Notes to Consolidated Financial Statements
Three and Six Months Ended June 30, 2007 and 2006
(Unaudited)

1. Significant Accounting Principles

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Express-1 Expedited Solutions, Inc. (we , us , our or the Company) have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (SEC) and in accordance with the instructions to Form 10-Q. Certain information and footnote disclosures normally included in annual financial statements have been condensed or omitted pursuant to those rules and regulations. However, we believe that the disclosures contained herein are adequate to make the information presented not misleading.

The financial statements reflect, in our opinion, all material adjustments (which include only normal recurring adjustments) necessary to fairly present our financial position at June 30, 2007 and results of operations for the three and six-month periods ended June 30, 2007 and 2006. The preparation of the financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities and the disclosure of contingencies at the date of the financial statements as well as the reported amounts of revenues and expenses during the reporting period. Estimates have been prepared on the basis of the most current and best available information and actual results could differ materially from those estimates.

These unaudited condensed consolidated financial statements and notes thereto should be read in conjunction with the audited financial statements and notes thereto for the fiscal year ended December 31, 2006 included in our Annual Report on Form 10-K as filed with the SEC and available on the SEC 's website (www.sec.gov). Results of operations in interim periods are not necessarily indicative of results to be expected for a full year.

Revenue Recognition

The Company recognizes revenue at the point in time it completes delivery on the shipments it handles; with related costs of delivery being accrued as incurred and expensed within the same period in which the associated revenue is recognized. The Company uses the following supporting criteria to determine revenue has been earned and should be recognized: i) persuasive evidence that an arrangement exists, ii) services have been rendered, iii) the sales price is fixed and determinable and iv) collectability is reasonably assured.

Revenue is reported by the Company on a gross basis in accordance with release 99-19 from the Emerging Issues Task Force (EITF) of the Financial Accounting Standards Board (FASB), *Reporting Revenue Costs as a Principal versus Net as an Agent*. The Company is the primary obligor and is responsible for providing the service desired by the customer. The customer holds the Company responsible for fulfillment including the acceptability of the service. Requirements may include, for example, on-time delivery, handling freight loss and damage claims, establishing pick-up and delivery times, and tracing shipments in transit. The Company has discretion in setting sales prices and as a result, its earnings vary. In addition it has discretion to select its drivers, contractors or other transportation providers (collectively, service providers) from among thousands of alternatives. Finally, the Company bears credit risk for all of its receivables. These three factors, discretion in setting sales prices, discretion in selecting service provider and credit risk further support reporting revenue on the gross basis.

Stock-Based Compensation

The Company accounts for share-based compensation in accordance with Statement of Financial Accounting Standard (SFAS) Number 123R, *Share-Based Payment*, which was adopted January 1, 2006, utilizing the modified prospective method.

The Company has in place a stock option plan approved by the shareholders for 5,600,000 shares of its common stock. Through the plan, the Company offers shares to employees and assists in the recruitment of qualified employees and non-employee directors. Under the plan, the Company may also grant restricted stock awards, subject to the satisfaction by the recipient of certain conditions

Table of Contents

and enumerated in the specific restricted stock grant.

Options generally become fully vested three to four years from the date of grant and expire five to ten years from grant date. During the three and six-month periods ended June 30, 2007, the Company granted 25,000 and 410,475 options to purchase shares of its common stock pursuant to its stock option plan as amended, respectively. As of June 30, 2007, the Company had 2,608,525 shares available for future stock option grants under its existing plan.

The weighted-average fair value of each stock option recorded in expense for the three and six-month periods ended June 30, 2007 and 2006 were estimated on the date of grant using the Black-Scholes option pricing model and were amortized over the vesting period of the underlying options. The Company has used one grouping for the assumptions, as its option grants are primarily basic with similar characteristics. The expected term of options granted has been derived based upon the Company's history of actual exercise behavior and represents the period of time that options granted are expected to be outstanding. Historical data was also used to estimate option exercises and employee terminations. Estimated volatility is based upon the Company's historical market price at consistent points in a period equal to the expected life of the options. The risk-free interest rate is based on the U.S. Treasury yield curve in effect at the time of grant and the dividend yield is zero. The assumptions outlined in the table below were utilized in the calculations of compensation expense from option grants in the reporting periods reflected.

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2007	2006	2007	2006
Risk-free interest rate	5.00%	4.35%	5.00%	4.35%
Expected life	6.0 years	5.0 years	6.0 years	5.0 years
Expected volatility	35%	31%	35%	26%
Expected dividend yield	none	none	none	none
Grant date fair value	\$0.59	\$0.37	\$0.62	\$0.19

The following table summarizes the stock option activity for the six-month period ended June 30, 2007:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life
Outstanding at beginning of period	13,153,738	\$ 1.49	2.5 Years
Warrants granted	10,173	1.25	
Warrants expired/cancelled	(20,000)	1.35	
Warrants exercised	(290,500)	1.00	
Options granted	410,475	1.45	
Options expired/cancelled	(1,070,000)	1.75	
Options exercised			
Outstanding at end of period	12,193,886	\$ 1.48	2.4 Years
Outstanding exercisable at end of period	11,072,822	\$ 1.50	2.0 Years

As of June 30, 2007, the Company had approximately \$319,000 of unrecognized compensation cost related to non-vested share-based compensation that is anticipated to be recognized over a weighted average period of approximately 1.09 years. Estimated compensation expense related to existing share-based plans is \$91,000, \$142,000, \$79,000 and \$7,000 for the years ended December 31, 2007, 2008, 2009 and 2010, respectively.

At June 30, 2007, the aggregate intrinsic value of warrants and options outstanding was \$18,055,000 and the aggregate intrinsic value of options exercisable was \$16,504,000. During the three and six-month periods ended June 30, 2007, 90,500 and 290,500 warrants were exercised and the Company received approximately \$90,500 and \$290,500 in cash from these transactions, respectively. The total fair value of options vested during the same three and

six-month periods was approximately \$56,000 and \$99,000, respectively.

Table of Contents**Use of Estimates**

The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States of America. These principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. The Company reviews its estimates, including but not limited to purchased transportation, recoverability of long-lived assets, recoverability of prepaid expenses, tax provision, allowance for doubtful accounts, deferred tax assets and expenses associated with the exercise of stock options, on a regular basis. The Company makes adjustments based on historical experiences and existing and expected future conditions. These evaluations are performed and adjustments are made as information is available. Management believes that these estimates are reasonable; however, actual results could differ from these estimates.

