CYANOTECH CORPORATION

FORM 10-Q

Explanatory Note Restatement of Financial Information

On December 1, 2006, Cyanotech Corporation (the Company) filed a Current Report on Form 8-K with the Securities and Exchange Commission (SEC) announcing that it would be restating certain consolidated financial statements in amendments to its annual report on Form 10-K/A for the fiscal year ended March 31, 2006. As more fully described in Note 13 to the Consolidated Financial Statements in Form 10-K/A filed February 14, 2007, the Company identified errors in the application of certain accounting practices and procedures. The restatement and filing of Form 10-K/A was primarily the result of the Company's failure to include as a component of inventory cost certain fixed production costs such as depreciation, general insurance and minor compensation cost. All inventories, cost of sales and operating expense balances, as presented in this Form 10-Q, properly reflect the inclusion of these fixed production costs in accordance with Accounting Research Bulletin No. 43. In addition, the restatement and filing of Form 10-K/A also included adjustments for certain Hawaii State Tax Credits and interest income for the years ended March 31, 2004 and 2003, and tax adjustments for the years ended March 31, 2006, 2005, 2004, and 2003, all of which were considered immaterial in prior years. In addition, refundable income taxes were restated for each of the years in the three year period ended March 31, 2006 and the reclassification of certain certificates of deposit from cash to short-term investments in fiscal years 2005 and 2004. These reclassifications had no effect on reported net income (loss) or in cash flow from operations. The foregoing adjustments and reclassifications are, where appropriate, reflected in the comparative restated information presented in this Form 10-Q.

The Company is filing this Form 10-Q for the fiscal quarter ended September 30, 2006. Restated amounts from the consolidated balance sheet, as of March 31, 2006, and the statement of operations and consolidated statement of cash flows for the three and six months ended September 30, 2005 are included in this filing. The Company will not file a Form 10-Q/A for the quarterly period ended September 30, 2005, and the consolidated financial statements and related information contained in that report should no longer be relied upon.

On November 3, 2006, the Company implemented a one for four stock split at which time the share price closed at \$0.43 with 20,934,565 common shares outstanding. As the stock split occurred after the close of the Company's fiscal quarter and prior to the issuance of the financial statements, all share data and per share data in these financial statements and notes to financial statements reflect the effect of the split as if it occurred prior to the end of the current fiscal quarter.

This Form 10-Q should be read in conjunction with the Company's Form 10-K/A for the fiscal year ended March 31, 2006 filed February 14, 2007. Prior period comparative information contained in this Form 10-Q has been restated consistent with the Company's Form 10-K/A and to reflect the Company's one-for-four reverse stock split (see Notes 2 and 3 of Notes to Consolidated Financial Statements included in the Form 10-Q).

The Company did not file Form 10-K/A, for the fiscal years 2005 or 2004, or Form 10-Q/A, for the interim periods affected by the restatement prior to and including December 31, 2005. The consolidated financial statements and related financial information for such periods as previously filed, contain errors and should therefore no longer be relied upon. The related audit reports for the years ended March 31, 2005 and 2004 of KPMG LLP, the Company's independent registered public accounting firm, with respect to those financial statements should also no longer be relied upon.

Potential Delisting of Our Common Stock From Nasdaq Capital Market Trading. See Risk Factors Part II, Item 1A herein.

CYANOTECH CORPORATION
FORM 10-Q
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
As of September 30, 2006
(Unaudited)

1. BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. *These consolidated financial statements and notes should be read in conjunction with the Company's consolidated financial statements contained in the Company's previously filed report on Form 10-K/A for the year ended March 31, 2006.*

The Company consolidates enterprises in which it has a controlling financial interest. The accompanying consolidated financial statements include the accounts of Cyanotech Corporation and its wholly owned subsidiaries, Nutrex Hawaii, Inc. and Cyanotech Japan YK. All significant intercompany balances and transactions have been eliminated in consolidation. While the financial information furnished for the three month and six month period ended September 30, 2006 is unaudited, the statements in this report reflect all material items which, in the opinion of management, are necessary for a fair presentation of the results of operations for the interim periods covered and of the financial condition of the Company at the dates of the consolidated balance sheets. The operating results for the interim period presented are not necessarily indicative of the results that may be expected for the year ending March 31, 2007.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosures of contingent assets and liabilities at the balance sheet date and the reported amounts of revenues and expenses during the period reported. Management reviews these estimates and assumptions periodically and reflects the effect of revisions in the period that they are determined to be necessary. Actual results could differ from those estimates and assumptions.

2. REVERSE STOCK SPLIT

On September 15, 2006 the Company's Board of Directors approved a one-for-four reverse stock split on our outstanding common stock and a proportional decrease in the number of common shares authorized from 30,000,000 to 7,500,000. The reverse stock split was effective on November 3, 2006 at which time the share price closed at \$0.43 with 20,934,565 common shares outstanding. On November 6, 2006, the share price opened at \$1.72 with 5,233,641 common shares outstanding resulting from the reverse stock split with the expectation that most stockholders of common stock will not exchange their shares as such exchange is not mandatory and stockholders may keep the originally issued shares for exchanged value. Fractional shares were paid with cash totaling less than \$1,000. The long term future impact of the reverse stock split on the Company's stock price is uncertain.

The reverse stock split decision by the Board of Directors was taken to bring the outstanding shares of common stock in line with the Company's size and value and to bring the price of such stock into compliance with the Nasdaq listing requirement of at least \$1.00 per share. The Company had been notified by Nasdaq that it was subject to delisting for failure of the stock to trade at \$1.00 per share or above. On November 20, 2006, the Company received a letter from Nasdaq indicating the closing bid price of its common stock had been at \$1.00 per share or greater for at least 10 consecutive business days. Accordingly, the Company regained compliance with Marketplace Rule 4310(c)(4).

As the stock split occurred after the close of the Company's fiscal quarter ended September 30, 2006 and prior to the issuance of these financial statements, all share option data and per share data in these financial statements and notes to financial statements reflect the effects of the stock split as if it occurred for all periods presented. The number of shares used in per share data was determined as if all outstanding shares at September 30, 2006 were exchanged.

3. STOCK-BASED COMPENSATION

Effective April 1, 2006, the Company adopted the provisions of Statement of Financial Accounting Standard No. 123(R) (SFAS No. 123R), Share-Based Payment, for its share-based compensation plans, which is a revision of Statement of Financial Accounting Statement No. 123 Accounting for Stock-Based Compensation. On March 29, 2005, the SEC staff issued Staff Accounting Bulletin No. 107, Share-Based Payment (SAB No. 107), which expressed the SEC staff's views on SFAS No. 123R, but did not modify any of SFAS No. 123R's provisions. SFAS No. 123R requires an entity to measure the cost of employee services

received in

7

exchange for an award. If an award vests or becomes exercisable based on the achievement of a condition other than service, performance or market condition, the award is liability-classified. Liability-classified awards are remeasured to fair value at each balance sheet date until the award is settled. Equity-classified awards, including grants of employee stock options, are measured at the grant-date fair value of the award and are not subsequently remeasured. The cost of equity-classified awards is recognized in the income statement over the period during which an employee is required to provide the service in exchange for the award. In the Company's case, all of the Company's stock options are equity-classified awards.

Under the 2005 Stock Option Plan (the 2005 Plan), 200,000 shares of common stock are reserved for issuance and the plan terminates on August 21, 2015. Under the 2005 Plan, eligible employees and certain independent consultants may be granted options to purchase shares of the Company's Stock. The shares issuable under the 2005 Plan will either be shares of the Company's authorized but previously unissued common stock or shares reacquired by the Company, including shares purchased on the open market. As of September 30, 2006, 195,000 options remained available for grant under the 2005 Plan. Concurrent with the 2005 Plan approval on August 22, 2005, the 1995 Stock Option Plan was terminated except for the outstanding options issued thereunder.

Options under the 2005 Plan are granted, and are vested and exercisable as determined by the Board of Directors or the Stock Option and Compensation Committee of the Board in accordance with the provisions of the 2005 Stock Option Plan. The number of options granted, vesting, exercise, and other conditions are set forth in a Stock Option Agreement evidencing each grant. No option can have a life in excess of ten (10) years. All shares granted in the form of options under the 2005 Plan will reduce, on a share for share basis, the number of shares available for subsequent grants. Option grants which forfeit under the terms of the 2005 Plan will return to the pool of reserved shares and be available for subsequent grants under the terms of the 2005 Plan.

