FORM 6-K

REPORT OF FOREIGN ISSUER

Pursuant to Rule 13a-16 or 15d-16 of the
Securities Exchange Act of 1934

For the period commencing April 14, 2004 through July 13, 2004

KONINKLIJKE PHILIPS ELECTRONICS N.V.

(Name of registrant)

Breitner Center, Amstelplein 2, 1096 BC Amsterdam, The Netherlands

(Address of principal executive offices)

Name and address of person authorized to receive notices
and communications from the Securities and Exchange Commission:

A. Westerlaken
Koninklijke Philips Electronics N.V.
Amstelplein 2
1096 BC Amsterdam The Netherlands

This report comprises a copy of the *Quarterly Report of the Philips Group* for the three months ended June 30, 2004, dated July 13, 2004 as well as a copy of the press releases entitled:

- Philips Plans NAVTEQ Share Sale , dated April 20, 2004;
 - Philips CEO Updates Market at Credit Suisse First Boston Conference , dated May 5, 2004;
 - Philips outlines growth plans for Medical and China at meeting with financial analysts , dated June 9, 2004;
 - Philips and Neusoft officially launch joint venture on Medical Systems , dated June 23, 2004;
 - Philips to acquire leading USA electronics accessories supplier Gemini , dated July 7, 2004;
 - Philips Reports net profit of EUR 616 Million in second quarter , dated July 13, 2004.
-

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrants have duly caused this report to be signed on their behalf, by the undersigned, thereunto duly authorized at Amsterdam, on the 13th day of July 2004.

Report on the performance of the Philips Group

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995

This document contains certain forward-looking statements with respect to the financial condition, results of operations and business of Philips and certain of the plans and objectives of Philips with respect to these items (including, but not limited to, cost savings), in particular the outlook paragraph of this report. By their nature, forward-looking statements involve risk and uncertainty because they relate to events and depend on circumstances that will occur in the future. There are a number of factors that could cause actual results and developments to differ materially from those expressed or implied by these forward-looking statements. These factors include, but are not limited to, levels of consumer and business spending in major economies, changes in consumer tastes and preferences, changes in law, the performance of the financial markets, pension costs, the levels of marketing and promotional expenditures by Philips and its competitors, raw materials and employee costs, changes in exchange and interest rates (in particular, changes in the euro and the US dollar can materially affect results), changes in tax rates and future business combinations, acquisitions or dispositions and the rate of technological changes. Market share estimates contained in this report are based on outside sources such as specialized research institutes, industry and dealer panels, etc. in combination with management estimates. Rankings are based on sales unless otherwise stated.

Use of Non-GAAP Information

In presenting and discussing the Philips Group's financial position, operating results and cash flows, management uses certain non-GAAP financial measures. These non-GAAP financial measures should not be viewed in isolation as alternatives to the equivalent GAAP measure and should be used in conjunction with the most directly comparable US GAAP measure(s). Unless otherwise indicated in this document, a discussion of the non-GAAP measures included in this document and a reconciliation of such measures to the most directly comparable US GAAP measure(s) is contained in the Annual Report 2003, Financial Statements and Analysis .

the data included in this report are unaudited

financial reporting according to US GAAP

Philips reports net profit of EUR 616 million in second quarter

Philips recorded net income of EUR 616 million (EUR 0.48 per share), compared with net income of EUR 42 million (EUR 0.03 per share) in the same period last year.

Sales amounted to EUR 7,280 million, an increase of 11% over the same period last year. The weaker US dollar and dollar-related currencies had a downward effect of 3%. Comparable sales increased by 14%.

Income from operations was a profit of EUR 356 million, compared with a loss of EUR 26 million in Q2 2003.

Unconsolidated companies contributed EUR 430 million to net income, including a gain of EUR 99 million related to InterTrust Technologies Corp. In Q2 2003 results from unconsolidated companies amounted to EUR 108 million.

Cash flow from operating activities was EUR 62 million. In Q2 2003 cash flow from operating activities totaled EUR 148 million. Inventories as a percentage of sales amounted to 12.5%, compared to 12.8% in Q2 2003.

Gerard Kleisterlee,
Philips President and CEO:

Clearly, Philips is on its way to sustained profitability and growth. The Board of Management is pleased to see the strong increase in top-line revenue, with improved income from operations and net income reflecting the benefit of continued financial discipline and focus on execution.

Based on our innovation pipeline, a well-filled order book and a reduced cost structure, we are confident that in the second half of the year we will see ongoing growth in revenues and earnings across our divisions.

Highlights in the quarter

Net income

Net income totaled EUR 616 million, compared with net income of EUR 42 million in the same quarter last year.

Income from operations was a profit of EUR 356 million, compared with a loss of EUR 26 million in Q2 2003, an improvement of EUR 382 million. Restructuring and impairment charges totaled EUR 50 million, compared with EUR 117 million last year. Pension costs were EUR 45 million, compared with EUR 112 million in Q2 2003.

The strong results from unconsolidated companies were primarily fueled by LG.Philips LCD and a one-time gain related to InterTrust Technologies Corp.

Sales by sector

Nominal sales for the group were 11% higher than last year. The weaker US dollar and dollar-related currencies had a downward effect of 3%.

