OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-32929

MOSYS, Inc.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction
of Incorporation or organization)

77-0291941
(I.R.S. Employer
Identification Number)

3301 Olcott Street

Santa Clara, California, 95054

(Address of principal executive office and zip code)

(408) 418-7500

(Registrant's telephone number, including area code)

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/> (Do not check if a smaller reporting company)	Smaller reporting company <input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Edgar Filing: MoSys, Inc. - Form 10-Q

As of May 1, 2012, 38,744,929 shares of the Registrant's common stock, \$0.01 par value, were outstanding.

MOSYS, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. The Company and Summary of Significant Accounting Policies

The Company

MoSys, Inc. (the Company) was incorporated in California in September 1991, and reincorporated in September 2000 in Delaware. The Company has been designing, developing, marketing and licensing high-performance semiconductor memory and high-speed parallel and serial interface intellectual property (IP) used by the semiconductor industry and communications, networking and storage equipment manufacturers. In February 2010, the Company announced the commencement of a new product initiative to develop a family of integrated circuit (IC) products under the Bandwidth Engine product name. Bandwidth Engine ICs combine the Company's high-density embedded memory with its high-speed 10 Gigabits per second interface (I/O) technology and are initially being marketed to networking systems companies and designers of advanced systems on chips designs. The Company's strategy and primary business objective is to become a fabless semiconductor company focused on development and sale of Bandwidth Engine ICs. The Company's future success and ability to achieve and maintain profitability will be dependent on its success in developing a market for the Bandwidth Engine ICs. During 2011, the Company began to dedicate more of its engineering resources and the engineering budget to IC efforts and this trend will continue as the Company places more emphasis on IC product sales as opposed to IP sales.

The accompanying condensed consolidated financial statements of the Company have been prepared without audit in accordance with the rules and regulations of the Securities and Exchange Commission (SEC). The condensed consolidated balance sheet at December 31, 2011 has been derived from the audited consolidated financial statements at that date. Certain information and disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) have been condensed or omitted in accordance with these rules and regulations. The information in this report should be read in conjunction with the Company's consolidated financial statements and notes thereto included in its most recent annual report on Form 10-K filed with the SEC.

In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments (consisting only of normal recurring adjustments) necessary to summarize fairly the Company's financial position, results of operations and cash flows for the interim periods presented. The operating results for the three months ended March 31, 2012 are not necessarily indicative of the results that may be expected for the year ending December 31, 2012 or for any other future period.

Basis of Presentation

The condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation. The Company's fiscal year is the calendar year.

Use of Estimates

The preparation of financial statements in accordance with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses recognized during the reported period. Actual results could differ from those estimates.

Cash Equivalents and Investments

The Company has invested its excess cash in money market accounts, certificates of deposit, commercial paper, corporate debt, government agency and municipal debt securities and considers all highly liquid debt instruments purchased with an original maturity of three months or less to be cash equivalents. Investments with original maturities greater than three months and remaining maturities less than one year are classified as short-term investments. Investments with remaining maturities greater than one year are classified as long-term investments. Management generally determines the appropriate classification of securities at the time of purchase. All securities are classified as available-for-sale. The Company's available-for-sale short-term and long-term investments are carried at fair value, with the unrealized holding gains and losses reported in accumulated other comprehensive income (loss). Realized gains and losses and declines in the value judged to be other than temporary are included in the other income and expense, net line item in the condensed consolidated statements of operations and comprehensive loss. The cost of securities sold is based on the specific identification method.

Table of Contents

Fair Value Measurements

The Company measures the fair value of financial instruments using a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels, as follows:

Level 1 Inputs used to measure fair value are unadjusted quoted prices that are available in active markets for the identical assets or liabilities as of the reporting date.

Level 2 Pricing is provided by third party sources of market information obtained through the Company's investment advisors rather than models. The Company does not adjust for or apply any additional assumptions or estimates to the pricing information it receives from advisors. The Company's Level 2 securities include cash equivalents and available-for-sale securities, which consisted primarily of certificates of deposit, commercial paper, corporate debt, and government agency and municipal debt securities from issuers with high quality credit ratings. The Company's investment advisors obtain pricing data from independent sources, such as Standard & Poor's, Bloomberg and Interactive Data Corporation, and rely on comparable pricing of other securities because the Level 2 securities it holds are not actively traded and have fewer observable transactions. The Company considers this the most reliable information available for the valuation of the securities.

Level 3 Unobservable inputs that are supported by little or no market activity and reflect the use of significant management judgment are used to measure fair value. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions. The determination of fair value for Level 3 investments and other financial instruments involves the most management judgment and subjectivity.

Allowance for Doubtful Accounts

The Company establishes an allowance for doubtful accounts to ensure that its trade receivables balances are not overstated due to uncollectibility. The Company performs ongoing customer credit evaluations within the context of the industry in which it operates. A specific allowance of up to 100% of the invoice value is provided for any problematic customer balances. Delinquent account balances are written off after management has determined that the likelihood of collection is remote. The Company performs ongoing credit evaluations of its customers financial condition and generally does not require collateral from its customers. The Company grants credit only to customers deemed creditworthy in the judgment of management. The Company maintains an allowance for doubtful accounts receivable based upon the expected collectibility of all accounts receivable. There was no allowance for doubtful accounts receivable at March 31, 2012 and December 31, 2011.

Revenue Recognition

General

Edgar Filing: MoSys, Inc. - Form 10-Q

The Company generates revenue from the licensing of its IP and sales of IC products. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery or performance has occurred, the sales price is fixed or determinable, and collectibility is reasonably assured. Evidence of an arrangement generally consists of signed agreements or customer purchase orders.

Licensing

Licensing revenue consists of fees earned from license agreements, development services and support and maintenance. For stand-alone license agreements or license deliverables in multi-deliverable arrangements that do not require significant development, modification or customization, revenues are recognized when all revenue recognition criteria have been met. Delivery of the licensed technology is typically the final revenue recognition criterion met, at which time revenue is recognized. If any of the criteria are not met, revenue recognition is deferred until such time as all criteria have been met.

