UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

Annual Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 for the fiscal year ended December 31, 2013 or

Transition Report Pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934

Commission file number 1-8002

THERMO FISHER SCIENTIFIC INC.
(Exact name of Registrant as specified in its charter)

Delaware
(State of incorporation or organization)

04-2209186
(I.R.S. Employer Identification No.)

81 Wyman Street
Waltham, Massachusetts
(Address of principal executive offices)

02451
(Zip Code)

Registrant's telephone number, including area code: (781) 622-1000

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of each exchange on which registered
Common Stock, \$1.00 par value	New York Stock Exchange
Preferred Stock Purchase Rights	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Edgar Filing: THERMO FISHER SCIENTIFIC INC. - Form 10-K

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months, and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of the Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer
o Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

As of June 29, 2013, the aggregate market value of the voting stock held by nonaffiliates of the Registrant was approximately \$30,411,997,000 (based on the last reported sale of common stock on the New York Stock Exchange Composite Tape reporting system on June 29, 2013).

As of February 1, 2014, the Registrant had 391,792,194 shares of Common Stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Sections of Thermo Fisher's definitive Proxy Statement for the 2014 Annual Meeting of Shareholders are incorporated by reference into Parts II and III of this report.

THERMO FISHER SCIENTIFIC INC.

PART I

Item 1. Business

General Development of Business

Thermo Fisher Scientific Inc. (also referred to in this document as “Thermo Fisher,” “we,” the “company,” or the “registrant”) is the world leader in serving science. Our mission is to enable our customers to make the world healthier, cleaner and safer. We help our customers accelerate life sciences research, solve complex analytical challenges, improve patient diagnostics and increase laboratory productivity.

On February 3, 2014, we completed our acquisition of Life Technologies Corporation (“Life Technologies”). In connection with obtaining certain regulatory approvals for the acquisition, which we refer to as the “Life Technologies Acquisition,” in December 2013, we entered an agreement to sell our sera and media, gene modulation and magnetic beads businesses to GE Healthcare, for approximately \$1.06 billion. References in this document to “Thermo Fisher,” “we,” the “company,” or the “registrant” pertain to the combined company including both the legacy Thermo Fisher and legacy Life Technologies businesses, except where indicated and for the information included in Part II, Items 6 through 9A of this Annual Report on Form 10-K, which pertain to only legacy Thermo Fisher businesses. The information in these items has been presented in this way to provide consistency with Thermo Fisher’s 2013 financial statements.

Thermo Fisher has approximately 50,000 employees and serves more than 400,000 customers within pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental, industrial quality and process control settings.

We serve our customers through four premier brands, Thermo Scientific, Life Technologies, Fisher Scientific and Unity Lab Services:

- Under the Thermo Scientific brand, we offer customers in research, diagnostics, industrial, and applied markets a complete range of high-end analytical instruments as well as laboratory equipment, software, services, consumables and reagents. Our portfolio of products includes innovative technologies for mass spectrometry, elemental analysis, molecular spectroscopy, sample preparation, informatics, chemical research and analysis, cell culture, bioprocess production, cellular, protein and molecular biology research, allergy testing, drugs-of-abuse testing, therapeutic drug monitoring testing, microbiology, anatomical pathology, transplant diagnostics, as well as environmental monitoring and process control.
- Under the Life Technologies brand, we offer life sciences customers a broad range of superior-performing products to help them drive innovation in research, clinical and applied markets. Our portfolio includes some of the most cited products and technologies in qPCR, capillary electrophoresis (CE) sequencing, next-generation sequencing (NGS), molecular diagnostics, forensics, cell culture and analysis, and agriculture research.
- Fisher Scientific is our channels brand, offering customers a complete portfolio of laboratory equipment, chemicals, supplies and services used in scientific research, healthcare, safety, and education markets. These products are offered through an extensive network of direct sales professionals, industry-specific catalogs, e-commerce capabilities and supply-chain management services. We also offer a range of biopharma services for clinical trials management and biospecimen storage.

- Unity Lab Services is our services brand, offering a complete portfolio of services from enterprise level engagements to individual instruments and laboratory equipment, regardless of the original manufacturer. Through our network of world-class service and support personnel, we provide services that are designed to help our customers improve productivity, reduce costs, and drive decisions with better data.

THERMO FISHER SCIENTIFIC INC.

Business (continued)

In addition to our four premier brands, we offer a number of specialty brands that cover a range of products.

We continuously increase our depth of capabilities in technologies, software and services, and leverage our extensive global channels to address our customers' emerging needs. Our goal is to make our customers more productive in an increasingly competitive business environment, and to allow them to solve their challenges, from complex research to improved patient care, environmental and process monitoring, and consumer safety.

Thermo Fisher is a Delaware corporation and was incorporated in 1956. The company completed its initial public offering in 1967 and was listed on the New York Stock Exchange in 1980.

Forward-looking Statements

Forward-looking statements, within the meaning of Section 21E of the Securities Exchange Act of 1934 (the Exchange Act), are made throughout this Annual Report on Form 10-K. Any statements contained herein that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words "believes," "anticipates," "plans," "expects," "seeks," "estimates," and similar expressions are intended to identify forward-looking statements. While the company may elect to update forward-looking statements in the future, it specifically disclaims any obligation to do so, even if the company's estimates change, and readers should not rely on those forward-looking statements as representing the company's views as of any date subsequent to the date of the filing of this report.

A number of important factors could cause the results of the company to differ materially from those indicated by such forward-looking statements, including those detailed under the heading, "Risk Factors" in Part I, Item 1A.

Business Segments and Products

For the year ended December 31, 2013, we reported our business in three segments: Analytical Technologies; Specialty Diagnostics; and Laboratory Products and Services. For financial information about these segments, including domestic and international operations, see Note 3 to our Consolidated Financial Statements, which begin on page F-1 of this report.

With the completion of our acquisition of Life Technologies, we have established a new reporting segment, called Life Sciences Solutions. Effective January 1, 2014, the company's financial performance will be reported in four segments reflecting the following changes:

- The new Life Sciences Solutions Segment consists of the majority of the former Life Technologies businesses and Thermo Fisher biosciences businesses.
- Thermo Fisher's global chemicals business has moved from the Biosciences business in the Analytical Technologies Segment to the Laboratory Products and Services Segment.
- Thermo Fisher's Analytical Technologies Segment has been renamed Analytical Instruments to reflect the transfer of the biosciences businesses to other segments, as mentioned above.

- Two small specialty diagnostics businesses within Life Technologies have become part of the Specialty Diagnostics Segment.
- Thermo Fisher has agreed to divest of its sera and media, gene modulation and magnetic beads businesses.

The description of the company's businesses set forth below reflects the organization of the company prior to the completion of the Life Technologies Acquisition. The businesses have been presented in this way to provide consistency with the company's 2013 financial statements and management's discussion and analysis of the 2013 financial statements included in this Annual Report on Form 10-K. The Life Technologies businesses are described under the heading, "Life Technologies Businesses and Related 2014 Segment Changes and Divestitures."

Business (continued)

Analytical Technologies Segment

Through our Analytical Technologies Segment, we provide a broad offering of instruments, reagents, consumables, software and services that are used for a range of applications in the laboratory, on the production line and in the field. These products are used by customers in all four of our key end markets: pharmaceutical and biotechnology; academic and government; industrial and applied; and healthcare and diagnostics. This segment includes four primary businesses – Chromatography and Mass Spectrometry, Chemical Analysis, Environmental and Process Instruments, and Biosciences.

Chromatography and Mass Spectrometry

Our chromatography and mass spectrometry business provides analytical instrumentation for organic and inorganic sample analysis. These products are complemented by laboratory information management systems (LIMS); chromatography data systems (CDS); database analytical tools; automation systems; and a range of consumables, such as a full line of chromatography columns.

Mass spectrometry (MS) is a technique for analyzing chemical compounds, individually or in complex mixtures, by forming charged ions that are then analyzed according to their mass-to-charge ratios. In addition to molecular information, each discrete chemical compound generates a pattern that provides structurally identifiable information. Our comprehensive offering includes life sciences mass spectrometry systems; inorganic mass spectrometry systems; and elemental analysis instrumentation; as well as a range of sample preparation and separation products including auto-samplers and multiplexing systems.

- Life Sciences Mass Spectrometers include three major product lines: triple quadrupole, ion trap and hybrid systems. Our triple quadrupole systems provide high performance quantitative analysis of chemicals in biological fluids, environmental samples and food matrices. They are also used by the pharmaceutical industry for targeted quantitation during drug discovery. Our ion trap systems are used for in-depth structural analysis of large biomolecules, such as proteins, as well as structural characterization of small molecules, such as drugs and drug metabolites. Our hybrid (LC/MS/MS) mass spectrometers combine linear ion trap, quadrupole and Orbitrap technologies to provide high resolution and accurate mass capabilities for both research and applied markets and are well suited for drug metabolism, proteomics, environmental analysis, food safety, toxicology and clinical research applications. We also offer a comprehensive portfolio of instrument control and data analysis software to help customers simplify their workflows and obtain knowledge from often complex data.
- Inorganic Mass Spectrometers include four product lines: isotope ratio mass spectrometry (IRMS); multi-collector mass spectrometry (MC/IRMS); inductively coupled plasma mass spectrometry (ICP/MS); and high resolution trace mass spectrometry (HR Trace/MS). These products are primarily used for qualitative and quantitative analysis of inorganic matter in a range of applications, including environmental analysis, materials science and earth sciences.

Chromatography is a technique for separating, identifying and quantifying individual chemical components of substances based on their specific physical and chemical characteristics. Our chromatography product line includes high performance liquid chromatography, ion chromatography and gas chromatography systems, all of which are supported by our Chromeleon chromatography data system software. Our comprehensive array of consumables and environmental sampling products complete the workflow solution.

- Liquid Chromatography (LC) Systems analyze complex sample matrices in liquids. Our high pressure liquid chromatography (HPLC) and ultrahigh pressure liquid chromatography (UHPLC) systems offer high throughput and sensitivity and are sold either as stand-alone systems or integrated with our mass spectrometers (LC/MS and LC/MS/MS). These systems are used for a range of applications, from complex proteomic analyses to routine industrial QA/QC.

THERMO FISHER SCIENTIFIC INC.

Business (continued)

- Ion Chromatography (IC) Systems separate ionic (charged) or highly polar molecules (e.g., sugars and carbohydrates), usually found in water-based solutions, and typically detect them based on their electrical conductivity. Our IC products are used in a wide range of applications, including scientific research, and environmental testing, as well as quality control in pharmaceutical, food and beverage, and other industrial processes.
- Gas Chromatography (GC) Systems analyze complex sample matrices in gases, comprising both separation and detection technology. Separation technology is common to all gas chromatography analyzers, and is paired with either a conventional detector (GC) or with different types of mass spectrometers (GC/MS). Our GC/MS offering includes a triple stage quadrupole, a single stage quadrupole, and an ion trap, for a range of applications, including food safety testing, quantitative screening of environmental samples, and complex molecular analyses.

Our elemental analysis spectrometers include two product lines: atomic absorption (AA) and inductively coupled plasma (ICP) systems, which use atomic spectroscopy techniques to identify trace concentrations of elements in liquid and solid samples primarily in environmental, petrochemical, food safety, metallurgical, geochemical and clinical/toxicology research applications. These products are widely used in growth markets such as China, India and Latin America to support compliance with increasingly stringent international environmental and consumer safety regulations.

Chemical Analysis

Our chemical analysis products fall into four main categories: materials and minerals; molecular spectroscopy; portable analytical instruments; and radiation measurement and security instruments. Customers use these products to quickly and accurately analyze the composition of materials to optimize workflows in academic, life sciences, pharmaceutical, and industrial applications or to help them comply with governmental regulations and industry safety standards. Our product lines range from those used in the laboratory for research or forensics, to those used on the production line to improve quality and efficiency, to portable systems for rapid and real-time identification in the field or to analyze, measure or respond to hazardous situations.

- Materials and Minerals Instruments include bench-top, production line, and stand-alone systems for a range of industrial applications. For example, our laboratory elemental analyzers use X-ray fluorescence (XRF), X-ray diffraction (XRD), and arc spark optical emission (OES) techniques for accurate and precise analysis of bulk materials in the metals, cement, minerals, and petrochemicals industries. We also offer on line analyzers that employ neutron activation and measurement of gamma rays to analyze bulk materials non-invasively and in real time, as well as systems that enable high-speed weighing during bulk materials handling. We also offer gauging systems that employ ionizing and non-ionizing technologies to measure the total thickness, basis weight and coating thickness of flat-sheet materials, such as steel, plastics, foil, rubber and glass. We also offer on line analyzers based on a variety of technologies such as X-ray imaging and ultra-trace chemical detection, to inspect packaged goods for physical contaminants, validate fill quantities, or check for missing or broken parts on line and at high speeds in the food and beverage, pharmaceutical production and packaging industries to maintain safety and quality standards.
- Molecular Spectroscopy Instruments are divided into five primary techniques: Fourier transform infrared (FTIR), Raman, near-infrared (NIR), ultraviolet/visible (UV/Vis), and Nuclear Magnetic Resonance (NMR) spectroscopy.

These technologies are typically used in the laboratory to provide information on the structure of molecules to identify, verify and quantify organic materials in pharmaceutical, biotechnology, polymer, chemical, and forensic sciences. Our material characterization instruments include rheometers and extruders that measure viscosity, elasticity, processability, and temperature-related mechanical changes of various materials. We also provide a range of surface analysis instruments commonly used in the semiconductor, metals, coatings, and polymer industries as a product development and failure analysis tool.

THERMO FISHER SCIENTIFIC INC.

Business (continued)

- Portable Analytical Instruments are rugged handheld products that provide rapid, precise, real-time analysis at the point of need. Our two main product categories are elemental and optical analyzers. Our portable elemental analyzers use XRF technology for identifying metal alloys in scrap metal recycling; QA/QC; precious metals analysis; environmental analysis; and lead screening in a range of consumer products. Our portable optical analyzers utilize Raman, FTIR and NIR technologies for use in the field by first responders, and law enforcement and military personnel who need to quickly and accurately identify chemicals and explosives in critical safety and security situations. Other applications include QA/QC in pharmaceutical production and identification of counterfeit drugs.
- Radiation Measurement and Security Products are used to monitor, detect and identify specific forms of radiation and trace explosives in nuclear power, environmental, industrial, medical, and security applications. Our primary customers include national, regional, and local government agencies responsible for monitoring cargo, vehicles and people traveling across borders. These products are also used by first-responders in safety and security situations, and for worker safety in the nuclear power and other industrial markets.

Environmental and Process Instruments

Our environmental and process instruments include fixed and portable instrumentation that help our customers protect people and the environment as well as comply with government regulations and industry safety standards.

Our products are used by environmental regulatory agencies and power plant operators to measure ambient air, stack gas emissions, and particulates in compliance with regulated emissions standards. Our products are also used in process monitoring applications by customers in natural gas, petrochemical, refining, and a wide variety of other industrial markets to provide measurements that improve efficiency, provide process and quality control, and increase worker safety.

Biosciences

Our biosciences offerings include reagents, instruments and consumables that help our customers conduct biological and medical research, discover and produce new drugs and vaccines, and diagnose disease. These products fall into three main categories: life science research, global chemicals and bioprocess production.

- Life Science Research reagents, instruments, and consumables are used for cell culture, protein, biology, molecular biology, and cell biology research and applied testing. The portfolio includes antibodies and products for protein purification, detection, modification, and analysis; products for nucleic acid sequencing, detection and purification, cloning and analysis, RNA interference and gene expression; and cellular imaging instruments and software reagents for high content analysis. Many of these products are also used in applied markets, including agriculture, forensics, diagnostics product development, and toxicology research.
- Global Chemicals comprises a broad range of chemicals, solvents and reagents supporting virtually every laboratory application – from research to drug discovery and development and manufacturing. This portfolio includes organic chemicals used to synthesize new materials; essential laboratory chemicals used by scientists to purify, extract, separate, identify and manufacture products; high purity analytical reagents, bioreagents used in many different applications, from cell growth to detailed protein analysis; and novel chemical building blocks, reactive

intermediates and screening libraries used to accelerate drug discovery. We provide bulk volumes of many products for scale-up from research to development and customized services for chemical procurement, processing, production, testing, and packaging.

- BioProcess Production products include customized, single-use containers and single-use bioreactor systems, liquid and dry powder cell-culture media (serum-free, chemically defined, protein-free, and animal derived component-free media), sera and process liquids. These products are used in the manufacturing of human and animal vaccines, monoclonal antibodies, protein-based therapeutics and products for wound healing. Available in turnkey and open architecture formats, these single-use systems have been specifically qualified for bioprocess production applications in the biopharmaceutical, biotechnology and diagnostic industries. Custom services are also available for media and feed formulation media optimization, analytical services, production method development and optimization, rapid prototyping, and supply chain management.

THERMO FISHER SCIENTIFIC INC.

Business (continued)

Specialty Diagnostics Segment

Our Specialty Diagnostics Segment offers a wide range of diagnostic test kits, reagents, culture media, instruments and associated products in order to serve customers in healthcare, clinical, pharmaceutical, industrial, and food safety laboratories. Our healthcare products are used to increase the speed and accuracy of diagnoses, which improves patient care in a more cost efficient manner. This segment has six primary businesses – ImmunoDiagnostics, Clinical Diagnostics, Transplant Diagnostics, Microbiology, Anatomical Pathology, and our Healthcare Market Channel.

ImmunoDiagnostics

Our immunodiagnosics offerings include developing, manufacturing and marketing complete blood-test systems to support the clinical diagnosis and monitoring of allergy, asthma and autoimmune diseases. Unlike skin prick tests, our in vitro allergy diagnostic tests utilize flexible systems which provide for convenient and accurate allergy diagnoses on low and high-throughput automation. In addition, we now can offer antibody tests for approximately 20 indications to help diagnose autoimmune diseases such as rheumatoid arthritis, celiac disease, lupus and scleroderma. These allergy and autoimmunity product lines operate on a common instrument platform which supports both productivity and cost efficiencies in clinical laboratories around the world. Our products include ImmunoCAP for allergy and asthma tests and EliA for autoimmunity tests.

Clinical Diagnostics

Our clinical diagnostics products include a broad offering of liquid, ready-to-use and lyophilized immunodiagnostic reagent kits, calibrators, controls and calibration verification fluids. In particular, we provide products used for drugs-of-abuse testing; therapeutic drug monitoring, including immunosuppressant drug testing; thyroid hormone testing; serum toxicology; clinical chemistry; immunology; hematology; coagulation; glucose tolerance testing; first trimester screening; tumor markers testing; and biomarkers testing for sepsis, acute myocardial infarction and congestive heart failure. We also private label many of our reagents and controls for major in vitro diagnostics companies through OEM arrangements. In many instances, we will work with customers or partners to develop new products and applications for their instrument platforms.

We have developed one of the broadest menus for drugs-of-abuse immunoassays. We also offer a line of immunosuppressant drug immunoassays that can be used on a variety of clinical chemistry analyzers.

Our clinical chemistry systems include analyzers and reagents to analyze and measure routine blood and urine chemistry, such as glucose and cholesterol; and advanced testing for specific proteins, therapeutic drug monitoring and drugs-of-abuse. Our diagnostic test range currently covers approximately 80 different validated methods. We also provide pre- and post-analytical automation for preparation of blood specimens before and after analysis, and specialty diagnostic tests based on patented biomarkers for sepsis, cardiovascular and pulmonary diseases, as well as intensive care treatments and prenatal screening.

Transplant Diagnostics

Our transplant diagnostics products include human leukocyte antigen (“HLA”) typing and testing for the organ transplant market. Our diagnostic tests are used by transplant centers for tissue typing, primarily to determine the

compatibility of donors and recipients pre-transplant, and to detect the presence of antibodies post-transplant that can lead to transplant rejection. These transplant diagnostic tests are widely used across the transplant-testing workflow to improve patient outcomes. Our transplant diagnostic offerings include several lines of HLA typing and antibody detection assays utilizing serological, molecular, ELISA, flow, and Luminex xMAP technologies.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

Microbiology

Our microbiology offerings include dehydrated and prepared culture media, collection and transport systems, instrumentation and consumables to detect pathogens in blood, diagnostic and rapid direct specimen tests, quality-control products and associated products for the microbiology laboratory. Our products help customers worldwide to diagnose infectious disease; determine appropriate antimicrobial therapy; implement effective infection control programs; and detect microbial contamination of their products or manufacturing facilities.

Within the food and pharmaceutical industries, our products are used to assure the safety and quality of consumer products by monitoring production environments; raw materials and end products for bacterial contamination; and animal health in the dairy industry.

Anatomical Pathology

Our anatomical pathology offerings include a broad portfolio of products primarily for cancer diagnosis and medical research in histology, cytology and hematology applications. These products include a wide range of instruments, consumables and reagents for specimen collection and transport, tissue preparation, staining and immunohistochemistry assays and controls. Reagent and consumable products include sample collection and preservation products used to ensure specimen integrity; tissue cassettes and reagents necessary for same-day, high-quality specimen processing; blades and paraffin used to section tissue; and a wide range of leading stains. Also included are a full line of immunohistochemistry antibodies, detection systems, ancillaries and controls.

We also provide a complete range of anatomical pathology instruments including cassette and slide labeling systems, which enable on-demand slide and cassette printing; tissue processors for same-day tissue-processing; superior reagent management and higher lab efficiency; embedding stations, microtomes and cryostats used to section tissue; and automated staining and cover slip systems used for primary and immunohistochemistry staining. In cytology, we offer low-speed centrifugation technology coupled with patented EZ cytofunnels to deposit a thin layer of cells onto a microscope slide to ensure better cell capture and better preservation of cell morphology. We manufacture high-quality flat-sheet glass to produce medical disposable products such as microscope slides, plates, cover glass, and microarray substrates serving the medical, diagnostics, and scientific communities. We also offer specialized hydrophobic, adhesive, and fluorescent slides through proprietary coating techniques.

Healthcare Market Channel

Our Healthcare Market channel offerings include a broad array of consumables, diagnostic kits and reagents, equipment, instruments, solutions and services for hospitals, clinical laboratories, reference laboratories, physicians' offices and other clinical testing facilities. These products are manufactured by Thermo Fisher and third parties.

Healthcare Market products and solutions focus on the collection, transportation and analysis of biological samples. Major product lines include anatomical pathology, molecular diagnostic, and cardiac risk management solutions; blood collection devices; and an extensive portfolio of rapid diagnostic testing kits.

Laboratory Products and Services Segment

Our Laboratory Products and Services segment offers virtually everything needed for the laboratory. Our unique combination of self-manufactured and sourced products and extensive service offering enables our customers to focus on their core activities and helps them to be more efficient, productive and cost effective. We serve the pharmaceutical, biotechnology, academic, government and other research and industrial markets, as well as the clinical laboratory through four key businesses: Laboratory Equipment, Laboratory Consumables, Research and Safety Market Channel, and BioPharma Services.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

Laboratory Equipment

Our Laboratory Equipment products are used primarily by pharmaceutical companies for drug discovery and development and by biotechnology companies and universities for life science research to advance the prevention and cure of diseases and enhance quality of life. This offering consists of equipment, accessories, and services for sample preparation, storage and protection, and analysis, with product categories including:

• **Sample Preparation and Preservation Equipment** protects our customers' chemical and biological samples and supports the growth of cells and organisms in optimal conditions such as temperature, carbon dioxide and humidity. This offering includes a comprehensive range of incubators and other related products.

• **Cold Storage Equipment** such as our leading laboratory refrigerators and freezers, ultralow-temperature freezers and cryopreservation storage tanks maintain samples in a cold environment to protect them from degradation.

• **Centrifugation Products** are used to separate biological matrices and inorganic materials. Our broad range includes microcentrifuges, which are used primarily for the purification of nucleic acids in the molecular biology laboratory; general use bench-top centrifuges for processing clinical samples such as blood and urine; and our floor models, which are used for large-volume blood processing or in laboratories with high-throughput needs. Our super-speed and ultra-speed models are used for applications such as protein purification.

• **Biological Safety Cabinets** enable technicians to handle samples without risk to themselves or their environment and without risk of cross-contamination of samples. These cabinets, equipped with filtered-air ventilation, controlled laminar flow and an ultraviolet source, can be used for tissue culture; handling of infectious samples; forensic analysis; bioterrorism research; and other applications.

• **Temperature Control Products** include heated bath circulators, immersion coolers, recirculating chillers, water baths, and dry baths in a range of sizes, temperatures and configurations for life science, analytical chemistry, manufacturing and quality-control applications.

• **Water Analysis Instruments** include meters, electrodes and solutions for the measurement of pH, ions, conductivity, dissolved oxygen, turbidity and other key parameters in the lab and production line. Based upon electrochemical and optical sensing technologies, these products are used wherever the quality of water and water-based products or processes are critical, such as QA/QC in the food and beverage industry, chemical and pharmaceutical production, and for environmental compliance.

• **Other Laboratory Equipment** includes water purification systems, shakers, vacuum concentrators, microbiological incubators, ovens, furnaces, hotplates, stirrers, stirring hotplates, and other related products.

Laboratory Consumables

Our laboratory consumables products include plastics, glass and related equipment, which customers use every day to support their scientific research; drug discovery and development; quality and process control; and clinical and basic research and development needs. Our product categories include cell culture and bioproduction; sample preparation and storage; liquid handling; detection instruments; and specialty products and services.

Cell Culture and Bioproduction Products support customers in research to production-scale activities. We offer a broad range of surface technologies for different application needs, including applications with traditional stem cell and human stem cell lines. Products include chamber slides, dishes, multidishes, flasks and gas permeable technologies. We also offer a complete line of serological pipettes and conical tubes to address cell-culture sample handling, as well as cell factories and roller bottles, and research serum and media products. These products are widely used in research and in the manufacture of vaccines and biotherapeutics.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

Sample Preparation and Storage Products include a full line of centrifugation consumables as well as vials and organization systems for ultralow temperature and cryogenic storage, with specific products designed for low protein binding and low DNA binding. We also offer containers for packaging life science and diagnostic reagents as well for the storage and transport of bulk intermediates and active pharmaceutical ingredients.

Liquid Handling Products include a leading offering of laboratory pipette tips and a complementary range of handheld and automated pipetting systems, supporting low- through high-throughput activity. These products optimize productivity and ergonomics, and ensure accurate results.

Detection Instruments include microplate readers, washers, purification systems, and PCR and qPCR instruments. These instruments offer researchers in the fields of cancer research, drug development, proteomics, and genomics efficiency, high-quality performance and accurate results.

Specialty Products and Services include a complete selection of clinical specimen collection, drug-of-abuse collection kits and environmental and food-safety glass and plastic vials, bottles and containers. We also manufacture plastic transfer pipettes and general purpose clinical laboratory consumables. We also offer containers for breast milk collection, storage and feeding primarily used in neo-natal units and by lactation specialists. In addition, we provide OEM and custom kit assembly services for clinical and drugs-of-abuse test kits.

Research and Safety Market Channel

Our Research and Safety Market channel serves academic, pharmaceutical, biotechnology, government and industrial customers. We go to market through our broad sales force, printed catalogs in eight different languages, a state-of-the-art website, www.fishersci.com, containing full product content for more than 370,000 products, and our global network of resellers and distributors. The Fisher Scientific catalog has been published for more than 100 years and is an internationally recognized scientific supply resource.

We have an international network of warehouses in our primary markets through which we maintain inventory and coordinate product delivery. With specialized product vaults and warehouse management systems, we are able to handle the complete range of products we offer to our customers. Our transportation capabilities include our dedicated fleet of delivery vehicles as well as parcel shipping capabilities that are closely integrated with our third-party parcel carriers. Throughout the product delivery process, we provide our customers with convenient access to comprehensive electronic systems that offer automated catalog search, product order and invoicing, and payment capabilities.

Our channel offers a mix of products that are manufactured by Thermo Fisher, by third parties for us on a private-label basis, and by third parties under their brand but offered for sale exclusively through us. We also offer a broad range of third-party products representing leading industry brand names on a non-exclusive basis.

Our research products include a complete offering of laboratory products, ranging from capital equipment and instruments to chemicals to consumable products. Our safety products include clean-room and controlled-environment supplies, personal protective equipment, firefighting, military, and first responder equipment and supplies, and environmental monitoring and sampling equipment. Our education products include science-related and laboratory products for the K-12 and secondary education market.

Our Cole-Parmer offerings include a wide variety of laboratory and industrial fluid-handling products, instrumentation, equipment, and supplies for the industrial, government, academic, biotechnology, pharmaceutical and healthcare markets.

Our Doe & Ingalls offerings include chemical distribution and supply chain services that help life science and advanced technology manufacturers have reliable, secure supply chains for their chemical raw materials.

THERMO FISHER SCIENTIFIC INC.

Business (continued)

In addition to our broad product offerings, we offer a variety of specialized services to our customers through our Unity Lab Services team, including training, equipment servicing and asset management, and dedicated supply management personnel. We also offer scientific support services including desktop delivery, coordination of instrument calibration and service, and on-site customer service.

BioPharma Services

Our BioPharma Services offerings include global services for pharmaceutical and biotechnology companies engaged in clinical trials, including specialized packaging; over-encapsulation; multi-lingual and specialized labeling and distribution for phase I through phase IV clinical trials; biological-specimen management; specialty pharmaceutical logistics; and clinical supply-chain management. Thermo Fisher's biorepository business provides temperature-controlled repository services for pharmaceutical, biotechnology, university, government, clinical and blood-processing customers. Our biorepository services business stores pharmacological and biospecimen samples at commercial sites. Additional services include inventory management, validation, business continuity, and repository management and transportation capabilities, resulting in a complete cold chain sample management solution.

Life Technologies Businesses and Related 2014 Segment Changes and Divestitures

With the acquisition of Life Technologies, we have enhanced our scale and depth of capabilities in research, specialty diagnostics and applied markets. We have established a new reporting segment, called Life Sciences Solutions, and effective January 1, 2014, the company's financial performance will be reported in four segments reflecting the following changes:

- The new Life Sciences Solutions Segment consists of the majority of the former Life Technologies businesses and Thermo Fisher biosciences businesses.
- Thermo Fisher's global chemicals business has moved from the Biosciences business in the Analytical Technologies Segment to the Laboratory Products and Services Segment.
- Thermo Fisher's Analytical Technologies Segment has been renamed Analytical Instruments to reflect the transfer of the biosciences businesses to other segments, as mentioned above.
- Two small specialty diagnostics businesses within Life Technologies have become part of the Specialty Diagnostics Segment.
 - Thermo Fisher has agreed to divest of its sera and media, gene modulation and magnetic beads businesses.