SFAS No. 123R offers several alternatives for implementation, among them the Modified Prospective Method of accounting for compensation costs related to Share Based Payments which the Company has determined to apply. In the Company's case, its employee incentive stock options are plain vanilla as defined by the SEC in SAB No. 107, normally vesting over a five year period and exercisable under the terms of the Company's Stock Plan up to ten years from date of grant. Because the Company's future employee incentive stock options are expected to be plain vanilla, they will be reflected only in Equity and Compensation Expense accounts. The Company has determined that a Black-Scholes-Merton model will be most reflective of the fair value of option grants, consistent with the provisions of SFAS No. 123R and SAB No. 107. Key input and assumptions used to estimate the fair value of stock options include the grant price of the award, the expected option term, volatility of the Company's stock, risk-free rate and the Company's dividend yield. Estimates of fair value are not intended to predict actual future events or the value ultimately realized by employees who receive equity awards and subsequent events are not indicative of the reasonableness of the original estimates of fair value made by the Company.

There is no unrecognized compensation cost related to nonvested stock options as of September 30, 2006. Currently outstanding nonvested options are options that were granted to non-employees and the compensation cost for these options was recognized in prior years operating results. There are no nonvested employee options because, on March 23, 2006, in response to SFAS No. 123R, the Compensation and Stock Option Committee of the Company's Board of Directors approved accelerating the vesting of all outstanding unvested employee incentive stock options under the provisions of APB Opinion No. 25, and related interpretations. Options held by non-employees and directors were not included in the vesting acceleration. The decision to accelerate vesting of all outstanding unvested employee incentive stock options was made to avoid recognizing, pursuant to the Company's April 1, 2006 adoption of SFAS No. 123R, the non-cash compensation cost related to unvested employee incentive stock options. It is estimated that the total future compensation expense that was avoided by accelerating vesting was \$78,000, before tax, based upon the March 23, 2006 acceleration date. A portion of this amount would have impacted the three and six months ended September 30, 2006 had the acceleration not occurred. No options were granted by the Company during the six month period ending September 30, 2006. Had any options been granted, related compensation expense under the provisions of SFAS No. 123R would have been reflected in the Consolidated Statements of Operations.

The Independent Director Stock Option and Stock Grant Plan (the 2004 Plan) has 75,000 shares of common stock reserved for issuance. Under the 2004 Plan, upon election to the Board of Directors, a newly elected non-employee director is granted a ten-year option to purchase 1,000 shares of the Company's common stock at a fair market value on the date of grant. All such options are granted at fair market value on the date of grant. Options granted vest and become exercisable six months from the date of grant. In addition, on the date of each Annual Meeting of Stockholders, each non-employee director continuing in office is automatically granted, without payment, 875 shares of common stock, non-transferable for six months following the date of grant. As of September 30, 2006, 69,500 options remained available for grant under the 2004 Plan. Concurrent with the 2004 Plan approval on August 16, 2004, the 1994 Non-Employee Director Stock Option and Stock Grant Plan was terminated except for the outstanding options issued thereunder.

The following table summarizes the weighted average characteristics of outstanding stock options as of September 30, 2006 for various exercise price ranges:

Edgar Filing: CYANOTECH CORP - Form 10-Q

Range of Exercise Prices	Outstanding Options			Exercisable Options

Edgar Filing: CYANOTECH CORP - Form 10-Q

Nonvested Options	Shares	Weighted Average Grant-Date Fair Value
Nonvested at March 31, 2006	2,953	\$ 3.98
Granted		
Vested		
Forfeited or expired	(1,017)	\$ 4.22
Nonvested at September 30, 2006	1,936	\$ 3.85

Edgar Filing: CYANOTECH CORP - Form 10-Q

Prior to April 1, 2006, as allowed by Statement of Financial Accounting Standards No. 123 (SFAS No. 123), Accounting for Stock-Based Compensation, the Company elected to apply the intrinsic value-based method of accounting for employee based stock options and adopted only the disclosure requirements of SFAS No. 123. The following table illustrates the effect on net loss and net (loss) per common share as if the Company had applied the fair-value method under SFAS No. 123 to its employee stock options for the three and six month comparable period ended September 30, 2005:

Edgar Filing: CYANOTECH CORP - Form 10-Q

	Three Months Ended September 30, 2005 (As Restated)	Six Months Ended September 30, 2005 (As Restated)
Net loss, as reported	\$ (297)	\$ (138)
Deduct stock-based employee compensation		
Expense determined under fair-value method for all awards	(18)	(39)
Pro-forma net loss	\$ (315)	\$ (177)
Basic net loss per common share:		
As reported	\$ (0.06)	\$ (0.03)
Pro-forma	\$ (0.06)	\$ (0.03)
Diluted net loss per common share:		
As reported	\$ (0.06)	\$ (0.03)
Pro-forma	\$ (0.06)	\$ (0.03)

Options were exercised during the six month period ending September 30, 2006. The intrinsic value of options exercised during the six months ended September 30, 2006 was \$1,000. The amount of cash received from option exercises during the six months ended September 30, 2006 was \$3,000. Because qualified employee incentive options were exercised and the Company has significant operating loss carry forwards, there were no tax consequences as a result of option exercises during the six months ended September 30, 2006.

4. INVENTORIES

Inventories are stated at the lower of cost (which approximates first-in, first-out) or market. Market is defined as sales price less cost to dispose and a normal profit margin. Inventories consist of the following (dollars in thousands):

	September 30, 2006	March 31, 2006 (As Restated)
Raw materials	\$ 237	\$ 240
Work in process	309	260
Finished goods	1,507	1,432
Supplies	124	124
	\$ 2,177	\$ 2,056

5. EQUIPMENT AND LEASEHOLD IMPROVEMENTS

Equipment and leasehold improvements are stated at cost. Depreciation and amortization are provided using the straight-line method over the estimated useful lives for equipment and furniture and fixtures, or the shorter of the land lease term or estimated useful lives for leasehold improvements as follows:

Equipment	3 to 10 years
Furniture and fixtures	7 years
Leasehold improvements	10 to 20 years

Edgar Filing: CYANOTECH CORP - Form 10-Q

Equipment and leasehold improvements consist of the following (dollars in thousands):

	September 30, 2006	March 31, 2006 (As Restated)
Equipment	\$ 10,629	\$ 10,461
Leasehold improvements	14,666	14,642
Furniture and fixtures	86	86
	25,381	25,189
Less accumulated depreciation and amortization	(15,977)	(15,327)
Construction in-progress	277	302
Equipment and leasehold improvements, net	\$ 9,681	\$ 10,164

6. TERM LOAN AGREEMENT COVENANTS WAIVER

The Company's long-term debt consists of a Term Loan Agreement (Term Loan) with a lender providing for \$3.5 million in aggregate credit facilities, secured by the Company's assets. The Term Loan contains restrictive covenants. The Company obtained a waiver of the debt covenants that may not be in compliance as a result of the restatement of previously issued financial statements and as related to the untimely submission of its quarterly financial statements for the first quarter ended June, 30, 2006 and the second quarter ended September 30, 2006 (see Note 2).

7. EARNINGS PER SHARE

Basic earnings per share is computed on the basis of the weighted average number of common shares outstanding. Diluted earnings per share is computed on the basis of the weighted average number of common shares outstanding plus the potentially dilutive effect of outstanding stock options and warrants using the treasury stock method and convertible securities using the if-converted method.

