BLADEX'S PROFITS FOR THE SECOND QUARTER AND HALF-YEAR 2017 WERE \$17.5 MILLION, OR \$0.44 PER SHARE, AND \$40.9 MILLION, OR \$1.04 PER SHARE, RESPECTIVELY

PANAMA CITY, REPUBLIC OF PANAMA, July 21, 2017

Banco Latinoamericano de Comercio Exterior, S.A. (NYSE: BLX, “Bladex”, or “the Bank”), a Panama-based multinational bank originally established by the central banks of 23 Latin-American and Caribbean countries to promote foreign trade and economic integration in the Region, today announced its results for the second quarter (“2Q17”) and half-year (“1H17” or “6M17”) ended June 30, 2017.

The consolidated financial information in this document has been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

2Q17 & 6M17 Highlights

Reported results:

Bladex's Profits for the 2Q17 and 6M17 totaled \$17.5 million (-25% QoQ, -22% YoY) and \$40.9 million (-10% YoY), respectively, mainly on lower net interest income generated in 2Q17 (-15% QoQ, -23% YoY) totaling \$63.8 million in 6M17 (-18% YoY) from decreased average loan portfolio balances, reflecting lower demand in several countries of the Region during the quarter, along with the Bank's continued effort to reduce certain country, industry and client-specific exposures.

Fees and Other Income totaled \$5.3 million in 2Q17 (+42% QoQ, flat YoY) and \$9.0 million in first 6M17 (+11%), driven mostly by successful closings of two syndicated loan transactions during the 2Q17 and higher commissions YoY from letters of credit business activity.

Key performance metrics:

Year-to-date 2017 Annualized Return on Average Equity ("ROAE") was 8.1% compared to 9.4% in 1H16, on lower profitability and stronger levels of capitalization. ROAE in 2Q17 was 6.9% vs. 9.4% in 1Q17 and 9.1% in 2Q16. Annualized Return on Average Assets ("ROAA") was 1.23% in 1H17 (+2 bps YoY) and 1.08% in 2Q17 (-31 bps QoQ, -12 bps YoY).

2Q17 and 1H17 Net Interest Margin stood at 1.80% (-22 bps QoQ, -26 bps YoY), and 1.91% (-15 bps YoY), respectively, mainly from lower average lending portfolio balances and spreads, and the effects of an adjustment of the amortization of costs (forward points) associated with the hedging of foreign currency deposits.

Efficiency Ratio increased to 37% in 2Q17 (+7 pts QoQ, +14 pts YoY), and 33% in 6M17 (+5 pts YoY) on lower total income and higher, mostly non-recurring, severance expense.

The Tier 1 Basel III Capital Ratio strengthened to 20.3% at the end of 2Q17, compared to 19.0% a quarter ago, and 15.6% a year ago, reflecting higher capitalization on reduced levels of risk-weighted assets.

Commercial Portfolio & Quality:

As of June 30, 2017, end-of-period Commercial Portfolio balances stood at \$5.8 billion (-5% QoQ, -14% YoY), with 2Q17 and 1H17 average balances of \$5.7 billion (-7% QoQ, -15% YoY) and \$5.9 billion (-13% YoY), respectively, reflecting lower credit demand on subdued economic momentum, combined with elevated market liquidity and the Bank's continued focus on adjusting its portfolio concentration levels.

As of June 30, 2017, non-performing loans ("NPL") recorded a net decrease of \$2.8 million to \$62.6 million, representing 1.12% of gross loan portfolio ("Loan Portfolio") balances at the end of 2Q17, from NPL balances of \$65.4 million, or 1.14% of the Loan Portfolio, last quarter, and \$84.7 million, or 1.30% of the Loan Portfolio from last year. The coverage ratio of the total allowance for ECL to total Commercial Portfolio ending balances increased to 2.06% (+17 bps QoQ, +46 bps YoY) on lower Commercial Portfolio balances. Provisions for ECL increased \$0.7 million QoQ, reflecting the positive effects of a completed restructuring process in Panama offset by the effects of protracted progress in other ongoing restructuring negotiations, and by the deterioration of one minor exposure in Brazil, which entered judicial restructuring proceedings.