The systems and reagents offered through Life Sciences Solutions enable, simplify and accelerate a broad spectrum of biological research of genes, proteins and cells within academic and life science research, clinical research and commercial applications. Our scientific expertise assists in making biodiscovery research techniques more effective and efficient for pharmaceutical, biotechnology, agricultural, clinical, government and academic scientific professionals with backgrounds in a wide range of scientific disciplines. The new Life Sciences Solutions Segment includes three primary businesses – Biosciences; Genetic, Medical & Applied Sciences; and BioProduction.

Biosciences

Our new Biosciences business includes Life Technologies' former Life Sciences business (with the exception of its bioproduction business) combined with Thermo Fisher's molecular and protein biology reagents businesses from its former biosciences business.

Our biosciences offerings include:

Reagents, instruments, and consumables used for protein biology, molecular biology, and cell imaging and analysis. The portfolio includes antibodies and products for protein purification, detection, modification, and analysis; and products for nucleic acid sequencing, detection and purification for high content analysis. Many of these products are also used in applied markets, including agriculture, forensics, diagnostics product development, and toxicology research.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

◆Molecular Probes fluorescence-based technologies, which facilitate the labeling of molecules for biological research and drug discovery. This product line also leverages a wide range of cell analysis instruments, such as the Attune Acoustic Focusing Cytometer, and imaging platforms to enable fluorescence microscopy.

◆Gibco cell culture media and reagents for preserving and growing mammalian cells, which are used in many life science research applications. This product line also features the cell therapy systems line of growth media, some of which has received FDA 510K clearance in recent years.

◆Invitrogen products, which are among the most cited in research papers, and are comprised of tools used for genetic engineering, amplification, quantification and analysis. This product line includes stem cell reprogramming kits, used for the development of iPS cells; transfection reagents, which are widely used to transfer genetic elements into living cells, enable the study of protein function and gene regulation; RNA interference reagents, which enable scientists to selectively “turn off” genes in biology systems to gain insight into biological pathways; along with gene editing tools and gene synthesis products.

◆Ambion products, consisting primarily of tools used for RNA isolation, the first step for performing many molecular techniques, such as NGS, real-time qPCR, etc. Specific products include: Dynabeads, Cells-to-CT, PUIreLink and MagMax.

◆Novex high-performance protein analysis products, including pre-cast electrophoresis gels for separating nucleic acids and proteins, and western blotting and staining tools. Other products include antibodies, which allow researchers to capture and label proteins, visualize their location through the use of dyes, and discern their role in disease.

Genetic, Medical & Applied Sciences

Our new Genetic, Medical and Applied Sciences business includes Life Technologies’ Ion Torrent, Genetic Analysis and Medical Sciences businesses, with the addition of the Human Identification (HID) and Food and Animal Health business from Life Technologies’ Applied Sciences group. This business combines a wide variety of instruments and related reagents used to analyze DNA across a broad range of applications in research, clinical and applied markets.

Our Genetic, Medical and Applied Sciences offerings include:

◆Genetic Analysis, which primarily provides qPCR, capillary electrophoresis (CE) and next-generation sequencing (NGS) platforms and reagents. –These products are used to discover sources of genetic and epigenetic variation, to catalog the DNA structure of organisms, and to verify the composition of genetic research material. These approaches to genetic analysis are used in clinical research, human identification (HID), animal health and food safety applications. In addition, our PCR and real-time PCR systems, reagents and assays enable researchers to amplify and detect targeted nucleic acids (DNA and RNA molecules for a host of applications in molecular biology.

◆Medical Sciences provides qPCR and NGS technologies and assays for applications in molecular diagnostics, diagnostic development, clinical and translational research, and public health monitoring and is primarily focused on cancer and inherited disease.

Human Identification, which provides instrumentation (qPCR, CE sequencing and NGS) and reagents to forensic laboratories that analyze DNA recovered from crime scenes. These products are routinely used to positively convict criminals and exonerate the innocent. Primary customers include the FBI and police departments around the world.

THERMO FISHER SCIENTIFIC INC.

Business (continued)

• **Animal Health/Food Safety** offers qPCR, Elisa, Sample Preparation and NGS platforms for analysis applications in animal health and food safety. In animal health, we provide kits that are used to monitor health of farm animals by detection of viruses and pathogens. In food safety, we provide solutions to detect pathogens commonly at the root of many outbreaks: Salmonella, E. coli, Listeria, etc. We also provide the beverage industry with kits used to monitor bacterial contamination during beer and wine production.

BioProduction

The new BioProduction business includes Thermo Fisher's bioprocessing business and Life Technologies' bioproduction business. This business supports developers and manufacturers of biological-based therapeutics and vaccines with a portfolio of premium solutions and services focused on upstream cell culture, downstream purification, analytics for detection and quantitation of process/product impurities, and a suite of single-use solutions spanning the biologics workflow.

Our bioproduction offerings include:

• **Single Use Technologies**, which includes our Thermo Scientific single-use bioproduction solutions that deliver faster turnaround and set-up times, require minimal validation, reduce investment and running costs, and increase flexibility of manufacturing capacity.

• **Cell Culture Media and Services**, which includes our Gibco media solutions, used by leading biotechnology and pharmaceutical companies to grow cells in controlled conditions and enable the large scale cGMP manufacturing of life saving drugs and vaccines, along with associated services to optimize the productivity of these production platforms.

• **Chromatography**, which includes POROS products that deliver unmatched capacity and resolution for process-scale bioseparations, and CaptureSelect affinity products that offer a broad set of scalable options for the purification of antibodies, antibody fragments and proteins.

• **Pharma Analytics**, which are rapid molecular products that deliver accurate results in less than four hours for contaminant detection, identification and quantitation.

- **Cell Therapy**, which are scalable solutions for the manufacture of cell therapy-based drugs.

Sales and Marketing

We market and sell our products and services through a direct sales force, customer-service professionals, electronic commerce, third-party distributors and various catalogs.

We have approximately 14,300 sales and service personnel including over 2,000 highly trained technical specialists who enable us to better meet the needs of our more technical end-users. We also provide customers with product standardization and other supply-chain-management services to reduce procurement costs.

New Products and Research and Development

Our business includes the development and introduction of new products and may include entry into new business segments. During 2013, 2012 and 2011, we spent \$396 million, \$376 million and \$340 million, respectively, on research and development. We anticipate that we will continue to make significant expenditures for research and development as we seek to provide a continuing flow of innovative products to maintain and improve our competitive position.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

Raw Materials

Our management team believes that we have a readily available supply of raw materials for all of our significant products from various sources. We do not anticipate any difficulties obtaining the raw materials essential to our business.

Raw-material and fuel prices are subject to fluctuations due to market conditions. We employ many strategies, including the use of alternative materials, to mitigate the effect of these fluctuations on our results.

Patents, Licenses and Trademarks

Patents are important in all segments of our business. No particular patent, or related group of patents, is so important, however, that its loss would significantly affect our operations as a whole. Where appropriate, we seek patent protection for inventions and developments made by our personnel that are incorporated into our products or otherwise fall within our fields of interest. Patent rights resulting from work sponsored by outside parties do not always accrue exclusively to the company and may be limited by agreements or contracts.

We protect some of our technology as trade secrets and, where appropriate, we use trademarks or register trademarks used in connection with products. We also enter into license agreements with others to grant and/or receive rights to patents and know-how.

Seasonal Influences

Revenues in the fourth quarter are historically stronger than in other quarters due to the capital spending patterns of industrial, pharmaceutical and government customers. Sales of flu tests and related diagnostic products vary quarter to quarter and year to year based on the severity and duration of flu season. Sales of allergy tests vary quarter to quarter and year to year based on the severity and duration of airborne pollen allergens.

Working Capital Requirements

There are no special inventory requirements or credit terms extended to customers that would have a material adverse effect on our working capital.

Dependency on a Single Customer

There is no single customer the loss of which would have a material adverse effect on our business. No customer accounted for more than 5% of our total revenues in any of the past three years.

Backlog

Our backlog of firm orders at year-end 2013 and 2012 was as follows:

(In millions)	2013	2012
---------------	------	------

Analytical Technologies	\$1,047.2	\$1,014.6
Specialty Diagnostics	183.0	187.0
Laboratory Products and Services	399.0	388.8
Eliminations	(24.9)	(12.8)
	\$1,604.3	\$1,577.6

We believe that virtually all of our backlog at the end of 2013 will be filled during 2014. The table above does not include backlog of Life Technologies which was acquired on February 3, 2014.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

Government Contracts

Although the company transacts business with various government agencies, no government contract is of such magnitude that a renegotiation of profits or termination of the contract at the election of the government agency would have a material adverse effect on the company's financial results.

Competition

The company encounters aggressive and able competition in virtually all of the markets we serve. Because of the diversity of our products and services, we face many different types of competitors and competition. Our competitors include a broad range of manufacturers and third-party distributors. In general, competitive climates in the markets we serve are characterized by changing technology and customer demands that require continuing research and development. Our success in these markets primarily depends on the following factors:

- technical performance and advances in technology that result in new products and improved price/performance ratios;
 - product differentiation, availability and reliability;
 - the depth of our capabilities;
- our reputation among customers as a quality provider of products and services;
 - customer service and support;
- active research and application-development programs; and
 - relative prices of our products and services.

Environmental Matters

We are subject to various laws and governmental regulations concerning environmental matters and employee safety and health in the United States and other countries. U.S. federal environmental legislation that affects us includes the Toxic Substances Control Act, the Resource Conservation and Recovery Act, the Clean Air Act, the Clean Water Act, the Safe Drinking Water Act, and the Comprehensive Environmental Response Compensation and Liability Act (CERCLA). We are also subject to regulation by the Occupational Safety and Health Administration (OSHA) concerning employee safety and health matters. The United States Environmental Protection Agency (EPA), OSHA, and other federal agencies have the authority to promulgate regulations that have an effect on our operations.

In addition to these federal activities, various states have been delegated certain authority under the aforementioned federal statutes as well as having authority over these matters under state laws. Many state and local governments have adopted environmental and employee safety and health laws and regulations, some of which are similar to federal requirements.

A number of our operations involve the handling, manufacturing, use or sale of substances that are or could be classified as toxic or hazardous materials within the meaning of applicable laws. Consequently, some risk of environmental harm is inherent in our operations and products, as it is with other companies engaged in similar businesses.

Our expenses for environmental requirements are incurred generally for ongoing compliance and historical remediation matters. Based on current information, we believe that these compliance costs are not material. For historical remediation obligations, our expenditures relate primarily to the cost of permitting, installing, and operating and maintaining groundwater-treatment systems and other remedial measures.

Our Fair Lawn and Somerville, New Jersey, facilities are the subject of administrative consent orders issued by the New Jersey Department of Environmental Protection in 1984. Our Rockford, Illinois, facility is subject to a Resource Conservation and Recovery Act (RCRA) corrective action program administered by the Illinois Environmental Protection Agency. We are required to maintain groundwater-remediation activities at these sites. As the owner of the Fair Lawn facility, we are listed as a potentially responsible party for remediation within an area called the Fair Lawn Wellfields Superfund Site.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Business (continued)

We record accruals for environmental liabilities based on current interpretations of environmental laws and regulations when it is probable that a liability has been incurred and the amount of such liability can be reasonably estimated. We calculate estimates based upon several factors, including reports prepared by environmental specialists and management's knowledge and experience with these environmental matters. We include in these estimates potential costs for investigation, remediation and operation and maintenance of cleanup sites. Accrued liabilities for environmental matters totaled \$29 million at December 31, 2013. The liability for environmental matters associated with Fisher was recorded at the date of merger at its fair value and as such was discounted to its net present value.

These environmental liabilities do not include third-party recoveries to which we may be entitled. We believe that our accrual is adequate for the environmental liabilities we currently expect to incur. As a result, we believe that our ultimate liability with respect to environmental matters will not have a material adverse effect on our financial position, results of operations or cash flows. However, we may be subject to additional remedial or compliance costs due to future events, such as changes in existing laws and regulations, changes in agency direction or enforcement policies, developments in remediation technologies, changes in the conduct of our operations, and the effect of changes in accounting rules, which could have a material adverse effect on our financial position, results of operations or cash flows.

Our recently acquired Life Technologies subsidiary also has certain environmental liabilities, including from its prior acquisitions, such as obligations for the clean-up of formerly-owned locations as well as several hazardous waste sites under state and federal environmental laws, in connection with its acquisitions of Dexter Corporation in 2000 and Applied Biosystems in 2008. Life Technologies has reserves accrued for these matters. Unexpected results related to the investigation and clean-up of any of these sites could cause our financial exposure in these matters to exceed stated reserves, requiring us to allocate additional funds and other resources to address these environmental liabilities, which could have a material adverse effect on our financial position, results of operations or cash flows.

Regulatory Affairs

Our operations, and some of the products we offer, are subject to a number of complex and stringent laws and regulations governing the production, handling, transportation and distribution of chemicals, drugs and other similar products, including the operating and security standards of the United States Drug Enforcement Administration, the Bureau of Alcohol, Tobacco, Firearms and Explosives, the Food and Drug Administration, and various state boards of pharmacy as well as comparable state and foreign agencies. As Thermo Fisher's businesses also include export and import activities, we are subject to pertinent laws enforced by the U.S. Departments of Commerce, State and Treasury. In addition, our logistics activities must comply with the rules and regulations of the Department of Transportation, the Federal Aviation Administration and similar foreign agencies. While we believe we are in compliance in all material respects with such laws and regulations, any noncompliance could result in substantial fines or otherwise restrict our ability to provide competitive distribution services and thereby have an adverse effect on our financial condition. To date, none has had a material impact on our operations.

We are subject to laws and regulations governing government contracts, and failure to address these laws and regulations or comply with government contracts could harm our business by leading to a reduction in revenue associated with these customers. We have agreements relating to the sale of our products to government entities and, as a result, we are subject to various statutes and regulations that apply to companies doing business with the government. We are also subject to investigation for compliance with the regulations governing government contracts.

A failure to comply with these regulations could result in suspension of these contracts, criminal, civil and administrative penalties or debarment.

Financial Information About Geographic Areas

Financial information about geographic areas is summarized in Note 3 to our Consolidated Financial Statements, which begin on page F-1 of this report.

Available Information

The company files annual, quarterly and current reports, proxy statements and other documents with the Securities and Exchange Commission (SEC) under the Exchange Act. The public may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 100 F Street NE, Washington, D.C. 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Also, the SEC maintains a website that contains reports, proxy and information statements and other information that issuers, including the company, file electronically with the SEC. The public can obtain any documents that we file with the SEC at www.sec.gov. We also make available free of charge on or through our own website at www.thermofisher.com our Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, Current Reports on Form 8-K and, if applicable, amendments to those reports filed or furnished pursuant to Section 13(a) of the Exchange Act as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. In addition, paper copies of these documents may be obtained free of charge by writing to the company care of its Investor Relations Department at our principal executive office located at 81 Wyman Street, Waltham, Massachusetts 02451.

Executive Officers of the Registrant

Name	Age	Present Title (Fiscal Year First Became Executive Officer)
Marc N. Casper	45	President and Chief Executive Officer (2001)
Alan J. Malus	54	Executive Vice President (2006)
Mark P. Stevenson	51	Executive Vice President (2014)
Seth H. Hoogasian	59	Senior Vice President, General Counsel and Secretary (2001)
Thomas W. Loewald	50	Senior Vice President (2012)
Edward A. Pesicka	46	Senior Vice President and Chief Commercial Officer (2008)
Andrew J. Thomson	49	Senior Vice President (2012)
Peter M. Wilver	54	Senior Vice President and Chief Financial Officer (2003)
Peter E. Hornstra	54	Vice President and Chief Accounting Officer (2001)

Mr. Casper was appointed President and Chief Executive Officer in October 2009. He was Chief Operating Officer from May 2008 to October 2009 and Executive Vice President from November 2006 to October 2009. He was Senior Vice President from December 2003 to November 2006. From December 2001 to December 2003 he was Vice President.

Mr. Malus was appointed Executive Vice President of Thermo Fisher Scientific in January 2012 and was appointed President, Laboratory Products and Services in January 2014. He was President, Analytical Technologies from January 2012 to January 2014. He was President, Laboratory Products from July 2008 to January 2012 and was appointed Senior Vice President of Thermo Fisher Scientific in November 2006.

Mr. Stevenson was appointed Executive Vice President and President, Life Sciences Solutions in February 2014. Prior to the acquisition of Life Technologies, Mr. Stevenson was President and Chief Operating Officer of Life Technologies from November 2008 to February 2014 and previously President and Chief Operating Officer of Applied Biosystems, Life Technologies' predecessor entity, from December 2007 to November 2008.

Mr. Hoogasian was appointed Senior Vice President in November 2006, Secretary in 2001 and General Counsel in 1992. He was Vice President from 1996 to November 2006.

Mr. Loewald was appointed Senior Vice President of Thermo Fisher Scientific in January 2012 and appointed President, Analytical Instruments in January 2014. He was President, Laboratory Products from January 2012 to January 2014. He was appointed President of the Laboratory Equipment business in August 2008, and was President

of the Environmental Instruments business from October 2006 until August 2008.

Mr. Pesicka was appointed Senior Vice President of Thermo Fisher Scientific in July 2008 and was appointed Chief Commercial Officer in January 2014. He was President, Customer Channels from July 2008 to January 2014. He was President, Research Market from November 2006 to July 2008.

Mr. Thomson was appointed Senior Vice President of Thermo Fisher Scientific and President, Specialty Diagnostics in February 2012. He was President of the Clinical Diagnostics business from October 2009 to May 2012 and was Vice President and General Manager for North America for the Microbiology business from January 2009 until October 2009.

Mr. Wilver was appointed Senior Vice President in November 2006 and Chief Financial Officer in October 2004. He was Vice President and Chief Financial Officer from October 2004 to November 2006.

Mr. Hornstra was appointed Vice President in February 2007 and Chief Accounting Officer in January 2001. He was Corporate Controller from January 1996 to February 2007.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Item 1A. Risk Factors

Set forth below are the risks that we believe are material to our investors. This section contains forward-looking statements. You should refer to the explanation of the qualifications and limitations on forward-looking statements beginning on page 4.

We must develop new products, adapt to rapid and significant technological change and respond to introductions of new products by competitors to remain competitive. Our growth strategy includes significant investment in and expenditures for product development. We sell our products in several industries that are characterized by rapid and significant technological changes, frequent new product and service introductions and enhancements and evolving industry standards. Competitive factors include technological innovation, price, service and delivery, breadth of product line, customer support, e-business capabilities and the ability to meet the special requirements of customers. Our competitors may adapt more quickly to new technologies and changes in customers' requirements than we can. Without the timely introduction of new products, services and enhancements, our products and services will likely become technologically obsolete over time, in which case our revenue and operating results would suffer.

Many of our existing products and those under development are technologically innovative and require significant planning, design, development and testing at the technological, product and manufacturing-process levels. Our customers use many of our products to develop, test and manufacture their own products. As a result, we must anticipate industry trends and develop products in advance of the commercialization of our customers' products. If we fail to adequately predict our customers' needs and future activities, we may invest heavily in research and development of products and services that do not lead to significant revenue.

It may be difficult for us to implement our strategies for improving internal growth. Some of the markets in which we compete have been flat or declining over the past several years. To address this issue, we are pursuing a number of strategies to improve our internal growth, including:

- strengthening our presence in selected geographic markets;
- allocating research and development funding to products with higher growth prospects;
- developing new applications for our technologies;
- expanding our service offerings;
- continuing key customer initiatives;
- combining sales and marketing operations in appropriate markets to compete more effectively;
- finding new markets for our products; and
- continuing the development of commercial tools and infrastructure to increase and support cross-selling opportunities of products and services to take advantage of our depth in product offerings.

We may not be able to successfully implement these strategies, and these strategies may not result in the expected growth of our business.

Our business is affected by general economic conditions and related uncertainties affecting markets in which we operate. Our business is affected by general economic conditions, both inside and outside the U.S. If the global economy and financial markets, or economic conditions in Europe, the U.S. or other key markets, are unstable, it could adversely affect the business, results of operations and financial condition of the company and its customers, distributors, and suppliers, having the effect of:

- reducing demand for some of our products;
- increasing the rate of order cancellations or delays;
- increasing the risk of excess and obsolete inventories;
- increasing pressure on the prices for our products and services; and
- creating longer sales cycles and greater difficulty in collecting sales proceeds.

Financial Statement Index

20

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Risk Factors (continued)

For example, recent developments in Europe have created uncertainty with respect to the ability of certain European countries to continue to service their sovereign debt obligations. This debt crisis and related European financial restructuring efforts may cause the value of the euro to deteriorate, reducing the purchasing power of our European customers and reducing our U.S. dollar revenues as translated from the euro. In addition, the European crisis could result in customers in Europe taking longer to pay for products they have purchased from us, or being unable to pay at all. The continued weakness in world economies makes the strength and timing of any economic recovery uncertain, and there can be no assurance that global economic conditions will not deteriorate further.

Demand for some of our products depends on capital spending policies of our customers and on government funding policies. Our customers include pharmaceutical and chemical companies, laboratories, universities, healthcare providers, government agencies and public and private research institutions. Many factors, including public policy spending priorities, available resources and product and economic cycles, have a significant effect on the capital spending policies of these entities.

Spending by some of these customers fluctuates based on budget allocations and the timely passage of the annual federal budget. An impasse in federal government budget decisions could lead to substantial delays or reductions in federal spending. The U.S. Government has been unable to reach agreement on budget reduction measures required by the Budget Control Act of 2011. As a result, on March 1, 2013, an enforcement mechanism known as sequestration went into effect, which will trigger a total of \$1.2 trillion in spending reductions over the next decade, divided between domestic and defense spending. Unless Congress and the Administration take further action, government funding would be reduced for certain of our customers, including those who are dependent on funding from the National Institutes of Health, which would likely have a significant effect on these entities' spending policies. These policies in turn can have a significant effect on the demand for our products.

Integrating the Life Technologies businesses into Thermo Fisher's existing businesses may be more difficult, costly or time consuming than expected and the anticipated benefits and cost savings of the transaction may not be fully realized. The success of the acquisition of Life Technologies, including the realization of anticipated benefits and cost savings, will depend, in part, on Thermo Fisher's ability to successfully combine the businesses of Thermo Fisher and Life Technologies. The integration may be more difficult, costly or time consuming than expected. It is possible that the integration process could result in the loss of key employees or the disruption of each company's ongoing businesses or that the alignment of standards, controls, procedures and policies may adversely affect the combined company's ability to maintain relationships with clients, customers, suppliers and employees or to fully achieve the anticipated benefits and cost savings of the transaction. The loss of key employees could adversely affect Thermo Fisher's ability to successfully conduct its business in the markets in which Life Technologies operated prior to closing, which could have an adverse effect on our financial results and the value of our common stock. Other potential difficulties of combining the business of Thermo Fisher and Life Technologies include unanticipated issues in integrating manufacturing, logistics, information communications and other systems.

If we experience difficulties with the integration process, the anticipated benefits of the transaction may not be realized fully or at all, or may take longer to realize than expected. Integration efforts between the two companies may also divert management attention and resources. These integration matters could have an adverse effect on the company.

THERMO FISHER SCIENTIFIC INC.

Risk Factors (continued)

As a multinational corporation, we are exposed to fluctuations in currency exchange rates, which could adversely affect our cash flows and results of operations. International markets contribute a substantial portion of our revenues, and we intend to continue expanding our presence in these regions. The exposure to fluctuations in currency exchange rates takes on different forms. International revenues and costs are subject to the risk that fluctuations in exchange rates could adversely affect product demand and the profitability in U.S. dollars of products and services provided by us in international markets, where payment for our products and services is made in the local currency. As a multinational corporation, our businesses occasionally invoice third-party customers in currencies other than the one in which they primarily do business (the “functional currency”). Movements in the invoiced currency relative to the functional currency could adversely impact our cash flows and our results of operations. In addition, reported sales made in non-U.S. currencies by our international businesses, when translated into U.S. dollars for financial reporting purposes, fluctuate due to exchange rate movement. Should our international sales grow, exposure to fluctuations in currency exchange rates could have a larger effect on our financial results. In 2012, currency translation had an unfavorable effect of \$227 million on the revenues of our continuing operations due to the strengthening of the U.S. dollar relative to other currencies in which the company sells products and services, and in 2013, currency translation had an unfavorable effect on revenues of our continuing operations of \$36 million.

Healthcare reform legislation could adversely impact us. The Patient Protection and Affordable Care Act could have an adverse impact on us. Some of the potential consequences, such as a reduction in governmental support of healthcare services or adverse changes to the delivery or pricing of healthcare services or products or mandated benefits, may cause healthcare-industry participants to purchase fewer of our products and services or to reduce the prices they are willing to pay for our products or services.

Our inability to protect our intellectual property could have a material adverse effect on our business. In addition, third parties may claim that we infringe their intellectual property, and we could suffer significant litigation or licensing expense as a result. We place considerable emphasis on obtaining patent and trade secret protection for significant new technologies, products and processes because of the length of time and expense associated with bringing new products through the development process and into the marketplace. Our success depends in part on our ability to develop patentable products and obtain and enforce patent protection for our products both in the United States and in other countries. We own numerous U.S. and foreign patents, and we intend to file additional applications, as appropriate, for patents covering our products. Patents may not be issued for any pending or future patent applications owned by or licensed to us, and the claims allowed under any issued patents may not be sufficiently broad to protect our technology. Any issued patents owned by or licensed to us may be challenged, invalidated or circumvented, and the rights under these patents may not provide us with competitive advantages. In addition, competitors may design around our technology or develop competing technologies. Intellectual property rights may also be unavailable or limited in some foreign countries, which could make it easier for competitors to capture increased market position. We could incur substantial costs to defend ourselves in suits brought against us or in suits in which we may assert our patent rights against others. An unfavorable outcome of any such litigation could materially adversely affect our business and results of operations.

We also rely on trade secrets and proprietary know-how with which we seek to protect our products, in part, by confidentiality agreements with our collaborators, employees and consultants. These agreements may be breached and we may not have adequate remedies for any breach. In addition, our trade secrets may otherwise become known or be independently developed by our competitors.

Third parties may assert claims against us to the effect that we are infringing on their intellectual property rights. With our recent acquisition of Life Technologies, we have become party to several lawsuits in which plaintiffs claim we infringe their intellectual property. We could incur substantial costs and diversion of management resources in defending these claims, which could have a material adverse effect on our business, financial condition and results of operations. In addition, parties making these claims could secure a judgment awarding substantial damages, as well as injunctive or other equitable relief, which could effectively block our ability to make, use, sell, distribute, or market our products and services in the United States or abroad. In the event that a claim relating to intellectual property is asserted against us, or third parties not affiliated with us hold pending or issued patents that relate to our products or technology, we may seek licenses to such intellectual property or challenge those patents. However, we may be unable to obtain these licenses on commercially reasonable terms, if at all, and our challenge of the patents may be unsuccessful. Our failure to obtain the necessary licenses or other rights could prevent the sale, manufacture, or distribution of our products and, therefore, could have a material adverse effect on our business, financial condition and results of operations.

Changes in governmental regulations may reduce demand for our products or increase our expenses. We compete in many markets in which we and our customers must comply with federal, state, local and international regulations, such as environmental, health and safety and food and drug regulations. We develop, configure and market our products to meet customer needs created by those regulations. Any significant change in regulations could reduce demand for our products or increase our expenses. For example, many of our instruments are marketed to the pharmaceutical industry for use in discovering and developing drugs. Changes in the U.S. Food and Drug Administration's regulation of the drug discovery and development process could have an adverse effect on the demand for these products.

THERMO FISHER SCIENTIFIC INC.

Risk Factors (continued)

If our security products do not operate as designed and fail to detect explosives or radiation, we could be exposed to product liability and related claims for which we may not have adequate insurance coverage. Products currently or previously sold by our environmental and process instruments and radiation measurement and security instruments businesses include fixed and portable instruments used for chemical, radiation and trace explosives detection. These products are used in airports, embassies, cargo facilities, border crossings and other high-threat facilities for the detection and prevention of terrorist acts. If any of these products were to malfunction, it is possible that explosive or radioactive material could fail to be detected by our product, which could lead to product liability claims. There are also many other factors beyond our control that could lead to liability claims, such as the reliability and competence of the customers' operators and the training of such operators. Any such product liability claims brought against us could be significant and any adverse determination may result in liabilities in excess of our insurance coverage. Although we carry product liability insurance, we cannot be certain that our current insurance will be sufficient to cover these claims or that it can be maintained on acceptable terms, if at all.

Our inability to complete pending acquisitions or to successfully integrate any new or previous acquisitions could have a material adverse effect on our business. Our business strategy includes the acquisition of technologies and businesses that complement or augment our existing products and services. Certain acquisitions may be difficult to complete for a number of reasons, including the need for antitrust and/or other regulatory approvals. Any acquisition we may complete may be made at a substantial premium over the fair value of the net identifiable assets of the acquired company. Further, we may not be able to integrate acquired businesses successfully into our existing businesses, make such businesses profitable, or realize anticipated cost savings or synergies, if any, from these acquisitions, which could adversely affect our business.

Moreover, we have acquired many companies and businesses. As a result of these acquisitions, we recorded significant goodwill and indefinite-lived intangible assets (tradenames) on our balance sheet, which amount to approximately \$12.50 billion and \$1.34 billion, respectively, as of December 31, 2013 and we will record additional goodwill and indefinite-lived intangible assets in connection with the Life Technologies Acquisition. We assess the realizability of goodwill and indefinite-lived intangible assets annually as well as whenever events or changes in circumstances indicate that these assets may be impaired. These events or circumstances would generally include operating losses or a significant decline in earnings associated with the acquired business or asset. Our ability to realize the value of the goodwill and indefinite-lived intangible assets will depend on the future cash flows of these businesses. These cash flows in turn depend in part on how well we have integrated these businesses. If we are not able to realize the value of the goodwill and indefinite-lived intangible assets, we may be required to incur material charges relating to the impairment of those assets.

