We depend on government funding of healthcare.

Many of our customers receive the majority of their funding from the government and are supplemented by payments from private health care insurers. Our customers depend on Medicare and Medicaid funding to be viable businesses. A variety of changes to health insurance and reimbursement have been proposed in Congress, some of which, if enacted into law, could have a negative impact on Medicare and Medicaid funding and on reimbursement protocols. If Medicare and Medicaid funding were to be materially decreased, our customers would be severely impacted, increasing our risk of not being paid in full by our customers. An increase in our exposure to uncollectible accounts could have a material adverse effect on our financial position, results of operations and cash flows.

In 2011, the government will implement a change to reimbursement practices by shifting to a fully bundled rate per dialysis session compared to the current practice of separately billed services and medications. This change increases the burden on dialysis treatment providers to effectively manage their cost of treatment and operations and may put more pressure on suppliers such as us to reduce costs. As a result, we may see increased pressure to reduce the cost of our products, which would have a negative impact on our revenue and gross profit margins.

Orders from our international distributors may not result in recurring revenue.

Our revenue from international distributors may not recur consistently or at all. Such revenue is often dependent upon the availability of government funding in those nations and there may be local, regional or geopolitical changes that impact funding of healthcare expenditures in those nations.

We depend on key personnel.

Our success depends heavily on the efforts of Robert L. Chioini, our President and Chief Executive Officer, Dr. Richard Yocum MD, our Vice President of Drug Development & Medical Affairs, Dr. Ajay Gupta MD, our Chief Scientific Officer, and Thomas E. Klema, our Chief Financial Officer, Secretary and Treasurer. Mr. Chioini is primarily responsible for managing our sales and marketing efforts. Dr. Yocum is primarily responsible for managing our product development efforts. Dr. Gupta is primarily responsible for discovery and development of new technologies. None of our executive management are parties to a current employment agreement with the Company. If we lose the services of Mr. Chioini, Dr. Yocum, Dr. Gupta or Mr. Klema, our business, product development efforts, financial condition and results of operations could be adversely affected.

Table of Contents

Our business is highly regulated.

The testing, manufacture and sale of the products we manufacture and distribute are subject to extensive regulation by the FDA and by other federal, state and foreign authorities. Before medical devices can be commercially marketed in the United States, the FDA must give either 510(k) clearance or pre-market approval for the devices. If we do not comply with these requirements, we may be subject to a variety of sanctions, including fines, injunctions, seizure of products, suspension of production, denial of future regulatory approvals, withdrawal of existing regulatory approvals and criminal prosecution. Our business could be adversely affected by any of these actions.

Although our hemodialysis concentrates have been cleared by the FDA, it could rescind these clearances and any new products or modifications to our current products that we develop could fail to receive FDA clearance. If the FDA rescinds or denies any current or future clearances or approvals for our products, we would be prohibited from selling those products in the United States until we obtain such clearances or approvals. Our business would be adversely affected by any such prohibition, any delay in obtaining necessary regulatory approvals, and any limits placed by the FDA on our intended use. Our products are also subject to federal regulations regarding manufacturing quality. In addition, our new products will be subject to review as a pharmaceutical drug by the FDA. The process of obtaining such approval is time-consuming and expensive. In addition, changes in applicable regulatory requirements could significantly increase the costs of our operations and may reduce our profitability if we are unable to recover any such cost increases through higher prices.

We depend on contract research organizations and consultants to manage and conduct our clinical trials and if they fail to follow our protocol or meet FDA regulatory requirements our clinical trial data and results could be compromised causing us to delay our development plans or have to do more testing than planned.

We utilize a contract research organization to conduct our clinical trials in accordance with a specified protocol. We also contract with other third party service providers for clinical trial material production, packaging and labeling, lab testing, data management services as well as a number of other services. There can be no assurance that these organizations will fulfill their commitments to us on a timely basis or that the accuracy and quality of the clinical data they provide us will not be compromised by their failure to fulfill their obligations. If these service providers do not perform as contracted, our development plans could be adversely affected.

Foreign approvals to market our new drug products may be difficult to obtain.

The approval procedures for the marketing of our new drug products in foreign countries vary from country to country, and the time required for approval may be longer or shorter than that required for FDA approval. Even after foreign approvals are obtained, further delays may be encountered before products may be marketed. Many countries require additional governmental approval for price reimbursement under national health insurance systems.

Additional studies may be required to obtain foreign regulatory approval. Further, some foreign regulatory agencies may require additional studies involving patients located in their countries.

Health care reform could adversely affect our business.

The federal and state governments in the United States, as well as many foreign governments, from time to time explore ways to reduce medical care costs through health care reform. The federal Medicare and Medicaid programs are facing financial challenges and are looking at ways to reduce the costs of the Medicare and Medicaid programs. Similarly, many states have large deficits which may prove unsustainable, resulting in defaults on state debt obligations which may ultimately result in the reduction or curtailment of health care benefits or state Medicaid reimbursement.

In the United States, Congress has debated bills that, if adopted, would make significant changes to the health care payment and delivery system. It is difficult to determine at this time whether a health care reform bill will be passed and if passed, what the provisions of such a bill would be. Any health care reform that impacts the level of

Table of Contents

health care benefits, the insurers responsible for payment or the providers responsible for performing services, particularly changes in the Medicare and Medicaid programs, could reduce our sales and profitability and have a material adverse effect on our business, financial condition and results of operations. In addition, the current health reform bills would impose fees or excise taxes on pharmaceutical and device manufacturers based on their revenues, which could also have a material adverse effect on the Company.

We may not have sufficient products liability insurance.

As a supplier of medical products, we may face potential liability from a person who claims that he or she suffered harm as a result of using our products. We maintain products liability insurance in the amount of \$3 million per occurrence and \$3 million in the aggregate. We cannot be sure that it will remain economical to retain our current level of insurance, that our current insurance will remain available or that such insurance would be sufficient to protect us against liabilities associated with our business. We may be sued, and we may have significant legal expenses that are not covered by insurance. In addition, our reputation could be damaged by product liability litigation and that could harm our marketing ability. Any litigation could also hurt our ability to retain products liability insurance or make such insurance more expensive. Our business, financial condition and results of operations could be adversely affected by an uninsured or inadequately insured product liability claim in the future.

Our Board of Directors is subject to potential deadlock.

Our Board of Directors presently has four members, and under our bylaws, approval by a majority of the Directors is required for many significant corporate actions. It is possible that our Board of Directors may be unable to obtain majority approval in certain circumstances, which would prevent us from taking action.

RISKS RELATED TO OUR COMMON STOCK

Shares eligible for future sale may affect the market price of our common shares.

We are unable to predict the effect, if any, that future sales of common shares, or the availability of our common shares for future sales, will have on the market price of our common shares from time to time. Sales of substantial amounts of our common shares (including shares issued upon the exercise of stock options or warrants), or the possibility of such sales, could adversely affect the market price of our common shares and also impair our ability to raise capital through an offering of our equity securities in the future. As of December 31, 2009 an additional 1,694,169 shares may be issued upon exercise of outstanding warrants. In addition, as of December 31, 2009, there were an additional 1,624,400 warrants that become exercisable in 2010. In the future, we may issue additional shares or warrants in connection with investments or for other purposes considered advisable by our Board of Directors. Any substantial sale of our common shares may have an adverse effect on the market price of our common shares.

In addition, as of December 31, 2009, there were 3,136,500 shares issuable upon the exercise of outstanding and exercisable stock options, 1,305,000 shares issuable upon the exercise of outstanding stock options that are not yet exercisable and 473,333 additional shares available for grant under our 2007 Long Term Incentive Plan. Additional grants have been made in 2010. The market price of the common shares may be depressed by the potential exercise of these options. The holders of these options are likely to exercise them when we would otherwise be able to obtain additional capital on more favorable terms than those provided by the options.

The market price of our securities may be volatile.

The historically low trading volume of our common shares may also cause the market price of the common shares to fluctuate significantly in response to a relatively low number of trades or transactions.

Voting control and anti-takeover provisions reduce the likelihood that you will receive a takeover premium.