Income Taxes

Taxes on income are provided in accordance with SFAS No. 109, *Accounting for Income Taxes*. Deferred income tax assets and liabilities are recognized for the expected future tax consequences of events that have been reflected in the consolidated financial statements. Deferred tax assets and liabilities are determined based on the differences between the book values and the tax basis of particular assets and liabilities, and the tax effects of net operating loss and capital loss carry forwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in the tax rate is recognized as income or expense in the period that included the enactment date. A valuation allowance is provided to offset the net deferred tax assets if, based upon the available evidence, it is more likely than not that some or all of the deferred tax assets will not be realized. The Company has no valuation allowance on its deferred tax assets, as of June 30, 2007. The Company had gross federal net operating loss carry forwards of approximately \$8,250,000 as of December 31, 2006. Based upon the pre-tax income reported in the first six months of 2007, the Company estimates these loss carry forwards have been reduced to approximately \$6,300,000 as of June 30, 2007.

Earnings Per Share

Earnings per common share are computed in accordance with SFAS No. 128, *Earnings Per Share*, which requires companies to present basic earnings per share and diluted earnings per share.

Basic Earnings per Share Basic earnings per share are computed by dividing net income by the weighted average number of shares of common stock outstanding during the period. The numerators, denominators and basic earnings per share are outlined in the table below.

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2007	2006	2007	2006
Net income	\$ 754,000	\$ 848,000	\$ 1,215,000	\$ 1,405,000
Basic weighted shares outstanding	26,706,100	26,285,034	26,574,016	26,285,034
Basic earnings per share	\$ 0.03	\$ 0.03	\$ 0.05	\$ 0.05

Diluted Earnings per Share Diluted earnings per common share are computed by dividing net income by the combined weighted average number of shares of common stock outstanding and dilutive options outstanding during the period. The numerators, denominators and diluted earnings per share are outlined in the table below.

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2007	2006	2007	2006
Net income	\$ 754,000	\$ 848,000	\$ 1,215,000	\$ 1,405,000
Basic weighted shares outstanding	26,706,100	26,285,034	26,574,016	26,285,034
Dilutive options and warrants	803,628	156,775	791,522	113,918

Edgar Filing: EXPRESS-1 EXPEDITED SOLUTIONS INC - Form 10-Q

Diluted weighted shares outstanding	27,509,728	26,441,809	27,365,538	26,398,952
Diluted earnings per share	\$ 0.03	\$ 0.03	\$ 0.04	\$ 0.05

9

Table of Contents

Warrants Exercised During the three and six-month periods ended June 30, 2007, the Company received approximately \$91,000 and \$291,000 in cash from the exercise of 90,500 and 290,500 warrants, respectively. These warrants were originally issued in conjunction with a private placement in September 2003 and carried an exercise price of \$1.00 each. The impact of these transactions was (i) an increase in the number of shares outstanding for the three and six-month periods by 90,500 and 290,500 shares, respectively (ii) an associated reduction in basic and diluted earnings per common share, and (iii) an increase in additional paid-in capital.

Stock and Warrants Granted During the six-month period ended June 30, 2007, the Company issued 19,343 shares of its common stock and granted 10,173 warrants to the holders of convertible securities issued during July 2003 in connection with a private placement, respectively. The warrants carry an exercise price of \$1.25 per share and are exercisable until July 2008.

2. Recent Accounting Pronouncements

Effective January 1, 2007, the Company adopted FASB Interpretation Number 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, which is an interpretation of SFAS Number 109, *Accounting for Income Taxes*. FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on the recognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. In addition, FIN 48 clearly scopes out income taxes from FASB Statement Number 5, *Accounting for Contingencies*.

On May 22, 2007, the FASB issued Interpretation Number 48-1 (FIN 48-1), *Definition of Settlement in FASB Interpretation Number 48*, to provide guidance about how an enterprise should determine whether a tax position is effectively settled for the purpose of recognizing previously unrecognized tax benefits. Under FIN 48-1, a tax position is considered to be effectively settled if the taxing authority completed its examination, the company does not plan to appeal, and it is remote that the taxing authority would reexamine the tax position in the future.

The Company did not record an adjustment within its financial statements as a result of adopting the provisions of FIN 48, as of June 30, 2007 and does not currently anticipate a material impact upon its financial statements in future periods as a result of this pronouncement.

Other new pronouncements issued but not effective until after June 30, 2007 are not expected to have a significant effect on the Company's consolidated financial position or results of operations, with the possible exception of the following, which are currently being evaluated by management:

In February 2007, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 159 *The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement No. 115*. SFAS No. 159 permits entities to choose to measure eligible items at fair value at specified election dates and report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. SFAS No. 159 is effective for fiscal years beginning after November 15, 2007. Management is currently evaluating the effect adoption of this statement will have on the Company's consolidated financial position and results of operations when it becomes effective in 2008.

In September 2006, the FASB issued SFAS No. 157 *Fair Value Measurements*, which defines fair value, establishes a framework for consistently measuring fair value under generally accepted accounting principles, and expands disclosures about fair value measurements. This Statement applies under other accounting pronouncements that require or permit fair value measurements and is effective for fiscal years beginning after November 15, 2007. The Company is currently evaluating the impact of adopting this Statement.

3. Commitments and Contingencies***Litigation***

In the ordinary course of business, the Company may be a party to a variety of legal actions. The Company does not anticipate any of these matters or any matters in the aggregate to have a materially adverse effect on the Company's business or its financial position or results of operations.

Table of Contents***Regulatory Compliance***

The Company's activities are regulated by state and federal agencies under requirements that are subject to broad interpretations. Among these regulations are limitations on the hours-of-service that can be performed by the Company's drivers, limitations on the types of commodities that can be hauled, limitations on the gross vehicle weight for each class of vehicle utilized by the Company and limitations on the transit authorities within certain regions. The Company cannot predict future changes to be adopted by the regulatory bodies that could require changes to the manner in which the Company operates.

Contingent Commitment

The Company has entered into an agreement with a third-party transportation equipment leasing company which results in a contingent liability. The Company has accounted for this contingency based upon the guidelines contained within FIN Number 45 and in SFAS Number 5. Accordingly the Company has estimated the maximum amount of the contingent liability to be \$51,000 as of June 30, 2007, and has recorded this amount as a reserve within its balance sheet and as an expense within its statement of earnings. The Company periodically evaluates the contingency amount and adjusts the liability based upon the results of those periodic evaluations. Based upon its analysis, the Company estimates that the range in liability that could be recognized is between \$0 and \$51,000, as of June 30, 2007.

4. Debt***Line of Credit***

The Company had \$1.3 million outstanding and \$4.3 million available for additional borrowings under its line of credit as of June 30, 2007. The maximum amount available for borrowings has been reduced by approximately \$400,000 for letters of credit issued on behalf of the Company and securing performance under certain insurance contracts. The facility has a maximum available amount of \$6.0 million and matures on September 30, 2008.

Term Debt

The Company has outstanding \$175,000 of term debt related to capital leases on revenue equipment and other assets used within its operations as of June 30, 2007. Of this amount, \$117,000 is classified as current; maturing in less than one year.

