

LINCOLN NATIONAL CORP
Form S-3ASR
September 20, 2007

As filed with the Securities and Exchange Commission on September 20, 2007.

File No. 333-

SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM S-3
REGISTRATION STATEMENT
UNDER
THE SECURITIES ACT OF 1933

Lincoln National Corporation

(Exact Name of Registrant as Specified in Its Charter)

Indiana

(State or Other Jurisdiction of Incorporation or Organization)

35-1140070

(I.R.S. Employer Identification No.)

Centre Square West Tower
1500 Market Street, Suite 3900
Philadelphia, PA 19102

(215) 448-1400

(Address, Including Zip Code, and Telephone Number, Including Area Code, of Registrant's Principal Executive Offices)

Lincoln National Corporation
Executive Deferred Compensation Plan for Agents

(Full Title of Plan)

Dennis L. Schoff
Senior Vice President & General Counsel
Lincoln National Corporation
Centre Square West Tower
1500 Market Street, Suite 3900
Philadelphia, PA 19102

(215) 448-1400

(Name, Address, Including Zip Code, and Telephone Number, Including Area Code, of Agent for Service)

Approximate date of commencement of proposed sale to the public: From time to time after the effective date of this registration statement.

If the only securities being registered on this Form are being offered pursuant to dividend or interest reinvestment plans, please check the following box. []

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, other than securities offered only in connection with dividend or interest reinvestment, check the following box. [X]

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. [] _____

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration number of the earlier effective registration statement for the same offering. [] _____

If this Form is a registration statement pursuant to General Instruction I.D. or a post-effective amendment thereto that shall become effective upon filing with the Commission pursuant to Rule 462(e) under the Securities Act, check the following box. [X]

If this Form is a post-effective amendment to a registration statement filed pursuant to General Instruction I.D. filed to register additional securities or additional classes of securities pursuant to Rule 413(b) under the Securities Act, check the following box. []

CALCULATION OF REGISTRATION FEE

Title of Securities to be registered	Amount to be registered	Proposed Maximum offering price per unit	Proposed maximum aggregate offering price	Amount of registration fee
Deferred Compensation Obligations	\$10,000,000 ⁽¹⁾	100%	\$10,000,000 ⁽²⁾	\$307

(1) The Deferred Compensation Obligations are unsecured and unsubordinated obligations of Lincoln National Corporation to pay deferred compensation in the future in accordance with the terms of the Lincoln National Corporation Executive Deferred Compensation Plan for Agents.

(2) The fee is calculated pursuant to Rule 457(h) under the Securities Act of 1933, as amended (the "Securities Act").

PROSPECTUS

\$10,000,000

**LINCOLN NATIONAL CORPORATION
DEFERRED COMPENSATION OBLIGATIONS**

Offered as set forth in this Prospectus pursuant to the

**LINCOLN NATIONAL CORPORATION
EXECUTIVE DEFERRED COMPENSATION PLAN
FOR AGENTS**

This Prospectus relates to shares of our Deferred Compensation Obligations under the Plan to be offered and sold to a select group of "Participants", consisting of highly compensated individuals holding a full-time agent's contract with The Lincoln National Life Insurance Company, or LNL, and of similarly situated individuals associated with affiliates and subsidiaries of Lincoln National Corporation.

The filing of this Registration Statement is not an admission by us that the Deferred Compensation Obligations as defined below are securities or are subject to the registration requirements of the Securities Act.

Investing in our securities involves risks. See "Risk Factors" beginning on page 4 of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or passed upon the adequacy or accuracy of this prospectus supplement and the accompanying prospectus. Any representation to the contrary is a criminal offense.

You should rely only on the information contained in or incorporated by reference in this prospectus. We have not authorized anyone to provide you with information that is different. We are not making an offer of these securities in any state or jurisdiction where the offer is not permitted. The information contained or incorporated by reference in this prospectus is accurate only as of the respective dates of such information. Our business, financial condition, results of operations and prospects may have changed since those dates.

The date of this Prospectus is September 20, 2007.

It is important for you to read and consider all information contained in this prospectus in making your investment decision. You should also read and consider the additional information under the caption “Where You Can Find More Information”.

Unless otherwise indicated, all references in this prospectus to “LNC,” “we,” “our,” “us,” or similar terms refer to Lincoln National Corporation together with its subsidiaries.

