NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Note 1 – General

The accompanying financial statements are unaudited. In the opinion of Management, all adjustments (comprising only normal recurring accruals) necessary for a fair presentation of the results of the interim periods have been included. These statements should be read in conjunction with the financial statements and accompanying notes included in Sandy Spring Bancorp's 2008 Annual Report on Form 10-K. There have been no significant changes to the Company's accounting policies as disclosed in the 2008 Annual Report on Form 10-K. The results shown in this interim report are not necessarily indicative of results to be expected for the full year 2009.

The accounting and reporting policies of Sandy Spring Bancorp, Inc. (the "Company") and its wholly-owned subsidiary, Sandy Spring Bank (the "Bank"), together with its subsidiaries, Sandy Spring Insurance Corporation, The Equipment Leasing Company, and West Financial Services, Inc., conform to accounting principles generally accepted in the United States of America and to general practices within the financial services industry. Certain reclassifications have been made to amounts previously reported to conform to current classifications.

Consolidation has resulted in the elimination of all significant intercompany accounts and transactions.

Subsequent events have been evaluated through August 6, 2009, which is the date the financial statements were available to be issued.

Cash Flows

For purposes of reporting cash flows, cash and cash equivalents include cash and due from banks and federal funds sold (which have original maturities of three months or less).

Note 2 - New Accounting Pronouncements

Adopted Accounting Pronouncements

In April 2009, the FASB issued FSP FAS 115-2 and 124-2, "Recognition and Presentation of Other-Than-Temporary Impairments" ("FSP FAS 115-2 and 124-2"), which is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. This FSP changes the requirements for recognizing OTTI for debt securities and modifies the criteria used to assess the collectability of cash flows when determining the potential for OTTI. The FSP further modifies the presentation of OTTI losses and increases the frequency of and expands existing disclosure requirements. The Company's adoption of this FSP in the second quarter of 2009 did not have a material impact on the Company's financial position, results of operations or cash flows.

In April 2009, the FASB issued FSP FAS 157-4, "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly" ("FSP FAS 157-4"), which is effective for interim and annual reporting periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. This FSP provides additional guidance related to the use of judgment in evaluating the relevance of inputs when determining fair value, estimating fair values when the volume and level of activity for an asset or liability has significantly decreased and identifying transactions that are not orderly. The Company's adoption of this FSP in the second quarter of 2009 did not have a material impact on the Company's financial position, results of operations or cash flows.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, “Interim Disclosures about Fair Value of Financial Instruments” (“FSP FAS 107-1”), which is effective for interim periods ending after June 15, 2009, with early adoption permitted for periods ending after March 15, 2009. This FSP requires disclosures about the fair value of its financial instruments whenever it issues summarized financial information for interim reporting periods. The Company’s adoption of this FSP in the second quarter of 2009 did not have a material impact on the Company’s financial position, results of operations or cash flows.

In June 2008, the FASB issued FSP EITF 03-6-1, "Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities." The FSP concludes that unvested share-based payment awards that contain nonforfeitable rights to dividends or dividend equivalents are participating securities that should be included in the earnings allocation in computing earnings per share under the two class method. The FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and interim periods within those years. All prior period per share data presented must be adjusted retrospectively. The Company's adoption of this FSP did not have a material impact on the Company's financial position, results of operations or cash flows.

In May 2009, the FASB issued SFAS No. 165, "Subsequent Events" ("SFAS No. 165"). The Statement establishes general standards of accounting for and disclosure of events that occurred after the balance sheet date but before financial statements are issued or are available to be issued. This Statement will be effective for interim or annual financial periods ending after June 15, 2009 and shall be applied prospectively. The Statement defines two types of subsequent events that must be evaluated: recognized and nonrecognized subsequent events. An entity must recognize in the financial statements the effects of all subsequent events that provide additional evidence about conditions that existed at the date of the balance sheet, including the estimates inherent in the process of preparing financial statements. An entity may not recognize subsequent events that provide evidence about conditions that did not exist at the date of the balance sheet but that arose after the balance sheet date but prior to the issuance of the financial statements. The Statement stipulates that certain nonrecognized subsequent events may be of such a nature that they must be disclosed to keep the financial statements from being misleading. The adoption of this Statement did not have a material impact on the Company's financial position, results of operations or cash flows.

Pending Accounting Pronouncements

In December 2008, the FASB issued FSP FAS 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets." This FSP amends SFAS No. 132(revised 2003), "Employers' Disclosures about Pensions and Other Postretirement Benefits", to provide guidance on an employer's disclosures about plan assets of a defined benefit pension or other postretirement plan ("FSP FASB 132(R)-1"). The FSP is effective for financial statements issued for fiscal years ending after December 15, 2009. The FSP requires employers to disclose information about fair value measurements of plan assets that would be similar to the disclosures about fair value measurements required by SFAS No. 157, "Fair Value Measurements." The Company does not expect that the adoption of this FSP will have a material impact on its financial position, results of operations or cash flows

In June 2009, the FASB issued SFAS No. 166, "Accounting for Transfers of Financial Assets an amendment of FASB Statement No. 140" ("SFAS No. 166"). The disclosure requirements apply to transfers that occur both before and after the effective date of the statement. SFAS No. 166 is effective as of the beginning of a reporting entity's first annual reporting period beginning after November 15, 2009, for interim periods within that first annual reporting period, and for interim and annual reporting periods thereafter. Earlier application is prohibited. This statement changes the derecognition guidance for transferors of financial assets, including entities that sponsor securitizations, to align that guidance with the original intent of FASB Statement No. 140, "Accounting for the Transfers and Servicing of Financial Assets and Extinguishments of Liabilities." In addition, on and after the effective date, existing qualifying special-purpose entities must be evaluated for consolidation by the reporting entity.

The Statement eliminates the concept of a qualifying special purpose entity ("QSPE"). The Statement eliminates any reference to a QSPE and requires a transferor to evaluate transfers to such entities under the amended guidance. SFAS No. 166 also introduces the concept of a participating interest. A participating interest is defined as a proportionate interest ownership interest in a financial asset in which the cash flows from the asset are allocated to the participating interest holders in proportion to their ownership share.

Additionally, the Statement significantly modifies the conditions required for a transfer of a financial asset or a participating interest therein to qualify as a sale. SFAS No. 166 also changes the measurement guidance for transfers of financial assets in that it requires that a transferor recognize and initially measure at fair value any servicing assets, servicing liabilities, and any other assets obtained and liabilities incurred in a sale. The Statement amends the disclosure requirements that will allow financial statement users to understand the nature and extent of the transferor's continuing involvement with financial assets that have been transferred. The Company does not expect that the adoption of this Statement will have a material impact on its financial position, results of operations or cash flows.

In June 2009, the FASB issued SFAS No. 167, "Amendments to FASB Interpretation No.46(R)" ("SFAS No. 167"). The Statement is effective as of the beginning of a reporting entity's first annual reporting period that begins after November 15, 2009 and for interim periods within the first annual reporting period. Earlier application is prohibited. The objective of this Statement is to improve the accounting and disclosure of any involvement with variable interest entities ("VIEs"). The Statement eliminates the existing approach for identifying the primary beneficiary of a VIE. It changes that approach with an analysis to determine if an enterprise's variable interests give it a controlling financial interest in the VIE. The statement also expands the disclosure requirements for an enterprise that have a variable interest in a VIE. The Company does not expect that the adoption of this Statement will have a material impact on its financial position, results of operations or cash flows.

In June 2009, the FASB issued SFAS No. 168, "The FASB Accounting Standards CodificationTM and the Hierarchy of Generally Accepted Accounting Principles – a replacement of FASB No. 162" ("SFAS No. 168"). This Statement is effective for financial statements issued for interim and annual periods ending after September 15, 2009. The Statement modifies the hierarchy of generally accepted accounting principles ("GAAP") to include two levels of GAAP: authoritative and nonauthoritative to be applied by nongovernmental entities. Authoritative GAAP will include all rules and interpretive releases of the Securities and Exchange Commission ("SEC"). Subsequent to the effective date of the SFAS No. 168, all references to GAAP will conform to the codification standards. Management has determined that this guidance does not impact the financial statements of the Company.

Note 3 – Stock Based Compensation

At June 30, 2009, the Company had two stock-based compensation plans in existence, the 1999 Stock Option Plan (expired but having outstanding options that may still be exercised) and the 2005 Omnibus Stock Plan, which is described below.

The Company's 2005 Omnibus Stock Plan ("Omnibus Plan") provides for the granting of non-qualifying stock options to the Company's directors, and incentive and non-qualifying stock options, stock appreciation rights and restricted stock grants to selected key employees on a periodic basis at the discretion of the Board. The Omnibus Plan authorizes the issuance of up to 1,800,000 shares of common stock of which 1,200,222 are available for issuance at June 30, 2009, has a term of ten years, and is administered by a committee of at least three directors appointed by the Board of Directors. Options granted under the plan have an exercise price which may not be less than 100% of the fair market value of the common stock on the date of the grant and must be exercised within seven to ten years from the date of grant. The exercise price of stock options must be paid for in full in cash or shares of common stock, or a combination of both. The Stock Option Committee has the discretion when making a grant of stock options to impose restrictions on the shares to be purchased in exercise of such options. Outstanding options granted under the expired 1999 Stock Option Plan will continue until exercise or expiration.

Effective March 25, 2009, the Board of Directors approved the granting of 73,560 stock options, subject to a three year vesting schedule with one third of the options vesting each year as of March 25, 2010, 2011, and 2012, respectively. In addition, on March 25, 2009, the Board of Directors granted 97,008 restricted shares subject to a five year vesting schedule with one fifth of the shares vesting each year as of March 25, 2010, 2011, 2012, 2013, and 2014, respectively. Compensation expense is recognized on a straight-line basis over the stock option or restricted stock vesting period. The fair value based method for expense recognition of employee awards resulted in expense of approximately \$0.5 million and \$0.4 million for the six month periods ended June 30, 2009 and 2008, respectively.

The fair values of all of the options granted have been estimated using a binomial option-pricing model.

