

ICICI BANK LTD  
Form 424B2  
June 26, 2007

**Table of Contents**

Filed pursuant to Rule 424(b)(2)

Registration No. 333-143711

A filing fee of \$155,525.93, calculated in accordance with Rule 457(r), has been transmitted to the SEC in connection with the equity shares, directly or in the form of ADSs, offered by means of this prospectus supplement, including ADSs initially offered and sold outside the United States pursuant to Regulation S that may be resold from time to time in the United States in transactions that require registration under the Securities Act of 1933, as amended, and equity shares initially offered and sold outside the United States pursuant to Regulation S that may be resold from time to time in the United States in transactions that require registration under the Securities Act of 1933, as amended, which together do not exceed aggregate proceeds of \$4.94 billion.

**Prospectus Supplement****(To Prospectus dated June 13, 2007)****ICICI BANK LIMITED****43,451,776 American Depositary Shares****Representing 86,903,552 Equity Shares**

We are offering 86,903,552 equity shares in the form of American Depositary Shares, or ADSs. Each ADS offered represents two equity shares of ICICI Bank Limited.

Our outstanding ADSs are traded on the New York Stock Exchange under the symbol IBN. The last reported sales price of our ADSs on the New York Stock Exchange on June 22, 2007 was US\$49.64 per ADS. Our equity shares are traded in India on the Bombay Stock Exchange Limited and the National Stock Exchange of India Limited. The closing price for our equity shares on the Bombay Stock Exchange Limited on June 22, 2007 was US\$23.52 assuming an exchange rate of Rs.40.55 per dollar.

**Investing in our ADSs involve certain risks, see Risk Factors beginning on page S-14.**

Neither the Securities and Exchange Commission, or the SEC, nor any state securities commission has approved or disapproved of these securities or determined if this prospectus supplement or the accompanying prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

	<b>Per ADS</b>	<b>Total</b>
Initial Price to Public	US\$ 49.25000	US\$ 2,139,999,968
Underwriting Discounts and Commissions	US\$ 0.24625	US\$ 10,700,000
Proceeds to us, before Expenses	US\$ 49.00375	US\$ 2,129,299,968

We have granted the underwriters an option exercisable within 30 days from the date of this prospectus supplement to purchase up to an aggregate of an additional 6,497,462 ADSs, representing up to an additional 12,994,924 equity shares, at the initial price to the public, less the underwriting discounts and commissions.

The underwriters are offering the ADSs subject to various conditions. The underwriters expect to deliver the ADSs in book-entry form only through the facilities of The Depository Trust Company against payment in New York, New York on a delayed basis. **The time of delivery is expected to be July 5, 2007. Any change in the time of delivery will be notified to investors through a press release which will be posted on our website at [www.icicibank.com](http://www.icicibank.com). Such notification may not occur until two or three business days before the earlier of July 5, 2007 or the new**

**Table of Contents**

You should read this prospectus supplement along with the prospectus that follows. Both documents contain information you should consider when making your investment decision. You should rely on the information contained in or incorporated by reference into this prospectus supplement and the attached prospectus. We have not, and the underwriters have not, authorized any other person to provide you with different information. If anyone does provide you with different or inconsistent information, you may not rely on it. We are not, and the underwriters are not, making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted. You should assume that the information appearing in this prospectus supplement and the attached prospectus is accurate only as of the date on the bottom of the front cover of this prospectus supplement. Our business, financial condition, results of operations and prospects may have changed since that date.

**Table of Contents**

**ABOUT THIS PROSPECTUS SUPPLEMENT**

This prospectus supplement contains the terms for this offering of American Depositary Shares. This prospectus supplement, or the information incorporated by reference in this prospectus supplement, may add, update or change information in the attached prospectus. If information in this prospectus supplement, or the information incorporated by reference in this prospectus supplement, is inconsistent with the information in the accompanying prospectus, then the information in this prospectus supplement, or incorporated by reference in this prospectus supplement, will apply and will supersede that information in, or incorporated by reference into, the accompanying prospectus. Capitalized terms used but not defined in this prospectus supplement have the meanings given to those terms in the accompanying prospectus.

It is important for you to read and consider all information contained in this prospectus supplement and the accompanying prospectus in making your investment decision. You should also read and consider the information in the documents we have referred you to under **Where You Can Find More Information About Us** in the attached prospectus.

Pursuant to the issuance and listing of our securities in the United States under registration statements filed with the United States Securities Exchange Commission, we file annual reports on Form 20-F which must include financial statements prepared under generally accepted accounting principles in the United States (US GAAP) or financial statements prepared according to a comprehensive body of accounting principles with a reconciliation of net income and stockholders' equity to US GAAP. When we first listed our securities in the United States, Indian GAAP was not considered a comprehensive body of accounting principles under US securities laws and regulations. Accordingly, our annual reports on Form 20-F for fiscal years 2000 through 2005 have included US GAAP financial statements. However, pursuant to a significant expansion of Indian accounting standards, Indian GAAP constitutes a comprehensive body of accounting principles. Accordingly, we have included consolidated financial statements prepared according to Indian GAAP, with a reconciliation of net income and stockholders' equity to US GAAP and a description of significant differences between Indian GAAP and US GAAP, in our annual reports for fiscal 2006 and fiscal 2007.

Unless otherwise stated in this prospectus supplement or unless the context otherwise requires, references in this prospectus supplement to **we**, **our**, **us** and **the Company** are to ICICI Bank Limited and its consolidated subsidiaries and other consolidated entities. References in this prospectus to **ICICI Bank** are to ICICI Bank Limited on an unconsolidated basis. References in this prospectus to **ICICI** are to ICICI Limited prior to its amalgamation with ICICI Bank Limited.

In this prospectus supplement, references to **US** or **United States** are to the United States of America, its territories and its possessions. References to **India** are to the Republic of India. References to **\$** or **US\$** or **dollars** or **US dollars** are to the legal currency of the United States and references to **Rs.** or **rupees** or **Indian rupees** are to the legal currency of India. References to a particular **fiscal year** are to our fiscal year ended March 31 of such year.

Except as otherwise stated in this prospectus supplement, all translations from Indian rupees to US dollars are based on the noon buying rate in the City of New York on March 30, 2007, for cable transfers in Indian rupees as certified for customs purposes by the Federal Reserve Bank of New York which was Rs. 43.10 per \$1.00. No representation is made that the Indian rupee amounts have been, could have been or could be converted into US dollars at such a rate or any other rate. Any discrepancies in any table between totals and sums of the amounts listed are due to rounding.

**Table of Contents****SUMMARY**

*You should read the following summary together with the risk factors and the more detailed information about us and our financial results included elsewhere in this prospectus supplement or incorporated by reference.*

**Overview**

We offer products and services in the areas of commercial banking to retail and corporate customers (both domestic and international), treasury and investment banking and other products like insurance and asset management. In fiscal 2007, we made a net profit of Rs. 27.6 billion (US\$640 million) compared to a net profit of Rs. 24.2 billion (US\$562 million) in fiscal 2006. At year-end fiscal 2007, we had assets of Rs. 3,943.3 billion (US\$91.5 billion) and a net worth of Rs. 239.6 billion (US\$5.6 billion). At year-end fiscal 2007, ICICI Bank was the second-largest bank in India and the largest bank in the private sector in terms of total assets. At May 15, 2007, ICICI Bank had the largest market capitalisation among all banks in India.

Our commercial banking operations for retail customers consist of retail lending and deposits, private banking, distribution of third party investment products and other fee-based products and services, as well as issuance of unsecured redeemable bonds. We provide a range of commercial banking and project finance products and services, including loan products, fee and commission-based products and services, deposits and foreign exchange and derivatives products to India's leading corporations, growth-oriented middle market companies and small and medium enterprises. In addition to foreign exchange and derivatives products for our customers, our treasury operations include maintenance and management of regulatory reserves and proprietary trading in equity and fixed income. We also offer agricultural and rural banking products. ICICI Securities and ICICI Securities Primary Dealership are engaged in equity underwriting and brokerage and primary dealership in government securities respectively. ICICI Securities owns ICICIDirect.com, an online brokerage platform. Our venture capital and private equity fund management subsidiary, ICICI Venture Funds Management Company manages funds. We provide a wide range of life and general insurance and asset management products and services, respectively, through our subsidiaries ICICI Prudential Life Insurance Company Limited, ICICI Lombard General Insurance Company Limited and ICICI Prudential Asset Management Company Limited. According to data published by the Insurance Regulatory and Development Authority of India, ICICI Prudential Life Insurance Company had a retail market share of about 28% in new business written (on weighted received premium basis) by private sector life insurance companies and about 9.9% in new business written (on weighted received premium basis) by all life insurance companies in India during fiscal 2007. According to data published by the Insurance Regulatory and Development Authority of India, ICICI Lombard General Insurance Company Limited had a market share of about 34% in gross written premium among the private sector general insurance companies and 12% among all general insurance companies in India during fiscal 2007. ICICI Prudential Life Insurance Company and ICICI Lombard General Insurance Company were the market leaders among private sector life and general insurance companies respectively in fiscal 2007. According to data published by the Association of Mutual Funds in India, ICICI Prudential Asset Management Company Limited was among the top two mutual funds in India in terms of total funds under management at April 30, 2007 with a market share of over 12%. We cross-sell the products of our insurance and asset management subsidiaries to our customers.

We believe that the international markets present a growth opportunity and have, therefore, expanded the range of our commercial banking products to international customers. We currently have subsidiaries in the United Kingdom, Canada and Russia, branches in Singapore, Dubai, Sri Lanka, Hong Kong, Bahrain and Qatar and representative offices in the United States, China, United Arab Emirates, Bangladesh, South Africa, Malaysia, Thailand and Indonesia. Our subsidiary in the United Kingdom has established a branch in Antwerp, Belgium and has received regulatory approvals to establish a branch in Frankfurt, Germany.

We deliver our products and services through a variety of channels, ranging from bank branches and ATMs to call centers and the Internet. At year-end fiscal 2007, we had a network of 710 branches, 45 extension counters and 3,271 ATMs across several Indian states. The Sangli Bank Limited, an unlisted private sector bank with over 190 branches and extension counters merged with us effective April 19, 2007.

## **Table of Contents**

### **Strategy**

Our objective is to enhance our position as a premier provider of banking and other financial services in India and to leverage our competencies in financial services and technology to develop an international business franchise.

The key elements of our business strategy are to:

focus on quality growth opportunities by:

maintaining and enhancing our strong retail franchise;

maintaining and enhancing our strong corporate franchise;

building an international presence;

building a rural banking franchise; and

strengthening our insurance and asset management businesses;  
emphasize conservative risk management practices and enhance asset quality;

use technology for competitive advantage; and

attract and retain talented professionals.

ICICI Bank's legal name is ICICI Bank Limited but we are known commercially as ICICI Bank. ICICI Bank was incorporated on January 5, 1994 under the laws of India as a limited liability corporation. The duration of ICICI Bank is unlimited. Our principal corporate office is located at ICICI Bank Towers, Bandra-Kurla Complex, Mumbai 400051, India, our telephone number is +91 22 2653 1414 and our website address is [www.icicibank.com](http://www.icicibank.com). Our agent for service of process in the United States is Mr. G.V.S Ramesh, Joint General Manager, ICICI Bank Limited, New York Representative Office, 500 Fifth Avenue, Suite 2830, New York, New York 10110. The information on our website is not a part of this prospectus supplement.

