Colfax CORP  
Form 10-K  
February 25, 2011  
UNITED STATES  
SECURITIES AND EXCHANGE COMMISSION  
Washington, D.C. 20549

FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from \_\_\_\_\_ to \_\_\_\_\_

Commission File Number: 001-34045

Colfax Corporation  
(Exact name of registrant as specified in its charter)

Delaware  
(State or other jurisdiction of incorporation or organization)

54-1887631  
(I.R.S. Employer Identification No.)

8170 Maple Lawn Boulevard, Suite 180  
Fulton, Maryland  
(Address of principal executive offices)

20759  
(Zip Code)

Registrant's telephone number, including area code: 301-323-9000

Securities Registered Pursuant to Section 12(b) of the Act:

Title of Each Class  
Common Stock, \$.001 par value

Name of Each Exchange On Which Registered  
New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act:

NONE  
(Title of Class)

Edgar Filing: Colfax CORP - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes  No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes  No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer  Accelerated filer  Non-accelerated filer  Smaller reporting company   
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes  No

The aggregate market value of common shares held by non-affiliates of the Registrant on July 2, 2010 was \$253,477,763 based upon the closing price of the registrant's common shares as quoted on the New York Stock Exchange composite tape on such date.

As of January 31, 2011, the number of shares of registrant's common stock outstanding was 43,414,344.

EXHIBIT INDEX APPEARS ON PAGE 85

DOCUMENTS INCORPORATED BY REFERENCE

Part III incorporates certain information by reference from the registrant's definitive proxy statement for its 2011 annual meeting of stockholders to be filed pursuant to Regulation 14A within 120 days after the end of the registrant's fiscal year covered by this report. With the exception of the sections of the 2011 proxy statement specifically incorporated herein by reference, the 2011 proxy statement is not deemed to be filed as part of this Form 10-K.

#### SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

Some of the statements contained in this Annual Report that are not historical facts are forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934 (the “Exchange Act”). We intend such forward-looking statements to be covered by the safe harbor provisions for forward-looking statements contained in Section 21E of the Exchange Act. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date this Annual Report is filed with the SEC. All statements other than statements of historical fact are statements that could be deemed forward-looking statements, including statements regarding: projections of revenue, profit margins, expenses, tax provisions and tax rates, earnings or losses from operations, impact of foreign exchange rates, cash flows, pension and benefit obligations and funding requirements, synergies or other financial items; plans, strategies and objectives of management for future operations including statements relating to potential acquisitions, compensation plans or purchase commitments; developments, performance or industry or market rankings relating to products or services; future economic conditions or performance; the outcome of outstanding claims or legal proceedings including asbestos-related liabilities and insurance coverage litigation; potential gains and recoveries of costs; assumptions underlying any of the foregoing; and any other statements that address activities, events or developments that we intend, expect, project, believe or anticipate will or may occur in the future. Forward-looking statements may be characterized by terminology such as “believe,” “anticipate,” “should,” “would,” “intend,” “plan,” “will,” “expect,” “estimate,” “project,” “positioned,” “strategy,” and other expressions. These statements are based on assumptions and assessments made by our management in light of their experience and perception of historical trends, current conditions, expected future developments and other factors we believe to be appropriate. These forward-looking statements are subject to a number of risks and uncertainties, including but not limited to the following:

- risks associated with our international operations;
- significant movements in foreign currency exchange rates;
- changes in the general economy, as well as the cyclical nature of our markets;
- our ability to accurately estimate the cost of or realize savings from our restructuring programs;
- availability and cost of raw materials, parts and components used in our products;
  - the competitive environment in our industry;
- our ability to identify, finance, acquire and successfully integrate attractive acquisition targets;
  - the amount of and our ability to estimate our asbestos-related liabilities;
  - material disruption at any of our significant manufacturing facilities;
- the solvency of our insurers and the likelihood of their payment for asbestos-related costs;
- our ability to manage and grow our business and execution of our business and growth strategies;
  - our recent substantial leadership turnover and realignment;

Edgar Filing: Colfax CORP - Form 10-K

- our ability and the ability of customers to access required capital at a reasonable cost;
  - our ability to expand our business in our targeted markets;
  - our ability to cross-sell our product portfolio to existing customers;
- the level of capital investment and expenditures by our customers in our strategic markets;

- our financial performance;
- our ability to identify, address and remediate any material weakness in our internal control over financial reporting; and
- others risks and factors, listed in Item 1A. Risk Factors in Part I of this Form 10-K.

Any such forward-looking statements are not guarantees of future performance and actual results, developments and business decisions may differ materially from those envisaged by such forward-looking statements. These forward-looking statements speak only as of the date this Annual Report is filed with the SEC. We do not assume any obligation and do not intend to update any forward-looking statement except as required by law. See Item 1A. Risk Factors in Part I of this Form 10-K for a further discussion regarding some of the reasons that actual results may be materially different from those that we anticipate.

## PART I

### ITEM 1. BUSINESS

#### General

Colfax Corporation is a global supplier of a broad range of fluid handling products, including pumps, fluid handling systems and controls, and specialty valves. We believe that we are a leading manufacturer of rotary positive displacement pumps, which include screw pumps, gear pumps and progressive cavity pumps. We design and engineer our products to high quality and reliability standards for use in critical fluid handling applications where performance is paramount. We also offer customized fluid handling solutions to meet individual customer needs based on our in-depth technical knowledge of the applications in which our products are used.

Our products are marketed principally under the Allweiler, Baric, Fairmount, Houttuin, Imo, LSC, Portland Valve, Tushaco, Warren and Zenith brand names. We believe that our brands are widely known and have a premium position in our industry. Allweiler, Houttuin, Imo and Warren are among the oldest and most recognized brands in the markets in which we participate, with Allweiler dating back to 1860. We have a global manufacturing footprint, with production facilities in Europe, North America and Asia, as well as worldwide sales and distribution channels.

We employ a comprehensive set of tools that we refer to as the Colfax Business System, or CBS. CBS is a disciplined strategic planning and execution methodology designed to achieve excellence and world-class financial performance in all aspects of our business by focusing on the Voice of the Customer and continuously improving quality, delivery and cost. Modeled on the Danaher Business System, CBS focuses on conducting root-cause analysis, developing process improvements and implementing sustainable systems. Our approach addresses the entire business, not just manufacturing operations.

We currently serve markets that have a need for highly engineered, critical fluid handling solutions and are global in scope. Our strategic markets include:

Strategic Markets	Applications
Commercial Marine	Fuel oil transfer; lubrication; water and wastewater handling; cargo handling
Oil and Gas	Crude oil gathering; pipeline services; unloading and loading; rotating equipment lubrication; lube oil purification

Power Generation	Fuel unloading, transfer, burner and injection; rotating equipment lubrication
Global Defense	Fuel oil transfer; oil transport; water and wastewater handling; firefighting; fluid control
General Industrial	Machinery lubrication; hydraulic elevators; chemical processing; pulp and paper processing; food and beverage processing; distribution

We serve a global customer base across multiple markets through a combination of direct sales and marketing associates and third-party distribution channels. Our customer base is highly diversified and includes commercial, industrial and government customers such as Alfa Laval Group, General Dynamics Corporation, Siemens AG, the U.S. Navy and various sovereign navies around the world. Our business is not dependent on any single customer or a few customers. In 2010, no single customer represented more than 6% of sales.

Our business began with an initial investment by our founders in 1995 with the intention to acquire, manage and create a world-class industrial manufacturing company. We seek to acquire businesses with leading market positions and brands that exhibit strong cash flow generation potential. With our management expertise and the introduction of CBS into our acquired businesses, we pursue growth in revenues, improvements in operating margins and increasing cash flow.

Since our platform acquisitions of Imo and Allweiler in 1997 and 1998, respectively, we have completed additional acquisitions that have broadened our fluid handling product portfolio and geographic footprint. A summary of recent acquisition activity follows:

- In January 2007, we acquired LSC, a manufacturer of fluid handling systems. LSC designs, manufactures, installs and maintains oil mist lubrication and oil purification systems in refineries, petrochemical plants and other processing facilities.
- In November 2007, we acquired Fairmount, an original equipment manufacturer of mission critical programmable automation controllers in fluid handling applications primarily for the U.S. Navy.
  - In August 2009, we acquired PD-Technik, a provider of marine aftermarket related products and services.
- In August 2010, we acquired Baric Group, a premier supplier of engineered fluid handling systems primarily for the oil and gas market.

In addition to our acquisitions, in 2005 we opened a green-field production facility in Wuxi, China to manufacture and assemble complete products and systems for our customers in China and other Asian markets and to supply low cost components and parts for our existing operations.

## Our Industry

Based on industry data supplied by The Freedonia Group and European Industrial Forecasting, we estimate the worldwide fluid handling market, which we define as industrial pumps, valves, and gaskets and seals, to have been \$130 billion in 2009. Within this market, we primarily compete in the estimated \$5 billion global rotary positive displacement pump market, a sub-section of the estimated \$14 billion positive displacement pump market. We are also a competitor in the estimated \$28 billion centrifugal pump market and the estimated \$50 billion valve market.

We believe that there are over 9,000 companies competing in the worldwide fluid handling industry. The fluid handling industry's customer base is broadly diversified across many sectors of the economy, and we believe customers place a premium on quality, reliability, availability, design and application engineering support. Because products in the fluid handling industry often are used as components in critical applications, we believe the most successful industry participants are those that have the technical capabilities to meet customer specifications, offer products with reputations for quality and reliability, and can provide timely delivery and strong aftermarket support.

## Competitive Strengths

**Strong Market Positions, Broad Product Portfolio and Leading Brands.** We believe that we are a leading manufacturer of rotary positive displacement pumps, which include screw pumps, gear pumps and progressive cavity pumps. We offer a broad portfolio of fluid handling products that fulfill critical needs of customers across numerous industries. Our brands are among the oldest and most recognized in the markets in which we participate.

**Strong Application Expertise.** We believe that our reputation for quality and technical expertise positions us as a premium supplier of fluid handling products. With 150 years of experience, we have significant expertise in designing and manufacturing fluid handling products that are used in critical applications, such as lubricating power generation turbines, transporting crude oil through pipelines, and transferring heavy fuel oil in commercial marine vessels.

**Extensive Global Sales, Distribution and Manufacturing Network.** We sell our products through more than 400 direct sales, customer service and marketing associates and approximately 185 authorized distributors in more than 95 countries. We believe that our global reach within the highly fragmented, worldwide fluid handling industry provides us with an ability to better serve our customers. Our European, North American and Asian manufacturing capabilities provide us with the ability to optimize material sourcing, transportation and production costs and reduce foreign currency risk.

**We Use CBS to Continuously Improve Our Business.** CBS is our business system designed to encourage a culture of continuous improvement in all aspects of our operations and strategic planning. Modeled on the Danaher Business System, CBS focuses on conducting root-cause analysis, developing process improvements and implementing sustainable systems. Our approach addresses the entire business, not just manufacturing operations.

**Large Installed Base Generating Aftermarket Sales and Service.** With a history dating back to 1860, we have a significant installed base across numerous industries. Because of the critical applications in which our products are used and the high quality and reliability of our products, we believe there is a tendency to replace “like for like” products. This tendency leads to significant aftermarket demand for replacement products as well as for spare parts and service. In the year ended December 31, 2010, approximately 24% of our revenues were derived from aftermarket sales and services.

**Broad and Diverse Customer Base.** Our customer base spans numerous industries and is geographically diverse. Approximately 75% of our sales in 2010 were delivered to customers outside of the U.S. In addition, no single customer represented more than 6% of our sales during this period.

**Leadership Team with Focus on CBS and Experience in Integrating Acquisitions.** We are led by a senior leadership team with experience in the application of CBS methodology to all aspects of industrial manufacturing operations. We believe that we have extensive experience in acquiring and effectively integrating attractive acquisition targets.

#### Growth Strategy

We intend to continue to increase our sales, expand our geographic reach, broaden our product offerings, and improve our profitability through the following strategies:

**Apply CBS to Drive Profitable Sales Growth and Increase Shareholder Value.** The core element of our operating philosophy is CBS. CBS focuses our organization on continuous improvement and performance goals by empowering our associates to develop innovative strategies to meet customer needs. Rather than a static process, CBS continues to evolve as we benchmark ourselves against best-in-class industrial companies.

Beyond the traditional application of cost control, overhead rationalization, global process optimization, and implementation of lean manufacturing techniques, we utilize CBS to identify strategic opportunities to enhance future sales growth. The foremost principle of CBS is the Voice of the Customer, which drives our activities to continuously improve customer service, product quality, delivery and cost. The Voice of the Customer is instrumental in the development of differentiated products, services and solutions by utilizing a formal interview process with the end users of our products to identify “pain points” or customer needs. By engaging end users in the discussion, rather than solely relying on salespeople or channel partners for anecdotal input, we see the real issues and opportunities. We then prioritize these opportunities with the intention of implementing novel or breakthrough ideas that uniquely solve end-user needs. As we continue to apply the methodology of CBS to our existing business as well as to future acquisitions, we believe that we will be able to continue to introduce differentiated products and solutions, improve operating margins and increase the asset utilization of our businesses. As a result, we believe we can create profitable sales growth, generate excess cash flow to fund future acquisitions and increase shareholder value.

**Execute Market Focused Strategies.** We have aligned our marketing and sales organization into market focused teams designed to coordinate global activity around five strategic markets: commercial marine, oil and gas, power generation, global defense and general industrial. These markets have a need for highly engineered, critical fluid handling solutions and are attractive due to their ongoing capital expenditure requirements, long term growth rates and global nature. We intend to continue to use our application expertise, highly engineered and specialized products, broad product portfolio and recognized product brands to generate high margin incremental revenue.

**Commercial Marine**— We provide complete fluid handling packages to shipbuilders throughout the world primarily for use in engine room applications. Our products are widely recognized for their superior reliability and lower total cost of ownership. The increased rate of commercial marine vessel construction in recent years has expanded our installed base of fluid handling products and has generated increased aftermarket revenues. In addition to supplying our products for new vessels, we intend to continue to grow our aftermarket sales and services by optimizing our channels to improve market coverage. We are also addressing changing environmental requirements with our products. We also intend to continue to expand our global reach by utilizing our Chinese operations to offer locally manufactured products, to reduce production costs and to provide local customer service and support for the Asia Pacific region, an area where the majority of the commercial marine vessels are constructed.

**Oil and Gas**— We provide a broad portfolio of fluid handling products for many oil and gas applications around the world. In particular, we have a strong presence in oil field tank farms, pipelines and refineries and also in Floating Production Storage and Offloading (FPSO) installations. We intend to continue to execute our strategy in the global crude oil transport market by targeting applications where our products can replace less efficient fluid handling alternatives. We also intend to leverage our position as a leading supplier of 2-screw pumps by developing complex turnkey systems to capture the growing need for fluid handling solutions that can undertake the difficult task of handling varying mixtures of heavy crude oil, natural gas and water at the same time. Additionally, we expect to continue to broaden our presence within the refinery market through our acquisition of Baric Group. We are also adding resources to the growing oil and gas markets around the world, including Asia, the Middle East and developing nations.

**Power Generation**— We provide fluid handling products used in critical lubrication and fuel injection services for fossil fuel, hydro and nuclear power plants around the world. We believe that we have in-depth knowledge of fuel injection and lubrication applications, strong product brand names and a reputation for reliability in the power generation industry. Within this market we intend to continue our growth as a provider of turnkey systems by utilizing our expertise in power generation applications to develop innovative solutions. We also plan to continue to leverage our global presence to strengthen our relationships with large original equipment manufacturers of power generation equipment to establish us as a critical supplier.

**Global Defense**— For over 90 years we have supplied our specialty centrifugal and screw pumps to sovereign navies around the world, including the U.S. Navy and most of the major navies in Europe. With the acquisitions of Portland Valve and Fairmount, we broadened our offering to include specialty valves and advanced control systems, respectively. We intend to continue to design, manufacture and sell high value fluid handling systems in order to meet the evolving requirements and standards of the navies around the world. Our engineers are also working with the U.S. Navy to incorporate electronics and advanced control algorithms into our products. We are also focused on expanding our repair and service capabilities as work is outsourced to private shipyards. As part of this strategy, we have established a waterfront repair and service facility in San Diego, California to complement our Portland, Maine facility in order to provide more responsive aftermarket support to the U.S. Navy.

**General Industrial**— We provide fluid handling solutions for a broad array of general industrial applications, including machinery lubrication, commercial construction, chemical processing, pulp and paper processing and food and beverage processing, among others. We intend to continue to apply our application and engineering expertise to supply our customers with a portfolio of products that can solve their most critical fluid handling needs. We also intend to continue to expand our presence in the general industrial market by targeting new applications for our existing products, deploying regionally focused strategies and leveraging our global presence and sales channels to sell our solutions worldwide.

- Target Faster Growing Regions by Leveraging Our Global Manufacturing, Sales and Distribution Network. We intend to continue to leverage our strong global presence and worldwide network of

distributors to capitalize on growth opportunities by selling regionally developed and marketed products and solutions throughout the world. As our customers have become increasingly global in scope, we have likewise increased our global reach to serve our customers by maintaining a local presence in numerous markets and investing in sales, marketing and manufacturing capabilities globally.

**Develop Differentiated Products, Applications and Technologies.** We will continue to engineer our key products to meet the needs of new and existing customers and also to improve our existing product offerings to strengthen our market position. We plan to continue to develop technological, or “SMART,” solutions, which incorporate advanced electronics, sensors and controls, through the use of our Voice of the Customer process to solve specific customer needs. We believe our SMART solutions will reduce our customers’ total cost of ownership by providing real-time diagnostic capabilities to minimize downtime, increase operational efficiency and avoid unnecessary costs. We also intend to leverage Fairmount’s portfolio of advanced controls into our broader industrial offerings to develop innovative SMART fluid handling solutions.

**Grow Our Offerings of Systems and Solutions.** We will continue to provide high value added fluid handling solutions by utilizing our engineering and application expertise along with our brand recognition and sales channels to drive incremental revenue. We intend to establish regional system manufacturing capabilities to address our customers’ desire to purchase turnkey modules and their preference for outsourced assembly.

**Continue to Pursue Strategic Acquisitions that Complement our Platform.** We believe that the fragmented nature of the fluid handling industry presents substantial consolidation and growth opportunities for companies with access to capital and the management expertise to execute a disciplined acquisition and integration program. We have successfully applied this strategy since our inception and plan to continue to seek companies that:

- Enhance our position in our strategic markets;
- have recognized, leading brands and strong industry positions;
- present opportunities to expand our product lines and services;
- have a reputation for high quality products;
- will broaden our global manufacturing footprint;
- complement or augment our existing worldwide sales and distribution networks; or

present opportunities to provide operational synergies and improve the combined business operations by implementing CBS.

Our acquisition strategy considers a broad range of industrial businesses, including businesses in or complementary to our existing business, as well as industrial businesses not associated with fluid handling. It is likely that our acquisition efforts will focus on similar or complementary businesses in the near term.

## Products

We design, manufacture and distribute fluid handling products that transfer or control liquids in a variety of applications. We also sell replacement parts and perform repair services for our manufactured products.

Our primary products, brands and their end uses include:

Fluid Handling Products	Primary Brands	Primary End Uses
Pumps	Allweiler, Houttuin, Imo, Warren, Tushaco	Commercial marine, oil and gas, machinery lubrication, power generation,

Edgar Filing: Colfax CORP - Form 10-K

	and Zenith	defense, chemical and commercial construction
Fluid Handling Systems	Allweiler, Baric, Fairmount, Houttuin, Imo, LSC and Warren	Commercial marine, oil and gas, power generation and defense
Specialty Valves	Portland Valve	Global defense

## Pumps

**Rotary Positive Displacement Pumps** —We believe that we are a leading manufacturer of rotary positive displacement pumps with a broad product portfolio and globally recognized brands. Rotary positive displacement pumps consist of a casing containing screws, gears, vanes or similar components that are actuated by the relative rotation of that component to the casing, which results in the physical movement of the liquid from the inlet to the discharge at a constant rate. Positive displacement pumps generally offer precise, quiet and highly efficient transport of viscous fluids. The U.S. Hydraulic Institute accredits 11 basic types of rotary positive displacement pumps, of which we manufacture five (3-screw, 2-screw, progressive cavity, gear and peristaltic).

