QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2007

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____.

Commission File Number: 0-6835

IRWIN FINANCIAL CORPORATION

(Exact Name of Corporation as Specified in its Charter)

Indiana

35-1286807

(State or Other Jurisdiction of Incorporation or Organization)

(I.R.S. Employer Identification No.)

500 Washington Street Columbus, Indiana

47201

(Address of Principal Executive Offices)

(Zip Code)

(812) 376-1909

www.irwinfinancial.com

(Corporation's Telephone Number, Including Area Code)

(Web Site)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

As of July 27, 2007, there were outstanding 29,330,993 common shares, no par value, of the Registrant.

Table of Contents**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS****Note 1 Accounting Policies, Management Judgments and Accounting Estimates**

Consolidation: Irwin Financial Corporation and its subsidiaries (the Corporation) provide financial services throughout the United States (U.S.) and Canada. We are engaged in commercial banking, commercial finance and home equity lending. We are in the process of exiting the mortgage banking segment. Our direct and indirect subsidiaries include, Irwin Union Bank and Trust Company, Irwin Union Bank, F.S.B., Irwin Commercial Finance Corporation, Irwin Home Equity Corporation and Irwin Mortgage Corporation (IMC). Intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, the financial statements reflect all material adjustments necessary for a fair presentation. The Corporation does not meet the criteria as primary beneficiary for our wholly-owned trusts holding our company-obligated mandatorily redeemable preferred securities established by Financial Accounting Standards Board (FASB) Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities. As a result, these trusts are not consolidated.

Because we are in the process of exiting the mortgage banking line of business, the financial statements and footnotes within this report conform to the presentation required in Statement of Financial Accounting Standard (SFAS) 144, Accounting for the Impairment or Disposal of Long-Lived Assets. Certain of the balance sheet assets related to this line of business are being reported as assets held for sale. See Note 2 for additional information.

Use of Estimates: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Cash and Cash Equivalents Defined: For purposes of the statement of cash flows, we consider cash and due from banks to be cash equivalents.

Allowance for Loan and Lease Losses: The allowance for loan and lease losses is an estimate based on management's judgment applying the principles of SFAS 5, Accounting for Contingencies, SFAS 114, Accounting by Creditors for Impairment of a Loan, and SFAS 118, Accounting by Creditors for Impairment of a Loan Income Recognition and Disclosures. The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We perform an assessment of the adequacy of the allowance on a quarterly basis.

Within the allowance, there are specific and expected loss components. The specific loss component is assessed for loans we believe to be impaired in accordance with SFAS 114. We have defined impairment as nonaccrual loans. For loans determined to be impaired, we measure the level of impairment by comparing the loan's carrying value to fair value using one of the following fair value measurement techniques: present value of expected future cash flows, observable market price, or fair value of the associated collateral. An allowance is established when the fair value implies a value that is lower than the carrying value of that loan. In addition to establishing allowance levels for specifically identified impaired loans, management determines an allowance for all other loans in the portfolio for which historical experience indicates that certain losses exist. These loans are segregated by major product type, and in some instances, by aging, with an estimated loss ratio applied against each product type and aging category. The loss ratio is generally based upon historic loss experience for each loan type as adjusted for certain environmental factors management believes to be relevant.

It is our policy to promptly charge off any commercial loan, or portion thereof, which is deemed to be uncollectible. This includes, but is not limited to, any loan rated Loss by the regulatory authorities. Impaired commercial credits are considered on a case-by-case basis. The amount charged off includes any accrued interest. Unless there is a significant reason to the contrary, consumer loans are charged off when deemed uncollectible, but generally no later than when a loan is past due 180 days.

Servicing Assets: When we securitize or sell loans, we periodically retain the right to service the underlying loans sold. A portion of the cost basis of loans sold is allocated to this servicing asset based on its fair value relative to the loans sold and the servicing asset combined. Prior to the January 1, 2007, all servicing rights were carried at lower of cost or fair market value. We use a combination of observed pricing on similar, market-traded servicing rights and

internal valuation models that calculate the present value of future cash flows to determine the fair value of the servicing assets. These models are supplemented and calibrated to market prices using inputs from independent servicing brokers, industry surveys and valuation experts. In using this valuation method, we incorporate assumptions that we believe market participants would use in estimating future net servicing income, which include estimates of the

Table of Contents

cost of servicing per loan, the discount rate, float value, an inflation rate, ancillary income per loan, prepayment speeds, and default rates. Prior to January 1, 2007, all servicing assets were amortized over the period of and in proportion to estimated net servicing income.

For servicing assets associated with second mortgages and high loan-to-value first mortgages, the fair value measurement method of reporting these servicing rights was elected beginning January 1, 2007, in accordance with SFAS 156, Accounting for Servicing of Financial Assets. Under the fair value method, we measure servicing assets at fair value at each reporting date and report changes in fair value in earnings in the period in which the changes occur. All remaining servicing rights follow the amortization method for subsequent measurement whereby these servicing rights are amortized in proportion to and over the period of estimated net servicing income.

Incentive Servicing Fees: For whole loan sales of certain home equity loans, in addition to our normal servicing fee, we have the right to an incentive servicing fee (ISF) that will provide cash payments to us if a pre-established return for the certificate holders and certain structure-specific loan credit and servicing performance metrics are met. Generally the structure-specific metrics involved both a delinquency and a loss test. The delinquency test is satisfied if, as of the last business day of the preceding month, delinquencies on the current pool of mortgage loans are less than or equal to a given percentage. The loss test is satisfied if, on the last business day of the preceding month, the percentage of cumulative losses on the original pool of mortgage loans is less than or equal to the applicable percentage as outlined in the specific deal documents. We receive ISF payments monthly, once the pre-established return has been paid to the certificate holder, if the delinquency and loss percentages are within guidelines. If we are terminated or replaced for cause as servicer under the securitization, the cash flow stream under the ISF contract terminates.

We account for ISFs similar to management contracts under Emerging Issues Task Force Topic No. D-96, Accounting for Management Fees Based on a Formula. Accordingly, we recognize revenue on a cash basis as the pre-established performance metrics are met and cash is due.

Income Taxes: A consolidated tax return is filed for all eligible entities. In accordance with SFAS 109, deferred income taxes are computed using the liability method, which establishes a deferred tax asset or liability based on temporary differences between the tax basis of an asset or liability and the basis recorded in the financial statements.

Recent Accounting Developments: In March 2006, the FASB issued SFAS 156, Accounting for Servicing of Financial Assets, an amendment of FASB Statement No. 140. This statement requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value, if practicable. The statement permits, but does not require, the subsequent measurement of classes of servicing assets and servicing liabilities at fair value, to better align with the use of derivatives used to mitigate the inherent risks of these assets and liabilities. Offsetting changes in fair value are recognized through income. This statement is effective as of January 1, 2007. We elected the fair value treatment for servicing rights associated with second mortgage and high loan to value first mortgage loans at our home equity lending line of business. Implementation of the fair value treatment under SFAS 156 resulted in a one-time increase to retained earnings of \$1.7 million. This represents the after-tax effect of the \$2.9 million fair value adjustment to the mortgage servicing asset as of January 1, 2007.

In September 2006, the FASB issued SFAS 157, Fair Value Measurements. This statement defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. We are currently evaluating this new statement and have not yet determined the ultimate impact it will have on our financial statements.

In February 2007, the FASB issued SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities. This statement permits entities to choose to measure certain financial instruments at fair value. This statement is effective for financial statements issued for fiscal years beginning after November 15, 2007. Early adoption is permitted as of January 1, 2007. We elected not to early adopt this statement. We are currently evaluating this new statement and have not yet determined the ultimate impact it will have on our financial statements once it becomes effective in 2008.

Effective January 1, 2007, we adopted FASB Interpretation Number 48, Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109, (FIN No. 48), which prescribes a single, comprehensive model

for how a company should recognize, measure, present and disclose in its financial statements uncertain tax positions that the company has taken or expects to take on its tax returns. Upon adoption of FIN No. 48, we did not recognize any material adjustment in our liability for unrecognized tax benefits. As of January 1, 2007, our unrecognized tax benefits were \$10.7 million, \$0.7 million of which would, if

Table of Contents

recognized, favorably affect the effective tax rate in future periods. As of June 30, 2007, our unrecognized tax benefits were \$15.9 million, \$0.7 million of which would, if recognized, favorably affect the effective tax rate in future periods.

Our continuing practice is to recognize interest and penalties related to unrecognized tax benefits in income tax expense. As of January 1, 2007, we had approximately \$0.8 million accrued for interest and no accrual for penalties related to unrecognized tax benefits. As of June 30, 2007, we have approximately \$1.2 million accrued for interest related to unrecognized tax benefits.

Tax years 2003-2006 remain open to examination by major taxing jurisdictions. Certain state tax returns remain open to examination for tax years 2002-2006.

Reclassifications: Certain amounts in the 2006 consolidated financial statements have been reclassified to conform to the 2007 presentation. These changes had no impact on previously reported net income or shareholders' equity.

Note 2 Discontinued Operations

In 2006, we sold the mortgage banking line of business origination operation, including the majority of this segment's loans held for sale, as well as the majority of this segment's capitalized mortgage servicing rights to five separate buyers. In January 2007, we transferred a nominal amount of assets associated with this segment's servicing platform (but not mortgage servicing rights) to a sixth buyer. The majority of the cash proceeds from the sales have been collected. We have staff continuing to work at IMC through the wind-down of our remaining assets, such as construction loans and repurchased loans.

In accordance with the provisions of SFAS 144, the results of operations of the mortgage banking line of business for the current and prior periods have been reported as discontinued operations. In addition, certain of the remaining assets for this segment have been reclassified as held for sale in the consolidated balance sheet.

Reduction due to reclassification or sale of loans	(796)	(246)
Foreign currency adjustment	317	(8)
Balance at end of period	\$ 92,140	\$ 74,468

Note 5 Servicing Assets

We adopted the fair value treatment for servicing assets associated with our second mortgage and high loan-to-value first mortgage portfolios as of January 1, 2007. The effect of remeasuring the selected servicing assets at fair value was reported as a cumulative-effect adjustment to retained earnings, increasing retained earnings \$1.7 million, net of tax. Changes in fair value subsequent to adoption were recorded through amortization and impairment of servicing assets. All other first mortgage loans continue to be accounted for using the amortization method with impairment recognized. These mortgage servicing assets are recorded at lower of their allocated cost basis or fair value and a valuation allowance is recorded for any stratum that is impaired.

We estimate the fair value of the servicing assets using a cash flow model to project future expected cash flows based upon a set of valuation assumptions we believe market participants would use for similar assets. The primary

assumptions we use for valuing our mortgage servicing assets include prepayment speeds, default rates, cost to service and discount rates. We review these assumptions on a regular basis to ensure that they remain consistent with current market conditions. Additionally, we periodically receive third party estimates of the portfolio value from independent valuation firms. Inaccurate assumptions in valuing mortgage servicing rights could adversely affect our results of operations. For servicing rights accounted for under the amortization method, we also review these mortgage servicing assets for other-than-temporary impairment each quarter and recognize a direct write-down when the recoverability of a recorded valuation allowance is determined to be remote. Unlike a valuation allowance, a direct write-down permanently reduces the unamortized cost of the mortgage servicing rights asset and the valuation allowance, precluding subsequent reversals.

Table of Contents

Changes in our fair value servicing assets are shown below:

	June 30, 2007 And the Six Months Then Ended (Dollars in thousands)	December 31, 2006 And the Year Then Ended
Beginning balance	\$ 27,725	NA
Gain from initial adoption of SFAS 156	2,905	NA
Changes in fair value	(6,554)	NA
Mortgage servicing asset from continuing operations	\$ 24,076	NA

Changes in our amortizing servicing assets are shown below:

	June 30, 2007 And the Six Months Then Ended (Dollars in thousands)	December 31, 2006 And the Year Then Ended
Beginning balance	\$ 31,949	\$ 34,445
Initial adoption of SFAS 156	(27,725)	
Additions	303	17,884
Amortization	(637)	(21,027)
(Impairment) recovery	(46)	647
Mortgage servicing asset from continuing operations	\$ 3,844	\$ 31,949

We have established a valuation allowance to record amortizing servicing assets at their lower of cost or market value. Changes in the allowance are summarized below:

	June 30, 2007 And the Six Months Then Ended	December 31, 2006 And the Year Then Ended
Balance at beginning of year	\$ 483	\$ 1,152
Transfer of assets from amortizing to fair value	(332)	
Impairment (recovery)	46	(647)
Reclass for sales of servicing and clean up calls		(22)
Valuation allowance from continuing operations	\$ 197	\$ 483

Note 6 Short-Term Borrowings

Short-term borrowings are summarized as follows:

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
Federal Home Loan Bank borrowings	\$ 490,173	\$ 371,693
Federal funds	123,000	230,500
Other	27	250
Total	\$ 613,200	\$ 602,443
Weighted average interest rate	4.77%	4.49%

Federal Home Loan Bank borrowings are collateralized by loans and loans held for sale.

Table of Contents

We also have lines of credit available to fund loan originations and operations with variable rates ranging from 5.6% to 5.8% at June 30, 2007.

Note 7 Collateralized Debt

We pledge or sell loans structured as secured financings at our home equity and commercial finance lines of business. Sale treatment is precluded on these transactions because we fail the true-sale requirements of SFAS 140 as we maintain effective control over the loans and leases securitized. This type of structure results in cash being received, debt being recorded, and the establishment of an allowance for credit losses. The notes associated with these transactions are collateralized by \$1.5 billion in home equity loans, home equity lines of credit, and leases. The principal and interest on these debt securities are paid using the cash flows from the underlying loans and leases. Accordingly, the timing of the principal payments on these debt securities is dependent on the payments received on the underlying collateral. The interest rates on the bonds are both fixed and floating.

