicitation of Written Consent of GM Common Stockholders Matters to be Approved.

Advantages and Disadvantages of the Transactions to GM Common Stockholders

The following is a description of certain important advantages and disadvantages of the transactions to the GM common stockholders. As described below, the transactions will have differing effects on and consequences for holders of GM \$1 2/3 par value common stock and holders of GM Class H common stock. For an explanation of material U.S. federal income tax consequences of the transactions to GM's common stockholders, see Material U.S. Federal Income Tax Considerations Relating to the Transactions below.

GM Class H Common Stockholders. As a result of the GM/ Hughes separation transactions, HEC Holdings will become an independent, publicly owned company that will be owned entirely by the former GM Class H common stockholders and, if applicable, GM and the GM \$1 2/3 par value common stockholders. Immediately after the completion of the GM/ Hughes separation transactions, EchoStar will merge with HEC Holdings, which will be the surviving corporation in the merger. As part of the GM/ Hughes separation transactions, GM Class H common stockholders will receive one share of HEC Holdings Class C common stock in exchange for each share of GM Class H common stock they own and all outstanding shares of GM Class H common stock will be redeemed and canceled. After the Hughes/ EchoStar merger, each of these shares will remain outstanding and will then be a share of New EchoStar Class C common stock. Therefore, as a result of the transactions, the former GM Class H common stockholders will no longer be holders of a tracking stock of General Motors, but instead will be holders of a more conventional common stock of New EchoStar. Upon the completion of the transactions, the former GM Class H common stockholders, together with, if applicable, GM and the GM \$1 2/3 par value common stockholders, will hold more than 50% of the voting power and economic interest in New EchoStar. As part of the GM/ Hughes separation transactions, Hughes will distribute to General Motors a dividend of up to \$4.2 billion and GM's retained economic interest in Hughes will be reduced by an amount that reflects the dividend.

Further, pursuant to the implementation agreement, New EchoStar may be required to indemnify General Motors for certain liabilities, including with respect to the historical operation of the Hughes and EchoStar businesses. See Description of Principal Transaction Agreements Implementation Agreement Indemnification for Tax Liabilities and Other General Indemnification.

If the requisite GM common stockholder approval of the proposals relating to the transactions is obtained, the GM Class H common stockholders will no longer have the right to have their shares of GM Class H common stock exchanged for shares of GM \$1 2/3 par value common stock at a 120% exchange rate, as

currently provided for under certain circumstances pursuant to provisions of the GM restated certificate of incorporation. As discussed in greater detail at The Transactions GM Background and Considerations Alternatives to the Transactions, GM determined that such an exchange would not be in the best interests of GM and its common stockholders in connection with the proposed separation of Hughes from GM and, accordingly, GM structured the transactions so as not to result in such an exchange.

Further, GM Class H common stockholders will not receive any portion of the Hughes dividend distribution to GM. If the requisite GM common stockholder approval of the proposals relating to the transactions is obtained, GM common stockholders will be approving and consenting to an asset transfer consisting of the Hughes dividend distribution to GM without the distribution of a portion of the Hughes dividend distribution to GM Class H common stockholders that is currently provided for under certain circumstances pursuant to a policy statement of the GM board of directors.

However, if the requisite GM common stockholder approval of the transactions is not obtained, the transactions will not occur and GM Class H common stockholders will similarly have no right to exchange their shares for shares of GM \$1 2/3 par value common stock at a 120% exchange rate or to receive any distribution from GM.

GM \$1 2/3 Par Value Common Stockholders. As a result of the GM/ Hughes separation transactions, each share of GM Class H common stock will be exchanged for one share of HEC Holdings Class C common stock and all outstanding shares of GM Class H common stock will be redeemed and canceled. Consequently, after the completion of the GM/ Hughes separation transactions, General Motors will have only one class of outstanding common stock, the GM \$1 2/3 par value common stock. General Motors will then no longer have tracking stock and will be primarily focused on its core automotive and related businesses. As a result, GM will no longer have a dual-class common stock capital structure. After the GM/Hughes separation transactions, the GM \$1 2/3 par value common stockholders will continue to hold their shares of GM \$1 2/3 par value common stock. However, their shares will reflect only the financial performance of GM's core automotive and related businesses, which will not include the Hughes business except through and to the extent of any GM ownership of New EchoStar C common stock after the transactions. We expect that GM \$1 2/3 par value common stockholders will not receive shares of HEC Holdings or New EchoStar. However, if and to the extent required in order to maintain the tax-free status of the Hughes split-off, GM may make a pro rata distribution to the GM \$1 2/3 par value common stockholders of a portion of the HEC Holdings Class C common stock it receives in the Hughes recapitalization. GM currently estimates that it would make a distribution in order to maintain the tax-free status of the Hughes split-off only if the average market price of GM Class H common stock during the five trading days preceding the completion of the Hughes split-off were to be greater than \$ per share or less than \$ per share. This price calculation is based upon the number of shares of GM Class H common stock outstanding as of , 2002 and assumes that any shares of HEC Holdings Class C common stock transferred by GM in debt-for-equity exchanges do not count toward the satisfaction of the relevant tax test. The average market price of GM Class H common stock during the five trading days preceding , 2002 was \$ per share. If GM determines that a pro rata distribution is required, then the number of shares of HEC Holdings Class C common stock to be distributed to the GM \$1 2/3 par value common stockholders and the record date for the distribution will be publicly announced by GM around the time of the completion of the Hughes split-off.

As part of the GM/ Hughes separation transactions, General Motors will receive a dividend in an amount of up to \$4.2 billion from Hughes and GM's retained economic interest in Hughes will be reduced by an amount reflecting the dividend. After the Hughes/ EchoStar merger and the completion of any GM share dispositions, General Motors may retain shares of New EchoStar Class C common stock. See Summary Purposes of the Transactions Liquidity and Value Provided to GM and GM Common Stockholders. As described in greater detail elsewhere in this document, whether and to what extent GM would hold any shares such that it would be able to engage in GM share dispositions after the Hughes/ EchoStar merger or to retain any ownership interest in New EchoStar after the Hughes/ EchoStar merger will depend upon a number of factors that will not be known until immediately before the completion of the GM/Hughes separation transactions and the Hughes/ EchoStar merger, including, among other things, the actual amount of the Hughes dividend distribution and the average market price of GM Class H common stock during a specified period preceding that time. For more information, see Description of the Transactions The GM/ Hughes

Separation Transactions The Hughes Recapitalization Reduction in GM's Retained Economic Interest in Hughes. Regardless of whether GM \$1 2/3 par value common stockholders receive any shares of HEC Holdings Class C common stock as a result of the transactions, through and to the extent of any GM ownership of New EchoStar Class C common stock after the transactions, the GM \$1 2/3 par value common stockholders will have an indirect interest in New EchoStar following the Hughes/ EchoStar merger. However, as a result of the Hughes recapitalization, GM's ownership interest in New EchoStar will be significantly smaller than the retained economic interest GM held in Hughes prior to the transactions.

Pursuant to the implementation agreement, General Motors may be required to indemnify New EchoStar for certain liabilities, including with respect to the historical operation of GM's core automotive and related businesses. In addition, this agreement includes certain indemnification obligations of New EchoStar in favor of GM, including with respect to the historical operation of the Hughes business. See Description of Principal Transaction Agreements Implementation Agreement Indemnification for Tax Liabilities and Other General Indemnification.

EchoStar Background and Considerations

EchoStar's Development of the Hughes/EchoStar Merger

EchoStar has from time to time evaluated opportunities for strategic investments or acquisitions that would complement its services and products, enhance its technical capabilities or otherwise offer growth opportunities and, in some cases, EchoStar has entered into negotiations or agreements with respect to such opportunities.

In the fall of 2000, as described above at GM Background and Considerations GM's Development of the Transactions, General Motors and Hughes were considering the possibility of a strategic combination between Hughes and another company in the telecommunications industry with significant distribution and/or content production capabilities and contacted a variety of industry participants, including EchoStar, in this regard. After discussions among EchoStar's senior management and its financial and legal advisors, and after consultation with the EchoStar board of directors, EchoStar publicly expressed an interest in entering into discussions with Hughes regarding the possibility of a strategic combination. EchoStar's management was interested in pursuing such discussions because it recognized that EchoStar's strategic position could be improved substantially by a transaction involving Hughes that would further its objectives of significant growth in its subscriber base, rationalization of the use of satellite spectrum and accelerated technological development, particularly in light of the increasingly difficult competition in the multi-channel video programming distribution market from cable operators. After preliminary discussions with representatives of GM and Hughes, EchoStar was informed by GM that, at that point in time, and based on the terms of EchoStar's indication of interest, GM and Hughes had determined not to pursue further discussions with EchoStar. In November 2000, EchoStar announced that its initial overtures to GM regarding a potential transaction with Hughes had been rejected. Shortly thereafter, it was publicly reported that General Motors and Hughes had entered into discussions with The News Corporation and Sky Global Networks regarding a transaction involving a combination of Hughes and Sky Global Networks.

By March 2001, subsequent to news reports that indicated that General Motors and Hughes had not reached any definitive agreement with The News Corporation and Sky Global Networks, EchoStar, GM and Hughes reinitiated discussions to explore whether a business combination between Hughes and EchoStar was feasible and whether mutually agreeable terms for a combination transaction could be developed. During March and April of 2001, discussions occurred among EchoStar, GM and Hughes and their respective advisors regarding the feasibility of combining the businesses of EchoStar and Hughes and various possible transaction structures that could both meet EchoStar's objectives for such a combination and prove attractive to GM and Hughes. During this period, EchoStar consulted with members of the EchoStar board on the significant aspects of the discussions with GM and Hughes. GM subsequently issued its press release of May 1, 2001, discussed above at GM Background and Considerations GM's Development of the Transactions, in which GM indicated that GM and Hughes would be pursuing their discussions and negotiations with The News Corporation and Sky Global Networks. Representatives of GM informed

EchoStar of the determination of GM and Hughes, in light of the proposals as then presented by EchoStar, not to pursue, at that time, further discussions with EchoStar about a possible combination with Hughes.

Notwithstanding GM's May 1, 2001 announcement, EchoStar's management continued to believe that a combination of EchoStar and Hughes was feasible and could create extraordinary value for the stockholders of a combined company. On May 14, 2001, Charles W. Ergen, the Chairman and Chief Executive Officer of EchoStar, sent a letter to the board of directors of General Motors, indicating EchoStar's desire to pursue a transaction involving the combination of Hughes with EchoStar. This letter was followed on May 17, 2001 by a formal proposal by EchoStar relating to a split-off of Hughes from General Motors and subsequent merger of Hughes and EchoStar involving a cash distribution by Hughes to GM in connection with the split-off and a stock-for-stock exchange in the merger. The proposal aimed to address what EchoStar believed were GM's and Hughes' key objectives for such a transaction. In response to this proposal, GM and Hughes resumed discussions with EchoStar relating to several elements of the proposal of significant concern to the parties. During this time period, the parties also discussed the possibility of entering into a joint operating agreement under which they would share satellite capacity in the event that a merger of their operations was not permitted. This alternative was analyzed and rejected for a number of reasons as described in greater detail above at GM Background and Considerations GM's Development of the Transactions. General Motors and Hughes expressed concerns to EchoStar about several aspects of its proposal in a letter dated July 9, 2001. Shortly thereafter, GM and Hughes informed EchoStar that they were discontinuing discussions with EchoStar at that time.

EchoStar continued to view a combination with Hughes as highly attractive for the reasons outlined below under EchoStar's Reasons for the Hughes/ EchoStar Merger. At a special meeting of the EchoStar board of directors held on August 5, 2001, the board determined to propose a stock-for-stock merger in a letter addressed to the board of directors of General Motors, which was also released to the public that same day. That proposal, and the discussions among EchoStar, GM and Hughes that followed it through the remainder of August, September and October 2001, are described above under GM Background and Considerations GM's Development of the Transactions EchoStar Public Proposal. During this time period, EchoStar provided periodic updates to EchoStar's board of directors regarding the status and developments in the negotiations with General Motors and Hughes.