**Specialty Centrifugal Pumps**— Centrifugal pumps use the kinetic energy imparted by rotating an impeller inside a configured casing to create pressure. While traditionally used to transport large quantities of thin liquids, our centrifugal pumps use specialty designs and materials to offer customers high quality, reliability and customized solutions for a wide range of viscosities, temperatures and applications. We position our specialty centrifugal pumps for applications where customers clearly recognize our brand value or in markets where centrifugal and rotary pumps are complimentary.

## Fluid Handling Systems

We manufacture complete fluid handling systems used primarily in the oil and gas, power generation, commercial marine and global defense markets. We offer turnkey systems and support, including design, manufacture, installation, commission and service. Our systems include:

- lubrication systems, which are used in rotating equipment in oil refineries and other process industries;
- custom designed packages used in crude oil pipeline applications;
- lubrication and fuel forwarding systems used in power generation turbines;
- complete packages for commercial marine engine rooms; and
- fire suppression systems for navy applications.

## Specialty Valves

Our specialty valves are used primarily in naval applications. Our valve business has specialized machining, welding and fabrication capabilities that enable it to serve as a supplier to the U.S. Navy. In addition to designing and manufacturing valves, we also offer repair and retrofit services for products manufactured by other valve suppliers through our aftermarket support centers located in Portland, Maine and San Diego, California.

## Manufacturing

We manufacture and assemble our products at 14 locations in Europe, North America and Asia. This global manufacturing reach enables us to serve our customers wherever they choose to do business. Each of our manufacturing sites offers machining, fabrication and assembly capabilities that gives us the flexibility to source some of our products from multiple facilities. Our manufacturing facilities also benefit from the use of shared technology and collaboration across production lines, enabling us to increase operational efficiencies through the use of common suppliers and the duplication of production processes.

Competition

Our products and services are marketed on a worldwide basis. We believe that the principal elements of competition in our markets are:

- the ability to meet customer specifications;
- application expertise and design and engineering capabilities;
- product quality and brand name;
- timeliness of delivery;
- price; and

• quality of aftermarket sales and support.

The markets we serve are highly fragmented and competitive. Because we compete in selected niches of the fluid handling industry, there is not any single company that competes directly with us across all of our markets. As a result, we have many different competitors in each of our strategic markets. In the commercial marine market, we compete primarily with Naniwa Pump Manufacturing Co., Ltd., Shinko Industries, Ltd., Shin Shin Machinery Group Co., Ltd. and Taiko Kikai Industries Co., Ltd. In the oil and gas market, we compete primarily with Joh. Heir. Bornemann GmbH and Leistrizt Pumpen GmbH. In the power generation market, we compete primarily with Buffalo Pumps, a subsidiary of Ampco-Pittsburgh Corporation. In the global defense market, we compete primarily with Buffalo Pumps, Carver Pump Company, Curtiss-Wright Corporation and Tyco International, Inc.

#### Research and Development

We closely integrate research and development with marketing, manufacturing and product engineering in meeting the needs of our customers. Our business product engineering teams are continuously enhancing our existing products and developing new product applications for our growing base of customers that require custom solutions. We believe these capabilities provide a significant competitive advantage in the development of high quality fluid handling systems. Our product engineering teams focus on:

- lowering the cost of manufacturing our existing products;
- redesigning existing product lines to increase their efficiency or enhance their performance; and
- developing new product applications.

Expenditures for research and development for the years ended December 31, 2010, 2009 and 2008 were \$6.2 million, \$5.9 million and \$5.9 million, respectively.

#### Intellectual Property

We rely on a combination of intellectual property rights, including patents, trademarks, copyrights, trade secrets and contractual provisions to protect our intellectual property. Although we highlight recent additions to our patent portfolio as part of our marketing efforts, we do not consider any one patent or trademark or any group thereof essential to our business as a whole or to any of our business operations. We also rely on proprietary product knowledge and manufacturing processes in our operations.

#### International Operations

Our products and services are available worldwide. We believe this geographic diversity allows us to draw on the skills of a worldwide workforce, provides stability to our operations, allows us to drive economies of scale, provides revenue streams that may offset economic trends in individual economies, and offers us an opportunity to access new markets for products. In addition, we believe that future growth is dependent in part on our ability to develop products and sales models that target developing countries. Our principal markets outside the United States are in Europe, Asia, the Middle East and South America.

The manner in which our products and services are sold differs by region. Most of our sales in non-U.S. markets are made by subsidiaries located outside the United States, though we also sell into non-U.S. markets through various representatives and distributors and directly from the U.S. In countries with low sales volumes, we generally sell through representatives and distributors.

Financial information about our international operations is contained in Note 17 of the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data, and information about the possible effects of foreign currency fluctuations on our business is set forth in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations. For a discussion of risks related to our non-U.S. operations and foreign currency exchange, please refer to Item 1A. Risk Factors.

#### Raw Materials and Backlog

We obtain raw materials, component parts and supplies from a variety of sources, generally each from more than one supplier. Our principal raw materials are metals, castings, motors, seals and bearings. Our suppliers and sources of raw materials are based in the United States and other countries. We believe that our sources of raw materials are adequate for our needs for the foreseeable future and the loss of any one supplier would not have a material adverse effect on our business or results of operations.

Manufacturing turnaround time is generally sufficiently short to allow us to manufacture to order for most of our products, which helps to limit inventory levels. Backlog generally is a function of requested customer delivery dates and may range from days to several years. Backlog of orders as of December 31, 2010 was \$313.5 million, compared with \$290.9 million as of December 31, 2009. We expect to ship approximately 70% of our December 31, 2010 backlog during 2011; however, orders are subject to postponement or cancellation.

#### Seasonality

Our fluid handling business is seasonal. As our customers seek to fully utilize capital spending budgets before the end of the year, historically our shipments have peaked during the fourth quarter. Also, our European operations typically experience a slowdown during the July and August holiday season.

#### Working Capital

We maintain an adequate level of working capital to support our business needs. There are no unusual industry practices or requirements related to working capital items.

#### Associates

The following table presents our worldwide associate base as of the periods indicated:

	Year ended December 31,		
	2010	2009	2008
North America	638	598	739
Europe	1,260	1,189	1,276
Asia and Middle East	262	254	299
<b>Total</b>	<b>2,160</b>	<b>2,041</b>	<b>2,314</b>

There are 39 associates in the United States covered by a collective bargaining agreement with the International Union of Electronic, Electrical, Salaried, Machine and Furniture Workers-Communications Workers of America (IUE-CWA). The contract with the union expires December 4, 2011 and provides for wage increases ranging from 3.5% to a maximum of 3.8% per year. In addition, approximately 49% of our associates are represented by foreign trade unions, by law, in Germany, Sweden and the Netherlands, which subjects us to arrangements very similar to collective bargaining agreements. We have not experienced any work stoppages or strikes that have had a material adverse impact on operations. We consider our relations with our associates to be good.

#### Government Contracts

Sales to U.S. government defense agencies and government contractors constituted approximately 10% of our revenue in 2010. We are subject to business and cost accounting regulations associated with our U.S. government defense contracts. Violations can result in civil, criminal or administrative proceedings involving fines, compensatory and treble damages, restitution, forfeitures, and suspension or debarment from U.S. government defense contracts.

#### Company Information and Access to SEC Reports

We were organized as a Delaware corporation in 1998. Our principal executive offices are located at 8170 Maple Lawn Boulevard, Suite 180, Fulton, MD 20759, and our main telephone number at that address is (301)

Edgar Filing: Colfax CORP - Form 10-K

323-9000. Our corporate website address is [www.colfaxcorp.com](http://www.colfaxcorp.com).

We make available, free of charge through our website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and any amendments to those reports as soon as practicable after filing or furnishing the material to the SEC. You may also request a copy of these filings, at no cost, by writing or telephoning us at: Investor Relations, Colfax Corporation, 8170 Maple Lawn Boulevard, Suite 180, Fulton, MD 20759, telephone (301) 323-9000. Information contained on our website is not incorporated by reference in this report.

ITEM 1A.

RISK FACTORS

An investment in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with the information included elsewhere in this Annual Report on Form 10-K and other documents we file with the SEC. If any of the following risks actually occur, our business, financial condition or operating results could suffer. As a result, the trading price of our common stock could decline and you could lose all or part of your investment in our common stock. The risks and uncertainties described below are those that we have identified as material, but are not the only risks and uncertainties facing us and we caution that this list of risk factors may not be exhaustive. Our business is also subject to general risks and uncertainties that affect many other companies, such as overall U.S. and non-U.S. economic and industry conditions, a global economic slowdown, geopolitical events, changes in laws or accounting rules, fluctuations in interest rates, terrorism, international conflicts, natural disasters or other disruptions of expected economic or business conditions. We operate in a continually changing business environment, and new risk factors emerge from time to time which we cannot predict. Additional risks and uncertainties not currently known to us or that we currently believe are immaterial also may impair our business, including our results of operations, liquidity and financial condition.

Risks Related to Our Business

Changes in the general economy and the cyclical nature of our markets could harm our operations and financial performance.

Our financial performance depends, in large part, on conditions in the markets we serve and on the general condition of the global economy. Any sustained weakness in demand, downturn or uncertainty in the global economy could reduce our sales and profitability, and result in restructuring efforts. Restructuring efforts are inherently risky and we may not be able to predict the cost and timing of such actions accurately or properly estimate the impact on demand, if any. We also may not be able to realize the anticipated savings we expected from restructuring activities. In addition, our products are sold in many industries, some of which are cyclical and may experience periodic downturns. Cyclical weakness in the industries we serve could lead to reduced demand for our products and affect our profitability and financial performance. In 2010 the effects of the global economic slowdown started to recede in some markets but we still see sluggish demand and less than robust growth in certain areas.

We believe that many of our customers and suppliers are reliant on liquidity from global credit markets and in some cases, require external financing to purchase products or finance operations. Lack of liquidity or inability to access the credit markets by our customers could impact our ability to collect amounts owed to us. Further, lack of liquidity by financial institutions could impact our ability to fully access our existing credit facility.

The majority of our sales are derived from international operations. We are subject to specific risks associated with international operations.

In the year ended December 31, 2010, we derived approximately 66% of our sales from operations outside of the U.S. and have manufacturing facilities in eight countries. Sales from international operations, export sales and the use of manufacturing facilities outside of the U.S. are subject to risks inherent in doing business outside the U.S. These risks include:

- economic instability;
- partial or total expropriation of our international assets;
- trade protection measures, including tariffs or import-export restrictions;

- currency exchange rate fluctuations and restrictions on currency repatriation;
- significant adverse changes in taxation policies or other laws or regulations; and
- the disruption of operations from political disturbances, terrorist activities, insurrection or war.

Significant movements in foreign currency exchange rates may harm our financial results.

We are exposed to fluctuations in currency exchange rates. In the year ended December 31, 2010, approximately 66% of our sales were derived from operations outside the U.S. A significant portion of our revenues and income are denominated in Euros, Swedish Kronor and Norwegian Kroner. Consequently, depreciation of the Euro, Krona or Krone against the U.S. dollar has a negative impact on the income from operations of our European operations. Large fluctuations in the rate of exchange between the Euro, the Krona, the Krone and the U.S. dollar could have a material adverse effect on our results of operations and financial condition.

In addition, we do not engage to a material extent in hedging activities intended to offset the risk of exchange rate fluctuations. Any significant change in the value of the currencies of the countries in which we do business against the U.S. dollar could affect our ability to sell products competitively and control our cost structure, which, in turn, could adversely affect our results of operations and financial condition.

We are dependent on the availability of raw materials, as well as parts and components used in our products.

While we manufacture many of the parts and components used in our products, we require substantial amounts of raw materials and purchase parts and components from suppliers. The availability and prices for raw materials, parts and components may be subject to curtailment or change due to, among other things, suppliers' allocations to other purchasers, interruptions in production by suppliers, changes in exchange rates and prevailing price levels. Any significant change in the supply of, or price for, these raw materials or parts and components could materially affect our business, financial condition, results of operations and cash flow. In addition, delays in delivery of components or raw materials by our suppliers could cause delays in our delivery of products to our customers.

The markets we serve are highly competitive and some of our competitors may have resources superior to ours. Responding to this competition could reduce our sales and operating margins.

We sell most of our products in highly fragmented and competitive markets. We believe that the principal elements of competition in our markets are:

- the ability to meet customer specifications;
- application expertise and design and engineering capabilities;
- product quality and brand name;
- timeliness of delivery;
- price; and
- quality of aftermarket sales and support.

In order to maintain and enhance our competitive position, we intend to continue our investment in manufacturing quality, marketing, customer service and support, and distribution networks. We may not have sufficient resources to continue to make these investments and we may not be able to maintain our competitive position. Our competitors may develop products that are superior to our products, develop methods of more efficiently and effectively providing products and services, or adapt more quickly than we do to new technologies or evolving customer requirements. Some of our competitors may have greater financial, marketing and research and development resources than we have. As a result, those competitors may be better able to withstand the effects of periodic economic downturns. In addition,

pricing pressures could cause us to lower the prices of some of our products to stay competitive. We may not be able to compete successfully with our existing competitors or with new competitors. If we fail to compete successfully, the failure may have a material adverse effect on our business and results of operations.

Acquisitions have formed a significant part of our growth strategy in the past and are expected to continue to do so. If we are unable to identify suitable acquisition candidates or successfully integrate the businesses we acquire or realize the intended benefits, our growth strategy may not succeed. Acquisitions involve numerous risks, including risks related to integration and undisclosed or underestimated liabilities.

Historically, our business strategy has relied on acquisitions. We expect to derive a significant portion of our growth by acquiring businesses and integrating those businesses into our existing operations. We intend to seek acquisition opportunities both to expand into new markets and to enhance our position in our existing markets. However, our ability to do so will depend on a number of steps, including our ability to:

- identify suitable acquisition candidates;
- negotiate appropriate acquisition terms;
- obtain debt or equity financing that we may need to complete proposed acquisitions;
- complete the proposed acquisitions; and
- integrate the acquired business into our existing operations.

If we fail to achieve any of these steps, our growth strategy may not be successful.

In addition, acquisitions involve numerous risks, including difficulties in the assimilation of the operations, technologies, services and products of the acquired company, the potential loss of key employees of the acquired company and the diversion of our management's attention from other business concerns. This is the case particularly in the fiscal quarters immediately following the completion of an acquisition because the operations of the acquired business are integrated into the acquiring businesses' operations during this period. We cannot be sure that we will accurately anticipate all of the changing demands that any future acquisition may impose on our management, our operational and management information systems and our financial systems.

We may underestimate or fail to discover liabilities relating to a future acquisition during the due diligence investigation and we, as the successor owner, might be responsible for those liabilities. For example, two of our acquired subsidiaries are each one of many defendants in a large number of lawsuits that claim personal injury as a result of exposure to asbestos from products manufactured with components that are alleged to have contained asbestos. Although our due diligence investigations in connection with these acquisitions uncovered the existence of potential asbestos-related liabilities, the scope of such liabilities were greater than we had originally estimated. Although we seek to minimize the impact of underestimated or potential undiscovered liabilities by structuring acquisitions to minimize liabilities and obtaining indemnities and warranties from the selling party, these methods may not fully protect us from the impact of undiscovered liabilities. Indemnities or warranties are often limited in scope, amount or duration, and may not fully cover the liabilities for which they were intended. The liabilities that are not covered by the limited indemnities or warranties could have a material adverse effect on our business and financial condition.

We may require additional capital to finance our operating needs and to finance our growth. If the terms on which the additional capital is available are unsatisfactory, if the additional capital is not available at all or we are not able to fully access our existing credit facility, we may not be able to pursue our growth strategy.

Our growth strategy will require additional capital investment to complete acquisitions, integrate the completed acquisitions into our existing operations, and to expand into new markets.

We intend to pay for future acquisitions using cash, capital stock, notes, assumption of indebtedness or any combination of the foregoing. To the extent that we do not generate sufficient cash internally to provide the capital we require to fund our growth strategy and future operations, we will require additional debt or equity financing. We cannot be sure that this additional financing will be available or, if available, will be on terms acceptable to us. Further, high volatility in the equity markets and in our stock price may make it difficult for us to access the equity markets for additional capital at attractive prices, if at all. If we are unable to obtain sufficient additional capital in the future, it may limit our ability to implement fully our business strategy. Even if future debt financing is available, it may result in (1) increased interest expense, (2) increased term loan payments, (3) increased leverage, and (4) decreased income available to fund further acquisitions and expansion. It may also limit our ability to withstand

competitive pressures and make us more vulnerable to economic downturns. If future equity financing is available, issuances of our equity securities may dilute our existing stockholders.

In addition, our credit facility agreement includes restrictive covenants which could limit our financial flexibility. If we do not maintain compliance with these covenants, our creditors could declare a default. Our ability to comply with the provisions of our indebtedness may be affected by changes in economic or business conditions beyond our control.

A material disruption at any of our manufacturing facilities could adversely affect our ability to generate sales and meet customer demand.

If operations at our manufacturing facilities were to be disrupted as a result of significant equipment failures, natural disasters, power outages, fires, explosions, terrorism, adverse weather conditions, labor disputes or other reasons, our financial performance could be adversely affected as a result of our inability to meet customer demand for our products. Interruptions in production could increase our costs and reduce our sales. Any interruption in production capability could require us to make substantial capital expenditures to remedy the situation, which could negatively affect our profitability and financial condition. We maintain property damage insurance which we believe to be adequate to provide for reconstruction of facilities and equipment, as well as business interruption insurance to mitigate losses resulting from any production interruption or shutdown caused by an insured loss. However, any recovery under our insurance policies may not offset the lost sales or increased costs that may be experienced during the disruption of operations, which could adversely affect our financial performance.

Efforts to realign our operating platform could disrupt our business and affect our results of operations.

In recognition of our evolving global business, we are moving from a business-unit structure to a global-functional operating structure. We believe this strategic realignment will better allow us to deliver customer-centric fluid handling solutions. Inherent in any realignment of operations are risks related to our ability to structure our business in a way that accomplishes our goals and best responds to customer needs without causing disruption to our ongoing business.

Available insurance coverage, the number of future asbestos-related claims and the average settlement value of current and future asbestos-related claims of two of our subsidiaries could be different than we have estimated, which could materially and adversely affect our financial condition, results of operations and cash flow.

Two of our subsidiaries are each one of many defendants in a large number of lawsuits that claim personal injury as a result of exposure to asbestos from products manufactured with components that are alleged to have contained asbestos. Such components were acquired from third-party suppliers and were not manufactured by any of our subsidiaries nor were the subsidiaries producers or direct suppliers of asbestos. For purposes of our financial statements, we have estimated the future claims exposure and the amount of insurance available based upon certain assumptions with respect to future claims and liability costs. We estimate the liability costs to be incurred in resolving pending and forecasted claims for the next 15-year period.

Our decision to use a 15-year period is based on our belief that this is the extent of our ability to forecast liability costs. We also estimate the amount of insurance proceeds available for such claims based on the current financial strength of the various insurers, our estimate of the likelihood of payment and applicable current law. We reevaluate these estimates regularly. Although we believe our current estimates are reasonable, a change in the time period used for forecasting our liability costs, the actual number of future claims brought against us, the cost of resolving these claims, the likelihood of payment by, and the solvency of, insurers and the amount of remaining insurance available could be substantially different than our estimates, and future revaluation of our liabilities and insurance recoverables could result in material adjustments to these estimates, any of which could materially and adversely affect our financial condition, results of operations and cash flow. In addition, the company incurs defense costs related to those claims, a portion of which has historically been reimbursed by our insurers. We also incur litigation costs in connection with actions against certain of the subsidiaries' insurers relating to insurance coverage. While these costs may be significant, we may not be able to predict the amount or duration of such costs. Additionally, we may experience delays in receiving reimbursement from insurers, during which time we may be required to pay cash for settlement or legal defense costs. Any increase in the actual number of future claims brought against us, the defense costs of resolving these claims, the cost of pursuing claims against our insurers, the likelihood and timing of payment

by, and the solvency of, insurers and the amount of remaining insurance available, could materially and adversely affect our financial condition, results of operations and cash flow.

Our international operations are subject to the laws and regulations of the United States and many foreign countries. Failure to comply with these laws may affect our ability to conduct business in certain countries and may affect our financial performance.

We are subject to a variety of laws regarding our international operations, including the Foreign Corrupt Practices Act and regulations issued by U.S. Customs and Border Protection, the Bureau of Industry and Security, and the regulations of various foreign governmental agencies. We cannot predict the nature, scope or effect of future regulatory requirements to which our international sales and manufacturing operations might be subject or the manner in which existing laws might be administered or interpreted. Future regulations could limit the countries in which some of our products may be manufactured or sold, or could restrict our access to, and increase the cost of obtaining, products from foreign sources. In addition, actual or alleged violations of these laws could result in enforcement actions and financial penalties that could result in substantial costs.