Comparable sales at Medical Systems were up by 3%, driven by Computed Tomography and X-Ray. The 2% growth at Domestic Appliances and Personal Care (DAP) was attributable to improved sales at Shaving & Beauty and Food & Beverage. Consumer Electronics (CE) showed strong growth of 19%, driven by Connected Displays and Mobile Infotainment. At Lighting, sales growth was visible across almost all businesses and was driven by innovation. Semiconductors showed 28% comparable growth, the main driver being Mobile Communications.

Sales per region

Sales in Europe/Africa increased by 11%. Semiconductors and CE led with comparable growth of 18%, while DAP posted a 3% decline. Eastern Europe posted comparable growth of 30%.

The weaker dollar had an unfavorable effect of 6% on sales in North America. The 2% comparable growth was mainly driven by Lighting.

Sales growth in Latin America was fueled by 46% growth at CE.

In Asia Pacific, all sectors posted growth, particularly CE and Semiconductors. The growth was mainly driven by 38% comparable growth in China.

Income from operations by sector

Medical Systems' income from operations included a EUR 14 million goodwill impairment charge for MedQuist as well as investments in new business initiatives for molecular imaging and diagnostics.

DAP's income from operations included increased investments in advertising and promotion and in expansion of retail channels into emerging markets, as well as higher legal fees.

Income from operations at CE improved by EUR 95 million compared with Q2 2003. This was mainly due to savings generated by the Business Renewal Program and higher license income.

Lighting's significant improvement reflects growth through innovation and solid cost control.

The strong improvement at Semiconductors was due to higher sales, improved margins and the benefits of earlier restructurings.

Unallocated benefited from lower pension costs.
Financial income and expenses

Total financial expenses amounted to EUR 65 million, EUR 15 million below last year's level.
Results relating to unconsolidated companies

LG.Philips LCD's contribution of EUR 251 million to net income reflected strong sales growth, firm pricing and effective cost control.

A EUR 99 million net gain (after costs and taxes) was recognized by InterTrust Technologies Corp. following its license agreement with Microsoft Corp.

Cash balance

in millions of euros

| | Q2 2003 | Q2 2004 |
|--------------------------------------|--------------------|--------------------|
| Beginning balance | 1,568 | 3,105 |
| Net cash from operating activities | 148 | 62 |
| Gross capital expenditures | (220) | (350) |
| Acquisitions/divestments | 308 | (40) |
| Other cash from investing activities | 349 | 83 |
| Dividend paid | (460) | (460) |
| Changes in debt/other | (200) | 34 |
| | <hr/> | <hr/> |
| Ending balance | 1,493 | 2,434 |
| | <hr/> | <hr/> |

Cash balance

A dividend of EUR 0.36 per share was paid in respect of the financial year 2003 following the approval of the General Meeting of Shareholders on March 25, 2004.

EUR 1 billion of the available cash balance will be used to redeem short-term bonds maturing in Q3 2004.

Cash flows from operating activities

Cash flow from operating activities reflected increased investment in working capital in connection with the higher sales level.

Semiconductors and Medical Systems generated a strong cash flow from operating activities.

Gross capital expenditures

Gross capital expenditures of EUR 350 million were EUR 130 million higher than last year, primarily due to higher expenditures at Semiconductors.

In Q2 gross capital expenditures totaled EUR 189 million at Semiconductors, mainly for SSMC, EUR 65 million at Miscellaneous for Optical Storage and the High-Tech Campus in The Netherlands, and EUR 33 million at Lighting.

Inventories

Inventories as a percentage of sales amounted to 12.5%, an improvement of 0.3 percentage points compared to Q2 2003.

Significant decreases compared to last year were visible at Medical Systems and DAP.

Enhanced supply chain and working capital management remains a key area of focus in all businesses.
Net debt and group equity

The increase in net debt during the quarter reflects the reduction in the cash balance, which was mainly a result of the dividend payment of EUR 460 million.

Group equity increased by EUR 671 million from the last quarter, driven by net income.
Employment

During Q2 the number of employees increased by 303. Most of these were temporary employees. Headcount increases at Semiconductors and Lighting were partly offset by decreases at Corporate Investments and CE.

Compared to Q2 2003 the number of employees increased by 1,687. The increase occurred mainly at Semiconductors (higher level of activity and consolidation of SSMC), Optical Storage and Lighting, while headcount declined at Medical Systems, DAP and CE.

Medical Systems

Medical Systems: key data

| Number of employees (FTEs) | 31,166 | 30,155 |
| | <hr/> | <hr/> |

Business highlights

The joint venture between Philips and Neusoft was officially established under the name of Philips and Neusoft Medical Systems Co., Ltd.

At the Society of Nuclear Medicine's 51st annual meeting, Philips launched its Precedence SPECT/CT system, the industry's first SPECT with multi-slice diagnostic CT system, as a platform to accelerate molecular imaging.

Philips entered into a long-term research agreement with the University of Chicago Hospitals. This agreement involves the exchange of Philips' imaging equipment for the Hospitals' experience in computer-assisted detection and diagnosis.

Financial performance

Compared to last year, sales decreased 1% nominally, but increased 3% on a comparable basis. Computed Tomography and X-Ray were the main drivers of this growth.

All regions contributed to the comparable sales growth, especially EMEA, Asia Pacific and Latin America.

Income from operations included a EUR 14 million goodwill impairment charge for MedQuist and investments in new business initiatives for molecular imaging and diagnostics.

Cash flow benefited from effective working capital management.

The order book is strong. On a comparable basis, order intake increased by about 15% due to product innovations.
Looking ahead

With its positive order intake and strict cost control, Medical Systems is on track to reach 14% EBITA as a percentage of sales in 2004.