Reconciliations between the numerator and the denominator of the basic and diluted earnings per share computations for the three months ended September 30, 2006 and 2005 are as follows (in thousands, except per share amounts):

	Three Months Ended September 30, 2006			Three Months Ended September 30, 2005 (As Restated)		
	Net Loss (Numerator)	Shares (Denominator)	Per Share Amount	Net Loss (Numerator)	Shares (Denominator)	Per Share Amount
Basic net loss per share	\$ (572)	5,234	\$ (0.11)	\$ (297)	5,224	\$ (0.06)
Effect of dilutive securities Common stock options and warrants						
Diluted net loss per share	\$ (572)	5,234	\$ (0.11)	\$ (297)	5,224	\$ (0.06)

Reconciliations between the numerator and the denominator of the basic and diluted earnings per share computations for the six months ended September 30, 2006 and 2005 are as follows (in thousands, except per share amounts):

	Six Months Ended September 30, 2006			Six Months Ended September 30, 2005 (As Restated)		
	Net Loss (Numerator)	Shares (Denominator)	Per Share Amount	Net Loss (Numerator)	Shares (Denominator)	Per Share Amount
Basic net loss per share	\$ (919)	5,233	\$ (0.18)	\$ (138)	5,224	\$ (0.03)
Effect of dilutive securities Common stock options and warrants						
Diluted net loss per share	\$ (919)	5,233	\$ (0.18)	\$ (138)	5,224	\$ (0.03)

Edgar Filing: CYANOTECH CORP - Form 10-Q

The following securities were excluded from the calculation of diluted earnings per share because their effect was antidilutive (in thousands):

	Three Months Ended		Six Months Ended	
	September 30,		September 30,	
	2006	2005	2006	2005
Stock options and warrants	94	130	99	130

8. NEW ACCOUNTING PRONOUNCEMENTS

Edgar Filing: CYANOTECH CORP - Form 10-Q

In November 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 151 (SFAS No. 151) Inventory Costs an Amendment of Accounting Research Bulletin No. 43, Chapter 4 . SFAS No. 151 requires that abnormal amounts of freight, handling costs and wasted material (spoilage) be recognized as current-period charges and fixed production overhead costs be allocated to inventory based on the normal capacity of production facilities. Normal capacity is defined as the production expected to be achieved over a number of periods or seasons under normal circumstances, taking into account the loss of capacity resulting from planned maintenance . Companies will no longer be permitted to capitalize inventory costs on the balance sheet when the production defect rate varies significantly from the expected defect rate. The Company adopted SFAS No. 151 effective April 1, 2006. In accordance with SFAS No. 151 fixed production related costs of \$59,000 or \$0.01 per diluted share were not inventoried for the three months ended September 30, 2006, and fixed production related costs of \$95,000 or \$0.02 per diluted share were not inventoried for the six months ended September 30, 2006. The costs were not inventoried due to production below normal capacity.

In December 2004, the FASB issued SFAS No. 153, Exchange of Nonmonetary Assets, an amendment of APB Opinion No. 29, Accounting for Nonmonetary Transactions . SFAS No. 153 is based on the principle that exchange of nonmonetary assets should be measured based on the fair market value of the assets exchanged. SFAS No. 153 eliminates the exception of nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. SFAS No. 153 is effective for nonmonetary asset exchanges in fiscal periods beginning after June 15, 2005. The Company adopted SFAS No. 153 effective April 1, 2006. Adoption of the provisions of SFAS No. 153 had no material impact on the Company s financial condition, results of operations, or liquidity.

In May 2005, the FASB issued SFAS No. 154, Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3 . SFAS No. 154 requires retrospective application for voluntary changes in accounting principle unless it is impracticable to do so. In addition, indirect effects of a change in accounting principle should be recognized in the period of the accounting change. The Company adopted SFAS No. 154 effective April 1, 2006. Because the impact of adopting the provisions of SFAS No. 154 will be dependent on future events or circumstances, management cannot predict such impact.

In June 2006, the FASB issued FASB Interpretation No. 48 (FIN No. 48), Accounting for Uncertainty in Income Taxes, an interpretation of FASB Statement No. 109 . This interpretation prescribes a more-likely-than-not recognition threshold and measurement attribute (the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement with tax authorities) for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. This interpretation also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN No. 48 is effective for fiscal years beginning after December 15, 2006. The Company will adopt FIN No. 48 on April 1, 2007 and has not yet determined the impact of these provisions on the Company s results of operations, financial condition or liquidity.

In June 2006, the FASB ratified the consensus on Emerging Issues Task Force Issue No. 06-3 (EITF No. 06-3), How Taxes Collected from Customers and Remitted to Governmental Authorities Should Be Presented in the Income Statement . The scope of EITF No. 06-3 includes any tax assessed by a governmental authority that is directly imposed on a revenue-producing transaction between a seller and a customer and may include, but is not limited to, sales, use, value added, Universal Service Fund (USF) contributions and some excise taxes. The Task Force affirmed its conclusion that entities should present these taxes in the income statement on either a gross or a net basis based on their accounting policy, which should be disclosed pursuant to APB Opinion No. 22, Disclosure of Accounting Policies. If such taxes are significant and are presented on a gross basis, the amounts of those taxes should be disclosed. The consensus on EITF No. 06-3 will be effective for interim and annual reporting periods beginning after December 15, 2006. The Company will adopt EITF No. 06-3 on January 1, 2007 and has elected to present these taxes on a gross basis consistent with its accounting policy and historical treatment. For future periods after January 1, 2007, if material, the Company will disclose such taxes.

On September 13, 2006, the SEC issued Staff Accounting Bulletin No. 108 (SAB No. 108), Considering the Effects of Prior Year Misstatements when Quantifying Misstatements of Current Year Financial Statements which expresses the SEC s views regarding

the process of quantifying financial statement misstatements. SAB No. 108 provides guidance on the consideration of the effects of prior year misstatements (misstatements that were not corrected at the end of the prior year) in quantifying current year misstatements for the purpose of a materiality assessment. Common practice in quantifying a misstatement allows for multiple approaches. A misstatement can be based on the amount of the error originating in the current year income statement or be based on the effects of correcting the misstatement existing in the balance sheet at the end of the current year, irrespective of the misstatement's year(s) of origination. Therefore, in quantifying the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements, errors should be measured under each approach and evaluated for materiality. An adjustment would be required when either approach results in quantifying a misstatement that is material, as defined in FASB Concepts Statement No. 2, after considering all relevant quantitative and qualitative factors. SAB No.108 is effective for fiscal years ended after November 15, 2006. Because the impact of adopting the provisions of SAB No. 108 will be dependent on future events or circumstances, management cannot predict such impact.

On September 15, 2006, the FASB issued SFAS No. 157, Fair Value Measurement (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company is evaluating the impact of adopting SFAS 157 on the Company's consolidated financial position, results of operations and cash flows.

9. LISTING STATUS: RESTATEMENT OF PREVIOUSLY ISSUED CONSOLIDATED FINANCIAL STATEMENTS

On December 1, 2006, Cyanotech Corporation filed a Current Report on Form 8-K with the SEC announcing that based on the current findings of its previously announced accounting review, it had determined to restate certain of its previously issued financial statements. Since that time, we completed our accounting review and determined that certain of the errors resulted from deficiencies in our internal control over financial reporting. See Item 4 Controls and Procedures in this Form 10-Q and Item 9A Controls and Procedures in Form 10-K/A filed February 14, 2007. Due to the inventory valuation issues involved and the time and effort required for completion of the restatement reflected in the Form 10-K/A, the Company is delinquent in the filing of this Form 10-Q. On December 18, 2006, the Company received a Determination Letter (the Letter) from the Nasdaq Listing Qualifications Hearings Panel (the Panel). In its letter, the Panel granted, subject to certain conditions, the Company's request for continued listing on the Nasdaq Stock Market. The Panel determined the Company will have until February 20, 2007 to file its late Form 10-Q for the quarter ended June 30, 2006, its Form 10-Q for the quarter ended September 30, 2006, and the Form 10-K/A restatement filed February 14, 2007. The decision represents the full extent of the Panel's authority to grant an exception pursuant to Marketplace Rule 4002(b). The Company has filed an appeal on February 20, 2007 with the Nasdaq Listing and Review Council of the Panel's determination requesting a stay of the delisting of its common stock until February 28, 2007.

Edgar Filing: CYANOTECH CORP - Form 10-Q

The Company's Form 10-K/A for the fiscal years ended March 31, 2006 and 2005 amended and restated the:

- (1) consolidated balance sheets as of March 31, 2006 and 2005;
- (2) consolidated statements of operations, stockholder's equity and comprehensive income (loss) and cash flows for

each of the years in the three year period ended March 31, 2006;

- (3) accumulated deficit as of March 31, 2003;

- (4) selected financial data for the years ended March 31, 2006, 2005, 2004, 2003 and 2002; and

- (5) certain financial data for the quarterly periods ended March 31, 2006, and December 31, September 30, June 30,

and March 31, 2005 and December 31, September 30, and June 30, 2004.

The errors or adjustments identified in our previously issued consolidated financial statements are as follows:

(A) *We failed to include as a component of inventory cost certain fixed production costs such as depreciation, general*

insurance and minor compensation cost into inventory. Inventories for March 31, 2006, 2005, 2004 and 2003, and

quarterly periods within the years 2006 and 2005, were restated as were cost of sales and certain operating expenses

as included in the Consolidated Statements of Operations for each of the years in the three year period ended March

31, 2006. This restatement was a result of the discovery of the error subsequent to the filing with the SEC of the

Original Form 10-K as filed with the SEC. All inventories, cost of sales and operating expense balances, as

presented in this Form 10-Q, properly reflect the inventory which includes these fixed production costs in

accordance with Accounting Research Bulletin No. 43.

