Introductory Note: Caution Concerning Forward-Looking Statements	

This Form 10-Q Report and the Company's other communications and statements may contain forward-looking statements, including statements about the Company's beliefs, plans, objectives, goals, expectations, estimates, projections and intentions. These statements are subject to significant risks and uncertainties and are subject to change based on various factors, many of which are beyond the Company's control. The words may, could, should, would, believe, anticipate, estimate, expect, intend, plan, target, goal, and similar expressions are intended to identify forward-looking statements. All forward-looking statements, by their nature, are subject to risks and uncertainties. The Company's actual future results may differ materially from those set forth in its forward-looking statements. For information concerning these factors and related matters, see Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations, in this Report, and the following sections of the Company's Annual Report on Form 10-K for the year ended September 30, 2016: (a) Risk Factors in Part I, and (b) Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II. However, other factors besides those referenced could adversely affect the Company's results, and you should not consider any such list of factors to be a complete set of all potential risks or uncertainties. Any forward-looking statements made by the Company herein

speak as of the date of this Report. The Company does not undertake to update any forward-looking statement, except as required by law.

Unless the context otherwise indicates, all references in this Report to the Company, Gencor, we, us, or our, or similar words are to Gencor Industries, Inc. and its subsidiaries.

GENCOR INDUSTRIES, INC.

Notes to Condensed Consolidated Financial Statements

For the Quarter Ended December 31, 2016

(Unaudited)

Note 1 Basis of Presentation

The accompanying condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all material adjustments (consisting of normal, recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the quarter ended December 31, 2016 are not necessarily indicative of the results that may be expected for the year ending September 30, 2017.

The accompanying Condensed Consolidated Balance Sheet at September 30, 2016 has been derived from the audited financial statements at that date but does not include all of the information and notes required by generally accepted accounting principles for complete financial statements.

For further information, refer to the consolidated financial statements and notes thereto included in the Gencor Industries, Inc. Annual Report on Form 10-K for the year ended September 30, 2016.

Note 2 Marketable Securities

Marketable debt and equity securities are categorized as trading securities and are thus marked to market and stated at fair value. Fair value is determined using the quoted closing or latest bid prices for Level 1 investments and market standard valuation methodologies for Level 2 investments. Realized gains and losses on investment transactions are determined by specific identification and are recognized as incurred in the condensed consolidated statements of income. Net unrealized gains and losses are reported in the condensed consolidated statements of income in the current period and represent the change in the fair value of investment holdings during the period.

Fair Value Measurements

The fair value of financial instruments is presented based upon a hierarchy of levels that prioritizes the inputs of valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

The fair value of marketable equity securities, mutual funds, exchange-traded funds, government securities, and cash and money funds are substantially based on quoted market prices (Level 1). Corporate and municipal bonds are valued using market standard valuation methodologies, including: discounted cash flow methodologies, and matrix pricing or other similar techniques. The inputs to these market standard valuation methodologies include, but are not limited to: interest rates, credit standing of the issuer or counterparty, industry sector of the issuer, coupon rate, call provisions, maturity, estimated duration and assumptions regarding liquidity and estimated future cash flows. In addition to bond

characteristics, the valuation methodologies incorporate market data, such as actual trades completed, bids and actual dealer quotes, where such information is available. Accordingly, the estimated fair values are based on available market information and judgments about financial instruments (Level 2). Fair values of the Level 2 investments (if any) are provided by the Company's professional investment management firm.

Table of Contents

The following table sets forth, by level, within the fair value hierarchy, the Company's assets measured at fair value as of December 31, 2016:

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Equities	\$ 3,265,000	\$	\$	\$ 3,265,000
Mutual Funds	5,275,000			5,275,000
Exchange-Traded Funds	738,000			738,000
Government Securities	69,757,000			69,757,000
Cash and Money Funds	7,351,000			7,351,000
Total	\$ 86,386,000	\$	\$	\$ 86,386,000

Net unrealized gains and (losses) recognized during the quarter ended December 31, 2016 on trading securities still held as of December 31, 2016 were \$153,000. There were no transfers of investments between Level 1 and Level 2 during the quarter ended December 31, 2016.