Domestic Appliances and Personal Care

DAP: key data

in millions of euros unless otherwise stated

| Net operating capital (NOC) | 589 | 528 |
| Number of employees (FTEs) | 8,525 | 8,301 |

Business highlights

The new Coolskin additive shaver range was well received by retailers and consumers.

Senseo continues to perform strongly in Europe. It is also leading the development of the cup-by-cup coffeemaker market in the USA, where it has tested as the preferred product. More than 6 million Senseo coffeemakers have been sold worldwide since first being brought to the market.

Philips DAP Industries Poland was recognized as the most effective company in Poland in the manufacturing and non-finance related sector by the Polish Academy of Science and Ministry of Economics.

Financial performance

Sales were at the same level as last year. On a comparable basis sales grew by 2%, whereas the main markets in which DAP operates were flat or even declining. The comparable growth was primarily driven by improved sales at Shaving & Beauty and Food & Beverage.

Income from operations included approximately EUR 20 million for increased investments in advertising and promotion and in expansion of retail channels into emerging markets as well as increased legal expenses. Solid gross margins were maintained.

Continued focus on asset management led to a reduction in net operating capital compared to Q2 2003.

Looking ahead

Focus on launching new products, extending partnerships, expanding retail channels into emerging markets and enhancing purchasing and cost savings.

Investments in advertising and promotion will be ongoing in Q3 and Q4.

Continuous competitive pressure in North America and Western Europe.

7

Consumer Electronics

Consumer Electronics: key data

in millions of euros unless otherwise stated

| | Q2 2003 | Q2 2004 |
|-------------------------------|--------------------|--------------------|
| Sales | 1,980 | 2,288 |
| Sales growth | | |
| % nominal | (18) | 16 |
| % comparable | (5) | 19 |

| in % of sales | (2.1) | 2.3 |
| Net operating capital (NOC) | 201 | 133 |
| Number of employees (FTEs) | 18,609 | 17,716 |

Business highlights

Introduction of Nike-Philips sports-inspired portable audio range, including MP3RUN, an MP3 player with a personal coach for fitness performance monitoring.

Flat TV market share in the top 10 European markets increased to above 20%.

Philips announced the acquisition of the leading North American electronics accessories supplier Gemini.

As an important step within the Business Renewal Program, Philips outsourced its after-sales service activities in the US to IBM in order to increase efficiency and cost productivity and to streamline processes.

Philips was recognized as the official electronics technology supplier for Ocean's 12, which will be released in December 2004.

Financial performance

CE sales (excluding Licenses) amounted to EUR 2,180 million, reflecting strong comparable growth of 18%, driven by Connected Displays and Mobile Infotainment in particular. Growth was visible in all regions, particularly in Europe and Asia Pacific.

Income from operations (excluding Licenses) was a loss of EUR 34 million, including EUR 18 million restructuring costs. This represents a EUR 64 million improvement compared with last year and is largely attributable to top-line growth and savings generated by the Business Renewal Program.

Sales of Licenses amounted to EUR 108 million. This resulted in income from operations of EUR 87 million (including EUR 36 million for past-use licenses), compared to EUR 56 million last year (including EUR 18 million for past-use licenses). Higher volumes and the increase in past-use license

income drove the improvement.

Looking ahead

The Business Renewal Program remains on target to achieve EUR 400 million savings by year-end 2005. Restructuring charges are expected to amount to approximately EUR 30 million in Q3 and approximately EUR 20 million in Q4.

Certain markets in Europe are weak.

Lighting

Lighting: key data

Business highlights

A new permanent lighting installation was supplied for the Eiffel Tower in Paris, providing a 30% energy saving compared with the previous installation.

In Shihwa, Korea, a production plant for car headlights was opened to support the growth of the Automotive Lighting business in Asia Pacific.

A UHP assembly plant was opened in Malu, China.

Financial performance

Sales increased on both a nominal and comparable basis, by 4% and 7% respectively, compared to last year. This improvement was primarily led by innovative new products in Lighting Electronics, Automotive, Special Lighting & UHP and to a lesser extent Lamps.

Income from operations improved to 12.5% of sales, a level not seen in Q2 since 2000, reflecting the improved markets and a successful drive towards operational excellence.

Looking ahead

Focus on profitable growth driven by innovation and cost management.

Continue to build capacity for innovative products.

Continue to optimize supply chain management and asset utilization.

Semiconductors

Semiconductors: key data

in millions of euros unless otherwise stated

| | Q2 2003 | Q2 2004 |
|-------------------------------|--------------------|--------------------|
| Sales | 1,114 | 1,418 |
| Segment revenues | 1,155 | 1,460 |
| Segment revenues growth | | |

| % comparable | (6) | 27 |
| Income (loss) from operations | (139) | 143 |
| in % of segment revenues | (12.0) | 9.8 |
| in % of sales | (12.5) | 10.1 |
| Net operating capital (NOC) | 3,132 | 3,254 |
| Number of employees (FTEs) | 33,943 | 36,050 |

Business highlights

A significant milestone was passed in putting 90-nm CMOS chips into production at the Crolles2 and TSMC wafer fabs in France and Taiwan.

Five new companies have joined the Nexperia Home Partner Program. There are now 17 independent software vendors and partners in the program.

A new Nexperia semiconductor reference design was introduced, which will help consumer electronics manufacturers produce high-quality, low-cost DVD video recorders.