When sales arrangements contain multiple deliverables (e.g., license and services), the Company reviews each deliverable to determine the separate units of accounting that exist within the agreement. If more than one unit of accounting exists, the consideration payable to the Company under the agreement is allocated to each unit of accounting using the relative fair value method. Revenue is recognized for each unit of accounting when the revenue recognition criteria have been met for that unit of accounting. The Company allocates revenue among the deliverables using the relative selling price method. Revenue allocated to each element is recognized when the basic revenue recognition criteria is met for each element. Under GAAP, the Company is required to apply a hierarchy to determine the selling price to be used for allocating revenue to deliverables: (i) vendor-specific objective evidence of fair

Table of Contents

value (VSOE), (ii) third-party evidence of selling price (TPE) and (iii) best estimate of the selling price (ESP). In general, the Company is unable to establish VSOE or TPE for license fees and development services. Therefore revenue is allocated to these elements based on the Company's ESP, which the Company determines after considering multiple factors such as management approved pricing guidelines, geographic differences, market conditions, competitor pricing strategies, internal costs and gross margin objectives. These factors may vary over time depending upon the unique facts and circumstances related to each deliverable. If the facts and circumstances underlying the factors considered change or should future facts and circumstances lead the Company to consider additional factors, the Company's ESP for license fee and development services could change.

For license agreements involving deliverables that do require significant production, modification or customization, and where the Company has significant experience in meeting the design specifications in the contract and the direct labor hours related to services under the contract can be reasonably estimated, the Company recognizes revenue over the period in which the contract services are performed. For these arrangements, the Company recognizes revenue using the percentage of completion method. Under this method, revenue recognized in any period depends on the Company's progress toward completion of projects in progress. Significant management judgment and discretion are used to estimate total direct labor hours. These judgmental elements include determining that the Company has the experience to meet the design specifications and estimating the total direct labor hours to perform the contract services, based on experience in developing prior licensees' designs. The direct labor hours for the development of the licensee's design are estimated at the beginning of the contract. As the direct labor hours are incurred, they are used as a measure of progress towards completion. During the contract performance period, the Company reviews estimates of direct labor hours to complete the contracts and will revise its estimates of revenue and gross profit under the contract if it revises the estimations of the direct labor hours to complete. The Company's policy is to reflect any revision in the contract gross profit estimate in reported income or loss in the period in which the facts giving rise to the revision become known. Under the percentage of completion method, provisions for estimated losses on uncompleted contracts are recorded in the period in which such losses are determined to be likely. If the amount of revenue recognized under the percentage of completion accounting method exceeds the amount of billings to a customer, the excess amount is recorded as an unbilled contracts receivable.

The Company provides support and maintenance under many of its license agreements. Under these arrangements, the Company provides unspecified upgrades, design rule changes and technical support. No other upgrades, products or other post-contract support are provided. Support and maintenance revenue is recognized at its fair value established by VSOE, ratably over the period during which the obligation exists, typically 12 months. These arrangements are generally renewable annually by the customer.

Under limited circumstances, the Company also recognizes prepaid pre-production royalties as license revenues. These are lump sum payments made when the Company enters into licensing agreements that cover future shipments of a product that is not commercially available from the licensee. The Company characterizes such payments as license revenues because they are paid as part of the initial license fee and not with respect to products being produced by the licensee. These payments are non-cancelable and non-refundable.

Royalty

The Company's licensing contracts typically also provide for royalties based on licensees' use of the Company's memory technology in their currently shipping commercial products. The Company recognizes royalties in the quarter in which it receives the licensee's report. Under limited circumstances, the Company may also recognize prepaid post-production royalties as revenue upon execution of the contract, which are paid in a lump sum after the licensee commences production of the royalty-bearing product and applied against future unit shipments regardless of the actual level of shipments by the licensee. The criteria for revenue recognition of prepaid royalties are that a formal agreement with the licensee is executed, no deliverables, development or support services related to prepaid royalties are required, the fees are non-refundable and not contingent upon future product shipments by the licensee, and the fees are payable by the licensee in a time period consistent with the Company's normal billing terms. If any of these criteria are not met, the Company defers revenue recognition until such time as all criteria have been met.

IC products

The Company recognizes revenue at the time of shipment to the Company's customers. Revenue is recognized upon shipment for sales to distributors with limited rights of returns and price protection if the Company concludes it can reasonably estimate the credits for returns and price adjustments issuable. The Company records an estimated allowance, at the time of shipment, for future returns and other charges against revenue consistent with the terms of sale. IC product revenue was not significant for the three months ended March 31, 2012, and has been included in the licensing and other revenue line item in the condensed consolidated statements of operations and comprehensive loss.

Table of Contents**Cost of Net Revenue**

Cost of licensing and other revenue consists primarily of engineering personnel and overhead allocation costs directly related to development services specified in agreements and costs of IC sales. Development services typically include customization of the Company's technologies for the licensee's particular IC design and may include engineering support to assist in the commencement of production of a licensee's products.

Goodwill

The Company reviews goodwill for impairment on an annual basis or whenever events or changes in circumstances indicate the carrying value of an asset may not be recoverable. The Company first assesses qualitative factors to determine whether it is more-likely-than-not that the fair value of the reporting unit is less than the carrying amount as a basis for determining whether it is necessary to perform the two-step impairment test. If the qualitative assessment warrants further analysis, the Company compares the fair value of the reporting unit to its carrying value. The fair value of the reporting unit is determined using the market approach. If the fair value of the reporting unit exceeds the carrying value of net assets of the reporting unit, goodwill is not impaired, and the Company is not required to perform further testing. If the carrying value of the net assets of the reporting unit exceeds the fair value of the reporting unit, then the Company must perform the second step in order to determine the implied fair value of the reporting unit's goodwill and compare it to the carrying value of the reporting unit's goodwill. If the carrying value of the reporting unit's goodwill exceeds its implied fair value, then the Company must record an impairment charge equal to the difference. The Company has determined that it has a single reporting unit for purposes of performing its goodwill impairment test. The Company performed the annual impairment test in September 2011, and the test did not indicate impairment of goodwill, as the fair value exceeded the carrying value of the reporting unit by approximately 61%. As the Company used the market approach to assess impairment, the price of its common stock is an important component of the fair value calculation. If the Company's stock price continues to experience significant price and volume fluctuations, this will impact the fair value of the reporting unit, which can lead to potential impairment in future periods. As of March 31, 2012, the Company had not identified any factors to indicate there was an impairment of our goodwill and determined that no additional impairment analysis was required.

