A. M. Castle & Co.
Notes to Consolidated Financial Statements
March 31, 2006
(Unaudited)

1. Consolidated Financial Statements

The consolidated financial statements included herein are unaudited. The Consolidated Balance Sheet at December 31, 2005 is derived from the audited financial statements at that date. A. M. Castle & Co. (the Company) believes that the disclosures are adequate and make the information not misleading. However, certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission. In the opinion of management, the unaudited statements, included herein, contain all adjustments (consisting of only normal recurring adjustments) necessary to present fairly the financial position, the cash flows and the results of operations for the periods then ended. It is suggested that these condensed financial statements be read in conjunction with the financial statements and the notes thereto included in the Company's latest annual report on Form 10-K. The 2006 interim results reported herein may not necessarily be indicative of the results of operations for the full year.

2. Earnings Per Share

Earnings per common share are computed by dividing net income by the weighted average number of shares of common stock (basic) plus common stock equivalents (diluted) outstanding during the year. Common stock equivalents consist of stock options, restricted stock awards and preferred stock shares and have been included in the calculation of weighted average shares outstanding using the treasury stock method. In accordance with the Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 128 Earnings per Share, the following table is a reconciliation of the basic and fully diluted earnings per share calculations for the periods reported.

<i>(in thousands, except per share data)</i>	For The Three Months Ended March 31,	
	2006	2005
Net income	\$16,049	\$11,770
Preferred dividends	(242)	(240)
Net income applicable to common stock	\$15,807	\$11,530
Weighted average common shares outstanding	16,633	15,815
Dilutive effect of outstanding employee and directors' common stock options and restricted stock	322	598
Dilutive effect of convertible preferred stock	1,794	1,794
Diluted common shares outstanding	18,749	18,207
Basic income per common share	\$ 0.95	\$ 0.73

Edgar Filing: CASTLE A M & CO - Form 10-Q

Diluted income per common share	\$ 0.86	\$ 0.65
Outstanding employee and directors common and restricted stock options and preferred shares having no dilutive effect	6	157

Table of Contents

Page 7 of 18

3. Revolving Line of Credit

On July, 29, 2005 the Company entered into an \$82.0 million five year secured revolving credit agreement (the Revolver) with a syndicate of U.S. banks.

The Revolver consists of (i) a \$75.0 million revolving loan (the U.S. Facility) and (ii) a \$7.0 million revolving loan (the Canadian Facility) to be drawn by the borrower from time to time. The Canadian Facility can be drawn in U.S. dollars and/or Canadian dollars. Available proceeds under the Revolver may be used for general corporate purposes.

As of March 31, 2006 and December 31, 2005 the Company had no outstanding borrowings under either the U.S. or Canadian Facility. As described in the Company s Form 10-K for the year-ended December 31, 2005, the Revolver replaced the accounts receivable securitization facility.

4. Goodwill

The Company performs an annual impairment test on goodwill during the first quarter of each fiscal year. Based on the test made during the first quarter of 2006, the Company has determined that there is no impairment of goodwill.

The changes in carrying amounts of goodwill were as follows (*in thousands*):

	Metals Segment	Plastics Segment	Total
Balance as of December 31, 2005	\$ 19,249	\$ 12,973	\$ 32,222
Currency valuation	(3)		(3)
Balance as of March 31, 2006	\$ 19,246	\$ 12,973	\$ 32,219

5. INVENTORY

Final inventory determination under the last-in first-out (LIFO) method can only be made at the end of each fiscal year based on the actual inventory levels and costs at that time. Accordingly, interim LIFO determinations, including those at March 31, 2006, are based solely on management s estimates of inventory levels and costs. Since future estimates of inventory levels and costs are subject to certain forces beyond the control of management, interim financial results are subject to fiscal year-end LIFO inventory valuations.

Current replacement cost of inventories exceeded book value by \$103.9 million and \$104.0 million at March 31, 2006 and December 31, 2005, respectively. Income taxes would become payable on any realization of this excess from reductions in the level of inventories.

