FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2016
OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____
Commission file number 1-812

UNITED TECHNOLOGIES CORPORATION

DELAWARE 06-0570975
10 Farm Springs Road,
Farmington, Connecticut
06032
(860) 728-7000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At September 30, 2016 there were 823,405,687 shares of Common Stock outstanding.

UNITED TECHNOLOGIES CORPORATION
AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

The Condensed Consolidated Financial Statements at September 30, 2016 and for the quarters and nine months ended September 30, 2016 and 2015 are unaudited, but in the opinion of management include all adjustments (consisting only of normal recurring adjustments) necessary for a fair statement of the results for the interim periods. The results reported in these Condensed Consolidated Financial Statements should not necessarily be taken as indicative of results that may be expected for the entire year. The financial information included herein should be read in conjunction with the financial statements and notes in our Annual Report to Shareowners (2015 Annual Report) incorporated by reference to our Annual Report on Form 10-K for calendar year 2015 (2015 Form 10-K).

In March 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting, which amends the accounting for employee share-based payment transactions to require recognition of the tax effects resulting from the settlement of stock-based awards as income tax expense or benefit in the income statement in the reporting period in which they occur. The ASU also requires that all tax-related cash flows resulting from share-based payments, including the excess tax benefits related to the settlement of stock-based awards, be classified as cash flows from operating activities, and that cash paid by directly withholding shares for tax withholding purposes be classified as a financing activity in the statement of cash flows. In addition, the ASU also allows companies to make an accounting policy election to either estimate the number of awards that are expected to vest, consistent with current U.S. GAAP, or account for forfeitures when they occur. The new standard is effective for annual reporting periods beginning after December 15, 2016 with early adoption permitted. We have elected to early adopt the requirements of the amended standard in the third quarter of 2016 and are therefore required to report the impacts as though adopted on January 1, 2016. Accordingly, we recognized additional income tax benefits of approximately \$13 million and \$11 million for the quarter and nine months ended September 30, 2016, respectively. In addition, we recognized the additional income tax benefits and cash paid by directly withholding shares for tax withholding purposes of \$29 million for the nine months ended September 30, 2016 as an increase in net cash flows provided by operating activities of continuing operations, and an increase in net cash flows used in financing activities of continuing operations. There is no change to our accounting policy with respect to estimation of forfeitures. Certain reclassifications have been made to the prior year amounts to conform to the current year presentation. On November 6, 2015, we completed the sale of the Sikorsky Aircraft business (Sikorsky) to Lockheed Martin Corp. Accordingly, the results of operations and the related cash flows of Sikorsky have been reclassified to Discontinued Operations in our Condensed Consolidated Statements of Operations for the quarter and nine months ended September 30, 2015 and in our Condensed Consolidated Statement of Cash Flows for the nine months ended September 30, 2015. See Note 2 for further discussion.

Note 1: Acquisitions, Dispositions, Goodwill and Other Intangible Assets

Business Acquisitions and Dispositions. During the nine months ended September 30, 2016, our investment in business acquisitions was \$537 million, including debt assumed of \$2 million, and consisted of the acquisition of a majority interest in an Italian heating products and services company by UTC Climate, Controls & Security and a number of small acquisitions, primarily in our commercial businesses.

Goodwill. Changes in our goodwill balances for the nine months ended September 30, 2016 were as follows:

	Balance as of	Goodwill	Foreign	Balance
(Dollars in millions)	January 1, 2016	Resulting	Currency	as of
		from Business	Translation and	September
		Combinations	Other	30, 2016
Otis	\$ 1,566	\$ 19	\$ 49	\$ 1,634
UTC Climate, Controls & Security	9,458	450	(208)	9,700

Total Segments	27,298	494	(373)	27,419
Eliminations and other	3	—	—		3
Total	\$ 27,301	\$ 494	\$ (373)	\$ 27,422

8

Table of Contents

Intangible Assets. Identifiable intangible assets are comprised of the following:

(Dollars in millions)	September 30, 2016		December 31, 2015	
	Gross Amount	Accumulated Amortization	Gross Amount	Accumulated Amortization
Amortized:				
Service portfolios	\$2,068	\$ (1,404)	\$1,977	\$ (1,307)
Patents and trademarks	379	(202)	361	(189)
Collaboration intangible assets	3,637	(176)	3,336	(86)
Customer relationships and other	12,840	(3,410)	12,430	(2,988)
	18,924	(5,192)	18,104	(4,570)
Unamortized:				
Trademarks and other	2,068	—	2,069	—
Total	\$20,992	\$ (5,192)	\$20,173	\$ (4,570)

Customer relationship intangible assets include payments made to our customers to secure certain contractual rights. Such payments are capitalized when there are distinct rights obtained and there are sufficient incremental cash flows to support the recoverability of the assets established. Otherwise, the applicable portion of the payments are expensed. We amortize these intangible assets based on the underlying pattern of economic benefit, which may result in an amortization method other than straight-line. In the aerospace industry, amortization based on the pattern of economic benefit generally results in lower amortization expense during the development period with increasing amortization expense as programs enter full production and aftermarket cycles. If a pattern of economic benefit cannot be reliably determined, a straight-line amortization method is used. We classify amortization of such payments as a reduction of sales. The collaboration intangible assets are amortized based upon the pattern of economic benefits as represented by the underlying cash flows.

Amortization of intangible assets for the quarter and nine months ended September 30, 2016 was \$197 million and \$578 million, respectively, compared with \$183 million and \$537 million for the same periods of 2015. The following is the expected amortization of intangible assets for the years 2016 through 2021, which reflects the pattern of expected economic benefit on certain aerospace intangible assets.

(Dollars in millions)	Remaining 2016	2017	2018	2019	2020	2021
Amortization expense	\$ 197	\$817	\$874	\$879	\$865	\$827

Note 2: Discontinued Operations

On November 6, 2015, we completed the sale of Sikorsky to Lockheed Martin Corp. Accordingly, the results of operations and the cash flows related to Sikorsky have been reclassified to Discontinued Operations in our Condensed Consolidated Statements of Operations and Comprehensive Income for the quarters and nine months ended September 30, 2015, and in our Condensed Consolidated Statement of Cash Flows for the nine months ended September 30, 2015. In the nine months ended September 30, 2016, we recognized approximately \$11 million of additional gain on the disposal, primarily resulting from the settlement of working capital adjustments. In the quarter and nine months ended September 30, 2016, we recognized approximately \$40 million of income tax benefit and \$12 million of income tax expense, respectively, including the impacts related to filing Sikorsky's 2015 tax returns. Net cash outflows from discontinued operations of approximately \$2.5 billion for the nine months ended September 30, 2016 were primarily due to the payment of taxes related to the 2015 gain realized on the sale of Sikorsky.

Table of Contents

The following summarized financial information related to Sikorsky has been segregated from continuing operations and reported as Discontinued Operations:

Income (Expense)	Quarter Ended		Nine Months	
	September 30,		Ended	
(Dollars in millions)	2016	2015	2016	2015
Discontinued Operations:				
Net sales	\$—	\$1,421	\$—	\$4,379
Cost of sales	—	(1,163)	—	(3,628)
Research and development	—	(47)	—	(133)
Selling, general and administrative	1	(88)	2	(264)
Pension curtailment	—	(110)	—	(110)
Other income, net	—	14	—	40
Income from operations	1	27	2	284
(Loss) gain on disposal	(4)	(38)	11	(66)
Income tax benefit (expense)	40	(54)	(12)	(140)
Income (loss) from discontinued operations	\$37	\$(65)	\$1	\$78

Note 3: Earnings Per Share

(Dollars in millions, except per share amounts; shares in millions)	Quarter Ended		Nine Months	
	September 30,		Ended	
	2016	2015	2016	2015
Net income attributable to common shareowners:				
Net income from continuing operations	\$1,443	\$1,427	\$4,041	\$4,252
Income (loss) from discontinued operations	37	(65)	1	78
Net income attributable to common shareowners	\$1,480	\$1,362	\$4,042	\$4,330
Basic weighted average number of shares outstanding	822.4	876.4	824.0	882.1
Stock awards and equity units	8.8	8.6	7.8	11.5
Diluted weighted average number of shares outstanding	831.2	885.0	831.8	893.6
Earnings (Loss) Per Share of Common Stock - Basic:				
Net income from continuing operations	\$1.76	\$1.63	\$4.90	\$4.82
Income (loss) from discontinued operations	0.04	(0.07)	—	0.09
Net income attributable to common shareowners	1.80	1.55	4.91	4.91
Earnings (Loss) Per Share of Common Stock - Diluted:				
Net income from continuing operations	\$1.74	\$1.61	\$4.86	\$4.76
Income (loss) from discontinued operations	0.04	(0.07)	—	0.09
Net income attributable to common shareowners	1.78	1.54	4.86	4.85

The computation of diluted earnings per share excludes the effect of the potential exercise of stock awards, including stock appreciation rights and stock options, when the average market price of the common stock is lower than the exercise price of the related stock awards during the period because the effect would be anti-dilutive. For the quarter and nine months ended September 30, 2016, the number of stock awards excluded from the computation was approximately 12.2 million and 15.0 million, respectively. For the quarter and nine months ended September 30, 2015, the number of stock awards excluded from the computation was approximately 10.3 million and 8.8 million, respectively.

Table of Contents

Note 4: Inventories and Contracts in Progress

(Dollars in millions)	September 30, 2016	December 31, 2015
Raw materials	\$ 2,209	\$ 2,037
Work-in-process	2,807	2,422
Finished goods	3,438	3,183
Contracts in progress	9,580	8,668
	18,034	16,310
Less:		
Progress payments, secured by lien, on U.S. Government contracts	(157)	(239)
Billings on contracts in progress	(8,796)	(7,936)
	\$ 9,081	\$ 8,135

Included within inventory are capitalized contract development costs related to certain aerospace programs at UTC Aerospace Systems. As of September 30, 2016 and December 31, 2015, these capitalized costs were \$148 million and \$152 million, respectively, which will be liquidated as production units are delivered to the customer. Within commercial aerospace, inventory costs attributable to new engine offerings are recognized based on the average cost per unit expected over the life of each contract using the units-of-delivery method of percentage of completion accounting. Under this method, costs of initial engine deliveries in excess of the projected contract per unit average cost are capitalized, and these capitalized amounts are subsequently expensed as additional engine deliveries occur for engines with costs below the projected contract per unit average cost over the life of the contract. As of September 30, 2016 and December 31, 2015, inventory included \$144 million and \$13 million, respectively, of such capitalized amounts.

Note 5: Borrowings and Lines of Credit

(Dollars in millions)	September 30, 2016	December 31, 2015
Commercial paper	\$ 780	\$ 727
Other borrowings	91	199
Total short-term borrowings	\$ 871	\$ 926

At September 30, 2016, we had revolving credit agreements with various banks permitting aggregate borrowings of up to \$4.35 billion, pursuant to a \$2.20 billion revolving credit agreement and a \$2.15 billion multicurrency revolving credit agreement, both of which expire in August 2021. As of September 30, 2016, there were no borrowings under these revolving credit agreements. The undrawn portions of these revolving credit agreements are also available to serve as backup facilities for the issuance of commercial paper. As of September 30, 2016, our maximum commercial paper borrowing limit was \$4.35 billion. We use our commercial paper borrowings for general corporate purposes, including the funding of potential acquisitions, debt refinancing, and repurchases of our common stock. The need for commercial paper borrowings arises when the use of domestic cash for acquisitions, dividends, and share repurchases exceeds the sum of domestic cash generation and foreign cash repatriated to the U.S.

On February 22, 2016, we issued €950 million aggregate principal amount of 1.125% notes due 2021, €500 million aggregate principal amount of 1.875% notes due 2026 and €750 million aggregate principal amount of floating rate notes due 2018. The net proceeds from these debt issuances were used for general corporate purposes.

Table of Contents

Long-term debt consisted of the following:

(Dollars in millions)	September 30, 2016	December 31, 2015
5.375% notes due 2017 ¹	\$ 1,000	\$ 1,000

Other (fair market value adjustments and discounts)	33	60
Total long-term debt	21,794	19,499
Less: current portion	1,604	179
Long-term debt, net of current portion	\$ 20,190	\$ 19,320

We may redeem the above notes, in whole or in part, at our option at any time at a redemption price in U.S. Dollars equal to the greater of 100% of the principal amount of the notes to be redeemed or the sum of the present values of the remaining scheduled payments of principal and interest on the notes to be redeemed, discounted to the redemption date on a semiannual basis at the adjusted treasury rate plus 10-50 basis points. The redemption price will also include interest accrued to the date of redemption on the principal balance of the notes being redeemed.

These notes bear interest at the three-month EURIBOR rate plus 0.800%, established quarterly. The interest rate in effect at September 30, 2016 was 0.501%. The notes may be redeemed at our option in whole, but not in part, at any time in the event of certain developments affecting U.S. taxation.

³We may redeem these notes, in whole or in part, at our option at any time. If redeemed earlier than three months prior to the stated maturity date, the redemption price in Euro shall equal the greater of 100% of the principal amount of the notes to be redeemed or the sum of the present values of the remaining scheduled payments of principal and interest on the notes to be redeemed, discounted to the redemption date on an annual basis at a rate based upon a comparable German federal government bond whose maturity is closest to the maturity of the notes plus 15-30 basis points. In addition, the notes may be redeemed at our option in whole, but not in part, at any time in the event of

certain developments affecting U.S. taxation.

We may redeem these notes, in whole or in part, at our option at any time. If redeemed prior to November 16, 2044, the redemption price in U.S. Dollars shall equal the greater of 100% of the principal amount of the notes to be redeemed or the sum of the present values of the remaining scheduled payments of principal and interest on the notes to be redeemed, discounted to the redemption date on a semiannual basis at the adjusted treasury rate plus 25 basis points.

12

Table of Contents

On April 29, 2016, we renewed our universal shelf registration statement filed with the Securities and Exchange Commission (SEC) for an indeterminate amount of equity and debt securities for future issuance, subject to our internal limitations on the amount of equity and debt to be issued under this shelf registration statement.

Note 6: Income Taxes

We conduct business globally and, as a result, UTC or one or more of our subsidiaries files income tax returns in the U.S. federal jurisdiction and various state and foreign jurisdictions. In the normal course of business we are subject to examination by taxing authorities throughout the world, including such major jurisdictions as Australia, Belgium, Canada, China, France, Germany, Hong Kong, Italy, Japan, Singapore, South Korea, Spain, the United Kingdom and the United States. With few exceptions, we are no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations for years before 2003.

In the ordinary course of business, there is inherent uncertainty in quantifying our income tax positions. We assess our income tax positions and record tax benefits for all years subject to examination based upon management's evaluation of the facts, circumstances, and information available at the reporting date. It is reasonably possible that a net reduction within a range of \$100 million to \$685 million of unrecognized tax benefits may occur within the next 12 months as a result of additional worldwide uncertain tax positions, the revaluation of current uncertain tax positions arising from developments in examinations, in appeals, in the courts, or the closure of tax statutes. See Note 15, Contingent Liabilities, for discussion regarding uncertain tax positions, included in the above range, related to pending litigation with respect to certain deductions claimed in Germany.