Financial performance

Sequential revenues, excluding Mobile Display Systems (MDS), increased by 7% in US dollar terms. Sequential revenues of MDS declined by 7% in US dollar terms.

The book-to-bill ratio at quarter end remains strong at 1.13, despite a slight decrease from 1.25 at the end of Q1 2004.

The improvement in income from operations compared to Q1 was driven by the Standard Products and Mobile Communications businesses and higher loading of our manufacturing operations.

Income from operations in Q2 2003 was negatively impacted by accelerated asset depreciation and restructuring charges totaling EUR 90 million.

The wafer-fab utilization rate rose to 99% in Q2 from 90% in Q1.

Looking ahead

Low-single-digit sequential increase in segment revenues expected in Q3 2004 (in USD terms).

Restructuring charges expected in the second half of the year (probably Q4) in connection with the reorganization of the plant in Nijmegen, The Netherlands.

Miscellaneous

Miscellaneous: key data

Business highlights

Philips started shipping its 16x double-layer DVD writer to leading PC manufacturers. By the end of 2004 production volume is expected to be 600,000 units per month.

A memorandum of understanding was signed with Chinese Renmin University for an IP academy, to start in September 2004.

Three Industrial Design Excellence Awards (IDEA) were received from the Industrial Designers Society of America.

Financial performance Technology Cluster

Results in the Technology Cluster were impacted by higher investments in development projects for new technologies.

Financial performance Corp. Investments/others

The increase in nominal sales was mainly driven by Optical Storage, Navigation Technologies (NAVTEQ) and Philips Enabling Technologies Group (ETG).

Optical Storage and NAVTEQ continued to perform strongly. Income from operations at Assembléon and ETG improved compared to Q2 2003.

Looking ahead

Secondary offering of shares of NAVTEQ common stock planned for Q3.

Further execution of divestment program expected, assuming market conditions continue to improve.

Business highlights

E.com rating announced: Philips Annual Report 2003 into the world top 3, and an A+ rating.

Philips recognized as the best investor relations company in its sector in Europe by Institutional Investor.

Independent research identifies Philips as the second highest scoring company in applying the Dutch code on corporate governance.

Philips presented with the James Jackson Award in the UK for authority and competence in the field of EcoDesign.
Financial performance

Corporate and Regional Overhead costs came in EUR 9 million higher than in Q2 2003, primarily due to higher personnel-related costs.

Pension costs decreased by EUR 42 million compared to Q2 2003, mainly due to lower pension costs in the Netherlands.

Looking ahead

In Q3 income from operations related to pensions/postretirement benefit costs in the sector Unallocated is expected to be at approximately the same level as in Q2 2004.

Increased cost expected in the second half of the year due to higher marketing investments and the roll-out of the new brand positioning.

Joint ventures LG.Philips LCD and LG.Philips Displays

LG.Philips LCD joint venture (100%)

LG.Philips LCD joint venture (100%)

Sales at LG.Philips LCD grew by 12% sequentially (7% in local currency), driven by higher volume shipments and improved average sales prices of large-size panels. Compared to last year, sales were up 75% due to the increased market demand.

Income from operations amounted to 32.8% of sales, marginally above the level of Q1.

LG.Philips Displays joint venture (100%)

Q2 sales were driven by increased demand for both television and monitor tubes, partly due to high LCD panel prices. Sales of television tubes were strong, especially in the Americas and the Asia Pacific region.

Sequentially, sales grew by 7% due to higher volumes. Sales were up on last year's level by 10% in euro terms and 17% in US dollar terms.

Income from operations improved from Q1, helped by better margins. Restructuring charges amounted to EUR 8 million.

The positive operating cash flow was maintained in Q2.

Philips group

The 1st six months 2004

Net profit EUR 1,166 million

Nominal sales growth of 7% comparable sales up 11%, driven by Semiconductors and Consumer Electronics

Income from operations EUR 574 million

Unconsolidated companies contributed EUR 887 million to net income

Cash flow from operating activities EUR 466 million

Highlights in the 1st half year

Net income

Net income was a profit of EUR 1,166 million, compared to a net loss of EUR 27 million in the first half of 2003.

Sales amounted to EUR 13,911 million and were 7% higher than in the same period last year. The weaker US dollar and dollar-related currencies had a downward effect of 5%, while a 1% upwards effect was mainly due to the consolidations of SSMC in 2004 and the BenQ joint venture at Optical Storage in 2003.

Comparable sales increased 11%, predominantly due to strong sales growth at Semiconductors (26%) and CE (14%). Sales growth at Medical Systems was 3%. Lighting was solid at 4%. At DAP, soft market conditions, in particular in Western Europe and North America, led to 3% lower sales.

Income from operations was a profit of EUR 574 million, compared to a profit of EUR 6 million in the same period last year. Restructuring and impairment charges totaled EUR 66 million, compared to EUR 192 million in the first half of last year. Pension costs amounted to EUR 177 million, compared to EUR 230 million in the same period last year.

Unconsolidated companies contributed EUR 887 million to net income, compared to EUR 84 million in the first six months of 2003. Contributing to these improved results were a dilution gain of EUR 156 million on Philips participation in Atos Origin and a net gain of EUR 99 million related to InterTrust Technologies Corp. LG.Philips LCD contributed EUR 466 million, an increase of EUR 414 million, driven by much higher sales volumes and increased panel prices.

