(Zip Code)

(305) 520-8400
(Registrant's telephone number including area code)

Please send copies of notices and communications from the Securities and Exchange Commission to:

c/o Del Monte Fresh Produce Company
241 Sevilla Avenue
Coral Gables, Florida 33134
(Address of Registrant's U.S. Executive Offices)

Securities registered pursuant to Section 12(b) of the Act:

Title of Each Class	Name of Each Exchange on Which Registered
Ordinary Shares, par value \$0.01 per share	New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act: None

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of Ordinary Shares held by non-affiliates at July 2, 2010, the last business day of the registrant's most recently completed second quarter, and was \$802,352,679 based on the number of shares held by non-affiliates of the registrant and the reported closing price of Ordinary Shares on July 2, 2010 of \$19.94. The registrant does not have non-voting common stock outstanding.

As of February 18, 2011, there were 58,787,283 Ordinary Shares of Fresh Del Monte Produce Inc. issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's definitive Proxy Statement for the 2011 Annual General Meeting of Shareholders to be filed with the Securities and Exchange Commission within 120 days after the end of the registrant's fiscal year are incorporated by reference in Part III of this report.

Forward-Looking Statements

In this Annual Report (the “Report”), references to “\$” and “dollars” are to United States dollars. References in this Report to Fresh Del Monte, “we”, “our” and “us” refer to Fresh Del Monte Produce Inc. and its subsidiaries, unless the context indicates otherwise. Percentages and certain amounts contained herein have been rounded for ease of presentation. Any discrepancies in any table between totals and the sums of amounts listed are due to rounding. As used herein, references to years ended 2008 through 2010 are to fiscal years ended December 26, 2008, January 1, 2010 and December 31, 2010, respectively.

This Report, information included in future filings by us and information contained in written material, press releases and oral statements, issued by or on behalf of us contains, or may contain, statements that constitute forward-looking statements in particular, information in Item 1. Business and Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations – Trend Information, contained in this Report.. In this Report, these statements appear in a number of places and include statements regarding the intent, beliefs or current expectations of us or our officers (including statements preceded by, followed by or that include the words “believes,” “expects,” “anticipates” or similar expressions) with respect to various matters, including our plans and future performance. These forward-looking statements involve risks and uncertainties. Fresh Del Monte’s actual plans and performance may differ materially from those in the forward-looking statements as a result of various factors, including (i) the uncertain global economic environment and the timing and strength of a recovery in the markets we serve, and the extent to which adverse economic conditions continue to affect our sales volume and results, including our ability to command premium prices for certain of our principal products, or increase competitive pressures within the industry, (ii) the impact of governmental initiatives in the United States and abroad to spur economic activity, including the effects of significant government monetary or other market interventions on inflation, price controls and foreign exchange rates, (iii) the impact of governmental trade restrictions, including adverse governmental regulation that may impact our ability to access certain markets, (iv) our anticipated cash needs in light of our liquidity, (v) the continued ability of our distributors and suppliers to have access to sufficient liquidity to fund their operations, (vi) trends and other factors affecting our financial condition or results of operations from period to period, including changes in product mix or consumer demand for branded products such as ours, particularly as consumers remain price-conscious in the current economic environment; anticipated price and expense levels; the impact of crop disease, severe weather conditions, such as the recent adverse weather conditions in our banana production areas, or natural disasters, such as earthquakes, on crop quality and yields and on our ability to grow, procure or export our products; the impact of prices for petroleum-based products and packaging materials; and the availability of sufficient labor during peak growing and harvesting seasons, (vii) the impact of pricing and other actions by our competitors, particularly during periods of low consumer confidence and spending levels, (viii) the impact of foreign currency fluctuations, (ix) our plans for expansion of our business (including through acquisitions) and cost savings, (x) our ability to successfully integrate acquisitions into our operations, (xi) the impact of impairment or other charges associated with exit activities, crop or facility damage or otherwise, (xii) the timing and cost of resolution of pending legal and environmental proceedings, (xiii) the impact of changes in tax accounting or tax laws (or interpretations thereof), and the impact of settlements of adjustments proposed by the Internal Revenue Service or other taxing authorities in connection with our tax audits, and (xiv) the cost and other implications of changes in regulations applicable to our business, including potential legislative or regulatory initiatives in the United States or elsewhere directed at mitigating the effects of climate change. All forward-looking statements in this report are based on information available to us on the date hereof, and we assume no obligation to update any such forward-looking statements.

The forward-looking statements are not guarantees of future performance and involve risks and uncertainties. It is important to note that our actual results may differ materially from those in the forward-looking statements as a result of various factors. The accompanying information contained in this Report, identifies important factors that could cause our actual results to differ materially from those in the forward-looking statements.

The volume data included in this Report has been obtained from our records. Except for volume data for Fresh Del Monte, the market share, volume and consumption data contained in this Report have been compiled by us based upon data and other information obtained from third-party sources, primarily from the Food and Agriculture Organization of the United Nations (the "FAO"), and from our surveys of customers and other company-compiled data. Except as otherwise indicated, volume data contained in this Report is shown in millions of 40-pound equivalent boxes.

PART I

Item 1. Business

History and Development of Fresh Del Monte

Our legal name is Fresh Del Monte Produce Inc., and our commercial name is Del Monte Fresh Produce. We are an exempted holding company, incorporated under the laws of the Cayman Islands on August 29, 1996. At December 31, 2010, the close of our most recent fiscal year, members of the Abu-Ghazaleh family directly owned 35.3% of our outstanding Ordinary Shares.

Our principal executive office is located at Walker House, 87 Mary Street, George Town, Grand Cayman, KY1-9002, Cayman Islands. The address of our U.S. executive office is located at Del Monte Fresh Produce Company, 241 Sevilla Avenue, Coral Gables, Florida 33134. Our telephone number at our U.S. executive office is (305) 520-8400. Our Internet address is <http://www.freshdelmonte.com>. The electronic version of this Annual Report on Form 10-K, along with other information about us, our operations and our results and other documents filed with the Securities and Exchange Commission (the "SEC") can be found on our Web site. Information on our Web site is not a part of this Report on Form 10-K.

Our global business, conducted through subsidiaries, is primarily the worldwide sourcing, transportation and marketing of fresh and fresh-cut produce together with prepared food products in Europe, Africa and the Middle East. We source our fresh produce products (bananas, pineapples, melons, tomatoes, grapes, apples, pears, peaches, plums, nectarines, cherries, citrus, avocados, blueberries and kiwi) primarily from Central and South America, Africa, the Philippines, North America and Europe. We source our prepared food products primarily from Africa, Europe, the Middle East and Asia. Our products are sourced from company-owned operations, through joint venture arrangements and through supply contracts with independent producers. We distribute our products in North America, Europe, Asia, the Middle East, Africa and South America.

On June 6, 2008, we acquired all of the shares of Desarrollo Agroindustrial de Frutales, S.A., a producer of high-quality bananas in Costa Rica; all of the shares of Frutas de Exportacion, S.A., a major producer of gold pineapples in Costa Rica; and all of the shares of an affiliated sales and marketing company, collectively known as "Caribana". The purchase price for Caribana was \$405.9 million plus \$2.9 million for acquisition-related expenses, financed with \$88.5 million in cash on hand and drawings under our then-existing syndicated revolving credit facility. As a result of this acquisition, our land holdings in Costa Rica increased by approximately 13,000 hectares of quality farm land producing approximately 13 million boxes of bananas and 11 million boxes of gold pineapples annually. We also acquired state-of-the-art packing facilities, as well as modern farming equipment. Caribana's extensive production area substantially increased our presence in the banana market and further strengthened our number one position in the gold pineapple market. The close proximity of Caribana's production and packing operations to our existing farms has provided significant operating efficiencies and synergies. This transaction has enabled us to continue to capitalize on the growing global demand for fresh produce and to expand our reach into existing and new markets.

On June 27, 2008, we acquired certain operating assets, excluding land, of Melones de Costa Rica, S.A. ("MCR"). MCR is a 50%-owned unconsolidated subsidiary that produced melons for us in Costa Rica. MCR continues to own the land that is leased to us on a long-term basis. The purchase price was \$8.0 million. During the third quarter of 2008, we also acquired two additional melon operations in Guatemala. The assets acquired comprised principally farming equipment, packing sheds and materials and supplies inventory. The purchase price was \$13.9 million.

Our capital expenditures totaled \$70.8 million in 2010, consisting of approximately \$31.0 million, principally for expansion of production facilities in Guatemala, Costa Rica and Brazil combined with improvements to our port

facilities in North America and distribution facilities in Saudi Arabia related to the banana segment. We also spent approximately \$33.1 million principally for expansion of production facilities in Costa Rica, Guatemala, Chile and the Philippines and fresh-cut facilities in the United States and the United Kingdom related to the other fresh produce segment and \$6.7 million principally for expansion of production facilities in Kenya, Greece and Jordan related to the prepared food segment. Our capital expenditures totaled \$84.5 million in 2009, consisting of approximately \$51.4 million primarily for distribution centers in Saudi Arabia and for expansion of production facilities in Costa Rica, Guatemala, Brazil and the Philippines related to the banana segment, \$27.8 million principally for expansion of our pineapple operations in Costa Rica and the Philippines, expansion of non-tropical fruit operations in Chile and expansion of fresh-cut fruit facilities in North America and the United Kingdom related to the other fresh produce segment and \$5.3 million for expansion of production facilities in Jordan and Kenya related to the prepared food segment. Our capital expenditures totaled \$101.5 million in 2008, consisting of \$59.4 million principally for distribution centers in Saudi Arabia and South Korea and for expansion of production facilities in the Philippines, Guatemala and Brazil related to the banana segment, \$23.1 million principally for expansion of production facilities in Costa Rica, the Philippines and Chile related to the other fresh produce segment and \$19.0 million principally for production facilities in Jordan and Kenya related to the prepared food segment. The principal capital expenditures planned for 2011 consist primarily of the expansion of production facilities in Costa Rica, Guatemala, Chile, Kenya, Jordan and Greece and for our distribution and fresh-cut facilities in Saudi Arabia, North America and the United Kingdom.

Business Overview

We are one of the world's leading vertically integrated producers, marketers and distributors of high-quality fresh and fresh-cut fruit and vegetables, as well as a leading producer and distributor of prepared fruit and vegetables, juices, beverages and snacks in Europe, Africa and the Middle East. We market our products worldwide under the DEL MONTE® brand, a symbol of product innovation, quality, freshness and reliability since 1892. Our global sourcing and logistics network allows us to provide regular delivery of consistently high-quality fresh produce, juices, beverages, processed fruit and vegetables and value-added services to our customers.

We have leading market positions in the following product categories. We believe we are:

the number one marketer of fresh pineapples worldwide, including our Del Monte Gold ® Extra Sweet pineapple;

the third-largest marketer of bananas worldwide;

a leading marketer of branded fresh-cut fruit in the United States and the United Kingdom;

a leading re-packer of tomatoes in the United States;

a leading year-round marketer of branded grapes in the United States;

a leading marketer of branded non-tropical fruit in selected markets; and

a leading marketer for canned fruit and pineapple in the European Union (EU) and other European markets.

We source and distribute our fresh produce products on a global basis. Our products are grown primarily in Central and South America, Africa and the Philippines. We also source products from North America and Europe. Our products are sourced from company-controlled farms and independent growers. We transport our fresh produce to markets using our fleet of 12 owned and 14 chartered refrigerated vessels, and we operate four port facilities in the United States. At year end 2010, we operated 43 distribution centers, generally with cold storage and banana ripening facilities in our key markets worldwide, including the United States, the United Kingdom, Germany, Japan, South Korea, Hong Kong, Poland, the United Arab Emirates and Saudi Arabia. We also operate 14 fresh-cut facilities in the United States, the United Kingdom, Japan, the United Arab Emirates and Saudi Arabia, some of which are located within our distribution centers. Through our vertically integrated network, we manage the transportation and distribution of our products in a continuous temperature-controlled environment. This enables us to preserve quality and freshness, and to optimize product shelf life, while ensuring timely and year-round distribution. Furthermore, our position as a volume producer and shipper of bananas allows us to lower our average per-box logistics cost and to provide regular deliveries of our premium fresh fruit to meet the increasing demand for year-round supply.

We market and distribute our products to retail stores, food clubs, wholesalers, distributors and foodservice operators in more than 100 countries around the world. North America is our largest market, accounting for 49% of our net sales in 2010. Europe, Asia and the Middle East regions are our other major markets, accounting for 26%, 12% and 12% of our net sales in 2010, respectively. Our distribution centers and fresh-cut facilities address the growing demand from supermarket chains, club stores, mass merchandisers and independent grocers to provide value-added services, including the preparation of fresh-cut produce, ripening, customized sorting and packing, just-in-time and direct-store-delivery and in-store merchandising and promotional support. Large national retail chains are increasingly choosing fewer suppliers – ones that can serve all of their needs on a national basis – and there is a significant opportunity for a company with a full fresh and fresh-cut produce line, a well-recognized brand, a consistent supply of quality produce and a national distribution network to become the preferred supplier to these large retail customers. We believe that we are uniquely positioned as a preferred supplier, and our goal is to expand on this status by

increasing our leading position in fresh-cut produce, expanding our banana, pineapple and melon business and diversifying our other fresh produce selections. We are a multinational company offering a variety of fresh produce in all major markets along with fresh-cut produce in selected markets and a prepared food product line that includes prepared fruit and vegetables, juices, beverages and snacks in Europe, Africa, the Middle East and countries formerly part of the Soviet Union.

2

Our strategy is focused on a combination of maximizing revenues from our existing infrastructure, entering new markets and strict cost control initiatives. We plan to continue to capitalize on the growing global demand for fresh produce and expand our reach into existing and new markets. We expect sales growth of fresh produce in key markets by increasing sales volume and per unit sales prices as permitted by market conditions. Our 2008 acquisitions substantially increased our production capability of bananas and pineapples and continue to provide the potential over time for further operating efficiencies and synergies. In addition, our number one position in the gold pineapple market has been further strengthened. Our strategy includes increasing volumes from existing production and distribution facilities in order to improve operating efficiencies and reduce per unit costs. We plan additional investments in production facilities in order to expand our product offering in established markets and continue with our recent expansion in growth markets, such as the Middle East, Africa and countries formerly part of the Soviet Union.

Products Sourcing and Production

Our products are grown and sourced primarily in Central and South America, Africa and the Philippines. We also source products from North America and Europe. In 2010, 45% of the fresh produce we sold was grown on company-controlled farms and the remaining 55% was acquired through supply contracts with independent growers. Costa Rica is our most significant sourcing location representing approximately 36% of our total sales volume of fresh produce products and where we have 42% of our property, plant and equipment in 2010.

We produce, source, distribute and market a broad array of fresh produce throughout the world, primarily under the DEL MONTE® brand, as well as under other proprietary brands, such as UTC® and Rosy®. We also produce, distribute and market prepared fruits and vegetables, juices, beverages and snacks under the DEL MONTE® brand, as well as other proprietary brands, such as Fruit Express™, Just Juice®, Fruitini® and other regional trademarks in Europe, Africa, the Middle East and countries formerly part of the Soviet Union.

The following table indicates our net sales by product for the last three years:

	December 31, 2010		Year ended January 1, 2010			December 26, 2008		
	(U.S. dollars in millions)							
Net sales by product category:								
Banana	\$ 1,620.2	46 %	\$ 1,510.9	43 %	\$ 1,420.2	40 %		
Other fresh produce:								
Gold pineapples	506.3	14 %	475.6	14 %	458.2	13 %		
Fresh-cut produce	317.3	9 %	314.8	9 %	319.2	9 %		
Non-tropical fruit	293.0	8 %	278.6	8 %	286.1	8 %		
Melons	179.5	5 %	242.1	7 %	221.1	6 %		
Tomatoes	114.3	3 %	120.0	3 %	140.0	4 %		
Vegetables	65.4	2 %	68.4	2 %	78.8	2 %

Other products and services	49.2	2 %	96.6	3 %	138.6	4 %		
Total	\$ 3,552.9	100 %	\$ 3,496.4	100 %	\$ 3,531.0	100 %		

See Note 24, "Business Segment Data", to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data for further information.

3

Bananas

Bananas are the leading internationally traded fresh fruit in terms of volume and dollar sales and the best-selling fresh fruit in the United States. Europe and North America are the world's largest banana markets and Asia is the third largest market. According to the latest published statistics from the Food and Agriculture Organization of the United Nations ("FAO"), in 2008, Europe, North America, Asia and the Middle East consumed 19.3, 9.8, 4.3 and 1.3 billion pounds of bananas, respectively. Bananas are a key produce department product due to their high turnover and the premium margins realized by grocers.

Bananas have a relatively short growing cycle and are grown in tropical locations with humid climates and heavy rainfall, such as Central and South America, the Caribbean, the Philippines and Africa. Bananas are grown throughout the year in these locations, although demand and prices fluctuate based on the relative supply of bananas and the availability of seasonal and alternative fruit.

We believe that we are the world's third-largest marketer of bananas, based on internally generated data. Our banana sales in North America, Europe, Asia and the Middle East accounted for approximately 44%, 25%, 18% and 13% of our net sales of bananas in 2010, respectively. We produced 35% of the banana volume we sold in 2010 on company-controlled farms, and we purchased the remainder from independent growers.

Bananas are the best-selling fresh produce item, as well as a high-margin product for many of our customers. Accordingly, our ability to provide our customers with a year-round supply of high-quality DEL MONTE® bananas is important to maintaining our existing customer relationships and attracting new customers. Our position as a volume shipper of bananas has also allowed us to make regular shipments of a wide array of other fresh produce, such as pineapples, melons and plantains, reducing our average per-box logistics costs and maintaining higher quality produce with a longer shelf life.

We produce bananas on company-controlled farms in Costa Rica, Guatemala, Brazil, Cameroon and the Philippines and we purchase bananas from independent growers in Costa Rica, Ecuador, Colombia, Guatemala and the Philippines. Although our supply contracts are primarily long-term, we also make purchases in the spot market, primarily in Ecuador. In Ecuador and Costa Rica, there are minimum export prices for the sale of bananas, which are established by the respective governments and reviewed by them on a periodic basis.

Due in part to limitations in the Philippines on foreign ownership of land, we purchase the majority of bananas in the Philippines through long-term contracts with independent growers. Approximately 76% of our Philippine-sourced bananas are supplied by one grower, representing 14% of the Philippines banana industry volume in 2010. In the Philippines, we have leased approximately 2,000 hectares of land where we have planted bananas for the Asia market. Due to disease affecting an isolated growing area of our bananas in the Philippines, during the fourth quarter of 2010, we decided to abandon those affected areas. As a result of this decision, we reduced our growing area from approximately 2,000 to 850 hectares and recorded \$12.7 million in asset impairments as of December 31, 2010.

Gold Pineapples

Pineapples are grown in tropical and sub-tropical locations, including the Philippines, Costa Rica, Hawaii, Thailand, Malaysia, Brazil, Indonesia and various countries in Africa. In contrast to bananas, pineapples have a long growing cycle of 18 months, and require re-cultivation after one to two harvests. Pineapple growing thus requires a higher level of capital investment, as well as greater agricultural expertise.

The premium pineapples, such as our Del Monte Gold® Extra Sweet pineapple, which has enhanced taste, golden shell color, bright yellow flesh and higher vitamin C content, has replaced the Champaka and other traditional pineapple varieties in popularity and demand and has led to increased competition.

We believe we are the market leader of fresh pineapples worldwide, based on internally generated data. Pineapple sales in North America, Europe, Asia and the Middle East accounted for 52%, 31%, 14% and 3% of our net sales of pineapples in 2010, respectively. From 1996 to 2010, our volume of the Del Monte Gold ® Extra Sweet pineapple increased from two and a half million boxes to 29.2 million boxes. Our pineapple volume has increased by 6% this year. Based on FAO data, for the 10-year period from 1998 to 2008, the volume of pineapple sales in the United States, Europe, Asia and the Middle East has increased by 194%, 258% and 76% and 1,955%, respectively. We believe that a substantial portion of this growth is due to our introduction of the Del Monte Gold ® Extra Sweet pineapple. As a result of our continued expansion of existing pineapple operations, we expect to continue to increase the sales volume of our extra sweet pineapples in the near future with extra sweet pineapples grown in Costa Rica and the Philippines.

The principal production and procurement areas for our gold pineapples are Costa Rica and the Philippines. Given the complexity of pineapple cultivation relative to our bananas, a higher percentage of the fresh pineapples we sell (80% by volume in 2010) are produced on company-controlled farms.

Fresh-Cut Produce

Fresh-cut produce first gained prominence in many U.S. and European markets with the introduction of washed and cut vegetables. While packaged salads continue to lead the category of fresh-cut produce sales, the category has expanded significantly to include gold extra sweet pineapple, melons, mango, grapes, citrus and assorted vegetable produce items that are washed, cut and packaged in a ready-to-use form. Market expansion has been driven largely by consumer demand for fresh, healthy and ready-to-eat food alternatives, as well as significant demand from foodservice operators. Within this market, we believe that there has been increasing differentiation between companies active primarily in the packaged salad market and other companies, like us, that can offer a wide variety of fresh-cut fruit and vegetable items.

The majority of fresh-cut produce is sold to consumers through retail store and club store settings, as well as non-conventional settings such as convenience stores, gas stations and airports. We believe that outsourcing by food retailers will increase, particularly as food safety regulations become more stringent and retailers demand more value-added services. This trend should benefit large branded suppliers like us, who are better positioned to invest in fresh-cut facilities and to service regional and national chains and foodservice operators, as well as supercenters, mass merchandisers and club stores. We also believe that large branded suppliers benefit from merchandising, branding and other marketing strategies for fresh-cut products, similar to those used for branded processed food products, which depend substantially on product differentiation.

We believe that the fresh-cut produce market continues to be one of the fastest-growing categories in the fresh produce segment, largely due to consumer trends favoring healthy and conveniently packaged ready-to-eat foods. We established a platform in this industry through acquisitions and by building upon our existing fresh-cut pineapple business. We believe that our experience in this market, coupled with our sourcing and logistics capabilities and the DEL MONTE® brand, have enabled us to achieve a leading position in this highly fragmented market. Based on the latest supermarket scan data as supplied by an independent market data provider for 2010, we believe that we continue to be the market leader in branded fresh-cut fruit in the United States. Our fresh-cut fruit products include pineapple, melons, grapes, citrus, apples, mango, kiwi and other fruit items. The fruit we use in our fresh-cut operations are sourced within our integrated system of company-controlled farms and from GAP-certified (good agricultural practices) independent growers. We also offer fresh-cut vegetables for prepared salads, such as coleslaw and potato salad. We purchase our vegetables for these purposes from GAP-certified independent growers in the United States and in Europe. Our purchase contracts for both fruit and vegetables are typically short-term but vary by produce item. Our fresh-cut products are sold in the United States, the United Kingdom, the Middle East and Japan.

Non-Tropical Fruit

Non-tropical fruit includes grapes, apples, pears, peaches, plums, nectarines, cherries, avocados, citrus and kiwis. Generally, non-tropical fruit grows on trees, bushes or vines that shed their leaves seasonally. Approximately 42% of our non-tropical fruit net sales are from the sale of grapes. Fresh grapes are a favorite quick, easy and healthy snack among consumers young and old. In addition to their delicious taste, a growing body of research on fresh grapes suggests that grapes may offer significant health benefits as well. Fresh grapes are a well-known fruit worldwide, fitting into almost any lifestyle. Based on the United States Department of Agriculture (“USDA”), Economic Research Service, fresh grape consumption has grown 19% between 1998 and 2008 in the United States and, on average, Americans consumed 8.5 pounds of fresh grapes in 1998. Fresh grapes are also processed for the production of wine, raisins, juices and canned products. The higher production cost and higher product value of fresh grapes result from more intensive production practices than are required for grapes grown for processing. While California supplies the majority of total grape volumes, imports have made fresh grapes available year-round in the United States, with shipments mostly from Chile. Most U.S. production is marketed from May to October. Chilean grapes dominate the market from December to April.

Approximately 18% of our non-tropical fruit net sales are from the sale of avocados. According to the latest published statistics from the USDA, for the 10-year period from 1999 to 2008, avocado imports to the United States have increased by 449%. Per capita consumption of avocados in the United States has also increased significantly in the last 10 years. According to the Economic Research service of the USDA, per capita consumption of avocados reached 3.7 pounds during 2008.

We sell a variety of non-tropical fruit, including all of the types referred to above. In 2010, non-tropical fruit sales in North America, Europe, the Middle East, Asia and South America accounted for approximately 54%, 8%, 22%, 11% and 5% of our total net sales of non-tropical fruit, respectively. We obtain our supply of non-tropical fruit from company-owned farms in Chile and from independent growers in Chile, the United States, Mexico, Spain and New Zealand. In Chile, we purchase non-tropical fruit from independent growers and also produce a variety of non-tropical fruit on approximately 5,100 acres of company-owned or leased land. Our avocados are sourced principally from Mexico. In Spain and Mexico, we have our own sourcing operations, ensuring a consistent supply of high-quality non-tropical fruit during the growing season. Purchase contracts for non-tropical fruit are typically made on an annual basis.

Melons

Based on FAO data, for the 10-year period from 1998 to 2008, the volume of imports of cantaloupes and other melons increased in North America, Europe and the Middle East by 4%, 65% and 104%, respectively and decreased by 12% in Asia. Melons are one of the highest volume fresh produce items, and this category includes many varieties, such as cantaloupe, honeydew and watermelon. During the summer and fall growing seasons in the United States and Europe, demand is met in large part by local suppliers of unbranded or regionally branded melons. By contrast, in North America and Europe, imports significantly increase, and melons generally command premium pricing from October to May. Melons are grown in temperate and tropical locations and have a relatively short growing cycle.

We sell a variety of melons including cantaloupe, honeydew, watermelon and specialty melons, which we introduced to meet the different tastes and expectations of consumers in Europe. Cantaloupes represented over 73% of our melon sales volume in 2010. We are a significant producer and distributor of melons from October to May in North American and European regions by sourcing melons from our company-controlled farms and independent growers in Central and South America, where production generally occurs during this period. Melons sold in North America and Europe from October to May generally command a premium price due to the relative scarcity of melons and alternative fruit. Melon sales in North America and Europe accounted for 88% and 12% of our net sales of melons in 2010, respectively. In terms of volume, we produced 89% of the melons we sold in 2010 on company-controlled farms and purchased the remainder from independent growers.

We are able to provide our customers with a year-round supply of melons from diverse sources. For example, we supply the North American market during its summer season with melons from Arizona, California and the East Coast of the United States, and we supply the European market during its summer season with melons from Spain.

We have devoted significant research and development efforts towards maintaining our expertise in melons, especially cantaloupes. Melon crop yields are highly sensitive to weather conditions and are adversely affected by high levels of precipitation during the growing period of the fruit. We have developed specialized melon growing technology that we believe has reduced our exposure to the risk of intemperate weather conditions and significantly increased our yields.

Tomatoes

The United States is one of the largest producers of tomatoes in the world, ranking second only to China. Mexico and Canada are also important suppliers of fresh tomatoes within North America. Based on information available at producemarketplace.com, an industry website, in 2009, fresh tomatoes remained a top performer for food retailers, generating approximately 7.2% of a retailers' total produce sales.