The total intrinsic value of options exercised during the six months ended June 30, 2009 and 2008 was \$0 million and \$0.2 million, respectively

A summary of share option activity for the two plans for the six month period ended June 30, 2009 follows:

(Dollars in thousands, except per share data):	Number of Shares	Weighted		Aggregate Intrinsic Value
		Weighted Average Exercised Share Price	Average Remaining Contractual Life(Years)	
Balance at January 1, 2009	973,730	\$ 33.47	5.0	\$ 610
Granted	73,560	12.01	7.0	
Exercised	0	0	0	
Forfeited or expired	(163,314)	32.55	3.2	
Balance at June 30, 2009	883,976	\$ 31.85	4.8	\$ 201
Exercisable at June 30, 2009	718,448	\$ 33.86		\$ 8

A summary of the status of the Company's nonvested options and restricted stock as of June 30, 2009, and changes during the six month period then ended, is presented below:

	Number Of Shares	Weighted Average Grant-Date Fair Value
Nonvested at January 1, 2009	134,010	\$ 5.25
Granted	73,560	3.22
Vested	(34,456)	4.47
Forfeited	(7,586)	4.62
Nonvested at June 30, 2009	165,528	\$ 4.54

	Number Of Shares	Weighted Average Grant-Date Fair Value
Restricted stock at January 1, 2009	41,202	\$ 31.27
Granted	97,008	12.01
Vested	(5,441)	27.96
Forfeited	(2,074)	25.83
Restricted stock at June 30, 2009	130,695	\$ 17.20

The number of options, exercise prices, and fair values has been retroactively restated for all stock dividends occurring since the date the options were granted.

The total of unrecognized compensation cost related to nonvested share-based compensation arrangements was approximately \$2.1 million as of June 30, 2009. That cost is expected to be recognized over a weighted average period of approximately 3.5 years.

The Company generally issues authorized but previously unissued shares to satisfy option exercises.

Note 4 - Per Share Data

The calculations of net income per common share for the three and six month periods ended June 30, 2009 and 2008 are shown in the following table. Basic net income per common share is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding and does not include the impact of any potentially dilutive common stock equivalents. The diluted earnings per common share calculation method is derived by dividing net income available to common stockholders by the weighted average number of common shares outstanding adjusted for the dilutive effect of common stock equivalents.

(Dollars and amounts in thousands, except per share data)	Three Months Ended		Six Months Ended	
	June 30, 2009	June 30, 2008	June 30, 2009	June 30, 2008

Diluted net income (loss) per share	\$	(0.02)	\$	0.34	\$	0.12	\$	0.84
Diluted net income (loss) per common share	\$	(0.09)	\$	0.34	\$	(0.03)	\$	0.84

9

Options for 883,976 shares and 1,047,087 shares of common stock were not included in computing diluted net income per share for the six month periods ended June 30, 2009 and 2008, respectively, because their effects are antidilutive. For the three months ended June 30, 2009 and 2008, options for 883,976 shares and 1,047,087 shares of common stock were not included, respectively.

Note 5 - Pension, Profit Sharing, and Other Employee Benefit Plans

Defined Benefit Pension Plan

The Company has a qualified, noncontributory, defined benefit pension plan covering substantially all employees. Benefits after January 1, 2005, are based on the benefit earned as of December 31, 2004, plus benefits earned in future years of service based on the employee's compensation during each such year. On November 14, 2007, the Company informed employees that the plan would be frozen for new and existing entrants after December 31, 2007. All benefit accruals for employees were frozen as of December 31, 2007 based on past service and thus future salary increases will no longer affect the defined benefit provided by the plan, although additional vesting may continue to occur.

The Company's funding policy is to contribute amounts to the plan sufficient to meet the minimum funding requirements of the Employee Retirement Income Security Act of 1974 ("ERISA"), as amended. In addition, the Company contributes additional amounts as it deems appropriate based on benefits attributed to service prior to the date of the plan freeze. The Plan invests primarily in a diversified portfolio of managed fixed income and equity funds. The Company, with input from its actuaries, estimates that the 2009 contribution will be approximately \$4.0 million.

Net periodic benefit cost for the three and six month periods ended June 30 includes the following components:

(In thousands)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
Interest cost on projected benefit obligation	\$ 360	\$ 355	\$ 715	\$ 710
Expected return on plan assets	(300)	(326)	(642)	(652)
Amortization of prior service cost	0	(44)	0	(88)
Recognized net actuarial loss	342	99	678	198
Net periodic benefit cost	\$ 402	\$ 84	\$ 751	\$ 168

Cash and Deferred Profit Sharing Plan

The Company has a qualified Cash and Deferred Profit Sharing Plan that includes a 401(k) provision with a Company match. Effective January 1, 2007 the Company revised the Plan to eliminate the deferral option and require an all-cash payout of any profit sharing distributions beginning in 2007. The 401(k) provision is voluntary and covers all eligible employees after ninety days of service. Employees contributing to the 401(k) provision receive a matching contribution of 100% of the first 3% of compensation and 50% of the next 2% of compensation subject to employee contribution limitations. The Company match vests immediately. The Plan permits employees to purchase shares of Sandy Spring Bancorp, Inc. common stock with their 401(k) contributions, Company match, and other contributions under the Plan. Profit sharing contributions and the Company match are included in noninterest expenses and totaled \$0.7 million for both of the six month periods ended June 30, 2009 and 2008, respectively, and \$0.3 million for both of the three month periods ended June 30, 2009 and 2008, respectively.

The Company has a short-term incentive plan named the Sandy Spring Leadership Incentive Plan which provides a cash bonus to key members of management based on the Company's financial results using a weighted formula. Payments under this plan to senior executive officers may be limited under the Emergency Economic Stabilization Act of 2008, as amended. The expense for this plan is included in noninterest expenses and totaled \$0 and \$0.4 million for the six month periods ended June 30, 2009 and 2008, respectively, and \$0 and \$0.2 million for the three month periods ended June 30, 2009 and 2008, respectively.

Executive Incentive Retirement Plan

In past years, the Company had Supplemental Executive Retirement Agreements ("SERAs") with its executive officers providing for retirement income benefits as well as pre-retirement death benefits. Retirement benefits payable under the SERAs, if any, were integrated with other pension plan and Social Security retirement benefits expected to be received by the executive. The Company accrued the present value of these benefits over the remaining number of years to the executives' retirement dates. Effective January 1, 2008, these agreements were replaced with a defined contribution plan, the "Executive Incentive Retirement Plan" or "the Plan". Benefits under the SERAs were reduced to a fixed amount as of December 31, 2007, and those amounts accrued were transferred to the new plan on behalf of each participant. Additionally, under the new Plan, officers designated by the board of directors earn a deferral bonus which is accrued annually based on the Company's financial performance compared to a selected group of peer banks. For current participants, accruals after January 1, 2008 vest immediately. Amounts transferred to the plan from the SERAs on behalf of each participant continue to vest based on years of service. Allocations to executive officers for 2009 and subsequent periods may be subject to restrictions pursuant to the Emergency Economic Stabilization Act of 2008, as amended. The Company had expenses related to the new Plan of \$0.1 million and \$0.4 million for the six months ended June 30, 2009 and June 30, 2008, respectively, and 0 and \$0.2 million for the three month periods ended June 30, 2009 and 2008, respectively.

Note 6 – Investments

The amortized cost and estimated fair values of investments available for sale are as follows:

(In thousands)	As of June 30, 2009				As of December 31, 2008			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value

State and municipal	4	1,131	41	0	41
	42	\$ 87,619	\$ 2,686	\$ 9	\$ 2,695

Approximately 96% of the bonds carried in the available-for-sale investment portfolio experiencing continuous losses as of June 30, 2009 are rated AAA, 2% are rated A and 2% are rated Ca. Approximately 94% of the bonds carried in the available-for-sale investment portfolio experiencing losses as of December 31, 2008 are rated AAA, 4% are rated B1 and 2% are not rated. The securities representing the unrealized losses in the available-for-sale portfolio as of June 30, 2009 and December 31, 2008 all have modest duration risk (2.84 years in 2009 and 2.41 years in 2008), low credit risk, and minimal loss (approximately 1.99% in 2009 and 2.98% in 2008) when compared to book value. The unrealized losses that exist are the result of changes in market interest rates since the original purchase. These factors coupled with the fact that the Company has both the intent and ability to hold these investments for a sufficient period of time, which may be maturity, to allow for any anticipated recovery in fair value substantiates that the unrealized losses in the available-for-sale portfolio are temporary.

The amortized cost, and estimated fair values, of debt securities available for sale at June 30, 2009 and December 31, 2008 by contractual maturity are shown below. The Company has allocated mortgage-backed securities into the four maturity groupings shown using the expected average life of the individual securities based upon statistics provided by independent third party industry sources. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(In thousands)	June 30, 2009		December 31, 2008	
	Amortized Cost	Estimated Fair Value	Amortized Cost	Estimated Fair Value

Due after ten years	0	0	0	0
Total debt securities available for sale	\$ 693,470	\$ 696,964	\$ 290,609	\$ 291,377

There were no sales of investments available for sale during 2009 or 2008.

At June 30, 2009 and December 31, 2008, investments available for sale with a book value of \$219.3 million and \$217.2 million, respectively, were pledged as collateral for certain government deposits and for other purposes as required or permitted by law. The outstanding balance of no single issuer, except for U.S. Agencies and Corporations securities, exceeded ten percent of stockholders' equity at June 30, 2009 and December 31, 2008.

The amortized cost and estimated fair values of investments held to maturity are as follows:

June 30, 2009			December 31, 2008

12

Gross unrealized losses and fair value by length of time that the individual held-to-maturity securities have been in a continuous unrealized loss position at June 30, 2009 and December 31, 2008 are as follows:

(In thousands) Held to Maturity as of June 30, 2009	Number of securities	Fair Value	Continuous unrealized losses existing for:		Total Unrealized Losses
			Less than 12 months	More than 12 months	
State and municipal	9	\$ 7,526	\$ 107	\$ 0	\$ 107
	9	\$ 7,526	\$ 107	\$ 0	\$ 107

(In thousands) Held to Maturity as of December 31, 2008	Number of securities	Fair Value	Continuous unrealized losses existing for:		Total Unrealized Losses
			Less than 12 months	More than 12 months	
State and municipal	14	\$ 10,658	\$ 159	\$ 0	\$ 159
	14	\$ 10,658	\$ 159	\$ 0	\$ 159

Approximately 61% of the bonds carried in the held-to-maturity investment portfolio experiencing continuous unrealized losses as of June 30, 2009, are rated AA- and 39% are rated A. As of December 31, 2008, approximately 16% of such bonds are rated AAA and approximately 84% are rated AA. The securities representing the unrealized losses in the held-to-maturity portfolio all have modest duration risk (5.53 years in 2009 and 6.27 years in 2008), low credit risk, and minimal losses (approximately 1.40% in 2009 and 1.47% in 2008) when compared to book value. The unrealized losses that exist are the result of changes in market interest rates since the original purchase. These factors coupled with the Company's intent and ability to hold these investments for a sufficient period of time, which may be maturity, to allow for any anticipated recovery in fair value substantiates that the unrealized losses in the held-to-maturity portfolio are temporary.