Our foreign subsidiaries have done and may continue to do business in countries subject to U.S. sanctions and embargoes, including Iran and Syria, and we have limited managerial oversight over those activities. Failure to comply with these sanctions and embargoes may result in enforcement or other regulatory actions.

From time to time, certain of our foreign subsidiaries sell products to companies and entities located in, or controlled by the governments of, certain countries that are or have previously been subject to sanctions and embargoes imposed by the U.S. government and/or the United Nations, such as Iran and Syria. With the exception of the U.S. sanctions against Cuba, the applicable sanctions and embargoes generally do not prohibit our foreign subsidiaries from selling non-U.S.-origin products and services in those countries. However, Colfax Corporation, its U.S. personnel and its domestic subsidiaries, as well as employees of our foreign subsidiaries who are U.S. citizens, are prohibited from participating in, approving or otherwise facilitating any aspect of the business activities in those countries. These constraints may negatively affect the financial or operating performance of such business activities. We cannot be certain that our attempts to comply with U.S. sanction laws and embargoes will be effective, and as a consequence we may face enforcement or other actions if our compliance efforts are not effective. Actual or alleged violations of these laws could result in substantial fines or other sanctions which could result in substantial costs. In addition, Iran and Syria currently are identified by the State Department as state sponsors of terrorism, and may be subject to increasingly restrictive sanctions. Because certain of our foreign subsidiaries have contact with and transact business in such countries, including sales to enterprises controlled by agencies of the governments of such countries, our reputation may suffer due to our association with these countries, which may have a material adverse effect on the price of our common stock. Further, certain U.S. states and municipalities have recently enacted legislation regarding investments by pension funds and other retirement systems in companies that have business activities or contacts with countries that have been identified as state sponsors of terrorism and similar legislation may be pending in other states. As a result, pension funds and other retirement systems may be subject to reporting requirements with respect to investments in companies such as ours or may be subject to limits or prohibitions with respect to those investments that may have a material adverse effect on the price of our shares.

In addition, one of our foreign subsidiaries made a small number of sales from 2003 through 2007 totaling approximately \$60,000 in the aggregate to two customers in Cuba which may have been made in violation of regulations of the U.S. Treasury Department's Office of Foreign Assets Control, or OFAC. Cuba is also identified by the U.S. State Department as a state sponsor of terrorism. We have submitted a disclosure report to OFAC regarding these transactions. On December 5, 2008, the Company executed a tolling agreement with the OFAC extending the statute of limitations for the investigation until May 1, 2011. As a result of these sales, we may be subject to fines or other sanctions.

If we fail to comply with export control regulations, we could be subject to substantial fines or other sanctions.

Some of our products manufactured or assembled in the United States are subject to the U.S. Export Administration Regulations, administered by the U.S. Department of Commerce, Bureau of Industry and Security, which require that we obtain an export license before we can export such products to specified countries. Additionally, some of our products are subject to the International Traffic in Arms Regulations, which restrict the export of certain military or intelligence-related items, technologies and services to non-U.S. persons. Failure to comply with these laws could harm our business by subjecting us to sanctions by the U.S. government, including substantial monetary penalties, denial of export privileges and debarment from U.S. government contracts.

Approximately 49% of our employees are represented by foreign trade unions. If the representation committees responsible for negotiating with these unions on our behalf are unsuccessful in negotiating new and acceptable agreements when the existing agreements with our employees covered by the unions expire or if the foreign trade unions chose not to support our restructuring programs, we could experience business disruptions or increased costs.

As of December 31, 2010, we had 1,524 employees in foreign locations. In certain countries, labor and employment laws are more restrictive than in the U.S. and, in many cases, grant significant job protection to employees, including rights on termination of employment. In Germany, Sweden and the Netherlands, by law, some of our employees are represented by trade unions in these jurisdictions, which subjects us to employment arrangements very similar to collective bargaining agreements. If our employees represented by foreign trade unions were to engage in a strike, work stoppage or other slowdown in the future, we could experience a significant disruption of our operations. Such disruption could interfere with our business operations and could lead to decreased productivity, increased labor costs and lost revenue.

Although we have not experienced any material recent strikes or work stoppages, we cannot offer any assurance that the representation committees that negotiate with the foreign trade unions on our behalf will be successful in negotiating new collective bargaining agreements or other employment arrangements when the current ones expire. Furthermore, future labor negotiations could result in significant increases in our labor costs.

Our manufacturing business is subject to the possibility of product liability lawsuits, which could harm our business.

In addition to the asbestos-related liability claims described above, as the manufacturer of equipment for use in industrial markets, we face an inherent risk of exposure to other product liability claims. Although we maintain quality controls and procedures, we cannot be sure that our products will be free from defects. In addition, some of our products contain components manufactured by third parties, which may also have defects. We maintain insurance coverage for product liability claims. Our insurance policies have limits, however, that may not be sufficient to cover claims made against us. In addition, this insurance may not continue to be available to us at a reasonable cost. With respect to components manufactured by third-party suppliers, the contractual indemnification that we seek from our third-party suppliers may be limited and thus insufficient to cover claims made against us. If our insurance coverage or contractual indemnification is insufficient to satisfy product liability claims made against us, the claims could have an adverse effect on our business and financial condition. Even claims without merit could harm our reputation, reduce demand for our products, cause us to incur substantial legal costs and distract the attention of our management.

As a manufacturer, we are subject to a variety of environmental and health and safety laws for which compliance could be costly. In addition, if we fail to comply with such laws, we could incur liability that could result in penalties and costs to correct any non-compliance.

Our business is subject to international, federal, state and local environmental and safety laws and regulations, including laws and regulations governing emissions of: regulated air pollutants; discharges of wastewater and storm water; storage and handling of raw materials; generation, storage, transportation and disposal of regulated wastes; and worker safety. These requirements impose on our business certain responsibilities, including the obligation to obtain and maintain various environmental permits. If we were to fail to comply with these requirements or fail to obtain or maintain a required permit, we could be subject to penalties and be required to undertake corrective action measures to achieve compliance. In addition, if our noncompliance with such regulations were to result in a release of hazardous materials to the environment, such as soil or groundwater, we could be required to remediate such contamination, which could be costly. Moreover, noncompliance could subject us to private claims for property damage or personal injury based on exposure to hazardous materials or unsafe working conditions. Changes in applicable requirements or stricter interpretation of existing requirements may result in costly compliance requirements or otherwise subject us to future liabilities.

As the present or former owner or operator of real property, or generator of waste, we could become subject to liability for environmental contamination, regardless of whether we caused such contamination.

Under various federal, state and local laws, regulations and ordinances, and, in some instances, international laws, relating to the protection of the environment, a current or former owner or operator of real property may be liable for the cost to remove or remediate contamination on, under, or released from such property and for any damage to natural resources resulting from such contamination. Similarly, a generator of waste can be held responsible for contamination resulting from the treatment or disposal of such waste at any off-site location (such as a landfill), regardless of whether the generator arranged for the treatment or disposal of the waste in compliance with applicable laws. Costs associated with liability for removal or remediation of contamination or damage to natural resources could be substantial and liability under these laws may attach without regard to whether the responsible party knew of, or was responsible for, the presence of the contaminants. In addition, the liability may be joint and several. Moreover, the presence of contamination or the failure to remediate contamination at our properties, or properties for which we are deemed responsible, may expose us to liability for property damage or personal injury, or materially adversely affect our ability to sell our real property interests or to borrow using the real property as collateral. We cannot be sure that we will not be subject to environmental liabilities in the future as a result of historic or current operations that have resulted or will result in contamination.

Failure to maintain and protect our trademarks, trade names and technology may affect our operations and financial performance.

The market for many of our products is, in part, dependent upon the goodwill engendered by our trademarks and trade names. Trademark protection is therefore material to a portion of our business. The failure to protect our trademarks and trade names may have a material adverse effect on our business, financial condition and operating results. Litigation may be required to enforce our intellectual property rights, protect our trade secrets or determine the validity and scope of proprietary rights of others. Any action we take to protect our intellectual property rights could be costly and could absorb significant management time and attention. As a result of any such litigation, we could lose any proprietary rights we have. In addition, it is possible that others will independently develop technology that will compete with our patented or unpatented technology. The development of new technologies by competitors that may compete with our technologies could reduce demand for our products and affect our financial performance.

The loss of key leadership could have a material adverse effect on our ability to run our business.

We may be adversely affected if we lose members of our senior leadership. We are highly dependent on our senior leadership team as a result of their expertise. During 2010 we added several new members to our senior leadership team, including Clay H. Kiefaber, our President and Chief Executive Officer, and C. Scott Brannan, our Senior Vice President, Finance and Chief Financial Officer. The loss of key leadership or the inability to attract, retain and motivate sufficient numbers of qualified management personnel could have a material adverse effect on us and our business.

Some of our stockholders may exert significant influence over us.

Currently, two of our stockholders, Mitchell P. Rales and Steven M. Rales, together, and through an entity wholly owned by them, hold approximately 42% of our outstanding common stock. The level of ownership of these stockholders, and the service of Mitchell Rales as chairman of our board of directors, enables them to exert significant influence over all matters involving us, including matters presented to our stockholders for approval, such as election and removal of our directors and change of control transactions. This concentration of ownership and voting power may also have the effect of delaying or preventing a change in control of our company and could prevent stockholders from receiving a premium over the market price if a change in control is proposed. The interests of these persons may

not coincide with the interests of the other holders of our common stock with respect to our operations or strategy.

The market price of our common stock may experience a high level of volatility.

The market price for our common stock has experienced a high level of volatility and may continue to do so in the future. During the period from our initial public offering (IPO) to December 31, 2010, our common stock traded between \$5.33 and \$28.35 per share. At any given time, you may not be able to sell your shares at a price that you think is acceptable. The market liquidity for our stock is relatively low. As of December 31, 2010, we had 43,413,553 shares of common stock outstanding. The average daily trading volume in our common stock during the period from January 1, 2010 to December 31, 2010 was approximately 140,000 shares. Although a more active trading market may develop in the future, the limited market liquidity for our stock may affect your ability to sell at a price that is satisfactory to you. Stock markets in general have experienced extreme volatility that has often been unrelated to the operating performance of a particular company. These broad fluctuations may adversely affect the trading price of our common stock, regardless of our operating performance.

Provisions in our charter documents and Delaware law may delay or prevent an acquisition of our company, which could decrease the value of your shares.

Our amended and restated certificate of incorporation, amended and restated bylaws, and Delaware law contain provisions that may make it difficult for a third-party to acquire us without the consent of our board of directors. These provisions include prohibiting stockholders from taking action by written consent, prohibiting special meetings of stockholders called by stockholders and prohibiting stockholder nominations and approvals without complying with specific advance notice requirements. In addition, our board of directors has the right to issue preferred stock without stockholder approval, which our board of directors could use to effect a rights plan or “poison pill” that could dilute the stock ownership of a potential hostile acquirer and may have the effect of delaying, discouraging or preventing an acquisition of our company. Delaware law also imposes some restrictions on mergers and other business combinations between us and any holder of 15% or more of our outstanding voting stock. Although Mitchell Rales and Steven Rales, both individually and in the aggregate, hold more than 15% of our outstanding voting stock, this provision of Delaware law does not apply to them.

There may be limitations on our ability to fully utilize our net operating loss carryforwards and other U.S. deferred tax assets in future periods.

We may not be able to generate sufficient future U.S. taxable income to utilize our U.S. net operating loss carryforwards (NOLs) and/or other net U.S. deferred tax assets. Our net U.S. deferred tax assets, including U.S. NOLs and net of valuation allowances, are \$54.8 million as of December 31, 2010. If sufficient future taxable income and/or available tax planning strategies are not available to utilize some or all of these deferred tax assets, additional valuation allowances may be recorded which would negatively affect our results of operations.

Our results of operations could vary as a result of the methods, estimates and judgments we use in applying our accounting policies.

The methods, estimates and judgments we use in applying our accounting policies have a significant impact on our results of operations (see “Critical Accounting Policies and Estimates” in Part II, Item 7 of this Form 10-K). Such methods, estimates and judgments are, by their nature, subject to substantial risks, uncertainties and assumptions, and factors may arise over time that lead us to change our methods, estimates and judgments. Changes in those methods, estimates and judgments could significantly affect our results of operations.

Any impairment in the value of our intangible assets, including goodwill, would negatively affect our operating results and total capitalization.

Our total assets reflect substantial intangible assets, primarily goodwill. The goodwill results from our acquisitions, representing the excess of cost over the fair value of the net assets we have acquired. We assess at least annually whether there has been impairment in the value of our intangible assets. If future operating performance at one or more of our business units were to fall significantly below current levels, if competing or alternative technologies emerge, or if market conditions for businesses acquired declines, we could incur, under current applicable accounting rules, a non-cash charge to operating earnings for goodwill impairment. Any determination requiring the write-off of a significant portion of unamortized intangible assets would negatively affect our results of operations and total capitalization, the effect of which could be material.

Our defined benefit pension plans are subject to financial market risks that could adversely affect our operating results, financial condition and cash flow.

Our defined benefit pension plan obligations are affected by changes in market interest rates and the majority of plan assets are invested in publicly traded debt and equity securities, which are affected by market risks. Significant changes in market interest rates, decreases in the fair value of plan assets and investment losses or lack of expected investment gains on plan assets may adversely impact our future operating results, financial condition and cash flow.

## ITEM 2.

## PROPERTIES

We have 14 principal production facilities in eight countries. The following table lists our primary facilities at December 31, 2010, indicating the location, square footage, whether the facilities are owned or leased, and principal use.

Location	Sq. Footage	Owned/Leased	Principal Use
Fulton, Maryland	7,445	Leased	Corporate headquarters
Richmond, Virginia	12,050	Leased	Former corporate headquarters
Hamilton, New Jersey	2,200	Leased	Subsidiary headquarters
Columbia, Kentucky	75,000	Owned	Production
Warren, Massachusetts	147,000	Owned	Production
Monroe, North Carolina	187,000	Owned	Production
Houston, Texas	25,000	Leased	Production
Portland, Maine	61,000	Leased	Production
Tours, France	33,000	Leased	Production
Bottrop, Germany	55,000	Owned	Production
Gottmadingen, Germany	38,000	Leased	Production
Radolfzell, Germany	350,000	Owned	Production
Utrecht, Netherlands	50,000	Owned	Production

## ITEM 3.

## LEGAL PROCEEDINGS

Discussion of legal matters is incorporated by reference to Part II, Item 8, Note 18, "Commitments and Contingencies," in the Notes to the Consolidated Financial Statements.

## ITEM 4.

[REMOVED AND RESERVED]

## EXECUTIVE OFFICERS OF THE REGISTRANT

Set forth below are the names, ages, positions and experience of our executive officers. All of our executive officers hold office at the pleasure of our Board of Directors.

Name	Age	Position
Clay H. Kiefaber	55	President and Chief Executive Officer and Director
William E. Roller	48	Executive Vice President, Colfax Fluid Handling
C. Scott Brannan	52	Senior Vice President, Finance, Chief Financial Officer and Treasurer
Daniel A. Pryor	42	Senior Vice President, Strategy and Business Development
A. Lynne Puckett	49	Senior Vice President, General Counsel and Secretary

Clay H. Kiefaber became President, Chief Executive Officer in January 2010. Mr. Kiefaber has served on the Colfax Board of Directors since the Company's IPO in 2008. Before joining Colfax as President and Chief Executive Officer in 2010, he spent nearly 20 years in increasingly senior executive positions at Masco Corporation. Most recently, he was a Group President, where he was responsible for a \$2.8 billion group of architectural coatings, windows, and spa business units. Prior to becoming a Group President at Masco, Mr. Kiefaber was Group Vice President of Masco Builder Cabinet Group. He previously spent 14 years in increasingly senior positions in Masco's Merillat Industries subsidiary. Mr. Kiefaber holds an M.B.A. degree from the University of Colorado and a B.A. degree from Miami University.

William E. Roller has served as our Executive Vice President, Colfax Fluid Handling since November 2010. He most recently served as Executive Vice President, Colfax Americas and was responsible for Colfax's business in the Americas as well as the global oil & gas and defense solutions organizations. He joined Colfax in 1999 as General Manager, Imo Pump. In addition to Imo, he managed Zenith Pump, Lubrication Systems Company and Baric Group upon the acquisition of those businesses. He joined Colfax from Precision Auto Care, Inc. where he was Senior Vice President of Manufacturing and Distribution for 2 years. From 1991 until 1997, Mr. Roller worked for AMF Industries in several increasingly responsible manufacturing roles. Previous to AMF, he spent 4 years with FMC Corporation in various manufacturing roles. Mr. Roller is a graduate of the Virginia Polytechnic Institute and State University, with a BS in Chemical Engineering and an MBA from the University of Virginia Darden School.

C. Scott Brannan has been the Senior Vice President, Finance, Chief Financial Officer and Treasurer since October 2010. Mr. Brannan served on the Colfax Board of Directors and was Chairman of the Audit Committee from 2008 to September 2010. Prior to joining Colfax in his current role, he was a partner at Aronson & Company, a public accounting firm, from 2003 to 2010. He was also previously employed at Danaher Corporation for 12 years in roles of increasing responsibility, including Chief Accounting Officer, Controller and Vice President of Administration. Prior to Danaher, he spent 8 years with Arthur Andersen & Co. He holds bachelors and masters degrees in accounting from Loyola University Maryland and is a certified public accountant.

Daniel A. Pryor has served as our Senior Vice President, Strategy and Business Development since January 2011. Prior to joining Colfax, he was a Partner and Managing Director with The Carlyle Group, a global alternative asset manager, where he focused on industrial leveraged buyouts and led numerous portfolio company and follow-on acquisitions. While at Carlyle he served on the boards of portfolio companies Veyance Technologies, Inc., John Maneely Co., and HD Supply Inc. Prior to Carlyle, he spent 11 years at Danaher Corporation in roles of increasing responsibility, most recently as Vice President – Strategic Development. Mr. Pryor earned his MBA from Harvard Business School and his BA in Economics from Williams College.

A. Lynne Puckett has served as our Senior Vice President, General Counsel and Secretary since September 2010. Prior to joining Colfax, she was a Partner with the law firm of Hogan Lovells U.S. LLP from 1999 to 2010. Her experience includes a broad range of corporate and transactional matters, including mergers and acquisitions, venture capital financings, debt and equity offerings, and general corporate and securities law matters. Before entering the practice of law, Ms. Puckett worked for the U.S. Central Intelligence Agency and a major U.S. defense contractor. Ms. Puckett holds a J.D. from the University of Maryland School of Law and a B.S. degree from James Madison University.

## PART II

### ITEM MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS 5. AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock began trading on the New York Stock Exchange under the symbol CFX on May 8, 2008. As of January 31, 2011, there were approximately 4,996 holders of record of our common stock. The high and low sales prices per share of our common stock, as reported on the New York Stock Exchange, for the fiscal periods presented are as follows:

	2010		2009	
	High	Low	High	Low
First Quarter	\$ 12.46	\$ 10.44	\$ 13.22	\$ 5.33
Second Quarter	\$ 13.97	\$ 10.00	\$ 9.48	\$ 6.05
Third Quarter	\$ 15.17	\$ 10.17	\$ 12.66	\$ 7.21

Edgar Filing: Colfax CORP - Form 10-K

Fourth Quarter	\$ 19.04	\$ 14.46	\$ 13.91	\$ 10.22
----------------	----------	----------	----------	----------

We have not paid any dividends on our common stock since inception, and we do not anticipate the declaration or payment of dividends at any time in the foreseeable future. Our credit agreement limits the amount of cash dividends and common stock repurchases the Company may make to a total of \$10 million annually.

Performance Graph

Issuer Purchase of Equity Securities

On November 4, 2008, the Company's board of directors authorized the repurchase of up to \$20 million (up to \$10 million per year in 2008 and 2009) of the Company's common stock on the open market or in privately negotiated transactions. The repurchase program was to be conducted pursuant to SEC Rule 10b5-1. The timing and amount of shares repurchased was determined by the Share Repurchase Committee, constituting three members of the Company's board of directors, based on its evaluation of market conditions and other factors. There were no common stock repurchases during 2010.