We are subject to laws and regulations governing government contracts, and failure to address these laws and regulations or comply with government contracts could harm our business by leading to a reduction in revenue associated with these customers. We have agreements relating to the sale of our products to government entities and, as a result, we are subject to various statutes and regulations that apply to companies doing business with the government. The laws governing government contracts differ from the laws governing private contracts and government contracts may contain pricing terms and conditions that are not applicable to private contracts. We are also subject to investigation for compliance with the regulations governing government contracts. A failure to comply with these regulations could result in suspension of these contracts, criminal, civil and administrative penalties or debarment.

Because we compete directly with certain of our larger customers and product suppliers, our results of operations could be adversely affected in the short term if these customers or suppliers abruptly discontinue or significantly modify their relationship with us. Our largest customer in the laboratory products business is also a significant competitor. Our business may be harmed in the short term if our competitive relationship in the marketplace with certain of our large customers results in a discontinuation of their purchases from us. In addition, we manufacture products that compete directly with products that we source from third-party suppliers. We also source competitive products from multiple suppliers. Our business could be adversely affected in the short term if any of our large third-party suppliers abruptly discontinues selling products to us.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Risk Factors (continued)

Because we rely heavily on third-party package-delivery services, a significant disruption in these services or significant increases in prices may disrupt our ability to ship products, increase our costs and lower our profitability. We ship a significant portion of our products to our customers through independent package delivery companies, such as Federal Express in the U.S. and DHL in Europe. We also maintain a small fleet of vehicles dedicated to the delivery of our products and ship our products through other carriers, including national and regional trucking firms, overnight carrier services and the U.S. Postal Service. If one or more of these third-party package-delivery providers were to experience a major work stoppage, preventing our products from being delivered in a timely fashion or causing us to incur additional shipping costs we could not pass on to our customers, our costs could increase and our relationships with certain of our customers could be adversely affected. In addition, if one or more of these third-party package-delivery providers were to increase prices, and we were not able to find comparable alternatives or make adjustments in our delivery network, our profitability could be adversely affected.

We are required to comply with a wide variety of laws and regulations, and are subject to regulation by various federal, state and foreign agencies. For example, some of our operations are subject to regulation by the U.S. Food and Drug Administration and similar international agencies. These regulations govern a wide variety of product activities, from design and development to labeling, manufacturing, promotion, sales and distribution. If we fail to comply with the U.S. Food and Drug Administration's regulations or those of similar international agencies, we may have to recall products and/or cease their manufacture and distribution, which would increase our costs and reduce our revenues.

We are also subject to a variety of federal, state, local and international laws and regulations that govern, among other things, the importation and exportation of products, the handling, transportation and manufacture of substances that could be classified as hazardous, and our business practices in the U.S. and abroad such as anti-corruption and anti-competition laws. A failure to comply with these laws and regulations could result in criminal, civil and administrative penalties.

New regulations related to "conflict minerals" may cause us to incur additional expenses and could limit the supply and increase the cost of certain metals used in manufacturing our products. On August 22, 2012, the SEC adopted a new rule requiring disclosures by public companies of specified minerals, known as conflict minerals, that are necessary to the functionality or production of products manufactured or contracted to be manufactured. The new rule, which is effective for 2013 and requires a disclosure report to be filed by May 31, 2014, will require companies to perform due diligence, disclose and report whether or not such minerals originate from the Democratic Republic of Congo or an adjoining country. The new rule could affect sourcing at competitive prices and availability in sufficient quantities of certain minerals used in the manufacture of our products, including tantalum, tin, gold and tungsten. The number of suppliers who provide conflict-free minerals may be limited. In addition, there may be material costs associated with complying with the disclosure requirements, such as costs related to determining the source of certain minerals used in our products, as well as costs of possible changes to products, processes, or sources of supply as a consequence of such verification activities. As our supply chain is complex, we may not be able to sufficiently verify the origins of the relevant minerals used in our products through the due diligence procedures that we implement, which may harm our reputation. In addition, we may encounter challenges to satisfy those customers who require that all of the components of our products be certified as conflict-free, which could place us at a competitive disadvantage if we are unable to do so.

Our business could be adversely affected by disruptions at our sites. We rely upon our manufacturing operations to produce many of the products we sell and our warehouse facilities to store products, pending sale. Any significant

disruption of those operations for any reason, such as strikes or other labor unrest, power interruptions, fire, earthquakes, or other events beyond our control could adversely affect our sales and customer relationships and therefore adversely affect our business. Although most of our raw materials are available from a number of potential suppliers, our operations also depend upon our ability to obtain raw materials at reasonable prices. If we are unable to obtain the materials we need at a reasonable price, we may not be able to produce certain of our products or we may not be able to produce certain of these products at a marketable price, which could have an adverse effect on our results of operations.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Risk Factors (continued)

Fluctuations in our effective tax rate may adversely affect our results of operations and cash flows. As a global company, we are subject to taxation in numerous countries, states and other jurisdictions. In preparing our financial statements, we record the amount of tax that is payable in each of the countries, states and other jurisdictions in which we operate. Our future effective tax rate, however, may be lower or higher than experienced in the past due to numerous factors, including a change in the mix of our profitability from country to country, changes in accounting for income taxes and recently enacted and future changes in tax laws in jurisdictions in which we operate. Any of these factors could cause us to experience an effective tax rate significantly different from previous periods or our current expectations, which could have an adverse effect on our business, results of operations and cash flows.

We may incur unexpected costs from increases in fuel and raw material prices, which could reduce our earnings and cash flow. Our primary commodity exposures are for fuel, petroleum-based resins and steel. While we may seek to minimize the impact of price increases through higher prices to customers and various cost-saving measures, our earnings and cash flows could be adversely affected in the event these measures are insufficient to cover our costs.

Unforeseen problems with the implementation and maintenance of our information systems could have an adverse effect on our operations. As a part of our ongoing effort to upgrade our current information systems, we periodically implement new enterprise resource planning software and other software applications to manage certain of our business operations. As we implement and add functionality, problems could arise that we have not foreseen. Such problems could adversely impact our ability to provide quotes, take customer orders and otherwise run our business in a timely manner. In addition, if our new systems fail to provide accurate pricing and cost data our results of operations and cash flows could be adversely affected.

We also rely on our technology infrastructure, among other functions, to interact with suppliers, sell our products and services, fulfill orders and bill, collect and make payments, ship products, provide services and support to customers, track customers, fulfill contractual obligations and otherwise conduct business. Our systems may be vulnerable to damage or interruption from natural disasters, power loss, telecommunication failures, terrorist attacks, computer viruses, computer denial-of-service attacks, unauthorized access to customer or employee data or company trade secrets, and other attempts to harm our systems. When we upgrade or change systems, we may suffer interruptions in service, loss of data or reduced functionality. Certain of our systems are not redundant, and our disaster recovery planning is not sufficient for every eventuality. Despite any precautions we may take, such problems could result in, among other consequences, interruptions in our services, which could harm our reputation and financial results.

Our debt may restrict our investment opportunities or limit our activities. As of December 31, 2013, we had approximately \$10.49 billion in outstanding indebtedness. In addition, we have a revolving credit facility that provides for up to \$1.50 billion of unsecured multi-currency revolving credit and a \$5.00 billion term facility that we entered into to partially finance the Life Technologies Acquisition (which we drew down in the first quarter of 2014). We may also obtain additional long-term debt and lines of credit to meet future financing needs, which would have the effect of increasing our total leverage.

Our leverage could have negative consequences, including increasing our vulnerability to adverse economic and industry conditions, limiting our ability to obtain additional financing and limiting our ability to acquire new products and technologies through strategic acquisitions.

Our ability to make scheduled payments, refinance our obligations or obtain additional financing will depend on our future operating performance and on economic, financial, competitive and other factors beyond our control. Our business may not generate sufficient cash flow to meet our obligations. If we are unable to service our debt, refinance our existing debt or obtain additional financing, we may be forced to delay strategic acquisitions, capital expenditures or research and development expenditures.

Financial Statement Index

25

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Risk Factors (continued)

Additionally, the agreements governing our debt require that we maintain certain financial ratios, and contain affirmative and negative covenants that restrict our activities by, among other limitations, limiting our ability to incur additional indebtedness, make investments, create liens, sell assets and enter into transactions with affiliates. The covenants in our revolving credit facility and the term credit facility that we entered into to partially finance the Life Technologies Acquisition include a total debt-to-EBITDA ratio and an interest coverage ratio. Specifically, the company has agreed that, so long as any lender has any commitment under either facility, or any loan or other obligation is outstanding under either facility, or any letter of credit is outstanding under the revolving credit facility, it will not permit (as the following terms are defined in the facility) the Consolidated Leverage Ratio (the ratio of consolidated Indebtedness to Consolidated EBITDA) as at the last day of any fiscal quarter to be greater than 5.5 to 1.0 during the first six months after the closing date of the Life Technologies Acquisition (which was February 3, 2014) and decreasing, based on the passage of time, to 3.5 to 1.0, after 18 months or the Consolidated Interest Coverage Ratio (the ratio of Consolidated EBITDA to Consolidated Interest Expense) to be less than 3.0 to 1.0.

Our ability to comply with these financial restrictions and covenants is dependent on our future performance, which is subject to prevailing economic conditions and other factors, including factors that are beyond our control such as foreign exchange rates and interest rates. Our failure to comply with any of these restrictions or covenants may result in an event of default under the applicable debt instrument, which could permit acceleration of the debt under that instrument and require us to prepay that debt before its scheduled due date. Also, an acceleration of the debt under certain of our debt instruments would trigger an event of default under other of our debt instruments.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

The location and general character of our principal properties by segment are as follows:

Life Sciences Solutions

We own approximately 2.2 million square feet of office, engineering, laboratory and production space, principally in California, New York, Utah, Maryland and Illinois within the U.S., and in the U.K., Lithuania and New Zealand. We lease approximately 2.9 million square feet of office, engineering, laboratory and production space, principally in California, Texas, Utah, Colorado and Massachusetts within the U.S., and in Singapore, China, Germany, Netherlands and India, under various leases that expire between 2014 and 2028.

Analytical Technologies

We own approximately 1.8 million square feet of office, engineering, laboratory and production space, principally in California, Massachusetts, Wisconsin, and Minnesota within the U.S., and in Germany, Italy and Switzerland. We lease approximately 1.7 million square feet of office, engineering, laboratory and production space, principally in Texas, Tennessee, Massachusetts, California, Florida, Pennsylvania and Colorado within the U.S., and in China, Germany, the U.K., Australia, Japan and Canada, under various leases that expire between 2014 and 2029.

Specialty Diagnostics

We own approximately 2.3 million square feet of office, engineering, laboratory and production space, principally in Virginia, Texas, Kansas, California and New Hampshire within the U.S., and in Sweden, Germany, the U.K. and Switzerland. We lease approximately 1.6 million square feet of office, engineering, laboratory and production space, principally in California, Michigan, Kansas and Wisconsin within the U.S., and in Finland, Germany, the U.K., China, and France under various leases that expire between 2014 and 2024.

Financial Statement Index

26

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Laboratory Products and Services

We own approximately 5.9 million square feet of office, engineering, laboratory, warehouse and production space, principally in Pennsylvania, New York, New Jersey, North Carolina, Illinois, Ohio, Georgia and Massachusetts within the U.S., and in the U.K., Germany, Canada, Denmark and France. We lease approximately 3.7 million square feet of office, engineering, laboratory, warehouse and production space, principally in California, Illinois, Pennsylvania, Maryland, North Carolina, Tennessee and New Jersey within the U.S. and in Australia, Germany, Mexico, the U.K. and Singapore under various leases that expire between 2014 and 2038.

Corporate Headquarters

We own approximately 81,000 square feet of office space in Massachusetts. We also lease approximately 22,000 square feet of office space in Massachusetts under a lease that expires in 2015.

We believe that all of the facilities that we are currently using are in good condition and are suitable and adequate to meet our current needs. If we are unable to renew any of the leases that are due to expire in 2014 or 2015, we believe that suitable replacement properties are available on commercially reasonable terms.

Item 3. Legal Proceedings

Our business involves a risk of product liability and other claims in the ordinary course of business. We are a party to various lawsuits and legal proceedings, including individual and consolidated multi-party product liability actions for products we may have distributed or manufactured. These matters have arisen in the ordinary course and conduct of our business, as well as through acquisitions. We believe that some of the costs incurred in defending and ultimately disposing of many of these claims for personal injury and other matters may be covered in part by insurance policies maintained by certain insurance carriers or subject to indemnification by our suppliers or purchasers. Management, after review and consideration with counsel, considers that any ultimate liability with respect to these matters should not have a material adverse effect on our results of operations, financial position or cash flows. While liabilities arising from potential future claims could become material, we currently believe, on the basis of our claims history and related factors, that such potential future claims are not likely to have a material impact on our business, financial condition and results of operations. Actual costs incurred will depend on the solvency of our insurance carriers, the degree of coverage with respect to any particular claim, our success in litigating these claims and the solvency of third parties who may be jointly and severally liable. See “Note 10 to our Consolidated Financial Statements – Commitments and Contingencies.”

On February 3, 2014, we acquired Life Technologies. Life Technologies and its subsidiaries are party to several lawsuits in which plaintiffs claim infringement of their intellectual property. For example:

On June 6, 2004, Enzo Biochem, Enzo Life Sciences and Yale University filed a complaint against Life Technologies in United States District Court for the District of Connecticut (Enzo Biochem, Enzo Life Sciences, & Yale Univ. v. Applera Corp. & Tropix, Inc., D-Conn Case No. 3:04-cv-00929). The plaintiffs allege patent infringement by Applera’s labeled DNA terminator products used in DNA sequencing and fragment analysis. The plaintiff sought damages for alleged willful infringement, attorneys’ fees, costs, prejudgment interest, and injunctive relief. In November 2012, the jury awarded damages of \$48.5 million. Prejudgment interest of \$12.4 million was also granted. The \$60.9 million judgment and interest has been accrued by Life Technologies. The case is currently on appeal to the United States Court of Appeal for the Federal Circuit.

On January 30, 2012, Enzo Life Sciences filed a complaint against Life Technologies in United States District Court for the District of Delaware (Enzo Life Sciences, v. Life Technologies, D-Del. Case No. 12-cv-00105). The plaintiff alleges patent infringement by Life Technologies' Taqman probes and assays, Dynabead oligo-dT beads, and NCode oligonucleotide array products. The plaintiff seeks damages for alleged willful infringement, attorneys' fees, costs, prejudgment interest and injunctive relief.

THERMO FISHER SCIENTIFIC INC.

On May 26, 2010, Promega Corp. & Max-Planck-Gesellschaft Zur Forderung Der Wissenschaften EV filed a complaint against Life Technologies in the United States District Court for the Western District of Wisconsin (Promega Corp. & Max-Planck-Gesellschaft Zur Forderung Der Wissenschaften EV v. Life Technologies Corp., Invitrogen IP Holdings, Inc. and Applied Biosystems, LLC, WD-WI Case No. 10-cv-00281). The plaintiffs allege patent infringement by sales and uses of Applied Biosystems' short tandem repeat DNA identification products outside the scope of a 2006 license agreement. The plaintiff sought damages for alleged willful infringement, attorneys' fees, costs, prejudgment interest, and injunctive relief. Although a jury initially found willful infringement and assessed damages at \$52 million, the District Court subsequently overturned the verdict on the grounds that the plaintiff had failed to prove infringement. The District Court entered judgment in favor of Life Technologies, and the case is currently on appeal to the United States Court of Appeals for the Federal Circuit. The \$52 million award has been accrued by Life Technologies.

On September 29, 2009, Life Technologies filed a complaint against Illumina, Inc. and Solexa, Inc. in the United States District Court for the District of Delaware (Life Technologies Corp., Applied Biosystems, LLC et al. v. Illumina, Inc. and Solexa, Inc., D-Del. Case No. 09-cv-00706) alleging infringement of patents relating to clonal amplification of nucleic acids by Illumina's next generation Genome Analyzer, HiSeq, and MiSeq DNA sequencing systems. Illumina asserted counterclaims in that case alleging infringement of patents relating to optical tracking, generating linked pairs of nucleic acid segments, and genome-wide variation analysis by Life Technologies' next generation SOLiD sequencing system and Ion Torrent's semiconductor sequencing system. On April 6, 2011, the case was transferred to the United States District Court for the Southern District of California (SD-Cal. Case No. 3:11-cv-00703). Life Technologies seeks damages for alleged willful infringement, attorneys' fees, costs, pre- and post-judgment interest, and injunctive relief. On its counterclaims, Illumina seeks damages for alleged infringement, attorneys' fees, costs, pre- and post-judgment interest, and injunctive relief.

On December 27, 2011, Illumina Inc. filed a complaint against Life Technologies in the United States District Court for the Southern District of California (Illumina, Inc. v. Life Technologies Corp., Applied Biosystems, LLC & Ion Torrent Systems, Inc., SD-Cal. Case No. 11-cv-3022) alleging infringement of a patent relating to methods for making bead arrays by Ion Torrent's semiconductor sequencing systems. Plaintiff seeks damages for alleged willful infringement, attorneys' fees, costs, pre- and post-judgment interest, and injunctive relief.

On April 26, 2012, Esoterix Genetic Laboratories filed a complaint against Life Technologies in the United States District Court for the Middle District of North Carolina (Esoterix Genetic Laboratories, LLC v. Life Technologies Corp., Applied Biosystems, LLC & Ion Torrent Systems, Inc., MD-NC Case No. 12-cv-00411) alleging infringement of patents relating to detection of subpopulations of cells with mutated sequences and multiplexed DNA amplification by Life Technologies' OpenArray systems, next generation SOLiD sequencing system, and Ion Torrent semiconductor sequencing systems. Plaintiff seeks damages for alleged willful infringement, attorneys' fees, costs, prejudgment interest, and injunctive relief.

On October 31, 2012, Esoterix Genetic Laboratories and The Johns Hopkins University filed a complaint against Life Technologies in the United States District Court for the Middle District of North Carolina (Esoterix Genetic Laboratories, LLC & The Johns Hopkins University v. Life Technologies Corp., Applied Biosystems, LLC & Ion Torrent Systems, Inc., MD-NC Case No. 12-cv-01173) alleging infringement of patents relating to methods of determining a ratio of genetic sequences in a population of genetic sequences and methods of determining allelic imbalances in a biological sample by Life Technologies' OpenArray systems, next generation SOLiD sequencing system, and Ion Torrent semiconductor sequencing systems. Plaintiffs seek damages for alleged willful infringement, attorneys' fees, costs, prejudgment interest, and injunctive relief.

On June 3, 2013, Unisone Strategic IP filed a complaint against Life Technologies in the United States District Court for the Southern District of California (Unisone Strategic IP v. Life Tech et al., SD-Cal. Case No. 13-cv-01278) alleging patent infringement by Life Technologies' supply chain management system software, which operates with product "supply centers" installed at customer sites. Plaintiff seeks damages for alleged willful infringement, attorneys' fees, costs, and injunctive relief.

An unfavorable outcome in one or more of these matters could have a material adverse effect on the company's results of operations, financial position or cash flows.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Price of Common Stock

Our common stock is traded on the New York Stock Exchange under the symbol TMO. The following table sets forth the high and low sale prices of the company's common stock for 2013 and 2012, as reported in the consolidated transaction reporting system.

	2013		2012	
	High	Low	High	Low
First Quarter	\$78.04	\$64.54	\$58.37	\$45.67
Second Quarter	89.50	75.27	56.91	48.14
Third Quarter	94.74	84.41	61.00	49.63
Fourth Quarter	111.44	89.71	65.54	57.21

The closing price of the company's common stock on December 31, 2013 and 2012, was \$111.35 and \$63.78, respectively.

The following table sets forth the per share dividends declared on the company's common stock for 2013 and 2012.

	2013	2012
First Quarter	\$0.15	\$0.13
Second Quarter	0.15	0.13
Third Quarter	0.15	0.13
Fourth Quarter	0.15	0.15

Our payment of dividends in the future will be determined by our Board of Directors and will depend upon our earnings, financial condition and other factors.

Holders of Common Stock

As of February 1, 2014, the company had 5,266 holders of record of its common stock. This does not include holdings in street or nominee names.

Issuer Purchases of Equity Securities

There was no share repurchase activity for the company's fourth quarter of 2013. On November 8, 2012, the Board of Directors authorized the repurchase of up to \$1.00 billion of the company's common stock beginning January 1, 2013. At December 31, 2013, \$910 million was available for future repurchases of the company's common stock under this authorization. In connection with the acquisition of Life Technologies, the company suspended repurchases of its common stock at the end of the first quarter of 2013.

Total Assets	31,863.4	27,444.6	26,833.7	21,349.4	21,625.0
Long-term Obligations	9,499.6	7,031.2	5,755.2	2,031.3	2,064.0
Shareholders' Equity	16,856.1	15,464.7	15,038.1	15,361.0	15,430.9

The caption “restructuring and other costs” in the notes below includes amounts charged to cost of revenues, primarily for the sale of inventories revalued at the date of acquisition, and charges/credits to selling, general and administrative expense primarily for significant acquisition transaction costs.

- (a) Reflects \$179.8 million of pre-tax charges for restructuring and other costs; after-tax loss of \$5.8 million related to the company’s discontinued operations; and the repurchase of \$89.8 million of the company’s common stock. Also reflects the issuance of \$3.20 billion of long-term debt in December 2013 to fund the acquisition of Life Technologies in January 2014.
- (b) Reflects \$150.2 million of pre-tax charges for restructuring and other costs; after-tax loss of \$80.5 million related to the company’s discontinued operations; and the repurchase of \$1.15 billion of the company’s common stock.
- (c) Reflects \$230.6 million of pre-tax charges for restructuring and other costs; after-tax income of \$306.5 million related to the company’s discontinued operations; and the repurchase of \$1.34 billion of the company’s common stock. Also reflects the acquisitions of Dionex Corporation, in May 2011, and the Phadia group, in August 2011.
- (d) Reflects \$76.4 million of pre-tax charges for restructuring and other costs; after-tax income of \$49.5 million related to the company’s discontinued operations; and the repurchase of \$1.01 billion of the company’s common stock.
- (e) Reflects \$67.1 million of pre-tax charges for restructuring and other costs; after-tax income of \$43.2 million related to the company’s discontinued operations; and the repurchase of \$414.6 million of the company’s common stock.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Reference is made throughout this Management's Discussion and Analysis of Financial Condition and Results of Operations to Notes to Consolidated Financial Statements, which begin on page F-1 of this report.

Overview

The company develops, manufactures and sells a broad range of products that are sold worldwide. The company expands the product lines and services it offers by developing and commercializing its own technologies and by making strategic acquisitions of complementary businesses. The company's continuing operations fall into three business segments (see Note 3): Analytical Technologies, Specialty Diagnostics and Laboratory Products and Services.

Recent and Pending Acquisitions and Divestitures

The company's strategy is to augment internal growth at existing businesses with complementary acquisitions such as those completed in 2012 and its 2014 acquisition of Life Technologies. The company's principal 2012 acquisitions are described below.

- One Lambda, a provider of transplant diagnostics, was acquired in September 2012 to enhance the company's presence in specialty in vitro diagnostics and to increase access to the transplant diagnostics market.
- Doe & Ingalls, a channel for specialty production chemicals and provider of customized supply-chain services to the life sciences and microelectronics industries, was acquired in May 2012 to expand the company's products and services that address the production market.

In addition, on April 14, 2013, the company entered into an Agreement and Plan of Merger with Life Technologies providing for the acquisition of Life Technologies by the company (the "Life Technologies Acquisition") at a price of approximately \$13.6 billion in cash (\$76.1311786 per share), plus the assumption of certain Life Technologies indebtedness (Note 2). Life Technologies provides innovative products and services to customers conducting scientific research and genetic analysis, as well as those in applied markets, such as forensics and food safety testing. Life Technologies' revenues totaled \$3.9 billion in 2013. The acquisition was completed on February 3, 2014. Life Technologies will be reported in a new segment, Life Sciences Solutions, together with most of the company's existing biosciences businesses.

The company completed its permanent financing arrangements for the Life Technologies Acquisition in December 2013. The financing consists of a term loan agreement (the "Term Credit Facility"), proceeds from issuance of senior debt and commercial paper, proceeds from equity forward agreements and cash on hand. These arrangements are discussed below under the caption "Liquidity and Capital Resources".

In December 2013, the company entered an agreement to sell its sera and media, gene modulation and magnetic beads businesses to GE Healthcare for approximately \$1.06 billion. The businesses fall principally in the Analytical Technologies segment. Divestiture of these businesses was a condition to obtaining antitrust approval for the Life Technologies Acquisition. As of December 31, 2013, the agreement to sell the businesses was contingent on, among other things, obtaining antitrust approval for the acquisition of Life Technologies. That approval was obtained in January 2014 at which time these businesses were designated as held for sale. Revenues and operating income in 2013

of the businesses to be sold were approximately \$250 million and \$80 million, respectively. The sale is subject to additional regulatory approvals and other customary closing conditions.

Overview of Results of Operations and Liquidity

In February 2013, in connection with a change in management responsibility for two product lines with aggregate annual revenues of approximately \$100 million, the company transferred its water analysis and research serum and media product lines to the Laboratory Products and Services segment from the Analytical Technologies segment. The company has historically moved a product line between segments when a shift in strategic focus of either the product line or a segment more closely aligns the product line with a segment different than that in which it had previously been reported. Prior period segment information has been reclassified to reflect these transfers.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview of Results of Operations and Liquidity (continued)

(Dollars in millions)	2013			2012		
Revenues						
Analytical Technologies	\$4,125.1	31.5	%	\$4,017.9	32.1	%
Specialty Diagnostics	3,191.7	24.4	%	2,962.3	23.7	%
Laboratory Products and Services	6,350.5	48.5	%	6,053.7	48.4	%
Eliminations	(577.0)	(4.4)	%	(524.0)	(4.2)	%
	\$13,090.3	100	%	\$12,509.9	100	%

Sales in 2013 were \$13.09 billion, an increase of \$580 million from 2012. Sales increased \$188 million due to acquisitions. The unfavorable effects of currency translation resulted in a decrease in revenues of \$36 million in 2013. Aside from the effects of currency translation and acquisitions, revenues increased \$429 million (3%) primarily due to increased demand offset in part by modestly lower sales to customers in academic and government markets which the company believes was due in part to uncertainty in government funding expectations in the U.S. Sales remained strong to customers in pharmaceutical and biotech industries while sales to customers in industrial markets grew modestly. Sales growth was strong in Asia and modest in Europe and North America.

In 2013, total company operating income and operating income margin were \$1.61 billion and 12.3%, respectively, compared with \$1.48 billion and 11.8%, respectively, in 2012. The increase in operating income and operating income margin was primarily due to productivity improvements, net of inflationary cost increases, and, to a lesser extent, profit on incremental sales from acquisitions. The increase was offset in part by strategic growth investments, unfavorable foreign currency exchange and, to a lesser extent, \$24 million of higher acquisition-related charges in 2013, an increase in amortization expense of \$16 million in 2013 primarily related to the acquisitions of One Lambda and Doe & Ingalls and imposition of a medical device excise tax in 2013. The company's references throughout this discussion to productivity improvements generally refer to improved cost efficiencies from its Practical Process Improvement (PPI) business system, reduced costs resulting from global sourcing initiatives, a lower cost structure following restructuring actions, including headcount reductions and consolidation of facilities, and low cost region manufacturing.

The company's effective tax rates were 3.1% and 0.9% in 2013 and 2012, respectively. Due primarily to the non-deductibility of intangible asset amortization, the company's cash payments (net of refunds) for income taxes for its continuing operations were higher than its income tax expense for financial reporting purposes and totaled \$230 million and \$331 million in 2013 and 2012, respectively. Tax payments decreased in 2013 due primarily to refunds of taxes paid in 2012. In 2013, non-U.S. subsidiaries of the company made cash and deemed distributions to the U.S. which resulted in no net tax cost. As a result of these distributions, the company generated U.S. foreign tax credits of \$160 million offset by additional U.S. income taxes of \$56 million on the related foreign income. The net result of these transactions favorably affected the income tax provision by \$104 million and reduced the company's effective tax rate by 7.9 percentage points in 2013. In addition, the effective tax rate in 2013 was also reduced by the U.S. Congress' renewal in January 2013 of a tax credit for research and development activities for 2012 and 2013 and, to a lesser extent, increased earnings in lower tax jurisdictions and financing costs associated with the acquisition of Life

Technologies that are deductible in the U.S. The tax credit for 2012 and 2013 research and development activities favorably affected the tax provision in 2013 by \$15.4 million, or 1.2 percentage points. The tax provision in the 2013 period was unfavorably affected by \$5.4 million, or 0.4 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates and audit settlements. The tax provision in 2012 was favorably affected by \$53 million, or 4.1 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates, particularly a lower tax rate in Sweden. The company expects its effective tax rate in 2014 will be between 2% and 5% based on currently forecasted rates of profitability in the countries in which the company conducts business. The tax credit for research and development activities has not been extended by the U.S. Congress as of February 26, 2014.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview of Results of Operations and Liquidity (continued)

Income from continuing operations increased to \$1.28 billion in 2013, from \$1.26 billion in 2012, primarily due to improved operating performance, offset in part by \$126 million of costs related to the acquisition and financing of Life Technologies.

During 2013, the company's cash flow from operations totaled \$2.01 billion (after deducting \$5 million used by discontinued operations), compared with \$2.04 billion (after deducting \$28 million from discontinued operations) for 2012. The decrease resulted in part from cash disbursements for fees paid to obtain bridge financing commitments and other transaction costs, totaling \$108 million, related to the acquisition of Life Technologies. In addition, higher increases in working capital items than in 2012 were partially offset in part by higher income before amortization and depreciation in 2013 compared to 2012.

As of December 31, 2013, the company's short-term debt totaled \$988 million, including \$250 million of commercial paper obligations and \$706 million of senior notes, due in 2014. The company has a revolving credit facility with a bank group that provides up to \$1.50 billion of unsecured multi-currency revolving credit. If the company borrows under this facility, it intends to leave undrawn an amount equivalent to outstanding commercial paper to provide a source of funds in the event that commercial paper markets are not available. As of December 31, 2013, no borrowings were outstanding under the company's revolving credit facility, although available capacity was reduced by approximately \$43 million as a result of outstanding letters of credit.