The amortized cost and estimated fair values of debt securities held to maturity at June 30, 2009 and December 31, 2008 by contractual maturity are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(In thousands)	June 30, 2009		December 31, 2008

Note 7 - Segment Reporting

The Company operates in four operating segments—Community Banking, Insurance, Leasing, and Investment Management. Only Community Banking currently meets the threshold for segment reporting; however, the Company is disclosing separate information for all four operating segments. Each of the operating segments is a strategic business unit that offers different products and services. The Insurance, Leasing, and Investment Management segments are businesses that were acquired in separate transactions where management at the time of acquisition was retained. The accounting policies of the segments are the same as those described in Note 1 to the consolidated financial statements included in the 2008 Annual Report on Form 10-K. However, the segment data reflect intersegment transactions and balances.

The Community Banking segment is conducted through Sandy Spring Bank and involves delivering a broad range of financial products and services, including various loan and deposit products to both individuals and businesses. Parent company income is included in the Community Banking segment, as the majority of parent company activities are related to this segment. Major revenue sources include net interest income, gains on sales of mortgage loans, trust income, fees on sales of investment products and service charges on deposit accounts. Expenses include personnel, occupancy, marketing, equipment and other expenses. Included in Community Banking expenses are noncash charges associated with amortization of intangibles related to acquired entities totaling \$.8 million and \$.9 million for the three month periods ended June 30, 2009 and 2008 respectively. For the six month periods ended June 30, 2009 and 2008, the amortization related to acquired entities totaled \$1.6 million and \$1.7 million, respectively.

The Insurance segment is conducted through Sandy Spring Insurance Corporation, a subsidiary of the Bank, and offers annuities as an alternative to traditional deposit accounts. In addition, Sandy Spring Insurance Corporation operates the Chesapeake Insurance Group and Wolfe and Reichelt Insurance Agency, general insurance agencies located in Annapolis, Maryland, and Neff & Associates, located in Ocean City, Maryland. Major sources of revenue are insurance commissions from commercial lines and personal lines. Expenses include personnel and support charges. Included in insurance expenses are non-cash charges associated with amortization of intangibles totaling \$0 and \$0.1 million for the three month periods ended June 30, 2009 and 2008, respectively. For the six month periods ended June 30, 2009 and 2008, respectively, amortization related to acquired entities totaled \$0.1 million and \$0.2 million.

The Leasing segment is conducted through The Equipment Leasing Company, a subsidiary of the Bank that provides leases for essential commercial equipment used by small to medium sized businesses. Equipment leasing is conducted through vendor relations and direct solicitation to end-users located primarily in states along the east coast from New Jersey to Florida. The typical lease is categorized as a financing lease and is characterized as a “small ticket” by industry standards, averaging less than \$100 thousand, with individual leases generally not exceeding \$500 thousand. Major revenue sources include interest income. Expenses include personnel and support charges.

The Investment Management segment is conducted through West Financial Services, Inc., a subsidiary of the Bank that was acquired in October 2005. This asset management and financial planning firm, located in McLean, Virginia, provides comprehensive financial planning to individuals, families, small businesses and associations including cash flow analysis, investment review, tax planning, retirement planning, insurance analysis and estate planning. West Financial has approximately \$652.0 million in assets under management as of June 30, 2009. Major revenue sources include noninterest income earned on the above services. Expenses include personnel and support charges. Included in investment management expenses are non-cash charges associated with amortization of intangibles totaling \$0.2 million for both of the three month periods ended June, 2009 and 2008, and \$0.4 million for both of the six month periods ended June 30, 2009 and 2008.

Note 8 – Comprehensive Income

The components of total comprehensive income for the six month periods ended June 30, 2009 and 2008 are as follows:

	For the six months ended June 30	
	2009	2008
(In Thousands)		
Net Income	\$ 1,937	\$ 13,856
Securities available for sale:		
Net change in unrealized gains (losses) on securities available for sale	2,916	(408)
Related income tax expense	(1,163)	163
Net securities gains reclassified into earnings	(192)	(653)
Related income tax benefit	77	260
Net effect on other comprehensive income for the period	1,638	(638)
Defined benefit pension plan:		
Amortization of prior service costs	0	(88)
Related income tax benefit (expense)	0	36
Recognition of unrealized gain	678	196
Related income tax expense	(270)	(78)
Net effect on other comprehensive income for the period	408	66
Total other comprehensive income	2,046	(572)
Comprehensive income	\$ 3,983	\$ 13,284

The activity in accumulated other comprehensive income for the periods ended June 30, 2009 and 2008 is as follows:

	Defined Benefit Pension Plan	Unrealized Gains (losses) on Securities Available-for-Sale	Total
Balance at January 1, 2008	\$ (2,097)	\$ 1,042	\$ (1,055)
Period change, net of tax	66	(638)	(572)
Balance at June 30, 2008	\$ (2,031)	\$ 404	\$ (1,627)
Balance at January 1, 2009	\$ (8,033)	\$ 461	\$ (7,572)
Period change, net of tax	408	1,638	2,046
Balance at March 31, 2009	\$ (7,625)	\$ 2,099	\$ (5,526)

Note 9- Fair Value Measurements

On February 15, 2007, the FASB issued Statement of Financial Accounting Standards No. 159, "The Fair Value Option for Financial Assets and Financial Liabilities" (SFAS No. 159), which gives entities the option to measure eligible financial assets, financial liabilities and Company commitments at fair value (i.e. the fair value option), on an instrument-by-instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting standards. The election to use the fair value option is available when an entity first recognizes a financial asset or financial liability or upon entering into a Company commitment. Subsequent changes in fair value must be recorded in earnings. Additionally, SFAS No. 159 allows for a one-time election for recorded to beginning retained earnings.

The Company adopted SFAS No. 159 as of January 1, 2008 and elected the fair value option for a group of specific financial instruments which are mortgage loans held for sale. The Company believes by electing the fair value option for this financial instrument, it will allow the accounting for gains on sale of mortgage loans to more accurately reflect the timing and economics of the transaction. The effect of this adjustment was immaterial to the Company's financial results for the three and six month periods ending June 30, 2009 and June 30, 2008.

Simultaneously with the adoption of SFAS No. 159, the Company adopted SFAS No. 157, "Fair Value Measurements" ("SFAS No. 157"), effective January 1, 2008. SFAS No. 157 clarifies that fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. Under SFAS No. 157, fair value measurements are not adjusted for transaction costs. SFAS No. 157 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest priority to unobservable inputs (level 3 measurements). The three levels of the fair value hierarchy under SFAS No. 157 are described below.

Basis of Fair Value Measurement:

Level 1- Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2- Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;

Level 3- Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e. supported by little or no market activity).

A financial instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

The types of instruments valued based on quoted market prices in active markets include most U.S. government and agency securities, many other sovereign government obligations, liquid mortgage products, active listed equities and most money market securities. Such instruments are generally classified within level 1 or level 2 of the fair value hierarchy. As required by SFAS No. 157, the Company does not adjust the quoted price for such instruments.

The types of instruments valued based on quoted prices in markets that are not active, broker or dealer quotations, or alternative pricing sources with reasonable levels of price transparency include most investment-grade and high-yield corporate bonds, less liquid mortgage products, less liquid equities, state, municipal and provincial obligations, and certain physical commodities. Such instruments are generally classified within level 2 of the fair value hierarchy.

Level 3 is for positions that are not traded in active markets or are subject to transfer restrictions, valuations are adjusted to reflect illiquidity and/or non-transferability, and such adjustments are generally based on available market evidence. In the absence of such evidence, management's best estimate is used.

Impaired loans totaled \$105.7 million at June 30, 2009, compared to \$52.6 million at December 31, 2008.

Interest rate swap agreements are measured by alternative pricing sources with reasonable levels of price transparency in markets that are not active. Based on the complex nature of interest rate swap agreements, the markets these instruments trade in are not as efficient and are less liquid than that of the more mature level 1 markets. These markets do however have comparable, observable inputs in which an alternative pricing source values these assets in order to arrive at a fair market value. These characteristics classify interest rate swap agreements as level 2 as represented in SFAS No. 157.

The following table set forth the Company's financial assets and liabilities that were accounted for or disclosed at fair value. Assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement (in thousands):

	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2009
Assets				
Residential Mortgage loans held for sale	\$ -	\$ 14,494	\$ -	\$ 14,494
Investments securities, available for sale		694,174	3,140	697,314
Interest rate swap agreements	-	89	-	89
Liabilities				
Interest rate swap agreements	\$ -	\$ (89)	\$ -	\$ (89)

(In thousands)

Assets	Significant Unobservable Inputs (Level 3)
--------	---

Investments available for sale:

Beginning balance December 31, 2008	\$ 3,154
-------------------------------------	----------

Total Unrealized losses included in other comprehensive income	(14)
--	------

Ending balance June 30, 2009	\$ 3,140
------------------------------	----------

The Company owns \$4.8 million of collateralized debt obligation securities that are backed by pooled trust preferred securities issued by banks, thrifts, and insurance companies. The market for pooled trust securities at June 30, 2009 is not active and markets for similar securities are also not active. There are currently very few market participants who are willing and or able to transact for these securities.

Given current conditions in the debt markets and the absence of observable transactions in the secondary markets, the Company has determined:

- The few observable transactions and market quotations that are available are not reliable for purposes of determining fair value at June 30, 2009.
- An income valuation approach technique (present value technique) that maximizes the use of relevant observable inputs and minimizes the use of unobservable inputs will be equally or more representative of fair value than the market approach valuation technique used at prior measurement dates.
-

The pooled trust preferred securities will be classified within Level 3 of the fair value hierarchy because the Company has determined that significant adjustments are required to determine fair value at the measurement date.

Assets Measured at Fair Value on a Nonrecurring Basis

The following table sets forth the Company's financial assets subject to fair value adjustments (impairment) on a nonrecurring basis as they are valued at the lower of cost or market. Assets classified in their entirety based on the lowest level of input that is significant to the fair value measurement:

(In thousands)	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Balance as of June 30, 2009
Assets				
Impaired loans	\$ -	\$ -	\$ 89,038	\$ 89,038

In accordance with SFAS No. 114, "Accounting for Creditors for Impairment of a Loan" impaired loans totaling \$105.7 million were written down to fair value of \$89.0 million resulting in an impairment charge of \$16.7 million which was included in our allowance for loan losses.