Collateralized debt is summarized as follows:

	Contractual Maturity	Weighted Average Interest Rate at June 30, 2007	June 30, 2007	December 31, 2006

Per-share from Continuing Operations			\$ 0.60	\$ (0.01)	\$ 0.59
Per-share amount for All Operations			\$ 0.03	\$	\$ 0.03

At June 30, 2007 and 2006, 2,015,094 and 1,830,737 shares, respectively, related to stock options that were not included in the dilutive earnings per share calculation because they had exercise prices above the stock price as of the respective dates.

Note 10 Industry Segment Information

We have three principal business segments that provide a broad range of financial services. The commercial banking line of business provides commercial banking services. The commercial finance line of business originates leases and loans against commercial equipment and real estate. The home equity lending line of business provides consumer mortgage products and services.

As described in Note 2, we have recently exited the conforming, conventional mortgage banking line of business. This segment is shown in the table below as Discontinued Operations. Our other segment primarily includes the parent company, our private equity portfolio and eliminations and a small amount of unsold items of our mortgage banking business.

The accounting policies of each segment are the same as those described in Note 1 Accounting Policies, Management Judgments and Accounting Estimates.

Table of Contents

Following is a summary of each segment's revenues, net income, and assets for the years indicated:

	Consolidated						Consolidated
	Commercial Banking	Commercial Finance	Home Equity Lending	Other	Continuing Operations	Discontinued Operations	
(Dollars in thousands)

Table of Contents**Note 11 Commitments and Contingencies***Culpepper v. Inland Mortgage Corporation*

On July 2, 2007, the Court of Appeals for the 11th Circuit affirmed the decision of the United States District Court for the Northern District of Alabama granting summary judgment in favor of our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation), and decertifying the plaintiffs' class. On July 13, 2007, plaintiffs filed a petition for a rehearing en banc. This lawsuit was originally filed in April 1996 alleging that Irwin Mortgage's payment of broker fees to mortgage brokers violated the federal Real Estate Settlement Procedures Act. In its July 2, 2007, decision, and based on the test set forth in the Department of Housing and Urban Development's 2001 policy statement on lender payments to mortgage brokers, the court of appeals affirmed summary judgment for Irwin Mortgage because the plaintiffs failed to show that the total compensation Irwin Mortgage paid to the mortgage brokers was unreasonable in light of the services provided. The court of appeals also held that the district court did not abuse its discretion in decertifying the plaintiffs' class because the individualized assessment required in this type of action made class certification inappropriate. We await a decision of the court of appeals on the plaintiffs' petition. We have not established any reserves for this case.

Silke v. Irwin Mortgage Corporation

In April 2003, our indirect subsidiary, Irwin Mortgage Corporation, was named as a defendant in a class action lawsuit filed in the Marion County, Indiana, Superior Court. The complaint alleged that Irwin Mortgage charged a document preparation fee in violation of Indiana law for services performed by clerical personnel in completing legal documents related to mortgage loans. On June 18, 2004, the court certified a plaintiff class and held oral argument on cross-motions for summary judgment on April 30, 2007. On May 2, 2007, the Indiana Supreme Court issued an opinion in another case, *Charter One Mortgage Corporation v. Condra*, which held that the preparation of mortgage documents by non-attorneys does not necessarily constitute the practice of law and that a lender's charging a fee for the preparation does not convert it into the unauthorized practice of law. In light of the *Charter One* decision, the plaintiffs in *Silke* delivered to the trial court their proposed Order on Parties' Cross-Motions for Summary Judgment and Entry of Final Judgment in favor of Irwin Mortgage. We therefore expect the court to dismiss the *Silke* litigation. We have not established any reserves for this case.

Cohens v. Inland Mortgage Corporation

In October 2003, our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation), was named as a defendant, along with others, in an action filed in the Supreme Court of New York, County of Kings. The plaintiffs, a mother and two children, allege they were injured from lead contamination while living in premises allegedly owned by the defendants. The suit seeks approximately \$41 million in damages and alleges negligence, breach of implied warranty of habitability and fitness for intended use, loss of services and the cost of medical treatment. On September 15, 2005, Irwin Mortgage filed an answer and cross-claims seeking dismissal of the complaint. On October 13, 2006, Irwin Mortgage filed a motion for summary judgment. In May 2007, the court disposed of this case due to lack of prosecution by the plaintiffs. We expect the action to be restored, however, based on a motion by plaintiffs on June 28, 2007. We filed an affirmation in support of our motion for summary judgment on July 10, 2007. We have not established any reserves for this case.

Litigation in Connection with Loans Purchased from Community Bank of Northern Virginia

Our subsidiary, Irwin Union Bank and Trust Company, is a defendant in several actions in connection with loans Irwin Union Bank purchased from Community Bank of Northern Virginia (Community).

Hobson v. Irwin Union Bank and Trust Company was filed on July 30, 2004 in the United States District Court for the Northern District of Alabama. As amended on August 30, 2004, the *Hobson* complaint, seeks certification of both a plaintiffs' and a defendants' class, the plaintiffs' class to consist of all persons who obtained loans from Community and whose loans were purchased by Irwin Union Bank. *Hobson* alleges that defendants violated the Truth-in-Lending Act (TILA), the Home Ownership and Equity Protection Act (HOEPA), the Real Estate Settlement Procedures Act (RESPA) and the Racketeer Influenced and Corrupt Organizations Act (RICO). On October 12, 2004, Irwin filed a motion to dismiss the *Hobson* claims as untimely filed and substantively defective.

Kossler v. Community Bank of Northern Virginia was originally filed in July 2002 in the United States District Court for the Western District of Pennsylvania. Irwin Union Bank and Trust was added as a defendant in

December 2004. The *Kossler* complaint seeks certification of a plaintiffs class and seeks to void the mortgage loans as illegal contracts. Plaintiffs also seek recovery against Irwin for alleged RESPA violations and for conversion. On September 9, 2005, the *Kossler* plaintiffs filed a Third Amended Class Action Complaint. On October 21, 2005, Irwin filed a renewed motion seeking to dismiss the *Kossler* action.

Table of Contents

The plaintiffs in *Hobson* and *Kossler* claim that Community was allegedly engaged in a lending arrangement involving the use of its charter by certain third parties who charged high fees that were not representative of the services rendered and not properly disclosed as to the amount or recipient of the fees. The loans in question are allegedly high cost/high interest loans under Section 32 of HOEPA. Plaintiffs also allege illegal kickbacks and fee splitting. In *Hobson*, the plaintiffs allege that Irwin was aware of Community's alleged arrangement when Irwin purchased the loans and that Irwin participated in a RICO enterprise and conspiracy related to the loans. Because Irwin bought the loans from Community, the *Hobson* plaintiffs are alleging that Irwin has assignee liability under HOEPA.

If the *Hobson* and *Kossler* plaintiffs are successful in establishing a class and prevailing at trial, possible RESPA remedies could include treble damages for each service for which there was an unearned fee, kickback or overvalued service. Other possible damages in *Hobson* could include TILA remedies, such as rescission, actual damages, statutory damages not to exceed the lesser of \$500,000 or 1% of the net worth of the creditor, and attorneys' fees and costs; possible HOEPA remedies could include the refunding of all closing costs, finance charges and fees paid by the borrower; RICO remedies could include treble plaintiffs' actually proved damages. In addition, the *Hobson* plaintiffs are seeking unspecified punitive damages. Under TILA, HOEPA, RESPA and RICO, statutory remedies include recovery of attorneys' fees and costs. Other possible damages in *Kossler* could include the refunding of all origination fees paid by the plaintiffs.

Irwin Union Bank and Trust Company is also a defendant, along with Community, in two individual actions (*Chatfield v. Irwin Union Bank and Trust Company, et al.* and *Ransom v. Irwin Union Bank and Trust Company, et al.*) filed on September 9, 2004 in the Circuit Court of Frederick County, Maryland, involving mortgage loans Irwin Union Bank purchased from Community. On July 16, 2004, both of these lawsuits were removed to the United States District Court for the District of Maryland. The complaints allege that the plaintiffs did not receive disclosures required under HOEPA and TILA. The lawsuits also allege violations of Maryland law because the plaintiffs were allegedly charged or contracted for a prepayment penalty fee. Irwin believes the plaintiffs received the required disclosures and that Community, a Virginia-chartered bank, was permitted to charge prepayment fees to Maryland borrowers.

Under the loan purchase agreements between Irwin and Community, Irwin has the right to demand repurchase of the mortgage loans and to seek indemnification from Community for the claims in these lawsuits. On September 17, 2004, Irwin made a demand for indemnification and a defense to *Hobson*, *Chatfield* and *Ransom*. Community denied this request as premature.

In response to a motion by Irwin, the Judicial Panel On Multidistrict Litigation consolidated *Hobson*, *Chatfield* and *Ransom* with *Kossler* in the Western District of Pennsylvania for all pretrial proceedings. The Pennsylvania District Court had been handling another case seeking class action status, *Kessler v. RFC, et al.*, also involving Community and with facts similar to those alleged in the Irwin consolidated cases. The *Kessler* case had been settled, but the settlement was appealed and set aside on procedural grounds. Subsequently, the parties in *Kessler* filed a motion for approval of a modified settlement, which would provide additional relief to the settlement class. Irwin is not a party to the *Kessler* action, but the resolution of issues in *Kessler* may have an impact on the Irwin cases. The Pennsylvania District Court has effectively stayed action on the Irwin cases until issues in the *Kessler* case are resolved. On July 5, 2007, the *Amicus Curiae* (Friend of the Court) appointed by the Pennsylvania District Court to evaluate the fairness of the modified *Kessler* settlement issued his Advisory Opinion, which found the proposed modified *Kessler* settlement to be fair and reasonable. We have established a reserve for the Community litigation based upon SFAS 5 guidance and the advice of legal counsel.

Putkowski v. Irwin Home Equity Corporation and Irwin Union Bank and Trust Company

On August 12, 2005, our indirect subsidiary, Irwin Home Equity Corporation, and our direct subsidiary, Irwin Union Bank and Trust Company (collectively, Irwin), were named as defendants in litigation seeking class action status in the United States District Court for the Northern District of California for alleged violations of the Fair Credit Reporting Act. In response to Irwin's motion to dismiss filed on October 18, 2005, the court dismissed the plaintiffs' complaint with prejudice on March 23, 2006. Plaintiffs filed an appeal in the U.S. Court of Appeals for the 9th Circuit on April 13, 2006. We have not established any reserves for this case.

White v. Irwin Union Bank and Trust Company and Irwin Home Equity Corporation

On January 5, 2006, our direct subsidiary, Irwin Union Bank and Trust Company, and our indirect subsidiary, Irwin Home Equity Corporation, (collectively, Irwin) were named as defendants in litigation in the Circuit Court for Baltimore City, Maryland. The plaintiffs alleged that Irwin charged or caused plaintiffs to pay certain fees, costs and other charges that were excessive or illegal under Maryland law in connection with loans made to plaintiffs by Irwin. The plaintiffs sought certification of a class consisting of Maryland residents who received mortgage loans from Irwin secured by real property in the State of Maryland and who claimed injury due to Irwin s lending practices. On April 24, 2006, the plaintiffs initiated an arbitration with the American Arbitration Association (*White v. Irwin Union Bank & Trust, et al.*)

Table of Contents

on behalf of the same proposed class of persons. On August 11, 2006, the court dismissed the lawsuit and compelled arbitration of the claims asserted on behalf of the class. On October 13, 2006, the parties tentatively agreed to settle this matter solely on behalf of the individual plaintiffs for a nonmaterial amount. The settlement agreement was approved by the arbitrator, and the American Arbitration Association arbitration was dismissed with prejudice, effective June 6, 2007, thus concluding this matter.

We and our subsidiaries are from time to time engaged in various matters of litigation, including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position or results of operations, except as described above. Reserves are established for these various matters of litigation, when appropriate under SFAS 5, based in part upon the advice of legal counsel.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations. About Forward-looking Statements

You should read the following discussion in conjunction with our consolidated financial statements, footnotes, and tables. This discussion and other sections of this report contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995. We are including this statement for purposes of invoking these safe harbor provisions.

Forward-looking statements are based on management's expectations, estimates, projections, and assumptions. These statements involve inherent risks and uncertainties that are difficult to predict and are not guarantees of future performance. In addition, our past results of operations do not necessarily indicate our future results. Words that convey our beliefs, views, expectations, assumptions, estimates, forecasts, outlook and projections or similar language, or that indicate events we believe could, would, should, may or will occur (or might not occur) or are likely (or unlikely) to occur, and similar expressions, are intended to identify forward-looking statements. These may include, among other things, statements and assumptions about:

- our projected revenues, earnings or earnings per share, as well as management's short-term and long-term performance goals;

- projected trends or potential changes in our asset quality, loan delinquencies, charge-offs, reserves, asset valuations, capital ratios or financial performance measures;

- our plans and strategies, including the expected results or costs and impact of implementing or changing such plans and strategies;

- potential litigation developments and the anticipated impact of potential outcomes of pending legal matters;

- the anticipated effects on results of operations or financial condition from recent developments or events; and

- any other projections or expressions that are not historical facts.