CEO's Comments

Mr. Rubens V. Amaral Jr., Bladex's Chief Executive Officer, stated the following regarding the Bank's 2Q17 results: *"Market developments during the second quarter underscored generally challenging operating conditions in our markets. The positive growth momentum in Brazil seen earlier in the year experienced a significant setback in the wake of political developments in that country. There are faint signals of an economic recovery but they are probably not strong enough to help us overcome the economy's significant challenges. This makes a scenario of emergence from the recession at a macro level this year, and a gradual strengthening of operating conditions at the business (micro) level somewhat more unlikely. This is impacting the progress of ongoing restructurings in our Brazil portfolio of non-performing loans, in stark contrast to the pace of restructuring proceedings in other countries, of which the positive resolution of our Panama NPL, is the latest example. Weak Brazil business dynamics are also having an impact on neighboring countries, where business activity remains subdued. Elsewhere in the Region, market dynamics are better supported by more moderate economic growth; however, the unusually high influx of USD liquidity into places like Argentina, Central America and the Caribbean by way of debt capital market issuances, repatriated funds and record levels of remittances, has affected local demand for US dollars, and increased the levels of prepayments of existing transactions.*

Given all these challenges, our expectations for resuming asset growth in the second quarter were not met. We are expecting signs of seasonal strengthening in the second half of the year, as historical patterns would suggest that high levels of liquidity in the region from repatriated funds and remittances are unsustainable. In view of the first half of the year's performance, we are revising our expectations for year-on-year portfolio growth, and now aim to reach at a minimum 2016 year-end portfolio levels.

This growth scenario will strengthen top line revenue in the second half of 2017. We also expect that margins will remain strong, underpinned by our lending and pricing discipline, and the steady rise in underlying market (base) rates, which tends to benefit the short-term nature of our portfolio. Our results have been impacted by this quarter's adjustment relating to the time-based recognition (i.e. amortization) of forward points for the coverage of a small number of foreign currency deposits. These deposits represent funding at attractive costs and tenors for the Bank.

Our fee-based business showed good growth with two syndication transactions successfully completed this quarter, offsetting lower income in our Letters of Credit business on account of the weaker market dynamics. Our pipeline of upcoming syndicated transactions remains strong for the coming months and quarters.

The credit quality of our book of business remains very strong, as evidenced by a slight net decline in NPLs as mentioned above. We have worked diligently over the recent quarters and years to strengthen our credit underwriting process, and to further diversify our exposure profile. A negative impact on asset growth has been part of the cost to pay, but we have managed to pro-actively de-risk from what could have been other problem credits in our books. That said, we are above provision levels that we would consider “normal” for our business in a normalized economic credit cycle. Our allowances are slightly above 2% as relates to total outstanding Commercial Portfolio balances, and conservatively reflect the losses we expect to incur given the risks identified at this point in time.

The efficiency ratio has suffered this quarter due to non-recurring effects both on the total income side (adjusted amortization of forward points) and on the expense side (severance related payments), but should fundamentally remain well on track for improvement throughout the rest of the year.

With Tier 1 capitalization above 20%, high levels of liquidity, and a solid funding base, the Bank has a strong financial position to endure a prolonged down credit cycle in the Region while maintaining acceptable levels of profitability. We remain confident and committed to achieving our long term growth and profitability goals.” Mr. Amaral concluded.

RESULTS BY BUSINESS SEGMENT

The Bank’s activities are managed and executed in two business segments, Commercial and Treasury. The business segment results are determined based on the Bank’s managerial accounting process as defined by IFRS 8 – Operating Segments, which assigns consolidated statement of financial positions, revenue and expense items to each business segment on a systemic basis.

COMMERCIAL BUSINESS SEGMENT

The Commercial Business Segment encompasses the Bank’s core business of financial intermediation and fee generation activities developed to cater to corporations, financial institutions and investors in Latin America. These activities include the origination of bilateral and syndicated credits, short-term and medium-term loans, customers’ liabilities under acceptances, loan commitments and financial guarantee contracts. Profits from the Commercial Business Segment include (i) net interest income from loans; (ii) Fees and Other Income from the issuance, confirmation and negotiation of letters of credit, guarantees and loan commitments, and through loan structuring and syndication activities; and (iii) gain on the sale of loans generated through loan intermediation activities, such as sales in the secondary market and distribution in the primary market; (iv) impairment loss (recovery) from ECL on loans at amortized cost, loan commitments and financial guarantee contracts; and (v) direct and allocated operating expenses.

The Bank’s “Commercial Portfolio” includes gross loans at amortized cost (or the “Loan Portfolio”), loan commitments and financial guarantee contracts, such as confirmed and stand-by letters of credit, and guarantees covering commercial risk; and other assets consisting mainly of customers’ liabilities under acceptances.