Impaired loans are evaluated at the time the loan is identified as impaired, at the lower of cost or market value. Market value is measured based on the value of the collateral securing these loans and is classified at a level 3 in the fair value hierarchy. Collateral may be real estate and/or business assets including equipment, inventory and/or accounts receivable. The value of business equipment, inventory and accounts receivable collateral is based on net book value on the business' financial statements and if necessary discounted based on management's review and analysis. Appraised and reported values may be discounted based on management's historical knowledge, changes in market conditions from the time of valuation, and/or management's expertise and knowledge of the client and client's business. Impaired loans are reviewed and evaluated on at least a quarterly basis for additional impairment and adjusted accordingly, based on the same factors identified above.

Fair Value of Financial Instruments

The Company discloses fair value information about financial instruments for which it is practicable to estimate the value, whether or not such financial instruments are recognized on the balance sheet. Financial instruments have been defined broadly to encompass 95.0% of the Company's assets and 99.0% of its liabilities at June 30, 2009 and December 31, 2008. Fair value is the amount at which a financial instrument could be exchanged in a current transaction between willing parties, other than in a forced sale or liquidation, and is best evidenced by a quoted market price, if one exists.

Quoted market prices, where available, are shown as estimates of fair market values. Because no quoted market prices are available for a significant part of the Company's financial instruments, the fair value of such instruments has been derived based on the amount and timing of future cash flows and estimated discount rates.

Present value techniques used in estimating the fair value of many of the Company's financial instruments are significantly affected by the assumptions used. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate cash settlement of the instrument. Additionally, the accompanying estimates of fair values are only representative of the fair values of the individual financial assets and liabilities, and should not be considered an indication of the fair value of the Company.

The estimated fair values of the Company's financial instruments are as follows:

(In thousands)	As of June 30, 2009		As of December 31, 2008	
	Carrying Amount	Estimated Fair Value	Carrying Amount	Estimated Fair Value
Financial Assets				
Cash and temporary investments (1)	\$ 136,978	\$ 136,978	\$ 116,620	\$ 116,620
Investments available for sale	697,314	697,314	291,727	291,727
Investments held to maturity and other equity securities	178,060	182,232	200,764	205,054
Loans, net of allowances	2,331,072	2,300,767	2,440,120	2,467,993
Accrued interest receivable and other assets (2)	87,914	87,914	85,219	85,219
Financial Liabilities				
Deposits	\$ 2,650,485	\$ 2,659,945	\$ 2,365,257	\$ 2,380,527
Short-term borrowings	496,463	527,311	421,074	462,130
Long-term borrowings	49,434	36,442	101,584	103,495
Accrued interest payable and other liabilities (2)	3,860	3,860	4,330	4,330

(1) Temporary investments include federal funds sold, interest-bearing deposits with banks and residential mortgage loans held for sale.

(2) Only financial instruments as defined in SFAS No. 107, "Disclosure about Fair Value of Financial Instruments," are included in other assets and other liabilities.

The following methods and assumptions were used to estimate the fair value of each category of financial instruments for which it is practicable to estimate that value:

Cash and Temporary Investments:

Cash and due from banks, federal funds sold and interest-bearing deposits with banks. The carrying amount approximated the fair value.

Residential mortgage loans held for sale. The fair value of residential mortgage loans held for sale was derived from secondary market quotations for similar instruments.

Investments. The fair value for U.S. Treasury, U.S. Agency, state and municipal, corporate debt and some trust preferred securities was based upon quoted market bids; for mortgage-backed securities upon bid prices for similar pools of fixed and variable rate assets, considering current market spreads and prepayment speeds; and, for equity securities upon quoted market prices. Certain trust preferred securities were estimated by utilizing the discounted value of estimated cash flows.

Loans. The fair value was estimated by computing the discounted value of estimated cash flows, adjusted for potential loan and lease losses, for pools of loans having similar characteristics. The discount rate was based upon the current loan origination rate for a similar loan. Non-performing loans have an assumed interest rate of 0%.

Accrued interest receivable. The carrying amount approximated the fair value of accrued interest, considering the short-term nature of the receivable and its expected collection.

Other assets. The carrying amount approximated the fair value considering their short-term nature.

Deposits. The fair value of demand, money market savings and regular savings deposits, which have no stated maturity, were considered equal to their carrying amount, representing the amount payable on demand. While management believes that the Bank's core deposit relationships provide a relatively stable, low-cost funding source that has a substantial intangible value separate from the value of the deposit balances, these estimated fair values do not include the intangible value of core deposit relationships, which comprise a significant portion of the Bank's deposit base.

The fair value of time deposits was based upon the discounted value of contractual cash flows at current rates for deposits of similar remaining maturity.

Short-term borrowings. The carrying amount approximated the fair value of repurchase agreements due to their variable interest rates. The fair value of Federal Home Loan Bank of Atlanta advances was estimated by computing the discounted value of contractual cash flows payable at current interest rates for obligations with similar remaining terms.

Long-term borrowings. The fair value of the Federal Home Loan Bank of Atlanta advances and subordinated debentures was estimated by computing the discounted value of contractual cash flows payable at current interest rates for obligations with similar remaining terms.

Accrued interest payable and other liabilities. The carrying amount approximated the fair value of accrued interest payable, accrued dividends and premiums payable, considering their short-term nature and expected payment.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

Sandy Spring Bancorp makes forward-looking statements in this report. These forward-looking statements may include: statements of goals, intentions, earnings expectations, and other expectations; estimates of risks and of future costs and benefits; assessments of probable loan and lease losses; assessments of market risk; and statements of the ability to achieve financial and other goals. Forward-looking statements are typically identified by words such as "believe," "expect," "anticipate," "intend," "outlook," "estimate," "forecast," "project" and other similar words and expressions. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made. The Company does not assume any duty and does not undertake to update its forward-looking statements. Because forward-looking statements are subject to assumptions and uncertainties, actual results or future events could differ, possibly materially, from those that the Company anticipated in its forward-looking statements, and future results could differ materially from historical performance.

The Company's forward-looking statements are subject to the following principal risks and uncertainties: general economic conditions and trends, either nationally or locally; conditions in the securities markets; changes in interest rates; changes in deposit flows, and in the demand for deposit, loan, and investment products and other financial services; changes in real estate values; changes in the quality or composition of the Company's loan or investment portfolios; changes in competitive pressures among financial institutions or from non-financial institutions; the Company's ability to retain key members of management; changes in legislation, regulation, and policies; and a variety of other matters which, by their nature, are subject to significant uncertainties. The Company provides greater detail regarding some of these factors in its Form 10-K for the year ended December 31, 2008, including in the Risk Factors section of that report. The Company's forward-looking statements may also be subject to other risks and uncertainties, including those that it may discuss elsewhere in this report or in its other filings with the SEC.

THE COMPANY

The Company is the registered bank holding company for Sandy Spring Bank (the "Bank"), headquartered in Olney, Maryland. The Bank operates forty two community offices in Anne Arundel, Carroll, Frederick, Howard, Montgomery, and Prince George's Counties in Maryland and Fairfax and Loudoun counties in Virginia, together with an insurance subsidiary, equipment leasing company and an investment management company in McLean, Virginia.

The Company offers a broad range of financial services to consumers and businesses in this market area. Through June 30, 2009, year-to-date average commercial loans and leases and commercial real estate loans accounted for approximately 58% of the Company's loan and lease portfolio, and year-to-date average consumer and residential real estate loans accounted for approximately 42%. The Company has established a strategy of independence and intends to establish or acquire additional offices, banking organizations, and non-banking organizations as appropriate opportunities arise.

CRITICAL ACCOUNTING POLICIES

The Company's consolidated financial statements are prepared in accordance with generally accepted accounting principles ("GAAP") in the United States of America and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements may reflect different estimates, assumptions, and judgments. Certain policies inherently have a greater reliance on the use of estimates, assumptions, and judgments and as such have a greater possibility of producing results that could be materially different than originally reported. The following accounting policies comprise those that management believe are the most critical to aid in fully understanding and evaluating our reported financial results:

- Allowance for loan and lease losses;
- Goodwill impairment;
- Accounting for income taxes;
- Fair value measurements, including assessment of other than temporary impairment;
- Defined benefit pension plan.

Allowance for loan and lease losses

The allowance for loan and lease losses is an estimate of the losses that may be sustained in the loan and lease portfolio. The allowance is based on two basic principles of accounting: (1) Statement of Financial Accounting Standards ("SFAS") No. 5, "Accounting for Contingencies," which requires that a loss be accrued when it is probable that the loss has occurred at the date of the financial statements and the amount of the loss can be reasonably estimated and (2) SFAS No. 114, "Accounting by Creditors for Impairment of a Loan," which requires that losses be accrued when it is probable that the Company will not collect all principal and interest payments according to the loan's or lease's contractual terms.

Management believes that the allowance is adequate. However, its determination requires significant judgment, and estimates of probable losses in the loan and lease portfolio can vary significantly from the amounts actually observed. While management uses available information to recognize probable losses, future additions to the allowance may be necessary based on changes in the loans and leases comprising the portfolio and changes in the financial condition of borrowers, such as may result from changes in economic conditions. In addition, various regulatory agencies, as an integral part of their examination process, and independent consultants engaged by the Company, periodically review the loan and lease portfolio and the allowance. Such review may result in additional provisions based on their judgments of information available at the time of each examination.

The Company's allowance for loan and lease losses has two basic components: the formula allowance reflecting historical losses by loan category, as adjusted by several factors whose effects are not reflected in historical loss ratios, and specific allowances. Each of these components, and the systematic allowance methodology used to establish them, are described in detail in Note 1 of the Notes to the Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended December 31, 2008. The amount of the allowance is reviewed monthly by the Senior Loan Committee and reviewed and approved quarterly by the board of directors.

The portion of the allowance that is based upon historical loss factors, as adjusted, establishes allowances for the major loan categories based upon adjusted historical loss experience over the prior eight quarters, weighted so that losses realized in the most recent quarters have the greatest effect. The use of these historical loss factors is intended to reduce the differences between estimated losses inherent in the loan and lease portfolio and actual losses. The factors used to adjust the historical loss ratios address changes in the risk characteristics of the Company's loan and lease portfolio that are related to (1) trends in delinquencies and other non-performing loans, (2) changes in the risk

level of the loan portfolio related to large loans, (3) changes in the categories of loans comprising the loan portfolio, (4) concentrations of loans to specific industry segments, (5) changes in economic conditions on both a local and national level, (6) changes in the Company's credit administration and loan and lease portfolio management processes, and (7) quality of the Company's credit risk identification processes. This component comprised 70% of the total allowance at June 30, 2009 and December 31, 2008.