We qualify any forward-looking statements entirely by these cautionary factors.

Actual future results may differ materially from what is projected due to a variety of factors, including, but not limited to:

- potential changes in direction, volatility and relative movement (basis risk) of interest rates, which may affect consumer demand for our products and the management and success of our interest rate risk management

strategies;

competition from other financial service providers for experienced managers as well as for customers;

19

Table of Contents

staffing fluctuations in response to product demand or the implementation of corporate strategies that affect our work force;

the relative profitability of our lending operations;

the valuation and management of our portfolios, including the use of external and internal modeling assumptions we embed in the valuation of those portfolios and short-term swings in the valuation of such portfolios;

borrowers' refinancing opportunities, which may affect the prepayment assumptions used in our valuation estimates and which may affect loan demand;

unanticipated deterioration in the credit quality or collectibility of our loan and lease assets, including deterioration resulting from the effects of natural disasters;

unanticipated deterioration or changes in estimates of the carrying value of our other assets, including securities;

difficulties in delivering products to the secondary market as planned;

difficulties in expanding our businesses and obtaining funding sources as needed;

changes in the value of our lines of business, subsidiaries, or companies in which we invest;

changes in variable compensation plans related to the performance and valuation of lines of business where we tie compensation systems to line-of-business performance;

unanticipated outcomes in litigation;

legislative or regulatory changes, including changes in laws, rules or regulations that affect tax, consumer or commercial lending, corporate governance and disclosure requirements, and other laws, rules or regulations affecting the rights and responsibilities of our Corporation, bank or thrift;

regulatory actions that impact our Corporation, bank or thrift, including the memorandum of understanding entered into as of March 1, 2007 between Irwin Union Bank and Trust and the Federal Reserve Bank of Chicago;

changes in the interpretation of regulatory capital or other rules;

the availability of resources to address changes in laws, rules or regulations or to respond to regulatory actions;

changes in applicable accounting policies or principles or their application to our business or final audit adjustments, including additional guidance and interpretation on accounting issues and details of the implementation of new accounting methods;

the final disposition of our remaining assets and obligations of our discontinued mortgage banking segment; or

governmental changes in monetary or fiscal policies.

We undertake no obligation to update publicly any of these statements in light of future events, except as required in subsequent reports we file with the Securities and Exchange Commission (SEC).

Strategy

Our strategy is to create competitive advantage within the banking industry by serving niche markets of small businesses and consumers. Our strategic objective is to create value through well-controlled, profitable growth by: i) focusing on meeting customer needs rather than simply offering banking products or services, ii) being cost-efficient in our delivery, and iii) having strong risk management systems. We believe we must continually balance these three factors in order to deliver long-term value to all of our stakeholders.

Table of Contents

We have developed several tactics to meet these goals:

1. *Identify market niches.* We focus on product or market niches in banking where our understanding of customer needs and ability to meet them creates added value that permits us not to have to compete primarily on price. We do not believe it is necessary to be the largest or leading market share company in any of our product lines to earn an adequate risk-adjusted return, but we do believe it is important that we are viewed as a preferred provider in niche segments of those product offerings.

2. *Attract, develop and retain exceptional management with niche expertise.* We participate in lines of business only when we have attracted senior managers who have proven track records in the niche for which they are responsible. Our structure allows managers to focus their efforts on understanding their customers, meeting the needs of the markets they serve cost effectively, and identifying and controlling the risks inherent in their activities. This structure also promotes accountability among managers of each segment. We attempt to create a mix of short-term and long-term rewards that provide these managers with the incentive to achieve well-controlled, profitable growth over the long term.

3. *Diversify capital and earnings risk.* We diversify our revenues, credit risk, and application of capital across complementary lines of business and across different regions as a key part of our risk management. For example, the customers of our commercial bank have different growth and risk profiles in the Midwest and West. These markets perform differently due to differences in local economies, affecting both demand and credit quality of our products. Our home equity segment lends to consumers on a national basis, building a diversified portfolio where demand and credit quality fluctuate depending, in part, on local market conditions. Our customers' credit needs are cyclical, but when combined in an appropriate mix, we believe they provide sources of diversification and opportunities for growth in a variety of economic conditions.

4. *Focus on organic growth.* We primarily focus on growth through organic expansion of existing lines of business as we believe this approach often provides a better risk/return profile. Over the past ten years, we have made only a few acquisitions. Those have typically not been in competitive bidding situations.

5. *Identify opportunities for coordination and efficiencies across the Bank.* We have recently increased our attention to the identification of areas in which we can better coordinate and consolidate non-customer facing operations within our segments. Our objective is to improve risk management and operating efficiency without diminishing our ability to provide a high level of service to our customers. Our efforts to date have focused on the centralization of certain risk management functions, as well as improvements in information technologies and procurement through shared services.

6. *Create and maintain risk management systems appropriate to our size, scale and scope.* Increasingly, banks of all sizes have seen the need to enhance their risk management systems. These systems are an integral part of a well-managed banking organization and are as important to our future success as hiring good people and offering products and services in attractive niches. We are engaged in a multiyear process of enhancing our management depth and systems for assuring that we operate our businesses within the risk appetite established by our board of directors. The system we are creating provides centralized guidance and support from staff with demonstrated risk management expertise, who provide an independent perspective assessing and assisting the risk management processes and systems that are an integral part of each of our managers' responsibilities.

We believe long-term growth and profitability will result from our endeavors to serve attractive niches within commercial and consumer banking, our experienced management, our diverse products and geographic markets, and our focus on risk management systems.

Critical Accounting Policies

Accounting estimates are an integral part of our financial statements and are based upon our current judgments. Certain accounting estimates are particularly sensitive because of their significance to the financial statements and because of the possibility that future events affecting them may differ from our current judgments or that our use of different assumptions could result in materially different estimates. Our Annual Report on Form 10-K for the year ended 2006 provides a description of the critical accounting policies we apply to material financial statement items, all of which require the use of accounting estimates and/or judgment.

Table of Contents*Consolidated Overview*

As discussed below, the financial statements, footnotes, schedules and discussion within this report have been reformatted to conform to the presentation required for discontinued operations pursuant to our sale of our mortgage banking line of business.

	For the Three Months Ended June 30,			For the Six Months Ended June 30,		
	2007	2006	% Change	2007	2006	% Change
Net income (loss) from continuing operations (in thousands)	\$5,471	\$8,969	(39.0%)	\$ (623)	\$17,659	NM
Net (loss) income including discontinued operations (in thousands)	(389)	2,871	NM	(10,518)	1,013	NM
Basic earnings per share from continuing operations	0.18	0.30	(40.0%)	(0.04)	0.60	NM
Basic earnings per share including discontinued operations	(0.02)	0.10	NM	(0.38)	0.03	NM
Diluted earnings per share from continuing operations	0.17	0.30	(43.3%)	(0.06)	0.59	NM
Diluted earnings per share including discontinued operations	(0.03)	0.09	NM	(0.39)	0.03	NM
Return on average equity from continuing operations	4.3%	6.7%		(0.2)%	4.5%	
Return on average assets from continuing operations	0.4%	0.5%		0.0%	0.4%	

Consolidated Income Statement Analysis*Net Income from Continuing Operations*

We recorded net income from continuing operations of \$5.5 million for the three months ended June 30, 2007, down from net income from continuing operations of \$9.0 million for the three months ended June 30, 2006. Net income per share (diluted) was \$0.17 for the quarter ended June 30, 2007, down from \$0.30 per share for the second quarter of 2006. Return on equity was 4.3% for the three months ended June 30, 2007 and 6.7% for the same period in 2006. For the year to date, we recorded a net loss from continuing operations of \$0.6 million or \$(0.06) per diluted share compared to net income of \$17.7 million or \$0.59 per share in 2006. Return on equity for continuing operations for the six-month period ended June 30, 2007 was (0.2)% compared with 4.5% during the same period a year earlier.

Our consolidated performance in the first half of 2007 was negatively affected primarily by three factors: i) a loss in the home equity segment principally as a result of a disruption in the secondary markets, ii) an impaired commercial credit during the first quarter, and iii) slow loan and deposit growth in commercial banking. The disruption in the consumer mortgage market has been more significant than most observers had predicted and there are now fewer buyers for non-conforming mortgage products. Secondly, we determined that a large loan in Michigan was impaired due to apparent misrepresentations about collateral by the borrower discovered during the first quarter of 2007. This appears to have been an isolated event. The slowing of growth in the commercial banking segment is

attributable to a combination of decreased demand and some turn-over in our local market leadership of established branches, primarily in the Midwest.

Net Interest Income from Continuing Operations

Net interest income from continuing operations for the six months ended June 30, 2007 totaled \$132 million, up 5% from the first half of 2006 net interest income of \$125 million. Net interest margin for the six months ended June 30, 2007 was 4.58%, down slightly compared to 4.61% for the same period in 2006.

Table of Contents

The following table shows our daily average consolidated balance sheet, interest rates and yield at the dates indicated:

	For the Six Months Ended June 30,					
	2007			2006

(1) For purposes of these computations, nonaccrual loans are included in daily average loan amounts outstanding.

Table of Contents*Provision for Loan and Lease Losses from Continuing Operations*

The consolidated provision for loan and lease losses for the three months ended June 30, 2007 was \$19 million, compared to \$7 million for the same period in 2006. Year to date, the provision for 2007 was \$43 million, compared to \$16 million for the same period in 2006. More information on this subject is contained in the section on credit risk.

Noninterest Income from Continuing Operations

Noninterest income during the three months ended June 30, 2007 totaled \$10 million, compared to \$9 million for the same period of 2006. Noninterest income of \$9 million was recorded for the six months ended June 30, 2007 and \$23 million for the same period in 2006. The decrease in 2007 versus 2006 related primarily to the home equity line of business where there were higher valuation adjustments on loans held for sale, lower servicing revenues, and lower derivative gains. Details related to these fluctuations are discussed later in the home equity lending section of this document.

Noninterest Expense from Continuing Operations

Noninterest expenses for the three and six months ended June 30, 2007 totaled \$47 million and \$99 million, respectively, compared to \$51 million and \$104 million for the same periods in 2006. The decrease in consolidated noninterest expense in 2007 is primarily due to decreases in the home equity line of business variable compensation costs. Details related to these fluctuations are discussed later in the home equity lending section of this document.

Income Tax Provision from Continuing Operations

Income tax provision for the three months ended June 30, 2007 totaled \$3.4 million and income tax benefit totaled \$0.6 million, for the six months ended June 30, 2007, compared to tax provision of \$5.8 million and \$10.7 million during the same periods in 2006.

Consolidated Balance Sheet Analysis

Total assets at June 30, 2007 were \$6.1 billion, down 2% from December 31, 2006. Average assets for the first six months of 2007 were \$6.1 billion, down 7% from the average assets for the year ended December 31, 2006. The decline in the consolidated average balance sheet reflects the sale of the majority of the mortgage banking line of business assets. At June 30, 2007, \$27 million of assets from our mortgage banking segment were classified as assets held for sale on our balance sheet pending the planned sale of these assets.

Investment Securities

The following table shows the composition of our investment securities at the dates indicated:

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
U.S. Treasury and government obligations	\$ 13,245	\$ 13,730
Obligations of states and political subdivisions	3,436	3,545
Mortgage-backed securities	48,189	45,187
Other	77,443	65,968
Total	\$ 142,313	\$ 128,430

Loans Held For Sale

Loans held for sale totaled \$27 million at June 30, 2007, a decrease from a balance of \$238 million at December 31, 2006. The reduction occurred primarily at our home equity line of business where we reclassified \$167 million of mortgage loans held for sale to held for investment during the first quarter reflecting our decision not to sell into weak secondary market conditions. Details related to this reclassification are discussed later in the home equity lending section of this document.

Table of Contents*Loans and Leases*

Our commercial loans and leases are originated throughout the United States and Canada. At June 30, 2007, 93% of our loan and lease portfolio was associated with our U.S. operations. We also extend credit to consumers throughout the United States through mortgages, installment loans and revolving credit arrangements. Loans by major category for the periods presented were as follows:

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
Commercial, financial and agricultural	\$2,291,303	\$2,249,988
Residential real estate-construction	337,156	377,601
Residential real estate-mortgage	1,698,084	1,522,616

Allowance for Loans and Lease Losses

Changes in the allowance for loan and lease losses are summarized below:

	June 30, 2007 And the Six Months Then Ended	December 31, 2006 And the Year Then Ended
	(Dollars in thousands)	
Balance at beginning of year	\$ 74,468	\$ 59,223
Provision for loan and lease losses	42,662	35,101
Charge-offs	(29,837)	(30,810)
Recoveries	5,326	11,208
Reduction due to reclassification or sale of loans	(796)	(246)
Foreign currency adjustment	317	(8)
Balance at end of period	\$ 92,140	\$ 74,468

Deposits

Total deposits for the first half of 2007 averaged \$3.4 billion compared to deposits for the year 2006 that averaged \$4.0 billion. Demand deposits for the first half of 2007 averaged \$0.3 billion, a 55% decrease over the average balance for the year 2006. Demand deposits totaling \$0.4 billion in 2006 related to deposits at Irwin Union Bank and Trust Company (IUBT) which were associated with escrow accounts held on loans in the servicing portfolio at the discontinued mortgage banking line of business. These escrow accounts were transferred out of IUBT in early 2007 in connection with the transfer of mortgage servicing rights at the mortgage banking line of business.

