Panhandle Royalty Company
FORM 8-K
May 11, 2004

ITEM 5 OTHER EVENTS

This Form 8-K contains the Company's second fiscal quarter ended March 31, 2004 press release, dated on May 11, 2004.

OKLAHOMA CITY, OK PANHANDLE ROYALTY COMPANY (AMEX-PHX) reported fiscal 2004 second quarter revenues of \$6,184,605, up 24% from the first quarter. This provided a net income of \$1,897,637 after provision for income tax, up 92% from the first quarter. It was 45 cents per share after the April 1, 2004 two-for-one stock split. Average oil price received was \$33.83 per barrel, an increase of 12% over the fiscal first quarter. Average gas price received was \$5.23/mcf, an increase of 26% over the fiscal first quarter. Oil production for the quarter decreased 1% to 29,738 barrels. Natural gas production for the quarter increased 5% to 978,104 mcf.

Compared to the first quarter, cash flow from operations decreased 18% to \$3,107,773. Capital expenditures for oil and gas activities increased 16% to \$2,307,282. Assets were up 2% to \$50,631,502. Shareholders equity gained 8% to \$25,081,299. Total debt was reduced 8% from the first quarter to \$12,016,663. A dividend of 8 cents per share was paid during the quarter (equivalent to 4 cents per share on the new post two-for-one split shares).

Drilling activity where Panhandle has either a working or royalty interest has shown a substantial increase during the first half of fiscal 2004 with 403 wells in the categories of pending, scheduled, drilling, testing or completed. This is an increase of 9.2%. Those with actual operations (drilling, testing, completed) increased 20.5% to 217. Of this total there were 108 working interest and 109 royalty interest wells. A total of 143 wells were completed during the first half with a success rate of 93%. Eighty two per cent of the successful wells were gas producers.

H W Peace II, Company President and CEO stated:

This quarter's financial results have only been exceeded by last year's second quarter when we received an average price of \$5.94/mcf for our natural gas sales due to the perception at that time of the inability to refill storage from a severe winter draw down. Since then storage was refilled but a recovering economy and high oil price have combined to keep gas price near the \$5.00/mcf level. About 90% of PHX wells are drilled for gas in Oklahoma where most of the increase in drilling is occurring because there are ready nearby pipelines and a favorable regulatory system which encourages drilling. With our considerable fee mineral holdings in Oklahoma, should these economic conditions continue, Panhandle will reduce its total debt significantly sooner than anticipated from cash flow while participating in all wells meeting our economic criteria.