During the quarter, the Company recognized a non-cash benefit of approximately \$58 million, primarily tax, as a result of the closure of the audit by the Examination Division of the Internal Revenue Service of Goodrich Corporation tax years 2011 and 2012 through the date of acquisition by UTC. UTC tax years 2011 and 2012 are currently under review by the Examination Division of the Internal Revenue Service. Completion of that examination is possible within the next 3 to 6 months and could result in related non-cash gains, primarily tax, in the range of \$150 million to \$275 million.

Note 7: Employee Benefit Plans

Pension and Postretirement Plans. We sponsor both funded and unfunded domestic and foreign defined pension and other postretirement benefit plans, and defined contribution plans. Contributions to our plans were as follows:

	Quarter Ended		Nine Months	
	September 30,		Ended	
(Dollars in millions)	2016	2015	2016	2015
Defined benefit plans	\$ 18	\$ 23	\$ 125	\$ 93
Defined contribution plans	79	82	235	264

There were no contributions to our domestic defined benefit pension plans in the quarters and nine months ended September 30, 2016 and 2015. The following table illustrates the components of net periodic benefit cost for our defined pension and other postretirement benefit plans:

	Pension		Other Postretirement Benefits	
	Benefits		Benefits	
(Dollars in millions)	Quarter Ended		Quarter Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Service cost	\$ 96	\$ 124	\$ 1	\$ 1
Interest cost	302	350	9	8
Expected return on plan assets	(554)	(566)	—	—
Amortization of prior service credit	(7)	(3)	—	—
Recognized actuarial net loss (gain)	135	220	(1)	(1)
Net settlement and curtailment loss	3	128	—	—
Total net periodic benefit (income) cost	\$ (25)	\$ 253	\$ 9	\$ 8

Table of Contents

	Pension		Other Postretirement Benefits	
	Benefits		Benefits	
	Nine Months Ended		Nine Months Ended	
	September 30,		September 30,	
(Dollars in millions)	2016	2015	2016	2015
Service cost	\$ 287	\$ 373	\$ 3	\$ 3
Interest cost	908	1,051	25	24
Expected return on plan assets	(1,669)	(1,700)	—	—
Amortization of prior service credit	(22)	(8)	—	—
Recognized actuarial net loss (gain)	406	662	(3)	(3)
Net settlement and curtailment loss	18	137	—	—
Total net periodic benefit (income) cost	\$(72)	\$ 515	\$ 25	\$ 24

Net settlements and curtailment losses for pension benefits include curtailment losses of approximately \$110 million related to, and recorded in, discontinued operations for the quarter and nine months ended September 30, 2015. Total net periodic benefit cost in the table above includes approximately \$25 million and \$74 million related to, and recorded in, discontinued operations for the quarter and nine months ended September 30, 2015, respectively.

In 2015, we changed the approach we use to estimate the service and interest components of net periodic pension cost for our significant pension plans. Historically, we estimated the service and interest cost components utilizing a single weighted-average discount rate derived from the yield curve used to measure the benefit obligation at the beginning of the period. We elected to utilize a full yield curve approach in the estimation of these components by applying the specific spot rates along the yield curve used in determination of the benefit obligation to the relevant projected cash flows. We made this change to provide a more precise measurement of service and interest costs by improving the correlation between projected benefit cash flows to the corresponding spot yield curve rates. This change does not affect the measurement of our total benefit obligations. The discount rates used to measure service cost and interest cost during 2016 are 3.9% and 3.5%, respectively. The previous method would have used a discount rate for both service and interest costs of 4.1%. This change decreases the service and interest cost components of our annual net periodic pension cost by approximately \$215 million for 2016. We have accounted for this change as a change in accounting estimate and, accordingly, have accounted for it prospectively, effective January 1, 2016.

As part of our long-term strategy to de-risk our defined benefit pension plans, we entered into an agreement to purchase a group annuity contract to transfer approximately \$775 million of our outstanding pension benefit obligations related to certain U.S. retirees or beneficiaries, which was finalized on October 12, 2016. We have also offered certain former U.S. employees or beneficiaries with a vested pension benefit an option to take a one-time lump sum distribution in lieu of future monthly pension payments, which is expected to reduce our pension benefit obligations by approximately \$995 million by the end of 2016. These transactions are expected to reduce the assets of our defined benefit pension plans by approximately \$1.5 billion. As a result of these transactions, we expect to recognize a one-time pre-tax pension settlement charge in the range of \$400 million to \$530 million in the fourth quarter of 2016.

Note 8: Restructuring Costs

During the nine months ended September 30, 2016, we recorded net pre-tax restructuring costs totaling \$201 million for new and ongoing restructuring actions. We recorded charges in the segments as follows:

(Dollars in millions)

Otis	\$41
UTC Climate, Controls & Security	71
Pratt & Whitney	50
UTC Aerospace Systems	32
Eliminations and other	7
Total	\$201

Table of Contents

Restructuring charges incurred during the nine months ended September 30, 2016 primarily relate to actions initiated during 2016 and 2015, and were recorded as follows:

(Dollars in millions)

Cost of sales	\$ 110
Selling, general and administrative	65
Other expense	26
Total	\$ 201

2016 Actions. During the nine months ended September 30, 2016, we recorded net pre-tax restructuring costs totaling \$143 million, including \$71 million in cost of sales, \$46 million in selling, general and administrative expenses and \$26 million in other expense. The 2016 actions relate to ongoing cost reduction efforts, including workforce reductions, consolidation of field operations, and costs to exit legacy programs.

We are targeting the majority of the remaining workforce and all facility related cost reduction actions for completion during 2016 and 2017. No specific plans for significant other actions have been finalized at this time. The following table summarizes the accrual balance and utilization for the 2016 restructuring actions for the quarter and nine months ended September 30, 2016:

(Dollars in millions)	Severance	Facility Exit, Lease Termination and Other Costs	Total
Quarter Ended September 30, 2016			
Restructuring accruals at June 30, 2016	\$ 27	\$ 60	\$ 87
Net pre-tax restructuring costs	22	8	30
Utilization and foreign exchange	(12)	(6)	(18)
Balance at September 30, 2016	\$ 37	\$ 62	\$ 99
Nine Months Ended September 30, 2016			
Net pre-tax restructuring costs	\$ 71	\$ 72	\$ 143
Utilization and foreign exchange	(34)	(10)	(44)
Balance at September 30, 2016	\$ 37	\$ 62	\$ 99

The following table summarizes expected, incurred and remaining costs for the 2016 restructuring actions by segment:

(Dollars in millions)	Expected Costs	Costs Incurred Quarter Ended March 31, 2016	Costs Incurred Quarter Ended June 30, 2016	Costs Incurred Quarter Ended September 30, 2016	Remaining Costs at September 30, 2016
Otis	\$ 38	\$ (10)	\$ (13)	\$ (9)	\$ 6
UTC Climate, Controls & Security	53	(13)	(8)	(13)	19
Pratt & Whitney	61	—	(61)	—	—
UTC Aerospace Systems	90	(5)	(3)	(8)	74
Total	\$ 242	\$ (28)	\$ (85)	\$ (30)	\$ 99

2015 Actions. During the nine months ended September 30, 2016, we recorded net pre-tax restructuring costs totaling \$44 million for restructuring actions initiated in 2015, including \$35 million in cost of sales and \$9 million in selling, general and administrative expenses. The 2015 actions relate to ongoing cost reduction efforts, including workforce reductions and the consolidation of field operations. The following table summarizes the accrual balances and utilization for the 2015 restructuring actions for the quarter and nine months ended September 30, 2016:

Table of Contents

(Dollars in millions)	Severance	Facility Exit, Lease Termination and Other Costs	Total
Quarter Ended September 30, 2016			
Restructuring accruals at June 30, 2016	\$ 113	\$ 25	\$138
Net pre-tax restructuring costs	(14)	5	(9)
Utilization and foreign exchange	(36)	(2)	(38)
Balance at September 30, 2016	\$ 63	\$ 28	\$91

Nine Months Ended September 30, 2016			
Restructuring accruals at December 31, 2015	\$ 183	\$ 23	\$206
Net pre-tax restructuring costs	23	21	44
Utilization and foreign exchange	(143)	(16)	(159)
Balance at September 30, 2016	\$ 63	\$ 28	\$91

The following table summarizes expected, incurred and remaining costs for the 2015 restructuring actions by segment:

(Dollars in millions)	Expected Costs	Costs Incurred in 2015	Costs Incurred Quarter Ended March 31, 2016	Costs Incurred Quarter Ended June 30, 2016	(Costs Incurred) Reversals Quarter Ended September 30, 2016	Remaining Costs at September 30, 2016
Otis	\$ 51	\$ (35)	\$ (5)	\$ (5)	\$ (2)	\$ 4
UTC Climate, Controls & Security	195	(83)	(14)	(14)	(5)	79
Pratt & Whitney	59	(82)	(1)	—	24	—
UTC Aerospace Systems	140	(105)	(8)	(4)	(3)	20
Eliminations and other	28	(21)	(1)	(1)	(5)	—
Total	\$ 473	\$ (326)	\$ (29)	\$ (24)	\$ 9	\$ 103

During the quarter ended September 30, 2016, we had reversals of previously accrued restructuring reserves of approximately \$32 million, the majority of which related to a Pratt & Whitney business that was sold in the third quarter of 2016 after originally being scheduled for closure.

2014 and Prior Actions. As of September 30, 2016, we have approximately \$42 million of accrual balances remaining related to 2014 and prior actions.

Note 9: Financial Instruments

We enter into derivative instruments for risk management purposes only, including derivatives designated as hedging instruments under the Derivatives and Hedging Topic of the FASB ASC and those utilized as economic hedges. We operate internationally and, in the normal course of business, are exposed to fluctuations in interest rates, foreign exchange rates and commodity prices. These fluctuations can increase the costs of financing, investing and operating the business. We have used derivative instruments, including swaps, forward contracts and options to manage certain foreign currency, interest rate and commodity price exposures.

The four quarter rolling average of the notional amount of foreign exchange contracts hedging foreign currency transactions was \$18.0 billion and \$15.6 billion at September 30, 2016 and December 31, 2015, respectively.

Table of Contents

The following table summarizes the fair value of derivative instruments as of September 30, 2016 and December 31, 2015 which consist solely of foreign exchange contracts:

(Dollars in millions)	Asset Derivatives		Liability Derivatives	
	September 30, 2016	December 31, 2015	September 30, 2016	December 31, 2015
Derivatives designated as hedging instruments	\$ 30	\$ 4	\$ 130	\$ 428
Derivatives not designated as hedging instruments	71	97	51	105

As discussed in Note 5, we have issued approximately €2.95 billion of Euro-denominated debt, which qualifies as a net investment hedge against our investments in European businesses. As of September 30, 2016, the net investment hedge is deemed to be effective.

The amount of gains and losses related to the Company's derivative financial instruments was as follows:

(Dollars in millions)	Quarter Ended		Nine Months Ended	
	September 30, 2016	September 30, 2015	September 30, 2016	September 30, 2015
(Loss) gain recorded in Accumulated other comprehensive loss	\$ (7)	\$ (152)	\$ 188	\$ (274)
Loss reclassified from Accumulated other comprehensive loss into Product sales (effective portion)	32	64	139	164

Assuming current market conditions continue, a \$53 million pre-tax loss is expected to be reclassified from Accumulated other comprehensive loss into Product sales to reflect the fixed prices obtained from foreign exchange hedging within the next 12 months. At September 30, 2016, all derivative contracts accounted for as cash flow hedges will mature by November 2022.

The effect on the Condensed Consolidated Statement of Operations of foreign exchange contracts not designated as hedging instruments was as follows:

(Dollars in millions)	Quarter Ended		Nine Months Ended	
	September 30, 2016	September 30, 2015	September 30, 2016	September 30, 2015
Gain recognized in Other income, net	\$ 19	\$ 35	\$ 49	\$ 65

We paid \$29 million and received \$147 million from settlements of derivative contracts during the nine months ended September 30, 2016 and 2015, respectively.

Note 10: Fair Value Measurements

In accordance with the provisions of ASC 820, the following tables provide the valuation hierarchy classification of assets and liabilities that are carried at fair value and measured on a recurring and nonrecurring basis in our Condensed Consolidated Balance Sheet as of September 30, 2016 and December 31, 2015:

September 30, 2016 (Dollars in millions)	Total	Level		
		1	2	3
Recurring fair value measurements:				
Available-for-sale securities	\$ 1,005	\$ 1,005	\$ —	\$ —
Derivative assets	101	—	101	—
Derivative liabilities	(181)	—	(181)	—
December 31, 2015 (Dollars in millions)	Total	Level		
		1	2	3
Recurring fair value measurements:				
Available-for-sale securities	\$ 951	\$ 951	\$ —	\$ —
Derivative assets	101	—	101	—
Derivative liabilities	(533)	—	(533)	—

Valuation Techniques. Our available-for-sale securities include equity investments that are traded in active markets, either domestically or internationally, and are measured at fair value using closing stock prices from active markets.

Our derivative assets and liabilities include foreign exchange contracts and commodity derivatives that are measured at fair value using internal models based on observable market inputs such as forward rates, interest rates, our own credit risk and our counterparties' credit risks. As of September 30, 2016, there were no significant transfers in and out of Level 1 and Level 2.

17

Table of Contents

As of September 30, 2016, there has not been any significant impact to the fair value of our derivative liabilities due to our own credit risk. Similarly, there has not been any significant adverse impact to our derivative assets based on our evaluation of our counterparties' credit risks.

The following table provides carrying amounts and fair values of financial instruments that are not carried at fair value in our Condensed Consolidated Balance Sheet at September 30, 2016 and December 31, 2015:

(Dollars in millions)	September 30, 2016		December 31, 2015	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Long-term receivables	\$ 136	\$ 129	\$ 122	\$ 107
Customer financing notes receivable	459	430	403	403
Short-term borrowings	(871)	(871)	(926)	(926)
Long-term debt (excluding capitalized leases)	(21,774)	(24,938)	(19,476)	(21,198)
Long-term liabilities	(427)	(397)	(458)	(419)

The following table provides the valuation hierarchy classification of assets and liabilities that are not carried at fair value in our Condensed Consolidated Balance Sheet as of September 30, 2016:

(Dollars in millions)	Total	Level		
		Level 1	Level 2	Level 3
Long-term receivables	\$ 129	\$ —	—	\$ —
Customer financing notes receivable	430	—	430	—
Short-term borrowings	(871)	—	(780)	(91)
Long-term debt (excluding capitalized leases)	(24,938)	—	(24,752)	(186)
Long-term liabilities	(397)	—	(397)	—

We had commercial aerospace financing and other contractual commitments totaling approximately \$14.5 billion and \$14.6 billion as of September 30, 2016 and December 31, 2015, respectively, related to commercial aircraft and certain contractual rights to provide product on new aircraft platforms. Risks associated with changes in interest rates on these commitments are mitigated by the fact that interest rates are variable during the commitment term, and are set at the date of funding based on current market conditions, the fair value of the underlying collateral and the credit worthiness of the customers. As a result, the fair value of these financings is expected to equal the amounts funded.

