WILSON BANK HOLDING COMPANY
Notes to Consolidated Financial Statements
(Unaudited)

Basis of Presentation

The unaudited, consolidated financial statements include the accounts of Wilson Bank Holding Company (Company) and its wholly-owned subsidiary, Wilson Bank and Trust

The accompanying consolidated financial statements have been prepared, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations.

Fair Value Measurements

SAFS 157 provides guidance on how entities should measure fair value under generally accepted accounting principles (GAAP). For any assets or liabilities requiring a fair value, SFAS 157 establishes a hierarchy of assets valuation summarized as follows:

Level 1 assets are those with unadjusted quoted prices in active markets for identical assets to the instrument of security being valued, for example stocks trading on the New York Stock Exchange.

Level 2 assets are those where pricing inputs for the assets are observable, either directly or indirectly.

Level 3 assets are those that don't have readily observable pricing inputs.

Except for marketable securities, restricted equity securities and impaired loans, the Company does not account for any other assets or liabilities using fair value. All marketable securities and restricted equity securities are considered Level 2 assets since their fair values are determined using observable pricing inputs. Impaired loans are considered Level 3 assets

In the opinion of management, the consolidated financial statements contain all adjustments and disclosures necessary to summarize fairly the financial position of the Company as of June 30, 2008 and December 31, 2007, the results of operations for the three and six months ended June 30, 2008 and 2007, comprehensive earnings for the three and six months ended June 30, 2008 and 2007 and changes in cash flows for the six months ended June 30, 2008 and 2007. All significant intercompany transactions have been eliminated. The interim consolidated financial statements should be read in conjunction with the notes to the consolidated financial statements presented in the Company's 2007 Annual Report to Stockholders. The results for interim periods are not necessarily indicative of results to be expected for the complete fiscal year.

Balance, June 30, 2008 and 2007, respectively	\$ 10,475	\$ 9,716

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The purpose of this discussion is to provide insight into the financial condition and results of operations of the Company and its subsidiary, Wilson Bank & Trust. This discussion should be read in conjunction with the consolidated financial statements included herewith. Reference should also be made to the Company's Annual Report on Form 10-K for the year ended December 31, 2007 for a more complete discussion of factors that impact liquidity, capital and the results of operations.

Forward-Looking Statements

This Form 10-Q contains certain forward-looking statements regarding, among other things, the anticipated financial and operating results of the Company. Investors are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. The Company undertakes no obligation to publicly release any modifications or revisions to these forward-looking statements to reflect events or circumstances occurring after the date hereof or to reflect the occurrence of unanticipated events.

In connection with the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995, the Company cautions investors that future financial and operating results may differ materially from those projected in forward-looking statements made by, or on behalf of, the Company. The words "expect," "intend," "should," "may," "could," "believe," "suspect," "anticipate," "seek," "plan," "estimate" and similar expressions are intended to identify such forward-looking statements, but other statements not based on historical fact may also be considered forward-looking. Such forward-looking statements involve known and unknown risks and uncertainties, including, but not limited to those risks described in the Company's Annual Report on Form 10-K and also includes, without limitation, deterioration in real estate market conditions in the Company's market area, increased competition with other financial institutions, lack of sustained growth in the economy in the Company's market area, rapid fluctuations in interest rates, significant downturns in the business of one or more large customers, changes in the legislative and regulatory environment, inadequate allowance for loan losses and loss of key personnel. These risks and uncertainties may cause the actual results or performance of the Company to be materially different from any future results or performance expressed or implied by such forward-looking statements. The Company's future operating results depend on a number of factors which were derived utilizing numerous assumptions and other important factors that could cause actual results to differ materially from those projected in forward-looking statements.

***Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued
Critical Accounting Policies***

The accounting principles we follow and our methods of applying these principles conform with accounting principles generally accepted in the United States and with general practices within the banking industry. In connection with the application of those principles to the determination of our allowance for possible loan losses (ALL) and the recognition of our deferred income tax assets, we have made judgments and estimates which have significantly impacted our financial position and results of operations.

Allowance for Loan Losses

Our management assesses the adequacy of the ALL prior to the end of each calendar quarter. This assessment includes procedures to estimate the ALL and test the adequacy and appropriateness of the resulting balance. The ALL consists of two portions: (1) an allocated amount representative of specifically identified credit exposure and exposures readily predictable by historical or comparative experience; and (2) an unallocated amount representative of inherent loss which is not readily available. Even though the ALL is composed of two components, the entire allowance is available to absorb any credit losses.