As of December 31, 2009, our officers and directors beneficially owned approximately 20.8% of our voting shares (assuming the exercise of exercisable options granted to such officers and directors). Accordingly, they may

Table of Contents

be able to effectively control our affairs. Our shareholders do not have the right to cumulative voting in the election of directors. In addition, the Board of Directors has the authority, without shareholder approval, to issue shares of preferred stock having such rights, preferences and privileges as the Board of Directors may determine. Any such issuance of preferred stock could, under certain circumstances, have the effect of delaying or preventing a change in control and may adversely affect the rights of holders of common shares, including by decreasing the amount of earnings and assets available for distribution to holders of common shares and adversely affect the relative voting power or other rights of the holders of the common shares. In addition, we are subject to Michigan statutes regulating business combinations which might also hinder or delay a change in control. Anti-takeover provisions that could be included in the preferred stock when issued and the Michigan statutes regulating business combinations can have a depressive effect on the market price of our common shares and can limit shareholders' ability to receive a premium on their shares by discouraging takeover and tender offers.

Our directors serve staggered three-year terms, and directors may not be removed without cause. Our Articles of Incorporation also set the minimum and maximum number of directors constituting the entire Board at three and fifteen, respectively, and require approval of holders of a majority of our voting shares to amend these provisions. These provisions could have an anti-takeover effect by making it more difficult to acquire us by means of a tender offer, a proxy contest or otherwise, or to remove incumbent directors. These provisions could delay, deter or prevent a tender offer or takeover attempt that a shareholder might consider in his or her best interests, including those attempts that might result in a premium over the market price for the common shares.

We do not anticipate paying dividends in the foreseeable future.

Since inception, we have not paid any cash dividend on our common shares and do not anticipate paying such dividends in the foreseeable future. The payment of dividends is within the discretion of our Board of Directors and depends upon our earnings, capital requirements, financial condition and requirements, future prospects, restrictions in future financing agreements, business conditions and other factors deemed relevant by the Board. We intend to retain earnings and any cash resources to finance our operations and, therefore, it is highly unlikely we will pay cash dividends.

Item 1B. *Unresolved Staff Comments.*

Not applicable.

Item 2. *Properties.*

We occupy a 51,000 square foot facility in Wixom, Michigan under a lease expiring in August 2010. We also occupy a 51,000 square foot facility in Grapevine, Texas under a lease expiring in August 2010. We expect to extend or renew these leases on terms acceptable to us or find comparable facilities. In addition, we lease a 57,000 square foot facility in Greer, South Carolina under a three year lease expiring February 28, 2011. We have an option to renew thereafter for one or two years.

We intend to use each of our facilities to manufacture and warehouse our products. All such facilities and their contents are covered under various insurance policies which management believes provide adequate coverage. We also use the office space in Wixom, Michigan as our principal administrative office. With our continued growth we expect that we will require additional office space, manufacturing capacity and distribution facilities to meet our business requirements.

Item 3. *Legal Proceedings.*

We are not currently subject to any litigation that we expect to have a material effect on our financial condition and results of operations.

Table of Contents**PART II****Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities.***

Our common shares trade on the Nasdaq Global Market under the trading symbol RMTI. The prices below are the high and low sale prices as reported by the Nasdaq Global Market in each quarter during 2008 through 2009.

Quarter Ended	Sale Price	
	High	Low
March 31, 2008	\$ 7.26	\$ 5.72
June 30, 2008	\$ 7.49	\$ 4.65

December 31, 2008	\$ 4.79	\$ 1.06
March 31, 2009	\$ 4.85	\$ 2.56
June 30, 2009	\$ 8.79	\$ 3.82
September 30, 2009	\$ 9.39	\$ 7.20
December 31, 2009	\$ 8.14	\$ 6.00

As of February 28, 2010, there were 33 holders of record of our common shares.

Dividends

Our Board of Directors has discretion whether or not to pay dividends. Among the factors our Board of Directors considers when determining whether or not to pay dividends are our earnings, capital requirements, financial condition, future business prospects and business conditions. We have never paid any cash dividends on our common shares and do not anticipate paying dividends in the foreseeable future. We intend to retain earnings, if any, to finance the development and expansion of our operations.

Securities Authorized for Issuance Under Equity Compensation Plans

The information contained under Item 12 Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters of this Annual Report on Form 10-K under the heading Securities Authorized for Issuance Under Equity Compensation Plans is incorporated herein by reference.

Table of Contents**Performance Graph**

The following graph compares the cumulative 5-year total return of holders of the Company's common stock with the cumulative total returns of the Russell 2000 index and the Nasdaq Biotechnology index. The graph tracks the performance of a \$100 investment in our common stock and in each of the indexes (with reinvestment of all dividends, if any) on December 31, 2004 with relative performance tracked through December 31, 2009. The stock price performance included in this graph is not necessarily indicative of future stock price performance.

------------------------------	------------	------------	------------	------------	-----------

- (1) There were no cash dividends paid during the periods presented.
- (2) The Company has reclassified certain expenses from Selling, General and Administrative Expense to Cost of Sales in the 2008 and 2007 consolidated income statements to conform with the current year presentation. The impact of the change was not material. Earlier periods were not adjusted as the amounts were immaterial.

Table of Contents

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operations.*

Overview and Recent Developments

Rockwell Medical operates in a single business segment as a specialty pharmaceutical company offering innovative products targeting end-stage renal disease, chronic kidney disease, and iron deficiency anemia. As an established manufacturer delivering high-quality hemodialysis concentrates to dialysis providers and distributors in the U.S. and abroad, we provide products used to maintain human life, remove toxins and replace critical nutrients in the dialysis patient's bloodstream.

We are currently developing unique, proprietary renal drug therapies. These exclusive renal drug therapies support disease management initiatives to improve the quality of life and care of dialysis patients and are designed to deliver safe and effective therapy, while decreasing drug administration costs and improving patient convenience and outcome.

Our strategy is to develop high potential drug candidates while also expanding our dialysis products business, which had sales of \$54.7 million in 2009. Our dialysis products business was cash flow positive in 2009, which partially offset the cash requirements for our product development efforts, which totaled \$6.5 million in 2009.

Our product development costs were primarily for the Phase IIb clinical trial of SFP, our lead drug candidate. We believe our SFP product has unique and substantive benefits compared to current treatment options and has the potential to compete in the iron maintenance therapy market. The cost to obtain regulatory approval for a drug in the United States is expensive and can take several years. We anticipate that costs to complete the expected clinical trials and obtain FDA approval to market SFP will total approximately \$15 million. In addition to our SFP testing and approval process, we plan to spend additional amounts on testing and development of extensions of SFP technology as well as on other opportunities. We raised \$20.4 million, net of expenses, in the fourth quarter of 2009 primarily to fund these activities and believe these cash resources will be sufficient to complete the SFP testing and FDA approval process and our other planned research and development activities.

In 2009, our business operating results improved significantly, largely as a result of actions taken in late 2008 coupled with improved pricing conditions on many of the specialty chemicals and other raw materials that constitute a majority of our product costs. Following two years of high inflation in our key costs during 2007 and 2008, we realized a substantial reduction in the cost of specialty chemicals, packaging and diesel fuel during 2009. We also benefitted from a significant shift to lower cost products by our customers which further improved our gross profit margins. Conversion to our Dri-sate Dry Acid product line typically results in lower sales and cost per treatment for the provider while the lower associated distribution costs helps to increase our gross profit margins.

While our gross profit margins achieved historical highs of approximately 17% in the second half of 2009, we anticipate a moderate amount of downward pressure on gross profit margins in 2010. We anticipate a continued increase in fuel and other costs in 2010 along with competitive pricing pressures in the renal market, both of which may inhibit our ability to maintain gross profit margins at the level realized in the second half of 2009.

We could also experience changes in our customer and product mix in future quarters that could impact gross profit, since we sell a wide range of products with varying profit margins and to customers with varying order patterns. These changes in mix may cause our gross profit and our gross profit margins to vary period to period. As we add business in certain markets and regions in order to increase the scale of our business operations, we may incur additional costs that are greater than the additional revenue generated from these initiatives until we have achieved a scale of operations that is profitable.

The majority of our business is with domestic clinics who order routinely. Certain major distributors of our products internationally have not ordered consistently, however, resulting in variation in our sales from period to period. We anticipate that we will realize substantial orders from time to time from our largest international distributors but we expect the size and frequency of these orders to fluctuate from period to period. These orders may increase in future periods or may not recur at all.