Intangible Assets

Intangible assets acquired in business combinations, referred to as purchased intangible assets, are accounted for based on the fair value of assets purchased and are amortized over the period in which economic benefit is estimated to be received. Identifiable intangible assets relating to business combinations and the patent license were as follows (dollar amounts in thousands):

		March 31, 2012		
	Life (years)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
Developed technology	3-5	\$ 9,240	\$ 6,299	\$ 2,941
Customer relationships	3	390	366	24
Contract backlog	1	750	750	
Non-compete agreements	1.5	140	140	
Subtotal purchased intangible assets		10,520	7,555	2,965

Edgar Filing: MoSys, Inc. - Form 10-Q

Patent license	7	780	28	752
Total		\$ 11,300	\$ 7,583	\$ 3,717

December 31, 2011

	Life (years)	Gross Carrying Amount	Accumulated Amortization	Net Carrying Value
Developed technology	3-5	\$ 9,240	\$ 5,676	\$ 3,564
Customer relationships	3	390	334	56
Contract backlog	1	750	750	
Non-compete agreements	1.5	140	140	
Subtotal purchased intangible assets		10,520	6,900	3,620
Patent license	7	780		780
Total		\$ 11,300	\$ 6,900	\$ 4,400

Table of Contents

The related amortization expense was \$0.7 million for each of the three months ended March 31, 2012 and 2011. Amortization expense has been included in research and development expense in the condensed consolidated statements of operations and comprehensive loss. The estimated aggregate amortization expense to be recognized in future years is approximately \$1.1 million for the remainder of 2012, \$1.0 million for 2013, \$1.0 million for 2014, \$0.3 million for 2015 and \$0.1 million annually for 2016 through 2018.

Per Share Amounts

Basic net loss per share is computed by dividing net loss for the period by the weighted-average number of shares of common stock outstanding during the period. Diluted net loss per share gives effect to all potentially dilutive common shares outstanding during the period. Potentially dilutive common shares consist of incremental shares of common stock issuable upon the exercise of stock options, vesting of stock awards and purchases under the employee stock purchase plan. As of March 31, 2012 and 2011, stock awards to purchase approximately 11,546,000 and 10,110,000 shares, respectively, were excluded from the computation of diluted net loss per share as their inclusion would be anti-dilutive.

Note 2: Fair Value of Financial Instruments

The estimated fair values of financial instruments outstanding were as follows (in thousands):

	Cost	March 31, 2012		Fair Value
		Unrealized Gains	Unrealized Losses	
Cash and cash equivalents	\$ 9,420	\$	\$	\$ 9,420
Short-term investments:				
U.S. government debt securities	\$ 12,415	\$ 2	\$ (4)	\$ 12,413
Corporate notes and commercial paper	10,237	6	(4)	10,239
Certificates of deposit	716			716
Total short-term investments	\$ 23,368	\$ 8	\$ (8)	\$ 23,368
Long-term investments:				
U.S. government debt securities	\$ 15,239	\$ 4	\$ (13)	\$ 15,230
Corporate notes	6,681	4	(7)	6,678
Total long-term investments	\$ 21,920	\$ 8	\$ (20)	\$ 21,908
	Cost	December 31, 2011		Fair Value
		Unrealized Gains	Unrealized Losses	
Cash and cash equivalents	\$ 40,025	\$	\$	\$ 40,025

U.S. government debt securities	\$ 4,834	\$ 2	\$	\$ 4,836
Corporate notes	4,578	1	(2)	4,577
Total short-term investments	\$ 9,412	\$ 3	\$ (2)	\$ 9,413
Long-term investments:				
U.S. government debt securities	\$ 5,721	\$ 1	\$ (1)	\$ 5,721
Corporate notes	2,816	2	(2)	2,816
Total long-term investments	\$ 8,537	\$ 3	\$ (3)	\$ 8,537

Edgar Filing: MoSys, Inc. - Form 10-Q

As of March 31, 2012 and December 31, 2011, all of the available-for-sale securities with unrealized losses were in a loss position for less than 12 months. Total fair value of available-for-sale securities with unrealized losses was \$29.6 million at March 31, 2012.

Cost and fair value of investments based on two maturity groups were as follows (in thousands):

	March 31, 2012				Fair Value
	Cost	Unrealized Gains	Unrealized Losses		
Due within 1 year	\$ 23,368	\$ 8	\$ (8)	\$ 23,368	
Due in 1-2 years	21,920	8	(20)	21,908	
Total	\$ 45,288	\$ 16	\$ (28)	\$ 45,276	

	December 31, 2011				Fair Value
	Cost	Unrealized Gains	Unrealized Losses		
Due within 1 year	\$ 9,412	\$ 3	\$ (2)	\$ 9,413	
Due in 1-2 years	8,537	3	(3)	8,537	
Total	\$ 17,949	\$ 6	\$ (5)	\$ 17,950	

Table of Contents

The following table represents the Company's fair value hierarchy for its financial assets (cash equivalents and investments) as of March 31, 2012 and December 31, 2011 (in thousands):

	March 31, 2012				
	Fair Value	Level 1	Level 2	Level 3	
Money market funds	\$ 6,355	\$ 6,355			\$
Certificates of deposit	965		965		
Corporate notes and commercial paper	18,916		18,916		
U.S. government debt securities	27,644		27,644		
Total assets	\$ 53,880	\$ 6,355	\$ 47,525		\$

	December 31, 2011				
	Fair Value	Level 1	Level 2	Level 3	
Money market funds	\$ 2,792	\$ 2,792			\$
Corporate notes	7,393		7,393		
U.S. government debt securities	10,557		10,557		
Total assets	\$ 20,742	\$ 2,792	\$ 17,950		\$

There were no transfers in or out of Level 1 and Level 2 securities during the three months ended March 31, 2012 and 2011. There were no Level 3 financial assets as of March 31, 2012 and December 31, 2011.