(B) We recorded certain Hawaii State Tax Credit adjustments which were considered immaterial in prior years.

Refundable income taxes were restated for the year ended March 31, 2005. Income tax expense (benefit) was

restated for each of the years in the three year period ended March 31, 2006 but had no impact on net loss for the

three and six months ended September 30, 2006 and 2005.

(C) We recorded certain interest income adjustments which were considered immaterial in prior years. These impacted

the years ended March 31, 2004 and 2003 but had no impact on the three and six months ended September 30, 2005

and 2006.

Edgar Filing: CYANOTECH CORP - Form 10-Q

(D) We reclassified certain certificates of deposit from cash to short-term investments in fiscal years 2005 and 2004.

These reclassifications had no effect on reported net income (loss) or in cash flows from operations for the years ended March 31, 2005 and 2004. Cash flows from operations for the three and six months ended September 30, 2005 were restated.

(E) We recorded certain tax adjustments which were considered immaterial to reports filed in prior periods. These adjustments impacted the years ended March 31, 2005, 2004 and 2003. Cash flows from operations for the three and six months ended September 30, 2005 were restated.

Quarterly data has been derived from our unaudited consolidated financial statements that, in our opinion, reflects all recurring adjustments necessary to fairly present our financial information when read in conjunction with our Consolidated Financial Statements and Notes. This quarterly information has been restated for, and as of the end of, all quarters of fiscal 2006 and all quarters of fiscal 2005 from previously reported information filed on Forms 10-Q and Forms 10-K, as a result of the restatement of our financial results as discussed above. The results of operations for any quarter are not necessarily indicative of the results to be expected for any future period.

The following tables set forth the amounts previously reported in the Company's consolidated statements of operations for the three month period ended September 30, 2005 and the six months ended September 30, 2005 and the effect of the restatement adjustments, and the restated amounts.

(in thousands, except per share data)	Consolidated Statement of Operations		Three Months Ended September 30, 2005 (As restated)

CYANOTECH CORPORATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This report on Form 10-Q contains forward-looking statements regarding the future performance of Cyanotech and future events that involve risks and uncertainties that could cause actual results to differ materially from the statements contained herein. This document, and the other documents that the Company files from time to time with the Securities and Exchange Commission, such as its reports except those of which have been designated as no longer to be relied upon on Form 10-K/A, Form 10-K, Form 10-Q, Form 8-K, and its proxy materials, contain additional important factors that could cause actual results to differ from the Company's current expectations and the forward-looking statements contained herein.

Restatement of Previously Issued Consolidated Financial Statements

On December 1, 2006, the Company filed a Current Report on Form 8-K with the SEC in which it announced that based on current findings of its previously announced accounting review it had determined to restate certain of its previously issued financial statements. Since that time, the Company completed its accounting review and has determined that certain of the errors resulted from deficiencies in internal control over financial reporting. See Item 9A. Controls and Procedures in the Company's Form 10-K/A filed on February 14, 2007. The Company did not file Form 10-K/A, for the fiscal years 2005 or 2004, or Form 10-Q/A, for the interim periods affected by the restatement prior to and including December 31, 2005, and such consolidated financial statements and related financial information, as previously filed, contain errors and should therefore no longer be relied upon. The related audit reports of KPMG LLP, the Company's independent registered public accounting firm, with respect to those financial statements should also no longer be relied upon. Prior period comparative information contained in this form 10-Q has been restated consistent with the Company's Form 10-K/A and to reflect the Company's one-for-four reverse stock split as discussed under Item 1A Risk Factors sub heading Market Price for Our Common Stock of the Form 10-K/A..

Overview

A comparison of selected consolidated statements of operations data as reported herein follows for the periods indicated (dollars in thousands):

	Three Months Ended September 30, 2006	Three Months Ended September 30, 2005 (As Restated)	Change	
Net sales:				
Spirulina products	\$ 1,436	\$ 1,330	8	%
Natural astaxanthin products	1,000	1,131	(12))%
Other products	39	56	(30))%
Total sales, all products	\$ 2,475	\$ 2,517	(2))%

* not meaningful

Sales for the three and six months ended September 30, 2006 decreased \$42,000 or 2% and \$627,000 or 11% from the comparable three and six month periods of the prior year, respectively. For the three month period, natural astaxanthin sales decreased 12% and Spirulina sales increased 8% from the comparable prior year period. For the six month period, natural astaxanthin sales decreased 14% and Spirulina sales decreased 8% from the comparable prior year period. The decrease in natural astaxanthin sales for both the three and six months periods was primarily due to decreased unit sales in the Japan aquaculture market as a result of increased price competition from synthetic based astaxanthin products. We expected that warmer seasonal weather in Japan would increase the demand for our NatuRose astaxanthin product but the demand did not materialize and the market demand shortfall in Japan has persisted. For the three month period, the increase in Spirulina sales resulted primarily from increased unit sales in our consumer packaged products outside of the United States. For the six month period, the decrease in Spirulina sales resulted primarily from decreased units and slightly decreased prices which were not offset by slightly increased units and slightly increased prices for consumer packaged products. Price decreases primarily resulted from discounts on large volume orders.

For the three and six month periods ended September 30, 2006 costs of sales increased 7% and 2%, respectively, when compared to the comparable prior year period. For the three and six months ended September 30, 2006, variable production costs increased 12% and 13%, respectively, primarily in labor and chemicals. Labor costs were impacted by wage increases during the first quarter of fiscal 2007 in response to a competitive labor market (primarily from the construction industry) in Hawaii. Chemical costs increased as a result of increased consumption of nutrients, some of which were deemed to be period costs due to abnormal usage which was not effective in correcting an imbalance in the cultivation process. Such period costs totaled approximately \$143,000 in the second quarter of fiscal 2007 and \$149,000 for the six months ended September 30, 2006. Pursuant to SFAS No. 151, approximately \$59,000 and \$95,000 of fixed production overhead costs was not inventoriable during the three and six months ended September 30, 2006 because our natural astaxanthin production output was below normal capacity for both periods. In addition, production costs associated with the Company's animal nutrition market products were not inventoriable because such costs would have exceeded the market value for such inventory: For the three months ended September 30, 2006 such costs approximated \$127,000, while there were no such costs in the prior comparable period; and, for the six months ended September 30, 2006 and 2005, such costs approximated \$245,000 and \$1,000, respectively.

As a result of the decrease in sales coupled with the increase in cost of sales in both the three and six month periods, gross profit margins as a percentage of sales decreased to 16% for the three months ended September 30, 2006 as compared to 23% for the comparable prior year quarter and decreased to 18% for the six months ended September 30, 2006 as compared to 29% for the comparable prior year to date period. Due to above factors, we expect that the Company's gross profit margins during fiscal 2007 will continue to be less than the margins reported for comparable prior year periods while actions are currently underway to obtain production at desired capacity and quality levels.

Operating expenses, compared to the comparable prior year period, increased \$90,000 or 11% for the three months and \$81,000 or 5% for the nine months ended September 30, 2006. The increase was primarily due to efforts associated with the restatement and filing process of the Company's Form 10-K/A as well as late filings of Forms 10-Q and the related fees for accounting, auditing and contract services.

Lower gross profits and higher operating expenses resulted in a net loss of \$572,000 for the second quarter of fiscal 2007 compared to net losses of \$297,000 for the second quarter of the prior fiscal year and on a cumulative six months basis, a net loss of \$919,000 the fiscal 2007 period compared to \$138,000 a year ago.

Results of Operations

Second Quarter of Fiscal 2007 Compared to Second Quarter of Fiscal 2006

Net sales for the three months ended September 30, 2006 were \$2,475,000, a 2% decrease from \$2,517,000 for the comparable period a year ago. This decrease was primarily from reduced sales of natural astaxanthin products partially offset by increased spirulina sales from the prior comparable period.