Irwin Union Bank and Trust utilizes institutional broker-sourced deposits as funding to supplement deposits solicited through branches and other wholesale funding sources. At June 30, 2007, institutional broker-sourced deposits totaled \$0.5 billion, unchanged from December 31, 2006.

Short-Term Borrowings

Short-term borrowings during the first half of 2007 averaged \$634 million compared to an average of \$544 million for the year 2006. Short-term borrowings totaled \$613 million at June 30, 2007, compared to \$602 million at December 31, 2006. The increase in

Table of Contents

average short-term borrowings during the first half of 2007 compared to 2006 reflects declining deposit balances during the first half of 2007. Proceeds from this financing were used to pay down short-term borrowings.

Federal Home Loan Bank borrowings averaged \$483 million for the six months ended June 30, 2007, with an average rate of 5.11%. At June 30, 2007 the balance was \$490 million at an interest rate of 5.14%. The maximum outstanding during any month end during the first six months of 2007 was \$565 million. Federal Home Loan Bank borrowings averaged \$322 million for the year ended December 31, 2006, with an average rate of 4.9%. The balance at December 31, 2006 was \$372 million at an interest rate of 5.02%. The maximum outstanding during any month end during 2006 was \$609 million.

Collateralized and Other Long-Term Debt

Collateralized debt totaled \$1.3 billion at June 30, 2007, compared to \$1.2 billion at December 31, 2006. The bulk of these borrowings resulted from securitization of portfolio loans at the home equity lending line of business that results in loans remaining as assets and debt being recorded on the balance sheet. The securitization debt represents match-term funding for these loans.

Other long-term debt totaled \$234 million at June 30, 2007 and December 31, 2006. We have obligations represented by subordinated debentures totaling \$204 million with our wholly-owned trusts that were created for the purpose of issuing these securities. The subordinated debentures were the sole assets of the trusts at June 30, 2007. In accordance with FASB Interpretation No. 46 (FIN 46), Consolidation of Variable Interest Entities (revised December 2004), we deconsolidate the wholly-owned trusts that issued the trust preferred securities. As a result, these securities are no longer consolidated on our balance sheet. Instead, the subordinated debentures held by the trusts are disclosed on the balance sheet as other long-term debt.

Capital

Shareholders' equity averaged \$520 million during the first six months of 2007, down 1% compared to the average for the year 2006. Shareholders' equity balance of \$508 million at June 30, 2007 represented \$16.90 per common share, compared to \$17.30 per common share at December 31, 2006. We paid \$3.5 million and \$7.0 million in dividends for the three and six months ended June 30, 2007, respectively, reflecting an increase of \$0.01 and \$0.02 per share, respectively, compared to a year ago. We also paid \$0.3 million and \$0.7 million for the three and six months ended June 30, 2007, respectively, in preferred dividends on our noncumulative perpetual preferred stock.

The following table sets forth our capital and regulatory capital ratios at the dates indicated:

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
Tier 1 capital	\$ 680,781	\$ 712,403
Tier 2 capital	134,184	125,351
Total risk-based capital	\$ 814,965	\$ 837,754
Risk-weighted assets	\$ 6,113,756	\$ 6,258,927
Risk-based ratios:		
Tier 1 capital	11.1%	11.4%
Total capital	13.3	13.4
Tier 1 leverage ratio	11.1	11.5
Ending shareholders' equity to assets	8.3	8.5
Average shareholders' equity to assets	8.5	8.1

At June 30, 2007, our total risk-adjusted capital ratio was 13.3% exceeding our Policy internal minimum of 11.0% (we manage to a higher Policy minimum, 12.0%, at our principal subsidiary, Irwin Union Bank and Trust.). At December 31, 2006, our total risk-adjusted capital ratio was also 13.4%. Our ending equity to assets ratio at June 30, 2007 was 8.3% compared to 8.5% at December 31, 2006. Our Tier 1 capital totaled \$681 million as of June 30, 2007,

or 11.1% of risk-weighted assets.

Retained earnings increased by \$1.7 million during 2007 reflecting the impact of our adoption of FAS 156 related to accounting for mortgage servicing rights. In accordance with this pronouncement, we recorded as an increase to retained earnings a \$1.7 million one time (tax-affected) cumulative adjustment on January 1, 2007.

Table of Contents

Cash Flow Analysis

Our cash and cash equivalents decreased \$66 million during the first six months of 2007, compared to a decrease of \$0.8 million during the same period in 2006. Cash flows from operating activities provided \$154 million in cash and cash equivalents in the six months ended June 30, 2007 compared to the same period in 2006 when our operations provided \$548 million in cash and cash equivalents. In the first half of 2007, accounts receivable decreased \$138 million which increased cash provided by operating activities during that period.

Earnings Outlook

We do not provide specific earnings guidance. Our strategy is to seek opportunities for well-controlled, profitable growth by serving niche markets while attempting to mitigate the impact of changes in interest rates and economic conditions on our credit retained portfolios. Although at present we are not meeting our targets, we believe this strategy can, over time, provide above market growth rates in earnings per share and return on equity. Prior to 2005, a meaningful amount of our earnings, in many years, came from our conforming conventional first mortgage segment. We decided to exit this line of business in 2006. Opportunities in our remaining three segments continue to grow across the U.S. and, in our commercial finance segment, also in Canada. We believe this growth will contribute in a meaningful way to the Corporation's future success.

Home equity is currently performing at an unacceptable level. The segment provides credit and geographic diversification for commercial portfolios. If we are able to return it to acceptable financial performance, we believe in the long run it can generate excess capital to grow the commercial segments. Achieving this strategic intent is proving quite difficult in the short term as we are in the midst of making significant structural changes in this segment in the face of an external market environment undergoing extensive disruption resulting from increased losses in the subprime mortgage industry. This disruption in the subprime industry has spilled over into the broader mortgage market in which we participate. If our initiatives are successful and the external market environment normalizes, we believe that this segment can achieve both our financial goals of double digit earnings growth and a return in excess of the cost of capital.

Our consolidated performance in the first half of 2007 was negatively affected by three factors: a loss in the home equity segment as a result of a disruption in the secondary markets and increased loan losses, an impaired commercial credit, and slow loan and deposit growth in commercial banking. The disruption in the consumer mortgage market has been more significant than most observers had predicted and there are now fewer buyers for non-conforming mortgage products. We believe, however, that over time liquidity will be restored for non-conforming mortgages with prime or near-prime credit risk. Secondly, in the first quarter, we determined that a large loan in Michigan was impaired due to apparent misrepresentations about collateral by the borrower discovered during the first quarter of 2007. This appears to have been an isolated event. We have taken steps to retrain on best practices in collateral review procedures and have embarked on an extensive review of all material commercial credits in Michigan by our credit risk management staff. We intend to push our improved practices throughout our origination systems. Finally, we believe the slowing of growth in the commercial banking segment is attributable to a combination of decreased demand and some turn-over in our local market leadership of established branches primarily in the Midwest. We have continued to experience good growth in our newer markets in the West and we have put in place new processes which we believe will enhance growth in coming quarters.

As discussed in Note 2 to the Financial Statements, we are reporting the results of our mortgage banking business as discontinued operations. Weak secondary market conditions have prolonged the wind-down and increased disposition costs of the discontinued mortgage operations more than originally anticipated. We have suffered discontinued operations losses in each quarter since selling the segment. The majority of our current losses relate to credit costs for alleged breaches of representations and warranties made when loans were sold to the secondary market, prior to the sale of the segment in 2006. Management expects to report modest losses from Discontinued Operations in each of the remaining quarters of 2007. The amount of the loss is most likely to be affected by future economic deterioration, repurchase demands and results of disposition in the secondary market, which are hard to predict. We believe the bulk of the remaining disposition activities other than those associated with repurchase demands will be completed by year-end.

Earnings by Line of Business

Irwin Financial Corporation is composed of three principal lines of business:

Commercial Banking

Table of Contents

Commercial Finance

Home Equity Lending

The following table summarizes our net income (loss) by line of business for the periods indicated:

Table of Contents*Overview*

Our commercial banking line of business focuses on providing credit, cash management and personal banking products to small businesses and business owners. We offer commercial banking services through our banking subsidiaries, Irwin Union Bank and Trust Company, an Indiana state-chartered commercial bank, and Irwin Union Bank, F.S.B., a federal savings bank.

The following tables show the geographic composition of our commercial banking loans and our core deposits:

Markets	June 30, 2007			December 31, 2006		
	Loans Outstanding	Percent of Total	Weighted Average Coupon (Dollars in thousands)	Loans Outstanding	Percent of Total	Weighted Average Coupon
Indianapolis Western and Central	\$ 530,635	18.4%	7.5%	\$ 561,343	19.3%	7.6%

Las Vegas	455,414	18.7%	4.5	467,708	19.5	4.1
Other	507,983	20.8%	3.7	631,268	26.2	3.5
Total	\$2,437,422	100.0%	3.7%	\$2,400,039	100.0%	3.3%

Net Income

Commercial banking net income totaled \$6.3 million during the second quarter of 2007 compared to \$7.9 million for the same period in 2006. Year-to-date net income totaled \$9.5 million in 2007 compared to net income of \$14.6 million in 2006.

Net Interest Income

The following table shows information about net interest income for our commercial banking line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
Net interest income	\$ 29,892	\$ 31,411	\$ 59,478	\$ 61,273

Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

Average interest earning assets	3,104,600	3,164,181	3,055,570	3,102,229
Net interest margin	3.86%	3.98%	3.93%	3.98%

Net interest income was \$30 million for the second quarter of 2007, a decrease of 5% over second quarter of 2006. Net interest income year to date in 2007 also decreased 3% over the same period in 2006. The 2007 decline in net interest income resulted primarily from a decrease in our commercial banking interest earning assets. Net interest margin is computed by dividing net interest income by average interest earning assets. Net interest margin for the three months ended June 30, 2007 was 3.86%, compared to 3.98% for the same period in 2006. Year-to-date net interest margin for 2007 was 3.93%, compared to 3.98% for 2006. The decrease in 2007 margin reflects competitive conditions and unfavorable repricing of loans and deposits.

Table of Contents*Provision for Loan and Lease Losses*

Provision for loan and lease losses increased to \$5.4 million during the first half of 2007, compared to a provision of \$2.8 million during the same period in 2006. The increased provision relates primarily to a loss identified in the first quarter related to a commercial credit in Michigan. With respect to this credit, we believe the borrower will be unable to repay the majority of the loan as we discovered what we believe were misrepresentations about collateral offered for the loan. As such, we took a charge-off of \$4.1 million related specifically to this loan during the first quarter. With the exception of this loan, credit quality at the commercial banking line of business declined modestly during the first half of the year, but is still consistent with our historic experiences. The provision in the second quarter of 2007 was \$0.8 million compared to \$1.3 million a year earlier See further discussion in the Credit Quality section below.

Noninterest Income

The following table shows the components of noninterest income for our commercial banking line of business:

	Three Months Ended June		Six Months Ended June	
	30,	30,	30,	30,
	2007	2006	2007	2006
	(Dollars in thousands)			
Trust fees	\$ 540	\$ 478	\$ 1,114	\$ 979
Service charges on deposit accounts	926	1,102	1,794	2,061
Insurance commissions, fees and premiums	436	509	1,021	1,158
Gain from sales of loans	560	582	1,016	1,011
Loan servicing fees	366	377	750	763
Amortization of servicing assets	(290)	(293)	(569)	(534)
Brokerage fees	398	362	750	660
Other	1,252	1,476	2,259	2,764
Total noninterest income	\$ 4,188	\$ 4,593	\$ 8,135	\$ 8,862

Noninterest income during the three and six months ended June 30, 2007 decreased 9% and 8%, respectively, over the same periods in 2006. This decline relates primarily to lower service charges on deposit accounts and to a loss on sale of other real estate owned (OREO) during the first half of 2007.

Operating Expenses

The following table shows the components of operating expenses for our commercial banking line of business:

	Three Months Ended June		Six Months Ended June	
	30,	30,	30,	30,
	2007	2006	2007	2006
	(Dollars in thousands)			
Salaries and employee benefits	\$ 12,917	\$ 13,280	\$ 27,269	\$ 26,767
Other expenses	10,006	8,305	19,945	16,289
Total operating expenses	\$ 22,923	\$ 21,585	\$ 47,214	\$ 43,056
Efficiency ratio	67.3%	60.0%	69.8%	61.4%
Number of employees at period end ⁽¹⁾			588	585

(1) On a full time equivalent basis.

Operating expenses for the three and six months ended June 30, 2007 totaled \$23 million and \$47 million, respectively, an increase of 6% and 10% over the same periods in 2006. The increase in operating expenses is primarily due to increased premises and equipment costs due to our recent office expansions and support staff.

Balance Sheet

Total assets at June 30, 2007 were \$3.1 billion, unchanged from December 31, 2006. Earning assets for the six months ended June 30, 2007 averaged \$3.1 billion, unchanged from the same period in 2006. Average core deposits for the second quarter of 2007 totaled \$2.4 billion, an increase of 3% over average core deposits in the first quarter 2007.

Table of Contents*Credit Quality*

The allowance for loan losses to total loans is 0.92% at June 30, 2007, down slightly from 0.93% at December 31, 2006. Total nonperforming assets were \$17 million at June 30, 2007, a decrease of \$1.9 million versus year end 2006. Other real estate owned was \$5.7 million at June 30, an increase of \$1.3 million compared to the year-end 2006 balance. Nonperforming loans are not significantly concentrated in any industry category, although a greater than average amount of our nonperforming loans are located in our Michigan markets. The increase in year-to-date charge-offs and increase in year-to-date provision for loan losses relate primarily to a single commercial credit in the Michigan market that was charged off in the first quarter of 2007. The following table shows information about our nonperforming assets in this line of business and our allowance for loan losses.