Note 3: Asset Purchase Agreement

In March 2012, the Company entered into an asset purchase agreement for an exclusive license of a portion of its intellectual property pertaining to its high-speed serial I/O technology for approximately \$4.3 million. The Company will also provide certain technology transfer support services, and fifteen employees of the Company's India subsidiary accepted employment with the purchasing company. The Company received approximately \$2.2 million, net of transaction costs, in cash upon execution of the agreement. The agreement includes approximately \$1.9 million (the Holdback) to be paid upon providing technology transfer support services and achievement of certain contractually agreed-upon development milestones. A portion of the Holdback is reserved for any costs related to indemnification claims that may arise during the 12 month period following the agreement date.

During the quarter ended March 31, 2012, the Company recognized a \$1.9 million gain on this transaction, net of transaction costs, which has been recorded as a reduction of operating expenses in the condensed consolidated statements of operations and comprehensive loss, and approximately \$0.3 million in current liabilities for the technology transfer support service obligation. Gains related to the Holdback will be recorded when the milestones are completed and the indemnity period lapses, which is expected to be within 12 months of the agreement date.

Note 4. Commitments and Contingencies*Indemnification*

In the ordinary course of business, the Company enters into contractual arrangements under which it may agree to indemnify the counterparties from any losses incurred relating to breach of representations and warranties, failure to perform certain covenants, or claims and losses arising from certain events as outlined within the particular contract, which may include, for example, losses arising from litigation or claims relating to past performance. Such indemnification clauses may not be subject to maximum loss clauses. The Company has entered into indemnification agreements with its officers and directors. No material amounts were reflected in the Company's condensed consolidated financial statements for the three months ended March 31, 2012 or 2011 related to these indemnifications.

The Company has not estimated the maximum potential amount of indemnification liability under these agreements due to the limited history of prior claims and the unique facts and circumstances applicable to each particular agreement. To date, the Company has not made any payments related to these indemnification agreements.

Table of Contents**Legal Matters**

The Company is not a party to any material legal proceeding that the Company believes is likely to have a material adverse effect on its consolidated financial position or results of operations. From time to time the Company may be subject to legal proceedings and claims in the ordinary course of business. These claims, even if not meritorious, could result in the expenditure of significant financial resources and diversion of management efforts.

In September 2010, a claimant filed suit against the Company seeking a contractual payment by the Company of approximately 200,000 shares of the Company's common stock, among other claims. In November 2010, the suit went to arbitration, and in December 2010, the Company filed a counter claim against the claimant. On April 3, 2012, the arbitrator ruled against the Company and awarded the claimant a cash award of approximately \$1.4 million. The disputed shares are to be returned to the Company and retired. The value of the retired shares, \$0.8 million as of the arbitration settlement date, was recorded as a reduction to stockholders' equity as a stock repurchase. The remaining amount of \$0.6 million was recorded as a selling, general and administrative expense in the Company's condensed consolidated statements of operations and comprehensive loss. The Company expects to pay the \$1.4 million in the second quarter of 2012.

Note 5. Business Segments and Significant Customers

The Company operates in one business segment and uses one measurement of profitability for its business. Revenue attributed to the United States and to all foreign countries is based on the geographical location of the customer.

The Company recognized revenue from customers in North America, Asia and Europe as follows (in thousands):

	Three Months Ended	
	March 31,	
	2012	2011
United States	\$ 581	\$ 1,346
Taiwan	437	789
Japan	394	1,294
Europe	12	106
Other Asia		4
Total	\$ 1,424	\$ 3,539

Customers who accounted for at least 10% of total revenues were as follows:

	Three Months Ended	
	March 31,	
	2012	2011
Customer A	30%	22%
Customer B	26%	12%

Customer C	17%	20%
------------	-----	-----

Three customers accounted for 88% of net accounts receivable at March 31, 2012. Four customers accounted for 96% of net accounts receivable at December 31, 2011.

Note 6. Provision for Income Taxes

The Company determines deferred tax assets and liabilities based upon the differences between the financial statement and tax bases of the Company's assets and liabilities using tax rates in effect for the year in which the Company expects the differences to affect taxable income. A valuation allowance is established for any deferred tax assets for which it is more likely than not that all or a portion of the deferred tax assets will not be realized.

The Company files U.S. federal and state and foreign income tax returns in jurisdictions with varying statutes of limitations. The Company is not currently under any tax jurisdiction examination. The 2003 through 2011 tax years generally remain subject to examination by federal, state and foreign tax authorities. As of March 31, 2012, the Company did not have any unrecognized tax benefits or recognize any interest or penalties related to unrecognized tax benefits.

Table of Contents**Note 7. Stock-Based Compensation**

The Company recorded approximately \$1.0 million and \$0.7 million of stock-based compensation expense for the three months ended March 31, 2012 and 2011, respectively. The expense relating to stock-based awards is recognized on a straight-line basis over the requisite service period, usually the vesting period, based on the grant-date fair value. The unamortized compensation cost, net of expected forfeitures, as of March 31, 2012 was \$5.2 million and is expected to be recognized as expense over a weighted average period of approximately 2.44 years.

The Company presents the tax benefits resulting from tax deductions in excess of the compensation cost recognized from the exercise of stock options as financing cash flows in the condensed consolidated statements of cash flows. For the three months ended March 31, 2012 and 2011, there were no such tax benefits associated with the exercise of stock options due to the Company's loss position.

