

Edgar Filing: PUBLIC SERVICE CO OF NEW MEXICO - Form 8-K

PNM has completed two financial transactions designed to reduce high-cost debt and to expand the utility's available credit facilities.

In the first transaction, PNM eliminated \$45 million of off-balance sheet lease obligations financing the EIP transmission line. The lease obligations included \$38 million in long-term bonds paying a 10.25 percent interest rate. Acquiring majority ownership of the EIP line and retiring the bonds is expected to produce an annual net savings of approximately \$1.5 million, or \$0.04 per share.

In a second, unrelated transaction, PNM completed arrangements for a three-year, \$90 million liquidity facility secured by the utility's outstanding accounts receivable. The accounts receivable securitization "builds a mid-term source of inexpensive liquidity for PNM," said PNM Resources Senior Vice President and Chief Financial Officer John Loyack. PNM will use the new liquidity facility for general corporate purposes.

The 345-kilovolt EIP line runs 216 miles from near Albuquerque to the Texas-New Mexico border, connecting the PNM system with the Texas electrical grid.

PNM Resources is an energy holding company based in Albuquerque, New Mexico. PNM, the principal subsidiary of PNM Resources, provides natural gas service to 441,000 gas customers and electric utility service to 378,000 customers in New Mexico. The company also sells power on the wholesale market in the Western U.S. PNM Resources stock is traded primarily on the NYSE under the symbol PNM.

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995
Statements made in this filing that relate to future events are made pursuant to the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based upon current expectations and the company assumes no obligation to update this information. Because actual results may differ materially from expectations, the company cautions readers not to place undue reliance on these statements. Future financial results will be affected by a number of factors, including interest rates, weather, fuel costs, changes in supply and demand in the market for electric power, wholesale power prices, market liquidity, the competitive environment in the electric and natural gas industries, the performance of generating units and transmission system, state and federal regulatory and legislative decisions and actions, and the performance of state, regional and national economies. For a detailed discussion of the important factors affecting PNM Resources, please see "Management's Discussion and Analysis of Financial Condition and Results of Operations" in the Company's Form 10-K for the year ended December 31, 2002 and Form 8-K filings with the Securities and Exchange Commission.