### **Recent Developments**

Our board of directors has, subject to the receipt of all regulatory approvals, approved the transfer of our equity shareholding in ICICI Prudential Life Insurance Company Limited, ICICI Lombard General Insurance Company Limited, ICICI Prudential Asset Management Company Limited and ICICI Prudential Trust Limited to a proposed new subsidiary. ICICI Bank proposes to transfer its aggregate investment in these companies of Rs. 22.28 billion at year-end fiscal 2007 and any further investments that may be made by us prior to such transfer, to the proposed new subsidiary at the book value of these investments in our books on the date of transfer. The proposed new subsidiary proposes to raise equity capital through private placements or an initial public offering to meet the future capital requirements of the insurance subsidiaries. Pursuant to initiation of discussions with potential investors for investment in the proposed new subsidiary, we have received definitive offers from investors for subscription to equity shares of the proposed new subsidiary and for entering into definitive agreements for this purpose. The subscription amount is Rs. 26.50 billion towards fresh issue of shares by the proposed new subsidiary, and the investors would thereby acquire a collective stake of 5.9% in the proposed new subsidiary, valuing it at Rs. 446.00 billion on a post-issue basis. The arrangement is subject to receipt of regulatory and other approvals including that of the Reserve Bank of India, the Insurance Regulatory & Development Authority and the Foreign Investment Promotion Board, and would terminate failing receipt of such approvals within a mutually agreed date. While we have not received any official

**Table of Contents**

communication from the Foreign Investment Promotion Board in respect of our application, we have been given to understand that our application has not been approved by the Foreign Investment Promotion Board at its meeting on June 22, 2007. We will, in consultation with our advisors, evaluate the further steps to be taken to obtain the requisite approvals in this regard. An affiliate of Goldman Sachs International, one of the underwriters for this ADS Offering, has presented a definitive offer to subscribe for shares constituting 2.02% of the post-issue equity capital of the proposed new subsidiary. Naturally, any such implied valuation may vary over time depending upon the business of the proposed new subsidiary, the nature of the financing round and other elements. See Risk Factors Risks Relating to Our Business We have proposed a reorganization of our holdings in our insurance and asset management subsidiaries and our inability to implement this reorganization as well as the significant additional capital required by these businesses may adversely impact our business and the price of our Equity Shares .

**THE OFFERING**

ADSs offered	43,451,776 ADSs representing 86,903,552 equity shares, constituting approximately 29% of our issued and outstanding equity shares upon completion of both the Indian public offering and this ADS offering (assuming no exercise of the underwriters over-allotment option in either offering). This ADS offering is conditional upon the completion of the Indian public offering described below, which condition may be waived by mutual agreement of the underwriters and ourselves, provided that all relevant Indian regulations are complied with. The Indian public offering is subject to customary conditions and there is no assurance that the Indian public offering will close.
Over-allotment option granted by us	We have granted the underwriters an option exercisable within 30 days from the date of this prospectus to purchase up to an aggregate of an additional 6,497,462 ADSs, representing an additional 12,994,924 equity shares, at the initial price to the public, less the underwriting discount.
The ADSs	Each offered ADS represents two equity shares of par value Rs. 10 per share. The offered ADSs are evidenced by American Depositary Receipts.
ADSs to be outstanding after this offering	156,079,436 (assuming no exercise of the underwriters over-allotment option to purchase additional ADSs) representing 312,158,872 equity shares.
Equity shares to be outstanding after this offering	1,084,424,533 (assuming no exercise of the underwriters over-allotment option in either the Indian public offering or the ADS offering). The total number of equity shares issued may be required to be adjusted <i>inter alia</i> for the Rs. 50 per equity share discount to be offered to existing retail shareholders and retail bidders, pursuant to completion of bookbuilding process.
Offering price	The offered ADSs are being offered at a price of US\$49.25 per ADS.
Depository	Deutsche Bank Trust Company Americas.
Use of proceeds	We intend to use the net proceeds of this offering for future asset growth and compliance with regulatory requirements. The objects of the offering are to augment our capital base to meet the capital requirements arising out of growth in our assets, primarily our loan and investment portfolio due to the growth of the Indian economy, compliance with regulatory requirements and for other general corporate purposes including meeting the expenses of the ADS offering.
Listing	We are listing the offered ADSs on the New York Stock Exchange. Our outstanding equity shares are principally traded in India on the Bombay Stock Exchange Limited and the National Stock Exchange of India Limited.
New York Stock Exchange symbol for ADSs	IBN

**Table of Contents**

Dividends	<p>The declaration, amount and payment of dividends are subject to the recommendation of our board of directors and the approval of our shareholders. Under Indian regulations currently in force, the declaration of dividends by banks is subject to certain additional conditions. If we comply with such conditions, we are allowed to declare a dividend but only up to a certain percentage of our profits. For any dividends beyond such percentage, we are required to obtain permission from the Reserve Bank of India. Holders of equity shares and ADSs will be entitled to dividends paid, if any. For fiscal 2005, we paid a dividend, excluding dividend tax, of Rs. 7.50 per equity share. For fiscal 2006, in addition to the dividend, excluding dividend tax, of Rs. 7.50 per equity share for the year, we paid a special dividend, excluding dividend tax, of Rs. 1.00 per equity share. For fiscal 2007, we have proposed a dividend, excluding dividend tax, of Rs. 8.50 per equity share, which is subject to the approval of our shareholders. See also Dividends .</p>
Voting rights	<p>The ADSs will have no voting rights. Under the deposit agreement, the depository will vote the equity shares deposited with it as directed by our board of directors. See Restriction on Foreign Ownership of Indian Securities .</p>
Delivery and Settlement	<p>It is expected that delivery of the ADSs to the underwriters will be made against payment on a delayed basis. <b>The time of delivery is expected to be July 5, 2007. Any change in the time of delivery will be notified to investors through a press release which will be posted on our website at <a href="http://www.icicibank.com">www.icicibank.com</a>. Such notification may not occur until two or three business days before the earlier of July 5, 2007 or the new time of delivery.</b> Rule 15c6-1 under the Securities Exchange Act of 1934, as amended, generally requires that securities trades in the secondary market settle in three business days, unless the parties to the trade expressly agree otherwise. Accordingly, purchasers who wish to trade ADSs on any day prior to the third business day before the delivery of the ADSs will be required, by virtue of the fact that the ADSs initially will settle on a delayed basis, to specify an alternate settlement cycle at the time of any such trade, or to make any necessary arrangements to ensure that ADSs are available on the third business day after trading for settlement, to prevent a failed settlement. Purchasers of ADSs who wish to make such trades should consult their own advisors. <b>Purchasers who are not able to borrow ADSs or make any other necessary arrangements to prevent a failed settlement may not be able to make any trades of ADSs prior to the third business day before the delivery of the ADSs to the underwriters.</b></p>

**Table of Contents**

**Public Offering in India**

We have obtained the approval of our shareholders through postal ballot to issue equity shares up to an aggregate par value of Rs. 3,187.5 million, including equity shares issued pursuant to over-allotment options granted to the underwriters, which represents 25.0% of our authorized equity share capital. Part of the equity shares will be offered in India and other jurisdictions outside the US, where permitted, under an Indian prospectus filed with the Registrar of Companies, or the RoC, in India (the Indian public offering). Another part of the equity shares will be offered as ADSs representing equity shares to the public in the United States under this prospectus. Approximately 94,663,600 equity shares are expected to be sold in the Indian public offering, with an over-allotment option of 14,197,011 equity shares. The issue price of the equity shares to institutional investors will be Rs. 940.0 (US\$23.1) per equity share, with a portion of the equity shares being sold at a discount of Rs. 50 (US\$1.2) per equity share to retail investors. The allocation between the retail investors and other investors is expected to result in gross proceeds from the Indian public offering of approximately Rs. 87.5 billion (or US\$2.14 billion) (or approximately Rs. 100.6 billion (or US\$2.46 billion) assuming the over-allotment option is fully exercised). The ADS offering is conditional on the completion of the Indian public offering but not vice versa, which condition may be waived by mutual agreement of the underwriters and ourselves, provided that all relevant Indian regulations are complied with. The Indian public offering is subject to customary conditions and there is no assurance that the Indian public offering will close. We, in our discretion, may decide to withdraw the ADS offering at any time.

The prospectus used for the Indian public offering may not be distributed or made available in the United States. The prospectus may also not be distributed in any other jurisdiction outside India where such distribution would be unlawful.

**Table of Contents****SELECTED CONSOLIDATED FINANCIAL AND OPERATING DATA**

Pursuant to the issuance and listing of our securities in the United States under registration statements filed with the United States Securities Exchange Commission, we file annual reports on Form 20-F which must include financial statements prepared under generally accepted accounting principles in the United States (US GAAP) or financial statements prepared according to a comprehensive body of accounting principles with a reconciliation of net income and stockholders' equity to US GAAP. When we first listed our securities in the United States, Indian GAAP was not considered a comprehensive body of accounting principles under US securities laws and regulations. Accordingly, our annual reports on Form 20-F for fiscal years 2000 through 2005 have included US GAAP financial statements. However, pursuant to a significant expansion of Indian accounting standards, Indian GAAP has subsequently been considered to constitute a comprehensive body of accounting principles. Accordingly, beginning fiscal 2006, we have included in our annual report on Form 20-F, consolidated financial statements prepared according to Indian GAAP, which varies in certain respects from US GAAP. For a reconciliation of net income and stockholders' equity to US GAAP, a description of significant differences between Indian GAAP and US GAAP and certain additional information required under US GAAP, see notes 21 and 22 to our consolidated financial statements included in our annual report on Form 20-F for the fiscal year ended March 31, 2007 filed on June 11, 2007, as amended by Form 20-F/A filed on June 13, 2007, which is incorporated by reference in the accompanying prospectus. For selected financial data in accordance with US GAAP see Selected Financial Data in accordance with US GAAP.

The following tables set forth our summary financial and operating data on a consolidated basis. The summary data for fiscal 2003 through fiscal 2007 have been derived from our consolidated financial statements. Certain reclassifications have been made in the financial statements of prior years to conform to classifications used in the current year. These changes have no impact on previously reported results of operations or stockholders' equity. The accounting and reporting policies used in the preparation of our financial statements reflect general industry practices and conform with Indian GAAP, including the Accounting Standards issued by the Institute of Chartered Accountants of India, guidelines issued by the Reserve Bank of India, the Insurance Regulatory and Development Authority and the National Housing Bank as applicable to ICICI Bank and specific subsidiaries and joint ventures. The following discussion is based on our audited consolidated financial statements and accompanying notes prepared in accordance with Indian GAAP.

The consolidated financial statements for fiscal 2003 were jointly audited by N.M. Raiji & Co., Chartered Accountants and S.R. Batliboi & Co., Chartered Accountants, for fiscal 2004, 2005 and 2006 by S.R. Batliboi & Co., Chartered Accountants, and for fiscal 2007 by BSR & Co. Chartered Accountants, under auditing standards issued by the Institute of Chartered Accountants of India. The financial position as of March 31, 2006 and 2007 and the related consolidated profit and loss account and the consolidated cash flows for each of the years in the three-year period ended March 31, 2007 have also been audited by KPMG India, an independent registered public accounting firm, in accordance with the standards of the U.S. Public Company Accounting Oversight Board.

Our annual report prepared and distributed to our shareholders under Indian law and regulations and our red herring prospectus filed with the Securities & Exchange Board of India for issue of equity shares in India include unconsolidated Indian GAAP financial statements and analysis of our results or operations and financial condition based on unconsolidated Indian GAAP financial statements.

**Table of Contents**

You should read the following data with the more detailed information contained in Operating and Financial Review and Prospects and our consolidated financial statements. Historical results do not necessarily predict our results in the future.

**Operating Results Data**

The following table sets forth, for the periods indicated, our operating results data.

	<b>Year Ended March 31,</b>

- (1) Rupee amounts for fiscal 2007 have been translated into US dollars using the noon buying rate of Rs. 43.10 = US\$1.00 in effect on March 30, 2007.
- (2) Interest on advances represents interest on rupee and foreign currency loans and advances (including bills) and hire purchase receivables and gains on sell-down of loans. Commission paid to direct marketing agents/ dealers for origination of retail automobile loans which was being reduced from Interest Income up to fiscal 2006 has been reclassified to Direct marketing agency expenses .
- (3) Interest income includes gains on the sell-down of loans. In February 2006, the Reserve Bank of India issued guidelines on accounting for securitization of standard assets. In accordance with these guidelines, with effect from February 1, 2006, we account for any loss arising on securitization immediately at the time of sale and the profit/premium arising on account of securitization is

**Table of Contents**

amortized over the life of the asset. Prior to February 1, 2006, profit arising on account of securitization was recorded at the time of sale.