We establish the allocated amount separately for two different risk groups: (1) unique loans (commercial loans, including those loans considered impaired); and (2) homogenous loans (generally consumer and residential mortgage loans). We base the allocation for unique loans primarily on risk rating grades assigned to each of these loans as a result of our loan management and review processes. Each risk-rating grade is assigned an estimated loss ratio, which is determined based on one or more of the following: the experience of management, discussions with banking regulators, historical and current economic conditions and our independent loan review process. We estimate losses on impaired loans based on estimated cash flows discounted at the loan's original effective interest rate or the underlying collateral value. We also assign estimated loss ratios to our consumer portfolio. However, we base the estimated loss ratios for these homogenous loans on the category of consumer credit (e.g., automobile, residential mortgage, home equity) and not on the results of individual loan reviews.

The unallocated amount is particularly subjective and does not lend itself to exact mathematical calculation. We use the unallocated amount to absorb inherent losses which may exist as of the balance sheet date for such matters as changes in the local or national economy, the depth or experience of the lending staff, any concentrations of credit in any particular industry group, and new banking laws or regulations. After we assess applicable factors, we evaluate the aggregate unallocated amount based on our management's experience.

We then test the resulting ALL balance by comparing the balance in the allowance account to historical trends and peer information. Our management then evaluates the result of the procedures performed, including the result of our testing, and concludes on the appropriateness of the balance of the ALL in its entirety. The loan review and the finance committee of our board of directors review the assessment prior to the filing of quarterly financial information.

Table of Contents

WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued**Results of Operations**

Net earnings increased 10.9% to \$5,937,000 for the six months ended June 30, 2008 from \$5,356,000 in the first six months of 2007. Net earnings were \$3,063,000 for the quarter ended June 30, 2008, an increase of \$243,000, or 8.6%, from \$2,820,000 for the three months ended June 30, 2007 and an increase of \$189,000, or 6.6%, over the quarter ended March 31, 2008. The increase in net earnings during the six months ended June 30, 2008 as compared to the prior year period was primarily due to a 5.0% increase in total interest income, offset by a 2.0% decrease in interest expense. Net earnings for the six months ended June 30, 2008 compared to June 30, 2007 were negatively impacted by the increase in provision for possible loan losses of \$588,000, or 37.9% over the prior year's comparable period. See Provision for Possible Loan Losses for further explanation. Net interest margin for the six months ended June 30, 2008 was 3.48% as compared to 3.30% for the first six months of 2007 and the net interest margin was 3.16% for the quarter ended June 30, 2008 compared to 3.32% for the quarter ended June 30, 2007. The increase in net interest margin for the six months ended June 30, 2008, reflects the decrease in deposit pricing and the outpacing of loan growth by deposit growth.

Net Interest Income

Net interest income represents the amount by which interest earned on various earning assets exceeds interest paid on deposits and other interest-bearing liabilities and is the most significant component of the Company's earnings. The Company's total interest income, excluding tax equivalent adjustments relating to tax exempt securities, increased \$2,107,000, or 5.0%, during the six months ended June 30, 2008 as compared to the same period in 2007. The increase in total interest income was \$487,000, or 2.3%, for the quarter ended June 30, 2008 as compared to the quarter ended June 30, 2007. Interest income for the second quarter of 2008 decreased \$205,000, or 0.9%, over the first three months of 2008. The increase in the first six months of 2008 was primarily attributable to the growth of loans and the increased fed funds sold primarily attributable to the growth in deposits. The ratio of average earning assets to total average assets was 94.3% and 93.8% for the six months ended June 30, 2008 and June 30, 2007, respectively.

Interest expense decreased \$446,000, or 2.0%, for the six months ended June 30, 2008 as compared to the same period in 2007. The decrease was \$1,122,000, or 9.8%, for the three months ended June 30, 2008 as compared to the same period in 2007. Interest expense decreased \$976,000, or 8.6%, for the quarter ended June 30, 2008 over the first three months of 2008. The decrease for the quarter ended June 30, 2008 and for the six months ended June 30, 2008 was primarily due to a decrease in the rates paid on deposits reflecting the actions of the Federal Reserve Open Markets Committee to lower short term interest rates.

The foregoing resulted in an increase in net interest income, before the provision for possible loan losses, of \$2,553,000, or 12.8%, for the first six months of 2008 as compared to the same period in 2007. The increase was \$1,609,000, or 16.0%, for the quarter ended June 30, 2008 compared to the quarter ended June 30, 2007 and \$771,000, or 7.1%, when compared to the first quarter of 2008.