5. Related Party Transaction

In March 2007, the Company issued \$210,000 to the former owners of Dasher Express, Inc. and \$1,750,000 to the former owners of Express-1, Inc. to satisfy its contingent earn-out payments associated with the Company's performance for calendar year 2006. The Company's Board of Directors, at the recommendation of the Company's management, determined that a cash payment was in the Company's best interest and accordingly satisfied this obligation with cash available from operations and with borrowings from the Company's line of credit. The Company's CEO is among the former owners of Express-1, Inc. and received approximately 41% of the \$1,750,000 distribution. Members of his extended family, who are also Named Executive Officers of the Company, collectively received 32% of the distribution as former owners of Express-1, Inc., exclusive of the CEO's proceeds.

6. Operating Segments

The Company's two reportable business segments, Express-1 and Evansville, are defined by the types of services offered to the customers of each. Express-1 provides ground-based expedited transportation services throughout the continental United States, and to parts of Canada and Mexico. The Evansville segment provides dedicated expedite transportation services primarily to one customer account servicing automotive dealerships within a 250-mile radius of Evansville, Indiana.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies within this report and more fully within the Company's annual report on Form 10-K for 2006. Substantially all inter-segment sales prices are market based and all inter-segment activities are eliminated for financial reporting purposes. The Company evaluates performance based on operating income of the respective business units.

The schedule below identifies select financial data for each of the business segments for the three and six month periods ended June 30, 2007 and 2006.

Table of Contents**Express-1 Expedited Solutions, Inc
Segment Data**

	Express-1	Evansville	Corporate and Other	Consolidated
Three Months Ended June 30, 2007

7. Subsequent Events

The Company held discussions with its contract customer and contract administrator for its Evansville segment in August 2007. It is the understanding of the Company's management that, at this time, the customer does not wish to enter into another long-term contract but prefers to continue with the relationship under the general provisions of the expired contract. The Company remains in negotiations regarding rate increases and other provisions sought in Evansville and anticipates modifications will be in place during the third quarter of 2007. The Company believes it is in its best interest to continue to service the account in Evansville, even without a long-term contract.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Forward-Looking Statements. This Form 10-Q includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than

Table of Contents

statements of historical facts, included or incorporated by reference in this Form 10-Q which address activities, events or developments that the Company expects or anticipates will or may occur in the future, including such things as future capital expenditures (including the amount and nature thereof), finding suitable merger or acquisition candidates, expansion and growth of the Company's business and operations, and other such matters are forward-looking statements. These statements are based on certain assumptions and analyses made by the Company in light of its experience and its perception of historical trends, current conditions and expected future developments as well as other factors it believes are appropriate in the circumstances.

Investors are cautioned that any such forward-looking statements are not guarantees of future performance and involve significant risks and uncertainties, and that actual results may differ materially from those projected in the forward-looking statements. Factors that could adversely affect actual results and performance include, among others, the Company's limited operating history, potential fluctuations in quarterly operating results and expenses, government regulation, technology change and competition. Consequently, all of the forward-looking statements made in this Form 10-Q are qualified by these cautionary statements and there can be no assurance that the actual results or developments anticipated by the Company will be realized or, even if substantially realized, that they will have the expected consequence to or effects on the Company or its business or operations. The Company assumes no obligations to update any such forward-looking statements.

Executive Summary

Express-1 Expedited Solutions, Inc. (we , us , our and the Company) operates as an expedited transportation company. We service over 1,500 customers, specializing in time-sensitive transportation, fulfilled through a variety of exclusive-use vehicles, delivering reliable same-day or high-priority service between points within the United States and parts of Canada. Our services include expedited surface transportation, aircraft charters and dedicated expedited delivery. Our vehicle classifications include cargo vans, both 12-foot and 24-foot straight trucks and semi tractor-trailers. We offer an ISO 9001:2000 certified, twenty-four hour, seven-day-a -week call center allowing our customers immediate communication and status updates on time sensitive shipments while in-transit. Our customers receive electronic alerts, shipment tracking, proof of delivery, billing status and performance reports. We are dedicated to providing premium services that are customized to meet our clients' individual needs and flexible enough to cope with an ever-changing business environment.

We offer our services through two business segments referred to as Express-1 and Evansville. Both these segments are focused within the time-sensitive, high-priority expedite transportation market. Representing approximately 90% of our consolidated revenue, Express-1 is our largest business segment. Our Evansville operations account for approximately 10% of consolidated revenue and are sometimes referred to as Dedicated or Evansville Dedicated within our reports. These two expedite operations are complementary and provide us with a core base of focused transportation services on which to build.

We serve our customers' needs through two primary operational centers. Our Express-1 operations are located in Buchanan, Michigan, while our dedicated operations are located in Evansville, Indiana. We also operate a small cross-dock facility in Swanton, Ohio, near Toledo, which exclusively supports our Express-1 operations.

Express-1 provides its services primarily through a fleet of independent contractors operating a variety of their own equipment, including vans, straight trucks and semis. We often refer to this business model as asset-light meaning we predominantly rely upon equipment owned by our fleet of independent contract drivers to service the freight of our customers as opposed to purchasing our own fleet of equipment or assets. Our asset-light model can be contrasted with non-asset and asset-intensive business models which are both common within the transportation industry. The use of terms that describe the ownership and source of assets is helpful in allowing our investors to understand the amount of capital investment necessary in each form of transportation business model. Since we own and operate less than ten units within this segment, we consider ourselves to be asset-light. To supplement the capacity available from our fleet of contract drivers and company trucks, we utilize a network of transportation carriers to handle additional freight. The use of an asset-light model has enabled Express-1 to maintain its profitability under varying economic conditions. Express-1 operates throughout the United States and within certain provinces of Canada and Mexico.

We operate a dedicated transportation service from our Evansville, Indiana facility. Approximately 90% of our Evansville revenues are generated by service to one account. Our dedicated service contract extended through

April 2007, and the Company has been operating without a contract since that time. In August 2007, we received word that a long-term contract will not be forthcoming at this time. The customer has requested further that we continue our Evansville services without a long-term commitment.

Our growth strategy centers on initiatives, which we feel will continue to enhance both our top and bottom lines. Through internal

Table of Contents

growth, referred to by us as organic growth, our management team anticipates we will continue to increase our fleet capacity, expedited market presence and geographic footprint. To complement organic growth, we plan to entertain selective acquisitions on occasion, in furtherance of our expedited market focus. We continued to execute our strategy in the second quarter of 2007 as reflected by our year-over-year organic revenue growth of 27.4% for Express-1 and 1.2% for Evansville. Additionally, we have been able to hold direct expenses in-line as a percentage of total revenue compared to the previous year.