Company sales of spirulina products for the second quarter of fiscal 2007 were \$1,436,000, an increase of 8% over the \$1,330,000 generated in the second quarter of fiscal 2006. As a percentage of sales, Spirulina represented 58% of total sales in the current period and 53% of sales in the prior comparable period. Natural astaxanthin product sales were \$1,000,000 during the second quarter of fiscal 2007, a 12% decrease from \$1,131,000 in the second quarter of the prior year. The natural astaxanthin product lines decreased to 40% of total sales over a 45% of total sales in the second quarter of fiscal 2006. NatuRose sales continued to decrease as a result of lower demand in the Japanese aquaculture market and was a significant factor in the decrease in natural astaxanthin sales between

Edgar Filing: CYANOTECH CORP - Form 10-Q

the comparative quarters. Other product sales were \$39,000 and \$56,000 for the second quarters of fiscal years 2007 and 2006, respectively.

International sales were 41% of total sales for the second quarter of fiscal 2007, compared to 50% a year ago. For the three months ended September 30, 2006, our European distributor accounted for 10% of total sales as compared to 12% of total sales for the comparable months prior year period.

For the three months ended September 30, 2006 costs of sales increased 7% compared to the comparable prior year quarter. For the three ended September 30, 2006, variable production costs increased 12% primarily in labor and chemicals. Labor costs were impacted by wage increases during the first quarter of fiscal 2007 in response to a competitive labor market (primarily from the construction industry) in Hawaii. Chemical costs increased as a result of increased consumption of nutrients, some of which were deemed to be period costs due to abnormal usage which was not effective in correcting an imbalance in the cultivation process. Such period costs totaled approximately \$143,000 in three months ended September 30, 2006. Pursuant to SFAS No. 151, approximately \$59,000 of fixed production overhead costs was not inventoriable during the three months ended September 30, 2006 because our natural astaxanthin production output was below normal capacity, and \$60,000 of below normal capacity cost, prior to the adoption of SFAS No. 151, was recorded during the three months ended September 30, 2005. In addition, production costs associated with the Company's animal nutrition market products totaling approximately \$127,000 for the three months ended September 30, 2006 and nil for the three months ended September 30, 2005, were not inventoriable because such costs would have exceeded the market value for such inventory. As a result of the decrease in sales coupled with the increase in cost of sales, gross profit margins as a percentage of sales decreased to 16% for the three months ended September 30, 2006 as compared to 23% for the comparable prior year quarter.

Operating expenses for the three months ended September 30, 2006 were \$946,000 or 38% of sales, compared to \$856,000 or 34% of sales for the three months ended September 30, 2005. In the second quarter of fiscal 2007, sales and marketing and general and administrative expense were 8% and 13% above the comparable prior period, respectively, and research and development expenses remained consistent compared to the comparable period of the prior fiscal year. The incremental general and administrative expenses were associated with the prior fiscal year's restatement and filing of the Company's Form 10-K/A, late filings of Forms 10-Q for the first and second quarters of fiscal year 2007, and, to a much lesser extent, the fees associated with the Company's one for four reverse stock split on November 3, 2006 (Note 3). The Company expects that total operating expenses will increase throughout the remainder of the fiscal year due to the efforts associated with the restatement and filing process of the Company's Form 10-K/A as well as late filings of Forms 10-Q and the related fees for accounting, auditing and contract services. In addition, with respect to the reasons underlying the filing of Form 10-K/A, increased costs are expected as a result of management's recommendation and the Company's Audit Committee and Board of Directors approval and adoption of a remediation plan which includes that policies and procedures will be designed to ensure full compliance with Generally Accepted Accounting Principles (GAAP), particularly as it applies to inventory accounting, and will address key financial reporting risk elements, including the following: (a) ensuring that its disclosures are subject to adequate and rigorous review process prior to finalizing and releasing financial statements; (b) continuing to update its inventory accounting systems and procedures to properly accommodate specific inventoriable fixed costs in accordance with GAAP; and (c) continuing to identify resources with the critical skills necessary to ensure full compliance with GAAP. The process related to error identification and subsequent restatement, originated in the second quarter of fiscal 2007. Related audit, legal, outside consulting costs included in this Form 10-Q for the second quarter totaled \$53,000.

Net other expense, which includes interest on the Company's debt, for the second quarter of fiscal 2007 was \$34,000, an increase from \$25,000 for the same period a year ago. This increase is primarily attributed to higher interest rates in the current reporting period on the Company's outstanding debt.

For the second quarter of fiscal 2007, an income tax benefit of \$4,000 was recorded, compared to an income tax benefit of \$2,000 for the comparable period of the prior fiscal year. The Company does not expect any expense to be recorded for United States income taxes in the current fiscal year as a result of available net operating loss carry forwards.

The result of the foregoing was a net loss of \$572,000, or (\$0.11) per diluted share, for the three months ended September 30, 2006, in comparison to net loss of \$297,000, or (\$0.06) per diluted share, for the comparable prior year quarter. The higher net loss was the result of lower net sales and lower gross profit in conjunction with higher operating expenses in the current quarter.

Six Months Ended September 30, 2006 Compared to Six Months Ended September 30, 2005

Net sales for the six months ended September 30, 2006 were \$4,919,000, a decrease of 11% from sales of \$5,546,000 reported for the comparable period a year ago. The reduction in sales over the prior year's six-month period was largely the result of decreased sales of bulk products for both spirulina and natural astaxanthin, offset in part by increased sales in packaged products. International sales represented 47% of net sales for the six months ended September 30, 2006 compared to 54% for the same period a year ago due to lower sales in Japan and Europe. For the six months ended September 30, 2006 and September 30, 2005, our European distributor, accounted for 10% of total sales, with sales to our United States distributor accounting for less than 10% of total sales.

Edgar Filing: CYANOTECH CORP - Form 10-Q

For the six months ended September 30, 2006 costs of sales increased 2% above the comparable prior year period. For the three and six months ended September 30, 2006, variable production costs increased 13% primarily in labor and chemicals. Labor costs were impacted by wage increases during the first quarter of fiscal 2007 in response to a competitive labor market (primarily from the construction industry) in Hawaii. Chemical costs increased as a result of increased consumption of nutrients, some of which were deemed to be period costs due to abnormal usage which was not effective in correcting an imbalance in the cultivation process. Such period costs totaled approximately \$149,000 for the six months ended September 30, 2006. Pursuant to SFAS No. 151, approximately \$95,000 of fixed production overhead costs was not inventoriable during the six months ended September 30, 2006 because our natural astaxanthin production output was below normal capacity. In addition, production costs associated with the Company's animal nutrition market products totaling approximately \$245,000 and \$126,000 incurred during the six months ended September 30, 2006 and 2005, respectively, were not inventoriable because such costs would have exceeded the market value for such inventory. As a result of the decrease in sales coupled with the increase in cost of sales, gross profit margins as a percentage of sales decreased to 18% for the six months ended September 30, 2006 as compared to 29% for the comparable prior year period.

Operating expenses for the six months ended September 30, 2006 were \$1,728,000, an increase of \$81,000 or 5% from the comparable prior year period. The increase in spending reflects higher general and administrative expense, which was offset in part by slightly lower sales and marketing and research and development expenses. Higher general and administrative expenses during the current six-month period were primarily due to increased time and effort devoted to the restatement and filing of its 2006 annual report on Form 10-K/A. Lower expenses for sales and marketing and research and development for the current six-month period reflect the Company's efforts to contain expenses where possible. While it is our goal to contain discretionary operating spending in our research and development, sales and marketing, and general and administrative activities, it may become necessary for the company to selectively increase spending in some or all of these areas to remain competitive and to comply with regulatory requirements.

Net other expense, which includes interest on the Company's debt, for the six months ended September 30, 2006 was comparable to the same period of the prior fiscal year.

For the six months ended September 30, 2006, an income tax benefit of \$6,000 was recorded compared to an income tax provision recorded of \$3,000 for the same period of the prior year. The Company does not expect any United States income taxes for the current fiscal year as a result of available net operating loss carry-forwards.

Edgar Filing: CYANOTECH CORP - Form 10-Q

The Company recorded net loss of \$919,000 or \$0.18 per diluted share for the six month period ended September 30, 2006. For the same period a year ago the Company reported net loss of \$138,000 or \$0.03 per diluted share. The net loss in the current period is attributable to declining sales in conjunction with an increase in cost of product sales and higher general and administrative operating expenses as compared to the same period a year ago.