We source our fresh tomatoes mainly from the United States, Mexico, Canada, Guatemala and El Salvador. The tomato category is highly fragmented with many suppliers, re-packers and wholesalers in various geographic regions of the United States. As a high volume item, tomatoes are important for our network of distribution and re-packing facilities. This product category allows us to add value through leveraging our purchase volumes to reduce costs and perform the sorting, packaging and custom labeling locally, in addition to delivering on a just-in-time basis to retail chains and foodservice customers. With our fresh-cut fruit and vegetable facilities, we can add additional value by incorporating tomatoes into our consumer-packaged products. We have spent approximately \$9.0 million developing greenhouse tomato operations in Guatemala. In 2011, we plan to source additional volumes from this location.

Vegetables

We distribute and market a variety of vegetables including mainly potatoes, onions, bell peppers and cucumbers. While we sell bulk product, we also use our size and distribution network to find opportunities to add value such as

sorting and packaging. We source our vegetables from independent growers in North and Central America.

Other Fruit

We produce, distribute and market a variety of other fruit, including strawberries, plantains and mangos, as well as various other varieties of fruit. We source these other fruit items from company-controlled farms and independent growers in Costa Rica, Colombia, Guatemala and the United States.

6

Prepared Food

We have a royalty-free perpetual license to use the DEL MONTE® Trademark in connection with the production, manufacture, sale and distribution of prepared foods and beverages in over 100 countries throughout Western, Eastern and Central Europe, Africa, the Middle East and countries formerly part of the Soviet Union. Del Monte has operated in Europe for over 75 years, is the premier brand associated with fruit-based or fruit-derived products and is the leading brand for canned fruit and pineapple in many Western European markets. Del Monte has had a presence in the United Kingdom, the largest market, since 1926 and is perceived to be a quality brand with high consumer awareness. Del Monte has a reputation with both consumers and retailers for value, quality and reliability.

We produce, distribute and market prepared pineapple, peaches, fruit cocktail, pears, tomatoes and other fruit and vegetables. Our deciduous prepared food products, which include peaches, pears and fruit cocktail are principally sourced from our own facilities in Greece and South Africa. During the fourth quarter of 2010, we sold our deciduous canning production facility in South Africa, which will allow us to consolidate the production of peach and fruit cocktail prepared food products in our Greek facility in 2011. Other deciduous products will be sourced primarily from South Africa. Our tomato products are sourced from independent producers in Europe and the Middle East. Our prepared pineapple products are primarily sourced from our own facility in Kenya and are also sourced from independent producers in Asia. These products are sold primarily under the DEL MONTE® label and under the buyers' own label for major retailers. We also distribute and market beverages, including ambient juices and juice drinks as well as various snacks. We also produce and market industrial products that are composed of fruit that has been processed in our production facilities in the form of purees, pulps and concentrates for further processing (juices, yogurt, cake manufacture, pizza, etc.) and for sale to the foodservice industry worldwide. We expect to continue investing in new product development to increase revenue, defend our premium price position and maintain market leadership in our product categories. We plan to expand our offerings in the snack category by offering multiple varieties and sizes of fruit in plastic pots with new and improved recipes and various juice bars, targeting the convenience store and foodservice trade in selected European and Middle East markets.

Our prepared food segment also includes our Jordanian food business. This business includes a state-of-the-art vertically integrated poultry business, including poultry farms, a grain mill, a slaughterhouse and a meat processing plant in Jordan. Our Jordanian poultry business is the leading provider of poultry products to retail stores and foodservice operators in that country. The newly established meat processing operation provides meat products for the Jordanian market and to other Middle East and North African markets.

Other Products and Services

Our other products and services include our third-party ocean freight business, our third-party plastics and box manufacturing business and our Argentine grain business. Our third-party ocean freight business allows us to generate incremental revenue on vessels' return voyages to our product sourcing locations and when space is available on outbound voyages to our major markets, which reduces our overall shipping costs. During the fourth quarter of 2009, as a result of unfavorable economic conditions, we eliminated our third-party ocean freight service from North Europe to the Caribbean. Our plastics and box manufacturing business produces bins, trays, bags and boxes. Although this business is intended mainly to satisfy internal packaging requirements, we also sell these products to third parties. In 2010, as a result of continued under-performance, we discontinued our grain operation and sold our grain silos in Argentina.

Logistics Operations

We market and distribute our products to retail stores, foodservice operators, wholesalers and distributors in more than 100 countries around the world. As a result, we conduct complex logistics operations on a global basis, transporting our products from the countries in which they are grown to the many markets in which they are sold worldwide.

Maintaining fruit at the appropriate temperature is an important factor in preventing premature ripening and optimizing product quality and freshness. Consistent with our reputation for high-quality fresh produce, we must preserve our fresh fruit in a continuous temperature-controlled environment, beginning with the harvesting of the fruit in the field through its distribution to our end markets.

We have a fully integrated logistics network, which includes land and sea transportation through a broad range of refrigerated environments in vessels, port facilities, containers, trucks and warehouses. Our objective is to maximize utilization of our logistics network to lower our average per-box logistics cost, while remaining sufficiently flexible to redeploy capacity or shipments to meet fluctuations in demand in our key markets. We believe that our control of the logistics process is a competitive advantage because we are able to continuously monitor and maintain the quality of our produce and ensure timely and regular distribution to customers on a year-round basis. Because logistics costs are also our largest expense other than our cost of products, we devote substantial resources to managing the scheduling and availability of various means of reliable transportation.

7

We transport our fresh produce to markets worldwide using our fleet of 12 owned and 14 chartered refrigerated vessels. During 2010, we sold four of our older, less efficient vessels and took delivery of two Japanese built vessels capable of carrying approximately 430,000 40 pound boxes of palletized and containerized fruit. We believe that our fleet of owned vessels, combined with longer-term charters, is effective in reducing our ocean freight costs and mitigates our exposure to the volatility of the charter market. We also operate a fleet of approximately 4,500 refrigerated containers, which are 48% owned or under capital leases, and the remaining 52% are under operating leases. Our logistics system is supported by various information systems. As a vertically integrated food company, managing the entire distribution chain from the field to the customer requires the technology and infrastructure to be able to meet our customers' complex delivery needs.

Sales and Marketing

DEL MONTE® is a 118-year old brand that is recognized by consumers worldwide for quality, freshness and reliability. We employ a variety of marketing tools, including but not limited to advertising, public relations and promotions, to reinforce our brand equity with consumers and the trade. Depending on the product and market, we also provide technical, logistical and merchandising support aimed at safeguarding the superior quality of our products to the ultimate consumer. Our sales and marketing activities are conducted by our sales force located at our sales offices worldwide and at each of our distribution centers. Our commercial efforts are supported by marketing professionals located in key markets and regional offices. A key element of our sales and marketing strategy is to use our distribution centers as a means of providing value-added services for our customers.

We actively support our customers through technical training in the handling of fresh produce, in-store merchandising support, joint promotional activities, market research and inventory and other logistical support. Since most of our customers carry only one branded product for each fresh produce item, our marketing and promotional efforts for fresh produce emphasize trade advertising and in-store promotions.

One of our most recent innovations is our new Controlled Ripening Technology ("CRT™") banana packaging. Launched in October 2009, our proprietary, patent pending CRT™ packaging was created for individual single-serve packages and for our 40-pound bulk banana boxes. This packaging utilizes state-of-the-art technology to help improve the ripening and handling process while helping retailers increase banana sales, reduce product losses and maximize profits by extending the product's yellow shelf life. It also allows us to deliver to our customers the highest quality fruit. As a result of this CRT™ packaging, we are able to broaden our distribution channels to include vending machines and expand our product offerings to our convenience store and foodservice customer base.

The level of marketing investment necessary to support the prepared food business is significantly higher than that required for the fresh produce and fresh-cut fruit and vegetable business. We have utilized a variety of promotional tools to build the DEL MONTE® brand and engage consumers in key markets in Europe, Africa and the Middle East. In recent years, we implemented a new strategy for the prepared food business in certain key European markets consisting of utilizing distributors to perform product distribution, sales and marketing activities. Under these agreements, the sales, warehousing, logistics, marketing and promotion functions are all performed by the distributor. This strategy of utilizing independent distributors enables us to reduce distribution and sales and marketing expenses. In addition, we plan to expand our prepared food business by entering new markets in Eastern Europe, Africa and the Middle East and by expanding our offerings in the snack category, targeting the convenience store and foodservice trade in selected European and Middle East markets.

During 2010, one customer, Wal-Mart, Inc. (including its affiliates), accounted for approximately 13% of our total net sales. These sales are reported in our banana, other fresh produce and prepared food segments. No other customer accounted for 10% or more of our net sales. In 2010, the top 10 customers accounted for approximately 34% of our net sales.

Note 24, "Business Segment Data" included in Item 8. Financial Statements and Supplementary Data contains information regarding net sales to external customers attributable to each of our reportable segments and geographic regions, gross profit by each of our reportable segments, total assets attributable to each of our geographic regions, and information concerning the dependence of our reportable segments on foreign operations, for each of the years 2010, 2009 and 2008.

North America

In 2010, 49% of our net sales were made in North America. In North America, we have established a highly integrated sales and marketing network that builds on our ability to control transportation and distribution throughout our extensive logistics network. We operate a total of 22 distribution centers and fresh-cut facilities in the United States. Our distribution centers have ripening capabilities and/or other value-added services. We also operate four port facilities, which include cold storage facilities.

Our logistics network provides us with a number of sales and marketing advantages. For example, because we are able to maintain the quality of our fresh produce in a continuous temperature-controlled environment, we are under less pressure to fully sell a shipment prior to its arrival at port. We are thus better able to manage the timing of our sales to optimize margins. Our ability to off-load shipments for cold storage and distribution throughout our network also improves ship utilization by minimizing in-port docking time. Our logistics network also allows us to manage our inventory among distribution centers to respond more effectively to fluctuations in customer demand in the regions we serve.

We have sales professionals in locations throughout the United States and in Canada. We sell to leading grocery stores and other retail chains, wholesalers, mass merchandisers, supercenters, foodservice operators, club stores and distributors in North America. These large customers typically take delivery of our products at the port facilities, which we refer to as FOB delivery. We also service these large customers, as well as an increasing number of smaller regional chains and independent grocers, through our distribution centers.

Europe

In 2010, 26% of our net sales were made in Europe. We distribute our fresh produce and prepared food products throughout Europe. Our fresh produce products are distributed to leading retail chains, smaller regional customers as well as to wholesalers and distributors through direct sales and distribution centers. In the United Kingdom, we operate one distribution center and two fresh-cut facilities. In Germany, we operate three distribution centers and in Poland we operate two distribution centers. In the Netherlands, we have a sales and marketing entity. In Southern Europe, we distribute our fresh produce through an independent marketing company. Commencing in 2012, we plan to perform our own distribution in these markets by establishing our own sales and marketing organization. Our prepared food products are distributed through independent distributors throughout most of Europe, except in Germany, France and Poland where we use our own sales and marketing entities.

Middle East and North Africa

In 2010, 12% of our net sales were made in the Middle East and North Africa. We distribute our products through independent distributors and company-operated distribution facilities. We have increased our sales of bananas in the Middle East market through distributors and established our own direct sales initiatives. Our distribution/manufacturing center in Dubai, United Arab Emirates (“UAE”) is a state-of-the-art facility with just-in-time delivery capabilities that includes banana ripening and cold storage facilities, fresh-cut fruit and vegetable operations and an ultra-fresh juice manufacturing operation. We distribute these products in the UAE and export them to other Middle East countries. We also operate a distribution center in Abu-Dhabi, UAE that includes banana ripening and cold storage facilities. In Saudi Arabia, through our 60%-owned joint venture, we have implemented an expansion program that included the construction of two distribution centers with banana ripening, cold storage facilities and fresh-cut fruit and vegetable operations and future manufacturing capabilities. One of the distribution centers, located in Riyadh, the capital city of Saudi Arabia, was completed in 2009 while the second one, located in Jeddah, was completed in April of 2010. These strategically located distribution centers distribute our fresh produce products to this growing market. In addition, we market and distribute prepared food products in the UAE, Jordan, Saudi Arabia and various other Middle East and North African markets. We have also established a presence in Egypt where we market and distribute our prepared food products, mainly our juice product line. In Jordan, we own a state-of-the-art vertically integrated poultry business including poultry farms, a grain mill, a slaughterhouse and a meat processing plant. We are the leading provider of poultry products to retail stores and foodservice operators in that country. In recent years, we have expanded our food business in Jordan with the addition of the meat processing operation that provides meat products for the local market and for export to other Middle East and North African markets. We believe that the Middle East, North Africa and countries formerly part of the Soviet Union represent an area for rapid sales development of our fresh and prepared food products. Utilizing our extensive knowledge of this region, we plan to capitalize on this opportunity with increased focus and investments in these markets.

Asia

In 2010, 12% of our net sales were made in Asia. We distribute our products in Asia through direct marketing and large distributors. Our principal markets in this region are Japan, South Korea, mainland China and Hong Kong. In Japan, we distributed approximately 91% of the products we sold in 2010 through direct sales and the remainder through Japan’s largest fresh produce wholesaler, which distributes our products on a sales commission basis. Our products are distributed from four distribution centers located at strategic ports in Japan with cold storage and banana

ripening operations.

We also engage in direct sales and marketing activities in South Korea and Hong Kong. In other Asian markets, including mainland China, we sell to local distributors. We have one distribution center and banana ripening facility in Hong Kong. In South Korea, we have three distribution centers that utilize state-of-the art ripening technology, which we believe is not otherwise available in that market. This increases our ability to offer value-added services to our customers.

South America

We also distribute our products in South America. We have direct sales and marketing activities in strategic markets and also utilize local distributors in this region. Our sales in these markets focus mainly on non-tropical fruit including grapes, apples, pears, peaches, plums, cherries, kiwi and nectarines.

9

Competition

We compete based on a variety of factors, including the appearance, taste, size, shelf life and overall quality of our fresh produce, price and distribution terms, the timeliness of our deliveries to customers and the availability of our produce items. The fresh produce business is highly competitive, and the effect of competition is intensified because our products are perishable. Competition in the sale of bananas, pineapples, melons and the other fresh fruit and vegetables that we sell comes from competing producers and distributors. Our sales are also affected by the availability of seasonal and alternative produce. While historically our main competitors have been multinational banana and pineapple producers, our significantly increased product offering in recent years has resulted in additional competition from a variety of companies. These companies include local and regional producers and distributors in each of our fresh produce and fresh-cut product categories.

The extent of competition varies by product. In the pineapple and non-tropical fruit markets, we believe that the high degree of capital investment and cultivation expertise required, as well as the longer length of the growing cycle, makes it relatively difficult to enter the market. However, in recent years we have experienced an increase in competition with our Del Monte Gold® Extra Sweet pineapple, which has negatively affected our results.

In the banana market, we continue to face competition from a limited number of large multinational companies. At times, particularly when demand is greater than supply, we also face competition from a large number of relatively small banana producers. Unlike the pineapple and non-tropical fruit markets, there are few barriers to entry into the banana market. Supplies of bananas can be increased relatively quickly due to bananas relatively short growing cycle and the limited capital investment required for banana growing. As a result of changes in supply and demand, as well as seasonal factors, banana prices fluctuate significantly.

In the melon market, we compete with producers and distributors of both branded and unbranded melons. From June to October, the peak North American and European melon-growing season, many growers enter the market with less expensive unbranded or regionally branded melons due to the relative ease of growing melons during this period, the short growth cycle and reduced transportation costs resulting from the proximity of the melon farms to the markets. These factors permit many smaller domestic growers to enter the market. During the offshore growing season from October to May, we compete with growers principally in Central America. In recent years, there has been an abundant supply of melons in the market during the offshore growing season, which has negatively affected our results.

The fresh-cut produce market is highly fragmented, and we compete with a wide variety of local and regional distributors of branded and unbranded fresh-cut produce and, in the case of certain fresh-cut vegetables, a small number of large, branded producers and distributors. In this market, however, we believe that our principal competitive challenge is to capitalize on the growing trend of retail chains and independent grocers to outsource their own on-premises fresh-cut operations. We believe that our sales strategy, which emphasizes not only our existing sources of fresh produce, but also a full range of value-added services, strict compliance with food safety standards and our national distribution capability, positions us to gain an increasing share of this market.

The processed fruit and beverage markets are mature markets characterized by high levels of competition and consumer awareness. Consumer choices are driven by price and/or quality. Large retailers with their “buyers own label” (“BOL”) products appeal to price-conscious consumers, while brand names are the key differentiator for quality-focused consumers. In the processed food and beverage markets in Europe, Africa and the Middle East, we compete with various local producers, large retailers with their BOL products, as well as with large international branded companies. It is in the branded section that our processed foods products, specifically, canned fruit and pineapple in many European countries, hold a leading position in the markets. The mature state of the market in Western Europe, together with the strength and sophistication of the large retailers there, account in part for the increasing presence of BOL products in many food and beverage categories. In the past few years, we have faced increased competitive

pressure, particularly in the U.K. market, for branded processed food and beverage products. At the same time, our marketing and distribution costs in these European markets have increased. In order to reduce costs and increase our competitiveness in the processed food business, we decided to use distributors in certain key European markets to perform product distribution and sales and marketing activities. Under these arrangements, the sales, warehousing, logistics, marketing and promotion functions are all performed by the distributor. In the United Kingdom and Italian markets we have also outsourced our beverage production. This strategy, taking advantage of lower cost and established marketing and distribution networks, has enabled us to reduce costs and increase our competitiveness in these mature markets.

Quality Assurance

To ensure the consistent high quality of our products, we have a quality assurance group that maintains detailed quality specifications for all our products so that they meet or exceed minimum regulatory requirements. Our specifications require extensive sampling of our fresh produce at each stage of the production and distribution processes to ensure high quality and proper sizing, as well as to identify the primary sources of any defects. Our fresh produce is evaluated based on both external appearance and internal quality, using size, color, porosity, translucence and sweetness as criteria. Only fresh produce meeting our stringent quality specifications is sold under the DEL MONTE® brand.

We are able to maintain the high quality of our products by growing a substantial portion of our own produce and working closely with our independent growers. We insist that all produce supplied by our independent growers meet the same stringent quality requirements as produce grown on our farms. Accordingly, we monitor our independent growers to ensure that their produce will meet agricultural and quality control standards, offer technical assistance on certain aspects of production and packing and, in some cases, manage the farms. The quality assurance process begins on the farms and continues as harvested products enter our packing facilities. Where appropriate, we cool the fresh produce at our packing facilities to maximize quality and optimize shelf life. As an indication of our commitment to quality, many of our operations have received certificates of compliance from the International Standards of Operation, in environmental compliance (14001) and production processes (9001). In 2003, we became the world's first multinational fresh produce company to receive GlobalGap certification. In 2010, all of our operations that produce or handle high risk foods (tomatoes, melons or leafy greens) achieved certification to the Hazard Analysis & Critical Control Points (HACCP) based safe quality food standard. HACCP is a management system in which food safety is addressed through the analysis and control of biological, chemical and physical hazards from raw material production, procurement and handling, to manufacturing, distribution and consumption of the finished product. Taken together, these certifications reflect our commitment to quality and the strictest standards of food safety.

Government Regulation

Agriculture and the sale and distribution of fresh produce are subject to extensive regulation by government authorities in the countries where the produce is grown and the countries where such produce is marketed. We have internal policies and procedures to comply with the most stringent regulations applicable to our products, as well as a technical staff to monitor pesticide usage and compliance with applicable laws and regulations. We believe we are in material compliance with these laws and regulations.

We are also subject to various government regulations in countries where we market our products. The countries in which we market a material amount of our products are the United States, Canada, the countries of the European Union (the "EU"), Japan, China, South Korea, Jordan, the UAE and Saudi Arabia. These government regulations include:

sanitary regulations, particularly in the United States and the countries of the EU;

regulations governing pesticide use and residue levels, particularly in the United States, United Kingdom, Germany and Japan; and

regulations governing traceability, packaging and labeling, particularly in the United States and the countries of the EU.

Any failure to comply with applicable regulations could result in an order barring the sale of part or all of a particular shipment of our products or, in an extreme case, the sale of any of our products for a specified period. In addition, we believe there has been an increasing emphasis on the part of consumers, as well as retailers, wholesalers, distributors

and foodservice operators, on food safety issues, which could result in our business and operations being subject to increasingly stringent food safety regulations or guidelines.

Although the fresh-cut produce industry is not currently subject to any specific governmental regulations, we cannot predict whether or when any regulation will be implemented or the scope of any possible regulation.

European Union Banana Import Regulations

In November 2005, the EU agreed to reform its controversial banana import license regime. Latin America banana exporters and the United States long have complained that the EU's banana trading system favored African, Caribbean and Pacific countries ("ACP") in violation of global trade rules. From January 1, 2006, the quotas controlling import volumes of "third country" (almost exclusively Latin American) bananas coming into the EU were eliminated. Importers were required to pay a euro ("€") tariff of €176 per ton and a small guarantee of €15 per ton. Import licenses have been eliminated, but an import certificate is still required. The EU agreed to retain a duty-free quota of 775,000 tons per annum for bananas from ACP countries. In December 2007, most of the ACP countries, including Cameroon, signed a bilateral agreement with the EU that allows bananas duty free access to the EU market without any quantitative limitation commencing on January 1, 2008. On December 15, 2009, the EU entered into an agreement with certain Latin America banana exporting countries to settle the long running dispute over banana import tariffs. The EU will gradually reduce import tariffs on bananas from Latin America from the current level of €176 per ton to €114 per ton in 2017. The largest reduction in the import tariff of €28 per ton was retroactively effective to December 15, 2009. The import tariff will be reduced again on January 1, 2011 and at the beginning of each subsequent year for seven years, as follows: 2011-€143, 2012-€136, 2013-€132, 2014-€127, 2015-€122, 2016-€117 and 2017-€114. This agreement was ratified during the first half of 2010. If certain global agricultural trade conditions, as stipulated in the agreement, are not met by the end of 2013, the reduction in import tariffs will be frozen for two years until 2015. Afterwards, commencing in 2016, irrespective of meeting the stipulated conditions, the EU will continue to reduce its tariff each year as agreed, until the tariff reaches €114 on January 1, 2019. We cannot predict the impact of this reduction of banana import tariffs on the EU market. The EU continues to negotiate Free Trade Agreements with Latin America banana-producing countries and there is a possibility that some form of new EU banana tariff-rate quotas will be reinstated.

Environmental Proceedings

The management, use and disposal of some chemicals and pesticides are inherent aspects of our production operations. These activities and other aspects of production are subject to various environmental laws and regulations, depending upon the country of operation. In addition, in some countries of operation, environmental laws can require the investigation and, if necessary, remediation of contamination related to past or current operations. We are not a party to any dispute or legal proceeding relating to environmental matters where we believe that the risk associated with the dispute or legal proceeding would be material, except as described in Item 3. Legal Proceedings and Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data in connection with the Kunia Well Site.

On May 10, 1993, the EPA identified a certain site at our plantation in Hawaii for potential listing on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended. See Item 3. Legal Proceedings and Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

Research and Development, Patents and Licenses, Etc.

Our research and development programs have led to improvements in agricultural and growing practices and product packaging technology. These programs are directed mainly at reducing the cost and risk of pesticides, using natural biological agents to control pests and diseases, testing new varieties of our principal fruit varieties for improved crop yield and resistance to wind damage and improving post-harvest handling. We have also been seeking to increase the productivity of low-grade soils for improved banana growth and experimenting with various other types of fresh produce. Our research and development efforts are conducted by our staff of professionals and include studies conducted in laboratories, as well as on-site field analyses and experiments. Our research and development professionals are located at our production facilities and in the United States, and we provide our growers with access to improved technologies and practices. We operate research and development facilities in the San Francisco Bay area

of California and Costa Rica where we conduct various research activities relating to the development of new fruit varieties.

Some of the research and development projects include:

the development of the Del Monte Gold® Extra Sweet pineapple and other pineapple and melon varieties;

improved irrigation methods and soil preparation for melon planting; and

the development of our new CRT™ banana packaging created for individual single-serve packages and for our 40-pound bulk banana boxes that improves the ripening and handling process.

Our total corporate research and development expenses were \$3.4 million, \$3.2 million and \$3.5 million for 2010, 2009 and 2008, respectively, and are included in selling, general and administrative expenses in the Consolidated Financial Statements.

We have the exclusive right to use the DEL MONTE® brand for fresh fruit, fresh vegetables and other fresh and fresh-cut produce and certain other specified products on a royalty-free basis under a worldwide, perpetual license from Del Monte Corporation, an unaffiliated company that owns the DEL MONTE® trademark. Del Monte Corporation and several other unaffiliated companies manufacture, distribute and sell under the DEL MONTE® brand canned or processed fruit, vegetables and other produce, as well as dried fruit, snacks and other products. Our licenses allow us to use the trademark “DEL MONTE ®” and the words “DEL MONTE ®” in association with any design or logotype associated with the brand. The licenses also give us certain other trademarks and trademark rights, on or in connection with the production, manufacture, sale and distribution of fresh fruit, fresh vegetables, other fresh produce and certain other specified products. In addition, the licenses allow us to use certain patents and trade secrets in connection with the production, manufacture, sale and distribution of our fresh fruit, fresh vegetables, other fresh produce and certain other specified products.

We have a royalty-free perpetual license to use the DEL MONTE® trademark in connection with the production, manufacture, sale and distribution of all food and beverage products in Europe, Africa, the Middle East and countries formerly part of the Soviet Union.

We also sell produce under several other brands for which we have obtained registered trademarks, including UTC®, Rosy®, Fruit Express®, Just Juice®, Fruitini® and other regional brands.

Seasonality

In part as a result of seasonal sales price fluctuations, we have historically realized a greater portion of our net sales and of our gross profit during the first two calendar quarters of the year. The sales price of any fresh produce item fluctuates throughout the year due to the supply of and demand for that particular item, as well as the pricing and availability of other fresh produce items, many of which are seasonal in nature. For example, the production of bananas is continuous throughout the year and production is usually higher in the second half of the year, but the demand for bananas varies because of the availability of other fruit. As a result, demand for bananas is seasonal and generally results in higher sales prices during the first six months of the calendar year. We make most of our sales of non-tropical fruit from October to May. In the melon market, the entry of many growers selling unbranded or regionally branded melons during the peak North American and European melon growing season results in greater supply, and therefore lower sales prices, from June to October. As a result of greater demand during the fourth quarter, the prepared food business is expected to have higher net sales and gross profit during this period. These seasonal fluctuations are illustrated in the following table, which presents certain unaudited quarterly financial information for the periods indicated:

	Year ended	
	December 31, 2010	January 1, 2010
Net sales:		
First quarter	\$ 943.1	\$ 879.7
Second quarter	1,000.0	978.4
Third quarter	793.1	766.2
Fourth quarter	816.7	872.1
Total	\$ 3,552.9	\$ 3,496.4
Gross profit:		
First quarter	\$ 97.8	\$ 83.8
Second quarter	83.0	91.0
Third quarter	52.0	69.0
Fourth quarter	39.6	67.0

Total	\$ 272.4	\$ 310.8
-------	----------	----------

Employees

At year end 2010, we employed approximately 42,000 persons worldwide, substantially all of whom are year-round employees. Approximately 87% of these persons are employed in production locations. We believe that our overall relationship with our employees and unions is satisfactory.

