-

**Item 2.06 Material Impairments**

On January 10, 2006, Devon Energy Corporation determined that it would record a non-cash charge of approximately \$215 million (\$165 million after tax) against its fourth quarter 2005 earnings. This charge relates to impairment of certain of Devon's international assets. Devon is in the process of finalizing its year-end results for 2005. Therefore, the final reported results could differ from these estimates.

With the completion of 2005 exploration and development activities, Devon determined that it would impair the cumulative investments by \$170 million pre-tax (\$120 million after tax) in Angola and \$45 million pre-tax (\$45 million after tax) in Brazil. The impairment in Brazil relates to the purchase price allocated to certain Brazilian oil and gas assets through mergers and acquisitions and the cost of exploration activities unrelated to the company's recent success with its Polvo project on block BM-C-8 and other blocks upon which Devon is currently exploring. There is no tax benefit related to the Brazilian impairment.

Devon Energy Corporation hereby furnishes the information set forth in its Press Release, dated January 12, 2006, a copy of which is attached as Exhibit 99.1.