## ITEM 6. SELECTED FINANCIAL DATA

(in thousands, except per share information)

	Year ended December 31,				
	2010	2009	2008	2007	2006
<b>Statement of Operations Data:</b>					
Net sales	\$541,987	\$525,024	\$604,854	\$506,305	\$393,604
Cost of sales	350,579	339,237	387,667	330,714	256,806
Gross profit	191,408	185,787	217,187	175,591	136,798
Selling, general and administrative expenses	119,426	112,503	124,105	97,426	78,964

Income from continuing operations	16,215	23,797	531	65,646	2,198
Net income (1)	\$16,215	\$23,797	\$531	\$65,646	\$801
<b>Net income (loss) per share from continuing operations -- basic and diluted</b>					
	\$0.37	\$0.55	\$(0.08)	\$1.82	\$0.10

	December 31,				
	2010	2009	2008	2007	2006
<b>Balance Sheet Data:</b>					
Cash and cash equivalents	\$60,542	\$49,963	\$28,762	\$48,093	\$7,608
Goodwill and intangibles, net	200,636	175,370	175,210	181,517	150,395
Asbestos insurance asset, including current portion	374,351	389,449	304,015	305,228	297,106
Total assets	1,022,077	1,006,301	907,550	899,522	792,018
Asbestos liability, including current portion	429,651	443,769	357,258	376,233	388,920
Total debt, including current portion (2)	82,500	91,485	97,121	206,493	188,720

(1) Includes net loss from discontinued operations of \$1.4 million in the year ended December 31, 2006.

(2) See Note 12 to our Consolidated Financial Statements for information regarding the refinancing of the Company's debt in conjunction with the IPO in May 2008.

We completed the acquisitions of Baric Group in 2010, PD-Technik in 2009 and Fairmount and LSC in 2007. See Item 1. Business and Note 4 to our Consolidated Financial Statements for further information.

ITEM 7.MANAGEMENT’S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management’s Discussion and Analysis of Financial Condition and Results of Operations (MD&A) is designed to provide a reader of the Company’s financial statements with a narrative from the perspective of Company management. The Company’s MD&A is divided into four main sections:

- Overview
- Results of Operations
- Liquidity and Capital Resources
- Critical Accounting Policies

The following discussion of our financial condition and results of operations should be read together with “Selected Financial and Data,” “Risk Factors” and the financial statements and related notes included elsewhere in this Form 10-K. The following discussion includes forward-looking statements. For a discussion of important factors that could cause actual results to differ materially from the results referred to in the forward-looking statements, see “Special Note Regarding Forward-Looking Statements.”

Overview

Colfax Corporation is a global supplier of a broad range of fluid handling products, including pumps, fluid handling systems and controls, and specialty valves. We believe that we are a leading manufacturer of rotary positive displacement pumps, which include screw pumps, gear pumps and progressive cavity pumps. We design and engineer our products to high quality and reliability standards for use in critical fluid handling applications where performance is paramount. We also offer customized fluid handling solutions to meet individual customer needs based on our in-depth technical knowledge of the applications in which our products are used.

Our products are marketed principally under the Allweiler, Baric, Fairmount, Houttuin, Imo, LSC, Portland Valve, Tushaco, Warren and Zenith brand names. We believe that our brands are widely known and have a premium position in our industry. Allweiler, Houttuin, Imo and Warren are among the oldest and most recognized brands in the markets in which we participate, with Allweiler dating back to 1860. We have a global manufacturing footprint, with production facilities in Europe, North America and Asia, as well as worldwide sales and distribution channels.

We employ a comprehensive set of tools that we refer to as the Colfax Business System, or CBS. CBS is a disciplined strategic planning and execution methodology designed to achieve excellence and world-class financial performance in all aspects of our business by focusing on the Voice of the Customer and continuously improving quality, delivery and cost. Modeled on the Danaher Business System, CBS focuses on conducting root-cause analysis, developing process improvements and implementing sustainable systems. Our approach addresses the entire business, not just manufacturing operations.

We currently serve markets that have a need for highly engineered, critical fluid handling solutions and are global in scope. Our strategic markets include:

Strategic Markets	Applications
Commercial Marine	Fuel oil transfer; lubrication; water and wastewater handling; cargo handling
Oil and Gas	

Edgar Filing: Colfax CORP - Form 10-K

	Crude oil gathering; pipeline services; unloading and loading; rotating equipment lubrication; lube oil purification
Power Generation	Fuel unloading, transfer, burner and injection; rotating equipment lubrication
Global Defense	Fuel oil transfer; oil transport; water and wastewater handling; firefighting; fluid control
General Industrial	Machinery lubrication; hydraulic elevators; chemical processing; pulp and paper processing; food and beverage processing

We serve a global customer base across multiple markets through a combination of direct sales and marketing associates and third-party distribution channels. Our customer base is highly diversified and includes commercial, industrial and government customers.

Our business began in 1995 with the intention to acquire, manage and create a world-class industrial manufacturing company. We seek to acquire businesses with leading market positions and brands that exhibit strong cash flow generation potential. With our management expertise and the introduction of CBS into our acquired businesses, we pursue growth in revenues, improvements in operating margins and increasing cash flow.

## Outlook

We believe that we are well positioned to grow our business organically over the long term by enhancing our product offerings and expanding our customer base in our strategic markets. As a late cycle business, we began to recover from the global economic downturn midway through 2010. This recovery was evidenced by increases in both sales and orders in the third and fourth quarters of 2010 over the comparable 2009 quarters. Nonetheless, project delivery push-outs as well as order cancellations may continue in 2011. We will continue to monitor general global economic conditions and expect the following market conditions:

In the commercial marine industry, we expect international trade and demand for crude oil and other commodities as well as the age of the global merchant fleet to continue to create demand for new ship construction over the long term. We also believe the increase in the size of the global fleet will create an opportunity to supply aftermarket parts and service. In addition, we believe pending and future environmental regulations will enhance the demand for our products. Based on the modest increase in orders in 2010 and our current backlog, we expect sales in 2011 to be similar to 2010 levels. We are also likely to have additional order cancellations as well as delivery date extensions in the near term.

In the crude oil industry, we expect long term activity to remain favorable as capacity constraints and global demand drive further development of heavy oil fields. In pipeline applications, we expect demand for our highly efficient products to remain strong as our customers continue to focus on total cost of ownership. In refinery applications, projects that were deferred due to weak economic conditions have been released for quoting. We expect sales and orders to be at significantly higher levels in 2011 than in 2010.

In the power generation industry, we expect activity in Asia and the Middle East to remain solid as economic growth and fundamental undersupply of power generation capacity continue to drive investment in energy infrastructure projects. In the world's developed economies, we expect efficiency improvements will continue to drive demand. Nevertheless, in 2011, we expect both sales and orders to be at significantly lower levels than 2010, due to the conclusion of contractual obligations of our foreign subsidiaries to provide products to certain customers in the Middle East.

In the U.S., we expect Congress to continue to appropriate funds for new ship construction as older naval vessels are decommissioned. We also expect increased demand for integrated fluid handling systems for both new ship platforms and existing ship classes that reduce operating costs and improve efficiency as the U.S. Navy seeks to man vessels with fewer personnel. Outside of the U.S., we expect other sovereign nations will continue to expand their fleets as they address national security concerns. We expect modest growth in sales during 2011 and expect orders to decline as a result of significant growth in orders in 2010 and the timing of projects.

In the general industrial market, we expect long-term demand to be driven by capital investment. While this market is very diverse, orders in 2010 increased significantly compared to 2009 in both Europe and North America. We expect growth in both orders and sales in 2011.

Our global manufacturing sales and distribution network allows us to target fast growing regions throughout the world. We have production and distribution facilities in India and China and opened a Middle East sales and engineering office in Bahrain in 2009. We intend to leverage these investments to grow our market share in these emerging markets and plan to continue to invest in sales and marketing resources to increase our overall coverage.

We will also continue to target aftermarket opportunities in our strategic markets as we generally are able to generate higher margins on aftermarket parts and service than on foremarket opportunities. For the year ended December 31, 2010, aftermarket sales and services represented approximately 24% of our revenues.

We also expect to continue to grow as a result of strategic acquisitions. We believe that the extensive experience of our leadership team in acquiring and effectively integrating acquisition targets should enable us to capitalize on opportunities in the future.

## Results of Operations

### Key Performance Measures

The discussion of our results of operations that follows focuses on some of the key financial measures that we use to evaluate our business. We evaluate our business using several measures, including net sales, orders and order backlog. Our sales, orders and backlog are affected by many factors, particularly the impact of acquisitions, the impact of fluctuating foreign exchange rates and change from our existing businesses which may be driven by market conditions and other factors. To facilitate the comparison between reporting periods, we describe the impact of each of these three factors, to the extent they impact the periods presented, on our sales, orders and backlog in tabular format under the heading "Sales and Orders."

Orders and order backlog are highly indicative of our future revenue and thus are key measures of anticipated performance. Orders consist of contracts for products or services from our customers, net of cancellations. Order backlog consists of unfilled orders.

### Items Affecting the Comparability of Our Reported Results

Our financial performance and growth are driven by many factors, principally our ability to serve increasingly global markets, fluctuations in the relationship of foreign currencies to the U.S. dollar, the general economic conditions within our five strategic markets, the global economy and capital spending levels, the availability of capital, our estimates concerning the availability of insurance proceeds to cover asbestos litigation expenses and liabilities, the amounts of asbestos liabilities and litigation expenses, the impact of restructuring initiatives, our ability to pass through cost increases through pricing, the impact of sales mix, and our ability to continue to grow through acquisitions. These key factors have impacted our results of operations in the past and are likely to affect them in the future.

### Global Operations

Our products and services are available worldwide. The manner in which our products and services are sold differs by region. Most of our sales in non-U.S. markets are made by subsidiaries located outside the United States, though we also sell into non-U.S. markets through various representatives and distributors and directly from the U.S. In countries with low sales volumes, we generally sell through representatives and distributors. For the year ended December 31, 2010, approximately 75% of our sales were shipped to locations outside of the U.S. Accordingly, we are affected by levels of industrial activity and economic and political factors in countries throughout the world. Our ability to grow and our financial performance will be affected by our ability to address a variety of challenges and opportunities that are a consequence of our global operations, including efficiently utilizing our global sales, manufacturing and distribution capabilities, the expansion of market opportunities in Asia, successfully completing global strategic acquisitions, and engineering innovative new product applications for end users in a variety of geographic markets. However, we believe that our geographic, end market and product diversification may limit the impact that any one country or economy could have on our consolidated results.

### Foreign Currency Fluctuations

A significant portion of our sales, approximately 66% for the year ended December 31, 2010, are derived from operations outside the U.S., with the majority of those sales denominated in currencies other than the U.S. dollar, especially the Euro. Because much of our manufacturing and employee costs are outside the U.S., a significant portion of our costs are also denominated in currencies other than the U.S. dollar. Changes in foreign exchange rates can impact our results and are quantified when significant in our discussion of our operations.

### Economic Conditions in Strategic Markets

Our organic growth and profitability strategy focuses on five strategic markets: commercial marine, oil and gas, power generation, global defense and general industrial. Demand for our products depends on the level of new capital investment and planned maintenance by our customers. The level of capital expenditures depends, in turn, on the general economic conditions within that market as well as access to capital at reasonable cost. While demand within each of these strategic markets can be cyclical, the diversity of these markets may limit the impact of a downturn in any one of these markets on our consolidated results.

## Pricing

We believe our customers place a premium on quality, reliability, availability, design and application engineering support. Our highly engineered fluid handling products typically have higher margins than products with commodity-like qualities. However, we are sensitive to price movements in our raw materials supply base. Our largest material purchases are for components and raw materials consisting of steel, iron, copper and aluminum. Historically, we have been generally successful in passing raw material price increases on to our customers. While we seek to take actions to manage this risk, including commodity hedging where appropriate, such increased costs may adversely impact earnings.

## Sales and Cost Mix

Our profit margins vary in relation to the relative mix of many factors, including the type of product, the geographic location in which the product is manufactured, the end market for which the product is designed, and the percentage of total revenue represented by aftermarket sales and services. Aftermarket business, including spare parts and other value added services, is generally a higher margin business and is a significant component of our profitability.

## Strategic Acquisitions

We complement our organic growth with strategic acquisitions. Acquisitions can significantly affect our reported results and can complicate period to period comparisons of results. As a consequence, we report the change in our sales between periods both from existing and acquired businesses. We intend to continue to pursue acquisitions of complementary businesses that will broaden our product portfolio, expand our geographic footprint or enhance our position within our strategic markets.

On August 19, 2010, we completed the acquisition of Baric Group (“Baric”), a supplier of highly engineered fluid handling systems primarily for lubrication applications, with its primary operations based in Blyth, United Kingdom.

On August 31, 2009, we completed the acquisition of PD-Technik Ingenieurbüro GmbH (“PD-Technik”), a provider of marine aftermarket related products and services located in Hamburg, Germany. The acquisition of PD-Technik supports our marine aftermarket growth initiatives, broadening our served market as well as service capabilities.

## Restructuring and Other Related Charges

The Company initiated a series of restructuring actions beginning in 2009 in response to then current and expected future economic conditions. As a result, for the years ended December 31, 2010 and 2009, the Company recorded pre-tax restructuring and other related costs of \$10.3 million and \$18.2 million, respectively. The costs incurred in the year ended December 31, 2010 include \$2.2 million of termination benefits, including \$0.6 million of non-cash stock-based compensation expense, related to the departure of the Company’s former President and Chief Executive Officer in January of 2010. Additionally, the costs incurred in the year ended December 31, 2010 include \$1.3 million of termination benefits related to the October 2010 departures of the Company’s former Chief Financial Officer and General Counsel. The costs incurred in the year ended December 31, 2009 include a \$0.6 million non-cash asset impairment charge related to closure of a repair facility.

As of December 31, 2010, excluding additions from businesses acquired in 2009 and 2010, we have reduced our company-wide workforce by 237 associates from December 31, 2008. Additionally, through the second quarter of 2010, we participated in a German government-sponsored furlough program in which the government paid the wage-related costs for participating associates. We realized savings of approximately \$25 million in 2010 from the restructuring initiatives implemented in 2009 and 2010, primarily reflecting lower employee costs.

The Company has relocated its Richmond, Virginia corporate headquarters to the Columbia, Maryland area, in order to provide improved access to international travel and to its key advisors. In connection with the move, the Company has incurred \$0.6 million of employee termination benefit costs, reflected in restructuring and other related charges, and \$0.4 million of other relocation related costs in 2010, which are reflected in selling, general and administrative expenses. We expect to incur an additional \$1.5 million of employee termination benefit costs, operating lease exit costs and other relocation expenses related to the headquarters relocation in the first six months of 2011.

### IPO-related Costs

Results for the year ended December 31, 2008 include \$57.0 million of nonrecurring costs associated with our IPO during the second quarter. This amount includes \$10.0 million of share-based compensation and \$27.8 million of special cash bonuses paid under previously adopted executive compensation plans as well as \$2.8 million of employer payroll taxes and other related costs. It also includes \$11.8 million to reimburse the selling stockholders for the underwriting discount on the shares sold by them as well as the write-off of \$4.6 million of deferred loan costs associated with the early termination of a credit facility.

### Legacy Legal Adjustment

Selling, general and administrative expenses for the year ended December 31, 2008 include a \$4.1 million increase to legal reserves related to a non-asbestos legal matter that arose from the sale and subsequent repair of a product by a division of a subsidiary that was divested prior to our acquisition of the subsidiary. This legacy legal case was settled during the third quarter of 2008.

### Asbestos Liability and Defense Costs (Income)

Our financial results have been, and will likely in the future be, affected by our asbestos liabilities and the availability of insurance to cover these liabilities and defense costs related to asbestos personal injury litigation against two of our subsidiaries, as well as costs arising from our legal action against our insurers. Assessing asbestos liabilities and insurance assets requires judgments concerning matters such as the uncertainty of litigation, anticipated outcome of settlements, the number and cost of pending and future claims, the outcome of legal action against our insurance carriers, and their continued solvency. For a further discussion of these estimates and how they may affect our future results, see “—Critical Accounting Estimates—Asbestos Liabilities and Insurance Assets.”

Asbestos liability and defense costs (income) is comprised of projected indemnity cost, changes in the projected asbestos liability, changes in the probable insurance recovery of the projected asbestos-related liability, changes in the probable recovery of asbestos liability and defense costs paid in prior periods, and actual defense costs expensed in the period.

The table below presents asbestos liability and defense costs (income) for the periods indicated:

(Amounts in millions)	Year ended December 31,		
	2010	2009	2008
Asbestos liability and defense costs (income)	\$ 7.9	\$ (2.2 )	\$ (4.8 )

Asbestos liability and defense costs were \$7.9 million for the year ended December 31, 2010 compared to income of \$2.2 million for the year ended December 31, 2009. The increase in asbestos liability and defense costs was primarily attributable to a net pre-tax gain of \$7.8 million recorded in 2009, comprised of a \$19.4 million gain to increase the insurance asset as a result of favorable court rulings in October and December of 2009 concerning allocation methodology, partially offset by an \$11.6 million charge to increase asbestos-related liabilities by \$111.3 million, offset by an increase to expected insurance recoveries of \$99.7 million arising from a revision to our 15-year estimate of asbestos-related liabilities. Additionally, the Company recorded charges totaling \$4.0 million in the third and fourth quarters of 2010 as a result of developments in the litigation, which was partially offset by a \$0.7 million gain resulting from a settlement received from an insolvent carrier.

Asbestos liability and defense income was \$2.2 million for the year ended December 31, 2009 compared to \$4.8 million for the year ended December 31, 2008. The decrease in asbestos liability and defense income relates primarily to the favorable effect of one-time items in 2008 exceeding the favorable net effect of one-time items in 2009. One-time items in 2008 included a \$7.0 million gain resulting from resolution of a coverage dispute with a primary insurer concerning certain pre-1966 insurance policies, as well as a \$2.3 million gain from a change in estimate of our future asset recovery percentage for one subsidiary. One-time adjustments in 2009 include a \$19.4 million gain to increase the insurance asset as a result of favorable court rulings in October and December 2009 concerning allocation methodology offset by an \$11.6 million charge to increase asbestos-related liabilities by \$111.3 million, offset by an increase to expected insurance recoveries of \$99.7 million, as a result of an analysis of claims data.

### Asbestos Coverage Litigation Expense

Asbestos coverage litigation expenses include legal costs related to the actions against two of our subsidiaries respective insurers and a former parent company of one of the subsidiaries.

The table below presents coverage litigation expenses for the periods indicated:

(Amounts in millions)	Year ended December 31,		
	2010	2009	2008
Asbestos coverage litigation expenses	\$ 13.2	\$ 11.7	\$ 17.2

Legal costs related to the subsidiaries' action against their asbestos insurers were \$13.2 million for the year ended December 31, 2010, \$1.5 million higher than the year ended December 31, 2009, due to costs related to the trial by one of our subsidiaries against a number of its insurers and former parent that began in January 2010 and is expected to conclude in 2011. Legal costs for the year ended December 31, 2008 were higher than 2009 primarily due to trial preparation in the fourth quarter of 2008. The trial had been expected to commence in the first half of 2009, but did not begin until January 19, 2010.

### Seasonality

We experience seasonality in our fluid handling business. As our customers seek to fully utilize capital spending budgets before the end of the year, historically our shipments have peaked during the fourth quarter. Also, our European operations typically experience a slowdown during the July and August holiday season.

### Sales and Orders

Our sales, orders and backlog are affected by many factors including but not limited to acquisitions, fluctuating foreign exchange rates, and growth (decline) in our existing businesses which may be driven by market conditions and other factors. To facilitate the comparison between reporting periods, we disclose the impact of each of these three factors to the extent they impact the periods presented. The impact of foreign currency translation is the difference between sales from existing businesses valued at current year foreign exchange rates and the same sales valued at prior year foreign exchange rates. Growth due to acquisitions includes incremental sales due to an acquisition during the period or incremental sales due to reporting a full year's sales for an acquisition that occurred in the prior year. Sales growth (decline) from existing businesses excludes both the impact of foreign exchange rate fluctuations and acquisitions, thus providing a measure of growth (decline) due to factors such as price, mix and volume.

Orders and order backlog are highly indicative of our future revenue and thus are key measures of anticipated performance. Orders consist of contracts for products or services from our customers, net of cancellations, during a period. Order backlog consists of unfilled orders at the end of a period. The components of order and backlog growth (decline) are presented on the same basis as sales growth (decline).