As of June 30, 2017, the Commercial Portfolio stood at \$5.8 billion, a 5% decrease compared to \$6.1 billion a quarter ago, and a 14% decrease compared to \$6.8 billion a year ago, mainly attributable to lower credit demand on subdued economic momentum, combined with elevated market liquidity in several countries of the Region, and the Bank's continued focus on adjusting its portfolio concentration levels, while expanding its short-term trade finance book, with 80% of the Commercial Portfolio scheduled to mature within a year and 69% represented trade finance operations at the end of June 30, 2017, both up from 77% and 67%, respectively, a quarter ago and 74% and 59%, respectively, a year ago. Consequently, average quarterly and year-to-date Commercial Portfolio balances decreased 7% QoQ and 15% YoY to reach \$5.7 billion in 2Q17, and down 13% YoY to reach \$5.9 billion in the first 6M17, respectively.

The following graphs illustrate the geographic distribution of the Bank's Commercial Portfolio, highlighting the portfolio's diversification by country of risk, and across industry segments:

Refer to Exhibit X for additional information relating to the Bank's Commercial Portfolio distribution by country, and Exhibit XII for the Bank's distribution of credit disbursements by country.

| (US\$ million) | 6M17 | 6M16 | 2Q17 | 1Q17 | 2Q16 |
|---|--------|--------|--------|--------|--------|
| Commercial Business Segment: | | | | | |
| Net interest income | \$63.3 | \$69.5 | \$30.0 | \$33.3 | \$34.3 |
| Net other income ⁽¹⁰⁾ | 8.7 | 7.8 | 5.2 | 3.5 | 5.0 |
| Total income | 72.0 | 77.3 | 35.2 | 36.8 | 39.3 |
| Impairment loss from ECL on loans and loan commitments and financial guarantees contracts | (8.5) | (12.8) | (4.3) | (4.1) | (11.5) |
| Operating expenses | (18.5) | (16.9) | (9.8) | (8.7) | (7.3) |
| Profit for the period | \$45.1 | \$47.6 | \$21.1 | \$24.0 | \$20.4 |

2017 Second Quarter and Year-to-Date results were mainly impacted by:

- i. Lower net interest income on decreased average loan portfolio balances reflecting lower demand in several countries of the Region during the quarter, along with the Bank's continued effort to reduce certain country, industry and client-specific exposures, migrating the portfolio mix towards short-term transactions primarily focused on trade finance, partly offset by the rise in market rates supporting NIM resilience;
- ii. Increased fees and commissions led by the successful closing of two syndicated transactions during 2Q17, and from higher fees from the letters of credit business during the first half of 2017;
- iii. Higher allocated operating expenses on non-recurring severance expense in 2Q17. YoY variation also impacted by lower performance-based variable compensation accrual in 2Q16.
- iv. Provisions for ECL in the Commercial Portfolio reflecting the positive effects of a completed restructuring process in Panama offset by the effects of protracted progress in other ongoing restructuring negotiations, and by the deterioration of one minor exposure in Brazil, which entered judicial restructuring proceedings.

TREASURY BUSINESS SEGMENT

The Treasury Business Segment is responsible for the Bank's funding and liquidity management, along with the management of its activities in investment securities, and the Bank's interest rate, liquidity, price and currency positions. Interest-earning assets managed by the Treasury Business Segment include liquidity positions (cash and cash equivalents), and financial instruments related to the investment management activities, consisting of financial instruments at fair value through accumulated other comprehensive income (loss) account ("FVOCI") and securities at amortized cost. The Treasury Business Segment also manages the Bank's interest-bearing liabilities, which constitute its funding sources, mainly deposits, short- and long-term borrowings and debt.

Profit from the Treasury Business Segment includes net interest income derived from the above mentioned treasury assets and liabilities, and related net other income (net results from derivative financial instruments and foreign currency exchange, gain (loss) per financial instruments at FVTPL, gain (loss) per financial instruments at FVOCI, and other income), impairment loss from ECL on investment securities, and direct and allocated operating expenses. Until the Bank's exit from its participation in investment funds during the first-half of 2016, the Treasury Business Segment also incorporated the Bank's non-core results from its participation, which were shown in the other income line item "gain (loss) per financial instruments at FVTPL".