The specific allowance is used primarily to establish allowances for risk-rated credits on an individual or portfolio basis, and accounted for 30% of the total allowance at June 30, 2009 and December 31, 2008. The actual occurrence and severity of losses involving risk-rated credits can differ substantially from estimates, and some risk-rated credits may not be identified.

Goodwill

Goodwill is the excess of the fair value of liabilities assumed over the fair value of tangible and identifiable intangible assets acquired in a business combination. Under the provisions of FAS No. 142, "Goodwill and Other Intangible Assets", goodwill is not amortized but is tested for impairment annually or more frequently if events or changes in circumstances indicate that the asset might be impaired. Impairment testing requires that the fair value of each of the Company's reporting units be compared to the carrying amount of its net assets, including goodwill. The Company's reporting units were identified based upon an analysis of each of its individual operating segments. Determining the fair value of a reporting unit requires the Company to use a high degree of subjectivity. If the fair values of the reporting units exceed their book values, no write-down of recorded goodwill is necessary. If the fair value of a reporting unit is less than book value, an expense may be required on the Company's books to write down the related goodwill to the proper carrying value. The Company tests for impairment of goodwill as of September 30 each year, and again at any quarter-end if any triggering events occur during a quarter that may affect goodwill. For this testing the company works together with a third-party valuation firm to perform a "step one" test for potential goodwill impairment. The Company and the valuation firm determined that the Income approach and the Market approach were most appropriate in testing whether a "step two test" for impairment was necessary. At June 30, 2009 it was determined that there was no evidence of impairment of goodwill or intangibles.

Accounting for Income Taxes

The Company accounts for income taxes in accordance with SFAS No. 109, "Accounting for Income Taxes" and Financial Accounting Standards Board (the "FASB") Interpretation ("FIN") No. 48, "Accounting for Uncertainty in Income Taxes – an interpretation of FASB Statement No. 109". SFAS No. 109 requires the recording of deferred income taxes that reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Management exercises significant judgment in the evaluation of the amount and timing of the recognition of the resulting tax assets and liabilities. The judgments and estimates required for the evaluation are updated based upon changes in business factors and the tax laws. If actual results differ from the assumptions and other considerations used in estimating the amount and timing of tax recognized, there can be no assurance that additional expenses will not be required in future periods. On January 1, 2007 the Company incorporated FIN No. 48 with its existing accounting policy. FIN No. 48 prescribes a minimal probability threshold that a tax position must meet before a financial statement benefit is recognized. The Company recognized, when applicable, interest and penalties related to unrecognized tax benefits in other noninterest expenses in the consolidated income statement. Assessment of uncertain tax positions under FIN No. 48 requires careful consideration of the technical merits of a position based on management's analysis of tax regulations and interpretations. Significant judgment may be involved in applying the requirements of FIN No. 48.

Management expects that the Company's adherence to FIN No. 48 may result in increased volatility in quarterly and annual effective income tax rates as FIN No. 48 requires that any change in judgment or measurement of a tax position taken in a prior period be recognized as a discrete event in the period in which it occurs. Factors that could impact management's judgment include changes in income, tax laws and regulations, and tax planning strategies.

Fair Value

The Company measures certain financial assets and liabilities at fair value in accordance with SFAS No. 157, "Fair Value Measurements" and FASB Staff Position ("FSP") SFAS No. 157-3, "Determining the Fair Value of a financial Asset When the Market for that Asset is Not Active". Significant financial instruments measured at fair value in accordance with SFAS No. 157 on a recurring basis are investment securities available for sale and interest rate swap agreements while impaired loans are measured on a nonrecurring basis under SFAS No. 157. In addition, the Company has elected the fair value option under SFAS No. 159, "The Fair Value Option of Financial Assets and Financial Liabilities" for residential mortgage loans held for sale.

The Company conducts a review each quarter for all investment securities which reflect possible impairment to determine whether unrealized losses are temporary. Valuations for the investment portfolio are determined using

quoted market prices, where available. If quoted market prices are not available, such valuation is based on pricing models, quotes for similar investment securities, and, where necessary, an income valuation approach based on the present value of expected cash flows. In addition, the Company considers the financial condition of the issuer, the receipt of principal and interest according to the contractual terms and the intent and ability of the Company to hold the investment for a period of time sufficient to allow for any anticipated recovery in fair value.

The above accounting policies with respect to fair value are discussed in further detail in Note 9 to the consolidated financial statements.

Defined Benefit Pension Plan

The Company has a qualified, noncontributory, defined benefit pension plan covering substantially all employees. On November 14, 2007, the plan was frozen for new and existing entrants after December 31, 2007. All benefit accruals for employees were frozen as of December 31, 2007 based on past service. Thus, future salary increases and additional years of service will no longer affect the defined benefit provided by the plan although additional vesting may continue to occur.

Several factors affect the net periodic benefit cost of the plan to include (1) the size and characteristics of the plan population, (2) the discount rate, (3) the expected long-term rate of return on plan assets and (4) other actuarial assumptions. Pension cost is directly related to the number of employees covered by the plan and other factors including salary, age, years of employment, and the terms of the plan. As a result of the plan freeze, the characteristics of the plan population should not have a materially different effect in future years. The discount rate is used to determine the present value of future benefit obligations. The discount rate is determined by matching the expected cash flows of the plan to a yield curve based on long term, high quality fixed income debt instruments available as of the measurement date, which is December 31 of each year. The discount rate is adjusted each year on the measurement date to reflect current market conditions. The expected long-term rate of return on plan assets is based on a number of factors that include expectations of market performance and the target asset allocation adopted in the plan investment policy. Should actual asset returns deviate from the projected returns, this can affect the benefit plan expense recognized in the financial statements.

Non-GAAP Financial Measure

The Company has for many years used a traditional efficiency ratio that is a non-GAAP financial measure as defined in Securities and Exchange Commission Regulation G and Item 10 of Commission Regulation S-K. This traditional efficiency ratio is used as a measure of operating expense control and efficiency of operations. Management believes that its traditional ratio better focuses attention on the operating performance of the Company over time than does a GAAP ratio, and that it is highly useful in comparing period-to-period operating performance of the Company's core business operations. It is used by management as part of its assessment of its performance in managing noninterest expenses. However, this measure is supplemental, and is not a substitute for an analysis of performance based on GAAP measures. The reader is cautioned that the non-GAAP efficiency ratio used by the Company may not be comparable to GAAP or non-GAAP efficiency ratios reported by other financial institutions.

In general, the efficiency ratio is noninterest expenses as a percentage of net interest income plus total noninterest income. This is a GAAP financial measure. Noninterest expenses used in the calculation of the non-GAAP efficiency ratio exclude intangible asset amortization. Income for the non-GAAP ratio is increased for the favorable effect of tax-exempt income, and excludes securities gains and losses, which can vary widely from period to period without appreciably affecting operating expenses. The measure is different from the GAAP efficiency ratio. The GAAP measure is calculated using noninterest expense and income amounts as shown on the face of the Consolidated Statements of Income. The non-GAAP and GAAP efficiency ratios are presented and reconciled in Table 1.

Table 1 – GAAP based and Non-GAAP efficiency ratios

(Dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2009	2008	2009	2008
GAAP efficiency ratio:				
Noninterest expenses	\$ 26,858	\$ 24,886	\$ 51,108	\$ 49,589

Edgar Filing: SANDY SPRING BANCORP INC - Form 10-Q

Net interest income plus noninterest income	35,478	38,814	72,477	78,089
Efficiency ratio–GAAP	75.70%	64.12%	70.52%	63.50%
Non-GAAP efficiency ratio:				
Noninterest expenses	\$ 26,858	\$ 24,886	\$ 51,108	\$ 49,589
Less non-GAAP adjustment:				
Amortization of intangible assets	1,047	1,117	2,102	2,241
Noninterest expenses as adjusted	25,811	23,769	49,006	47,348
Net interest income plus noninterest income	35,478	38,814	72,477	78,089
Plus non-GAAP adjustment:				
Tax-equivalency	1,123	1,061	2,132	2,201
Less non-GAAP adjustments:				
Securities gains (losses)	30	79	192	653
Net interest income plus noninterest income – as adjusted	36,571	39,796	74,417	79,637
Efficiency ratio – Non-GAAP	70.58%	59.73%	65.85%	59.45%

24

A. FINANCIAL CONDITION

The Company's total assets were \$3.6 billion at June 30, 2009, increasing \$303.9 million or 9% during the first six months of 2009. Earning assets increased by 10% or \$303.4 million in the first six months of 2009 to \$3.4 billion at June 30, 2009. These increases were mainly the result of an increase of 78% in investments which was driven by the growth in deposits.

Total loans and leases, excluding loans held for sale, decreased 4% or \$101.3 million during the first six months of 2009, to \$2.4 billion. This decrease was due primarily to a decline in the residential mortgage loan portfolio which decreased by \$57.4 million or 9% due primarily to a decline in residential construction loans. Consumer loans remained virtually level during the period while commercial loans decreased \$43.0 million or 3% due mainly to declines in commercial and commercial construction loans. Residential mortgage loans held for sale increased by \$3.1 million from December 31, 2008, to \$14.5 million at June 30, 2009.

Table 2 – Analysis of Loans and Leases

The following table presents the trends in the composition of the loan and lease portfolio at the dates indicated:

(In thousands)	June 30, 2009	%	December 31, 2008	%
Residential real estate	\$ 589,423	25%	\$ 646,820	26%
Commercial loans and leases	1,394,618	58	1,437,599	58
Consumer	405,348	17	406,227	16
Total Loans and Leases	2,389,389	100%	2,490,646	100%
Less: Allowance for credit losses	(58,317)		(50,526)	
Net loans and leases	\$ 2,331,072		\$ 2,440,120	

The total investment portfolio increased by 78% or \$382.9 million from December 31, 2008, to \$875.4 million at June 30, 2009. The increase was due mainly to increases of \$405.6 million or 139% in available-for-sale securities and \$3.0 million or 10% in other equity securities, which were somewhat offset by a decrease of \$25.7 million or 15% in held-to-maturity securities. The increases were the result of an increase in deposits resulting primarily from the Company's new Premier money market product. The aggregate of federal funds sold and interest-bearing deposits with banks increased by \$18.6 million during the first six months of 2009, reaching \$79.1 million at June 30, 2009.