Other information

Other information

As announced earlier, MedQuist, in which Philips holds approximately 70.9% of the common stock, engaged Debevoise & Plimpton, independent outside counsel, supported by PricewaterhouseCoopers, to assist with a review of MedQuist's billing practices and related matters. MedQuist indicated that it was unable to predict when the review or the audit of its fiscal year 2003 results will be completed. MedQuist also stated that it was unable to assess whether the results of the review of its billing practices may have a material impact on its reported revenues and consolidated results of operations and financial position.

Philips reviewed the valuation of its investment in MedQuist on the basis of available data and determined that the investment is impaired as a result of underperformance of MedQuist in the current reporting period against expectations. In relation to this underperformance Philips has recognized an impairment charge of EUR 14 million in the second quarter. A full goodwill impairment test of the MedQuist investment cannot be completed in view of the fact that the outcome of MedQuist's review of its billing practices and related matters is as yet unknown. Therefore, any possible impact of the review on the valuation of MedQuist cannot presently be determined, and the EUR 14 million impairment charge recognized by Philips in this period does not reflect effects that the ongoing review of MedQuist may have on its results. The report from the independent investigation is expected soon. After the review and the audit of the MedQuist financial statements have been completed, an in depth-assessment of the strategic plan of MedQuist will be performed and the goodwill impairment test will be completed taking into consideration any changes that might result from the review.

In 2002, MedQuist had total sales of EUR 514 million and income from operations of EUR 76 million. At the end of June 2004 the goodwill of MedQuist was valued at EUR 618 million by Philips.

A refinancing package has been concluded with the financiers of LG.Philips Displays (LPD) for restructuring of its debt, resulting in extended maturities and reduced interest rates. The parent companies LG Electronics and Philips have each agreed to provide, in Q3 2004, an equity contribution of USD 250 million and a guarantee of USD 50 million as security for principal, interest and fees payable by LPD. At the same time, the existing USD 200 million guarantee from each shareholder will lapse.

LG.Philips LCD Co., Ltd. (LPL) of Korea, in which Philips holds a 50% interest, is preparing for an initial public offering of its common shares on the Korea Stock Exchange and (in the form of common shares represented by American Depositary Shares) on the New York Stock Exchange. Registration Statements have been filed with the Korean Financial Supervisory Commission and US Securities and Exchange Commission. As part of the offering, LPL expects to offer up to 33.6 million new shares, and the two shareholders, Philips and LG Electronics, expect to each offer up to 5.15 million of their LPL shares (excluding over-allotment options to be granted to the underwriting banks). As a result, Philips' ownership interest in LPL will go down to 43.2%, or 42.2% if the over-allotment options are exercised in full.

NAVTEQ Corporation of which Philips owns approximately 83% of the issued share capital is contemplating a secondary offering on the New York Stock Exchange, which is expected to reduce Philips' shareholding in the company to 45%. An over-allotment option to be granted to the underwriting banks will, if executed, lead to a further reduction of Philips' shareholding to approximately 38.8%. A Registration Statement has been filed with the US Securities and Exchange Commission.

Outlook

Outlook

Supported by a strong order intake, Medical Systems is on track to achieve its target of 14% EBITA (12.2% income from operations) in 2004. We expect that Semiconductors, building upon the success of its Nexperia chips, will finish the year strongly with a seasonality-driven Q4. Lighting is moving to a higher growth level, supported by a growing portfolio of innovative, high margin products and applications. Despite operating in a soft market, Domestic Appliances and Personal Care will achieve sales growth, supported by increased investment in marketing and new product introductions, and will improve its operating margins. At Consumer Electronics, market leadership in key product categories and the roll-out of the Business Renewal Program, which is intended to reduce the division's cost structure by EUR 400 million by year-end 2005, are important drivers of profitability.

Our Towards One Philips program will deliver further benefits in terms of synergies and new ways of working, enabling additional savings on indirect costs throughout the remainder of the year. Our ongoing transformation into a truly market-driven company is reflected in our investments in marketing, which together with our strong R&D position will help us to deliver the advanced and exciting products that our customers want.

| Net income (loss) | 0.03 | 0.48 | (0.02) | 0.91 |

The Group financial statements have been prepared on a basis consistent with US GAAP, which differs in certain respects from accounting principles as required by Dutch law (Dutch GAAP). Net income determined in accordance with Dutch GAAP amounted to a profit of EUR 962 million in the first six months of 2004, compared to a loss of EUR 383 million in the corresponding period last year. These aggregate amounts result in basic earnings per common share of a profit of EUR 0.75 in January-June 2004 compared to a loss of EUR 0.30 last year. The difference between Dutch GAAP and US GAAP is caused by the fact that goodwill is no longer amortized under US GAAP and by income recognition in respect of reversals of security impairments under Dutch GAAP.

| Short-term debt | 1,749 | 1,684 | 1,936 |
| | <hr/> | <hr/> | <hr/> |
| Total current liabilities | 9,376 | 9,241 | 9,811 |
| Non-current liabilities: | | | |
| Long-term debt | 5,185 | 4,192 | 4,210 |
| Long-term provisions | 2,050 | 1,976 | 2,014 |
| Other non-current liabilities | 590 | 653 | 736 |
| | <hr/> | <hr/> | <hr/> |
| Total liabilities | 17,201 | 16,062 | 16,771 |
| Minority interests | 182 | 175 | 327 |
| Stockholders' equity | 12,950 | 12,763 | 13,944 |
| | <hr/> | <hr/> | <hr/> |

| | | | |
|---|-----------|-----------|------------------|
| Total liabilities and equity | 30,333 | 29,000 | 31,042 |
| Number of common shares outstanding at the end of period (in thousands) | 1,277,082 | 1,280,686 | 1,279,958 |
| Ratios | | | |
| Stockholders' equity, per common share in euros | 12,950 | 12,763 | 13,944 |
| Inventories as a % of sales | 10.14 | 9.97 | 10.89 |
| Net debt : group equity ratio | 12.8 | 11.0 | 12.5 |
| | 29:71 | 18:82 | 21:79 |