As of June 30, 2017, treasury business assets totaled \$0.9 billion, down 34% from a quarter ago and 20% from a year ago, on lower cash and cash equivalent balances, totaling \$0.8 billion at the end of 2Q17, compared to \$1.3 billion a quarter ago and \$0.9 billion a year ago, and lower Investment Securities Portfolio (at FVOCI and at amortized cost) which decreased to \$79 million, from \$91 million a quarter ago, representing 1% of total assets, as of June 30, 2017 and March 31, 2017, and from \$180 million, or 2% of total assets a year ago, as the Bank continued to reduce its holdings to minimize market risk. The Investment Securities Portfolio consisted of readily-quoted Latin American securities, 94% of which represented sovereign or state owned risk (refer to Exhibit XI for a per-country risk distribution of the Investment Securities Portfolio).

The Bank follows the requirements for internal liquidity management limits and policies based on the Basel III Liquidity Coverage Ratio ("LCR"). Liquidity balances amounted to \$0.8 billion as of June 30, 2017, compared to \$1.2 billion as of March 31, 2017, and \$0.9 billion as of June 30, 2016, of which \$0.3 billion, or 44%, of the Bank's liquid assets at the end of 2Q17 were held in deposits with the Federal Reserve Bank of New York, with the remainder held with other highly rated financial institutions. As of these quarter-end dates, the liquid assets to total assets ratio was 12.0%, 17.3%, and 11.9%, respectively, while the liquid assets to total deposits ratio was 23.0%, 38.3%, and 28.3%, respectively.

Deposit balances increased to \$3.4 billion at the end of 2Q17, up 5% from the previous quarter and a year ago, representing 63% of total funding sources, compared to 54% and 49%, respectively. 71% of total deposits were placed by the central banks or designees (i.e.: Class A shareholders of the Bank) as of June 30, 2017. At that same date, short- and long-term borrowings and debt decreased 36% and 26% QoQ, and 60% and 27% YoY, respectively, to reach \$0.5 billion of short-term borrowings and \$1.5 billion of long-term borrowings and debt, at the end of the 2Q17, as the Bank relied more on deposits to cover its short-term funding needs as the lending book moved further towards shorter tenors. The quarterly weighted average funding cost in 2Q17 was 1.95%, compared to 1.72% in 1Q17, and 1.38% in 2Q17, up 23 bps from a quarter ago and 57 bps from a year ago, reflecting the increase in market rates, together with the effects of an adjustment of the amortization of costs associated with the hedging of foreign currency deposits (forward points), partly offset by decreased funding spreads. Similarly, year-to-date weighted average funding cost was 1.83% for the first 6M17, compared to 1.33% for the first 6M16, up 50 bps.

2017 Second Quarter and Year-to-Date results were mainly impacted by:

- i. Lower net interest income from the adjustment of amortization costs, and from loan portfolio mix-shift towards short-term exposures while funding mix maintained higher share of medium-term funding, together with the effects of the investment securities portfolio balances reduction to minimize market risk; and
- ii. Net other income positively impacted by the absence of non-core results that impacted 6M16 performance.

NET INTEREST INCOME AND MARGINS

| (US\$ million, except percentages) | 6M17 | 6M16 | 2Q17 | 1Q17 | 2Q16 |

| Net Interest Margin | 1.91% | 2.06% | 1.80% | 2.02% | 2.06% |

2017 Second Quarter and Year-to-Date Net Interest Income and margins were mainly impacted by:

- i. Lower net interest income in the Commercial Business Segment mainly due to decreased average loan portfolio balances.
- ii. Lower net interest income in the Treasury Division related to the adjustment of amortization costs, from loan portfolio mix-shift towards short-term exposures while funding mix maintained higher share of medium-term funding, together with the income effects of the investment securities portfolio balances reduction to minimize market risk.

FEES AND OTHER INCOME

Fees and Other Income includes the fee income associated with letters of credit and other contingent credits, such as guarantees and credit commitments, as well as fee income derived from loan structuring and syndication activities, together with loan intermediation and distribution activities in the primary and secondary markets.

| (US\$ million) | 6M17 | 6M16 | 2Q17 | 1Q17 | 2Q16 |

| Fees and Other Income | \$ 9.0 | \$ 8.1 | \$ 5.3 | \$ 3.7 | \$ 5.3 |

* Net of commission expenses

2017 Second Quarter and Year-to-Date Fees and Other Income were mainly impacted by:

- i. The successful closing of two syndicated transactions during 2Q17, and
- ii. Higher fees from the letters of credit business during the first half of 2017.