REQUIRED DISCLOSURE FOR NORTH CAROLINA RESIDENTS

THE COMMISSIONER OF INSURANCE OF THE STATE OF NORTH CAROLINA HAS NOT APPROVED OR DISAPPROVED OF THIS OFFERING NOR HAS THE COMMISSIONER PASSED UPON THE ACCURACY OR ADEQUACY OF THIS PROSPECTUS.

ABOUT THIS PROSPECTUS

This Prospectus also constitutes a Summary Plan Description, or Prospectus/SPD, and highlights the key features of The Lincoln National Corporation Executive Deferred Compensation Plan for Agents, which is referred to in this Prospectus/SPD as the Plan. Every effort has been made to ensure that this Prospectus/SPD provides an accurate, non-technical description of the Plan's provisions, as well as your rights and responsibilities under the Plan. However, this Prospectus/SPD does not describe all the details of the Plan. The Plan Document explains your benefits, rights and responsibilities in more detail, and is the controlling document in the case of any discrepancy between this Prospectus/SPD and the Plan Document. Please read each section of this Prospectus/SPD carefully. If you have any questions about the Plan that are not answered in this Prospectus/SPD, or if you would like a copy of the Plan Document, such additional information can be obtained (without charge) from Nolan Financial Group by calling Nolan's Deferred Compensation Customer Service Line at this number: 888-907-8633.

This booklet is not a substitute for the official Plan Document! If this Prospectus/SPD omits details of the Plan or disagrees with the official Plan Document in any way, the Plan Document will govern.

IRS CIRCULAR 230 NOTICE: As required by the IRS, we inform you that any tax advice contained in this Prospectus/SPD was not intended or written to be used or referred to, and cannot be used or referred to (i) for the purpose of avoiding penalties under the Internal Revenue Code, or (ii) in promoting, marketing, or recommending to another party any transaction or matter addressed in this Prospectus/SPD. Individuals should seek tax advice based on their own particular circumstances from an independent tax advisor.

THE COMPANY

We are a holding company, which operates multiple insurance and investment management businesses as well as broadcasting and sports programming business through subsidiary companies. Through our business segments, we sell a wide range of wealth protection, accumulation and retirement income products and solutions. These products include institutional and/or retail fixed and indexed annuities, variable annuities, universal life insurance, variable universal life insurance, term life insurance, mutual funds and managed accounts. LNC was organized under the laws of the state of Indiana in 1968, and maintains its principal executive offices in Philadelphia, Pennsylvania. We expect to relocate our principal executive offices to Radnor, Pennsylvania in the third quarter of 2007. “Lincoln Financial Group” is the marketing name for LNC and its subsidiary companies. At June 30, 2007, LNC had consolidated assets of \$187.7 billion and consolidated shareholders’ equity of \$11.8 billion.

We provide products and services in five operating businesses and report results through seven business segments, as follows:

- (1) Individual Markets, which includes the Individual Annuities and Individual Life Insurance segments,
- (2) Employer Markets, which includes the Retirement Products and Group Protection segments,
- (3) Investment Management, which is an operating business and segment,
- (4) Lincoln UK, which is an operating business and segment, and
- (5) Lincoln Financial Media, which is an operating business and segment.

On June 7, 2007, we announced plans to explore strategic options for Lincoln Financial Media. We are evaluating a range of options including, but not limited to, divestiture strategies. At this time, there should be no assumption that this strategic review will result in any type of transaction.

We also have “Other Operations,” which includes the financial data for operations that are not directly related to the business segments, unallocated corporate items (such as investment income on investments related to the amount of statutory surplus in our insurance subsidiaries that is not allocated to our business units and other corporate investments, interest expense on short-term and long-term borrowings, and certain expenses, including restructuring and merger-related expenses) and the historical results of the former reinsurance segment, which was sold to Swiss Re Life & Health America Inc. (“Swiss Re) in the fourth quarter of 2001, along with the ongoing amortization of deferred gain on the indemnity reinsurance portion of the transaction with Swiss Re.