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
Nonperforming loans	\$ 11,323	\$ 14,455
Other real estate owned	5,683	4,423
Total nonperforming assets	\$ 17,006	\$ 18,878
Nonperforming assets to total assets	0.55%	0.61%
Allowance for loan losses	\$ 26,476	\$ 27,113
Allowance for loan losses to total loans	0.92%	0.93%

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Provision for loan losses	\$ 800	\$ 1,337	\$ 5,441	\$ 2,813
Net charge-offs	1,252	715	6,079	1,307
Net charge-offs to average loans	0.14%	0.10%	0.42%	0.10%

The following table shows the ratio of nonperforming assets to total loans by market for the periods indicated:

	Markets	June 30, 2007	December 31, 2006
Indianapolis		0.27%	0.24%
Western and Central Michigan		2.42%	2.72%
Southern Indiana		0.18%	0.14%
Phoenix		0.36%	0.52%
Las Vegas		0.00%	0.00%
Other		0.19%	0.06%
Total		0.59%	0.65%

Overview

We established this line of business in 1999. We offer commercial finance products and services through a direct subsidiary of our banking subsidiary, Irwin Union Bank and Trust, an Indiana state-chartered commercial bank and its direct and indirect subsidiaries. In this segment, we provide small ticket, primarily full payout lease financing on a variety of small business equipment in the United States and Canada as well as equipment and leasehold improvement financing for franchisees (mainly in the quick service restaurant sector) in the United States. In 2006, we expanded our product line to include professional practice financing and information technology leasing to middle and upper middle market companies throughout the United States and Canada.

We provide cost-competitive, service-oriented financing alternatives to small businesses generally and to franchisees. We utilize direct and indirect sales forces to distribute our products. In the small ticket lease channel, with an average lease size of approximately \$30 thousand in our portfolio, our sales efforts focus on providing lease solutions for vendors and manufacturers. The majority of our leases are full payout (no residual), small-ticket assets secured by commercial equipment. We finance a variety of commercial, light industrial and office equipment types and limit the concentrations in our loan and lease portfolios. Within the franchise channel, the financing of equipment

and real estate is structured as loans and the loan amounts average approximately \$500 thousand.

Table of Contents*Portfolio Characteristics*

(1) In U.S. dollars.

Net Income

During the three months ended June 30, 2007, the commercial finance line of business recorded net income of \$2.9 million, relatively unchanged from the same period in the prior year. Year to date, the commercial finance line of business earned \$5.5 million compared to \$5.8 million for the same period in the prior year. The 2007 year-to-date decline in earnings is attributable primarily to higher loan loss provision related to our domestic small ticket leasing business as well as higher compensation and related expenses.

Table of Contents*Net Interest Income*

The following table shows information about net interest income for our commercial finance line of business:

	Three Months June 30,		Six Months June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Net interest income	\$ 12,923	\$ 10,107	\$ 24,931	\$ 19,799
Average interest earning assets	1,104,098	900,148	1,077,182	870,866
Net interest margin	4.69%	4.50%	4.67%	4.58%

Net interest income was \$13 million for the quarter ended June 30, 2007, an increase of 28% over 2006. Year to date net interest income was \$25 million, compared to \$20 million in 2006. The improvement in net interest income resulted primarily from an increase in our portfolio. The total loan and lease portfolio has increased to \$1.2 billion at June 30, 2007, an increase of 10% over year-end 2006 and an increase of 22% over June 30, 2006. This line of business originated \$175 million and \$303 million in loans and leases during the second quarter and year-to-date 2007, respectively, compared to \$164 million and \$284 million during the same periods of 2006.

Net interest margin is computed by dividing net interest income by average interest earning assets. Net interest margin for the second quarter of 2007 was 4.69% compared to 4.50% in 2006 for the same period. Year-to-date margins improved to 4.67% in 2007 compared to 4.58% during the same period in 2006. The increase in 2007 margin is due primarily to higher loan fees.

Provision for Loan and Lease Losses

The provision for loan and lease losses increased to \$6.5 million during the first six months in 2007 compared to \$2.9 million for the same period in 2006. The increased provisioning levels relate primarily to losses identified in the domestic small ticket leasing component of the commercial finance portfolio.

Noninterest Income

The following table shows the components of noninterest income for our commercial finance line of business:

	Three Months		Six Months Ended June	
	Ended June 30,		30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Gain from sales of loans	\$ 1,466	\$ 498	\$ 3,037	\$ 1,252
Derivative losses, net	(258)	(165)	(274)	(218)
Other	1,739	1,666	2,975	3,115
Total noninterest income	\$ 2,947	\$ 1,999	\$ 5,738	\$ 4,149

Noninterest income during the three months ended June 30, 2007 increased 47% over the same period in 2006. Year to date, noninterest income was \$5.7 million, compared to \$4.1 million in the same period of 2006. Included in noninterest income were gains that totaled \$0.3 million and \$1.8 million for the three and six months ended June 30, from sales of \$6 million and \$33 million in loans, respectively, compared to gains of \$0.5 million and \$1.3 million during the same periods in 2006. In addition to whole loan sales, we also sold \$39 million in participations of our franchise loan portfolio during the first half of 2007 resulting in a gain of \$1.2 million.

Table of Contents*Operating Expenses*

The following table shows the components of operating expenses for our commercial finance line of business:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Salaries and employee benefits	\$ 4,529	\$ 3,055	\$ 9,111	\$ 6,581
Other	3,405	2,655	5,958	5,067
Total operating expenses	\$ 7,934	\$ 5,710	\$ 15,069	\$ 11,648
Efficiency ratio	50.00%	47.20%	49.10%	48.65%
Number of employees at period end ⁽¹⁾			217	195

(1) On a full time equivalent basis.

Operating expenses during the second quarter and first half of 2007 totaled \$7.9 million and \$15.1 million, respectively, an increase of 39% and 29% over the same periods in 2006. The increased salaries and benefits expense relates to the continued growth in this business, including compensation costs related to higher production levels, infrastructure and staffing development, as well as incentive compensation costs related to profitability.

Credit Quality

The commercial finance line of business had nonperforming loans and leases at June 30, 2007 of \$5.8 million, compared to \$5.4 million as of December 31, 2006. Net charge-offs recorded by this line of business totaled \$2.1 million for the second quarter of 2007, compared to \$0.9 million for the second quarter of 2006. Net charge-offs year to date were \$4.0 million, up from the \$1.6 million net charge-offs recorded in the first half of 2006. Our allowance for loan and lease losses at June 30, 2007 totaled \$15.5 million, representing 1.34% of loans and leases, compared to a balance at December 31, 2006 of \$13.5 million, or 1.28% of loans and leases.

The following table shows information about our nonperforming loans and leases in this line of business and our allowance for loan and lease losses:

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
Nonperforming loans	\$ 5,773	\$ 5,374

- (2) Nonaccrual loans are included in the delinquency ratio.

Overview

Our home equity lending line of business originates, purchases, sells, and services a variety of mortgage loans nationwide. We offer mortgage products through our banking subsidiary, Irwin Union Bank and Trust, an Indiana state-chartered commercial bank and its direct subsidiary. We market our mortgage loans (generally using second mortgage liens, but also including first mortgage liens) principally through brokers and correspondents, but also through the Internet. We seek to serve creditworthy homeowners who are active credit users.

We offer mortgage loans with combined loan-to-value (CLTV) ratios of up to 125% of their collateral value to borrowers we believe have prime credit-quality. Mortgage loans are priced using a proprietary model, taking into account, among other factors, the credit history of our customer and the relative loan-to-value (LTV) ratio of the loan at origination. For most of our home equity

Table of Contents

product offerings, we offer customers the choice to accept an early repayment fee in exchange for a lower interest rate. Generally we either sell loans through whole loan sales or we fund these loans on balance sheet through warehouse lines or secured, term financings. In an effort to manage portfolio concentration risk and to comply with existing banking regulations, we have policies in place governing the size of our investment in loans secured by real estate where the LTV is greater than 90%.

Production and Portfolio Characteristics

The following table shows the geographic composition of our home equity managed portfolio:

State	June 30, 2007	December 31, 2006
California	9.8%	10.2%
Michigan	8.0	7.8

All other states	61.3	61.0
Total	100.0%	100.0%

Total managed portfolio in thousands \$ 1,656,141 \$ 1,708,975

For the quarter ended June 30, 2007, loans with loan-to-value ratios greater than 100%, but less than 125% (high LTVs, or HLTVs) constituted 51% of our loan originations and 53% of our managed portfolio for this line of business. HLTVs constituted 47% of our managed portfolio at December 31, 2006. Approximately 68%, or \$1.1 billion, of our home equity managed portfolio at June 30, 2007 was originated with early repayment provisions.

The following table provides a breakdown of our home equity lending managed portfolio by product type, outstanding principal balance and weighted average coupon for the following periods:

	June 30, 2007			December 31, 2006		
	Amount	% of Total	Weighted Average Coupon (Dollars in thousands)	Amount	% of Total	Weighted Average Coupon

<i>Net Income</i>		

Our home equity lending business recorded a net loss of \$2.0 million during the three months ended June 30, 2007, compared to a net loss for the same period in 2006 of \$0.4 million. A year-to-date loss of \$12.1 million was recorded

through June 30, 2007, compared to net income of \$0.7 million during the same period a year earlier.

Table of Contents*Net Revenue*

Net revenue for the three and six months ended June 30, 2007 totaled \$14 million and \$16 million, respectively, compared to net revenue for the same periods in 2006 of \$23 million and \$47 million. The decrease in revenues is primarily a result of higher loan loss provision and lower gains from loan sales.

During the second quarter of 2007, our home equity lending business produced \$123 million of home equity loans, compared to \$211 million during the same period in 2006. The decrease in volume principally reflects a decline in acquisitions in the retail channel and reflects disruptions in the secondary markets during the first half of 2007. The table below shows our originations by channel for the periods shown:

	For the Three Months Ended June 30,		For the Six Months Ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)

Percent broker	50%	29%	50%	27%
Percent correspondent	39	26	39	29
Percent retail loans	11	14	8	20
Percent other		31	3	24

Our home equity lending business had \$1.5 billion of net loans and loans held for sale at June 30, 2007 unchanged from December 31, 2006. Included in the loan balance at June 30, 2007 were \$1.2 billion of collateralized loans as part of secured financings.

The following table sets forth certain information regarding net revenue for the periods indicated:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2007	2006	2007	2006
	(Dollars in thousands)			
Net interest income	\$ 24,473	\$ 22,924	\$ 49,037	\$ 46,593
Provision for loan losses	(15,601)	(3,704)	(30,689)	(10,258)
Gain on sales of whole loans	1,588	618	1,841	3,004
Valuation adjustment on loans held for sale	(166)	(5,088)	(8,141)	(5,541)

(Impairment) recovery of servicing assets	(1,966)	409	(6,600)	983
Derivative gains (losses)	12	2,934	(282)	5,841
Other	576	(5)	938	481
Total net revenue	\$ 13,635	\$ 22,800	\$ 16,314	\$ 47,303

Net interest income increased to \$24 million for the three months ended June 30, 2007, compared to \$23 million for the same period in 2006. Year-to-date net interest income for 2007 was \$49 million, compared to \$47 million for 2006. The increase in net interest income is primarily due to higher rates and average loan balances in 2007 compared to 2006.

Provision for loan losses increased to \$16 million in the second quarter of 2007, compared to \$4 million during the same period in 2006. Year-to-date provision for loan losses was \$31 million in 2007 compared to \$10 million in 2006. The increased provision in 2007 relates primarily to the reclassification of \$167 million of mortgage loans held for sale to held for investment during the first quarter reflecting our decision not to sell into weak secondary market

conditions. The loans and lines that were moved were originated with the intent to sell into the secondary market, however, conditions in that market deteriorated rapidly during the first quarter. It is management's expectation that conditions will improve, but only gradually and, as a result, determined that it was more appropriate to move these loans into held for investment. These transferred loans resulted in an increase of \$6 million to the provision for loan losses during the first quarter. During the second quarter, the actual and expected performance of portfolio loans deteriorated, leading to the need to provide additional reserves for potential future loan losses. We expect weaknesses in this portfolio to continue as long as challenging conditions in the mortgage market persist.

Table of Contents

We completed whole loan sales during the second quarter of 2007 of \$35 million resulting in a gain on sale of loans of \$0.5 million, compared to \$0.8 million in gain on the sale of \$336 million of loans during the same period in 2006. In addition, net charge offs in our loans held for sale classification reduced the gain on sale during the quarter. As mentioned above, \$167 million of loans were reclassified to held for investment during the first quarter. We charged off \$7 million in the first quarter related to this pool of loans to mark them to market prior to the reclassification.