Through the course of discussions in late September and early October 2001, it was agreed among the parties that the contemplated combination would be structured as a one-step merger of EchoStar with and into Hughes (following the split-off of Hughes from GM), and that EchoStar would agree to purchase Hughes' approximately 81% indirect interest in PanAmSat on a stand-alone basis in the event that the merger with Hughes could not be completed for certain specified reasons, including the failure to obtain regulatory approval for the contemplated merger of Hughes and EchoStar. In addition, the parties agreed that the implied exchange ratio of EchoStar's bid would be 0.73 to reflect the proposed terms of the transactions including, among other things, the allocation of certain liabilities.

In mid-October, EchoStar was informed by GM and Hughes that the EchoStar proposal along with a proposal from another bidder would be presented to the GM board at a meeting in late October. In preparation for this meeting, GM, Hughes, EchoStar and their respective advisors met to finalize the terms of, and definitive documentation relating to, a proposed transaction involving a combination of Hughes with EchoStar, following the separation of Hughes from GM pursuant to a split-off. At the regular meeting of the EchoStar audit committee held on October 19, 2001, David K. Moskowitz, Senior Vice President, General Counsel and Secretary of EchoStar, briefed the members of the committee on the progress of discussions with GM and Hughes. The progress of these discussions and certain proposed terms of a combination with Hughes were also discussed at a special meeting of the EchoStar board of directors held on October 23, 2001. In addition, during this time EchoStar and its legal advisors met with its lead bank lenders and their counsel to finalize the terms of the loan commitments required to finance the cash requirements for the merger. By October 26, 2001, the definitive terms of a transaction involving the combination of Hughes with EchoStar following the separation of Hughes from GM pursuant to a split-off that would be presented by the parties to their respective boards of directors were agreed upon in nearly all respects. However, on the evening of October 26, 2001, discussions with one of EchoStar's bank lenders regarding the terms of its financing

commitment to EchoStar faltered. As a result, EchoStar had a firm commitment for only one-half of the \$5.525 billion of merger financing that was required. General Motors and Hughes agreed to present EchoStar's proposal for the merger to their respective boards of directors, but indicated to EchoStar that the absence of fully committed financing for the entire \$5.525 billion in cash requirements would likely place EchoStar's proposal at a disadvantage relative to that of the alternative bidder.

On the morning of October 27, 2001, a special meeting of the board of directors of EchoStar was held in Littleton, Colorado. At that meeting, which was attended in person or by telephone by representatives of EchoStar's financial advisor, Deutsche Banc Alex. Brown, and legal counsel, Sullivan & Cromwell, the board considered the proposed combination of Hughes and EchoStar and the related transactions. The EchoStar board considered the opinion of Deutsche Banc Alex. Brown, delivered orally at the meeting, and subsequently confirmed in writing, to the effect that, as of the date of its opinion, the exchange ratio was fair, from a financial point of view, to holders of EchoStar Class A common stock, based upon and subject to the various considerations set forth therein; and the other factors described in greater detail below at

EchoStar's Reasons for the Hughes/ EchoStar Merger. The board also engaged in a discussion of the merger financing and the difficulty of obtaining a necessary financing commitment from one of EchoStar's two lenders. Mr. Ergen advised the board that, in order to remedy what he understood at that time to be the principal defect in EchoStar's proposal being considered by the boards of directors of GM and Hughes, he was prepared to pledge to GM a significant amount of his personal shares of EchoStar Class B common stock beneficially held as collateral against any failure of EchoStar to obtain a financing commitment for the existing shortfall in the \$5.525 billion merger financing. This proposal was subsequently delivered to the GM board of directors in the form of the letter discussed above at GM Background and Considerations GM's Development of the Transactions October 27, 2001 Hughes Board, GM Capital Stock Committee and General Motors Board Meeting. The EchoStar board then approved the merger of Hughes and EchoStar and the related transactions on the principal terms previously negotiated with GM and Hughes. The letter containing Mr. Ergen's share pledge proposal was delivered to the GM board of directors during the course of its meeting later the same day.

Following a recess of the GM board of directors meeting on October 27, 2001, The News Corporation and Sky Global Networks publicly announced the withdrawal of their proposal to enter into a strategic transaction involving Hughes. Thereafter, GM, Hughes and EchoStar management, with the assistance of their respective financial, legal, tax, accounting and other advisors, finalized the terms of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger, and resolved all outstanding issues, including the terms of a \$2.7625 billion GM financing commitment to be secured by the EchoStar stock held by Mr. Ergen.

On October 28, 2001, EchoStar was notified that the GM board of directors had approved the Hughes/ EchoStar merger and the GM/ Hughes separation transactions and that the Hughes board of directors had approved Hughes/ EchoStar merger and the GM/ Hughes separation transactions. GM, Hughes and EchoStar then signed definitive agreements relating to the transactions and jointly issued a press release announcing their agreement to enter into the transactions.

On November 5, 2001, EchoStar succeeded in obtaining a commitment from an alternative financing source, Credit Suisse First Boston, for the \$2.7625 billion financing commitment provided by General Motors in connection with the transactions. Accordingly, the GM financing commitment, and the related pledge of EchoStar stock by Mr. Ergen, were terminated.

For more information about the events subsequent to the announcement of the transactions, see GM Background and Considerations GM's Development of the Transactions Further Discussions with EchoStar; Restatement of Transaction Agreements above.

EchoStar's Reasons for the Hughes/ EchoStar Merger

At its meeting on October 27, 2001, the EchoStar board of directors approved the Hughes/ EchoStar merger and related transactions. In the course of making its decision to approve the Hughes/ EchoStar merger and related transactions, the EchoStar board of directors consulted with EchoStar's management, as well as its

outside legal counsel and its financial advisors. The EchoStar board of directors considered, among other things, the following material factors at its October 27, 2001 meeting and certain prior meetings referred to above:

Strengthened Strategic Position. The combination of EchoStar and Hughes would create one of the nation's largest multi-channel subscription television platforms, having a scale that would permit New EchoStar to compete more effectively with cable television providers, deliver more program and service offerings to subscribers and better position New EchoStar to exploit the growth opportunity represented by 100 million available U.S. television households.

Cost Savings and Revenue Synergies. The integration of the two companies would create substantial potential cost savings and revenue synergies, which were estimated at up to \$5 billion annually by 2005, based on various assumptions and the expected contributions of these savings and synergies to the EBITDA of the combined companies. Based on further analysis and discussions that have taken place between EchoStar and Hughes since October 2001, EchoStar management is currently estimating that the integration of the two companies would create substantial potential cost savings and revenue synergies of up to \$5 billion annually by 2007, based on various assumptions and the expected contributions of these savings and synergies to the EBITDA of the combined companies. The principal elements of the expected cost savings and synergies include the following:

Cost Savings:

the reduction of subscriber acquisition costs through, among other things, standardization of and reduction in the cost of set-top boxes;

reductions in churn through the offering of increased services to subscribers, the enhancement of customer loyalty and the reduction of signal piracy through new technology;

reductions in programming costs as a result of a significantly larger subscriber base; and

reductions in general and administrative expenses through the elimination of duplicative overhead.

Revenue Synergies:

increased advertising and interactive services revenue as a result of the larger subscriber base and a broader, national reach;

increased subscriber revenue as a result of the increase in the number of local markets that would have satellite access to local programming;

the provision of broadband Internet access to consumers and businesses in less densely populated areas;

increased revenue per subscriber through the addition of new product offerings, such as specialty content channels, video-on-demand and pay-per-view; and

additional revenues from the expansion in high definition television (HDTV) capabilities.

You should understand that these estimated potential synergies are forward-looking statements subject to the risks and uncertainties described at Disclosure Regarding Forward-Looking Statements. These estimates of synergies are based on numerous estimates, assumptions and judgments and are subject to significant uncertainties. We cannot assure you that any particular amount of synergies will be realized by New EchoStar in connection with the Hughes/ EchoStar merger. See also Risk Factors Risk Factors Relating to the Transactions Risks Relating to New EchoStar New EchoStar May Not Realize the Benefits Expected From the Hughes/ EchoStar Merger.

Technological Strength. New EchoStar would be able to leverage the combined research and development efforts and the engineering capabilities of the combined companies to expand the features and functionality of their satellite receiver systems. These features would include a wide variety of innovative interactive television services and applications. In addition, EchoStar believed that New EchoStar would be better positioned to enhance its satellite-based broadband communications platform.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Additional Considerations. In the course of reaching its decision to approve the Hughes/ EchoStar merger and related transactions, the EchoStar board of directors considered the following additional factors:

the exchange ratio for each of the GM Class H common stock, the EchoStar Class A common stock and the EchoStar Class B common stock and the resulting percentage ownership interests and voting power that former EchoStar stockholders would have in the combined company;

the analysis and presentations of Deutsche Banc Alex. Brown on the financial aspects of the Hughes/EchoStar merger, and its oral opinion, subsequently confirmed in writing, to the effect that, as of the date of its opinion, the exchange ratio was fair from a financial point of view to holders of EchoStar Class A common stock, based upon and subject to the various considerations set forth therein;

that the receipt by EchoStar Class A common stockholders of New EchoStar Class A common stock in the Hughes/ EchoStar merger would be tax-free to such stockholders for U.S. federal income tax purposes;

that, on a pro forma basis, New EchoStar would be more highly leveraged than EchoStar on a stand-alone basis, at least until such time as the benefits of the expected synergies could be realized in amounts that would effectively counterbalance the increased debt load;

historical information concerning EchoStar's and Hughes' respective businesses, prospects, strategic business plans, financial condition, results of operations, technology positions, managements and competitive positions;

current financial market conditions and the historical stock market prices, volatility and trading information for EchoStar Class A common stock and GM Class H common stock;

the agreement that Charles W. Ergen, as Chairman of the Board of Directors and Chief Executive Officer of EchoStar, would lead the management team of the combined company and that Mr. Ergen would continue to control a significant portion of the voting power of the combined company;

the corporate governance arrangements agreed for the transactions, including the composition of the New EchoStar board of directors, the majority of which will initially consist of directors who are currently directors or officers of EchoStar;

the terms and conditions of the Hughes/ EchoStar merger agreement, including the fact that the exchange ratios are fixed; the conditions to the completion of the Hughes/ EchoStar merger; the high level of effort required of EchoStar and Hughes to obtain all regulatory approvals, including antitrust clearance; the circumstances under which the Hughes/ EchoStar merger agreement could be terminated; and the size and the impact of termination fees associated with a termination under certain circumstances;

that EchoStar would have the opportunity to acquire Hughes' indirect interest in PanAmSat if the Hughes/ EchoStar merger agreement were terminated under certain conditions as described elsewhere in this document; and

the impact of the Hughes/ EchoStar merger on the customers and employees of EchoStar.

The EchoStar board of directors also considered a number of potentially negative factors in its deliberations concerning the Hughes/ EchoStar merger and related transactions, including:

the risk that, because the exchange ratios under the Hughes/ EchoStar merger agreement would not be adjusted for changes in the market price of EchoStar Class A common stock or GM Class H common stock, the per share value of the consideration to be received by EchoStar stockholders could be significantly less than the per share market price of EchoStar Class A common stock immediately prior to the announcement of the proposed Hughes/ EchoStar merger;

that EchoStar stockholders as a group would control less than a majority of the combined company, that former holders of EchoStar Class A common stock would receive a class of common stock of New

EchoStar having a different number of votes per share than the class of New EchoStar common stock to be received by former GM Class H common stockholders;

the risk that the Hughes/ EchoStar merger might not receive regulatory approval from competition authorities in the United States and certain other countries, the FCC and telecommunications regulatory authorities in certain other countries and numerous state and local authorities, or that many of these governmental authorities could attempt to condition their approval of the Hughes/ EchoStar merger or of the transfer of licenses or other entitlements on the companies' compliance with certain conditions, including the divestiture of assets;

the \$600 million fee that would be payable by EchoStar to Hughes if the Hughes/ EchoStar merger agreement is terminated under certain circumstances relating to the failure to achieve regulatory approval under the U.S. antitrust laws or to achieve FCC approval for the license transfers;

the possibility of encountering difficulties in achieving cost savings and revenue synergies in the amounts currently estimated or in the time frame currently contemplated;

the fact that, because EchoStar's controlling stockholder would consent to approval of the Hughes/ EchoStar merger immediately after the EchoStar board of directors' approval, the EchoStar common stockholder approval was assured while the requisite GM common stockholder approval would not be;

the potential adverse impact of the public announcement of the Hughes/ EchoStar merger on EchoStar's ability to attract and retain customers and employees and, more generally, on EchoStar's overall competitive position, particularly if the Hughes/ EchoStar merger were not to occur; and

the possibility that the process of planning for the integration of Hughes into EchoStar and the regulatory approval process and effects might adversely affect the ability of EchoStar to meet its existing business performance targets.