FORWARD-LOOKING STATEMENTS—CAUTIONARY LANGUAGE

Except for historical information contained or incorporated by reference in this prospectus or any prospectus supplement, statements made in this prospectus or incorporated by reference in this prospectus or any prospectus supplement are “forward-looking statements” within the meaning of the Private Securities Litigation Reform Act of 1995 (“PSLRA”). A forward-looking statement is a statement that is not a historical fact and, without limitation, includes any statement that may predict, forecast, indicate or imply future results, performance or achievements, and may contain words like: “believe”, “anticipate”, “expect”, “estimate”, “project”, “will”, “shall” and other words or phrases with similar meaning in connection with a discussion of future operating or financial performance. In particular, these include statements relating to future actions, prospective services or products, future performance or results of current and anticipated services or products, sales efforts, expenses, the outcome of contingencies such as legal proceedings, operations, trends or financial results. LNC claims the protection afforded by the safe harbor for forward-looking statements provided by the PSLRA.

Forward-looking statements involve risks and uncertainties that may cause actual results to differ materially from the results contained in the forward-looking statements. Risks and uncertainties that may cause actual results to vary materially, some of which are described within the forward-looking statements include, among others:

- Problems arising with the ability to successfully integrate our and Jefferson-Pilot Corporation's businesses, which may affect our ability to operate as effectively and efficiently as expected or to achieve the expected synergies from the merger or to achieve such synergies within our expected timeframe;
- Legislative, regulatory or tax changes, both domestic and foreign, that affect the cost of, or demand for, LNC's products, the required amount of reserves and/or surplus, or otherwise affect our ability to conduct business, including changes to statutory reserves and/or risk-based capital requirements related to secondary guarantees under universal life and variable annuity products such as Actuarial Guideline VACARVM; restrictions on revenue sharing and 12b-1 payments; and the potential for U.S. Federal tax reform;
- The initiation of legal or regulatory proceedings against LNC or its subsidiaries and the outcome of any legal or regulatory proceedings, such as: (a) adverse actions related to present or past business practices common in businesses in which LNC and its subsidiaries compete; (b) adverse decisions in significant actions including, but not limited to, actions brought by federal and state authorities, and extra-contractual and class action damage cases; (c) new decisions that result in changes in law; and (d) unexpected trial court rulings;
- Changes in interest rates causing a reduction of investment income, the margins of LNC's fixed annuity and life insurance businesses and demand for LNC's products;
- A decline in the equity markets causing a reduction in the sales of LNC's products, a reduction of asset fees that LNC charges on various investment and insurance products, an acceleration of amortization of deferred acquisition costs ("DAC"), value of business acquired ("VOBA"), deferred sales inducements ("DSI") and deferred front-end loads ("DFEL") and an increase in liabilities related to guaranteed benefit features of LNC's variable annuity products;
- Ineffectiveness of LNC's various hedging strategies used to offset the impact of declines in and volatility of the equity markets;
- A deviation in actual experience regarding future persistency, mortality, morbidity, interest rates or equity market returns from LNC's assumptions used in pricing its products, in establishing related insurance reserves, and in the amortization of intangibles that may result in an increase in reserves and a decrease in net income including as a result of investor-owned life insurance business;

- Changes in accounting principles generally accepted in the United States that may result in unanticipated changes to LNC's net income, including the impact of the applications of Statement of Position 07-1 and Statements of Financial Accounting Standard 157 and 159;
- Lowering of one or more of LNC's debt ratings issued by nationally recognized statistical rating organizations, and the adverse impact such action may have on LNC's ability to raise capital and on its liquidity and financial condition;
- Lowering of one or more of the insurer financial strength ratings of LNC's insurance subsidiaries and the adverse impact such action may have on the premium writings, policy retention, and profitability of its insurance subsidiaries;
- Significant credit, accounting, fraud or corporate governance issues that may adversely affect the value of certain investments in the portfolios of LNC's companies requiring that LNC realize losses on such investments;
- The impact of acquisitions and divestitures, restructurings, product withdrawals and other unusual items, including LNC's ability to integrate acquisitions and to obtain the anticipated results and synergies from acquisitions;
 - The adequacy and collectibility of reinsurance that LNC has purchased;
- Acts of terrorism, war, or other man-made and natural catastrophes that may adversely affect LNC's businesses and the cost and availability of reinsurance;
- Competitive conditions, including pricing pressures, new product offerings and the emergence of new competitors, that may affect the level of premiums and fees that LNC can charge for its products;
- The unknown impact on LNC's business resulting from changes in the demographics of LNC's client base, as aging baby-boomers move from the asset-accumulation stage to the asset-distribution stage of life;
- Loss of key management, portfolio managers in the Investment Management segment, financial planners or wholesalers; and
- Changes in general economic or business conditions, both domestic and foreign, that may be less favorable than expected and may affect foreign exchange rates, premium levels, claims experience, the level of pension benefit costs and funding, and investment results.