Variability of Results

The Company has experienced significant quarterly fluctuations in operating results and anticipates that these fluctuations may continue in future periods. As described in previous paragraphs, operating results have fluctuated as a result of changes in sales levels to our customers, competition (both pricing, new products and other market trends) and production difficulties including increased production costs. The Company has also during its history experienced production difficulties as a result of inclement weather, changes in the mix between sales of bulk and packaged consumer products and start up costs associated with new product introductions, new facilities and expansion into new markets. In addition, future operating results may fluctuate as a result of factors beyond the Company's control such as foreign exchange fluctuations, changes in government regulations and economic changes in the regions it operates in and sells to. A portion of our operating expenses are relatively fixed and the timing of increases in expense levels is based in large part on forecasts of future sales. Therefore, if net sales are below expectations in any given period, the adverse impact on results of operations may be magnified by our inability to meaningfully adjust spending in areas such as depreciation, or the inability to adjust spending quickly enough, as in personnel and administrative costs, to compensate for a sales shortfall. We may also choose to reduce prices or increase spending in response to market conditions, and these decisions may have a material adverse effect on financial condition and results of operations.

Liquidity and Capital Resources

The Company's primary capital requirements are equipment and other leasehold improvement purchases, debt service obligation, and working capital requirements associated with the Company's ongoing operations.

Working capital at September 30, 2006 decreased by \$567,000 to \$5,080,000 from \$5,647,000 at March 31, 2006 primarily due to

Edgar Filing: CYANOTECH CORP - Form 10-Q

reductions in cash and equivalents of \$391,000 and receivables of \$463,000, offset partially by an increase in inventory of \$121,000 and prepaid expenses and other current assets of \$48,000.

At September 30, 2006, cash, cash equivalents and short-term investments was \$2,144,000, a decrease from \$2,535,000 at the beginning of the fiscal year. Net cash of \$50,000 was used by operations for the six months ended September 30, 2006 compared with \$344,000 of net cash provided by operations for the comparable prior year period. The net cash used by operations during the six months ended September 30, 2006 resulted primarily from the increase in net losses of \$919,000 in the current year compared to net losses of \$138,000 for the same period a year ago reduced by non-cash transactions, offset in part by higher collections of accounts receivable.

The Company believes that its current cash position in conjunction with the expectation of future cash provided by operations will be sufficient to meet its working capital and capital expenditure requirements at least the next 12 months. However, operating costs and the costs of restatement are placing and will continue to place an additional burden on the Company's liquidity. The Company expects its future production levels to be in line with future sales demand in an effort to reduce its investment in inventory held for sale. The Company continues to consider sources of capital to strengthen its financial position and liquidity should its liquidity position worsen significantly. There can be no assurance that such financing alternatives or other sources of capital will be available under favorable terms, if at all.

Cash used in investing activities (for capital expenditures) for the current six month period was \$167,000, an increase from \$123,000 in the comparable prior year period.

Cash used in financing activities amounted to \$174,000 and \$172,000 for the six months ended September 30, 2006 and 2005, respectively.

The Company's contractual obligations and commitments (consisting of a term loan and operating leases) are disclosed in the Company's 2006 Annual Report on Form 10-K/A in the following sections: Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations - Liquidity and Capital Resources, and Item 8 Financial Statements and Supplementary Data - Notes 5 and 6 of Notes to Consolidated Financial Statements. There were no significant changes in contractual obligations and commitments from March 31, 2006 to September 30, 2006.

Critical Accounting Policies

Edgar Filing: CYANOTECH CORP - Form 10-Q

Our unaudited financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information pursuant to Regulation S-X. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue and expenses. These estimates and assumptions are affected by management's application of accounting policies. The Company has identified certain policies that require the application of significant judgment by management. Our most critical accounting policies are those related to inventory valuations, valuation of equipment and leasehold improvements and long-lived assets and income taxes. These critical accounting policies are stated in the notes to consolidated financial statements in the Company's previously filed report on Form 10-K, as amended, for the fiscal year ended March 31, 2006. This discussion and analysis should be read in conjunction with such notes and our consolidated financial statements and related notes included elsewhere in this report.

Outlook

This outlook section contains a number of forward-looking statements, all of which are based on current expectations. Actual results may differ materially. Also, see the first paragraph of Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cyanotech Corporation's strategic direction is to position itself as a world-leader in the production and marketing of high-value natural products from microalgae. We are vertically aligned; producing raw materials in the form of microalgae processed at our 90-acre facility in Hawaii, and integrating those raw materials into finished products. For fiscal 2007 we are focused on the business-to-business wholesale market for the products and compounds that we produce. Our current product offerings include Naturally Cultivated Spirulina Pacifica® in powder, flake and tablet form, NatuRose® natural astaxanthin powder for the animal nutrition market, BioAstin® natural astaxanthin antioxidant in lipid extract, softgel caplet and micro-encapsulated beadlet form for the human nutrition and cosmetic industries and Phycobiliproteins for use in medical diagnostics. Information about our Company and our

products can be viewed at www.cyanotech.com, www.nutrex-hawaii.com or www.phycobiliprotein.com. Consumer products can also be purchased online at www.nutrex-hawaii.com.

Net sales declined 11% during the six month period ended September 30, 2006 as compared to the comparable prior year period. The Company continues to experience a reduction of NatuRose sales to the worldwide aquaculture market due to reduced Sea Bream sales, growers using less natural astaxanthin in their feed, pricing competition from synthetic astaxanthin offerings, and heightened competition from new formulations entering the markets. In addition, our costs are increasing because of complex non-US registration costs and rising labor, nutrient, utility and transportation costs. We feel that these conditions are likely to persist which places significant pressure on being able to maintain a profitable business for our natural astaxanthin product in the animal nutrition market. In response to this, we are shifting our natural astaxanthin production into higher value products such as BioAstin for human consumption until such time that animal nutrition markets can be identified that can generate reasonable profitability for the Company.

The Company is exploring options to expand consumer brand awareness and knowledge of its product lines, with particular focus of BioAstin, the Company's human natural astaxanthin product line, for which it believes full market penetration has not yet been realized. To accomplish these objectives the Company, among other initiatives, is actively searching for and will, within the current fiscal year, base a knowledgeable sales employee on the US mainland to increase the Company's outreach to both the US and European markets.

Gross profit margin percentages in fiscal 2007 are expected to remain lower in comparison to previous periods. The Company has experienced cost increases as certain variable operating costs for utilities, production labor, and pond nutrients have increased in comparison to previous periods. The Company's utility costs are impacted by the price of oil, which is used to generate electricity for processing and for water pumping. In the face of a robust local construction economy, the Company found it necessary to increase production wages in order to retain key employees and attract qualified personnel. With competition increasing and higher production costs, pressure is placed on achieving a reasonable profit margin. When market value, including a reasonable profit margin, cannot be achieved, production costs exceeding the product's market value cannot be inventoried and is reflected immediately in cost of sales. Additionally, with the adoption of SFAS 151, the Company recognizes costs associated with abnormal amounts of idle facility expense, freight, handling costs and wasted materials (such as spoilage) as current-period charges in cost of sales. When production costs exceed historical averages, the Company evaluates whether such costs are current-period charges or can be inventoried. In addition, the allocation of such fixed production overheads (such as depreciation and general insurance) to inventories is determined based on normal production capacity. When the Company's production volumes are below normal capacity limits, certain fixed production overhead costs cannot be inventoried and are recorded immediately in cost of sales. Currently, the Company's natural astaxanthin production levels are below previous periods and normal production levels due to an imbalance in certain cultivation specifications to established parameters associated with producing high quality microalgae. Producing the highest quality microalgae is a complex biological process which requires balancing numerous factors including microalgal strain variations, temperature, acidity, nutrient and other environmental considerations, some of which are not within the Company's control. It is difficult and time consuming to adjust, improve or correct the production process when quality levels fall below specifications. As a result, we experienced a production shortfall in our natural astaxanthin products during the three and six months ended September 30, 2006. These shortfalls likely resulted in decreased sales since customers are able to secure alternative products or are able to forgo purchases. Until the Company is able to prudently increase its level of natural astaxanthin production, the Company believes margins will continue to be negatively impacted by all of the foregoing cost elements, and margins are expected to remain lower than those reported for comparable previous periods.

