-

Item 8.01 Other Events.

On December 10, 2007, Genta Incorporated, (the Company), announced the release of new survival analyses based upon extended follow-up of patients in the Company's randomized Phase 3 trial of Genasense® (oblimersen sodium) Injection for relapsed or refractory chronic lymphocytic leukemia (CLL). The new data show that patients who achieved complete remission (the primary endpoint of the trial) with Genasense plus chemotherapy have shown extended survival compared with patients whose complete remission was induced with chemotherapy alone. The data were released this weekend at a press briefing sponsored by the American Society of Hematology (ASH) and will be presented in a scientific session on Tuesday December 11, 2007 at the ASH annual meeting in Atlanta, GA by Dr. Susan O'Brien, Professor of Medicine, M.D. Anderson Cancer Center, Houston, TX.

Item 9.01 Financial Statements and Exhibits.