Note 11: Long-Term Financing Receivables

Our long-term financing receivables primarily represent balances related to our aerospace businesses, such as long-term trade accounts receivable, leases receivable, and notes receivable. We also have other long-term receivables related to our commercial businesses; however, both the individual and aggregate amounts of those other receivables are not significant.

Long-term trade accounts receivable, including unbilled receivables related to long-term aftermarket contracts, are principally amounts arising from the sale of goods and delivery of services with a contractual maturity date or realization period of greater than one year, and are recognized as "Other assets" in our Condensed Consolidated Balance Sheet. Notes and leases receivable represent notes and lease receivables other than receivables related to operating leases, and are recognized as "Customer financing assets" in our Condensed Consolidated Balance Sheet. The following table summarizes the balance by class of aerospace business related long-term receivables as of September 30, 2016 and December 31, 2015.

(Dollars in millions)	September 30, 2016	December 31, 2015
Long-term trade accounts receivable	\$ 1,079	\$ 903
Notes and leases receivable	336	451
Total long-term receivables	\$ 1,415	\$ 1,354

Customer credit ratings range from customers with an extremely strong capacity to meet financial obligations, to customers whose uncollateralized receivable is in default. There can be no assurance that actual results will not differ from estimates or that consideration of these factors in the future will not result in an increase or decrease to the

allowance for credit losses on long-term receivables. Based upon the customer credit ratings, approximately 11% and 13% of our total long-term receivables were considered to bear high credit risk as of September 30, 2016 and December 31, 2015, respectively.

18

Table of Contents

For long-term trade accounts receivable, we evaluate credit risk and collectability individually to determine if an allowance is necessary. Our long-term receivables reflected in the table above, which include reserves of \$17 million and \$18 million as of September 30, 2016 and December 31, 2015, respectively, are individually evaluated for impairment. At September 30, 2016 and December 31, 2015, we did not have any significant balances that are considered to be delinquent, on non-accrual status, past due 90 days or more, or considered to be not recoverable.

Note 12: Shareowners' Equity and Noncontrolling Interest

A summary of the changes in shareowners' equity and noncontrolling interest comprising total equity for the quarters and nine months ended September 30, 2016 and 2015 is provided below:

(Dollars in millions)	Quarter Ended September 30,			2015		
	2016	2015	Total	2015	2015	Total
	Share-owners' Equity	Non-controlling Interest	Total	Share-owners' Equity	Non-controlling Interest	Total
Equity, beginning of period	\$29,090	\$ 1,558	\$30,648	\$30,377	\$ 1,561	\$31,938
Comprehensive income for the period:

On March 13, 2015, we entered into accelerated share repurchase (ASR) agreements to repurchase an aggregate of \$2.65 billion of our common stock. Under the terms of the ASR agreements, we made the aggregate payments and received an initial delivery of 18.6 million shares of common stock, representing approximately 85% of the shares expected to be repurchased. On July 31, 2015, the shares associated with the remaining portion of the aggregate purchase were settled upon final delivery to us of approximately 4.2 million additional shares of common stock. Including the remaining shares settled on July 31, 2015, the final price under the ASR was \$116.11 per share.

On August 3, 2015, we received approximately \$1.1 billion from the proceeds of the previously disclosed remarketing of our 1.550% junior subordinated notes, which were originally issued as part of our equity units on June 18, 2012, and issued approximately 11.3 million shares of common stock to settle the purchase obligation of the holders of the equity units under the purchase contract entered into at the time of the original issuance of the equity units.

On November 11, 2015, we entered into ASR agreements to repurchase an aggregate of \$6 billion of our common stock utilizing the net after-tax proceeds from the sale of Sikorsky. The ASR agreements provide for the repurchase of our common stock based on the average of the daily volume-weighted average prices of our common stock during the term of such ASR agreements, less a discount and subject to adjustments pursuant to the terms and conditions of the ASR agreements. Under the terms of the ASR agreements, we made the aggregate payments and received an initial delivery of approximately 51.9 million shares of our common stock, representing approximately 85% of the shares expected to be repurchased. The shares associated with the remaining portion of the aggregate purchase price have been settled over six tranches. On January 19, 2016, the shares associated with the remaining portion of the first tranche of the aggregate purchase were settled upon final delivery to us of approximately 2.1 million shares of common stock. On September 14 and 15, 2016, the shares associated with the remaining portion of the remaining five tranches of the aggregate purchase were settled upon final delivery to us of approximately 8 million additional shares of common stock. Including the remaining shares associated with the six tranches settled in 2016, the final price under the November 11, 2015 ASR was \$96.74 per share.

A summary of the changes in each component of accumulated other comprehensive (loss) income, net of tax for the quarters and nine months ended September 30, 2016 and 2015 is provided below:

Balance at September 30, 2015	\$ (2,191)	\$ (5,197)	\$ 287	\$ (287)	\$ (7,388)
Nine Months Ended September 30, 2015					
Balance at December 31, 2014	\$ (1,051)	\$ (5,709)	\$ 308	\$ (209)	\$ (6,661)
Other comprehensive (loss) income before reclassifications, net	(1,139)	104	10	(194)	(1,219)
Amounts reclassified, pre-tax	(1)	651	(56)	164	758
Tax (benefit) expense reclassified	—	(243)	25	(48)	(266)
Balance at September 30, 2015	\$ (2,191)	\$ (5,197)	\$ 287	\$ (287)	\$ (7,388)

Amounts reclassified that relate to our defined benefit pension and postretirement plans include amortization of prior service costs and transition obligations, and actuarial net losses recognized during each period presented. These costs are recorded as components of net periodic pension cost for each period presented (see Note 7 for additional details). All noncontrolling interests with redemption features, such as put options, that are not solely within our control (redeemable noncontrolling interests) are reported in the mezzanine section of the Condensed Consolidated Balance Sheet, between liabilities and equity, at the greater of redemption value or initial carrying value. The increase in the value of redeemable noncontrolling interest in our Condensed Consolidated Balance Sheet as of September 30, 2016

is primarily related to the acquisition of a majority interest in an Italian heating products and services company by UTC Climate, Controls & Security during the quarter ended June 30, 2016.

Table of Contents

Changes in noncontrolling interests that do not result in a change of control, and where there is a difference between fair value and carrying value, are accounted for as equity transactions. For the quarter and nine months ended September 30, 2016, the pro-forma impact on Net income attributable to common shareowners would have been an increase of \$2 million and a decrease of \$4 million, respectively, had the changes been recorded through net income. For the quarter and nine months ended September 30, 2015 the pro-forma impact on Net income attributable to common shareowners would have been an increase of \$1 million and \$12 million, respectively, had the changes been recorded through net income.

Note 13: Variable Interest Entities

Pratt & Whitney holds a 61% net collaboration interest in IAE International Aero Engines AG (IAE), and a 49.5% ownership interest in IAE. IAE's business purpose is to coordinate the design, development, manufacturing and product support of the V2500 jet engine program through involvement with the collaborators. IAE retains limited equity with the primary economics of the V2500 program passed to the participants in the separate collaboration arrangement. As such, we have determined that IAE is a variable interest entity with Pratt & Whitney its primary beneficiary, and IAE has, therefore, been consolidated. The carrying amounts and classification of assets and liabilities for IAE in our Condensed Consolidated Balance Sheet are as follows:

(Dollars in millions)	September 30, 2016	December 31, 2015
Current assets	\$ 2,410	\$ 1,920
Noncurrent assets	1,160	1,102
Total assets	\$ 3,570	\$ 3,022
Current liabilities	\$ 2,222	\$ 1,931
Noncurrent liabilities	1,460	1,355
Total liabilities	\$ 3,682	\$ 3,286

Note 14: Guarantees

We extend a variety of financial, market value and product performance guarantees to third parties. There have been no material changes to guarantees outstanding since December 31, 2015. The changes in the carrying amount of service and product warranties and product performance guarantees for the nine months ended September 30, 2016 and 2015 are as follows:

(Dollars in millions)	2016	2015
Balance as of January 1	\$1,212	\$1,264
Warranties and performance guarantees issued	218	208
Settlements made	(192)	(217)
Other	—	(56)
Balance as of September 30	\$1,238	\$1,199

The amounts above exclude service and product warranties and product performance guarantees related to Sikorsky of approximately \$42 million as of September 30, 2015.

Note 15: Contingent Liabilities

Summarized below are the matters previously described in Note 17 of the Notes to the Consolidated Financial Statements in our 2015 Annual Report, incorporated by reference in our 2015 Form 10-K, updated as applicable. Except as otherwise noted, while we are unable to predict the final outcome, based on information currently available, we do not believe that resolution of any of the following matters will have a material adverse effect upon our competitive position, results of operations, cash flows or financial condition.

Environmental. Our operations are subject to environmental regulation by federal, state and local authorities in the United States and regulatory authorities with jurisdiction over our foreign operations. As described in Note 1 to the Consolidated Financial Statements in our 2015 Annual Report, we have accrued for the costs of environmental remediation activities, including but not limited to investigatory, remediation, operating and maintenance costs and performance guaranties, and periodically reassess these amounts. We believe that the likelihood of incurring losses materially in excess of amounts accrued

is remote. Additional information pertaining to environmental matters is included in Note 1 to the Consolidated Financial Statements in our 2015 Annual Report.

Government. In the ordinary course of business, the Company and its subsidiaries and our properties are subject to regulatory and governmental examinations, information gathering requests, inquiries, investigations and threatened legal actions and proceedings. For example, we are now, and believe that, in light of the current U.S. Government contracting environment, we will continue to be the subject of one or more U.S. Government investigations. Such U.S. Government investigations often take years to complete and could result in administrative, civil or criminal liabilities, including repayments, fines, treble and other damages, forfeitures, restitution or penalties, or could lead to suspension or debarment of U.S. Government contracting or of export privileges. For instance, if we or one of our business units were charged with wrongdoing as a result of any of these investigations or other government investigations (including violations of certain environmental or export laws) the U.S. Government could suspend us from bidding on or receiving awards of new U.S. Government contracts pending the completion of legal proceedings. If convicted or found liable, the U.S. Government could fine and debar us from new U.S. Government contracting for a period generally not to exceed three years. The U.S. Government also reserves the right to debar a contractor from receiving new government contracts for fraudulent, criminal or other seriously improper conduct. The U.S. Government could void any contracts found to be tainted by fraud.

Our contracts with the U.S. Government are also subject to audits. Like many defense contractors, we have received audit reports, which recommend that certain contract prices should be reduced to comply with various government regulations, including because cost or pricing data we submitted in negotiation of the contract prices or cost accounting practices may not have conformed to government regulations, or that certain payments be delayed or withheld. Some of these audit reports involved substantial amounts. We have made voluntary refunds in those cases we believe appropriate, have settled some allegations and continue to litigate certain cases. In addition, we accrue for liabilities associated with those matters that are probable and can be reasonably estimated. The most likely settlement amount to be incurred is accrued based upon a range of estimates. Where no amount within a range of estimates is more likely, then we accrued the minimum amount.

Legal Proceedings.

F100 Engine Litigation

As previously disclosed, the United States Government sued us in 1999 in the United States District Court for the Southern District of Ohio (District Court), claiming that Pratt & Whitney violated the civil False Claims Act and common law. The claims relate to the "Fighter Engine Competition" between Pratt & Whitney's F100 engine and General Electric's F110 engine. The government alleged that it overpaid for F100 engines under contracts awarded by the U.S. Air Force in fiscal years 1985 through 1990 because Pratt & Whitney inflated its estimated costs for some purchased parts and withheld data that would have revealed the overstatements. At trial, which ended in April 2005, the government claimed Pratt & Whitney's liability to be approximately \$624 million. On August 1, 2008, the trial court held that the Air Force had not suffered any actual damages because Pratt & Whitney had made significant price concessions after the alleged overstatements were made. However, the trial court judge found that Pratt & Whitney violated the False Claims Act due to inaccurate statements contained in its 1983 initial engine pricing proposal. In the absence of actual damages, the trial court awarded the government the maximum civil penalty of \$7,090,000, or \$10,000 for each of the 709 invoices Pratt & Whitney submitted in 1989 and later under the contracts. In September 2008, both the government and UTC appealed the decision to the United States Court of Appeals for the Sixth Circuit. In November 2010, the Sixth Circuit affirmed Pratt & Whitney's liability for the civil penalty under the False Claims Act, but remanded the case to the trial court for further proceedings on the issues of False Claims Act damages and common law liability and damages.

On June 18, 2012, the trial court found that Pratt & Whitney had breached obligations imposed by common law based on the same conduct with respect to which the court previously found liability under the False Claims Act. Under the common law claims, the U.S. Air Force seeks damages for events occurring before March 3, 1989, which are not recoverable under the False Claims Act.

On June 17, 2013, the trial court awarded the government approximately \$473 million in damages and penalties, plus prejudgment interest in an amount to be determined. On July 1, 2013, the trial court, after determining the amount of prejudgment interest, entered judgment in favor of the government in the amount of approximately \$664 million. The

trial court also awarded post-judgment interest on the full amount of the judgment to accrue from July 2, 2013, at the federal variable interest rate determined pursuant to 28 U.S.C. § 1961. The judgment included four different components: (1) common law damages of approximately \$109 million; (2) prejudgment interest on common law damages of approximately \$191 million; (3) False Claims Act treble damages of approximately \$357 million; and (4) the civil penalty of approximately \$7 million. The penalty component of the judgment previously was affirmed by the United States Court of Appeals in 2010.

We filed an appeal from the judgment to the United States Court of Appeals for the Sixth Circuit on August 26, 2013. On April 6, 2015, the Sixth Circuit reversed the trial court's decision and vacated the prior damages award, noting that the

government did not prove any damages. The court rejected as a matter of law the evidence submitted by the government on damages and remanded the case to the District Court to decide in the first instance whether the government should have another opportunity to prove that it suffered any actual damages.

On July 17, 2015, the case returned to the District Court, at which time we filed a motion for entry of judgment, seeking a judgment of zero actual damages. The government responded by filing a motion on August 28, 2015, in which it abandoned its claim for actual damages, but sought a judgment of approximately \$85 million, representing (1) disgorgement of UTC's alleged profits in fiscal year 1985, the first year of the multi-year engine competition, (2) prejudgment interest and (3) the approximately \$7 million civil penalty.

On June 2, 2016, the District Court rejected the government's disgorgement calculation, and found that Pratt & Whitney wrongly received \$1,176,619 in profits in fiscal year 1985. On June 22, 2016, the District Court entered a judgment in favor of the government in the amount of \$11,050,790, comprised of \$1,176,619 for profit disgorgement, \$2,784,171 for prejudgment interest, and the civil penalty of \$7,090,000. Neither party appealed the June 2016 decision. Pratt & Whitney paid the judgment in full in the third quarter, and the matter is concluded.