13

Organizational Structure

We are organized under the laws of the Cayman Islands and, as set forth in our Amended and Restated Memorandum of Association, we are a holding company for the various subsidiaries that conduct our business on a worldwide basis. Our significant subsidiaries, all of which are directly or indirectly wholly owned, are:

Subsidiary	Country of Incorporation
Corporacion de Desarrollo Agricola Del Monte S.A.	Costa Rica
Del Monte B.V.	Netherlands
Del Monte Fresh Produce (Asia-Pacific) Limited	Hong Kong
Del Monte Fresh Produce Company	United States
Del Monte Fresh Produce International Inc.	Liberia
Del Monte Fresh Produce N.A., Inc.	United States
Del Monte Fund B.V.	Netherlands Antilles
Del Monte International GmbH	Switzerland
Fresh Del Monte Produce N.V.	Netherlands Antilles

Web site Access to Reports

We file annual, quarterly and current reports, and amendments to those reports, proxy statements and other information with the SEC. You may access and read our filings without charge through the SEC's Web site at www.sec.gov. You may also read and copy any document we file with the SEC at the SEC's Public Reference Room located at 100 F Street, NE, Room 1580, Washington, D.C. 20549. Please call the SEC at 1-800-SEC-0330 for further information on the Public Reference Room.

Our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports can be viewed on the Company's Web site at www.freshdelmonte.com as soon as reasonably practicable after such material is electronically filed with, or furnished to, the SEC. Information on our Web site is not a part of this Annual Report on Form 10-K.

In addition, copies of our annual report may be obtained free of charge at Fresh Del Monte Produce Inc., upon written request to attention: Investor Relations c/o Del Monte Fresh Produce Company, 241 Sevilla Avenue, Coral Gables, Florida 33134.

Item 1A. Risk Factors

We are subject to many risks and uncertainties that may affect our future financial performance and our stock price. Some of the risks and uncertainties that may cause our financial performance to vary or that may materially or adversely affect our financial performance or stock price are discussed below.

We could realize losses and suffer liquidity problems due to declines in sales prices for bananas, pineapples and other fresh produce.

Our profitability depends largely upon our profit margins and sales volumes of bananas, pineapples and other fresh produce. In 2008, 2009 and 2010, banana sales accounted for the most significant portion of our total net sales, and historically pineapple sales have accounted for the most significant portion of our total gross profit.

Supplies of bananas can be increased relatively quickly due to the banana's relatively short growing cycle and the limited capital investment required for banana growing. As a result of imbalances in supply and demand and import regulations, banana prices fluctuate; consequently, our operating results could be adversely affected.

Sales prices for bananas, pineapples and other fresh produce are difficult to predict. It is possible that sales prices for bananas and pineapples will decline in the future, and sales prices for other fresh produce may also decline. In recent years, there has been increasing consolidation among food retailers, wholesalers and distributors. We believe the increasing consolidation among food retailers may contribute to further downward pressure on our sales prices. In the event of a decline in sales prices or sales volumes, we could realize significant losses, experience liquidity problems and suffer a weakening in our financial condition. A significant portion of our costs is fixed, so that fluctuations in the sales prices have an immediate impact on our profitability. Our profitability is also affected by our production costs, which may increase due to factors beyond our control.

Due to fluctuations in the supply of and demand for fresh produce, our results of operations are seasonal, and we realize a greater portion of our net sales and gross profit during the first two quarters of each year.

In part as a result of seasonal sales price fluctuations, we have historically realized a greater portion of our gross profit during the first two quarters of each year. The sales price of any fresh produce item fluctuates throughout the year due to the supply of and demand for that particular item, as well as the pricing and availability of other fresh produce items, many of which are seasonal in nature. For example, the production of bananas is continuous throughout the year and production is usually higher in the second half of the year, but the demand for bananas during that period varies because of the availability of seasonal and alternative fruit. As a result, demand for bananas is seasonal and generally results in higher sales prices during the first six months of each calendar year. In the melon market, the entry of many growers selling unbranded or regionally branded melons during the peak North American and European melon growing season results in greater supply, and therefore, lower sales prices from June to October. In North American and European regions, we realize most of our sales and gross profit for melons, grapes and non-tropical fruit from October to May. In the prepared food business, we historically realize the largest portion of our net sales and gross profit in the third and fourth quarters of the year.

Crop disease, severe weather, natural disasters and other conditions affecting the environment, including the effects of climate change, could result in substantial losses and weaken our financial condition.

Crop disease, severe weather conditions, such as floods, droughts, windstorms and hurricanes, and natural disasters, such as earthquakes, may adversely affect our supply of one or more fresh produce items, reduce our sales volumes, increase our unit production costs or prevent or impair our ability to ship products as planned. This is particularly true in the case of our premium pineapple product, the Del Monte Gold® Extra Sweet pineapple, because a substantial portion of our production is grown in one region in Costa Rica. Since a significant portion of our costs are fixed and contracted in advance of each operating year, volume declines due to production interruptions or other factors could result in increases in unit production costs, which could result in substantial losses and weaken our financial condition. We have experienced crop disease, insect infestation, severe weather and other adverse environmental conditions from time to time, including hurricanes, droughts, floods and earthquakes in our sourcing locations. Severe weather conditions may occur with higher frequency or may be less predictable in the future due to the effects of climate change. When crop disease, insect infestations, severe weather, earthquakes and other adverse environmental conditions destroy crops planted on our farms or our suppliers' farms or prevent us from exporting them on a timely basis, we may lose our investment in those crops or our purchased fruit cost may increase. In 2010, we experienced crop disease in an isolated area of our Philippines banana operation and as a result incurred \$12.7 million in asset impairments, and we experienced significant flooding in our Guatemala banana operations which resulted in \$5.7 million in asset impairments, clean-up costs and inventory write-offs. We also incurred an additional \$2.2 million in inventory write-off and asset impairments as a result of an earthquake in Chile.

The fresh produce and prepared food markets in which we operate are highly competitive.

The fresh produce and prepared food business is highly competitive, and the effect of competition is intensified because most of our products are perishable. In banana and pineapple markets, we compete principally with a limited number of multinational and large regional producers. In the case of our other fresh fruit and vegetable products, we compete with numerous small producers, as well as regional competitors. Our sales are also affected by the availability of seasonal and alternative fresh produce. The extent of competition varies by product. To compete successfully, we must be able to strategically source fresh produce and prepared food of uniformly high quality and sell and distribute it on a timely and regular basis. In addition, our profitability has depended significantly on our gross profit on the sale of our Del Monte Gold® Extra Sweet pineapples. Increased competition in the production and sale of Del Monte Gold® Extra Sweet pineapples has adversely affected our results. We expect these competitive pressures to continue.

We are subject to material currency exchange risks because our operations involve transactions denominated in various currencies.

We conduct operations in many areas of the world involving transactions denominated in a variety of currencies, and our results of operations, as expressed in dollars, may be significantly affected by fluctuations in rates of exchange between currencies. Although a substantial portion of our net sales (42% in 2010) are denominated in non-dollar currencies, we incur a significant portion of our costs in dollars. Although we periodically enter into currency forward contracts as a hedge against currency exposures, we may not enter into these contracts during any particular period or these contracts may not adequately offset currency fluctuations. We generally are unable to adjust our non-dollar local currency sales prices to compensate for fluctuations in the exchange rate of the dollar against the relevant local currency. In addition, there is normally a time lag between our incurrence of costs and collection of the related sales proceeds. Accordingly, if the dollar appreciates relative to the currencies in which we receive sales proceeds, our operating results may be negatively affected. Our costs are also affected by fluctuations in the value, relative to the U.S. dollar, of the currencies of countries in which we have significant production operations, with a weaker dollar resulting in increased production costs.

Our strategy of diversifying our product line, expanding into new geographic markets and increasing the value-added services that we provide to our customers may not be successful.

We are diversifying our product line through acquisitions and internal growth. In addition, we have expanded our service offerings to include a higher proportion of value-added services, such as the preparation of fresh-cut produce, ripening, customized sorting and packing, direct-to-store delivery and in-store merchandising and promotional support. This represents a significant departure from our traditional business of delivering our products to our customers at the port. In recent periods, we have made significant investments in distribution centers, fresh-cut and prepared food facilities through capital expenditures and acquisitions and have expanded our business into new geographic markets. We may not be successful in anticipating the demand for these products and services, in establishing the requisite infrastructure to meet customer demands or the provision of these value-added services. During recent years, we incurred significant asset impairment and other charges as a result of our continuing efforts to align our diversified product lines to market demand. During 2010, as a result of lower than expected sales volume and pricing, we incurred a \$1.4 million impairment charge with respect to the DEL MONTE® perpetual, royalty-free brand name license for beverage products in the United Kingdom. If we are unable to recover from current challenging economic conditions in Europe, specifically in the United Kingdom, the prepared food goodwill and trademark may be at risk for impairment in the future. If we are not successful in our diversification efforts, our business, financial condition or results of operations could be further materially and adversely affected.

Increased prices for fuel, packaging materials or short-term refrigerated vessel charter rates could increase our costs significantly.

Our costs are determined in large part by the prices of fuel and packaging materials, including containerboard, plastic, resin and tin plate. We may be adversely affected if sufficient quantities of these materials are not available to us. Any significant increase in the cost of these items could also materially and adversely affect our operating results. Other than the cost of our products (including packaging), sea and inland transportation costs represent the largest component of cost of products sold.

During 2008, the cost of fuel increased by 42% and containerboard increased by 11%. During 2008, we also experienced a significant amount of cost increases on our products due to higher fertilizer and other raw material prices. During 2009, cost of fuel decreased by 32% and containerboard decreased 24% as compared with 2008. During 2010, cost of fuel increased by 25% and containerboard increased by 7% as compared with 2009. In addition, we are subject to the volatility of the charter vessel market because 14 of our refrigerated vessels are chartered rather than owned. These charters are for periods of three to 10 years. Charter rates have generally increased during 2008 as compared with the prior year, but did not experience any further increase during 2009 and 2010. As a result, significant increases in fuel, packaging material and charter rates would materially and adversely affect our results.

Compliance with regulation aimed at mitigating the effects of climate change, as discussed elsewhere in these Risk Factors, could also increase the cost of fuel for our shipping and logistics operations. We may be unable to pass along any cost increases in our product pricing. Even if we can pass on cost increases, significant changes in product pricing could also change consumer buying patterns, including a greater reliance on local production rather than imports.

We are subject to the risk of product contamination and product liability claims.

The sales of our products involve the risk of injury to consumers. Such injuries may result from tampering by unauthorized personnel, product contamination or spoilage, including the presence of foreign objects, substances, chemicals, or residues introduced during the growing, packing, storage, handling or transportation phases. While we are subject to governmental inspection and regulations and believe our facilities comply in all material respects with all applicable laws and regulations, including internal product safety policies, we cannot be sure that consumption of

our products will not cause a health-related illness in the future or that we will not be subject to claims or lawsuits relating to such matters. Even if a product liability claim is unsuccessful, the negative publicity surrounding any assertion that our products caused illness or injury could adversely affect our reputation with existing and potential customers and our brand image. In addition, claims or liabilities of this sort might not be covered by our insurance or by any rights of indemnity or contribution that we may have against others. We maintain product liability insurance in an amount that we believe is adequate. However, we cannot be sure that we will not incur claims or liabilities for which we are not insured or that exceed the amount of our insurance coverage, resulting in significant cash outlays that would materially and adversely affect our results and financial condition.

We are subject to legal and environmental risks that could result in significant cash outlays.

We are involved in several legal and environmental matters that, if not resolved in our favor, could require significant cash outlays and could materially and adversely affect our results of operations and financial condition. In addition, we may be subject to product liability claims if personal injury results from the consumption of any of our products. In addition, although the fresh-cut produce market is not currently subject to any specific governmental regulations, we cannot predict whether or when any regulation will be implemented or the scope of any possible regulation.

The U.S. Environmental Protection Agency (the "EPA") has placed a certain site at our former plantation in Oahu, Hawaii on the National Priorities List under the Comprehensive Environmental Response, Compensation and Liability Act of 1980. Under an order entered into with the EPA, we completed a remedial investigation and engaged in a feasibility study to determine the extent of the environmental contamination. The remedial investigation report was finalized on January 21, 1999 and approved by the EPA in February 1999. A final draft feasibility study was submitted for EPA review in December 1999 and updated in December 2001 and October 2002, and approved by the EPA on April 22, 2003. On September 25, 2003, the EPA issued the Record of Decision ("ROD"). The EPA estimates in the ROD that the remediation costs associated with the cleanup of our plantation will range from \$12.9 million to \$25.4 million. Certain portions of the EPA's estimates have been discounted using a 5% interest rate. The undiscounted estimates are between \$14.8 million to \$28.7 million. As of December 31, 2010, there is \$18.6 million included in other noncurrent liabilities and \$0.5 million included in accounts payable and accrued expenses in our Consolidated Balance Sheets relating to the Kunia well site clean-up. We expect to expend approximately \$0.5 million per year on this matter for the next five years. See Item 3. Legal Proceedings and Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data. In addition, we are involved in several actions in U.S. and non-U.S. courts involving allegations by numerous Central American and Philippine plaintiffs that they were injured by exposure to a nematocide containing the chemical Dibromochloropropane ("DBCP") during the 1970's. See Item 3. Legal Proceedings and Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

Environmental and other regulation of our business, including potential climate change regulation, could adversely impact us by increasing our production cost or restricting our ability to import certain products into the United States.

Our business depends on the use of fertilizers, pesticides and other agricultural products. The use and disposal of these products in some jurisdictions are subject to regulation by various agencies. A decision by a regulatory agency to significantly restrict the use of such products that have traditionally been used in the cultivation of one of our principal products could have an adverse impact on us. For example, most uses of methyl bromide, a pesticide used for fumigation of imported produce (principally melons) for which there is currently no known substitute, were phased out in the United States in 2006, however, various exemptions will allow its use offshore until 2015. Also, under the Federal Insecticide, Fungicide and Rodenticide Act, the Federal Food, Drug and Cosmetic Act and the Food Quality Protection Act of 1996, the EPA is undertaking a series of regulatory actions relating to the evaluation and use of pesticides in the food industry. Similarly, in the EU, regulation (EC) No. 1107/2009 will apply starting June 14, 2011 and will fundamentally change the pesticide approval process from the current risk base to hazard criteria based on the intrinsic properties of the substance. These actions and future actions regarding the availability and use of pesticides could have an adverse effect on us. In addition, if a regulatory agency were to determine that we are not in compliance with a regulation in that agency's jurisdiction, this could result in substantial penalties and a ban on the sale of part or all of our products in that jurisdiction.

There has been a broad range of proposed and promulgated state, national and international regulation aimed at reducing the effects of climate change. Such regulations apply or could apply in countries where we have interests or may have interests in the future. In the United States, there is a significant possibility that some form of regulation will be forthcoming at the federal level to address the effects of climate change. Such regulation could take any of several forms that result in the creation of additional costs in the form of taxes, the restriction of output, investments of capital

to maintain compliance with laws and regulations, or required acquisition or trading of emission allowances. Climate change regulation continues to evolve, and while it is not possible to accurately estimate either a timetable for implementation or our future compliance costs relating to implementation, we do not believe that such regulation is reasonably likely to have a material effect in the foreseeable future on our business, results of operations, capital expenditures or financial position.

We are exposed to political, economic and other risks from operating a multinational business.

Our business is multinational and subject to the political, economic and other risks that are inherent in operating in numerous countries. These risks include those of adverse government regulation, including the imposition of import and export duties and quotas, currency restrictions, expropriation and potentially burdensome taxation. For example, banana import regulations have in prior years restricted our access to the EU banana market and increased the cost of doing business in the EU. On December 15, 2009, the EU entered into an agreement with certain Latin America banana exporting countries to settle the long running dispute over banana import tariffs. The EU will gradually reduce import tariffs on bananas from Latin America from the current level of €176 per ton to €114 per ton in 2017. The largest reduction in the import tariff of €28 per ton was retroactively effective to December 15, 2009. This agreement was ratified during the first half of 2010. The EU continues to negotiate Free Trade Agreements with Latin American banana-producing countries, and there is a possibility that some form of new EU banana tariff-rate quotas will be reinstated. We cannot predict the impact of further changes to the banana import tariffs or new quotas, on the EU banana market.

Costa Rica and Ecuador, countries in which we operate, have established “minimum” export prices for bananas that are used as the reference point in banana purchase contracts from independent producers, thus limiting our ability to negotiate lower purchase prices. These minimum export price requirements could potentially increase the cost of sourcing bananas in countries that have established such requirements.

We are also subject to a variety of government regulations in countries where we market our products, including the United States, the countries of the EU, Asia, countries of the Middle East and Africa. Examples of the types of regulation we face include:

sanitary regulations;

regulations governing pesticide use and residue levels; and

regulations governing packaging and labeling.

If we fail to comply with applicable regulations, it could result in an order barring the sale of part or all of a particular shipment of our products or, possibly, the sale of any of our products for a specified period. Such a development could result in significant losses and could weaken our financial condition.

The distribution of our fresh produce in Southern Europe could be adversely affected if we are not successful in performing our own fresh produce products distribution, sales and marketing function.

We import and distribute a substantial portion of our fresh produce in Southern Europe through a marketing entity with which we have an exclusive arrangement. A discontinuation of this exclusive arrangement may affect our ability to import and distribute our fresh produce products in Southern Europe and the Mediterranean region. On June 16, 2008, as a result of continuing disagreements with this distributor related to operational issues, we delivered our formal notice that we will cease all business with them by December 31, 2011. Commencing in 2012, we plan to perform our own distribution in these markets by establishing our own sales and marketing organization. Our inability to successfully perform our own distribution, sales and marketing activities could affect the sale of our fresh produce products in Southern Europe and the Mediterranean region and may have a negative effect on our results of operations.

Acts or omissions of other companies could adversely affect the value of the DEL MONTE® brand.

We depend on the DEL MONTE® brand in marketing our products. We share the DEL MONTE® brand with unaffiliated companies that manufacture, distribute and sell canned or processed fruit and vegetables, dried fruit, snacks and other products. Acts or omissions by these companies, including an instance of food-borne contamination or disease, may adversely affect the value of the DEL MONTE ® brand. Our reputation and the value of the DEL MONTE ® brand may be adversely affected by negative consumer perception of this brand.

Our success depends on the services of our senior executives, the loss of whom could disrupt our operations.

Our ability to maintain our competitive position is dependent to a large degree on the services of our senior management team. We may not be able to retain our existing senior management personnel or attract additional qualified senior management personnel.

Our acquisition and expansion strategy may not be successful.

Our growth strategy is based in part on growth through acquisitions or expansion, which poses a number of risks. We may not be successful in identifying appropriate acquisition candidates, consummating acquisitions on satisfactory terms or integrating any newly acquired or expanded business with our current operations. We may issue Ordinary Shares, incur long-term or short-term indebtedness, spend cash or use a combination of these for all or part of the consideration paid in future acquisitions or to expand our operations. The execution of our acquisition and expansion strategy may entail repositioning or similar actions that in turn require us to record impairments, restructuring and other charges. Any such charges would reduce our earnings.

Our indebtedness could limit our financial and operating flexibility and subject us to other risks.

Our ability to obtain additional debt financing or refinance our debt on acceptable terms, if at all, in the future for working capital, capital expenditures or acquisitions may be limited either by financial considerations or due to covenants in existing loan agreements.

Our ability to meet our financial obligations will depend on our future performance, which will be affected by prevailing economic conditions and financial, business and other factors, some of which are beyond our control. Our ability to meet our financial obligations also may be adversely affected by the seasonal nature of our business, the cyclical nature of agricultural commodity prices, the susceptibility of our product sourcing to crop disease, severe weather and other adverse environmental conditions and other factors.

Since we are an exempted holding company, our ability to meet our financial obligations depends primarily on receiving sufficient funds from our subsidiaries. The payment of dividends or other distributions to us by our subsidiaries may be restricted by the provisions of our credit agreements and other contractual requirements and by applicable legal restrictions on payment of dividends.

If we were unable to meet our financial obligations, we would be forced to pursue one or more alternative strategies, such as selling assets, restructuring or refinancing our indebtedness or seeking additional equity capital, strategies which might not be successful. Additional sales of our equity capital could substantially dilute the ownership interest of existing shareholders.

Our new credit facility imposes operating and financial restrictions on our activities. Our failure to comply with the obligations under this facility, including maintenance of financial ratios, could result in an event of default, which, if not cured or waived, would permit acceleration by the lender of the indebtedness due under the facility.

We are controlled by our principal shareholders.

Members of the Abu-Ghazaleh family, including our Chairman and Chief Executive Officer and one of our directors, are our principal shareholders. Together, as of February 18, 2011, they beneficially own 35.1% of our outstanding Ordinary Shares, and our Chairman and Chief Executive Officer holds, and is expected to continue to hold, an irrevocable annual proxy to vote all of these shares. We expect our principal shareholders to continue to use their interest in our Ordinary Shares to significantly influence the direction of our management, the election of our entire board of directors, the method and timing of the payment of dividends, subject to applicable debt covenants and to determine substantially all other matters requiring shareholder approval and to control us. The concentration of our beneficial ownership may have the effect of delaying, deterring or preventing a change in control, may discourage bids for the Ordinary Shares at a premium over their market price and may otherwise adversely affect the market price of the Ordinary Shares.

A substantial number of our Ordinary Shares are available for sale in the public market, and sales of those shares could adversely affect our share price.

Future sales of our Ordinary Shares by our principal shareholders, or the perception that such sales could occur, could adversely affect the prevailing market price of our Ordinary Shares. Of the 58,787,283 Ordinary Shares outstanding as of February 18, 2011, 20,659,151 Ordinary Shares are owned by the principal shareholders and are “restricted securities.” These “restricted” Ordinary Shares can be registered upon demand and are eligible for sale in the public market without registration under the Securities Act of 1933 (the “Securities Act”), subject to compliance with the resale volume limitations and other restrictions of Rule 144 under the Securities Act.

Our organizational documents contain a variety of anti-takeover provisions that could delay, deter or prevent a change in control.

Various provisions of our organizational documents and Cayman Islands law may delay, deter or prevent a change in control of us that is not approved by our board of directors. These provisions include:

a classified board of directors;

a prohibition on shareholder action through written consents;

a requirement that general meetings of shareholders be called only by a majority of the board of directors or by the Chairman of the Board;

advance notice requirements for shareholder proposals and nominations;

limitations on the ability of shareholders to amend, alter or repeal our organizational documents; and

the authority of the board of directors to issue preferred shares with such terms as the board of directors may determine.

In addition, a change of control would constitute an event of default under our new credit facility, which would have a material adverse effect on us. These provisions also could delay, deter or prevent a takeover attempt.

Our shareholders have limited rights under Cayman Islands law.

We are incorporated under the laws of the Cayman Islands, and our corporate affairs are governed by our Memorandum and Articles of Association and by the Companies Law (As Revised) of the Cayman Islands. Principles of law relating to matters, such as the validity of corporate procedures, the fiduciary duties of our management, directors and controlling shareholders and the rights of our shareholders differ from those that would apply if we were incorporated in a jurisdiction within the United States. Further, the rights of shareholders under Cayman Islands law are not as clearly established as the rights of shareholders under legislation or judicial precedent applicable in most U.S. jurisdictions. As a result, our public shareholders may have more difficulty in protecting their interests in the face of actions by the management, directors or controlling shareholders than they might have as shareholders of a corporation incorporated in a U.S. jurisdiction. In addition, there is doubt as to whether the courts of the Cayman Islands would enforce, either in an original action or in an action for enforcement of judgments of U.S. courts, liabilities that are predicated upon the U.S. federal securities laws.

Item 1B. Unresolved Staff Comments

None.

20

Item 2. Properties

The following table summarizes the approximate plantation acreage under production that are owned or leased by us and the principal products grown on such plantations by location as of the end of 2010:

Location	Acres Under Production		Products
	Acres Owned	Acres Leased	
Costa Rica	42,400	10,900	Bananas, Pineapples, Melons
Guatemala	5,500	11,000	Bananas, Melons
Brazil	3,100	-	Bananas
Chile	4,300	800	Non-Tropical Fruit
Kenya	-	11,100	Pineapples
Philippines	200	9,900	Bananas, Pineapples
United States	-	4,300	Melons

Our significant properties include the following:

North America

We operate a total of 22 distribution centers in the United States of which nine are also fresh-cut facilities. We own seven of our distribution centers, including a 200,000 square foot distribution center in Dallas, Texas, a distribution center in Plant City, Florida and a repack facility in Winder, Georgia. The remaining 15 distribution centers are leased from third parties. All of our distribution centers have ripening capabilities and/or other value-added services. Also included are two stand-alone fresh-cut facilities that we own in Kankakee, Illinois and Portland, Oregon. In addition, we lease four port facilities that include cold storage capabilities.

Europe

We operate one owned distribution center in the United Kingdom and own one and lease two distribution centers in Germany, where our products are distributed to leading retail chains. We also own and operate two fresh-cut facilities in the United Kingdom. In Poland, we operate two distribution centers that are leased from third parties and include ripening facilities and other value added services. We own and operate a production facility for prepared fruit, tomato products and snacks in Larissa, Greece.

Asia

Our products are distributed from four leased distribution centers located at strategic ports in Japan with cold storage and banana ripening operations. In addition, we own three distribution centers in South Korea and lease a distribution center in Hong Kong. Our South Korean distribution centers include state-of-the art ripening technology and other value-added services. We also own and operate one fresh-cut facility in Japan.

South America

In Brazil we own approximately 20,000 acres of land not currently under production. In Uruguay, we own approximately 9,600 acres of which 7,400 acres contain a citrus plantation that is leased to a third party on a five-year basis.

Africa

We own and operate a warehouse and cannery in Thika, Kenya.

Middle East

In Jordan, we own an integrated poultry business including poultry farms, a grain mill and a poultry slaughterhouse and a meat processing plant. We also own a combined distribution/manufacturing center in Dubai, UAE. This state-of-the-art facility includes banana ripening and cold storage facilities, fresh-cut fruit and vegetable operations and an ultra fresh juice manufacturing operation. In addition, we operate a distribution center under an operating lease from a third party in Abu-Dhabi, UAE that includes banana ripening and cold storage facilities. In Saudi Arabia, we own 60% of a joint venture that operates two owned distribution centers with banana ripening, cold storage facilities and future manufacturing capabilities.

21

Maritime and Other Equipment (including Containers)

We own a fleet of 12 and charter another 14 refrigerated vessels. In addition, we own or lease other related equipment, including approximately 4,500 refrigerated container units and 170 trucks and refrigerated trailers used to transport our fresh produce in the United States.

Other Properties

We own our U.S. executive headquarters building in Coral Gables, Florida, our Central America regional headquarters building in San Jose, Costa Rica and our South America regional headquarters building in Santiago, Chile. We own our office space in Guatemala City, Guatemala and Amman, Jordan. Our remaining office space in North America, Europe, Asia, Central and South America is leased from third parties.