The following tables present components of our sales and order growth (decline), as well as, sales by fluid handling product for the periods indicated:

(Amounts in millions)	Sales		Orders		Backlog at Period End	
	\$	%	\$	%	\$	%
Year ended December 31, 2008	\$ 604.9		\$ 682.1		\$ 349.0	
<b>Components of Change:</b>						
Existing Businesses	(48.8 )	(8.1 )%	(198.0 )	(29.0 )%	(66.8 )	(19.1 )%
Acquisitions	1.0	0.2 %	1.4	0.2 %	0.7	0.2 %
Foreign Currency Translation	(32.1 )	(5.3 )%	(23.1 )	(3.4 )%	8.0	2.3 %
Total	(79.9 )	(13.2 )%	(219.7 )	(32.2 )%	(58.1 )	(16.6 )%
Year ended December 31, 2009	\$ 525.0		\$ 462.4		\$ 290.9	
<b>Components of Change:</b>						
Existing Businesses	16.1	3.1 %	71.1	15.4 %	(6.6 )	(2.3 )%
Acquisitions	10.0	1.9 %	6.1	1.3 %	38.7	13.3 %
Foreign Currency Translation	(9.1 )	(1.7 )%	(6.8 )	(1.5 )%	(9.5 )	(3.3 )%
Total	17.0	3.2 %	70.4	15.2 %	22.6	7.8 %
Year ended December 31, 2010	\$ 542.0		\$ 532.8		\$ 313.5	

(Amounts in millions)	Year ended December 31,		
	2010	2009	2008
<b>Net Sales by Product:</b>			
Pumps, including aftermarket parts and service	\$ 444.9	\$ 443.1	\$ 529.3
Systems, including installation service	78.6	69.3	58.2
Valves	14.6	10.1	10.1
Other	3.9	2.5	7.3
Total net sales	\$ 542.0	\$ 525.0	\$ 604.9

As detailed above, sales from existing businesses increased 3.1% for the year ended December 31, 2010 over the year ended December 31, 2009. This increase was primarily attributable to higher demand in all end markets except the oil and gas market. Foreign currency translation negatively impacted sales by 1.7%, primarily due to a stronger average U.S. dollar against the Euro for year ended December 31, 2010 compared to the same period in 2009.

Orders, net of cancellations, from existing businesses increased 15.4% for the year ended December 31, 2010 over the year ended December 31, 2009, primarily due to increased demand in the general industrial, commercial marine and oil and gas end markets, partially offset by lower demand in the defense end market. We experienced commercial marine order cancellations of approximately \$16.4 million during the year ended December 31, 2010, compared to \$21.9 million during the year ended December 31, 2009. Backlog as of December 31, 2010, of \$313.5 million decreased \$6.6 million, or 2.3% from December 31, 2009, excluding the impact of foreign currency translation and acquisitions. The Baric acquisition added \$38.7 million to backlog in 2010.

Sales from existing businesses declined 8.1% for the year ended December 31, 2009 over the year ended December 31, 2008. This decrease was primarily due to a significant decline in sales volume in the general industrial end market resulting from the global economic downturn, partially offset by a sales volume increase in the global defense end

market. Foreign currency translation negatively impacted sales and orders for the year ended December 31, 2009, primarily due to a stronger average U.S. dollar against the Euro for 2009 compared to 2008.

Orders, net of cancellations, from existing businesses for the year ended December 31, 2009 were down 29.0% from the prior year, primarily due to a significant decline in demand in the commercial marine, oil and gas, general industrial and power generation end markets. We experienced commercial marine order cancellations of approximately \$21.9 million during the year ended December 31, 2009, as a result of the economic downturn. Backlog as of December 31, 2009, of \$290.9 million decreased \$58.1 million, or 16.6%, reflecting the decline in orders during the year.

#### Gross Profit

The following table presents our gross profit and gross profit margin figures for the periods indicated:

(Amounts in millions)	Year ended December 31,						
	2010		2009		2008		
Gross profit	\$	191.4	\$	185.8	\$	217.2	
Gross profit margin		35.3	%	35.4	%	35.9	%

Gross profit increased \$5.6 million for the year ended December 31, 2010 compared to the same period in 2009. Gross profit from existing businesses increased \$6.5 million, with an additional increase of \$1.8 million due to the acquisitions of Baric and PD-Technik. Foreign currency translation negatively impacted gross profit by \$2.7 million. Gross profit margin for the year ended December 31, 2010 was flat compared to the year ended December 31, 2009, as margin declines driven by lower pricing and an unfavorable product mix shift were partially offset by restructuring program cost savings and higher productivity.

Gross profit decreased \$31.4 million for the year ended December 31, 2009 compared to the same period in 2008. Gross profit from existing businesses decreased \$19.8 million, with an additional \$11.7 million negative impact of foreign exchange rates. Gross profit margin declined a modest 50 basis points in 2009 despite a substantial decrease in production volume which caused lower absorption of fixed manufacturing costs. Significant restructuring program cost savings as well as favorable pricing and product mix in the commercial marine and general industrial end markets for the most part successfully mitigated the negative effect of volume on our gross margin.

#### Selling, General and Administrative Expenses

The following table presents our selling, general and administrative (SG&A) expenses for the periods indicated:

(Amounts in millions)	Year ended December 31,						
	2010		2009		2008		
SG&A expenses	\$	119.4	\$	112.5	\$	124.1	
SG&A expenses as a percentage of sales		22.0	%	21.4	%	20.5	%

Selling, general and administrative expenses increased \$6.9 million to \$119.4 million for the year ended December 31, 2010. Excluding a \$2.2 million net increase related to acquisitions and foreign exchange rates, SG&A increased \$4.7 million from 2009, primarily due to higher selling and commission costs and higher incentive compensation. There was also a \$2.9 million increase in pension costs due to the Company's assumption of the pension obligation for a group of former employees of a divested subsidiary as a result of an agreement reached in the fourth quarter of 2010. However, this was substantially offset by the reversal of an accrual established in prior years for this matter.

Selling, general and administrative expenses decreased \$11.6 million to \$112.5 million for the year ended December 31, 2009. Excluding the \$6.1 million favorable impact of foreign exchange rates, SG&A declined \$5.5 million from 2008, primarily due to reductions in selling and commission expenses of \$2.2 million and restructuring savings of \$2.5 million. An additional \$2.0 million of professional fees and other costs associated with becoming a public company and \$2.6 million of pension and other postretirement benefit costs were incurred in 2009, but were offset by lower legacy legal expenses and favorable changes in the fair value of commodity and foreign currency derivatives.

## Operating Income

The table below presents operating income data for the periods indicated:

(Amounts in millions)	Year ended December 31,						
	2010		2009		2008		
Operating income	\$	34.4	\$	39.6	\$	17.8	
Operating margin		6.3	%	7.5	%	2.9	%

Operating income for the year ended December 31, 2010 decreased \$5.3 million from the year ended December 31, 2009. Excluding a \$2.9 million net unfavorable impact of foreign currency exchange rates and acquisitions, operating income decreased by \$2.3 million. Increased asbestos claims and litigation expenses and unfavorable pricing and product mix shift were partially offset by lower restructuring costs, higher sales volumes and manufacturing cost reductions, including restructuring program cost savings.

Operating income for the year ended December 31, 2009 increased \$21.8 million from the prior year. The increase was primarily due to the absence of \$57.0 million of IPO-related costs incurred in 2008, partially offset by \$18.2 million of restructuring costs incurred in 2009 as well as a \$5.5 million negative impact of foreign exchange rates. Excluding these impacts, operating income was \$11.5 million lower than the prior year, primarily due to lower sales volume from existing businesses, partially offset by lower asbestos-related expenses and selling, general and administrative expenses.

## Interest Expense

For a description of our outstanding indebtedness, please refer to “Liquidity and Capital Resources” below.

Interest expense of \$6.7 million for the year ended December 31, 2010 declined \$0.5 million from the prior year. A decrease in the notional value of our interest rate swap from \$75 million to \$50 million on June 30, 2010 caused our overall weighted-average effective interest rate to decline, from 5.6% in 2009 to 5.4% in 2010.

Interest expense of \$7.2 million for the year ended December 31, 2009 declined \$4.6 million from the prior year, primarily due to lower debt levels during 2009 compared to 2008 as a result of debt repayments of \$105.4 million from a portion of the IPO proceeds in the second quarter of 2008. A decrease in the weighted-average effective interest rate on our variable rate borrowings that are not hedged, from 6.3% in 2008 to 5.6% in 2009 contributed approximately \$0.7 million to the reduction in interest expense.

## Provision for Income Taxes

The effective income tax rate for the year ended December 31, 2010 was 41.4% as compared to an effective tax rate of 26.6% for the year ended December 31, 2009. The effective tax rate for the year ended December 31, 2010 was higher than the U.S. federal statutory rate primarily due to a net increase in our valuation allowance, offset in part by international tax rates which are lower than the U.S. tax rate, and a net decrease to our unrecognized tax benefit liability. The 41.4% effective tax rate for the year ended December 31, 2010 was higher than the 26.6% effective tax rate for the year ended December 31, 2009 primarily due a \$4.2 million increase in our valuation allowance in 2010.

The effective income tax rate for the year ended December 31, 2009 was 26.6% as compared to an effective tax rate of 91.1% for the year ended December 31, 2008. Our effective tax rate for the year ended December 31, 2009 was lower than the U.S. federal statutory rate primarily due to international tax rates which are lower than the U.S. tax rate,

including the impact of the reduction in 2009 of the Swedish tax rate from 28% to 26.3% offset in part by a net increase to our valuation allowance and unrecognized tax benefit liability. The 26.6% effective tax rate for the year ended December 31, 2009 was lower than the 91.1% effective tax rate for the year ended December 31, 2008 primarily due to an \$11.8 million payment to reimburse certain selling shareholders for underwriters discounts that are not deductible for tax purposes and a \$3.4 million increase in valuation allowance in 2008.

## Liquidity and Capital Resources

### Overview

Historically, we have financed our capital and working capital requirements through a combination of cash flows from operating activities and borrowings under our credit facility. We expect that our primary ongoing requirements for cash will be for working capital, funding for potential acquisitions, capital expenditures, asbestos-related outflows and pension plan funding. If additional funds are needed for strategic acquisitions or other corporate purposes, we believe we could raise additional funds in the form of debt or equity.

### Borrowings

On May 13, 2008, coinciding with the closing of the IPO, we terminated our existing credit facility. There were no material early termination penalties incurred as a result of the termination. Deferred loan costs of \$4.6 million were written off in connection with this termination. On the same day, we entered into a new credit agreement (the "Credit Agreement"). The Credit Agreement, led by Banc of America Securities LLC and administered by Bank of America, is a senior secured structure with a \$150.0 million revolver and a Term A Note of \$100.0 million.

The Term A Note bears interest at LIBOR plus a margin ranging from 2.25% to 2.75% determined by the total leverage ratio calculated at quarter end. At December 31, 2010, the interest rate was 2.76% inclusive of a 2.50% margin. The Term A Note, as entered into on May 13, 2008, has \$2.5 million due on a quarterly basis on the last day of each March, June, September and December beginning June 30, 2010 and ending March 31, 2013, and one installment of \$60.0 million payable on May 13, 2013. On December 31, 2010, there was \$82.5 million outstanding on the Term A Note.

The \$150.0 million revolver contains a \$50.0 million letter of credit sub-facility, a \$25.0 million swing line loan sub-facility and a €100.0 million sub-facility. At December 31, 2010, the annual commitment fee on the revolver was 0.5% and there was \$14.1 million outstanding on the letter of credit sub-facility and \$6.0 million attributable to a defaulting lender, leaving approximately \$129.9 million available under our revolver.

On June 24, 2008, we entered into an interest rate swap with an aggregate notional value of \$75.0 million whereby we exchanged our LIBOR-based variable rate interest for a fixed rate of 4.1375%. The notional value decreased to \$50.0 million on June 30, 2010 and will decrease to \$25.0 million on June 30, 2011, and expires on June 29, 2012. The fair value of the swap agreement, based on third-party quotes, was a liability of \$1.8 million at December 31, 2010. The swap agreement has been designated as a cash flow hedge, and therefore changes in its fair value are recorded as an adjustment to other comprehensive income.

Substantially all assets and stock of the Company's domestic subsidiaries and 65% of the shares of certain European subsidiaries are pledged as collateral against borrowings under the Credit Agreement. Certain European assets are pledged against borrowings directly made to our European subsidiary. The Credit Agreement contains customary covenants limiting the Company's ability to, among other things, pay cash dividends, incur debt or liens, redeem or repurchase Company stock, enter into transactions with affiliates, make investments, merge or consolidate with others or dispose of assets. In addition, the Credit Agreement contains financial covenants requiring the Company to maintain a total leverage ratio of not more than 3.25 to 1.0 and a fixed charge coverage ratio of not less than 1.50 to 1.0, measured at the end of each quarter. If the Company does not comply with the various covenants under the Credit Agreement and related agreements, the lenders may, subject to various customary cure rights, require the immediate payment of all amounts outstanding under the Term A Note and revolver. The Company believes it is in compliance with all such covenants as of December 31, 2010 and expects to be in compliance for the next 12 months.

As of December 31, 2010, we had approximately \$135.9 million available on our \$150 million revolving credit line. Present drawings under the credit line are letters of credit securing various obligations related to our business. The revolving credit line is provided by a consortium of financial institutions with varying commitment levels as shown below (in millions):

	Amount
Bank of America	\$ 32.4
RBS Citizens	14.4
TD BankNorth	14.4
Wells Fargo	14.4
SunTrust Bank	14.4
Landesbank Baden-Wuerttemberg	10.5
DnB Nor Bank	10.5
HSBC	10.5
KeyBank	10.5
Carolina First Corp	6.0
UBS	6.0
Lehman Brothers(1)	6.0
Total	\$ 150.0

(1) The bankruptcy of Lehman Brothers resulted in their default under the terms of the revolver and we will not be able to draw on Lehman Brothers' commitment of \$6.0 million. The Credit Agreement was amended on February 14, 2011 to eliminate Lehman Brothers' commitment, thereby reducing the total amount of the revolving credit line to \$144.0 million.

#### Comparative Cash Flows

The table below presents selected cash flow data for the periods indicated:

(Amounts in millions)	Year ended December 31,		
	2010	2009	2008
Net cash provided by (used in) operating activities	\$62.0	\$38.7	\$(33.0)
Purchases of fixed assets	(12.5)	(11.0)	(18.6)
Net cash paid for acquisitions	(28.0)	(1.7)	(0.4)
Other sources, net	0.1	0.2	(0.1)
Net cash used in investing activities	\$(40.4)	\$(12.5)	\$(19.1)
Proceeds and repayments of borrowings, net	(8.8)	(5.0)	(110.3)
Net proceeds from the issuance of common stock	-	-	193.0
Dividends paid to preferred shareholders	-	-	(38.5)
Repurchases of common stock	-	-	(5.7)
Payments made for loan costs	-	-	(3.3)
Other sources (uses), net	0.8	(0.4)	(0.4)
Net cash (used in) provided by financing activities	\$(8.0)	\$(5.4)	\$34.8

Cash flows from operating activities can fluctuate significantly from period to period as working capital needs, the timing of payments for items such as asbestos-related cash flows, pension funding decisions and other items impact reported cash flows.

Net cash provided by (used in) operating activities was \$62.0 million, \$38.7 million and \$(33.0) million for the years ended December 31, 2010, 2009 and 2008, respectively. The two most significant items causing the variability in these reported amounts were asbestos-related cash flows (including the disposition of claims, defense costs, insurer reimbursements and settlements and legal expenses related to litigation against our insurers) and IPO-related costs in 2008. For the years ended December 31, 2010, 2009 and 2008, net cash paid for asbestos liabilities, net of insurance settlements received, was \$11.4 million, \$19.7 million and \$21.8 million, respectively. For the year ended December 31, 2008, cash paid for IPO-related costs were \$42.4 million. Additionally, in the year ended December 31, 2008, cash paid for legacy legal settlements were \$11.7 million. Excluding the effect of asbestos-related cash flows, IPO-related costs, and legacy legal settlements, net cash provided by operating activities would have been \$73.4 million, \$58.4 million and \$42.9 million for the years ended December 31, 2010, 2009 and 2008, respectively.

Other changes in operating cash flow items are discussed below.

Funding requirements of our defined benefit plans, including both pensions and other post-employment benefits, can vary significantly among periods due to changes in the fair value of plan assets and actuarial assumptions. For the years ended December 31, 2010, 2009 and 2008, cash contributions for defined benefit plans were \$12.1 million, \$8.3 million, and \$6.4 million, respectively.

For the years ended December 31, 2010 and 2009, cash payments of \$16.3 million and \$7.9 million, respectively, were made related to the Company's restructuring initiatives.

Changes in working capital also affected the operating cash flows for the years presented. We define working capital as trade receivables plus inventories less accounts payable.

Working capital, excluding the effects of acquisitions and foreign currency translation, decreased \$18.7 million from December 31, 2009 to December 31, 2010 and decreased \$10.3 million from December 31, 2008 to December 31, 2009. These changes were primarily due to decreases in inventory levels as a result of inventory reduction programs.

Investing activities consist primarily of purchases of fixed assets and cash paid for acquisitions.

In all years presented, capital expenditures were invested in new and replacement machinery, equipment and information technology. We generally target capital expenditures at approximately 2.0% to 2.5% of revenues.

On August 19, 2010, we completed the acquisition of Baric, a supplier of highly engineered fluid handling systems primarily for lubrication applications, with its primary operations based in Blyth, United Kingdom, for \$27.2 million, net of cash acquired in the transaction.

We paid \$0.7 million in 2010 and \$0.4 million in both 2009 and 2008 for contingent purchase price adjustments related to our 2007 acquisition of Fairmount Automation, Inc.

On August 31, 2009, we completed the acquisition of PD-Technik, a provider of marine aftermarket related products and services located in Hamburg, Germany, for \$1.3 million, net of cash acquired in the transaction.

Financing cash flows consist primarily of borrowings and repayments of indebtedness, payment of dividends to shareholders and redemptions of stock.

- During 2010, we repaid \$8.8 million of long-term borrowings.
- In the fourth quarter of 2008, we purchased 795,000 shares of our common stock for approximately \$5.7 million. We did not purchase any shares in 2009 or 2010.
- Our IPO proceeds in May 2008 were \$193.0 million after deducting estimated accounting, legal and other expenses of \$5.9 million. We used these proceeds to: (i) repay approximately \$105.4 million of indebtedness outstanding under our credit facility, (ii) pay dividends to existing preferred stockholders of record immediately prior to the consummation of the IPO in the amount of \$38.5 million, (iii) pay \$11.8 million to the selling stockholders in the IPO as reimbursement for the underwriting discount incurred on the shares sold by them, and (iv) pay special bonuses of approximately \$27.8 million to certain of our executives under previously adopted executive compensation plans. The remainder of the net proceeds was applied to working capital.

-

We paid approximately \$3.3 million in deferred loan costs related to our new credit facility entered into May 13, 2008.

## Contractual Obligations

We are party to numerous contracts and arrangements that obligate us to make cash payments in future years. These contracts include financing arrangements such as debt agreements and leases, as well as contracts for the purchase of goods and services.

The following table is a summary of our contractual obligations as of December 31, 2010 (in millions):

	Total	Less than One Year	1-3 Years	3-5 Years	More Than 5 Years
<b>Debt &amp; Leases:</b>					
Term Loan A	\$82.5	\$10.0	\$72.5	\$-	\$-
Interest Payments on Long-Term Debt (1)	6.6	3.7	2.9	-	-
Operating Leases	12.7	3.8	5.1	3.1	0.7
Purchase Obligations (2)	50.9	47.7	3.2	-	-
Total	\$152.7	\$65.2	\$83.7	\$3.1	\$0.7

(1) Includes estimated interest rate swap payments. Variable interest payments are estimated using a static rate of 3.2%.

(2) Amounts exclude open purchase orders for goods or services that are provided on demand, the timing of which is not certain.

We have cash funding requirements associated with our pension and other post-retirement benefit plans, which are estimated to be approximately \$6.7 million for the year ending December 31, 2011. Other long-term liabilities, such as those for asbestos and other legal claims, employee benefit plan obligations, and deferred income taxes, are excluded from the above table since they are not contractually fixed as to timing and amount.

## Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that provide liquidity, capital resources, market or credit risk support that expose us to any liability that is not reflected in our consolidated financial statements other than outstanding letters of credit of \$14.1 million and \$16.4 million of bank guarantees at December 31, 2010 and future operating lease payments of \$12.7 million.