Loan servicing fees totaled \$5 million during the second quarter of 2007 compared to \$10 million during the same period in 2006. Year to date, loan servicing fees totaled \$10 million, compared to \$18 million during the same period in 2006. The servicing portfolio underlying the mortgage servicing asset totaled \$1.1 billion at June 30, 2007 compared to \$1.7 billion at June 30, 2006. Included in loan servicing fees are incentive servicing fees (ISFs). As part of certain whole loan sales, we have the right to an incentive servicing fee that will provide cash payments to us once a pre-established return for the certificate holders and certain structure-specific loan credit and servicing performance metrics are met. At June 30, 2007, we were receiving incentive fees for six transactions that met these performance metrics. During the second quarter of 2007, we earned \$1.7 million in ISF fees, compared to \$4.3 million during the same period in 2006. For the first half of 2007, we earned \$3.6 million in ISF fees, compared to \$5.7 million during the same period in 2006. The following table summarizes ISF revenue recognized by quarter:

	2004	2005	2006	2007
	(Dollars in thousands)			
First Quarter	\$ 471	\$ 325	\$ 1,387	\$ 1,933
Second Quarter	234	681	4,278	1,708
Third Quarter	244	851	659	NA
Fourth Quarter		481	2,757	NA
Year to date	\$ 949	\$ 2,338	\$ 9,081	\$ 3,641

Amortization and impairment of servicing assets includes amortization expenses and valuation adjustments relating to the carrying value of servicing assets. We determine fair value of the home equity lending servicing asset using discounted cash flows and assumptions as to estimated future servicing income and cost that we believe market participants would use to value similar assets. In addition, we periodically assess these modeled assumptions for reasonableness through independent third-party valuations. Servicing asset amortization and impairment expense totaled \$7 million during the first half of 2007, compared to \$11 million for the six months ended June 30, 2006. This decrease reflects a smaller portfolio and reduced prepayment speeds. During the first quarter of 2007, the home equity lending line of business adopted the fair value method of accounting for mortgage servicing rights in accordance with SFAS 156. As a result, we are no longer amortizing servicing rights underlying high loan-to-value first mortgages and second mortgages. Rather, we are adjusting the fair value each quarter and recognizing a fair value adjustment through impairment on the income statement.

We originate fixed rate loans that are susceptible to decreases in value in a period of increasing interest rates. To protect against such decreases, we enter into derivative contracts. Derivative gains were \$12 thousand for the second quarter of 2007 and we had derivative losses of \$0.3 million year to date. This compares with gains of \$2.9 million and \$5.8 million for the same periods in 2006. The decrease in derivative gains in 2007 versus 2006 is due to fewer derivative contracts outstanding.

equivalent basis.

Table of Contents

Operating expenses were \$17 million and \$36 million for the three and six months ended June 30, 2007, compared to \$23 million and \$46 million for the same periods in 2006. Operating expenses declined in 2007 primarily due to a restructuring and downsizing of the retail channel which took place in the second quarter of 2006 and other cost cutting initiatives.

Home Equity Servicing

Our home equity lending business continues to service certain of the loans it has securitized and sold. We earn a servicing fee of approximately 50 to 100 basis points of the outstanding principal balance of the loans securitized. The total servicing portfolio was \$2.6 billion at June 30, 2007, compared to \$2.9 billion at December 31, 2006. For whole loans sold with servicing retained totaling \$0.6 billion at June 30, 2007 and \$0.7 billion at December 31, 2006, we capitalize servicing fees including rights to future early repayment fees. During the first quarter of 2007, we adopted the fair value method under FAS 156. Adoption of this new standard resulted in a \$2.9 million increase in our servicing asset to adjust its value to fair market value. We recorded a one time (tax-affected) cumulative adjustment to retained earnings of \$1.7 million to reflect the adoption of this new standard. The servicing asset at June 30, 2007 was \$24 million, down from \$28 million at December 31, 2006 reflecting the decrease in fair value as a result of recognizing the asset at fair value under FAS 156.

Our managed portfolio, representing that portion of the servicing portfolio on which we have retained credit risk, is separated into two categories: \$1.5 billion of loans originated and held on balance sheet either as loans held for investment or loans held for sale, and \$0.2 billion of loans and lines of credit securitized for which we retained a residual interest. In both cases, we retain credit and interest rate risk.

Included below in the category *Credit Risk Sold, Potential Incentive Servicing Fee Retained Portfolio* are \$0.5 billion of loans at June 30, 2007 and \$0.6 billion of loans at December 31, 2006 for which we have the opportunity to earn an incentive servicing fee. While the credit performance of these loans we have sold is one factor that can affect the value of the incentive servicing fee, we do not have direct credit risk in these pools.

The following table sets forth certain information for these portfolios. The managed portfolio includes those loans we service with credit risk retained. Delinquency rates and losses on our managed portfolio result from a variety of factors, including loan seasoning, portfolio mix, and general economic conditions.

	June 30, 2007	December 31, 2006	June 30, 2006

Table of Contents

Discontinued Operations Mortgage Banking

In 2006, we sold the mortgage banking line of business origination operation, including the majority of this segment's loans held for sale, as well as the majority of this segment's capitalized mortgage servicing rights to five separate purchasers. In January 2007, we transferred certain assets associated with this segment's servicing platform and placed the bulk of our remaining staff with a sixth buyer. We have some staff continuing to work at IMC through the wind-down of our remaining assets managing repurchased loans and collecting outstanding documents required for the completion of servicing transfers.

In accordance with the provisions of SFAS 144, the results of operations of the mortgage banking line of business for the current and prior periods have been reported as discontinued operations. In addition, certain of the remaining assets for this segment have been reclassified as held for sale in the consolidated balance sheet.

Weak secondary market conditions negatively affected the continuation of the wind-down and disposition costs of the discontinued mortgage operations. During the second quarter, the discontinued segment lost \$5.9 million, compared to \$4.0 million during the first quarter. The majority of our current losses relate to credit costs for alleged breaches of representations and warranties made when loans were sold to the secondary market, prior to the sale of the segment in 2006. In addition, the loss in the second quarter includes mark-to-market adjustments on the remaining assets that we are currently marketing for sale. The amount of any future loss is most likely to be affected by future repurchase demands and results of disposition in the secondary market, which are difficult to predict. We believe the bulk of the remaining disposition activities other than those associated with repurchase demands will be completed by year-end.

Parent and Other

Results at the parent company and other businesses totaled a net loss of \$1.9 million and \$3.6 million for the three and six months ended June 30, 2007, compared to a loss of \$1.4 million and \$3.4 million during the same periods in 2006. These losses at the parent company primarily relate to operating and interest expenses in excess of management fees charged to the lines of business and interest income earned on intracompany loans. Parent company operating results also include allocations to our subsidiaries of interest expense related to our interest-bearing capital obligations. During the six month period ended June 30, 2007, we allocated \$8.7 million of these expenses to our subsidiaries, compared to \$6.5 million during the first half of 2006.

Each subsidiary pays taxes to us at the statutory rate. Subsidiaries also pay fees to us to cover direct and indirect services. In addition, certain services are provided from one subsidiary to another. Intercompany income and expenses are calculated on an arm's-length, external market basis and are eliminated in consolidation.

Risk Management

We are engaged in businesses that involve the assumption of risks including:

Credit risk

Liquidity risk

Market risk (including interest rate and foreign exchange risk)

Operational risk

Compliance risk

The Board of Directors has primary responsibility for establishing the Corporation's risk appetite and overseeing its risk management system. Primary responsibility for management of risks within the risk appetite set by the Board of Directors rests with the managers of our business units, who are responsible for establishing and maintaining internal control systems and procedures that are appropriate for their operations. To provide an independent assessment of line management's risk mitigation procedures, we have established a centralized enterprise-wide risk management function. To maintain independence, this function is staffed with managers with substantial expertise and experience in various aspects of risk management who are not part of line management. They report to the Chief Risk Officer (CRO), who in turn reports to the Risk Management Committee of our Board of Directors. Our Internal Audit

Table of Contents

function independently audits both risk management activities in the lines of business and the work of the centralized enterprise-wide risk management function and reports directly to the Audit Committee of our Board of Directors.

Given the on-going growth in the scope of the Corporation, our efforts to date to improve our risk management systems, and heightened industry and regulatory focus around credit, market, liquidity, operational and compliance risks, the Board, having reviewed and evaluated results of reports from Internal Audit, Risk Management, and regulatory exams, embarked in 2006 on a comprehensive review of our risk management systems. These assessments were conducted at the Board's direction by a third-party to ensure independence and access to best-in-class practices. As a result of these assessments, management has developed a program of risk management improvement steps that it has begun implementing on an enterprise-wide basis. The costs of these resources are reflected in current period earnings.

Each line of business that assumes risk uses a formal process to manage this risk. In all cases, the objectives are to ensure that risk is contained within the risk appetite established by our Board of Directors and expressed through policy guidelines and limits. In addition, we attempt to take risks only when we are adequately compensated for the level of risk assumed.

Our CEO, Executive Vice President, CFO, Senior Vice President, and Chief Risk Officer meet on a regularly-scheduled basis (or more frequently as appropriate) as an Enterprise-wide Risk Management Committee (ERMC), reporting to the Board of Directors' Risk Management Committee. Our Chief Risk Officer, who reports directly to the Risk Management Committee, chairs the ERMC. In 2006, the ERMC reported to the Audit and Risk Management Committee of the Board of Directors. On January 1, 2007, the Board formed two committees, an Audit Committee and a separate Risk Management Committee in order to focus more independent oversight at the board level on the governance of the Corporation's risk management system. To ensure coordination between the two committees, the Chair of each committee is a member of the other committee. Beginning in 2007, the ERMC reports to the newly-formed Risk Management Committee of the Board of Directors.

Each of our principal risks is managed directly at the line of business level, with oversight and, when appropriate, standardization provided by the ERMC and its subcommittees. The ERMC and its subcommittees oversee all aspects of our credit, market, operational and compliance risks. The ERMC provides senior-level review and enhancement of line manager risk processes and oversight of our risk reporting, surveillance and model parameter changes.

Credit Risk

The assumption of credit risk is a key source of our earnings. However, the credit risk in our loan portfolios has the most potential for a significant effect on our consolidated financial performance. Each of our segments has a Chief Credit Officer with expertise specific to the product line and manages credit risk through various combinations of the use of lending policies, credit analysis and approval procedures, periodic loan reviews, servicing activities, and/or personal contact with borrowers. Commercial loans over a certain size, depending on the loan type and structure, are reviewed by a loan committee prior to approval. We perform independent loan review across the Corporation through a centralized function that reports directly to the head of Credit Risk Management who in turn reports to the Chief Risk Officer.

The allowance for loan and lease losses is an estimate based on our judgment applying the principles of SFAS 5, Accounting for Contingencies, SFAS 114, Accounting by Creditors for Impairment of a Loan, and SFAS 118, Accounting by Creditors for Impairment of a Loan—Income Recognition and Disclosures. The allowance is maintained at a level we believe is adequate to absorb probable losses inherent in the loan and lease portfolio. We perform an assessment of the adequacy of the allowance at the segment level no less frequently than on a quarterly basis and through review by a subcommittee of the ERMC.

Within the allowance, there are specific and expected loss components. The specific loss component is based on a regular analysis of all loans over a fixed-dollar amount where the internal credit rating is at or below a predetermined classification. From this analysis we determine the loans that we believe to be impaired in accordance with SFAS 114. Management has defined impaired as nonaccrual loans. For loans determined to be impaired, we measure the level of impairment by comparing the loan's carrying value using one of the following fair value measurement techniques: present value of expected future cash flows, observable market price, or fair value of the associated collateral. An allowance is established when the collateral value of the loan implies a value that is lower than carrying value. In

addition to establishing allowance levels for specifically identified higher risk graded or high delinquency loans, management determines an allowance for all other loans in the portfolio for which historical or projected experience indicates that certain losses will occur. These loans are segregated by major product type, and in some instances, by aging, with an estimated loss ratio or migration pattern applied against each product type and aging category. For portfolios that are too new to have adequate historical experience on which to base a loss estimate, we use estimates derived from industry experience and management s

Table of Contents

judgment. The loss ratio or migration patterns are generally based upon historic loss experience or historic rate migration behaviors, respectively, for each loan type adjusted for certain environmental factors management believes to be relevant.

Net charge-offs for the three months ended June 30, 2007 in our held for investment portfolio were \$12 million, or 0.9% of average loans, compared to \$4 million, or 0.3% of average loans during the same period in 2006. Year-to-date net charge-offs were \$25 million, compared to \$8 million during the same period in 2006. The increase in charge-offs and allowance is due in part to a single large commercial credit in Michigan that was charged off during the first quarter. We believe the borrower will be unable to repay the majority of the loan as we recently discovered what we believe were misrepresentations about collateral offered for the loan. In addition, a reclassification of home equity loans from the held-for-sale category to the held-for-investment category during the first quarter resulted in a \$7 million charge off as these loans were marked to market at the date of transfer. In addition, we incurred a \$6 million increase to our loan loss provision in connection with these same loans. At June 30, 2007, the allowance for loan and lease losses was 1.7% of outstanding loans and leases, compared to 1.4% at year-end 2006.

Total nonperforming loans and leases at June 30, 2007, were \$43 million compared to \$38 million at December 31, 2006. Nonperforming loans and leases as a percent of total loans and leases at June 30, 2007 were 0.8%, an increase from 0.7% at December 31, 2006. Other real estate we owned totaled \$17 million at June 30, 2007, up from \$15 million at December 31, 2006. Total nonperforming assets at June 30, 2007 were \$61 million, or 1.0% of total assets compared to nonperforming assets at December 31, 2006 of \$58 million, or 0.9% of total assets.