Cost Accounting Standards Claim

By letter dated December 24, 2013, a Divisional Administrative Contracting Officer of the United States Defense Contract Management Agency asserted a claim and demand for payment of approximately \$211 million against Pratt & Whitney. The claim is based on Pratt & Whitney's alleged noncompliance with cost accounting standards from January 1, 2005 to December 31, 2012, due to its method of determining the cost of collaborator parts used in the calculation of material overhead costs for government contracts. On March 18, 2014, Pratt & Whitney filed an appeal to the Armed Services Board of Contract Appeals. Pratt & Whitney's appeal is still pending, and we continue to believe the government's claim is without merit.

German Tax Litigation

As previously disclosed, UTC has been involved in administrative review proceedings with the German Tax Office, which concern approximately €215 million (approximately \$241 million) of tax benefits that we have claimed related to a 1998 reorganization of the corporate structure of Otis operations in Germany. Upon audit, these tax benefits were disallowed by the German Tax Office. UTC estimates interest associated with the aforementioned tax benefits is an additional approximately €118 million (approximately \$133 million). On August 3, 2012, we filed suit in the local German Tax Court (Berlin-Brandenburg). In March 2016, the local German Tax Court dismissed our suit, and we have appealed this decision to the German Federal Tax Court (FTC).

From 2008 to 2014, there was ongoing litigation between the German Government and another taxpayer in a case involving a German tax law relevant to our reorganization. In November 2014, the FTC ruled in favor of the German Government, and against the other taxpayer. In light of the FTC decision in the case involving the other taxpayer, we fully accrued for tax and interest in 2014. In 2015, UTC made tax and interest payments to German tax authorities of €275 million (approximately \$300 million) in order to avoid additional interest accruals pending final resolution of this matter. In the meantime, we continue to vigorously litigate our matter.

Asbestos Matters

As previously reported, like many other industrial companies, we and our subsidiaries have been named as defendants in lawsuits alleging personal injury as a result of exposure to asbestos integrated into certain of our products or business premises. While we have never manufactured asbestos and no longer incorporate it in any currently-manufactured products, certain of our historical products, like those of many other manufacturers, have contained components incorporating asbestos. A substantial majority of these asbestos-related claims have been dismissed without payment or were covered in full or in part by insurance or other forms of indemnity. Additional cases were litigated and settled without any insurance reimbursement. The amounts involved in asbestos related claims were not material individually or in the aggregate in any year.

Our estimated total liability to resolve all pending and unasserted potential future asbestos claims through 2059 is \$378 million and is recorded primarily in Other long-term liabilities on our Condensed Consolidated Balance Sheet as of September 30, 2016. This amount is on a pre-tax basis, not discounted, and excludes the Company's defense fees (which will continue to be expensed by the Company as they are incurred).

In addition, the Company has an insurance recovery receivable for probable asbestos related recoveries of approximately \$106 million, which is included primarily in Other assets on our Condensed Consolidated Balance

Sheet as of September 30, 2016. In calculating this amount, the Company used the estimated asbestos liability for pending and projected future claims and considered the amount of insurance available, allocation methodologies, solvency ratings, creditworthiness, and the contractual terms with each insurer.

The amounts recorded by UTC for asbestos-related claims are based on currently available information and assumptions that we believe are reasonable. Our actual liabilities or insurance recoveries could be higher or lower than those recorded if actual results vary significantly from the assumptions. Key variables in these assumptions include the number and type of new claims to be filed each year, the outcomes or resolution of such claims, the average cost of resolution of each new claim, the resolution of coverage issues with other excess insurance carriers with whom we have not yet achieved settlements, and the solvency risk with respect to our insurance carriers. Other factors that may affect our future liability include uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, reforms that may be made by state and federal courts, and the passage of state or federal tort reform legislation.

Other.

As described in Note 14 of this Form 10-Q and Note 16 to the Consolidated Financial Statements in our 2015 Annual Report, we extend performance and operating cost guarantees beyond our normal warranty and service policies for extended periods on some of our products. We have accrued our estimate of the liability that may result under these guarantees and for service costs that are probable and can be reasonably estimated.

We also have other commitments and contingent liabilities related to legal proceedings, self-insurance programs and matters arising out of the normal course of business. We accrue contingencies based upon a range of possible outcomes. If no amount within this range is a better estimate than any other, then we accrue the minimum amount.

In the ordinary course of business, the Company and its subsidiaries are also routinely defendants in, parties to or otherwise subject to many pending and threatened legal actions, claims, disputes and proceedings. These matters are often based on alleged violations of contract, product liability, warranty, regulatory, environmental, health and safety, employment, intellectual property, tax and other laws. In some of these proceedings, claims for substantial monetary damages are asserted against the Company and its subsidiaries and could result in fines, penalties, compensatory or treble damages or non-monetary relief. We do not believe that these matters will have a material adverse effect upon our competitive position, results of operations, cash flows or financial condition.

Note 16: Segment Financial Data

Our operations are classified into four principal segments: Otis, UTC Climate, Controls & Security, Pratt & Whitney, and UTC Aerospace Systems. The segments are generally based on the management structure of the businesses and the grouping of similar operating companies, where each management organization has general operating autonomy over diversified products and services.

As discussed in Note 2, on November 6, 2015, we completed the sale of Sikorsky to Lockheed Martin Corp. Amounts reported for 2015 in the table below exclude amounts attributable to Sikorsky, which have been reclassified to Discontinued Operations in the accompanying Condensed Consolidated Statements of Operations.

Results for the quarters ended September 30, 2016 and 2015 are as follows:

(Dollars in millions)	Net Sales		Operating Profits		Operating Profit Margins			
	2016	2015	2016	2015	2016	2015

See Note 8 to the Condensed Consolidated Financial Statements for a discussion of restructuring costs included in segment operating results.

Note 17: Accounting Pronouncements

In May 2014, the FASB issued Accounting Standards Update (ASU) 2014-09, "Revenue from Contracts with Customers." In March 2016, the FASB issued ASU 2016-08, "Revenue from Contracts with Customers (Topic 606), Principal versus Agent Considerations (Reporting Revenue Gross versus Net)." The ASU clarifies how an entity should identify the unit of accounting (i.e. the specified good or service) for the principal versus agent evaluation and how it should apply the control principle to certain types of arrangements. In April 2016, the FASB issued ASU 2016-10, "Revenue from Contracts with Customers (Topic 606), Identifying Performance Obligations and Licensing," which clarifies the guidance surrounding licensing arrangements and the identification of performance obligations. In May 2016, the FASB issued ASU 2016-12, "Revenue from Contracts with Customers (Topic 606), Narrow-Scope Improvements and Practical Expedients," which addresses implementation issues raised by stakeholders concerning collectability, noncash consideration, presentation of sales tax, and transition. On August 12, 2015, the FASB issued ASU 2015-14, "Revenue from Contracts with Customers (Topic 606): Deferral of the Effective Date," which delays the effective date of ASU 2014-09 by one year. The new standard is effective for reporting periods beginning after December 15, 2017, and interim periods therein, using either of the following transition methods; (i) a full retrospective adoption reflecting the application of the standard in each prior reporting period, or (ii) a modified retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized through retained earnings at the date of adoption. We are in the process of evaluating the potential revenue implications of the standard change, which may result in changes to our revenue recognition practices including the elimination of the units-of-delivery method for certain U.S. Government programs and the elimination of the completed contract method of accounting.

In January 2016, the FASB issued ASU 2016-01, "Financial Instruments - Overall: Recognition and Measurement of Financial Assets and Financial Liabilities." This ASU modifies how entities measure equity investments and present changes in the fair value of financial liabilities. Upon adoption, investments that do not result in consolidation and are not accounted for under the equity method generally must be carried at fair value, with changes in fair value recognized in net income. The provisions of this ASU are effective for years beginning after December 15, 2017. We are currently evaluating the impact of this ASU.

In February 2016, the FASB issued ASU 2016-02, "Leases (Topic 842)." Under the amendments of this ASU, lessees will be required to recognize the following for all leases (with the exception of short-term leases) at the commencement date; (i) a lease liability, which is a lessee's obligation to make lease payments arising from a lease, measured on a discounted basis; and (ii) a right-of-use asset, which is an asset that represents the lessee's right to use, or control the use of, a specified asset for the lease term. Lessor accounting is largely unchanged under the amendments of this ASU. The provisions of this ASU are effective for years beginning after December 15, 2018. We are currently evaluating the impact of this ASU. We expect the ASU to have a material impact on our assets and liabilities due to the addition of right-of-use assets and lease liabilities, but we do not expect it to have a material impact on our cash flows or results of operations.

In June 2016, the FASB issued ASU 2016-13, "Financial Instruments - Credit Losses (Topic 328): Measurement of Credit Losses on Financial Instruments." This ASU requires that certain financial assets, including those measured at amortized cost basis, be presented at the net amount expected to be collected, utilizing an impairment model known as the current expected credit loss model. In addition, available-for-sale debt securities will no longer use the concept of "other than temporary" when considering credit losses. Under this ASU, entities must use an allowance approach for credit losses on available-for-sale debt securities, and the allowance must be limited to the amount at which a security's fair value is below the amortized cost of the

Table of Contents

asset. The provisions of this ASU are effective for years beginning after December 15, 2019, with early adoption permitted. We are currently evaluating the impact of this ASU.

In August 2016, the FASB issued ASU 2016-15, "Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments." This ASU is intended to reduce diversity in practice in presentation and classification of certain cash receipts and cash payments by providing guidance on eight specific cash flow issues. The provisions of this ASU are effective for years beginning after December 15, 2017, with early adoption permitted. We do not expect this ASU to have a significant impact on our financial statements or disclosures.

Table of Contents

With respect to the unaudited condensed consolidated financial information of UTC for the quarters and nine months ended September 30, 2016 and 2015, PricewaterhouseCoopers LLP (PricewaterhouseCoopers) reported that it has applied limited procedures in accordance with professional standards for a review of such information. However, its report dated October 27, 2016, appearing below, states that the firm did not audit and does not express an opinion on that unaudited condensed consolidated financial information. PricewaterhouseCoopers has not carried out any significant or additional audit tests beyond those that would have been necessary if their report had not been included. Accordingly, the degree of reliance on its report on such information should be restricted in light of the limited nature of the review procedures applied. PricewaterhouseCoopers is not subject to the liability provisions of Section 11 of the Securities Act of 1933, as amended (the Act) for its report on the unaudited condensed consolidated financial information because that report is not a "report" or a "part" of a registration statement prepared or certified by PricewaterhouseCoopers within the meaning of Sections 7 and 11 of the Act.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareowners of United Technologies Corporation:

We have reviewed the accompanying condensed consolidated balance sheet of United Technologies Corporation and its subsidiaries as of September 30, 2016 and the related condensed consolidated statements of operations and condensed consolidated statements of comprehensive income for the three-month and nine-month periods ended September 30, 2016 and 2015 and the condensed consolidated statement of cash flows for the nine-month periods ended September 30, 2016 and 2015. This interim financial information is the responsibility of the Corporation's management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the accompanying condensed consolidated interim financial information for it to be in conformity with accounting principles generally accepted in the United States of America.

We previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet as of December 31, 2015, and the related consolidated statements of operations, of comprehensive income, of cash flows, and of changes in equity for the year then ended (not presented herein), and in our report dated February 11, 2016, which included a paragraph that described the change in classification and presentation of debt issuance costs and deferred income taxes, and the leveling classification of pension assets in 2015, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2015 is fairly stated in all material respects in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

BUSINESS OVERVIEW

We are a global provider of high technology products and services to the building systems and aerospace industries. Our operations for the periods presented herein are classified into four principal business segments: Otis, UTC Climate, Controls & Security, Pratt & Whitney, and UTC Aerospace Systems. Otis and UTC Climate, Controls & Security are referred to as the "commercial businesses," while Pratt & Whitney, and UTC Aerospace Systems are referred to as the "aerospace businesses." On November 6, 2015, we completed the sale of Sikorsky to Lockheed Martin Corp. for approximately \$9.1 billion in cash. The results of operations and the related cash flows of Sikorsky have been reclassified to Discontinued Operations in our Condensed Consolidated Statements of Operations and Cash Flows for all periods presented.

The current status of significant factors affecting our business environment in 2016 is discussed below. For additional discussion, refer to the "Business Overview" section in Management's Discussion and Analysis of Financial Condition and Results of Operations in our 2015 Annual Report, which is incorporated by reference in our 2015 Form 10-K.

General

Our worldwide operations can be affected by industrial, economic and political factors on both a regional and global level. To limit the impact of any one industry, or the economy of any single country on our consolidated operating results, our strategy has been, and continues to be, the maintenance of a balanced and diversified portfolio of businesses. Our operations include original equipment manufacturing (OEM) and extensive related aftermarket parts and services in both our commercial and aerospace businesses. Our business mix also reflects the combination of shorter cycles at UTC Climate, Controls & Security and in our commercial aerospace aftermarket businesses, and longer cycles at Otis and in our aerospace OEM businesses. Our customers include companies in the private sector and governments, and our businesses reflect an extensive geographic diversification that has evolved with the continued globalization of world economies.

The global economy continues to expand in 2016 with world gross domestic product (GDP) growth projected to reach approximately 2.4% reflecting modest growth in the U.S. and Europe and a slowing but still growing economy in China. U.S. GDP growth is forecasted to be 1.4%, reflecting a mixed outlook with an improving housing market and growth in new jobs tempered by lower productivity and lower corporate profits. Although emerging markets have historically led global growth relative to advanced and developing countries, slowing growth rates in China and contraction in Russia and Brazil have tempered growth expectations for emerging markets in 2016 to approximately 3.9%.

In a referendum on June 23, 2016, voters in the United Kingdom (the U.K.) voted in favor of the U.K.'s exiting the European Union (the EU). Since the vote, the pound sterling has weakened significantly, but most financial markets have recovered to the levels prior to the vote. However, the manner in which the U.K. decides to exit the EU could have negative macroeconomic consequences. Our 2015 full year sales in the U.K. were approximately \$2 billion and represented less than 4 percent of our overall sales, and we do not believe the U.K.'s withdrawal from the EU will significantly impact our businesses in the near term.

Our military businesses sales are affected by U.S. Department of Defense budget and spending levels. Total sales to the U.S. Government were \$1.4 billion and \$1.3 billion, or 10% of total UTC sales, in the quarters ended September 30, 2016 and 2015. The defense portion of our aerospace business is affected by changes in market demand and the global political environment. Our participation in long-term production and development programs for the U.S. Government has and is expected to contribute positively to our results in 2016.

Discontinued Operations

On November 6, 2015, we completed the sale of Sikorsky to Lockheed Martin Corp. for approximately \$9.1 billion in cash. As noted above, the results of operations and the related cash flows of Sikorsky have been reclassified to Discontinued Operations in our Condensed Consolidated Statements of Operations, Comprehensive Income and Cash Flows for all periods presented. Proceeds from the sale were used to fund \$6.0 billion of share repurchases through accelerated share repurchase (ASR) agreements entered into on November 11, 2015. In connection with the sale of Sikorsky, we have made tax payments of approximately \$2.5 billion in 2016. We expect remaining tax payments related to the sale of Sikorsky to be less than \$100 million.