6. Share-Based Compensation

As described in the Company s Form 10-K for the year-ended December 31, 2005, the Company adopted FAS No. 123R, Share-Based Payments , effective October 1, 2005 using the modified retrospective method of adoption. Accordingly, all prior period financial statements have been restated to reflect this standard.

The fair value of stock options granted has been estimated using the Black Scholes option pricing model. There were no stock options granted in the first quarter of 2006. Other forms of share-based compensation have generally used the market price of the Company s stock on the date of grant to estimate fair value.

In 2005, the Company established the 2005 Performance Stock Equity Plan (the Performance Plan). Under the Performance Plan, 435,698 stock awards were granted of which 70,908 have been forfeited. In the first quarter of 2006, awards of 45,000 were granted and 69,658 were forfeited. The number of shares that could potentially be issued is 729,580.

Additionally, the Company re-purchased treasury stock in the first quarter in lieu of cash for stock options exercised. The value of the shares surrendered was \$43,700.

Table of Contents**7. Segment Reporting**

The Company distributes and performs processing on both metals and plastics. Although the distribution processes are similar, different customer markets, supplier bases and types of products exist. Additionally, our Chief Executive Officer reviews and manages these two businesses separately. As such, these businesses are considered segments according to FAS No. 131 Disclosures about Segments of an Enterprise and Related Information and are reported accordingly in the Company's financial statements.

The accounting policies for all segments are described in Note 1 Principal Accounting Policies in the Company's Form 10-K for the year-ended December 31, 2005. Management evaluates performance of its business segments based on operating income. The Company does not maintain separate standalone financial statements prepared in accordance with generally accepted accounting principles for each of its operating segments.

The Company has entered into consignment inventory agreements with a few select customers whereby revenue is not recorded until the customer has consumed product from the consigned inventory and title has passed. Revenue derived from consigned inventories at customer locations for 2006 was \$4.6 million, or 1.6% of sales. Inventory on consignment at customers as of March 31, 2006 was \$2.2 million, or 1.8% of consolidated net inventory as reported on the Company's consolidated balance sheets.

The following is the segment information for the quarters ended March 31, 2006 and 2005:

<i>(dollars in thousands)</i>	Net Sales	Gross Material Margin	Other Operating Expense	Operating Income	Capital Expenditures	Depreciation
2006						
Metals Segment	\$250,648	\$73,643	\$47,132	\$26,511	\$4,565	\$2,138
Plastics Segment	28,545	9,450	7,661	1,789	434	306
Other			2,161	(2,161)		
Consolidated	\$279,193	\$83,093	\$56,954	\$26,139	\$4,999	\$2,444
2005						
Metals Segment	\$220,005	\$64,326	\$43,361	\$20,965	\$ 552	\$2,012
Plastics Segment	26,198	8,577	7,080	1,497	437	261
Other			1,687	(1,687)		
Consolidated	\$246,203	\$72,903	\$52,128	\$20,775	\$ 989	\$2,273

Other Operating loss includes the costs of executive, finance and legal departments, and other corporate activities which support both the metals and plastics segments of the Company.

The segment information for total assets at March 31, 2006 and December 31, 2005 was as follows:

<i>(dollars in thousands)</i>	March 31, 2006	December 31, 2005
Metals Segment	\$387,358	\$362,822
Plastics Segment	51,100	49,775
Other	11,977	11,138

Consolidated	\$450,435	\$423,735
--------------	-----------	-----------

Other The segment's total assets consist of the Company's income tax receivable and its investment in a joint venture.