We believe that our property, plant and equipment are well maintained, in good operating condition and adequate for their present needs. Except as noted in Item 3. Legal Proceedings and Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data, we know of no other environmental issues that may affect the utilization of our property, plant and equipment. For further information with respect to our property, plant and equipment, see Note 8, "Property, Plant and Equipment " to the Consolidated Financial Statements filed as part of this Report.

The principal capital expenditures planned for 2011 consist primarily of the expansion of production facilities in Costa Rica, Guatemala, Chile, Kenya, Jordan and Greece and for our distribution and fresh-cut facilities in Saudi Arabia, North America and the United Kingdom.

Item 3. Legal Proceedings

See Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

Item 4. [Reserved]

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Ordinary Share Prices and Related Matters

Our Ordinary Shares are traded solely on the New York Stock Exchange, under the symbol FDP, and commenced trading on October 24, 1997, the date of our initial public offering.

The following table presents the high and low sales prices of our Ordinary Shares for the periods indicated as reported on the New York Stock Exchange Composite Tape:

	High	Low
2009		
First quarter	\$ 26.04	\$ 13.02
Second quarter	\$ 18.75	\$ 14.52
Third quarter	\$ 24.00	\$ 15.51
Fourth quarter	\$ 24.43	\$ 20.91
2010		
First quarter	\$ 22.76	\$ 19.25
Second quarter	\$ 22.39	\$ 19.49
Third quarter	\$ 23.00	\$ 19.58
Fourth quarter	\$ 25.08	\$ 21.34

Dividend Policy

On November 3, 2010, our Board of Directors reinstated a quarterly cash dividend, declaring a third quarter 2010 cash dividend of \$0.05 per ordinary share to shareholders of record on November 17, 2010. We paid an aggregate of \$2.9 million in dividends on December 10, 2010. We did not pay dividends in the years 2008 and 2009. Because we are an exempted holding company, our ability to pay dividends and to meet our debt service obligations depends primarily on receiving sufficient funds from our subsidiaries. Pursuant to the new credit facility, we may declare and pay dividends and distributions in cash solely out of and up to 50% of our net income for the year immediately preceding the year in which the dividend or distribution is paid; provided that we may declare dividends in cash solely out of and up to 70% of our net income for the fiscal year immediately preceding the year in which the dividend or distribution is paid if, after giving effect to such dividend payment, we have a leverage ratio of 2.50 to 1.00 for such year. It is also possible that countries in which one or more of our subsidiaries are located could institute exchange controls, which could prevent those subsidiaries from remitting dividends or other payments to us. Dividends are payable when, as and if declared by our board of directors, and we cannot assure you that dividends will be paid in the future.

Shareholders

As of February 18, 2011, we had 112 shareholders of record, which excludes shareholders whose shares were held by brokerage firms, depositories and other institutional firms in "street name".

Performance Graph

The graph below matches the cumulative five-year total return of holders of Fresh Del Monte Produce Inc.'s common stock with the cumulative total returns of the S&P 500 index and the S&P 500 Food Products index. The graph assumes that the value of the investment in the Company's common stock and in each of the indexes (including reinvestment of dividends) was \$100 on December 30, 2005 and tracks it through December 31, 2010.

	12/30/05	12/29/06	12/28/07	12/26/08	1/1/10	12/31/10
Fresh Del Monte Produce Inc.	100.00	67.27	152.77	106.79	99.71	112.82
S&P 500	100.00	115.80	122.16	76.96	97.33	111.99
S&P 500 Food Products	100.00	121.95	127.41	103.91	122.38	138.28

The stock price performance included in this graph is not necessarily indicative of future stock price performance.

Share Repurchase Program

The following table provides information regarding our purchases of Ordinary Shares during the periods indicated:

Period	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Dollar Value of Shares that May Yet Be Purchased Under the Program (2)(3)
October 2, 2010 through November 1, 2010	883,901	\$ 21.88	883,901	\$ 201,836,793
November 2, 2010 through December 1, 2010	454,458	\$ 21.72	454,458	\$ 191,965,965
December 2, 2010 through December 31, 2010	-	\$ -	-	\$ 191,965,965
Total	1,338,359	\$ 21.83	1,338,359	\$ 191,965,965

- (1) As of December 31, 2010, we retired all 1,338,359 of the repurchased ordinary shares.
- (2) On August 3, 2009, we announced that our Board of Directors, at their July 31, 2009 board meeting, approved a three-year stock repurchase program of up to \$150.0 million of our ordinary shares.
- (3) On May 5, 2010, we announced that our Board of Directors, at their May 5, 2010 board meeting, approved a three-year stock repurchase program of up to \$150.0 million of our ordinary shares in addition to the program announced on August 3, 2009.

Item 6. Selected Financial Data

Our fiscal year end is the last Friday of the calendar year or the first Friday subsequent to the end of the calendar year, whichever is closest to the end of the calendar year.

The following selected financial data for the years ended December 29, 2006, December 28, 2007, December 26, 2008, January 1, 2010 and December 31, 2010 is derived from our audited Consolidated Financial Statements for the applicable year, prepared in accordance with U.S. generally accepted accounting principles.

The following selected financial data should be read in conjunction with Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations and our Consolidated Financial Statements and accompanying notes contained in Item 8. Financial Statements and Supplementary Data in this Report.

	Year ended (a)				As adjusted (b)
	December 31, 2010	January 1, 2010	December 26, 2008	December 28, 2007	December 29, 2006
(U.S. Dollars in millions, except share and per share data)					
Statement of Income Data:					
Net sales	\$3,552.9	\$3,496.4	\$3,531.0	\$3,365.5	\$3,214.3

Shareholders' equity (c)	1,631.5	1,695.2	1,513.9	1,379.6	1,038.5

(a) We reclassified gain on sales of property, plant and equipment in other (expense) income, net on the Consolidated Statements of Income for 2008. Accordingly, we have reclassified these amounts for years prior to 2008 to gain on sales of property, plant and equipment, a component of operating income. See Note 1, "General" to our Consolidated Financial Statements.

(b) Effective December 30, 2006, the first day of our 2007 year, we adopted the deferral method of accounting for planned major maintenance activities related to vessel dry-dock activities, whereby actual costs incurred are deferred and amortized on a straight-line basis over the period until the next scheduled dry-dock activity. We have applied the new guidance included in the ASC related to "Other Assets and Deferred Costs" retrospectively to the year ended December 29, 2006. See Note 2, "Summary of Significant Accounting Policies" to our Consolidated Financial Statements.

(c) The ASC on "Consolidation" was amended to require classification of noncontrolling interests as a component of consolidated shareholders' equity and the elimination of "minority interest" accounting in results of operations. Earnings attributable to noncontrolling interests are required to be reported as part of consolidated earnings and not as a separate component of income or expense and are required to be disclosed on the face of the statement of income. We adopted this additional guidance on December 27, 2008, the first day of our 2009 fiscal year. See Note 2, "Summary of Significant Accounting Policies" to our Consolidated Financial Statements.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We are one of the world's leading vertically integrated producers, marketers and distributors of high-quality fresh and fresh-cut fruit and vegetables, as well as a leading producer and marketer of prepared fruit and vegetables, juices, beverages and snacks in Europe, Africa and the Middle East. We market our products worldwide under the DEL MONTE® brand, a symbol of product innovation, quality, freshness and reliability since 1892. Our global sourcing and logistics system allows us to provide regular delivery of consistently high-quality produce and value-added services to our customers. Our major producing operations are located in North, Central and South America, Asia and Africa. Production operations are aggregated on the basis of our products: bananas, other fresh produce, prepared foods and other products and services. Other fresh produce includes pineapples, melons, tomatoes, non-tropical fruit (including grapes, apples, pears, peaches, plums, nectarines, avocados, citrus and kiwis), fresh-cut produce and other fruit and vegetables. Prepared foods include prepared fruit and vegetables, juices, beverages, snacks, poultry and meat products. Other products and services includes a plastic product and box manufacturing business, a grain business and third-party ocean freight services.

Strategy

Our strategy is focused on a combination of maximizing revenues from our existing infrastructure, entering new markets and strict cost control initiatives. We plan to continue to capitalize on the growing global demand for fresh produce and expand our reach into existing and new markets. We expect sales growth of fresh produce in key markets by increasing sales volume and per unit sales prices as permitted by market conditions. Our 2008 acquisitions substantially increased our production capability of bananas, pineapples and continue to provide the potential over time for further operating efficiencies and synergies. In addition, our number one position in the gold pineapple market has been further strengthened. Our strategy includes increasing volumes from existing production and distribution facilities in order to improve operating efficiencies and reduce per unit costs. We plan additional investments in production facilities in order to expand our product offering in established markets and continue with our recent expansion in growth markets, such as the Middle East, Africa and countries formerly part of the Soviet Union.

Net Sales

Our net sales are affected by numerous factors, including mainly the balance between the supply of and demand for our produce and competition from other fresh produce companies. Our net sales are also dependent on our ability to supply a consistent volume and quality of fresh produce to the markets we serve. For example, seasonal variations in demand for bananas as a result of increased supply and competition from other fruit are reflected in the seasonal fluctuations in banana prices, with the first six months of each year generally exhibiting stronger demand and higher prices, except in those years where an excess supply exists. During 2010, there were generally higher supplies of bananas in the markets. Our overall banana sales volume increased by 10% and our average per unit sales prices decreased 3%. In the processed foods business, we generally realize the largest portion of our net sales and gross profit in the third and fourth quarters of the year. During 2010, our prepared food net sales increased as a result of increased demand for our Jordanian poultry and processed meat products, canned pineapples and beverage products in Sub-Saharan Africa.

Since our financial reporting currency is the U.S. dollar, our net sales are significantly affected by fluctuations in the value of the currency in which we conduct our sales versus the dollar, with a weak dollar versus such currencies resulting in increased net sales in dollar terms. Including the effect of our foreign currency hedges, net sales for 2010 were positively impacted by \$18.2 million, as compared to 2009, principally as a result of a stronger Japanese yen and Korean won, partially offset by a weaker euro and British pound, versus the U.S. dollar.

Our net sales growth in recent years has been achieved primarily through increased sales volume in existing markets of other fresh produce, primarily pineapples and non-tropical fruit, and favorable pricing on our Del Monte Gold® Extra Sweet pineapple combined with increased sales volume and per unit sales prices of bananas in existing and new markets. During 2010, our net sales were positively affected by higher sales volume of bananas and gold pineapples that resulted from our recent acquisitions and production expansion, which were offset principally by lower net sales of melons and other products and services. Our net sales growth in recent years is also attributable to a broadening of our product line with the expansion of our fresh-cut produce business and our expansion into new markets. We expect our net sales growth to continue to be driven by increased sales volumes in our banana, other fresh produce and the prepared food segments. In the Middle East, we expect to continue to increase our net sales of our fresh produce and prepared food product offerings as a result of our expansion in the Saudi Arabian and other regional markets. We also expect to increase our sales by developing new products in the prepared food segment, targeting the convenience store and foodservice trade in selected European and Middle East markets.

Cost of Products Sold

Cost of products sold is principally composed of two elements, product and logistics costs. Product cost for our produce is primarily composed of cultivation (the cost of growing crops), harvesting, packaging, labor, depreciation and farm administration. Product cost for produce obtained from independent growers is composed of produce and packaging costs. Logistics costs include land and sea transportation and expenses related to port facilities and distribution centers. Sea transportation cost is the most significant component of logistics costs and is comprised of the cost of vessel operating expenses and chartering refrigerated vessels. Vessel operating expenses for our owned vessels include operations, maintenance, depreciation, insurance, fuel (the cost of which is subject to commodity price fluctuations), and port charges. For chartered vessels, operating expenses include the cost of chartering the vessels, fuel and port charges. Variations in containerboard prices, which affect the cost of boxes and other packaging materials, and fuel prices can have a significant impact on our product cost and our profit margins. Also, variations in the production yields, fertilizers and other input costs and the cost to procure products from independent growers can have a significant impact on our costs. Containerboard, plastic, resin and fuel prices have historically been volatile. During 2009, fuel prices decreased by 32% and containerboard decreased 24% as compared with 2008, reducing cost of products sold by \$67.0 million. This decrease in cost of products sold that resulted from lower fuel and containerboard prices was offset by an increase in production costs due to lower yields and higher input costs and increased cost of produce from independent growers of approximately \$75.0 million and a charge of \$17.2 million related to growing crop inventory as a result of our decision to discontinue pineapple operations in Brazil. During 2010, cost of fuel increased by 25% and containerboard increased by 7%, increasing our cost of product sold by \$30.7 million. In addition, we incurred \$8.7 million of increased costs for inventory write-offs and other costs associated with exit activities in Brazil, floods in Guatemala and damages caused by an earthquake in Chile, partially offset by insurance reimbursements.

In general, changes in our volume of products sold can have a disproportionate effect on our gross profit. Within any particular year, a significant portion of our cost of products sold is fixed, both with respect to our operations and with respect to the cost of produce purchased from independent growers from whom we have agreed to purchase all the products they produce. Accordingly, higher volumes produced on company-owned farms directly reduce the average per-box cost, while lower volumes directly increase the average per-box cost. In addition, because the volume that will actually be produced on our farms and by independent growers in any given year depends on a variety of factors, including weather, that are beyond our control or the control of our independent growers, it is difficult to predict volumes and per-box costs.

Since our financial reporting currency is the U.S. dollar, our costs are affected by fluctuations in the value of the currency in which we have significant operations versus the dollar, with a weak dollar versus those currencies resulting in increased costs. During 2010, cost of products sold was negatively impacted by approximately \$31.9 million as a result of a weaker U.S. dollar versus the various currencies in which we have significant operations.

Selling, General and Administrative Expenses

Selling, general and administrative expenses primarily include the costs associated with selling in countries where we have our own sales force, advertising and promotional expenses, professional fees, general corporate overhead and other related administrative functions.

Gain on Sales of Property, Plant and Equipment

Gain on sales of property, plant and equipment was \$9.2 million in 2010 principally as a result of the sale of four refrigerated vessels and properties in South America. In 2009, the gain on sales of property, plant and equipment of \$11.2 million resulted primarily from the sale of five refrigerated vessels and properties in South America and Africa.

Asset Impairment and Other Charges, Net

Asset impairment and other charges, net were \$37.3 million in 2010 as compared with \$8.0 million in 2009, an increase of \$29.3 million. In 2010, we recorded asset impairment and other charges totaling \$37.3 million related to plant disease affecting an isolated growing area in our banana operations in the Philippines that will be abandoned during the first quarter of 2011, exit activities in South Africa and Brazil, damage caused by floods in our Guatemala banana farms and an earthquake in Chile, combined with an impairment charge of the DEL MONTE® perpetual, royalty-free brand name license for beverage products in the United Kingdom due to lower than expected sales volume and pricing and the relocation of a port facility in North America.

In 2009, we recorded asset impairment and other charges totaling \$10.9 million as a result of our decision to discontinue pineapple planting in Brazil and our decision to not use certain property, plant and equipment as originally intended for other crop production. During 2009, we also incurred charges of \$1.2 million for termination benefits and contract termination costs resulting from our decision to discontinue our commercial cargo service in Germany, a \$2.0 million impairment charge of the DEL MONTE® perpetual, royalty-free brand name license for beverage products in the United Kingdom due to lower than expected sales volume and pricing and a \$2.8 million asset impairment charge related to an intangible asset for a non-compete agreement as a result of the Caribana acquisition. These charges were partially offset by \$5.5 million of credits due to the reversal of contract termination costs as a result of the closure of an under-utilized distribution center in the United Kingdom, and the discontinuance of retiree medical benefits and the reversal of contract termination costs related to the closing of our Hawaii pineapple operations. Also included in asset impairments and other charges, net, for 2009 was \$3.4 million of insurance recoveries related to the 2008 floods of our Brazil banana operations.

Asset impairment and other charges were \$18.4 million in 2008. In 2008, we recorded asset impairment charges totaling \$11.3 million as a result of extensive flood damage at our banana farms in Brazil and Costa Rica and \$10.0 million principally due to the closure of under-utilized distribution centers and the previously announced closure of our beverage production operation in the United Kingdom combined with related contract termination costs related to the banana and prepared food segments. During 2008, we also recorded a net benefit of approximately \$2.9 million related to the previously announced closing of our Hawaii pineapple operations.

Interest Expense

Interest expense consists primarily of interest on borrowings under working capital facilities that we maintain and interest on other long-term debt primarily for capital lease obligations. In 2010, our interest expense declined, reflecting primarily a decrease in our average outstanding debt.

Other Income (Expense), Net

Other income (expense), net, primarily consists of currency exchange gains or losses, equity gains and losses in unconsolidated companies and other miscellaneous income and expense items. During 2010, we recorded equity losses from our unconsolidated subsidiaries as compared with equity gains recorded in the prior year. In addition, our currency exchange losses were lower during 2010 as compared with the prior year.

Provision for (Benefit from) Income Taxes

The provision for (benefit from) income taxes in 2010 was a benefit of \$(0.7) million and includes a benefit of \$(7.3) million as a result of a change in estimate, combined with reversals of uncertain tax positions and release of valuation allowance in certain jurisdictions. Income taxes consist of the consolidation of the tax provisions, computed on a separate entity basis, in each country in which we have operations. Since we are a non-U.S. company with substantial operations outside the United States, a substantial portion of our results of operations is not subject to U.S. taxation. Several of the countries in which we operate have favorable tax rates. We are subject to U.S. taxation on our operations in the United States. From time to time, tax authorities in various jurisdictions in which we operate audit our tax returns and review our tax positions. There are audits presently pending in various countries. There can be no assurance that any tax audits, or changes in existing tax laws or interpretations in countries in which we operate, will not result in an increased effective tax rate for us.

Results of Operations

The following table presents, for each of the periods indicated, certain income statement data expressed as a percentage of net sales:

	December		Year ended		December	
	31,		January 1,		26,	
	2010		2010		2008

2010 Compared with 2009

Net Sales

Net sales in 2010 were \$3,552.9 million compared with \$3,496.4 million in 2009. The increase in net sales of \$56.5 million was primarily attributable to higher net sales of bananas and prepared food, partially offset by lower net sales of other products and services and other fresh produce.

Net sales in the banana segment increased by \$109.3 million due to higher sales volume in North America and the Middle East partially offset by lower per unit sales prices in Europe, the Middle East and Asia.

- o North America banana sales volume increased as a result of increased supplies. Per unit sales prices increased slightly as compared with prior year.
- o Middle East banana sales volume increased significantly as a result of shipments to new markets in this region. Per unit sales prices decreased as compared with prior year as a result of weak market conditions.
- o Europe banana sales volume was relatively flat and per unit sales price decreased as compared with prior year. Contributing to the decrease in per unit sales price were unfavorable exchange rates and weak market conditions.
- o Asia banana sales volume decreased as a result of unfavorable growing conditions in the Philippines. Per unit sales price decreased as a result of poor market conditions partially offset by favorable exchange rates.

Net sales in the prepared food segment increased by \$22.4 million principally as the result of increased sales in our Jordanian poultry and processed meat business, canned pineapples and deciduous fruit in Europe and beverage products in Sub-Saharan Africa.

Net sales in the other products and services segment decreased by \$47.4 million principally due to lower commodity selling prices affecting our Argentine grain business combined with our decision to exit grain operations in Argentina and lower third-party freight revenue due to the elimination of freight services from Northern Europe to the Caribbean.

Net sales in the other fresh produce segment decreased by \$27.8 million principally as a result of lower net sales of melons, potatoes and tomatoes, partially offset by higher sales of pineapples, non-tropical fruit, vegetables and fresh-cut fruit.

- o Net sales of melons decreased principally as a result of planned sales volume reduction, partially offset by higher per unit sales price in North America.
- o Net sales of potatoes and tomatoes decreased as a result of continued product rationalization and market conditions.
- o Net sales of pineapples increased principally due to an increase in sales volume in North America due to increased production in Costa Rica, combined with higher per unit sales prices in Asia as a result of favorable exchange rates.
- o Net sales of non-tropical fruit increased principally as a result of higher apple sales volumes and per unit sales price in the Middle East, higher grapes per unit sales price in Asia and North America, partially offset by lower sales volume and per unit sales prices of avocados in North America.

o

Net sale of vegetables increased principally as a result of higher sales volume of onions and bell peppers in North America.

oNet sales of fresh-cut products increased principally due to higher sales volumes in North America and the Middle East that resulted from expansion of our customer base along with increased business with our current retail and foodservice customers in addition to higher per unit sales prices in North America, partially offset by lower sales volume in Europe.

Cost of Products Sold

Cost of products sold was \$3,280.5 million in 2010 compared with \$3,185.6 million in 2009, an increase of \$94.9 million. This increase in cost of products sold was primarily attributable to higher sales volumes of bananas and pineapples combined with higher fuel, containerboard and fruit procurement and production costs. Partially offsetting these increases in cost of product sold were lower restructuring and other charges incurred during 2010. In 2010, cost of product sold included \$8.7 million of net charges principally related to the write-off of inventory caused by floods in our Guatemala banana farms, net of related insurance reimbursements, an earthquake in Chile and exit activities in Brazil related to the discontinuation of melon growing operations. In 2009, cost of product sold included \$15.2 million principally related to growing crop inventory write-off as a result of our decision to discontinue pineapple operations in Brazil and an insurance reimbursement for prior years flood damage.

Gross Profit

Gross profit was \$272.4 million in 2010 compared with \$310.8 million in 2009, a decrease of \$38.4 million. The decrease in gross profit was attributable to lower gross profit on bananas, prepared food and other products and services, partially offset by higher gross profit on other fresh produce.

Gross profit in the banana segment decreased by \$77.3 million as a result of higher fuel and containerboard and fruit production and procurement costs combined with lower per unit sales price in Europe, the Middle East and Asia, partially offset by a 10% increase in sales volume. Contributing to the increase in per unit fruit cost in 2010 was the inclement weather in Central America. In Guatemala, we recorded a charge of \$2.0 million, net of insurance recoveries, for clean-up costs and packaging materials inventory write-offs related to extensive flood damage.

Gross profit in the prepared food segment decreased by \$6.6 million principally as a result of higher costs of canned pineapples and higher costs in the Jordanian poultry business, partially offset by higher per unit sales prices.

Gross profit in the other products and services segment decreased by \$1.9 million primarily due to lower third-party freight services.

Gross profit on the other fresh produce segment increased by \$47.4 million principally as a result of higher gross profit on gold pineapples, non-tropical fruit and melons.

oGross profit on gold pineapples increased in 2010 principally as a result higher sales volumes in North America, the Middle East and Asia, combined with the charge of \$17.2 million that was recorded in 2009 related to growing crop inventory as a result of our decision to discontinue pineapple operations in Brazil, partially offset by higher freight costs.

oGross profit in non-tropical fruit increased principally due to higher per unit sales prices of grapes in North America that resulted from favorable market conditions.

oGross profit on melons increased principally due to improvements in per unit sales prices in North America, partially offset by lower sales volumes, lower per unit sales prices in Europe, higher production, procurement and ocean freight costs combined with a charge of \$4.9 million for the discontinuation of our Brazil melon growing operation and costs associated with planned volume reduction in Costa Rica and Guatemala.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased \$1.0 million to \$166.8 million in 2010 compared with \$165.8 million in 2009. The increase was primarily due to higher advertising and promotional expenses in Europe related to the prepared food business, and higher selling and marketing expenses in the Middle East and Asia, partially offset by lower administrative expenses.

Gain on Sales of Property, Plant and Equipment

Gain on sales of property, plant and equipment was \$9.2 million in 2010 principally as a result of the sale of four refrigerated vessels and properties in South America. In 2009, the gain on sales of property, plant and equipment of \$11.2 million resulted primarily from the sale of five refrigerated vessels and properties in South America and Africa.

Asset Impairment and Other Charges

Asset impairment and other charges, net were \$37.3 million in 2010, as compared with \$8.0 million in 2009, an increase of \$29.3 million.

Asset impairment and other charges (credits) for 2010 were as follows:

During the second quarter of 2010, we entered into an agreement to sell substantially all of the assets of our South Africa canning operations. As a result, we recognized a \$16.7 million asset impairment of our investment in South Africa and \$0.1 million in other charges in the prepared food reporting segment.

\$12.7 million in asset impairments related to plant disease affecting an isolated growing area in our banana operations in the Philippines that will be abandoned during the first quarter of 2011.

\$6.1 million in asset impairments and a \$(2.4) million insurance reimbursement related to flood damage to our Guatemala banana plantation.

\$1.4 million charge for impairment of the DEL MONTE® perpetual, royalty-free brand name license for beverage products in the United Kingdom due to lower than expected sales volume and pricing related to the prepared food segment.

\$1.1 million in asset impairment charges related to damage caused by an earthquake in Chile in the other fresh produce segment.

\$1.3 million in other charges due to the discontinuation of melon growing operations in Brazil related to the other fresh produce segment.

\$0.7 million in asset impairment charges as a result of the relocation of a port facility in North America related to the banana and other fresh produce segments.

\$ (0.4) million in insurance proceeds related to the 2008 flood damage to our Brazil banana plantation.

Asset impairment and other charges (credits) for 2009 were as follows:

\$10.9 million in asset impairment and other charges as a result of our decision to discontinue pineapple operations in Brazil.

\$1.2 million in termination benefits and contract termination costs resulting from our decision to eliminate our commercial cargo service from Northern Europe to the Caribbean related to the other products and services segment.

\$2.0 million charge for impairment of the DEL MONTE® perpetual, royalty-free brand name license for beverage products in the United Kingdom due to lower than expected sales volume and pricing related to the prepared food segment.

\$2.8 million impairment charge related to an intangible asset for a non-compete agreement as a result of the Caribana acquisition related to the banana segment.

\$(0.8) million in reversals of contract termination costs previously recorded related to the closure of an under-utilized distribution center in the United Kingdom related to the banana segment.

\$(4.7) million principally due to a gain from the discontinuance of the retiree medical plan and the reversal of certain contract termination costs related to the previously announced closing of our Hawaii pineapple operations related to the other fresh produce segment.

\$(3.4) million gain due to insurance proceeds related to the 2008 Brazil floods related to the banana segment.

Operating Income

Operating income in 2010 was \$77.5 million compared with an operating income of \$148.2 million in 2009, a decrease of \$70.7 million. The decrease in operating income is attributable to lower gross profit, higher asset impairment and other charges combined with higher selling, general and administrative expense and lower gain on sales of property, plant and equipment.

Interest Expense

Interest expense was \$10.8 million in 2010 as compared with \$11.9 million in 2009, a decrease of \$1.1 million. The lower interest expense in 2010 is principally due to lower average debt balances.

Other Income (Expense), Net

Other income (expense), net was an expense of \$(7.5) million in 2010 compared with an expense of \$(5.2) million in 2009. The increase in expense in 2010 was principally due to equity losses from unconsolidated subsidiaries during 2010 as compared with equity income in 2009. Partially offsetting the equity loss from unconsolidated subsidiaries were lower foreign exchange losses incurred in 2010 as compared with 2009.