The Company and its subsidiaries have in the past divested certain of its businesses and assets. In connection with these divestitures, certain representations, warranties and indemnities were made to purchasers to cover various risks or unknown liabilities. We cannot estimate the potential liability, if any, that may result from such representations, warranties and indemnities because they relate to unknown and unexpected contingencies; however, the Company does not believe that any such liabilities will have a material adverse effect on our financial condition, results of operations or liquidity.

## Critical Accounting Policies

The methods, estimates and judgments we use in applying our critical accounting policies have a significant impact on the results we report in our financial statements. We evaluate our estimates and judgments on an ongoing basis. Our estimates are based upon our historical experience, our evaluation of business and macroeconomic trends, and information from other outside sources as appropriate. Our experience and assumptions form the basis for our judgments about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual

results may vary from what our management anticipates and different assumptions or estimates about the future could change our reported results.

We believe the following accounting policies are the most critical in that they are important to the financial statements and they require the most difficult, subjective or complex judgments in the preparation of the financial statements. For a detailed discussion on the application of these and other accounting policies, see Note 2 to the Consolidated Financial Statements.

## Asbestos Liabilities and Insurance Assets

Two of our subsidiaries are each one of many defendants in a large number of lawsuits that claim personal injury as a result of exposure to asbestos from products manufactured with components that are alleged to have contained asbestos. Such components were acquired from third-party suppliers, and were not manufactured by any of our subsidiaries nor were the subsidiaries producers or direct suppliers of asbestos. The manufactured products that are alleged to have contained asbestos generally were provided to meet the specifications of the subsidiaries' customers, including the U.S. Navy.

The subsidiaries settle asbestos claims for amounts management considers reasonable given the facts and circumstances of each claim. The annual average settlement payment per asbestos claimant has fluctuated during the past several years. Management expects such fluctuations to continue in the future based upon, among other things, the number and type of claims settled in a particular period and the jurisdictions in which such claims arise. To date, the majority of settled claims have been dismissed for no payment.

Claims activity related to asbestos is as follows (1):

	Year ended December 31,		
	2010	2009	2008
Claims unresolved at the beginning of the period	25,295	35,357	37,554
Claims filed (2)	3,692	3,323	4,729
Claims resolved (3)	(4,223 )	(13,385 )	(6,926 )
Claims unresolved at the end of the period	24,764	25,295	35,357
Average cost of resolved claims (4)	\$12,037	\$11,106	\$5,378

- (1) Excludes claims filed by one legal firm that have been "administratively dismissed."  
(2) Claims filed include all asbestos claims for which notification has been received or a file has been opened.  
(3) Claims resolved include asbestos claims that have been settled or dismissed or that are in the process of being settled or dismissed based upon agreements or understandings in place with counsel for the claimants.  
(4) Average cost of settlement to resolve claims in whole dollars. These amounts exclude claims settled in Mississippi for which the majority of claims have historically been resolved for no payment. These amounts exclude insurance recoveries. The increase in average cost of resolved claims from 2008 to 2009 is driven primarily by a shift in the mix of settled claims from dismissals with no dollar value to mesothelioma settlements.

We have projected each subsidiary's future asbestos-related liability costs with regard to pending and future unasserted claims based upon the Nicholson methodology. The Nicholson methodology is a standard approach used by experts and has been accepted by numerous courts. This methodology is based upon risk equations, exposed population estimates, mortality rates, and other demographic statistics. In applying the Nicholson methodology for each subsidiary we performed: 1) an analysis of the estimated population likely to have been exposed or claim to have been exposed to products manufactured by the subsidiaries based upon national studies undertaken of the population of workers believed to have been exposed to asbestos; 2) the use of epidemiological and demographic studies to estimate the number of potentially exposed people that would be likely to develop asbestos-related diseases in each year; 3) an analysis of the subsidiaries' recent claims history to estimate likely filing rates for these diseases; and 4) an analysis of the historical asbestos liability costs to develop average values, which vary by disease type, jurisdiction and the nature of claim, to determine an estimate of costs likely to be associated with currently pending and projected asbestos claims. Our projections, based upon the Nicholson methodology, estimate both claims and the estimated cash

outflows related to the resolution of such claims for periods up to and including the endpoint of asbestos studies referred to in item 2) above. It is our policy to record a liability for asbestos-related liability costs for the longest period of time that we can reasonably estimate.

Projecting future asbestos-related liability costs is subject to numerous variables that are difficult to predict, including, among others, the number of claims that might be received, the type and severity of the disease alleged by each claimant, the latency period associated with asbestos exposure, dismissal rates, costs of medical treatment, the financial resources of other companies that are co-defendants in the claims, funds available in post-bankruptcy trusts, uncertainties surrounding the litigation process from jurisdiction to jurisdiction and from case to case, including fluctuations in the timing of court actions and rulings, and the impact of potential changes in legislative or judicial standards, including potential tort reform. Furthermore, any projections with respect to these variables are subject to even greater uncertainty as the projection period lengthens. These trend factors have both positive and negative effects on the dynamics of asbestos litigation in the tort system and the related best estimate of our asbestos liability, and these effects do not move in linear fashion but rather change over multiple year periods. Accordingly, we monitor these trend factors over time and periodically assesses whether an alternative forecast period is appropriate. Taking these factors into account and the inherent uncertainties, we believe that we can reasonably estimate the asbestos-related liability for pending and future claims that will be resolved in the next 15 years and have recorded that liability as our best estimate. While it is reasonably possible that the subsidiaries will incur costs after this period, we do not believe the reasonably possible loss or range of reasonably possible loss is estimable at the current time. Accordingly, no accrual has been recorded for any costs which may be paid after the next 15 years. Defense costs associated with asbestos-related liabilities as well as costs incurred related to litigation against the subsidiaries' insurers are expensed as incurred.

We assessed the subsidiaries' existing insurance arrangements and agreements, estimated the applicability of insurance coverage for existing and expected future claims, analyzed publicly available information bearing on the current creditworthiness and solvency of the various insurers, and employed such insurance allocation methodologies as we believed appropriate to ascertain the probable insurance recoveries for asbestos liabilities. The analysis took into account self-insurance retentions, policy exclusions, pending litigation, liability caps and gaps in coverage, existing and potential insolvencies of insurers as well as how legal and defense costs will be covered under the insurance policies.

During the third quarter of 2009, an analysis of claims data including filing and dismissal rates, alleged disease mix, filing jurisdiction, as well as settlement values resulted in the determination that the Company should revise its rolling 15-year estimate of asbestos-related liability for pending and future claims. The analysis reflected that a statistically significant increase in mesothelioma filings had occurred and was expected to continue for both subsidiaries. As a result, the Company recorded an \$11.6 million pretax charge in the third quarter of 2009, which was comprised of an increase to its asbestos-related liabilities of \$111.3 million offset by expected insurance recoveries of \$99.7 million.

Each subsidiary has separate insurance coverage acquired prior to Company ownership of each independent entity. In its evaluation of the insurance asset, the Company used differing insurance allocation methodologies for each subsidiary based upon the applicable law pertaining to the affected subsidiary.

In November 2008, one of the subsidiaries entered into a settlement agreement with the primary and umbrella carrier governing all aspects of the carrier's past and future handling of the asbestos related bodily injury claims against the subsidiary. As a result of this agreement, during the third quarter of 2008, the Company increased its insurance asset by \$7.0 million attributable to resolution of a dispute concerning certain pre-1966 insurance policies and recorded a corresponding pretax gain. The Company reimbursed the primary insurer for \$7.6 million in deductibles and retrospective premiums in the fourth quarter of 2008 and has no further liability to the insurer under these provisions of the primary policies.

For this subsidiary, the Delaware Court of Chancery ruled on October 14, 2009, that asbestos-related costs should be allocated among excess insurers using an "all sums" allocation (which allows an insured to collect all sums paid in connection with a claim from any insurer whose policy is triggered, up to the policy's applicable limits) and that the subsidiary has rights to excess insurance policies purchased by a former owner of the business. Based upon this ruling mandating an "all sums" allocation, as well as the language of the underlying insurance policies and the assertion and belief that defense costs are outside policy limits, the Company, as of October 2, 2009, increased its future expected recovery percentage from 67% to 90% of asbestos-related costs following the exhaustion of its primary and umbrella layers of insurance and recorded a pretax gain of \$17.3 million. The subsidiary expects to be responsible for approximately 10% of its future asbestos-related costs.

During the third quarter of 2010, an insolvent carrier that had written approximately \$1.4 million in limits for which this subsidiary had assumed no recovery made a cash settlement offer of approximately \$0.7 million. As such, the subsidiary recorded a gain for this amount and a receivable from the insurer.

The subsidiary was notified during the third quarter of 2010 by the primary and umbrella carrier who had been fully defending and indemnifying the subsidiary for twenty years that the limits of liability of its primary and umbrella layer policies had been exhausted. Since then, the subsidiary has sought coverage from certain excess layer insurers whose terms and conditions follow form to the umbrella carrier. Certain first-layer excess insurers have defended and/or indemnified the subsidiary and/or agreed to defend and/or indemnify the subsidiary, subject to their reservations of rights and their applicable policy limits. Litigation between this subsidiary and its excess insurers is continuing and it is anticipated that the trial phase will be completed in 2011. The subsidiary continues to work with its excess insurers to obtain defense and indemnity payments while the litigation is proceeding. Given the

uncertainties of litigation, there are a variety of possible outcomes, including but not limited to the subsidiary being required to fund all or a portion of the subsidiary's defense and indemnity payments until such time a final ruling orders payment by the insurers. While not impacting the results of operations, the funding requirement could range up to \$10 million per quarter until final resolution.

In 2003, the other subsidiary filed a lawsuit against a large number of its insurers and its former parent to resolve a variety of disputes concerning insurance for asbestos-related bodily injury claims asserted against it. Although none of these insurance companies contested coverage, they disputed the timing, reasonableness and allocation of payments.

For this subsidiary it was determined by court ruling in the fourth quarter of 2007, that the allocation methodology mandated by the New Jersey courts will apply. Further court rulings in December of 2009, clarified the allocation calculation related to amounts currently due from insurers as well as amounts the Company expects to be reimbursed for asbestos-related costs incurred in future periods. As a result, in the fourth quarter of 2009, the Company increased its receivable for past costs by \$11.9 million and decreased its insurance asset for future costs by \$9.8 million and recorded a pretax gain of \$2.1 million.

In connection with this litigation, the court engaged a special master to review the appropriate information and recommend an allocation formula in accordance with applicable law and the facts of the case. During the fourth quarter of 2010, the court-appointed special allocation master made its recommendation which has not yet been and may not be accepted by the court. Based upon the recommendation, the Company reduced the current asbestos receivable by \$2.3 million, increased the long-term asbestos asset by \$0.4 million and recorded a net charge to asbestos liability and defense costs of \$1.9 million in the third quarter of 2010. As a result of the current status of this litigation, we decreased the amount currently due from insurers by \$0.5 million and decreased the insurance asset for future periods by \$1.6 million and recorded a pretax loss of \$2.1 million in the fourth quarter of 2010. We currently anticipate that the trial phase in this litigation will be complete in 2011. We cannot predict the outcome of this litigation with certainty, or whether the outcome will be more or less favorable than our best estimate included in the consolidated financial statements. Given the uncertainty inherent in litigation, we would estimate the range of possible results from positive \$30 million to negative \$30 million relative to our reported insurance assets on our consolidated balance sheets. The timing of any cash inflows or outflows related to these matters cannot be estimated. The subsidiary expects to be responsible for approximately 15% of all future asbestos-related costs.

The Company has established reserves of \$429.7 million and \$443.8 million as of December 31, 2010 and December 31, 2009, respectively, for the probable and reasonably estimable asbestos-related liability cost it believes the subsidiaries will pay through the next 15 years. It has also established recoverables of \$374.4 million and \$389.4 million as of December 31, 2010 and December 31, 2009, respectively, for the insurance recoveries that are deemed probable during the same time period. Net of these recoverables, the expected cash outlay on a non-discounted basis for asbestos-related bodily injury claims over the next 15 years was \$55.3 million and \$54.3 million as of December 31, 2010 and December 31, 2009, respectively. In addition, the Company has recorded a receivable for liability and defense costs previously paid in the amount of \$51.8 million and \$52.8 million as of December 31, 2010 and December 31, 2009, respectively, for which insurance recovery is deemed probable. The Company has recorded the reserves for the asbestos liabilities as "Accrued asbestos liability" and "Long-term asbestos liability" and the related insurance recoveries as "Asbestos insurance asset" and "Long-term asbestos insurance asset". The receivable for previously paid liability and defense costs is recorded in "Asbestos insurance receivable" and "Long-term asbestos insurance receivable". The Company also has reflected in other accrued liabilities \$23.3 million and \$15.8 million as of December 31, 2010 and December 31, 2009, respectively, for overpayments by certain insurers and unpaid legal costs related to defending itself against asbestos-related liability claims and legal action against the Company's insurers.

The expense (income) related to these liabilities and legal defense was \$7.9 million, net of estimated insurance recoveries, for the year ended December 31, 2010 compared to (\$2.2) million and (\$4.8) million for the years ended December 31, 2009 and 2008, respectively. Legal costs related to the subsidiaries' action against their asbestos insurers were \$13.2 million for the year ended December 31, 2010 compared to \$11.7 million and \$17.2 million for the years ended December 31, 2009 and 2008, respectively.

Management's analyses are based on currently known facts and a number of assumptions. However, projecting future events, such as new claims to be filed each year, the average cost of resolving each claim, coverage issues among layers of insurers, the method in which losses will be allocated to the various insurance policies, interpretation of the effect on coverage of various policy terms and limits and their interrelationships, the continuing solvency of various insurance companies, the amount of remaining insurance available, as well as the numerous uncertainties inherent in asbestos litigation could cause the actual liabilities and insurance recoveries to be higher or lower than those projected or recorded which could materially affect our financial condition, results of operations or cash flow.

## Retirement Benefits

Pension obligations and other post-retirement benefits are actuarially determined and are affected by several assumptions, including the discount rate, assumed annual rates of return on plan assets, and per capita cost of covered health care benefits. Changes in discount rate and differences from actual results for each assumption will affect the amounts of pension expense and other post-retirement expense recognized in future periods. These assumptions may also have an effect on the amount and timing of future cash contributions. See Note 11 to our Consolidated Financial Statements for further information.

## Impairment of Goodwill and Indefinite-Lived Intangible Assets

Goodwill represents the costs in excess of the fair value of net assets acquired associated with our acquisitions.

We evaluate the recoverability of goodwill and indefinite-lived intangible assets annually or more frequently if an event occurs or circumstances change in the interim that would more likely than not reduce the fair value of the asset below its carrying amount. Goodwill is considered to be impaired when the net book value of a reporting unit exceeds its estimated fair value.

During the year ended December 31, 2010, the Company changed the date of its annual goodwill and indefinite-lived intangible assets impairment testing from the last day of the fourth quarter to the first day of the fourth quarter. The Company adopted this change in timing in order to provide additional time to quantify the fair value of our reporting units and, if necessary, to determine the implied fair value of goodwill. This change in timing will also reduce the likelihood that the annual impairment analysis would not be completed by the required filing date of the Company's annual financial statements. The revised date also better aligns with our strategic planning and budgeting process, which is an integral component of the impairment testing. In accordance with GAAP, the Company will also perform interim impairment testing should circumstances requiring it arise. We believe this accounting change is preferable and does not result in the delay, acceleration, or avoidance of an impairment charge.

In the evaluation of goodwill for impairment, we first compare the fair value of the reporting unit to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is potentially impaired and step two of the impairment analysis is performed. In step two of the analysis, an impairment loss is recorded equal to the excess of the carrying value of the reporting unit's goodwill over its implied fair value should such a circumstance arise.

We measure fair value of reporting units based on a present value of future discounted cash flows or a market valuation approach. The discounted cash flows model indicates the fair value of the reporting units based on the present value of the cash flows that the reporting units are expected to generate in the future. Significant estimates in the discounted cash flows model include: the weighted average cost of capital; long-term rate of growth and profitability of our business; and working capital effects. The market valuation approach indicates the fair value of the business based on a comparison of the Company against certain market information. Significant estimates in the market approach model include identifying appropriate market multiples and assessing earnings before interest, income taxes, depreciation and amortization (EBITDA) in estimating the fair value of the reporting units.

The analysis performed as of October 2, 2010 and December 31, 2009 and 2008 indicated no impairment to be present. However, actual results could differ from our estimates and projections, which would affect the assessment of impairment. As of December 31, 2010, we have goodwill of \$172.3 million that is subject to at least annual review of impairment. See Note 10 to our Consolidated Financial Statements for further information.

## Income Taxes

We account for income taxes under the asset and liability method, which requires that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that some portion of the deferred tax asset will not be realized. In evaluating the need for a valuation allowance, we take into account various factors, including the expected level of future taxable income and available tax planning strategies. If actual results differ from the assumptions made in the evaluation of our valuation allowance, we record a change in valuation allowance through income tax expense in the period such determination is made.

During the year ending December 31, 2010, the valuation allowance increased from \$45.1 million to \$52.9 million with \$4.2 million and \$3.6 million of the increase recognized in income tax expense and in other comprehensive income, respectively. The \$7.8 million net increase in 2010 was primarily attributable to U.S. deferred tax assets we believe may not be realized. Consideration was given to U.S. tax planning strategies and future U.S. taxable income as to how much of the total U.S. deferred tax asset could be realized on a more likely than not basis.

The determination of our provision for income tax requires significant judgment, the use of estimates, and the interpretation and application of complex tax laws. Significant judgment is required in assessing the timing and amounts of deductible and taxable items. We establish reserves when, despite the belief that the tax return positions are fully supportable, we believe that certain positions may be successfully challenged. When facts and circumstances change, the reserves are adjusted through the provision for income taxes. Tax benefits are not recognized until minimum recognition thresholds are met as prescribed by applicable accounting standards.

### Revenue Recognition

We recognize revenues and costs from product sales when all of the following criteria are met: persuasive evidence of an arrangement exists, the price is fixed or determinable, product delivery has occurred or services have been rendered, there are no further obligations to customers, and collectibility is probable. Product delivery occurs when title and risk of loss transfer to the customer. Our shipping terms vary based on the contract. If any significant obligations to the customer with respect to such sale remain to be fulfilled following shipment, typically involving obligations relating to installation and acceptance by the buyer, revenue recognition is deferred until such obligations have been fulfilled. Any customer allowances and discounts are recorded as a reduction in reported revenues at the time of sale because these allowances reflect a reduction in the purchase price for the products purchased. These allowances and discounts are estimated based on historical experience and known trends. Revenue related to service agreements is recognized as revenue over the term of the agreement.

We maintain allowances for doubtful accounts for estimated losses resulting from the inability of our customers to make required payments. These allowances are based on recent trends of certain customers estimated to be a greater credit risk as well as general trends of the entire pool of customers. The allowance for doubtful accounts was \$2.6 million and \$2.8 million as of December 31, 2010 and 2009, respectively. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

The foregoing criteria are used for all classes of customers including original equipment manufacturers, distributors, government contractors and other end users.

### Stock-Based Compensation

Pursuant to our 2008 omnibus incentive plan, our board of directors may make awards in the form of shares of restricted stock, stock options and restricted stock units ("RSUs") and other stock-based awards. We measure and recognize the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award, with limited exceptions. That cost is recognized over the period during which an employee is required to provide service in exchange for the award—the requisite service period or vesting period. No compensation cost is recognized for equity instruments for which employees do not render the requisite service. We have equity incentive plans to encourage employees and non-employee directors to remain with us and to more closely align their interests with those of our shareholders.

For purposes of calculating stock-based compensation, the fair value of restricted stock or restricted stock units granted is equal to the market value of a share of common stock on the date of the grant. For grants that were awarded

on May 7, 2008 in conjunction with our initial public offering, we used the initial public offering price as the fair value of the restricted stock and restricted stock units granted. For stock options, we estimate the fair value on the date of grant using the Black-Scholes option-pricing model. The determination of fair value using the Black-Scholes model requires a number of complex and subjective variables. One key input into the model is the fair value of our common stock on the date of grant, the initial public offering price in the case of stock options issued on May 7, 2008. Other key variables in the Black-Scholes option-pricing model include the expected volatility of our common stock price, the expected term of the award and the risk-free interest rate. In addition, we are required to estimate forfeitures of unvested awards when recognizing compensation expense. Significant assumptions used to calculate stock-based compensation during the years ended December 31, 2010 and 2009 were a stock price volatility of 52.2% and 32.5%, respectively, an expected option life of 4.5 years, a risk-free interest rate based on the 5-year treasury note yield on the date of grant ranging from 1.1% to 2.6% in 2010 and 1.9% to 2.5% in 2009 and a 0% expected dividend yield.

