Item 12. Results of Operations and Financial Condition

On October 16, 2003, the Company issued the following press release:

**SECOND BANCORP
REPORTS THIRD QUARTER EARNINGS**

Warren, Ohio, October 16, 2003 **SECOND BANCORP INCORPORATED (Nasdaq SECD , SECDP)** reported third quarter 2003 net income of \$4,907,000, down 11% from the \$5,536,000 earned during the same period last year. Year-to-date earnings were \$19,006,000, an increase of 30.4% over net income reported for the first nine months of 2002. Diluted earnings for the quarter were \$.51 per share, 7% lower than the \$.55 reported last year and, for the first three quarters of the year, were \$1.97 per share, 36% higher than the \$1.45 reported for the same period last year. Year-to-date 2003 earnings include a one time \$3.65 million (or \$.38 per diluted share) after-tax gain on the sale of two banking centers completed during the first quarter. Excluding this non-recurring gain-on-sale, earnings for the year's first nine months were \$15,354,000 or \$1.59 per diluted share, 8.9% above year-ago results.

Chief Financial Officer and Treasurer David L. Kellerman indicated In addition to core business activity, third quarter earnings were influenced by \$3,566,000 in gains on the sale of securities as the Company reduced its holdings of longer duration securities to minimize portfolio risk as interest rates rise. Financial performance for the quarter was also affected by our large mortgage servicing rights (MSR) portfolio which, net of hedging activity intended to reduce volatility in that line of business, produced a loss of \$3,229,000 for the reporting period compared to gains of \$1,513,000 in the prior quarter. Combined net mortgage banking activities, which include the gain on sale of mortgage loans, generated a loss of \$1.2 million for the third quarter of 2003 versus gains of \$2.1 million for the same quarter last year and \$6.6 million for the linked quarter. Net mortgage activities generated profit of \$9.8 million for the first nine months of 2003 versus \$3.7 million for the same period last year.

Reflecting the Company's financial results for the quarter, key performance ratios were generally restrained. Return on average assets (ROA) was .98% compared to 1.25% for the same period last year and return on average equity (ROE) was 14.56% for the quarter compared to 16.22% a year earlier. Year-to-date, ROA was 1.31% (1.06% excluding the first quarter non-recurring gain on sale) compared to 1.12% in 2002 and ROE was 18.57% (15.00% excluding the referenced first quarter event) compared to 14.59% a year ago. The Company's net interest margin for the quarter was 3.06%, 43 basis points less than the 3.49% reported last year.

Excluding securities gains, non-interest income for the quarter was \$3.49 million versus \$6.33 million for the same period last year largely reflecting the loss in net MSR valuation referred to in Mr. Kellerman's comments above. Also contributing to lower non-interest income was MSR amortization during the quarter which increased to \$2.7 million from \$1.1 million for last year's third quarter. Those items more than offset a \$1.5 million increase in gains-on-sale of loans from the same quarter last year. Non-interest expenses for the third quarter were \$13.1 million, 6.7% lower than was reported for the prior quarter but 10.4% higher than a year ago primarily reflecting increased salaries and other operating expenses.

President and Chief Executive Officer Rick L. Blossom stated "The combination of persistently low short-term interest rates and generally rising long-term rates during recent months have begun to have a negative impact on Second Bancorp's earnings performance. That impact is the result of a compressed net interest margin and a significant reduction in revenue generated by our important mortgage lending line of business. Margin compression continues to reduce the profitability of our \$1.3 billion loan and \$600 million securities portfolios and rising interest rates have largely eliminated mortgage re-financing activity and, therefore, fee income generated by the sale of loans in the secondary market. While we are developing strategies to reduce the effect of these banking realities, we expect them to restrain earnings in the fourth quarter. Consequently, and excluding the first quarter gain on the sale of branches, we may miss our most recent \$2.08 to \$2.13 per share earnings guidance for 2003 by as much as 10%."

Credit quality remains a focal point for Second Bancorp. Though net loan charge-offs for the quarter were 20% lower than a year ago, non-performing loans continued to grow in absolute terms and as a percentage of total loans. Non-performing loans at quarter-end reached \$22.6 million, \$2.2 million higher than at the end of the prior quarter and were 1.68% of total loans compared to 1.65% at the end of the second quarter. The Company's reserve for loan losses as a percentage of period-end loans was 1.41%, slightly lower than was reported for the prior quarter.

The Company also reported that its Board of Directors declared a nineteen cent (\$.19) per common share dividend payable October 31, 2003 to shareholders of record on October 15. That dividend is unchanged from the second quarter of this year and is 5.6% higher than the dividend paid for last year's third quarter.

This announcement contains forward-looking statements that involve risk and uncertainties, including changes in general economic and financial market conditions and the Company's ability to execute its business plans. Although management believes the expectations reflected in such forward-looking statements are reasonable, actual results may differ materially.