Acquisition Activity

Our growth strategy contemplates acquisitions. Our operations and results can be affected by the rate and extent to which appropriate acquisition opportunities are available, acquired businesses are effectively integrated, and anticipated synergies or cost savings are achieved. During the nine months ended September 30, 2016, our investment in business acquisitions was

29

Table of Contents

\$537 million, including debt assumed of \$2 million, which includes the acquisition of a majority interest in an Italian-based heating products and services company by UTC Climate, Controls & Security and a number of small acquisitions primarily in our commercial businesses. We expect cash investment in acquisitions to be approximately \$1 billion in 2016. However, actual acquisition spending may vary depending upon the timing, availability and value of acquisition opportunities.

Other

Government legislation, policies and regulations can have a negative impact on our worldwide operations.

Government regulation of refrigerants and energy efficiency standards, elevator safety codes and fire protection regulations are important to our commercial businesses. Government and market-driven safety and performance regulations, restrictions on aircraft engine noise and emissions, and government procurement practices can impact our aerospace and defense businesses.

Global economic and political conditions, changes in raw material and commodity prices, interest rates, foreign currency exchange rates, energy costs, levels of end market demand in construction, levels of air travel, the financial condition of commercial airlines, and the impact from natural disasters and weather conditions create uncertainties that could impact our earnings outlook for the remainder of 2016. See Part I, Item 1A, "Risk Factors" in our 2015 Form 10-K for further discussion.

CRITICAL ACCOUNTING ESTIMATES

Preparation of our financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, sales and expenses. We believe the most complex and sensitive judgments, because of their significance to the Consolidated Financial Statements, result primarily from the need to make estimates about the effects of matters that are inherently uncertain. Management's Discussion and Analysis of Financial Condition and Results of Operations and Note 1 to the Consolidated Financial Statements in our 2015 Annual Report, incorporated by reference in our 2015 Form 10-K, describe the significant accounting estimates and policies used in preparation of the Consolidated Financial Statements. Actual results in these areas could differ from management's estimates. There have been no significant changes in our critical accounting estimates during the nine months ended September 30, 2016.

RESULTS OF OPERATIONS**Net Sales**

	Quarter Ended September 30,		Nine Months Ended September 30,	
(Dollars in millions)	2016	2015	2016	2015
Net Sales	\$ 14,354	\$ 13,788	\$ 42,585	\$ 41,798

The factors contributing to the total percentage change year-over-year in total net sales for the quarter and nine months ended September 30, 2016 are as follows:

	Quarter Ended September 30, 2016		Nine Months Ended September 30, 2016	
Organic change	5	%	3	%
Foreign currency translation	(1))%	(2))%
Acquisitions and divestitures, net	1	%	1	%
Other	(1))%	—	
Total % Change	4	%	2	%

During the quarter ended September 30, 2016, organic sales growth was driven by Pratt & Whitney (13%) and UTC Aerospace Systems (6%), while Otis and UTC Climate, Controls & Security sales were flat. The organic sales growth at Pratt & Whitney was primarily driven by higher total aftermarket and military OEM sales. The organic sales growth at UTC Aerospace Systems was primarily due to an increase in commercial OEM sales for both legacy and new programs, and commercial aftermarket sales volume. Higher service sales at Otis were offset by a decline in new

equipment sales. Growth in UTC Climate, Controls & Security's residential heating, ventilation and air conditioning (HVAC) sales was offset by a decline in the transport refrigeration business.

During the nine months ended September 30, 2016, organic sales growth at Pratt & Whitney (8%), UTC Aerospace Systems (3%), and Otis (2%), was partially offset by a decline at UTC Climate, Controls & Security (1%). The organic sales growth at Pratt & Whitney primarily reflects higher commercial aftermarket sales. The organic sales growth at UTC Aerospace

Table of Contents

Systems was primarily due to an increase in commercial OEM and aftermarket sales volume. The organic sales growth at Otis was primarily driven by higher service sales in the Americas and Asia and higher new equipment sales in North America partially offset by lower new equipment sales in China. The decline in sales at UTC Climate, Controls & Security was primarily driven by lower container volume in the refrigeration business.

Cost of Products and Services Sold

(Dollars in millions)	Quarter Ended		Nine Months Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Cost of products sold	\$7,522	\$7,114	\$22,542	\$21,952
Percentage of product sales	73.8	% 73.8	% 74.5	% 73.9
Cost of services sold	\$2,820	\$2,686	\$8,195	\$7,826
Percentage of service sales	67.8	% 64.8	% 66.4	% 64.8
Total cost of products and services sold	\$10,342	\$9,800	\$30,737	\$29,778

The factors contributing to the percentage change year-over-year for the quarter and nine months ended September 30, 2016 in total cost of products and services sold are as follows:

	Quarter Ended		Nine Months	
	September 30,		Ended	
	2016		September 30,	
	2016		2016	
Organic change	6	%	4	%
Foreign currency translation	—		(2))%
Acquisitions and divestitures, net	1	%	1	%
Other	(1))%	—	
Total % Change	6	%	3	%

The organic increase in total cost of products and services sold in the quarter and nine months ended September 30, 2016 was driven by the organic sales increase noted above, as well as unfavorable year-over-year contract performance and contract termination benefits and settlements at Pratt & Whitney, an increase in negative engine margin in 2016 relative to 2015 associated with OEM sales mix within Pratt & Whitney, partially offset by the impact of lower commodity costs at UTC Climate, Controls & Security. Foreign exchange fluctuations primarily at Otis and UTC Climate, Controls & Security were neutral for the quarter ended September 30, 2016 and provided a benefit through lower cost of sales of approximately 2% for the nine months ended September 30, 2016.

Gross Margin

(Dollars in millions)	Quarter Ended		Nine Months Ended	
	September 30,		September 30,	
	2016	2015	2016	2015
Gross margin	\$4,012	\$3,988	\$11,848	\$12,020
Percentage of net sales	28.0	% 28.9	% 27.8	% 28.8

The 90 basis point decline in gross margin as a percentage of sales for the quarter ended September 30, 2016 primarily reflects lower gross margin at Pratt & Whitney (80 basis points) driven by unfavorable year-over-year contract performance and contract termination benefits and settlements, and the unfavorable impact of customer contract negotiations.

The 100 basis point decrease in gross margin as a percentage of sales for nine months ended September 30, 2016 is primarily due to lower gross margin at Pratt & Whitney (80 basis points) driven by unfavorable year-over-year contract performance and contract termination benefits and settlements, an increase in negative engine margin, and the unfavorable impact of customer contract negotiations. Gross margin also decreased at UTC Aerospace Systems (20 basis points) driven by unfavorable commercial and military OEM mix. Lower gross margin at Otis resulting from unfavorable pricing, was offset by higher gross margin at UTC Climate, Controls & Security primarily driven by lower commodities cost.

Table of Contents

Research and Development

	Quarter Ended		Nine Months	
	September 30,		September 30,	
(Dollars in millions)	2016	2015	2016	2015
Company-funded	\$582	\$546	\$1,711	\$1,668
Percentage of net sales	4.1 %	4.0 %	4.0 %	4.0 %
Customer-funded	\$350	\$384	\$1,065	\$1,209
Percentage of net sales	2.4 %	2.8 %	2.5 %	2.9 %

Research and development spending is subject to the variable nature of program development schedules, and therefore, year-over-year fluctuations in spending levels are expected. The majority of the company-funded spending is incurred by the aerospace businesses. The year-over-year increase in company-funded research and development (7%) for the quarter ended September 30, 2016 is primarily driven by higher research and development spending at Pratt & Whitney (3%) as development programs progress towards certification, and higher spending at Otis (2%) and UTC Aerospace Systems (1%). Customer-funded research and development declined 9%, primarily at UTC Aerospace Systems (8%) due to lower spend related to several commercial aerospace programs.

The year-over-year increase in company-funded research and development (3%) for the nine months ended September 30, 2016 is primarily driven by higher research and development costs within Pratt & Whitney (3%) as development programs progress towards certification, and higher spending at Otis (2%). These increases were partially offset by lower spend within UTC Aerospace Systems related to several commercial aerospace programs (1%). Customer-funded research and development declined (12%) due primarily to lower spending on U.S.

Government and commercial engine programs at Pratt & Whitney (6%), and lower spend within UTC Aerospace Systems related to several commercial aerospace programs (6%).

We expect company-funded research and development for the full year 2016 to be up slightly from 2015 levels.

Selling, General and Administrative

	Quarter Ended		Nine Months	
	September 30,		September 30,	
(Dollars in millions)	2016	2015	2016	2015
Selling, general and administrative expenses	\$1,390	\$1,359	\$4,204	\$4,261
Percentage of net sales	9.7 %	9.9 %	9.9 %	10.2 %

Selling, general and administrative expenses increased 2% in the quarter ended September 30, 2016 due to higher expenses at Otis (2%) reflecting higher labor and information technology costs; and higher expenses related to recent acquisitions (2%), partially offset by lower pension costs.

Selling, general and administrative expenses declined 1% in the nine months ended September 30, 2016 due to lower pension costs (4%); partially offset by higher expenses at Otis (2%) reflecting higher labor and information technology costs; and higher expenses related to recent acquisitions (1%).

Other Income, Net

	Quarter Ended		Nine Months	
	September 30,		September 30,	
(Dollars in millions)	2016	2015	2016	2015
Other income, net	\$ 211	\$ 219	\$ 600	\$ 808

Other income, net includes equity earnings in unconsolidated entities, royalty income, foreign exchange gains and losses, as well as other ongoing and nonrecurring items. The year-over-year decrease in other income, net (4%) in the quarter ended September 30, 2016 reflects the absence of prior year favorable transactional foreign exchange gains from mark to market adjustments and embedded foreign currency derivatives within certain elevator new equipment contracts (11%), partially offset by higher joint venture income (6%).

The year-over-year decrease in other income, net (26%) in the nine months ended September 30, 2016 reflects the absence of the prior year gains from the remeasurement to fair value of previously held equity interests in UTC Climate, Controls & Security joint venture investments (19%), and the absence of the favorable impact of a prior year contract termination at Pratt & Whitney (4%).

Table of Contents

Interest Expense, Net

(Dollars in millions)	Quarter Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Interest expense	\$252	\$223	\$741	\$707
Interest income	(27)	(39)	(68)	(89)
Interest expense, net	\$225	\$184	\$673	\$618
Average interest expense rate	4.0 %	4.0 %	4.1 %	4.1 %

The increase in interest expense during the quarter and nine months ended September 30, 2016 relative to the prior year is due to additional interest expense on non-U.S. long-term debt issued in February, 2016, partially offset by lower average outstanding U.S. long-term debt balances and related interest expense.

Income Taxes

	Quarter Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Effective tax rate	24.3 %	28.0 %	26.4 %	27.8 %

The decrease in the effective tax rate for the quarter and nine months ended September 30, 2016 primarily reflects the favorable non-cash impact related to the conclusion of a review by the Internal Revenue Service of Goodrich's 2011-2012 tax years through the date of acquisition. Additionally, the lower forecasted effective tax rate for 2016 has also contributed to the decrease in effective tax rate in comparison to 2015.

The decrease in the effective tax rate for the nine months ended September 30, 2016 reflects the items noted above, as well as the absence of the amount recorded in 2015 related to the non-taxable gain recognized on the remeasurement to fair value of a previously held equity interest in a UTC Climate, Controls & Security joint venture.

We estimate our full year 2016 continuing operations annual effective income tax rate to be approximately 28%, excluding restructuring and non-operational nonrecurring items.

Net Income from Continuing Operations Attributable to Common Shareowners

(Dollars in millions, except per share amounts)	Quarter Ended September 30,		Nine Months Ended September 30,	
	2016	2015	2016	2015
Net income from continuing operations attributable to common shareowners	\$1,443	\$1,427	\$4,041	\$4,252
Diluted earnings per share from continuing operations	\$1.74	\$1.61	\$4.86	\$4.76

Net income from continuing operations attributable to common shareowners for the quarter ended September 30, 2016 includes restructuring charges, net of tax benefit, of \$8 million as well as a net charge for significant non-operational and/or nonrecurring items, net of tax, of \$11 million. The effect of restructuring charges and nonrecurring items on diluted earnings per share for the quarter ended September 30, 2016 was \$0.02 per share while the effect of foreign currency translation and hedging generated a favorable impact of \$0.02 per diluted share.

Net income from continuing operations attributable to common shareowners for the quarter ended September 30, 2015 includes restructuring charges, net of tax benefit, of \$52 million. The effect of restructuring charges on diluted earnings per share for the quarter ended September 30, 2015 was \$0.06 per share while the effect of foreign currency translation and hedging generated an unfavorable effect of \$0.05 per diluted share.

Net income from continuing operations attributable to common shareowners for the nine months ended September 30, 2016 includes restructuring charges, net of tax benefit, of \$128 million as well as a net charge for significant non-operational and/or nonrecurring items, net of tax, of \$21 million. The effect of restructuring charges and nonrecurring items on diluted earnings per share for the nine months ended September 30, 2016 was \$0.18 per share. The effect of foreign currency translation and hedging generated a favorable impact of \$0.02 on earnings per diluted

share.

Net income from continuing operations attributable to common shareowners for the nine months ended September 30, 2015 includes restructuring charges, net of tax benefit, of \$140 million as well as a net benefit from significant non-operational and/or nonrecurring items, net of tax, of \$127 million. The effect of restructuring charges on diluted earnings per share for the

33

Table of Contents

nine months ended September 30, 2015 was \$0.15, which was partially offset by a net benefit from significant nonrecurring items of \$0.14 per share. The impact of foreign currency translation and hedging generated an unfavorable effect of \$0.18 per diluted share.

Net Income from Discontinued Operations Attributable to Common Shareowners

	Quarter Ended		Nine Months	
	September 30,		Ended	
(Dollars in millions, except per share amounts)	2016	2015	2016	2015
Net income (loss) from discontinued operations attributable to common shareowners	\$37	\$(65)	\$1	\$78
Diluted earnings (loss) per share from discontinued operations	\$0.04	\$(0.07)	\$—	\$0.09

Net income from discontinued operations attributable to common shareowners for the quarter ended September 30, 2016 reflects approximately \$40 million of income tax benefit, including the impacts related to filing Sikorsky's 2015 tax returns. Net income from discontinued operations attributable to common shareowners for the nine months ended September 30, 2016 reflects the final purchase price adjustment for the sale of Sikorsky, and the net effects of filing Sikorsky's 2015 tax returns. For the quarter and nine months ended September 30, 2015, net income from discontinued operations attributable to common shareowners primarily reflects income from Sikorsky's operations, a reduction to the gain on disposal and additional associated tax expense.

Restructuring Costs

	Nine Months	
	Ended	
(Dollars in millions)	2016	2015
Restructuring costs included within continuing operations	\$201	\$205
Restructuring costs included within discontinued operations	—	139
Restructuring costs	\$201	\$344

Restructuring actions are an essential component of our operating margin improvement efforts and relate to both existing operations and those recently acquired. Charges generally arise from severance related to workforce reductions, facility exit and lease termination costs associated with the consolidation of field and manufacturing operations and costs to exit legacy programs. We expect to incur restructuring costs within continuing operations in 2016 of approximately \$350 million to \$400 million, including trailing costs related to prior actions associated with our continuing cost reduction efforts and the integration of acquisitions. We continue to closely monitor the economic environment and may undertake further restructuring actions to keep our cost structure aligned with the demands of the prevailing market conditions.