Provision for Possible Loan Losses

The provision for possible loan losses was \$2,140,000 and \$1,552,000 for the first six months of 2008 and 2007, respectively. The provision for loan losses during the three month periods

FORM 10-Q, CONTINUED

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

ended June 30, 2008 and 2007 was \$1,224,000 and \$790,000, respectively. The increase in the provision in each of 2008 second quarter and first six months of 2008 related to the Company's decision to increase the provision of possible loan losses during 2008 due to an increase in loan growth and the continued weakening of economic conditions. The provision for possible loan losses is based on past loan experience and other factors which, in management's judgment, deserve current recognition in estimating possible loan losses. Such factors include past loan loss experience, growth and composition of the loan portfolio, review of specific problem loans, the relationship of the allowance for loan losses to outstanding loans, and current economic conditions that may affect the borrower's ability to repay. Management has in place a system designed for monitoring its loan portfolio in an effort to identify potential problem loans. The provision for possible loan losses raised the allowance for possible loan losses (net of charge-offs and recoveries) to \$10,475,000, an increase of 10.6% from \$9,473,000 at December 31, 2007 and a reduction of \$189,000, or 2.0% from March 31, 2008. The allowance for possible loan losses was .98% and .95% of total loans at June 30, 2008 and December 31, 2007, respectively.

The level of the allowance and the amount of the provision involve evaluation of uncertainties and matters of judgment. The Company maintains an allowance for loan losses which management believes is adequate to absorb losses inherent in the loan portfolio. A formal review is prepared monthly by the Loan Review Officer to assess the risk in the portfolio and to determine the adequacy of the allowance for loan losses. The review includes analysis of historical performance, the level of non-performing and adversely rated loans, specific analysis of certain problem loans, loan activity since the previous assessment, reports prepared by the Loan Review Officer, consideration of current economic conditions, and other pertinent information. The level of the allowance to net loans outstanding will vary depending on the overall results of this monthly assessment. The review is presented to the Finance Committee and subsequently approved by the Board of Directors. Management believes the allowance for possible loan losses at June 30, 2008 to be adequate, but if economic conditions deteriorate beyond management's current expectations and additional charge-offs are incurred, the allowance for loan losses may require an increase through additional provision for loan losses.

Non-Interest Income

The components of the Company's non-interest income include service charges on deposit accounts, other fees and commissions and gain on sale of loans. Total non-interest income for the six months ended June 30, 2008 increased 11.1% to \$6,510,000 from \$5,858,000 for the same period in 2007. The increase was \$210,000, or 6.6%, during the quarter ended June 30, 2008 compared to the second quarter in 2007 and there was an increase of \$270,000, or 8.6%, over the first three months of 2008. The increase for the first six months of 2008 was due primarily to an increase in other fees and commissions and an increase in other income. Other fees and commissions increased \$834,000, or 49.4%, during the six months ended June 30, 2008 compared to the same period in 2007. Other fees and commissions increased \$412,000, or 43.7%, during the quarter ended June 30, 2008 compared to the same quarter in 2007. Other fees and commissions include income on brokerage accounts, insurance policies sold and various other fees. Other income increased \$153,000 during the six months ended June 30, 2008 due to a reclassification of income and expenses relating to debit and credit card exchange fees. Service charges on deposit accounts decreased \$289,000, or 8.9%, during the six months ended June 30, 2008 compared to the same period in 2007 as a result of a reduction in insufficient fund fees resulting from the bank changing the posting of debit card transaction from delayed posting to real time balances.

Table of Contents

**WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED**

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

The decrease was \$246,000, or 14.2% during the quarter ended June 30, 2008 compared to the second quarter of 2007 and there was an increase of \$35,000, or 2.4%, over the first three months of 2008.