The foregoing discussion of the matters that the EchoStar board of directors considered is not intended to be exhaustive, but to include all material items that the EchoStar board of directors considered. In view of the complexity and wide variety of factors, both positive and negative, that the EchoStar board of directors considered, the EchoStar board of directors did not find it practical to quantify, rank or otherwise weight the factors considered. In considering the various factors, individual members of the EchoStar board of directors considered all of these factors as a whole, and concluded that, on balance, the positive factors outweighed the negative ones.

Recommendation of EchoStar Board of Directors; EchoStar Stockholder Approval Pursuant to Action by Written Consent of Controlling Stockholder

After careful consideration, the EchoStar board of directors unanimously determined that the Hughes/ EchoStar merger and the related transactions are advisable, fair to and in the best interests of EchoStar and the EchoStar stockholders. The EchoStar board of directors unanimously approved the Hughes/ EchoStar merger agreement and unanimously recommended that EchoStar stockholders approve the Hughes/ EchoStar merger agreement. A trust controlled by Charles W. Ergen, as the holder of EchoStar Class B common stock representing about 90% of the voting power of EchoStar, approved the Hughes/ EchoStar merger agreement by executing a written consent in accordance with the Nevada Revised Statutes and the amended and restated bylaws of EchoStar. Accordingly, no approval of the Hughes/ EchoStar merger by the EchoStar Class A common stockholders is required.

Opinion of EchoStar's Financial Advisor

A description of the fairness opinion of EchoStar's financial advisor in connection with the Hughes/ EchoStar merger, Deutsche Banc Alex. Brown, is set forth below. This description is qualified in its entirety by reference to the full text of the opinion included in Appendix C to this document. Because the fairness opinion of Deutsche Banc Alex. Brown was delivered prior to the final determination of the necessary structural modifications to the transactions described at EchoStar's Development of the Hughes/ EchoStar Merger,

the following description does not reflect the fact that HEC Holdings will become the parent company of Hughes in connection with the GM/Hughes separation transactions and the corporate entity into which EchoStar will be merged in the Hughes/ EchoStar merger.

Deutsche Banc Alex. Brown has acted as financial advisor to EchoStar in connection with the transactions. At the October 27, 2001 meeting of the EchoStar board of directors, Deutsche Banc Alex. Brown delivered its oral opinion, subsequently confirmed in writing as of October 28, 2001, to the EchoStar board of directors to the effect that, as of the date of such opinion, based upon and subject to the assumptions made, matters considered and limits of the review undertaken by Deutsche Banc Alex. Brown, the exchange ratio of 1/0.73 shares of New EchoStar Class A common stock for each outstanding share of EchoStar Class A common stock not owned directly by EchoStar was fair, from a financial point of view, to the holders of the EchoStar Class A common stock.

Deutsche Banc Alex. Brown's opinion is directed to the EchoStar board of directors to assist it in connection with its consideration of the proposed transactions and relates only to the fairness, from a financial point of view, to EchoStar Class A common stockholders of the exchange ratio of 1/0.73 shares of New EchoStar Class A common stock for each share of EchoStar Class A common stock. Deutsche Banc Alex. Brown's opinion does not relate to any other aspect of the transactions, is not an opinion as to the fairness of the transactions to Hughes or its stockholders and does not constitute a recommendation to EchoStar, Hughes or their respective stockholders as to the transactions or as to how stockholders should vote with respect to the Hughes/ EchoStar merger agreement.

The full text of the Deutsche Banc Alex. Brown written opinion, dated October 28, 2001 which sets forth, among other things, the assumptions made, matters considered and limits on the review undertaken by Deutsche Banc Alex. Brown in connection with the opinion, is attached as Appendix C to this document and is incorporated herein by reference. EchoStar's Class A common stockholders should read the opinion in its entirety. The summary of the opinion set forth in this document is qualified in its entirety by reference to the full text of such opinion.

In connection with Deutsche Banc Alex. Brown's role as financial advisor to the EchoStar board of directors, and in arriving at its opinion, Deutsche Banc Alex. Brown has, among other things:

reviewed certain publicly available financial and other information concerning Hughes and EchoStar and certain internal analyses and other information furnished to it by Hughes and EchoStar;

discussed with members of the senior management of both Hughes and EchoStar regarding the businesses and prospects of their respective companies, and the joint prospects of a combined company;

reviewed the reported prices and trading activity for GM Class H common stock and the EchoStar Class A common stock;

compared certain financial and stock market information for Hughes and EchoStar with similar information for certain other companies whose securities are publicly traded;

reviewed the terms of the Hughes/ EchoStar merger agreement, the implementation agreement, the GM/ Hughes separation agreement and the PanAmSat stock purchase agreement, and certain related documents (Deutsche Banc Alex. Brown refers to these documents collectively as the "Transaction Documents"); and

performed such other studies and analyses and considered such other factors as it deemed appropriate.

In preparing its opinion, Deutsche Banc Alex. Brown did not assume responsibility for independent verification of, and did not independently verify, any information, whether publicly available or furnished to it, concerning Hughes or EchoStar, including, without limitation, any financial information, forecasts or projections considered in connection with the rendering of its opinion. Accordingly, for purposes of its opinion, Deutsche Banc Alex. Brown assumed and relied upon the accuracy and completeness of all such information and Deutsche Banc Alex. Brown did not conduct a physical inspection of any of the properties or assets, and did not prepare or obtain any independent evaluation or appraisal of any of the assets or liabilities, of Hughes

or EchoStar. With respect to the financial forecasts and projections made available by EchoStar and Hughes to Deutsche Banc Alex. Brown and used in Deutsche Banc Alex. Brown's analyses, and with respect to analyses and forecasts of certain cost savings, operating efficiencies, revenue effects and financial synergies expected to be achieved as a result of the transactions, made available by EchoStar to Deutsche Banc Alex. Brown and used in Deutsche Banc Alex. Brown's analyses, Deutsche Banc Alex. Brown assumed that they were reasonably prepared on bases reflecting the best currently available estimates and judgments of the management of Hughes or EchoStar, as the case may be, as to the matters covered thereby. Deutsche Banc Alex. Brown refers to these cost savings, operating efficiencies, revenue effects and financial synergies, collectively, as Synergies. In rendering its opinion, Deutsche Banc Alex. Brown expressed no view as to the reasonableness of those forecasts and projections, including the Synergies, or the assumptions on which they are based. Deutsche Banc Alex. Brown's opinion was necessarily based upon economic, market and other conditions as in effect on, and the information made available to it as of, the date of such opinion and Deutsche Banc Alex. Brown undertook no obligation to update its opinion to reflect any developments occurring after the date of the opinion.

For purposes of rendering its opinion, Deutsche Banc Alex. Brown assumed that, in all respects material to its analyses, the representations and warranties of GM, EchoStar and Hughes contained in each of the Transaction Documents are true and correct, GM, EchoStar and Hughes will each perform all of the covenants and agreements to be performed by it under the Transaction Documents and certain related documents and all conditions to the obligations of each of GM, EchoStar and Hughes to consummate the transactions will be satisfied without any waiver thereof. Deutsche Banc Alex. Brown also assumed that all material governmental, regulatory or other approvals and consents required in connection with the consummation of the transactions will be obtained and that in connection with obtaining any necessary governmental, regulatory or other approvals and consents, or any amendments, modifications or waivers to any agreements, instruments or orders to which either EchoStar or Hughes is a party or is subject or by which it is bound, no limitations, restrictions or conditions will be imposed or amendments, modifications or waivers made that would have a material adverse effect on the combined company or materially reduce the contemplated benefits of the transactions to EchoStar. In addition, EchoStar advised Deutsche Banc Alex. Brown, and accordingly for purposes of rendering its opinion Deutsche Banc Alex. Brown assumed, that the transactions will be tax-free to each of EchoStar and Hughes and their respective stockholders.

Set forth below is a summary of all material financial analyses performed by Deutsche Banc Alex. Brown in connection with its opinion and reviewed with the EchoStar board of directors at its meeting on October 27, 2001.

As part of the transactions, the holders of EchoStar Class A common stock will receive 1/0.73 shares of New EchoStar Class A common stock for each outstanding share of EchoStar Class A common stock.

Deutsche Banc Alex. Brown performed a variety of analyses detailed below related to the Hughes/ EchoStar merger which were deemed to be relevant by Deutsche Banc Alex. Brown to the holders of EchoStar Class A common stock.

Deutsche Banc Alex. Brown performed an analysis that compared the exchange ratio in the Hughes/ EchoStar merger with the historical ratio of the trading prices of EchoStar Class A common stock and the GM Class H common stock. See [Historical Exchange Ratio Analysis](#).

Deutsche Banc Alex. Brown also examined on a pro forma basis, assuming the Hughes/ EchoStar merger is completed, the relative revenue and EBITDA contribution of Hughes and EchoStar, and compared it with the transaction enterprise value contribution of each company based on the transaction exchange ratio. See [Relative Contribution Analysis](#).

Deutsche Banc Alex. Brown also performed discounted cash flow analyses of EchoStar and Hughes on a stand-alone basis to examine the relative valuation of these companies as compared to the price paid implied by the transaction exchange ratio. See [Discounted Cash Flow Analysis](#).

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

Deutsche Banc Alex. Brown also performed discounted cash flow analyses to compare the value of 1/0.73 shares of New EchoStar Class A common stock at various levels of Synergies to the value of a share of the outstanding EchoStar Class A common stock. See Discounted Cash Flow Analysis.

Deutsche Banc Alex. Brown compared certain financial information and valuation metrics relating to Hughes and EchoStar with the corresponding information and measurements of a selected group of publicly traded companies; which analyses were performed principally to establish a benchmark to compare the per share valuation ranges derived from the discounted cash flow analysis for each company on a stand-alone basis rather than to directly compare the respective valuations of EchoStar and Hughes for purposes of assessing the transaction exchange ratio. See Analysis Based on Selected Publicly Traded Comparable Companies.

Deutsche Banc Alex. Brown did not attribute any particular weight to any analysis or factor considered by it, but rather made qualitative judgments as to the significance and relevance of each analysis and factor. Accordingly, Deutsche Banc Alex. Brown believes that its analyses must be considered as a whole and that selecting portions of its analyses, without considering all analyses, would create an incomplete view of the process underlying its opinion.

Historical Exchange Ratio Analysis. Deutsche Banc Alex. Brown reviewed the per share closing market prices of GM Class H common stock and EchoStar Class A common stock on October 25, 2001 and the movements of such prices for the one-, three-, six- and twelve-month periods ending on October 25, 2001. Deutsche Banc Alex. Brown calculated the historical exchange ratios during these periods implied by dividing the daily per share closing prices of GM Class H common stock by those of EchoStar Class A common stock and arrived at a range of implied exchange ratios of 0.573x to 0.735x as shown in the table below.

Deutsche Banc Alex. Brown compared this range of implied exchange ratios to the implied exchange ratio in the Hughes/EchoStar merger of 0.73 shares of EchoStar Class A common stock in exchange for each share of GM Class H common stock. The 0.73x exchange ratio is the inverse of the exchange ratio in the Hughes/EchoStar merger of 1/0.73, or about 1.3699, shares of New EchoStar Class A common stock in exchange for each share of EchoStar Class A common stock and is the exchange ratio that was used throughout Deutsche Banc Alex. Brown's analyses. This implied exchange ratio of 0.73x is within the range of implied historical exchange ratios of 0.573x to 0.735x for the periods described above. More specifically, this implied exchange ratio of 0.73x was lower than the average implied exchange ratio for the 12-month period indicating that holders of the EchoStar Class A common stock will receive a higher percentage of New EchoStar equity based on the transaction exchange ratio than is suggested by the historical exchange ratio analysis for this period. For the other periods, however, the implied exchange ratio in the Hughes/ EchoStar merger was higher than the average for such periods indicating that holders of the EchoStar Class A common stock will receive a lower percentage of New EchoStar equity based on the transaction exchange ratio than is suggested by the historical exchange ratio analysis for these other periods.