- (4) As required by the Reserve Bank of India's circular no. DBOD.BP.BC.87/21.04.141/2006-07 dated April 20, 2007, we have deducted the amortization of premium on government securities, which was earlier included in Provisions and contingencies, from Non interest income. Prior period figures have been reclassified to conform to the current classification.
- (5) Operating expenses for fiscal 2003 includes Rs. 256 million (US\$6 million) and operating expenses for fiscal years 2004, 2005, 2006 and 2007 include Rs. 384 million (US\$9 million) in each year on account of amortization of expenses related to our early retirement option scheme over a period of five years as approved by the Reserve Bank of India.
- (6) The amount of premium ceded on re-insurance has been reclassified from expenses pertaining to insurance business and netted off from non-interest income.
- (7) Represents net profit/(loss) before dilutive impact.
- (8) Represents net profit/(loss) adjusted for full dilution. Options to purchase 12,610,275, 1,098,225, 5,000 and 123,500 equity shares granted to employees at a weighted average exercise price of Rs. 154.7, Rs. 266.6, Rs. 569.6 and Rs. 849.2 were outstanding in fiscal 2003, 2004, 2006 and 2007 respectively, but were not included in the computation of diluted earnings per share because the exercise price of the options was greater than the average market price of the equity shares during the period.
- (9) In India, dividends for a fiscal year are normally declared and paid in the following year. We declared a dividend of Rs. 7.50 per equity share for each of fiscal 2003 and fiscal 2004, which was paid out in August 2003 and in September 2004, i.e., in fiscal 2004 and in fiscal 2005 respectively. We declared a dividend of Rs. 8.50 per equity share for each of fiscal 2005 and fiscal 2006, which was paid out in August 2005 and in July 2006 respectively i.e., in fiscal 2006 and in fiscal 2007. The dividend per equity share shown above is based on the total amount of dividends declared for the year. In US dollars, the dividend was US\$0.23 per equity share for fiscal 2007. We have declared a dividend of Rs. 10.00 per equity share for fiscal 2007 which is subject to the approval of shareholders. The following table sets forth, for the periods indicated, selected income statement data expressed as a percentage of average total assets for the respective period.

Edgar Filing: ICICI BANK LTD - Form 424B2

- (1) Rupee amounts at March 31, 2007 have been translated into US dollars using the noon buying rate of Rs. 43.10 = US\$1.00 in effect at March 30, 2007.
- (2) Includes suspended interest and claims received from Export Credit Guarantee Corporation of India/ Deposit Insurance Credit Guarantee Corporation on working capital loans.

S-11

---

**Table of Contents**

- (3) ICICI had issued preference share capital redeemable at face value after 20 years. For these preference shares, the notification dated April 17, 2002 from Ministry of Finance, government of India, issued on the recommendation of the Reserve Bank of India, under Section 53 of the Banking Regulation Act, 1949 had exempted us from the restriction of section 12(1) of the Banking Regulation Act, 1949, which prohibits the issue of preference shares by banks, for a period of five year. We have applied to the Reserve Bank of India for making a recommendation to central government for continuation of such exemption.
- (4) For fiscal years 2003 through 2007, the average balances are the average of quarterly balances outstanding at the end of March of the previous fiscal year and the end of June, September, December and March of that fiscal year.
- (5) Represents the average of the quarterly balance of total liabilities and minority interest.
- (6) Represents the ratio of total dividends paid on equity share capital, exclusive of dividend distribution tax, as a percentage of net income.
- (7) Represents the difference between yield on average interest-earning assets and cost of average interest-bearing liabilities. Yield on average interest-earning assets is the ratio of interest income to average interest-earning assets. Cost of average interest-bearing liabilities is the ratio of interest expense to average interest-bearing liabilities.
- (8) Represents the ratio of net interest income to average interest-earning assets. The difference in net interest margin and spread arises due to the difference in the amount of average interest-earning assets and average interest-bearing liabilities. If average interest-earning assets exceed average interest-bearing liabilities, net interest margin is greater than spread, and if average interest-bearing liabilities exceed average interest-earning assets, net interest margin is less than spread.
- (9) Represents the ratio of non-interest expense (excluding direct marketing agency expenses, lease depreciation and expenses pertaining to insurance business) to the sum of net interest income and non-interest income (net of lease depreciation).
- (10) Represents the ratio of non-interest expense (excluding direct marketing agency expenses, lease depreciation and expenses pertaining to insurance business) to average total assets.
- (11) ICICI Bank's capital adequacy is computed in accordance with the Reserve Bank of India's guidelines and is based on unconsolidated financial statements prepared in accordance with Indian GAAP. At March 31, 2007, ICICI Bank's total capital adequacy ratio was 11.69% with a Tier 1 capital adequacy ratio of 7.42% and a Tier 2 capital adequacy ratio of 4.27%. Foreign currency bonds amounting to Rs. 32.3 billion (US\$750 million) raised for Upper Tier-II capital have been excluded from the above capital adequacy ratio computation, pending clarification required by Reserve Bank of India regarding certain terms of these bonds. If these bonds were considered as Tier-II capital, the total capital adequacy ratio would be 12.81%.
- (12) Includes general provision on standard assets.

**Selected Financial Data in accordance with US GAAP**

The following table sets forth, certain selected financial data under generally accepted accounting principles adopted in the United States.

**At or for the Year Ended March 31,**

2003	2004	2005	2006	2007	2007 <sup>(1)</sup>
------	------	------	------	------	---------------------

(1) Rupee amounts for fiscal 2007 have been translated into US dollars using the noon buying rate of Rs. 43.10 = US\$1.00 in effect on March 30, 2007.

(2) Represents net income/(loss) before dilutive impact.

(3) Represents net profit/(loss) adjusted for full dilution. Options to purchase 12,610,275, 1,098,225, 5,000 and 123,500 equity shares granted to employees at a weighted average exercise price of Rs. 154.7, Rs. 266.6, Rs. 569.6 and Rs. 849.2 were outstanding in fiscal 2003, 2004, 2006 and 2007 respectively, but were not included in the computation of diluted earnings per share because the exercise price of the options was greater than the average market price of the equity shares during the period. In fiscal 2003, we reported a net loss and accordingly all outstanding options at year-end fiscal 2003 are anti-dilutive.

**Table of Contents**

(4) In India, dividends for a fiscal year are normally declared and paid in the following year. We declared a dividend of Rs. 7.50 per equity share for each of fiscal 2003 and fiscal 2004, which was paid out in August 2003 and in September 2004, i.e., in fiscal 2004 and in fiscal 2005 respectively. We declared a dividend of Rs. 8.50 per equity share for each of fiscal 2005 and fiscal 2006, which was paid out in August 2005 and in July 2006 respectively i.e., in fiscal 2006 and in fiscal 2007. The dividend per equity share shown above is based on the total amount of dividends paid out on equity shares during the year, exclusive of dividend tax. This was different from the dividend declared for the year. In US\$, the dividend was US\$0.20 per equity share for fiscal 2007. We have declared We have declared a dividend of Rs. 10.00 per equity share for fiscal 2007 which will be paid in fiscal 2008 subject to the approval of our shareholders.

**Table of Contents****RISK FACTORS**

*Investing in the securities offered using this prospectus involves risk. You should consider carefully the risks described below, together with the risks as described in the documents incorporated by reference into this prospectus supplement. See *Incorporation of Documents by Reference* in the accompanying prospectus. If any of these risks actually occur you may lose all or part of your investment.*

**Risks Relating to India*****A slowdown in economic growth or rise in interest rates in India could cause our business to suffer.***

Any slowdown in the Indian economy or volatility of global commodity prices, in particular oil and steel prices, could adversely affect our borrowers and contractual counterparties. As our commercial banking operations for retail customers are important to our business and our agricultural loan portfolio is increasingly important to our business, any slowdown in the growth of the housing, automobiles and agricultural sectors could adversely impact our business. Since 2006, interest rates in the Indian economy have increased significantly and we have recently experienced a slowdown in disbursements of housing loans and automobile loans. While we believe that there continues to be robust growth potential for retail loans, a slowdown in demand for loans from retail customers, including due to higher interest rates, could adversely impact our business. Slowdown in economic growth could result in lower credit demand and higher defaults among corporate, retail and rural borrowers, which could adversely impact our business, our financial performance, our stockholders' equity, our ability to implement our strategy and the price of our equity shares and ADSs.

***A significant increase in the price of crude oil could adversely affect the Indian economy, which could adversely affect our business.***

India imports approximately 75.0% of its requirements of crude oil, which were approximately 31.9% of total imports during the period April 2006-February 2007 and 31.3% of total imports in fiscal 2006. Since 2004, there has been a sharp increase in global crude oil prices due to both increased demand and pressure on production and refinery capacity, and political and military tensions in key oil-producing regions. The full burden of the oil price increase has not been passed to Indian consumers and has been substantially absorbed by the government and government-owned oil marketing companies. While global crude prices have moderated from their peak levels, sustained high levels, further increases or volatility of oil prices and the pass-through of increases to Indian consumers could have a material negative impact on the Indian economy and the Indian banking and financial system in particular, including through a rise in inflation and market interest rates and a higher trade deficit. This could adversely affect our business including our liquidity, our ability to grow, the quality of our assets, our financial performance, our stockholders' equity, our ability to implement our strategy and the price of our equity shares and ADSs.

***A significant change in the Indian government's economic liberalization and deregulation policies could adversely affect our business and the price of our equity shares and ADSs.***

Our assets and customers are predominantly located in India. The Indian government has traditionally exercised and continues to exercise a dominant influence over many aspects of the economy. Government policies could adversely affect business and economic conditions in India, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

***Financial instability in other countries, particularly emerging market countries and countries where we have established operations, could adversely affect our business and the price of our equity shares and ADSs.***

The Indian economy is influenced by economic and market conditions in other countries, particularly emerging market countries in Asia. We have also established operations in several other countries. A loss of investor confidence in the financial systems of other emerging markets and countries where we have established operations or any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector, our

**Table of Contents**

business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

***If regional hostilities, terrorist attacks or social unrest in some parts of the country increase, our business and the price of our equity shares and ADSs could be adversely affected.***

India has from time to time experienced social and civil unrest and hostilities both internally and with neighboring countries. In the past, there have been military confrontations between India and Pakistan. India has also experienced terrorist attacks in some parts of the country. These hostilities and tensions could lead to political or economic instability in India and adversely affect our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

***Trade deficits could adversely affect our business and the price of our equity shares and ADSs.***

India's trade relationships with other countries and its trade deficit, driven to a major extent by global crude oil prices, may adversely affect Indian economic conditions. If trade deficits increase or are no longer manageable because of the rise in global crude oil prices or otherwise, the Indian economy, and therefore our business, our financial performance, our stockholders' equity and the price of our equity shares and ADSs could be adversely affected.

***Natural calamities could adversely affect the Indian economy, or the economy of other countries where we operate, our business and the price of our equity shares and ADSs.***

India has experienced natural calamities like earthquakes, floods and drought in the past few years. The extent and severity of these natural disasters determine their impact on the Indian economy. For example, in fiscal 2003, many parts of India received significantly less than normal rainfall. As a result of the drought conditions in the economy during fiscal 2003, the agricultural sector recorded a negative growth of 7.2%. Also, the erratic progress of the monsoon in fiscal 2005 adversely affected sowing operations for certain crops and resulted in a decline in the growth rate of the agricultural sector from 10.0% in fiscal 2004 to negligible growth in fiscal 2005. The agricultural sector grew by 6.0% in fiscal 2006 and by 2.7% in fiscal 2007. Further prolonged spells of below or above normal rainfall or other natural calamities could adversely affect the Indian economy and our business, especially in view of our strategy of increasing our exposure to rural India. Similarly natural calamities in other countries where we operate could affect the economies of those countries and our operations in those countries.

***Financial difficulty and other problems in certain financial institutions in India could adversely affect our business and the price of our equity shares and ADSs.***

As an Indian bank, we are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is sometimes referred to as "systemic risk", may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Any such difficulties or instability of the Indian financial system in general could create an adverse market perception about Indian financial institutions and banks and adversely affect our business. See also "Overview of the Indian Financial Sector" in our annual report on Form 20-F for the fiscal year ended March 31, 2007 filed on June 11, 2007, as amended by Form 20-F/A filed on June 13, 2007, which is incorporated by reference in the accompanying prospectus. As the Indian financial system operates within an emerging market, it faces risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. For example, in April 2003, unsubstantiated rumors, believed to have originated in Gujarat, a state in India, alleged that we were facing liquidity problems. Although our liquidity position was sound, we witnessed higher than normal deposit withdrawals on account of these unsubstantiated rumors for several days in April 2003. We successfully controlled the situation in this instance, but any failure to control such situations in the future could result in high volumes of deposit withdrawals which would adversely impact our liquidity position.