Non-Interest Expenses

Non-interest expenses consist primarily of employee costs, occupancy expenses, furniture and equipment expenses, data processing expenses, director's fees, loss on sale of other real estate and other operating expenses. Total non-interest expenses increased \$1,582,000, or 10.1%, during the first six months of 2008 compared to the same period in 2007. The increase for the quarter ended June 30, 2008 was \$931,000, or 11.8%, as compared to the comparable quarter in 2007. The Company experienced an increase of \$404,000, or 4.8%, in non-interest expenses in the quarter as compared to the first three months of 2008. The increase in non-interest expenses is attributable primarily to an increase in employee salaries and benefits associated with an increase in the number of employees necessary to support the Company's operations. The number of employees increased from 365 at June 30, 2007 to 369 at June 30, 2008. Other operating expenses for the six months ended June 30, 2008 increased to \$4,240,000 from \$3,531,000 for the comparable period in 2007. Other operating expenses increased \$447,000, or 25.2%, during the quarter ended June 30, 2008 as compared to the same period in 2007. The increase in other operating expenses for the six months ended June 30, 2008 related primarily to an increase in FDIC insurance premiums of \$335,000, or 558.3% to \$395,000 at June 30, 2008 compared to \$60,000 at June 30, 2007 due to exhausting a one time credit allowed by the FDIC in determining the FDIC insurance premium.

Income Taxes

The Company's income tax expense was \$3,760,000 for the six months ended June 30, 2008 an increase of \$454,000 over the comparable period in 2007. Income tax expense was \$1,950,000 for the quarter ended June 30, 2008, an increase of \$211,000 over the same period in 2007. The percentage of income tax expense to net income before taxes was 38.8% and 38.2% for the six months ended June 30, 2008 and 2007, respectively, and 38.9% and 38.1% for the quarters ended June 30, 2008 and 2007, respectively. The percentage of income tax expense to net income before taxes was 38.6% for the first three months of 2008. The effective tax rate exceeds the statutory tax rate as a result of permanent differences related to life insurance premiums.

Earnings Per Share

The computation of basic earnings per share is based on the weighted average number of common shares outstanding during the period. The computation of diluted earnings per share for the Company begins with the basic earnings per share plus the effect of common shares contingently issuable from stock options.

The following is a summary of components comprising basic and diluted earnings per share (EPS) for the three months and six months ended June 30, 2008 and 2007:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2008	2007	2008	2007
	(Dollars in Thousands Except Per Share Amounts)		(Dollars in Thousands Except Per Share Amounts)	
Basic EPS Computation:				
Numerator Earnings available to common Stockholders	\$ 3,063	\$ 2,820	\$ 5,937	\$ 5,356
Denominator Weighted average number of common shares outstanding	6,976,514	6,904,499	6,956,906	6,891,675
Basic earnings per common share	\$.44	\$.41	\$.85	\$.78
Diluted EPS Computation:				
Numerator Earnings available to common Stockholders	\$ 3,063	\$ 2,820	\$ 5,937	\$ 5,356
Denominator Weighted average number of common shares outstanding	6,976,514	6,904,499	6,956,906	6,891,675
Dilutive effect of stock options	36,873	43,223	35,941	39,849
	7,013,387	6,947,722	6,992,847	6,931,524
Diluted earnings per common share	\$.44	\$.41	\$.85	\$.77

Financial Condition**Balance Sheet Summary**

The Company's total assets increased 5.2% to \$1,403,375,000 during the six months ended June 30, 2008 from \$1,334,245,000 at December 31, 2007. Total assets decreased \$184,000 during the three-month period ended June 30, 2008 after increasing \$69,314,000, or 5.2%, during the three-month period ended March 31, 2008. Loans, net of allowance for possible loan losses, totaled \$1,058,455,000 at June 30, 2008, a 7.1% increase compared to \$988,053,000 at December 31, 2007. Loans increased \$40,460,000, or 4.0%, during the three months ended June 30,

2008. Securities decreased \$3,695,000, or 1.7%, to \$219,686,000 at June 30, 2008 from \$223,381,000 at December 31, 2007. Securities decreased

FORM 10-Q, CONTINUED

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

\$9,967,000, or 4.3%, during the three months ended June 30, 2008. Federal funds sold decreased from \$14,722,000 at December 31, 2007 to \$13,943,000 at June 30, 2008, reflecting a growth in loans that exceeded deposit growth.

Total liabilities increased by 5.5% to \$1,283,132,000 at June 30, 2008 compared to \$1,216,060,000 at December 31, 2007. For the quarter ended June 30, 2008 total liabilities increased \$818,000, or 0.1%. The increase in total liabilities for the six months ended June 30, 2008, was comprised primarily of a \$67,699,000, or 5.7%, increase in total deposits, offset by a decrease of \$1,145,000, or 11.7%, in securities sold under repurchase agreements during the six months ended June 30, 2008. Federal Home Loan Bank advances decreased \$829,000 during the six months ended June 30, 2008.

