Exhibit No.	Description

Edgar Filing: STATE AUTO FINANCIAL CORP - Form 8-K

99.1 Press release issued by State Auto Financial Corporation on April 30, 2003.

ITEM 9: Regulation FD Disclosure

The information in this Current Report on Form 8-K, including the exhibit hereto, is being furnished, not filed, under "Item 12. Disclosure of Results of Operations and Financial Condition" and is being provided under this "Item 9. Regulation FD Disclosure" in accordance with interim procedures promulgated by the Securities and Exchange Commission in Release No. 33-8216.

On April 30, 2003, the Registrant issued a press release announcing earnings for the first quarter of 2003 (the "Release"). The full text of the Release is attached as Exhibit 99.1 to this Current Report on Form 8-K and is incorporated by reference herein.

The Release included a non-GAAP financial measure, net operational earnings per share. Net operational earnings per share is equal to GAAP net earnings per share other than that net operational earnings excludes realized capital gains and losses, net of applicable taxes, on investment activity for the period being reported. As disclosed in the Release, GAAP net earnings were \$0.53 per diluted share while net operational earnings were \$0.47 per diluted share. For the first quarter of 2003, the difference between GAAP net earnings per share and net operational earnings per share was \$0.06 of realized capital gains.

Management uses net operational earnings because it believes this calculation better indicates the Company's operational performance than GAAP net earnings because net operational earnings exclude sometimes volatile realized capital gains/losses that are usually one time events. Net operational earnings provide a more stable platform on which to predict future earnings of the Company.