Of the company's existing cash and short-term investments of \$5.83 billion as of December 31, 2013, \$5.18 billion was available to partially fund the acquisition of Life Technologies in February 2014. The company believes that the remaining balance of approximately \$650 million and the company's future cash flow from operations together with available borrowing capacity under its revolving credit agreement are sufficient to meet the cash requirements of its existing and Life Technologies businesses for the foreseeable future, including at least the next 24 months.

Critical Accounting Policies and Estimates

The company's discussion and analysis of its financial condition and results of operations is based upon its financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses and related disclosure of contingent liabilities. On an on-going basis, management evaluates its estimates, including those related to bad debts, inventories, business combinations, intangible assets and goodwill, equity investments, sales returns, warranty obligations, income taxes, contingencies and litigation, pension costs and stock-based compensation. Management believes the most complex and sensitive judgments, because of their significance to the consolidated financial statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management bases its estimates on historical experience, current market and economic conditions and other assumptions that management believes are reasonable. The results of these estimates form the basis for judgments about the carrying value of assets and liabilities where the values are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

The company believes the following represent its critical accounting policies and estimates used in the preparation of its financial statements:

(a) Accounts Receivable

The company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to pay amounts due. Such allowances totaled \$54 million at December 31, 2013. The company estimates the amount of customer receivables that are uncollectible based on the age of the receivable, the creditworthiness of the customer and any other information that is relevant to the judgment. If the financial condition of the company's customers were to deteriorate, reducing their ability to make payments, additional allowances would be required.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Critical Accounting Policies and Estimates (continued)

(b) Inventories

The company writes down its inventories for estimated excess quantities and obsolescence based on differences between the cost and estimated net realizable value taking into consideration usage in the preceding 12 months, expected demand and any other information that is relevant to the judgment. If ultimate usage or demand varies significantly from expected usage or demand, additional writedowns may be required.

(c) Intangible Assets and Goodwill

The company uses assumptions and estimates in determining the fair value of assets acquired and liabilities assumed in a business combination. The determination of the fair value of intangible assets, which represent a significant portion of the purchase price in many of the company's acquisitions, requires the use of significant judgment with regard to (i) the fair value; and (ii) whether such intangibles are amortizable or non-amortizable and, if the former, the period and the method by which the intangible asset will be amortized. The company estimates the fair value of acquisition-related intangible assets principally based on projections of cash flows that will arise from identifiable intangible assets of acquired businesses. The projected cash flows are discounted to determine the present value of the assets at the dates of acquisition. Definite-lived intangible assets totaled \$5.73 billion at December 31, 2013. The company reviews definite-lived intangible assets for impairment when indication of potential impairment exists, such as a significant reduction in cash flows associated with the assets. Actual cash flows arising from a particular intangible asset could vary from projected cash flows which could imply different carrying values from those established at the dates of acquisition and which could result in impairment of such asset.

The company evaluates goodwill and indefinite-lived intangible assets for impairment annually and when events occur or circumstances change that may reduce the fair value of the asset below its carrying amount. Events or circumstances that might require an interim evaluation include unexpected adverse business conditions, economic factors, unanticipated technological changes or competitive activities, loss of key personnel and acts by governments and courts. Goodwill and indefinite-lived intangible assets totaled \$12.50 billion and \$1.34 billion, respectively, at December 31, 2013. Estimates of future cash flows require assumptions related to revenue and operating income growth, asset-related expenditures, working capital levels and other factors. Different assumptions from those made in the company's analysis could materially affect projected cash flows and the company's evaluation of goodwill and indefinite-lived intangible assets for impairment.

Growth at some of the company's businesses slowed in 2011 – 2013 which the company believes was in part due to uncertainty in funding expectations of customers in academic and government markets and economic uncertainty including a slow-down in Southern Europe. Projections of profitability for 2014 and thereafter and indicated fair values based on peer revenues and earnings trading multiples were sufficient to conclude that no impairment of goodwill or indefinite-lived intangible assets existed at the end of the tenth fiscal month of 2013, the date of the company's impairment testing. There can be no assurance, however, that the

slowing of growth experienced in 2011 - 2013 at some businesses will not continue or worsen in 2014 and that a downturn will not materially adversely affect peer trading multiples and the company's businesses such that they do not achieve their forecasted profitability and these assets become impaired. Should the fair value of the company's goodwill or indefinite-lived intangible assets decline because of reduced operating performance, market declines, or other indicators of impairment, or as a result of changes in the discount rate, charges for impairment may be necessary.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Critical Accounting Policies and Estimates (continued)

The company's ImmunoDiagnostics reporting unit was created with the acquisition of the Phadia Group in August 2011. Because this reporting unit consists solely of the acquired business, its book value equaled its fair value as of the acquisition date and thus, no cushion of fair value over book value existed at that date. During its 2013 goodwill impairment testing, the company determined that the ImmunoDiagnostics reporting unit's cushion of fair value over book value had increased from 0% at the acquisition date to 11% as of November 1, 2013. Despite this favorable increase, given that the fair value is not substantially in excess of the book value, relatively small decreases in future cash flows from forecasted results or changes in discount rates or other assumptions could result in impairment of goodwill. The key variables that drive the cash flows of the reporting unit are levels of profitability and terminal value growth rate assumptions, as well as the weighted average cost of capital (WACC) rate applied. The estimates used for these assumptions represent management's best estimates, which the company believes are reasonable. These assumptions, however, are subject to uncertainty, including the degree to which the acquired business will grow revenue and profitability levels. The ImmunoDiagnostics reporting unit had \$1.80 billion of goodwill, and had an overall carrying value of \$3.31 billion as of December 31, 2013.

(d) Other Long-lived Assets

The company reviews other long-lived assets for impairment when indication of potential impairment exists, such as a significant reduction in cash flows associated with the assets. Other long-lived assets totaled \$2.41 billion at December 31, 2013, including \$1.77 billion of fixed assets. In testing a long-lived asset for impairment, assumptions are made concerning projected cash flows associated with the asset. Estimates of future cash flows require assumptions related to revenue and operating income growth and asset-related expenditures associated with the asset being reviewed for impairment. Should future cash flows decline significantly from estimated amounts, charges for impairment of other long-lived assets may be necessary.

(e) Revenues

In instances where the company sells equipment with a related installation obligation, the company generally recognizes revenue related to the equipment when title passes. The company recognizes revenue related to the installation when it performs the installation. The allocation of revenue between the equipment and the installation is based on relative fair value at the time of sale. Should the fair value of either the equipment or the installation change, the company's revenue recognition would be affected.

In instances where the company sells equipment with customer-specified acceptance criteria, the company must assess whether it can demonstrate adherence to the acceptance criteria prior to the customer's acceptance testing to determine the timing of revenue recognition. If the nature of customer-specified acceptance criteria were to change or grow in complexity such that the company could not demonstrate adherence, the company would be required to defer additional revenues upon shipment of its products until completion of customer acceptance testing.

The company's software license agreements generally include multiple products and services, or "elements." The company recognizes software license revenue based on the residual method after all elements have either been delivered or vendor specific objective evidence (VSOE) of fair value exists for any undelivered elements. In the event VSOE is not available for any undelivered element, revenue for all elements is deferred until delivery of all elements other than post-contract support is completed. Revenues from software maintenance and support contracts are recognized on a straight-line basis over the term of the contract. VSOE of fair value of software maintenance and support is determined based on the price charged for the maintenance and support when sold separately. Revenues from training and consulting services are recognized as services are performed, based on VSOE, which is determined by reference to the price customers pay when the services are sold separately.

The company records reductions to revenue for estimated product returns by customers. Should a greater or lesser number of products be returned, additional adjustments to revenue may be required.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Critical Accounting Policies and Estimates (continued)

(f) Warranty Obligations

At the time the company recognizes revenue, it provides for the estimated cost of standard product warranties in cost of product revenues based primarily on historical experience and knowledge of any specific warranty problems that indicate projected warranty costs may vary from historical patterns. The liability for warranty obligations of the company's continuing operations totaled \$50 million at December 31, 2013. Should product failure rates or the actual cost of correcting product failures vary from estimates, revisions to the estimated warranty liability would be necessary.

(g) Income Taxes

In the ordinary course of business there is inherent uncertainty in quantifying the company's income tax positions. The company assesses income tax positions and records tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances and information available at the reporting date. For those tax positions where it is more likely than not that a tax benefit will be sustained, the company has recorded the largest amount of tax benefit with a greater than 50 percent likelihood of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. For those income tax positions where it is not more likely than not that a tax benefit will be sustained, no tax benefit has been recognized in the financial statements. The company's reserve for these matters totaled \$134 million at December 31, 2013. Where applicable, associated interest expense has also been recognized as a component of the provision for income taxes.

The company operates in numerous countries under many legal forms and, as a result, is subject to the jurisdiction of numerous domestic and non-U.S. tax authorities, as well as to tax agreements and treaties among these governments. Determination of taxable income in any jurisdiction requires the interpretation of the related tax laws and regulations and the use of estimates and assumptions regarding significant future events, such as the amount, timing and character of deductions, permissible revenue recognition methods under the tax law and the sources and character of income and tax credits. Changes in tax laws, regulations, agreements and treaties, currency exchange restrictions or the company's level of operations or profitability in each taxing jurisdiction could have an impact upon the amount of current and deferred tax balances and hence the company's net income.

The company estimates the degree to which tax assets and loss carryforwards will result in a benefit based on expected profitability by tax jurisdiction, and provides a valuation allowance for tax assets and loss carryforwards that it believes will more likely than not go unused. If it becomes more likely than not that a tax asset or loss carryforward will be used, the company reverses the related valuation allowance. Any such reversals are recorded as a reduction of the company's tax provision. The company's tax valuation allowance totaled \$77 million at December 31, 2013. Should the company's actual future taxable income by tax jurisdiction vary from estimates, additional allowances or reversals thereof may be necessary.

The company provides a liability for future income tax payments in the worldwide tax jurisdictions in which it operates. Should tax return positions that the company expects are sustainable not be sustained upon audit, the company could be required to record an incremental tax provision for such taxes. Should previously unrecognized tax benefits ultimately be sustained, a reduction in the company's tax provision would result.

Financial Statement Index

36

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Critical Accounting Policies and Estimates (continued)

(h) Contingencies and Litigation

The company records accruals for various contingencies, including legal proceedings, environmental, workers' compensation, product, general and auto liabilities, and other claims that arise in the normal course of business. The accruals are based on management's judgment, historical claims experience, the probability of losses and, where applicable, the consideration of opinions of internal and or external legal counsel and actuarial estimates. Reserves of acquired businesses, including product liability and environmental reserves, were initially recorded at fair value and discounted to their net present value. Additionally, the company records receivables from third-party insurers when recovery has been determined to be probable.

(i) Pension and Other Retiree Benefits

Several of the company's U.S. and non-U.S. subsidiaries sponsor defined benefit pension and other retiree benefit plans. The cost and obligations of these arrangements are calculated using many assumptions to estimate the benefits that the employee earns while working, the amount of which cannot be completely determined until the benefit payments cease. Major assumptions used in the accounting for these employee benefit plans include the discount rate, expected return on plan assets and rate of increase in employee compensation levels. Assumptions are determined based on company data and appropriate market indicators in consultation with third-party actuaries, and are evaluated each year as of the plans' measurement date. Net periodic pension costs for the company's pension and other postretirement benefit plans totaled \$29 million in 2013. The company's unfunded benefit obligation totaled \$301 million at year-end 2013 compared with \$408 million at year-end 2012. Should any of these assumptions change, they would have an effect on net periodic pension costs and the unfunded benefit obligation. For example, a 10% decrease in the discount rate would result in an annual increase in pension and other postretirement benefit expense of approximately \$3 million and an increase in the benefit obligation of approximately \$85 million.

As of December 31, 2013, the company expects to contribute between \$30 and \$40 million to its existing defined benefit pension plans in 2014.

(j) Stock-based Compensation

The fair value of most stock options granted by the company is estimated using the Black-Scholes option pricing model. For option grants and restricted stock units that require achievement of both service and market conditions, a lattice model is used to estimate fair value. Use of a valuation model requires management to make certain assumptions with respect to selected model inputs. Management estimates expected volatility based on the historical volatility of the company's stock. Historical data on exercise patterns is the basis for determining the expected life of an option. The risk-free interest rate is based on U.S. Treasury zero-coupon issues with a remaining term which approximates the expected life assumed at the date of grant. The dividend yield is based on the company's most recent quarterly dividend rate. Changes in these input variables would affect the amount of expense associated with stock-based compensation. The compensation expense recognized for all stock-based awards is net of estimated forfeitures. The company

estimates forfeiture rates based on historical analysis of option forfeitures. If actual forfeitures should vary from estimated forfeitures, adjustments to compensation expense may be required.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations

2013 Compared With 2012

Continuing Operations

(In millions)	2013	2012	Total Change	Currency Translation	Acquisitions/ Divestitures	Operations
Revenues						
Analytical Technologies	\$4,125.1	\$4,017.9	\$107.2	\$(24.9)	\$ 9.4	\$122.7
Specialty Diagnostics	3,191.7	2,962.3	229.4	(5.4)	143.0	91.8
Laboratory Products and Services	6,350.5	6,053.7	296.8	(6.1)	35.7	267.2
Eliminations	(577.0)	(524.0)	(53.0)	—	—	(53.0)
Consolidated Revenues	\$13,090.3	\$12,509.9	\$580.4	\$(36.4)	\$ 188.1	\$428.7

Sales in 2013 were \$13.09 billion, an increase of \$580 million from 2012. Sales increased \$188 million due to acquisitions. The unfavorable effects of currency translation resulted in a decrease in revenues of \$36 million in 2013. Aside from the effects of currency translation and acquisitions, revenues increased \$429 million (3%) primarily due to increased demand offset in part by modestly lower sales to customers in academic and government markets which the company believes was due in part to uncertainty in government funding expectations in the U.S. Sales remained strong to customers in pharmaceutical and biotech industries while sales growth was modest to customers in industrial markets. Sales growth was strong in Asia and modest in Europe and North America.

In 2013, total company operating income and operating income margin were \$1.61 billion and 12.3%, respectively, compared with \$1.48 billion and 11.8%, respectively, in 2012. The increase in operating income and operating income margin was primarily due to productivity improvements, net of inflationary cost increases, and, to a lesser extent, profit on incremental sales from acquisitions. The increase was offset in part by strategic growth investments, unfavorable foreign currency exchange and, to a lesser extent, \$24 million of higher acquisition-related charges in 2013, an increase in amortization expense of \$16 million in 2013 primarily related to the acquisitions of One Lambda and Doe & Ingalls and imposition of a medical device excise tax in 2013. The company's references throughout this discussion to productivity improvements generally refer to improved cost efficiencies from its Practical Process Improvement (PPI) business system, reduced costs resulting from global sourcing initiatives, a lower cost structure following restructuring actions, including headcount reductions and consolidation of facilities, and low cost region manufacturing.

In 2013, the company recorded restructuring and other costs, net, of \$180 million, including \$29 million of charges to cost of revenues related primarily for the sale of inventories revalued at the date of acquisition and, to a lesser extent, accelerated depreciation on manufacturing assets to be abandoned due to facility consolidations and \$74 million of charges to selling, general and administrative expenses consisting primarily of transaction costs related to the acquisition of Life Technologies, revisions of estimated contingent consideration for a recent acquisition and a charge associated with product liability litigation. The company incurred \$78 million of cash restructuring costs primarily for

continued headcount reductions and facility consolidations in an effort to streamline operations, including severance at several businesses and abandoned facility expenses at businesses that have been or are being consolidated, such as the consolidation of several facilities in the U.S. and Europe (see Note 14). The cash costs also included \$4 million of transaction expenses related to the agreement to sell its sera and media, gene modulation and magnetic beads businesses (see Note 2).

In 2012, the company recorded restructuring and other costs, net, of \$150 million, including \$56 million of charges to cost of revenues primarily related to the sale of inventories revalued at the date of acquisition and \$13 million of charges to selling, general and administrative expenses primarily consisting of transaction costs related to the acquisition of One Lambda. The company incurred \$67 million of cash restructuring costs primarily for continued headcount reductions and facility consolidations in an effort to streamline operations, including severance at several businesses and abandoned facility expenses at businesses that have been or are being consolidated. The company also recorded \$15 million of non-cash expense, net, primarily for the impairment of intangible asset at several small business units and, to a lesser extent, real estate writedowns related to facility consolidations partially offset by a \$6 million gain from the settlement of pre-acquisition litigation.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

As of February 27, 2014, the company has identified restructuring actions that will result in additional charges of approximately \$50 million in 2014 and expects to identify additional actions during 2014, including some related to the acquisition of Life Technologies. The restructuring projects for which charges were incurred in 2013 are expected to result in annual cost savings of approximately \$80 million beginning in part in 2013 and, to a greater extent, in 2014, including \$35 million in the Analytical Technologies segment, \$20 million in the Specialty Diagnostics segment and \$25 million in the Laboratory Products and Services segment. The restructuring actions for which charges were incurred in 2012 resulted in annual cost savings of approximately \$85 million beginning in part in 2012 and to a greater extent in 2013, including \$40 million in the Analytical Technologies segment, \$20 million in the Specialty Diagnostics segment and \$25 million in the Laboratory Products and Services segment.

The company expects significant restructuring charges in the first quarter of 2014 in connection with the acceleration of certain equity awards held by Life Technologies' employees and severance obligations payable to former Life Technologies' executives.

Segment Results

The company's management evaluates segment operating performance using operating income before certain charges/credits to cost of revenues and selling, general and administrative expenses, principally associated with acquisition-related activities; restructuring and other costs/income including costs arising from facility consolidations such as severance and abandoned lease expense and gains and losses from the sale of real estate and product lines; and amortization of acquisition-related intangible assets. The company also refers to this measure as adjusted operating income. The company uses this measure because it helps management understand and evaluate the segments' core operating results and facilitate comparison of performance for determining compensation (Note 3). Accordingly, the following segment data is reported on this basis.

Specialty Diagnostics	866.7	761.2	14	%
Laboratory Products and Services	918.0	869.6	6	%
Subtotal Reportable Segments	2,552.5	2,379.9	7	%
Cost of Revenues Charges	(28.6)	(55.6)		
Selling, General and Administrative Charges, Net	(73.5)	(12.5)		
Restructuring and Other Costs, Net	(77.7)	(82.1)		
Amortization of Acquisition-related Intangible Assets	(763.1)	(747.6)		
Consolidated Operating Income	\$ 1,609.6	\$ 1,482.1	9	%
Reportable Segments Operating Income Margin	19.5 %	19.0 %		
Consolidated Operating Income Margin	12.3 %	11.8 %		

Income from the company's reportable segments increased 7% to \$2.55 billion in 2013 due primarily to productivity improvements, net of inflationary costs increases, and, to a lesser extent, profit on incremental sales from acquisitions, offset in part by strategic growth investments and unfavorable foreign currency exchange.

Analytical Technologies

(Dollars in millions)	2013	2012	Change	
Revenues	\$4,125.1	\$4,017.9	3	%
Operating Income Margin	18.6 %	18.6 %	0.0pt	

Sales in the Analytical Technologies segment increased \$107 million to \$4.13 billion in 2013. Sales increased \$123 million (3%) due to higher revenues at existing businesses and \$9 million due to acquisitions. These increases were offset in part by a decrease of \$25 million due to the unfavorable effects of currency translation. The increase in revenue at existing businesses was primarily due to increased demand for chromatography and mass spectrometry instruments as well as bioscience products, offset in part by lower sales of chemical analysis products which the company believes were affected by macro economic conditions facing customers in industrial markets.

Operating income margin was 18.6% in 2013 compared to 18.6% in 2012. Operating margin was favorably affected by productivity improvements, net of inflationary cost increases, offset by strategic growth investments and unfavorable foreign currency exchange.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

Specialty Diagnostics

(Dollars in millions)	2013		2012		Change
Revenues	\$3,191.7		\$2,962.3		8 %
Operating Income Margin	27.2	%	25.7	%	1.5pt

Sales in the Specialty Diagnostics segment increased \$229 million to \$3.19 billion in 2013. Sales increased \$143 million due to an acquisition and \$92 million (3%) due to higher revenues at existing businesses. These increases were offset in part by a decrease of \$5 million due to the unfavorable effects of currency translation. The increase in revenue at existing businesses was primarily due to increased demand, particularly for clinical diagnostics products and, to a lesser extent, microbiology and allergy products in part as a result of strong flu and pollen seasons, partially offset by weakness from reduced healthcare utilization and lower sales of instruments to diagnostic laboratories due in part to lower healthcare reimbursement rates in the U.S. for anatomical pathology tests.

Operating income margin was 27.2% in 2013 and 25.7% in 2012. The increase resulted from profit on incremental sales from an acquisition and, to a lesser extent, at existing businesses as well as productivity improvements, net of inflationary cost increases. The increases were offset in part by strategic growth investments and imposition of the medical device excise tax in 2013.

Laboratory Products and Services

(Dollars in millions)	2013		2012		Change
Revenues	\$6,350.5		\$6,053.7		5 %
Operating Income Margin	14.5	%	14.4	%	0.1pt

Sales in the Laboratory Products and Services segment increased \$297 million to \$6.35 billion in 2013. Sales increased \$267 million (4%) due to higher revenues at existing businesses and \$36 million due to an acquisition. The unfavorable effects of currency translation resulted in a decrease in revenues of \$6 million in 2013. The increase in revenue at existing businesses was primarily due to increased demand for laboratory products and clinical trial logistics services. Sales of laboratory equipment increased only modestly due to weakness in demand from customers in academic and government markets.

Operating income margin was 14.5% in 2013 and 14.4% in 2012. The increase was primarily due to productivity improvements, net of inflationary cost increases and, to a lesser extent, price increases, offset in part by strategic growth investments and unfavorable sales mix.

Other Expense, Net

The company reported other expense, net, of \$290 million and \$213 million in 2013 and 2012, respectively (Note 4). In the first quarter of 2013, the company irrevocably contributed appreciated available-for-sale investments that had a fair value of \$27 million to two of its U.K. defined benefit plans, resulting in realization of a previously unrecognized gain of \$11 million. In 2013, other items, net also includes \$74 million of charges related to amortization of fees paid to obtain bridge financing commitments related to the Life Technologies Acquisition, offset in part by gains totaling \$5 million from sales of equity investments. Interest expense increased \$21 million primarily due to the debt issued to fund the One Lambda and Life Technologies acquisitions.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

Provision for Income Taxes

The company's effective tax rates were 3.1% and 0.9% in 2013 and 2012, respectively. Due primarily to the non-deductibility of intangible asset amortization, the company's cash payments (net of refunds) for income taxes for its continuing operations were higher than its income tax expense for financial reporting purposes and totaled \$230 million and \$331 million in 2013 and 2012, respectively. Tax payments decreased in 2013 due primarily to refunds of taxes paid in 2012. In 2013, non-U.S. subsidiaries of the company made cash and deemed distributions to the U.S. which resulted in no net tax cost. As a result of these distributions, the company generated U.S. foreign tax credits of \$160 million offset by additional U.S. income taxes of \$56 million on the related foreign income. The net result of these transactions favorably affected the income tax provision by \$104 million and reduced the company's effective tax rate by 7.9 percentage points in 2013. In addition, the effective tax rate in 2013 was also reduced by the U.S. Congress' renewal in January 2013 of a tax credit for research and development activities for 2012 and 2013 and, to a lesser extent, increased earnings in lower tax jurisdictions and financing costs associated with the acquisition of Life Technologies that are deductible in the U.S. The tax credit for 2012 and 2013 research and development activities favorably affected the tax provision in 2013 by \$15.4 million, or 1.2 percentage points. The tax provision in the 2013 period was unfavorably affected by \$5.4 million, or 0.4 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates and audit settlements. The tax provision in 2012 was favorably affected by \$53 million, or 4.1 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates, particularly a lower tax rate in Sweden. The company expects its effective tax rate in 2014 will be between 2% and 5% based on currently forecasted rates of profitability in the countries in which the company conducts business. The tax credit for research and development activities has not been extended by the U.S. Congress as of February 26, 2014.

The company has operations and a taxable presence in nearly 50 countries outside of the U.S. All of these countries except three have a lower tax rate than the U.S. The countries in which the company has a material presence that have significantly lower tax rates than the U.S. include Germany, the Netherlands, Sweden, Switzerland and the United Kingdom. The company's ability to obtain a benefit from lower tax rates outside the U.S. is dependent on its relative levels of income in countries outside the U.S. and on the statutory tax rates in those countries. Based on the dispersion of the company's non-U.S. income tax provision among many countries, the company believes that a change in the statutory tax rate in any individual country is not likely to materially affect the company's income tax provision or net income, aside from any resulting one-time adjustment to the company's deferred tax balances to reflect a new rate.

Discontinued Operations

On June 22, 2012, in an effort to exit a non-core business, the company's senior management made a decision to pursue a sale of its laboratory workstations business, part of the Laboratory Products and Services segment. The company completed the sale in October 2012 for nominal proceeds. Revenues of the laboratory workstations business were \$147 million in the 2012 period prior to the sale. The business incurred a pre-tax loss of \$30 million in 2012 due to inventory write-offs, higher manufacturing costs and restructuring and other transition costs associated with relocation of the business. In 2012, the company recorded after-tax charges aggregating \$63 million as the loss on the divestiture. The loss in 2013 for discontinued operations primarily represents a charge for the cost of razing

abandoned facilities of the business prior to sale of the land. The results of the laboratory workstations business have been included in the accompanying financial statements as discontinued operations for all periods presented.

Recent Accounting Pronouncements

In February 2013, the FASB issued new guidance which requires disclosure of information about significant reclassification adjustments from accumulated other comprehensive income in a single note or on the face of the financial statements. This guidance became effective for the company in 2013. Adoption of this standard, which is related to disclosure only, did not have an impact on the company's consolidated financial position, results of operations or cash flows.

Financial Statement Index

42

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

In July 2012, the FASB modified existing rules to allow entities to use a qualitative approach to test indefinite-lived intangible assets for impairment. The revised standard allows an entity the option to first assess qualitatively whether it is more likely than not (that is, a likelihood of more than 50 percent) that an indefinite-lived intangible asset is impaired. An entity is not required to calculate the fair value of an indefinite-lived intangible asset and perform the quantitative impairment test unless the entity determines that it is more likely than not that the asset is impaired. This guidance became effective for the company in 2013. Adoption of this standard did not have an impact on the company's consolidated financial position, results of operations or cash flows.

In December 2011, the FASB issued new guidance which requires enhanced disclosures on offsetting amounts within the balance sheet, including disclosing gross and net information about instruments and transactions eligible for offset or subject to a master netting or similar agreement. This guidance became effective for the company in 2013. Adoption of this standard, which is related to disclosure only, did not have an impact on the company's consolidated financial position, results of operations or cash flows.

Contingent Liabilities

The company is contingently liable with respect to certain legal proceedings and related matters. An outcome that differs materially from current reserve estimates for one or more of the matters described in Note 10 or Item 3 of this Form 10-K could have a material adverse effect on the company's financial position as well as its results of operations and cash flows.

2012 Compared With 2011

Continuing Operations

Sales in 2012 were \$12.51 billion, an increase of \$951 million from 2011. The increase was due to acquisitions, including Phadia and Dionex, and, higher sales at existing businesses, offset in part by the unfavorable effects of currency translation. Had Phadia, Dionex and the company been combined from the beginning of 2011, revenues would have increased \$403 million (3%) over pro forma 2011 revenues, including \$474 million (4%) due to higher revenues at existing businesses and \$156 million due to other acquisitions, net of divestitures, offset in part by \$227 million due to the unfavorable effects of currency translation. The pro forma increase in revenues was primarily due to increased demand. Sales growth was strong in Asia and moderate in North America and Europe. Demand from customers in academic and government markets slowed such that growth was nominal in 2012 and demand from customers in industrial markets slowed such that growth was nominal in the second half of 2012.

In 2012, total company operating income and operating income margin were \$1.48 billion and 11.8%, respectively, compared with \$1.25 billion and 10.8%, respectively, in 2011. The increase in operating income was primarily due to profit on incremental sales from acquisitions and existing businesses and, to a lesser extent, productivity improvements, net of inflationary cost increases and \$84 million of lower acquisition-related charges in 2012. The increase was offset in part by strategic growth investments and an increase in amortization expense of \$100 million in 2012, primarily related to the acquisitions of Phadia and Dionex.

In 2012, the company recorded restructuring and other costs, net, of \$150 million, including \$56 million of charges to cost of revenues related primarily to the sale of inventories revalued at the date of acquisition and \$13 million of charges to selling, general and administrative expenses consisting primarily of transaction costs related to the acquisition of One Lambda. The company incurred \$67 million of cash restructuring costs primarily for continued headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated, such as the consolidation of several facilities in the U.S. and Europe. The company also recorded \$15 million of non-cash expense, net, primarily for the impairment of intangible assets at several small business units and, to a lesser extent, real estate writedowns related to facility consolidations partially offset by a \$6 million gain from the settlement of pre-acquisition litigation.

Financial Statement Index

43

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

In 2011, the company recorded restructuring and other costs, net, of \$231 million, including \$73 million of charges to cost of revenues primarily related to the sale of inventories revalued at the date of acquisition and \$62 million of charges to selling, general and administrative expenses primarily for transaction costs related to the acquisitions of Dionex and Phadia. The company incurred \$81 million of cash restructuring costs, including \$21 million of cash compensation from monetizing equity awards held by Dionex employees at the date of acquisition. The cash costs also include continuing costs associated with headcount reductions and facility consolidations in an effort to streamline operations, including severance to reduce headcount at several businesses and abandoned facility expenses at businesses that have been or are being consolidated. The company also recorded \$15 million of non-cash expense, net, primarily for the impairment of intangible assets at several small business units and, to a lesser extent, a loss on sale of a heating equipment business.

The restructuring actions for which charges were incurred in 2011 resulted in annual cost savings of approximately \$80 million beginning in part in 2011 and to a greater extent in 2012, including \$30 million in the Analytical Technologies segment, \$15 million in the Specialty Diagnostics segment and \$35 million in the Laboratory Products and Services segment.