For the three months ended June 30, 2007 compared to the three months ended June 30, 2006

Each of our business segments, which are defined more fully below, have unique operations and sources of revenue and associated expense. In addition to revenue and direct expenses, we identify the costs associated with our executive management team, public company expense, board of directors, legal and other costs of operating as a public company under the caption Corporate.

Our Express-1 segment has two means of generating revenues. Most of the revenue within this business segment is generated through a fleet of vehicles, we refer to this as our Core Fleet. These vehicle are predominantly owned and operated (approximately 98%) by independent contract drivers, with about 2% of the units owned by us. Revenue is also generated in our Express-1 segment through brokering loads to third-party transportation companies. Within our reports, we refer to revenue generated from this brokerage activity as our Brokerage revenue. Jointly, the activities of our Core Fleet and Brokerage are integral to Express-1. Both activities service the same customer base, are used interchangeably within our operations and are managed by the same staff and support team. When a load request is received within our operations center, the team quickly assesses whether the load can be hauled by our fleet of contract drivers or is to be brokered to one of our partner carriers. In all cases, we remain the primary obligor in the transaction and bear risks associated with providing freight services.

Our Evansville business segment operates as a division of our Company and utilizes a fleet of Company owned or Company leased vehicles with employee drivers to generate its revenue.

We refer to the impact of fuel on our business throughout this discussion. For purposes of these references, we have only considered the impact of fuel surcharge revenues, fuel surcharge payments to contractors and fuel costs associated with the Express-1 Core Fleet and Evansville operations, excluding our Express-1 Brokerage operations. We feel that this approach, most readily conveys the impact of fuel on our business, our revenues and costs. Fuel charges are not commonly negotiated as a separate item within our Express-1 Brokerage operations, which is a common practice within the brokerage portion of the transportation industry. For that reason, it is impossible to accurately separate fuel revenues and costs from other revenues and costs on a load-by-load basis, for the Express-1 Brokerage activities.

The table below is provided to allow the users of our reports a means to quickly determine the period-over-period changes in dollars, year-over-year percentage and percentage of revenue for some of the main captions within our financial reports. It is not intended to replace the financial statements contained elsewhere within this report on Form 10-Q and users of our reports are encouraged to review those financials as well as the notes thereto. For the purpose of this comparison, we have reclassified our Interest and Other expense line items into our Sales, General and Administrative expenses.

Table of Contents

Revenues	Three Months Ended June 30,			%	Percentage of Revenue Three Months Ended June 30,	
	2007	2006	Change		2007	2006

* Percentages reflected in the table above in columns labeled Percentage of Revenue, Three Months Ended June 30 were calculated based upon associated revenues for each grouping reflected, rather than consolidated revenues.

Revenues

Consolidated Revenues increased 24.5 % during the three months ended June 30, 2007 compared to the three months ended June 30, 2006. The increase in revenue primarily relates to strong organic growth within our Express-1 business segment. Our Evansville operations generate revenue primarily from one account, which makes it much more difficult to obtain an increase in revenues within this segment. Fuel surcharge revenue was \$1,125,000 and \$821,000 for the three months ended June 30, 2007 and 2006, respectively, contributing to some of the increase in revenue. Fuel surcharges are billed to our customers based upon a variable matrix that is tied to a national weekly index published by the Department of Energy.

Table of Contents

Express-1 Revenues increased 27.4% during the three months ended June 30, 2007 as compared to the same three months of 2006. The increase in revenue was associated with growth in revenues from the core fleet, which represents the freight hauled on our fleet of independent contractor and company owned trucks. Express-1 successfully increased its average fleet size by approximately 36% during the second quarter of 2007 compared to the second quarter of 2006. With this added capacity, we leveraged organic growth opportunities by expanding market share with existing customers as well as acquiring new accounts. Due to the increased fleet size, we successfully diverted some load opportunities that previously would have been brokered to other carriers onto our own fleet of independent contractors. Our margins are normally a little higher on loads hauled by our own fleet, than those brokered to third parties. We occasionally go through periods of time where the opportunity to broker semi-truckload business volume has been greater due to capacity shortages within the general freight markets. We refer to this cyclical business volume as capacity expedites, and our strategy has been to position Express-1 to take advantage of capacity expedites when present, but to continue to focus on building its fleet capacity as a core means of growth. Fuel surcharge revenue was \$994,000 during the current quarter compared to \$685,000 for the same period in 2006.

Evansville Revenues increased 1.2% in the three months ended June 30, 2007 compared to the three months ended June 30, 2006. The increase in revenues for Evansville was attributable to the acquisition of new customers. Revenue derived from the primary customer in Evansville was approximately even with that from the same period in the prior year. Evansville recorded \$132,000 in fuel surcharges for the second quarter of 2007, as compared to \$136,000 in fuel surcharges for the same period in 2006.

Direct Expenses

Consolidated Direct Expenses, increased by 25.1% for the three months ended June 30, 2007 compared to the three months ended June 30, 2006. These expenses consist primarily of payment for trucking services, independent contractors, fuel, insurance, cross-dock facilities, equipment costs and direct personnel payroll expenses. During the period we experienced some increases in costs within both our Express-1 and Evansville business segments. The primary factors contributing to the increase in direct costs are the cost of fuel, equipment maintenance and accident claims. During the second quarter of 2007, fuel related expenses totaled \$1,258,000 compared to \$952,000 in the second quarter of 2006.

Express-1 Direct Expenses increased by 27.8% during the second quarter of 2007 compared to the second quarter of 2006. As a percentage of revenue, direct expenses were essentially level during the period. Payments to contractors and other parties for providing services were in-line with the same period in the previous year, while payments for insurance claims and the cost of operating a larger fleet increased. Fuel prices impacted costs during the period compared to the same period in the prior year, and represented \$991,000 and \$696,000 during the second quarters of 2007 and 2006 respectively.

Evansville Direct Expenses increased by 5.0% during the second quarter of 2007 compared to the second quarter of 2006. The increase was related to rises in the cost of direct labor, equipment and facilities. Evansville has benefited from more favorable margins on the portion of business not associated with the dedicated contract, which somewhat mitigates the increases in direct costs. The impact of fuel on direct costs within Evansville was minimal for the period, as fuel represented \$267,000 and \$256,000 for the second quarters of 2007 and 2006, respectively.

Gross Margin

Consolidated Gross Margin improved by 22.7% and represented approximately 25.4% of consolidated revenues for the three months ended June 30, 2007 compared to 25.7% of consolidated revenue for the three months ended June 30, 2006. The decline in gross margin as a percentage of revenue was primarily associated with the aforementioned increases in costs within our Evansville segment. Within Express-1, gross margin improved slightly as a percentage of revenue. Fuel costs and surcharges had a limited effect on gross margin as a percentage of revenue for the period.