Table 3 – Analysis of Deposits

The following table presents the trends in the composition of deposits at the dates indicated:

(In thousands)	June 30, 2009		December 31, 2008	
	\$	%	\$	%
Noninterest-bearing deposits	553,604	21%	461,517	20%
Interest-bearing deposits:				
Demand	251,281	9	243,986	10
Money market savings	867,322	33	664,837	28
Regular savings	155,911	6	146,140	6
Time deposits less than \$100,000	457,698	17	477,148	20
Time deposits \$100,000 or more	364,669	14	371,629	16
Total interest-bearing	2,096,881	79	1,903,740	80
Total deposits	\$ 2,650,485	100%	\$ 2,365,257	100%

Total deposits were \$2.7 billion at June 30, 2009, increasing \$285.2 million or 12% from December 31, 2008. During the first six months of 2009, growth rates of 20% were achieved for noninterest bearing demand deposits (up \$92.1 million), 30% for money market deposits (up \$202.5 million), 7% for interest-bearing regular savings (up \$9.8 million) and 3% for interest bearing demand deposits (up \$7.3 million). Over the same period, decreases of 4% were recorded for time deposits less than \$100,000 (down \$19.5 million) and 2% for time deposits of \$100,000 or more (down \$7.0 million). The growth in both money market and demand deposits was due in part to the increase in the FDIC insurance limits which were put into place late in 2008. The increase in money market deposits was also due in large part to the introduction of the Company's new Premier money market product which is priced very competitively.

Total borrowings were \$545.9 million at June 30, 2009, which represented an increase of \$23.2 million or 4% from December 31, 2008. These additional borrowings were due to growth in retail repurchase agreements.

Market Risk and Interest Rate Sensitivity

Overview

The Company's net income is largely dependent on its net interest income. Net interest income is susceptible to interest rate risk to the degree that interest-bearing liabilities mature or reprice on a different basis than interest-earning assets. When interest-bearing liabilities mature or reprice more quickly than interest-earning assets in a given period, a significant increase in market rates of interest could adversely affect net interest income. Similarly, when interest-earning assets mature or reprice more quickly than interest-bearing liabilities, falling interest rates could result in a decrease in net interest income. Net interest income is also affected by changes in the portion of interest-earning assets that are funded by interest-bearing liabilities rather than by other sources of funds, such as noninterest-bearing deposits and stockholders' equity.

The Company's Board of Directors has established a comprehensive interest rate risk management policy, which is administered by Management's Asset Liability Management Committee ("ALCO"). The policy establishes limits of risk, which are quantitative measures of the percentage change in net interest income (a measure of net interest income at risk) and the fair value of equity capital (a measure of economic value of equity ("EVE") at risk) resulting from a hypothetical change in U.S. Treasury interest rates for maturities from one day to thirty years. The Company measures the potential adverse impacts that changing interest rates may have on its short-term earnings, long-term value, and liquidity by employing simulation analysis through the use of computer modeling. The simulation model captures optionality factors such as call features and interest rate caps and floors imbedded in investment and loan portfolio contracts. As with any method of gauging interest rate risk, there are certain shortcomings inherent in the interest rate

modeling methodology used by the Company. When interest rates change, actual movements in different categories of interest-earning assets and interest-bearing liabilities, loan prepayments, and withdrawals of time and other deposits, may deviate significantly from assumptions used in the model. Finally, the methodology does not measure or reflect the impact that higher rates may have on adjustable-rate loan customers' ability to service their debts, or the impact of rate changes on demand for loan, lease, and deposit products.

The Company prepares a current base case and eight alternative simulations, at least once a quarter, and reports the analysis to the Board of Directors. In addition, more frequent forecasts are produced when interest rates are particularly uncertain or when other business conditions so dictate.

If a measure of risk produced by the alternative simulations of the entire balance sheet violates policy guidelines, ALCO is required to develop a plan to restore the measure of risk to a level that complies with policy limits within two quarters.

The Company's interest rate risk management goals are (1) to increase net interest income at a growth rate consistent with the growth rate of total assets and, (2) to minimize fluctuations in net interest margin as a percentage of earning assets. Management attempts to achieve these goals by balancing, within policy limits, the volume of floating-rate liabilities with a similar volume of floating-rate assets; by keeping the average maturity of fixed-rate asset and liability contracts reasonably matched; by maintaining a pool of administered core deposits; and by adjusting pricing rates to market conditions on a continuing basis.

The balance sheet is subject to quarterly testing for eight alternative interest rate shock possibilities to indicate the inherent interest rate risk. Average interest rates are shocked by +/- 100, 200, 300, and 400 basis points ("bp"), although the Company may elect not to use particular scenarios that it determines are impractical in a current rate environment. It is management's goal to structure the balance sheet so that net interest earnings at risk over a twelve-month period and the economic value of equity at risk do not exceed policy guidelines at the various interest rate shock levels.

The Company augments its quarterly interest rate shock analysis with alternative external interest rate scenarios on a monthly basis. These alternative interest rate scenarios may include non-parallel rate ramps and non-parallel yield curve twists.

Analysis

Measures of net interest income at risk produced by simulation analysis are indicators of an institution's short-term performance in alternative rate environments. These measures are typically based upon a relatively brief period, usually one year. They do not necessarily indicate the long-term prospects or economic value of the institution.

ESTIMATED CHANGES IN NET INTEREST INCOME

CHANGE IN

INTEREST RATES:	+ 400bp	+ 300bp	+ 200bp	+ 100bp	- 100bp	- 200bp	-300bp	-400bp
POLICY LIMIT	-25%	-20%	-17.5%	-12.5%	-12.5%	-17.5%	-20%	-25%
June 2009	-14.89	-9.23	-5.29	-1.24	N/A	N/A	N/A	N/A
December 2008	4.19	4.81	4.35	2.80	N/A	N/A	N/A	N/A

The Net Interest Income at Risk position increased in all shock bands over the year-end 2008. All of the above measures of net interest income at risk remained well within prescribed policy limits. Although assumed to be unlikely, our largest exposure is at the +400bp level, with a measure of -14.89%. This is also well within our prescribed policy limit of 25%.

The measures of equity value at risk indicate the ongoing economic value of the Company by considering the effects of changes in interest rates on all of the Company's cash flows, and discounting the cash flows to estimate the present value of assets and liabilities. The difference between these discounted values of the assets and liabilities is the economic value of equity, which, in theory, approximates the fair value of the Company's net assets.

ESTIMATED CHANGES IN ECONOMIC VALUE OF EQUITY (EVE)

CHANGE IN

INTEREST RATES:	+ 400bp	+ 300bp	+ 200bp	+ 100bp	- 100bp	-200bp	-300bp	-400bp
POLICY LIMIT	-40%	-30%	- 22.5%	-10.0%	-12.5%	-22.5%	-30%	-40%

Edgar Filing: SANDY SPRING BANCORP INC - Form 10-Q

June 2009	-16.01	-8.93	-1.70	1.69	N/A	N/A	N/A	N/A
December 2008	-4.80	1.92	3.61	1.59	N/A	N/A	N/A	N/A

Measures of the economic value of equity (EVE) at risk position increased in the +400, +300 and +200 shock bands and decreased over year-end 2008 in the +100 shock band. Although assumed to be highly unlikely, the largest exposure is at the +400bp level, with a measure of -16.01%. This is well within our prescribed policy limit of 40%.

Liquidity

Liquidity is measured using an approach designed to take into account loan and lease payments, maturities, calls and pay-downs of securities, earnings, balance sheet growth, mortgage banking activities, investment portfolio liquidity, and other factors. Through this approach, implemented by the funds management subcommittee of ALCO under formal policy guidelines, the Company's liquidity position is measured weekly, looking forward at thirty-day intervals out to 360 days. The measurement is based upon the asset-liability management model's projection of a funds' sold or purchased position, along with ratios and trends developed to measure dependence on purchased funds and core growth. Resulting projections as of June 30, 2009 showed short-term investments exceeding short-term borrowings over the subsequent 360 days by \$44.1 million, which decreased from an excess of \$110.1 million at December 31, 2008. This excess of liquidity over projected requirements for funds indicates that the Company can increase its loans and other earning assets without incurring additional borrowing.

The Company also has external sources of funds, which can be drawn upon when required. The main sources of external liquidity are available lines of credit with the Federal Home Loan Bank of Atlanta and the Federal Reserve. The line of credit with the Federal Home Loan Bank of Atlanta totaled \$1,054.4 million, of which \$501.8 million was available based on pledged collateral with \$412.1 million outstanding at June 30, 2009. The line of credit at the Federal Reserve totaled \$391.2 million, all of which was available for borrowing based on pledged collateral, with no borrowings against it as of June 30, 2009. Other external sources of liquidity available to the Company in the form of unsecured lines of credit granted by correspondent banks totaled \$40.0 million at June 30, 2009, against which there were no outstanding borrowings. In addition, the Company had a secured line of credit with a correspondent bank of \$20.0 million as of June 30, 2009 against which there were no outstanding borrowings. Based upon its liquidity analysis, including external sources of liquidity available, management believes the liquidity position is appropriate at June 30, 2009.

The principal source of parent company liquidity is dividends from the Bank. In addition to its operating expenses, the Company is responsible for the payment of dividends to shareholders of its common stock and preferred stock. Payment of dividends to the Company by the Bank is limited under law. The amount that can be paid in any calendar year, without prior regulatory approval, cannot exceed the sum of the Bank's net income during the current calendar year and the retained net income of the prior two calendar years. The Company believes that such restriction will not have an impact on the Parent Company's ability to meet its ongoing cash obligations.

The following is a schedule of significant commitments at June 30, 2009:

	(In thousands)
Commitments to extend credit:	
Unused lines of credit (home equity and business)	\$ 636,562
Other commitments to extend credit	106,737
Standby letters of credit	66,348
	\$ 809,647

Capital Management

The Company recorded a total risk-based capital ratio of 13.27% at June 30, 2009, compared to 13.82% at December 31, 2008; a tier 1 risk-based capital ratio of 12.02%, compared to 12.56%; and a tier 1 leverage ratio of 9.95%, compared to 11.00%. These decreases were mainly the result of growth in the Company's investment portfolio for the six month period ending June 30, 2009. Capital adequacy, as measured by these ratios, was well above regulatory requirements. Management believes the level of capital at June 30, 2009, is appropriate.

Stockholders' equity totaled \$391.3 at June 30, 2009 and \$391.9 at December 31, 2008.

Internal capital generation (net income less dividends) reduced total stockholders' equity by \$4.1 million during the first six months of 2009.

External capital formation (equity created through the issuance of stock under the employee stock purchase plan, the director stock purchase plan, and the DRIP plan) totaled \$0.3 million during the six month period ended June 30, 2009.

28

Dividends for the first six months of the year were \$0.24 per share in 2009, compared to \$0.48 per share in 2008, for respective dividend payout ratios (dividends declared per share to diluted net income per common share) of (480)% versus 141% for the first six months of 2008.