The following table sets forth by level, within the fair value hierarchy, the Company's assets measured at fair value as of September 30, 2016:

	Fair Value Measurements			Total
	Level 1	Level 2	Level 3	
Equities	\$ 2,408,000	\$	\$	\$ 2,408,000
Mutual Funds	5,212,000			5,212,000
Exchange-Traded Funds	510,000			510,000
Government Securities	69,583,000			69,583,000
Cash and Money Funds	8,225,000			8,225,000
Total	\$ 85,938,000	\$	\$	\$ 85,938,000

Net unrealized gains and (losses) recognized during the quarter ended December 31, 2015 on trading securities still held as of December 31, 2015 were \$943,000. There were no transfers of investments between Level 1 and Level 2 during the quarter ended December 31, 2015.

The carrying amounts of cash and cash equivalents, accounts receivable and accounts payable approximate fair value because of the short-term nature of these items.

Note 3 Inventories

Inventories are valued at the lower of cost or market, with cost being determined principally by using the last-in, first-out (LIFO) method and market defined as replacement cost for raw materials and net realizable value for work in process and finished goods. Appropriate consideration is given to obsolescence, excessive levels, deterioration, possible alternative uses and other factors in determining net realizable value. The cost of work in process and finished goods includes materials, direct labor, variable costs and overhead. The Company evaluates the need to

record inventory adjustments on all inventories, including raw material, work in process, finished goods, spare parts and used equipment. Used equipment acquired by the Company on trade-in from customers is carried at estimated net realizable value. Unless specific circumstances warrant different treatment regarding inventory obsolescence, the carrying value of inventories three to four years old are reduced by 50%, while the carrying value of inventories four to five years old are reduced by 75%, and the carrying value of inventories greater than five years old are reduced to zero. Inventory is typically reviewed for obsolescence on an annual basis computed as of September 30, the Company's fiscal year end. If significant known changes in trends, technology or other specific circumstances that warrant consideration occur during the year, then the impact on obsolescence is considered at that time.

Table of Contents

Net inventories at December 31, 2016 and September 30, 2016 consist of the following:

	December 31, 2016	September 30, 2016
Raw materials	\$ 7,752,000	\$ 7,072,000
Work in process	329,000	976,000
Finished goods	4,415,000	3,545,000
Used equipment	41,000	41,000
	\$ 12,537,000	\$ 11,634,000

Note 4 Costs and Estimated Earnings in Excess of Billings

Costs and estimated earnings in excess of billings on uncompleted contracts as of December 31, 2016 and September 30, 2016 consist of the following:

	December 31, 2016	September 30, 2016
Costs incurred on uncompleted contracts	\$ 15,627,000	\$ 8,898,000
Estimated earnings	6,012,000	3,124,000
	21,639,000	12,022,000
Billings to date	14,948,000	7,101,000
Costs and estimated earnings in excess of billings	\$ 6,691,000	\$ 4,921,000

Note 5 Earnings per Share Data

The following table sets forth the computation of basic and diluted earnings per share for the quarters ended December 31, 2016 and 2015:

	December 31, 2016	December 31, 2015
Net income	\$ 1,394,000	\$ 1,575,000
Common Shares:		
Weighted-average common shares outstanding	14,380,000	14,307,000
Effect of dilutive stock options	209,000	118,000
Weighted-average diluted shares outstanding	14,589,000	14,425,000

Basic:

Net income per share	\$	0.10	\$	0.11
Diluted:				
Net income per share	\$	0.10	\$	0.11

Basic earnings per share is based on the weighted-average number of shares outstanding. Diluted earnings per share is based on the sum of the weighted-average number of shares outstanding plus common stock equivalents.

On July 11, 2016, the Company's Board of Directors approved a three-for-two split of the Company's common and Class B stock to be effected in the form of a 50% stock dividend. As a result, shareholders received one additional share of common or Class B stock for every two shares they held of the respective class of stock as of the record date. These shares were distributed on August 1, 2016, to shareholders of record as of the end of business on July 22, 2016. All share and per share data (except par value) have been adjusted to reflect the effect of the stock split for all periods presented. The number of shares of common and Class B stock issuable upon exercise of outstanding stock options were proportionately increased in accordance with terms of the respective plans. The number of authorized shares, as reflected on the Condensed Consolidated Balance Sheets, was not affected by the stock split and, accordingly, has not been adjusted.