Period	Average Implied Exchange Ratio
October 25, 2001	0.583x
One month average	0.573
Three months average	0.635
Six months average	0.664
Twelve months average	0.735

Relative Contribution Analysis. Deutsche Banc Alex. Brown compared the pro forma contribution of EchoStar and Hughes based on respective management projections, to New EchoStar assuming the completion of the Hughes/ EchoStar merger on December 31, 2000. This analysis showed that on a pro forma basis (excluding the effect of any Synergies that may be realized as a result of the Hughes/ EchoStar merger

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

and non-recurring expenses relating to the Hughes/ EchoStar merger), the relative contribution of Hughes and EchoStar and the implied Class A exchange ratio would be as follows:

	Relative Contribution Analysis		Implied Exchange Ratio
	Hughes	EchoStar	
Transaction enterprise value contribution(1)	63.9%	36.1%	0.73x
Estimated 2001 revenues	67.8	32.2	0.88x
Estimated 2002 revenues	64.7	35.3	0.76
Estimated 2001 EBITDA	42.3	57.7	0.28
Estimated 2002 EBITDA	39.0	61.0	0.24
Estimated 2001 subscribers	55.7	44.3	NM(2)
Estimated 2002 subscribers	54.0	46.0	NM(2)

(1) Based on the closing prices as of October 25, 2001.

(2) Given the value of non-direct-to-home businesses included in the enterprise value, the analysis is not comparable.

Based on the per share equity prices of GM Class H common stock and EchoStar Class A common stock as of October 25, 2001 and the agreed-to exchange ratio, Deutsche Banc Alex. Brown calculated the enterprise value contribution split of 63.9% for Hughes and 36.1% for EchoStar. Using the revenue figures provided to Deutsche Banc Alex. Brown by Hughes and EchoStar, Deutsche Banc Alex. Brown calculated the percentage of revenue contributed by Hughes and EchoStar to the combined entity to be 67.8% and 32.2%, respectively, for 2001, and 64.7% and 35.3%, respectively, for 2002. Using the EBITDA figures provided to Deutsche Banc Alex. Brown by Hughes and EchoStar, Deutsche Banc Alex. Brown calculated the percentage of EBITDA contributed by Hughes and EchoStar to the combined entity to be 42.3% and 57.7%, respectively, for 2001, and 39.0% and 61.0%, respectively, for 2002. The implied exchange ratios based on the level of revenue contribution are higher than the exchange ratio of 0.73x implied by the Hughes/ EchoStar merger, indicating that holders of EchoStar Class A common stock will receive a higher percentage of New EchoStar equity based on the transaction exchange ratio than is suggested by the relative 2001 and 2002 revenue contribution. The implied exchange ratios based on the level of EBITDA contribution are lower than the exchange ratio of 0.73x implied by the Hughes/ EchoStar merger, indicating that holders of EchoStar Class A common stock will receive a lower percentage of New EchoStar equity based on the transaction exchange ratio than is suggested by the relative 2001 and 2002 EBITDA contribution. However, the direct-to-home business generally and Hughes and EchoStar specifically are currently in a significant subscriber growth stage, resulting in high subscriber acquisition costs without immediate corresponding revenue, which has a negative impact on EBITDA during this period. This characteristic, coupled with the fact that the managements of Hughes and EchoStar have each projected significant EBITDA growth and EBITDA margin growth of their respective companies through the projected periods provided, suggests that a relative contribution comparison based on 2001 and 2002 EBITDA is less meaningful than a comparison based on 2001 and 2002 revenue.

Discounted Cash Flow Analysis. Deutsche Banc Alex. Brown performed a discounted cash flow analysis for both EchoStar and Hughes on a standalone basis and for New EchoStar. Deutsche Banc Alex. Brown calculated the discounted cash flow values for each of EchoStar and Hughes as the sum of the net present values of:

in the case of EchoStar, the estimated future cash flow that EchoStar would generate for the period beginning October 1, 2001 and ending December 31, 2007, and in the case of Hughes, the estimated future cash flow that Hughes would generate for the period beginning October 1, 2001 and ending December 31, 2005; plus

the value of EchoStar or Hughes, as the case may be, at the end of such period.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

The estimated future cash flows for EchoStar and Hughes were based on estimates provided by the respective managements. The terminal values of EchoStar and Hughes were calculated based on estimated EBITDA in each companies' respective terminal year and a range of multiples of 10.0x, 11.0x and 12.0x. Deutsche Banc Alex. Brown used discount rates ranging from 12.0% to 14.0% for both EchoStar and Hughes. Deutsche Banc Alex. Brown used such discount rates based on:

its review of selected peer companies of EchoStar and Hughes; and

its judgment of the estimated weighted average cost of capital of EchoStar and Hughes; and used such EBITDA multiples based on:

its review of the trading characteristics of the common stock of selected peer companies of EchoStar and Hughes; and

its review of selected research analyst estimates.

Utilizing a mid-range discount rate of 13.0%, this analysis yielded the following ranges of per share values:

	Implied Equity Value Per Share Range
EchoStar	\$ 39.01 - \$46.31
Hughes	\$ 15.58 - \$18.98

Deutsche Banc Alex. Brown also analyzed certain pro forma effects of the Hughes/ EchoStar merger. Deutsche Banc Alex. Brown performed a discounted cash flow analysis of the pro forma New EchoStar's business taking into account after-tax Synergies as estimated by EchoStar. Deutsche Banc Alex. Brown analyzed New EchoStar's business using a forecast for the period beginning October 1, 2001 and ending December 31, 2005, based on estimates provided by both EchoStar's and Hughes' managements. Deutsche Banc Alex. Brown estimated New EchoStar's common stock discounted cash flow value by using a discount rate range of 12.0% to 14.0%, a terminal year EBITDA multiple range of 12.0x to 14.0x and the implied exchange ratio in the Hughes/ EchoStar merger of 0.73 shares of EchoStar Class A common stock in exchange for each share of GM Class H common stock.

Scenario	Pro Forma New EchoStar Equity Value Per Share Range
No credit for Synergies	\$ 26.91 - \$32.74
50 percent credit for Synergies	42.17 - 50.21
100 percent credit for Synergies	57.41 - 67.65

Based on this analysis, Deutsche Banc Alex. Brown concluded that at 50 percent and higher credit for Synergies, the implied valuation range per share of EchoStar Class A common stock would be greater for the pro forma New EchoStar than the valuation range for EchoStar Class A common stock on a standalone basis.

Analysis Based on Selected Publicly Traded Comparable Companies. Deutsche Banc Alex. Brown compared certain financial information and commonly used valuation measurements relating to EchoStar and Hughes with the corresponding information and measurements for the group of publicly traded companies mentioned in the table below. However, due to the lack of a large number of comparable companies and the growth of the direct-to-home business generally, Deutsche Banc Alex. Brown principally used the per share valuation ranges derived from this analysis to establish a benchmark to compare the per share valuation ranges derived from the discounted cash flow analyses for each of EchoStar and Hughes, on a standalone basis, as described above rather than to directly compare the respective valuations of EchoStar and Hughes for purposes of assessing the transaction exchange ratio.

For the purpose of Hughes, Deutsche Banc Alex. Brown performed the publicly traded comparable companies analysis taking into account each of the five business segments owned and operated by Hughes.

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

These five segments are DIRECTV, DIRECTV Latin America, Hughes Network Systems, DIRECTV Broadband and PanAmSat.

EchoStar Peer Group(1)	Hughes Peer Group
British Sky Broadcasting Group PLC Pegasus Satellite Communications Inc. Hughes	DIRECTV(1) British Sky Broadcasting Group PLC Pegasus Satellite Communications Inc. EchoStar Communications Corporation DIRECTV Latin America(2) Globo Cabo S.A. Hughes Network Systems(3) Scientific-Atlanta, Inc. Gilat Satellite Networks Ltd. DIRECTV Broadband(4) Earthlink, Inc. Prodigy Communications Corporation PanAmSat(5) Asia Satellite Telecommunications Company Limited JSAT Corporation New Skies Satellites N.V. SES Global S.A.

- (1) The EchoStar and DIRECTV peer groups comprise selected direct broadcast satellite service providers.
- (2) The DIRECTV Latin America peer company is a Latin American cable company.
- (3) The Hughes Network Systems peer group comprises one set-top box manufacturer and one provider of private business network services.
- (4) The DIRECTV Broadband peer group comprises selected Internet service providers.
- (5) The PanAmSat peer group comprises selected fixed satellite services providers.

Deutsche Banc Alex. Brown derived an estimated valuation range for EchoStar and Hughes by comparing multiples of estimated October 25, 2001 enterprise value, which consists of common equity market value as of that date, as adjusted for debt, cash and some non-consolidated businesses, to:

estimated 2001 and 2002 numbers of subscribers;

estimated 2001 and 2002 earnings before interest expense, income taxes and depreciation and amortization (EBITDA); and

estimated 2001 and 2002 revenue.

To estimate the trading multiples for the selected peer group companies, Deutsche Banc Alex. Brown used publicly available information concerning projected financial performance from selected research analysts to determine the projected number of subscribers, EBITDA and revenue for 2001 and 2002.

None of the companies utilized as a comparison is identical to EchoStar, Hughes, or any of Hughes' five business segments. Accordingly, Deutsche Banc Alex. Brown believes the analysis based on publicly traded comparable companies is not simply mathematical. Rather, it involves complex considerations and qualitative judgments, reflected in Deutsche Banc Alex. Brown's opinion, concerning differences in financial and operating characteristics of the comparable companies and other factors that could affect the public trading value of the comparable companies.

EchoStar

Deutsche Banc Alex. Brown derived an estimated valuation range for EchoStar by comparing the multiples of enterprise value to number of subscribers, EBITDA and revenue, with the corresponding multiples of similar publicly traded companies:

	Enterprise Value to Number of Subscribers	
	Estimated 2001	Estimated 2002
EchoStar (on a current trading basis)	\$ 2,266	\$ 1,893
EchoStar Peer Group		
Range	\$ 1,426 - \$2,520	\$ 1,299 - \$2,256
Mean	\$ 1,911	\$ 1,722
Median	\$ 1,788	\$ 1,613

Using this analysis, Deutsche Banc Alex. Brown applied a subscriber multiple range of \$1,800 to \$2,200 per estimated 2001 EchoStar subscriber and a subscriber multiple range of \$1,600 to \$2,000 per estimated 2002 EchoStar subscriber, thereby deriving a valuation range for EchoStar of \$12,438 million to \$15,202 million and \$13,616 million to \$17,020 million, respectively. This valuation range corresponded to a per share value of EchoStar Class A common stock of \$19.04 to \$24.53 and \$21.37 to \$28.13, respectively.

	Enterprise Value to EBITDA	
	Estimated 2001	Estimated 2002
EchoStar (on a current trading basis)	42.1x	17.3x
EchoStar Peer Group		
Range	26.5x - 72.8x	12.2x - 44.5x
Mean	53.9x	26.7x
Median	62.4x	23.3x

Using this analysis, Deutsche Banc Alex. Brown applied an EBITDA multiple range of 45.0x to 55.0x for 2001 estimated EchoStar EBITDA and an EBITDA multiple range of 18.0x to 22.0x for 2002 estimated EchoStar EBITDA, thereby deriving a valuation range for EchoStar of \$21,577 million to \$26,372 million and \$17,125 million to \$20,930 million, respectively. This valuation range corresponded to a per share value of EchoStar Class A common stock of \$37.19 to \$46.72 and \$28.35 to \$35.91, respectively.

	Enterprise Value to Revenue	
	Estimated 2001	Estimated 2002
EchoStar (on a current trading basis)	4.3x	3.3x
EchoStar Peer Group		
Range	2.4x - 6.3x	2.1x - 5.3x
Mean	3.8x	3.3x
Median	2.8x	2.4x

Using this analysis, Deutsche Banc Alex. Brown applied a revenue multiple range of 3.5x to 4.5x for 2001 estimated EchoStar revenue and a revenue multiple range of 3.0x to 4.0x for 2002 estimated EchoStar revenue, thereby deriving a valuation range for EchoStar of \$13,975 million to \$17,968 million and \$15,269 million to \$20,358 million, respectively. This valuation range corresponded to a per share value of EchoStar Class A common stock of \$21.68 to \$29.49 and \$24.66 to \$34.77, respectively.