Common Stock Options and Restricted Stock

A summary of the option and restricted stock unit activity under the Company's Amended and Restated 2000 Stock Option and Equity Incentive Plan (Amended 2000 Plan) and 2010 Equity Incentive Plan (2010 Plan), referred to collectively as the Plans, is presented below (in thousands, except exercise price):

	Available for Grant	Number of Shares	Options Outstanding Weighted Average Exercise Prices
Balance at December 31, 2011	1,977	6,528	\$ 4.48
Additional shares authorized under the 2010 Plan	500		
Options granted	(4)	4	\$ 3.93
Options cancelled	111	(111)	\$ 4.23
Options exercised		(34)	\$ 2.85
Options expired	(55)		
Balance at March 31, 2012	2,529	6,387	\$ 4.50

A summary of restricted stock awards and restricted stock unit activity for grants outside of the Plans is presented below (in thousands, except fair value):

	Number of Shares	Weighted Average Grant-Date Fair Value
Non-vested shares at March 31, 2012 and December 31, 2011	15	\$ 1.60

Edgar Filing: MoSys, Inc. - Form 10-Q

The Company also has awarded options to new employees outside the Plans and may continue to do so outside the 2010 Plan, as a material inducement to the acceptance of employment with the Company, as permitted under the Listing Rules of the Nasdaq Stock Market. These grants must be approved by the compensation committee of the board of directors, a majority of the independent directors or, below a specified share level, by an authorized executive officer.

A summary of the inducement grant option activity is presented below (in thousands, except exercise price):

	Options Outstanding	
	Number of Shares	Weighted Average Exercise Prices
Balance at December 31, 2011	4,815	\$ 3.29
Granted	350	\$ 3.92
Cancelled	(103)	\$ 1.54
Exercised	(111)	\$ 1.54
Balance at March 31, 2012	4,951	\$ 3.41

Edgar Filing: MoSys, Inc. - Form 10-Q

Table of Contents

The following table summarizes significant ranges of outstanding and exercisable options and inducement grants, excluding restricted stock awards and restricted stock unit activity, as of March 31, 2012 (in thousands, except contractual life and exercise price):

Range of Exercise Price	Number Outstanding	Options Outstanding			Number Exercisable	Options Exercisable		
		Weighted Average Remaining Contractual Life (in Years)	Weighted Average Exercise Price	Aggregate Intrinsic Value		Weighted Average Remaining Contractual Life (in Years)	Weighted Average Exercise Price	Aggregate Intrinsic Value
\$1.50 - \$2.50	3,309	2.63	\$ 1.70	\$ 7,520	2,061	2.85	\$ 1.70	\$ 4,686
\$2.51 - \$5.00	4,694	4.33	\$ 3.96	1,029	2,204	3.67	\$ 4.12	282
\$5.01 - \$7.50	2,688	4.20	\$ 5.87		1,805	3.76	\$ 5.84	
\$7.51 - \$15.00	647	0.92	\$ 8.63		647	0.92	\$ 8.63	
	11,338	3.61	\$ 4.02	\$ 8,549	6,717	3.17	\$ 4.27	\$ 4,968

As of March 31, 2012, the Company had 10.6 million shares subject to outstanding options fully vested and expected to vest, after estimated forfeitures, with a remaining contractual life of 3.51 years, weighted average exercise price of \$4.03 and aggregate intrinsic value of \$8.1 million.

The total fair value of shares subject to outstanding options vested during the three months ended March 31, 2012 and 2011 calculated using the Black-Scholes valuation method was \$0.5 million and \$0.6 million, respectively. The total intrinsic value of employee stock options exercised during the three months ended March 31, 2012 and 2011 was \$0.3 million and \$0.7 million, respectively.

Options to purchase 6.7 million and 5.7 million shares with weighted average exercised prices of \$4.27 and \$4.65 per share were exercisable at March 31, 2012 and 2011, respectively.

Valuation Assumptions

The fair value of the Company's share-based payment awards for the three months ended March 31, 2012 and 2011 was estimated on the grant date using a Black-Scholes valuation method and an option-pricing model with the following assumptions:

Employee stock options:	Three Months Ended March 31,	
	2012	2011
Risk-free interest rate	0.7% - 0.8%	1.5%
Volatility	66.8%	62.9%
Expected life (years)	4.0	4.0
Dividend yield	0%	0%

Edgar Filing: MoSys, Inc. - Form 10-Q

The risk-free interest rate was derived from the Daily Treasury Yield Curve Rates as published by the U.S. Department of the Treasury as of the grant date for terms equal to the expected terms of the options. The expected volatility was based on the combination of: 1) four-year historical volatility and 2) implied volatility of the Company's stock price. The expected term of options granted was derived from historical data based on employee exercises and post-vesting employment termination behavior. A dividend yield of zero is applied because the Company has never paid dividends and has no intention to pay dividends in the near future.

The stock-based compensation expense recorded is adjusted based on estimated forfeiture rates. An annualized forfeiture rate has been used as a best estimate of future forfeitures based on the Company's historical forfeiture experience. The stock-based compensation expense will be adjusted in later periods if the actual forfeiture rate is different from the estimate.

Employee Stock Purchase Plan

In June 2010, the Company's stockholders approved the 2010 Employee Stock Purchase Plan (ESPP). A total of 2.0 million shares of common stock have been reserved for issuance under the ESPP. The ESPP, which is intended to qualify under Section 423 of the Internal Revenue Code, is administered by the board of directors or the compensation committee of the board of directors. The ESPP provides that eligible employees may purchase up to \$25,000 worth of the Company's common stock annually over the course of two six-month offering periods. The purchase price to be paid by participants is 85% of the price per share of the Company's common stock either at the beginning or the end of each six-month offering period, whichever is less. On February 29, 2012, approximately 178,000 shares of common stock were issued at an aggregate purchase price of \$579,000 under the ESPP. As of March 31, 2012, there were approximately 1,500,000 shares authorized and unissued under the ESPP.