PORTFOLIO QUALITY AND ALLOWANCE FOR ECL ON LOANS, LOAN COMMITMENTS AND FINANCIAL GUARANTEE CONTRACTS

| (In US\$ million) | 30-Jun-17 | 31-Mar-17 | 31-Dec-16 | 30-Sep-16 | 30-Jun-16 |
|--|-----------|-----------|-----------|-----------|-----------|
| Allowance for ECL on loans at amortized cost: | | | | | |
| Balance at beginning of the period | \$ 109.9 | \$ 106.0 | \$ 106.3 | \$ 102.1 | \$ 92.1 |
| Provisions | 5.7 | 4.0 | 17.6 | 5.0 | 10.0 |
| Write-offs, net of recoveries | 0.0 | 0.0 | (17.9) | (0.8) | 0.0 |
| End of period balance | \$ 115.6 | \$ 109.9 | \$ 106.0 | \$ 106.3 | \$ 102.1 |
| Allowance for ECL on loan commitments and financial guarantee contracts: | | | | | |
| Balance at beginning of the period | \$ 5.9 | \$ 5.8 | \$ 5.4 | \$ 6.1 | \$ 4.5 |
| (Reversals) Provisions | (1.3) | 0.2 | 0.4 | (0.7) | 1.6 |
| End of period balance | \$ 4.6 | \$ 5.9 | \$ 5.8 | \$ 5.4 | \$ 6.1 |
| Total allowance for ECL on loans at amortized cost, loan commitments and financial guarantee contracts | \$ 120.2 | \$ 115.9 | \$ 111.8 | \$ 111.7 | \$ 108.2 |
| Total allowance for ECL on loans at amortized cost, loan commitments and financial guarantee contracts to Commercial Portfolio | 2.06 % | 1.89 % | 1.73 % | 1.67 % | 1.60 % |
| NPL to gross loan portfolio | 1.12 % | 1.14 % | 1.09 % | 1.31 % | 1.30 % |
| Total allowance for ECL on loans at amortized cost, loan commitments and financial guarantee contracts to NPL (times) | 1.9 | 1.8 | 1.7 | 1.3 | 1.3 |

The total allowance for ECL amounted to \$120.2 million at June 30, 2017, representing 2.06% of the total Commercial Portfolio, compared to \$115.9 million and 1.89%, respectively, as of March 31, 2017, and compared to \$108.2 million and 1.60%, respectively, as of June 30, 2016. The QoQ and YoY increases of \$4.3 million and \$12.0 million in credit allowances, respectively, were primarily associated with higher allowances assigned to performing exposures based on lifetime ECL (IFRS Rule 9 Stage 2), and NPL (IFRS Rule 9 Stage 3), partly offset by lower impairment from ECL on performing exposures assessed based on 12-month ECL (IFRS Rule 9 Stage 1), which resulted from both lower end-of-period portfolio balances, and from the overall portfolio mix shift towards shorter term trade exposures.

The total reserve coverage increases of 17 basis points QoQ and 46 basis points YoY resulted from lower Commercial Portfolio balances while aforementioned provisions for ECL increased as the net effect of a completed restructuring process in Panama was offset by the effects of protracted progress in other ongoing restructuring negotiations, and by

the deterioration of one minor exposure in Brazil, which entered judicial restructuring proceedings. As a result, NPL balances decreased to \$62.6 million, representing 1.12% of lower Loan Portfolio balances at the end of 2Q17, compared to NPL balance of \$65.4 million, or 1.14% of the Loan Portfolio a quarter ago, and \$84.7 million, or 1.30% of the Loan Portfolio, a year ago. The ratio of the total allowance for ECL on loans, loan commitments and financial guarantee contracts to NPLs was 1.9 times as of the end of June 30, 2017, compared to 1.8 times from a quarter ago, and 1.3 times a year ago.

RECENT EVENTS

Quarterly dividend payment: At a meeting held July 18, 2017, the Bank's Board of Directors approved a quarterly § common dividend of \$0.385 per share corresponding to the second quarter 2017. The dividend will be paid on August 17, 2017, to stockholders registered as of August 2, 2017.

Ratings updates: On July 19, 2017, Fitch Ratings affirmed the Bank's long- and short-term foreign currency Issuer Default Rating at 'BBB+/F2' respectively; with a "Stable" Outlook. On June 28, 2017, S&P Global Ratings affirmed the Bank's global and national scale issuer credit ratings at 'BBB/A-2' and 'mxAAA/mxA-1+', respectively, with a "Stable" Outlook. Prior to that, on June 22, 2017, S&P Global Ratings had revised Panama's Banking Industry Risk § Assessment ("BICRA") outlook to stable from negative, citing sooner-than-expected improvements in the country's regulatory framework through the introduction and adoption of Basel III capital and liquidity rules, in addition to the enhancements in norms aimed at preventing money laundering, therefore, prompted the Bank's outlook revised to stable from negative.