The following schedule details the loans of the Company at June 30, 2008 and December 31, 2007:

	(In Thousands)	
	June 30, 2008	December 31, 2007
Commercial, financial & agricultural	\$ 349,553	\$ 337,368
Real estate construction	110,957	100,036
Real estate mortgage	532,828	486,504
Consumer	75,592	73,618
	1,068,930	997,526
Allowance for possible losses	(10,475)	(9,473)
	\$ 1,058,455	\$ 988,053

The Company follows the provisions of Statement of Financial Accounting Standards (SFAS) No. 114, Accounting by Creditors for Impairment of a Loan and SFAS No. 118, Accounting by Creditors for Impairment of a Loan Income Recognition and Disclosures . These pronouncements apply to impaired loans except for large groups of smaller-balance homogeneous loans that are collectively evaluated for impairment including credit card, residential mortgage, and consumer installment loans.

A loan is impaired when the current net worth and financial capacity of the borrower or of the collateral pledged, if any, is viewed as inadequate and it is probable that the Company will be unable to collect the scheduled payments of principal and interest due under the contractual terms of the loan agreement. In those cases, such loans have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt, and if such deficiencies are not corrected, there is a probability that the Company will sustain some loss. In such cases, interest income continues to accrue as long as the loan does not meet the Company's criteria for nonaccrual status. Impaired loans are measured at the present value of expected future cash flows discounted at the loan's effective interest rate, at the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. If the measure of the impaired loan is less than the recorded investment in the loan, the Company shall recognize an impairment by creating a valuation allowance with a corresponding charge to the provision for loan losses or by adjusting an existing valuation allowance for the impaired loan with a corresponding charge or credit to the provision for loan losses

**WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED**

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

The Company's first mortgage single family residential, consumer and credit card loans, which totaled approximately \$354,067,000, \$68,238,000 and \$2,814,000, respectively, at June 30, 2008, are divided into various groups of smaller-balance homogeneous loans that are collectively evaluated for impairment and thus are not subject to the provisions of SFAS Nos. 114 and 118. Substantially all other loans of the Company are evaluated for impairment under the provisions of SFAS Nos. 114 and 118.

The Company considers all loans subject to the provisions of SFAS Nos. 114 and 118 that are on nonaccrual status to be impaired. Loans are placed on nonaccrual status when doubt as to timely collection of principal or interest exists, or when principal or interest is past due 90 days or more unless such loans are well-secured and in the process of collection. Delays or shortfalls in loan payments are evaluated with various other factors to determine if a loan is impaired. Generally, delinquencies under 90 days are not considered determinative unless certain other factors are present which indicate impairment is probable. The decision to place a loan on nonaccrual status is also based on an evaluation of the borrower's financial condition, collateral, liquidation value, and other factors that affect the borrower's ability to pay.

Generally, at the time a loan is placed on nonaccrual status, all interest accrued on the loan in the current fiscal year is reversed from income, and all interest accrued and uncollected from the prior year is charged off against the allowance for loan losses. Thereafter, interest on nonaccrual loans is recognized as interest income only to the extent that cash is received and future collection of principal is not in doubt. If the collectibility of outstanding principal is doubtful, such interest received is applied as a reduction of principal. A nonaccrual loan may be restored to accruing status when principal and interest are no longer past due and unpaid and future collection of principal and interest on a timely basis is not in doubt. At June 30, 2008, the Company had nonaccrual loans totaling \$9,281,000 as compared to \$2,167,000 at December 31, 2007. The increase in nonaccrual loans is primarily related to loans included in three large relationships in the Company's loan portfolio where the borrower has indicated that it is unable to repay the loan in full.

Other loans may be classified as impaired when the current net worth and financial capacity of the borrower or of the collateral pledged, if any, is viewed as inadequate. Such loans generally have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt, and if such deficiencies are not corrected, there is a probability that the Company will sustain some loss. In such cases, interest income continues to accrue as long as the loan does not meet the Company's criteria for nonaccrual status.

Generally the Company also classifies as impaired any loans the terms of which have been modified in a troubled debt restructuring. Interest is accrued on such loans that continue to meet the modified terms of their loan agreements. At June 30, 2008, the Company had no loans that have had the terms modified in a troubled debt restructuring.

Loans are charged-off in the month when they are considered uncollectible. Net charge-offs for the period ended June 30, 2008 was \$1,138,000 as compared to \$2,045,000 for the period ended June 30, 2007.