Results of Operations (continued)

Segment Results

(Dollars in millions)	2012	2011	Change	
Revenues				
Analytical Technologies	\$4,017.9	\$3,739.7	7	%
Specialty Diagnostics	2,962.3	2,469.9	20	%
Laboratory Products and Services	6,053.7	5,831.2	4	%
Eliminations	(524.0)	(482.0)	9	%
Consolidated Revenues	\$12,509.9	\$11,558.8	8	%
Segment Income				
Analytical Technologies	\$749.1	\$694.8	8	%
Specialty Diagnostics	761.2	598.4	27	%
Laboratory Products and Services	869.6	836.1	4	%
Subtotal Reportable Segments	2,379.9	2,129.3	12	%
Cost of Revenues Charges	(55.6)	(72.6)		
Selling, General and Administrative Costs, Net	(12.5)	(61.5)		
Restructuring and Other Costs, Net	(82.1)	(96.5)		
Amortization of Acquisition-related Intangible Assets	(747.6)	(647.9)		
Consolidated Operating Income	\$1,482.1	\$1,250.8	18	%
Reportable Segments Operating Income Margin	19.0 %	18.4 %		
Consolidated Operating Income Margin	11.8 %	10.8 %		

Income from the company's reportable segments increased 12% to \$2.38 billion in 2012 due primarily to profit on incremental sales from acquisitions and, to a lesser extent, existing businesses and productivity improvements offset in part by inflationary cost increases.

Analytical Technologies

(Dollars in millions)	2012	2011	Change	
Revenues	\$4,017.9	\$3,739.7	7	%
Operating Income Margin	18.6 %	18.6 %	-	

Sales in the Analytical Technologies segment increased \$278 million to \$4.02 billion in 2012. The increase was due to acquisitions, including Dionex, and higher revenue at existing businesses, offset in part by the unfavorable effects of currency translation. Had Dionex and the company been combined from the beginning of 2011, revenues would have increased \$104 million (3%) over pro forma 2011 revenues, including an increase of \$183 million (5%) due to higher revenues at existing businesses and \$2 million due to acquisitions, net of a disposition, offset in part by \$81 million due to the unfavorable effects of currency translation. The pro forma increase in revenue at existing businesses was primarily due to increased demand across the segment's range of analytical instruments and for bioscience products, offset in part by lower sales to customers in academic and government markets.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

Operating income margin was 18.6% in both 2012 and 2011. Profit from productivity improvements, net of inflationary cost increases and, to a lesser extent, from incremental sales at existing businesses was substantially offset by higher spending on commercial initiatives and unfavorable currency translation.

Specialty Diagnostics

(Dollars in millions)	2012	2011	Change
Revenues	\$2,962.3	\$2,469.9	20 %
Operating Income Margin	25.7 %	24.2 %	1.5

Sales in the Specialty Diagnostics segment increased \$492 million to \$2.96 billion in 2012. The increase was due to acquisitions, including Phadia, and higher revenue at existing businesses, offset in part by the unfavorable effects of currency translation. Had Phadia and the company been combined from the beginning of 2011, revenues would have increased \$118 million (4%) over pro forma 2011 revenues, including increases of \$103 million (4%) due to higher revenues at existing businesses and \$80 million due to other acquisitions, offset in part by \$65 million due to the unfavorable effects of currency translation. The pro forma increase in revenue at existing businesses was primarily due to increased demand for clinical diagnostic products and, to a lesser extent, microbiology products.

Operating income margin was 25.7% in 2012 and 24.2% in 2011. The increase resulted primarily from the accretive Phadia acquisition and, to a lesser extent, productivity improvements, net of inflationary cost increases and profit on incremental sales at existing businesses. The increases were offset in part by higher spending on commercial initiatives.

Laboratory Products and Services

(Dollars in millions)	2012	2011	Change
Revenues	\$6,053.7	\$5,831.2	4 %
Operating Income Margin	14.4 %	14.3 %	0.1

Sales in the Laboratory Products and Services segment increased \$223 million to \$6.05 billion in 2012. Sales increased \$74 million due to acquisitions. The unfavorable effects of currency translation resulted in a decrease in revenues of \$89 million in 2012. In addition to the changes in revenue resulting from acquisitions and currency translation, revenues increased \$238 million (4%) primarily due to increased demand for laboratory consumables and, to a lesser extent, clinical trial logistics services. The increase in demand was offset in part by lower sales of laboratory equipment, particularly to customers in academic and government markets.

Operating income margin was 14.4% in 2012 and 14.3% in 2011. The increase resulted from productivity improvements, net of inflationary cost increases, offset in part by lower sales of higher margin laboratory equipment and higher spending on commercial initiatives.

Other Expense, Net

The company reported other expense, net, of \$213 million and \$118 million in 2012 and 2011, respectively. The increase was primarily due to an increase of \$66 million in interest expense related to the debt issued to fund the Phadia and Dionex acquisitions. In 2011, other items, net included a \$28 million gain on currency exchange contracts associated with the Phadia acquisition and repayment of its multi-currency debt and an \$18 million gain on the sale of an investment accounted for under the cost method, offset in part by \$10 million of fees associated with short-term financing commitments to fund the Phadia acquisition.

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Results of Operations (continued)

Provision for Income Taxes

The company's effective tax rates were 0.9% and 9.7% in 2012 and 2011, respectively. Due primarily to the non-deductibility of intangible asset amortization, the company's cash payments for income taxes for its continuing operations were higher than its income tax expense for financial reporting purposes and totaled \$331 million and \$353 million in 2012 and 2011, respectively. The decrease in the effective tax rate was due in part to increased earnings in lower tax jurisdictions including the effect of the Phadia acquisition. The tax provision in 2012 was favorably affected by \$53 million, or 4.1 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates, particularly a lower tax rate in Sweden. The tax provision in 2011 was unfavorably affected by \$12 million, or 1.0 percentage points, as a result of adjustments to deferred tax balances due to changes in tax rates, offset in part by \$8 million, or 0.7 percentage points, by the ability to use tax loss carryforwards as a result of the Phadia acquisition.

Discontinued Operations

The company placed its laboratory workstations business for sale in June 2012 and reclassified its accounts and results to discontinued operations for all periods presented. Revenues of the laboratory workstations business were \$147 million in the 2012 period prior to the sale, compared to \$180 million in 2011. The business incurred a pre-tax loss of \$30 million in 2012 compared with a pre-tax loss of \$6 million in 2011 due to inventory write-offs, higher manufacturing costs and restructuring and other transition costs associated with relocation of the business. In 2012, the company recorded after-tax charges aggregating \$63 million as the loss on the divestiture. The business was sold in October 2012 for nominal proceeds.

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business (Athena) for \$740 million in cash and its Lancaster Laboratories business (Lancaster) for \$180 million in cash and escrowed proceeds of \$20 million, substantially all of which was received in October 2012. The sale of these businesses resulted in an after-tax gain of \$304 million or \$0.79 per diluted share. Revenues and operating income of the two businesses aggregated approximately \$225 million and \$60 million, respectively, in 2010. The results of both businesses have been included in the accompanying financial statements as discontinued operations for all periods presented.

Liquidity and Capital Resources

Consolidated working capital was \$6.75 billion at December 31, 2013, compared with \$2.74 billion at December 31, 2012. Included in working capital were cash, cash equivalents and short-term investments of \$5.83 billion at December 31, 2013 and \$810 million at December 31, 2012. The increase in working capital is primarily due to the issuance of \$3.20 billion of long-term debt to fund the acquisition of Life Technologies and, to a lesser extent, earnings before amortization and depreciation and proceeds from the issuance of the company's common stock under employees' stock plans, offset in part by the payment of dividends and the repurchase of the company's common stock.

2013

Cash provided by operating activities was \$2.01 billion during 2013. Increases in accounts receivable and inventories used cash of \$148 million and \$72 million, respectively, primarily to support growth in sales. A decrease in other assets provided cash of \$169 million primarily due to the timing of income tax refunds. An increase in accounts payable provided cash of \$47 million, primarily due to higher inventory purchases. An increase in other liabilities provided cash of \$163 million primarily due to the timing of payments for income taxes and incentive compensation. In 2013, the company paid fees to obtain bridge financing commitments and other transaction costs totaling \$108 million related to the acquisition of Life Technologies. The company made cash contributions to its pension and postretirement benefit plans totaling \$38 million during 2013. Cash payments for income taxes of continuing operations decreased to \$230 million during 2013, compared with \$331 million in the prior year, primarily related to refunds due from 2012. Payments for restructuring actions, principally severance costs and lease and other expenses of real estate consolidation, used cash of \$69 million during 2013.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Capital Resources (continued)

During 2013, the company's primary investing activities were the purchase of \$282 million of property, plant and equipment.

The company's financing activities provided \$3.31 billion of cash during 2013. To partially fund the acquisition of Life Technologies, the company issued \$3.20 billion of senior notes. The company's financing activities also included \$230 million of proceeds from employee stock option exercises offset by the repurchase of \$90 million of the company's common stock and the payment of \$216 million in cash dividends. On November 8, 2012, the Board of Directors authorized the repurchase of up to \$1.00 billion of the company's common stock beginning January 1, 2013. At December 31, 2013, \$910 million was available for future repurchases of the company's common stock under this authorization. In connection with the acquisition of Life Technologies, the company suspended repurchases of its common stock at the end of the first quarter of 2013.

As of December 31, 2013, the company's short-term debt totaled \$988 million, including \$250 million of commercial paper obligations and \$706 million of senior notes, due in 2014. The company has a revolving credit facility with a bank group that provides up to \$1.50 billion of unsecured multi-currency revolving credit. If the company borrows under this facility, it intends to leave undrawn an amount equivalent to outstanding commercial paper to provide a source of funds in the event that commercial paper markets are not available. As of December 31, 2013, no borrowings were outstanding under the company's revolving credit facility, although available capacity was reduced by approximately \$43 million as a result of outstanding letters of credit.

In January 2014, the company borrowed \$5.00 billion under its Term Credit Facility and committed to make scheduled repayments through 2017. In addition, in January and February 2014, the company issued 34.9 million shares under equity forward and subscription agreements for aggregate proceeds of \$2.94 billion. Proceeds from the Term Credit Facility and the equity forward agreements and cash on hand were used to fund the \$13.6 billion cash purchase price of Life Technologies. The financial covenants of the Term Credit Facility and revolving credit facility require the company to maintain a Consolidated Leverage Ratio of debt to EBITDA (as defined in the agreements) below 5.5 to 1.0 during the first six months after the closing date of the Life Technologies Acquisition and decreasing, based on the passage of time, to 3.5 to 1.0, after 18 months. The company must also maintain a minimum interest coverage ratio of 3.0 to 1.0.

Approximately half of the company's cash balances, aside from approximately \$5.18 billion of cash held at year-end to fund the Life Technologies Acquisition, and cash flows from operations are from outside the U.S. The company uses its non-U.S. cash for needs outside of the U.S. including acquisitions and repayment of acquisition-related intercompany debt to the U.S. In addition, the company also transfers cash to the U.S. using non-taxable returns of capital as well as dividends where the related U.S. foreign tax credit equals or exceeds any tax cost arising from the dividends. As a result of using such means of transferring cash to the U.S., the company does not expect any adverse liquidity effects from its significant non-U.S. cash balances for the foreseeable future.

Of the company's existing cash and short-term investments of \$5.83 billion as of December 31, 2013, \$5.18 billion was available to partially fund the acquisition of Life Technologies in February 2014. The company believes that the remaining balance of approximately \$650 million and the company's future cash flow from operations together with

available borrowing capacity under its revolving credit agreement are sufficient to meet the cash requirements of its existing and Life Technologies businesses for the foreseeable future, including at least the next 24 months.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Capital Resources (continued)

2012

Cash provided by operating activities was \$2.04 billion during 2012. An increase in inventories used cash of \$60 million, primarily to support growth in sales. An increase in other assets used cash of \$100 million primarily related to the timing of tax refunds. An increase in other liabilities provided cash of \$127 million, primarily due to the timing of payments for incentive compensation and income taxes. Cash payments for income taxes of continuing operations totaled \$331 million during 2012. Payments for restructuring actions, principally severance costs and lease and other expenses of real estate consolidation, used cash of \$64 million during 2012.

During 2012, the company's primary investing activities included acquisitions and the purchase of property, plant and equipment. The company expended \$1.08 billion for acquisitions and \$315 million for purchases of property, plant and equipment. The company's investing activities also included a \$45 million increase in restricted cash to collateralize short-term borrowings in Asia. The company's discontinued operations provided \$59 million of cash, primarily tax benefits from the loss on sale of the laboratory workstations business and receipt of escrowed proceeds from the 2011 sale of Lancaster Laboratories.

The company's financing activities used \$918 million of cash during 2012, principally for the repurchase of \$1.15 billion of the company's common stock and to reduce commercial paper obligations by \$849 million, offset in part by the issuance of \$1.3 billion in senior notes. The company's financing activities in 2012 also included the repayment of \$355 million of long-term debt and the receipt of \$254 million of proceeds from employee stock option exercises. Cash dividend payments totaled \$142 million during 2012.

2011

Cash provided by operating activities was \$1.69 billion during 2011. Increases in accounts receivable and inventories used cash of \$101 million and \$29 million, respectively, primarily to support growth in sales. An increase in other assets used cash of \$137 million primarily due to the timing of tax refunds. An increase in accounts payable provided cash of \$34 million, primarily due to higher inventory purchases. Payments for restructuring actions, principally severance costs and lease and other expenses of real estate consolidation, used cash of \$69 million during 2011.

During 2011, the company's primary investing activities included acquisitions and the purchase of property, plant and equipment. The company expended \$5.69 billion for acquisitions and \$261 million for purchases of property, plant and equipment. The company's continuing operations had cash proceeds from a divestiture of \$14 million and the company's discontinued operations had net cash proceeds of \$746 million, primarily from the sale of Athena and Lancaster.

The company's financing activities provided \$3.55 billion of cash during 2011, principally \$5.15 billion from the issuance of debt to fund acquisitions, offset in part by the repurchase of \$1.34 billion of the company's common stock. Following issuance of a redemption notice for the remaining \$329 million principal outstanding of the company's 3.25% Senior Subordinated Convertible Notes due 2024, all of the balance was converted or redeemed for a total cash outlay of \$452 million. The company's financing activities in 2011 also included \$158 million of proceeds

from employee stock option exercises.

Off-Balance Sheet Arrangements

The company did not use special purpose entities or other off-balance-sheet financing arrangements in 2011 - 2013 except for letters of credit, bank guarantees, a build-to-suit lease arrangement entered in 2012, surety bonds and other guarantees disclosed in the table or discussed below. Of the amounts disclosed in the table below for letters of credit, bank guarantees, surety bonds and other guarantees, \$4.8 million relates to guarantees of the performance of third parties, principally in connection with businesses that were sold. The balance relates to guarantees of the company's own performance, primarily in the ordinary course of business.

Contractual Obligations and Other Commercial Commitments

The table below summarizes, by period due or expiration of commitment, the company's contractual obligations and other commercial commitments as of December 31, 2013.

(In millions)	Payments due by Period or Expiration of Commitment				Total
	2014	2015 and 2016	2017 and 2018	2019 and Thereafter	
Contractual Obligations and Other Commercial Commitments					
Debt principal, including short-term debt (a)	\$981.0	\$2,609.3	\$1,401.1	\$5,500.0	\$10,491.4
Interest	324.1	560.4	436.1	1,145.5	2,466.1
Capital lease obligations	0.3	0.2	—	—	0.5
Operating lease obligations	106.5	131.7	62.0	54.2	354.4
Unconditional purchase obligations (b)	282.2	8.5	—	—	290.7
Letters of credit and bank guarantees	78.2	10.6	0.5	13.7	103.0
Surety bonds and other guarantees	47.3	5.5	—	—	52.8
Pension obligations on balance sheet	29.7	64.1	70.7	161.9	326.4
Asset retirement obligations	4.0	10.2	3.5	10.5	28.2
Acquisition-related contingent consideration accrued on balance sheet	2.1	2.8	0.2	—	5.1
Other (c)	1.1	—	—	—	1.1
	\$1,856.5	\$3,403.3	\$1,974.1	\$6,885.8	\$14,119.7

(a) Amounts represent the expected cash payments for debt and do not include any deferred issuance costs.

(b) Unconditional purchase obligations include agreements to purchase goods or services that are enforceable and legally binding and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Purchase obligations exclude agreements that are cancelable at any time without penalty.

(c) Obligation represents funding commitments pursuant to investments held by the company.

The contractual obligation at December 31, 2013 to purchase Life Technologies for \$13.6 billion plus the assumption of debt has been omitted from the above table. The acquisition was completed on February 3, 2014.

Reserves for unrecognized tax benefits of \$134 million have not been included in the above table due to the inability to predict the timing of tax audit resolutions.

The company has no material commitments for purchases of property, plant and equipment but expects that for 2014, such expenditures for its existing and Life Technologies businesses will approximate \$470 to \$490 million.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Liquidity and Capital Resources (continued)

A guarantee of residual value under a build-to-suit lease arrangement for a facility that will be leased upon completion of construction has not been included in the above table due to the inability to predict if and when the guarantee may require payment. Upon completion of construction in 2014, a five-year lease will commence with options to purchase the facility or renew the lease for up to three 5-year terms. The residual value guarantee becomes operative at the end of the lease for up to a maximum of \$58 million.

In disposing of assets or businesses, the company often provides representations, warranties and/or indemnities to cover various risks including, for example, unknown damage to the assets, environmental risks involved in the sale of real estate, liability to investigate and remediate environmental contamination at waste facilities, and unidentified tax liabilities and related legal fees. The company does not have the ability to estimate the potential liability from such indemnities because they relate to unknown conditions. However, the company has no reason to believe that these uncertainties would have a material adverse effect on its financial position, annual results of operations or cash flows.

The company has recorded liabilities for known indemnifications included as part of environmental liabilities. See Item 1. Business – Environmental Matters for a discussion of these liabilities.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The company is exposed to market risk from changes in interest rates and currency exchange rates, which could affect its future results of operations and financial condition. The company manages its exposure to these risks through its regular operating and financing activities. The company has periodically hedged interest rate risks of fixed-rate instruments with offsetting interest rate swaps. Additionally, the company uses short-term forward and option contracts primarily to hedge certain balance sheet and operational exposures resulting from changes in currency exchange rates. Such exposures result from purchases, sales, cash and intercompany loans that are denominated in currencies other than the functional currencies of the respective operations. The currency-exchange contracts principally hedge transactions denominated in euro, British pounds sterling, Chinese yuan, Australian dollars and Swedish krona. Income and losses arising from these derivative contracts are recognized as offsets to losses and income resulting from the underlying exposure being hedged. The company does not enter into speculative derivative agreements.

Interest Rates

The company is exposed to changes in interest rates while conducting normal business operations as a result of ongoing investing and financing activities, which affect the company's debt as well as cash and cash equivalents. As of December 31, 2013, the company's debt portfolio was comprised primarily of fixed rate borrowings. The fair market value of the company's fixed interest rate debt is subject to interest rate risk. Generally, the fair market value of fixed interest rate debt will increase as interest rates fall and decrease as interest rates rise. The total estimated fair value of the company's debt at December 31, 2013 was \$10.60 billion (see Note 12). Fair values were determined from available market prices using current interest rates and terms to maturity. If interest rates were to decrease by 100 basis points, the fair value of the company's debt at December 31, 2013 would increase by approximately \$523 million. If interest rates were to increase by 100 basis points, the fair value of the company's debt at December 31,

2013 would decrease by approximately \$482 million.

In addition, interest rate changes would result in a change in the company's interest expense due to variable-rate debt instruments including swap arrangements. A 100-basis -point increase in interest rates at December 31, 2013 would increase the company's annual pre-tax interest expense by approximately \$9 million.

Currency Exchange Rates

The company views its investment in international subsidiaries with a functional currency other than the U.S. dollar as permanent. The company's investment in international subsidiaries is sensitive to fluctuations in currency exchange rates. The functional currencies of the company's international subsidiaries are principally denominated in Swedish krona, euro, British pounds sterling, Danish krone and Canadian dollars. The effect of a change in currency exchange rates on the company's net investment in international subsidiaries is reflected in the "accumulated other comprehensive items" component of shareholders' equity. A 10% depreciation in year-end 2013 functional currencies, relative to the U.S. dollar, would result in a reduction of shareholders' equity of \$758 million.

Financial Statement Index

51

Table of Contents

THERMO FISHER SCIENTIFIC INC.

Quantitative and Qualitative Disclosures About Market Risk (continued)

The fair value of forward currency-exchange contracts is sensitive to changes in currency exchange rates. The fair value of forward currency-exchange contracts is the estimated amount that the company would pay or receive upon termination of the contract, taking into account the change in currency exchange rates. A 10% depreciation in year-end 2013 non-functional currency exchange rates related to the company's contracts would result in an unrealized gain on forward currency-exchange contracts of \$85 million. A 10% appreciation in year-end 2013 non-functional currency exchange rates related to the company's contracts would result in an increase in the unrealized loss on forward currency-exchange contracts of \$85 million. The unrealized gains or losses on forward currency-exchange contracts resulting from changes in currency exchange rates are expected to approximately offset losses or gains on the exposures being hedged.

Certain of the company's cash and cash equivalents are denominated in currencies other than the functional currency of the depositor and are sensitive to changes in currency exchange rates. A 10% depreciation in the related year-end 2013 non-functional currency exchange rates applied to such cash balances would result in a negative impact of \$16 million on the company's net income.

Item 8. Financial Statements and Supplementary Data

This data is submitted as a separate section to this report. See Item 15 "Exhibits and Financial Statement Schedules."

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

Management's Evaluation of Disclosure Controls and Procedures

The company's management, with the participation of the company's chief executive officer and chief financial officer, evaluated the effectiveness of the company's disclosure controls and procedures as of December 31, 2013. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of the company's disclosure controls and procedures as of December 31, 2013, the company's chief executive officer and chief financial officer concluded that, as of such date, the company's disclosure controls and procedures were effective at the reasonable assurance level.

THERMO FISHER SCIENTIFIC INC.

Changes in Internal Control over Financial Reporting

There have been no changes in the company's internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) during the fiscal quarter ended December 31, 2013, that have materially affected or are reasonably likely to materially affect the company's internal control over financial reporting.

Management's Annual Report on Internal Control Over Financial Reporting

The company's management, including the company's chief executive officer and chief financial officer, is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. The company's management conducted an assessment of the effectiveness of the company's internal control over financial reporting as of December 31, 2013 based on criteria established in "Internal Control - Integrated Framework" (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on this assessment, the company's management concluded that, as of December 31, 2013, the company's internal control over financial reporting was effective.

The company's independent registered public accounting firm, PricewaterhouseCoopers LLP, has audited the effectiveness of the company's internal control over financial reporting as of December 31, 2013, as stated in their report that appears on page F-2 of this Annual Report on Form 10-K.

THERMO FISHER SCIENTIFIC INC.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of Thermo Fisher Scientific Inc.:

In our opinion, the consolidated financial statements listed in the index appearing under Item 15(a)(1) present fairly, in all material respects, the financial position of Thermo Fisher Scientific Inc. and its subsidiaries at December 31, 2013 and December 31, 2012, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2013 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the index appearing at Item 15(a)(2) presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2013, based on criteria established in Internal Control - Integrated Framework (1992) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Annual Report on Internal Control over Financial Reporting appearing under Item 9A of Thermo Fisher Scientific Inc.'s Annual Report on Form 10-K. Our responsibility is to express opinions on these financial statements, on the financial statement schedule and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1. Nature of Operations and Summary of Significant Accounting Policies

Nature of Operations

Thermo Fisher Scientific Inc. (the company or Thermo Fisher) enables customers to make the world healthier, cleaner and safer by providing analytical instruments, equipment, reagents and consumables, software and services for research, manufacturing, analysis, discovery and diagnostics. Markets served include pharmaceutical and biotech companies, hospitals and clinical diagnostic labs, universities, research institutions and government agencies, as well as environmental and industrial process control settings.

Principles of Consolidation

The accompanying financial statements include the accounts of the company and its wholly and majority-owned subsidiaries. All material intercompany accounts and transactions have been eliminated. The company accounts for investments in businesses in which it has significant influence but not control (generally between 20% and 50% ownership) using the equity method.

Presentation

Certain reclassifications of prior year amounts have been made to conform to the current year presentation.

During 2013, the company determined that \$45 million of cash that was restricted from withdrawal due to serving as collateral for short-term borrowings in Asia was included in its previously reported year-end 2012 cash balance. Presentation of this amount has been revised to other current assets from cash in the accompanying balance sheet as of December 31, 2012 to properly reflect the restriction on withdrawal. Cash used for investing activities in the accompanying cash flow statement for 2012 reflects an increase of \$45 million from previously reported amounts for the increase in restricted cash as of December 31, 2012. The company has evaluated the impact of this revision, which had no impact on net income, net assets or cash flows from operations, and concluded it is immaterial to all prior period financial statements. Restricted cash totaled \$49 million as of December 31, 2013 and was primarily classified as other current assets on the accompanying balance sheet. Of this amount, \$36 million represented collateral for short-term borrowings in Asia.

Revenue Recognition and Accounts Receivable

Revenue is recognized after all significant obligations have been met, collectability is probable and title has passed, which typically occurs upon shipment or delivery or completion of services. If customer-specific acceptance criteria exist, the company recognizes revenue after demonstrating adherence to the acceptance criteria. The company recognizes revenue and related costs for arrangements with multiple deliverables, such as equipment and installation, as each element is delivered or completed based upon its relative fair value. When a portion of the customer's payment is not due until installation or other deliverable occurs, the company defers that portion of the revenue until completion of installation or transfer of the deliverable. Provisions for discounts, warranties, rebates to customers, returns and other adjustments are provided for in the period the related sales are recorded. Sales taxes, value-added taxes and certain excise taxes collected from customers and remitted to governmental authorities are accounted for on a net basis and therefore are excluded from revenue.

The company recognizes revenue from the sale of software. License fee revenues relate primarily to sales of perpetual licenses to end-users and are recognized when a formal agreement exists, the license fee is fixed and determinable, delivery of the software has occurred and collection is probable. Software arrangements with customers often include multiple elements, including software products, maintenance and support. The company recognizes software license fees based on the residual method after all elements have either been delivered or vendor specific objective evidence (VSOE) of fair value exists for such undelivered elements. In the event VSOE is not available for any undelivered element, revenue for all elements is deferred until delivery is completed. Revenues from software maintenance and support contracts are recognized on a straight-line basis over the term of the contract, which is generally a period of one year. VSOE of fair value of software maintenance and support is determined based on the price charged for the maintenance and support when sold separately. Revenues from training and consulting services are recognized as services are performed, based on VSOE, which is determined by reference to the price customers pay when the services are sold separately.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Service revenues represent the company's service offerings including clinical trial logistics, asset management, diagnostic testing, training, service contracts, and field service including related time and materials. Service revenues are recognized as the service is performed. Revenues for service contracts are recognized ratably over the contract period.

Accounts receivable are recorded at the invoiced amount and do not bear interest. The company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to pay amounts due. The allowance for doubtful accounts is the company's best estimate of the amount of probable credit losses in existing accounts receivable. The company determines the allowance based on the age of the receivable, the creditworthiness of the customer and any other information that is relevant to the judgment. Account balances are charged off against the allowance when the company believes it is probable the receivable will not be recovered. The company does not have any off-balance-sheet credit exposure related to customers.

The company records shipping and handling charges billed to customers in net sales and records shipping and handling costs in cost of product revenues for all periods presented.

Deferred revenue in the accompanying balance sheet consists primarily of unearned revenue on service contracts, which is recognized ratably over the terms of the contracts. Substantially all of the deferred revenue in the accompanying 2013 balance sheet will be recognized within one year.

Warranty Obligations

The company provides for the estimated cost of standard product warranties, primarily from historical information, in cost of product revenues at the time product revenue is recognized. While the company engages in extensive product quality programs and processes, including actively monitoring and evaluating the quality of its component supplies, the company's warranty obligation is affected by product failure rates, utilization levels, material usage, service delivery costs incurred in correcting a product failure and supplier warranties on parts delivered to the company. Should actual product failure rates, utilization levels, material usage, service delivery costs or supplier warranties on parts differ from the company's estimates, revisions to the estimated warranty liability would be required. The liability for warranties is included in other accrued expenses in the accompanying balance sheet. Extended warranty agreements are considered service contracts which are discussed above. Costs of service contracts are recognized as incurred. The changes in the carrying amount of warranty obligations are as follows:

(In millions)	Year Ended	
	December 31, 2013	December 31, 2012
Beginning Balance	\$48.7	\$42.2
Provision charged to income	70.7	66.2

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Research and Development

The company conducts research and development activities to increase its depth of capabilities in technologies, software and services. Research and development costs include salaries and benefits, consultants, facilities related costs, material costs, depreciation and travel. Research and development costs are expensed as incurred.

Income Taxes

The company recognizes deferred income taxes based on the expected future tax consequences of differences between the financial statement basis and the tax basis of assets and liabilities, calculated using enacted tax rates in effect for the year in which the differences are expected to be reflected in the tax return.

The financial statements reflect expected future tax consequences of uncertain tax positions that the company has taken or expects to take on a tax return presuming the taxing authorities' full knowledge of the positions and all relevant facts, but without discounting for the time value of money (Note 7).

Earnings per Share

Basic earnings per share has been computed by dividing net income by the weighted average number of shares outstanding during the year. Except where the result would be antidilutive to income from continuing operations, diluted earnings per share has been computed using the treasury stock method for the convertible obligations, equity forward agreements and outstanding stock options and restricted units, as well as their related income tax effects (Note 8).

Cash and Cash Equivalents

Cash equivalents consists principally of money market funds, commercial paper and other marketable securities purchased with an original maturity of three months or less. These investments are carried at cost, which approximates market value.