Provision for (Benefit from) Income Taxes

Provision for (benefit from) income taxes was a benefit of \$(0.7) million in 2010 compared with a benefit of \$(12.8) million in 2009. The benefit in 2010 includes a benefit of \$(7.3) million as a result of a change in estimate, combined with reversals of uncertain tax positions and release of valuation allowances in certain jurisdictions. Provision for (benefit from) for income taxes in 2009 related principally to \$13.6 million of net changes in the deferred tax valuation allowance due to expected utilization of deferred tax assets as a result of increased profitability of our North America operations combined with the settlement of certain tax positions in connection with an audit in 2009.

2009 Compared with 2008

Net Sales

Net sales in 2009 were \$3,496.4 million compared with \$3,531.0 million in 2008. The decrease in net sales of \$34.6 million was primarily attributable to lower net sales of prepared food, other products and services and other fresh produce, partially offset by higher net sales of bananas.

Net sales in the prepared food segment decreased by \$75.0 million principally due to lower sales volume of canned pineapples, beverage and deciduous products due to poor market conditions and unfavorable exchange rates. Also contributing to the decrease in net sales in the prepared food segment was a change to a beverage production and distribution agreement in the United Kingdom, whereby sales are recognized net of production and distribution costs, resulting in approximately \$11.0 million of lower net sales in 2009 as compared to 2008.

Net sales in the other products and services segment decreased by \$42.0 million principally due to lower commodity selling prices affecting our Argentine grain business and lower third-party freight revenue due to the elimination of freight services from Northern Europe to the Caribbean.

Net sales in the other fresh produce segment decreased by \$8.3 million principally as a result of lower net sales of tomatoes, other fruits and vegetables, non-tropical fruit and fresh-cut products, partially offset by higher net sales of melons and pineapples.

oNet sales of tomatoes decreased primarily due to lower sales volume resulting from fluctuations in supply and demand. Net sales of other fruits and vegetables decreased primarily due to product rationalization in North America combined with challenging market conditions.

oNet sales of non-tropical fruit decreased principally as a result of lower sales volume of grapes and lower per unit sales prices for apples, partially offset by higher sales volume of avocados.

oNet sales of fresh-cut products decreased primarily due to lower sales in Europe due to unfavorable exchange rates and product rationalization.

o Net sales of melons increased as a result of higher sales volume that resulted principally from improved yields and increased production from Company-operated facilities in Central America, partially offset by a 7% decrease in per unit selling prices that resulted from higher industry volumes.

o Net sales of pineapples increased principally due to an 11% increase in sales volume that resulted from the Caribana acquisition, partially offset by lower per unit sales prices. Pineapple per unit sales prices decreased as a result of the unfavorable current economic conditions and unfavorable exchange rates in Europe and South Korea.

Net sales in the banana segment increased by \$90.8 million due to higher sales volume in North America, the Middle East and Asia combined with higher per unit sales prices in all regions, partially offset by unfavorable exchange rates in Europe and South Korea. Also contributing to the increase in sales volume was the additional sales volume that resulted from the Caribana acquisition.

Cost of Products Sold

Cost of products sold was \$3,185.6 million in 2009 compared with \$3,187.0 million in 2008, a decrease of \$1.4 million. This decrease in cost of products sold was primarily attributable to lower ocean freight rates that resulted from lower fuel prices, favorable exchange rates and \$2.1 million of insurance proceeds related to the 2008 Brazil flood damage, partially offset by an increase in production costs due to lower yields and higher input costs and increased cost of produce from independent growers and a charge of \$17.2 million related to growing crop inventory as a result of our decision to discontinue pineapple operations in Brazil.

Gross Profit

Gross profit was \$310.8 million in 2009 compared with \$344.0 million in 2008, a decrease of \$33.2 million. The decrease in gross profit was attributable to lower gross profit on other fresh produce, bananas and other products and services, partially offset by higher gross profit on prepared food.

Gross profit on the other fresh produce segment decreased by \$22.4 million principally as a result of lower gross profit on gold pineapples, melons and non-tropical fruit, partially offset by higher gross profit on fresh-cut products.

o Gross profit on gold pineapples decreased principally as a result of a charge of \$17.2 million related to growing crop inventory as a result of our decision to discontinue pineapple operations in Brazil, combined with lower per unit sales prices principally in Europe and North America as a result of poor market conditions and unfavorable exchange rates in Europe, partially offset by higher volume in all markets.

o Gross profit on melons decreased principally due to lower per unit sales prices as a result of higher industry volumes in North America.

o Gross profit in non-tropical fruit decreased principally due to lower gross profit on apples and grapes as a result of unfavorable market conditions, partially offset by higher gross profit on stone fruit (peaches, nectarines, plums, cherries) and avocados as a result of lower fruit costs.

o Gross profit on fresh-cut products increased principally due to lower per unit costs and improved efficiencies in North America.

Gross profit in the banana segment decreased by \$9.0 million principally due to a 5% increase in per unit cost as a result of higher procurement, production and distribution costs, partially offset by higher per unit sales prices and lower per unit ocean freight costs that resulted from lower fuel costs and improvements in vessel utilization. Also

affecting gross profit in the banana segment was the effect of the Brazil flood, which decreased gross profit by \$2.1 million in 2008 due to inventory write-offs and increased gross profit in 2009 for the same amount due to insurance recovery.

Gross profit on the other products and services segment decreased by \$2.1 million principally due to lower gross profit in our Argentine grain business resulting from lower commodity prices.

Gross profit in the prepared food segment increased by \$0.3 million primarily due to lower freight costs, partially offset by higher distribution costs.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased \$3.3 million to \$165.8 million in 2009 compared with \$162.5 million in 2008. The increase was primarily due to higher marketing and selling expenses in Europe and the Middle East as a result of our efforts to support brand awareness, combined with higher professional fees and employee benefit expenses.

Gain on Sales of Property, Plant and Equipment

Gain on sales of property, plant and equipment was \$11.2 million in 2009 principally as a result of the sale of five refrigerated vessels and properties in South America and Africa. In 2008, the gain on sales of property, plant and equipment of \$7.5 million resulted primarily from the sale of land and equipment in South America.

Asset Impairment and Other Charges

Asset impairment and other charges, net were \$8.0 million in 2009 as compared with \$18.4 million in 2008, a decrease of \$10.4 million.

Asset impairment and other charges (credits) for 2009 were as follows:

\$10.9 million in asset impairment and other charges as a result of our decision to discontinue pineapple operations in Brazil.

\$1.2 million in termination benefits and contract termination costs resulting from our decision to eliminate our commercial cargo service from Northern Europe to the Caribbean related to the other products and services segment.

\$2.0 million charge for impairment of the DEL MONTE® perpetual, royalty-free brand name license for beverage products in the United Kingdom due to lower than expected sales volume and pricing related to the prepared food segment.

\$2.8 million impairment charge related to an intangible asset for a non-compete agreement as a result of the Caribana acquisition related to the banana segment.

\$(0.8) million in reversals of contract termination costs previously recorded related to the closure of an under-utilized distribution center in the United Kingdom related to the banana segment.

\$(4.7) million principally due to a gain from the discontinuance of the retiree medical plan and the reversal of certain contract termination costs related to the previously announced closing of our Hawaii pineapple operations related to the other fresh produce segment.

\$(3.4) million gain due to insurance proceeds related to the 2008 Brazil floods related to the banana segment.

Asset impairment and other charges (credits) for 2008 were as follows:

\$11.3 million in asset impairment and other charges as a result of extensive flood damage at our banana farms in Brazil and Costa Rica.

\$10.0 million in asset impairment and contract termination costs principally due to the closure of under-utilized distribution centers and the previously announced closure of our beverage production operation in the United Kingdom related to the banana and prepared food segments.

\$(2.9) million net gain primarily due to unrecognized prior service costs as a result of the previously announced closing of our Hawaii pineapple operations related to the other fresh produce segment.

Operating Income

Operating income in 2009 was \$148.2 million compared with an operating income of \$170.6 million in 2008, a decrease of \$22.4 million. The decrease in operating income is attributable to lower gross profit and higher selling, general and administrative expense, partially offset by increased gain on sales of property, plant and equipment and lower asset impairment and other charges.

Interest Expense

Interest expense was \$11.9 million in 2009 as compared with \$14.5 million in 2008, a decrease of \$2.6 million. The lower interest expense in 2009 reflects a slight decrease in our average outstanding debt and lower average interest rates, partially offset by the write-off of debt issuance cost related to the refinancing of our term loan that was previously being amortized through May 10, 2011.

Other Income (Expense), Net

Other income (expense), net was a loss of \$(5.2) million in 2009 compared with income of \$4.5 million in 2008. The loss in 2009 was principally due to \$6.4 million in foreign exchange losses primarily as a result of unfavorable exchange rates for the euro and British pound as compared with \$6.5 million in foreign exchange gains in 2008. Partially offsetting the foreign exchange losses incurred in 2009 were higher equity earnings from unconsolidated subsidiaries.

Provision for (Benefit from) Income Taxes

Provision for (benefit from) income taxes was \$(12.8) million in 2009 as compared with a provision of \$4.8 million in 2008. The benefit from income taxes for 2009 related principally to \$13.6 million of net changes in the deferred tax valuation allowance due expected utilization of deferred tax assets as a result of increased profitability of our North America operations combined with the settlement of certain tax positions in connection with an audit.

Liquidity and Capital Resources

Net cash provided by operating activities was \$197.4 million for 2010, compared with \$257.5 million for 2009, a decrease of \$60.1 million. The decrease in cash provided by operating activities was principally due to lower net income, partially offset by lower levels of prepared food finished goods inventory.

Net cash provided by operating activities was \$257.5 million for 2009 as compared with \$187.2 million for 2008, an increase of \$70.3 million. The increase in cash provided by operating activities was principally attributable to lower levels of trade receivables that resulted from improved collections and lower sales combined with lower levels of raw materials and packaging supplies inventories, partially offset by lower net income and higher payments for accounts payable and accrued expenses.

Working capital was \$513.8 million at December 31, 2010, compared with \$551.3 million at January 1, 2010, a decrease of \$37.5 million. This decrease in working capital was primarily attributable to lower finished goods inventory and prepaid expenses and other current assets, combined with higher levels of accounts payable and accrued expenses. Partially offsetting these decreases in working capital were higher levels of cash and cash equivalents and higher trade accounts receivables.

Net cash used in investing activities was \$50.6 million for 2010, \$66.9 million for 2009 and \$499.5 million for 2008. Net cash used for investing activities for 2010 consisted primarily of capital expenditures of \$70.8 million, partially offset by \$16.0 million of proceeds from sales of property, plant and equipment and \$4.2 million of return of investment by an unconsolidated company. Our capital expenditures consisted of approximately \$30.9 million, principally for expansion of production facilities in Guatemala, Costa Rica and Brazil combined with improvements to our port facilities in North America and distribution facilities in Saudi Arabia related to the banana segment, \$33.1 million principally for expansion of production facilities in Costa Rica, Guatemala, Chile and the Philippines and fresh-cut facilities in the United States and United Kingdom related to the other fresh produce segment and \$6.7 million principally for expansion of production facilities in Kenya, Greece and Jordan related to the prepared food segment. Proceeds from sale of property, plant and equipment for 2010 consisted primarily of the sale of four refrigerated vessels and properties in South America and the sale of our South Africa canning operations. On October 12, 2010, the sale of our South Africa canning operations was executed by the receipt of approximately \$1.5 million in cash and \$6.9 million recorded as a financing receivable, which was collected on January 27, 2011.

Net cash used in investing activities for 2009 consisted primarily of capital expenditures of \$84.5 million, partially offset by proceeds from sales of property, plant and equipment of \$17.6 million. Our capital expenditures for 2009 were comprised of \$51.6 million primarily for distribution centers in Saudi Arabia and expansion of production

facilities in Costa Rica, Guatemala, Brazil and the Philippines related to the banana segment, \$29.9 million principally for expansion and improvements of our pineapple operations in Costa Rica and the Philippines, improvements of non-tropical fruit operations in Chile and of fresh-cut fruit facilities in North America and the United Kingdom related to the other fresh produce segment and \$5.3 million for expansion of production facilities in Jordan and Kenya related to the prepared food segment. Proceeds from sale of property, plant and equipment for 2009 consisted primarily of the sale of five refrigerated vessels that were scrapped and properties in South America and Africa.

Net cash used in investing activities for 2008 consisted primarily of capital expenditures of \$101.5 million, purchase business combination of \$414.5 million, partially offset by \$16.5 million of proceeds from sale of property, plant and equipment. Capital expenditures for 2008 consisted of \$59.4 million principally for distribution centers in Saudi Arabia and South Korea and for production facilities in the Philippines, Guatemala and Brazil related to the banana segment, \$23.1 million principally for expansion of production facilities in the Philippines, Costa Rica and Chile related to the other fresh produce segment and \$19.0 million principally for production facilities in Jordan and Kenya related to the prepared food segment. Cash payments for purchases of business combinations consisted principally of the acquisition of Caribana for \$401.2 million and the purchase of melon operations in Costa Rica and Guatemala for \$12.4 million. Proceeds from sale of property, plant and equipment consisted primarily of disposal of non-performing assets in South America and Europe.

Net cash used in financing activities was \$136.7 million for 2010 and \$182.2 million for 2009. Net cash provided by financing activities was \$304.5 million for 2008. Net cash used in financing activities for 2010 of \$136.7 million was primarily attributable to repurchases of our ordinary shares of \$108.1 million, net repayment of long-term debt of \$31.3 million and dividends paid of \$2.9 million, partially offset by contributions from noncontrolling interest of \$3.4 million and proceeds from stock options exercised of \$2.2 million.

Net cash used in financing activities of \$182.2 million for 2009 was primarily attributable to net repayments on long-term debt of \$198.0 million, partially offset by contributions from noncontrolling interest of \$14.8 million and proceeds from stock options exercised of \$1.0 million.

Net cash provided by financing activities of \$304.5 million for 2008 was attributable to net borrowings under our credit facilities of \$271.8 million, proceeds from stock options exercised of \$22.1 million and contributions from noncontrolling interest of \$10.6 million.

We finance our working capital and other liquidity requirements primarily through cash from operations and borrowings under our \$500.0 million senior secured revolving credit facility (the "Credit Facility") administered by Rabobank Nederland, New York Branch. The Credit Facility has a 3.5-year term, with a scheduled termination date of January 17, 2013. The Credit Facility includes a swing line facility and a letter of credit facility with a \$100 million sublimit. Borrowings under the Credit Facility bear interest at a spread over the London Interbank Offer Rate ("LIBOR") that varies with our leverage ratio. On August 13, 2010, we amended the Credit Facility by lowering the spread over LIBOR that varies with our leverage ratio. The Credit Facility is collateralized directly or indirectly by substantially all of our assets and is guaranteed by certain of our subsidiaries. At December 31, 2010, we had \$285.0 million outstanding under the Credit Facility bearing interest at a per annum rate of 2.26%. In addition, we pay a fee on unused commitments.

The Credit Facility requires us to be in compliance with financial and other covenants, including limitations on capital expenditures, the amount of dividends that can be paid in the future, the amount and types of liens and indebtedness, material asset sales and mergers. As of December 31, 2010, we were in compliance with all of the financial and other covenants contained in the Credit Facility.

At December 31, 2010, we had \$207.4 million available under committed working capital facilities, primarily under the Credit Facility. At December 31, 2010, we applied \$16.5 million to the letter of credit facility, comprised primarily of certain contingent obligations and other governmental agencies and purchases of equipment guarantees. We also had \$11.4 million in other letters of credit and bank guarantees not included in the letter of credit facility.

As of December 31, 2010, we had \$295.6 million of long-term debt and capital lease obligations, including the current portion, consisting of \$285.0 million outstanding under the Credit Facility, \$3.4 million of capital lease obligations and \$7.2 million of other long-term debt and notes payable.

Based on our operating plan, combined with our borrowing capacity under our Credit Facility, we believe we will have sufficient resources to meet our cash obligations in the foreseeable future. As of December 31, 2010, we had cash and cash equivalents of \$49.1 million.

Primarily as a result of the discontinuance of our Brazil melon operations, we paid approximately \$1.8 million in termination benefits in 2010. We expect to make additional payments of approximately \$2.8 million principally related to the previously announced closure of our Hawaii pineapple operations and the under-utilized facility in the United Kingdom. These cash outlays and other expected cash outlays in the range of \$0.5 million to \$2.0 million, as a result of the reduction of planted areas due to plant disease in the Philippines banana operation, will be funded from

operating cash flows and available borrowings under credit facilities.

The principal capital expenditures planned for 2011 consist primarily of the expansion of production facilities in Costa Rica, Guatemala, Chile, Kenya, Jordan and Greece and for our distribution and fresh-cut facilities in Saudi Arabia, North America and the United Kingdom. We expect to fund our capital expenditures in 2011 through operating cash flows and borrowings under our Credit Facilities. We generated cash from operations of \$197.4 million in 2010 and had \$198.5 million available under our Credit Facility as of December 31, 2010.

The fair value of our derivatives decreased from a net asset of \$19.6 million as of January 1, 2010 to a net liability of \$18.6 million as of December 31, 2010, related to our foreign currency and bunker fuel cash flow hedges. For foreign currency hedges, these fluctuations are primarily driven by the strengthening or weakening of the U.S. dollar compared to the euro, British pound and Japanese yen currencies being hedged relative to the contracted exchange rates. For bunker fuel hedges, these fluctuations are driven by the increase or decrease in bunker fuel prices relative to the contracted bunker fuel price. During 2010, we predominately entered into derivative contracts to hedge the British pound, euro and Japanese yen, as well as to hedge bunker fuel prices. The change in 2010 was primarily related to the weakening of the U.S. dollar compared to the Japanese yen relative to the contracted hedge position coupled with the fact that the bunker fuel derivatives fully settled in 2010 of which the settlement resulted in a realized gain of \$3.6 million, which impacted our cost of products sold. We enter into derivative instruments with counterparties that are highly rated and do not expect a deterioration of our counterparty's credit rating; however, the deterioration of our counterparty's credit would affect the Consolidated Financial Statements in the recognition of the fair value of the hedges that would be transferred to earnings as the contracts settle. We expect that net losses of \$9.5 million and \$9.1 million of the fair value of hedges will be transferred to earnings in 2011 and 2012 along with the earnings effect of the hedged forecasted transactions.

Other

We are involved in several legal and environmental matters that, if not resolved in our favor, could require significant cash outlays and could have a material adverse effect on our results of operations, financial condition and liquidity. See Item 1. Business Overview under "Environmental Matters" and Item 3. Legal Proceedings and Note 19, "Litigation" to the Consolidated Financial Statements included in Item 8. Financial Statements and Supplementary Data.

Critical Accounting Policies

We believe the following accounting policies used in the preparation of our Consolidated Financial Statements may involve a high degree of judgment and complexity and could have a material effect on our Consolidated Financial Statements.

Growing Crops

Expenditures on pineapple, melon and non-tropical fruit, including grapes, growing crops are valued at the lower of cost or market and are deferred and charged to cost of products sold when the related crop is harvested and sold. The deferred growing costs consist primarily of land preparation, cultivation, irrigation and fertilization costs. The deferred growing crop calculation is dependent on an estimate of harvest yields and future crop expenditures. If there is an unexpected decrease in estimated harvest yields, a write-down of deferred growing costs may be required. During 2009, we incurred a charge of \$17.1 million in cost of products sold primarily related to growing crop inventory as a result of our decision to discontinue pineapple operations in Brazil, in the other fresh produce segment. During 2010, we incurred a charge of \$3.7 million related to growing crop inventory as a result of our decision to discontinue melon operations in Brazil.

Stock-Based Compensation

Our share-based payments are composed entirely of compensation expense related to stock options and all stock option awards are granted to employees and members of our Board of Directors, each of whom meets the definition of an employee under the provisions of the Accounting Standards Codification™ (the “Codification” or “ASC”) guidance on “Compensation-Stock Compensation”. We use the Black-Scholes option pricing model to estimate the fair value of stock options granted.

Stock-based compensation expense related to stock options for the year ended December 31, 2010, included in the determination of income before provision for income taxes and net income, totaled \$7.5 million on the straight-line, single award basis, or \$0.12 per diluted share, respectively, and are included in the accompanying Consolidated Statements of Income for the year ended December 31, 2010 in selling, general and administrative expenses. We are in a net operating loss carryforward position in the relevant jurisdictions for the years ended 2008, 2009 and 2010, therefore there was no reduction in taxes currently payable or related effect on cash flows as the result of excess tax benefits from stock options exercised in these periods. The amount of cash received from the exercise of stock options was \$2.2 million for the year ended December 31, 2010. As of December 31, 2010, the total remaining unrecognized compensation costs related to non-vested stock options amounted to \$10.5 million, which will be amortized over the weighted-average remaining requisite service period of 1.4 years.

Goodwill and Indefinite-Lived Intangible Assets

We assess goodwill for impairment on an annual basis on the first day of the fourth quarter of each year, or sooner if events indicate such a review is necessary. Based on this valuation, we have determined that there was no impairment of goodwill in 2010, 2009 or 2008. As of December 31, 2010, we were not aware of any items or events that would cause us to further adjust the recorded value of goodwill for impairment. Potential impairment exists if the fair value of a reporting unit to which goodwill has been allocated is less than the carrying value of the reporting unit. The amount of the impairment to recognize, if any, is calculated as the amount by which the carrying value of goodwill exceeds its implied value. Future changes in the estimates used to conduct the impairment review, including revenue projection, market values and changes in the discount rate used, could cause the analysis to indicate that our goodwill is impaired in subsequent periods and result in a write-off of a portion or all of goodwill. The discount rate used is based on independently calculated risks, our capital mix and an estimated market risk premium. The fair value of the prepared food unit’s goodwill and trademarks and the melon and banana reporting units’ goodwill are highly sensitive

to differences between estimated and actual cash flows and changes in the related discount rate used to evaluate the fair value of these assets. If we are unable to recover from poor market conditions related to bananas, the banana reporting unit goodwill may be at risk for impairment in the future. If we are unable to recover from lower melon pricing in North America, the melon reporting unit goodwill may be at risk for impairment in the future. If we are unable to recover from current challenging economic conditions in Europe, the prepared food reporting unit goodwill and trademarks may be at risk for impairment in the future.

The following table highlights the sensitivities of the goodwill and indefinite-lived intangibles at risk as of December 31, 2010 (U.S. dollars in millions):

	Prepared Food Reporting Unit														
	Melon Reporting Unit		Banana Reporting Unit		Goodwill		U.K. Beverage Trademarks		Remaining DEL MONTE® Trademarks						
Carrying Value	\$	3.3	\$	65.2	\$	72.4	\$	5.1	\$	63.6					
Approximate percentage by which the fair value exceeds the carrying value based on annual impairment test as of 1st day of fourth quarter		3	%	8	%	3	%	-	(1)	16	%				
Amount that a one percentage point increase in the discount rate and a 5% decrease in cash flows would cause the carrying value to exceed the fair value and trigger a fair valuation	\$	3.3		\$	55.9		\$	34.4		\$	0.7	(2)	\$	-	(3)

(1) The trademark for beverage products in the United Kingdom was impaired by \$1.4 million during the third quarter of 2010.

(2) Represents additional impairment after applying the sensitivities disclosed above.

(3) As of December 31, 2010, applying the sensitivities disclosed above does not result in the carrying value exceeding the fair value; however, after applying those sensitivities, the fair value exceeds the carrying value by approximately 6%.

As part of the Del Monte Foods acquisition, we acquired perpetual, royalty-free licenses to use the DEL MONTE® brand for processed and/or canned food in more than 100 countries throughout Europe, Africa, the Middle East and countries formerly part of the Soviet Union. Included in other non-current assets at December 31, 2010 is an indefinite-lived intangible asset of \$68.7 million related to these licenses. This indefinite-lived intangible asset is not being amortized but is reviewed for impairment consistent with the Codification guidance on “Intangibles – Goodwill and Other”. In 2010 and 2009, we recorded charges for impairment of the DEL MONTE® royalty-free brand name

license for U.K. beverage products due to lower than expected sales volume and pricing of \$1.4 million and \$2.0 million, respectively. As of December 31, 2010, we are not aware of any items or events that would cause a further adjustment to the carrying value of goodwill.

Impairment of Long-Lived Assets

We account for the impairment of long-lived assets in accordance with the Codification guidance related to “Property, Plant and Equipment”. The Codification guidance requires write-downs to be recorded on long-lived assets used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets’ carrying amount. In 2008, we recorded asset impairment of \$15.7 million primarily as a result of extensive flood damage at our banana farms in Brazil and Costa Rica, the closure of under-utilized distribution centers and the previously announced closure of our beverage production operation in the United Kingdom. During 2009, we recorded asset impairment charges of \$13.3 million due to our decision to discontinue pineapple planting in Brazil, our decision not to use certain property, plant and equipment as originally intended for other crop production and an impairment of an intangible asset for a non-compete agreement as a result of the Caribana acquisition. During 2010, we recorded \$37.3 million in asset impairment charges due to the sale of our investment in a canning operation in South Africa, disease affecting an isolated area of our Philippines banana operation, flood damage to our banana plantation in Guatemala, earthquake damage to our non-tropical fruit operations in Chile and the relocation of a port facility in North America.

In assessing potential impairment, we consider the operating performance and projected undiscounted cash flows of the relevant assets. If the projected cash flows are estimated to be less than the assets’ carrying value, we may have to record additional impairment charges. The fair value of the assets is determined based on discounted future cash flows or independent appraisals from third parties.

Income Taxes

Deferred income taxes are recognized for the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year end, based on enacted tax laws and statutory tax rates applicable to the year in which the differences are expected to affect taxable income. Valuation allowances are established when it is deemed more likely than not that some portion or all of the deferred tax assets will not be realized. Our judgments regarding future profitability may change due to future market conditions and other factors. These changes, if any, may require adjustments to our deferred tax assets.

Contingencies

Estimated losses from contingencies are expensed if it is probable that an asset has been impaired or a liability has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Gain contingencies are not reflected in the financial statements until realized. We use judgment in assessing whether a loss contingency is probable and estimable. Actual results could differ from these estimates.

Environmental Remediation Liabilities

Estimated expenses associated with environmental remediation obligations are accrued when such expenses are probable and can be reasonably estimated. We have recorded provisions for the Kunia Well Site related to the expected environmental remediation. The related liability is based on the Record of Decision, which was issued by the EPA on September 25, 2003. Certain portions of the EPA's estimates have been discounted using a 5% interest rate. Interest expense of \$0.6 million was accrued during 2010. In 2004, we commenced certain remediation and further testing activities. At December 31, 2010 and January 1, 2010, the total liability for the Kunia Well Site was \$19.0 million and \$19.9 million, respectively. We expect to expend approximately \$0.5 million in cash per year for the next five years. The ultimate amount of the cost for the expected environmental remediation of the Kunia Well Site is dependent on the actual cost. Actual remediation costs could significantly differ from our estimates.

