Restructuring Plan

On March 31, 2015, Carpenter Technology Corporation (the **Company**) approved and commenced a restructuring plan (the **Restructuring Plan**). The Restructuring Plan includes: (i) reducing the Company's salaried positions by approximately 200, or 10%, (ii) reducing the Company's outsourced contractors by approximately 60 positions, and (iii) reducing other non-labor related costs.

Activities undertaken in connection with the Restructuring Plan are expected to be substantially completed by the end of the first quarter of fiscal year 2016. The Restructuring Plan is expected to result in approximately \$30 million of annual cost savings. In connection with the Restructuring Plan, the Company expects to incur a pre-tax charge of approximately \$11 million, which will be recorded in the third quarter of fiscal year 2015. In connection with the Restructuring Plan, we do not expect to have any future cash expenditures in excess of the charges set forth above.

Ultra-Fine Grain Materials Development Program Exit

In connection with the Company's ongoing strategic assessment, the Company has exited the ultra-fine grain materials development program (the **Program Exit**). In connection with the Program Exit, the Company anticipates that it will incur a pre-tax charge in the third quarter of fiscal year 2015 of approximately \$13 million, reflecting the cost to exit a license agreement as well as the associated non-cash asset impairment charges. The charges associated with the Program Exit are not expected to result in future cash expenditures.

On March 31, 2015, the Company issued a press release (the **Press Release**) announcing the Restructuring Plan, the Program Exit and providing certain preliminary estimated financial results for the third quarter of fiscal year 2015. A copy of the Press Release is attached to this Current Report on Form 8-K as Exhibit 99.1. The description of the Restructuring Plan, the Program Exit and the contents of the Press Release are qualified in their entirety by Exhibit 99.1, which is incorporated herein by reference.