2016 Actions. During the nine months ended September 30, 2016, we recorded net pre-tax restructuring charges of \$143 million relating to ongoing cost reduction actions initiated in 2016. We are targeting to complete in 2016 and 2017 the majority of the remaining workforce and facility related cost reduction actions initiated in 2016.

Approximately 80% of the total pre-tax charge will require cash payments, which we have funded and expect to continue to fund with cash generated from operations. During the nine months ended September 30, 2016, we had cash outflows of approximately \$40 million related to the 2016 actions. We expect to incur additional restructuring charges of \$99 million to complete these actions. We expect recurring pre-tax savings in continuing operations to increase over the two-year period subsequent to initiating the actions to approximately \$100 million annually.

2015 Actions. During the nine months ended September 30, 2016 and 2015, we recorded net pre-tax restructuring charges of \$44 million and \$271 million, respectively, for actions initiated in 2015. During the quarter ended September 30, 2016, we had reversals of previously accrued restructuring reserves of approximately \$32 million, the majority of which related to a Pratt & Whitney business that was sold in the third quarter of 2016 after originally being scheduled for closure. We are targeting to complete in 2016 the majority of the remaining workforce and facility related cost reduction actions initiated in 2015. Approximately 63% of the total pre-tax charge will require cash payments, which we have and expect to continue to fund with cash generated from operations. During the nine months ended September 30, 2016, we had cash outflows of approximately \$146 million related to the 2015 actions. We

expect to incur additional restructuring charges of \$103 million to complete these actions. We expect recurring pre-tax savings in continuing operations to increase over the two-year period subsequent to initiating the actions to approximately \$430 million annually, of which, approximately \$224 million was realized during the nine months ended September 30, 2016.

For additional discussion of restructuring, see Note 8 to the Condensed Consolidated Financial Statements.

Table of Contents

Segment Review

Segments are generally based on the management structure of the businesses and the grouping of similar operating companies, where each management organization has general operating autonomy over diversified products and services. We have previously reported the results of Sikorsky within our Aerospace Businesses as a separate reporting segment, but have reclassified Sikorsky's results to discontinued operations for all periods presented, as noted in the "Discontinued Operations" section of our Business Overview in Management's Discussion and Analysis of Financial Condition and Results of Operations. Adjustments to reconcile segment reporting to the consolidated results for the quarters and nine months ended September 30, 2016 and 2015 are included in "Eliminations and other" below, which also includes certain smaller subsidiaries. We attempt to quantify material cited factors within our discussion of the results of each segment whenever those factors are determinable. However, in some instances, the factors we cite within our segment discussion are based upon input measures or qualitative information that does not lend itself to quantification when discussed in the context of the financial results measured on an output basis and are not, therefore, quantified in the below discussions.

Commercial Businesses

Our commercial businesses generally serve customers in the worldwide commercial and residential property industries, and UTC Climate, Controls & Security also serves customers in the commercial and transport refrigeration industries. Sales in the commercial businesses are influenced by a number of external factors, including fluctuations in residential and commercial construction activity, regulatory changes, interest rates, labor costs, foreign currency exchange rates, customer attrition, raw material and energy costs, credit markets and other global and political factors. UTC Climate, Controls & Security's financial performance can also be influenced by production and utilization of transport equipment, and, in the case of its residential business, weather conditions. To ensure adequate supply of products in the distribution channel, UTC Climate, Controls & Security customarily offers its customers incentives to purchase products. The principal incentive program provides reimbursements to distributors for offering promotional pricing on UTC Climate, Controls & Security products. We account for incentive payments made as a reduction to sales.

At constant currency and excluding the effect of acquisitions and divestitures, UTC Climate, Controls & Security equipment orders in the quarter ended September 30, 2016 were flat in comparison to the same period of the prior year as an increase in residential HVAC orders (11%) was offset by declines in the transport refrigeration (8%) and commercial HVAC (2%) businesses. Within the Otis segment, new equipment orders in the quarter increased 2% in comparison to the prior year as order growth in Europe and the Middle East (21%) and the Asia region excluding China (12%) were offset by order declines in China (10%) and the Americas (1%).

Summary performance for each of the commercial businesses for the quarters ended September 30, 2016 and 2015 was as follows:

(Dollars in millions)	Otis			UTC Climate, Controls & Security		
	2016	2015	Change	2016	2015	Change
Net Sales	\$3,018	\$3,043	(1)%	\$ 4,415	\$ 4,279	3 %
Cost of Sales	2,025	2,047	(1)%	3,067	2,948	4 %
	993	996	—	1,348	1,331	1 %
Operating Expenses and Other	409	354	16 %	547	560	(2)%
Operating Profits	\$584	\$642	(9)%	\$ 801	\$ 771	4 %
Operating Profit Margins	19.4%	21.1%	18.1%	18.0%		

Table of Contents

Summary performance for each of the commercial businesses for the nine months ended September 30, 2016 and 2015 was as follows:

(Dollars in millions)	Otis			UTC Climate, Controls & Security		
	2016	2015	Change	2016	2015	Change
Net Sales	\$8,830	\$8,886	(1)%	\$ 12,602	\$ 12,585	—
Cost of Sales	5,972	5,978	—	8,708	8,719	—
	2,858	2,908	(2)%	3,894	3,866	1 %
Operating Expenses and Other	1,227	1,112	10 %	1,615	1,543	5 %
Operating Profits	\$1,631	\$1,796	(9)%	\$ 2,279	\$ 2,323	(2)%
Operating Profit Margins	18.5 %	20.2 %	18.1 %	18.5 %		

Otis –

Quarter Ended September 30, 2016 Compared with Quarter Ended September 30, 2015

Factors Contributing to Total % Change

	Organic / Operational	FX Translation	Acquisitions / Divestitures, net	Restructuring Costs	Other
Net Sales	—	(1)%	—	—	—
Cost of Sales	—	(1)%	—	—	—
Operating Profits	(11)%	(1)%	—	1 %	2 %

Organic sales were flat for the quarter as higher service sales (1%), driven by growth in the Americas and Asia, were offset by a decline in new equipment sales (1%). The new equipment sales decline was driven by China (3%), partially offset by growth in North America (2%).

The operational profit decrease of 11% was driven by unfavorable price and mix (13%) primarily in China and Europe; the absence of prior year favorable transactional foreign exchange gains from mark to market adjustments and embedded foreign currency derivatives within certain new equipment contracts (4%); and higher research and development spending (2%). These decreases were partially offset by favorable productivity and commodity costs and profit contribution from higher service sales volume.

Nine Months Ended September 30, 2016 Compared with Nine Months Ended September 30, 2015

Factors Contributing to Total % Change

	Organic / Operational	FX Translation	Acquisitions / Divestitures, net	Restructuring Costs	Other
Net Sales	2 %	(3)%	—	—	—
Cost of Sales	3 %	(3)%	—	—	—
Operating Profits	(7)%	(2)%	—	(1)%	1 %

The organic sales increase of 2% primarily reflects higher service sales (1%), driven by growth in the Americas and Asia, and new equipment sales growth (1%). The growth in new equipment sales was driven by growth in North America (2%), partially offset by a decline in China (2%).

The operational profit decrease of 7% was driven by unfavorable price and mix (10%), primarily in China and Europe; the absence of prior year favorable transactional foreign exchange gains from mark to market adjustments and embedded foreign currency derivatives within certain new equipment contracts (2%); and higher research and development spending (1%); partially offset by higher volume (4%) and favorable productivity and commodity costs (combined 3%).

Table of Contents

UTC Climate, Controls & Security –

Quarter Ended September 30, 2016 Compared with Quarter Ended September 30, 2015

Factors Contributing to Total % Change

	Organic	FX	Acquisitions /	Restructuring	Other
	/	Translation	Divestitures, net	Costs	
	Operational				
Net Sales	—	(1)%	4%	—	—
Cost of Sales	—	(1)%	5%	—	—
Operating Profits	5%	(1)%	—	—	—

Organic sales were flat in the quarter as growth in North America residential HVAC (1%) was offset by a decline in the transport refrigeration business (1%) and a decline in commercial HVAC sales in the Middle East (1%).

The 5% operational profit increase was driven by net restructuring and productivity savings (combined 3%) and lower commodities cost net of pricing (combined 2%).

Nine Months Ended September 30, 2016 Compared with Nine Months Ended September 30, 2015

Factors Contributing to Total % Change

	Organic	FX	Acquisitions /	Restructuring	Other
	/	Translation	Divestitures, net	Costs	
	Operational				
Net Sales	(1)%	(1)%	2%	—	—
Cost of Sales	(2)%	(1)%	3%	—	—
Operating Profits	7%	(3)%	—	—	(6)%

Organic sales decreased by 1% primarily driven by a decline in the transport refrigeration business (1%) due to lower container volume.

The 7% operational profit increase was driven by lower commodities cost (5%), and productivity and restructuring savings (combined 4%), partly offset by the impact of lower sales volume and adverse sales mix (combined 3%). The 6% decrease in "Other" is driven by the absence of a prior year gain as a result of a fair value adjustment related to acquisitions of a controlling interest in joint venture investments (6%), and a gain on a property sale (1%). "Other" also includes current year gains related to the acquisition of a controlling interest in a joint venture investment in the Middle East and from the sale of an investment in Australia (combined 1%), which were offset by a prior year gain from an acquisition of a controlling interest in another joint venture investment.

Aerospace Businesses

The aerospace businesses serve both commercial and government aerospace customers. Revenue passenger miles (RPMs), U.S. Government military and space spending, and the general economic health of airline carriers are all barometers for our aerospace businesses. Performance in the general aviation sector is closely tied to the overall health of the economy and is positively correlated to corporate profits.

We continue to see growth in a strong commercial airline industry which is benefiting from traffic growth and lower fuel costs. Airline traffic, as measured by RPMs, grew approximately 5% in the first eight months of 2016, while jet fuel costs have declined approximately 10% relative to prices one year ago.

Our commercial aftermarket businesses continue to evolve as an increasing proportion of our aerospace businesses' customers are covered under Fleet Management Programs (FMPs). FMPs are comprehensive long-term spare part and service agreements with our customers. We expect a continued shift to FMPs in lieu of transactional spare part sales as new engines enter our customers' fleets on FMPs and legacy fleets are retired. For the first nine months of 2016, as compared with 2015, commercial aerospace aftermarket sales increased 15% at Pratt & Whitney and 2% at UTC Aerospace Systems.

We record changes in contract estimates using the cumulative catch-up method in accordance with the Revenue Recognition Topic of the FASB ASC. Operating profit in the quarter and nine months ended September 30, 2016 included significant net unfavorable changes in aerospace contract estimates of \$24 million and \$20 million, respectively, primarily representing unfavorable contract adjustments recorded at Pratt & Whitney. Operating profit in the quarter and nine months ended September 30, 2016 also includes a charge provided for ongoing customer contract

negotiations at Pratt & Whitney. The amount recorded may be subject to change as negotiations progress.

37

Table of Contents

As previously disclosed, Pratt & Whitney's PurePower PW1500G engine models have been selected by Bombardier to power the new CSeries passenger aircraft, which entered into service on July 15, 2016. There have been multi-year delays in the development of the CSeries aircraft. Notwithstanding these delays, Bombardier reports that they have received over 300 orders for the aircraft, have certified the initial aircraft model and expect to close the certification process for all aircraft models in 2016. We have made various investments in support of the production and delivery of our PW1500G engines and systems for the CSeries program, which we currently expect to recover through future deliveries of PW1500G powered CSeries aircraft. We will continue to monitor the progress of the program and our ability to recover our investments.

Summary performance for each of the aerospace businesses for the quarters ended September 30, 2016 and 2015 was as follows:

(Dollars in millions)	Pratt & Whitney			UTC Aerospace Systems		
	2016	2015	Change	2016	2015	Change
Net Sales	\$3,501	\$3,234	8 %	\$3,646	\$3,457	5 %

	2,234	2,370	(6)%	2,891	2,898	—
Operating Expenses & Other	1,098	1,045	5 %	1,171	1,177	(1)%
Operating Profits	\$1,136	\$1,325	(14)%	\$1,720	\$1,721	—
Operating Profit Margins	10.4%	12.9%	15.8%	16.2%		

Pratt & Whitney –

Quarter Ended September 30, 2016 Compared with Quarter Ended September 30, 2015

Factors Contributing to Total % Change

	Organic / Operational	FX Translation*	Acquisitions / Divestitures, net	Restructuring Costs	Other
Net Sales	13 %	1 %	—	—	(6)%
Cost of Sales	18 %	—	—	(1)%	(4)%
Operating Profits	(17)%	6 %	—	10 %	(18)%

The organic sales increase of 13% primarily reflects higher commercial aftermarket sales (5%), military engine sales (4%) and military aftermarket sales (3%). Included in the sales increase is the absence of prior year startup challenges related to the transition to a third-party material logistics center that delayed some large engine shipments during the third quarter of 2015. "Other" primarily reflects a sales reduction recorded in connection with provisions established for ongoing customer contract negotiations (6%).

Pratt & Whitney's operating profit includes lower pension cost and restructuring savings across its businesses. The operational profit decrease (17%) was primarily due to unfavorable year-over-year contract performance, contract termination benefits and contract settlements (27%), lower commercial engines profit contribution driven by unfavorable engine mix (15%), higher research and development spending (5%) and the absence of prior year licensing arrangements (5%). These decreases were partially offset by profit contribution from strong commercial aftermarket volume (23%), higher military aftermarket volume (7%) and higher military engines volume partially

offset by unfavorable mix (5%). “Other” primarily reflects a charge

38

Table of Contents

provided for ongoing customer contract negotiations (23%), partially offset by the benefit of licensing certain intellectual property rights during the quarter (5%).

Nine Months Ended September 30, 2016 Compared with Nine Months Ended September 30, 2015

	Factors Contributing to Total % Change				
	Organic	FX	Acquisitions /	Restructuring	Other
	/	Translation*	Divestitures, net	Costs	
	Operational				
Net Sales	8 %	—	—	—	(2)%
Cost of Sales	12 %	(1)%	—	—	(1)%
Operating Profits	(11)%	4 %	—	(1)%	(6)%

* For Pratt & Whitney only, the transactional impact of foreign exchange hedging at Pratt & Whitney Canada has been netted against the translational foreign exchange impact for presentation purposes in the above tables. For all other segments, these foreign exchange transactional impacts are included within the organic/operational caption in their respective tables. Due to its potential significance to Pratt & Whitney's overall operating results, we believe it is useful to segregate the foreign exchange transactional impact in order to clearly identify the underlying financial performance.

The organic sales increase of 8% primarily reflects higher commercial aftermarket sales (7%), military engine and aftermarket sales (2%), partially offset by unfavorable commercial engine sales mix (1%). Included in the sales increase is the absence of prior year startup challenges related to the transition to a third-party material logistics center that delayed some large engine shipments during the third quarter of 2015.