Weighted-average shares issuable upon the exercise of stock options included in the diluted earnings per share calculation for the quarter ended December 31, 2016 were 482,000, which equates to 209,000 dilutive common stock equivalents. Weighted-average shares issuable upon the exercise of stock options included in the diluted earnings per share calculation for the quarter ended December 31, 2015 were 488,000, which equates to 118,000 dilutive common stock equivalents. Weighted-average shares issuable upon the exercise of stock options, which were not included in the diluted earnings per share calculations because they were anti-dilutive, were zero for the quarters ended December 31, 2016 and 2015.

Note 6 Customers with 10% (or greater) of Net Revenues

Approximately 10.0% of net revenues in the quarter ended December 31, 2016 and 2.7% of net revenues for the quarter ended December 31, 2015 were from entities owned by a global company.

Table of Contents**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations****Overview**

Gencor Industries, Inc. (the Company), is a leading manufacturer of heavy machinery used in the production of highway construction materials, synthetic fuels, and environmental control equipment. The Company's core products include asphalt plants, combustion systems and fluid heat transfer systems. The Company's products are manufactured in two facilities in the United States.

Because the Company's products are sold primarily to the highway construction industry, the business is seasonal in nature. Traditionally, the Company's customers do not purchase new equipment for shipment during the summer and fall months to avoid disrupting their peak season for highway construction and repair work. The majority of orders for the Company's products are thus received between October and February, with a significant volume of shipments occurring prior to June. The principal factors driving demand for the Company's products are the overall economic conditions, the level of government funding for domestic highway construction and repair, Canadian infrastructure spending, the need for spare parts, fluctuations in the price of crude oil (liquid asphalt as well as fuel costs), and a trend towards larger plants resulting from industry consolidation.

On July 6, 2012, President Obama signed a \$118 billion transportation bill, Moving Ahead for Progress in the 21st Century Act (MAP-21). MAP-21 included a final three-month extension of the previous SAFETEA-LU bill at then current spending levels combined with a new two-year, \$105 billion authorization of the federal highway, transit, and safety programs effective October 1, 2012. The bill provided states with two years of funding to build roads, bridges, and transit systems. On August 8, 2014, President Obama signed a \$10.8 billion ten month bill to fund federal highway and mass-transit programs through May 31, 2015. On May 29, 2015, MAP-21 was extended through July 31, 2015. On July 31, 2015, President Obama signed a three-month extension of MAP-21 which provided \$8 billion in funding for the Highway Trust Fund from August 1, 2015 through October 29, 2015. Two additional short-term extensions were approved between October 29, 2015 and December 4, 2015.

On December 4, 2015, President Obama signed into law a five-year, \$305 billion transportation bill, Fixing America's Surface Transportation Act (the FAST Act). The FAST Act reauthorized the collection of the 18.4 cents per gallon gas tax that is typically used to pay for transportation projects. It also included \$70 billion from other areas of the federal budget to close a \$16 billion annual funding deficit. The bill includes spending of more than \$205 billion on roads and highways over five years. The 2016 funding levels are approximately 5% above 2015 projected funding, with annual increases between 2.0% and 2.5% from 2016 through 2020.

The Canadian government has also enacted major infrastructure stimulus programs. In 2007, the Building Canada Plan provided \$33 billion in infrastructure funding through 2014. The 2014 New Building Canada Fund is one component within the \$53 billion 2014 New Building Canada Plan. The 2014 New Building Canada Fund provided funding for infrastructure projects at the national, provincial and local levels.

In addition to government funding and overall economic conditions, fluctuations in the price of oil, which is a major component of asphalt mix, may affect the Company's financial performance. An increase in the price of oil increases the cost of liquid asphalt and could, therefore, decrease demand for hot mix asphalt paving materials and certain of the Company's products. Increases in oil prices also drive up the cost of gasoline and diesel, which results in increased freight costs. Where possible, the Company will pass increased freight costs on to its customers. However, the Company may not be able to recapture all of the increased costs and thus could have a negative impact on the Company's financial performance.