Table of Contents

Note 8. Related Party Transactions

In February 2012, the Company entered into a strategic development and marketing agreement with Credo Semiconductor (Hong Kong) Ltd. (Credo), a privately-funded fabless semiconductor company, to develop, market and sell integrated circuits. Two of the Company's executive officers are investors in Credo. The agreement calls for the Company to pay approximately \$1.4 million to Credo and its hardware vendors upon Credo achieving certain development and verification milestones, of which the Company paid \$0.2 million in the quarter ended March 31, 2012, which was accounted for as research and development expense. The first \$1.2 million of gross profits generated by the sale of these integrated circuits will be retained by the Company. Thereafter, the gross profits will be shared equally by the two companies.

Note 9. Subsequent Events

On April 3, 2012, the Company received notification of an arbitration settlement against the Company; see Note 4.

ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Management's Discussion and Analysis of Financial Condition and Results of Operations should be read in conjunction with the accompanying condensed consolidated financial statements and notes included in this report. This Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which include, without limitation, statements about the market for our technology, our strategy, competition, expected financial performance, all information disclosed under Item 3 of this Part I, and other aspects of our business identified in our most recent annual report on Form 10-K filed with the Securities and Exchange Commission on March 15, 2012 and in other reports that we file from time to time with the Securities and Exchange Commission. Any statements about our business, financial results, financial condition and operations contained in this Form 10-Q that are not statements of historical fact may be deemed to be forward-looking statements. Without limiting the foregoing, the words believes, anticipates, expects, intends, plans, projects, or similar expressions are intended to identify forward-looking statements. Our actual results could differ materially from those expressed or implied by these forward-looking statements as a result of various factors, including the risk factors described below in Risk Factors and elsewhere in this report and under Item 1A of our annual report on Form 10-K for the year ended December 31, 2011. We undertake no obligation to update publicly any forward-looking statements for any reason, except as required by law, even as new information becomes available or events occur in the future.

Company Overview

Our strategy and primary business objective is to become a fabless semiconductor company focused on the development and sale of Bandwidth Engine integrated circuits (ICs) to networking equipment systems providers and their subsystem and component vendors. Our Bandwidth Engine family of ICs combines our 1T-SRAM high-density embedded memory and high-speed 10 Gigabits per second (Gbps) serial interface (I/O) technology with our intelligent access technology and a highly efficient interface protocol and is initially being marketed to networking systems companies. Bandwidth Engine ICs have been designed to increase system performance by using a serial I/O to increase the accesses per second between the processor and memory components in networking systems.

Edgar Filing: MoSys, Inc. - Form 10-Q

Since the beginning of 2010, we have invested an increasing amount of our financial and engineering resources towards the development of our Bandwidth Engine family of ICs. We shipped initial samples of our first Bandwidth Engine ICs to prospective customers in December 2010, and, in November 2011, we announced two design wins for low volume applications. Our future success and ability to achieve and maintain profitability will be dependent on our success in developing a market for our Bandwidth Engine ICs.

Historically, our primary business has been defining, designing, marketing and licensing differentiated embedded memory and high-speed parallel and serial interface intellectual property (IP) for advanced systems on chip (SoCs) designs. However, our competitiveness and the demand for our IP have declined since the beginning of 2011 when we began dedicating more of our engineering and marketing resources to our IC efforts. This trend will continue as we place far more emphasis on IC product sales than on IP transactions.

The 1T-SRAM is our high-density, high-performance patented memory solution that represents an alternative to traditional volatile embedded memory. Our I/O IP includes physical layer (PHY) circuitry that allows ICs to communicate with one another in the networking, storage, computer and consumer market segments. Our PHY IP supports serial interface technologies, such as 10 Gbps Base KR, XAUI, PCI Express and SATA, as well as parallel interfaces like DDR3. Our IP customers typically include fabless semiconductor companies, integrated device manufacturers (IDMs) and foundries.

As a result of our reduced licensing activities, we expect our licensing and royalty revenue to decrease in future periods. We do not expect to generate significant revenue from our Bandwidth Engine ICs until 2013, and we believe that the growth in our IC revenues will not offset the decline in our IP revenues until at least 2013. Accordingly, we expect our losses from operations to increase in the near future.

Table of Contents

Sources of Revenue

Licensing. Licensing revenue consists of fees earned from license agreements, development services, prepaid pre-production royalties, and support and maintenance. Our licensing revenue consists primarily of fees for providing circuit design, layout and design verification and granting licenses to customers that embed our technology into their products. License fees generally range from \$100,000 to several million dollars per contract, depending on the scope and complexity of the development project, and the extent of the licensee's rights. The vast majority of our contracts allow for milestone billing based on work performed. Fees billed prior to revenue recognition are recorded as deferred revenue.

Royalty. Royalty revenue represents amounts earned under provisions in our memory licensing contracts that require our licensees to report royalties and make payments at a stated rate based on actual units manufactured or sold by licensees for products that include our memory IP. Our license agreements require the licensee to report the manufacture or sale of products that include our technology after the end of the quarter in which the sale or manufacture occurs, and we recognize royalties in the quarter in which we receive the licensee's report.

The timing and level of royalties are difficult to predict. They depend on the licensee's ability to market, produce and sell products incorporating our technology. Many of the products of our licensees that are currently subject to licenses from us are used in consumer products, such as electronic game consoles, for which demand can be seasonal.

IC product. IC product revenue is recognized at the time of shipment of our ICs to customers. Revenue is recognized upon shipment for sales to distributors with limited rights of returns and price protection if we conclude we can reasonably estimate the credits for returns and price adjustments issuable. An estimated allowance is recorded, at the time of shipment for future returns and other charges against revenue consistent with the terms of sale.

Critical Accounting Policies and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make certain estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses. On an ongoing basis we make these estimates based on our historical experience and on assumptions that we consider reasonable under the circumstances. Actual results may differ from these estimates, and reported results could differ under different assumptions or conditions. Our significant accounting policies and estimates are disclosed in Note 1 of the "Notes to Consolidated Financial Statements" in our Annual Report on Form 10-K for the year ended December 31, 2011. As of March 31, 2012, there have been no material changes to our significant accounting policies and estimates.