Table of Contents

Results of Operations

For the year ended December 31, 2009 compared to the year ended December 31, 2008

Sales

In 2009, our sales were \$54.7 million, an increase of \$3.1 million or 5.9% over 2008. This increase was due to growth in both our domestic sales of \$1.6 million or 3.3% and in our international sales of \$1.5 million or 30%. Our international sales were 12% of total sales in 2009 compared to 10% of sales in 2008. The majority of our sales growth in 2009 came from unit volume growth primarily in our Dri-Sate Dry Acid product line as customers continued to migrate from liquid to dry acid concentrate, and to a lesser extent from conversion from higher cost formulations to lower cost formulations. In addition, our average selling prices increased approximately 2.3% in 2009.

Gross Profit

Our gross profit in 2009 was \$7.9 million, an increase of \$5.4 million or 215% over 2008. Our gross profit margins increased to 14.4% in 2009 compared to 4.9% in 2008. The improvement in our gross profit was primarily due to significant changes to our product mix coupled with lower operating and procurement costs and higher sales prices. Our product mix was favorably impacted by the continued conversion of customers to our Dri-Sate product line and to lower cost formulations of our dialysis concentrates. Dri-Sate case volume increased by 35% in 2009 compared to 2008. We also benefitted from lower diesel fuel costs and chemical procurement costs.

Selling, General and Administrative Expenses

Selling, general and administrative, or SG&A, expenses were \$6.9 million or 12.6% of sales in 2009 compared to 13.1% of sales in 2008. SG&A costs increased \$0.15 million compared to 2008, primarily due to an increase in non-cash charges for equity compensation, which aggregated \$2.35 million in 2009 compared to \$1.45 million in 2008, and minor increases in compensation and other operating expense. The increase was offset by the effect of legal and settlement costs of \$925,000 related to the settlement of certain litigation in 2008.

Research and Development

We incurred product development and research costs related to the commercial development, patent approval and regulatory approval of new products, including SFP, aggregating approximately \$6.5 million and \$3.8 million in 2009 and 2008, respectively. Costs incurred in both 2009 and 2008 were primarily for conducting human clinical trials of SFP.

Interest Expense, Net

Net interest expense in 2009 increased by \$241,000 compared to 2008 primarily due to a \$268,000 reduction in interest income from our cash investments as a result of lower investable funds and a substantially lower interest rate environment in 2009 compared to 2008. The investment of the proceeds of the October 2009 equity offering in short term investments had an immaterial effect on interest income in 2009 and is not expected to cause interest income to increase significantly due to the very low short term interest rate environment.

Income Tax Expense

We have substantial tax loss carryforwards from our earlier losses. We have not recorded a federal income tax benefit from either our prior losses or our current year losses because we might not realize the carryforward benefit of the

remaining losses.

For the year ended December 31, 2008 compared to the year ended December 31, 2007

Sales

For the year ended December 31, 2008, our sales were \$51.6 million, an increase of \$8.6 million or 20.0% over sales for the year ended December 31, 2007. This increase was due to growth in both our domestic sales of \$5.5 million or 13.4% and in our international sales of \$3.1 million or 160%. Our domestic sales growth was largely due to the

Table of Contents

impact of business acquired following the exit of Gambro from the dialysis concentrate market in early 2007. Our international sales growth included expansion to new markets and our total international business increased to 10% of total sales in 2008 from 5% of sales in 2007. We realized unit volume sales growth of approximately 15% in our concentrate product lines which accounted for the majority of our sales growth in 2008 compared to 2007 with the remainder of our sales growth primarily due to increased prices. Our unit volume sales growth was due to higher international demand for our concentrate product lines and domestically, an increase in the number of clinics we service.

Gross Profit

Our gross profit in 2008 was \$2.5 million compared to \$2.9 million in 2007 which included the reclassification of certain expenses to cost of sales from SG&A expense for both periods to conform with the current year presentation. While we realized higher sales in 2008, the impact of cost increases for chemicals, packaging and fuel more than offset the beneficial impact of higher selling prices and increased sales volumes. We experienced unprecedented increases in our key cost drivers in 2008 continuing the trends experienced in 2007. We also incurred cost increases in the second half of 2008 relating to our operational improvements discussed above that adversely affected our gross profit in 2008, some of which increases, such as the costs relating to additional human resources and information technology, will continue to affect our operating expenses in future periods. As a result, our gross profit margins decreased to 4.8% in 2008 from 6.7%. We experienced substantially higher costs in our key chemical ingredients in 2008 and our fuel costs increased 1.6% as a percent of domestic sales in 2008 compared to 2007. The weighted average market price of domestic diesel fuel increased approximately 32% in 2008 compared to 2007 based on Department of Energy diesel fuel statistics.

Prices for several of our key raw material ingredients decreased substantially at the end of 2008. Beginning in 2009, we negotiated new annual contracts for certain key chemicals at substantially lower prices than paid in the fourth quarter of 2008.

Selling, General and Administrative Expenses

Selling, general and administrative, or SG&A, expenses were \$6.8 million or 13.1% of sales in 2008 compared to 7.5% of sales in 2007, including the reclassification for both periods of certain expenses to cost of sales adjusted to conform to the current year presentation. SG&A costs increased \$3.5 million in 2008 compared to 2007. In 2008, SG&A included non-cash charges for equity related compensation of \$1.45 million, an increase of \$1.2 million in 2008 compared to 2007. In addition, we settled a legal dispute with a former landlord for \$750,000 and incurred overall costs of \$925,000 related to this litigation in 2008. Approximately half of the remaining increase in SG&A of \$1.4 million was due to increased costs for human resources. We made a substantial investment in information technology and the associated costs increased approximately \$0.2 million compared to 2007. We also began to increase our public relations and investor relations activities pertaining to SFP and increased our related spending by approximately \$0.2 million compared to 2007. In addition, we incurred approximately \$0.1 million in additional costs associated with the audit of our internal controls by our independent accounting firm for the first time in 2008.

Research and Development

We incurred product development and research costs related to the commercial development, patent approval and regulatory approval of new products, including SFP, aggregating approximately \$3.8 million and \$3.3 million in 2008 and 2007, respectively. Costs incurred in 2008 were primarily for conducting human clinical trials of SFP. Expenditures in 2007 included expenditures for non-clinical testing and costs related to preparation for human clinical testing of SFP.

Interest Expense, Net

Net interest income in 2008 increased by \$332,000 compared to 2007 primarily due to investment income from our cash investments following our equity offering in late 2007 and, to a lesser extent, to a decrease in interest expense because of lower overall borrowings.

Table of Contents

Income Tax Expense

We have substantial tax loss carryforwards from our earlier losses. We have not recorded a federal income tax benefit from either our prior losses or our current year losses because we might not realize the carryforward benefit of the remaining losses.

Critical Accounting Estimates and Judgments

Our consolidated financial statements and accompanying notes are prepared in accordance with accounting principles generally accepted in the United States of America. These accounting principles require us to make estimates, judgments and assumptions that affect the reported amounts of revenues, expenses, assets, liabilities, and contingencies. All significant estimates, judgments and assumptions are developed based on the best information available to us at the time made and are regularly reviewed and updated when necessary. Actual results will generally differ from these estimates. Changes in estimates are reflected in our financial statements in the period of change based upon on-going actual experience, trends, or subsequent realization depending on the nature and predictability of the estimates and contingencies.

Interim changes in estimates are generally applied prospectively within annual periods. Certain accounting estimates, including those concerning revenue recognition, allowance for doubtful accounts, impairments of long-lived assets, and accounting for income taxes, are considered to be critical in evaluating and understanding our financial results because they involve inherently uncertain matters and their application requires the most difficult and complex judgments and estimates. These are described below. For further information on our accounting policies, see Note 2 to our Consolidated Financial Statements.

Revenue recognition

We recognize revenue at the time we transfer title to our products to our customers consistent with generally accepted accounting principles. Our products are generally sold domestically on a delivered basis and as a result we do not recognize revenue until delivered to the customer with title transferring upon completion of the delivery. For our international sales, we recognize revenue upon the transfer of title as defined by standard shipping terms and conventions uniformly recognized in international trade.

Allowance for doubtful accounts

Accounts receivable are stated at invoice amounts. The carrying amount of trade accounts receivable is reduced by an allowance for doubtful accounts that reflects our best estimate of accounts that may not be collected. We review outstanding trade account receivable balances and based on our assessment of expected collections, we estimate the portion, if any, of the balance that may not be collected as well as a general valuation allowance for other accounts receivable based primarily based on historical experience. All accounts or portions thereof deemed to be uncollectible are written off to the allowance for doubtful accounts. If we underestimate the allowance, we would incur a current period expense and could have a material adverse effect on earnings.