Notes:

-Numbers and percentages set forth in this earnings release have been rounded and accordingly may not total exactly.

-QoQ and YoY refer to quarter-on-quarter and year-on-year variations, respectively.

Footnotes:

Total operating expenses includes the following expenses line items of the consolidated statements of profit or loss:
1) salaries and other employee expenses, depreciation of equipment and leasehold improvements, amortization of intangible assets, and other expenses.

- 2) Earnings per Share (“EPS”) calculation is based on the average number of shares outstanding during each period.
- 3) ROAE refers to return on average stockholders’ equity which is calculated on the basis of unaudited daily average balances.
- 4) NIM refers to net interest margin which constitutes to net interest income divided by the average balance of interest-earning assets.
- 5) NIS refers to net interest spread which constitutes the average yield earned on interest-earning assets, less the average yield paid on interest-bearing liabilities.
- 6) Efficiency Ratio refers to consolidated operating expenses as a percentage of total income.
- 7) Market capitalization corresponds to total outstanding common shares multiplied by market close price at the end of each corresponding period.

8) Tier 1 Capital is calculated according to Basel III capital adequacy guidelines, and is equivalent to stockholders' equity excluding certain effects such as the OCI effect of the financial instruments at FVOCI. SAFE HARBOR STATEMENT

This press release contains forward-looking statements of expected future developments. The Bank wishes to ensure that such statements are accompanied by meaningful cautionary statements pursuant to the safe harbor established by the Private Securities Litigation Reform Act of 1995. The forward-looking statements in this press release refer to the growth of the credit portfolio, including the trade portfolio, the increase in the number of the Bank's corporate clients, the positive trend of lending spreads, the increase in activities engaged in by the Bank that are derived from the Bank's client base, anticipated operating profit and return on equity in future periods, including income derived from the Treasury Business Segment, the improvement in the financial and performance strength of the Bank and the progress the Bank is making. These forward-looking statements reflect the expectations of the Bank's management and are based on currently available data; however, actual experience with respect to these factors is subject to future events and uncertainties, which could materially impact the Bank's expectations. Among the factors that can cause actual performance and results to differ materially are as follows: the anticipated growth of the Bank's credit portfolio; the continuation of the Bank's preferred creditor status; the impact of increasing/decreasing interest rates and of the macroeconomic environment in the Region on the Bank's financial condition; the execution of the Bank's strategies and initiatives, including its revenue diversification strategy; the adequacy of the Bank's allowance for expected credit losses; the need for additional allowance for expected credit losses; the Bank's ability to achieve future growth, to reduce its liquidity levels and increase its leverage; the Bank's ability to maintain its investment-grade credit ratings; the availability and mix of future sources of funding for the Bank's lending

operations; potential trading losses; the possibility of fraud; and the adequacy of the Bank's sources of liquidity to replace deposit withdrawals.

The Bank's activities are managed and executed in two business segments, Commercial and Treasury. The business segment results are determined based on the Bank's managerial accounting process as defined by IFRS 8 - Operating Segments, which assigns consolidated statement of financial positions, revenue and expense items to each business segment on a systematic basis.

(1) Interest income on interest-earning assets, net of allocated cost of funds.

(2) Net other income (loss) by Business Segment consists of the following items:

- Commercial Business Segment: net fees and commissions, gain on sale of loans at amortized cost, and net related other income.

- Treasury Business Segment: net other income from derivative financial instruments and foreign currency exchange, gain (loss) per financial instruments at fair value through profit or loss, gain (loss) per financial instruments at FVTOCI, and net related other income.

(3) Operating Expenses allocation methodology assigns overhead expenses based on resource consumption by business segment. Total operating expenses includes the following line items of the consolidated statements of profit or loss: salaries and other employee expenses, depreciation of equipment and leasehold improvements, amortization of intangible assets, and other expenses.

(4) Includes loans at amortized cost, net of unearned interest and deferred fees.

(5) Includes cash and cash equivalents, financial instruments at fair value through profit or loss, financial instruments at FVTOCI and securities at amortized cost, gross of the allowance for expected credit losses.