The analyses based on selected publicly traded comparable companies for EchoStar resulted in a wide range of per share values for EchoStar Class A common stock, reflecting the growth stage of the direct-to-home business and the lack of a large number of comparable

publicly traded companies. Therefore, the per share valuation ranges derived from these analyses were principally used as a benchmark in comparing the per share valuation range derived from the discounted cash flow analysis for EchoStar described above rather than

to directly compare the respective valuations of EchoStar and Hughes for purposes of assessing the transaction exchange ratio.

Hughes

Given the number and diversity of Hughes' business segments, Deutsche Banc Alex. Brown performed comparable publicly traded companies analyses on each of Hughes' business segments to derive a sum-of-the-parts value for Hughes on a consolidated basis. Further, as each of Hughes' business segments are diverse, different valuation multiple methodologies were applied for valuing each business segment. The valuation multiple primarily utilized in the comparable publicly traded companies analyses to value each of Hughes' five business segments is set forth below:

Business Segment	Valuation Multiple
DIRECTV	Subscriber multiple
DIRECTV Latin America	Subscriber multiple
Hughes Network Systems	Revenue multiple
DIRECTV Broadband	Revenue multiple
PanAmSat Corporation	EBITDA and revenue multiples

Deutsche Banc Alex. Brown summed the reference value ranges derived from each of the business segment valuation analyses and after adjusting for net debt, Deutsche Banc Alex. Brown derived a sum-of-the-parts range of the per share values for GM Class H common stock of \$14.67 to \$18.28. The per share valuation range derived from this analysis was principally used as a benchmark in comparing the per share valuation range derived from the discounted cash flow analysis for Hughes described above rather than to directly compare the respective valuations of EchoStar and Hughes for purposes of assessing the transaction exchange ratio. The range of per share values for GM Class H common stock implied by the sum-of-the-parts analysis of Hughes of \$14.67 to \$18.28 was determined to be comparable to the range of values implied by the discounted cash flow analysis of Hughes of \$15.58 to \$18.98. The individual comparable publicly traded companies analyses for each of Hughes' business segments and the corresponding reference value range for each used in deriving the sum-of-the-parts valuation range for Hughes are set forth below.

DIRECTV

Deutsche Banc Alex. Brown derived an estimated valuation range for DIRECTV by comparing the multiple of enterprise value to number of DIRECTV subscribers with the corresponding multiple of similar publicly traded companies:

	Enterprise Value to Number of Subscribers	
	Estimated 2001	Estimated 2002
DIRECTV (on a current trading basis)(1)	\$1,788	\$1,613
DIRECTV Peer Group		
Range	\$1,426 - \$2,520	\$1,299 - \$2,256
Mean	\$2,071	\$1,816
Median	\$2,266	\$1,893

(1) Values arrived at by making adjustments to Hughes' enterprise value for non direct-to-home businesses.

Using this analysis, Deutsche Banc Alex. Brown applied a subscriber multiple range of \$1,800 - \$2,200 per estimated 2001 DIRECTV subscriber, and a subscriber multiple range of \$1,600 to \$2,000 per estimated 2002 DIRECTV subscriber, thereby deriving a valuation range for DIRECTV of \$15,640 million to \$19,116 million and \$15,982 million to \$19,978 million, respectively and, hence, used a reference range of \$15,811 million to \$19,547 million.

DIRECTV Latin America

Deutsche Banc Alex. Brown derived an estimated valuation range for DIRECTV Latin America by comparing the multiple of enterprise value to number of DIRECTV Latin America subscribers with the corresponding multiple of similar publicly traded companies:

	Enterprise Value to Number of Subscribers	
	Estimated 2001	Estimated 2002
DIRECTV Latin America(on a current trading basis)	NA	NA
DIRECTV Latin America Peer Group	\$ 913	\$ 900

Using this analysis, Deutsche Banc Alex. Brown applied a subscriber multiple range of \$800 to \$1,000 per estimated 2001 DIRECTV Latin America subscriber and a subscriber multiple range of \$700 to \$900 per estimated 2002 DIRECTV Latin America subscriber, thereby deriving a valuation range for DIRECTV Latin America of \$1,284 million to \$1,605 million and \$1,519 million to \$1,954 million, respectively and, hence, used a reference range of \$1,402 million to \$1,779 million.

Hughes Network Systems

Deutsche Banc Alex. Brown derived an estimated valuation range for Hughes Network Systems by comparing the multiple of enterprise value to revenue with the corresponding multiple of similar publicly traded companies:

	Enterprise Value to Revenue	
	Estimated 2001	Estimated 2002
Hughes Network Systems Peer Group		
Range	0.8x - 1.4x	0.7x - 1.6x
Mean	1.1x	1.2x
Median	1.1x	1.2x

Using this analysis, Deutsche Banc Alex. Brown applied a revenue multiple range of 1.2x to 1.4x for 2001 estimated Hughes Network Systems revenue and a revenue multiple range of 1.1x to 1.3x for 2002 estimated Hughes Network Systems revenue, thereby deriving a valuation range for Hughes Network Systems of \$1,555 million to \$1,815 million and \$1,569 million to \$1,854 million, respectively and, hence, used a reference range of \$1,562 million to \$1,834 million.

DIRECTV Broadband

Deutsche Banc Alex. Brown derived an estimated valuation range for DIRECTV Broadband by comparing the multiple of enterprise value to revenue with the corresponding multiple of similar publicly traded companies:

	Enterprise Value to Revenue	
	Estimated 2001	Estimated 2002
DIRECTV Broadband Peer Group		
Range	1.3x - 1.7x	1.1x - 1.4x
Mean	1.5x	1.2x
Median	1.5x	1.2x

Edgar Filing: EHOSTAR COMMUNICATIONS CORP - Form PRER14C

Using this analysis, Deutsche Banc Alex. Brown applied a revenue multiple range of 1.3x to 1.5x for 2001 estimated DIRECTV Broadband revenue and a revenue multiple range of 1.1x to 1.3x for 2002 estimated DIRECTV Broadband revenue, thereby deriving a valuation range for DIRECTV Broadband of \$36 million to \$42 million and \$103 million to \$122 million, respectively and, hence, used a reference range of \$70 million to \$82 million.

PanAmSat

Deutsche Banc Alex. Brown derived an estimated valuation range for PanAmSat by comparing the multiples of enterprise value to revenue and EBITDA with the corresponding multiples of similar publicly traded companies:

	Enterprise Value to Revenue	
	Estimated 2001	Estimated 2002
PanAmSat	6.5x	6.3x
PanAmSat Peer Group		
Range	2.4x - 8.1x	2.2x - 7.1x
Mean	5.2x	4.7x
Median	5.1x	4.7x

Using this analysis, Deutsche Banc Alex. Brown applied a revenue multiple range of 6.5x to 8.0x for 2001 estimated PanAmSat revenue and a revenue multiple range of 6.0x to 7.0x for 2002 estimated PanAmSat revenue, thereby deriving a valuation range for PanAmSat of \$5,630 million to \$6,929 million and \$4,782 million to \$5,579 million, respectively.

	Enterprise Value to EBITDA	
	Estimated 2001	Estimated 2002
PanAmSat	9.8x	9.0x
PanAmSat Peer Group		
Range	4.1x - 12.2x	3.7x - 10.9x
Mean	7.3x	6.5x
Median	6.4x	5.7x

Using this analysis, Deutsche Banc Alex. Brown applied an EBITDA multiple range of 9.0x to 10.0x for 2001 estimated PanAmSat EBITDA and an EBITDA multiple range of 8.0x to 9.0x for 2002 estimated PanAmSat EBITDA, thereby deriving a valuation range for PanAmSat of \$5,302 million to \$5,892 million and \$4,411 million to \$4,962 million, respectively.

Based on the revenue and EBITDA multiple analyses, \$2,162 million of net debt attributable to PanAmSat and Hughes 81% indirect interest in PanAmSat, Deutsche Bank used a reference range of \$2,324 million to \$2,980 million for the value of Hughes indirect interest in PanAmSat.

The foregoing summary describes analyses and factors that Deutsche Banc Alex. Brown deemed material in its presentation to the EchoStar board of directors, but is not a comprehensive description of all analyses performed and factors considered by Deutsche Banc Alex. Brown in connection with preparing its opinion. The preparation of a fairness opinion is a complex process involving the application of subjective business judgment in determining the most appropriate and relevant methods of financial analysis and the application of those methods to the particular circumstances and, therefore, is not readily susceptible to summary description. Deutsche Banc Alex. Brown believes that its analyses must be considered as a whole and that considering any portion of such analyses and of the factors considered without considering all analyses and factors could create a misleading view of the process underlying the opinion. In arriving at its fairness determination, Deutsche Banc Alex. Brown did not assign specific weights to any particular analyses.

In conducting its analyses and arriving at its opinion, Deutsche Banc Alex. Brown utilized a variety of generally accepted valuation methods. The analyses were prepared solely for the purpose of enabling Deutsche Banc Alex. Brown to provide its opinion to the EchoStar board of directors as to the fairness, from a financial point of view, of the exchange ratio to the holders of the EchoStar Class A common stock and do not purport to be appraisals or necessarily reflect the prices at which businesses or securities actually may be sold, which are inherently subject to uncertainty. In connection with its analyses, Deutsche Banc Alex. Brown made, and was provided by management of both EchoStar and Hughes with, numerous assumptions with respect to industry performance, general business and economic conditions and other matters, many of which are beyond

the respective companies' control. Analyses based on estimates or forecasts of future results are not necessarily indicative of actual past or future values or results, which may be significantly more or less favorable than suggested by such analyses. Because such analyses are inherently subject to uncertainty, being based upon numerous factors or events beyond the control of EchoStar, Hughes or their respective advisors, neither EchoStar nor Deutsche Banc Alex. Brown nor any other person assumes responsibility if future results or actual values are materially different from these forecasts or assumptions.

The terms of the transactions were determined through negotiations among EchoStar, General Motors and Hughes and were approved by the EchoStar board of directors. Although Deutsche Banc Alex. Brown provided advice to the EchoStar board of directors during the course of these negotiations, the decision to enter into the transactions was solely that of the EchoStar board of directors. As described above, the opinion and presentation of Deutsche Banc Alex. Brown to the EchoStar board of directors was only one of a number of factors taken into consideration by the EchoStar board of directors in making its determination to approve the transactions. Deutsche Banc Alex. Brown's opinion was provided to the EchoStar board of directors to assist it in connection with its consideration of the transactions and does not constitute a recommendation to any holder of EchoStar stock as to how to vote with respect to the transactions.

The EchoStar board of directors selected Deutsche Banc Alex. Brown as financial advisor in connection with the transactions based on Deutsche Banc Alex. Brown's qualifications, expertise, reputation and experience in mergers and acquisitions. Deutsche Banc Alex. Brown is a registered broker dealer and member of the New York Stock Exchange. The EchoStar board of directors retained Deutsche Banc Alex. Brown pursuant to a letter agreement dated October 14, 2001 and an addendum dated October 27, 2001. As compensation for Deutsche Banc Alex. Brown's services in connection with the transactions, EchoStar has agreed to pay Deutsche Banc Alex. Brown a cash fee of \$8,000,000 if the transactions are completed, which will be offset by certain fees already paid. Regardless of whether the transactions are consummated, EchoStar has agreed to reimburse Deutsche Banc Alex. Brown for bona fide out-of-pocket expenses in an amount not to exceed \$75,000. EchoStar has also agreed to indemnify Deutsche Banc Alex. Brown and related persons to the full extent lawful against liabilities, including liabilities under the federal securities laws, arising out of its engagement or the transactions.

Deutsche Banc Alex. Brown is an internationally recognized investment banking firm experienced in providing advice in connection with mergers and acquisitions and related transactions. Deutsche Banc Alex. Brown and its affiliates have, from time to time, provided investment banking, commercial banking (including extension of credit) and other financial services to EchoStar, GM and Hughes or their affiliates for which they have received or will receive compensation. Deutsche Banc Alex. Brown or an affiliate thereof has also agreed to provide financing in connection with the transactions for which it has received partial compensation and will receive additional compensation when the financing is actually provided. In the ordinary course of business, Deutsche Banc Alex. Brown and its affiliates may actively trade in the securities and other instruments and obligations of EchoStar, GM and Hughes for their own accounts and for the accounts of their customers. Accordingly, Deutsche Banc Alex. Brown and its affiliates may at any time hold a long or short position in such securities, instruments and obligations.