Impairments of long-lived assets

We account for impairment of long-lived assets, which include property and equipment, amortizable intangible assets and goodwill, in accordance with authoritative accounting pronouncements. An impairment review is performed annually or whenever a change in condition occurs which indicates that the carrying amounts of assets may not be recoverable. Such changes may include changes in our business strategies and plans, changes to our customer contracts, changes to our product lines and changes in our operating practices. We use a variety of factors to assess the

realizable value of long-lived assets depending on their nature and use.

Goodwill is not amortized; however, it must be tested for impairment at least annually. The goodwill impairment analysis is based on the fair market value of our common shares. Amortization continues to be recorded for other intangible assets with definite lives over the estimated useful lives. Intangible assets subject to amortization are reviewed for potential impairment whenever events or circumstances indicate that carrying amounts may not be recoverable based on future cash flows. If we determine that goodwill has been impaired, the change in value will be accounted for as a current period expense and could have a material adverse effect on earnings.

Table of Contents

Accounting for income taxes

We estimate our income tax provision to recognize our tax expense and our deferred tax liabilities and assets for future tax consequences of events that have been recognized in our financial statements using current enacted tax laws. Deferred tax assets must be assessed based upon the likelihood of recoverability from future taxable income and to the extent that recovery is not likely, a valuation allowance is established. The allowance is regularly reviewed and updated for changes in circumstances that would cause a change in judgment about whether the related deferred tax asset may be realized. These calculations and assessments involve complex estimates and judgments because the ultimate tax outcome can be uncertain and future events unpredictable. If we determine that the deferred tax asset will be realized in the future, it may result in a material beneficial effect on earnings.

Liquidity and Capital Resources

Our strategy is centered on obtaining regulatory approval to market SFP and developing other high potential drug candidates, while also expanding our dialysis products business. We expect to expend substantial amounts in support of our clinical development plan and regulatory approval of SFP and its extensions. These initiatives will require the expenditure of substantial cash resources.

In October 2009, we raised \$20.4 million in equity capital, net of related expenses, primarily for the purpose of funding the clinical development and FDA approval of SFP. We estimate that we will spend \$18 million on our SFP Phase III clinical development program and FDA approval activities and other development initiatives over the next two years. Positive cash flows from operations should reduce our overall use of cash going forward.

We recently completed our Phase IIb clinical trial for SFP and plan to seek FDA approval to conduct Phase III clinical trials for SFP. We anticipate that costs to complete the remaining planned clinical trials for SFP and obtain FDA approval to market SFP will total approximately \$15 million.

Our cash resources include cash generated from our business operations and the proceeds from our equity offerings in 2007 and 2009. Our current assets exceeded our current liabilities by over \$24.4 million as of December 31, 2009 and included \$23 million in cash and cash equivalents. In 2009, we realized \$20.5 million in cash from financing activities while using \$1.6 million in investing activities, primarily on capital spending, and also using \$1.4 million in operating activities. Cash used in operations of \$1.4 million was net of \$6.5 million in research and development expenditures. Impacting the cash generated from business operations was a \$1.7 million reduction in accounts receivable from 2008 with approximately \$1 million of the increase in cash due to earlier than expected cash receipts from a customer at year end.

We believe our cash resources are sufficient to fund our anticipated research and development activities as well as our ordinary course operating cash requirements in 2010 and 2011. We expect to generate positive cash flow from operations in 2010, excluding the effect of our research and development expenses assuming stable operating results and relative stability in the markets for our key raw materials. However, if we use more cash than anticipated for SFP development, or are required to do more testing than expected or if the assumptions underlying our cash flow projections for 2010 and 2011 prove to be incorrect, we may need to obtain additional cash, such as through equity financing, debt financing of capital expenditures or a line of credit, to supplement our working capital. Alternatively, we may seek to enter into development arrangements with an international partner in order to fully execute our strategic plan. We may also evaluate alternative sources of business development funding, licensing agreements with international marketing partners, sub-licensing of certain products for certain markets and other potential funding sources.

Contractual Obligations

The following table details our contractual obligations as of December 31, 2009:

Contractual Obligations	Total	Payments due by period			More than 5 years
		Less than 1 year	1-3 years	3-5 years	
Capital leases	\$ 65,789	\$ 45,806	\$ 19,983		
Operating leases	\$ 3,510,840	\$ 1,655,687	\$ 1,648,141	\$ 207,012	
Purchase obligations	\$ 4,500	\$ 4,500			
Total	\$ 3,581,129	\$ 1,705,993	\$ 1,668,124	\$ 207,012	

Table of Contents

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a material effect on our financial condition.

Item 7A. *Quantitative and Qualitative Disclosures about Market Risk.*

Interest Rate Risk

Our current exposure to interest rate risk is limited to changes in interest rates on short term investments of cash. As of December 31, 2009, we had \$20.5 million in short term investments in a money market fund.

A hypothetical 100 basis point increase in market interest rates for short term liquid investments would increase our annualized interest income by approximately \$0.2 million, assuming we invested \$20.5 million in cash and that level remained constant for the year. We did not perform an analysis of a 100 basis point decrease in market interest rates as such an analysis would be meaningless.

Foreign Currency Exchange Rate Risk

Our international business is conducted in U.S. dollars. It has not been our practice to hedge the risk of appreciation of the U.S. dollar against the predominant currencies of our trading partners. We have no significant foreign currency exposure to foreign supplied materials, and an immediate 10% strengthening or weakening of the U.S. dollar would not have a material impact on our shareholders' equity or net income.

Item 8. *Financial Statements.*

The Consolidated Financial Statements of the Registrant required by this item are set forth on pages F-1 through F-19 and incorporated herein by reference.

Item 9. *Changes In and Disagreements with Accountants on Accounting and Financial Disclosure.*

None.

Item 9A. *Controls and Procedures.*

Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure material information required to be disclosed in our reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required financial disclosure. In designing and evaluating the disclosure controls and procedures, we recognized that a control system, no matter how well designed and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within a company have been detected. Management necessarily was required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As of the end of the period covered by this report, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective at the reasonable assurance level.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. We maintain internal control over financial reporting designed to provide reasonable assurance, not absolute,

Table of Contents

regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate. Therefore, internal control over financial reporting determined to be effective provides only reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Under the supervision and with the participation of our Chief Executive Officer and Chief Financial Officer, management evaluated the effectiveness of our internal control over financial reporting as of December 31, 2009. In making its assessment of internal control over financial reporting, management used the criteria described in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Our evaluation included documenting, evaluating and testing of the design and operating effectiveness of our internal control over financial reporting. Based on this evaluation, we concluded that the Company’s internal control over financial reporting was effective as of December 31, 2009.

Plante & Moran, PLLC, an independent registered public accounting firm, as auditors of our consolidated financial statements, has issued an attestation report on the effectiveness of our internal control over financial reporting as of December 31, 2009. Plante & Moran, PLLC’s report, which expresses an unqualified opinion on the effectiveness of our internal control over financial reporting, is included herein.

Changes in Internal Controls

There was no change in our internal control over financial reporting identified in connection with the Company’s evaluation of such internal controls that occurred during our fiscal quarter ended December 31, 2009 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. *Other Information.*

Table of Contents**Securities Authorized for Issuance Under Equity Compensation Plans**

The following table summarizes our compensation plans, including individual compensation arrangements, under which our equity securities are authorized for issuance as of December 31, 2009:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) (c)
Equity compensation plans approved by security holders	4,441,500	\$ 3.95	473,333
Equity compensation plans not approved by security holders	1,160,200	\$ 5.84	- 0 -
Total	5,601,700	\$ 4.32	473,333

In 2007, 2008 and 2009, we issued warrants to purchase common shares pursuant to compensation arrangements with four non-employee consultants who provide (or provided) services to us, including providing investor relations consulting services and introducing the Company to potential licensing partners and acquisition candidates and acting as a liaison to the equity investment community. These were not issued under a preexisting plan and shareholder approval for these transactions was not required or sought. The exercise price and the number of shares of common stock purchasable upon exercise of the warrants are subject to adjustment in certain events including: (a) a stock dividend payable in common stock, stock split, or subdivision of our common stock; and (b) reclassification of our common stock or any reorganization, consolidation, merger, or sale, lease, license, exchange or other transfer of all or substantially all of the business and/or assets of the Company.