Investments

The company's marketable equity and debt securities that are part of its cash management activities are considered short-term investments in the accompanying balance sheet. Such securities principally represent available-for-sale investments. In addition, the company owns marketable equity securities that represent less than 20% ownership and for which the company does not have the ability to exert significant influence. Such investments are also considered available-for-sale. All available-for-sale securities are carried at fair market value, with the difference between cost and fair market value, net of related tax effects, recorded in the "accumulated other comprehensive items" component of shareholders' equity (Notes 11 and 12). Decreases in fair market values of individual securities below cost are reviewed to determine if the unrealized loss is other than temporary. Decreases below cost for a duration of six to nine months are deemed indicative of other than temporary impairment, and the company assesses the need to write down the carrying amount of the investments to fair market value through other expense, net, in the accompanying statement of income. Should a decrease in the fair market value of debt securities be deemed attributable to non-credit loss conditions, however, no impairment is recorded in the statement of income if the company has the ability and intent to

hold the investment to maturity.

Other investments for which there are not readily determinable market values are accounted for under the cost method of accounting. The company periodically evaluates the carrying value of its investments accounted for under the cost method of accounting, which provides that they are recorded at the lower of cost or estimated net realizable value. At December 31, 2013 and 2012, the company had cost method investments with carrying amounts of \$13.7 million and \$12.2 million, respectively, which are included in other assets.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Inventories

Inventories are valued at the lower of cost or market, cost being determined principally by the first-in, first-out (FIFO) method with certain of the company's businesses utilizing the last-in, first-out (LIFO) method. The company periodically reviews quantities of inventories on hand and compares these amounts to the expected use of each product or product line. In addition, the company has certain inventory that is subject to fluctuating market pricing. The company assesses the carrying value of this inventory based on a lower of cost or market analysis. The company records a charge to cost of sales for the amount required to reduce the carrying value of inventory to net realizable value. Costs associated with the procurement of inventories, such as inbound freight charges, purchasing and receiving costs, and internal transfer costs, are included in cost of revenues in the accompanying statement of income. The components of inventories are as follows:

(In millions)	December 31, 2013	December 31, 2012
Raw Materials	\$347.4	\$362.0
Work in Process	157.7	149.7
Finished Goods	989.4	931.6
	\$1,494.5	\$1,443.3

The value of inventories maintained using the LIFO method was \$197.0 million and \$190.6 million at December 31, 2013 and 2012, respectively, which was below estimated replacement cost by \$26.5 million and \$25.1 million, respectively. The company recorded a reduction in cost of revenues as a result of the liquidation of LIFO inventories of \$0.1 million, \$0.3 million and \$0.2 million in 2013, 2012 and 2011, respectively.

Property, Plant and Equipment

Property, plant and equipment are recorded at cost. The costs of additions and improvements are capitalized, while maintenance and repairs are charged to expense as incurred. The company provides for depreciation and amortization using the straight-line method over the estimated useful lives of the property as follows: buildings and improvements, 25 to 40 years; machinery and equipment (including software), 3 to 10 years; and leasehold improvements, the shorter of the term of the lease or the life of the asset. When assets are retired or otherwise disposed of, the assets and related accumulated depreciation are eliminated from the accounts and the resulting gain or loss is reflected in the accompanying statement of income. Property, plant and equipment consists of the following:

(In millions)	December 31, 2013	December 31, 2012
Land	\$212.2	\$216.6
Buildings and Improvements	821.0	805.5
Machinery, Equipment and Leasehold Improvements	2,047.9	1,829.9

	3,081.1	2,852.0
Less: Accumulated Depreciation and Amortization	1,313.7	1,125.6
	\$1,767.4	\$1,726.4

Depreciation and amortization expense of property, plant and equipment including amortization of assets held under capital leases, was \$236.8 million, \$236.1 million and \$211.7 million in 2013, 2012 and 2011, respectively.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Acquisition-related Intangible Assets

Acquisition-related intangible assets include the costs of acquired customer relationships, product technology, patents, tradenames and other specifically identifiable intangible assets, and are being amortized using the straight-line method over their estimated useful lives, which range from 3 to 20 years. In addition, the company has tradenames and in-process research and development that have indefinite lives and which are not amortized. The company reviews intangible assets for impairment when indication of potential impairment exists, such as a significant reduction in cash flows associated with the assets. Intangible assets with indefinite lives are reviewed for impairment annually or whenever events or changes in circumstances indicate they may be impaired. Acquisition-related intangible assets are as follows:

(In millions)	December 31, 2013			December 31, 2012		
	Gross	Accumulated Amortization	Net	Gross	Accumulated Amortization	Net
Continuing Operations:						
Definite Lives:						
Customer relationships	\$6,738.2	\$ (2,771.2)	\$3,967.0	\$7,047.0	\$ (2,617.6)	\$4,429.4
Product technology	2,530.8	(1,187.0)	1,343.8	2,512.9	(958.6)	1,554.3
Tradenames	816.0	(395.4)	420.6	807.8	(330.5)	477.3
Patents	20.0	(19.7)	0.3	19.7	(19.2)	0.5
Other	16.8	(14.9)	1.9	15.7	(13.3)	2.4
	10,121.8	(4,388.2)	5,733.6	10,403.1	(3,939.2)	6,463.9
Indefinite Lives:						
Tradenames	1,326.9	—	1,326.9	1,326.9	—	1,326.9
In-process research and development	10.8	—	10.8	13.7	—	13.7
	1,337.7	—	1,337.7	1,340.6	—	1,340.6
	\$11,459.5	\$ (4,388.2)	\$7,071.3	\$11,743.7	\$ (3,939.2)	\$7,804.5

The estimated future amortization expense of acquisition-related intangible assets with definite lives is as follows:

(In millions)

2014	\$737.1
2015	722.1
2016	683.7
2017	677.3
2018	624.9

2019 and thereafter	2,288.5
	\$5,733.6

Amortization of acquisition-related intangible assets in continuing operations was \$763.1 million, \$747.6 million and \$647.9 million in 2013, 2012 and 2011, respectively and for discontinued operations was \$4.2 million in 2011.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other Assets

Other assets in the accompanying balance sheet include deferred tax assets, investments in joint ventures, cash surrender value of life insurance, deferred debt issuance costs, insurance recovery receivables related to product liability matters, pension assets, cost-method investments, notes receivable, capitalized catalog costs and other assets.

The company owns 49% - 50% non-controlling interests in two joint ventures and records its pro rata share of the joint ventures' results in other expense, net, in the accompanying statement of income, using the equity method of accounting. The joint ventures were formed to combine the company's capabilities with those of businesses contributed by the respective joint venture partners in the fields of integrated response technology services and disposable laboratory glass products. The results of the joint ventures were not material for any period presented. The company made purchases of products for resale from the glass products joint venture totaling \$46.6 million, \$48.3 million and \$45.1 million in 2013, 2012 and 2011, respectively.

Goodwill

The company assesses the realizability of goodwill annually and whenever events or changes in circumstances indicate it may be impaired. Such events or circumstances generally include the occurrence of operating losses or a significant decline in earnings associated with one or more of the company's reporting units. The company estimates the fair value of its reporting units by using forecasts of discounted future cash flows and peer market multiples. When an impairment is indicated, any excess of carrying value over the implied fair value of goodwill is recorded as an operating loss. The company completed annual tests for impairment at November 1, 2013 and November 2, 2012, and determined that goodwill was not impaired.

The changes in the carrying amount of goodwill by segment are as follows:

(In millions)	Analytical Technologies	Specialty Diagnostics	Laboratory Products and Services	Total
Balance at December 31, 2011	\$ 3,090.4	\$ 3,870.6	\$5,012.3	\$11,973.3
Acquisitions	15.6	273.5	81.1	370.2
Finalization of purchase price allocations for 2011 acquisitions	(0.9)	(3.4)	—	(4.3)
Revision to goodwill allocable to discontinued operations	—	—	13.1	13.1
Currency translation	10.0	106.7	6.0	122.7
Other	16.7	(18.2)	1.0	(0.5)
Balance at December 31, 2012	3,131.8	4,229.2	5,113.5	12,474.5
Finalization of purchase price allocations for 2012 acquisitions	(0.1)	0.5	—	0.4
Currency translation	10.6	28.3	(6.4)	32.5

Other	(1.2)	0.1	(3.0)	(4.1)
Balance at December 31, 2013	\$ 3,141.1		\$ 4,258.1	\$ 5,104.1		\$ 12,503.3	

In 2012, the company reduced its earlier estimate of goodwill allocable to discontinued operations by \$13.1 million, based on the actual selling price of the business.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Asset Retirement Obligations

The company reviews legal obligations associated with the retirement of long-lived assets that result from contractual obligations or the acquisition, construction, development and/or normal use of the assets. If it is determined that a legal obligation exists, regardless of whether the obligation is conditional on a future event, the fair value of the liability for an asset retirement obligation is recognized in the period in which it is incurred, if a reasonable estimate of fair value can be made. The fair value of the liability is added to the carrying amount of the associated asset, and this additional carrying amount is depreciated over the life of the asset. The difference between the gross expected future cash outflow and its present value is accreted over the life of the related lease as interest expense. At December 31, 2013 and 2012, the company had recorded asset retirement obligations of \$28.2 million and \$28.3 million, respectively, which are primarily included in other long-term liabilities in the accompanying balance sheet.

Loss Contingencies

Accruals are recorded for various contingencies, including legal proceedings, environmental, workers' compensation, product, general and auto liabilities, self-insurance and other claims that arise in the normal course of business. The accruals are based on management's judgment, historical claims experience, the probability of losses and, where applicable, the consideration of opinions of internal and/or external legal counsel and actuarial estimates. Additionally, the company records receivables from third-party insurers up to the amount of the loss when recovery has been determined to be probable. Liabilities acquired in acquisitions have been recorded at their fair value and, as such, were discounted to their present value at the dates of acquisition.

Advertising

The company records advertising costs as expenses as incurred, except for certain direct-response advertising, which is capitalized and amortized on a straight-line basis over its expected period of future benefit, generally one to three years. The company has capitalized advertising costs of \$4.4 million and \$1.9 million at December 31, 2013 and 2012, respectively, included in other assets in the accompanying balance sheet. Direct-response advertising consists of external catalog production and mailing costs, and amortization begins on the date the catalogs are first mailed. Advertising expense, which includes amortization of capitalized direct-response advertising, as described above, was \$33.2 million, \$39.5 million and \$29.6 million in 2013, 2012 and 2011, respectively. Included in advertising expense was catalog amortization of \$4.1 million, \$5.6 million and \$7.2 million for 2013, 2012 and 2011, respectively.

Currency Translation

All assets and liabilities of the company's non-U.S. subsidiaries are translated at year-end exchange rates, and revenues and expenses are translated at average exchange rates for the year. Resulting translation adjustments are reflected in the "accumulated other comprehensive items" component of shareholders' equity. Currency transaction gains and losses are included in the accompanying statement of income and in aggregate were net losses of \$16.6 million, \$11.0 million and \$1.0 million in 2013, 2012 and 2011, respectively.

Derivative Contracts

The company is exposed to certain risks relating to its ongoing business operations including changes to interest rates, currency exchange rates and commodity prices. The company uses derivative instruments primarily to manage currency exchange and interest rate risks. The company recognizes derivative instruments as either assets or liabilities and measures those instruments at fair value. If a derivative is a hedge, depending on the nature of the hedge, changes in the fair value of the derivative are either offset against the change in fair value of the hedged item through earnings or recognized in other comprehensive income until the hedged item is recognized in earnings. Derivatives that are not designated as hedges are recorded at fair value through earnings.

The company uses short-term forward and option currency-exchange contracts primarily to hedge certain balance sheet and operational exposures resulting from changes in currency exchange rates, predominantly intercompany loans and cash balances that are denominated in currencies other than the functional currencies of the respective operations. These contracts principally hedge transactions denominated in euro, British pounds sterling, Chinese yuan, Australian dollars, and Swedish krona. The company does not hold or engage in transactions involving derivative instruments for purposes other than risk management. As of December 31, 2013, the company had no outstanding foreign exchange contracts that were hedging anticipated purchases or sales.

Financial Statement Index

F-16

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Cash flow hedges. For derivative instruments that are designated and qualify as a cash flow hedge, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. As of December 31, 2013 and 2012, the company had no outstanding derivative contracts that were accounted for as cash flow hedges.

Fair value hedges. For derivative instruments that are designated and qualify as a fair value hedge, the gain or loss on the derivative, as well as the offsetting loss or gain on the hedged item attributable to the hedged risk, are recognized in earnings. During 2011 and 2013, in connection with new debt issuances, the company entered into interest rate swap arrangements. The company includes the gain or loss on the hedged items (fixed-rate debt) in the same line item (interest expense) as the offsetting effective portion of the loss or gain on the related interest rate swaps.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. In addition, significant estimates were made in estimating future cash flows to assess potential impairment of assets, and in determining the ultimate loss from selling discontinued operations and abandoning leases at facilities being exited (Note 14). Actual results could differ from those estimates.

Recent Accounting Pronouncements

In February 2013, the FASB issued new guidance which requires disclosure of information about significant reclassification adjustments from accumulated other comprehensive income in a single note or on the face of the financial statements. This guidance became effective for the company in 2013. Adoption of this standard, which is related to disclosure only, did not have an impact on the company's consolidated financial position, results of operations or cash flows.

In July 2012, the FASB modified existing rules to allow entities to use a qualitative approach to test indefinite-lived intangible assets for impairment. The revised standard allows an entity the option to first assess qualitatively whether it is more likely than not (that is, a likelihood of more than 50 percent) that an indefinite-lived intangible asset is impaired. An entity is not required to calculate the fair value of an indefinite-lived intangible asset and perform the quantitative impairment test unless the entity determines that it is more likely than not that the asset is impaired. This guidance became effective for the company in 2013. Adoption of this standard did not have an impact on the company's consolidated financial position, results of operations or cash flows.

In December 2011, the FASB issued new guidance which requires enhanced disclosures on offsetting amounts within the balance sheet, including disclosing gross and net information about instruments and transactions eligible for offset or subject to a master netting or similar agreement. This guidance became effective for the company in 2013. Adoption of this standard, which is related to disclosure only, did not have an impact on the company's consolidated financial position, results of operations or cash flows.

Note 2. Acquisitions and Dispositions

The company's acquisitions have historically been made at prices above the fair value of the acquired identifiable assets, resulting in goodwill, due to expectations of the synergies that will be realized by combining the businesses. These synergies include the elimination of redundant facilities, functions and staffing; use of the company's existing commercial infrastructure to expand sales of the acquired businesses' products; and use of the commercial infrastructure of the acquired businesses to cost-effectively expand sales of company products.

Acquisitions have been accounted for using the purchase method of accounting, and the acquired companies' results have been included in the accompanying financial statements from their respective dates of acquisition. Acquisition transaction costs are recorded in selling, general and administrative expenses. The net assets acquired have been recorded based on estimates of fair value.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2013

On April 14, 2013, the company entered into an agreement to acquire Life Technologies Corporation for approximately \$13.6 billion, plus the assumption of net debt at close (\$1.5 billion) (the “Life Technologies Acquisition”). The transaction closed on February 3, 2014. Life Technologies provides innovative products and services to customers conducting scientific research and genetic analysis, as well as those in applied markets, such as forensics and food safety testing. Life Technologies’ revenues totaled \$3.9 billion in 2013. The acquisition of Life Technologies extends customer reach and broadens the company’s offerings in biosciences; genetic, medical and applied sciences; and bioproduction. At the time that the company agreed to acquire Life Technologies, it entered into a bridge credit agreement and a term loan agreement (Note 9). The bridge credit agreement expired in December 2013 upon arrangement of permanent financing. The term loan agreement is a 3-year unsecured \$5 billion term loan facility under which the company borrowed \$5.00 billion in January 2014. In December 2013, the company issued \$3.20 billion of senior notes (Note 9) and in January and February 2014, the company issued 34.9 million shares of its common stock for proceeds of \$2.94 billion through equity forward arrangements (Note 11) to partially fund the acquisition. Beginning on the acquisition date, Life Technologies will be reported in a new segment, Life Sciences Solutions, together with most of the company’s existing biosciences businesses. The purchase price allocation for the acquisition and pro forma financial information are not yet available.

During 2013, the company made contingent purchase price and post closing adjustment payments totaling \$40 million for acquisitions completed prior to 2013. The contingent purchase price payments were contractually due to the sellers upon achievement of certain performance criteria at the acquired businesses.

2012

In September 2012, the Specialty Diagnostics segment acquired One Lambda, a provider of transplant diagnostics, for approximately \$885 million, net of cash acquired, including related real estate and subject to a post-closing adjustment, plus up to \$25 million of additional contingent consideration based upon the achievement of specified operating results in the year following the acquisition. The company recorded \$13 million as the fair value of contingent consideration at the acquisition date and an additional \$12 million as a charge to selling, general and administrative expense in 2013. The \$25 million contingent purchase price obligation was paid in 2013. The acquisition of One Lambda enhances the segment’s presence in specialty in vitro diagnostics and adds new capabilities to the company’s transplant-testing workflow. Revenues of One Lambda were \$182 million in 2011. The purchase price exceeded the fair value of the identifiable net assets and, accordingly, \$274 million was allocated to goodwill, all of which is tax deductible.

In May 2012, the Laboratory Products and Services segment acquired Doe & Ingalls Management, LLC, a North Carolina-based channel for specialty production chemicals and provider of customized supply-chain services to the life sciences and microelectronics industries, for \$175 million. The acquisition expands the segment’s products and services that address the production market. Revenues of Doe & Ingalls totaled approximately \$110 million in 2011. The purchase price exceeded the fair value of the identifiable net assets and, accordingly, \$81 million was allocated to goodwill, \$53 million of which is tax deductible.

In addition, in 2012, the Analytical Technologies segment acquired a manufacturer and supplier of radioactive isotope identifiers, x-ray and gamma-ray detectors and spectroscopy systems used to detect radioactive and other nuclear

materials in security and environmental settings and a manufacturer of miniature NMR spectrometers. The Specialty Diagnostics segment acquired a business that holds proprietary technology for tests to diagnose pre-eclampsia and eclampsia. The aggregate consideration for these acquisitions was \$25 million plus contingent consideration of up to \$15 million.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The company made contingent purchase price and post closing adjustment payments totaling \$6 million in 2012, for acquisitions completed prior to 2012. The contingent purchase price payments were contractually due to the sellers upon achievement of certain performance criteria at the acquired businesses.

The components of the purchase price and net assets acquired for 2012 acquisitions, as revised in 2013 for finalization of the valuation process are as follows:

(In millions)	One Lambda	Doe & Ingalls	Other	Total
Purchase Price				
Cash paid	\$886.3	\$174.9	\$25.4	\$1,086.6
Fair value of contingent consideration	13.1	1.5	5.3	19.9
Cash acquired	(1.3)	—	—	(1.3)
	\$898.1	\$176.4	\$30.7	\$1,105.2
Net Assets Acquired				
Current assets	\$110.2	\$21.9	\$2.1	\$134.2
Property, plant and equipment	30.2	11.6	0.1	41.9
Intangible assets:				
Customer relationships	330.7	68.1	3.2	402.0
Product technology	172.5	1.1	13.9	187.5
Tradenames and other	17.2	16.8	—	34.0
Goodwill	274.0	81.1	15.5	370.6
Other assets	—	0.5	—	0.5
Liabilities assumed	(36.7)	(24.7)	(4.1)	(65.5)
	\$898.1	\$176.4	\$30.7	\$1,105.2

The weighted average amortization periods for intangible assets acquired in 2012 are 13 years for customer relationships, 11 years for product technology and 13 years for tradenames and other. The weighted average amortization period for all intangible assets in the above table is 13 years.

2011

In August 2011, the Specialty Diagnostics segment completed the acquisition of the Phadia group, a global leader in allergy and autoimmunity diagnostics, headquartered in Sweden, for a total purchase price of \$3.54 billion, net of cash acquired, including the repayment of \$2.14 billion of indebtedness owed by Phadia to the seller and third-party lenders. Phadia develops, manufactures and markets complete blood-test systems to support the clinical diagnosis and monitoring of allergy and autoimmune diseases. Phadia has been a pioneer in bringing new allergy diagnostic tests to market and is a global leader for in vitro allergy diagnostics and a European leader in autoimmunity diagnostics. Phadia's revenues in 2010 totaled €367 million (approximately \$525 million based on exchange rates at the time of the acquisition agreement announcement). The purchase price exceeded the fair value of the identifiable net assets and,

accordingly, \$1.81 billion was recorded as goodwill, substantially none of which is tax deductible.

In May 2011, the Analytical Technologies segment completed the acquisition of Dionex Corporation, a leading manufacturer and marketer of chromatography systems, for a total purchase price of \$2.03 billion, net of cash acquired. Dionex, headquartered in Sunnyvale, California, is a global leader in the manufacturing and marketing of ion and liquid chromatography and sample preparation systems, consumables, and software for chemical analysis. Dionex systems are used worldwide in environmental analysis and by the life sciences, chemical, petrochemical, food and beverage, power generation, and electronics industries. Their expertise in applications and instrumentation helps analytical scientists to evaluate and develop pharmaceuticals, establish environmental regulations, and produce better industrial products. Revenues of Dionex totaled \$420 million in its fiscal year ended June 30, 2010. The purchase price exceeded the fair value of the identifiable net assets and, accordingly, \$1.32 billion was recorded as goodwill, substantially none of which is tax deductible.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In addition, in 2011, the Laboratory Products and Services segment acquired a U.S.-based manufacturer of clinical and diagnostic assays and platforms for rapid and sensitive protein biomarker analysis; a U.K.-based provider of single-use plastic products serving the microbiology, life sciences and clinical markets and certain operating assets of a Singapore-based distributor of laboratory equipment and consumables. The Specialty Diagnostics segment also acquired a provider of microbiology solutions, including blood culture identification and antibiotic susceptibility testing products with operations in both the U.S. and U.K. The aggregate consideration paid for these acquisitions was \$97 million, net of cash acquired. Separately, the company's discontinued operations acquired a manufacturer of laboratory workstations and fume hoods for \$8 million.

The company made contingent purchase price and post closing adjustment payments totaling \$35 million in 2011, for acquisitions completed prior to 2011. The contingent purchase price payments were contractually due to the sellers upon achievement of certain performance criteria at the acquired businesses.

The components of the purchase price and net assets acquired for 2011 acquisitions, as revised in 2012 for finalization of the valuation process are as follows:

(In millions)	Phadia	Dionex	Other	Total
Purchase Price				
Cash paid	\$3,655.2	\$2,140.8	\$98.1	\$5,894.1
Debt assumed	0.3	3.2	—	3.5
Fair value of contingent consideration	—	—	1.4	1.4
Cash acquired	(117.2)	(114.9)	(0.9)	(233.0)
	\$3,538.3	\$2,029.1	\$98.6	\$5,666.0
Net Assets Acquired				
Current assets	\$328.1	\$227.8	\$25.0	\$580.9
Property, plant and equipment	150.2	87.8	29.0	267.0
Intangible assets:				
Customer relationships	956.8	495.3	17.6	1,469.7
Product technology	696.3	350.2	20.0	1,066.5
In-process research and development	—	18.3	—	18.3
Tradenames and other	132.6	35.7	3.6	171.9
Goodwill	1,813.6	1,317.8	30.2	3,161.6
Other assets	67.9	3.1	1.2	72.2
Liabilities assumed	(607.2)	(506.9)	(28.0)	(1,142.1)
	\$3,538.3	\$2,029.1	\$98.6	\$5,666.0

The weighted average amortization periods for intangible assets acquired in 2011 are 14 years for customer relationships, 11 years for product technology and 14 years for tradenames and other. The weighted average amortization period for all intangible assets in the above table is 13 years.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Unaudited Pro Forma Information

The company acquired One Lambda in September 2012. Had the acquisition of One Lambda been completed as of the beginning of 2011, the company's pro forma results for 2012 would have been as follows:

(In millions except per share amounts)	2012
Revenues	\$12,643.0
Income from Continuing Operations	\$1,280.6
Net Income	\$1,200.0
Earnings per Share from Continuing Operations:	
Basic	\$3.52
Diluted	\$3.49
Earnings per Share:	
Basic	\$3.30
Diluted	\$3.27

The company's results would not have been materially different from its pro forma results had the company's other 2012 acquisitions occurred at the beginning of 2011.

Dispositions

In December 2013, the company entered an agreement to sell its sera and media, gene modulation and magnetic beads businesses to GE Healthcare for approximately \$1.06 billion. The businesses fall principally in the Analytical Technologies segment. Divestiture of these businesses was a condition to obtaining antitrust approval for the Life Technologies Acquisition. As of December 31, 2013, the agreement to sell the businesses was contingent on, among other things, obtaining antitrust approval for the acquisition of Life Technologies. That approval was obtained in January 2014 at which time these businesses were designated as held for sale. Revenues and operating income in 2013 of the businesses to be sold were approximately \$250 million and \$80 million, respectively. The sale is subject to additional regulatory approvals and other customary closing conditions.

The assets and liabilities of the businesses to be sold were as follows at December 31, 2013:

(In millions)	December 31, 2013
Current Assets	\$83.8
Long-term Assets	241.2
Current Liabilities	8.2

Long-term Liabilities

55.2

In October 2012, the company sold its laboratory workstations business and in April 2011, the company sold its Athena Diagnostics business and its Lancaster Laboratories business (see Note 15). In May 2011, the company sold a manufacturer of heating equipment for \$14 million and recorded a pre-tax loss on the sale of \$3 million, included in restructuring and other costs, net. Operating results of the business were not material.

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 3. Business Segment and Geographical Information

At December 31, 2013, the company's continuing operations fell into three business segments as follows:

Analytical Technologies: provides a broad offering of instruments, reagents, consumables, software and services that are used for a range of applications in the laboratory, on the production line and in the field. These products and services are used by customers in pharmaceutical, biotechnology, academic, government, environmental and other research and industrial markets, as well as the clinical laboratory.

Specialty Diagnostics: provides a wide range of diagnostic test kits, reagents, culture media, instruments and associated products used to increase the speed and accuracy of diagnoses. These products are used primarily by customers in healthcare, clinical, pharmaceutical, industrial and food safety laboratories.

Laboratory Products and Services: provides virtually everything needed for the laboratory, including a combination of self-manufactured and sourced products and an extensive service offering. These products and services are used by customers in pharmaceutical, biotechnology, academic, government and other research and industrial markets, as well as the clinical laboratory.

In February 2013, in connection with a change in management responsibility for two product lines, the company transferred its water analysis and research serum and media product lines to the Laboratory Products and Services segment from the Analytical Technologies segment. The company has historically moved a product line between segments when a shift in strategic focus of either the product line or a segment more closely aligns the product line with a segment different than that in which it had previously been reported. Prior period segment information has been reclassified to reflect these transfers.

The company's management evaluates segment operating performance based on operating income before certain charges/credits to cost of revenues and selling, general and administrative expenses, principally associated with acquisition accounting; restructuring and other costs/income including costs arising from facility consolidations such as severance and abandoned lease expense and gains and losses from the sale of real estate and product lines; and amortization of acquisition-related intangible assets. The company uses this measure because it helps management understand and evaluate the segments' core operating results and facilitates comparison of performance for determining compensation.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 4. Other Expense, Net

The components of other expense, net, in the accompanying statement of income are as follows:

(In millions)	2013	2012	2011
Interest Income	\$ 28.0	\$ 25.2	\$ 26.8
Interest Expense	(262.1)	(241.6)	(175.3)
Other Items, Net	(56.0)	3.7	30.5
	\$ (290.1)	\$ (212.7)	\$ (118.0)

Other Items, Net

In 2013, other items, net includes \$74 million of charges related to amortization of fees paid to obtain bridge financing commitments related to the Life Technologies Acquisition offset in part by \$5 million of gains from sales of equity investments. Additionally, the company irrevocably contributed appreciated available-for-sale investments that had a fair value of \$27 million to two of its U.K. defined benefit plans, resulting in realization of a previously unrecognized gain of \$11 million.

In 2011, other items, net includes \$28 million of gains on currency exchange contracts associated with the acquisition of Phadia and an \$18 million gain on the sale of an equity investment accounted for under the cost method, offset in part by \$10 million of fees associated with a short-term financing commitment to fund the Phadia acquisition.

Note 5. Stock-based Compensation Expense

The company has stock-based compensation plans for its key employees, directors and others. These plans permit the grant of a variety of stock and stock-based awards, including restricted stock units, stock options or performance-based shares, as determined by the compensation committee of the company's Board of Directors or for certain non-officer grants, by the company's employee equity committee, which consists of its chief executive officer. The company generally issues new shares of its common stock to satisfy option exercises and restricted unit vestings. Grants of stock options and restricted units generally provide that in the event of both a change in control of the company and a qualifying termination of an option or unit holder's employment, all options and service-based restricted unit awards held by the recipient become immediately vested (unless an employment or other agreement with the employee provides for different treatment).

Compensation cost is based on the grant-date fair value and is recognized ratably over the requisite vesting period or to the date based on qualifying retirement eligibility, if earlier.

The components of stock-based compensation expense are as follows:

(In millions)	2013	2012	2011
Stock Option Awards	\$41.4	\$39.3	\$49.4

Restricted Unit Awards	49.5	38.9	30.6
Total Stock-based Compensation Expense	\$90.9	\$78.2	\$80.0

Financial Statement Index

F-25

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Stock-based compensation expense is included in the accompanying statement of income as follows:

(In millions)	2013	2012	2011
Cost of Revenues	\$7.1	\$5.4	\$5.7
Selling, General and Administrative Expenses	80.5	70.7	72.4
Research and Development Expenses	3.3	2.1	1.9
Total Stock-based Compensation Expense	\$90.9	\$78.2	\$80.0

The company has elected to recognize any excess income tax benefits from stock option exercises in capital in excess of par value only if an incremental income tax benefit would be realized after considering all other tax attributes presently available to the company. The company measures the tax benefit associated with excess tax deductions related to stock-based compensation expense by multiplying the excess tax deductions by the statutory tax rates. The company uses the incremental tax benefit approach for utilization of tax attributes. Tax benefits recognized in capital in excess of par value on the accompanying balance sheet were \$46.6 million, \$18.7 million and \$14.6 million, respectively, in 2013, 2012 and 2011.