Regulatory Requirements

We have summarized below the material regulatory requirements affecting the GM/ Hughes separation transactions and the Hughes/ EchoStar merger. We have not yet satisfied any of the conditions in the transaction documents relating to the regulatory requirements we discuss and may not satisfy them in a timely manner (or at all). If we satisfy these conditions in a timely manner, we anticipate that we may be able to complete the GM/Hughes separation transactions and the Hughes/EchoStar merger in the fourth quarter of 2002.

U.S. Antitrust Requirements

The Hughes/ EchoStar merger is subject to the requirements of the Hart-Scott-Rodino Act, which prevents specified transactions from being completed until required information and materials are furnished to

the Antitrust Division of the U.S. Department of Justice and the U.S. Federal Trade Commission and specified waiting periods are terminated or expire. We have filed the required information and materials to notify the Department of Justice and the Federal Trade Commission of the Hughes/ EchoStar merger. The Department of Justice's Antitrust Division is currently conducting an investigation of the transactions, and, as anticipated, has requested additional information from the companies. We have provided the Department of Justice's Antitrust Division with a significant quantity of information and documents, and we are continuing to compile and provide information and documents in response to their requests. The Department of Justice's Antitrust Division may fail to permit the completion of the Hughes/EchoStar merger on a timely basis or it may bring a lawsuit seeking to prevent the Hughes/EchoStar merger or impose onerous conditions in connection with its clearance. The attorneys general of a number of states are also conducting an investigation of the transactions under the antitrust laws and could bring an action seeking to prevent the Hughes/EchoStar merger or attempt to impose onerous conditions.

The Antitrust Division of the Department of Justice may challenge the Hughes/ EchoStar merger on antitrust grounds. At any time, the Antitrust Division of the Department of Justice could challenge the Hughes/ EchoStar merger under the antitrust laws as it deems necessary, irrespective of whether applicable waiting periods have expired or whether the Hughes/ EchoStar merger were completed. In addition, any state could take action under either applicable state or federal antitrust laws as it deems necessary or desirable in the public interest, irrespective of whether applicable waiting periods have expired or whether the Hughes/ EchoStar merger were completed. Likewise, other persons could seek to challenge the Hughes/ EchoStar merger under applicable antitrust laws, irrespective of whether applicable waiting periods have expired and whether the Hughes/ EchoStar merger were completed. We can provide no assurance that a challenge to the Hughes/ EchoStar merger will not be made or that, if a challenge is made, we will prevail.

FCC Approval

Pursuant to the Communications Act of 1934, as amended, the transfer of control over a company holding or controlling FCC licenses requires prior FCC approval. Hughes and EchoStar each directly or indirectly hold or control FCC licenses. GM, Hughes and EchoStar filed an application for FCC approval of the transfer of licenses and other authorizations in connection with the Hughes split-off and the Hughes/ EchoStar merger on December 3, 2001. On December 21, 2001 the FCC placed the application on public notice and invited petitions, oppositions and other comments by third parties in respect of the application. Numerous parties have filed petitions to deny the application or comments, and EchoStar and Hughes have filed a consolidated opposition. As of the date of this document, the application remains pending before the FCC. In addition, GM, Hughes and EchoStar updated the application to reflect the completion of the \$1.5 billion investment by Vivendi Universal in EchoStar described at Description of the Transactions Hughes/ EchoStar Merger Financings. On February 4, 2002, the FCC issued to the applicants an Initial Information and Document Request, and stated that it would appreciate receiving responses to that request no later than March 6, 2002. On March 5, 2002, the applicants requested a 15-day extension of that date. By letter released on March 7, 2002, the FCC rejected the parties' request for an extension and stopped its self-imposed 180-day clock for merger review, until such time as the applicants submit the requested documents and information. While the FCC restarted its 180-day clock for merger review on July 23, 2002, suggesting an FCC decision time of November 2002, we cannot be sure that the FCC will decide our application by that time or that there will not be further delays in processing and evaluating our application.

In February 2002, EchoStar and Hughes filed an application requesting on behalf of New EchoStar authority to launch and operate a new state-of-the-art, spot-beam direct broadcast satellite. Grant of this authority would allow New EchoStar to offer local broadcast channels in all 210 designated market areas. The FCC placed this satellite application on notice for public comment on April 19, 2002, and the comment period closed on June 4, 2002. This pending satellite application may delay the FCC's consideration of the Hughes/ EchoStar merger application. As a result of these delays, the FCC may fail to approve the Hughes/ EchoStar merger application on a timely basis. It may also agree with the views of parties opposing the application and deny its approval of the Hughes/ EchoStar merger or impose onerous conditions. Furthermore, the FCC may fail to grant, or may delay action on, the pending satellite application.

Foreign and Certain Other Regulatory Matters

GM, Hughes and EchoStar have received approval for the Hughes/ EchoStar merger from Brazilian competition authorities. Competition and/or antitrust approvals or clearances from other countries may be required for completion of the Hughes/ EchoStar merger or the PanAmSat stock sale. In addition, Hughes subsidiaries provide telecommunications services in more than 50 foreign countries. In many of these countries, Hughes subsidiaries and/or PanAmSat have received government licenses or other authorizations to provide telecommunications services. In some of the countries, completion of the Hughes/ EchoStar merger or the PanAmSat stock sale will require either government approval or notification of the change in control of the relevant licenses or authorizations. The telecommunications regulatory authority in Guernsey has approved the transactions. In addition, the companies have submitted filings to obtain approval from telecommunications regulatory authorities in Brazil, Ireland and Papua New Guinea, and have filed the appropriate notifications in France, Germany and the United Kingdom. We do not currently anticipate that our pursuit of any of these clearances or approvals will hinder, delay or restrict completion of the transactions.

The transactions may be subject to certain regulatory requirements of other state, federal and foreign governmental agencies and authorities, including those relating to the regulation of the offer and sale of securities. GM, Hughes and EchoStar are currently working to evaluate and comply in all material respects with these requirements, as appropriate, and do not currently anticipate that they will hinder, delay or restrict completion of the transactions.

No Appraisal Rights

GM Stockholders

The Delaware General Corporation Law and the GM restated certificate of incorporation do not provide appraisal rights to the GM stockholders in connection with the GM/ Hughes separation transactions. No appraisal rights will be available to the GM stockholders in connection with the GM/Hughes separation transactions because no merger transaction is involved in the GM/ Hughes separation transactions. Similarly, no appraisal rights will be available to the GM stockholders in connection with the Hughes/ EchoStar merger because GM has approved the Hughes/ EchoStar merger in its capacity as the sole stockholder of both Hughes and HEC Holdings and General Motors is not a constituent corporation in the Hughes/ EchoStar merger.

EchoStar Stockholders

The Nevada Revised Statutes and the EchoStar articles of incorporation do not provide appraisal rights to the EchoStar stockholders in connection with the Hughes/ EchoStar merger. Appraisal rights will not be available to EchoStar Class A common stockholders because, among other things, the EchoStar Class A common stock is listed on the Nasdaq, and the New EchoStar Class A common stock will be listed on the Nasdaq as well.

Stockholder Litigation Relating to the Transactions

Several purported class actions have been filed on behalf of holders of GM Class H common stock against GM, Hughes and/or the Hughes directors, alleging that the defendants in the lawsuits violated purported fiduciary duties owed to the stockholders by allegedly improperly favoring The News Corporation Limited's Sky Global Networks over EchoStar as a potential merger partner for Hughes. Five cases, *Wurzel v. Cornelius, et al.*; *Selden Realty Association, Inc. v. Hughes Electronics Corporation, et al.*; *Lerner v. Cornelius, et al.*; *Kopelman v. Cornelius, et al.*; and *Weilheimer v. Cornelius, et al.*, were filed in Delaware Chancery Court and were consolidated under the *Wurzel* caption. Three cases were filed in Los Angeles Superior Court: *Salamone v. Hughes Electronics Corporation, et al.*; *Brody v. Hughes Electronics Corporation, et al.*; and *Lieberman v. Hughes Electronics Corporation, et al.* One case was filed in New York Supreme Court. Each of these lawsuits was filed prior to the date that Hughes and EchoStar entered into the Hughes/ EchoStar merger agreement. None of these lawsuits purport to challenge the Hughes/ EchoStar merger. The defendants believe that the suits are without merit.

Additional lawsuits may be filed after the date of this document.

Accounting Treatment

The GM/ Hughes Separation Transactions

GM will record the Hughes dividend distribution of up to \$4.2 billion as a reduction in GM's investment in Hughes. General Motors will record the Hughes split-off at fair value at the time of the Hughes split-off and will recognize a gain based on an implied exchange ratio of 0.73 shares of EchoStar Class A common stock in exchange for each share of GM Class H common stock. Based on the closing price of EchoStar Class A common stock of \$18.56 per share on June 28, 2002, and based on certain other assumptions, the transaction would have valued Hughes equity at \$18.7 billion, with a resulting after-tax gain of about \$7.8 billion based on the net book value of Hughes at June 30, 2002. In addition, GM currently anticipates that as a result of the Hughes split-off there will be a net reduction of GM stockholders' equity of about \$5.3 billion based on the EchoStar Class A common stock price on June 28, 2002 and the net book value of Hughes at June 30, 2002 and certain other assumptions. The actual gain, as well as the actual impact to GM stockholders' equity, will be higher or lower depending on, among other things, the actual EchoStar Class A common stock price and the net book value of Hughes at the time of the completion of the Hughes split-off.

Under certain limited circumstances, GM may distribute shares of HEC Holdings Class C common stock to the GM \$1 2/3 par value common stockholders in order to maintain the tax-free status of the Hughes split-off. Any shares that are distributed by GM will be accounted for as a dividend through a direct charge to the retained earnings of GM. The amount of the dividend will be equal to GM's net carrying value of the shares of HEC Holdings Class C common stock distributed. For more information about the potential distribution, see *The Transactions Description of the Transactions The GM/Hughes Separation Transactions Hughes Split-Off Potential Distributions of HEC Holdings Class C Common Stock to GM \$1 2/3 Par Value Common Stockholders*.

The financial results of Hughes for all periods prior to the effective date of the GM/Hughes separation transactions will be reported as discontinued operations in GM's consolidated financial statements. GM will begin reporting the financial results of Hughes as discontinued operations upon:

the receipt of the requisite GM common stockholder approval of the transactions; and

the satisfaction of all regulatory related conditions to the transactions.

The Hughes/ EchoStar Merger

The Hughes/ EchoStar merger will be accounted for using the purchase method of accounting, with EchoStar having acquired HEC Holdings. New EchoStar will establish a new accounting basis for the assets and liabilities of HEC Holdings based upon their fair values, the value of the consideration deemed to be provided to General Motors and its common stockholders in connection with the Hughes/ EchoStar merger, and the costs of the Hughes/ EchoStar merger. New EchoStar will record as goodwill the excess, if any, of the consideration over the fair values of HEC Holdings' assets and liabilities. A final determination of required purchase accounting adjustments, including the allocation of consideration to the assets acquired and liabilities assumed based on their respective fair values has not yet been made. Accordingly, the purchase accounting adjustments made in connection with the development of the pro forma condensed combined financial statements of New EchoStar appearing elsewhere in this document are preliminary and have been made solely for purposes of developing pro forma condensed combined financial information. New EchoStar will undertake to determine the fair value of certain of HEC Holdings' assets and liabilities (as so adjusted) and will make appropriate purchase accounting adjustments upon completion of that determination. For financial reporting purposes, the results of operations of HEC Holdings will be included in New EchoStar's consolidated statement of income following the completion of the Hughes/ EchoStar merger. New EchoStar's financial statements for prior periods will not be restated as a result of the Hughes/ EchoStar merger or related transactions. See *New EchoStar Unaudited Pro Forma Condensed Consolidated Financial Statements*.