Steel is a major component used in manufacturing the Company's equipment. The Company is subject to fluctuations in market prices for raw materials such as steel. If the Company is unable to purchase materials it requires or is unable to pass on price increases to its customers or otherwise reduce its cost of goods sold, its business results of operations and financial condition may be adversely affected.

The Company believes its strategy of continuing to invest in product engineering and development and its focus on delivering the highest quality products and superior service will strengthen the Company's market position. The Company continues to review its internal processes to identify inefficiencies and cost-reduction opportunities. The Company will continue to scrutinize its relationships with external suppliers to ensure it is achieving the highest quality materials and services at the most competitive cost.

Table of Contents

Results of Operations

Quarter Ended December 31, 2016 versus December 31, 2015

Net revenues for the quarters ended December 31, 2016 and December 31, 2015 were \$15,783,000 and \$13,258,000, respectively, an increase of \$2,525,000 or 19.0%. The positive impact of the FAST Act has continued into the first quarter of fiscal 2017. Many of our customers placed orders earlier than usual as their optimism for 2017 and beyond has resulted in an increase in demand for our equipment.

As a percent of sales, gross profit margins increased to 26.3% in the quarter ended December 31, 2016 from 24.8% in the quarter ended December 31, 2015, due to increased revenues and cost absorption.

Product engineering and development expenses increased \$34,000 for the quarter ended December 31, 2016 as compared to the quarter ended December 31, 2015, due to increased staffing. Selling, general and administrative (SG&A) expenses increased \$405,000 to \$2,190,000 for the quarter ended December 31, 2016 compared to the quarter ended December 31, 2015. Headcount additions and higher sales commissions contributed to most of the increase in SG&A expenses.

As a result of the improved revenues, the Company had operating income of \$1,544,000 or 9.8% of net revenues for the quarter ended December 31, 2016 versus operating income of \$1,115,000 or 8.4% of net revenues for the quarter ended December 31, 2015.

For the quarter ended December 31, 2016, interest and dividend income, net of fees, from the investment portfolio was \$41,000 as compared to \$385,000 in the quarter ended December 31, 2015. The net realized and unrealized gains on marketable securities were \$407,000 for the quarter ended December 31, 2016 versus \$593,000 for the quarter ended December 31, 2015.

The effective income tax rate for the quarter ended December 31, 2016 was 30.0% compared to 24.8% for the quarter ended December 31, 2015, which was positively impacted by a \$256,000 increase in the fiscal 2015 federal tax benefit estimate.

Net income for the quarter ended December 31, 2016 was \$1,394,000 or \$0.10 basic and diluted earnings per share versus net income of \$1,575,000 or \$0.11 basic and diluted earnings per share for the quarter ended December 31, 2015.

Liquidity and Capital Resources

The Company generates capital resources through operations and returns on its investments.

The Company had no long-term debt outstanding at December 31, 2016 or September 30, 2016. The Company does not currently require a credit facility. As of December 31, 2016, the Company had funded \$135,000 in cash deposits at insurance companies to cover collateral needs.

As of December 31, 2016, the Company had \$20,562,000 in cash and cash equivalents, and \$86,386,000 in marketable securities, including \$69,757,000 in government securities, \$3,265,000 in equities, \$5,275,000 in mutual funds, \$738,000 in exchange-traded funds and \$7,351,000 in cash and money funds. The marketable securities are invested through a global professional investment management firm. These securities may be liquidated at any time into cash and cash equivalents.

The Company's backlog was \$40.8 million at December 31, 2016 compared to \$31.2 million at December 31, 2015. The Company's working capital (defined as current assets less current liabilities) was equal to \$116.8 million at December 31, 2016 and \$115.2 million at September 30, 2016. The significant purchases, sales and maturities of

Table of Contents

marketable securities shown on the condensed consolidated statements of cash flows reflect the recurring purchase and sale of United States treasury bills. Cash provided by operations during the quarter ended December 31, 2016 was \$2,585,000. Costs and estimated earnings in excess of billings increased \$1,770,000 and inventories increased \$903,000, reflecting an increase in jobs-in-progress at December 31, 2016 compared to September 30, 2016. Customer deposits increased \$3,033,000 with the increase in customer orders and production activity during the first quarter of fiscal 2017.