**Table of Contents*****A decline in India's foreign exchange reserves may affect liquidity and interest rates in the Indian economy which could adversely impact us.***

A decline in India's foreign exchange reserves could result in reduced liquidity and higher interest rates in the Indian economy, which could adversely affect our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs. See also **Risks Relating to Our Business**.

***Any downgrading of India's debt rating by an international rating agency could adversely affect our business, our liquidity and the price of our equity shares and ADSs.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely affect our business and limit our access to capital markets and decrease our liquidity.

**Risks Relating to Our Business*****Our banking and trading activities are particularly vulnerable to interest rate risk and volatility in interest rates could adversely affect our net interest margin, the value of our fixed income portfolio, our income from treasury operations, the quality of our loan portfolio and our financial performance.***

As a result of certain reserve requirements of the Reserve Bank of India, we are more structurally exposed to interest rate risk than banks in many other countries. See **Supervision and Regulation** **Legal Reserve Requirements** in our annual report on Form 20-F for the fiscal year ended March 31, 2007 filed on June 11, 2007, as amended by Form 20-F/A filed on June 13, 2007, which is incorporated by reference in the accompanying prospectus. These requirements result in our maintaining a large portfolio of fixed income government of India securities, and we could be materially adversely impacted by a rise in interest rates, especially if the rise were sudden or sharp. These requirements also have a negative impact on our net interest income and net interest margin because we earn interest on a portion of our assets at rates that are generally less favorable than those typically received on our other interest-earning assets. If the yield on our interest-earning assets does not increase at the same time or to the same extent as our cost of funds, or if our cost of funds does not decline at the same time or to the same extent as the yield on our interest-earning assets, our net interest income and net interest margin is adversely impacted. During the last quarter of fiscal 2007, the Indian markets experienced volatility and sharp increases in interest rates and we experienced a sharp increase in our funding costs, which may adversely impact our net interest income, net interest margin and financial performance during fiscal 2008. We are also exposed to interest rate risk through our treasury operations and our subsidiary, ICICI Securities Primary Dealership Limited, which is a primary dealer in government of India securities. A rise in interest rates or greater interest rate volatility could adversely affect our income from treasury operations or the value of our fixed income securities trading portfolio. Sharp and sustained increases in the rates of interest charged on floating rate home loans, which are a material proportion of our loan portfolio, would result in extension of loan maturities and higher monthly installments due from borrowers, which could result in higher rates of default in this portfolio.

***If we are not able to control the level of non-performing assets in our portfolio, our business will suffer.***

Since 2001, we have experienced rapid growth in our retail loan portfolio. Recently, we have experienced rapid growth in the portfolio of non-collateralized retail loans including unsecured personal loans and the proportion of unsecured personal loans and credit card receivables in our retail loan has increased significantly. See **Business Overview of ICICI Bank's Products and Services** **Commercial Banking for Retail Customers**. Various factors, including a rise in unemployment, prolonged recessionary conditions, a sharp and sustained rise in interest rates, developments in the Indian economy, movements in global commodity markets and exchange rates and global competition could cause an increase in the level of non-performing assets on account of these retail loans and have a material adverse impact on the quality of our loan portfolio. In addition, under the directed lending norms of the Reserve Bank of India, we are required to extend 50.0% of our residual adjusted net bank credit (excluding the advances of ICICI at year-end fiscal 2002) to certain eligible sectors, which are categorized as **priority sectors**. See **Business** **Loan**

**Table of Contents**

**Portfolio Directed Lending** . We may experience a significant increase in non-performing assets in our directed lending portfolio, particularly loans to the agricultural sector and small-scale industries, where we are less able to control the portfolio quality and where economic difficulties are likely to affect our borrowers more severely. Any change by the Reserve Bank of India in the directed lending norms may result in our inability to meet the priority sector lending requirements as well as require us to increase our lending to relatively riskier segments and may result in an increase in non-performing assets in the directed lending portfolio. See also **Business Classification of Loans** . We have experienced rapid international growth in the last three years which has increased the complexity of the risks that we face and **Business Classification of Loans** . Our rapid retail expansion in India and our rural initiative expose us to increased risks that may adversely affect our business . We may not be able to control or reduce the level of non-performing assets in our project and corporate finance portfolio. We may not be successful in our efforts to improve collections and foreclose on existing non-performing assets. We also have investments in security receipts arising out of the sale of non-performing assets by us to Asset Reconstruction Company (India) Limited, a reconstruction company registered with the Reserve Bank of India. See **Business Classification of Loans** . There can be no assurance that Asset Reconstruction Company (India) Limited will be able to recover these assets and redeem our investments in security receipts and that there will be no reduction in the value of these investments.

If we are not able to control or reduce the level of non-performing assets, the overall quality of our loan portfolio may deteriorate and our business may be adversely affected.

***Further deterioration of our non-performing asset portfolio and an inability to improve our provisioning coverage as a percentage of gross non-performing assets could adversely affect the price of our equity shares and ADSs.***

Although we believe that our total provisions will be adequate to cover all known losses in our asset portfolio, there can be no assurance that there will be no deterioration in the provisioning coverage as a percentage of gross non-performing assets or otherwise or that the percentage of non-performing assets that we will be able to recover will be similar to our and ICICI's past experience of recoveries of non-performing assets. In the event of any further deterioration in our non-performing asset portfolio, there could be an adverse impact on our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

***The value of our collateral may decrease or we may experience delays in enforcing our collateral when borrowers default on their obligations to us which may result in failure to recover the expected value of collateral security exposing us to a potential loss.***

A substantial portion of our loans to corporate and retail customers are secured by collateral. See **Business Classification of Loans Non-Performing Asset Strategy** . Changes in asset prices may cause the value of our collateral to decline and we may not be able to realize the full value of our collateral as a result of delays in bankruptcy and foreclosure proceedings, defects or deficiencies in the perfection of collateral (including due to inability to obtain approvals that may be required from various persons, agencies or authorities), fraudulent transfers by borrowers and other factors, including current legislative provisions or changes thereto and past or future judicial pronouncements. Failure to recover the expected value of collateral could expose us to potential losses, which could adversely affect our business.

***We have experienced rapid international growth in the last three years which has increased the complexity of the risks that we face.***

Beginning in fiscal 2004, we began a rapid international expansion opening banking subsidiaries in the United Kingdom, Canada and Russia and branches and representative offices in several countries. We offer retail banking products and services including remittance services across these markets primarily to non-resident Indians. We also deliver products and services, including foreign currency financing and cross-border acquisition financing, to our corporate clients through our international subsidiaries and branches. In Canada and the United Kingdom, we have also launched direct banking offerings using the Internet as the access

**Table of Contents**

channel. At year-end fiscal 2007, the assets of these banking subsidiaries and branches constituted approximately 19% of the consolidated assets of ICICI Bank and its banking subsidiaries.

This rapid international expansion into banking in multiple jurisdictions exposes us to a new variety of regulatory and business challenges and risks, including cross-cultural risk and has increased the complexity of our risks in a number of areas including currency risks, interest rate risks, compliance risk, regulatory and reputational risk and operational risk. The loan portfolio of our international branches and subsidiaries includes foreign currency loans to Indian companies for their Indian operations (as permitted by regulation) as well as for their overseas ventures, including cross-border acquisitions. This exposes us to specific additional risks including the failure of the acquired entities to perform as expected, and our inexperience in various aspects of the economic and legal framework in overseas markets. See also [Business](#) [Loan Portfolio](#) . We are subject to legal and regulatory risk which may adversely affect our business and the price of our equity shares and ADSs . The skills required for this business could be different from those required for our Indian business and we may not be able to attract the required talented professionals. If we are unable to manage these risks, our business could be adversely affected.

***Our rapid retail expansion in India and our rural initiative expose us to increased risks that may adversely affect our business.***

We have experienced rapid growth in our retail loan portfolio. See [Business](#) [Loan Portfolio](#) . In addition, we have begun a rural initiative designed to bring our products and services into many rural areas. This rapid growth of the retail loan business and the rural initiative exposes us to increased risks within India including the risk that our impaired loans may grow faster than anticipated, increased operational risk, increased fraud risk and increased regulatory and legal risk. For example, during fiscal 2007, we made a provision of Rs. 0.93 billion (US\$22 million) for losses from frauds pertaining to the warehouse receipt-based financing product for agricultural credit. See also [Business](#) [Loan Portfolio](#) . We are subject to legal and regulatory risk which may adversely affect our business and the price of our equity shares and ADSs .

***We are subject to legal and regulatory risk which may adversely affect our business and the price of our equity shares and ADSs.***

We are subject to a wide variety of banking, insurance and financial services laws and regulations and a large number of regulatory and enforcement authorities in each of the jurisdictions in which we operate. The laws and regulations governing the banking and financial services industry have become increasingly complex governing a wide variety of issues, including interest rates, liquidity, capital adequacy, securitization, investments, ethical issues, money laundering, privacy, record keeping, and marketing and selling practices, with sometimes overlapping jurisdictional or enforcement authorities. Our insurance businesses are also subject to extensive regulation and supervisions and the Insurance Regulatory and Development Authority has the ability to impact and alter laws and regulations regarding the insurance industry, including regulations governing products, selling commissions, solvency margins and reserving, which can also lead to additional costs or restrictions on our activities.

Failure to comply with applicable regulations in various jurisdictions, including unauthorized actions by employees, representatives, agents and third parties, suspected or perceived failures and media reports, and ensuing inquiries or investigations by regulatory and enforcement authorities, has resulted, and may result in regulatory action including financial penalties and restrictions on or suspension of the related business operations.

In addition, a failure to comply with the applicable regulations in various jurisdictions by our employees, representatives, agents and third party service providers either in or outside the course of their services, or suspected or perceived failures by them, may result in inquiries or investigations by regulatory and enforcement authorities, in regulatory or enforcement action against either us, or such employees, representatives, agents and third party service providers. Such actions may impact our reputation, result in adverse media reports, lead to increased or enhanced regulatory or supervisory concerns, additional costs, penalties, claims and expenses being incurred by us or impact adversely our ability to conduct business.

**Table of Contents**

In fiscal 2006, the Reserve Bank India imposed a penalty of Rs. 0.5 million (US\$11,601) on us in connection with our role as collecting bankers in certain public offerings of equity by companies in India. The Securities and Futures Commission, Hong Kong charged us with carrying on the business of dealing in securities in Hong Kong between June 15, 2004 and March 8, 2006, without having the requisite license. The Eastern Magistrate's Court, Hong Kong, on April 10, 2007 fined us a sum of HKD 40,000 (approximately US\$5,120) and further ordered us to reimburse investigation costs to the Securities and Futures Commission. We have paid these amounts.

If we fail to manage our legal and regulatory risk in the many jurisdictions in which we operate, our business could suffer, our reputation could be harmed and we would be subject to additional legal risk. This could, in turn, increase the size and number of claims and damages asserted against us or subject us to regulatory investigations, enforcement actions or other proceedings, or lead to increased regulatory or supervisory concerns. We may also be required to spend additional time and resources on any remedial measures which could have an adverse effect on our business.

Despite our best efforts to comply with all applicable regulations, there are a number of risks that cannot be completely controlled. Our rapid international expansion has led to increased risk in this respect. Regulators in every jurisdiction in which we operate or have listed our securities have the power to bring administrative or judicial proceedings against us (or our employees, representatives, agents and third party service providers), which could result, among other things, in suspension or revocation of one or more of our licenses, cease and desist orders, fines, civil penalties, criminal penalties or other disciplinary action which could materially harm our results of operations and financial condition.

We cannot predict the timing or form of any current or future regulatory or law enforcement initiatives, which we note are increasingly common for international banks and financial institutions, but we would expect to cooperate with any such regulatory investigation or proceeding.