The risks included here are not exhaustive. Other sections of this prospectus, including "Risk Factors" beginning on page 4 below, our annual reports on Form 10-K, Quarterly Reports on Form 10-Q, current reports on Form 8-K and other documents filed with the Securities and Exchange Commission include additional factors which could impact our business and financial performance. Moreover, we operate in a rapidly changing and competitive environment. New risk factors emerge from time to time and it is not possible for management to predict all such risk factors.

Further, it is not possible to assess the impact of all risk factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements. Given these risks and uncertainties, investors should not place undo reliance on forward-looking statements as a prediction of actual results. In addition, we disclaim any obligation to update any forward-looking statements to reflect events or circumstances that occur after the date of this prospectus.

RISK FACTORS

You should carefully consider the risks described below and those incorporated by reference into this prospectus before making an investment decision. The risks and uncertainties described below and incorporated by reference into this prospectus are not the only ones facing our company. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our business operations. If any of these risks actually occur, our business, financial condition and results of operations could be materially affected. In that case, the value of our securities could decline substantially.

Risk Factors in connection with Our Business

Our reserves for future policy benefits and claims related to our current and future business as well as businesses we may acquire in the future may prove to be inadequate.

Our reserves for future policy benefits and claims may prove to be inadequate. We establish and carry, as a liability, reserves based on estimates of how much we will need to pay for future benefits and claims. For our life insurance and annuity products, we calculate these reserves based on many assumptions and estimates, including estimated premiums we will receive over the assumed life of the policy, the timing of the event covered by the insurance policy, the lapse rate of the policies, the amount of benefits or claims to be paid and the investment returns on the assets we purchase with the premiums we receive. The assumptions and estimates we use in connection with establishing and carrying our reserves are inherently uncertain. Accordingly, we cannot determine with precision the ultimate amounts that we will pay, or the timing of payment of, actual benefits and claims or whether the assets supporting the policy liabilities will grow to the level we assume prior to payment of benefits or claims. If our actual experience is different from our assumptions or estimates, our reserves may prove to be inadequate in relation to our estimated future benefits and claims. As a result, we would incur a charge to our earnings in the quarter in which we increase our reserves.

Because the equity markets and other factors impact the profitability and expected profitability of many of our products, changes in equity markets and other factors may significantly affect our business and profitability.

The fee revenue that we earn on equity-based variable annuities, unit-linked accounts, variable universal life insurance policies and investment advisory business, is based upon account values. Because strong equity markets result in higher account values, strong equity markets positively affect our net income through increased fee revenue. Conversely, a weakening of the equity markets results in lower fee income and may have a material adverse effect on our results of operations and capital resources.

The increased fee revenue resulting from strong equity markets increases the expected gross profits (“EGPs”) from variable insurance products as do better than expected lapses, mortality rates and expenses. As a result, the higher EGPs may result in lower net amortized costs related to DAC, DSI, VOBA, and DFEL. However, a decrease in the equity market as well as increases in lapses, mortality rates and expenses depending upon their significance, may result in higher net amortized costs associated with DAC, DSI, VOBA and DFEL and may have a material adverse effect on our results of operations and capital resources. For more information on DAC, DSI, VOBA and DFEL amortization, see “Item 7—Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” of the Form 10-K for the year ended December 31, 2006.

Changes in the equity markets, interest rates and/or volatility affects the profitability of our products with guaranteed benefits, therefore, such changes may have a material adverse effect on our business and profitability.