Express-1 Gross Margin increased by 26.3% and represented 26.1% of revenue for the three months ended June 30, 2007, as compared to 26.3% of revenues for the same period in 2006. During the second quarter of 2007, Express-1 organically grew its revenue by 27.4% over the same period in the prior year resulting from growth of 35.8% within its fleet of independent contract drivers. The growth within the Express-1 fleet, lessened the impact of softness in the brokerage activities related to the weak general freight market for semi tractor-trailers.

Evansville Gross Margin decreased by 12.9% and represented 18.1% of revenue for the three months ended June 30, 2007 compared to 21.0% for the three months ended June 30, 2006. The decrease in margin was due to cost increases associated with the

Table of Contents

Evansville dedicated contract. Fuel costs did not significantly impact margin within our Evansville operations for the quarter compared to the same quarter in the prior year.

Sales, General and Administrative Expenses (Including interest and other expenses)

Consolidated Sales, General and Administrative Expenses (SG&A) increased by 14.3% and represented 16.6% of revenue during the three months ended June 30, 2007 compared to 18.1% of revenue for the three months ended June 30, 2006. Decreases in SG&A as a percentage of revenue were realized within both business segments. Our Corporate expenses remained relatively flat as we are implementing the provisions of Section 404 of Sarbanes Oxley. Our management is pleased with the cost containment efforts of our entire team, and we continue to cautiously anticipate additional leverage can be attained in the future. We have invested some of our profits into initiatives we feel will help generate longer-term growth. These include expansion within our sales and recruiting forces and development of larger international capabilities.

Express-1 Sales, General and Administrative Expense increased by 14.8% and represented 13.7% of associated revenue for the three-month period ended June 30, 2007 compared to 15.3% for the same period in 2006. Express-1 continued to benefit from its operating leverage and we believe it should continue to achieve higher rates of growth in revenue than the rate of increase within SG&A in the future.

Evansville Sales, General and Administrative Expense decreased by 22.1% and represented 10% of revenue during the three months ended June 30, 2007, as compared to 13.0% of revenue for the three months ended June 30, 2006. Contributing to this decrease was the elimination of amortization associated with start-up costs for the Evansville operation and a reduction in the amount of corporate overhead absorbed within the period compared to the same period in the prior year.

Income From Operations

Consolidated Income From Operations increased 42.8% during the three months ended June 30, 2007 compared to the three months ended June 30, 2006. We have benefited from the success within our Express-1 segment. The improvement in operating income came during a soft general freight market. We continue to gain market share and grow due to the hard work and dedication of our employees and independent contract drivers, which we refer to as VP s or Value Providers. We are dedicated to customer service and focused on profitable long-term growth. As shareholders, our employees have a stake in our success and continue to drive this momentum.

Express-1 Income from Operations improved by 42.2% during the three months ended June 30, 2007 compared to the same period in the prior year. Contributing to the year-over-year change were improvements in gross margin and SG&A expenses. Express-1 has continued its historical trend of strong revenue and earnings growth, which emphasizes our operating leverage.

Evansville Income from Operations increased by 2.0% during the three months ended June 30, 2007 compared to the same period in the prior year. Contributing to the overall profitability within Evansville was an increase in revenue from newly-acquired customer accounts with stronger margins. We continue to operate our Evansville dedicated services without a long-term contract, and anticipate some rate increases and other provisions will be forthcoming to compensate for our support of this dedicated customer.

Provision for, Benefit from Income Tax

During the three months ended June 30, 2007, we recorded a current income tax provision of \$457,000 on a consolidated basis compared to no current tax provision in the three months ended June 30, 2006. No taxes were recorded during the second quarter of 2006 due to the existence of a deferred tax valuation allowance in excess of \$2.0 million. The valuation allowance was eliminated during the fourth quarter of 2006. On June 30, 2007, our estimates indicated we had approximately \$6.3 million of Federal Net Operating Loss Carry-forwards (NOL s), which will be used to reduce future taxable income. We do not anticipate using a significant amount of cash for income tax payments until these NOL s are exhausted, but we do anticipate paying a nominal amount of Alternative Minimum Tax and State income taxes during this period. We record our provision for Federal and State income taxes at the approximate rate of 37.5% of pre-tax income.

Net Income

Net Income declined by 11.1% during the three months ended June 30, 2007, as compared to the three months ended June 30, 2006.

Table of Contents

The decrease is due to the recording of a current tax provision during the 2007 period. As previously mentioned, net income before tax increased by 42.8% during the quarter.

Earnings Per Share

Basic Earnings Per Share was \$0.03 for the three months ended June 30, 2007 compared to \$0.03 for the three months ended June 30, 2006. During these same periods, basic weighted average shares outstanding were 26,706,100 and 26,285,034 for 2007 and 2006, respectively.

Diluted Earnings Per Share was \$0.03 for the three months ended June 30, 2007 compared to \$0.03 for the three months ended June 30, 2006. During these same periods, diluted weighted average shares outstanding were 27,509,728 and 26,441,809 for 2007 and 2006 respectively.

For the six months ended June 30, 2007 compared to the six months ended June 30, 2006

The table below is provided to allow the users of our reports a means to quickly determine the period-over-period changes in dollars, year-over-year percentage and percentage of revenue for some of the main categories within our reports. It is not intended to replace the financial statements contained elsewhere within this report on Form 10-Q and users of our reports are encouraged to review those financials as well as the notes thereto. For the purposes of this comparison, we have reclassified our Interest and Other expense line items into our Sales, General and Administrative expenses.

* Percentages reflected in the table above in columns labeled Percentage of Revenue, Six Months Ended June 30 were calculated based upon associated revenues for each grouping reflected, rather than consolidated revenues.

Revenue

Consolidated Revenues increased 22.5 % during the six months ended June 30, 2007 compared to the six months ended June 30, 2006. The increase in revenue was generated primarily by organic growth within our Express-1 segment. Our Evansville operations generate revenue primarily from one dedicated contract making it more difficult to obtain an increase. Fuel surcharge revenue was \$1,964,000 and \$1,419,000 for the six months ended June 30, 2007 and 2006, respectively, contributing to some of the increase in revenue.

Table of Contents

Express-1 Revenues increased 25.2% during the six months ended June 30, 2007 compared to the same six months of 2006. Increases in capacity within our core fleet provided the stimulus for this growth. Express-1 realized an increase in average fleet size of approximately 33% during the first half of 2007 compared to the first half of 2006. We have continued to handle more of our customer calls on our own fleet, as opposed to brokering the loads to third party carriers. Consequently, we've seen a decline in the Brokerage portion of our Express-1 Brokerage activities, as the number of loads moved by our own equipment has increased substantially year-over-year. Coupled with this has been an overall decline in the volume of loads available for brokerage during the six months of 2007, versus the same period in 2006. Our volume of semi-truckload capacity expedites began to decline in third-quarter of 2006, and is impacted by capacity swings within the general truck-load market. Fuel surcharge revenue was \$1,717,000 during the first six months of 2007 compared to \$1,178,000 for the same period in 2006.