Table of Contents

Page 9 of 18

8. Pension and Postretirement Benefits

The following are the components of the net pension and post-retirement benefit expenses (*in thousands*):

	2006	March 31, 2005
Service cost	\$ 917.8	\$ 720.5
Interest cost	1,805.8	1,593.0
Expected return on plan	(2,423.9)	(2,394.2)
Amortization of prior service cost	26.4	27.7
Amortization of net (loss) gain	945.8	614.6
Net periodic cost	\$ 1,271.9	\$ 561.6

As of March 31, 2006 the Company has not made any cash contributions to its pension plans for this fiscal year but will continue to evaluate options for funding this plan in 2006 in light of its favorable cash position and proposed pension accounting rule changes.

9. Commitments and Contingent Liabilities

At March 31, 2006 the Company had \$2.2 million of an irrevocable letter of credit outstanding to comply with the insurance reserve requirements of its workers' compensation insurance carrier. The Letter of Credit is obtained under a provision in the new revolving credit facility.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.**Financial Review**

This discussion should be read in conjunction with the information contained in the Consolidated Financial Statements and Notes.

Executive Overview***Economic Trends and Current Business Conditions***

A. M. Castle & Co. (the Company) continued to enjoy favorable demand for its products through the first quarter of 2006. The North American durable goods manufacturing sector, the Company's primary market, continues to exhibit demand requirements above 2005 levels. The aerospace, oil and gas, and mining and construction equipment sectors continued to show particular strength. The Company's metals product offerings are predominantly in carbon bar or tubing, alloy bar, high-end specialty metals (such as nickel alloy, stainless steel and aluminum), and carbon plate up to twenty inches thick.

Historically, the Company has used the Purchaser's Managers Index (PMI) provided by the Institute of Supply Managers to track general demand trends in its customer markets. Table 1 below shows recent PMI trends from the first quarter of 2005 through the first quarter of 2006. Generally speaking, an index above 50.0 indicates growth in the manufacturing sector of the U.S. economy. As the table indicates, there has been sustained growth in the manufacturing sector for several quarters. The Company's revenue growth, in real terms or net of material price increases, has improved over these same quarters. First quarter 2006 volume growth for the Company on a consolidated basis is approximately 9% ahead of the same quarter in 2005, (net of material price increases).

Table of Contents**Table 1**

YEAR	Qtr 1	Qtr 2	Qtr 3	Qtr 4

Total Operating Income	\$ 26.1	\$ 20.8	\$ 5.3	
<i>% of Total Net Sales</i>	<i>9.3%</i>	<i>8.4%</i>	<i>0.9%</i>	

Other Operating loss includes the costs of executive, finance and legal departments, and other corporate activities which support both the metals and plastics segments of the Company.

Table of Contents**Net Sales:**

Consolidated net sales of \$279.2 million increased 13.4%, or \$33.0 million, versus the first quarter of 2005. Metals segment sales of \$250.7 million were \$30.7 million, or 14.0%, ahead of last year. Strong demand continued for the Company's metals products, particularly in the aerospace, oil and gas, and mining and construction equipment markets. Increased volume accounted for approximately 10% of this segment's sales growth with the balance due to favorable material price.

Plastics segment sales of \$28.5 million were \$2.3 million, or 8.8%, stronger than the same quarter of 2005. Increased volume accounted for 1% of the sales growth while plastics material prices rose 8%.

Gross Material Margin and Operating Income:

Consolidated gross material margin of \$83.1 million was \$10.2 million, or 14.0%, better than last year driven by increased sales. Metals segment gross material margin of \$73.6 million was \$9.3 million, or 14.5%, ahead of the first quarter of 2005. Plastics segment gross material margin increased by \$0.9 million, or 10.5%, to a level of \$9.5 million. The Company has been able to maintain or slightly improve its material margin percentages in both segments while material prices rose.

Total consolidated operating expenses of \$57.0 million increased \$4.9 million, or 9.4%, versus the first quarter of last year on a 13.4% increase in net sales. The increased expenses were driven by increased demand and related distribution activity.

The Company's Other operating segment includes expenses related to executive, finance and legal departments, and other corporate activities which support both the metals and plastics segments.

Consolidated operating income of \$26.1 million (9.3% of sales) is \$5.3 million better than the first quarter of last year largely reflecting continued top line growth and margin maintenance.