Table of Contents

WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

Impaired loans and related allowance for loan loss amounts at June 30, 2008 and December 31, 2007 were as follows:

(In Thousands)	June 30, 2008		December 31, 2007	
	Recorded Investment	Allowance For Loan Loss	Recorded Investment	Allowance For Loan Loss
Impaired loans with allowance for loan loss	\$ 9,281	1,354	\$ 2,167	313
Impaired loans with no allowance for loan loss				
	\$ 9,281	1,354	\$ 2,167	\$ 313

The allowance for loan loss related to impaired loans was measured based upon the estimated fair value of related collateral. The increase in impaired loans includes three large relationships which make up 75% of the impaired loans at June 30, 2008 and make up 0.8% of the Company's total loan portfolio.

The following schedule details selected information as to non-performing loans of the Company at June 30, 2008 and December 31, 2007:

	June 30, 2008		December 31, 2007	
	Past Due 90 Days	Non-Accrual	Past Due 90 Days	Non-Accrual
	(In Thousands)		(In Thousands)	
Real estate loans	\$ 2,839	8,843	\$ 1,592	1,620
Installment loans	328	226	437	13
Commercial	3	212	97	534
	\$ 3,170	9,281	\$ 2,126	2,167
Renegotiated loans	\$			

Non-performing loans, which included non-accrual loans and loans 90 days past due, at June 30, 2008 totaled \$12,451,000 an increase from \$4,293,000 at December 31, 2007. During the three months ended June 30, 2008, non-performing loans increased \$2,660,000 from \$9,791,000 at March 31, 2008. The increase in non-performing loans during the six months ended June 30, 2008 of \$8,158,000 is due primarily to an increase in non-performing real estate loans of \$8,470,000 and an increase in non-performing installment loans of \$104,000, offset by a decrease in non-performing commercial loans of \$416,000. The increase in non-performing loans relates primarily to two customers with non-performing loans totaling \$6,937,000. Management believes that it is probable that it will incur losses on these loans but believes that these losses should not exceed the amount in the allowance for loan losses already allocated to loan losses.

Table of Contents

WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED

Item 2 . Management s Discussion and Analysis of Financial Condition and Results of Operations, Continued

The following table presents total internally graded loans as of June 30, 2008 and December 31, 2007:

	June 30, 2008 (In Thousands)			
	Total	Special Mention	Substandard	Doubtful
Commercial, financial and Agricultural	\$ 589	136	453	
Real estate mortgage	11,844	3,517	8,327	
Real estate construction	8,199	1,408	6,791	
Consumer	1,174	325	811	38
	\$ 21,806	5,386	16,382	38

	December 31, 2007 (In Thousands)			
	Total	Special Mention	Substandard	Doubtful
Commercial, financial and Agricultural	\$ 1,935	913	1,022	
Real estate mortgage	5,104	2,433	2,413	258
Real estate construction	57	32	25	
Consumer	883	329	462	92
	\$ 7,979	3,707	3,922	350

The collateral values securing internally graded loans, based on estimates received by management, total approximately \$48,351,000 (\$26,198,000 related to real property, \$17,033,000 related to real estate construction, and \$5,120,000 related to personal and other loans). The internally classified loans have increased \$13,827,000, or 173.3%, from \$7,979,000 at December 31, 2007 to \$21,806,000 at June 30, 2008. Loans are listed as classified when information obtained about possible credit problems of the borrower has prompted management to question the ability of the borrower to comply with the repayment terms of the loan agreement. The loan classifications do not represent or result from trends or uncertainties which management expects will materially impact future operating results, liquidity or capital resources.

Residential real estate loans that are internally classified totaling \$11,844,000 and \$5,104,000 at June 30, 2008 and December 31, 2007, respectively, consist of 99 and 67 loans at June 30, 2008 and December 31 2007, respectively, that have been graded accordingly due to bankruptcies, inadequate cash flows and delinquencies. No material losses on these loans are currently anticipated by management.

Consumer	2,745	7.1	1,911	7.4
	\$ 10,475	100.0%	\$ 9,473	100.0%

Liquidity and Asset Management

The Company's management seeks to maximize net interest income by managing the Company's assets and liabilities within appropriate constraints on capital, liquidity and interest rate risk. Liquidity is the ability to maintain sufficient cash levels necessary to fund operations, meet the requirements of depositors and borrowers and fund attractive investment opportunities. Higher levels of liquidity bear corresponding costs, measured in terms of lower yields on short-term, more liquid earning assets and higher interest expense involved in extending liability maturities.