Material U.S. Federal Income Tax Considerations Relating to the Transactions

The following discussion describes the material U.S. federal income tax consequences of the GM/Hughes separation transactions and the Hughes/ EchoStar merger to holders of GM Class H common stock, holders of GM \$1 2/3 par value common stock and holders of EchoStar common stock. This discussion does not address all aspects of U.S. federal income taxation that might be relevant to such stockholders in light of their status or personal investment circumstances; nor does it discuss the consequences to stockholders that are subject to special treatment under the U.S. federal income tax laws, such as non-U.S. persons, dealers or traders in securities or currencies, regulated investment companies, insurance companies, financial institutions, tax-exempt organizations, pass-through entities or taxpayers that hold GM common stock or EchoStar common stock, or will hold New EchoStar common stock, as part of a straddle, hedge, or conversion transaction or that have a functional currency other than the U.S. dollar. In addition, this discussion does not address the tax consequences to holders of options in respect of GM common stock or EchoStar common stock or other persons who have received their GM common stock or EchoStar common stock as compensation or through a tax-qualified retirement plan. Also, this discussion does not address the tax consequences of the GM/ Hughes separation transactions or the Hughes/ EchoStar merger under state, local and non-U.S. tax laws or U.S. federal tax laws other than the U.S. federal income tax. This discussion assumes that the GM common stock and EchoStar common stock that is held by GM common stockholders and EchoStar common stockholders, respectively, will, in each case, be held by them as a capital asset within the meaning of the Code and assumes further that, except as specifically indicated below, no stock of HEC Holdings will be distributed to the holders of GM \$1 2/3 par value common stock in connection with the GM/Hughes separation transactions.

This discussion is based upon the Internal Revenue Code of 1986, as amended, regulations proposed or promulgated thereunder, judicial precedent relating thereto and current rulings and administrative practice of the IRS, in each case as in effect as of the date of this document and all of which are subject to change at any time, possibly with retroactive effect. Any such change could alter the tax consequences to General Motors, HEC Holdings, EchoStar or you as GM and EchoStar common stockholders as described directly below.

You should consult your tax advisor as to the particular tax consequences to you of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger, including the applicability and effect of U.S. federal, state, local and non-U.S. income and other tax laws.

Material U.S. Federal Income Tax Consequences of the GM/ Hughes Separation Transactions

General Motors has received a private letter ruling from the IRS to the effect, among other things, that:

The contribution of all of the outstanding stock of Hughes to HEC Holdings (which we refer to as the HEC contribution), followed by the Hughes split-off, will be treated as a reorganization under Section 368(a) of the Code.

No gain or loss will be recognized by General Motors or by HEC Holdings on the HEC contribution.

No gain or loss will be recognized by General Motors on the distribution of HEC Holdings Class C common stock to the holders of GM Class H common stock in the Hughes split-off.

No gain or loss will be recognized by, and no amount will be included in the income of, the holders of GM Class H common stock upon the receipt of HEC Holdings Class C common stock in the Hughes split-off.

General Motors may retain shares of HEC Holdings Class C common stock for up to five years after the completion of the Hughes split-off.

An acquisition from General Motors of shares of HEC Holdings Class C common stock retained by GM after the Hughes split-off will not cause the acquired shares to be treated as tainted shares for purposes of Section 355(e) of the Code. This ruling does not apply to the 100 million shares of HEC Holdings Class C common stock that General Motors is permitted to use in the GM share dispositions.

Edgar Filing: ECHOSTAR COMMUNICATIONS CORP - Form PRER14C

An acquisition of GM Class H common stock or HEC Holdings Class C common stock from AOL will not cause the acquired shares to be treated as tainted shares for purposes of Section 355(e) of the Code.

General Motors will not recognize gain or loss on the transfer of GM Class H common stock or HEC Holdings Class C common stock in the debt-for-equity exchanges, effected either prior to or within six months after the completion of the GM/Hughes separation transactions and otherwise in the manner described herein, although GM may recognize cancellation of indebtedness income to the extent that the adjusted issue price of a liability that is satisfied exceeds the fair market value of the GM Class H common stock or New EchoStar Class C common stock transferred in satisfaction of the liability.

It is a condition to the completion of the GM/Hughes separation transactions that GM obtain a private letter ruling to the effect that the distribution by GM of HEC Holdings Class C common stock in connection with the Hughes split-off will be tax-free to GM, HEC Holdings and their respective stockholders under Section 355 and related sections of the Code, which ruling continues to be in effect at the time of the completion of the GM/Hughes separation transactions. The private letter ruling that GM has received from the IRS will satisfy this condition if it continues to be in effect at the time of the completion of the GM/Hughes separation transactions. If the private letter ruling ceases to be in effect at the time of the completion of the GM/Hughes separation transactions, this condition may be waived only by the mutual agreement of GM, Hughes and EchoStar. The private letter ruling has been filed as an exhibit to the registration statement of which this document constitutes a part.

In the opinion of Kirkland & Ellis, counsel to General Motors, assuming that the rulings received by GM from the IRS continue to be in full force and effect at the time of the completion of the GM/ Hughes separation transactions, for U.S. federal income tax purposes:

No gain or loss will be recognized by General Motors upon the contribution of all of the outstanding stock of Hughes to HEC Holdings in the HEC contribution or upon the distribution of HEC Holdings Class C common stock in exchange for GM Class H common stock in the Hughes split-off, other than gains related to certain intercompany transactions that will be triggered by the Hughes split-off.

No gain or loss will be recognized by GM Class H common stockholders (and no amount will otherwise be included in their income) upon their receipt of the HEC Holdings Class C common stock in exchange for their GM Class H common stock.

The tax basis of the HEC Holdings Class C common stock that GM Class H common stockholders receive will be equal to the tax basis of the GM Class H common stock exchanged therefor.

The holding period of the HEC Holdings Class C common stock that GM Class H common stockholders receive will include the holding period of the GM Class H common stock exchanged therefor.

No gain or loss will be recognized by the holders of GM \$1 2/3 par value common stock in connection with the changes to the GM restated certificate of incorporation proposed in connection with the GM/ Hughes separation transactions.

General Motors will not recognize any gain or loss as a result of an issuance by GM of GM Class H common stock in a debt-for-equity exchange effected prior to the completion of the GM/Hughes separation transactions, or a distribution by GM of New EchoStar Class C common stock in a debt-for-equity exchange effected within six months after the completion of the Hughes/ EchoStar merger, in exchange for the satisfaction of outstanding liabilities of GM to certain of GM's creditors, although GM may recognize cancellation of indebtedness income to the extent that the adjusted issue price of a liability that is satisfied exceeds the fair market value of the GM Class H common stock or New EchoStar Class C common stock transferred in satisfaction of the liability.

The IRS ruling does not specifically address how tax bases and holding periods should be allocated among shares of HEC Holdings Class C common stock received in the Hughes split-off by stockholders who own two or more blocks of GM Class H common stock with different per share bases and/or holding periods.

If you fall into this category of stockholders, then you are encouraged to consult with your own tax advisor regarding the possible tax basis and holding period consequences of the Hughes split-off.

The IRS ruling, while generally binding on the IRS, is based upon representations made by GM and upon assumptions described in the IRS ruling. The opinion of Kirkland & Ellis, in turn, is based upon the IRS ruling and the opinion is subject to the qualifications and limitations set forth in the opinion. If any of the representations or assumptions related to the IRS ruling is incorrect or untrue in any material respect, then the IRS ruling may be invalidated. We are not aware of any facts or circumstances that would cause any of these representations or assumptions to be incorrect or untrue in any material respect. Nevertheless, if the Hughes split-off were held to be taxable, both General Motors and holders of GM Class H common stock potentially would incur material tax liabilities.

Current Treasury regulations require each GM Class H common stockholder that receives HEC Holdings Class C common stock pursuant to the Hughes split-off to attach to such stockholder's U.S. federal income tax return for the year in which the Hughes split-off occurs a statement setting forth the necessary data to show the applicability of Section 355 of the Code to the Hughes split-off. If you are a GM Class H common stockholder, GM will provide this information to you after the completion of the GM/ Hughes separation transactions and the Hughes/ EchoStar merger so that you can comply with these regulations.

As discussed elsewhere in this document, if and to the extent required in order to maintain the tax-free status of the Hughes split-off, GM may distribute shares of HEC Holdings Class C common stock to the holders of GM \$1 2/3 par value common stock in the form of a pro rata distribution. General Motors intends to request a supplemental private letter ruling from the IRS to the effect that neither the GM \$1 2/3 par value common stockholders nor GM will recognize gain or loss as a result of a distribution by GM to the GM \$1 2/3 par value common stockholders of shares of HEC Holdings Class C common stock in connection with the Hughes split-off.

Material U.S. Federal Income Tax Consequences of the Hughes/ EchoStar Merger

The companies intend that the Hughes/ EchoStar merger qualify as a reorganization under Section 368(a) of the Code. HEC Holdings has received, prior to or on the date of this document, an opinion from its outside tax counsel, Weil, Gotshal & Manges LLP, to the effect that the Hughes/ EchoStar merger will be treated as a reorganization within the meaning of Section 368(a) of the Code, and EchoStar has received, prior to or on the date of this document, an opinion from its outside tax counsel, Sullivan & Cromwell, to the same effect. It is a condition to each party's obligation to complete the Hughes/ EchoStar merger that it receives such opinion from its outside tax counsel again at the time of the Hughes/ EchoStar merger. Although HEC Holdings and EchoStar may waive the condition requiring receipt of their respective tax opinions, neither HEC Holdings nor EchoStar currently intends to waive this condition. If we were to waive that condition, we would recirculate this document to resolicit the approval of the GM common stockholders if appropriate under the circumstances.

Prior to or on the date of this document, EchoStar has received an opinion from its outside tax counsel, Sullivan & Cromwell, that:

No gain or loss will be recognized by the EchoStar common stockholders upon receipt of New EchoStar Class A common stock or New EchoStar Class B common stock, as applicable, in the Hughes/ EchoStar merger, except with respect to cash received instead of fractional shares.

The aggregate tax basis of shares of New EchoStar common stock received pursuant to the Hughes/ EchoStar merger, including any fractional share deemed received, will be the same as the aggregate tax basis of the shares of EchoStar common stock exchanged therefor.

The holding period of the shares of New EchoStar common stock received pursuant to the Hughes/ EchoStar merger, including any fractional share deemed received, will include the holding period of the shares of EchoStar common stock exchanged therefor.

Cash received by a holder of EchoStar common stock instead of a fractional share of New EchoStar common stock will be treated as having been received in exchange for such fractional share interest, and the holder will recognize gain or loss for U.S. federal income tax purposes, in an amount equal to the difference between the amount of cash received and the portion of the basis of the shares of EchoStar common stock allocable to the fractional share interest. The gain or loss will be capital gain or loss, and will be long-term capital gain or loss if the shares of EchoStar common stock had been held for more than one year at the time of the Hughes/ EchoStar merger.

Prior to or on the date of this document, HEC Holdings has received an opinion from its outside tax counsel, Weil, Gotshal & Manges LLP, that no gain or loss will be recognized by HEC Holdings as a result of the Hughes/ EchoStar merger, and that, moreover, no gain or loss will be recognized by the former GM Class H common stockholders with respect to their HEC Holdings Class C common stock as a result of the Hughes/ EchoStar merger and neither the tax basis nor the holding period of the HEC Holdings Class C common stock will be affected as a result of the Hughes/ EchoStar merger.

In rendering their tax opinions in connection with the Hughes/ EchoStar merger, counsel to each of HEC Holdings and EchoStar have relied upon assumptions and representations made by HEC Holdings and EchoStar, and the opinions are subject to the limitations and qualifications set forth therein. The companies are not aware of any facts or circumstances that would cause any of these representations or assumptions to be incorrect or untrue in any material respect. The tax opinions will neither bind the IRS or the courts, nor preclude the IRS from adopting a contrary position. If the Hughes/ EchoStar merger were held to be taxable, then EchoStar and New EchoStar, as successor to EchoStar, potentially would incur material tax liabilities, and the EchoStar common stockholders would recognize gain or loss for U.S. federal income tax purposes on the exchange of EchoStar common stock for New EchoStar common stock.

Resale Limitations

In general, shares of New EchoStar Class C common stock issued to GM Class H common stockholders and shares of New EchoStar Class A common stock issued to EchoStar Class A common stockholders pursuant to the transactions will be freely transferable, except for shares received by persons who may be deemed to be affiliates of the parties under the Securities Act. Affiliates generally include individuals or entities that control, are controlled by, or are under common control with a person. Affiliates may sell their shares of New EchoStar common stock only pursuant to an effective registration statement under the Securities Act covering the resale of those shares, an exemption under Rule 145(d) of the Securities Act or any other applicable exemption under the Securities Act. We expect that the exemption under Rule 145(d) of the Securities Act will be available for resales of shares of New EchoStar Class A common stock and New EchoStar Class C common stock by most of the affiliates of New EchoStar immediately following the completion of the Hughes/EchoStar merger. HEC Holdings' registration statement on Form S-4, of which this document constitutes a part, does not cover the resale of New EchoStar common stock held by affiliates after the transactions.