Cash used in investing activities for the quarter ended December 31, 2016 of \$252,000 related to capital expenditures. Cash provided by financing activities of \$10,000 for the quarter ended December 31, 2016 related to proceeds from the exercise of stock options.

Seasonality

The Company is concentrated in the manufacturing of asphalt plants and related components, which is typically subject to a seasonal slow-down during the third and fourth quarters of the calendar year.

Forward-Looking Information

This Report on Form 10-Q contains certain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act), which represent the Company's expectations and beliefs, including, but not limited to, statements concerning gross margins, sales of the Company's products and future financing plans. These statements by their nature involve substantial risks and uncertainties, certain of which are beyond the Company's control. Actual results may differ materially depending on a variety of important factors, including the financial condition of the Company's customers, changes in the economic and competitive environments and demand for the Company's products.

For information concerning these factors and related matters, see the following sections of the Company's Annual Report on Form 10-K for the year ended September 30, 2016: (a) Risk Factors in Part I and (b) Management's Discussion and Analysis of Financial Condition and Results of Operations in Part II. However, other factors besides those referenced could adversely affect the Company's results, and you should not consider any such list of factors to be a complete set of all potential risks or uncertainties. Any forward-looking statements made by the Company herein speak as of the date of this Report. The Company does not undertake to update any forward-looking statements, except as required by law.

Critical Accounting Policies, Estimates and Assumptions

The Company believes the following discussion addresses its most critical accounting policies, which are those that are most important to the portrayal of the financial condition and results of operations and require management's most difficult, subjective, or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Accounting policies, in addition to the critical accounting policies referenced below, are presented in Note 1 to the Company's Consolidated Financial Statements included in the Company's Annual Report on Form 10-K for the year ended September 30, 2016, Accounting Policies.

Estimates and Assumptions

In preparing the Condensed Consolidated Financial Statements, the Company uses certain estimates and assumptions that may affect reported amounts and disclosures. Estimates and assumptions are used, among other places, when accounting for certain revenue (e.g. contract accounting), expense, and asset and liability valuations. The Company

believes that the estimates and assumptions made in preparing the Condensed Consolidated Financial Statements are reasonable, but are inherently uncertain. Assumptions may be incomplete or inaccurate and unanticipated events may occur. The Company is subject to risks and uncertainties that may cause actual results to differ from estimated results.

Table of Contents*Revenues & Expenses*

Revenues from contracts for the design, manufacture and sale of asphalt plants are recognized under the percentage-of-completion method. The percentage-of-completion method of accounting for these contracts recognizes revenue, net of any promotional discounts, and costs in proportion to actual labor costs incurred as compared with total estimated labor costs expected to be incurred during the entire contract. Pre-contract costs are expensed as incurred. Changes to total estimated contract costs or losses, if any, are recognized in the period in which they are determined. Revenue recognized in excess of amounts billed is classified as current assets under costs and estimated earnings in excess of billings. The Company anticipates that all incurred costs associated with these contracts at December 31, 2016, will be billed and collected within one year.

Revenues from all other contracts for the design and manufacture of custom equipment, for service and for parts sales, net of any discounts and return allowances, are recorded when the following four revenue recognition criteria are met: product is delivered/ownership is transferred or service is performed, persuasive evidence of an arrangement exists, the selling price is fixed or determinable, and collectability is reasonably assured.

Provisions for estimated returns and allowances and other adjustments are provided for in the same period the related sales are recorded. Returns and allowances, which reduce product revenue, are estimated using historical experience.

Product warranty costs are estimated using historical experience and known issues and are charged to production costs as revenue is recognized.

All product engineering and development costs, and selling, general and administrative expenses are charged to operations as incurred. Provision is made for any anticipated contract losses in the period that the loss becomes evident.