Stock-based compensation expense recognized for the years ended December 31, 2010, 2009 and 2008 was \$3.1 million, \$2.6 million and \$11.3 million, respectively. We cannot predict with certainty the impact of stock-compensation expense to be recognized in the future because the actual amount of stock-based compensation expense we record in any fiscal period will be dependent on a number of factors, including the number of shares subject to the stock awards issued, the fair value of our common stock at the time of issuance and the expected volatility of our stock price over time. However, based on awards we currently expect to make in 2011, stock-based compensation for the year ended December 31, 2011 is projected to be approximately \$3.5 million.

#### Recent Pronouncements

See Note 3 to our Consolidated Financial Statements for a discussion of recently issued accounting pronouncements.

#### ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to market risk from changes in interest rates, foreign currency exchange rates and commodity prices that could impact our results of operations and financial condition. We address our exposure to these risks through our normal operating and financing activities.

Information concerning market risk for the year ended December 31, 2010 is discussed below.

##### Interest Rate Risk

We are subject to exposure from changes in interest rates based on our financing activities. Under our credit facility, all of our borrowings at December 31, 2010 are variable rate facilities based on LIBOR or EURIBOR. In order to mitigate our interest rate risk, we periodically enter into interest rate swap or collar agreements. A hypothetical increase in the interest rate of 1.00% during 2010 on our variable rate debt that is not hedged would have increased our interest cost by approximately \$0.3 million.

On June 24, 2008, we entered into an interest rate swap with an aggregate notional value of \$75.0 million whereby we exchanged our LIBOR-based variable rate interest for a fixed rate of 4.1375%. The notional value decreased to \$50.0 million on June 30, 2010 and will decrease to \$25.0 million on June 30, 2011, and expires on June 29, 2012. The fair value of the swap agreement, based on third-party quotes, was a liability of \$1.8 million at December 31, 2010. The swap agreement has been designated as a cash flow hedge, and therefore changes in its fair value are recorded as an adjustment to other comprehensive income.

##### Exchange Rate Risk

We have manufacturing sites throughout the world and sell our products globally. As a result, we are exposed to movements in the exchange rates of various currencies against the U.S. dollar and against the currencies of other countries in which we manufacture and sell products and services. During 2010, approximately 66% of our sales were derived from operations outside the U.S., with approximately 62% generated from our European operations. In particular, we have more sales in European currencies than we have expenses in those currencies. Therefore, when European currencies strengthen or weaken against the U.S. dollar, operating profits are increased or decreased, respectively. To assist with the matching of revenues and expenses and assets and liabilities in foreign currencies, we may periodically enter into derivative instruments such as cross currency swaps or forward contracts. To illustrate the potential impact of changes in foreign currency exchange rates, assuming a 10% increase in average foreign exchange rates compared to the U.S. dollar, 2010 income before income taxes would have increased by \$3.7 million.

##### Commodity Price Risk

We are exposed to changes in the prices of raw materials used in our production processes. Commodity futures contracts are periodically used to manage such exposure. As of December 31, 2010, we had no open commodity futures contracts.

Report of Ernst & Young LLP, Independent Registered Public Accounting Firm,  
on Internal Control Over Financial Reporting

The Board of Directors and Shareholders of Colfax Corporation

We have audited Colfax Corporation's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Colfax Corporation's management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Colfax Corporation maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Colfax Corporation as of December 31, 2010 and 2009 and the related consolidated statements of income, shareholders' equity and cash flows for each of the three years in the period ended December 31, 2010 of Colfax Corporation and our report dated February 25, 2011 expressed an unqualified opinion thereon.

Report of Ernst & Young LLP, Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of Colfax Corporation

We have audited the accompanying consolidated balance sheets of Colfax Corporation as of December 31, 2010 and 2009, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15(a). These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Colfax Corporation at December 31, 2010 and 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Colfax Corporation's internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 25, 2011 expressed an unqualified opinion thereon.

COLFAX CORPORATION  
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS  
December 31, 2009, 2008 and 2007  
Dollars in thousands, unless otherwise noted

## 1. Organization and Nature of Operations

Colfax Corporation (the “Company”, “Colfax”, “we”, “our” or “us”) is a global supplier of a broad range of fluid handling products, including pumps, fluid handling systems and controls, and specialty valves. We believe that we are a leading manufacturer of rotary positive displacement pumps, which include screw pumps, gear pumps and progressive cavity pumps. We have a global manufacturing footprint, with production facilities in Europe, North America and Asia, as well as worldwide sales and distribution channels. Our products serve a variety of applications in five strategic markets: commercial marine, oil and gas, power generation, defense and general industrial. We design and engineer our products to high quality and reliability standards for use in critical fluid handling applications where performance is paramount. We also offer customized fluid handling solutions to meet individual customer needs based on our in-depth technical knowledge of the applications in which our products are used. Our products are marketed principally under the Allweiler, Baric, Fairmount, Houttuin, Imo, LSC, Portland Valve, Tushaco, Warren, and Zenith brand names. We believe that our brands are widely known and have a premium position in our industry. Allweiler, Houttuin, Imo and Warren are among the oldest and most recognized brands in the fluid handling industry, with Allweiler dating back to 1860.

## 2. Summary of Significant Accounting Policies

### Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its subsidiaries. The Company owns 44% of the common shares of Sistemas Centrales de Lubricación S.A. de C.V., a Mexican company and 28% of the common shares of Allweiler Al-Farid Pumps Company (S.A.E.), an Egyptian Corporation. These investments are recorded in these financial statements using the equity method of accounting. Accordingly, \$7.2 million and \$6.6 million are recorded in other assets on the consolidated balance sheets at December 31, 2010 and 2009, respectively. The Company records its share of these investments’ net earnings, based on its economic ownership percentage. Accordingly, \$1.8 million, \$1.5 million and \$1.5 million of earnings from equity investments were included as a reduction of selling, general and administrative expenses on the consolidated statements of operations for each of the three years ended December 31, 2010, 2009 and 2008, respectively. All significant intercompany accounts and transactions have been eliminated.

### Revenue Recognition

The Company generally recognizes revenues and costs from product sales when all of the following criteria are met: persuasive evidence of an arrangement exists, the price is fixed and determinable, product delivery has occurred or services have been rendered, there are no further obligations to customers, and collectibility is probable. Product delivery occurs when title and risk of loss transfer to the customer. The Company’s shipping terms vary based on the contract. If any significant obligations to the customer with respect to such sale remain to be fulfilled following shipments, typically involving obligations relating to installation and acceptance by the buyer, revenue recognition is deferred until such obligations have been fulfilled. Any customer allowances and discounts are recorded as a reduction in reported revenues at the time of sale because these allowances reflect a reduction in the sales price for the products sold. These allowances and discounts are estimated based on historical experience and known trends. Revenue related to service agreements is recognized as revenue over the term of the agreement.

In some cases, customer contracts may include multiple deliverables for product shipments and installation or maintenance labor. Deliverables are determined to be separate units of accounting if they have standalone value and there is no general right of refund. Revenues from product shipments on this type of contract are recognized when title and risk of loss transfer to the customer, and the service revenue components are recognized as services are performed.

In some cases, customers may request that we store products on their behalf until the product is needed. Under these arrangements, revenue is recognized when title and risk of loss have passed to the customer.

Amounts billed for shipping and handling are recorded as revenue. Shipping and handling expenses are recorded as cost of sales. Progress billings are generally shown as a reduction of inventory unless such billings are in excess of accumulated costs, in which case such balances are included in accrued liabilities. The Company accrues for bad debts, as a component of selling, general, and administrative expenses, based upon estimates of amounts deemed uncollectible and a specific review of significant delinquent accounts factoring in current and expected economic conditions. Product return reserves are accrued at the time of sale based on historical rates, and are recorded as a reduction to net sales.

#### Taxes Collected from Customers and Remitted to Governmental Authorities

The Company collects various taxes and fees as an agent in connection with the sale of products and remits these amounts to the respective taxing authorities. These taxes and fees have been presented on a net basis in the consolidated statements of operations and are recorded as a liability until remitted to the respective taxing authority.

#### Research and Development

Research and development costs are expensed as incurred.

#### Advertising

Advertising costs of \$0.5 million, \$0.5 million, and \$0.9 million for years ending December 31, 2010, 2009 and 2008, respectively, are expensed as incurred and have been included in selling, general and administrative expenses.

#### Cash and Cash Equivalents

Cash and cash equivalents include all financial instruments purchased with an initial maturity of three months or less.

#### Trade Receivables

Receivables are presented net of allowances for doubtful accounts. The Company records the allowance for doubtful accounts based on its best estimate of probable losses incurred in the collection of accounts receivable. Estimated losses are based on historical collection experience, and are reviewed periodically by management.

#### Inventories

Inventories include the costs of material, labor and overhead. Inventories are stated at the lower of cost or market. Cost is primarily determined using the first-in, first-out method. The Company periodically reviews its quantities of inventories on hand and compares these amounts to the expected usage of each particular product. The Company records as a charge to cost of sales any amounts required to reduce the carrying value of inventories to net realizable value.

#### Property, Plant and Equipment

Property, plant and equipment are stated at historical cost, which includes the fair values of such assets acquired. Depreciation of property, plant and equipment is provided for on a straight-line basis over estimated useful lives ranging from three to 40 years. Assets recorded under capital leases are amortized over the shorter of their estimated useful lives or the lease terms. The estimated useful lives or lease terms of assets range from three to 40 years. Repairs and maintenance expenditures are expensed as incurred unless the repair extends the useful life of the asset.

#### Impairment of Goodwill and Indefinite-Lived Intangible Assets

Goodwill represents the costs in excess of the fair value of net assets acquired associated with acquisitions by the Company. Indefinite-lived intangible assets consist of trade names.

The Company evaluates the recoverability of goodwill and indefinite-lived intangible assets annually or more frequently if an event occurs or circumstances change in the interim that would more likely than not reduce the fair value of the asset below its carrying amount. Goodwill is considered to be impaired when the net book value of a reporting unit exceeds its estimated fair value.

During the year ended December 31, 2010, the Company changed the date of its annual goodwill and indefinite-lived intangible assets impairment testing from the last day of the fourth quarter to the first day of the fourth quarter. The Company adopted this change in timing in order to provide additional time to quantify the fair value of our reporting units and, if necessary, to determine the implied fair value of goodwill. This change in timing will also reduce the likelihood that the annual impairment analysis would not be completed by the required filing date of the Company's annual financial statements. The revised date also better aligns with our strategic planning and budgeting process, which is an integral component of the impairment testing. In accordance with GAAP, the Company will also perform interim impairment testing should circumstances requiring it arise. We believe this accounting change is preferable and does not result in the delay, acceleration, or avoidance of an impairment charge.

In the evaluation of goodwill for impairment, the Company first compares the fair value of the reporting unit to its carrying value. If the carrying value of a reporting unit exceeds its fair value, the goodwill of that reporting unit is potentially impaired and step two of the impairment analysis is performed. In step two of the analysis, an impairment loss is recorded equal to the excess of the carrying value of the reporting unit's goodwill over its implied fair value should such a circumstance arise.

The Company measures fair value of reporting units based on a present value of future discounted cash flows or a market valuation approach. The discounted cash flows model indicates the fair value of the reporting units based on the present value of the cash flows that the reporting units are expected to generate in the future. Significant estimates in the discounted cash flows model include: the weighted average cost of capital; long-term rate of growth and profitability of our business; and working capital effects. The market valuation approach indicates the fair value of the business based on a comparison of the Company against certain market information. Significant estimates in the market approach model include identifying appropriate market multiples and assessing earnings before interest, income taxes, depreciation and amortization (EBITDA) in estimating the fair value of the reporting units.

The analysis performed as of October 2, 2010, and December 31, 2009 and 2008 indicated no impairment to be present.

#### Impairment of Long-Lived Assets Other than Goodwill and Indefinite-Lived Intangible Assets

Intangibles primarily represent acquired customer relationships, acquired order backlog, acquired technology, software license agreements and patents. Acquired order backlog is amortized in the same period the corresponding revenue is recognized. A portion of the Company's acquired customer relationships is being amortized over seven years based on the present value of the future cash flows expected to be generated from the acquired customers. All other intangibles are being amortized on a straight-line basis over their estimated useful lives, generally ranging from three to 15 years.

The Company assesses its long-lived assets other than goodwill and indefinite-lived intangible assets for impairment whenever facts and circumstances indicate that the carrying amounts may not be fully recoverable. To analyze recoverability, the Company projects undiscounted net future cash flows over the remaining lives of such assets. If these projected cash flows are less than the carrying amounts, an impairment loss would be recognized, resulting in a write-down of the assets with a corresponding charge to earnings. The impairment loss is measured based upon the difference between the carrying amounts and the fair values of the assets. Assets to be disposed of are reported at the lower of the carrying amounts or fair value less cost to sell. Management determines fair value using the discounted cash flow method or other accepted valuation techniques. The Company recorded asset impairment losses totaling \$0.6 million in 2009 in connection with the closure of two facilities. No such impairments were recorded in 2010 or 2008.

#### Derivatives

The Company periodically enters into foreign currency, interest rate swap, and commodity derivative contracts. The Company uses interest rate swaps to manage exposure to interest rate fluctuations. Foreign currency contracts are used to manage exchange rate fluctuations and generally hedge transactions between the Euro and the U.S. dollar. Commodity futures contracts are used to manage costs of raw materials used in the Company's production processes.

The Company enters into such contracts with financial institutions of good standing, and the total credit exposure related to non-performance by those institutions is not material to the operations of the Company. The Company does not enter into contracts for trading purposes.

We designate a portion of our derivative instruments as cash flow hedges for accounting purposes. For all derivatives designated as hedges, we formally document the relationship between the hedging instrument and the hedged item, as well as the risk management objective and the strategy for using the hedging instrument. We assess whether the hedging relationship between the derivative and the hedged item is highly effective at offsetting changes in the cash flows both at inception of the hedging relationship and on an ongoing basis. Any change in the fair value of the derivative that is not effective at offsetting changes in the cash flows or fair values of the hedged item is recognized currently in earnings.

Interest rate swaps and other derivative contracts are recognized on the balance sheet as assets and liabilities, measured at fair value on a recurring basis using significant observable inputs, which is Level 2 as defined in the fair value hierarchy. For transactions in which we are hedging the variability of cash flows, changes in the fair value of the derivative are reported in accumulated other comprehensive income until earnings are affected by the hedged item. Changes in the fair value of derivatives not designated as hedges are recognized currently in earnings.

#### Self-Insurance

We are self-insured for a portion of our product liability, workers' compensation, general liability, medical coverage and certain other liability exposures. The Company accrues loss reserves up to the retention amounts when such amounts are reasonably estimable and probable. The accompanying consolidated balance sheets include estimated amounts for claims exposure based on experience factors and management estimates for known and anticipated claims as follows:

	December 31,	
	2010	2009
Medical insurance	\$ 702	\$ 697
Workers' compensation	153	189
Total self-insurance reserves	\$ 855	\$ 886

#### Warranty Costs

Estimated expenses related to product warranties are accrued at the time products are sold to customers and recorded as part of cost of sales. Estimates are established using historical information as to the nature, frequency, and average costs of warranty claims.

Warranty activity for the years ended December 31, 2010 and 2009 consisted of the following:

	2010	2009
Warranty liability at beginning of the year	\$2,852	\$3,108
Accrued warranty expense, net of adjustments	2,079	1,651
Changes in estimates related to pre-existing warranties	(589 )	(798 )
Cost of warranty service work performed	(1,264 )	(1,191 )
Foreign exchange translation effect	(115 )	82
Warranty liability at end of the year	\$2,963	\$2,852

#### Income Taxes

Income taxes for the Company are accounted for under the asset and liability method. Deferred income tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred income tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred income tax assets and liabilities of a change in tax rates is generally recognized in income in the period that includes the enactment date.

Valuation allowances are recorded if it is more likely than not that some portion of the deferred tax asset will not be realized. In evaluating the need for a valuation allowance, we take into account various factors, including the expected level of future taxable income and available tax planning strategies. If actual results differ from the assumptions made in the evaluation of our valuation allowance, we record a change in valuation allowance through income tax expense or other comprehensive income in the period such determination is made.

#### Foreign Currency Exchange Gains and Losses

The Company's financial statements are presented in U.S. dollars. The functional currencies of the Company's operating subsidiaries are the local currencies of the countries in which each subsidiary is located. Assets and liabilities denominated in foreign currencies are translated at rates of exchange in effect at the balance sheet date. Revenues and expenses are translated at average rates of exchange in effect during the year. The amounts recorded in each year are net of income taxes to the extent the underlying equity balances in the entities are not deemed to be permanently reinvested.

Transactions in foreign currencies are translated at the exchange rate in effect at the date of each transaction. Differences in exchange rates during the period between the date a transaction denominated in a foreign currency is consummated and the date on which it is either settled or translated for inclusion in the consolidated balance sheets are recognized in the consolidated statements of operations for that period. The foreign currency transaction gain (loss) in income was \$(0.4) million, \$(1.4) million, and \$0.3 million for the years ended December 31, 2010, 2009 and 2008, respectively.

#### Debt Issuance Costs

Costs directly related to the placement of debt are capitalized and amortized using the straight-line method, which approximates the effective interest method over the term of the related obligation. Amounts written off due to early extinguishment of debt are charged to earnings. Cost and accumulated amortization related to debt issuance costs amounted to approximately \$3.4 million and 1.8 million, respectively, as of December 31, 2010 and \$3.4 million and \$1.1 million, respectively, as of December 31, 2009.

#### Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the U.S. requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the periods presented. Actual results could differ from those estimates.

#### Reclassifications

Certain prior period amounts have been reclassified to conform to current year presentations.

### 3. Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board issued Accounting Standards Update (ASU) No. 2009-13, Multiple-Deliverable Revenue Arrangements—a consensus of the FASB Emerging Issues Task Force. ASU No. 2009-13 addresses the unit of accounting for arrangements involving multiple deliverables and how arrangement consideration should be allocated to the separate units of accounting. The Company has adopted the provisions of ASU No. 2009-13 prospectively beginning January 1, 2011. The Company does not anticipate a material impact on its results of operations from adopting the provisions of ASU No. 2009-13.

### 4. Acquisitions

The following acquisitions were accounted for using the acquisition method of accounting and, accordingly, the accompanying financial statements include the financial position and the results of operations from the dates of acquisition.

On August 19, 2010, we completed the acquisition of Baric Group (“Baric”) for \$27.0 million, net of cash acquired. During the fourth quarter of 2010, a final working capital settlement of \$0.2 million was paid pursuant to terms of the purchase agreements. Baric is a supplier of highly engineered fluid handling systems primarily for lubrication applications, with its primary operations based in Blyth, United Kingdom. The following table summarizes intangible assets acquired:

	Asset	Weighted Average Amortization Period (years)
Acquired customer relationships	\$7,053	10.0
Acquired developed technology	6,492	9.6
Backlog	3,339	2.3
Other	395	8.6
Trade names - indefinite life	2,770	
Goodwill	12,940	
Total intangible assets acquired	\$32,989	

The weighted average amortization period for total acquired amortizing intangibles is approximately 8.3 years. None of the goodwill acquired is expected to be tax deductible.

On August 31, 2009, we completed the acquisition of PD-Technik Ingenieurbüro GmbH (“PD-Technik”), a provider of marine aftermarket related products and services located in Hamburg, Germany, for \$1.3 million, net of cash acquired in the transaction.

On November 29, 2007, the Company acquired Fairmount Automation, Inc. (“Fairmount”), an original equipment manufacturer of mission critical programmable automation controllers in fluid handling applications primarily for the U.S. Navy, for \$4.5 million plus contingent payments based on achievement of revenue and earnings targets over the three year period ending December 31, 2010. In the fourth quarters of 2009 and 2008, the first two targets were achieved, resulting in payments of \$0.4 million in each period, which were recorded as goodwill. In the fourth quarter of 2010, the final target was achieved, resulting in a payment of \$0.7 million, which was recorded as goodwill.