The amount of reserves related to the guaranteed minimum death benefits (“GMDB”) for variable annuities is tied to the difference between the value of the underlying accounts and the guaranteed death benefit, calculated using a benefit ratio approach. The GMDB reserves take into account the present value of total expected GMDB payments and the present value of total expected assessments over the life of the contract and claims and assessments to date. The amount of reserves related to the guaranteed minimum withdrawal benefits (“GMWB”) and guaranteed income benefits (“GIB”) for variable annuities is based on the fair value of the underlying benefit. Both the level of expected GMDB payments and expected total assessments used in calculating the benefit ratio are affected by the equity markets. The liabilities related to GMWB and GIB benefits valued at fair value are impacted by changes in equity markets, interest rates and volatility. Accordingly, strong equity markets will decrease the amount of GMDB reserves that we must carry, and strong equity markets, increases in interest rates and decreases in volatility will generally decrease the fair value of the liabilities underlying the GMWB and GIB benefits.

Conversely, a decrease in the equity markets will increase the net amount at risk under the GMDB benefits we offer as part of our variable annuity products, which has the effect of increasing the amount of GMDB reserves that we must carry. Also, a decrease in the equity market along with a decrease in interest rates and an increase in volatility will generally result in an increase in the fair value of the liabilities underlying GMWB and GIB benefits, which has the effect of increasing the amount of GMWB and GIB reserves that we must carry. Such an increase in reserves would result in a charge to our earnings in the quarter in which we increase our reserves. We maintain a customized dynamic hedge program that is designed to mitigate the risks associated with income volatility around the change in reserves on guaranteed benefits. However, the hedge positions may not be effective to exactly offset the changes in the carrying value of the guarantees due to, among other things, the time lag between changes in their values and corresponding changes in the hedge positions, extreme swings or liquidity in the equity and derivatives markets, contractholder behavior different than expected, and divergence between the performance of the underlying funds and hedging indices. For more information on our hedging program, see “Item 7—Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” of the Form 10-K for the year ended December 31, 2006.

Changes in interest rates may cause interest rate spreads to decrease and may result in increased contract withdrawals.

Because the profitability of our fixed annuity and interest-sensitive whole life, universal life and fixed portion of variable universal life insurance business depends in part on interest rate spreads, interest rate fluctuations could negatively affect our profitability. Changes in interest rates may reduce both our profitability from spread businesses and our return on invested capital. Some of our products, principally fixed annuities and interest-sensitive whole life, universal life and the fixed portion of variable universal life insurance, have interest rate guarantees that expose us to the risk that changes in interest rates will reduce our “spread,” or the difference between the amounts that we are required to pay under the contracts and the amounts we are able to earn on our general account investments intended to support our obligations under the contracts. Declines in our spread or instances where the returns on our general account investments are not enough to support the interest rate guarantees on these products could have a material adverse effect on our businesses or results of operations.

In periods of increasing interest rates, we may not be able to replace the assets in our general account with higher yielding assets needed to fund the higher crediting rates necessary to keep our interest sensitive products competitive. We therefore may have to accept a lower spread and thus lower profitability or face a decline in sales and greater loss of existing contracts and related assets. In periods of declining interest rates, we have to reinvest the cash we receive as interest or return of principal on our investments in lower yielding instruments than available. Moreover, borrowers may prepay fixed-income securities, commercial mortgages and mortgage-backed securities in our general account in order to borrow at lower market rates, which exacerbates this risk. Because we are entitled to reset the interest rates on our fixed rate annuities only at limited, pre-established intervals, and since many of our policies have guaranteed minimum interest or crediting rates, our spreads could decrease and potentially become negative.

Increases in interest rates may cause increased surrenders and withdrawals of insurance products. In periods of increasing interest rates, policy loans and surrenders and withdrawals of life insurance policies and annuity contracts may increase as policyholders seek to buy products with perceived higher returns. This process may lead to a flow of cash out of our businesses. These outflows may require investment assets to be sold at a time when the prices of those assets are lower because of the increase in market interest rates, which may result in realized investment losses. A sudden demand among consumers to change product types or withdraw funds could lead us to sell assets at a loss to meet the demand for funds.

A downgrade in our financial strength or credit ratings could limit our ability to market products, increase the number or value of policies being surrendered and/or hurt our relationships with creditors.

Nationally recognized rating agencies rate the financial strength of our principal insurance subsidiaries and rate our debt. Ratings are not recommendations to buy our securities. Each of the rating agencies reviews its ratings periodically, and our current ratings may not be maintained in the future. Please see “Item 1. Business--Ratings” of the Form 10-K for the year ended December 31, 2006.