The Company anticipates that future total operating expenses will increase due to the costs of the restatement and the remediation of errors identified by the restatement, including the need to improve the Company's internal controls. *Please refer to Note 2 Item 4 (a) in this report.* In addition, increased costs are expected as a result of management's recommendation and the Company's Audit Committee and Board of Directors approval and adoption of a remediation plan which includes that policies and procedures will be designed to ensure full compliance with GAAP, particularly as it applies to inventory accounting, and will address key financial reporting risk elements, including the following: (a) ensuring that its disclosures are subject to adequate and rigorous review process prior to finalizing and releasing financial statements; (b) continuing to update its inventory accounting systems and procedures to properly accommodate specific inventoriable fixed costs in accordance with GAAP; and (c) continuing to identify resources with the critical skills necessary to ensure full compliance with GAAP. Since the process related to error identification and the subsequent restatement began after June 30, 2006, related audit, legal, outside consulting costs, and remediation plan costs are included in and are applicable to this Form 10-Q. For the quarter ended September 30, 2006, such costs are reflected in general and administrative expenses.

To effectively manage its cash resources the Company will continue to balance production in light of sales demand, minimizing the cost associated with build-ups in inventory. Additionally, the Company has experienced cash outflows for investing and financing activities, primarily in meeting debt repayment obligations and may need to utilize cash to meet working capital needs if prolonged net losses are incurred in future periods. A prolonged downturn in sales could impair the Company's ability to generate sufficient cash for operations and minimize the Company's ability to attract additional capital investments which may be necessary in order to expand into new markets or increase product offerings.

The Company's future results of operations and the other forward-looking statements contained in this Outlook, in particular the statements regarding revenues, gross margin and capital spending involve a number of risks and uncertainties. In addition to the factors discussed above, any of the following could cause actual results to differ materially: business conditions and growth in the natural products industry and in the general economy; changes in customer order patterns; changes in demand for natural products in general; changes in weather conditions; competitive factors, such as increased production capacity from competing Spirulina and astaxanthin producers and the resulting impact, if any, on world market prices for these products; government actions; shortage of manufacturing capacity; and other factors beyond our control. Risk factors are discussed in detail in Item 1A, included in this report.

Cyanotech believes that it has the product offerings, facilities, personnel, and competitive and financial resources for improved results, but future revenues, costs, margins and profits are all influenced by a number of factors, as discussed above, all of which are inherently difficult to forecast.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We have not entered into any transactions using derivative financial instruments or derivative commodity instruments and believe that our exposure to market risk associated with other financial instruments is not material.

We have a term loan agreement that adjusts quarterly based on the prime rate plus 1%. As such we are exposed to interest rate risk whereby a 1% increase or decrease in the prime rate would lead to an increase or decrease of approximately \$15,000 in interest expense for the year ending March 31, 2007 (based on March 31, 2006 amounts outstanding).

The Company may enter into additional foreign countries in the future that may involve similar economic and political risks as well as challenges that are different from those currently encountered by the Company.

Item 4. Controls and Procedures

(a) Disclosure Controls and Procedures

This Form 10-Q should be read in conjunction with Item 9A Controls and Procedures of the Company's Form 10-K/A for the fiscal year ended March 31, 2006 filed February 14, 2007, which is incorporated herein by reference.

There were changes in Controls and Procedures during the current quarter. As disclosed in the Form 10-Q reports for the second and third quarters of fiscal year 2007 beginning in the second quarter of fiscal year 2007 the Company identified errors in the application of certain accounting practices and procedures. As a result, during the second and subsequent quarters of fiscal year 2007 the Company began changing and is continuing a process of changing its control policies, procedures, and systems. This process was and is directly related to the Company's February 14, 2007 filing of Form 10-K/A, correction of the error in its inventory accounting, and also the remediation plan adopted by the Board of directors in November 2006 as discussed in Form 10-K/A.

Because the aforementioned error was discovered by the Company on August 7, 2006, it is clear that as of June 30, 2006 the Company did not maintain effective controls over accounting for inventory. Specifically, errors resulted because the Company did not have effective policies and procedures and adequately trained and qualified accounting department staff to ensure that inventory included all inventoriable fixed cost components such as depreciation, portions of general insurance costs, and portions of direct labor burden costs in accordance with GAAP. As a result of this weakness, which was later determined by the Company to be material, the Company restated its consolidated financial statements of and for fiscal years ended March 31, 2006, 2005, and quarterly periods within fiscal years 2006 and 2005, and 2004 and has restated selected financial data for the years ended March 31, 2004 and 2002 to adjust its inventory balances, cost of goods sold, and restated amounts of income and loss. The restatement is reflected in the Company's Form 10-K/A filed February 14, 2007, and is reflected in restated prior period comparable information contained in this Form 10-Q.

The process of investigating and rectifying the aforementioned errors has resulted in the Company enhancing and continuing to enhance its accounting policies and procedures to assure that inventoriable fixed cost components such as depreciation, portions of general insurance costs, and portions of direct labor burden costs are reflected in the Company's financial statements in accordance with GAAP. Because of the nature of and circumstances surrounding the errors, the Company's management, Board of Directors, and Audit Committee of the Board of Directors concluded that the errors were not the result of illegal acts.

Specific changes in the Company's disclosure controls and procedures during the second quarter of fiscal year 2007 included:

- Initializing changes in inventory accounting procedures and systems.

- Heightening enterprise level review and evaluation of inventory accounting policies, procedures, and systems.

22

- Engaging additional professional accounting resources on a consulting basis to assist with error evaluation and correction.

Incorporated into the results reported in this Form 10-Q are the above discussed restatement and inventory accounting error corrections which ensure that inventory as reported herein includes all inventoriable fixed cost components such as depreciation, portions of general insurance costs, and portions of direct labor burden costs in accordance with GAAP.

PART II. OTHER INFORMATION⁶

Item 1. Legal Proceedings

None

Item 1A. Risk Factors

You should carefully consider the risks described below which we believe are significant but not the only ones we face. Any of the following risks could have a material adverse effect on our business, financial condition and operating results. You should also refer to the other information contained in this report, including our financial statements and the related notes.

A Significant or Prolonged Economic Downturn Could Have a Material Adverse Effect on Our Results of Operations

Our results of operations are affected by the business activity of our customers who in turn are affected by the level of economic activity in the industries and markets that they serve. A decline in the level of business activity of our clients could have a material adverse effect on our revenues and profit margin.

Our Quarterly Operating Results May Vary From Quarter to Quarter, Which May Result in Increased Volatility of Our Share Price

We have experienced, and may in the future continue to experience, fluctuations in our quarterly operating results. These fluctuations could reduce the market price of our Common Stock. Factors that may cause our quarterly operating results to vary include, but are not limited to:

- the business decisions of our customers regarding orders for our products;
- increased energy costs;
- increased raw material costs;
- production difficulties, especially CO₂ interruption, which could shut down production;
- weather-related cultivation difficulties;
- contamination of our cultivation and production facilities;
- the effect of weather on customer demand patterns;
- the introduction of new products by us or our competitors;
- changes in our pricing policies or those of our competitors;
- seasonal trends in our customers' buying patterns
- changes in government regulation, both domestic and foreign;

- fluctuation in foreign currency exchange rates;
- global economic and political conditions and related risks, including acts of terrorism; and
- customers using alternative, possibly synthetic, products;
- an inability to produce or deliver orders;
- product quality issues which may restrict production or require product recall;
- other factors beyond our control.

A significant portion of our expense levels are relatively fixed and the timing of increases in expense levels is based in large part on our forecasts of future sales. If net sales are below expectations in any given period, the adverse impact on results of operations may be magnified by our inability to adjust expenses quickly enough to compensate for the sales shortfall.

23

Our Global Operations Expose Us to Complex Management, Foreign Currency, Legal, Tax and Economic Risks, Which We May Not Be Able to Address Adequately

We conduct business in a number of countries around the world. For the quarter ended September 30, 2006, approximately 41% of our net sales were from sales to foreign customers. As a result, we are subject to a number of risks that include, but are not limited to:

- the burden of complying with a wide variety of national and local laws;
- potentially longer payment cycles for foreign sales;
- multiple and possibly overlapping and conflicting tax laws;
- coordinating geographically separated locations;
- restrictions (government and otherwise) on the movement of cash;
- the absence in some jurisdictions of effective laws protecting our intellectual property rights;
- changes in government regulations, both domestic and foreign;
- global economic and political conditions and related risks, including acts of terrorism; and
- fluctuations in foreign currency exchange rates.

Competition in Our Industry is Intense

The nutritional products market is highly competitive. It includes international, national, regional and local producers and distributors, many of whom have greater resources than Cyanotech and offer a greater variety of products. Increased competition in our industry could result in price reductions, reduced gross profit margin or loss of market share, any of which could have a material effect on our business, results of operations and financial condition.