***Regulatory changes in India or other jurisdictions in which we operate could adversely affect our business.***

The laws and regulations or the regulatory or enforcement environment in any of the jurisdictions in which we operate may change at any time and may have an adverse effect on the products or services we offer, the value of our assets or of the collateral available for our loans or our business in general. Since 2005, the Reserve Bank of India has instituted several changes in regulations applicable to banking companies, including increase in risk-weights on certain categories of loans for computation of capital adequacy, increase in general provisioning requirements for various categories of assets, change in capital requirements and accounting norms for securitization, increases in regulated interest rates, increases in the cash reserve ratio, cessation of payment of interest on cash reserve balances, changes in limits on investments in financial sector enterprises and venture capital funds and changes in directed lending requirements. In April 2007, the Reserve Bank of India issued final guidelines on implementation of the new capital adequacy framework pursuant to Basel II, which, while requiring maintenance of capital for operational risk and undrawn commitments and higher capital for unrated exposures, stipulates continuance of higher risk weights for retail loans and increase in minimum Tier-1 capital adequacy ratio from 4.5% to 6.0%. The Reserve Bank of India has also issued draft guidelines on accounting for derivative instruments and transactions and restructuring of loans, which in their final form could adversely impact our financial performance. The Insurance Regulatory & Development Authority issued new regulations effective July 1, 2006, introducing minimum policy period and sum assured stipulations for unit-linked life insurance products. Similar changes in the future could have an adverse impact on our growth, capital adequacy and profitability. Any change by the Reserve Bank of India in the directed lending norms may result in our inability to meet the priority sector lending requirements as well as require us to increase our lending to relatively riskier segments and may result in an increase in non-performing assets in the directed lending portfolio. The new levy of fringe benefit tax on employee stock options proposed in the government of India's budget for fiscal 2008 could adversely impact our financial performance if the incidence of the tax is borne or required to be borne by us.

**Table of Contents*****The failure of our restructured loans to perform as expected or a significant increase in the level of restructured loans in our portfolio could affect our business.***

Our standard assets include restructured standard loans. See Business Classification of Loans Restructured Loans . Our borrowers requirements to restructure their loans arose due to several factors, including increased competition arising from economic liberalization in India, variable industrial growth, a sharp decline in commodity prices, the high level of debt in the financing of projects and capital structures of companies in India and the high interest rates in the Indian economy during the period in which a large number of projects contracted their borrowings. These factors reduced profitability for certain of our borrowers and also resulted in the restructuring of certain Indian companies in sectors including petroleum, refining and petrochemicals, iron and steel, textiles and cement. The failure of these borrowers to perform as expected or a significant increase in the level of restructured assets in our portfolio could adversely affect our business, our future financial performance, our stockholders equity and the price of our equity shares and ADSs.

***Our funding is primarily short-term and if depositors do not roll over deposited funds upon maturity, our business could be adversely affected.***

Most of our incremental funding requirements, including replacement of maturing liabilities of ICICI (which generally had longer maturities), are met through short-term funding sources, primarily in the form of deposits including deposits from corporate customers and inter-bank deposits. Our customer deposits generally have a maturity of less than one year. However, a large portion of our assets, primarily the assets of ICICI and our home loan portfolio, have medium or long-term maturities, creating the potential for funding mismatches. Our ability to raise fresh deposits and grow our deposit base depends in part on our ability to expand our network of branches, which requires the approval of the Reserve Bank of India. In September 2005, the Reserve Bank of India replaced the existing system of granting authorizations for opening individual branches with a system of giving aggregated approvals covering both branches and existing non-branch channels like ATMs, on an annual basis. While we have recently received the Reserve Bank of India s authorizations for establishing new branches and additional off-site ATMs, there can be no assurance that these authorizations or future authorizations granted by the Reserve Bank of India will meet our requirements for branch expansion to achieve the desired growth in our deposit base. High volumes of deposit withdrawals or failure of a substantial number of our depositors to roll over deposited funds upon maturity or to replace deposited funds with fresh deposits as well as our inability to grow our deposit base, could have an adverse effect on our liquidity position, our business, our future financial performance, our stockholders equity and the price of our equity shares and ADSs. See also Financial difficulty and other problems in certain financial institutions in India could adversely affect our business and the price of our equity shares and ADSs .

***A large proportion of ICICI s loans consisted of project finance assistance, which continues to be a part of our loan portfolio and is particularly vulnerable to completion and other risks.***

Long-term project finance assistance was a significant proportion of ICICI s asset portfolio and continues to be a part of our loan portfolio. The viability of these projects and other projects that we may finance in future depends upon a number of factors, including market demand, government policies and the overall economic environment in India and the international markets. These projects are particularly vulnerable to a variety of risks, including completion risk and counterparty risk, which could adversely impact their ability to generate revenues. We cannot be sure that these projects will perform as anticipated. In the past, we experienced a high level of default and restructuring in our project finance loan portfolio as a result of the downturn in certain global commodity markets and increased competition in India. Future project finance losses or high levels of loan restructuring could have a materially adverse effect on our profitability and the quality of our loan portfolio.

**Table of Contents**

***We have a high concentration of loans to certain customers and sectors and if a substantial portion of these loans become non performing, the overall quality of our loan portfolio, our business and the price of our equity shares and ADSs could be adversely affected.***

Our loan portfolio and non-performing asset portfolio have a high concentration in certain customers. See Business Loan Portfolio Loan Concentration . In the past, certain of our borrowers have been adversely affected by economic conditions in varying degrees. Credit losses due to financial difficulties of these borrowers/ borrower groups in the future could adversely affect our business, our financial performance, our stockholders equity and the price of our equity shares and ADSs.

***We face greater credit risks than banks in developed economies.***

Our credit risk is higher because most of our borrowers are based in India. Unlike several developed economies, a nationwide credit bureau has become operational in India only recently. This may affect the quality of information available to us about the credit history of our borrowers, especially individuals and small businesses. In addition, the credit risk of our borrowers, particularly small and middle market companies, is higher than borrowers in more developed economies due to the greater uncertainty in the Indian regulatory, political, economic and industrial environment and the difficulties of many of our corporate borrowers to adapt to global technological advances. Also, several of our corporate borrowers in the past suffered from low profitability because of increased competition from economic liberalization, a sharp decline in commodity prices, a high debt burden and high interest rates in the Indian economy at the time of their financing, and other factors. This may lead to an increase in the level of our non-performing assets and there could be an adverse impact on our business, our future financial performance, our stockholders equity and the price of our equity shares and ADSs.

***We have proposed a reorganization of our holdings in our insurance and asset management subsidiaries and our inability to implement this reorganization as well as the significant additional capital required by these businesses may adversely impact our business and the price of our equity shares and ADSs.***

Given the expected losses and the significant growth in our life insurance and general insurance businesses, we expect that significant additional capital will be needed to support these businesses and, as a result, we have reorganized our holdings in our insurance and asset management subsidiaries. Our board has approved the transfer of our equity shareholding in our insurance and asset management subsidiaries to a proposed new subsidiary. We propose to raise equity capital in this proposed new subsidiary to meet the future capital requirements of the insurance subsidiaries. The incorporation of the subsidiary, transfer of the equity shares and issuance of new shares by the proposed new subsidiary are subject to regulatory and other approvals. See Business Insurance . If we are unable to implement this reorganization and raise capital in this proposed new subsidiary, we would be required to invest further capital to fund the growth of the insurance businesses. Our inability to implement this reorganization and raise capital in this subsidiary, or the valuation at which such capital is raised, could adversely impact our ability to capitalise our insurance subsidiaries, their growth, our future capital adequacy, our financial performance and the price of our equity shares and ADSs.

***While our insurance businesses are becoming an increasingly important part of our business, there can be no assurance that they will continue to experience high rates of growth.***

Our life insurance and general insurance joint ventures have experienced high rates of growth and are becoming an increasingly important part of our business. See Business Insurance and Operating and Financial Review and Prospects Insurance Segment . There can be no assurance that these businesses will continue to experience high rates of growth. Any slowdown in these businesses and in particular in the life insurance business could have an adverse impact on our business and the price of our equity shares and ADSs.

**Table of Contents*****Our life insurance business is in a loss position and is expected to continue to generate losses for some years.***

We and our joint venture partner have made significant investments in our life insurance joint venture, ICICI Prudential Life Insurance Company Limited. As described elsewhere in this prospectus supplement, see Business Insurance and Operating and Financial Review and Prospects Insurance Segment , and as is normal in the start-up phase of any life insurance business, we are currently experiencing losses from this businesses. We expect these losses to continue for some years.

***Loss reserves for our general insurance business are based on estimates as to future claims liabilities and adverse developments relating to claims could lead to further reserve additions and materially adversely affect our results of operations.***

In accordance with industry practice and accounting and regulatory requirements, we establish reserves for loss and loss adjustment expenses related to our general insurance business. Reserves are based on estimates of future payments that will be made in respect of claims, including expenses relating to such claims. Such estimates are made on both a case by case basis, based on the facts and circumstances available at the time the reserves are established, as well as in respect of losses that have been incurred but not reported. These reserves represent the estimated ultimate cost necessary to bring all pending claims to final settlement.

Reserves are subject to change due to a number of variables which affect the ultimate cost of claims, such as changes in the legal environment, results of litigation, costs of repairs and other factors such as inflation and exchange rates and our reserves for environmental and other latent claims are particularly subject to such variables. Our results of operations depend significantly upon the extent to which our actual claims experience is consistent with the assumptions we use in setting the prices for products and establishing the liabilities for obligations for technical provisions and claims. To the extent that our actual claims experience is less favorable than the underlying assumptions used in establishing such liabilities, we may be required to increase our reserves, which may materially adversely affect our results of operations.

Established loss reserves estimates are periodically adjusted in the ordinary course of settlement, using the most current information available to management, and any adjustments resulting from changes in reserve estimates are reflected in current results of operations. We also conduct reviews of various lines of business to consider the adequacy of reserve levels. Based on current information available to us and on the basis of our internal procedures, our management considers that these reserves are adequate at year-end fiscal 2007. However, because the establishment of reserves for loss and loss adjustment expenses is an inherently uncertain process, there can be no assurance that ultimate losses will not materially exceed the established reserves for loss and loss adjustment expenses and have a material adverse effect on our results of operations.

***The financial results of our general insurance business could be materially adversely affected by the occurrence of catastrophe.***

Portions of our general insurance may cover losses from unpredictable events such as hurricanes, windstorms, monsoons, earthquakes, fires, industrial explosions, floods, riots and other man-made or natural disasters, including acts of terrorism. The incidence and severity of these catastrophes in any given period are inherently unpredictable.

Although we monitor our overall exposure to catastrophes and other unpredictable events in each geographic region and determine our underwriting limits related to insurance coverage for losses from catastrophic events, we generally seek to reduce our exposure through the purchase of reinsurance, selective underwriting practices and by monitoring risk accumulation. Claims relating to catastrophes may result in unusually high levels of losses and could have a material adverse effect on our financial position or results of operations.

**Table of Contents*****Actuarial experience and other factors could differ from assumptions made in the calculation of life actuarial reserves.***

The assumptions we make in assessing our life insurance reserves may differ from what we experience in the future. We derive our life insurance reserves using best estimate actuarial policies and assumptions. These assumptions include the assessment of the long-term development of interest rates, investment returns, the allocation of investments between equity, fixed income and other categories, mortality and morbidity rates, policyholder lapses and future expense levels. We monitor our actual experience of these assumptions and to the extent that we consider that this experience will continue in the longer term, we refine our long-term assumptions. Changes in any such assumptions may lead to changes in the estimates of life and health insurance reserves.

***A determination against us in respect of disputed tax assessments may adversely impact our financial performance.***

We have been assessed a significant amount in additional taxes by the government of India's tax authorities in excess of our provisions. See Business Legal and Regulatory Proceedings . We have appealed all of these demands. While we expect that no additional liability will arise out of these disputed demands, there can be no assurance that these matters will be settled in our favor or that no further liability will arise out of these demands. Any additional tax liability may adversely impact our financial performance and the price of our equity shares and ADSs.

***We are involved in various litigations. Any final judgment awarding material damages against us could have a material adverse impact on our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.***

We and other group companies, or our or their directors or officers, are often involved in litigations (including civil or criminal) for a variety of reasons, which generally arise because we seek to recover our dues from borrowers or because customers seek claims against us. The majority of these cases arise in the normal course and we believe, based on the facts of the cases and consultation with counsel, that these cases generally do not involve the risk of a material adverse impact on our financial performance or stockholders' equity. Where we assess that there is a probable risk of loss, it is our policy to make provisions for the loss. However, we do not make provisions or disclosures in our financial statements where our assessment is that the risk is insignificant. See Business Legal and Regulatory Proceedings . We cannot guarantee that the judgments in any of the litigation in which we are involved would be favorable to us and if our assessment of the risk changes, our view on provisions will also change.