Other Income and Expense, and Net Results:

Equity in earnings of joint venture of \$1.2 million were \$0.3 million lower than 2005, reflecting weaker sales within the Company's joint venture, Kreher Steel.

Financing costs, which consists of interest expense and also, in 2005, discount on sale of accounts receivable, were \$1.1 million in the first quarter of 2006 which was \$1.5 million lower than the same period in 2005 due to the Company's lower interest rate on its refinanced debt and reduced borrowings.

Consolidated net income applicable to common stock was \$15.8 million or \$0.86 per diluted share in the first quarter of 2006 versus a consolidated net income applicable to common stock of \$11.5 million or \$0.65 per diluted share in the corresponding period of 2005.

Critical Accounting Policies:

There have been no changes in critical accounting policies from those described in the Company's Annual Report on Form 10-K for the year-ended December 31, 2005.

Liquidity and Capital Resources

The Company's principal sources of liquidity are earnings from operations, management of working capital and the Revolver.

Cash from operating activities in the first quarter of 2006 was \$0.6 million.

Working capital, excluding the current portion of long-term debt, of \$151.5 million is up \$13.3 million since the beginning of the year. Trade receivables of \$133.6 million are up \$26.6 million due to increased sales. Receivable days sales outstanding (DSO) declined 2.2 days from December 31, 2005 to a level of 40.9 days reflecting strong collections during the quarter. Inventory at net book value of \$121.0 million, including LIFO (last-in, first-out) reserves of \$103.9 million is up slightly from the start of 2006. Days sales in inventory (DSI) improved to 102 days which is lower than the December 31, 2005 level of 119 days as sales outpaced mill receipts. The

Table of Contents

Company expects to operate at an average DSI of approximately 115 days in 2006.

The Company also paid a cash dividend to its shareholders of \$0.06 per share, or \$1.0 million during the first quarter of 2006.

Capital expenditures in the first quarter of 2006 were \$5.0 million. Major expenditures included the purchase of a new facility in the Birmingham, Alabama area (\$2.6 million) and its ongoing business system replacement initiative (\$0.5 million), along with typical equipment replacement and upgrades.

Company Financial Condition

In addition to several consecutive quarters of solid earnings performance, the Company reduced its overall borrowings. Also, in 2005 the Company replaced its long-term notes with a new loan arrangement that reduced interest expense and overall debt service cash outlays for the next several years.

The Company's principal payments required over the next few years are summarized below in Table 2 (*dollars in millions*)

Table 2

Year ending December 31,	
2006	\$ 6,104
2007	6,570
2008	6,841
2009	10,390
2010	7,190
2011 and beyond	42,836
Total debt	\$ 79,931

As of March 31, 2006, the Company remains in compliance with the covenants of its financial agreements, which require it to maintain certain funded debt-to-capital ratios, working capital-to-debt ratios and a minimum equity value as defined within the agreement. A summary of covenant compliance is shown below.

	Required	Actual 3/31/06
Debt-to-Capital Ratio	< 0.55	0.25
Working Capital-to-Debt Ratio	> 1.00	2.84
Minimum Equity Value	\$128.7 million	\$191.5 million

Current business conditions lead management to believe it will be able to generate sufficient cash from operations and ongoing working capital management to fund its ongoing capital expenditure programs and meet its debt obligations.

Commitments and Contingencies

At March 31, 2006 the Company had \$2.2 million of an irrevocable letter of credit outstanding to comply with the insurance reserve requirements of its workers' compensation insurance carrier. The Letter of Credit is obtained under a provision of the new revolving credit facility.

The Company is the defendant in several lawsuits arising out of the conduct of its business. These lawsuits are incidental and occur in the normal course of the Company's business affairs. It is the opinion of the Company, based on current knowledge, that no uninsured liability will result from the outcome of this litigation that would have a material adverse effect on the consolidated results of operations, financial condition or cash flows of the

Company.