The allowance for doubtful accounts is determined by performing a specific review of all account balances greater than 90 days past due and other higher risk amounts to determine collectability and also adjusting for any known customer payment issues with account balances in the less-than-90-day past due aging buckets. Account balances are charged off against the allowance for doubtful accounts when they are determined to be uncollectable. Any recoveries of account balances previously considered in the allowance for doubtful accounts reduce future additions to the allowance for doubtful accounts.

Inventories

Inventories are valued at the lower of cost or market, with cost being determined principally by using the last-in, first-out (LIFO) method and market defined as replacement cost for raw materials and net realizable value for work in process and finished goods. Appropriate consideration is given to obsolescence, excessive levels, deterioration, possible alternative uses and other factors in determining net realizable value. The cost of work in process and finished goods includes materials, direct labor, variable costs and overhead. The Company evaluates the need to record inventory adjustments on all inventories, including raw material, work in process, finished goods, spare parts and used equipment. Used equipment acquired by the Company on trade-in from customers is carried at estimated net realizable value. Unless specific circumstances warrant different treatment regarding inventory obsolescence, the cost basis of inventories three to four years old are reduced by 50%, while the cost basis of inventories four to five years old are reduced by 75%, and the cost basis of inventories greater than five years old are reduced to zero. Inventory is typically reviewed for obsolescence on an annual basis computed as of September 30, the Company's fiscal year end. If significant known changes in trends, technology or other specific circumstances that warrant consideration occur during the year, then the impact on obsolescence is considered at that time.

Investments

Marketable debt and equity securities are categorized as trading securities and are thus marked to market and stated at fair value. Fair value is determined using the quoted closing or latest bid prices for Level 1 investments and market standard valuation methodologies for Level 2 investments. Realized gains and losses on investment transactions are determined by specific identification and are recognized as incurred in the condensed consolidated statements of income. Net unrealized gains and losses are reported in the condensed consolidated statements of income and represent the change in the fair value of investment holdings during the period.

Long Lived Asset Impairment

Property and equipment, and intangible assets subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset (or asset group) may not be recoverable. An impairment loss would be recognized when the carrying amount of an asset exceeds the estimated undiscounted cash flows expected to result from the use of the asset and its eventual disposition. The amount of the impairment loss to be recorded is calculated by the excess over its fair value of the asset's carrying value. Fair value is generally determined using a discounted cash flow analysis.

Off-Balance Sheet Arrangements

None

Item 3. Quantitative and Qualitative Disclosures about Market Risk

The Company operates manufacturing facilities and sales offices at two locations in the United States. The Company is subject to business risks inherent in non-U.S. activities, including political and economic uncertainty, import and export limitations, and market risk related to changes in interest rates and foreign currency exchange rates. Periodically, the Company may use derivative financial instruments consisting primarily of interest rate hedge agreements to manage exposures to interest rate changes. The Company's objective in managing its exposure to changes in interest rates on any future variable rate debt is to limit the impact on earnings and cash flow and reduce overall borrowing costs.

At December 31, 2016 and September 30, 2016, the Company had no debt outstanding and there was no credit facility in place. The Company does not currently require a credit facility but continues to evaluate its needs and options for such a facility.

The Company's marketable securities are invested in cash and money funds, equities, mutual funds, exchange-traded funds, and government securities through a professional investment advisor. Investment securities are exposed to various risks, such as interest rate, market and credit risks. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of securities, it is possible that changes in these risk factors could have an adverse material impact on the Company's results of operations or equity.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's Chief Executive Officer and Chief Financial Officer evaluated the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the period covered by this Report. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this Report, the Company's disclosure controls and procedures are effective.

Because of inherent limitations, the Company's disclosure controls and procedures, no matter how well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of such disclosure controls and procedures are met and no evaluation can provide absolute assurance that all control issues and instances of fraud, if any, within the Company has been detected.

Changes in Internal Control over Financial Reporting

The Company's management, including the Chief Executive Officer and Chief Financial Officer, has reviewed the Company's internal control over financial reporting. There were no changes in the Company's internal control over financial reporting during the quarter ended December 31, 2016 that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.