Our Revenues Could Be Adversely Affected By the Loss of a Significant Customer or the Failure to Collect a Large Accounts Receivable

We have in the past derived, and may continue in the future to derive, a significant portion of our revenues from a relatively limited number of major customers. From quarter to quarter, revenues from one or more individual customers may exceed 10% of our revenues for the quarter. During the year ended March 31, 2006, sales to one customer, a European distributor of natural products, were approximately 12% of net sales. If sales to this customer or other such major customer decrease significantly, this may materially affect our results of operations. In addition, if we fail to collect large accounts receivable from such major customers, we could be subject to significant financial exposure. For the six months ending September 30, 2006, sales to this European distributor represent 10% of total sales.

If We Are Unable to Protect Our Intellectual Property Rights or if We Infringe Upon the Intellectual Property Rights of Others Our Business May Be Harmed

The Company has received five United States patents: two on aspects of our production methods and three for use of our BioAstin® products. Although we regard our proprietary technology, trade secrets, trademarks and similar intellectual property as important, we rely on a combination of trade secret, contract, patent, copyright and trademark law to establish and protect our rights in our products and technology. There can be no assurance that we will be able to protect our technology adequately or that competitors will not be able to develop similar technology independently. In addition, the laws of certain foreign countries may not protect the Company's intellectual property rights to the same extent as the laws of the United States. Litigation in the United States or abroad may be necessary to enforce our patent or other intellectual property rights, to protect our trade secrets, to determine the validity and scope of the proprietary rights of

others or to defend against claims of infringement. Such litigation, even if successful, could result in substantial costs and diversion of resources and could have a material adverse effect on our business, results of operations and financial condition. Additionally, if any such claims are asserted against us, we may seek to obtain a license under the third party's intellectual property rights. There can be no assurance, however, that a license would be available on terms acceptable or favorable to us, if at all.

24

We May Need to Raise Additional Capital in the Future Which May Not Be Available

At September 30, 2006, the Company's working capital was \$5,080,000. Cash equivalents and short-term investments at September 30, 2006 totaled \$2,144,000. Our cash requirements will depend on numerous factors, including: demand for products; normal requirements to maintain and upgrade facilities and equipment; whether opportunities emerge in either new markets or in research and development activities; or, in the event we need to expand or contract our production or distribution infrastructure. We believe our current cash, cash equivalents, short-term investments and expected cash provided from operations will be sufficient to meet our capital requirements for at least the next 12 months. If we need to raise additional funds, we may not be able to secure funding on acceptable terms, if at all. If we raise additional funds through the issuance of equity or convertible debt securities, the percentage ownership of our then current stockholders may be reduced. If we raise additional funds through the issuance of convertible debt securities, or through additional debt or similar instruments, such securities, debt, or similar instruments could have rights senior to those of our common stockholders and such instruments could contain provisions restricting our operations. If adequate funds are not available to satisfy either short-term or long-term capital requirements, we may be required to limit operations with adverse results.

Our Insurance Liability Coverage is Limited

In the ordinary course of business, the Company purchases insurance coverages (e.g., property and liability coverages) to protect itself against loss of or damage to its properties and claims made by third parties and employees for property damage or personal injuries. However, the protection provided by such insurance is limited in significant respects and, in some instances, the Company has no coverage and certain of the Company's insurance has substantial deductibles or has limits on the maximum amounts that may be recovered. For example, if a hurricane or other uninsured catastrophic natural disaster should occur, the Company may not be able to recover all facility restoration costs and revenues lost from business interruption. In addition, the Company maintains product liability insurance in limited amounts for all of its products involving human consumption; however, broader product liability coverage is prohibitively expensive. Insurers have also introduced new exclusions or limitations of coverage for claims related to certain perils including, but not limited to, mold and terrorism. If a series of losses occurred, such as from a series of lawsuits in the ordinary course of business each of which were subject to the deductible amount, or if the maximum limit of the available insurance were substantially exceeded, the Company could incur losses in amounts that would have a material adverse effect on its result of operations and financial condition.

Our Ability to Develop and Market New Products or Modify Existing Products and Production Methods May Be Adversely Affected If we Lose the Services of or Cannot Replace Certain Employees Knowledgeable in Advanced Scientific and Other Fields

The Company's products are derived from and depend on proprietary and non-proprietary processes and methods founded on advanced scientific knowledge, skills, and expertise. If the services of employees knowledgeable in these fields are lost and cannot be replaced in a reasonable time frame at reasonable costs, the Company's ability to develop and market new products or modify existing products and production methods would be adversely impacted. At the same time, regulatory compliance surrounding the Company's products and financial matters generally requires minimum levels of knowledge and expertise related to production, quality assurance, and financial control. If the Company loses the services or cannot reasonably replace employees who have the necessary knowledge and expertise the Company's ability to remain in regulatory compliance could be adversely affected.

As a Result of Restating the Company's Form 10-K/A and the Late Filing of Form 10-Qs, Additional General and Administrative Expenditures Will Be Required in Future Periods

During the current fiscal year the Company expects to expend significant amounts for independent registered public accounting, legal, outside consulting, and regulatory expenses to address: (a) the previously discussed 10-K/A restatement process, (b) previously disclosed matters dealing with resulting potential delisting from the Nasdaq Capital Market, (c) policy, procedure, and initial systems modifications required by and attendant to correcting the historical error which lead to the restatement process, and (d) additional costs related to late filing of the Company's Forms 10-Q for the first two quarters of fiscal year 2007. Also, to accomplish the remediation plan set forth in the 10-K/A under Item 9A Controls and Procedures therein. As of the filing date of this Form 10-Q the Company has expended approximately \$500,000 related to such efforts, and will have to expend additional amounts which cannot now be reliably estimated.

The Company Will Incur Additional Sums In the Future in Order to Comply with Securities and Exchange and Public Company Accounting Oversight Requirements Resulting from the Sarbanes-Oxley Act

As of the date of filing this Form 10-Q the Company is required to have policies, procedures, systems and related documentation in full compliance with Securities and Exchange Commission and Public Company Accounting Oversight Board requirements. There is currently no means of reliably estimating such costs or their duration.

Potential Delisting from Nasdaq Capital Market Trading

On December 1, 2005 the Company received notice from Nasdaq that the bid price of the Company's stock closed below the minimum \$1.00 per share requirement of Nasdaq Marketplace Rule 4310(c)(4). The Company, however, was provided until May 30, 2006, to regain compliance with such rule, and was granted by letter dated May 31, 2006 another 180 days to regain compliance with such rule. By letter dated August 23, 2006, the Company was notified by Nasdaq of its failure to comply with Nasdaq Marketplace Rule 4310(c)(14) for not filing its Form 10-Q for the quarter ended June 30, 2006 and we were notified that the Company's common stock would be suspended from trading on September 1, 2006. The Company appealed this decision and the common stock continued to be listed.

On November 3, 2006, the Company implemented a one for four reverse stock split of its common stock as a result of which Nasdaq issued a letter, dated November 20, 2006, indicating the closing bid price of our common stock was in compliance with Marketplace Rule 4310(c)(4). This non-compliance matter is now closed.

The Nasdaq Listing Qualifications Panel issued its decision on the appeal on December 18, 2006 holding that the Company is granted an extension until February 20, 2007 to file its Form 10-Q reports. The Company filed on February 20, 2007 an appeal with the Nasdaq Listing and Review Council requesting a further stay of the delisting until February 28, 2007, but such stay may not be granted. See the Company's Form 8-K dated December 18, 2006. If the Company's common stock is delisted, our stockholders could be materially and adversely affected by having less active and efficient market available for the trading of their stock.

Item 4. Submission of Matters to a Vote of Security Holders

On August 24, 2006, the following matters were submitted and voted by stockholders entitled to vote at the Company's annual Meeting of Stockholders:

The votes shown below are adjusted for the Company's previously discussed one for four reverse stock split.

a) The following directors were elected to serve until the next Annual Meeting or until their successors are elected.

	For Votes	Withheld Votes
Gerald R. Cysewski	4,090,676	145,085
Michael A. Davis	4,092,214	143,548
Gregg W. Robertson	4,095,476	140,285
David I. Rosenthal	4,096,064	139,698
John T. Waldron	4,096,201	139,560
Paul C. Yuen	4,095,476	140,285

b) Ratification of the selection of KPMG LLP as the Company's independent Registered Public Accounting Firm for the fiscal year ending March 31, 2007. The vote on the ratification was 4,212,289 for, 11,692 against and 11,780 abstaining.