***If we are not able to integrate any future acquisitions, our business could be disrupted.***

We may seek opportunities for growth through acquisitions or be required to undertake mergers mandated by the Reserve Bank of India under its statutory powers. In the past, the Reserve Bank of India has ordered mergers of weak banks with other banks primarily in the interest of depositors of the weak banks.

On April 19, 2007 we received the Reserve Bank of India's approval for an all-stock amalgamation of The Sangli Bank Limited, or Sangli Bank, an unlisted private sector bank with us. At year-end fiscal 2006, Sangli Bank had over 190 branches and extension counters, total assets of Rs. 21.5 billion (US\$499 million), total deposits of Rs. 20.0 billion (US\$465 million), total loans of Rs. 8.9 billion (US\$206 million) and total capital adequacy of only 1.6%. In fiscal 2006, it incurred a loss of Rs. 0.29 billion (US\$7 million).

This and any future acquisitions or mergers may involve a number of risks, including deterioration of asset quality, diversion of our management's attention required to integrate the acquired business and the failure to retain key acquired personnel and clients, leverage synergies or rationalise operations, or develop the skills required for new businesses and markets, or unknown and known liabilities, some or all of which could have an adverse effect on our business.

**Table of Contents*****Our business is very competitive and our growth strategy depends on our ability to compete effectively.***

Within the Indian market, we face intense competition from Indian and foreign commercial banks in all our products and services. Foreign banks also operate in India through non-banking finance companies. Further liberalization of the Indian financial sector could lead to a greater presence or new entries of foreign banks offering a wider range of products and services, which would significantly toughen our competitive environment. In addition, the Indian financial sector may experience further consolidation, resulting in fewer banks and financial institutions, some of which may have greater resources than us. The government of India has indicated its support for consolidation among government-owned banks. The Reserve Bank of India has announced a road map for the presence of foreign banks in India that would, after a review in 2009, allow foreign banks to acquire up to a 74.0% shareholding in an Indian private sector bank. See *Business Competition and Overview of the Indian Financial Sector Commercial Banks Foreign Banks* in our annual report on Form 20-F for the fiscal year ended March 31, 2007 filed on June 11, 2007, as amended by Form 20-F/A filed on June 13, 2007, which is incorporated by reference in the accompanying prospectus. Due to competitive pressures, we may be unable to successfully execute our growth strategy and offer products and services at reasonable returns and this may adversely impact our business.

In our international operations we also face intense competition from the full range of competitors in the financial services industry, both banks and non-banks and both Indian and foreign banks. We remain a small to mid-size player in the international markets and many of our competitors have resources much greater than our own.

***Fraud and significant security breaches in our computer system and network infrastructure could adversely impact our business.***

Our business operations are based on a high volume of transactions. Although we take adequate measures to safeguard against system-related and other fraud, there can be no assurance that we would be able to prevent fraud. Our reputation could be adversely affected by fraud committed by employees, customers or outsiders. Our rural initiative, our rapid international growth and our expansion to new product lines such as insurance may create additional challenges with respect to managing the risk of frauds due to the increased geographical dispersion and use of intermediaries. For example, during fiscal 2007, we made a provision of Rs. 0.93 billion (US\$22 million) for losses from frauds pertaining to the warehouse receipt-based financing product for agricultural credit. See *Operating and Financial Review and Prospects Provisions for Non-performing Assets and Restructured Loans and Business Risk Management Operational Risk*. Physical or electronic break-ins, security breaches, other disruptive problems caused by our increased use of the Internet or power disruptions could also affect the security of information stored in and transmitted through our computer systems and network infrastructure. Although we have implemented security technology and operational procedures to prevent such occurrences, there can be no assurance that these security measures will be successful. A significant failure in security measures could have a material adverse effect on our business, our future financial performance, our stockholders' equity and the price of our equity shares and ADSs.

***System failures could adversely impact our business.***

Given the increasing share of retail products and services and transaction banking services in our total business, the importance of systems technology to our business has increased significantly. Our principal delivery channels include ATMs, call centers and the Internet. Any failure in our systems, particularly for retail products and services and transaction banking, could significantly affect our operations and the quality of our customer service and could result in business and financial losses and adversely affect the price of our equity shares and ADSs.

**Table of Contents*****There is operational risk associated with our industry which, when realized, may have an adverse impact on our business.***

We, like all financial institutions, are exposed to many types of operational risk, including the risk of fraud or other misconduct by employees or outsiders, unauthorized transactions by employees and third parties (including violation of regulations for prevention of corrupt practices, and other regulations governing our business activities), misreporting or non-reporting with respect to statutory, legal or regulatory reporting and disclosure obligations, or operational errors, including clerical or record keeping errors or errors resulting from faulty computer or telecommunications systems. Our rapid growth, particularly in the rural initiative, international arena and insurance businesses exposes us to additional operational and control risks. The increasing size of our treasury operations, which use automated control and recording systems as well as manual checks and record keeping, exposes us to the risk of errors in control and record keeping. We use direct marketing associates for marketing our retail credit products. We also outsource some functions, like collections, to other agencies. Given our high volume of transactions, certain errors may be repeated or compounded before they are discovered and successfully rectified. In addition, our dependence upon automated systems to record and process transactions may further increase the risk that technical system flaws or employee tampering or manipulation of those systems will result in losses that are difficult to detect. We may also be subject to disruptions of our operating systems, arising from events that are wholly or partially beyond our control (including, for example, computer viruses or electrical or telecommunication outages), which may give rise to a deterioration in customer service and to loss or liability to us. We are further exposed to the risk that external vendors may be unable to fulfill their contractual obligations to us (or will be subject to the same risk of fraud or operational errors by their respective employees as are we), and to the risk that its (or its vendors ) business continuity and data security systems prove not to be sufficiently adequate. We also face the risk that the design of our controls and procedures prove inadequate, or are circumvented, thereby causing delays in detection or errors in information. Although we maintain a system of controls designed to keep operational risk at appropriate levels, like all banks and insurance companies we have suffered losses from operational risk and there can be no assurance that we will not suffer losses from operational risks in the future that may be material in amount, and our reputation could be adversely affected by the occurrence of any such events involving our employees, customers or third parties. For a discussion of how operational risk is managed, see Business Risk Management Operational Risk .

***We are subject to credit, market and liquidity risk which may have an adverse effect on our credit ratings and our cost of funds.***

To the extent any of the instruments and strategies we use to hedge or otherwise manage our exposure to market or credit risk are not effective, we may not be able to mitigate effectively our risk exposures in particular market environments or against particular types of risk. Our balance sheet growth will be dependent upon economic conditions, as well as upon our determination to securitize, sell, purchase or syndicate particular loans or loan portfolios. Securitization is an important element of our funding and capital management strategy. The Indian securitization market is still evolving in terms of asset classes, participants and regulations and there can be no assurance of our continuing ability to securitize loan portfolios. In November 2006, CRISIL, an Indian credit rating agency, lowered the rating of a personal loan receivables pool, securitized by us, by two notches due to higher than anticipated utilization of the cash collateral stipulated at the initiation of the transaction. Similarly, syndication of corporate loan exposures is an important part of our strategy and there can be no assurance of the continued availability and growth of the market for Indian corporate loan syndications.

Our trading revenues and interest rate risk are dependent upon our ability to properly identify, and mark to market, changes in the value of financial instruments caused by changes in market prices or rates. Our earnings are dependent upon the effectiveness of our management of migrations in credit quality and risk concentrations, the accuracy of our valuation models and our critical accounting estimates and the adequacy of our allowances for loan losses. To the extent our assessments, assumptions or estimates prove inaccurate or not predictive of actual results, we could suffer higher than anticipated losses. See also Further deterioration of our non-performing asset portfolio and an inability to improve our provisioning coverage as a

**Table of Contents**

percentage of gross non-performing assets could adversely affect the price of our equity shares and ADSs . The successful management of credit, market and operational risk is an important consideration in managing our liquidity risk because it affects the evaluation of our credit ratings by rating agencies. Rating agencies may reduce or indicate their intention to reduce the ratings at any time. See also . Any downgrading of India s debt rating by an international rating agency could adversely affect our business, our liquidity and the price of our equity shares and ADSs . The rating agencies can also decide to withdraw their ratings altogether, which may have the same effect as a reduction in our ratings. Any reduction in our ratings (or withdrawal of ratings) may increase our borrowing costs, limit our access to capital markets and adversely affect our ability to sell or market our products, engage in business transactions, particularly longer-term and derivatives transactions, or retain our customers. This, in turn, could reduce our liquidity and negatively impact our operating results and financial condition. For more information relating to our ratings, see Business Risk Management Quantitative and Qualitative Disclosures about Market Risk Liquidity Risk .

***We depend on the accuracy and completeness of information about customers and counterparties.***

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of customers and counterparties, including financial statements and other financial information. We may also rely on certain representations as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, in deciding whether to extend credit, we may assume that a customer s audited financial statements conform with generally accepted accounting principles and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. Our financial condition and results of operations could be negatively affected by relying on financial statements that do not comply with generally accepted accounting principles or other information that is materially misleading.

***Any inability to attract and retain talented professionals may adversely impact our business.***

Our business is growing more complex with both product line expansion into the insurance area and geographic expansion internationally and via the rural initiatives. This complexity is happening at the same time as a developing shortage of skilled management talent both at the highest levels and among middle management and young professionals in India due to the rapid growth and globalization of the Indian economy. Our continued success depends in part on the continued service of key members of our management team and our ability to continue to attract, train, motivate and retain highly qualified professionals is a key element of our strategy and we believe it to be a significant source of competitive advantage. The successful implementation of our growth strategy depends on the availability of skilled management, both at our head office and at each of our business units and international locations and on our ability to attract and train young professionals. If we or one of our business units or other functions fail to staff their operations appropriately, or lose one or more of our key senior executives or qualified young professionals and fail to replace them in a satisfactory and timely manner, our business, financial condition and results of operations, including our control and operational risks, may be adversely affected. Likewise, if we fail to attract and appropriately train, motivate and retain young professionals or other talent, our business may likewise be affected. See Business Employees .

***If we are required to change our accounting policies with respect to the expensing of stock options, our earnings could be adversely affected.***

Under Indian GAAP, we currently deduct the expense for employee stock option grants from our income based on the intrinsic value method and not on the fair value method. Had compensation costs for our employee stock options been determined in a manner consistent with the fair value approach, our profit after tax for fiscal 2007 as reported would have been reduced to the pro forma amount of Rs. 26.7 billion (US\$620 million) from Rs. 27.6 billion (US\$641 million) and for fiscal 2006 to Rs. 23.7 billion (US\$550 million) from Rs. 24.2 billion (US\$562 million).

**Table of Contents*****We are exposed to fluctuations in foreign exchange rates.***

As a financial intermediary we are exposed to exchange rate risk. See Business Risk Management Quantitative and Qualitative Disclosures about Market Risk Exchange Rate Risk . Adverse movements and volatility in foreign exchange rates may adversely affect our borrowers, the quality of our exposure to our borrowers and our business.

**Risks Relating to the ADSs and Equity Shares**

You will not be able to vote your ADSs and your ability to withdraw equity shares from the depositary facility is uncertain and may be subject to delays.

Our ADS holders have no voting rights unlike holders of our equity shares who have voting rights. For certain information regarding the voting rights of the equity shares underlying our ADSs, see Business Shareholding Structure and Relationship with the Government of India . If you wish, you may withdraw the equity shares underlying your ADSs and seek to exercise your voting rights under the equity shares you obtain from the withdrawal. However, for foreign investors, this withdrawal process may be subject to delays and is subject to a cap of 49% on the total shareholding of foreign institutional investors and non-resident Indians in us. For a discussion of the legal restrictions triggered by a withdrawal of the equity shares from the depositary facility upon surrender of ADSs, see Restriction on Foreign Ownership of Indian Securities .