In addition, certain significant stockholders have contractually agreed to be subject to transfer restrictions. For more information, see [Shares Eligible for Future Sale](#).

DESCRIPTION OF PRINCIPAL TRANSACTION AGREEMENTS

On October 28, 2001, GM, Hughes and EchoStar entered into certain agreements which set forth the terms and conditions of the proposed transactions. The principal transaction documents consist of the following:

the implementation agreement, which establishes the overall framework for implementing the transactions;

the GM/ Hughes separation agreement, which establishes the terms and conditions of the separation of Hughes from GM, including the Hughes recapitalization;

the Hughes/ EchoStar merger agreement, which establishes the terms and conditions of the Hughes/ EchoStar merger;

the PanAmSat stock purchase agreement, which establishes the terms and conditions of the sale of the approximately 81% interest held by Hughes subsidiaries in PanAmSat to EchoStar under certain circumstances, including upon a failure of the Hughes/ EchoStar merger to receive certain required governmental approvals; and

certain other ancillary agreements contemplated by the agreements listed above.

On December 14, 2001, in connection with the agreement relating to Vivendi Universal's investment in EchoStar Series D convertible preferred stock, GM, Hughes and EchoStar amended several provisions of the implementation agreement and the Hughes/ EchoStar merger agreement to account for certain terms of the investment by Vivendi Universal. For more information on Vivendi Universal's investment in EchoStar Series D convertible preferred stock, see The Transactions Description of the Transactions Hughes/ EchoStar Merger Financings above.

In addition, at the time of the original execution of the principal transaction agreements in October 2001, General Motors, Hughes and EchoStar anticipated that certain modifications to the structure of the transactions would be needed, including to reflect the formation of HEC Holdings, which did not exist in October 2001, and its role in the transactions. As a result, the parties agreed to appropriately amend and restate certain of the transaction agreements upon the final determination of the nature and scope of the necessary structural modifications. On , 2002, the parties amended and restated the transaction agreements originally entered into to reflect, among other things, the creation of HEC Holdings.

The descriptions of the principal transaction agreements, including the implementation agreement, the GM/ Hughes separation agreement, the Hughes/ EchoStar merger agreement, the PanAmSat stock purchase agreement and certain other agreements contemplated by those agreements, set forth below summarize what we believe to be the material terms of those agreements. However, these summaries do not purport to be complete and are qualified in their entirety by reference to the actual text of those agreements, most of which have been filed as exhibits to the registration statement of which this document constitutes a part. Copies of the implementation agreement, the GM/ Hughes separation agreement, the Hughes/ EchoStar merger agreement and the PanAmSat stock purchase agreement have been filed as exhibits to the registration statement of which this document constitutes a part and are incorporated by reference into this document. For more information about how you can obtain copies of these agreements, see Where You Can Find More Information below. Covenants and agreements described below which are binding upon Hughes, HEC Holdings and/or EchoStar will bind New EchoStar after the Hughes/ EchoStar merger.

Implementation Agreement

GM, Hughes, HEC Holdings and EchoStar have entered into an implementation agreement that establishes certain important terms and conditions relating to the implementation of the proposed transactions. Generally speaking, the implementation agreement creates the framework for the overall transaction and sets forth the terms and conditions of GM's obligation to effect the separation of Hughes from GM pursuant to the Hughes split-off.

Let us tell you more about the implementation agreement:

Proposal of Matters Relating to the Transactions to GM Common Stockholders

The implementation agreement provides the terms under which GM will seek GM common stockholder approval of the proposals relating to the transactions. In addition to the obligations of GM, Hughes and HEC Holdings to prepare this document and file the registration statement of which this document forms a part, GM has agreed to:

take all other action, in accordance with the U.S. federal securities laws, the Delaware General Corporation Law, all other applicable law, its restated certificate of incorporation, its bylaws and the policy statement of its board of directors regarding certain capital stock matters, necessary to present the GM/Hughes separation transactions, including the proposed amendment to the GM restated certificate of incorporation, the Hughes recapitalization and all other aspects of the GM/Hughes separation transactions, including the Hughes split-off, to the holders of GM \$1 2/3 par value common stock and GM Class H common stock for their consideration and in order to seek the requisite GM common stockholder approval;

include in this document the recommendation of the GM board of directors in favor of the GM/Hughes separation transactions;

mail this document to the GM common stockholders; and

use commercially reasonable efforts, in accordance with the U.S. federal securities laws, the Delaware General Corporation Law and all other applicable law, to solicit from the GM common stockholders written consents to be obtained in connection with this consent solicitation sufficient under applicable law to constitute the requisite GM common stockholder approval.

Each of these obligations is subject to certain conditions relating to compliance with certain securities laws, the continued effectiveness of the IRS ruling received by GM and the availability of the Hughes/EchoStar merger financing. This document will not be mailed to the GM common stockholders unless these conditions have been satisfied or waived.

In addition, the implementation agreement provides that if the GM board of directors determines, in accordance with its fiduciary duties under applicable law, either that:

it cannot or will not be able to recommend the GM/ Hughes separation transactions to GM common stockholders for their approval; or

after having recommended to GM common stockholders approval of the GM/ Hughes separation transactions, it is required to withdraw, revoke or modify in any adverse manner its recommendation;

then GM must promptly notify EchoStar in writing of this determination of non-recommendation and GM will not be required to take or continue any of the actions described above, although certain provisions of the Hughes/ EchoStar merger agreement giving rise to termination rights on the part of Hughes and EchoStar, and EchoStar's right to a termination fee, will apply, as described further below. Under certain circumstances, GM would be deemed to have delivered a non-recommendation notice if GM fails to confirm, upon EchoStar's request, that GM's board of directors continues to recommend the GM/Hughes separation transactions and has a good faith intention and is prepared to submit the GM/Hughes separation transactions to its stockholders in accordance with its obligations described above, continues to take certain actions in furtherance thereof and is in compliance with its non-solicitation covenant described below. For more information, see Hughes/ EchoStar Merger Agreement Termination below.

At any time after delivering a non-recommendation notice to EchoStar, GM may notify EchoStar in writing that the GM board of directors has determined to recommend the GM/ Hughes separation transactions to GM common stockholders for approval and to withdraw the notice. Commencing five business days after GM delivers its notice of withdrawal, the rights of Hughes and EchoStar to terminate the Hughes/ EchoStar merger agreement will lapse.

At any time after delivering a non-recommendation notice to EchoStar that has not been withdrawn as described above, GM may notify EchoStar in writing that GM proposes to seek the requisite GM common stockholder approval of the GM/ Hughes separation transactions notwithstanding GM's non-recommendation determination. GM may provide this notice to EchoStar only if it has determined, in good faith and upon the advice of legal counsel, that taking into account its non-recommendation determination and the fiduciary duties of its board of directors under applicable law, GM is authorized under Delaware corporate law to seek GM common stockholder approval of the GM/Hughes separation transactions and that the receipt of such stockholder approval (if received) would result in the GM/Hughes separation transactions being duly authorized by all necessary corporate action on the part of GM. Commencing five business days after GM delivers such a notice that it proposes to seek such GM common stockholder approval, certain rights of Hughes and EchoStar to terminate the Hughes/ EchoStar merger agreement will lapse.

Requisite GM Common Stockholder Approval

Pursuant to the terms of the implementation agreement, GM is seeking common stockholder approval from:

the holders of a majority of the outstanding shares of GM \$1 2/3 par value common stock;

the holders of a majority of the outstanding shares of GM Class H common stock; and

the holders of a majority of the voting power of the outstanding shares of GM \$1 2/3 par value common stock and GM Class H common stock, voting together as a single class, based on their respective per share voting power pursuant to provisions set forth in the GM restated certificate of incorporation.

If these approvals are obtained, the matters relating to the transactions, which are being submitted to GM common stockholders pursuant to this consent solicitation, will have received the requisite GM common stockholder approval.

Hughes Split-Off

The implementation agreement provides that, subject to the completion by General Motors, Hughes and HEC Holdings of the Hughes recapitalization in accordance with the terms and conditions of the GM/ Hughes separation agreement, including the receipt by GM of the Hughes dividend distribution, immediately following the completion of the Hughes recapitalization and immediately prior to the Hughes/ EchoStar merger, GM, Hughes and HEC Holdings will promptly take all actions within their control to complete the Hughes split-off pursuant to the following steps:

GM will distribute one share of HEC Holdings Class C common stock in exchange for and in redemption of each outstanding share of GM Class H common stock, and the GM Class H common stock will be redeemed and cancelled; and

GM will, subject to the condition that the amount of the Hughes dividend distribution not exceed the amount of GM's remaining retained economic interest in Hughes immediately before the Hughes recapitalization, retain any remaining shares of HEC Holdings Class C common stock other than those shares distributed to holders of GM Class H common stock in connection with the redemption of all outstanding GM Class H common stock as described above or that are subject to any GM share dispositions.

GM, Hughes and HEC Holdings have agreed to cooperate, and to instruct the GM transfer agent and the HEC Holdings transfer agent to cooperate, with the other parties in connection with the Hughes split-off and related matters, including the issuance and delivery of certificates representing, or other evidence of ownership of, the shares of HEC Holdings Class C common stock to be distributed in connection with the Hughes split-off. To this end, the HEC Holdings transfer agent will distribute letters of transmittal to all holders of GM Class H common stock as of immediately prior to the Hughes split-off for use in surrendering the certificates representing shares of GM Class H common stock in exchange for certificates representing, or other evidence of ownership of, shares of HEC Holdings Class C common stock.

After the Hughes split-off, each former holder of shares of GM Class H common stock will not have any rights with respect to such shares, and any certificates representing, or other evidence of ownership of, such shares will represent shares of HEC Holdings Class C common stock distributed in the Hughes split-off.

After the transactions are completed, the HEC Holdings transfer agent will begin mailing certificates representing, or other evidence of ownership of, HEC Holdings Class C common stock. We currently estimate that it will take about weeks following the closing of the transactions to complete this mailing.

Treatment of Stock Options, Restricted Stock Units and Incentive Compensation Awards. In connection with the Hughes split-off, GM, Hughes and HEC Holdings have agreed to take all such actions as may be necessary to cause each outstanding option to purchase GM Class H common stock to be converted into an option to purchase, and become in accordance with its terms exercisable for, the same number of shares of HEC Holdings Class C common stock. In addition, restricted stock units with respect to GM Class H common stock and other incentive compensation awards payable in, or determined by reference to, shares of GM Class H common stock, will be converted into, and become in accordance with their terms exercisable for, the same number of restricted stock units or incentive compensation awards with respect to HEC Holdings Class C common stock. GM, Hughes and HEC Holdings have agreed to take all such actions as may be necessary to cause payments under the Hughes long-term achievement plan that are payable in shares of GM Class H common stock to become payable in the same number of shares of HEC Holdings Class C common stock and payments under such plan that are payable in shares of GM \$1 2/3 par value common stock to become payable in a number of shares of HEC Holdings Class C common stock to be determined by a formula based on the prices of GM Class H common stock and GM \$1 2/3 par value common stock near the time of the completion of the GM/ Hughes separation transactions. GM, Hughes and HEC Holdings have agreed to use commercially reasonable efforts to obtain any consents of the holders of such options, restricted stock units and rights to payment under the Hughes long-term achievement plan to the extent required by the terms thereof to achieve these effects in connection with the Hughes split-off.

GM, Hughes and HEC Holdings have agreed to take all actions necessary to prevent stock options, restricted stock units or other incentive compensation awards granted to employees of Hughes or its subsidiaries after the signing of the implementation agreement from vesting or becoming exercisable as a result of the transactions. GM has also agreed, subject to applicable law and with the prior approval of EchoStar, to exercise its authority under the Hughes Electronics Corporation Incentive Plan to limit the period of exercisability of any stock options held by employees who terminate their employment after the completion of the Hughes/EchoStar merger to a maximum exercise period of two years following termination.

The boards of directors of GM, Hughes and HEC Holdings will adopt appropriate resolutions so that the disposition of shares of and options with respect to GM Class H common stock, or other equity securities or derivative securities of GM, and the acquisition of shares or options with respect to HEC Holdings Class C common stock, or other equity securities or derivative securities of HEC Holdings