In 2006, the Company will be negotiating a new contract for 278 of its 289 union employees, of its total workforce of 1,606. The contract is due for renewal in September 2006 and the Company has begun reviewing contract issues and developing contingency plans.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

The Company is exposed to various interest rate and metals and plastics price risks that arise in the normal course of business. The Company finances its operations with fixed and variable rate borrowings. Market risk arises from changes in variable interest rates. Under its Revolver, the Company's interest rate on borrowings is subject to changes in the LIBOR and Prime Rate. As of March 31, 2006, the Company had no outstanding borrowings under the Revolver. All of the Company's long-term debt as of March 31, 2006 is on a fixed interest rate. The Company's raw material costs are comprised primarily of engineered metals and plastics. Market risk arises from changes in the price of steel, other metals and plastics. Although average selling prices generally increase or decrease as material costs increase or decrease, the impact of a change in the purchase price of materials is more immediately reflected in the Company's cost of goods sold than in its selling prices.

Item 4. Controls and Procedures**(a) Evaluation of Disclosure Controls and Procedures**

A review and evaluation was performed by the Company's management, including the Company's Chief Executive Officer (the CEO) and Chief Financial Officer (the CFO), of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of the end of the period covered by this report.

In its annual report on Form 10-K for the year ended December 31, 2005, the Company reported that it had identified certain material weaknesses in its system of internal controls over financial reporting, as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended. Specifically, in conducting its evaluation of the Company's internal control over financial reporting at December 31, 2005, management identified material weaknesses that it (1) lacks sufficient resources with the appropriate level of technical accounting expertise in areas such as stock-based compensation, income taxes and LIFO (last-in, first-out) inventory valuation, and (2) did not maintain sufficient monitoring controls over its financial closing and reporting process.

As part of its evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report, management has (i) identified no material weaknesses other than those described above and (ii) evaluated whether the material weaknesses described above continue to exist. Although the Company believes that the changes in internal controls discussed below begin to address the reported material weaknesses, management cannot conclude that these weaknesses are eliminated until the Company performs further testing of internal controls over financial reporting in subsequent periods and takes further action steps to address these weaknesses. Therefore, the CEO and CFO conclude that the Company's current disclosure controls and procedures, as designed and implemented, were not effective in ensuring that the information the Company is required to disclose in this quarterly report is recorded, processed, summarized and reported reliably in accordance with generally accepted accounting principles within the time period required by the rules of the Securities and Exchange Commission.

(b) Changes in Internal Controls

In response to deficiencies in internal control over financial reporting as identified above,

Table of Contents

management implemented the following changes in the Company's internal control over financial reporting during the period ended March 31, 2006.

The Company has hired a tax manager to improve its internal capabilities for tax accounting and is evaluating various options related to LIFO inventory valuation accounting. The Company is also evaluating the use of external resources to remediate weaknesses identified regarding stock-based compensation and other complex technical accounting transactions. Additionally, the Company is reviewing its entire financial closing and reporting process as part of the business system replacement project (BSR) and will be testing these changes throughout the year.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

There are no material legal proceedings other than the ordinary routine litigation incidental to the business of the Company.

Item 1A. Risk Factors

During the quarter there were no material changes to the risk factors set forth in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2005.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Period	(a) Total Number of Shares (or Units) Purchased	(b) Average Price Paid per Share (or Unit)	(c) Total Number of Shares (or Units) Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number (or Approximate Dollar Value) of Shares (or Units) that May Yet Be Purchased (Under the Plans or Programs)
January 1 - January 31	1,620	\$ 26.97		
February 1 - February 28				
March 1 - March 31				
Total	1,620	\$ 26.97		

Item 6. Exhibits

Exhibit 31.1 Certification Pursuant to Section 302 by CEO

Exhibit 31.2 Certification Pursuant to Section 302 by CFO

Exhibit 32.1 Certification Pursuant to Section 906 by CEO & CFO