Stockholders' equity determined in accordance with Dutch GAAP amounted to EUR 13,116 million as of June 30, 2004 compared to EUR 13,944 million under US GAAP. The deviation is caused by the fact that goodwill under Dutch GAAP has to be amortized and charged to income, whereas under US GAAP it is no longer amortized, but instead tested for impairment.

Philips Plans NAVTEQ Share Sale

Amsterdam, The Netherlands Royal Philips Electronics (AEX: PHI, NYSE: PHG) today announced that NAVTEQ Corporation in which Philips owns approximately 83% of the issued share capital has filed a registration statement on Form S-1 with the Securities and Exchange Commission (SEC) relating to a contemplated \$500 million secondary offering of shares of common stock. The contemplated offering remains subject to a number of conditions, including the circulation of a preliminary prospectus and the declaration by the SEC of the effectiveness of NAVTEQ's registration statement relating to the offering.

The shares in this offering are being offered by Philips and NavPart I B.V, NAVTEQ's principal stockholders. The size of the sale of NAVTEQ shares by Philips and NavPart I B.V will depend upon prevailing market conditions at the time of the offering. The managing underwriters will be Credit Suisse First Boston LLC and Merrill Lynch Pierce, Fenner & Smith Incorporated.

A registration statement relating to these securities has been filed with the SEC but has not yet become effective. These securities may not be sold nor may offers to buy be accepted prior to the time that the registration statement becomes effective. This press release shall not constitute an offer to sell or the solicitation of an offer to buy nor shall there be any sale of these securities in any State in which such offer, solicitation, or sale would be unlawful prior to registration or qualification under the securities laws of any such State.

Once available, preliminary prospectuses may be obtained directly from:

Philips CEO Updates Market at Credit Suisse First Boston Conference

Gerard Kleisterlee, President and Chief Executive Officer of Royal Philips Electronics (AEX: PHI, NYSE: PHG), will today address the Credit Suisse First Boston European Technology Conference in Barcelona, Spain. Mr. Kleisterlee will use this forum to recap the company's performance during the first quarter of 2004, while discussing Philips management agenda for the remainder of the year.

Mr. Kleisterlee will trace how Philips is maintaining the momentum achieved in its business toward the end of 2003, by illustrating growth and substantial earnings improvement in the first quarter of 2004 compared with the same period in 2003. In commenting on the company's performance to date, Mr. Kleisterlee said: "Now that our company is back on a more stable footing, it's time to turn our attention to growing our business while maintaining the financial discipline we've instilled in our organization." While in Barcelona, Mr. Kleisterlee will review the Philips 2004 business and performance agenda, as the company aims to maintain the upward trend in its performance.

With regard to the 2004 management agenda, Mr. Kleisterlee will also reconfirm the Medical System business is on track to reach the 14% EBITA target. For its Semiconductors division Philips expects the margins to further improve during the year. The Domestic Appliances and Personal Care business with a focus on launching new products will be back into higher sales and margins compared to the first quarter.

Philips outlines growth plans for Medical and China at meeting with financial analysts

Amsterdam, The Netherlands Today, Royal Philips Electronics (AEX: PHI, NYSE: PHG) will be holding a meeting with investors and financial analysts that focuses on future profitable growth areas for the company the company's Medical Systems division and the company's China activities.

Medical Systems on track to meeting financial targets expanding focus on clinical IT, personal healthcare and molecular medicine

After having integrated USD 5 billion in medical acquisitions over the past five years and created a leadership position in several diagnostic medical imaging and monitoring markets, Philips will report that its Medical Systems business continues to be on the path to achieving 14 percent EBITA (12.2 percent EBIT) for 2004 supported by market share gains through the introduction of innovative products.

Over the past couple of years we've succeeded in consistently improving our business performance not only in terms of our financials, but also when it comes to developing innovative products, simplifying our supply chain and building intimate relationships with our customers. We've done this while continuing to invest in our future. Of course, this is only the beginning, and there is so much more we can do to help our customers diagnose and monitor patients earlier and more effectively, both inside and outside of the hospital, said Jouko Karvinen, president and CEO, Philips Medical Systems.

At the meeting, executives will also address future growth opportunities for the Medical Systems business, and ways of expanding beyond the diagnostic imaging, patient monitoring and clinical IT businesses. While achieving the financial targets set for this year, the company will examine possibilities for acquisitions that extend and improve the company's existing Medical Systems operations. In a follow-up phase, the company will explore strategies for entering the emerging market for molecular medicine, which may include additional acquisitions.

Another topic for discussion at the meeting will be the increasing trend toward personal healthcare. Approximately half of today's healthcare costs in the hospital are associated with caring for the chronically ill. Studies have shown that enabling patients with chronic illnesses to monitor their condition at home not only helps lower healthcare costs, but also helps patients manage their health more effectively in an environment they prefer. Philips believes it is well positioned to address this potential market with its existing range of tele-monitoring devices, extensive experience in wireless home-networking technologies, intimate understanding of the end consumer and strong consumer brand. In personal healthcare, the company is working with partners to develop solutions that are broadband-based, personalized, linked to the care community, and which lead to the development of new care models.