As of October 3, 2007, we entered into a consulting agreement pursuant to which we have issued warrants to acquire 135,000 Common Shares. The warrants were earned at the rate of 15,000 warrants per month of service. The first 90,000 warrants that were earned have an exercise price of \$7.00 per share and the remaining 45,000 warrants have an exercise price of \$7.50 per share and in each case are exercisable for cash. The warrants expire at the close of business on October 3, 2011. These warrants become exercisable on the first anniversary of the date on which they are earned and may be exercised in whole or in part at any time until their expiration. The Common Shares underlying these warrants have been registered for resale by the holder under the Securities Act of 1933.

On November 28, 2007, we entered into an agreement pursuant to which we issued warrants to acquire 80,000 Common Shares at an exercise price of \$10.00 per share, exercisable for cash at any time during the period from November 28, 2008 to November 28, 2012. The Common Shares underlying these warrants have been registered for resale by the holder under the Securities Act of 1933.

On May 28, 2008, we entered into an advisory agreement pursuant to which we issued warrants to acquire 100,000 Common Shares. The warrants were immediately earned and will become exercisable on May 28, 2009. The warrants will expire on the earlier of (i) May 28, 2012, or (ii) the termination of the agreement prior to May 28, 2009 (A) by us due to a material breach of the agreement by the consultant or (B) by the consultant. The warrants have an exercise price of \$9.00 per share and may be exercised on a cashless basis or for cash. The Common Shares underlying these warrants have been registered for resale by the holder under the Securities Act of 1933.

On September 30, 2008, we entered into an advisory agreement pursuant to which we issued warrants to acquire 60,000 Common Shares. The warrants were earned in 20,000 share increments on September 30, 2008, January 1, 2009 and July 1, 2009. The warrants became exercisable on January 1, 2010 and will expire on September 30, 2012. Upon a termination of the agreement (A) by us due to a material breach of the agreement by the consultant or (B) by the consultant, any unearned warrants at the time of such termination would have expired. The warrants have an exercise price of \$6.50 per share and may be exercised on a cashless basis or for cash. The Common Shares underlying these warrants have been registered for resale by the holder under the Securities Act of 1933.

Table of Contents

In November 2008, the Company entered into an advisory agreement, as amended, pursuant to which we issued warrants to acquire a total of 700,000 Common Shares. All of the warrants were immediately earned. Warrants to purchase 300,000 Common Shares at an exercise price of \$1.99 per share became exercisable on November 5, 2009, and will expire on November 5, 2011. The warrants would have expired upon an earlier termination of the agreement prior to November 5, 2009 (A) by us due to a material breach of the agreement by the consultant or (B) by the consultant. Warrants to purchase 400,000 Common Shares will become exercisable on November 5, 2010, and will expire on the earlier of (i) November 5, 2011, or (ii) the termination of the agreement prior to November 5, 2010 (A) by us due to a material breach of the agreement by the consultant or (B) by the consultant. One-half of these warrants have an exercise price of \$4.54, and the remainder have an exercise price of \$7.00 per share. The warrants are exercisable only for cash. The Common Shares underlying these warrants have been registered for resale by the holder under the Securities Act of 1933.

On September 29, 2009, the Company entered into a placement agency agreement with two co-placement agents related to the registered direct offering by the Company of Common Shares and warrants to purchase Common Shares that closed on October 5, 2009. At the closing, the Company issued to the placement agents warrants to purchase 85,200 Common Shares, which is 3.0% of the Common Shares sold in the offering, at an exercise price of \$9.55 per share. These warrants are exercisable commencing six months from the date of issuance thereof and expire on the third anniversary of the date of issuance thereof. These warrants and the underlying shares were issued pursuant to registration statement on Form S-3 (File No. 333-160791) filed with the SEC.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Rockwell Medical Technologies, Inc. and Subsidiary

We have audited the accompanying consolidated balance sheets of Rockwell Medical Technologies, Inc. and Subsidiary (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2009. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above presents fairly, in all material respects, the consolidated financial position of Rockwell Medical Technologies, Inc. and Subsidiary at December 31, 2009 and 2008, and the consolidated results of its operations and its cash flows for each of the years in the three-year period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Rockwell Medical Technologies, Inc. and Subsidiary's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 11, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders
Rockwell Medical Technologies, Inc. and Subsidiary

We have audited Rockwell Medical Technologies, Inc. and Subsidiary's internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Rockwell Medical Technologies, Inc. and Subsidiary maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Rockwell Medical Technologies, Inc. and Subsidiary (the Company) as of December 31, 2009 and 2008, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2009 and related financial statement schedule and our report dated March 11, 2010 expressed an unqualified opinion thereon.

Table of Contents

ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. Description of Business

We manufacture, sell and distribute hemodialysis concentrates and other ancillary medical products and supplies used in the treatment of patients with End Stage Renal Disease, or ESRD . We supply our products to medical service providers who treat patients with kidney disease. Our products are used to cleanse patients' blood and replace nutrients lost during the kidney dialysis process. We primarily sell our products in the United States.

We are regulated by the Federal Food and Drug Administration under the Federal Drug and Cosmetics Act, as well as by other federal, state and local agencies. We have received 510(k) approval from the FDA to market hemodialysis solutions and powders. We also have 510(k) approval to sell our Dri-Sate Dry Acid Concentrate product line and our Dri-Sate Mixer.

We have obtained global licenses for certain dialysis related drugs which we are developing and seeking FDA approval to market. We plan to devote substantial resources to the development, testing and FDA approval of our lead drug candidate.

2. Summary of Significant Accounting Policies

Basis of Presentation

Our consolidated financial statements include our accounts and the accounts for our wholly owned subsidiary, Rockwell Transportation, Inc.

All intercompany balances and transactions have been eliminated in consolidation.

Revenue Recognition

We recognize revenue at the time we transfer title to our products to our customers consistent with generally accepted accounting principles. Generally, we recognize revenue when our products are delivered to our customer's location consistent with our terms of sale. We recognize revenue for international shipments when title has transferred consistent with standard terms of sale.

We require certain customers, mostly international customers, to pay for product prior to the transfer of title to the customer. Deposits received from customers and payments in advance for orders are recorded as liabilities under Customer Deposits until such time as orders are filled and title transfers to the customer consistent with our terms of sale. At December 31, 2009 and 2008 we had customer deposits of \$250,915 and \$245,186, respectively.

Shipping and Handling Revenue and Costs

Our products are generally priced on a delivered basis with the price of delivery included in the overall price of our products which is reported as sales. Separately identified freight and handling charges are also included in sales.

We include shipping and handling costs, including expenses of Rockwell Transportation, Inc., in cost of sales.

Cash and Cash Equivalents

We consider cash on hand, money market funds, unrestricted certificates of deposit and short term marketable securities with an original maturity of 90 days or less as cash and cash equivalents.

Accounts Receivable

Accounts receivable are stated at invoice amounts. The carrying amount of trade accounts receivable is reduced by an allowance for doubtful accounts that reflects our best estimate of accounts that may not be collected. We review outstanding trade accounts receivable balances and based on our assessment of expected collections, we estimate the portion, if any, of the balance that may not be collected as well as a general valuation allowance for

F-7

Table of Contents

ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

other accounts receivable based primarily on historical experience. All accounts or portions thereof deemed to be uncollectible are written off to the allowance for doubtful accounts.

Inventory

Inventory is stated at the lower of cost or net realizable value. Cost is determined on the first-in first-out (FIFO) method.

Property and Equipment

Property and equipment are recorded at cost. Expenditures for normal maintenance and repairs are charged to expense as incurred. Property and equipment are depreciated using the straight-line method over their useful lives, which range from three to ten years. Leasehold improvements are amortized using the straight-line method over the shorter of their useful lives or the related lease term.

Licensing Fees

License fees related to the technology, intellectual property and marketing rights for dialysate iron covered under certain issued patents have been capitalized and are being amortized over the life of the related patents which is generally 17 years.

Goodwill, Intangible Assets and Long Lived Assets

The recorded amounts of goodwill and other intangibles from prior business combinations are based on management's best estimates of the fair values of assets acquired and liabilities assumed at the date of acquisition. Goodwill is not amortized; however, it must be tested for impairment at least annually. Amortization continues to be recorded for other intangible assets with definite lives over their estimated useful lives. Intangible assets subject to amortization are reviewed for potential impairment whenever events or circumstances indicate that carrying amounts may not be recoverable.