Stock Options

The company's practice is to grant stock options at fair market value. Options vest over 3-5 years with terms of 7-10 years, assuming continued employment with certain exceptions. Vesting of the option awards is contingent upon meeting certain service conditions. The fair value of most option grants is estimated using the Black-Scholes option pricing model. For option grants that require the achievement of both service and market conditions, a lattice model is used to estimate fair value. The fair value is then amortized on a straight-line basis over the requisite service periods of the awards, which is generally the vesting period. Use of a valuation model requires management to make certain assumptions with respect to selected model inputs. Expected volatility was calculated based on the historical volatility of the company's stock. Historical data on exercise patterns is the basis for estimating the expected life of an option. The risk-free interest rate is based on U.S. Treasury zero-coupon issues with a remaining term which approximates the expected life assumed at the date of grant. The expected annual dividend rate was calculated by dividing the company's annual dividend, based on the most recent quarterly dividend rate, by the closing stock price on the grant date. The compensation expense recognized for all stock-based awards is net of estimated forfeitures. Forfeitures are estimated based on an analysis of actual option forfeitures.

The weighted average assumptions used in the Black-Scholes option pricing model are as follows:

	2013	2012	2011
Expected Stock Price Volatility	33	% 34	% 33
Risk Free Interest Rate	0.7	% 0.8	% 1.7
Expected Life of Options (years)	4.5	4.5	4.1
Expected Annual Dividend	0.8	% 0.9	% 0.0

The weighted average per share grant-date fair values of options granted during 2013, 2012 and 2011 were \$19.84, \$15.36 and \$15.79, respectively. The total intrinsic value of options exercised during the same periods was \$189.8 million, \$125.4 million and \$85.3 million, respectively. The intrinsic value is the difference between the market value of the shares on the exercise date and the exercise price of the option.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

A summary of the company's option activity for the year ended December 31, 2013 is presented below:

	Shares (in millions)	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (a) (in millions)
Outstanding at December 31, 2012	15.3	49.07		
Granted	1.9	74.29		
Exercised	(5.1)	44.79		
Canceled / Expired	(0.6)	56.38		
Outstanding at December 31, 2013	11.5	54.81	4.1	
Vested and Unvested Expected to Vest at December 31, 2013	11.1	54.47	4.1	\$ 629.6
Exercisable at December 31, 2013	5.4	48.49	3.1	\$ 336.8

(a) Market price per share on December 31, 2013 was \$111.35. The intrinsic value is zero for options with exercise prices above the market price.

As of December 31, 2013, there was \$63 million of total unrecognized compensation cost related to unvested stock options granted. The cost is expected to be recognized through 2017 with a weighted average amortization period of 2.2 years.

Restricted Share/Unit Awards

Awards of restricted units convert into an equivalent number of shares of common stock. The awards generally vest over 3-4 years, assuming continued employment, with some exceptions. Vesting of the awards is contingent upon meeting certain service conditions and may also be contingent upon meeting certain performance and/or market conditions. The fair market value of the award at the time of the grant is amortized to expense over the requisite service period of the award, which is generally the vesting period. Recipients of restricted units have no voting rights but are entitled to receive dividend equivalents. The fair value of service- and performance-based restricted unit awards is determined based on the number of units granted and the market value of the company's shares on the grant date. For awards with market-based vesting conditions, the company uses a lattice model to estimate the grant-date fair value of the award.

A summary of the company's restricted unit activity for the year ended December 31, 2013 is presented below:

Weighted Units (in thousands)	Average Grant-Date Fair Value
--	-------------------------------------

Unvested at December 31, 2012	2,051	53.91
Granted	785	77.18
Vested	(840)	56.17
Forfeited	(149)	58.12
Unvested at December 31, 2013	1,847	62.43

Financial Statement Index

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The total fair value of shares vested during 2013, 2012 and 2011 was \$47.2 million, \$23.0 million and \$21.2 million, respectively.

As of December 31, 2013, there was \$65 million of total unrecognized compensation cost related to unvested restricted stock unit awards. The cost is expected to be recognized through 2017 with a weighted average amortization period of 2.0 years.

Employee Stock Purchase Plans

Qualifying employees are eligible to participate in an employee stock purchase plan sponsored by the company. Shares may be purchased under the program at 95% of the fair market value at the end of the purchase period and the shares purchased are not subject to a holding period. Shares are purchased through payroll deductions of up to 10% of each participating employee's gross wages. The company issued 100,000, 151,000 and 139,000 shares, respectively, of its common stock for the 2013, 2012 and 2011 plan years, which ended on December 31.

Note 6. Pension and Other Postretirement Benefit Plans

401(k) Savings Plan and Other Defined Contribution Plans

The company's 401(k) savings and other defined contribution plans cover the majority of the company's eligible U.S. and certain non-U.S. employees. Contributions to the plans are made by both the employee and the company. Company contributions are based on the level of employee contributions. Company contributions to these plans are based on formulas determined by the company. In 2013, 2012 and 2011, the company charged to expense \$87.3 million, \$86.0 million and \$79.4 million, respectively, related to its defined contribution plans.

Defined Benefit Pension Plans

Employees of a number of the company's non-U.S. and certain U.S. subsidiaries participate in defined benefit pension plans covering substantially all full-time employees at those subsidiaries. Some of the plans are unfunded, as permitted under the plans and applicable laws. The company also maintains postretirement healthcare programs at several acquired businesses where certain employees are eligible to participate. The costs of the postretirement healthcare programs are funded on a self-insured and insured-premium basis.

The company recognizes the funded status of defined benefit pension and other postretirement benefit plans as an asset or liability. This amount is defined as the difference between the fair value of plan assets and the benefit obligation. The company is required to recognize as a component of other comprehensive income, net of tax, the actuarial gains/losses and prior service costs/credits that arise but were not previously required to be recognized as components of net periodic benefit cost. Other comprehensive income is adjusted as these amounts are later recognized in income as components of net periodic benefit cost.

When a company with a pension plan is acquired, any excess of projected benefit obligation over the plan assets is recognized as a liability and any excess of plan assets over the projected benefit obligation is recognized as an asset. The recognition of a new liability or a new asset results in the elimination of (a) previously existing unrecognized net gain or loss and (b) unrecognized prior service cost or credits.

The company funds annually, at a minimum, the statutorily required minimum amount as actuarially determined. During 2013, 2012 and 2011, the company made cash contributions of approximately \$38.2 million, \$23.3 million and \$25.3 million, respectively. Additionally, in 2013 the company irrevocably contributed appreciated available-for-sale investments that had a fair value of \$27 million to two of its U.K. defined benefit plans. Contributions to the plans included in the following table are estimated at between \$30 and \$40 million for 2014.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The actuarial assumptions used to compute the funded status for the plans are based upon information available as of December 31, 2013 and 2012 and are as follows:

	Domestic Pension Benefits		Non-U.S. Pension Benefits		Postretirement Benefits	
	2013	2012	2013	2012	2013	2012
Weighted Average Assumptions Used to Determine Projected Benefit Obligations						
Discount rate	4.75%	4.00%	3.91%	3.65%	4.75%	4.20%
Average rate of increase in employee compensation	4.00%	4.00%	3.21%	2.94%	—	—
Initial healthcare cost trend rate					7.01%	7.14%
Ultimate healthcare cost trend rate					5.45%	5.47%

The actuarial assumptions used to compute the net periodic pension benefit cost (income) are based upon information available as of the beginning of the year, as presented in the following table:

	Domestic Pension Benefits			Non-U.S. Pension Benefits		
	2013	2012	2011	2013	2012	2011
Weighted Average Assumptions Used to Determine the Net Benefit Cost (Income)						
Discount rate	4.00%	4.50%	5.25%	3.65%	4.37%	4.77%
Average rate of increase in employee compensation	4.00%	4.00%	4.00%	2.94%	3.23%	3.35%
Expected long-term rate of return on assets	7.00%	7.75%	7.75%	4.96%	5.17%	5.32%

The ultimate healthcare cost trend rates for the postretirement benefit plans are expected to be reached between 2018 and 2027.

The discount rate reflects the rate the company would have to pay to purchase high-quality investments that would provide cash sufficient to settle its current pension obligations. The discount rate is determined based on a range of factors, including the rates of return on high-quality, fixed-income corporate bonds and the related expected duration of the obligations or, in certain instances, the company has used a hypothetical portfolio of high quality instruments with maturities that mirror the benefit obligation in order to accurately estimate the discount rate relevant to a

particular plan.

The expected long-term rate of return on plan assets reflects the average rate of earnings expected on the funds invested, or to be invested, to provide for the benefits included in the projected benefit obligations. In determining the expected long-term rate of return on plan assets, the company considers the relative weighting of plan assets, the historical performance of total plan assets and individual asset classes and economic and other indicators of future performance. In addition, the company may consult with and consider the opinions of financial and other professionals in developing appropriate return benchmarks.

Asset management objectives include maintaining an adequate level of diversification to reduce interest rate and market risk and providing adequate liquidity to meet immediate and future benefit payment requirements.

The expected rate of compensation increase reflects the long-term average rate of salary increases and is based on historic salary increase experience and management's expectations of future salary increases.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The amounts in accumulated other comprehensive income expected to be recognized as components of net periodic benefit cost in 2014 are as follows:

(In millions)	Domestic Pension Benefits	Non-U.S. Pension Benefits	Post- retirement Benefits
Net Actuarial Loss	\$3.6	\$4.3	\$—
Net Prior Service Credit	—	(0.3)	(0.1)
	\$3.6	\$4.0	\$(0.1)

The projected benefit obligation and fair value of plan assets for the company's qualified and non-qualified pension plans with projected benefit obligations in excess of plan assets are as follows:

(In millions)	Pension Plans	
	2013	2012
Pension Plans with Projected Benefit Obligations in Excess of Plan Assets		
Projected benefit obligation	\$ 988.3	\$ 1,162.0
Fair value of plan assets	700.6	795.7

The accumulated benefit obligation and fair value of plan assets for the company's qualified and non-qualified pension plans with accumulated benefit obligations in excess of plan assets are as follows:

(In millions)	Pension Plans	
	2013	2012
Pension Plans with Accumulated Benefit Obligations in Excess of Plan Assets		
Accumulated benefit obligation	\$ 949.8	\$ 1,120.2
Fair value of plan assets	697.7	793.1

The measurement date used to determine benefit information is December 31 for all plan assets and benefit obligations.

The net periodic pension benefit cost (income) includes the following components for 2013, 2012 and 2011:

(In millions)	Domestic Pension Benefits			Non-U.S. Pension Benefits		
	2013	2012	2011	2013	2012	2011
Components of Net Benefit Cost						
(Income)						
Service cost-benefits earned	\$—	\$—	\$—	\$19.5	\$11.8	\$13.7

Edgar Filing: THERMO FISHER SCIENTIFIC INC. - Form 10-K

Interest cost on benefit obligation	19.0	20.4	21.9	29.0	30.7	32.1
Expected return on plan assets	(24.3)	(28.1)	(29.4)	(29.0)	(27.3)	(27.8)
Amortization of actuarial net loss	5.2	3.6	1.5	6.3	3.3	1.6
Amortization of prior service benefit	—	—	—	(0.3)	(0.1)	—
Settlement/curtailment loss	—	—	—	0.1	—	—
Special termination benefit	—	—	—	1.1	0.5	0.9
Net periodic benefit cost (income)	\$(0.1)	\$(4.1)	\$(6.0)	\$26.7	\$18.9	\$20.5

The net periodic postretirement benefit cost was not material in 2013, 2012 or 2011.

Financial Statement Index

F-31

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Expected benefit payments are estimated using the same assumptions used in determining the company's benefit obligation at December 31, 2013. Benefit payments will depend on future employment and compensation levels, average years employed and average life spans, among other factors, and changes in any of these factors could significantly affect these estimated future benefit payments. Estimated future benefit payments during the next five years and in the aggregate for the five fiscal years thereafter, are as follows:

(In millions)	Domestic Pension Benefits	Non-U.S. Pension Benefits	Post- retirement Benefits
2014	\$26.2	\$27.7	\$2.0
2015	26.5	28.4	2.0
2016	26.4	31.7	2.0
2017	29.7	32.9	1.9
2018	27.1	33.9	2.0
2019-2023	144.2	200.2	9.8

A change in the assumed healthcare cost trend rate by one percentage point effective January 2013 would change the accumulated postretirement benefit obligation as of December 31, 2013 and the 2013 aggregate of service and interest costs, as follows:

(In millions)	Increase	Decrease
One Percentage Point		
Effect on total of service and interest cost components	\$0.4	\$(0.3)
Effect on postretirement healthcare benefit obligation	6.1	(4.7)

Domestic Pension Plan Assets

The company's overall objective is to manage the assets in a liability framework where investments are selected that are expected to have similar changes in fair value as the related liabilities will have upon changes in interest rates. The company invests in a portfolio of both return-seeking and liability-hedging assets, primarily through the use of institutional collective funds, to achieve long-term growth and to insulate the funded position from interest rate volatility. The strategic asset allocation uses a combination of risk controlled and index strategies in fixed income and global equities. The company also has a small portfolio (comprising less than 2% of invested assets) of private equity investments. The target allocations for the remaining investments are approximately 25% to funds investing in U.S. equities, including a sub-allocation of approximately 5% to real estate-related equities, approximately 15% to funds investing in international equities and approximately 60% to funds investing in fixed income securities. The portfolio maintains enough liquidity at all times to meet the near-term benefit payments.

Non-U.S. Pension Plan Assets

The company maintains specific plan assets for many of the individual pension plans outside the U.S. The investment strategy of each plan has been uniquely established based on the country specific standards and characteristics of the

plans. Several of the plans have contracts with insurance companies whereby the market risks of the benefit obligations are borne by the insurance companies. When assets are held directly in investments, generally the objective is to invest in a portfolio of diversified assets with a variety of fund managers. For plans not currently managing the assets in a liability framework, the investments are substantially limited to funds investing in global equities and fixed income securities with the target asset allocations ranging from approximately 55% - 70% for equities and 30% - 45% for fixed income securities. For plans managing the assets in a liability framework, the investments also include hedge funds, multi-asset funds and derivative funds with the target asset allocations ranging from approximately 3% - 10% for equities, 40% - 55% for fixed income, 15% - 28% for hedge funds, 2% - 5% for multi-asset funds and 18% - 22% for funds holding derivatives. The derivatives held by the funds are primarily interest rate swaps intended to match the movements in the plan liabilities as well as equity futures in a synthetic equity fund which provide targeted exposure to equity markets without the fund holding individual equity positions. Each plan maintains enough liquidity at all times to meet the near-term benefit payments.

Insurance contracts	94.6	—	94.6	—
Cash / money market funds	6.6	6.4	0.2	—
Total Non-U.S. Pension Plans	\$588.4	\$79.5	\$508.9	\$ —

The tables above present the fair value of the company's plan assets in accordance with the fair value hierarchy (Note 12). Certain pension plan assets are measured using net asset value per share (or its equivalent) and are reported as a level 2 investment above due to the company's ability to redeem its investment either at the balance sheet date or within limited time restrictions. The fair value of the company's private equity investments, which are classified as level 3 investments, are based on valuations provided by the respective funds. There was no significant activity within the Level 3 pension plan assets during the years presented.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 7. Income Taxes

The components of income from continuing operations before provision for income taxes are as follows:

(In millions)	2013	2012	2011
U.S.	\$914.9	\$908.5	\$812.1
Non-U.S.	404.6	360.9	320.7
	\$1,319.5	\$1,269.4	\$1,132.8

The components of the provision for income taxes of continuing operations are as follows:

(In millions)	2013	2012	2011
Current Income Tax Provision			
Federal	\$242.5	\$160.5	\$149.7
Non-U.S.	210.1	92.1	68.5
State	13.5	16.1	14.6
	466.1	268.7	232.8
Deferred Income Tax Provision (Benefit)			
Federal	\$(241.3)	\$(40.8)	\$(11.4)
Non-U.S.	(178.8)	(205.2)	(107.0)
State	(5.6)	(11.7)	(5.0)
	(425.7)	(257.7)	(123.4)
	\$40.4	\$11.0	\$109.4

The income tax provision (benefit) included in the accompanying statement of income is as follows:

(In millions)	2013	2012	2011
Continuing Operations	\$40.4	\$11.0	\$109.4
Discontinued Operations	(3.7)	(44.0)	191.5
	\$36.7	\$(33.0)	\$300.9

The company receives a tax deduction upon the exercise of non-qualified stock options by employees for the difference between the exercise price and the market price of the underlying common stock on the date of exercise. The provision for income taxes that is currently payable does not reflect \$46.6 million and \$18.7 million of such benefits that have been allocated to capital in excess of par value in 2013 and 2012, respectively.

Financial Statement Index

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The provision for income taxes in the accompanying statement of income differs from the provision calculated by applying the statutory federal income tax rate of 35% to income from continuing operations before provision for income taxes due to the following:

(In millions)	2013	2012	2011
Provision for Income Taxes at Statutory Rate	\$461.8	\$444.3	\$396.5
Increases (Decreases) Resulting From:			
Foreign rate differential	(180.2)	(319.5)	(279.6)
Impact of change in tax laws and apportionment on deferred taxes	3.3	(53.7)	11.7
Income tax credits	(227.6)	(52.1)	(24.8)
Manufacturing deduction	(33.6)	(27.3)	(27.0)
State income taxes, net of federal tax	(3.8)	(8.6)	0.3
Nondeductible expenses	19.6	8.1	17.5
Provision (reversal) of tax reserves, net	(4.3)	14.8	0.6
Tax return reassessments and settlements	10.5	—	3.0
Other, net	(5.3)	5.0	11.2
	\$40.4	\$11.0	\$109.4

In 2013, non-U.S. subsidiaries of the company made cash and deemed distributions to the U.S. which resulted in no net tax cost. As a result of these distributions, the company generated U.S. foreign tax credits of \$160 million, offset in part by additional U.S. income taxes of \$56 million on the related foreign income which reduced the benefit from the foreign tax rate differential in 2013. In addition, the impact of tax law changes in certain foreign jurisdictions reduced the benefit from the foreign rate differential in 2013. The impact of change in tax laws and apportionment on deferred taxes in 2012 includes \$55 million of benefit from a tax rate reduction enacted in Sweden.

Net deferred tax asset (liability) in the accompanying balance sheet consists of the following:

(In millions)	2013	2012
Deferred Tax Asset (Liability)		
Depreciation and amortization	\$(2,319.1)	\$(2,543.9)
Net operating loss and credit carryforwards	690.7	486.6
Reserves and accruals	125.4	116.0
Accrued compensation	195.1	210.0
Inventory basis difference	61.2	67.4
Other capitalized costs	51.9	53.9
Unrealized losses on hedging instruments	14.7	21.0
Other, net	36.0	48.9
	(1,144.1)	(1,540.1)
Less: Valuation allowance	76.8	113.7

\$(1,220.9) \$(1,653.8)

The company estimates the degree to which tax assets and loss carryforwards will result in a benefit based on expected profitability by tax jurisdiction and provides a valuation allowance for tax assets and loss and credit carryforwards that it believes will more likely than not expire unutilized. At December 31, 2013, all of the company's valuation allowance relates to deferred tax assets for which any subsequently recognized tax benefits will reduce income tax expense.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

At December 31, 2013, the company had federal, state and non-U.S. net operating loss carryforwards of \$130.2 million, \$891.9 million and \$1.89 billion, respectively. Use of the carryforwards is limited based on the future income of certain subsidiaries. The federal and state net operating loss carryforwards expire in the years 2014 through 2033. Of the non-U.S. net operating loss carryforwards, \$303.8 million expire in the years 2014 through 2032, and the remainder do not expire. The company also had \$203.0 million of federal foreign tax credit carryforwards as of December 31, 2013, which expire in the years 2014 through 2023.

A provision has not been made for U.S. or additional non-U.S. taxes on \$5.97 billion of undistributed earnings of international subsidiaries that could be subject to taxation if remitted to the U.S. because the company plans to keep these amounts permanently reinvested overseas except for instances where the company can remit such earnings to the U.S. without an associated net tax cost. Determining the deferred tax liability that would arise if these earnings were remitted is not practicable.

Unrecognized Tax Benefits

As of December 31, 2013, the company had \$134.2 million of unrecognized tax benefits which, if recognized, would reduce the effective tax rate.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits is as follows:

(In millions)	2013	2012	2011
Balance at beginning of year	\$ 164.8	\$ 120.3	\$ 62.1
Additions for tax positions of current year	12.6	20.5	43.2
Additions for tax positions of prior years	15.6	31.8	18.6
Reductions for tax positions of prior years	—	—	(2.1)
Closure of tax years	(7.2)	(7.8)	—
Settlements	(51.6)	—	(1.5)
	\$ 134.2	\$ 164.8	\$ 120.3

The company expects that the unrecognized tax benefits will increase in the first quarter of 2014 as a result of the acquisition of Life Technologies.

During 2013, the company settled the IRS audit relating to the 2008 and 2009 tax years which resulted in a decrease in the company's liability for unrecognized tax benefits of \$8.9 million. The liability was also reduced by \$21.0 million due to the company's withdrawal of a U.S. court case relating to the 2001 to 2003 tax years. Additionally, in 2013, the company benefited from a favorable resolution of a court case in Sweden which resulted in a decrease in the liability for unrecognized tax benefits of \$21.1 million. Of the total \$21.1 million, \$16.9 million reduced income tax expense. Of the total \$134 million of liability, \$5 million is classified as a current liability and the remainder is long-term.

During 2012, the statute of limitations on certain unrecognized tax benefits lapsed which resulted in a decrease in the liability for unrecognized tax benefits of \$7.8 million, all of which reduced income tax expense.

During 2011, the company's liability for unrecognized tax benefits increased primarily due to additional unrecognized tax benefits associated with the liquidation of a U.S. subsidiary, utilization of capital loss carryforwards and acquisitions.

In 2011, the company settled the IRS audit of a refund claim relating to the 2000 and 2001 tax years which resulted in a \$1.5 million decrease in the liability for unrecognized tax benefits.

Financial Statement Index

F-36

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The company classified interest and penalties related to unrecognized tax benefits as income tax expense. The total amount of interest and penalties related to uncertain tax positions and recognized in the balance sheet as of December 31, 2013 and 2012 was \$14.1 million and \$10.9 million, respectively.

The company conducts business globally and, as a result, Thermo Fisher or one or more of its subsidiaries files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business, the company is subject to examination by taxing authorities throughout the world, including such major jurisdictions as Australia, Canada, China, Denmark, Finland, France, Germany, Italy, Japan, the United Kingdom and the United States. With few exceptions, the company is no longer subject to U.S. federal, state and local, or non-U.S., income tax examinations for years before 2010.

Note 8. Earnings per Share

(In millions except per share amounts)

	2013	2012	2011
Income from Continuing Operations	\$1,279.1	\$1,258.4	\$1,023.4
(Loss) Income from Discontinued Operations	(0.7)	(19.2)	1.7
(Loss) Gain on Disposal of Discontinued Operations, Net	(5.1)	(61.3)	304.8
Net Income	\$1,273.3	\$1,177.9	\$1,329.9
Basic Weighted Average Shares	360.3	363.8	380.8
Plus Effect of:			
Convertible debentures	—	—	0.6
Equity forward arrangement	1.8	—	—
Stock options and restricted units	3.7	2.8	3.4
Diluted Weighted Average Shares	365.8	366.6	384.8
Basic Earnings per Share:			
Continuing operations	\$3.55	\$3.46	\$2.69
Discontinued operations	(.02)	(.22)	.80
	\$3.53	\$3.24	\$3.49
Diluted Earnings per Share:			
Continuing operations	\$3.50	\$3.43	\$2.66
Discontinued operations	(.02)	(.22)	.80
	\$3.48	\$3.21	\$3.46

Options to purchase 1.0 million, 7.2 million and 6.9 million shares of common stock were not included in the computation of diluted earnings per share for 2013, 2012 and 2011, respectively, because their effect would have been antidilutive.

The annual repayment requirements for debt obligations are as follows:

(In millions)

2014	\$981.3
2015	707.1
2016	1,902.4
2017	900.5
2018	500.6
2019 and thereafter	5,500.0

\$10,491.9

See Note 12 for fair value information pertaining to the company's long-term obligations.

Short-term obligations and current maturities of long-term obligations in the accompanying balance sheet included \$280.0 million and \$91.7 million at year-end 2013 and 2012, respectively, of commercial paper, short-term bank borrowings and borrowings under lines of credit of certain of the company's subsidiaries. The weighted average interest rate for short-term borrowings was 0.58% and 1.01% at December 31, 2013 and 2012, respectively. In addition to available borrowings under the company's revolving credit agreements, discussed below, the company had unused lines of credit of \$60.8 million as of December 31, 2013. These unused lines of credit generally provide for short-term unsecured borrowings at various interest rates.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Credit Facilities

In 2013, the company entered a revolving credit facility with a bank group that provides for up to \$1.50 billion of unsecured multi-currency revolving credit. The facility expires in July 2018. The agreement calls for interest at either a LIBOR-based rate or a rate based on the prime lending rate of the agent bank, at the company's option. The agreement contains affirmative, negative and financial covenants, and events of default customary for financings of this type. The financial covenant requires the company to maintain a Consolidated Leverage Ratio of debt to EBITDA (as defined in the agreement) below 3.5 to 1.0 prior to the closing date of the Life Technologies Acquisition, below 5.5 to 1.0 during the first six months after the closing date of the Life Technologies Acquisition and decreasing, based on the passage of time, to 3.5 to 1.0, after 18 months and an Interest Coverage Ratio of EBITDA (as defined in the agreement) to interest expense below 3.0 to 1.0. The credit agreement permits the company to use the facility for working capital; acquisitions; repurchases of common stock, debentures and other securities; the refinancing of debt; and general corporate purposes. The credit agreement allows for the issuance of letters of credit, which reduces the amount available for borrowing. If the company borrows under this facility, it intends to leave undrawn an amount equivalent to outstanding commercial paper (\$250 million at December 31, 2013) to provide a source of funds in the event that commercial paper markets are not available. As of December 31, 2013, no borrowings were outstanding under the facility, although available capacity was reduced by approximately \$43 million as a result of outstanding letters of credit.

Commercial Paper Program

The company has a U.S. commercial paper program pursuant to which it may issue and sell unsecured, short-term promissory notes (CP Notes). Maturities may not exceed 397 days from the date of issue and the CP Notes rank pari passu with all of the company's other unsecured and unsubordinated indebtedness. CP Notes are issued on a private placement basis under customary terms in the commercial paper market and are not redeemable prior to maturity nor subject to voluntary prepayment. CP Notes are issued at a discount from par, or, alternatively, are sold at par and bear varying interest rates on a fixed or floating basis. As of December 31, 2013, outstanding borrowings under this program were \$250 million, with a weighted average remaining period to maturity of 12 days. The weighted average interest rate on the outstanding CP Notes as of December 31, 2013 was 0.47%.

Term Loan

In connection with the planned acquisition of Life Technologies, the company entered into a bridge credit agreement and a term loan agreement. The bridge credit agreement was a 364-day unsecured committed bridge facility which was terminated in December 2013 by the company upon securing long-term financing for the acquisition. The term loan agreement is a 3-year unsecured \$5 billion term loan facility. In January 2014, the company borrowed \$5.00 billion under the term loan facility to partially fund the acquisition. The term loan agreement calls for interest at either a LIBOR-based rate or a rate based on the prime lending rate of the agent bank, at the company's option. The term loan agreement contains affirmative, negative and financial covenants, and events of default customary for financings of this type. The financial covenants require the company to maintain a Consolidated Leverage Ratio of debt to EBITDA (as defined in the agreements) below 5.5 to 1.0 during the first six months after the borrowing date and decreasing, based on the passage of time, to 3.5 to 1.0, beginning 18 months after the borrowing date. The company must also maintain a minimum interest coverage ratio of 3.0 to 1.0.

Senior Notes

Interest on each of the senior notes is payable semi-annually. Each of the notes may be redeemed at any time at a redemption price of 100% of the principal amount plus a specified make-whole premium plus accrued interest. The company is subject to certain affirmative and negative covenants under the indentures governing the senior notes, the most restrictive of which limits the ability of the company to pledge principal properties as security under borrowing arrangements.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Interest Rate Swap Arrangements

In December 2013, upon the issuance of \$900 million principal amount of 1.30% Senior Notes due 2017, the company entered into LIBOR-based interest rate swap arrangements with various banks. The aggregate amount of the swaps is equal to the principal amount of the 1.30% Notes and the payment dates of the swaps coincide with the payment dates of the 1.30% Notes. The swap contracts provide for the company to pay a variable interest rate of one-month LIBOR plus a spread of 0.6616% (0.83% at December 31, 2013) and to receive a fixed rate of 1.30%. The variable interest rate resets monthly. The swaps have been accounted for as a fair value hedge of the 1.30% Notes. See Note 12 for additional information.

In August 2011, the company terminated its fixed to floating rate swap arrangements on its 2.15% Senior Notes due 2012, 2.05% Senior Notes due 2014, 3.25% Senior Notes due 2014 and 3.20% Senior Notes due 2015. These swap arrangements were accounted for as fair value hedges. As a result of terminating these arrangements, the company received \$63 million (excluding accrued interest) in cash. The proceeds were recorded as part of the carrying value of the underlying debt, which will be amortized as a reduction of interest expense over the remaining terms of the respective debt instruments.

Cash Flow Hedge Arrangements

In 2013, prior to issuing the 4.15% Senior Notes due 2024, the company entered into interest rate swap agreements to mitigate the risk of interest rates rising prior to completion of a debt offering. Based on the company's conclusion that a debt offering was probable as a result of near-term debt maturities and that such debt would carry semi-annual interest payments over a 10-year term, the swaps hedged the cash flow risk for each of the semi-annual fixed-rate interest payments on \$700 million of principal amount of the planned 10-year fixed-rate debt issue. In December 2013, the company issued senior notes and terminated the swap arrangements. The company received \$11 million at the termination of these agreements and recorded a gain of \$1 million on the ineffective portion in other expense, net in the accompanying statement of income. The remaining favorable change in the fair value of the hedge upon termination (the effective portion) was \$6 million, net of tax, and was classified as an increase to accumulated other comprehensive items within shareholder's equity and is being amortized to interest expense over the term of the debt through 2024.

In 2011, prior to issuing the 3.60% Senior Notes due 2021, the company entered into hedging agreements (treasury locks) with several banks to mitigate the risk of interest rates rising prior to completion of a debt offering. Based on the company's conclusion that a debt offering was probable and that such debt would carry semi-annual interest payments over a 10-year term, the agreements hedged the cash flow risk for each of the semi-annual fixed-rate interest payments on \$850 million of principal amount of the 10-year fixed rate debt issue (or subsequent financings of such debt). The company paid \$59 million at the termination of this agreement. The unfavorable change in the fair value of the hedge upon termination was \$37 million, net of tax, and was classified as a reduction of accumulated other comprehensive items within shareholders' equity and is being amortized to interest expense over the term of the debt through 2021.