The operational profit decrease (11%) was primarily due to lower profit contribution from large commercial engines driven by unfavorable engine mix (14%), unfavorable year-over-year contract performance, contract termination benefits and contract settlements (13%), lower engine volume at Pratt Canada (9%), higher research and development spending (4%), and the absence of prior year licensing arrangements (2%). These decreases were partially offset by strong commercial aftermarket volume (26%), sales of legacy hardware (3%), and the profit contribution from higher military aftermarket sales (2%). "Other" primarily reflects a charge provided for ongoing customer contract negotiations (7%).

UTC Aerospace Systems –

Quarter Ended September 30, 2016 Compared with Quarter Ended September 30, 2015

	Factors Contributing to Total % Change				
	Organic	FX	Acquisitions /	Restructuring	Other
	/	Translation	Divestitures, net	Costs	
	Operational				
Net Sales	6 %	(1)%	—	—	—
Cost of Sales	6 %	—	—	—	—
Operating Profits	(2)%	2 %	(1)%	1 %	5 %

The organic sales growth of 6% primarily reflects an increase in commercial OEM sales for both legacy and new programs, and commercial aftermarket sales volume (combined, 9%), partially offset by lower military OEM and aftermarket sales volume (2%) and the absence of the favorable impact of a prior year contract termination (1%).

The operational profit decrease of 2% primarily reflects the absence of the favorable impact from a prior year contract termination benefit (7%), prior year sales to a third party aftermarket parts company (4%), and a prior year settlement (3%). The decrease also reflects lower military OEM and aftermarket profit contribution (3%), primarily driven by lower sales volume, and lower income from licensing agreements (3%). These declines were partially offset by higher commercial aerospace OEM and aftermarket profit contribution (13%), and lower pension costs (6%). The 5% increase in "Other" primarily reflects gains recognized on the sale of non-core assets.

Nine Months Ended September 30, 2016 Compared with Nine Months Ended September 30, 2015

	Factors Contributing to Total % Change			
	FX	Acquisitions /	Restructuring	Other

	Organizational	Translation	Divestitures, net	Costs		
	/

Net Sales	3	%	(1)	%	—
Cost of Sales	4	%	(1)	%	—
Operating Profits	(3)	%	1		%	—
						2 %

Table of Contents

The organic sales growth of 3% primarily reflects an increase in commercial OEM and aftermarket sales volume (5%), partially offset by lower military OEM and aftermarket sales volume (2%).

The operational profit decrease of 3% primarily reflects lower military profit contribution (5%) driven primarily by lower sales volume, and the absence of the favorable impact from prior year customer contract negotiations, dispute resolutions and other settlements (5%), a prior year contract termination benefit (2%), and prior year sales to a third party aftermarket parts company (1%). These declines were partially offset by lower pension costs (6%), higher net commercial OEM and aftermarket profit contribution (2%), and lower research and development costs (1%).

Eliminations and other –

	Net Sales		Operating Profits

	Ended		Ended	
(Dollars in millions)	September 30,		September 30,	
	2016	2015	2016	2015
Eliminations and other	\$(616)	\$(553)	\$ 47	\$ 65
General corporate expenses	—	—	(280)	(331)

Eliminations and other reflects the elimination of sales, other income and operating profit transacted between segments, as well as the operating results of certain smaller businesses. The year-over-year increase in the amount of sales eliminations for the nine months ended September 30, 2016, as compared with the same period of 2015, reflects an increase in the amount of inter-segment sales eliminations, principally between our aerospace businesses. The year-over-year decline in operating profit for the nine months ended September 30, 2016 as compared with the same period of 2015, reflects a decrease in royalty income. The year-over-year decline in general corporate expenses for the nine months ended September 30, 2016, as compared with the same period in 2015, primarily reflects lower expenses related to salaries, wages and employee benefits.

LIQUIDITY AND FINANCIAL CONDITION

(Dollars in millions)	September 30,	December 31,	September 30,
	2016	2015	2015
Cash and cash equivalents	\$ 7,107	\$ 7,075	\$ 5,477
Total debt	22,665	20,425	22,667
Net debt (total debt less cash and cash equivalents)	15,558	13,350	17,190
Total equity	30,764	28,844	32,051
Total capitalization (debt plus equity)	53,429	49,269	54,718
Net capitalization (debt plus equity less cash and cash equivalents)	46,322	42,194	49,241
Debt to total capitalization	42%	41%	41%
Net debt to net capitalization	34%	32%	35%

We assess our liquidity in terms of our ability to generate cash to fund our operating, investing and financing activities. Our principal source of liquidity is operating cash flows of continuing operations, which, after netting out capital expenditures, we generally target to approximate net income from continuing operations attributable to common shareowners. For 2016, we expect this to approximate 90% to 100% of net income from continuing operations attributable to common shareowners. In addition to operating cash flows, other significant factors that affect our overall management of liquidity include: capital expenditures, customer financing requirements, investments in businesses, dividends, common stock repurchases, pension funding, access to the commercial paper

markets, adequacy of available bank lines of credit, redemptions of debt, and the ability to attract long-term capital at satisfactory terms.

As part of our long-term strategy to de-risk our defined benefit pension plans, we entered into an agreement to purchase a group annuity contract to transfer approximately \$775 million of our outstanding pension benefit obligations related to certain U.S. retirees or beneficiaries, which was finalized on October 12, 2016. We have also offered certain former U.S. employees or beneficiaries with a vested pension benefit an option to take a one-time lump sum distribution in lieu of future monthly pension

Table of Contents

payments, which is expected to reduce our pension benefit obligations by approximately \$995 million by the end of 2016. These transactions are expected to reduce the assets of our defined benefit pension plans by approximately \$1.5 billion. As a result of these transactions, we expect to recognize a one-time pre-tax pension settlement charge in the range of \$400 million to \$530 million in the fourth quarter of 2016. See Note 7 to the Condensed Consolidated Financial Statements for further discussion.

Our domestic pension funds experienced a positive return on assets of 9.57% during the first nine months of 2016. Approximately 88% of these domestic pension plans' funds are invested in readily-liquid investments, including equity, fixed income, asset-backed receivables and structured products. The balance of these domestic pension plans' funds (12%) is invested in less-liquid but market-valued investments, including real estate and private equity. Across our global pension plans, the impact of higher discount rates for pension obligations, a change in the manner of estimating discount rates for service cost and interest cost and the continued recognition of prior pension investment gains, partially offset by a reduction in the expected return on plan assets and 2015 actual returns on plan assets, will result in decreased pension expense in 2016 of approximately \$500 million as compared to 2015, excluding the expected one-time pre-tax pension settlement charge discussed above. The \$500 million decreased pension expense includes a \$215 million decrease as a result of the change in approach to estimating the service and interest components of net periodic pension cost for our significant pension plans, as more fully discussed in Note 7.

Historically, our strong debt ratings and financial position have enabled us to issue long-term debt at favorable market rates. Our ability to obtain debt financing at comparable risk-based interest rates is partly a function of our existing debt-to-total-capitalization level as well as our credit standing. Our debt-to-total-capitalization increased to 42% at September 30, 2016, primarily reflecting additional borrowings in 2015 and 2016 to fund share repurchases. The average maturity of our long-term debt at September 30, 2016 is approximately eleven years. We use our commercial paper borrowings for general corporate purposes, including the funding of potential acquisitions, debt refinancing, and repurchases of our common stock. The need for commercial paper borrowings arises when the use of domestic cash for acquisitions, dividends, and share repurchases exceeds the sum of domestic cash generation and foreign cash repatriated to the U.S.

At September 30, 2016, we had revolving credit agreements with various banks permitting aggregate borrowings of up to \$4.35 billion pursuant to a \$2.20 billion revolving credit agreement and a \$2.15 billion multicurrency revolving credit agreement, both of which expire in August 2021. As of September 30, 2016, there were no borrowings under these revolving credit agreements. The undrawn portions of these revolving credit agreements are also available to serve as backup facilities for the issuance of commercial paper. As of September 30, 2016, our maximum commercial paper borrowing limit was \$4.35 billion.

On February 22, 2016, we issued €950 million aggregate principal amount of 1.125% notes due 2021, €500 million aggregate principal amount of 1.875% notes due 2026 and €750 million aggregate principal amount of floating rate notes due 2018. The net proceeds from these debt issuances were used for general corporate purposes.

On May 4, 2015, we completed the previously announced optional remarketing of the 1.550% junior subordinated notes, which were originally issued as part of our equity units on June 18, 2012. As a result of the remarketing, these notes were redesignated as our 1.778% junior subordinated notes due May 4, 2018. On August 3, 2015, we received approximately \$1.1 billion from the proceeds of the remarketing, and issued approximately 11.3 million shares of Common Stock to settle the purchase obligation of the holders of the equity units under the purchase contract entered into at the time of the original issuance of the equity units.

On March 13, 2015, we entered into ASR agreements to repurchase an aggregate of \$2.65 billion of our common stock, which was largely funded by our commercial paper borrowings. Under the terms of the ASR agreements, we made the aggregate payments and received an initial delivery of approximately 18.6 million shares of our common stock, representing approximately 85% of the shares expected to be repurchased. On July 31, 2015, the shares associated with the remaining portion of the aggregate purchase were settled upon final delivery to us of approximately 4.2 million additional shares of common stock.

On November 6, 2015, we completed the sale of Sikorsky to Lockheed Martin Corp. for approximately \$9.1 billion in cash. In connection with the sale of Sikorsky, we have made tax payments of approximately \$2.5 billion in 2016. We expect remaining tax payments related to the sale of Sikorsky to be less than \$100 million.

On November 11, 2015, we entered into ASR agreements to repurchase an aggregate of \$6 billion of our common stock utilizing the net after-tax proceeds from the sale of Sikorsky. The ASR agreements provide for the repurchase of our common stock based on the average of the daily volume-weighted average prices of our common stock during the term of such ASR agreements, less a discount and subject to adjustments pursuant to the terms and conditions of the ASR agreements. Under the terms of the ASR agreements, we made the aggregate payments and received an initial delivery of approximately 51.9 million shares of our common stock, representing approximately 85% of the shares expected to be repurchased. The shares associated

Table of Contents

with the remaining portion of the aggregate purchase price have been settled over six tranches. In January 2016, the shares associated with the remaining portion of the first tranche of the aggregate purchase were settled upon final delivery to us of approximately 2.1 million shares of common stock. In September 2016, the shares associated with the remaining portion of the remaining five tranches of the aggregate purchase were settled upon final delivery to us of approximately 8.0 million additional shares of common stock.

At September 30, 2016, approximately 89% of our cash was held by UTC's foreign subsidiaries, due to our extensive international operations. We manage our worldwide cash requirements by reviewing available funds among the many subsidiaries through which we conduct our business and the cost effectiveness with which those funds can be accessed. The repatriation of cash balances from certain of our subsidiaries could have adverse tax consequences or be subject to capital controls; however, those balances are generally available without legal restrictions to fund ordinary business operations. With few exceptions, U.S. income taxes have not been provided on undistributed earnings of international subsidiaries. Our intention is to reinvest these earnings permanently or to repatriate the earnings only when it is tax effective to do so.

We continue to be involved in litigation with the German Tax Office in the German Tax Court with respect to certain tax benefits that we have claimed related to a 1998 reorganization of the corporate structure of Otis operations in Germany. We made tax and interest payments of approximately \$300 million during the nine months ended September 30, 2015, to avoid additional interest accruals while we continue to litigate this matter. We do not expect to make significant additional tax or interest payments pending final resolution of this matter. See Note 15 to the Condensed Consolidated Financial Statements for a further discussion of this German tax litigation.

On occasion, we are required to maintain cash deposits with certain banks with respect to contractual obligations related to acquisitions or divestitures or other legal obligations. As of September 30, 2016 and December 31, 2015, the amount of such restricted cash was approximately \$26 million and \$45 million, respectively.

We believe our future operating cash flows will be sufficient to meet our future operating cash needs. Further, our ability to obtain debt or equity financing, as well as the availability under committed credit lines, provides additional potential sources of liquidity should they be required or appropriate.

Cash Flow - Operating Activities of Continuing Operations

	Nine Months Ended September 30,	
(Dollars in millions)	2016	2015
Net cash flows provided by operating activities of continuing operations	\$4,536	\$4,044

Cash generated from operating activities of continuing operations in the nine months ended September 30, 2016 was approximately \$492 million higher than the same period in 2015. Cash outflows for working capital improved by approximately \$935 million in the nine months ended September 30, 2016 over the prior year period, which was partially offset by lower net income (net of noncash charges) of approximately \$333 million, and the first of four annual payments of CAD \$327 million (approximately \$237 million) under the previously disclosed 2015 agreement with federal and provincial Canadian government agencies.

In the nine months ended September 30, 2016, accounts receivable increased approximately \$636 million, primarily in our aerospace businesses due to the growth in commercial aerospace OEM and aftermarket sales in the period.

Factoring activity in the quarter ended September 30, 2016, excluding customer-funded factoring at Pratt & Whitney related to certain extensions of contractual payment terms, was approximately \$375 million higher than the prior year.

Increases in inventories were primarily in our aerospace businesses supporting an increase in customers' platform deliveries and related aftermarket demand, and were partially offset by increased accounts payable at these businesses and increased customer advances at Pratt & Whitney and Otis. Increases in accrued liabilities were driven primarily by higher accruals related to taxes and interest due to the timing of payments.

For the nine months ended September 30, 2015, cash outflows for working capital were primarily driven by increases in inventories and accounts receivable, as well as net liquidations of customer advances primarily in Pratt & Whitney's military programs, partially offset by increases in accounts payable. Inventories increased at Pratt & Whitney and UTC Aerospace Systems supporting an increase in customers' platform deliveries and related aftermarket demand, as

well as due to Pratt & Whitney's transition to a new third-party material logistics center during the third quarter of 2015. Inventories increased at UTC Climate, Controls & Security, primarily in international HVAC and refrigeration markets, and at Otis supporting significant projects in Europe and Asia. Accounts receivable increased primarily in our commercial businesses, driven by the U.S. commercial and residential HVAC business at UTC Climate, Controls & Security and Otis new equipment sales, primarily in North America. Reductions in accrued liabilities primarily relate to liquidation of customer advances and deferred revenues, as

42

Table of Contents

well as payments of approximately \$300 million related to tax and interest accruals on the German tax matter discussed further in Note 15 to the Condensed Consolidated Financial Statements.

The funded status of our defined benefit pension plans is dependent upon many factors, including returns on invested assets, the level of market interest rates and actuarial mortality assumptions. We can contribute cash or UTC shares to our plans at our discretion, subject to applicable regulations. Total cash contributions to our global defined benefit pension plans during the nine months ended September 30, 2016 and 2015 were \$125 million and \$93 million, respectively. Although our domestic pension plans are approximately 84% funded on a projected benefit obligation basis as of September 30, 2016, and we are not required to make additional contributions through the end of 2020, we may elect to make discretionary contributions in 2016. We expect to make total cash contributions of approximately \$200 million to our global defined benefit pension plans in 2016. Contributions to our global defined benefit pension plans in 2016 are expected to meet or exceed the current funding requirements.