Our financial strength ratings, which are intended to measure our ability to meet policyholder obligations, are an important factor affecting public confidence in most of our products and, as a result, our competitiveness. The interest rates we pay on our borrowings are largely dependent on our credit ratings. A downgrade of the financial strength rating of one of our principal insurance subsidiaries could affect our competitive position in the insurance industry and make it more difficult for us to market our products as potential customers may select companies with higher financial strength ratings. This could lead to a decrease in fees as outflows of assets increase, and therefore, result in lower fee income. Furthermore, sales of assets to meet customer withdrawal demands could also result in losses, depending on market conditions. A downgrade of our debt ratings could affect our ability to raise additional debt with terms and conditions similar to our current debt, and accordingly, likely increase our cost of capital. In addition, a downgrade of these ratings could make it more difficult to raise capital to refinance any maturing debt obligations, to support business growth at our insurance subsidiaries and to maintain or improve the current financial strength ratings of our principal insurance subsidiaries described above.

A drop in the rankings of the mutual funds that we manage as well as a loss of key portfolio managers could result in lower advisory fees.

While mutual funds are not rated, per se, many industry periodicals and services, such as Lipper, provide rankings of mutual fund performance. These rankings often have an impact on the decisions of customers regarding which mutual funds to invest in. If the rankings of the mutual funds for which we provide advisory services decrease materially, the funds' assets may decrease as customers leave for funds with higher performance rankings. Similarly, a loss of our key portfolio managers who manage mutual fund investments could result in poorer fund performance, as well as customers leaving these mutual funds for new mutual funds managed by the portfolio managers. Any loss of fund assets would decrease the advisory fees that we earn from such mutual funds, which are generally tied to the amount of fund assets and performance. This would have an adverse effect on our results of operations.

Our businesses are heavily regulated and changes in regulation may reduce our profitability.

Our insurance subsidiaries are subject to extensive supervision and regulation in the states in which we do business. The supervision and regulation relate to numerous aspects of our business and financial condition. The primary purpose of the supervision and regulation is the protection of our insurance policyholders, and not our investors. The extent of regulation varies, but generally is governed by state statutes. These statutes delegate regulatory, supervisory and administrative authority to state insurance departments. This system of supervision and regulation covers, among other things:

- standards of minimum capital requirements and solvency, including risk-based capital measurements;
- restrictions of certain transactions between our insurance subsidiaries and their affiliates;
- restrictions on the nature, quality and concentration of investments;
- restrictions on the types of terms and conditions that we can include in the insurance policies offered by our primary insurance operations;

- limitations on the amount of dividends that insurance subsidiaries can pay;
- the existence and licensing status of the company under circumstances where it is not writing new or renewal business;
- certain required methods of accounting;
- reserves for unearned premiums, losses and other purposes; and
- assignment of residual market business and potential assessments for the provision of funds necessary for the settlement of covered claims under certain policies provided by impaired, insolvent or failed insurance companies.

We may be unable to maintain all required licenses and approvals and our business may not fully comply with the wide variety of applicable laws and regulations or the relevant authority's interpretation of the laws and regulations, which may change from time to time. Also, regulatory authorities have relatively broad discretion to grant, renew or revoke licenses and approvals. If we do not have the requisite licenses and approvals or do not comply with applicable regulatory requirements, the insurance regulatory authorities could preclude or temporarily suspend us from carrying on some or all of our activities or impose substantial fines. Further, insurance regulatory authorities have relatively broad discretion to issue orders of supervision, which permit such authorities to supervise the business and operations of an insurance company. As of June 30, 2007, no state insurance regulatory authority had imposed on us any substantial fines or revoked or suspended any of our licenses to conduct insurance business in any state or issued an order of supervision with respect to our insurance subsidiaries, which would have a material adverse effect on our results of operations or financial condition.

In addition, LFN and LFD, as well as our variable annuities and variable life insurance products, are subject to regulation and supervision by the SEC and the National Association of Securities Dealers ("NASD"). Our Investment Management segment, like other investment management companies, is subject to regulation and supervision by the SEC, NASD, the Municipal Securities Rulemaking Board, the Pennsylvania Department of Banking and jurisdictions of the states, territories and foreign countries in which they are licensed to do business. Lincoln UK is subject to regulation by the Financial Services Authority in the U.K. These laws and regulations generally grant supervisory agencies and self-regulatory organizations broad administrative powers, including the power to limit or restrict the subsidiaries from carrying on their businesses in the event that they fail to comply with such laws and regulations. Finally, our television and radio operations require a license, subject to periodic renewal, from the FCC to operate. While management considers the likelihood of a failure to renew remote, any station that fails to receive renewal would be forced to cease operations.