3.25% Senior Subordinated Convertible Notes due 2024

During the first quarter of 2011 following issuance of a redemption notice by the company, holders of the company's 3.25% Senior Subordinated Convertible Notes due 2024 exercised conversion rights for substantially all of the remaining \$329 million principal outstanding. The balance not converted by holders was redeemed by the company. The company paid the principal and the premium due upon conversion/redemption in cash for a total outlay of \$452 million. The premium was charged to capital in excess of par value when paid.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 10. Commitments and Contingencies

Operating Leases

The company leases certain logistics, office, and manufacturing facilities. Income from continuing operations includes expense from operating leases of \$127.9 million, \$125.5 million and \$125.3 million in 2013, 2012 and 2011, respectively. The following is a summary of annual future minimum lease and rental commitments under noncancelable operating leases as of December 31, 2013:

(In millions)

2014	\$ 106.5
2015	80.2
2016	51.5
2017	36.2
2018	25.8
Thereafter	54.2
	\$ 354.4

Purchase Obligations

The company has entered into unconditional purchase obligations, in the ordinary course of business, that include agreements to purchase goods or services that are enforceable and legally binding and that specify all significant terms including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Purchase obligations exclude agreements that are cancelable at any time without penalty. The aggregate amount of the company's unconditional purchase obligations totaled \$290.7 million at December 31, 2013 and the majority of these obligations are expected to be settled during 2014.

Letters of Credit, Guarantees and Other Commitments

Outstanding letters of credit and bank guarantees totaled \$103.0 million at December 31, 2013. Substantially all of these letters of credit and guarantees expire before 2020.

Outstanding surety bonds and other guarantees totaled \$52.8 million at December 31, 2013. The expiration of these bonds and guarantees ranges through 2015.

The letters of credit, bank guarantees and surety bonds principally secure performance obligations, and allow the holder to draw funds up to the face amount of the letter of credit, bank guarantee or surety bond if the applicable business unit does not perform as contractually required. The outstanding letters of credit, bank guarantees and surety bonds disclosed above include \$4.8 million for businesses that have been sold.

In connection with the sale of businesses of the company, the buyers have assumed certain contractual obligations of such businesses and have agreed to indemnify the company with respect to those assumed liabilities. In the event a third-party to a transferred contract does not recognize the transfer of obligations or a buyer defaults on its obligations

under the transferred contract, the company could be liable to the third-party for such obligations. However, in such event, the company would be entitled to seek indemnification from the buyer.

The company has funding commitments totaling \$1.1 million at December 31, 2013, related to investments it owns.

In 2012, the company entered into an off-balance sheet build-to-suit financing arrangement with a financial institution to fund construction of an operating facility in the U.S. Upon completion of construction in 2014, a five-year lease will commence with options to purchase the facility or renew the lease for up to three 5-year terms. The company has agreed with the lessor to comply with certain financial covenants consistent with its other debt arrangements (Note 9), and has guaranteed the facility's residual value at the end of the lease, up to a maximum of \$58 million.

F-41

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Indemnifications

In conjunction with certain transactions, primarily divestitures, the company has agreed to indemnify the other parties with respect to certain liabilities related to the businesses that were sold or leased properties that were abandoned (e.g., retention of certain environmental, tax, employee and product liabilities). The scope and duration of such indemnity obligations vary from transaction to transaction. Where appropriate, an obligation for such indemnifications is recorded as a liability. Generally, a maximum obligation cannot be reasonably estimated. Other than obligations recorded as liabilities at the time of divestiture, historically the company has not made significant payments for these indemnifications.

In connection with the company's efforts to reduce the number of facilities that it occupies, the company has vacated some of its leased facilities or sublet them to third parties. When the company sublets a facility to a third-party, it remains the primary obligor under the master lease agreement with the owner of the facility. As a result, if a third-party vacates the sublet facility, the company would be obligated to make lease or other payments under the master lease agreement. The company believes that the financial risk of default by sublessors is individually and in the aggregate not material to the company's financial position or results of operations.

In connection with the sale of products in the ordinary course of business, the company often makes representations affirming, among other things, that its products do not infringe on the intellectual property rights of others and agrees to indemnify customers against third-party claims for such infringement. The company has not been required to make material payments under such provisions.

Litigation and Related Contingencies

There are various lawsuits and claims pending against the company involving product liability, contract, commercial and other issues. In view of the company's financial condition and the accruals established for these matters, management does not believe that the ultimate liability, if any, related to these matters will have a material adverse effect on the company's financial condition, results of operations or cash flows.

The company establishes a liability that is an estimate of amounts needed to pay damages in the future for events that have already occurred. The accrued liabilities are based on management's judgment as to the probability of losses for asserted and unasserted claims and, where applicable, actuarially determined estimates. The reserve estimates are adjusted as additional information becomes known or payments are made.

The company accrues the most likely amount or at least the minimum of the range of probable loss when a range of probable loss can be estimated. The range of probable loss for product liability, workers compensation and other personal injury matters of the company's continuing operations at December 31, 2013, was approximately \$222 million to \$324 million on an undiscounted basis. The portion of these liabilities assumed in the 2006 merger with Fisher was recorded at its fair (present) value at the date of merger. The company's reserve for these matters in total, including the discounted liabilities, was \$179 million at December 31, 2013 (or \$224 million undiscounted). The reserve includes estimated defense costs and is gross of estimated amounts due from insurers of \$95 million at December 31, 2013 (or \$123 million undiscounted). The portion of these insurance assets assumed in the merger with Fisher was also recorded at its fair value at the date of merger. In addition to the above reserves, as of December 31, 2013, the company had product liability reserves of \$9 million (undiscounted) relating to divested businesses.

The assets and liabilities assumed at the merger date were ascribed a fair value based on the present value of expected future cash flows, using a discount rate equivalent to the risk free rate of interest for monetary assets with comparable maturities (weighted average discount rate of 4.67%). The discount on the liabilities of approximately \$45 million and the discount on the assets of approximately \$28 million (net discount \$17 million) are being accreted to interest expense over the expected settlement period.

Financial Statement Index

F-42

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Although the company believes that the amounts reserved and estimated recoveries are probable and appropriate based on available information, including actuarial studies of loss estimates, the process of estimating losses and insurance recoveries involves a considerable degree of judgment by management and the ultimate amounts could vary materially. Insurance contracts do not relieve the company of its primary obligation with respect to any losses incurred. The collectability of amounts due from its insurers is subject to the solvency and willingness of the insurer to pay, as well as the legal sufficiency of the insurance claims. Management monitors the payment history as well as the financial condition and ratings of its insurers on an ongoing basis.

The company is currently involved in various stages of investigation and remediation related to environmental matters. The company cannot predict all potential costs related to environmental remediation matters and the possible impact on future operations given the uncertainties regarding the extent of the required cleanup, the complexity and interpretation of applicable laws and regulations, the varying costs of alternative cleanup methods and the extent of the company's responsibility. Expenses for environmental remediation matters related to the costs of permit requirements and installing, operating and maintaining groundwater-treatment systems and other remedial activities related to historical environmental contamination at the company's domestic and international facilities were not material in any period presented. The company records accruals for environmental remediation liabilities, based on current interpretations of environmental laws and regulations, when it is probable that a liability has been incurred and the amount of such liability can be reasonably estimated. The company calculates estimates based upon several factors, including reports prepared by environmental specialists and management's knowledge of and experience with these environmental matters. The company includes in these estimates potential costs for investigation, remediation and operation and maintenance of cleanup sites.

Having assumed environmental liabilities in the merger with Fisher, the company was required to discount the estimate of loss to fair (present) value. This fair value was ascribed by using a discount rate of 4.73%, which was the risk free interest rate for monetary assets with maturities comparable to that of the environmental liability. The remaining discount of \$5 million is being accreted by charges to interest expense over the estimated maturity period of 30 years. At December 31, 2013 and 2012, the company's total environmental liability was approximately \$29 million and \$23 million, respectively.

Management believes that its reserves for environmental matters are adequate for the remediation costs the company expects to incur. As a result, the company believes that the ultimate liability with respect to environmental remediation matters will not have a material adverse effect on the company's financial position, results of operations or cash flows. However, the company may be subject to additional remedial or compliance costs due to future events, such as changes in existing laws and regulations, changes in agency direction or enforcement policies, developments in remediation technologies or changes in the conduct of the company's operations, which could have a material adverse effect on the company's financial position, results of operations or cash flows. Although these environmental remediation liabilities do not include third-party recoveries, the company may be able to bring indemnification claims against third parties for liabilities relating to certain sites.

Note 11. Comprehensive Income and Shareholders' Equity

Comprehensive Income

Comprehensive income combines net income and other comprehensive items. Other comprehensive items represent certain amounts that are reported as components of shareholders' equity in the accompanying balance sheet.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Shareholders' Equity

At December 31, 2013, the company had reserved 43,640,460 unissued shares of its common stock for possible issuance under stock-based compensation plans.

The company has 50,000 shares of authorized but unissued \$100 par value preferred stock.

Shareholder Rights Plan

The company has distributed rights under a shareholder rights plan adopted by the company's Board of Directors to holders of outstanding shares of the company's common stock. Each right entitles the holder to purchase one hundred-thousandth of a share (a Unit) of Series B Junior Participating Preferred Stock, \$100 par value, at a purchase price of \$200 per Unit, subject to adjustment. The rights will not be exercisable until the earlier of (i) 10 business days following a public announcement that a person or group of affiliated or associated persons (an Acquiring Person) has acquired, or obtained the right to acquire, beneficial ownership of 15% or more of the outstanding shares of common stock (the Stock Acquisition Date), or (ii) 10 business days following the commencement of a tender offer or exchange offer for 15% or more of the outstanding shares of common stock.

In the event that a person becomes the beneficial owner of 15% or more of the outstanding shares of common stock, except pursuant to an offer for all outstanding shares of common stock that at least 75% of the Board of Directors determines to be fair to, and otherwise in the best interests of, stockholders, each holder of a right (except for the Acquiring Person) will thereafter have the right to receive, upon exercise, that number of shares of common stock (or, in certain circumstances, units of preferred stock, cash, property or other securities of the company) which equals the exercise price of the right divided by one-half of the current market price of the common stock. In the event that, at any time after any person has become an Acquiring Person, (i) the company is acquired in a merger or other business combination transaction in which the company is not the surviving corporation or its common stock is changed or exchanged (other than a merger that follows an offer approved by the Board of Directors), or (ii) 50% or more of the company's assets or earning power is sold or transferred, each holder of a right (except for the Acquiring Person) shall thereafter have the right to receive, upon exercise, the number of shares of common stock of the acquiring company that equals the exercise price of the right divided by one-half of the current market price of such common stock.

At any time until the Stock Acquisition Date, the company may redeem the rights in whole, but not in part, at a price of \$.01 per right (payable in cash or stock). The rights expire on September 29, 2015, unless earlier redeemed or exchanged.

Equity Forward Agreements

In June 2013, in anticipation of the acquisition of Life Technologies, the company entered into equity forward agreements in connection with a public offering of 29.6 million shares of its common stock. The use of the equity forward agreements substantially eliminated future equity market price risk by fixing a common equity offering sales price under the then existing market conditions, while mitigating share dilution from the offering by postponing the actual issuance of common stock until the funds were needed for the Life Technologies Acquisition.

Under the terms of the agreements, the counterparties borrowed shares of the company's common stock and sold them for \$85.50 per share. Upon settlement of the agreements, in January 2014, the company issued and delivered 29.6 million shares of its common stock at the then applicable forward sale price of \$82.5342 per share. The forward price was initially \$83.2770 per share, net of underwriting fees, and was subject to adjustment in accordance with the terms of the agreements including fixed reductions related to cash dividends.

In November 2013, the company entered into a subscription agreement for a private placement of 5.3 million shares of its common stock at a price of \$94.85 per share that was contingent on the closing of the Life Technologies Acquisition. The agreement closed on February 3, 2014.

Financial Statement Index

F-45

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The equity forward and subscription agreements had no initial fair value as they were entered into at the then market price of the common stock. The company did not receive any proceeds from the sale of common stock until the agreements were settled in 2014. Upon settlement, the proceeds were recorded in equity. Prior to their settlement, to the extent that the equity forward agreements were dilutive, they have been reflected in the company's diluted earnings per share calculations using the treasury stock method. Prior to closing, the subscription agreement was not potentially dilutive to the company's diluted earnings per share calculations due to its contingent nature.

Note 12. Fair Value Measurements and Fair Value of Financial Instruments

Fair Value Measurements

The company uses the market approach technique to value its financial instruments and there were no changes in valuation techniques during 2013. The company's financial assets and liabilities carried at fair value are primarily comprised of investments in money market funds; derivative contracts, insurance contracts, mutual funds holding publicly traded securities and other investments in unit trusts held as assets to satisfy outstanding deferred compensation and retirement liabilities; and acquisition-related contingent consideration.

The fair value accounting guidance requires that assets and liabilities carried at fair value be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities that the company has the ability to access.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data such as quoted prices, interest rates and yield curves.

Level 3: Inputs are unobservable data points that are not corroborated by market data.

The following table presents information about the company's financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2013:

(In millions)	December 31, 2013	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Cash equivalents	\$4,859.9	\$4,859.9	\$—	\$ —
Investments in mutual funds, unit trusts and other similar instruments	9.8	9.8	—	—
Insurance contracts	74.5	—	74.5	—
Auction rate securities	4.5	—	—	4.5
Derivative contracts	3.8	—	3.8	—

Total Assets	\$4,952.5	\$4,869.7	\$78.3	\$ 4.5
Liabilities				
Derivative contracts	\$6.5	\$—	\$6.5	\$ —
Contingent consideration	5.1	—	—	5.1
Total Liabilities	\$11.6	\$—	\$6.5	\$ 5.1

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The following table presents information about the company's financial assets and liabilities measured at fair value on a recurring basis as of December 31, 2012:

(In millions)	December 31, 2012	Quoted Prices in Active Markets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets				
Cash equivalents	\$73.6	\$73.6	\$—	\$—
Investments in mutual funds, unit trusts and other similar instruments	36.6	36.6	—	—
Insurance contracts	62.5	—	62.5	—
Auction rate securities	4.3	—	—	4.3
Derivative contracts	1.6	—	1.6	—
Total Assets	\$178.6	\$110.2	\$64.1	\$ 4.3
Liabilities				
Derivative contracts	\$0.8	\$—	\$0.8	\$—
Contingent consideration	20.1	—	—	20.1
Total Liabilities	\$20.9	\$—	\$0.8	\$ 20.1

Available-for-sale investments are carried at fair value and are included in the tables above. The aggregate market value, cost basis and gross unrealized gains and losses of available-for-sale investments by major security type are as follows:

(In millions)	Market Value	Cost Basis	Gross Unrealized Gains	Gross Unrealized Losses
2013				
Mutual Fund and Unit Trust Investments	\$9.8	\$7.3	\$2.5	\$—
Auction Rate Securities	4.5	4.6	—	0.1
	\$14.3	\$11.9	\$2.5	\$0.1
2012				
Mutual Fund and Unit Trust Investments	\$36.6	\$25.4	\$11.2	\$—
Auction Rate Securities	4.3	4.8	—	0.5
	\$40.9	\$30.2	\$11.2	\$0.5

The cost of available-for-sale investments that were sold was based on specific identification in determining realized gains and losses recorded in the accompanying statement of income. In 2013, the company irrevocably contributed appreciated available-for-sale investments that had a fair value of \$27 million to two of its U.K. defined benefit plans, resulting in realization of a previously unrecognized gain of \$11 million. Gross realized gains and gross realized losses on the sale of available-for-sale investments were nominal in 2013, 2012 and 2011.

The company determines the fair value of its insurance contracts by obtaining the cash surrender value of the contracts from the issuer. The fair value of derivative contracts is the estimated amount that the company would receive/pay upon liquidation of the contracts, taking into account the change in interest rates and currency exchange rates. The company determines the fair value of the auction rate securities by obtaining indications of value from brokers/dealers. The company determines the fair value of acquisition-related contingent consideration based on assessment of the probability that the company would be required to make such future payment. Changes to the fair value of contingent consideration are recorded in selling, general and administrative expense.

Table of Contents

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

The company has the ability and intent to hold the auction rate securities to maturity unless they are redeemed earlier by the issuer. There was no significant activity within the Level 3 auction rate securities during 2013 or 2012. The following table provides a rollforward of the fair value, as determined by Level 3 inputs, of the contingent consideration.

(In millions)	2013	2012
Contingent Consideration		
Beginning Balance	\$20.1	\$1.7
Additions	—	19.9
Payments	(28.6)	(1.0)
Change in fair value included in earnings	13.5	(0.5)
Currency translation	0.1	—
Ending Balance	\$5.1	\$20.1

The notional amounts of derivative contracts outstanding, consisting of currency exchange contracts and interest swaps, totaled \$2.03 billion and \$719 million at December 31, 2013 and December 31, 2012, respectively.

While certain derivatives are subject to netting arrangements with counterparties, the company does not offset derivative assets and liabilities within the consolidated balance sheet. The following tables present the fair value of derivative instruments in the consolidated balance sheet and statement of income.

(In millions)	Fair Value – Assets		Fair Value – Liabilities	
	December 31, 2013	December 31, 2012	December 31, 2013	December 31, 2012
Derivatives Designated as Hedging Instruments				
Interest rate swaps (a)	\$—	\$—	\$5.2	\$—
Derivatives Not Designated as Hedging Instruments				
Currency exchange contracts (b)	3.8	1.6	1.3	0.8

(a) The fair value of the interest rate swaps is included in the consolidated balance sheet under the caption other long-term liabilities.

(b) The fair value of the currency exchange contracts is included in the consolidated balance sheet under the captions other current assets or other accrued expenses.

(In millions)	Gain (Loss) Recognized	
	2013	2012
Derivatives Designated as Fair Value Hedges		
Interest rate swaps - effective portion	\$0.2	\$—
Interest rate swaps - ineffective portion	(1.4)	—

Derivatives Not Designated as Fair Value Hedges

Currency exchange contracts

Included in cost of revenues	\$2.7	\$3.0
Included in other expense, net	(22.1)	(10.4)

Gains and losses recognized on currency exchange contracts and the effective portion of interest rate swaps are included in the consolidated statement of income together with the corresponding, offsetting losses and gains on the underlying hedged transactions. Gains and losses recognized on the ineffective portion of interest rate swaps is included in other expense, net in the accompanying statement of income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 14. Restructuring and Other Costs, Net

Restructuring and other costs in 2013 and 2012 primarily included continuing charges for headcount reductions and facility consolidations in an effort to streamline operations, including the closure and consolidation of operations within several facilities in the U.S., Europe and Asia. The company's 2013 and 2012 severance actions associated with facility consolidations and cost reduction measures affected approximately 3% of the company's workforce in both years.

Restructuring and other costs in 2011 primarily included cash compensation from monetizing equity awards held by Dionex employees at the date of acquisition as well as continuing charges for headcount reductions and facility consolidations in an effort to streamline operations, including the following: the consolidation of facilities in Finland and Australia of acquired businesses with existing facilities in those countries; the consolidation of facilities in the U.S.; and the restructuring of the commercial organization of a business across six European countries to increase productivity and efficiency in serving customers. The company's 2011 severance actions affected approximately 4% of the company's workforce.

As of February 27, 2014, the company has identified restructuring actions that will result in additional charges of approximately \$50 million, primarily in the first half of 2014. The company expects significant restructuring charges in the first quarter of 2014 in connection with the acceleration of certain equity awards held by Life Technologies' employees and severance obligations payable to former Life Technologies' executives.

2013

During 2013, the company recorded net restructuring and other costs as follows:

(In millions)	Cost of Revenues	Selling, General and Administrative Expenses	Restructuring and Other Costs, Net	Total
Analytical Technologies	\$2.9	\$ 52.3	\$ 26.8	\$82.0
Specialty Diagnostics	24.9	12.9	24.2	62.0
Laboratory Products and Services	0.8	—	23.7	24.5
Corporate	—	8.3	3.0	11.3
	\$28.6	\$ 73.5	\$ 77.7	\$179.8

The components of net restructuring and other costs by segment are as follows:

Analytical Technologies

In 2013, the Analytical Technologies segment recorded \$82.0 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$2.9 million for accelerated depreciation at facilities closing due to real estate consolidation; charges to selling, general and administrative expenses of \$52.3 million primarily for

transaction costs related to the acquisition of Life Technologies (Note 2); and \$26.8 million of other restructuring costs, net, \$28.5 million of which were cash costs. The cash costs, which were associated with headcount reductions and facility consolidations including the consolidation and closure of several facilities in the U.S. and Europe, consisted of \$18.5 million of severance; \$3.3 million of abandoned facility costs; and \$6.7 million of other cash costs, including outplacement costs for severed employees as well as retention and moving and other expenses associated with facility consolidations. The cash costs also included \$4.1 million of transaction expenses related to the agreement to sell its sera and media, gene modulation and magnetic beads businesses (see Note 2). In addition, the segment realized net gains of \$1.7 million primarily on the sale of real estate in the U.S and Europe.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Specialty Diagnostics

In 2013, the Specialty Diagnostics segment recorded \$62.0 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$24.9 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$12.9 million for revisions of estimated contingent consideration based on actual performance of a recent acquisition; and \$24.2 million of other restructuring costs, net, which were primarily cash costs. The cash costs consisted of \$17.8 million of severance; \$2.8 million of abandoned facility costs primarily for facilities in Europe and the U.S.; and \$3.5 million of other cash costs, primarily outplacement costs for severed employees and moving, travel and other expenses associated with facility consolidations.

Laboratory Products and Services

In 2013, the Laboratory Products and Services segment recorded \$24.5 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$0.8 million for accelerated depreciation at facilities closing due to real estate consolidation and \$23.7 million of other restructuring costs, \$22.4 million of which were cash costs. The cash costs, which consisted of headcount reductions and facility consolidations to streamline operations, included \$16.3 million of severance; \$3.7 million of abandoned facility costs; and \$2.4 million of other cash costs, primarily retention, moving and other expenses associated with facility consolidations. The segment also recorded \$1.3 million of non-cash expense, net, primarily for pension charges related to the headcount reductions.

Corporate

In 2013, the company recorded a charge to selling, general and administrative expenses of \$8.3 million associated with product liability litigation and \$3.0 million of restructuring costs primarily for severance at its corporate operations.

2012

During 2012, the company recorded net restructuring and other costs as follows:

(In millions)	Cost of Revenues	Selling, General and Administrative Expenses	Restructuring and Other Costs, Net	Total
Analytical Technologies	\$ 1.4	\$ (0.1)	\$ 42.3	\$ 43.6
Specialty Diagnostics	52.8	13.7	15.0	81.5
Laboratory Products and Services	1.4	(0.9)	23.8	24.3
Corporate	—	(0.2)	1.0	0.8
	\$ 55.6	\$ 12.5	\$ 82.1	\$ 150.2

The components of net restructuring and other costs by segment are as follows:

Analytical Technologies

In 2012, the Analytical Technologies segment recorded \$43.6 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$1.4 million primarily for accelerated depreciation at facilities closing due to real estate consolidation; \$0.1 million as a reduction of selling, general and administrative expenses; and \$42.3 million of other restructuring costs, net, \$33.8 million of which were cash costs. The cash costs, which were associated with headcount reductions and facility consolidations including the consolidation and closure of several facilities in the U.S. and Europe, consisted of \$21.7 million of severance; \$9.5 million of abandoned facility costs; and \$2.6 million of other cash costs, primarily for retention, relocation and moving expenses associated with facility consolidations. The segment also recorded \$8.5 million of non-cash expense, net, primarily for real estate writedowns related to facility consolidations.

THERMO FISHER SCIENTIFIC INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Specialty Diagnostics

In 2012, the Specialty Diagnostics segment recorded \$81.5 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$52.8 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$13.7 million for transaction costs related to the One Lambda acquisition; and \$15.0 million of other restructuring costs, \$14.3 million of which were cash costs associated with headcount reductions and facility consolidations to streamline operations. The cash costs consisted of \$11.3 million of severance; \$0.6 million of abandoned facility costs; and \$2.4 million of other cash costs. The non-cash charges of \$0.7 million consisted of writedowns to estimated disposal value of real estate held for sale.

Laboratory Products and Services

In 2012, the Laboratory Products and Services segment recorded \$24.3 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$1.4 million primarily for the sale of inventories revalued at the date of acquisition and, to a lesser extent, accelerated depreciation at facilities closing due to real estate consolidation; \$0.9 million, net, as a reduction of selling, general and administrative expenses for revisions of estimated contingent consideration; and \$23.8 million of other restructuring costs, \$17.5 million of which were cash costs. The cash costs, which consisted of headcount reductions and facility consolidations to streamline operations, included \$10.9 million of severance; \$3.2 million of abandoned facility costs; and \$3.4 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The segment recorded \$6.3 million of non-cash costs, net, primarily related to impairment of intangible assets of a business unit and fixed asset writedowns associated with facility consolidations, partially offset by a \$5.9 million gain on a pre-acquisition litigation-related matter.

Corporate

The company recorded \$1.0 million of cash costs primarily for severance at its corporate operations, offset in part by a reduction of selling, general and administrative expenses of \$0.2 million, net, associated with product liability litigation.

2011

During 2011, the company recorded net restructuring and other costs as follows:

(In millions)	Cost of Revenues	Selling, General and Administrative Expenses	Restructuring and Other Costs, Net	Total
Analytical Technologies	\$30.5	\$ 34.5	\$ 54.3	\$119.3
Specialty Diagnostics	39.0	24.0	8.4	71.4

Analytical Technologies

In 2011, the Analytical Technologies segment recorded \$119.3 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$30.5 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$34.5 million primarily for transaction costs related to the Dionex acquisition; and \$54.3 million of other restructuring costs, net, \$48.9 million of which were cash costs. These costs included \$21.2 million of cash compensation from monetizing equity awards held by Dionex employees at the date of acquisition. The segment also recorded continuing cash costs associated with headcount reductions and facility consolidations to streamline operations, which consisted of \$19.3 million of severance; \$7.0 million of abandoned facility costs; and \$1.4 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The segment also recorded \$5.4 million of non-cash charges, net, primarily for the impairment of intangible assets associated with a small business unit.

Specialty Diagnostics

In 2011, the Specialty Diagnostics segment recorded \$71.4 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$39.0 million primarily for the sale of inventories revalued at the date of acquisition; charges to selling, general and administrative expenses of \$24.0 million primarily for transaction costs related to the Phadia acquisition; and \$8.4 million of other restructuring costs, including cash costs of \$8.0 million associated with headcount reductions and facility consolidations to streamline operations, including the consolidation of facilities in Finland and Australia of acquired businesses with existing facilities in those countries. The cash costs consisted of \$6.7 million of severance; \$0.7 million of abandoned facility costs; and \$0.6 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The non-cash charges, net, of \$0.4 million consisted of \$1.2 million of writedowns to estimated disposal value of real estate held for sale, partially offset by \$0.8 million of income from termination of a post-retirement benefit plan.

Laboratory Products and Services

In 2011, the Laboratory Products and Services segment recorded \$34.8 million of net restructuring and other charges. The segment recorded charges to cost of revenues of \$3.1 million for accelerated depreciation at facilities closing due to real estate consolidation and sale of inventories revalued at the date of acquisition and \$31.7 million of other restructuring costs, net, \$22.0 million of which were cash costs. The cash costs were associated with the consolidation of facilities in the U.S. and the restructuring of the commercial organization of a business across six European countries to increase productivity and efficiency in serving customers, as well as other headcount reductions and facility consolidations. The cash costs included \$15.6 million of severance; \$4.2 million of abandoned facility costs; and \$2.2 million of other cash costs, primarily retention, relocation and moving expenses associated with facility consolidations. The segment recorded \$9.7 million of non-cash costs primarily related to impairment of intangible assets associated with two small business units and, to a lesser extent, a loss on sale of a heating equipment business.

Corporate

The company recorded \$5.1 million in restructuring and other charges at its corporate operations in 2011, including a charge to selling, general and administrative expense of \$3.0 million associated with product liability litigation and

\$2.1 million of cash costs for severance.

The following table summarizes the cash components of the company's restructuring plans. The non-cash components and other amounts reported as restructuring and other costs, net, in the accompanying statement of income have been summarized in the notes to the tables. Accrued restructuring costs are included in other accrued expenses in the accompanying balance sheet.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Note 15. Discontinued Operations

In June 2012, in an effort to exit a non-core business, the company's senior management made a decision to pursue a sale of its laboratory workstations business, part of the Laboratory Products and Services segment. The company completed the sale in October 2012 for nominal proceeds. The results of the laboratory workstations business have been classified and presented as discontinued operations in the accompanying financial statements. Prior period results have been adjusted to conform to this presentation.

In 2012, the company recorded an after-tax loss of \$63 million on the divestiture. In addition, the company recorded an after-tax gain of \$2 million upon receipt of additional proceeds from a prior divestiture.

Operating results of the laboratory workstations business were as follows:

(In millions)	2012	2011
Revenues	\$147.1	\$179.6
Pre-tax Income (Loss)	(30.0)	(6.2)

In 2013, the company recorded an after-tax charge of \$4.2 million for the estimated cost to raze certain abandoned facilities of the discontinued operations prior to the planned sale of the related land.

On April 4, 2011, the company sold, in separate transactions, its Athena Diagnostics business for \$740 million in cash and its Lancaster Laboratories business for \$180 million in cash and escrowed proceeds of \$20 million, substantially all of which was received in October 2012. The sale of these businesses resulted in an after-tax gain of approximately \$304 million or \$0.79 per diluted share in the second quarter of 2011. The results of both businesses have been included in the accompanying financial statements as discontinued operations. Operating results of these businesses were as follows:

(In millions)	2011
Revenues	\$54.3
Pre-tax Income	9.1

Note 16. Unaudited Quarterly Information

(In millions except per share amounts)	2013			
	First (a)	Second (b)	Third (c)	Fourth (d)
Revenues	\$3,191.5	\$3,240.1	\$3,191.8	\$3,466.9