An impairment review of goodwill, intangible assets, and property and equipment is performed annually or whenever a change in condition occurs which indicates that the carrying amounts of assets may not be recoverable. Such changes may include changes in our business strategies and plans, changes to our customer contracts, changes to our product lines and changes in our operating practices. We use a variety of factors to assess the realizable value of long-lived assets depending on their nature and use.

The useful lives of other intangible assets are based on management's best estimates of the period over which the assets are expected to contribute directly or indirectly to our future cash flows. Management annually evaluates the remaining useful lives of intangible assets with finite useful lives to determine whether events and circumstances warrant a revision to the remaining amortization periods. It is reasonably possible that management's estimates of the carrying amount of goodwill and the remaining useful lives of other intangible assets may change in the near term.

Income Taxes

We account for income taxes in accordance with the provisions of ASC 740-10, *Income Taxes*. A current tax liability or asset is recognized for the estimated taxes payable or refundable on tax returns for the year. Deferred tax liabilities or assets are recognized for the estimated future tax effects of temporary differences between book and tax accounting and operating loss and tax credit carryforwards. The Company recognizes interest and penalties accrued related to unrecognized tax benefits as income tax expense.

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)*****Research and Product Development***

We recognize research and product development costs as expenses as incurred. We incurred product development and research costs related to the commercial development, patent approval and regulatory approval of new products, including iron supplemented dialysate, aggregating approximately \$6,454,000, \$3,830,000 and \$3,264,000 in 2009, 2008 and 2007, respectively.

We are conducting human clinical trials on iron supplemented dialysate and we recognize the costs of the human clinical trials as the costs are incurred and services performed over the duration of the trials.

Share Based Compensation

We measure the cost of employee services received in exchange for equity awards, including stock options, based on the grant date fair value of the awards in accordance with ASC 718-10, *Compensation - Stock Compensation*. The cost of equity based compensation is recognized as compensation expense over the vesting period of the awards.

We estimate the fair value of compensation involving stock options utilizing the Black-Scholes option pricing model. This model requires the input of several factors such as the expected option term, expected volatility of our stock price over the expected option term, and an expected forfeiture rate, and is subject to various assumptions. We believe the valuation methodology is appropriate for estimating the fair value of stock options we grant to employees and directors which are subject to ASC 718-10 requirements. These amounts are estimates and thus may not be reflective of actual future results or amounts ultimately realized by recipients of these grants.

Employee Retirement Plans

We are the sponsor of a non-contributory 401(k) Employee Savings Plan.

Net Earnings per Share

We computed our basic earnings (loss) per share using weighted average shares outstanding for each respective period. Diluted earnings per share also reflect the weighted average impact from the date of issuance of all potentially dilutive securities, consisting of stock options and common share purchase warrants, unless inclusion would have had an antidilutive effect. Actual weighted average shares outstanding used in calculating basic and diluted earnings per share were:

	2009	2008	2007
Basic Weighted Average Shares Outstanding	14,709,016	13,836,435	11,771,381
Effect of Dilutive Securities	-0-	-0-	-0-
Diluted Weighted Average Shares Outstanding	14,709,016	13,836,435	11,771,381

Edgar Filing: IRON MOUNTAIN INC - Form 10-Q

For 2009, 2008 and 2007, the dilutive effect of stock options and common share purchase warrants have not been included in the average shares outstanding for the calculation of diluted loss per share as the effect would be anti-dilutive as a result of our net loss in these periods.

At December 31, 2009, potentially dilutive securities comprised 4,441,500 stock options exercisable at prices from \$.55 to \$8.35 , 3,318,569 common share purchase warrants exercisable at prices ranging from \$1.99 to \$10.00 and 150,000 restricted common shares.

At December, 31, 2008, potentially dilutive securities comprised 4,063,031 stock options exercisable at prices from \$.55 to \$6.50 , 2,114,169 common share purchase warrants exercisable at prices ranging from \$1.99 to \$10.00 and 150,000 restricted common shares.

F-9

Table of Contents

ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

At December, 31, 2007, potentially dilutive securities comprised 3,807,035 stock options exercisable at prices from \$.55 to \$6.50 and 1,204,169 common share purchase warrants exercisable at prices ranging from \$7.00 to \$10.00.

Disclosures About Fair Value of Financial Instruments

The carrying amounts of all significant financial instruments, comprising cash and cash equivalents, accounts receivable, and accounts payable approximate fair value because of the short maturities of these instruments.

Fair Market Value Measurements

On January 1, 2008, we adopted the methods of fair value as described in ASC 820-10, *Fair Value Measurements and Disclosures* to value our financial assets and liabilities. In order to increase consistency and comparability in fair value measurements, ASC 820-10 establishes a fair value hierarchy that prioritizes observable and unobservable inputs used to measure fair value into three broad levels, which are described below:

- Level 1:* Quoted prices (unadjusted) in active markets that are accessible at the measurement date for assets or liabilities. The fair value hierarchy gives the highest priority to Level 1 inputs.
- Level 2:* Observable prices that are based on inputs not quoted in active markets, but corroborated by market data.
- Level 3:* Unobservable inputs are used when little or no market data is available. The fair value hierarchy gives the lowest priority to Level 3 inputs.

In determining fair value, we utilize valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible as well as considering counterparty credit risk in its assessment of fair value. We value our cash and cash equivalents using Level 1 inputs in the fair value hierarchy as these short term investments are immediately available at our direction and without market risk to principal. We do not have other financial assets that would be characterized as Level 2 or Level 3 assets.

ASC 820-10 was effective for non-financial assets and liabilities for the year beginning January 1, 2009. There was no impact on our consolidated financial statements as a result of adopting fair value measurements for non-financial assets and liabilities for the year ended December 31, 2009.

We chose not to elect the fair value option as prescribed by ASC 820-10 for our financial assets and liabilities that had not been previously carried at fair value. Therefore, material financial assets and liabilities not carried at fair value, such as our trade accounts receivable and payable are still reported at their face values.

Estimates in Preparation of Financial Statements

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

Reclassifications

The Company has reclassified certain expenses from Selling, General and Administrative Expense to Cost of Sales in the 2008 and 2007 consolidated income statements to conform with the current year presentation. The impact of the change was not material.

F-10

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****3. Significant Market Segments**

We operate in one market segment which involves the manufacture and distribution of hemodialysis concentrates, dialysis kits and ancillary products used in the dialysis process to hemodialysis clinics. For the years ended December 31, 2009, 2008 and 2007, one customer, DaVita, Inc., accounted for 50%, 51% and 52% of our sales, respectively. Our accounts receivable from this customer were \$1,267,500 and \$2,620,000 as of December 31, 2009 and 2008, respectively. We are dependent on this key customer and the loss of its business would have a material adverse effect on our business, financial condition and results of operations. No other customers accounted for more than 10% of our sales.

The majority of our international sales in each of the last three years were sales to domestic distributors that were resold to end users outside the United States. Our sales to foreign customers and distributors amounted to less than 5% of our total sales in each of those years and we have no assets outside the United States. Our total international sales, including sales to domestic distributors for resale outside the United States, aggregated 12%, 10% and 5% of overall sales in 2009, 2008 and 2007, respectively.

4. Inventory

Components of inventory as of December 31, 2009 and 2008 are as follows:

	2009	2008
Raw Materials	\$ 1,051,781	\$ 1,316,875
Work in Process	196,603	291,937
Finished Goods	1,839,968	1,552,813
Total	\$ 3,088,352	\$ 3,161,625

5. Property and Equipment

Major classes of property and equipment, stated at cost, as of December 31, 2009 and 2008 are as follows:

	2009	2008
Leasehold Improvements	\$ 380,497	\$ 279,382
Machinery and Equipment	5,283,703	4,605,251
Information Technology & Office Equipment	1,750,485	1,433,830
Laboratory Equipment	522,270	365,515
Transportation Equipment	425,020	407,802

Edgar Filing: IRON MOUNTAIN INC - Form 10-Q

Accumulated Depreciation	8,361,975 (4,730,426)	7,091,780 (3,842,777)
Net Property and Equipment	\$ 3,631,549	\$ 3,249,003

Included in the table above are assets under capital lease obligations as follows:

	2009	2008
Assets under Capital Lease Obligations	\$ 658,028	\$ 665,454
Net Book Value of Assets under Capital Lease Obligations	318,350	373,013

Depreciation expense was \$1,202,438 for 2009, \$881,025 for 2008 and \$754,150 for 2007.