The following table shows information about our nonperforming assets at the dates shown:

	June 30, 2007	December 31, 2006
	(Dollars in thousands)	
Accruing loans past due 90 days or more:		
Commercial, financial and agricultural loans	\$ 146	\$
Consumer loans	4	73
Commercial financing		
Domestic leasing	45	83
Foreign leasing	128	236
	323	392
Nonaccrual loans and leases:		
Commercial, financial and agricultural loans	10,040	13,296
Real estate mortgages	26,233	18,125
Consumer loans	724	696
Commercial financing		
Franchise financing	1,818	791
Domestic leasing	2,366	2,495
Foreign leasing	1,416	1,768
	42,597	37,171
Total nonperforming loans and leases	42,920	37,563
Nonperforming Loans held for Sale not guaranteed	993	5,564

Edgar Filing: IRWIN FINANCIAL CORP - Form 10-Q

Other real estate owned	16,716	15,170
Total nonperforming assets	\$ 60,629	\$ 58,297
Nonperforming loans and leases to total loans and leases	0.8%	0.7%
Nonperforming assets total assets	1.0%	0.9%

Table of Contents

For the periods presented, the balances of any restructured loans are reflected in the table above either in the amounts shown for accruing loans past due 90 days or more or in the amounts shown for nonaccrual loans and leases. The nonperforming assets at June 30, 2007 and December 31, 2006 were held at our lines of business as follows:

	June 30, 2007	December 31, 2006
	(In millions)	
Commercial banking	\$17	\$ 19
Commercial finance	6	5
Home equity lending	30	23
Mortgage banking	8	11

Generally, the accrual of income is discontinued when the full collection of principal or interest is in doubt, or when the payment of principal or interest has become contractually 90 days past due unless the obligation is both well secured and in the process of collection. Loans are charged-off upon evidence of expected loss or 180 days past due, whichever comes first.

Liquidity Risk

Liquidity is the availability of funds to meet the daily requirements of our business. For financial institutions, demand for funds results principally from extensions of credit, withdrawal of deposits, and maturity of other funding liabilities. Liquidity is provided through deposits and short-term and long-term borrowings, by asset maturities or sales, and through equity capital.

The objectives of liquidity management are to ensure that funds will be available to meet current and future demands and that funds are available at a reasonable cost. Since loan assets are less marketable than securities and, therefore, need less volatile liability funding, the ratio of total loans to total deposits is a traditional measure of liquidity for banks and bank holding companies. At June 30, 2007, the ratio of loans (which excludes loans held for sale) to total deposits was 166%. We permanently fund a significant portion of our loans with secured financings, which effectively eliminates liquidity risk on these assets until we elected to exercise a clean up call. The ratio of loans to total deposits after reducing loans for those funded with secured financings was 120%.

Since 2002, home equity loan securitizations have generally been retained on-balance sheet. As a result, both the securitized assets and the funding from these on balance sheet securitizations are now reflected on the balance sheet. From a liquidity perspective, the securitizations provide matched-term funding for the life of the loans making up the securitizations unless we choose to utilize a clean-up call provision to terminate the securitization funding early. A clean-up call typically is optional at the master servicer's discretion. It can typically be made once outstanding loan balances in the securitization fall below 10% of the original loan balance in the securitization. Bond principal payments are dependent upon principal collections on the underlying loans. Prepayment speeds can affect the timing and amount of loan principal payments.

Our deposits consist of two primary types: non-maturity transaction account deposits and certificates of deposit (CDs). Core deposits exclude jumbo CDs, brokered CDs, and public fund CDs. Core deposits totaled \$2.5 billion at June 30, 2007, compared to \$2.4 billion at December 31, 2006.

Non-maturity transaction account deposits are generated by our commercial banking line of business and include deposits placed into checking, savings, money market and other types of deposit accounts by our customers. These types of deposits have no contractual maturity date and may be withdrawn at any time. While these balances fluctuate daily, a large percentage typically remains for much longer. At June 30, 2007, these deposit types totaled \$1.7 billion, unchanged from December 31, 2006. We monitor overall deposit balances daily with particular attention given to larger accounts that have the potential for larger daily fluctuations and which are at greater risk to be withdrawn should there be an industry-wide or bank-specific event that might cause uninsured depositors to be concerned about the safety of their deposits. On a monthly basis we model the expected impact on liquidity from moderate and severe liquidity stress scenarios as one of our tools to ensure that our liquidity is sufficient.

CDs differ from non-contractual maturity accounts in that they have contractual maturity dates. We issue CDs both directly to customers and through brokers. As of June 30, 2007, CDs issued directly to customers totaled \$0.6 billion, an increase of \$0.1 billion from December 31, 2006. Brokered CDs are typically considered to have higher liquidity (renewal) risk than CDs issued directly to customers, since brokered CDs are often done in large blocks and since a direct relationship does not exist with the depositor. In recognition of this, we manage the size and maturity structure of brokered CDs closely. For example, the maturities of brokered CDs

Table of Contents

are laddered to mitigate liquidity risk. CDs issued through brokers totaled \$0.5 billion at June 30, 2007, and had an average remaining life of 17 months, unchanged from December 31, 2006.

Escrow account deposits are related to the servicing of our originated first mortgage loans. At June 30, 2007, these escrow balances totaled \$8 million, a \$317 million decrease from December 31, 2006. We sold the majority of our mortgage servicing rights in the third quarter of 2006 and transferred the servicing and related escrows in early January 2007. These deposits had been used primarily to fund mortgage loans prior to the sale of our first mortgage business.

Short-term borrowings consist of borrowings from several sources. Our largest borrowing source is the Federal Home Loan Bank of Indianapolis (FHLBI). We utilize their collateralized borrowing programs to help fund qualifying first mortgage, home equity and commercial real estate loans. As of June 30, 2007, FHLBI borrowings outstanding totaled \$0.5 billion, a \$0.1 billion increase from December 31, 2006. We had sufficient collateral pledged to FHLBI at June 30, 2007 to borrow an additional \$0.2 billion, if needed.

In addition to borrowings from the FHLBI, we use other lines of credit as needed. We have three lines of credit subject to compliance with certain financial covenants set forth in these facilities including, but not limited to, net income, consolidated tangible net worth, return on average assets, nonperforming loans, loan loss reserve, Tier 1 leverage ratio, and risk-based capital ratio. We are in compliance with all applicable covenants as of June 30, 2007.

At June 30, 2007, the amount of short-term borrowings outstanding on our major credit lines and the total amount of the borrowing lines were as follows:

Warehouse lines of credit to fund primarily home equity loans: none outstanding on a \$300 million borrowing facility, of which \$150 million is committed

Lines of credit with correspondent banks, including fed funds lines: none outstanding out of \$175 million available but not committed

Lines of credit with non-correspondent banks: \$130 million outstanding

Warehouse lines of credit and conduits to fund Canadian sourced small ticket leases: \$252 million outstanding on \$366 million of borrowing facilities

In order to further diversify our funding sources, we have recently developed an internet deposit platform. Element Financial (<https://www.element-direct.com>) offers CDs nationally in denominations of \$5 thousand and larger. This initiative was released late in the second quarter of 2007 and, as a result, there has been a nominal amount of deposits raised through this channel as of June 30.

Market Risk (including Interest Rate and Foreign Exchange Risk)

Because all of our assets are not perfectly match-funded with like-term liabilities, our earnings are affected by interest rate changes. Interest rate risk is measured by the sensitivity of both net interest income and fair market value of net interest sensitive assets to changes in interest rates.

Our corporate-level asset-liability management committee (ALMC) oversees the interest rate risk profile of all of our lines of business. It is supported by ALMCs at each of our lines of business and monitors the repricing structure of assets, liabilities and off-balance sheet items. It uses a financial simulation model to measure the potential change in market value of all interest-sensitive assets and liabilities and also the potential change in earnings resulting from changes in interest rates. We incorporate many factors into the financial models, including prepayment speeds, prepayment fee income, deposit rate forecasts for non-maturity transaction accounts, caps and floors that exist on some variable rate instruments, embedded optionality and a comprehensive mark-to-market valuation process. We reevaluate risk measures and assumptions regularly, enhance modeling tools as needed, and, on an approximately annual schedule, have the model validated by internal audit or an out-sourced provider under internal audit's direction.

Our lines of business assume interest rate risk in the form of repricing structure mismatches between their loans and leases and funding sources. We manage this risk by adjusting the duration of their interest sensitive liabilities and through the use of hedging via financial derivatives.

Table of Contents

Our discontinued mortgage banking segment held a material amount of mortgage servicing rights (MSRs) as part of its strategy and operations. Having sold the mortgage segment, we do not expect ownership or the related hedging of remaining MSRs to be a material item. As of June 30, 2007, the amount of interest rate risk at our discontinued mortgage banking segment is not material. Our commercial banking and home equity lines of business assume interest rate risk by holding MSRs (\$28 million at June 30, 2007). Among other items, a key determinant to the value of MSRs is the prevailing level of interest rates. The primary exposure to interest rates is the risk that rates will decline, possibly increasing prepayment speeds on loans and decreasing the value of MSRs. MSRs have traditionally been recorded at the lower of cost or fair market value. We adopted SFAS 156, *Accounting for Servicing of Financial Assets* on our high loan-to-value first lien and home equity segment second lien mortgages during the first quarter of 2007. This adoption requires full mark-to-market on the designated servicing assets, eliminating the lower-of-cost or market treatment. Our decisions on the degree to which we manage servicing right interest risk with derivative instruments to insulate against short-term price volatility depend on a variety of factors.

The following tables reflect our estimate of the present value of interest sensitive assets, liabilities, and off-balance sheet items at June 30, 2007. In addition to showing the estimated fair market value at current rates, they also provide estimates of the fair market values of interest sensitive items based upon a hypothetical instantaneous and permanent move both up and down 100 and 200 basis points in the entire yield curve.

The first table is an economic analysis showing the present value impact of changes in interest rates, assuming a comprehensive mark-to-market environment. The second table is an accounting analysis showing the same net present value impact, adjusted for expected GAAP treatment. Neither analysis takes into account the book values of the noninterest sensitive assets and liabilities (such as cash, accounts receivable, and fixed assets), the values of which are not directly determined by interest rates.

The analyses are based on discounted cash flows over the remaining estimated lives of the financial instruments. The interest rate sensitivities apply only to transactions booked as of June 30, 2007, although certain accounts are normalized whereby the three- or six-month average balance is included rather than the year-end balance in order to avoid having the analysis skewed by a significant increase or decrease to an account balance at year end.

The tables that follow should be used with caution.

The net asset value sensitivities do not necessarily represent the changes in the lines of business net asset value that would actually occur under the given interest rate scenarios, as sensitivities do not reflect changes in value of the companies as a going concern, nor consider potential rebalancing or other management actions that might be taken in the future under asset/liability management as interest rates change.

The tables below show modeled changes in interest rates for individual asset and liability classes. Asset and liability classes in our portfolio have interest rate sensitivity tied to different underlying indices or instruments. While the rate sensitivity of individual classes presented below is our best estimate of changes in value due to interest rate changes, the total potential change figures are subject to basis risk if all yield curve do not move in parallel as the model assumes.

Few of the asset classes shown react to interest rate changes in a linear fashion. That is, the point estimates we have made at Current and +/-2% and +/-1% are appropriate estimates at those amounts of rate change, but it may not be accurate to interpolate linearly between those points. This is most evident in products that contain optionality in payment timing or pricing such as mortgage servicing or nonmaturity transaction deposits. Finally, the tables show theoretical outcomes for dramatic changes in interest rates which do not consider potential rebalancing or repositioning of hedges and balance sheet mix.

Off-Balance Sheet Instruments

In the normal course of our business as a provider of financial services, we are party to certain financial instruments with off-balance sheet risk to meet the financial needs of our customers. These financial instruments include loan commitments and standby

Table of Contents

letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amounts recognized on the consolidated balance sheet. We follow the same credit policies in making commitments and contractual obligations as we do for our on-balance sheet instruments.

Our exposure to credit loss, in the form of nonperformance by the counterparty on commitments to extend credit and standby letters of credit, is represented by the contractual amount of those instruments. Collateral pledged for standby letters of credit and commitments varies but may include accounts receivable; inventory; property, plant, and equipment; and residential real estate. Total outstanding commitments to extend credit at June 30, 2007 and December 31, 2006 were \$1.0 billion. We had \$25 million in irrevocable standby letters of credit outstanding at both June 30, 2007 and December 31, 2006.

Derivative Financial Instruments

Financial derivatives are used as part of the overall asset/liability risk management process. We use certain derivative instruments that qualify and certain derivative instruments that do not qualify for hedge accounting treatment under SFAS 133. The derivatives that do not qualify for hedge treatment are classified as other assets and other liabilities and are marked to market on the income statement. While we do not seek Generally Accepted Accounting Principles (GAAP) hedge accounting treatment for the assets and liabilities that these instruments are hedging, the economic purpose of these instruments is to manage the risk inherent in existing exposures to either interest rate risk or foreign currency risk.

We have interest rate swaps that have a notional amount of \$25 million to economically hedge fixed rate certificate of deposits. Notional amounts do not represent the amount of risk. We do not receive SFAS 133 hedge accounting treatment for these transactions. We recognized an immaterial gain in derivative gains (losses) and (\$0.6) million loss for the six months ended June 30, 2007 and 2006, respectively, related to these swaps. Under the terms of these swap agreements, we receive a fixed rate of interest and pay a floating rate of interest based upon either one-month or three-month LIBOR.

We have interest rate swaps that have a notional amount of \$75 million to hedge floating rate deposits that qualify for SFAS 133 hedge accounting treatment. Under the terms of these swap agreements, we pay a fixed rate of interest and receive a floating rate of interest based on the Federal Funds rate. Ineffectiveness related to these cash flow hedges in 2007 was \$6 thousand.