Derivative Financial Instruments

We account for derivative financial instruments in accordance with the ASC guidance on "Derivatives and Hedging". The ASC on "Derivatives and Hedging" requires us to recognize the value of derivative instruments as either assets or liabilities in the statement of financial position at fair value. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated as a hedge and qualifies as part of a hedging relationship. The accounting also depends on the type of hedging relationship, whether a cash flow hedge, a fair value hedge, or hedge of a net investment in a foreign operation. A fair value hedge requires that the effective portion of the change in the fair value of a derivative financial instrument be offset against the change in the fair value of the underlying asset, liability, or firm commitment being hedged through earnings. A cash flow hedge requires that the effective portion of the change in the fair value of a derivative instrument be recognized in other comprehensive income, a component of shareholders' equity, and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. The ineffective portion of the change in fair value of a derivative instrument is to be recognized in earnings in the same line in which the hedge transaction affects earnings. The ineffective portion of the change in fair value is immaterial for the year ended December 31, 2010.

We use derivative financial instruments primarily to reduce our exposure to adverse fluctuations in foreign exchange rates and bunker fuel prices. When entered into, we formally designate and document the financial instrument as a hedge of a specific underlying exposure, as well as the risk management objectives and strategies for undertaking the hedge transaction. The fair values of derivatives used to hedge or modify our risks fluctuate over time. These fair value amounts should not be viewed in isolation, but rather in relation to the cash flows or fair value of the underlying hedged transactions or assets and other exposures and to the overall reduction in our risk relating to adverse fluctuations in foreign exchange rates and bunker fuel prices.

We account for the fair value of our derivative financial instruments as either an asset in other current assets or noncurrent assets or a liability in accrued expenses or other noncurrent liabilities. We use an income approach to value our outstanding foreign currency and bunker fuel cash flow hedges. An income approach consists of a discounted cash flow model that takes into account the present value of future cash flows under the terms of the contracts using current market information as of the measurement date such as foreign currency and bunker fuel spot and forward rates. An element of default risk based on observable inputs is also built into the fair value calculation.

Fair Value Measurements

We measure fair value for financial instruments, such as derivatives on an ongoing basis. We measure fair value for non-financial assets, when a valuation is necessary, such as for impairment of long-lived and indefinite-lived assets when indicators of impairment exist. Fair value is measured in accordance with the ASC on "Fair Value Measurements and Disclosures". The ASC on "Fair Value Measurements and Disclosures" defines fair value, establishes a framework for measuring fair value and enhances disclosures about fair value measures required under other accounting

pronouncements, but does not change existing guidance as to whether or not an instrument is carried at fair value. The ASC also requires us to classify fair value measurements based on the weight of observable and unobservable valuation inputs as follows: Level 1: inputs are derived from quoted prices in active markets for identical assets; Level 2: inputs are derived from significant other observable inputs and Level 3: inputs utilized are not observable. We adopted the provisions of "Fair Value Measurements and Disclosures" for financial instruments effective December 29, 2007, the first day of our 2008 fiscal year and for non-financial assets effective December 27, 2008, the first day of our 2009 fiscal year.

During 2010 and 2009, we recognized impairment charges of \$1.4 million and \$2.0 million, respectively, related to the Del Monte indefinite-lived intangible of a perpetual, royalty-free brand name license due to lower than expected sales volumes and pricing in the United Kingdom in the prepared foods segment specifically related to beverage products. An income-based approach was used to value the trademark intangible, which measures the fair value of an intangible asset by capitalizing the royalties saved due to ownership of the intangible asset rather than paying a rent or royalty for the use of the asset. This income-based approach referred to as the royalty savings method utilizes internal unobservable inputs such as a discounted net sales cash flow model with the application of a royalty savings rate assumption corroborated by a mix of internal and market inputs. Due to the use of unobservable inputs, we classify the fair value of this indefinite-lived intangible asset within Level 3 of the fair value hierarchy.

Our trademarks are valued on the basis of prepared products, specifically beverage products produced and sold in the United Kingdom, with a trademark carrying value at December 31, 2010 of \$5.1 million and all other prepared products with a trademark carrying value at December 31, 2010 of \$63.6 million.

During the second quarter of 2010, we entered into an agreement to sell substantially all the assets of our South Africa canning operations. As a result, we recognized a \$16.7 million asset impairment of our investment in South Africa in the prepared food reporting segment. The carrying value of our investment in South Africa was \$24.4 million, including cumulative translation adjustments, and was written down to a fair value of \$7.7 million. We estimated the fair value of the underlying assets by using the market approach. The market approach uses prices and other relevant information generated by market transactions involving comparable assets. We used observable inputs based on market participant information related to the probable sale of South African assets and, as such, we classify the fair value of the investment in South Africa within Level 2 of the fair value hierarchy. We received the regulatory approval for the sale of our South Africa canning operations effective October 11, 2010. On October 12, 2010, the sale of our South Africa canning operations was executed by the receipt of approximately \$1.5 million in cash and \$6.9 million recorded as a financing receivable, which was collected on January 27, 2011.

During the fourth quarter of 2010, we recognized \$12.7 million in impairment charges related to plant disease affecting an isolated growing area in our banana operations in the Philippines that will be abandoned during 2011 in the banana segment. The carrying value of these assets was \$13.5 million and was written down to a fair value of \$0.8 million. We estimated the fair value of these assets using the income based approach considering the cash flows that would be obtained as a result of the production and distribution of bananas over the next few months prior to abandoning the growing areas impacted by disease. The income based approach utilizes unobservable inputs. Due to the use of unobservable inputs, we classify the fair value of these growing areas within Level 3 of the fair value hierarchy.

We recorded \$10.5 million in asset impairment and other charges (credits) resulting from our decision in May 2009 to discontinue pineapple planting in Brazil and our subsequent decision, during the third quarter, to not use certain property, plant and equipment as originally intended for other crop production. The carrying value of these assets was \$17.4 million and was written down to a fair value of \$6.9 million. We estimated the fair value of the underlying assets by using a combination of the market approach and the cost approach. The cost approach is based on the amount that currently would be required to replace the service capacity of the assets. The market approach uses prices and other relevant information generated by market transactions involving comparable assets. We used a combination of observable inputs primarily based on appraisals and unobservable inputs using market participant assumptions to estimate the fair value of the underlying assets. Due to the use unobservable inputs, we classify the fair value of these long-lived assets within Level 3 of the fair value hierarchy.

Recent Developments

We have been involved in litigation regarding a tax position in a foreign jurisdiction affecting the years 2005 and 2006. Subsequent to December 31, 2010, we lost an appeal on the 2005 case. As a result, we will remeasure our tax position during the first quarter of 2011, concluding that it is no longer more likely than not that we will sustain our tax position for both 2005 and 2006. During the first quarter 2011, we expect to settle this liability of approximately \$2.6 million, including interest and penalties, related to the year 2005 and will accrue approximately \$1.6 million including interest and penalties for the 2006 year.

New Accounting Pronouncements

On December 21, 2010, the Financial Accounting Standards Board (“FASB”) issued an Accounting Standards Update (“ASU”) to address the difference in ways entities have interpreted the Accounting Standards Codification (“ASC”) guidance on disclosures about supplementary pro-forma information for business combinations. This ASU will

require pro forma disclosures for revenue and earnings as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period. The ASU also expands the supplemental pro-forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination. This ASU is effective prospectively for business combinations whose acquisition date is at or after January 1, 2011, the beginning of our 2011 fiscal year. This ASU will not have an impact to our Consolidated Financial Statements other than require us to provide increased disclosure.

Trend Information

Our net sales growth in recent years has been achieved primarily through increased sales volume in existing markets of other fresh produce, primarily pineapples and non-tropical fruit, and favorable pricing on our Del Monte Gold® Extra Sweet pineapple combined with increased sales volume and per unit sales prices of bananas in existing and new markets. During 2010, our net sales were positively affected by higher sales volume of bananas and gold pineapples that resulted from our recent acquisitions and production expansion, which were offset principally by lower net sales of melons and other products and services. Our net sales growth in recent years is also attributable to a broadening of our product line with the expansion of our fresh-cut produce business and our expansion into new markets. We expect our net sales growth to continue to be driven by increased sales volumes in our banana, other fresh produce and the prepared food segments. In the Middle East, we expect to continue to increase our net sales of our fresh produce and prepared food product offerings as a result of our expansion in the Saudi Arabian and other regional markets. We also expect to increase our sales by developing new products in the prepared food segment, targeting the convenience store and foodservice trade in selected European and Middle East markets.

Our strategy is focused on a combination of maximizing revenues from our existing infrastructure, entering new markets and strict cost control initiatives. We plan to continue to capitalize on the growing global demand for fresh produce and expand our reach into existing and new markets. We expect sales growth of fresh produce in key markets by increasing sales volume and per unit sales prices as permitted by market conditions. Our 2008 acquisitions substantially increased our production capability of bananas, pineapples and melons and continue to provide the potential over time for further operating efficiencies and synergies. In addition, our number one position in the gold pineapple market has been further strengthened. Our strategy includes increasing volumes from existing production and distribution facilities in order to improve operating efficiencies and reduce per unit costs. We plan additional investments in production facilities in order to expand our product offering in established markets and continue with our recent expansion in growth markets, such as the Middle East, Africa and countries formerly part of the Soviet Union.

In the pineapple, grape and non-tropical fruit markets, we believe that the high degree of capital investment and cultivation expertise required, as well as the longer length of the growing cycle, makes it relatively difficult to enter the market. However, in recent years we have experienced an increase in competition with respect to our Del Monte Gold® Extra Sweet pineapple, which has affected our results. We expect these competitive pressures to continue in 2011.

In the EU, the banana import tariff system that has been in effect since 2006 was modified in 2010. On December 15, 2009, the EU entered into an agreement with certain Latin America banana exporting countries to settle the long running dispute over banana import tariffs. The EU will gradually decrease import tariffs on bananas from Latin America from the current level of €176 per ton to €114 per ton in 2017. The agreement was ratified in 2010 and the largest reduction in the import tariff of €28 per ton became retroactively effective to December 15, 2009. During 2010, there was generally an over-supply situation in the EU banana market which resulted in lower per unit net sales prices. The EU continues to negotiate Free Trade Agreements with Latin American banana-producing countries, and there is a possibility that some form of new EU banana tariff-rate quotas will be reinstated. We cannot predict the impact of further changes to the banana import tariffs or new quotas, on the EU banana market.

Our costs are determined in large part by the prices of fuel and packaging materials, including containerboard, plastic, resin and tin plate. Any significant increase in the cost of these items could also materially and adversely affect our operating results. Other than the cost of our products (including packaging), sea and inland transportation costs represent the largest component of cost of products sold. Fuel prices increased by 17% and containerboard increased slightly in 2007 as compared with 2006. During 2008, fuel prices increased an additional 42% and containerboard increased 11%. And during 2009, fuel prices decreased by 32% and containerboard decreased 24% as compared with 2008. During 2010 fuel prices increased by 25% and containerboard prices increased by 7% as compared with 2009.

increasing cost of product sold by \$30.7 million. We expect the cost of fuel and containerboard to continue to increase in 2011. In addition, we are subject to the volatility of the charter vessel market because approximately 14 of our refrigerated vessels are chartered rather than owned. These charters are for periods of three to 10 years. Charter rates have generally increased during 2007 and 2008 as compared with the relevant prior year, but did not experience any further increase during 2009 and 2010. During 2009, we entered into 10-year agreements to charter four new vessels. Two of these new vessels were put into service during 2009 and the remaining two were delivered during 2010. We believe that our fleet of owned vessels combined with longer-term charters is effective in reducing our ocean freight costs and mitigates our exposure to the volatility of the charter market.

Tabular Disclosure of Contractual Obligations

The following details information with respect to our contractual obligations as of December 31, 2010.

Contractual obligations by period	(U.S. dollars in millions)				
	Total	Less than 1 year	1 - 3 years	3 - 5 years	More than 5 years
Fruit purchase agreements	\$ 1,444.0	\$ 31.5	\$ 988.7	\$ 185.2	\$ 238.6
Purchase obligations	213.0	57.6	140.6	6.5	8.3
Operating leases and charter agreements	426.5	91.2	111.1	75.4	148.8
Capital lease obligations (including interest)	3.6	2.6	1.0	0.0	0.0
Long-term debt	292.2	2.7	289.5	0.0	0.0
Retirement benefits	76.4	7.0	14.9	15.3	39.2
Uncertain tax positions	8.3	0.0	8.3	0.0	0.0
Totals	\$ 2,464.0	\$ 192.6	\$ 1,554.1	\$ 282.4	\$ 434.9

We have agreements to purchase the entire or partial production of certain products of our independent growers in Costa Rica, Guatemala, Ecuador, Cameroon, Colombia, Chile, United States, and the Philippines that meet our quality standards. Total purchases under these agreements amounted to \$722.2 million, \$671.4 million and \$698.9 million for 2010, 2009 and 2008, respectively.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk from changes in currency exchange rates and interest rates, which may adversely affect our results of operations and financial condition. We seek to minimize the risks from these currency exchange rate and interest rate fluctuations through our regular operating and financing activities and, when considered appropriate, through the use of derivative financial instruments. Our policy is to not use financial instruments for trading or other speculative purposes and not to be a party to any leveraged financial instruments.

We manage our currency exchange rate risk by hedging a portion of our overall exposure using derivative financial instruments. We also have procedures to monitor the impact of market risk on the fair value of long-term debt, short-term debt instruments and other financial instruments, considering reasonably possible changes in currency exchange and interest rates.

Exchange Rate Risk

Because we conduct our operations in many areas of the world involving transactions denominated in a variety of currencies, our results of operations as expressed in U.S. dollars may be significantly affected by fluctuations in rates of exchange between currencies. These fluctuations could be significant. Approximately 42% of our net sales and a significant portion of our costs and expenses in 2010 were denominated in currencies other than the dollar. We generally are unable to adjust our non-dollar local currency sales prices to reflect changes in exchange rates between the dollar and the relevant local currency. As a result, changes in exchange rates between the euro, Japanese yen, British pound or other currencies in which we receive sale proceeds and the dollar have a direct impact on our operating results. There is normally a time lag between our sales and collection of the related sales proceeds, exposing us to additional currency exchange rate risk.

To reduce currency exchange rate risk, we generally exchange local currencies for dollars promptly upon receipt. We periodically enter into currency forward contracts as a hedge against a portion of our currency exchange rate exposures; however, we may decide not to enter into these contracts during any particular period. As of December 31, 2010, we had several foreign currency cash flow hedges outstanding. The fair value of these hedges as of that date was a net liability of \$18.6 million.

The results of a hypothetical 10% strengthening in the average value of the dollar during 2010 relative to the other currencies in which a significant portion of our net sales are denominated would have resulted in a decrease in net sales of approximately \$138.0 million for the year ended December 31, 2010. This calculation assumes that each exchange rate would change in the same direction relative to the dollar. Our sensitivity analysis of the effects of changes in currency exchange rates does not factor in a potential change in sales levels or any offsetting gains on currency forward contracts.

Interest Rate Risk

As described in Note 14, "Long-Term Debt and Capital Lease Obligations" to the Consolidated Financial Statements, our indebtedness is both variable and fixed rate.

At December 31, 2010, our variable rate total debt had a carrying value of \$291.0 million. The fair value of the debt approximates the carrying value because the variable rates approximate market rates. A 10% increase in the interest rate for 2010 would have resulted in a negative impact of approximately \$0.6 million on our results of operations for the year ended December 31, 2010.

The above discussion of our procedures to monitor market risk and the estimated changes in fair value resulting from our sensitivity analyses are forward-looking statements of market risk assuming certain adverse market conditions occur.

Actual results in the future may differ materially from these estimated results due to actual developments in the global financial markets. The analysis methods we used to assess and mitigate risk discussed above should not be considered projections of future events or losses.

Management's Annual Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934. The Company's internal control over financial reporting is designed under the supervision of our Chairman and Chief Executive Officer and Senior Vice President and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. Our internal control over financial reporting includes those policies and procedures that:

- (i) Pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) Provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and
- (iii) Provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on the financial statements.

Under the supervision and with the participation of our management, including our Chairman and Chief Executive Officer and Senior Vice President and Chief Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our evaluation under the framework in *Internal Control-Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2010.

The effectiveness of our internal control over financial reporting as of December 31, 2010 has been audited by Ernst & Young LLP, an independent registered public accounting firm, as stated in their report that is included elsewhere herein. That report expresses an unqualified opinion on the effectiveness of our internal control over financial reporting.

Fresh Del Monte Produce Inc.

Report of Independent Registered Public Accounting Firm on Internal Control Over Financial Reporting

The Board of Directors and Shareholders of
Fresh Del Monte Produce Inc.

We have audited Fresh Del Monte Produce Inc. and subsidiaries' internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Fresh Del Monte Produce Inc. and subsidiaries' management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Fresh Del Monte Produce Inc. and subsidiaries maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Fresh Del Monte Produce Inc. and subsidiaries as of December 31, 2010 and January 1, 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2010 of Fresh Del Monte Produce Inc. and subsidiaries, and our report dated March 1, 2011 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
Fresh Del Monte Produce Inc.

We have audited the accompanying consolidated balance sheets of Fresh Del Monte Produce Inc. and subsidiaries as of December 31, 2010 and January 1, 2010, and the related consolidated statements of income, shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2010. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Fresh Del Monte Produce Inc. and subsidiaries at December 31, 2010 and January 1, 2010, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2010, in conformity with U.S. generally accepted accounting principles. Also, in our opinion, the related financial statement schedule, when considered in relation to the basic financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Fresh Del Monte Produce Inc.'s internal control over financial reporting as of December 31, 2010, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 1, 2011 expressed an unqualified opinion thereon.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. General

Reference in this Report to Fresh Del Monte, “we”, “our” and “us” and the “Company” refer to Fresh Del Monte Produce Inc and its subsidiaries, unless the context indicates otherwise.

We were incorporated under the laws of the Cayman Islands on August 29, 1996. Prior to March 31, 2008, we qualified as a “foreign private issuer” for purposes of filing and disclosure requirements under the United States securities laws. As a “foreign private issuer” under the Securities and Exchange Act of 1934, as amended (the “Exchange Act”), we filed our annual report with the United States Securities and Exchange Commission (“SEC”) on Form 20-F. Effective March 31, 2008, we no longer satisfied the definition of a “foreign private issuer” under the Exchange Act and we are now required to file our annual reports on Form 10-K and our quarterly reports on Form 10-Q.

We are engaged primarily in the worldwide production, transportation and marketing of fresh produce. We source our products, which include bananas, pineapples, melons and non-tropical fruit (including grapes, apples, pears, peaches, plums, nectarines, avocados, citrus and kiwis) and tomatoes, primarily from Central America, South America, Africa and the Philippines. We also source products from North America and Europe and distribute our products in North America, Europe, Asia, South America, Africa and the Middle East. Products are sourced from our company-owned farms, through joint venture arrangements and through supply contracts with independent growers. We have the exclusive right to use the DEL MONTE® brand for fresh fruit, fresh vegetables and other fresh and fresh-cut produce and certain other specified products on a royalty-free basis under a worldwide, perpetual license from Del Monte Corporation, an unaffiliated company that owns the DEL MONTE® trademark. Del Monte Corporation and several other unaffiliated companies manufacture, distribute and sell under the DEL MONTE® brand canned or processed fruit, vegetables and other produce, as well as dried fruit, snacks and other products in certain geographic regions.

We are also a producer, marketer and distributor of prepared fruit and vegetables, juices and snacks and we hold a perpetual, royalty-free license to use the DEL MONTE® brand for prepared foods throughout Europe, Africa, the Middle East and countries formerly part of the Soviet Union.

Certain amounts from 2008 and 2009 have been reclassified to conform to the 2010 presentation. Included in the reclassifications is a correction of an immaterial error of classifying gain on sales of property, plant and equipment in other income (expense), net on the Consolidated Statements of Income for 2008. Accordingly, we have reclassified these amounts for 2008 to gain on sales of property, plant and equipment, a component of operating income. We reclassified deferred tax assets and related valuation allowance for 2009 to conform to the current presentation. We also reclassified 2008 and 2009 operating cash flows to conform to the 2010 presentation primarily related to contribution from noncontrolling interest and foreign currency translation adjustment.

We are required to evaluate events occurring after December 31, 2010, our fiscal year end, for recognition and disclosure in the Consolidated Financial Statements for the year ended December 31, 2010. Events are evaluated based on whether they represent information existing as of December 31, 2010, which require recognition in the Consolidated Financial Statements or new events occurring after December 31, 2010, which do not require recognition but require disclosure if the event is significant to the Consolidated Financial Statements. We evaluated events occurring subsequent to December 31, 2010 through the date of issuance of these Consolidated Financial Statements.

2. Summary of Significant Accounting Policies

Principles of Consolidation

Our Consolidated Financial Statements include the accounts of our majority owned subsidiaries, which we control, and consolidated variable interest entities (“VIE”). Our fiscal year end is the last Friday of the calendar year or the first Friday subsequent to the end of the calendar year, whichever is closest to the end of the calendar year. All significant intercompany accounts and transactions have been eliminated in consolidation. One of our subsidiary’s financial statements is provided to us on a three-month lag.

The Accounting Standards CodificationTM (the “Codification” or “ASC”) on “Consolidation” was amended to require classification of noncontrolling interests as a component of consolidated shareholders’ equity and the elimination of “minority interest” accounting in results of operations. Earnings attributable to noncontrolling interests are required to be reported as part of consolidated earnings and not as a separate component of income or expense and are required to be disclosed on the face of our Consolidated Statements of Income. We adopted this additional guidance on December 27, 2008, the first day of our 2009 fiscal year.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Summary of Significant Accounting Policies (continued)

The adoption resulted in the reclassification of \$17.0 million of noncontrolling interests from minority interests to shareholders' equity on the December 26, 2008 Consolidated Balance Sheet and the presentation of a net loss of \$0.5 million and net income of \$0.2 million attributable to the noncontrolling interests in the Consolidated Statements of Income for the year ended December 26, 2008. Prior to the adoption of the additional guidance on noncontrolling interests, income attributable to noncontrolling interests was reported in other income (loss) in the Consolidated Statements of Income.

Use of Estimates

The preparation of our Consolidated Financial Statements in accordance with U.S. generally accepted accounting principles requires us to make estimates and assumptions that affect the amounts reported in our Consolidated Financial Statements and accompanying notes. Actual results could differ from these estimates.

Accounting for Planned Major Maintenance Activities

We account for planned major maintenance activities, such as vessel dry-dock activities, consistent with the ASC guidance related to "Other Assets and Deferred Costs". We utilize the deferral method of accounting for vessel dry-dock activities whereby actual costs incurred are deferred and amortized on a straight-line basis over the period until the next scheduled dry-dock activity.

Cash and Cash Equivalents

We classify as cash equivalents all highly liquid investments with a maturity of three months or less at the time of purchase. Also included in cash and cash equivalents are certificates of deposits for which the aggregate amount are foreign deposits.

Trade Receivables and Concentrations of Credit Risk

Trade receivables less allowances are recognized on our accompanying Consolidated Balance Sheets at net realizable value, which approximates fair value. We perform ongoing credit evaluations of our customers and adjust credit limits based upon payment history and customers' credit worthiness, as determined by our review of their current credit information. We continuously monitor collections and payments from our customers and maintain a provision for estimated credit losses based upon our historical experience, specific customer collection issues that we have identified and reviews of the aging of trade receivables based on contractual terms. We generally do not require collateral on trade accounts receivable. Write-off of accounts receivable is done only when all collection efforts have been exhausted without success. No single customer's receivable balance is considered to be large enough to pose a significant credit risk to us, except trade accounts receivable from one customer, which represents 10% of trade accounts receivable, net of allowance. This customer is current with its payments.

Other Accounts Receivable

Other accounts receivables less allowances are recognized on our accompanying consolidated balance sheets at net realizable value, which approximates fair value. Other accounts receivable includes value-added taxes ("VAT")

receivables, seasonal advances to growers and suppliers, which are usually short-term in nature, and other financing receivables.

Value added taxes are primarily related to purchases by production units and will be refunded by the taxing authorities. As of December 31, 2010 and January 1, 2010, \$14.4 million and \$14.2 million net of allowance of \$3.1 million and \$2.6 million, respectively, of these amounts were classified as current in other accounts receivable and \$32.0 million and \$20.5 million, net of allowance of \$12.9 million and \$16.3 million, respectively, were classified as noncurrent in other noncurrent assets on our Consolidated Balance Sheets.

Advances to growers and suppliers are generally repaid to the company as produce is harvested and sold. The company requires property liens and pledges of the season's produce as collateral to support the advances. Occasionally, the company agrees to a payment plan or takes steps to recover advances through the liens or pledges. Refer to Note 10, "Financing Receivables" for further discussion on advances to growers and suppliers.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Summary of Significant Accounting Policies (continued)

Allowances against VAT and advances to growers and suppliers are established based on the company's knowledge of the financial condition of the paying party and historical loss experience. Allowances are recorded and charged to expense when an account is deemed to be uncollectible. Recoveries of VAT and advances to growers and suppliers previously reserved in the allowance are credited to operating income.

Inventories

Inventories are valued at the lower of cost or market. Cost is computed using the weighted average cost method for finished goods, which includes fresh produce and prepared food and the first-in first-out, actual cost or average cost methods for raw materials and packaging supplies. Raw materials and packaging supplies inventory consists primarily of agricultural supplies, containerboard, packaging materials and spare parts.

Growing Crops

Expenditures on pineapple, melon and non-tropical fruit growing crops are valued at the lower of cost or market and are deferred and charged to cost of products sold when the related crop is harvested and sold. The deferred growing costs included in inventories in our Consolidated Balance Sheets consist primarily of land preparation, cultivation, irrigation and fertilization costs. Expenditures related to banana crops are expensed in the year incurred due to the continuous nature of the crop.

Investments in Unconsolidated Companies

Investments in unconsolidated companies are accounted for under the equity method of accounting for investments of 20% or more in companies over which we do not have control, except for one VIE. See Note 6, "Investments in Unconsolidated Companies" and Note 7, "Variable Interest Entities".

Property, Plant and Equipment and Other Definite-Lived or Long-Lived Assets

Property, plant and equipment are stated at cost. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets, which range from 10 to 40 years for buildings, five to 20 years for ships and containers, three to 20 years for machinery and equipment, three to seven years for furniture, fixtures and office equipment and five to 10 years for automotive equipment. Leasehold improvements are amortized over the term of the lease, or the estimated useful life of the related asset, whichever is shorter. Definite-lived intangibles are amortized over their useful lives with a weighted average amortization period of 17.0 years. Amortization expense related to definite-lived intangible assets totaled \$1.5 million, \$1.8 million, and \$1.4 million for 2010, 2009 and 2008, respectively, and is included in cost of products sold.

When assets are retired or disposed of, the costs and accumulated depreciation or amortization are removed from the respective accounts and any related gain or loss is recognized. Maintenance and repairs are charged to expense as incurred. Significant expenditures, which extend the useful lives of assets, are capitalized. Interest is capitalized as part of the cost of construction.

We review long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If the carrying amount of an asset exceeds the asset's fair value, we measure and record an impairment loss for the excess. An asset's fair value is calculated by either determining the expected future discounted cash flow of the asset or by independent appraisal. For long-lived assets held for sale, we record impairment losses when the carrying amount is greater than the fair value less the cost to sell. We discontinue depreciation of long-lived assets when these assets are classified as held for sale and include the net book value of these assets in prepaid expenses and other current assets. Our long-lived assets are primarily composed of property, plant and equipment and definite-lived intangible assets. See Note 8, "Property, Plant and Equipment" and Note 9, "Goodwill and Other Intangible Assets".