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****6. Goodwill and Intangible Assets**

Total goodwill was \$920,745 at December 31, 2009 and 2008. We completed our annual impairment tests as of November 30, 2009 and 2008, and determined that no adjustment for impairment of goodwill was required.

We have entered into several global licensing agreements for certain patents covering therapeutic drug compounds and vitamins to be delivered using our dialysate product lines. We intend to seek FDA approval for these products. We have capitalized the licensing fees paid for the rights to use this patented technology as an intangible asset.

As of December 31, 2009 we had capitalized licensing fees of \$375,387, net of accumulated amortization of \$161,050.

As of December 31, 2008 we had capitalized licensing fees of \$370,438, net of accumulated amortization of \$129,782.

During 2007, we terminated a licensing agreement related to a patent which we determined we would not benefit from. As a result, we determined that the remaining unamortized costs of that licensing agreement of \$146,355 were impaired and expensed this amount which is included in research and product development expenses for 2007 in the consolidated income statement.

Our policy is to amortize licensing fees over the life of the patents pertaining to the licensing agreements. We recognized amortization expense of \$31,268 in 2009, \$30,693 in 2008, and \$49,223 in 2007. Estimated amortization expense for licensing fees for 2010 through 2016 is approximately \$32,000 per year. One of the licensing agreements requires additional payments upon achievement of certain milestones.

7. Capital Lease Obligations

We entered into capital lease obligations primarily related to equipment with a fair market value aggregating \$25,400 and \$23,220 for the years ended December 31, 2009 and 2008, respectively. In addition, we have other capital lease obligations related to financing other equipment. These capital lease obligations require even monthly installments through 2012 and interest rates on the leases range from 4% to 10.5%. These obligations under capital leases had outstanding balances of \$62,000 and \$218,053 at December 31, 2009 and 2008, respectively.

Future minimum lease payments under capital lease obligations are:

Year Ending December 31, 2010	\$ 45,806
Year Ending December 31, 2011	16,447
Year Ending December 31, 2012	3,536
Total minimum payments on capital lease obligations	65,789
Interest	(3,789)

Present value of minimum lease payments	62,000
Current portion of capital lease obligations	(42,938)
Long-term capital lease obligations	\$ 19,062

8. Operating Leases

We lease our production facilities and administrative offices as well as certain equipment used in our operations. The lease terms range from monthly to seven years. Lease payments under all operating leases were \$2,191,884, \$2,132,731 and \$1,833,670 for the years ended December 31, 2009, 2008 and 2007, respectively.

F-12

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

We have long term leases on two buildings that are each approximately 51,000 square feet. Those leases expire in August 2010. We also have a lease on a building that is approximately 57,000 square feet that expires on February 28, 2011.

Future minimum rental payments under operating lease agreements are as follows:

Year ending December 31, 2010	\$ 1,655,687
Year ending December 31, 2011	893,133
Year ending December 31, 2012	755,008
Year ending December 31, 2013	193,410
Year ending December 31, 2014	13,602
Total	\$ 3,510,840

9. Income Taxes

A reconciliation of income tax expense at the statutory rate to income tax expense at our effective tax rate is as follows:

	2009	2008	2007
Tax Expense Computed at 34% of Pretax Income	\$ (1,870,000)	\$ (2,674,000)	\$ (1,264,000)
Effect of Permanent Differences Principally Related to Non-deductible expenses			
Effect of Change in Valuation Allowance	(1,870,000)	(2,674,000)	(1,264,000)
Total Income Tax Benefit	\$ -0-	\$ -0-	\$ -0-

The details of the net deferred tax asset are as follows:

	December 31,	
	2009	2008
Deferred tax assets:		
Net Operating Loss Carryforward	\$ 10,181,000	\$ 8,542,000
Stock Based Compensation	610,000	379,000
Accrued Expenses	66,000	27,000
Inventories	74,000	110,000
Accounts Receivable	11,000	33,000

Edgar Filing: IRON MOUNTAIN INC - Form 10-Q

Subtotal	10,942,000	9,091,000
Deferred Tax Liabilities :		
Tax over Book Depreciation	217,000	219,000
Goodwill & Intangible Assets	224,000	188,000
Prepaid Expenses	20,000	26,000
Subtotal	461,000	433,000
Subtotal	10,481,000	8,658,000
Valuation Allowance	(10,481,000)	(8,658,000)
Net Deferred Tax Asset	\$ -0-	\$ -0-

F-13

Table of Contents

ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Deferred tax assets result primarily from net operating loss carryforwards. For tax purposes, we have net operating loss carryforwards of approximately \$29,944,000 that expire between 2012 and 2029 with approximately \$975,000 expiring in 2012 and the remainder expiring between 2018 through 2029.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will be realized upon the generation of future taxable income during the periods in which those temporary differences become deductible. We recognized no income tax expense or benefit for the years ended December 31, 2009, 2008 and 2007. Due to anticipated spending on research and development over the next several years, coupled with our limited history of operating income and our net losses in 2009, 2008 and 2007, management has placed a full valuation allowance against the net deferred tax assets as of December 31, 2009 and 2008.

Since January 1, 2007, the Company has accounted for its uncertain tax positions in accordance with ASC 740-10, *Income Taxes* and the amount of unrecognized tax benefits related to tax positions is not significant at December 31, 2009 and 2008.

10. Capital Stock

Our authorized capital stock consists of 40,000,000 common shares, no par value per share, of which 17,200,442 shares were outstanding as of December 31, 2009, 14,104,690 shares were outstanding at December 31, 2008 and 13,815,186 shares were outstanding at December 31, 2007; 2,000,000 preferred shares, none of which were issued or outstanding at December 31, 2009, 2008 or 2007 and 1,416,664 shares of 8.5% non-voting cumulative redeemable Series A Preferred Shares, \$1.00 par value, of which none were outstanding at December 31, 2009, 2008 or 2007.

During 2009, we also issued 3,095,752 common shares and 1,204,400 common share purchase warrants and realized net cash proceeds of \$20,651,000. This total includes 2,840,000 common shares issued pursuant to a registered direct offering in October 2009 to institutional investors for which we received gross proceeds of \$22,000,000 and net proceeds of \$20,388,000 after deducting investment banking fees, legal, registration, accounting and other expenses related to this offering. This registered direct offering consisted of a unit priced at \$7.75, which included one common share and a warrant to purchase .38 common shares per unit at an exercise price of \$9.55 per share. For financial reporting purposes, the net proceeds were allocated between common stock and warrants on a relative fair value basis.

During 2009, we issued 255,752 common shares from the exercise of 333,198 stock options by employees and realized proceeds of \$262,654. The weighted average exercise price of options exercised was \$2.14.

During 2008, we issued 139,504 common shares as a result of the exercise of stock options by employees and realized proceeds of \$232,140 or \$1.66 per share on average. The Board of Directors approved restricted stock grants totaling 150,000 common shares in 2008.

During 2007, we issued 2,314,837 common shares and 1,079,169 common share purchase warrants and realized net cash proceeds of approximately \$13,200,000. This total includes 2,158,337 common shares issued pursuant to a private offering of our common shares with institutional investors for which we received gross proceeds of \$12,950,000. The private offering consisted of a unit priced at \$6.00, which included one common share and a warrant

to purchase one-half of a common share at an exercise price of \$7.18 per share. We realized net proceeds of \$12,743,000 after deducting legal, registration, accounting and other expenses related to this offering. The shares issued under this stock purchase agreement were later registered for resale and such registration statement was declared effective by the Securities and Exchange Commission on January 29, 2008. We were required to maintain the registration statement effective until either all registered shares were sold or January 29, 2010.

Table of Contents

ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

During 2007, we also issued 156,500 common shares as a result of the exercise of stock options by employees and realized proceeds of \$474,828 or \$3.03 per share on average.

Common Shares

Holders of the common shares are entitled to one vote per share on all matters submitted to a vote of our shareholders and are to receive dividends when and if declared by the Board of Directors. The Board is authorized to issue additional common shares within the limits of the Company's Articles of Incorporation without further shareholder action, subject to applicable stock exchange rules.

Warrants

We had 3,318,569 common share purchase warrants outstanding at December 31, 2009 of which 1,694,169 were exercisable as of December 31, 2009. During 2009, we issued 1,164,400 warrants pertaining to our registered direct offering, consisting of 1,079,200 warrants exercisable at \$9.55 with a five year term and 85,200 warrants exercisable at \$9.55 with a three year term. In addition, pursuant to an agreement executed in September 2008, 40,000 warrants issued in exchange for services were earned. These warrants have an exercise price of \$6.50 and expire on September 30, 2012.