Cash Flow - Investing Activities of Continuing Operations

(Dollars in millions)	Nine Months Ended September 30,	
	2016	2015
Net cash flows used in investing activities of continuing operations	\$(1,849)	\$(1,416)

Cash flows used in investing activities of continuing operations for the nine months ended September 30, 2016 and 2015 primarily reflect capital expenditures, cash investments in businesses, and payments related to our collaboration intangible assets and contractual rights to provide product on new aircraft platforms.

During the nine months ended September 30, 2016, our collaboration intangible assets increased by approximately \$301 million, of which \$261 million resulted from payments made under our 2012 agreement to acquire Rolls-Royce's collaboration interest in IAE. Capital expenditures for the nine months ended September 30, 2016 (\$1,043 million) primarily relate to investments in new programs at Pratt & Whitney and UTC Aerospace Systems, as well as new facilities at Pratt & Whitney and UTC Climate, Controls & Security.

Cash investments in businesses in the nine months ended September 30, 2016 (\$535 million) consisted of the acquisition of a majority interest in an Italian heating products and services company by UTC Climate, Controls & Security and a number of small acquisitions, primarily in our commercial businesses. We expect total cash investments for acquisitions in 2016 to be approximately \$1 billion, including acquisitions completed during the nine months ended September 30, 2016. However, actual acquisition spending may vary depending upon the timing, availability and appropriate value of acquisition opportunities.

As discussed in Note 9 to the Condensed Consolidated Financial Statements, we enter into derivative instruments for risk management purposes only, including derivatives designated as hedging instruments under the Derivatives and Hedging Topic of the FASB ASC and those utilized as economic hedges. We operate internationally and, in the normal course of business, are exposed to fluctuations in interest rates, foreign exchange rates and commodity prices. These fluctuations can increase the costs of financing, investing and operating the business. We have used derivative instruments, including swaps, forward contracts and options to manage certain foreign currency, interest rate and commodity price exposures. During the nine months ended September 30, 2016 and 2015, we had net cash payments of approximately \$29 million and net cash receipts of approximately \$147 million, respectively, from the settlement of these derivative instruments.

Customer financing activities were a net use of cash of \$74 million and \$128 million for the nine months ended September 30, 2016 and 2015, respectively. While we expect that 2016 customer financing activity will be a net use of funds, actual funding is subject to usage under existing customer financing commitments during the remainder of the year. We may also arrange for third-party investors to assume a portion of our commitments. We had commercial aerospace financing and other contractual commitments of approximately \$14.5 billion at September 30, 2016 related to commercial aircraft and certain contractual rights to provide product on new aircraft platforms, of which up to \$0.4 billion may be required to be disbursed during the remainder of 2016. We had commercial aerospace financing and other contractual commitments of approximately \$14.6 billion at December 31, 2015.

Cash Flow - Financing Activities of Continuing Operations

	Nine Months Ended September 30,	
(Dollars in millions)	2016	2015
Net cash flows used in financing activities of continuing operations	\$(203)	\$(1,861)

43

Table of Contents

The timing and levels of certain cash flow activities, such as acquisitions and repurchases of our stock, have resulted in the issuance of both long-term and short-term debt, including approximately \$2.3 billion of net long-term debt issuances in the nine months ended September 30, 2016. Commercial paper borrowings and revolving credit facilities provide short-term liquidity to supplement operating cash flows and are used for general corporate purposes, including the funding of potential acquisitions and repurchases of our stock. We had approximately \$780 million of outstanding commercial paper at September 30, 2016.

At September 30, 2016, management had remaining authority to repurchase approximately \$5.3 billion of our common stock under the October 14, 2015 share repurchase program. Under this program, shares may be purchased on the open market, in privately negotiated transactions, under accelerated share repurchase programs, and under plans complying with Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended. We may also reacquire shares outside of the program from time to time in connection with the surrender of shares to cover taxes on vesting of restricted stock. Other than the transactions under the ASR agreements discussed above, we made cash payments of approximately \$528 million to repurchase approximately 5.2 million shares of our common stock during the nine months ended September 30, 2016. We expect 2016 full year share repurchases to be approximately \$2 billion to \$3 billion, which we expect to largely fund through additional borrowings in the fourth quarter of 2016.

During the nine months ended September 30, 2015, we repurchased approximately 14 million shares of our common stock for approximately \$1.35 billion, in addition to the shares repurchased under the \$2.65 billion ASR discussed above. Our share repurchase levels are influenced by various factors, including the level of other investing activities. We paid dividends on common stock of \$0.64 per share in the first quarter of 2016 and \$0.66 per share in both the second and third quarters of 2016, totaling approximately \$1,561 million in the aggregate for the nine months ended September 30, 2016. On October 12, 2016, the Board of Directors declared a dividend of \$0.66 per share payable December 10, 2016 to shareowners of record at the close of business on November 18, 2016.

On April 29, 2016, we renewed our universal shelf registration statement filed with the SEC for an indeterminate amount of debt and equity securities for future issuance, subject to our internal limitations on the amount of debt to be issued under this shelf registration statement.

Cash Flow - Discontinued Operations

(Dollars in millions)	Nine Months Ended September 30,	
	2016	2015
Net cash flows used in discontinued operations	\$(2,480)	\$(366)

Cash flows used in discontinued operations primarily represent cash flows related to Sikorsky. For the nine months ended September 30, 2016, cash flows used in operating activities of discontinued operations primarily reflect the payment of taxes associated with the net gain realized on the sale of Sikorsky to Lockheed Martin Corp. in November 2015.

For the nine months ended September 30, 2015, cash flows used in operating activities of discontinued operations resulted primarily from operating income of approximately \$250 million, which was more than offset by investments in working capital and other net operating assets, primarily through reductions in accounts payable, customer advances and accrued liabilities, and partially offset by reductions in accounts receivable. Cash flows used in investing activities of discontinued operations were driven by capital expenditures of Sikorsky.

Off-Balance Sheet Arrangements and Contractual Obligations

In our 2015 Annual Report, incorporated by reference in our 2015 Form 10-K, we disclosed our off-balance sheet arrangements and contractual obligations. As of September 30, 2016, there have been no material changes to these off-balance sheet arrangements and contractual obligations outside the ordinary course of business.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no significant change in our exposure to market risk during the nine months ended September 30, 2016. For discussion of our exposure to market risk, refer to Part II, Item 7A, "Quantitative and Qualitative Disclosures About Market Risk," contained in our 2015 Form 10-K.

Table of Contents

Item 4. Controls and Procedures

As required by Rule 13a-15 under the Exchange Act, we carried out an evaluation under the supervision and with the participation of our management, including the Chairman, President and Chief Executive Officer (CEO), the Executive Vice President & Chief Financial Officer (CFO) and the Corporate Vice President, Controller (Controller), of the effectiveness of the design and operation of our disclosure controls and procedures as of September 30, 2016. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our CEO, our CFO and our Controller have concluded that, as of September 30, 2016, our disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our CEO, our CFO and our Controller, as appropriate, to allow timely decisions regarding required disclosure.

There has been no change in our internal control over financial reporting during the nine months ended September 30, 2016, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Cautionary Note Concerning Factors That May Affect Future Results

This Form 10-Q contains statements which, to the extent they are not statements of historical or present fact, constitute "forward-looking statements" under the securities laws. From time to time, oral or written forward-looking statements may also be included in other information released to the public. These forward-looking statements are intended to provide management's current expectations or plans for our future operating and financial performance, based on assumptions currently believed to be valid. Forward-looking statements can be identified by the use of words such as "believe," "expect," "expectations," "plans," "strategy," "prospects," "estimate," "project," "target," "anticipate," "will," "should," "see," "guidance," "confident" and other words of similar meaning in connection with a discussion of future operating or financial performance. Forward-looking statements may include, among other things, statements relating to future sales, earnings, cash flow, results of operations, uses of cash, share repurchases and other measures of financial performance or potential future plans, strategies or transactions. All forward-looking statements involve risks, uncertainties and other factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements. For those statements, we claim the protection of the safe harbor for forward-looking statements contained in the U.S. Private Securities Litigation Reform Act of 1995. Such risks, uncertainties and other factors include, without limitation:

- the effect of economic conditions in the industries and markets in which we operate in the U.S. and globally and any changes therein, including financial market conditions, fluctuations in commodity prices, interest rates and foreign currency exchange rates, levels of end market demand in construction and in both the commercial and defense segments of the aerospace industry, levels of air travel, financial condition of commercial airlines, the impact of weather conditions and natural disasters and the financial condition of our customers and suppliers;
- challenges in the development, production, delivery, support, performance and realization of the anticipated benefits of advanced technologies and new products and services;
- future levels of indebtedness and capital spending and research and development spending;
- future availability of credit and factors that may affect such availability, including credit market conditions and our capital structure;
- delays and disruption in delivery of materials and services from suppliers;
- customer- and Company- directed cost reduction efforts and restructuring costs and savings and other consequences thereof;
- the scope, nature, impact or timing of acquisition and divestiture activity, including among other things integration of acquired businesses into our existing businesses and realization of synergies and opportunities for growth and innovation;
- new business opportunities;
- our ability to realize the intended benefits of organizational changes;
- the anticipated benefits of diversification and balance of operations across product lines, regions and industries;
- the timing and scope of future repurchases of our common stock, which may be suspended at any time due to market conditions and the level of other investing activities and uses of cash;
- the outcome of legal proceedings, investigations and other contingencies;
- pension plan assumptions and future contributions;
- the impact of the negotiation of collective bargaining agreements and labor disputes;
- the effect of changes in political conditions in the U.S. and other countries in which we operate, including but not limited to the effect of the U.K.'s pending withdrawal from the EU, on general market conditions and currency exchange rates in the near term and beyond; and
- the effect of changes in tax, environmental, regulatory (including among other things import/export) and other laws and regulations in the U.S. and other countries in which we operate.

Table of Contents

In addition, this Form 10-Q includes important information as to risks, uncertainties and other factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements. See the "Notes to Consolidated Financial Statements" under the heading "Note 15: Contingent Liabilities," the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" under the headings "Business Overview," "Results of Operations," "Liquidity and Financial Condition," and "Critical Accounting Estimates," and the sections titled "Legal Proceedings" and "Risk Factors" in this Form 10-Q and in our 2015 Annual Report. Additional important information as to these factors is included in our 2015 Annual Report in the section titled "Management's Discussion and Analysis of Financial Condition and Results of Operations" under the headings "Restructuring Costs," "Environmental Matters" and "Governmental Matters" and in our 2015 Form 10-K in the "Business" section under the headings "General," "Description of Business by Segment" and "Other Matters Relating to Our Business as a Whole." The forward-looking statements speak only as of the date of this report or, in the case of any document incorporated by reference, the date of that document. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law. Additional information as to factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements is disclosed from time to time in our other filings with the SEC.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

Export Violations

As previously disclosed, on June 28, 2012, we entered into a four-year Consent Agreement (CA) with the U.S. State Department's Office of Defense Trade Controls Compliance (DTCC) to resolve violations of the U.S. Arms Export Control Act (AECA) and International Traffic in Arms Regulations (ITAR) that we had voluntarily disclosed to DTCC. DTCC officially closed the CA on October 11, 2016.

As previously disclosed, in June 2012, DTCC imposed a partial statutory debarment on P&WC with respect to obtaining new or renewed ITAR license privileges following P&WC's guilty plea to criminal violation of the AECA and ITAR. The debarment does not affect ITAR licenses/authorizations existing at the time of the partial debarment, nor does it extend to programs supporting: (1) the U.S. Government; (2) NATO allies; or (3) "major non-NATO allies" (as defined in the ITAR). P&WC may seek and has received "transaction exception" approvals on a case-by-case basis for new or renewed ITAR licensing in other cases during the period of debarment. In February 2015, P&WC applied for full reinstatement of its ITAR privileges. DTCC's decision on P&WC's application is pending. UTC expects DTCC to terminate the debarment and reinstate P&WC's full ITAR privileges, and we are awaiting formal action.

See Note 15, Contingent Liabilities, for discussion regarding other legal proceedings.

Except as otherwise noted above, there have been no material developments in legal proceedings. For previously reported information about legal proceedings refer to Part I, Item 3, "Legal Proceedings," of our 2015 Form 10-K and Part II, Item 1, "Legal Proceedings," of our 2016 Form 10-Q (Q1) and 2016 Form 10-Q (Q2).

Item 1A. Risk Factors

There have been no material changes in the Company's risk factors from those disclosed in Part I, Item 1A, Risk Factors, in our 2015 Form 10-K.

Table of Contents

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The following table provides information about our purchases during the quarter ended September 30, 2016 of equity securities that are registered by us pursuant to Section 12 of the Exchange Act.

2016	Total Number of Shares Purchased (000's)	Average Price Paid per Share	Total Number of Shares Purchased as Part of a Publicly Announced Program (000's)	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Program (dollars in millions)
July 1 - July 31	—	\$—	—	\$ 5,964
August 1 - August 31	—	—	—	\$ 5,964
September 1 - September 30 *	6,374	101.91	6,374	\$ 5,314
September ASR settlement	8,042	—	8,042	\$ 5,314
Total	14,416	\$101.91	14,416	

* Includes approximately 1.5 million shares, at an average price paid of \$101.84 per share, which were cash-settled in October 2016.

On October 14, 2015, our Board of Directors authorized a share repurchase program for up to \$12 billion of our common stock, replacing the program announced on July 19, 2015. At September 30, 2016, the maximum dollar value of shares that may yet be purchased under this current program was approximately \$5,314 million. Under this program, shares may be purchased on the open market, in privately negotiated transactions, under accelerated share repurchase (ASR) programs and under plans complying with Rules 10b5-1 and 10b-18 under the Securities Exchange Act of 1934, as amended. We may also reacquire shares outside of the program from time to time in connection with the surrender of shares to cover taxes on vesting of restricted stock. No shares were reacquired in transactions outside the program during the quarter ended September 30, 2016.

On November 11, 2015, we entered into ASR agreements to repurchase an aggregate of \$6 billion of our common stock utilizing the net after-tax proceeds from the sale of Sikorsky. The ASR agreements provide for the repurchase of our common stock based on the average of the daily volume-weighted average prices of our common stock during the term of such ASR agreement, less a discount and subject to adjustments pursuant to the terms and conditions of the ASR agreement. Under the terms of the ASR agreements, we made the aggregate payments and received an initial delivery of approximately 51.9 million shares of our common stock, representing approximately 85% of the shares expected to be repurchased. The shares associated with the remaining portion of the aggregate purchase price have been settled over six tranches. In January 2016, the shares associated with the remaining portion of the first tranche of the aggregate purchase were settled upon final delivery to us of approximately 2,078 thousand shares of common stock. In September, 2016, the shares associated with the remaining portion of the remaining five tranches of the aggregate purchase were settled upon final delivery to us of approximately 8,042 thousand additional shares of common stock. Including the remaining shares associated with the six tranches settled in 2016, the final price under the November 11, 2015 ASR was \$96.74 per share.