Results of Operations

Net Revenue.

Edgar Filing: MoSys, Inc. - Form 10-Q

	Three Months Ended March 31,		Year-Over-Year Change 2011 to 2012
	2012	2011	
	(dollar amounts in thousands)		
Licensing and other	\$ 221	\$ 1,347	\$ (1,126) (84)%
Percentage of total net revenue	16%	38%	

Licensing and other revenue decreased for the three months ended March 31, 2012, compared with the same period of 2011, primarily due to the decline in the number and value of new license agreements. We did not execute any new license agreements in the first quarter of 2012, and we do not expect to enter into new license agreements during the remainder of 2012. Revenue from the sale of our IC products was included in this line item, and was not considered significant for the three months ended March 31, 2012.

	Three Months Ended March 31,		Year-Over-Year Change 2011 to 2012
	2012	2011	
	(dollar amounts in thousands)		
Royalty	\$ 1,203	\$ 2,192	\$ (989) (45)%
Percentage of total net revenue	84%	62%	

Edgar Filing: MoSys, Inc. - Form 10-Q

Table of Contents

Royalty revenue decreased for the three months ended March 31, 2012, compared with the same period of 2011, primarily due to a decrease in shipments by an IDM licensee whose product is used in the Nintendo Wii® game console and a decrease in royalties received from a major foundry partner.

Cost of Net Revenue and Gross Profit.

	Three Months Ended March 31,		Year-Over-Year Change	
	2012	2011	2011 to 2012	
(dollar amounts in thousands)				
Cost of net revenue	\$ 57	\$ 690	\$ (633)	(92)%
Percentage of total net revenue	4%	19%		

	Three Months Ended March 31,		Year-Over-Year Change	
	2012	2011	2011 to 2012	
(dollar amounts in thousands)				
Gross profit	\$ 1,367	\$ 2,849	\$ (1,482)	(52)%
Percentage of total net revenue	96%	81%		

Cost of net revenue consists of personnel and related overhead allocation costs for engineers assigned to revenue-generating licensing arrangements and costs related to the sale of IC products.

Cost of net revenue decreased for the three months ended March 31, 2012, compared with the same period of 2011 primarily due to the lack of new licensing agreements and limited engineering services required on existing contracts during the first quarter of 2012. Cost of net revenue included stock-based compensation expense of \$8,000 and \$61,000 for the three months ended March 31, 2012 and 2011, respectively.

Gross profit decreased for the three months ended March 31, 2012, compared with the same period of 2011 primarily due the decrease in our revenue. Gross margin percentage increased to 96% for the three months ended March 31, 2012 from 81% in the same quarter of the prior year primarily due to the increase in royalty revenue, which has no related costs, as a percentage of total net revenue.

Research and Development.

	Three Months Ended March 31,		Year-Over-Year Change	
	2012	2011	2011 to 2012	
(dollar amounts in thousands)				
Research and development	\$ 7,506	\$ 6,155	\$ 1,351	22%
Percentage of total net revenue	522%	174%		

Edgar Filing: MoSys, Inc. - Form 10-Q

Our research and development expenses include development and design of variations of our 1T-SRAM and I/O technologies for use in different manufacturing processes used by licensees, costs related to the development of our IC products and amortization of technology-based intangible assets. We expense research and development costs as they are incurred.

The \$1.4 million increase for the three months ended March 31, 2012, compared with the same period a year ago, was primarily due to increases in costs related to the development of our Bandwidth Engine IC and stock-based compensation charges.

Research and development expenses included stock-based compensation expense of \$0.8 million and \$0.3 million for the three months ended March 31, 2012 and 2011, respectively.

Selling, General and Administrative.

	Three Months Ended March 31,		Year-Over-Year Change 2011 to 2012	
	2012	2011		
	(dollar amounts in thousands)			
Selling, general and administrative	\$ 2,926	\$ 2,714	\$ 212	8%
Percentage of total net revenue	206%	77%		

Selling, general and administrative expenses consist primarily of personnel and related overhead costs for sales, marketing, application engineering, finance, human resources and general management.

Table of Contents

The \$0.2 million increase for the three months ended March 31, 2012, compared with the same period a year ago, was primarily due to arbitration costs and a \$0.6 million judgment, partially offset by lower sales commissions resulting from lower sales bookings.

Selling, general and administrative expenses included stock-based compensation expense of \$0.3 million for each of the three month periods ended March 31, 2012 and 2011. We expect total selling, general and administrative expenses to decrease in absolute dollars as the arbitration costs incurred in the first quarter are not expected to recur.

Other Income and Expense, net.

	Three Months Ended March 31,		Year-Over-Year Change	
	2012	2011	2011 to 2012	
	(dollar amounts in thousands)			
Other income and expense, net	\$ 24	\$ 9	\$ 15	167%
Percentage of total net revenue	2%			

Other income and expense, net primarily consisted of interest income on our investments, which was \$40,000 and \$44,000 for the three months ended March 31, 2012 and 2011, respectively. Despite our higher average cash and investments balance, interest income declined due to lower interest rates earned during the quarter ended March 31, 2012. Interest income was partially offset by expenses, including foreign exchange transaction losses and other non-operating expenses, for the three month ended March 31, 2012 and 2011.

Income Tax Provision.

	Three Months Ended March 31,		Year-Over-Year Change	
	2012	2011	2011 to 2012	
	(dollar amounts in thousands)			
Income tax provision	\$ 30	\$ 18	\$ 12	67%
Percentage of total net revenue	2%		1%	

Our income tax provisions are primarily attributable to foreign jurisdictions.

The provision for the three months ended March 31, 2012 and 2011 was attributable to taxes for our foreign subsidiaries and branches and minimum U.S. state income tax liabilities. We believe that, based on the history of our operating losses and other factors, the weight of available evidence indicates that it is more likely than not that we will not be able to realize the benefit of our net operating losses. Accordingly, a full valuation reserve has been recorded against our net deferred tax assets.

