-

**Item 8.01. Other Events.**

On October 19, 2015, Agile Therapeutics, Inc. ( Agile ) issued a press release announcing that it had completed enrollment in its ongoing single-arm, open-label Twirla® Phase 3 SECURE clinical trial. The Company expects to complete the trial of over 2,000 subjects in the second half of 2016, and to submit its response to FDA's complete response letter in the first half of 2017. The Company announced that the subject demographics are consistent with its goals of a broadly representative patient population and fewer than twenty percent of subjects who are naïve to hormonal contraceptive products. The SECURE study is a multicenter Phase 3 clinical trial of Twirla (AG200-15) of over 2,000 female subjects who will receive treatment for up to one year. The clinical trial will assess the effectiveness of the patch in preventing pregnancy using the Pearl Index as the primary contraceptive efficacy measure. Safety and tolerability will also be evaluated.

A copy of Agile's press release is attached hereto as Exhibit 99.1 and is hereby incorporated by reference herein.

**Item 9.01. Financial Statements and Exhibits.**

**(d) Exhibits.**