Liquid assets include cash and cash equivalents and securities and money market instruments that will mature within one year. At June 30, 2008, the Company's liquid assets totaled \$123,221,000. The Company maintains a formal asset and liability management process to quantify, monitor and control interest rate risk and to assist management in maintaining stability in the net interest margin under varying interest rate environments. The Company accomplishes this process through the development and implementation of lending, funding and pricing strategies designed to maximize net interest income under varying interest rate environments subject to specific liquidity and interest rate risk guidelines.

Analysis of rate sensitivity and rate gap analysis are the primary tools used to assess the direction and magnitude of changes in net interest income resulting from changes in interest rates. Included in the analysis are cash flows and maturities of financial instruments held for purposes other than trading, changes in market conditions, loan volumes and pricing and deposit volume and mix. These assumptions are inherently uncertain, and, as a result, net interest income can not be precisely estimated nor can the impact of higher or lower interest rates on net interest income be precisely predicted. Actual results will differ due to timing, magnitude and frequency of interest rate changes and changes in market conditions and management's strategies, among other factors.

The Company's primary source of liquidity is a stable core deposit base. In addition loan payments, investment security maturities and short-term borrowings provide a secondary source.

Table of Contents

***WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED***

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued

Interest rate risk (sensitivity) focuses on the earnings risk associated with changing interest rates. Management seeks to maintain profitability in both immediate and long-term earnings through funds management/interest rate risk management. The Company's rate sensitivity position has an important impact on earnings. Senior management of the Company meets monthly to analyze the rate sensitivity position of the subsidiary banks. These meetings focus on the spread between the Company's cost of funds and interest yields generated primarily through loans and investments.

The Company's securities portfolio consists of earning assets that provide interest income. For those securities classified as held-to-maturity, the Company has the ability and intent to hold these securities to maturity or on a long-term basis. Securities classified as available-for-sale include securities intended to be used as part of the Company's asset/liability strategy and/or securities that may be sold in response to changes in interest rate, prepayment risk, the need or desire to increase capital and similar economic factors. Securities totaling approximately \$2.5 million mature or will be subject to rate adjustments within the next twelve months.

A secondary source of liquidity is the Company's loan portfolio. At June 30, 2008, loans totaling approximately \$447.3 million either will become due or will be subject to rate adjustments within twelve months from the respective date. Continued emphasis will be placed on structuring adjustable rate loans.

As for liabilities, certificates of deposit of \$100,000 or greater totaling approximately \$309.7 million will become due or reprice during the next twelve months. Historically, there has been no significant reduction in immediately withdrawable accounts such as negotiable order of withdrawal accounts, money market demand accounts, demand deposit accounts and regular savings accounts. Management anticipates that there will be no significant withdrawals from these accounts in the future.

Management believes that with present maturities, the anticipated growth in deposit base, and the efforts of management in its asset/liability management program, liquidity will not pose a problem in the near term future. At the present time there are no known trends or any known commitments, demands, events or uncertainties that will result in or that are reasonably likely to result in the Company's liquidity changing in a materially adverse way.

Off Balance Sheet Arrangements

At June 30, 2008, the Company had unfunded loan commitments outstanding of \$183.3 million and outstanding standby letters of credit of \$20.9 million. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. If needed to fund these outstanding commitments, the Company's bank subsidiary has the ability to liquidate Federal funds sold or securities available-for-sale or on a short-term basis to borrow and purchase Federal funds from other financial institutions. Additionally, the Company's bank subsidiary could sell participations in these or other loans to correspondent banks. As mentioned above, the Company's bank subsidiary has been able to fund its ongoing liquidity needs through its stable core deposit base, loan payments, its investment security maturities and short-term borrowings.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations, Continued
Capital Position and Dividends**

At June 30, 2008, total stockholders' equity was \$120,243,000, or 8.6% of total assets, which compares with \$118,185,000, or 8.9% of total assets at December 31, 2007. The dollar increase in stockholders' equity during the six months ended June 30, 2008 results from the Company's net income of \$5,937,000, proceeds from the issuance of common stock related to exercise of stock options of \$83,000, the net effect of a \$5,610,000 unrealized loss on investment securities net of applicable income taxes of \$2,148,000, cash dividends declared of \$2,075,000 of which \$1,850,000 was reinvested under the Company's dividend reinvestment plan, a charge to retained earnings of \$284,000 relating to a change in accounting principle for executive officer deferred compensation, and \$9,000 related to stock option compensation.