Liquidity and Capital Resources; Changes in Financial Condition

Cash Flows

As of March 31, 2012, we had cash, cash equivalents and long and short-term investments of \$54.7 million and had total working capital of \$29.4 million. Our principal source of cash and investments in 2011 was the sale of patents for \$35 million in December 2011. Our primary capital requirements are to fund working capital, including development of Bandwidth Engine ICs, and any acquisitions that we make that require cash consideration or expenditures.

Net cash used in operating activities was \$6.2 million for the first three months of 2012, which primarily resulted from the net loss of \$7.2 million and \$0.8 million generated from changes in operating assets and liabilities, reduced by the \$1.9 million gain on the sale of assets and adjusted for non-cash charges consisting of stock-based compensation of \$1.0 million and depreciation and amortization of \$0.9 million. The changes in assets and liabilities primarily related to the timing of billing our customers, collection of receivables and payments to vendors.

Net cash used in operating activities was \$3.9 million for the first three months of 2011 and was primarily attributable to our net loss of \$6.0 million, partially offset by \$0.4 million in changes in assets and liabilities, non-cash charges, including stock-based compensation expense of \$0.7 million, depreciation and amortization expense of \$0.9 million and a \$0.1 million provision for doubtful accounts. The changes in assets and liabilities primarily related to the timing of billing our customers, collection of receivables and payments to vendors.

Net cash used in investing activities was \$25.2 million for the first three months of 2012, and included net amounts transferred from cash to marketable securities of \$27.3 million that did not impact our liquidity and \$2.2 million in proceeds from the sale of assets.

Table of Contents

Net cash used in investing activities was \$5.7 million for the first three months of 2011, and included amounts transferred to and from cash and marketable securities of \$5.5 million that did not impact our liquidity and \$0.2 million for purchases of fixed assets.

Our financing activities in for the first three months of 2012 and 2011 primarily consisted of proceeds from the exercise of stock options and our employee stock purchase plan.

Our future liquidity and capital requirements are expected to vary from quarter to quarter, depending on numerous factors, including:

- level and timing of licensing, royalty and IC product revenue;
- cost, timing and success of technology development efforts, including meeting customer design specifications;
- fabrication costs, including mask costs of our Bandwidth Engine ICs, currently under development;
- variations in manufacturing yields, materials costs and other manufacturing risks;
- costs of acquiring other businesses and integrating the acquired operations; and
- profitability of our business.

We expect our cash expenditures to continue to exceed receipts in 2012 as we will generate minimal revenue from IC sales and expect reduced licensing and royalty revenues compared with 2011, and we will continue our research and development efforts for the expansion and fabrication of the Bandwidth Engine IC product line. We believe our existing cash, cash equivalents and investments, along with our existing capital and cash generated from operations, if any, to be sufficient to meet our operating cash requirements through the remainder of 2012 and for the foreseeable future. Should our cash resources prove inadequate, we may seek additional funding through public or private equity or debt financing, and have a shelf registration allowing us to sell up to approximately \$30 million of our securities from time to time until November 2013. We also might decide to raise additional capital at such times and upon such terms as management considers favorable and in our interests, including, but not limited to, from the sale of our debt and/or equity securities under our existing shelf registration statement. There can be no assurance that such additional funding will be available to us on favorable terms, if at all. The failure to raise capital when needed could have a material adverse effect on our business and financial condition.

Contractual Obligations

Edgar Filing: MoSys, Inc. - Form 10-Q

The impact that our contractual obligations as of March 31, 2012 are expected to have on our liquidity and cash flow in future periods is as follows (in thousands):

	Payment Due by Period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
Operating Leases	\$ 6,237	\$ 848	\$ 1,531	\$ 1,377	\$ 2,481
Purchase Commitments	3,211	3,211			
Capital Lease	104	104			
	\$ 9,552	\$ 4,163	\$ 1,531	\$ 1,377	\$ 2,481

As of March 31, 2012, we had purchase commitments primarily related to computer-aided design tools payable through March 2013 and capital lease obligation for testing equipment.

ITEM 3. Qualitative and Quantitative Disclosures about Market Risk

Our investment portfolio consists of money market accounts, certificates of deposit, corporate debt, commercial paper, government agency and municipal debt securities. The portfolio dollar-weighted average maturity of these investments is within 12 months. Our primary objective with this investment portfolio is to invest available cash while preserving principal and meeting liquidity needs. No single security should exceed 5% of the portfolio at the time of purchase. In accordance with our investment policy, we place investments with high credit quality issuers and limit the amount of credit exposure to any one issuer. These securities, which approximated \$53.9 million as of March 31, 2012 and earned an average annual interest rate of approximately 0.4% during the first three months of 2012, are subject to interest rate and credit risks. We do not have any investments denominated in foreign currencies, and, therefore, are not subject to foreign currency risk on such investments.

Table of Contents

ITEM 4. Controls and Procedures

Disclosure Controls and Procedures. Our management is responsible for establishing and maintaining adequate internal control over our financial reporting. Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934. Based on this evaluation, our management concluded that as of March 31, 2012, our disclosure controls and procedures were effective.

Changes in Internal Control over Financial Reporting. During the first quarter of 2012, there was no change in our internal control over financial reporting that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

ITEM 1. Legal Proceedings

The discussion of legal matters in Note 4 of the Notes to Condensed Consolidated Financial Statements included in Part I, Item 1 of this report under the heading "Legal Matters" is incorporated by reference in response to this Part II, Item 1.

ITEM 1A. Risk Factors

We face many significant risks in our business, some of which are unknown to us and not presently foreseen. These risks could have a material adverse impact on our business, financial condition and results of operations in the future. We have disclosed a number of material risks under Item 1A of our annual report on Form 10-K for the year ended December 31, 2011, which we filed with the Securities and Exchange Commission on March 15, 2012.

ITEM 6. Exhibits

(a) Exhibits

Edgar Filing: MoSys, Inc. - Form 10-Q
