**Cameco to Split Shares and Increase Dividend**

Saskatoon, Saskatchewan, Canada, December 9, 2004 . . . . .

Cameco Corporation announced today that its board of directors has approved a three-for-one stock split of the company's outstanding common shares, to be effected by way of a stock dividend. All shareholders will receive two additional shares for each share owned on the record date of December 31, 2004.

The board of directors also declared a quarterly cash dividend of \$0.15 per common share (on a pre-split basis), payable on January 14, 2005 to shareholders of record on December 31, 2004.

In addition, the board of directors has approved an increase in the annual cash dividend from \$0.60 per share to \$0.72 (\$0.24 post-split) beginning in 2005 that will be paid quarterly. This represents a 20% increase in Cameco's cash dividend. The company has consistently paid dividends since it began trading in 1991.

Our decision to split the stock and increase the dividend reflects our increasing confidence that we can continue to grow as a nuclear energy company producing uranium fuel and generating clean electricity, said Jerry Grandey, Cameco's president and chief executive officer.

Shareholders who have Cameco stock certificates should retain them. The transfer agent, CIBC Mellon Trust Company, will mail new certificates on January 6, 2005. Upon completion of the stock split, the number of shares outstanding will total approximately 173 million. Cameco's common shares are expected to begin trading on a split basis on December 29, 2004 on the Toronto Stock Exchange and January 7, 2005 on the New York Stock Exchange. The stock split will have no unfavourable tax consequences in Canada or the United States.

Cameco, with its head office in Saskatoon, Saskatchewan, is the world's largest uranium producer. The company's uranium products are used to generate electricity in nuclear energy plants around the world, providing one of the cleanest sources of energy available today. Cameco's shares trade on the Toronto and New York stock exchanges.

**Table of Contents**

Statements contained in this news release which are not historical facts are forward-looking statements that involve risks, uncertainties and other factors that could cause actual results to differ materially from those expressed or implied by such forward-looking statements. Factors that could cause such differences, without limiting the generality of the following, include: volatility and sensitivity to market prices for uranium, electricity in Ontario and gold; the impact of the sales volume of uranium, conversion services, electricity generated and gold; competition; the impact of change in foreign currency exchange rates and interest rates; imprecision in reserve estimates; environmental and safety risks including increased regulatory burdens; unexpected geological or hydrological conditions; political risks arising from operating in certain developing countries; a possible deterioration in political support for nuclear energy; changes in government regulations and policies, including trade laws and policies; demand for nuclear power; replacement of production and failure to obtain necessary permits and approvals from government authorities; legislative and regulatory initiatives regarding deregulation, regulation or restructuring of the electric utility industry in Ontario; Ontario electricity rate regulations; weather and other natural phenomena; ability to maintain and further improve positive labour relations; operating performance of the facilities; success of planned development projects; and other development and operating risks.

Although Cameco believes that the assumptions inherent in the forward-looking statements are reasonable, undue reliance should not be placed on these statements, which only apply as of the date of this report. Cameco disclaims any intention or obligation to update or revise any forward-looking statement, whether as a result of new information, future events or otherwise.