Accumulated comprehensive loss declined by \$2.0 million during the first six months of 2009 to a loss of \$5.5 million. This decrease in loss was due primarily to an increase in unrealized gains on securities available for sale due to improved market conditions during the period.

B. RESULTS OF OPERATIONS – SIX MONTHS ENDED JUNE 30, 2009 AND JUNE 30, 2008

Net income available to common shareholders for the first six months of the year decreased \$14.4 million or 103% to a loss of \$0.5 million in 2009 from net income of \$13.9 million in 2008, representing annualized returns on average common equity of (0.30%) in 2009 and 8.76% in 2008, respectively. Diluted earnings (loss) per common share (“EPS”) for the first six months of the year was (\$0.03) in 2009, compared to \$0.84 in 2008.

Net interest income declined by \$4.2 million, or 8%, to \$49.5 million for the first six months of 2009, while total noninterest income decreased by \$1.4 million, or 6% for the period. In addition, noninterest expenses increased by \$1.5 million, or 3% compared to the prior year period.

The decrease in net interest income was due to a decline of 107 basis points in the yield on loans and 148 basis points in the yield on investments which exceeded the decline of 55 basis points on interest-bearing liabilities. This reflects the Company’s current asset sensitive position and the growth in nonperforming assets as well as the growth in the Company’s new Premier Money Market product, which has been very competitively priced to grow market share and customer relationships over the long term. These factors produced a net interest margin decrease of 73 basis points to 3.24% for the six months ended June 30, 2009, from 3.97% for the same period of 2008.

Ratio of average earning assets to						
Average interest-bearing liabilities	126.63%			121.51%		

(1) Interest income includes the effects of taxable-equivalent adjustments (reduced by the nondeductible portion of interest expense) using the appropriate federal income tax rate of 35.00% and, where applicable, the marginal state income tax rate of 7.50% (or a combined marginal federal and state rate of 39.88%) for 2009 and 2008, to increase

tax-exempt interest income to a taxable-equivalent basis. The net taxable-equivalent adjustment amounts utilized in the above table to compute yields were \$2.1 million and \$2.2 million for the six months ended June 30, 2009 and 2008, respectively.

(2) Non-accrual loans are included in the average balances.

(3) Net interest margin = annualized net interest income on a tax-equivalent basis divided by total interest-earning assets.

Net Interest Income

Net interest income for the first six months of 2009 was \$49.5 million, a decrease of 8% from \$53.7 million in 2008, due primarily to a 125 basis point decline in tax equivalent yield on earning assets which exceeded a 55 basis point decline in the cost of interest bearing liabilities. Non-GAAP tax-equivalent net interest income, which takes into account the benefit of tax advantaged investment securities, decreased by 8%, to \$51.6 million in 2009 from \$55.9 million in 2008. The effects of changes in average balances, yields and rates are presented in Table 5.

For the first six months of 2009, total interest income decreased by \$8.4 million or 10%, compared to 2008. On a non-GAAP tax-equivalent basis, interest income also decreased by 10%. Average earning assets increased by 13% versus the prior period to \$3.2 billion from \$2.8 billion, while the average yield earned on those assets decreased by 125 basis points to 5.00%. Comparing the first six months of 2009 versus the same period in 2008, average total loans and leases grew by 5% to \$2.5 billion (a decline to 77% of average earning assets, versus 84% a year ago), while recording a 107 basis point decrease in average yield to 5.34%. Average commercial loans and leases increased by 7% (due to an increase in commercial mortgages); average consumer loans increased by 8% (attributable primarily to home equity line growth); while residential real estate loans decreased by 1% (primarily due to a decrease in construction lending). Over the same period, average total securities increased by 53% to \$655.6 million (20% of average earning assets, versus 15% a year ago), while the average yield earned on those assets decreased by 148 basis points to 4.22%. The lower level of growth in average total loans and leases reflects the lack of quality loan demand in the marketplace as a result of the current negative economic conditions on both a regional and local basis. The increased growth in average total securities was due mainly to the investment of the proceeds resulting from the successful launch of the new Premier Money Market product as part of the Company's Operation Take Share campaign to grow market share.

Interest expense for the first six months of the year decreased by \$4.1 million or 13% in 2009 compared to 2008. Average total interest-bearing liabilities increased by 9% over the prior year period, while the average rate paid on these funds decreased by 55 basis points to 2.22%. As shown in Table 4, all categories of interest-bearing liabilities showed decreases in the average rate as market interest rates continued to decline.

Table 5 – Effect of Volume and Rate Changes on Net Interest Income

(In thousands and tax equivalent)	Increase Or (Decrease)	2009 vs. 2008 Due to Change In Average:*		Increase Or (Decrease)	2008 vs. 2007 Due to Change In Average:*

Credit Risk Management

The Company's loan and lease portfolio (the "credit portfolio") is subject to varying degrees of credit risk. Credit risk is mitigated through portfolio diversification, limiting exposure to any single customer, industry or collateral type. The Company maintains an allowance for loan and lease losses (the "allowance") to absorb possible losses in the loan and lease portfolio. The allowance is based on careful, continuous review and evaluation of the loan and lease portfolio, along with ongoing, quarterly assessments of the probable losses inherent in that portfolio. The allowance represents an estimation made pursuant to Statement of Financial Accounting Standards ("SFAS") No. 5, "Accounting for Contingencies" and SFAS No. 114, "Accounting by Creditors for Impairment of a Loan." The adequacy of the allowance is determined through careful and continuous evaluation of the credit portfolio, and involves consideration of a number of factors, as outlined below, to establish a prudent level. Determination of the allowance is inherently subjective and requires significant estimates, including estimated losses on pools of homogeneous loans and leases based on historical loss experience and consideration of current economic trends, which may be susceptible to significant change. Loans and leases deemed uncollectible are charged against the allowance, while recoveries are credited to the allowance. Management adjusts the level of the allowance through the provision for loan and lease losses, which is recorded as a current period operating expense. The Company's systematic methodology for assessing the appropriateness of the allowance includes: (1) the general allowance reflecting historical losses, as adjusted, by credit category, and (2) the specific allowance for risk-rated credits on an individual or portfolio basis.

The general allowance, which is based upon historical loss factors, as adjusted, establishes allowances for the major loan and lease categories based upon adjusted historical loss experience over the prior eight quarters, weighted so that losses in the most recent quarters have the greatest effect. The factors used to adjust the historical loss experience address various risk characteristics of the Company's loan and lease portfolio including: (1) trends in delinquencies and other non-performing loans, (2) changes in the risk profile related to large loans in the portfolio, (3) changes in the categories of loans comprising the loan portfolio, (4) concentrations of loans to specific industry segments, (5) changes in economic conditions on both a local and national level, (6) changes in the Company's credit administration and loan and lease portfolio management processes, and (7) quality of the Company's credit risk identification processes.

The specific allowance is used to allocate an allowance for internally risk rated loans where significant conditions or circumstances indicate that a loss may be imminent. Analysis resulting in specific allowances, including those on loans identified for evaluation of impairment, includes consideration of the borrower's overall financial condition, resources and payment record, support available from financial guarantors and the sufficiency of collateral. These factors are combined to estimate the probability and severity of inherent losses. Then a specific allowance is established based on the Company's calculation of the potential loss imbedded in the individual loan. Allowances are also established by application of credit risk factors to other internally risk rated loans, individual consumer and residential loans and commercial leases having reached nonaccrual or 90-day past due status. Each risk rating category is assigned a credit risk factor based on management's estimate of the associated risk, complexity, and size of the individual loans within the category. Additional allowances may also be established in special circumstances involving a particular group of credits or portfolio within a risk category when management becomes aware that losses incurred may exceed those determined by application of the risk factor alone.

The amount of the allowance is reviewed monthly by the Senior Loan Committee, and reviewed and approved quarterly by the Board of Directors.

The provision for loan and lease losses totaled \$21.2 million for the first six months of 2009 compared to \$8.9 million in the same period of 2008. This increase was due to internal risk rating downgrades primarily in the residential real estate development portfolio. The Company experienced net charge-offs during the first six months of 2009 of \$13.4 million compared to net charge-offs of \$0.5 million for the first six months of 2008.

Management believes that the allowance is adequate. However, its determination requires significant judgment, and estimates of probable losses inherent in the credit portfolio can vary significantly from the amounts actually observed. While management uses available information to recognize probable losses, future additions to the allowance may be necessary based on changes in the credits comprising the portfolio and changes in the financial condition of borrowers, such as may result from changes in economic conditions. In addition, regulatory agencies, as an integral part of their examination process, and independent consultants engaged by Sandy Spring Bank, periodically review the credit portfolio and the allowance. Such review may result in additional provisions based on these third-party judgments of information available at the time of each examination. During the first six months of 2009, there were no significant changes in estimation methods or assumptions that affected the allowance methodology. The allowance for loan and lease losses was 2.44% of total loans and leases at June 30, 2009 and 2.03% at December 31, 2008. The allowance increased during the first six months of 2009 by \$7.8 million, to \$58.3 million at June 30, 2008, from \$50.5 million at December 31, 2008. The increase in the allowance during the first six months of 2009 was due primarily to a higher level of nonperforming loans and internal risk rating downgrades on a number of existing loans.

Nonperforming loans and leases increased by \$70.1 million to \$139.5 million at June 30, 2009 from \$69.4 million at December 31, 2008, while nonperforming assets increased by \$74.1 million for the same period to \$146.3 million at June 30, 2008. Expressed as a percentage of total assets, nonperforming assets increased to 4.05% at June 30, 2009 from 2.18% at December 31, 2008. The increase in non-accrual loans and leases was mainly the result of \$64.9 million in residential real estate development loans, \$3.2 million in commercial loans, \$1.2 million in commercial real estate loans and \$6.2 million in residential mortgage loans. Management believes these loans are adequately reserved or well secured. The allowance for loan and lease losses represented 42% of nonperforming loans and leases at June 30, 2009, compared to coverage of 73% at December 31, 2008. Significant variation in this coverage ratio may occur from period to period because the amount of nonperforming loans and leases depends largely on the condition of a small number of individual credits and borrowers relative to the total loan and lease portfolio. Other real estate owned increased to \$6.8 million at June 30, 2009 compared to \$2.9 million at December 31, 2008. The balance of impaired loans and leases was \$105.7 million at June 30, 2009, with specific reserves against those loans of \$16.7 million, compared to \$52.6 million at December 31, 2008, with specific reserves of \$13.8 million.