Evansville Revenues increased 2.2% in the six months ended June 30, 2007 compared to the six months ended June 30, 2006. The increase in revenues for Evansville was attributable to the acquisition of new customers. Revenue derived from the dedicated contract customer was down slightly year-over-year. Evansville recorded \$247,000 in fuel surcharges during the first half of 2007 compared to \$241,000 in fuel surcharges during the first half of 2006.

Direct Expense

Consolidated Direct Expenses, increased by 22.2% for the six months ended June 30, 2007 compared to the six months ended June 30, 2006. As a percentage of revenue, we were able to hold cost increases to a minimum within our business segments. During the first six months of 2007, fuel related expenses totaled \$2,150,000 and \$1,678,000 for 2007 and 2006, respectively.

Express-1 Direct Expenses increased by 25.6% during the first six months of 2007 compared to the same period in 2006. As a percentage of revenue, direct expenses were level during the period thereby supporting our margin. Express-1 payments to contractors and other parties were essentially flat, while payments for insurance claims and the cost of operating a larger fleet increased slightly. Fuel prices impacted costs during the period compared to the same period in the prior year and represented \$1,649,000 and \$1,211,000 of direct expense during the first six months of 2007 and 2006, respectively.

Evansville Direct Expenses decreased by 1.0% during the first six months of 2007 compared to the same period in 2006. Our Evansville operations were able to hold increases related to direct wages, equipment and facilities during the early part of the year, which offset increases near the end of the first half of 2007. Benefiting Evansville greatly have been the more favorable margins on new accounts. The impact of fuel on direct costs within Evansville was minimal during the period, as fuel represented \$501,000 and \$467,000 for the first six months of 2007 and 2006, respectively.

Gross Margin

Consolidated Gross Margin improved by 23.5% and represented approximately 25.8% of consolidated revenues for the first half of 2007 compared to 25.6% of consolidated revenue for the same period in 2006. The improvements were primarily associated with the aforementioned ability to hold costs in-line as a percentage of revenue coupled with the improvements in margin on new accounts in Evansville. Fuel costs and surcharges had a limited effect on gross margin as a percentage of revenue for the period.

Express-1 Gross Margin increased by 24.2% and represented 26.3% of revenue for the first half of 2007 compared to 26.5% of revenues for the same period in 2006. Express-1 has been able to successfully hold its margin at a historically good level, in spite of softness within the transportation markets. This underscores the premium value attributable to our expedited freight compared to that of general commodity transportation. During the first half of 2007, Express-1 successfully grew its fleet by 33.3% over the same period in 2006.

Evansville Gross Margin increased by 16.2% and represented 21.1% of revenue for the first half of 2007 compared to 18.6% for the same period in 2006. The increase was primarily the result of stronger margins associated with new customer accounts within the segment. During the period fuel cost did not significantly impact margin within Evansville compared to the same period in the prior year.

Sales, General and Administrative Expenses (Including interest and other expenses)

Consolidated Sales, General and Administrative Expenses (SG&A) increased by 18.0% and represented 18.1% of revenue during the first six months of 2007 compared to 18.8% of revenue for the same period in 2006. Decreases in

SG&A as a percentage of revenue were realized within both our business segments, while our Corporate expenses remained level, even as we are implementing Section 404 of Sarbanes Oxley. Our management is pleased with the cost containment efforts of our entire team, and we continue to cautiously anticipate additional leverage in the future. We have begun to invest and will continue to invest some of our profits into initiatives targeting longer term growth. These include expansion within our sales and recruiting force and development of a larger international capability.

Table of Contents

Express-1 Sales, General and Administrative Expense increased by 20.9% for the first six months of 2007 compared to the same period in 2006. Included within SG&A during the first six months of 2007 was the write-down on one specific customer's account receivable in the amount of \$175,000. Express-1 continued to benefit from its operating leverage and we anticipate achieving higher rates of growth in revenue than for SG&A in the future.

Evansville Sales, General and Administrative Expense decreased by 11.1% during the first six months of 2007 compared to the same period in 2006. Contributing to this decrease was the elimination of amortization related to start-up costs during April 2007.

Income From Operations

Consolidated Income From Operations increased 38.8% during the six months ended June 30, 2007 compared to the same period in 2006. We benefited from the success within our Express-1 operations and improvements in our Evansville operations. Our increases in operating income were achieved in a weak transportation market. Our entire organization is focused on continuing to drive momentum.

Express-1 Income from Operations improved by 29.0% during the first half of 2007 compared to the same period in 2006. Contributing to the year-over-year change were strong margins and controls over SG&A. Express-1 continued its historical trend of strong revenue and earnings growth, emphasizing our operating leverage.

Evansville Income from Operations increased by 85.2% during the first half of 2007 compared to the same period in 2006. Contributing to the overall profitability within Evansville were increases in revenue from newly-acquired customer accounts with stronger margins.

Provision for, Benefit from Income Tax

During the six months ended June 30, 2007, we recorded a current income tax provision of \$735,000 on a consolidated basis compared to not recording a current tax provision in the same period in 2006. Due to the existence of a deferred tax valuation allowance, we did not record a provision for current taxes on our statements during the first nine months of 2006. The valuation allowance was eliminated during the fourth quarter of 2006. On June 30, 2007, we estimate our Net Operating Loss Carryforwards (NOL's) to be approximately \$6.3 million. This will be used to reduce future taxable income until exhausted. We do not anticipate using a significant amount of cash for income tax payments, but will pay a nominal amount of Alternative Minimum Tax and State income taxes until the NOL is depleted. We record our provision for income taxes at the approximate rate of 37.5% of pre-tax income.

Net Income

Net Income declined by 13.5% during the six months ended June 30, 2007 compared to the six months ended June 30, 2006. The decrease is due to recording of a current tax provision during the 2007 period. As previously mentioned, net income before tax increased by 38.8% during the same period.

Earnings Per Share

Basic Earnings Per Share was \$0.05 for the six months ended June 30, 2007 compared to \$0.05 for the six months ended June 30, 2006. During these same periods, basic weighted average shares outstanding were 26,574,016 and 26,285,034 for 2007 and 2006, respectively.

Diluted Earnings Per Share was \$0.04 for the six months ended June 30, 2007 compared to \$0.05 for the six months ended June 30, 2006. During these same periods, diluted weighted average shares outstanding were 27,365,538 and 26,398,952 for 2007 and 2006 respectively.