We recorded charges related to impairment of long-lived assets in 2010, 2009 and 2008 of \$35.9 million, \$11.9 million and \$14.7 million, respectively. These charges were net of insurance recoveries in 2010, 2009 and 2008. Such charges are included in asset impairment and other charges, net in the accompanying Consolidated Statements of Income for the years ended December 31, 2010, January 1, 2010 and December 26, 2008 and as described further in Note 4, "Asset Impairment and Other Charges, Net".

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Summary of Significant Accounting Policies (continued)

There are numerous uncertainties and inherent risks in conducting business, such as but not limited to general economic conditions, actions of competitors, ability to manage growth, actions of regulatory authorities, natural disasters such as earthquakes, crop disease, severe weather such as floods, pending investigations and/or litigation, customer demand and risk relating to international operations. Adverse effects from these risks may result in adjustments to the carrying value of our assets and liabilities in the future, including, but not necessarily limited to, long-lived assets.

Goodwill and Indefinite-Lived Intangible Assets

Our goodwill represents the excess of the purchase price of business combinations over the fair value of the net assets acquired. We assess goodwill and indefinite-lived intangible assets for impairment on an annual basis as of the first day of our fourth quarter, or sooner if events indicate such a review is necessary. Potential impairment exists if the fair value of a reporting unit to which goodwill has been allocated, or the fair value of indefinite-lived intangible assets, is less than their respective carrying values. The amount of the impairment to recognize, if any, is calculated as the amount by which the carrying value of goodwill exceeds its implied value or the amount of the carrying value of the intangible asset exceeds its fair value. Future changes in the estimates used to conduct the impairment review, including revenue projections, market values and changes in the discount rate used could cause the analysis to indicate that our goodwill or indefinite-lived intangible assets are impaired in subsequent periods and result in a write-off of a portion or all of goodwill. The discount rate used is based on independently calculated risks, our capital mix and an estimated market premium.

Revenue Recognition

Revenue is recognized on sales of products when the customer agrees to the terms of the sale and receives title to the goods, generally upon delivery and when collectability is reasonably assured. We follow the guidance of the ASC on "Revenue Recognition" with regards to recording revenue gross as a principal versus net as an agent, in its presentation of net sales. This guidance requires us to assess whether we act as a principal in the transaction. Where we are the principal in the transaction and have the risks and rewards of ownership, the transactions are recorded gross in the Consolidated Statements of Income. If we do not act as a principal in the transaction, the transactions are recorded on a net basis in the Consolidated Statements of Income.

Cost of Products Sold

Cost of products sold includes the cost of produce, packaging materials, labor, depreciation, overhead, transportation and other distribution costs, including handling costs incurred to deliver fresh produce or prepared products to customers.

During 2010, we made the decision to cease melon operations in Brazil due to higher than expected costs. As a result, we recorded \$4.9 million in cost of products sold related to the write-off of growing crop and raw materials and packaging supplies inventory. In addition, in 2010, we recorded \$2.0 million, net of \$2.6 million in insurance proceeds, in cost of products sold related to the write-off of inventory and other costs as a result of flood damage to our Guatemala banana farms and \$1.2 million related to the write-off of inventory as a result of damage caused by the

February earthquake in Chile.

During 2009, we made the decision to cease pineapple operations in Brazil due to lower than optimal crop quality and higher than expected costs. As a result, we recorded \$17.2 million in cost of products sold related to the write-off of growing crop inventory. In addition, in 2009, we recorded a credit of \$2.1 million in cost of products sold related to insurance proceeds received as a result of the flood damage experienced during 2008 in our Brazil banana operations, which is included in operating cash flows in our Consolidated Statements of Cash Flows.

During 2008, we experienced extensive flooding in our Brazil banana operation. As a result of the flooding and subsequent decision not to re-plant on certain Brazil banana farms, we recorded \$1.7 million in cost of products sold in relation to idled worker cost, salaries and termination and \$0.4 million of packaging material write-offs and other costs. In addition, in 2008, we recorded \$0.9 million in cost of products sold related to inventory write-offs and other clean up costs as a result of flooding in our Costa Rican banana operation. In 2009, we collected \$0.8 million in insurance proceeds related to the Costa Rica flood.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Summary of Significant Accounting Policies (continued)

Advertising and Promotional Costs

We expense advertising and promotional costs as incurred. Advertising and promotional costs, which are included in selling, general and administrative expenses, were \$20.4 million, \$17.5 million, and \$16.7 million for 2010, 2009 and 2008, respectively.

Debt Issuance Costs

Debt issuance costs relating to long-term debt are amortized over the term of the related debt instrument using the straight-line method as the costs are primarily related to our revolving credit facility and are included in other noncurrent assets. Debt issuance cost amortization, which is included in interest expense, was \$2.3 million, \$3.3 million and \$1.8 million for 2010, 2009 and 2008, respectively. These amounts are included in the amortization of debt issuance costs caption in the Consolidated Statements of Cash Flows.

Income Taxes

Deferred income taxes are recognized for the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year end, based on enacted tax laws and statutory tax rates applicable to the year in which the differences are expected to affect taxable income. Valuation allowances are established when it is deemed more likely than not that some portion or all of the deferred tax assets will not be realized.

We account for income tax uncertainties consistent with the ASC guidance included in "Income Taxes", which clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The ASC also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure and transition.

See Note 13, "Income Taxes".

Environmental Remediation Liabilities

Losses associated with environmental remediation obligations are accrued when such losses are probable and can be reasonably estimated. See Note 19, "Litigation".

Currency Translation

For our operations in countries where the functional currency is other than the U.S. dollar, balance sheet amounts are translated using the exchange rate in effect at the balance sheet date. Income statement amounts are translated monthly using the average exchange rate for the respective month. The gains and losses resulting from the changes in exchange rates from year-to-year and the effect of exchange rate changes on intercompany transactions of long-term investment nature are recorded as a component of accumulated other comprehensive income or loss as currency translation adjustments.

For our operations where the functional currency is the U.S. dollar, non-monetary balance sheet amounts are translated at historical exchange rates. Other balance sheet amounts are translated at the exchange rates in effect at the balance sheet date. Income statement accounts, excluding those items of income and expenses that relate to non-monetary assets and liabilities, are translated at the average exchange rate for the month. These remeasurement adjustments are included in the determination of net income and are included in other income (expense), net.

Other income (expense), net, in the accompanying Consolidated Statements of Income includes a net loss of \$5.3 million and \$6.4 million for 2010 and 2009, respectively, and a net gain of \$6.5 million for 2008 on foreign exchange. These amounts include the effect of foreign currency remeasurement, realized foreign currency transaction gains and losses and changes in the value of foreign currency denominated accounts receivable and accounts payable.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Summary of Significant Accounting Policies (continued)

Other Income (Expense), net

In addition to foreign currency gains and losses described above, other income (expense), net, also consists of equity gains (losses) of unconsolidated companies, and other items of non-operating income and expenses.

Leases

We lease property, plant and equipment for use in our operations. We evaluate the accounting for leases consistent with the provisions of the ASC on “Leases”. We evaluate our leases at inception or at any subsequent modification and classify them as either a capital lease or an operating lease based on lease terms. For operating leases that contain rent escalations, rent holidays or rent concessions, rent expense is recognized on a straight-line basis over the life of the lease.

See Note 18, “Commitments and Contingencies” for more information.

Fair Value Measurements

Fair value is measured in accordance with the ASC on “Fair Value Measurements and Disclosures” that defines fair value, establishes a framework for measuring fair value and enhances disclosures about fair value measures required under other accounting pronouncements, but does not change existing guidance as to whether or not an instrument is carried at fair value. We measure fair value for financial instruments, such as derivatives on an ongoing basis. We measure fair value for non-financial assets, when a valuation is necessary, such as for impairment of long-lived and indefinite-lived assets when indicators of impairment exist. We adopted the provisions of “Fair Value Measurements and Disclosures” for financial instruments effective December 29, 2007, the first day of our 2008 fiscal year and for non-financial assets effective December 27, 2008, the first day of our 2009 fiscal year. We adopted the additional fair value disclosure provisions for our pension assets effective January 1, 2010.

Stock-Based Compensation

We account for stock-based compensation expense consistent with ASC guidance on “Compensation – Stock Compensation”. Our share-based payments are composed entirely of stock-based compensation expense as all equity awards granted to employees and members of our Board of Directors, each of whom meets the definition of an employee under the provisions of the ASC, are stock options or restricted share awards. We use the Black-Scholes option pricing model to estimate the fair value of stock options granted.

See Note 17, “Stock-Based Compensation” for more information.

Derivative Financial Instruments

We account for derivative financial instruments in accordance with the ASC guidance on “Derivatives and Hedging”. The ASC on “Derivatives and Hedging” requires us to recognize the value of derivative instruments as either assets or liabilities in the statement of financial position at fair value. The accounting for changes in the fair value (i.e., gains or losses) of a derivative instrument depends on whether it has been designated as a hedge and qualifies as

part of a hedging relationship. The accounting also depends on the type of hedging relationship, whether a cash flow hedge, a fair value hedge, or hedge of a net investment in a foreign operation. A fair value hedge requires that the effective portion of the change in the fair value of a derivative financial instrument be offset against the change in the fair value of the underlying asset, liability, or firm commitment being hedged through earnings. A cash flow hedge requires that the effective portion of the change in the fair value of a derivative instrument be recognized in other comprehensive income, a component of shareholders' equity, and reclassified into earnings in the same period or periods during which the hedged transaction affects earnings. The ineffective portion of the change in fair value of a derivative instrument is to be recognized in earnings in the same line in which the hedge transaction affects earnings.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

2. Summary of Significant Accounting Policies (continued)

We use derivative financial instruments primarily to reduce our exposure to adverse fluctuations in foreign exchange rates and bunker fuel prices. When entered into, we formally designate and document the financial instrument as a hedge of a specific underlying exposure, as well as the risk management objectives and strategies for undertaking the hedge transaction. Derivatives are recorded in the Consolidated Balance Sheets at fair value in prepaid expenses and other current assets, other noncurrent assets, accounts payable and accrued expenses or other noncurrent liabilities, depending on whether the amount is an asset or liability and is of a short-term or long-term nature. Derivatives are recorded in the Consolidated Statements of Cash Flows in net cash provided by operating activities in prepaid expenses and other current assets, accounts payable and accrued expenses or other noncurrent assets and liabilities, depending on the classification in the Consolidated Balance Sheets. The fair values of derivatives used to hedge or modify our risks fluctuate over time. These fair value amounts should not be viewed in isolation, but rather in relation to the cash flows or fair value of the underlying hedged transactions or assets and other exposures and to the overall reduction in our risk relating to adverse fluctuations in foreign exchange rates and bunker fuel prices.

See Note 20, “Derivative Financial Instruments” for more information.

Retirement and Other Employee Benefits

Using appropriate actuarial methods and assumptions, we account for defined benefit pension plans in accordance with ASC guidance on “Compensation – Retirement Benefits”.

Effective December 26, 2008, we adopted the measurement date provisions of the ASC, which required us to measure defined benefit pension plans and other post-retirement benefit plans as of the date of our fiscal year end. We elected to adopt the change in measurement date using the alternative method. The alternative method requires only one actuarial valuation during the transition period. The valuation provides a projection of net periodic benefit cost for a 13-month period that resulted in an immaterial impact to retained earnings in the fourth quarter of 2008. See Note 16, “Retirement and Other Employee Benefits” for more information.

Effective on January 1, 2010, we adopted new ASC guidance included in “Compensation – Retirement Benefits”, which amends existing guidance, to require more detailed disclosures about our plan assets, including investment strategies, major categories of plan assets, concentrations of risk within plan assets, and valuation techniques used to measure the fair value of plan assets consistent with the fair value hierarchy model described in the ASC on “Fair Value Measurements and Disclosures”, as described in Note 21, “Fair Value Measurements”.

New Accounting Pronouncement

On December 21, 2010, the Financial Accounting Standards Board (“FASB”) issued an Accounting Standards Update (“ASU”) to address the difference in ways entities have interpreted the Accounting Standards Codification (“ASC”) guidance on disclosures about supplementary pro-forma information for business combinations. This ASU will require pro forma disclosures for revenue and earnings as though the business combination(s) that occurred during the current year had occurred as of the beginning of the comparable prior annual reporting period. The ASU also expands the supplemental pro-forma disclosures to include a description of the nature and amount of material, nonrecurring pro forma adjustments directly attributable to the business combination. This ASU is effective prospectively for business combinations whose acquisition date is at or after January 1, 2011, the beginning of our 2011 fiscal year. This ASU

will not have an impact to our Consolidated Financial Statements other than require us to provide increased disclosure.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

3. Acquisitions

Caribana acquisition

On June 6, 2008, we completed the acquisition for 100% of the shares of Desarrollo Agroindustrial de Frutales, S.A., a producer of high-quality bananas in Costa Rica; Frutas de Exportacion, S.A., a major provider of gold pineapples in Costa Rica; and an affiliated sales and marketing company, collectively known as “Caribana”, for a purchase price of \$405.9 million, which includes \$2.9 million in acquisition-related expenses. The acquisition was funded with \$88.5 million in cash on hand and drawings under the Credit Facility (as defined in Note 14, “Long-Term Debt and Capital Lease Obligations”).

As a result of the acquisition, our land holdings in Costa Rica increased by approximately 13,000 hectares of quality farm land. In addition to farm land, we acquired plantations and farming and packing infrastructure for the production of bananas and pineapples. This acquisition was accounted for as a purchase of a business under the ASC guidance on “Business Combinations”.

The following is an unaudited condensed balance sheet of Caribana at June 6, 2008, based on the assessment of fair value, and including the major captions of assets acquired (U.S. dollars in millions):

Cash acquired	\$ 1.6
Property, Plant and Equipment	232.7
Other assets, net	2.7
Inventories	20.8
Non-compete agreements (intangibles)	10.3
Current and deferred taxes	(26.7)
Estimated fair market value of net assets acquired	241.4
Purchase price	405.9
Goodwill	\$ 164.5

An increase in property, plant and equipment of \$57.2 million and an increase in current and deferred tax liabilities of \$26.4 million with a corresponding net decrease in goodwill were included in the purchase price allocation based on valuations concluded when compared to the preliminary values disclosed during the second quarter of 2008. The non-compete agreements obtained as part of the Caribana acquisition are being amortized over a period of 10 years. Goodwill represents the excess purchase price above the fair market value of the net assets acquired. Based on the purchase price allocation, \$143.0 million and \$21.5 million in goodwill was allocated to the other fresh produce and banana segments, respectively, none of which is tax deductible.

We have included the operations of Caribana in our Consolidated Statements of Income beginning with the June 6, 2008 acquisition date.

The following unaudited pro-forma information presents a summary of our consolidated results of operations as if the Caribana acquisition had occurred as of December 29, 2007, the first day of our 2008 fiscal year (U.S. dollars in millions):

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

	Quarter ended December 26, 2008	Year ended December 26, 2008
Net sales	\$ 831.0	\$ 3,605.4
Net income	\$ 22.9	\$ 164.6
Net income per ordinary share:		
Basic	\$ 0.36	\$ 2.60
Diluted	\$ 0.36	\$ 2.59
Weighted average number of ordinary shares:		
Basic	63,540,689	63,344,941
Diluted	63,602,862	63,607,786

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

3. Acquisitions (continued)

Other acquisitions and asset purchases

On June 27, 2008, we acquired certain assets, excluding land, of Melones de Costa Rica, S.A. (“MCR”) for a purchase price of \$8.0 million. MCR is a 50% owned unconsolidated subsidiary that produced melons for us in Costa Rica. MCR will continue to own the land which will be leased to us on a long-term basis.

During the third quarter of 2008, we completed the acquisitions of two melon operations in Guatemala. The purchase price was \$13.9 million of which \$13.9 million was paid using operating cash flows and available borrowings under the Credit Facility.. During the fourth quarter of 2008, goodwill decreased by \$1.6 million primarily due to the completion of the appraisal of fixed assets, which resulted in an increase to property, plant & equipment of \$2.0 million and an increase to deferred tax liabilities of \$0.6 million. The following is an unaudited condensed balance sheet as of the acquisition date, based on the assessment of fair value including the major captions of assets acquired (U.S. dollars in millions):

Property, Plant and Equipment	\$9.8
Inventories	1.8
Deferred Taxes	(0.6)
Estimated fair market value of net assets acquired	11.0
Purchase price	13.9
Goodwill	\$2.9

Goodwill represents the excess purchase price above the fair market value of the net assets acquired. Based on the purchase price allocation, \$2.9 million in goodwill was allocated to the other fresh produce segment, which is tax deductible. The acquisition of the two melon operations in Guatemala were accounted for as a purchase of a business under the ASC on “Business Combinations”.

See Note 9, “Goodwill and Other Intangible Assets” for further information.

4. Asset Impairment and Other Charges, Net

We recorded asset impairment and other charges, net totaling \$37.3 million, \$8.0 million and \$18.4 million for the years 2010, 2009 and 2008, respectively, which were the result of exit activities and asset impairments.

The following represents a summary of asset impairment and other charges, net for the years ended 2010, 2009 and 2008 (U.S. dollars in millions):

	Decemer 31, 2010	Year ended January 1, 2010	December 26, 2008
Charges related to asset impairments, net	\$ 19.0	\$ 1.4	\$ 11.6
Asset impairment and other charges related to exit	18.3	6.6	6.8

4. Asset Impairment and Other Charges, Net (continued)

The following represents the detail of asset impairment and exit activity charges (credits), net for the year ended December 31, 2010 by reporting segment and geographic region (U.S. dollars in millions):

	North America	Banana Segment Central America	South America	Asia	Other Fresh Produce Segment South America	Prepared Foods Segment Europe	Africa	Totals
Impairment of long-lived and other assets	\$ 0.7	\$ 3.7	\$ (0.4)	\$ 12.7	\$ 1.1	\$ 1.4	\$ 16.7	\$ 35.9
Total asset impairment charges (credits)	0.7	3.7	(0.4)	12.7	1.1	1.4	16.7	35.9
One-time termination benefits, contract termination costs and other exit activity charges	-	-	-	-	1.3	-	0.1	1.4
Total asset impairment and other charges (credits), net	\$ 0.7	\$ 3.7	\$ (0.4)	\$ 12.7	\$ 2.4	\$ 1.4	\$ 16.8	\$ 37.3

Asset impairment and other charges (credits), net of \$37.3 million for the year ended December 31, 2010 related to the following:

\$16.7 million impairment of our investment in South Africa and \$0.1 million in other charges as a result of entering into an agreement to sell substantially all of the assets of our South Africa canning operations in the prepared food segment.

\$12.7 million in impairment charges related to plant disease affecting an isolated growing area in an isolated area of our banana operations in the Philippines that will be abandoned during the first quarter of 2011 in the banana segment.

\$6.1 million in impairment charges and \$(2.4) million of insurance reimbursements as a result of flood damage to our Guatemala banana plantation in the banana segment.

\$1.4 million impairment of the DEL MONTE® perpetual, royalty-free brand name license due to lower than expected sales volume and pricing for beverage products in the United Kingdom related to the prepared food segment.

\$1.1 million impairment related to damage caused by the February earthquake in Chile in the other fresh produce segment.

\$1.3 million in termination benefits due to the discontinuation of the melon growing operations in Brazil in the other fresh produce segment.

\$0.7 million impairment as a result of the relocation of a port facility in North America in the banana segment.

\$(0.4) million of insurance reimbursements related to the 2008 flood damage in our Brazil banana plantations in the banana segment.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

4. Asset Impairment and Other Charges, Net (continued)

The following represents the detail of asset impairment and exit activity charges (credits), net for the year ended January 1, 2010 by reporting segment and geographic region (U.S. dollars in millions):

	Banana Segment		Other Fresh Produce Segment		Prepared Foods Segment	Other Products & Services	Totals	
	Europe	Central America	South America	North America	South America	Europe	Europe	
Impairment of long-lived and other assets	\$ -	\$ 2.8	\$ (3.4)	\$ -	\$ 10.5	\$ 2.0	\$ -	\$ 11.9
Total asset impairment charges (credits)	-	2.8	(3.4)	-	10.5	2.0	-	11.9
One-time termination benefits, contract termination costs and other exit activity charges (credits)	(0.8)	-	-	(4.7)	0.4	-	1.2	(3.9)
Total asset impairment and other charges (credits), net	\$ (0.8)	\$ 2.8	\$ (3.4)	\$ (4.7)	\$ 10.9	\$ 2.0	\$ 1.2	\$ 8.0

Asset impairment and other charges (credits), net of \$8.0 million for the year ended January 1, 2010 related to the following:

\$10.9 million asset impairment and other charges as a result of our decision to discontinue pineapple planting in Brazil and our decision to not use certain property, plant and equipment as originally intended for other crop production related to the other fresh produce segment.

\$1.2 million in one-time termination benefits and contract termination costs resulting from our decision to discontinue our commercial cargo service in Europe related to the other products and services segment.

\$2.0 million impairment of the DEL MONTE® perpetual, royalty-free brand name license due to lower than expected sales volume and pricing for beverage products in the United Kingdom related to the prepared food segment.

\$2.8 million impairment charge related to an intangible asset for a non-compete agreement as a result of the Caribana acquisition related to the banana segment.

\$(0.8) million in reversals of contract termination costs previously recorded related to the closure of an under-utilized distribution center in the United Kingdom related to the banana segment.

\$(4.7) million principally due to a gain from the discontinuance of the retiree medical plan and the reversal of certain contract termination costs related to the previously announced closing of our Hawaii pineapple operations related to the other fresh produce segment.

\$(3.4) million gain due to insurance recoveries related to the 2008 Brazil floods related to the banana segment.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

4. Asset Impairment and Other Charges, Net (continued)

The following represents the detail of asset impairment and exit activity charges (credits), net for the year ended December 26, 2008 by reporting segment and geographic region (U.S. dollars in millions):

	Europe	Banana Segment Central America	South America	Other Fresh Produce Segment North America	Prepared Foods Segment Europe	Totals
Impairment of long-lived and other assets	\$ 3.1	\$ 2.8	\$ 8.5	\$ 0.3	\$ -	\$ 14.7
Total asset impairment charges	3.1	2.8	8.5	0.3	-	14.7
One-time termination benefits, contract termination costs and other exit activity charges (credits)	4.7	-	-	(2.9)	1.9	3.7
Total asset impairment and other charges (credits), net	\$ 7.8	\$ 2.8	\$ 8.5	\$ (2.6)	\$ 1.9	\$ 18.4

Asset impairment and other charges (credits), net of \$18.4 million for the year ended December 26, 2008 related to the following:

\$11.3 million in asset impairment charges, net of an insurance reimbursement, as a result of extensive flood damage at our banana farms in Brazil and Costa Rica related to the banana segment.

\$10.0 million in asset impairment and contract termination costs principally due to the closure of under-utilized distribution centers and the previously announced closure of our beverage production operation in the United Kingdom related to the banana and prepared food segments.

\$(2.9) million net gain primarily due to unrecognized prior service costs as a result of the previously announced closing of our Hawaii pineapple operations related to the other fresh produce segment.

The following represents the roll forward of exit activity and other reserves for the year ended December 31, 2010 (U.S. dollars in millions):

Cash Paid

	Exit activity and other reserve balance at January 1, 2010	Impact to Earnings	Exit activity and other reserve balance at December 31, 2010
One-time termination benefits	\$ 1.7	\$ 1.4	\$ (1.8) 1.3
Contract termination and other exit activity charges	1.4	0.1	- 1.5
	\$ 3.1	\$ 1.5	\$ (1.8) \$ 2.8

Included in the exit activity reserve balance at December 31, 2010 are \$1.5 million in contract termination costs related to the closure of an under-utilized distribution center in the United Kingdom in the banana segment and \$1.3 million in termination benefits primarily related to the previously announced decision to exit Hawaiian production operations in the other fresh produce segment. As a result of our decision to abandon certain isolated areas in the Philippines in the banana segment due to plant disease, we expect to incur other charges within a range of \$0.5 million to \$2.0 million in 2011. We do not expect additional charges related to the exit and other activities mentioned above that would significantly impact our results of operations and financial condition.

Exit activity and other reserves are recorded in the Consolidated Balance Sheets in accounts payable and accrued expenses, for the current portion and other noncurrent liabilities for the noncurrent portion.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Inventories

Inventories consisted of the following (U.S. dollars in millions):

	December 31, 2010	January 1, 2010
Finished goods	\$ 138.8	\$ 178.0
Raw materials and packaging supplies	134.1	120.5
Growing crops	137.5	138.4
Total inventories	\$ 410.4	\$ 436.9

6. Investments in Unconsolidated Companies

Investments in unconsolidated companies accounted for under the equity method amounted to \$2.9 million and \$7.9 million at December 31, 2010 and January 1, 2010, respectively.

Investments in unconsolidated companies accounted for under the equity method and cost method consisted of the following at December 31, 2010:

Company	Business	Ownership Interest
Melones De Costa Rica, S.A.	Melon production	50%
Hacienda Filadelfia, S.A.	Melon production	50%
Frutas de Parrita, S.A.	Melon production	50%
Texas Specialty Produce Investors, LLC, Texas	Supplier of specialty produce and herbs	50%
Cartorama S.A.	Carton box corrugators	10%

Purchases from unconsolidated companies were \$10.6 million, \$42.8 million and \$43.4 million for 2010, 2009 and 2008, respectively. At December 31, 2010 and January 1, 2010 there were \$0.7 million and \$4.4 million, respectively, of payables to unconsolidated companies. Our portion of income (losses) in unconsolidated companies amounted to \$(0.8) million, \$0.9 million and \$(2.6) million in 2010, 2009 and 2008, respectively, and is included in other income (expense), net. We received \$4.2 million as a return of capital from an unconsolidated investment during 2010. There were no dividends received from unconsolidated subsidiaries in 2010, 2009 and 2008.

7. Variable Interest Entities

Effective January 2, 2010, we adopted the ASU issued by the FASB on December 23, 2009, which codifies Statement of Financial Accounting Standard No. 167, "Amendments to FASB Interpretation No. 46(R)" and amends the consolidation guidance that applies to Variable Interest Entities ("VIEs"). The ASU amends many important provisions of the existing Accounting Standards Codification ("ASC") guidance on "Consolidation". This amended consolidation guidance for VIEs replaces the existing quantitative approach for identifying which enterprise should consolidate a VIE, which was based on which enterprise is exposed to a majority of the risks and rewards, with a qualitative approach, based on which enterprise has both (1) the power to direct the economically significant activities of the entity and (2) the obligation to absorb losses of, or the right to receive benefits from, the entity that could potentially

be significant to the VIE. Determinations about whether an enterprise should consolidate a VIE are required to be evaluated continuously as changes to existing relationships or future transactions may result in a consolidation or deconsolidation of VIEs. The adoption of the ASU did not have an impact on our Consolidated Financial Statements other than to require additional disclosures.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Variable Interest Entities (continued)

One of our Del Monte Gold® Extra Sweet pineapple producers meets the definition of a VIE pursuant to the ASC guidance on “Consolidation” and is consolidated. Our variable interest in this entity includes an equity investment and certain debt guarantees. All of this entity’s pineapple production is sold to us. Based on the criteria of this ASC, as amended by this ASU, we are the primary beneficiary of this entity’s expected residual returns or losses in excess of our ownership interest. Although we are the primary beneficiary, the VIE’s creditors do not have recourse against our general credit. At December 31, 2010, the VIE had total assets of \$43.0 million and total liabilities of \$11.2 million. The VIE had long-term debt of \$5.9 million, which is collateralized by its property, plant and equipment and further guaranteed by a \$1.0 million standby letter of credit issued by us. As of December 31, 2010, the VIE is current on the guaranteed long-term debt. There are no other restrictions on the assets of the VIE.