In the field of molecular medicine, executives will discuss Philips' strategic partnerships with customers and research institutes to develop the technologies and

imaging agents for a market that is expected to take off in the next five years. Using an individual's biochemistry as the basis for diagnosis and treatment, molecular medicine will be able to detect and image conditions like heart disease and cancer at the level of individual cells. This way treatment can be offered even before symptoms occur leading to dramatically better patient outcomes and lower costs to society.

Business activities in China forecast to double over five years With the Chinese economy continuing to grow approximately eight percent each year, Philips expects to expand its local market presence and increase exports from China. Between 2002 and 2007, the company forecasts its total business activities in the country will almost double to over EUR 12 billion. In 2003, Philips was already one of the largest foreign investors in China, with a staff of approximately 18,000 employees, and over 1000 research and development personnel employed in the country.

China has the potential to make a major contribution to Philips' top-line growth, since in China the markets for all of our businesses are expected to grow twice as fast as global markets, David Chang, CEO of Philips China explained. Philips will capitalize on its leading market positions and strong brand to address this local demand, while stepping up research and development activities, broadening its base of Chinese talent and launching cross-company marketing programs. With our recently announced manufacturing and R&D joint venture with Neusoft in China combined with Philips' strengths in the country, we also expect our Medical Systems business to be a dramatic driver for growth in China, David Chang added.

A webcast of the Financial Analysts Day begins at 10.00 CET and can be followed at www.investor.philips.com. At 17.00 CET, a press briefing on the subjects covered in the morning will also be webcast. To follow the press briefing, please visit www.philips.com/webcast.

Philips and Neusoft officially launch joint venture on Medical Systems

June 23, 2004, Beijing The joint venture by Royal Philips Electronics (AEX: PHI, NYSE: PHG) or Philips, of the Netherlands and China Neusoft Group or Neusoft, was officially launched today under the name of Philips and Neusoft Medical Systems Co., Ltd.. Over 30 senior officials from the central and provincial governments, and Dutch Embassy gathered for the ceremony today with industry associates to witness the official launch ceremony.

Located in Shenyang of Northeast China, the joint venture has registered capital of about US\$30 million, which is equivalent to RMB about 250 million. Philips holds 51% of that capital share and Neusoft Digital Medical Company holds 49%. The R&D and manufacturing joint venture represents a breakthrough for Philips and Neusoft medical activities in China, which enables both parties to expand their R&D and manufacturing capabilities with a broader portfolio of medical equipment.

Both partners will benefit from the win-win partnership, as Neusoft will not only benefit from Philips' experience with the most advanced technologies and management skills, but also have access to opportunities for much needed internationalisation. By joining forces with a local industry leader, Philips can quickly deploy its strategy for the market in China and gain a direct link to a long-term supply of skilled workforce as well as R&D talent, with the aim to build the new JV into a global competence center of Philips for economy to mid-range products.

Philips and Neusoft Medical Systems Co. Ltd. will begin developing and manufacturing computed tomography (CT), MR, Ultrasound and x-ray equipment, based on Neusoft Digital Medical Systems' previous production capabilities and product designs from both houses. Both parties will retain their own brands, sales forces and service networks, in the meantime bring with them the understanding of different aspects of the medical systems business.

Dr. Liu Ji Ren, Chairman and CEO of Neusoft, said at the launch ceremony and press conference: The cooperation marks the crusade of full-scaled internalisation of Neusoft Digital Medical Systems. By partnering with Philips in the areas of technology, management and marketing, we will not only be able to build up the competitiveness of Neusoft in domestic medical systems market, but also enhance our capabilities in the process of expanding global market.

Dr. Martin Schuurmans, Executive Vice President of Philips Medical Systems, feels Philips and Neusoft will take full advantage of their partnership to offer even more cost-effective advanced medical solutions for China and the rest of the world. By joining forces with Neusoft, Philips will leapfrog into the high-growth medical equipment market in China and sharpen the competitive edge by tapping into local know-how of applications for that market. In the meantime, expanding our base in China will also help us to serve international markets in Asia Pacific, South America and East Europe.

China has the potential to make a major contribution to Philips' top-line growth, said David Chang, CEO of Philips China, the cooperation with Neusoft marks the

major breakthrough of Philips Medical Systems in China market, we expects the Medical Systems business to be a dramatic driver for growth in China.

According to the Ministry of Health, the public medical and health services remain as one of the most important pillars for social development and sustainable growth. This JV will provide the advanced medical equipments and solutions for the Chinese medical industry and enhance the Chinese R&D capabilities in the mid-range medical apparatus market.

As China's economy continues to grow and as Chinese people continue to pay more attention to the healthcare industry, the medical market will experience a \$1.7 billion US growth (which is an annual growth by about 10% by 2006). The investment made by the Chinese government in the medical equipment market has already experienced an annual increase of 13%. China has become the world's third largest medical market, following the United States and Japan. However, it is expected to overtake Japan in the next five to ten years, becoming the world's second largest medical market.

Statistics show that the medium and economy market products hold 75% of the Chinese medical market and 45% of the global medical market. Moreover, these products show an annual growth rate of 15% in China and 8% in the worldwide market. As the trend continues the mid-to- economy range products will soon become the mainstream in the medical market.