***Your ability to sell in India any equity shares withdrawn from the depositary facility, the conversion of rupee proceeds from such sale into a foreign currency and the repatriation of such foreign currency may be subject to delays if specific approval of the Reserve Bank of India is required.***

ADS holders seeking to sell in India any equity shares withdrawn upon surrender of ADSs, convert the rupee proceeds from such sale into a foreign currency or repatriate such foreign currency may need the Reserve Bank of India s approval for each such transaction. See Restriction on Foreign Ownership of Indian Securities . We cannot guarantee that any such approval will be obtained in a timely manner or at terms favorable to the investor. Because of possible delays in obtaining the requisite approvals, investors in equity shares may be prevented from realizing gains during periods of price increases or limiting losses during periods of price declines.

***Restrictions on deposit of equity shares in the depositary facility could adversely affect the price of our ADSs.***

Under current Indian regulations, an ADS holder who surrenders ADSs and withdraws equity shares may deposit those equity shares again in the depositary facility in exchange for ADSs. An investor who has purchased equity shares in the Indian market may also deposit those equity shares in the ADS program. However, the deposit of equity shares may be subject to securities law restrictions and the restriction that the cumulative aggregate number of equity shares that can be deposited as of any time cannot exceed the cumulative aggregate number represented by ADSs converted into underlying equity shares as of such time. These restrictions increase the risk that the market price of our ADSs will be below that of the equity shares.

***Certain shareholders own a large percentage of our equity shares and their actions could adversely affect the price of our equity shares and ADSs.***

Life Insurance Corporation of India and General Insurance Corporation of India, each of which is directly or indirectly controlled by the Indian government, are among our principal shareholders. Our other large shareholders include Allamanda Investments Pte. Limited, a subsidiary of Temasek Holdings Pte. Limited, the Government of Singapore, Crown Capital Limited, CLSA Merchant Bankers Limited and Bajaj Auto Limited, an Indian private sector company. See Business Shareholding Structure and Relationship with the Government of India . Any substantial sale of our equity shares by these or other large shareholders could adversely affect the price of our equity shares and ADSs.

**Table of Contents*****Conditions in the Indian securities market may adversely affect the price or liquidity of our equity shares and ADSs.***

The Indian securities markets are smaller and more volatile than securities markets in developed economies. In the past, the Indian stock exchanges have experienced high volatility and other problems that have affected the market price and liquidity of the listed securities, including temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In March 1995, the Bombay Stock Exchange (the BSE), was closed for three days following a default by a broker. In March 2001, the BSE dropped 667 points or 15.6% and there were also rumors of insider trading in the BSE leading to the resignation of the BSE president and several other members of the governing board. In the same month, the Kolkata Stock Exchange suffered a payment crisis when several brokers defaulted and the exchange invoked guarantees provided by various Indian banks. In April 2003, the decline in the price of the equity shares of a leading Indian software company created volatility in the Indian stock markets and created temporary concerns regarding our exposure to the equity markets. On May 17, 2004, the BSE Sensex fell by 565 points from 5,070 to 4,505, creating temporary concerns regarding our exposure to the equity markets. Both the BSE and the National Stock Exchange (the NSE) halted trading on the exchanges on May 17, 2004 in view of the sharp fall in prices of securities. The Indian securities markets experienced rapid appreciation during fiscal 2006 but underwent a sharp correction in May 2006. The markets experienced a recovery thereafter but have experienced periods of volatility. Further, from time to time, disputes have arisen between listed companies and stock exchanges and other regulatory bodies, which in some cases had a negative effect on market sentiment. In recent years, there have been changes in laws and regulations for the taxation of dividend income, which have impacted the Indian equity capital markets. See Dividends. Similar problems or changes in the future could adversely affect the market price and liquidity of our equity shares and ADSs.

***An active or liquid trading market for our ADSs is not assured.***

Although our ADSs are listed and traded on the New York Stock Exchange, we cannot be certain that an active, liquid market for our ADSs will be sustained. Indian legal restrictions may limit the supply of ADSs and a loss of liquidity could increase the price volatility of our ADSs.

***Settlement of trades of equity shares on Indian stock exchanges may be subject to delays.***

The equity shares represented by the ADSs are currently listed on the BSE and the NSE. Settlement on those stock exchanges may be subject to delays and an investor in equity shares withdrawn from the depository facility upon surrender of ADSs may not be able to settle trades on such stock exchanges in a timely manner.

***Changes in Indian regulations on foreign ownership, a change in investor preferences or an increase in the number of ADSs outstanding could adversely affect the price of our ADSs.***

ADSs issued by companies in certain emerging markets, including India, may trade at a discount or a premium to the underlying equity shares, in part because of the restrictions on foreign ownership of the underlying equity shares. See Restriction on Foreign Ownership of Indian Securities. Historically, our ADSs have generally traded at a small premium to the trading price of our underlying equity shares on the Indian stock exchanges. See Market Price Information. We believe that this price premium resulted from the limited portion of our market capitalization represented by ADSs, restrictions imposed by Indian law on the conversion of equity shares into ADSs and an apparent preference among some investors to trade dollar-denominated securities. In fiscal 2006, we conducted a US\$498 million offering of ADSs which increased the number of outstanding ADSs and we may conduct similar offerings in the future. Also, over time, some of the restrictions on the issuance of ADSs imposed by Indian law have been relaxed. As a result, any premium enjoyed by the ADSs as compared to the equity shares may be reduced or eliminated as a result of offerings made or sponsored by us, changes in Indian law permitting further conversion of equity shares into ADSs or a change in investor preferences.

**Table of Contents*****Your holdings may be diluted by additional issuances of equity and any dilution may adversely affect the market price of our equity shares and ADSs.***

We propose to conduct a capital raising exercise comprising a public offering in India and an ADS offering aggregating Rs. 201.25 billion (US\$4.7 billion). This capital raising exercise will result in a dilution of your shareholding. We may conduct additional equity offerings to fund the growth of our business, including our international operations, our insurance business or our other subsidiaries. In addition, up to 5.0% of our issued equity shares from time to time, may be granted in accordance with our Employee Stock Option Scheme. Any future issuance of equity shares or ADSs or exercise of employee stock options would dilute the positions of investors in equity shares and ADSs and could adversely affect the market price of our equity shares and ADSs.

***You may be unable to exercise preemptive rights available to other shareholders.***

A company incorporated in India must offer its holders of equity shares preemptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages prior to the issuance of any new equity shares, unless these rights have been waived by at least 75.0% of the company's shareholders present and voting at a shareholders' general meeting. US investors in ADSs may be unable to exercise these preemptive rights for equity shares underlying ADSs unless a registration statement under the Securities Act of 1933, as amended (the Securities Act) is effective with respect to such rights or an exemption from the registration requirements of the Securities Act is available. Our decision to file a registration statement will depend on the costs and potential liabilities associated with any such registration as well as the perceived benefits of enabling US investors in ADSs to exercise their preemptive rights and any other factors we consider appropriate at such time. To the extent that investors in ADSs are unable to exercise preemptive rights, their proportional ownership interests in us would be reduced.

***Because the equity shares underlying the ADSs are quoted in rupees in India, you may be subject to potential losses arising out of exchange rate risk on the Indian rupee.***

Investors who purchase ADSs are required to pay for the ADSs in US dollars and are subject to currency fluctuation risk and convertibility risks since the equity shares underlying the ADSs are quoted in rupees on the Indian stock exchanges on which they are listed. Dividends on the equity shares will also be paid in rupees and then converted into US dollars for distribution to ADS investors. Investors who seek to convert the rupee proceeds of a sale of equity shares withdrawn upon surrender of ADSs into foreign currency and repatriate the foreign currency may need to obtain the approval of the Reserve Bank of India for each such transaction. See also Your ability to sell in India any equity shares withdrawn from the depository facility, the conversion of rupee proceeds from such sale into a foreign currency and the repatriation of such foreign currency may be subject to delays if specific approval of the Reserve Bank of India is required and Exchange Rates .

***You may be subject to Indian taxes arising out of capital gains.***

Generally, capital gains, whether short-term or long-term, arising on the sale of the underlying equity shares in India are subject to Indian capital gains tax. Investors are advised to consult their own tax advisers and to carefully consider the potential tax consequences of an investment in the ADSs. See Taxation Indian Taxation .

***There may be less company information available in Indian securities markets than in securities markets in the United States.***

There is a difference between India and the United States in the level of regulation and monitoring of the securities markets and the activities of investors, brokers and other market participants. The Securities and Exchange Board of India is responsible for improving disclosure and regulating insider trading and other matters for the Indian securities markets. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in the United States.

**Table of Contents**

***It may not be possible for you to enforce any judgment obtained outside India, including in the United States, against the Company or any of its affiliates in India, except by way of a suit in India on such judgment.***

The Company is incorporated under the laws of India and all of its directors and executive officers reside outside the United States. In addition, all of the Company's assets are located outside the United States. As a result, you may be unable to:

effect service of process upon the Company and other persons or entities within jurisdictions outside India; or

enforce, in Indian courts, judgments against the Company and other persons or entities obtained in courts of jurisdictions outside India, including judgments predicated upon the civil liability provisions of the securities laws of jurisdictions outside India.

India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions. In order to be enforceable, a judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Indian Code of Civil Procedure, 1908.

Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced in India. The United States and India do not currently have a treaty providing for reciprocal recognition and enforcement of judgments (other than arbitration awards) in civil and commercial matters. Therefore, a final judgment for the payment of money rendered by any federal or state court in a non-reciprocating jurisdiction for civil liability, whether or not predicated solely upon the general securities laws of the United States, would not be enforceable in India.

However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States within three years of obtaining such final judgment. If and to the extent that Indian courts were of the opinion that fairness and good faith so required, they would, under current practice, give binding effect to the final judgment which had been rendered in the United States, unless such a judgment contravened principles of Indian public policy. It is unlikely that an Indian court would award damages on the same basis as a foreign court if an action is brought in India. Moreover, it is unlikely that an Indian court would award damages to the extent awarded in a final judgment rendered in the United States if it believed that the amount of damages awarded were excessive or inconsistent with Indian practice. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered. For more information, see "Enforcement of Civil Liabilities" in this Prospectus Supplement.

***A third party could be prevented from acquiring control of the Company because of anti-takeover provisions under Indian law.***

There are provisions in Indian law that may discourage a third party from attempting to take control of the Company, even if a change in control would result in the purchase of your Equity Shares at a premium to the market price or would otherwise be beneficial to you. Indian takeover regulations contain certain provisions that may delay, deter or prevent a future takeover or change in control of the Company. Under SEBI (Substantial Acquisition of Shares and Takeover) Regulations, 1997 ( "Takeover Code" ), any person acquiring either control or an interest (either on his own or together with parties acting in concert with him) in 15% or more of the Company's voting Equity Shares must make an open offer to acquire at least another 20% of its outstanding voting Equity Shares. A takeover offer to acquire at least another 20% of the Company's outstanding voting Equity Shares also must be made if a person (either on his own or together with parties acting in concert with him) holding between 15% and 55% of the Company's voting Equity Shares has entered into an agreement to acquire or decided to acquire additional voting Equity Shares in any financial year (ending on March 31) that exceed 5% of the Company's voting Equity Shares. Any further acquisition of the voting Equity Shares by any person who holds 55% or more but less than 75% or 90% (in cases where the company has been listed by making an offer of at least 10% to the public) of the voting Equity Shares is required to make an open offer to acquire a minimum of 20% of the voting Equity Shares or

**Table of Contents**

where the further acquisition is by way of a tender offer, such number of voting Equity Shares as would not result in the public shareholding being reduced to less than the minimum specified in the listing agreement with the Stock Exchanges (within the time period prescribed therein) to maintain continuous listing. In addition, an acquirer that seeks to acquire any equity shares or voting rights which would reduce the public shareholding in a company to a level below the limits specified in the listing agreement entered into between the company and the applicable stock exchange may acquire such equity shares or voting rights only in accordance with the guidelines and regulations relating to delisting of securities specified by SEBI. Further, the government of India regulates foreign ownership in Indian banks and the Reserve Bank of India has issued guidelines requiring its acknowledgement for the acquisition of shareholding in excess of 5.0% in an Indian private sector bank. See *Supervision and Regulation Reserve Bank of India Regulations* in our annual report on Form 20-F for the fiscal year ended March 31, 2007 filed on June 11, 2007, as amended by Form 20-F/A filed on June 13, 2007. These provisions may discourage or prevent certain types of transactions involving an actual or threatened change in control of the Company.