Critical Accounting Policies

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions. In certain circumstances, those estimates and assumptions can affect amounts reported in the accompanying consolidated financial statements. We have made our best estimates and judgments of certain amounts included in the

Table of Contents

financial statements, giving due consideration to materiality. We do not believe there is a great likelihood that materially different amounts will be reported related to the accounting policies described below. However, application of these accounting policies involves the exercise of judgment and use of assumptions as to future uncertainties and, as a result, actual results could differ from these estimates. Note 1 of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2006, includes a summary of the significant accounting policies and methods used in the preparation of our consolidated financial statements. Following is a brief discussion of the changes that occurred during 2007 to the significant accounting policies and estimates disclosed in Note 1 of the Notes to Consolidated Financial Statements in our Annual Report on Form 10-K for the year ended December 31, 2006.

Revenue Recognition

We recognize revenue at the time of delivery based upon the following criteria: i) persuasive evidence of an arrangement exists, ii) services have been rendered, iii) the sales price is fixed and determinable and iv) collectability is reasonably assured. We report revenue on a gross basis in accordance with EITF 99-19, *Reporting Revenue Costs as a Principal versus Net as an Agent*. We are the primary obligor and are responsible for providing the service desired by the customer and we are responsible for fulfillment including the acceptability of the service. We have discretion in setting sales prices and as a result, our earnings vary. In addition we have discretion to select our drivers, contractors or other transportation providers (collectively, service providers) from among thousands of alternatives. Finally, we have credit risk for our receivables. These three factors, discretion in setting sales prices, discretion in selecting service provider and credit risk further support reporting revenue on the gross basis.

New Pronouncement

Effective January 1, 2007, the Company adopted FASB Interpretation No. 48 (FIN 48), *Accounting for Uncertainty in Income Taxes*, which is an interpretation of SFAS No. 109, *Accounting for Income Taxes*. FIN 48 clarifies the accounting for income taxes by prescribing the minimum recognition threshold a tax position is required to meet before being recognized in the financial statements. FIN 48 also provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition. In addition, FIN 48 clearly scopes out income taxes from FASB Statement No. 5, *Accounting for Contingencies*. The adoption of FIN 48 had no impact on our financial statements in the current period.

Liquidity and Capital Resources**Cash Flow**

As of June 30, 2007, we had \$4,724,000 of working capital with associated cash and cash equivalents of \$328,000 compared with working capital of \$2,078,000 and cash of \$79,000 at December 31, 2006. This represents an increase of 120% or \$2,397,000 in non-cash working capital during the period.

During the six months ended June 30, 2007, we generated \$2,013,000 in cash from operations compared to \$1,180,000 for the first six months of 2006. Primary components of this increase were (i) an increase of approximately \$500,000 in tax-adjusted net income (net income before tax, less the amount of cash paid for income taxes), (ii) an increase in receivables and related provisions for doubtful accounts of approximately \$170,000, and (iii) a reduction in other assets, and increases in accrued expenses and other accruals of approximately \$505,000.

Investing activities used approximately \$2,173,000 during the six months ended June 30, 2007 compared to our use of \$1,776,000 on these activities during the prior year. Most of this cash was used to satisfy earn-out payments to the former owners of Express-1, Inc. and Dasher Express, Inc. during both years. These payments totaled \$1,960,000 and \$1,460,000, respectively during the six month periods ending June 30, 2007 and 2006. In addition to these payments, we used \$231,000 and \$466,000 on capital expenditure items, such as satellite communications equipment for our fleet, computer software and related computer hardware, during the 2007 and 2006 periods respectively. During 2006, we received approximately \$150,000 in proceeds from a loan on one of our former business units.

Financing activities generated approximately \$409,000 and \$292,000 for the six month periods ended June 30, 2007 and 2006 respectively. This cash from financing activities was principally derived from \$291,000 we received on the exercise of warrants and new borrowings on our line of credit facility and reductions in capital lease obligations of \$118,000 during the 2007 period. Financing activities generated approximately \$292,000 for the same six-month period in 2006.

Table of Contents**Liquidity**

Credit Facility To ensure that our Company has adequate near-term liquidity, we maintain a \$6.0 million line of credit facility with a Michigan banking corporation (the Bank). The line of credit calls for our operating subsidiary, Express-1, Inc. to be the borrower and the Company to act as guarantor. Under the loan documents, we may draw upon the line of credit the lesser of (i) \$6,000,000 or (ii) 80% of the eligible accounts receivable of Express-1, Inc. plus \$912,000 based upon real property also included in the collateral base. All obligations under the agreements are secured by the accounts receivable and other assets of Express-1, Inc. All advances under the agreement are subject to interest at the Bank's prime rate plus an applicable margin ranging from negative 0.50% to positive 0.25% and based upon the Company's performance in the preceding quarter. Interest is payable monthly. The maturity date of the loan is September 30, 2008, and the facility contains covenants pertaining to the maintenance of certain financial ratios. As of June 30, 2007, the Company was in compliance with all terms and conditions under the loan agreements and had available borrowing capacity of approximately \$4.3 million with an effective interest rate of 8.0%.

The Bank facility also permits the issuance of letters of credit as security for the Company's obligations and contingent obligations. As of June 30, 2007, we had outstanding letters of credit totaling approximately \$400,000, issued primarily for deductibles and premium security on various insurance policies. The total of these letters of credit has reduced the above-described borrowing capacity by an equal amount.

Warrants and Options We may receive proceeds in the future from the exercise of warrants and options outstanding as of June 30, 2007, in accordance with the following schedule:

	Approximate Number of Shares	Approximate Proceeds
Total Outstanding as of June 30, 2007:		
Options granted within Stock Compensation Plan	2,991,475	\$ 3,663,146
Options granted outside Stock Compensation Plan(1)	1,712,857	2,997,500
Warrants issued	7,489,554	11,394,532
	12,193,886	\$ 18,055,178

- (1) Consists of options granted to sellers of Dasher Express, Inc. and Express-1, Inc. in conjunction with the purchase agreements for these two acquisitions.

Contractual Obligations The table below reflects all contractual obligations of our Company as of June 30, 2007. Included within this table is the maximum amount that could become due and payable for the one remaining contingent earn-out payment on the Dasher and Express-1 acquisitions. The contingent amount is tied directly to the segment performance of Express-1 for the full year of 2007.

We believe a significant portion of the required payments will be generated by our operations. However, we may have to secure additional sources of funds in the future to make some portion of the payments as due.

Contractual Obligations	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years	3-5 years	
Long-term debt					
Capital lease obligations	168,000	110,000	58,000		
Operating leases	64,000	46,000	18,000		
Contingent Earn-out obligations (*)	2,210,000	2,210,000			
Notes payable	7,000	7,000			
Total contractual cash obligations	\$2,449,000	\$2,373,000	\$76,000		

23

Table of Contents

(*) Represents the maximum amount we could be required to pay, based upon the attainment of specific performance targets of our Express-1, Inc. business segment.

Legal Proceedings From time-to-time we are named as a defendant in legal proceedings. The potential exists that we could incur material expenses in the defense and resolution of legal matters. Furthermore, since we have not established material reserves in connection with such claims, any such liability would be recorded as an expense in the period incurred or estimated. This amount, even if not material to our overall financial condition, could adversely affect our results of operations in the period recorded.