Centered on Shenyang, Liaoning Province has developed an economic zone with many emerging industries and markets, convenient transportations and infrastructure. Li Wancai, Vice Governor of Liaoning Province, hailed: this partnership will exert a positive impact to boost the economic revitalization of Northeast China. Chen Zhenggao, the Mayor of Shenyang Municipality, stated: This cooperation is a wise decision to achieve win-win for Shenyang has developed over decades a solid foundation for manufacturing with capable engineers and management talents.

Extensive training is now being provided to ensure that the JV can run with the same manufacturing efficiency as Philips' other medical production sites and products are up to international standards. This will include on-site training of key managers and engineers as well as further improvement of ongoing quality controls. It is predicted to maintain an annual growth rate of 30% during the next five years. It is expected that by 2008 the JV will be doing the R&D and manufacturing of over 10 categories and 50 different kinds of products. The JV will export their products to the overseas market, especially to the emerging markets that have strong demands for medium and economy products (i.e. South America and East Europe).

About Neusoft Group Ltd.

Neusoft is one of the leading software and solution companies in China, it originated from Northeastern University in 1991. It owns the first listed software company in China, Neusoft Co., Ltd. Philips to acquire leading USA electronics accessories supplier Gemini

Amsterdam, The Netherlands and Clifton, NJ, United States Royal Philips Electronics (AEX: PHI, NYSE: PHG) and Gemini Industries, Inc., the leading North American supplier of consumer electronics and PC accessories, announced today that they have signed an agreement under which Philips will acquire Gemini. Financial details of the acquisition have not been disclosed.

Since Gemini was founded in 1964, the New Jersey-based company has become the premier supplier of accessories for the audio, video, computing, gaming, digital imaging and telephony markets in the United States. Gemini's current portfolio of 2500 products has given the company prominent positioning in major retail chains across America, including the leading national retailers. Philips has been a supplier to Gemini for the last 8 years, and has licensed its brand to part of Gemini's portfolio. The company has approximately 500 employees.

Through the acquisition of Gemini, Philips will significantly grow the peripherals and accessories business activities on a global scale. The consumer electronics and PC-related accessories industry is growing fast. Within this market Gemini, whose 2003 gross sales were approximately US \$200 million, has played a leading role in driving the application of category management, incorporating product creation, supply and shelf-space management in a single value chain. This acquisition provides Philips and Gemini with a unique opportunity to broaden the scope into Europe, to better serve the global retailers' needs and leverage internal synergies between the two companies.

Accessories are one of the fastest growing and higher-margin product categories in consumer electronics today, and represent an increasingly important part of retailers' operations, says Frans van Houten, Senior Vice President Royal Philips Electronics and CEO, Philips Consumer Electronics Business Groups. This makes the acquisition of Gemini a perfect fit for Philips, broadening our US distribution strength and adding to our highly successful portfolio of innovative, easy-to-use and award-winning audio-video accessories and PC peripherals at the same time.

We look forward to continuing Gemini's growth as part of Philips' global organization, says Michael O'Neal, Chief Executive Officer of Gemini. With Philips' backing including its industry-leading technologies, excellent product development capabilities and worldwide brand we will be better positioned to serve our customers and take the business to the next level.

Subject to regulatory approval, it is anticipated that the transaction will close in August 2004.

Philips reports net profit of EUR 616 million in second quarter

Report on the performance of the Philips Group

all amounts in millions of euros unless otherwise stated

the data included in this report are unaudited

financial reporting according to US GAAP

Philips reports net profit of EUR 616 million in second quarter

Philips recorded net income of EUR 616 million (EUR 0.48 per share), compared with net income of EUR 42 million (EUR 0.03 per share) in the same period last year.

Sales amounted to EUR 7,280 million, an increase of 11% over the same period last year. The weaker US dollar and dollar-related currencies had a downward effect of 3%. Comparable sales increased by 14%.

Income from operations was a profit of EUR 356 million, compared with a loss of EUR 26 million in Q2 2003.

Unconsolidated companies contributed EUR 430 million to net income, including a gain of EUR 99 million related to InterTrust Technologies Corp. In Q2 2003 results from unconsolidated companies amounted to EUR 108 million.

Cash flow from operating activities was EUR 62 million. In Q2 2003 cash flow from operating activities totaled EUR 148 million. Inventories as a percentage of sales amounted to 12.5%, compared to 12.8% in Q2 2003.

Gerard Kleisterlee, Philips President and CEO: Clearly, Philips is on its way to sustained profitability and growth. The Board of Management is pleased to see the strong increase in top-line revenue, with improved income from operations and net income reflecting the benefit of continued financial discipline and focus on execution. Based on our innovation pipeline, a well-filled order book and a reduced cost structure, we are confident that in the second half of the year we will see ongoing growth in revenues and earnings across our divisions.

Use of Non-GAAP Information

In presenting and discussing the Philips Group's financial position, operating results and cash flows, management uses certain non-GAAP financial measures. These non-GAAP financial measures should not be viewed in isolation as alternatives to the equivalent GAAP measure and should be used in conjunction with the most directly comparable US GAAP measure(s). Unless otherwise indicated in this document, a discussion of the non-GAAP measures included in this document and a reconciliation of such measures to the most directly comparable US GAAP

measure(s) is contained in the Annual Report 2003, Financial Statements and Analysis .