In April 1999, the stockholders of the Company approved the Wilson Bank Holding Company 1999 Stock Option Plan (the "Stock Option Plan"). The Stock Option Plan provides for the granting of stock options, and authorizes the issuance of common stock upon the exercise of such options, for up to 200,000 shares of common stock, to officers and other key employees of the Company and its subsidiaries. Furthermore, the Company may issue additional shares under the Stock Option Plan as needed in order that the aggregate number of shares that may be issued during the term of the Stock Option Plan is equal to five percent (5%) of the shares of common stock then issued and outstanding. Under the Stock Option Plan, stock option awards may be granted in the form of incentive stock options or nonstatutory stock options, and are generally exercisable for up to ten years following the date such option awards are granted. Exercise prices of incentive stock options must be equal to or greater than 100% of the fair market value of the common stock on the grant date. As of June 30, 2008, the Company has granted key employees options to purchase a total of 78,171 shares of common stock. At June 30, 2008, options to purchase 29,620 shares were exercisable.

The Company's principal regulators have established minimum risk-based capital requirements and leverage capital requirements for the Company and its subsidiary bank. These guidelines classify capital into two categories of Tier I and total risk-based capital. Total risk-based capital consists of Tier I (or core) capital (essentially common equity less intangible assets) and Tier II capital (essentially qualifying long-term debt, of which the Company and subsidiary bank have none, and

a part of the allowance for possible loan losses). In determining risk-based capital requirements, assets are assigned risk-weights of 0% to 100%, depending on regulatory assigned levels of credit risk associated with such assets. The risk-based capital guidelines require the subsidiary bank and the Company to have a total risk-based capital ratio of 8.0% and a Tier I risk-based capital ratio of 4.0%. Set forth below is the Company's and the bank subsidiary's capital ratios as of June 30, 2008 and December 31, 2007.

	Wilson Bank Holding Company		Wilson Bank & Trust	
	Amount	Ratio	Amount	Ratio
	(Dollars in Thousands)		(Dollars in Thousands)	
June 30, 2008				
Actual:				
Total Capital	\$ 128,673	11.81%	\$ 128,524	11.80%
Tier 1 Capital	117,791	10.81	117,641	10.80
Leverage	117,791	8.51	117,641	8.49
For Capital Adequacy Purposes:				
Total Capital		8.0%		8.0%
Tier 1 Capital		4.0		4.0
Leverage		4.0		4.0
December 31, 2007				
Actual:				
Total Capital	\$ 123,242	11.67%	\$ 123,572	12.08%
Tier 1 Capital	113,769	10.77	113,350	11.08
Leverage	113,769	8.63	113,350	8.60
For Capital Adequacy Purposes:				
Total Capital		8.0		8.0
Tier 1 Capital		4.0		4.0
Leverage		4.0		4.0

The Company is considered to be well capitalized under regulatory definition.

Impact of Inflation

Although interest rates are significantly affected by inflation, the inflation rate is immaterial when reviewing the Company's results of operations.

**WILSON BANK HOLDING COMPANY
FORM 10-Q, CONTINUED**

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company's primary component of market risk is interest rate volatility. Fluctuations in interest rates will ultimately impact both the level of income and expense recorded on a large portion of the Company's assets and liabilities, and the market value of all interest-earning assets and interest-bearing liabilities, other than those which possess a short term to maturity. Based upon the nature of the Company's operations, the Company is not subject to foreign currency exchange or commodity price risk.

Interest rate risk (sensitivity) management focuses on the earnings risk associated with changing interest rates. Management seeks to maintain profitability in both immediate and long-term earnings through funds management/interest rate risk management. The Company's rate sensitivity position has an important impact on earnings. Senior management of the Company meets monthly to analyze the rate sensitivity position. These meetings focus on the spread between the cost of funds and interest yields generated primarily through loans and investments.

There have been no material changes in reported market risks during the six months ended June 30, 2008.

Item 4. Controls and Procedures

The Company maintains disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934 (the Exchange Act), that are designated to ensure that information required to be disclosed by it in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to the Company's management, including its Chief Executive Officer and its Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. The Company carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report. Based on the evaluation of these disclosure controls and procedures, its Chief Executive Officer and its Chief Financial Officer concluded that its disclosure controls and procedures were effective.

There were no changes in the Company's internal control over financial reporting during the Company's fiscal quarter ended June 30, 2008 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