Item 3. *Quantitative and Qualitative Disclosures About Market Risk.*

Market risk generally represents the risk of loss that may result from the potential change in value of a financial instrument as a result of fluctuations in interest rates and market prices. We do not currently have any trading derivatives nor do we expect to have any in the future. We have established policies and internal processes related to the management of market risks, which we use in the normal course of our business operations.

Table of Contents

Interest Rate Risk

We have interest rate risk, as borrowings under our credit facility are based on variable market interest rates. As of June 30, 2007, we had \$1.3 million of variable rate debt outstanding under our credit facility. Presently, the variable interest rate on outstanding obligations under the line is 8.0%. A hypothetical 10% increase in our credit facility's weighted-average interest rate for the three months ended June 30, 2007, would correspondingly decrease our earnings and operating cash flows by approximately \$2,600 in the period or \$10,400 annually.

Intangible Asset Risk

We have a substantial amount of intangible assets and are required to perform goodwill impairment tests whenever events or circumstances indicate that the carrying value may not be recoverable from estimated future cash flows. As a result of our periodic evaluations, we may determine that the intangible asset values need to be written down to their fair values, which could result in material charges that could be adverse to our operating results and financial position. Although at June 30, 2007, we believed our intangible assets were recoverable, changes in the economy, the business in which we operate and our own relative performance could change the assumptions used to evaluate intangible asset recoverability. We continue to monitor those assumptions and their effect on the estimated recoverability of our intangible assets.

Equity Price Risk

We do not own any equity investments other than in our subsidiaries. As a result, we do not currently have any direct equity price risk.

Commodity Price Risk

We do not enter into contracts for the purchase or sale of commodities. As a result, we do not currently have any direct commodity price risk.

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures. Under the supervision and with the participation of the Company's management, including the Company's principal executive officer and principal financial officer, the Company conducted an evaluation of the effectiveness of the design and operations of its disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act), as of the end of the period covered by this report. Based on their evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective such that the material information required to be included in our Securities and Exchange Commission (SEC) reports is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms relating to Express-1 Expedited Solutions, Inc., including our consolidated subsidiaries, and was made known to them by others within those entities, particularly during the period when this report was being prepared.

Changes in internal controls. There were no changes in our internal controls over financial reporting during the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

Table of Contents

PART II OTHER INFORMATION

Item 1. *Legal Proceedings.*

From time-to-time, the Company is involved in various civil actions as part of its normal course of business. The Company is not party to any litigation that is material to ongoing operations as defined in Item 103 of Regulation S-K as of the period ended June 30, 2007.

The Company has joined with several other unsecured creditors to force bankruptcy proceedings against a former customer in South Carolina. The Company cannot reasonably estimate the amount or timing of a recovery, if any, at this time. Accordingly, the Company has written off the entire balance of this receivable within its financial statements as presented herein.

Item 1A. *Risk Factors.*

Refer to Item 1A of our annual report (Form 10K) for the year ended December 31, 2006, under the caption **RISK FACTORS** for specific details on factors and events that are not within our control and could affect our financial results.

In addition to the Risk Factors outlined with our Form 10-K and referenced above, we have additional risk associated with non-renewal of the long-term service contract in our Evansville business segment. With approximately 90% of its revenues generated from one dedicated customer, Evansville could be significantly adversely impacted by the loss of this business volume. We have been advised that a long-term renewal of the dedicated contract will not be immediately forthcoming. We have further agreed to continue to serve this customer, without a long-term commitment. Should this primary customer decide to cancel our services in the future, we could incur significant shutdown expenses as well as realizing interruptions to our revenue and earnings streams associated with our Evansville business segment.

Item 2. *Unregistered Sales of Equity Securities and Use of Proceeds.*

At various times from January 1, 2007 until June 30, 2007, the Company issued a total of 19,343 shares of common stock and concurrently issued warrants to purchase a total of 10,173 shares of common stock at an exercise price of \$1.25. The foregoing shares of common stock and warrants were issued upon the exercise, by a number of individuals, of options to purchase units consisting of shares of the Company's common stock and warrants.

At various times from January 1, 2007 until June 30, 2007, the Company issued a total of 290,500 shares of common stock upon the exercise by Barron Partners of certain warrants. The company received a total of \$291,000 in consideration of said exercises.

All of the foregoing securities were issued by the Company in reliance on the exemptions from registration provided by Section 4(2) of the Securities Act of 1933, as amended (the **Securities Act**) or Rule 506 of Regulation D as promulgated under the Securities Act of 1933. Each of the recipients of the Company's securities represented to the Company that they were an accredited or sophisticated investor, had sufficient liquid assets to sustain a loss of their investment in the Company, had consulted with such independent legal counsel or other advisers as they deemed appropriate to evaluate their investment in the Company, had been afforded the right to ask questions of the Company, and were acquiring the Company's securities solely for their own account as a personal investment.

Item 3. *Defaults upon Senior Securities.*

The Company's line of credit contains various covenants pertaining to the maintenance of certain financial ratios. As of June 30, 2007, the Company was in compliance with the ratios required under its revolving credit agreement. No events of default exist on the credit facility as of the filing date.

Item 4. *Submission of Matters to a Vote of Security Holders.*

The following three proposals were submitted to the shareholders at the annual meeting held June 14, 2007. All items were approved and ratified by vote at the meeting.

- (1) To elect a board of seven directors;

Table of Contents

- (2) To ratify the appointment of Pender Newkirk & Company as independent auditors for the Company for the year ending December 31, 2007;
- (3) To approve and ratify an amendment to our Certificate of Incorporation and Bylaws creating three classes of Director (Class I, Class II and Class III) with staggered three-year terms of appointment.
The votes to the above matters are as follows:

	For	Against	Abstentions
1. Election of Directors			
Mike Welch Inside Director	24,684,654	0	74,529
Mark Patterson Inside Director	24,682,917	0	76,266
Jim Martell Independent Director	24,686,604	0	72,579
Jennifer Dorris Independent Director	24,651,738	0	107,445
John Affleck-Graves Independent Director	24,685,724	0	73,459
Jay Taylor Independent Director	24,686,617	0	72,566
Calvin R. Whitehead Independent Director	24,686,175	0	73,008
2. Appointment of Auditor	24,428,346	316,545	14,290
3. Amendment to Certificate of Incorporation and Bylaws Creating Three Classes of Director with Staggered Three Year Terms of Appointment	14,125,554	771,117	14,882

All matters submitted to the shareholders for vote above, passed and were adopted. No additional matters were submitted to the shareholders for voting during the three-month period ended June 30, 2007.

Item 5. Other Information.

None

Item 6. Exhibits

- 31.1 Certification of the Chief Executive Officer Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002