Table 6 — Analysis of Credit Risk
(Dollars in thousands)

Activity in the allowance for credit losses is shown below:

	Six Months Ended June 30, 2009	Twelve Months Ended December 31, 2008
Balance, January 1	\$ 50,526	\$ 25,092
Provision for loan and lease losses	21,228	33,192
Loan charge-offs:		
Residential real estate	(764)	(4,798)
Commercial loans and leases	(12,056)	(2,677)
Consumer	(977)	(988)
Total charge-offs	(13,797)	(8,463)
Loan recoveries:		
Residential real estate	0	21
Commercial loans and leases	313	475
Consumer	47	209
Total recoveries	360	705
Net charge-offs	(13,437)	(7,758)
Balance, period end	\$ 58,317	\$ 50,526
Net charge-offs (recoveries) to average loans and leases (annual basis)	1.10%	0.32%
Allowance to total loans and leases	2.44%	2.03%

The following table presents nonperforming assets at the dates indicated:

	June 30, 2009	December 31, 2008
Non-accrual loans and leases	\$ 123,117	\$ 67,950
Loans and leases 90 days past due	16,004	1,038
Restructured loans and leases	395	395
Total nonperforming loans and leases*	139,516	69,383
Other real estate owned, net	6,829	2,860
Total nonperforming assets	\$ 146,345	\$ 72,243
Nonperforming assets to total assets	4.05%	2.18%

*Those performing loans and leases considered potential problem credits (which the Company classifies as substandard), as defined and identified by management, amounted to approximately \$134.7 million at June 30, 2009, compared to \$125.7 million at December 31, 2008. These are credits where known information about the borrowers' possible credit problems causes management to have doubts as to their ability to comply with the present repayment terms. This could result in their reclassification as nonperforming credits in the future, however most are well collateralized and are not believed to present significant risk of loss. Loans classified for regulatory purposes not included in either nonperforming or potential problem loans consist only of "other loans especially mentioned" and do not, in management's opinion, represent or result from trends or uncertainties reasonably expected to materially impact future operating results, liquidity or capital resources, or represent material credits where known information about the borrowers' possible credit problems causes management to have doubts as to the borrowers' ability to comply with the loan repayment terms.

Noninterest Income and Expenses

Total noninterest income was \$23.0 million for the six month period ended June 30, 2009, a 6% or \$1.4 million decrease from the same period of 2008. The decrease in noninterest income for the first six months of 2009 was due primarily to a decrease of \$0.5 million or 8% in service charges on deposits resulting from lower overdraft fees while insurance agency commissions decreased \$0.4 million or 10%. Fees on sales of investment products decreased \$0.4 million or 23% and trust and investment management fees declined \$0.2 million or 5%, both of which were due primarily to reduced assets under management. These decreases were somewhat offset by an increase in gains on sales of mortgage loans of \$0.4 million or 31% due largely to higher mortgage refinancing volumes reflecting market conditions. Other noninterest income also increased \$0.2 million or 8% compared to the first six months of 2008.

Total noninterest expenses were \$51.1 million for the six month period ended June 30, 2009, a 3% or \$1.5 million increase from the same period in 2008. Excluding the one time special assessment by the FDIC of \$1.7 million in 2009, noninterest expenses totaled \$49.4 million which was virtually even with the prior year period. Salaries and employee benefits decreased \$0.7 million or 3% during the first six months of 2009 due to a decrease in incentive compensation and a reduction in the number of full time equivalent employees. Occupancy and equipment expenses decreased \$0.2 million or 2% for the period while outside data services decreased by \$0.4 million or 20%. FDIC insurance expense totaled \$3.7 million for the first six months of 2009, an increase of \$2.9 million. This increase was due primarily to a one time special assessment by the FDIC of \$1.7 million in the second quarter. Average full-time equivalent employees decreased to 669 during the first six months of 2009, from 705 during the like period in 2008, a 5% decrease. These results reflect the continuing effect of project LIFT, a previously disclosed initiative for improved management of operating expenses.

Income Taxes

The effective tax rate decreased to a tax benefit for the six month period ended June 30, 2009, from a tax expense of 29.5% for the prior year period. This decrease was primarily due to the level of tax exempt income from investment securities and bank owned life insurance which more than offset the decreased level of net income before income taxes.

C. RESULTS OF OPERATIONS – SECOND QUARTER 2009 AND 2008

Net income (loss) available to common shareholders for the second quarter of the year decreased \$7.2 million or 126% to a net loss of \$1.5 million in 2009 from net income \$5.7 million in 2008, representing annualized returns on average common equity of (1.90%) in 2009 and 7.09% in 2008, respectively. Diluted net income (loss) per common share for the second quarter of the year was (\$0.09) in 2009, compared to \$0.34 in 2008.

Net interest income declined by \$2.7 million, or 10%, to \$24.4 million for the three months ended June 30, 2009, while total noninterest income decreased by \$0.7 million, or 6% for the period. Noninterest expenses increased \$2.0 million or 8% for the quarter.

The decrease in net interest income was due to a decline of 89 basis points in the yield on loans and 168 basis points in the yield on investments which exceeded the decline of 33 basis points on interest-bearing liabilities. This reflects the Company's current asset sensitive position and the growth in nonperforming assets as well as the growth in the Company's new Premier Money Market product, which has been very competitively priced to grow market and customer relationships over the long term. These factors produced a net interest margin decrease of 85 basis points to 3.11% for the three months ended June 30, 2009, from 3.96% for the same period of 2008.

The provision for loan and lease losses totaled \$10.6 million for the second quarter of 2009 compared to \$6.2 million in the same period of 2008. This increase was due to internal risk rating downgrades primarily in the residential real estate development portfolio. The Company experienced net charge-offs during the second quarter of 2009 of \$12.1 million compared to net charge-offs of \$0.6 million for the same quarter of 2008.

Second quarter noninterest income was \$11.0 million for 2009, representing a 6% or \$0.7 million decrease from the second quarter of 2008. The decrease in noninterest income for the quarter was due primarily to a decrease of \$0.4 million or 11% in service charges on deposits due to lower overdraft fees while insurance agency commissions decreased \$0.3 million or 23% due to the effect of the overall economy. Fees on sales of investment products decreased \$0.3 million or 31% compared to the second quarter of 2008 and trust and investment management fees declined \$0.1 million or 5%, both of which were due primarily to a decline in assets under management. These decreases were partially offset by an increase in gains on sales of mortgages of \$0.1 million or 20% due largely to higher mortgage refinancing volumes reflecting market conditions. Other noninterest income also increased \$0.4 million or 23% for the quarter due largely to valuation adjustments on matched commercial loan swaps.

Noninterest expenses totaled \$26.9 million for the second quarter of 2009, an 8% or \$2.0 million increase over the second quarter of 2008. This increase was due in large part to an increase of \$2.4 million in FDIC insurance expense resulting primarily from a one time special assessment by the FDIC which totaled \$1.7 million. Salaries and employee benefits decreased \$0.2 million during the quarter due primarily to a decrease in incentive compensation and a decline in the number of full-time equivalent employees. Occupancy and equipment expenses decreased \$0.3 million or 6% for the quarter due to a move of staff from leased to owned facilities.

Income Taxes

The effective tax rate decreased to a benefit for the second quarter of 2009, from an expense of 27.0% for the prior year period. This decrease was primarily due to the level of tax exempt income from investment securities and bank owned life insurance which more than offset the decreased level of net income before income taxes.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See "Financial Condition - Market Risk and Interest Rate Sensitivity" in Management's Discussion and Analysis of Financial Condition and Results of Operations, above, which is incorporated herein by reference. Management has determined that no additional disclosures are necessary to assess changes in information about market risk that have occurred since December 31, 2008.

Item 4. CONTROLS AND PROCEDURES

The Company's management, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, evaluated as of the last day of the period covered by this report, the effectiveness

of the design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15 under the Securities Exchange Act of 1934. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures were effective. There were no significant changes in the Company's internal controls over financial reporting (as defined in Rule 13a-15 under the Securities Act of 1934) during the six months ended June 30, 2009, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. RISK FACTORS

There have been no material changes in the risk factors as disclosed in the 2008 Annual Report on Form 10-K.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Previously the Company had a stock repurchase program that permitted the repurchase of up to 5%, or approximately 786,000 shares, of its outstanding common stock. A total of 1,332,689 shares had been repurchased since 1997, when stock repurchases began, through March 31, 2009. There were no shares repurchased in 2008 or 2009. This program expired on March 31, 2009 and was not renewed. As a result of participating in the Department of the Treasury's Troubled Asset Relief Program ("TARP") Capital Purchase Program, until December 31, 2011, the Company may not repurchase any shares of its common stock, other than in connection with the administration of an employee benefit plan, without the consent of the Treasury Department.

Item 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

At the Company's annual shareholders' meeting held on April 22, 2009, the shareholders of the Company elected four directors by the following vote:

Nominee	For	Withheld
Susan D. Goff	12,389,710	404,010
Robert L. Orndorff	12,307,381	486,340
David E. Rippeon	12,401,266	392,455
Daniel J. Schrider	12,504,560	289,161

There were no solicitations in opposition to management's nominees and all such nominees were elected. Daniel J. Schrider had been appointed to the board in 2009. The remaining three directors were incumbent directors previously elected by the shareholders to three-year terms. Directors continuing in office are Mark E. Friis, Hunter R. Hollar, Solomon Graham, Gilbert L. Hardesty, Pamela A. Little, Craig A. Ruppert and Lewis R. Schumann.

The American Recovery and Reinvestment Act of 2009 requires Bancorp, during the period in which any obligation arising from Bancorp's participation in the TARP Capital Purchase Program remains outstanding, to submit to the shareholders a non-binding vote on the compensation of Bancorp's named executive officers, as described in the Compensation Discussion and Analysis, the compensation tables, and related material in the proxy statement dated April 22, 2009. Accordingly, at the annual meeting, the shareholders voted to approve such compensation as follows:

For	Against	Withheld	Non Votes
9,341,076	3,211,511	241,121	0

Also at the annual meeting, the shareholders ratified the appointment of Grant Thornton LLP, as the independent auditors for 2009 by the following vote:

	Against	Withheld	Non Votes
For 12,662,359	68,316	63,041	0

Item 6. EXHIBITS

Exhibit 31(a)	Certification of Chief Executive Officer
Exhibit 31(b)	Certification of Chief Financial Officer
Exhibit 32 (a)	Certification of Chief Executive Officer pursuant to 18 U.S. Section 1350
Exhibit 32 (b)	Certification of Chief Financial Officer pursuant to 18 U.S. Section 1350

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this quarterly report to be signed on its behalf by the undersigned, thereunto duly authorized.