Many of the foregoing regulatory or governmental bodies have the authority to review our products and business practices and those of our agents and employees. In recent years, there has been increased scrutiny of our businesses by these bodies, which has included more extensive examinations, regular "sweep" inquiries and more detailed review of disclosure documents. These regulatory or governmental bodies may bring regulatory or other legal actions against us if, in their view, our practices, or those of our agents or employees, are improper. These actions can result in substantial fines, penalties or prohibitions or restrictions on our business activities and could have a material adverse effect on our business, results of operations or financial condition.

For further information on regulatory matters relating to us, see "Item 1. Business--Regulatory" of the Form 10-K for the year ended December 31, 2006.

Legal and regulatory actions are inherent in our businesses and could result in financial losses or harm our businesses.

There continues to be a significant amount of federal and state regulatory activity in the industry relating to numerous issues including, but not limited to, market timing and late trading of mutual fund and variable and indexed insurance products and broker-dealer access arrangements. Like others in the industry, we have received inquiries including requests for information and/or subpoenas from various authorities including the SEC, NASD and the New York Attorney General, as well as notices of potential proceedings from the SEC and NASD. We are in the process of responding to, and in some cases have settled or are in the process of settling, certain of these inquiries and potential proceedings. We continue to cooperate fully with such authorities. In addition, we are, and in the future may be, subject to legal actions in the ordinary course of our insurance and investment management operations, both domestically and internationally. Pending legal actions include proceedings relating to aspects of our businesses and operations that are specific to us and proceedings that are typical of the businesses in which we operate. Some of these proceedings have been brought on behalf of various alleged classes of complainants. In certain of these matters, the plaintiffs are seeking large and/or indeterminate amounts, including punitive or exemplary damages. Substantial legal liability in these or future legal or regulatory actions could have a material financial effect or cause significant harm to our reputation, which in turn could materially harm our business prospects.

Changes in U.S. federal income tax law could make some of our products less attractive to consumers and increase our tax costs.

The Economic Growth and Tax Relief Reconciliation Act of 2001 (“EGTRRA”) as well as the Jobs and Growth Tax Relief Reconciliation Act of 2003 contain provisions that have and will continue, near term, to significantly lower individual tax rates. These may have the effect of reducing the benefits of deferral on the build-up of value of annuities and life insurance products. EGTRRA also includes provisions that will eliminate, over time, the estate, gift and generation-skipping taxes and partially eliminate the step-up in basis rule applicable to property held in a decedent’s estate. Many of these provisions expire in 2010, unless extended. The Bush Administration continues to propose that many of the foregoing rate reductions, as well as elimination of the estate tax, be made permanent, and continues to propose several tax-favored savings initiatives, that, if enacted by Congress, could also adversely affect the sale of our annuity, life and tax-qualified retirement products and increase the surrender of such products. Although we cannot predict the overall effect on the sales of our products of the tax law changes included in these Acts, some of these changes might hinder our sales and result in the increased surrender of insurance products.

In addition, changes to the Internal Revenue Code, administrative rulings or court decisions could increase our effective tax rate. In this regard, on August 16, 2007, the Internal Revenue Service issued a revenue ruling which purports, among other things, to modify the calculation of separate account deduction for dividends received by life insurance companies. We are currently evaluating the potential effect of the ruling on our tax position.

Our risk management policies and procedures may leave us exposed to unidentified or unanticipated risk, which could negatively affect our businesses or result in losses.

We have devoted significant resources to develop our risk management policies and procedures and expect to continue to do so in the future. Nonetheless, our policies and procedures to identify, monitor and manage risks may not be fully effective. Many of our methods of managing risk and exposures are based upon our use of observed historical market behavior or statistics based on historical models. As a result, these methods may not predict future exposures, which could be significantly greater than the historical measures indicate, such as the risk of pandemics causing a large number of deaths. Other risk management methods depend upon the evaluation of information regarding markets, clients, catastrophe occurrence or other matters that is publicly available or otherwise accessible to us, which may not always be accurate.