**Table of Contents**

**ENFORCEABILITY OF CERTAIN CIVIL LIABILITIES**

ICICI Bank is a limited liability company under the laws of India. Substantially all of our directors and executive officers and certain experts named in this prospectus reside outside the United States, and a substantial portion of our assets and the assets of such persons are located outside the United States. As a result, it may be difficult for investors to effect service of process upon such persons within the United States or to enforce against us or such persons in US courts judgments obtained in US courts, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. We have been advised by our Indian legal counsel, Amarchand & Mangaldas & Suresh A. Shroff & Co., that in India the statutory basis for recognition of foreign judgments is found in Section 13 of the Indian Code of Civil Procedure 1908, or the Civil Code, which provides that a foreign judgment shall be conclusive as to any matter directly adjudicated upon except: (i) where the judgment has not been pronounced by a court of competent jurisdiction; (ii) where the judgment has not been given on the merits of the case; (iii) where the judgment appears on the face of the proceedings to be founded on an incorrect view of international law or a refusal to recognize the law of India in cases where such law is applicable; (iv) where the proceedings in which the judgment was obtained were opposed to natural justice; (v) where the judgment has been obtained by fraud; or (vi) where the judgment sustains a claim founded on a breach of any law in force in India. Section 44A of the Civil Code provides that where a foreign judgment has been rendered by a court in any country or territory outside India which the government of India has by notification declared to be a reciprocating territory, it may be enforced in India by proceedings in execution as if the judgment had been rendered by the relevant court in India. The United States has not been declared by the government of India to be a reciprocating territory for purposes of Section 44A. Accordingly, a judgment of a court in the United States may be enforced in India only by a suit upon the judgment, not by proceedings in execution. The suit must be brought in India within three years from the date of the judgment in the same manner as any other suit filed to enforce a civil liability in India. It is unlikely that a court in India would award damages on the same basis as a foreign court if an action is brought in India. Furthermore, it is unlikely that an Indian court would enforce foreign judgments if it viewed the amount of damages awarded as excessive or inconsistent with Indian practice. A party seeking to enforce a foreign judgment in India is required to obtain approval from the Reserve Bank of India under the Foreign Exchange Management Act, 1999 to execute such a judgment or to repatriate any amount recovered. We have also been advised by our Indian counsel that a party may file suit in India against us, our directors or our executive officers as an original action predicated upon the provisions of the federal securities laws of the United States.

**Table of Contents**

**USE OF PROCEEDS**

We intend to use the net proceeds of this offering for future asset growth and compliance with regulatory requirements. The objects of the offering are to augment our capital base to meet the capital requirements arising out of growth in our assets, primarily our loan and investment portfolio due to the growth of the Indian economy, compliance with regulatory requirements and for other general corporate purposes including meeting the expenses of the ADS offering.

S-33

---

**Table of Contents****EXCHANGE RATES**

Fluctuations in the exchange rate between the Indian rupee and the US dollar will affect the US dollar equivalent of the Indian rupee price of our equity shares on the Indian stock exchanges and, as a result, will affect the market price of our ADSs in the United States. These fluctuations will also affect the conversion into US dollars by the depository of any cash dividends paid in Indian rupees on our equity shares represented by ADSs.

In early July 1991, the government adjusted the Indian rupee downward by an aggregate of approximately 20.0% against the US dollar. The adjustment was effected as part of an economic package designed to overcome economic and foreign exchange problems. After the Indian rupee was made convertible on the current account in March 1993, it depreciated on an average annual basis at a rate of approximately 5-6%. During fiscal 2004, the rupee appreciated against the US dollar, from Rs. 47.53 per US\$1.00 at March 31, 2003 to Rs. 43.40 per US\$1.00 at March 31, 2004. The rupee depreciated against the US dollar by 0.5% during fiscal 2005 and by 2.0% during fiscal 2006. During fiscal 2007, the rupee appreciated against the US dollar by 3.1%, moving from Rs. 44.48 per US\$1.00 at March 31, 2006 to Rs. 43.10 per US\$1.00 at March 30, 2007. During fiscal 2008 (through June 22, 2007), the rupee appreciated against the US dollar by 5.9% moving from Rs. 43.10 per US\$1.00 at March 30, 2007 to Rs. 40.55 at June 22, 2007. The following table sets forth, for the periods indicated, certain information concerning the exchange rates between Indian rupees and US dollars based on the noon buying rate.

<b>Fiscal Year</b>	<b>Period End<sup>(1)</sup></b>	<b>Average<sup>(1)(2)</sup></b>
2003	47.53	48.36
2004	43.40	45.78
2005	43.62	44.87
2006	44.48	44.20
2007	43.10	45.06
2008 (through June 22, 2007)	40.55	40.65

<b>Month</b>	<b>High</b>	<b>Low</b>
November 2006	45.26	44.46
December 2006	44.70	44.11
January 2007	44.49	44.07
February 2007	44.21	43.87
March 2007	44.43	42.78
April 2007	43.05	40.56
May 2007	41.04	40.14

(1) The noon buying rate at each period end and the average rate for each period differed from the exchange rates used in the preparation of our financial statements.

(2) Represents the average of the noon buying rate on the last day of each month during the period.

Although certain rupee amounts in this prospectus supplement have been translated into US dollars for convenience, this does not mean that the rupee amounts referred to could have been, or could be, converted into US dollars at any particular rate, the rates stated below, or at all. Except in the section on Market Price Information, all translations from rupees to US dollars are based on the noon buying rate in the City of New York for cable transfers in rupees at March 30, 2007. The Federal Reserve Bank of New York certifies this rate for customs purposes on each date the rate is given. The noon buying rate at March 30, 2007 was Rs. 43.10 per US\$1.00 and at June 22, 2007 was

Rs. 40.55 per US\$1.00.

S-34

---

**Table of Contents****DIVIDENDS**

Under Indian law, a company pays dividends upon a recommendation by its Board of Directors and approval by a majority of the shareholders at the annual general meeting of shareholders held within six months of the end of each fiscal year. The shareholders have the right to decrease but not increase the dividend amount recommended by the Board of Directors. Dividends may be paid out of the company's profits for the fiscal year in which the dividend is declared or out of undistributed profits of prior fiscal years. Dividends can also be paid by a company in the interim, termed interim dividend which does not require the approval of the shareholders unless it is combined with the final dividend being recommended by the board of directors. The Reserve Bank of India has stipulated that banks may declare and pay interim dividend out of the profits from the relevant accounting period, without prior approval of the Reserve Bank of India if they satisfy the minimum criteria and requirements and the cumulative interim dividend(s) are within the prudential cap on dividend payout ratio prescribed in the guidelines issued in this regard by the Reserve Bank of India. See also Supervision and Regulation Reserve Bank of India Regulations Restrictions on Payment of Dividends in our annual report on Form 20-F for the fiscal year ended March 31, 2007 filed on June 11, 2007, as amended by Form 20-F/A filed on June 13, 2007, which is incorporated by reference in the accompanying prospectus.

Pursuant to guidelines issued by the Securities and Exchange Board of India in February 2000, with respect to equity shares issued by us during a particular fiscal year, dividends declared and paid for such fiscal year are paid in full and are no longer prorated from the date of issuance to the end of such fiscal year.

ICICI Bank paid dividends consistently every year from fiscal 1996, the second year of its operations. For fiscal 2003, we paid a dividend, excluding dividend tax, of Rs. 7.50 (US\$0.17) per equity share aggregating to Rs. 4.6 billion (US\$107 million) which was paid in fiscal 2004. For fiscal 2004, we paid a dividend, excluding dividend tax, of Rs. 7.50 (US\$0.17) per equity share aggregating to Rs. 5.5 billion (US\$128 million). The amount of Rs. 5.5 billion (US\$128 million) excludes the impact of the issue of 6,992,187 equity shares on May 24, 2004 through the exercise of the greenshoe option in the issue of equity shares in April 2004. The dividend for fiscal 2004 was paid in fiscal 2005. For fiscal 2005, we paid a dividend, excluding dividend tax, of Rs. 7.50 (US\$0.17) per equity share and a special dividend, excluding dividend tax, of Rs. 1.00 (US\$0.02) per equity share to mark the completion of 50 years in finance by ICICI group aggregating to Rs. 6.3 billion (US\$146 million), which we paid out in August 2005. For fiscal 2006, we paid a dividend, excluding dividend tax, of Rs. 8.50 (US\$0.19) per equity share aggregating to Rs. 7.6 billion (US\$176 million), which we paid out in July 2006. For fiscal 2007, our board of directors has recommended a dividend, excluding dividend tax, of Rs. 10.00 (US\$0.23) per equity share aggregating to Rs. 9.0 billion (US\$209 million). This is subject to the approval of our shareholders at the annual general meeting scheduled on July 21, 2007.

The following table sets forth, for the periods indicated, the dividend per equity share and the total amount of dividends paid out on the equity shares during the fiscal year by ICICI Bank, each exclusive of dividend tax. This may be different from the dividend declared for the year.

<b>Dividend Paid During the Fiscal Year</b>	<b>Dividend Per Equity Share</b>	<b>Total Amount of Dividends Paid</b>
		<b>(Rs. in millions)</b>
2003	7.50	4,599
2004	7.50	5,507
2005	8.50	6,292
2006	8.50	7,583
2007 <sup>(1)</sup>	10.00	8,993

(1) Proposed. Dividend will be paid to shareholders who were shareholders of record as of June 15, 2007 (including on shares held in physical form where valid transfer instruments have been lodged with us as of that date).

**Table of Contents**

Dividend income is tax-exempt in the hands of shareholders. However, we are required to pay a tax on distributed profits. We were required to pay a 14.025% tax (including surcharge) on distributed profits in fiscal 2007. In fiscal 2008, we are required to pay a 16.995% tax (including surcharge) on distributed profits.

Future dividends will depend upon our revenues, cash flow, financial condition, the regulations of the Reserve Bank of India and other factors. Owners of ADSs will be entitled to receive dividends payable in respect of the equity shares represented by such ADSs. The equity shares represented by ADSs rank *pari passu* with existing equity shares. At present, we have equity shares issued in India and equity shares represented by ADSs.

S-36

---

**Table of Contents****CAPITALIZATION**

The following table summarizes our capitalization as of March 31, 2007 prepared in accordance with Indian GAAP in Indian rupees and, for convenience, in US dollars on an actual basis and as adjusted to give effect to the completion of this ADS offering and the Indian public offering and, in each case, assumes no exercise of the underwriters' over-allotment option. The numbers have been translated into US dollars at the RBI reference rate on June 22, 2007 of US\$1.00 = Rs. 40.71.

As of March 31, 2007

	Actual		As adjusted	
	(Rupees in millions)	(US dollars in millions)	(Rupees in millions) <sup>(7)</sup>	(US dollars in millions) <sup>(7)</sup>
<b>Borrowings<sup>(1)</sup></b>				
Short-term debt <sup>(2)</sup>	182,882.4	4,243.2	182,882.4	4,243.2
Long-term debt <sup>(3)</sup>	645,924.1	14,986.6	645,924.1	14,986.6
<b>Total debts (A)</b>	<b>828,806.5</b>	<b>19,229.8</b>	<b>828,806.5</b>	<b>19,229.8</b>
<b>Shareholders' Funds:</b>				
Share capital <sup>(4)</sup>	12,493.4	289.9	14,309.1	332.0
Reserves <sup>(5)</sup>	229,959.3	5,335.5	402,762.7	9,344.8
Less: unamortized deferred revenue expenditure <sup>(6)</sup>	502.0	11.6	502.0	11.6
<b>Total shareholders' funds (B)</b>	<b>241,950.7</b>	<b>5,613.8</b>	<b>416,569.8</b>	<b>9,665.2</b>
<b>Total capitalization (A) + (B)</b>	<b>1,070,757.2</b>	<b>24,843.6</b>	<b>1,245,376.3</b>	<b>28,895.0</b>

(1) Borrowings do not include deposits.

(2) Short-term debt represents debt with a contractual maturity of less than one year.

(3) Includes Rs. 212,211.2 million of unsecured redeemable debentures and bonds in the nature of subordinated debt. Long-term debt represents debt with a contractual maturity of greater than one year.

(4) Includes:

(a) preference share capital of Rs. 3500 million.

(b) 9,487,051 equity shares of Rs. 10 each fully paid up on exercise of employee stock options.

(5) Includes:

(a) Rs. 1,901.9 million on exercise of employee stock options.