## 5. Income Taxes

Income before income taxes and the components of the provision for income taxes were as follows:

	Year ended December 31,		
	2010	2009	2008
Income (loss) before income tax expense:			
Domestic	\$(12,737 )	\$698	\$(54,303 )
Foreign	40,425	31,720	60,299
	\$27,688	\$32,418	\$5,996
Provision for income taxes:			
Current income tax expense (benefit):			
Federal	\$(30 )	\$(1,323 )	\$(1,145 )
State	261	344	239
Foreign	11,538	6,911	19,701
	11,769	5,932	18,795
Deferred income tax expense (benefit):			
Domestic	-	2,241	(12,607 )
Foreign	(296 )	448	(723 )
	(296 )	2,689	(13,330 )
	\$11,473	\$8,621	\$5,465

U.S. income taxes at the statutory rate reconciled to the overall U.S. and foreign provision for income taxes were as follows:

	Year ended December 31,		
	2010	2009	2008
Tax at U.S. federal income tax rate	\$9,691	\$11,346	\$2,099
State taxes	(5 )	34	(1,500 )
Effect of international tax rates	(2,522 )	(2,260 )	(3,342 )
Payment of non-deductible underwriting fee	-	-	4,483
Changes in valuation and tax reserves	3,827	(710 )	2,903
Other	482	211	822
Provision for income taxes	\$11,473	\$8,621	\$5,465

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Significant components of the deferred tax assets and liabilities were as follows:

	December 31,			
	2010	2010	2009	2009
	Current	Long-Term	Current	Long-Term
<b>Deferred tax assets:</b>				
Post-retirement benefit obligations	\$ 1,076	\$ 28,688	\$ 1,003	\$ 23,262

<b>Net deferred tax assets</b>	<b>\$ 5,905</b>	<b>\$ 38,855</b>	<b>\$ 6,832</b>	<b>\$ 41,465</b>

For purposes of the balance sheet presentation, the Company nets current and non-current tax assets and liabilities within each taxing jurisdiction. The above table is presented prior to the netting of the current and non-current deferred tax items. The Company evaluates the recoverability of its net deferred tax assets on a jurisdictional basis by considering whether net deferred tax assets will be realized on a more likely than not basis. To the extent a portion or all of the applicable deferred tax assets do not meet the more likely than not threshold, a valuation allowance is recorded. During the year ending December 31, 2010, the valuation allowance increased from \$45.1 million to \$52.9 million with \$4.2 million and \$3.6 million of the increase recognized in income tax expense and other comprehensive income, respectively. The \$7.8 million net increase in 2010 was primarily attributable to U.S. deferred tax assets the Company believes may not be realized. Consideration was given to U.S. tax planning strategies and future U.S. taxable income as to how much of the relevant deferred tax asset could be realized on a more likely than not basis.

The Company has U.S. net operating loss carryforwards of approximately \$130.5 million expiring in years 2021 through 2030, and minimum tax credits of approximately \$1.9 million that may be carried forward indefinitely. Tax credit carryforwards include foreign tax credits that have been offset by a valuation allowance. We experienced an “ownership change” within the meaning of Section 382 of the Internal Revenue Code of 1986, as amended, as a result of the IPO. The Company’s ability to use these various carryforwards existing at the time of the ownership change to offset any taxable income generated in taxable periods after the ownership change may be limited under Section 382 and other federal tax provisions.

For the years ended December 31, 2010, 2009 and 2008, the Company intends that all undistributed earnings of its controlled international subsidiaries will be reinvested and no tax expense in the United States has been recognized

under the applicable accounting standard, for these reinvested earnings. The amount of unremitted earnings from these international subsidiaries, subject to local statutory restrictions, as of December 31, 2010 is approximately \$151.5 million. It is not reasonably determinable as to the amount of deferred tax liability that would need to be provided if such earnings were not reinvested.

The Company applies an accounting standard which establishes a single model to address accounting for uncertainty in tax positions. This accounting standard applies to all tax positions and requires a recognition threshold and measurement of a tax position taken or expected to be taken in a tax return. This standard also provides guidance on classification, interest and penalties, accounting in interim periods and transition, and significantly expanded income tax disclosure requirements.

A reconciliation of the beginning and ending amount of gross unrecognized tax benefits is as follows:

Balance at December 31, 2008	\$ 10,101
Additions for tax positions in prior periods	73
Additions for tax positions in current period	308
Reductions for tax positions in prior periods	(1,896 )
Foreign exchange impact / other	160
Balance at December 31, 2009	8,746
Additions for tax positions in prior periods	590
Additions for tax positions in current period	412
Reductions for tax positions in prior periods	(1,076 )
Foreign exchange impact / other	(81 )
Balance at December 31, 2010	\$ 8,591

The Company's unrecognized tax benefits as of December 31, 2010 and 2009 totaled \$8.9 million and \$9.3 million inclusive of \$0.3 million and \$0.5 million of interest and penalties, respectively. These amounts were offset in part by tax benefits of approximately \$0.6 million and \$0.7 million for the years ended December 31, 2010 and 2009, respectively. The net liabilities for uncertain tax positions for the years ended December 31, 2010 and 2009 were \$8.3 million and \$8.6 million, respectively, and if recognized, would favorably impact the effective tax rate.

The Company records interest and penalties on uncertain tax positions for post-adoption periods as a component of income tax expense. The interest and penalty expense recorded in income tax expense attributed to uncertain tax positions for the years ended December 31, 2010, 2009 and 2008 was \$0.1 million, \$0.2 million and \$0.2 million, respectively.

The Company is subject to income tax in the U.S., state, and international locations. The Company's significant operations outside the U.S. are located in Germany and Sweden. In Sweden, tax years 2005 to 2010 and in Germany, tax years 2006 to 2010 remain subject to examination. In the U.S., tax years 2005 and beyond generally remain open for examination by U.S. and state tax authorities as well as tax years ending in 1997, 1998, 2000 and 2003 that have U.S. tax attributes available that have been carried forward to open tax years or are available to be carried forward to future tax years.

Due to the difficulty in predicting with reasonable certainty when tax audits will be fully resolved and closed, the range of reasonably possible significant increases or decreases in the liability for unrecognized tax benefits that may occur within the next 12 months is difficult to ascertain. Currently, we estimate it is reasonably possible the expiration of various statutes of limitations and resolution of tax audits may reduce our tax expense in the next 12 months ranging from zero to \$5.7 million.

## 6. Restructuring and Other Related Charges

The Company initiated a series of restructuring actions beginning in 2009 in response to then current and expected future economic conditions. As a result, for the years ended December 31, 2010 and 2009, the Company recorded pre-tax restructuring and other related costs of \$10.3 million and \$18.2 million, respectively. The costs incurred in the year ended December 31, 2010 include \$2.2 million of termination benefits, including \$0.6 million of non-cash stock-based compensation expense, related to the departure of the Company's former President and Chief Executive

Officer (CEO) in January of 2010. Additionally, the costs incurred in the year ended December 31, 2010 include \$1.3 million of termination benefits related to the October 2010 departures of the Company's former Chief Financial Officer and General Counsel. The costs incurred in the year ended December 31, 2009 include a \$0.6 million non-cash asset impairment charge related to closure of a repair facility.

As of December 31, 2010, excluding additions from businesses acquired in 2009 and 2010, we have reduced our company-wide workforce by 237 associates from December 31, 2008. Additionally, through the second quarter of 2010, we participated in a German government-sponsored furlough program in which the government paid the wage-related costs for participating associates. Payroll taxes and other employee benefits related to employees' furlough time are included in restructuring costs.

The Company has relocated its Richmond, Virginia corporate headquarters to the Columbia, Maryland area, in order to provide improved access to international travel and to its key advisors. In connection with the move, the Company has incurred \$0.6 million of employee termination benefit costs, reflected in restructuring and other related charges, and \$0.4 million of other relocation related costs in 2010, which are reflected in selling, general and administrative expenses. We expect to incur an additional \$1.5 million of employee termination benefit costs, operating lease exit costs and other relocation expenses related to the headquarters relocation in the first six months of 2011.

During the second quarter of 2009, we closed a repair facility in Aberdeen, NC. Further, during the fourth quarter of 2009, we closed a manufacturing facility in Sanford, NC and moved its production to the Company's facilities in Monroe, NC and Columbia, KY. We recorded non-cash impairment charges of \$0.6 million to reduce the carrying value of the real estate and equipment at these facilities to their estimated fair values.

We recognize the cost of involuntary termination benefits at the communication date or ratably over any remaining expected future service period. Voluntary termination benefits are recognized as a liability and a loss when employees accept the offer and the amount can be reasonably estimated. We record asset impairment charges to reduce the carrying amount of long-lived assets that will be sold or disposed of to their estimated fair values. Fair values are estimated using observable inputs including third party appraisals and quoted market prices.

A summary of restructuring activity for the year ended December 31, 2010 is shown below.

	Year Ended December 31, 2010				Restructuring Liability at Dec. 31, 2010
	Restructuring Liability at Dec. 31, 2009	Provisions	Payments	Foreign Currency Translation	
<b>Restructuring and Other Related Charges:</b>					
Termination benefits (1)	\$ 9,473	\$ 7,610	\$ (14,169 )	\$ (734 )	\$ 2,180
Furlough charges (2)	-	327	(319 )	(8 )	-
Facility closure charges (3)	-	909	(909 )	-	-
Consulting costs (4)	-	903	(903 )	-	-
	\$ 9,473	9,749	\$ (16,300 )	\$ (742 )	\$ 2,180
Non-cash termination benefits (5)		574			
<b>Total</b>		\$ 10,323			

- (1) Includes severance and other termination benefits such as outplacement services.  
(2) Includes payroll taxes and other employee benefits related to German employees' furlough time.  
(3) Includes the cost of relocating and training associates and relocating equipment in connection with the closing of the Sanford, NC facility.  
(4) Includes outside consulting fees directly related to the Company's restructuring and performance improvement initiatives.  
(5) Includes stock-based compensation expense related to the accelerated vesting of certain share-based payments in connection with the departure of the Company's former President and CEO in January 2010.

## 7. Earnings (Loss) Per Share

The following table presents the computation of basic and diluted earnings (loss) per share:

	Year ended December 31,		
	2010	2009	2008
<b>Numerator:</b>			
Net income	\$ 16,215	\$ 23,797	\$ 531
Dividends on preferred stock	-	-	(3,492 )
Net income (loss) available to common shareholders	\$ 16,215	\$ 23,797	\$ (2,961 )
<b>Denominator:</b>			
Weighted-average shares of common stock outstanding - basic	43,389,878	43,222,616	36,240,157
Net income (loss) per share - basic	\$ 0.37	\$ 0.55	\$ (0.08 )
Weighted-average shares of common stock outstanding - basic	43,389,878	43,222,616	36,240,157
Net effect of potentially dilutive securities (1)	277,347	103,088	-
Weighted-average shares of common stock outstanding - diluted	43,667,225	43,325,704	36,240,157
Net income (loss) per share - diluted	\$ 0.37	\$ 0.55	\$ (0.08 )

(1) Potentially dilutive securities consist of options and restricted stock units.

In the years ended December 31, 2010, 2009 and 2008, respectively, approximately 1.3 million, 0.6 million and 0.5 million potentially dilutive stock options, restricted stock units and deferred stock units were excluded from the calculation of diluted loss per share since their effect would have been anti-dilutive.

## 8. Inventories

Inventories consisted of the following:

	December 31,	
	2010	2009
Raw materials	\$ 23,758	\$ 28,445
Work in process	29,565	32,888
Finished goods	20,121	21,013
	73,444	82,346
Less-Customer progress billings	(7,726 )	(3,171 )
Less-Allowance for excess, slow-moving and obsolete inventory	(7,777 )	(8,025 )
	\$ 57,941	\$ 71,150

## 9. Property, Plant and Equipment

Property, plant and equipment consisted of the following:

	Depreciable Lives in Years	December 31,	
		2010	2009
Land	-	\$ 15,106	\$ 16,618
Buildings and improvements	3 - 40	39,666	36,651
Machinery and equipment	3 - 15	121,933	119,727
Software	3 - 5	17,063	17,324
		193,768	190,320
Less-Accumulated depreciation		(104,522 )	(98,230 )
		\$ 89,246	\$ 92,090

Depreciation expense, including the amortization of assets recorded under capital leases, for the years ended December 31, 2010, 2009 and 2008, was approximately \$12.1 million, \$11.8 million and \$12.1 million, respectively. These amounts include depreciation expense related to software for the years ended December 31, 2010, 2009 and 2008 of \$1.9 million, \$1.7 million and \$2.0 million, respectively.

## 10. Goodwill and Intangible Assets

Changes in the carrying amount of goodwill during the years ended December 31, 2010 and 2009 are as follows:

	Goodwill
Balance December 31, 2008	\$ 161,694
Contingent purchase price payment for Fairmount acquisition	418
Attributable to 2009 acquisition of PD-Technik	6
Impact of changes in foreign exchange rates	1,300
Balance December 31, 2009	163,418
Contingent purchase price payment for Fairmount acquisition	736
Attributable to 2010 acquisition of Baric	12,940
Impact of changes in foreign exchange rates	(4,756 )
Balance December 31, 2010	\$ 172,338

Other intangible assets consisted of the following:

	December 31,			
	2010		2009	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization

Edgar Filing: Colfax CORP - Form 10-K

Acquired customer relationships	\$22,084	\$ (10,719 )	\$15,512	\$ (8,989 )
Trade names - indefinite life	4,819	-	2,062	-
Acquired developed technology	12,231	(3,331 )	5,811	(2,444 )
Acquired backlog of open orders	3,311	(474 )	-	-
Other intangibles	591	(214 )	146	(146 )
	\$43,036	\$ (14,738 )	\$23,531	\$ (11,579 )

In connection with the acquisition of PD-Technik in 2009, customer relationship intangibles of \$0.9 million were acquired and are being amortized over a period of six years.

Amortization expense for the years ended December 31, 2010, 2009 and 2008 was approximately \$3.5 million, \$2.6 million and \$2.7 million, respectively. Amortization expense for the next five fiscal years is expected to be: 2011—\$5.3 million, 2012—\$5.0 million, 2013—\$2.4 million, 2014—\$2.1 million, and 2015—\$1.7 million.

#### 11. Retirement and Benefit Plans

The Company sponsors various defined benefit plans, defined contribution plans and other post-retirement benefits plans, including health and life insurance, for certain eligible employees or former employees. We use December 31 as the measurement date for all of our employee benefit plans.

As a result of a settlement agreement reached in October of 2010, we assumed directly the pension obligation for a group of former employees of a divested subsidiary in place of an obligation to indemnify the purchaser of the subsidiary for all pension-related costs of the former employees. The pension plan covering those employees transferred the rights to the assets and liabilities to one of our foreign plans. The amounts related to this settlement are reflected as “Plan combinations” in the tables below. The net underfunded position of \$2.9 million has been recorded as current year pension expense. This expense is substantially offset within SG&A by the reversal of an accrual established in prior years for this matter.

The following table summarizes the changes in our pension and other post-retirement benefit plan obligations and plan assets and includes a statement of the plans' funded status:

Year ended December 31,	Pension Benefits		Other Post-retirement Benefits	
	2010	2009	2010	2009
<b>Change in benefit obligation:</b>				
Projected benefit obligation at beginning of year	\$306,571	\$295,165	\$10,859	\$10,370
Service cost	1,168	1,381	-	-
Interest cost	16,514	17,577	553	525
Actuarial loss	20,344	10,662	3,671	772
Acquisitions	-	72	-	-
Plan combinations	12,639	-	-	-
Foreign exchange effect	(4,827 )	2,958	-	-
Benefits paid	(21,121 )	(21,244 )	(1,280 )	(808 )
Projected benefit obligation at end of year	\$331,288	\$306,571	\$13,803	\$10,859
Accumulated benefit obligation at end of year	\$327,498	\$303,598	\$-	\$-
<b>Change in plan assets:</b>				
Fair value of plan assets at beginning of year	\$209,921	\$192,859	\$-	\$-
Actual return on plan assets	22,886	29,193	-	-

Acquisitions	-	60	-	-
Plan combinations	9,762	-	-	-
Foreign exchange effect	(1,005 )	1,536	-	-
Benefits paid	(21,121 )	(21,244 )	(1,280 )	(808 )
Fair value of plan assets at end of year	\$231,240	\$209,921	\$-	\$-
Funded status at end of year	\$(100,048 )	\$(96,650 )	\$(13,803 )	\$(10,859 )
<b>Amounts recognized in the balance sheet at December 31:</b>				
Non-current assets	\$290	\$244	\$-	\$-
Current liabilities	(1,050 )	(1,114 )	(834 )	(1,409 )
Non-current liabilities	(99,288 )	(95,780 )	(12,969 )	(9,450 )
<b>Total</b>	<b>\$(100,048 )</b>	<b>\$(96,650 )</b>	<b>\$(13,803 )</b>	<b>\$(10,859 )</b>

The accumulated benefit obligation and fair value of plan assets for the pension plans with accumulated benefit obligations in excess of plan assets were \$324.8 million and \$228.1 million, respectively, as of December 31, 2010 and \$301.2 million and \$207.2 million, respectively, as of December 31, 2009.

The projected benefit obligation and fair value of plan assets for the pension plans with projected benefit obligations in excess of plan assets were \$328.5 million and \$228.1 million, respectively, as of December 31, 2010 and \$304.1 million and \$207.2 million, respectively, as of December 31, 2009.

The following table summarizes the changes in our foreign pension plans' obligations and plan assets, included in the previous disclosure, and includes a statement of the foreign plans' funded status:

Year ended December 31,	Foreign Pension Benefits	
	2010	2009
<b>Change in benefit obligation:</b>		
Projected benefit obligation at beginning of year	\$80,960	\$82,253
Service cost	1,168	1,381
Interest cost	4,138	4,668
Actuarial loss (gain)	5,494	(5,947 )
Acquisitions	-	72
Plan combinations	12,639	-
Foreign exchange effect	(4,827 )	2,958
Benefits paid	(4,436 )	(4,425 )
<b>Projected benefit obligation at end of year</b>	<b>\$95,136</b>	<b>\$80,960</b>
<b>Accumulated benefit obligation at end of year</b>	<b>\$91,346</b>	<b>\$77,988</b>
<b>Change in plan assets</b>		
Fair value of plan assets at beginning of year	\$24,841	\$23,219
Actual return on plan assets	1,638	1,390
Employer contribution	3,271	3,061
Acquisitions	-	60
Plan combinations	9,762	-
Foreign exchange effect	(1,005 )	1,536
Benefits paid	(4,436 )	(4,425 )
<b>Fair value of plan assets at end of year</b>	<b>\$34,071</b>	<b>\$24,841</b>
<b>Funded status at end of year</b>	<b>\$(61,065 )</b>	<b>\$(56,119 )</b>

Expected contributions to the pension plans for 2011 are \$6.7 million. The following benefit payments are expected to be paid during the years ending December 31:

	Pension Benefits		Other
	All Plans	Foreign Plans	Post-retirement Benefits
2011	\$23,080	\$ 4,554	\$ 834
2012	22,232	4,752	895
2013	22,182	4,833	922
2014	22,228	4,923	932
2015	22,424	5,003	945
Years 2016-2020	110,002	25,782	4,534

The Company's primary investment objective for its pension plan assets is to provide a source of retirement income for the plans' participants and beneficiaries. The assets are invested with the goal of preserving principal while providing a reasonable real rate of return over the long term. Diversification of assets is achieved through strategic allocations to various asset classes. Actual allocations to each asset class vary due to periodic investment strategy changes, market value fluctuations, the length of time it takes to fully implement investment allocation positions, and the timing of benefit payments and contributions. The asset allocation is monitored and rebalanced as required, as frequently as on a quarterly basis in some instances. The following are the actual and target allocation percentages for the Company's pension plan assets:

	Actual Allocation		Target Allocation
	December 31, 2010	2009	
<b>United States Plans:</b>			
<b>Equity securities:</b>			
U.S.	34 %	39 %	32% - 42 %
International	16	12	10% - 16 %
Fixed income securities	32	34	27% - 43 %
Hedge fund	18	15	13% - 20 %
<b>Foreign Plans:</b>			
Large cap equity securities	11	15	0% - 20 %
Fixed income securities	57	83	80% - 100%
Cash and cash equivalents	32	2	0% - 5 %

The large proportion of assets in cash for foreign plans at December 31, 2010 is a temporary situation due to the transfer of assets resulting from the October settlement agreement.

The following table presents the Company's pension plan assets using the fair value hierarchy as of December 31, 2010 and 2009. The fair value hierarchy has three levels based on the reliability of the inputs used to determine fair value. Level 1 refers to fair values determined based on quoted prices in active markets for identical assets. Level 2 refers to fair values estimated using significant observable inputs, and Level 3 includes fair values estimated using significant unobservable inputs.

	Total	December 31, 2010		
		Level 1	Level 2	Level 3