We had 2,114,169 common share purchase warrants outstanding at December 31, 2008 of which 1,204,169 were exercisable as of December 31, 2008. During 2008, we issued 910,000 warrants, in exchange for services, that will be exercisable after time periods ranging from 1 to 2 years. Exercise prices for these warrants ranged from \$1.99 to \$9.00. Warrants issued in 2008 expire between October 3, 2011 and September 30, 2012.

As of December 31, 2007, we had 1,204,169 common share purchase warrants outstanding all of which were issued in 2007. Pursuant to a Securities Purchase Agreement dated November 28, 2007, we issued 1,079,169 warrants with an exercise price of \$7.18 and a five year term. The warrants are exercisable at any time during the period November 28, 2008 to November 28, 2012. Also, in conjunction with that offering, we issued 80,000 warrants to a placement agent with an exercise price of \$10.00 and that are exercisable until November 28, 2012.

In 2007, we also issued 135,000 warrants in exchange for services which were vested on a monthly basis over a one year period with 90,000 of such warrants exercisable at \$7.00 and 45,000 of such warrants exercisable at \$7.50. The warrants have a four year term expiring October 3, 2011. As of December 31, 2008, 90,000 of the warrants with an exercise price of \$7.00 and 45,000 of the warrants with an exercise price of \$7.50 were earned and vested. As of December 31, 2007, 45,000 of the warrants with an exercise price of \$7.00 were earned and vested.

Warrants were valued using the Black Scholes model. The net proceeds from our 2009 registered direct offering and the private placement of our common shares and common share purchase warrants in 2007 described above were prorated between the fair market value of our common shares issued and the Black Scholes valuation of the warrants. In 2009, 2008 and 2007 we recognized \$403,000, \$340,000 and \$86,000 in expense related to services provided in exchange for warrants. At December 31, 2009, the amount of unrecorded expense for services in exchange for warrants attributable to future periods was approximately \$487,000 which is expected to be amortized to expense on a straight line basis over the remaining service period in 2010.

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Outstanding warrants by exercise price consisted of the following as of December 31, 2009, 2008 and 2007:

Total		3,318,569	2,114,169	1,204,169

11. Long Term Incentive Plan & Stock Options***Long Term Incentive Plan & Stock Options***

The Board of Directors adopted the Rockwell Medical Technologies, Inc., 2007 Long Term Incentive Plan (LTIP) on April 11, 2007. The shareholders approved the LTIP on May 24, 2007 and approved amendments to the LTIP on May 23, 2008 and May 21, 2009. There are 2,500,000 common shares reserved for issuance under the LTIP. The Compensation Committee of the Board of Directors (the Committee) is responsible for the administration of the LTIP including the grant of stock based awards and other financial incentives including performance based incentives to employees, non-employee directors and consultants.

Upon approval of the LTIP, the 1997 Stock Option Plan (the Old Plan) was terminated as to future grants. No options were granted under the Old Plan after 2006.

The Committee determines the terms and conditions of options and other equity based incentives including, but not limited to, the number of shares, the exercise price, term of option and vesting requirements. The Committee approved stock option grants during 2009, 2008 and 2007 and restricted stock grants during 2008 under the LTIP. The stock option awards were granted with an exercise price equal to the market price of the Company's stock on the date of the grant. The options expire 10 years from the date of grant or upon termination of employment and vest in three equal annual installments beginning on the first anniversary of the date of grant.

We granted 150,000 restricted shares under the LTIP in 2008. Restricted stock was granted with half of the shares vesting after 18 months from the grant date and the remainder vesting after 36 months from the grant date with vesting conditioned upon continued employment with the Company. These restricted stock grants were valued at the market

price on the date of grant. For the years ended December 31, 2009 and 2008, we recognized \$154,438 and \$17,800 in compensation expense for restricted stock awards. The amount of unrecorded stock-based compensation expense for restricted stock awards attributable to future periods was approximately \$291,263 as of December 31, 2009.

Our standard stock option agreement allows for the payment of the exercise price of vested stock options either through cash remittance in exchange for newly issued shares, or through non-cash exchange of previously issued shares held by the recipient for at least six months in exchange for our newly issued shares. The latter method results in no cash being received by us, but also results in a lower number of total shares being outstanding subsequently as a direct result of this exchange of shares. Shares returned to us in this manner would be retired.

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

In 2009, 2008 and 2007, the Company received cash proceeds of \$262,654, \$232,140 and \$474,828, respectively, in exchange for shares issued upon the exercise of options during the year. No income tax benefits were recognized during 2009, 2008 and 2007 related to stock option activity as the Company has a full valuation allowance recorded against its deferred tax assets.

A summary of the status of the LTIP and the Old Plan is as follows:

	Shares	Weighted Average Exercise Price	Aggregate Intrinsic Value
Outstanding at December 31, 2006	3,219,235	2.68	\$ 14,313,218
Granted	785,000	6.43	
Exercised	(156,500)	3.03	\$ 342,853
Forfeited	(40,700)	5.26	
Outstanding at December 31, 2007	3,807,035	3.42	\$ 14,034,941
Granted	495,000	3.75	
Exercised	(139,504)	1.66	\$ 308,740
Forfeited	(99,500)	6.16	
Outstanding at December 31, 2008	4,063,031	3.44	\$ 4,557,158
Granted	805,000	6.22

As of December 31, 2009	1,305,000	

The per share weighted average fair market values at the date of grant for options granted to employees during the year ended December 31, 2009 was \$6.22. The fair market values of stock options granted during the year ended December 31, 2009 was determined using the Black Scholes option pricing model using the following assumptions: dividend yield of 0.0%, risk free interest rates of 2.1-3.2%, volatility of 65-66% and expected lives of 6 years. The per share weighted average fair market values at the date of grant for options granted to employees during the year ended December 31, 2008 was \$2.33. The fair market values of stock options granted during the year ended December 31, 2008 was determined using the Black Scholes option pricing model using the following assumptions: dividend yield of 0.0%, risk free interest rates of 2.4-3.4%, volatility of 67-73% and expected lives of 6 years. The per share weighted average fair market values at the date of grant for options granted to employees during the year ended December 31, 2007 was \$4.37. The fair market values of stock options granted during the year ended December 31, 2007 was determined using the Black Scholes option pricing model using the following assumptions: dividend yield of 0.0%, risk free interest rates of 3.7-4.3%, volatility of 75% and expected lives of 6 years.

We believe this valuation methodology is appropriate for estimating the fair value of stock options we grant to employees and directors which are subject to ASC 718-10 requirements. We primarily base our determination of expected volatility through our assessment of the historical volatility of our common shares. We do not believe that we are able to rely on our historical stock option exercise and post-vested termination activity to provide accurate data for estimating our expected term for use in determining the fair value of these options. Therefore, as allowed by Staff Accounting Bulletin (SAB) No. 107, *Share-Based Payment*, we have opted to use the simplified method for

estimating the expected option term equal to the midpoint between the vesting period and the contractual term. The contractual term of the option is 10 years from the date of grant and the vesting term of the option is three years from date of grant. Risk free interest rates utilized are based upon published U.S. Treasury yield curves at the date of the grant for the expected option term.

For the year ended December 31, 2009, we recognized compensation expense of \$1,795,246 related to options granted to employees under the LTIP with a corresponding credit to common stock. At December 31, 2009, the amount of unrecorded stock-based compensation expense for stock options attributable to future periods was approximately \$3,955,000 which is expected to be amortized to expense on a straight line basis over the remaining three year vesting period of the options.

For the year ended December 31, 2008, we recognized compensation expense of \$1,097,431 related to options granted to employees under the LTIP with a corresponding credit to common stock. At December 31, 2008, the amount of unrecorded stock-based compensation expense for stock options attributable to future periods was approximately \$2,935,000.

Table of Contents**ROCKWELL MEDICAL TECHNOLOGIES, INC. AND SUBSIDIARY****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

For the year ended December 31, 2007, we recognized compensation expense of \$57,938 related to options granted to employees in 2007 with a corresponding credit to common stock. At December 31, 2007, the amount of unrecorded stock-based compensation expense for stock options attributable to future periods was approximately \$3,253,000.

As of December 31, 2009, the remaining number of common shares available for equity awards under the LTIP was 473,333.