We have one additional interest rate swap that qualifies for hedge accounting treatment under SFAS 133. It is a cash flow hedge in which we pay a fixed rate of interest and receive a floating rate. The purpose of this swap is to manage interest rate risk exposure created by Capital Trust XI which has variable rate interest payments. This hedge had a notional amount of \$15 million at June 30, 2007. The amount of loss on this swap recorded to other comprehensive income at June 30, 2007 was immaterial. Ineffectiveness related to these cash flow hedges in 2007 was immaterial.

In our home equity business we utilize interest rate caps to mitigate the interest rate exposure created by the 2006-1, 2006-2, 2006-3 and 2007-1 securitizations in which floating rate notes are funding fixed rate home equity loans. We have \$287 million in amortizing interest rate caps relating to these hedging activities. These contracts are marked-to-market with gains and losses included in derivative gains (losses) on the consolidated income statements. We do not receive SFAS 133 hedge accounting treatment for these transactions. The gain (loss) on these activities for the six months ending June 30, 2007 and 2006, totaled a loss of (\$0.1) million and \$0.8 million gain, respectively.

Also in our home equity business, we have a \$10 million amortizing interest rate swap in which we pay a fixed rate of interest and receive a floating rate. The purpose of the swap is to manage interest rate risk exposure created by the 2005-1 securitization in which floating rate notes are funding fixed rate home equity loans. This swap is accounted for as a cash flow hedge in accordance with SFAS 133, with the changes in the fair value of the effective portion of the hedge reported as a component of equity and \$83 thousand and \$326 thousand reduced interest expense during the six months ended June 30, 2007 and 2006, respectively. Ineffectiveness related to this cash flow hedge in 2007 was immaterial.

We enter into commitments to originate home equity loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on loans intended to be sold are considered to be derivatives. We record changes in the fair value of these commitments based upon the current secondary market value

of securities with similar characteristics. For the six months ended June 30, 2007, a gain of \$0.1 million was recorded in Gain from sale of loans. At June 30, 2007, we had rate lock commitments outstanding totaling \$21 million.

Table of Contents

We deliver Canadian dollar fixed rate leases into a commercial paper conduit. To lessen the repricing mismatch between fixed rate CAD-denominated leases and floating rate CAD-denominated commercial paper, a series of amortizing CAD interest rate swaps have been executed. As of June 30, 2007, the commercial paper conduit was providing \$206 million of variable rate funding. In total, our interest rate swaps were effectively converting \$202 million of this funding to a fixed interest rate. The losses on these swaps for the six months ended June 30, 2007 and 2006 were \$0.3 million and \$0.3 million, respectively.

We own foreign currency forward contracts to protect the U.S. dollar value of intercompany loans made to Irwin Commercial Finance Canada Corporation that are denominated in Canadian dollars. We had a contractual amount of \$70 million in forward contracts outstanding as of June 30, 2007. For the six months ending June 30, 2007 and 2006, we recognized losses of \$3.9 million and \$1.5 million, respectively. These contracts are marked-to-market with gains and losses included in derivative gains (losses) on the consolidated income statements. We do not receive SFAS 133 hedge accounting treatment for this transaction. We recognized a foreign currency transaction gain on the intercompany loans of \$4.4 million and \$2.0 million, respectively, for the six months ended June 30, 2007 and 2006.

Operational and Compliance Risk.

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems or from external events. Irwin Financial, like other financial services organizations, is exposed to a variety of operational risks. These risks include regulatory, reputational and legal risks, as well as the potential for processing errors, internal or external fraud, failure of computer systems, unauthorized access to information, and external events that are beyond the control of the Corporation, such as natural disasters.

Compliance risk is the risk of loss resulting from failure to comply with laws and regulations. While Irwin Financial is exposed to a variety of compliance risks, the two most significant arise from our consumer lending activities and our status as a public company.

Our Board of Directors has ultimate accountability for the level of operational and compliance risk we assume. The Board guides management by approving our business strategy and significant policies. Our management and Board have also established (and continue to improve) a control environment that encourages a high degree of awareness of the need to alert senior management and the Board of potential control issues on a timely basis.

The Board has directed that primary responsibility for the management of operational and compliance risk rests with the managers of our business units, who are responsible for establishing and maintaining internal control procedures that are appropriate for their operations. Our enterprise-wide risk management function provides an independent assessment of line management's operational risk mitigation procedures. This function, which is managed in conjunction with enterprise-wide oversight of compliance, reports to the Chief Risk Officer (CRO), who in turn reports to the Risk Management Committee of our Board of Directors. We have developed risk and control summaries for our key business processes. Line of business and corporate-level managers use these summaries to assist in identifying operational and other risks for the purpose of monitoring and strengthening internal and disclosure controls. Our Chief Executive Officer, Chief Financial Officer and Board of Directors, as well as the Boards of our subsidiaries, use the risk summaries to assist in overseeing and assessing the adequacy of our internal and disclosure controls, including the adequacy of our controls over financial reporting as required by section 404 of the Sarbanes Oxley Act and Federal Deposit Insurance Corporation Improvement Act.

Given the ongoing growth of the scope of the Corporation, our efforts to date to improve our risk management systems, and heightened industry and regulatory focus around risks, the Board, having reviewed and evaluated results of reports from Internal Audit, Risk Management, and regulatory exams, embarked in 2006 on a comprehensive review of our risk management systems, including operational and compliance risk management processes. These assessments were conducted at the Board's direction by a third-party to ensure independence and access to best-in-class practices. As a result of these assessments, management has developed a program of risk management improvement steps which it has begun implementing on an enterprise-wide basis. The costs of these resources are reflected in current period earnings.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

The quantitative and qualitative disclosures about market risk are reported in the Market Risk (including Interest Rate and Foreign Exchange Risk) section of Item 2, Management's Discussion and Analysis of Financial Condition and

Results of Operations found on pages 46 through 48.

Table of Contents**Item 4. Controls and Procedures.**

Disclosure Controls and Procedures As of the end of the period covered by this report, the Corporation carried out an evaluation as required by Rule 13a-15(b) or 15d-15(b) of the Securities Exchange Act of 1934 (Exchange Act), under the supervision and with the participation of management, including the Chief Executive Officer (CEO) and the Chief Financial Officer (CFO), of the effectiveness of the Corporation s disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) or 15d-15(e). Based on this evaluation, the CEO and the CFO have concluded that the Corporation s disclosure controls and procedures were effective as of June 30, 2007.

Internal Control Over Financial Reporting In connection with the evaluation performed by management with the participation of the CEO and the CFO as required by Exchange Act Rule 13a-15(d) or 15d-15(d), there were no changes in the Corporation s internal control over financial reporting as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) that occurred during the quarter ended June 30, 2007 that have materially affected, or are reasonably likely to materially affect, the Corporation s internal control over financial reporting. In March 2007, we discovered what we believe were misrepresentations about the collateral offered for a commercial loan originated by a branch of our subsidiary, Irwin Union Bank and Trust Company, which caused us to charge off \$4 million. We have undertaken an investigation of the causes of the loss and have made certain changes in staff and operating procedures in the branch in which we had the loss. We have further ascertained that we believe the control procedures have been and continue to be in place and effective in our other branches and lending locations.

PART II. Other Information.**Item 1. Legal Proceedings.**

Since the time we filed our Report on Form 10-Q for the quarter ended March 31, 2007, we experienced developments as noted in the litigation described below. For a full description of the litigation, see Note 11, Commitments and Contingencies, in the Notes to Consolidated Financial Statements, Part I, Item 1, of this Report.

Culpepper v. Inland Mortgage Corporation (suit filed in April 1996 in the United States District Court for the Northern District of Alabama alleging our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation), violated the federal Real Estate Settlement Procedures Act relating to the payment by Irwin Mortgage of broker fees to mortgage brokers).

Developments: On July 2, 2007, the Court of Appeals for the 11th Circuit affirmed the decision of the district court granting summary judgment in favor of Irwin Mortgage and decertifying the plaintiffs class. On July 13, 2007, plaintiffs filed a petition for a rehearing en banc. We await a decision of the court of appeals on the plaintiffs petition.

Silke v. Irwin Mortgage Corporation (suit filed in April 2003 in the Marion County, Indiana, Superior Court seeking class action status and alleging our indirect subsidiary, Irwin Mortgage Corporation, charged a document preparation fee in violation of Indiana law).

Developments: On May 2, 2007, the Indiana Supreme Court decided a case unrelated to Irwin involving document preparation fees, and held that the preparation of mortgage documents by non-attorneys does not necessarily constitute the practice of law and that a lender s charging a fee for the preparation does not convert it into the unauthorized practice of law. In light of the Indiana Supreme Court s decision in that case, the plaintiffs in *Silke* delivered to the trial court a proposed Order on Parties Cross-Motions for Summary Judgment and Entry of Final Judgment in favor of Irwin Mortgage on May 7, 2007. We therefore expect the trial court to dismiss the *Silke* litigation.

Cohens v. Inland Mortgage Corporation (suit filed in October 2003 in the Supreme Court of New York, County of Kings, against our indirect subsidiary, Irwin Mortgage Corporation (formerly Inland Mortgage Corporation) and others, alleging lead contamination from premises allegedly owned by defendants).

Developments: In May 2007, the court disposed of this case due to lack of prosecution by the plaintiffs. We expect the action to be restored, however, based on a motion by plaintiffs on June 28, 2007. We filed an affirmation in support of our motion for summary judgment on July 10, 2007.

Table of Contents

Litigation in Connection with Loans Purchased from Community Bank of Northern Virginia (several actions in which our subsidiary, Irwin Union Bank and Trust Company, is a defendant in connection with loans Irwin Union Bank purchased from Community Bank of Northern Virginia, consolidated for pretrial proceedings in the United States District Court for the Western District of Pennsylvania).

Developments: The District Court for the Western District of Pennsylvania had sought the opinion of an *Amicus Curiae* (Friend of the Court) to determine whether a proposed modified settlement in a similar case (not involving Irwin) was fair and reasonable, during which time the Irwin cases were effectively stayed. On July 5, 2007, the *Amicus Curiae* found the proposed settlement in the other case to be fair and reasonable.

White v. Irwin Union Bank and Trust Company and Irwin Home Equity Corporation (suit filed on January 5, 2006 in the Circuit Court for Baltimore City, Maryland, seeking class action status against our direct subsidiary, Irwin Union Bank and Trust Company, and our indirect subsidiary, Irwin Home Equity Corporation, alleging violations of the Maryland Mortgage Lending Laws and the Maryland Consumer Protection Act; plaintiffs initiated arbitration on April 24, 2006; lawsuit was dismissed on August 11, 2006; on October 13, 2006, the parties tentatively agreed to settle the arbitration action solely on behalf of the individual plaintiffs for a nonmaterial amount.)

Developments: The settlement agreement was approved by the arbitrator, and the arbitration action was dismissed with prejudice, effective June 6, 2007, thus concluding this matter.

We and our subsidiaries are from time to time engaged in various matters of litigation, including the matters described above, other assertions of improper or fraudulent loan practices or lending violations, and other matters, and we have a number of unresolved claims pending. In addition, as part of the ordinary course of business, we and our subsidiaries are parties to litigation involving claims to the ownership of funds in particular accounts, the collection of delinquent accounts, challenges to security interests in collateral, and foreclosure interests, that is incidental to our regular business activities. While the ultimate liability with respect to these other litigation matters and claims cannot be determined at this time, we believe that damages, if any, and other amounts relating to pending matters are not likely to be material to our consolidated financial position or results of operations, except as described above. Reserves are established for these various matters of litigation, when appropriate under SFAS 5, based in part upon the advice of legal counsel.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

(c) (Issuer Repurchases of Equity Securities). In 2006, the Board of Directors of the Corporation approved the repurchase of up to two million shares or up to \$50 million of common stock of the Corporation. The repurchases will occur from time to time based on market conditions, parent company cash flow, and the Corporation's current and future projections of capital position. From time to time, we also repurchase shares in connection with our equity-based compensation plans. The following table shows our repurchase activity for the past three months:

Calendar Month	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan or Program	Approximate Dollar Value of Shares that May Yet Be Purchased under the Plan or Program
April	4,566	\$ 16.26		
May	233,500	\$ 16.61	233,500	36,107,236
June	72,875	\$ 16.08	70,272	\$ 34,977,252
Total	310,941	\$ 16.48	303,772	

- (1) Includes shares repurchased in connection with the Corporation's equity-based compensation plans.

Table of Contents**Item 4. Submission of Matters to a Vote of Security Holders.**

- a) We held our Annual Meeting of Shareholders on May 9, 2007.
- b) Proposal No. 1. The following Director Nominees were elected to serve on the Board until the 2010 Annual Meeting, by the votes set forth below.

Nominees	Shares For	Shares Withheld
Sally A. Dean	25,081,438	2,539,003
William H. Kling	26,814,128	806,313
Lance R. Odden	26,748,498	871,943

The following directors are currently serving terms that expire as set forth below:

David W. Goodrich	2009
R. David Hoover	2008
Brenda J. Lauderback	2009
John C. McGinty, Jr.	2009
William I. Miller	2008
Dayton H. Molendorp	2008
Marita Zuraitis	2009

- c) In addition to the election of directors, the shareholders voted on and approved the following proposal:

Matter	Shares For	Shares Against	Shares Abstained
Proposal No. 2. Approval of the Irwin Financial Corporation 2007 Performance Unit Plan and grants made under the Plan	26,896,013	670,040	54,385