We have provided funding for capital investments in the VIE in proportion to our voting interest. We may from time to time in the future provide additional funding for capital investments in the VIE.

8. Property, Plant and Equipment, Net

Property, plant and equipment consisted of the following (U.S. dollars in millions):

	December 31, 2010	January 1, 2010
Land and land improvements	\$ 495.7	\$ 506.3
Buildings and leasehold improvements	413.0	377.2
Machinery and equipment	405.1	386.3
Maritime equipment (including containers)	204.2	221.5
Furniture, fixtures and office equipment	98.2	99.3
Automotive equipment	44.8	44.5
Construction-in-progress	39.8	78.2
	1,700.8	1,713.3
Less: accumulated depreciation and amortization	(667.7)	(644.8)
Property, plant and equipment, net	\$ 1,033.1	\$ 1,068.5

Depreciation and amortization expense on property, plant and equipment, including assets under capital leases, amounted to \$77.2 million, \$81.8 million and \$82.0 million for 2010, 2009 and 2008, respectively.

Containers, machinery and equipment and automotive equipment under capital leases totaled \$17.2 million and \$17.4 million at December 31, 2010 and January 1, 2010, respectively. Accumulated amortization for assets under capital leases was \$8.3 million and \$6.6 million at December 31, 2010 and January 1, 2010, respectively.

For the years 2010, 2009 and 2008, the gain on sales of property, plant and equipment included gains of \$9.2 million, \$11.2 million and \$7.5 million, respectively. Included in the \$9.2 million are gains primarily related to the sale of four refrigerated vessels in the banana segment and properties in South America primarily in the other fresh produce segment. In 2009, the gain on sales of property, plant and equipment of \$11.2 million are primarily related to the sale of five refrigerated vessels in the banana segment and properties in South America in the other fresh produce segment and Africa in the prepared food segment. In 2008, the gain on sales of property, plant and equipment of \$7.5 million

resulted primarily from the sale of land and equipment in South America primarily in the other fresh produce segment.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Goodwill and Other Intangible Assets

The following table reflects our indefinite-lived intangible assets, including goodwill and our definite-lived intangible assets along with related accumulated amortization by major category (U.S. dollars in millions):

	December 31, 2010	January 1, 2010
Goodwill	\$ 406.4	\$ 409.0
Indefinite-lived intangible assets:		
Trademarks	68.7	70.3
Definite-lived intangible assets:		
Definite-lived intangible assets	12.7	12.7
Accumulated amortization	(5.3)	(3.8)
Definite-lived intangible assets, net	7.4	8.9
Goodwill and other intangible assets, net	\$ 482.5	\$ 488.2

Indefinite-lived and definite-lived intangible assets are included in other noncurrent assets in the Consolidated Balance Sheets.

The following table reflects the changes in the carrying amount of goodwill by operating segment (U.S. dollars in millions):

	Bananas	Other fresh produce	Prepared food	Totals
Goodwill	\$ 64.3	\$ 284.5	\$ 71.0	\$ 419.8
Accumulated impairment losses	-	(18.7)	-	(18.7)
Balance as of December 26, 2008	\$ 64.3	\$ 265.8	\$ 71.0	\$ 401.1
Adjustment resulting from the subsequent recognition of deferred taxes	1.0	-	-	1.0
Foreign exchange and other	0.1	0.5	6.3	6.9
Goodwill	\$ 65.4	\$ 285.0	\$ 77.3	\$ 427.7
Accumulated impairment losses	-	(18.7)	-	(18.7)
Balance as of January 1, 2010	\$ 65.4	\$ 266.3	\$ 77.3	\$ 409.0
Adjustment resulting from the subsequent recognition of deferred taxes	-	-	-	-
Foreign exchange and other	(0.1)	(0.2)	(2.3)	(2.60)
Goodwill	\$ 65.3	\$ 284.8	\$ 75.0	\$ 425.1
Accumulated impairment losses	-	(18.7)	-	(18.7)

Balance as of December 31, 2010	\$ 65.3	\$ 266.1	\$ 75.0	\$ 406.4

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Goodwill and Other Intangible Assets (continued)

Results of Impairment Tests

In accordance with the ASC guidance on “Goodwill and Other Intangible Assets”, we review goodwill for impairment on an annual basis or earlier if indicators of impairment arise. Based on the valuation of goodwill performed as of the first day of our fourth quarter in 2010 and 2009, the fair value of goodwill exceeded its carrying value and thus there was no impairment to be recorded. As of December 31, 2010, we are not aware of any items or events that would cause a further adjustment to the carrying value of goodwill.

As a result of lower than expected sales volume and pricing in the United Kingdom, we recorded an impairment charge of \$1.4 million and \$2.0 million during third quarter of 2010 and the first quarter of 2009, respectively, related to the DEL MONTE® indefinite-lived perpetual, royalty-free brand name license for U.K. beverage products. Based on the valuation of the trademarks performed as of the first day of our fourth quarter, the fair value of the trademarks exceeded their carrying value and thus there was no impairment to be recorded. As of December 31, 2010, we are not aware of any items or events that would cause a further adjustment to the carrying value of the trademarks

The fair value of the prepared food unit’s goodwill and trademarks and the banana and melon reporting units’ goodwill are highly sensitive to differences between estimated and actual cash flows and changes in the related discount rate used to evaluate the fair value of these assets. The following table highlights the sensitivities of the goodwill and indefinite-lived intangibles at risk as of December 31, 2010 (U.S. dollars in millions):

	Prepared Food Reporting Unit				
	Melon Reporting Unit Goodwill	Banana Reporting Unit Goodwill	U.K. Beverage Trademarks	Remaining DEL MONTE® Trademarks	
Carrying Value	\$ 3.3	\$ 65.2	\$ 72.4	\$ 5.1	\$ 63.6
Approximate percentage by which the fair value exceeds the carrying value based on annual impairment test as of 1st day of fourth quarter	3 %	8 %	3 %	-	(1) 16 %
Amount that a one percentage point increase in the discount rate and a 5% decrease in cash	\$ 3.3	\$ 55.9	\$ 34.4	\$ 0.7	(2) \$ - (3)

flows would cause the carrying value to exceed the fair value and trigger a fair valuation

(1) The trademark for beverage products in the United Kingdom was impaired by \$1.4 million during the third quarter of 2010.

(2) Represents additional impairment after applying the sensitivities disclosed above.

(3) As of December 31, 2010, applying the sensitivities disclosed above does not result in the carrying value exceeding the fair value; however, after applying those sensitivities, the fair value exceeds the carrying value by approximately 6%.

See Note 4, "Asset Impairment and Other Charges, Net" for further discussion related to impairments of intangible assets occurring during 2010 and 2009.

Impact to Goodwill and Intangibles as a result of Acquisitions

On June 6, 2008, we completed the acquisition of Caribana. As a result of the purchase price allocation finalized during the first quarter of 2009, \$143.0 million and \$21.5 million in goodwill was allocated to the other fresh produce and banana segments, respectively. Non-compete agreements with a fair value of \$10.3 million were obtained as part of the Caribana acquisition and are being amortized over a period of 10 years. For the year ended January 1, 2010, we recorded \$1.0 million in amortization expense related to the non-compete agreement intangible asset. Due to the untimely death of the holder of one of the non-compete agreements related to the Caribana acquisition, we impaired \$2.8 million in intangible assets in the banana segment during 2009.

During the third quarter of 2008, we completed the acquisitions of two melon operations in Guatemala. As a result of the purchase price allocation finalized during the fourth quarter of 2008, \$2.9 million in goodwill was allocated to the other fresh produce segment.

See Note 3, "Acquisitions" for further information regarding the acquisitions described above.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Goodwill and Other Intangible Assets (continued)

The estimated amortization expense related to definite-lived intangible assets for the five succeeding years is as follows (U.S. dollars in millions):

2011	\$ 1.5
2012	0.8
2013	0.8
2014	0.8
2015	0.8

10. Financing Receivables

In July 2010, the FASB issued an ASU relating to improving disclosure on the credit quality of financing receivables and allowances for credit losses and requires expanded disclosures on the balance of financing receivables, aging of those receivables and related allowance for doubtful accounts information at a disaggregated level. The ASU also requires roll-forward of the allowance for doubtful accounts related to financing receivables. Financing receivables are defined as a contractual right to receive money, on demand or on fixed or determinable dates and is recognized as an asset in the creditor's balance sheet. The guidance in this ASU is effective for our fiscal year ended December 31, 2010, although disclosure of reporting period activity such as roll-forwards of the related allowance for doubtful accounts are not required until the first quarter 2011 quarterly financial statements. This ASU will not have an impact to our Consolidated Financial Statements other than require us to provide increased disclosures.

We source our products from various independent growers primarily in Central and South America, Africa and the Philippines. We also source products from North America and Europe. A significant portion of the fresh produce we sell is acquired through supply contracts with independent growers. In order to ensure the consistent high quality of our products and packaging, we make advances to independent growers and suppliers. These growers and suppliers typically sell all of their production to us and make payments on their advances as a deduction to the agreed upon selling price of the fruit or packaging material. The majority of the advances to growers and suppliers are for terms less than one year and typically span a growing season. In certain cases, there may be longer term advances with terms of up to 10 years.

These advances are collateralized by property liens and pledges of the season's produce; however certain factors such as the impact of weather (i.e. flooding) and crop disease may impact the ability for these growers to repay their advance. Occasionally, we agree to a payment plan or take steps to recover the advance via established collateral. Reserves for uncollectible advances are determined on a case by case basis depending on the production for the season and other contributing factors.

We also from time to time enter into notes receivables primarily related to asset sales. The majority of our notes receivables have terms that are less than one year.

The following table details the advances to growers along with the related allowance for doubtful accounts (U.S. dollars in millions):

December 31,

January 1,

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

	2010		2010	
	Current	Noncurrent	Current	Noncurrent
Gross advances to growers	\$ 34.2	\$ 0.5	\$ 35.6	\$ 0.5
Allowance for advances to growers	(3.8)	(0.2)	(4.0)	(0.2)
Net advances to growers	\$ 30.4	\$ 0.3	\$ 31.6	\$ 0.3
Gross notes receivable	\$ 8.2	\$ 1.0	\$ 7.8	\$ 1.8
Allowance for notes receivable	(0.6)	-	-	-
Net allowance for notes receivable	\$ 7.6 (a)	\$ 1.0	\$ 7.8 (b)	\$ 1.8

(a) \$6.9 million of notes receivable, net of allowance of \$0.6 million, relates to the sale of the assets of our South Africa canning operation and was paid in January 2011.

(b) \$7.1 million of notes receivable relates to the sale of land and equipment in South America and was paid during 2010.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

10. Financing Receivables (continued)

The current and noncurrent portions of the financing receivables included above are classified in the Consolidated Balance Sheets in other accounts receivable and other noncurrent assets, respectively.

The following table details the credit risk profile of the above listed financing receivables (U.S. dollars in millions):

	Current Status	Fully Reserved	Total
Gross advances to growers:			
December 31, 2010	\$ 30.7	\$ 4.0	\$ 34.7
January 1, 2010	31.7	4.4	36.1
Gross notes receivable:			
December 31, 2010	9.2	-	9.2
January 1, 2010	9.6	-	9.6

11. Accumulated Other Comprehensive Income (Loss)

Accumulated other comprehensive income (loss) consisted of the following (U.S. dollars in millions):

	Unrealized Gain (Loss) on Derivatives	Currency Translation Adjustment	Retirement Benefit Adjustment, Net of Tax	Total
Balance at December 28, 2007	\$ (6.3)	\$ 26.7	\$ 18.9	\$ 39.3
Current year net change in other comprehensive income (loss)	13.4	(51.6)	(19.2)	(57.4)
Balance at December 26, 2008	7.1	(24.9)	(0.3)	(18.1)
Current year net change in other comprehensive income (loss)	13.4	20.5	(13.0)	20.9
Balance at January 1, 2010	20.5	(4.4)	(13.3)	2.8
Current year net change in other comprehensive income (loss)	(39.1)	10.0	2.2	(26.9)
Balance at December 31, 2010	\$ (18.6)	\$ 5.6	\$ (11.1)	\$ (24.1)

Fluctuations in unrealized gains (losses) on derivatives are primarily driven by the strengthening or weakening of the U.S. dollar compared to the euro, British pound and Japanese yen currencies being hedged relative to the contracted exchange rates. In each of the years 2010, 2009 and 2008, we predominately entered into derivative contracts to hedge the British pound, euro and Japanese yen. In 2010 and 2009, we also entered into bunker fuel hedges. Fluctuations in bunker fuel hedges are driven by the increase or decrease in bunker fuel prices relative to the contracted bunker fuel price.

In 2010, the net unrealized loss on derivatives related primarily to the strengthening of the Japanese yen compared to the U.S. dollar partially offset by the strengthening of the U.S. dollar compared to the British pound and euro relative to the contracted hedge position. In 2010, the bunker fuel hedges settled, resulting in a realized gain of \$3.6 million

which impacted our cost of products sold mainly as a result of increasing fuel prices relative to the contracted bunker fuel price.

In 2009, the net unrealized gain on derivatives related primarily to the strengthening of the U.S. dollar compared to the Japanese yen relative to the contracted hedge position. As of January 1, 2010, the fair value of the bunker fuel derivatives resulted in a net unrealized gain of \$4.3 million.

In 2008, the net unrealized gain on derivatives related primarily to the strengthening of the U.S. dollar compared to the British pound and euro, offset by the weakening of the U.S. dollar compared to the Japanese yen. Refer to Note 20, "Derivative Financial Instruments".

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

12. Accounts Payable and Accrued Expenses

Accounts payable and accrued expenses consisted of the following (U.S. dollars in millions):

	December 31, 2010	January 1, 2010
Trade and other payables	\$ 178.3	\$ 160.8
Accrued fruit purchases	16.8	20.3
Vessel and port operating expenses	18.4	20.5
Payroll and employee benefits	29.5	28.6
Accrued promotions	9.1	10.7
Other accrued expenses	79.8	76.0
Accounts payable and accrued expenses	\$ 331.9	\$ 316.9

Other accrued expenses is primarily composed of accruals for inland freight costs incurred, purchases received but not invoiced and other accruals, none of which individually exceeds 5% of current liabilities.

13. Income Taxes

The provision for (benefit from) income taxes consisted of the following (U.S. dollars in millions):

	December 31, 2010	January 1, 2010	December 28, 2008
Current:			
U.S. federal income tax	\$ 0.2	\$ 1.0	\$ 0.3
State	0.5	1.1	0.2
Non-U.S.	2.9	2.4	6.5
	3.6	4.5	\$ 7.0
Deferred:			
U.S. federal income tax	0.1	(18.4)	(0.5)
State	-	(1.8)	(0.1)
Non-U.S.	(4.4)	2.9	(1.6)
	(4.3)	(17.3)	(2.2)
	\$ (0.7)	\$ (12.8)	\$ 4.8

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

13. Income Taxes (continued)

Income before income taxes consisted of the following (U.S. dollars in millions):

	December 31, 2010	January 1, 2010	December 26, 2008
U.S. \$	20.2	\$ 59.0	\$ 24.4
Non-U.S.	39.9	72.8	137.6
	\$ 60.1	\$ 131.8	\$ 162.0

The differences between the reported provision for (benefit from) income taxes and income taxes computed at the U.S. statutory federal income tax rate are explained in the following reconciliation (U.S. dollars in millions):

	December 31, 2010	Year ended (a) January 1, 2010	December 26, 2008
Income tax provision (benefit) computed at the			
U.S. statutory federal rate	\$ 21.0	\$ 46.1	\$ 56.7
Effect of tax rates on non-U.S. operations	(76.9)	(66.5)	(68.8)
Provision for (reversal of) tax contingencies/uncertain tax positions	(2.0)	(2.9)	0.4
Non-deductible/(taxable) interest	27.3	17.4	(3.5)
Foreign exchange	7.6	19.0	(13.5)
Non-deductible intercompany charges	(3.1)	(0.2)	2.4
Non-deductible differences	1.5	2.7	(0.7)
Non-taxable income/loss	3.2	(1.7)	-
Net operating loss re-established due to settlement of audit	0.5	(4.5)	-
Other	1.6	0.2	(1.0)
Change in deferred rate	0.5	0.4	0.2
Tax credits	(1.3)	-	-
Increase/(decrease) in valuation allowance (b)	19.4	(22.8)	32.6
Provision for (benefit from) income taxes	\$ (0.7)	\$ (12.8)	\$ 4.8

(a) Certain amounts in prior years have been reclassified to conform to current year presentation.

(b) The increase/(decrease) in valuation allowance includes effects of foreign exchange and adjustments to deferred tax balances which were fully offset by valuation allowance.

Equity in earnings of unconsolidated companies	(0.7)	(0.9)
Pension	(1.9)	(0.8)
Other noncurrent liabilities	(4.8)	(5.5)
Total noncurrent deferred tax liabilities	(82.3)	(85.1)
Total current and noncurrent deferred tax liabilities	\$ (109.8)	\$ (110.9)
Deferred tax assets:		
Current:		
Net operating loss carryforwards	\$ 9.4	\$ 9.7
Allowances and other accrued assets	27.1	18.2
Inventories	3.5	4.9
Total current deferred tax assets	40.0	32.8
Valuation allowance	(22.5)	(16.7)
Total net current deferred tax assets	17.5	16.1
Noncurrent:		
Pension liability	20.4	19.9
Property, plant and equipment	7.9	4.3
Post-retirement benefits other than pension	1.0	1.0
Net operating loss carryforwards	160.0	146.7
Capital loss carryover	7.7	8.2
Other noncurrent assets	33.1	37.9
Total noncurrent deferred tax assets	230.1	218.0
Valuation allowance	172.9	(157.3)
Total net noncurrent deferred tax assets	57.2	60.7
Total deferred tax assets, net	\$ 74.4	\$ 76.8

Net deferred tax liabilities	\$ (35.4)	\$ (34.1)
------------------------------	------------	------------

(a) Certain amounts in prior year have been reclassified to conform to current year presentation.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

13. Income Taxes (continued)

The valuation allowance established with respect to the deferred tax assets related primarily to net operating losses. During 2010 and 2009, the valuation allowance increased by \$21.5 million and decreased by \$34.4 million, respectively. The increase in 2010 related primarily to valuation allowances on deferred tax assets in tax jurisdictions where it was deemed more likely than not that future taxable income would not be sufficient to realize the related income tax benefits. The decrease in the valuation allowance in 2009 primarily related to deferred tax assets in tax jurisdictions where, due to our current and foreseeable operations, there was a change in judgment about our ability to realize the deferred tax assets in future years.

Except for earnings that are currently distributed, no additional provision has been made for U.S. or non-U.S. income taxes on the undistributed earnings of subsidiaries; as such earnings are expected to be permanently reinvested. A liability could arise if amounts are distributed by such subsidiaries or if such subsidiaries are ultimately disposed. It is not practicable to estimate the additional income taxes related to permanently reinvested earnings or the basis differences related to investments in subsidiaries.

At December 31, 2010, we had approximately \$651.6 million of federal and foreign tax operating loss carry-forwards expiring as follows (U.S. dollars in millions):

Expires	
2011	\$ 21.7
2012	18.5
2013	56.2
2014 and beyond	97.3
No expiration	457.9
Total	\$ 651.6

Included in the total tax operating loss carry-forwards at December 31, 2010, we had \$19.7 million of loss carry-forwards for U.S. tax purposes resulting from stock option exercises from 2003 to 2009, which have expiration dates beginning in 2023.

At December 31, 2010, we had state tax operating loss carry-forwards ranging up to \$9.4 million, which have various expiration dates within the years 2011–2027.

A reconciliation of the beginning and ending amount of uncertain tax positions excluding interest and penalties is as follows (U.S. dollars in millions):

Uncertain tax positions at January 1, 2010	\$16.5
Gross decreases - tax position in prior period	(1.0)
Gross increases - current-period tax positions	0.9
Settlements	(1.3)
Lapse of statute of limitations	(1.3)
Foreign Exchange	0.4
Uncertain tax positions at December 31, 2010	\$14.2

As of December 31, 2010, we had \$8.9 million accrued for uncertain tax positions, that, if recognized would affect the effective income tax rate.

The tax years 2004-2010 remain subject to examination by taxing authorities throughout the world in major jurisdictions, such as Costa Rica, Hong Kong, Netherlands, Netherlands Antilles, Switzerland and the United States.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

13. Income Taxes (continued)

We classify interest and penalties on uncertain tax positions as a component of income tax expense in the Consolidated Statements of Income. We recognized a net expense related to interest and penalties of \$0.6 million for the year ended December 31, 2010. Accrued interest and penalties related to uncertain tax positions as of December 31, 2010 is \$2.6 million and is included in other noncurrent liabilities.

We have been involved in litigation regarding a tax position in a foreign jurisdiction affecting the years 2005 and 2006. Subsequent to December 31, 2010, we lost an appeal on the 2005 case. As a result, we will remeasure our tax position during the first quarter of 2011, concluding that it is no longer more likely than not that we will sustain our tax position for both 2005 and 2006. During the first quarter 2011, we expect to settle this liability for approximately \$2.6 million, including interest and penalties, related to the year 2005 and will accrue approximately \$1.6 million including interest and penalties for the 2006 year.

14. Long-Term Debt and Capital Lease Obligations

The following is a summary of long term-debt and capital lease obligations (U.S. dollars in millions):

	December 31, 2010	January 1, 2010
\$500.0 million 3.5 year syndicated bank loan (see Credit Facility below) due January 2013	\$ 285.0	\$ 309.7
Various other notes payable	7.2	9.5
Capital lease obligations	3.4	6.0
Total long-term debt and capital lease obligations	295.6	325.2
Less: Current portion	(5.3)	(4.9)
Long-term debt and capital lease obligations	\$ 290.3	\$ 320.3

Credit Facility

On July 17, 2009, we entered into a 3.5-year, \$500 million senior secured revolving credit facility, expiring on January 17, 2013 (the "Credit Facility"), with Rabobank Nederland, New York Branch, as administrative agent and lead arranger. The Credit Facility includes a swing line facility and a letter of credit facility with a \$100 million sublimit. Borrowings under the Credit Facility bear interest at a spread over the London Interbank Offer Rate ("LIBOR") that varies with our leverage ratio. The Credit Facility is collateralized directly or indirectly by substantially all of our assets and is guaranteed by certain of our subsidiaries. On August 13, 2010, we amended the Credit Facility by lowering the spread over LIBOR that varies with our leverage ratio.

The Credit Facility requires us to be in compliance with financial and other covenants, including limitations on capital expenditures, the amount of dividends that can be paid in the future, the amount and types of liens and indebtedness, material asset sales and mergers. As of December 31, 2010, we were in compliance with all of the covenants contained in the Credit Facility. The Credit Facility permits borrowings under the revolving commitment with an interest rate (2.26% per annum at December 31, 2010) determined based on our leverage ratio and spread over LIBOR. In addition, we pay a fee on unused commitments.

At December 31, 2010, we had \$207.4 million available under committed working capital facilities, primarily under the Credit Facility. At December 31, 2010, we applied \$16.5 million to the letter of credit facility, comprised primarily of certain contingent obligations and other governmental agency guarantees combined with guarantees for purchases of raw materials and equipment. Included in the letter of credit facility, \$1.0 million relates to a debt guarantee for a VIE. We also had \$11.4 million in other letters of credit and bank guarantees not included in the letter of credit facility. Refer to Note 7, "Variable Interest Entities", for further discussion of VIEs.

At December 31, 2010, we had \$295.6 million of long-term debt and capital lease obligations, including the current portion, consisting of \$285.0 million outstanding under the Credit Facility, \$3.4 million of capital lease obligations and \$7.2 million of other long-term debt and notes payable.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

14. Long-Term Debt and Capital Lease Obligations (continued)

Maturities of long-term debt and capital lease obligations during the next five years are (U.S. dollars in millions):

	Long-Term Debt	Capital Leases	Totals
2011	\$ 2.7	\$ 2.6	\$ 5.3
2012	289.5	0.8	290.3
2013	-	0.2	0.2
	292.2	3.6	295.8
Less: Amounts representing interest	-	(0.2)	(0.2)
	292.2	3.4	295.6
Less: Current portion	\$ (2.7)	\$ (2.6)	\$ (5.3)
Totals, net of current portion of long-term debt and capital lease obligations	\$ 289.5	\$ 0.8	\$ 290.3

Cash payments of interest on long-term debt, net of amounts capitalized, were \$7.9 million, \$8.8 million and \$12.6 million for 2010, 2009 and 2008, respectively. Capitalized interest expense was \$0.8 million for 2010 and \$2.2 million for 2009 and 2008, respectively.

15. Net Income Per Ordinary Share

Basic and diluted net income per ordinary share is calculated as follows (U.S. dollars in millions, except share and per share data):

	December 31, 2010	Year ended January 1, 2010	December 26, 2008
Numerator:			
Net income attributable to Fresh Del Monte Produce Inc.	\$ 62.2	\$ 143.9	\$ 157.7
Denominator:			
Weighted average number of ordinary shares - Basic	60,535,978	63,570,999	63,344,941
Effect of dilutive securities - employee stock options	174,961	97,353	262,845
Weighted average number of ordinary shares - Diluted	60,710,939	63,668,352	63,607,786
Net income per ordinary share attributable to Fresh Del Monte Produce Inc.:			

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

Basic	\$ 1.03	\$ 2.26	\$ 2.49
Diluted	\$ 1.02	\$ 2.26	\$ 2.48

There were no anti-dilutive options for the years ended 2010, 2009 and 2008, except for the fourth quarter of 2010. Refer to Note 23, "Unaudited Quarterly Financial Information".

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

16. Retirement and Other Employee Benefits

We sponsor a number of defined benefit pension plans and post-retirement plans. The most significant of these plans cover employees in the United States, United Kingdom, Costa Rica and Guatemala. These plans are accounted for consistent with the ASC guidance related to “Compensation – Retirement Benefits”.

The benefit obligation is the projected benefit obligation for defined benefit pension plans and the accumulated post-retirement benefit obligation (“APBO”) for post-retirement benefit plans other than pensions.

U.S.-Based Defined Benefit Pension Plans

We sponsor a non-contributory defined benefit pension plan, which covers a portion of our U.S.-based employees under a collective bargaining agreement. This plan provides benefits based on the employees’ years of service and qualifying compensation. Our funding policy for this plan is to contribute amounts sufficient to meet the minimum funding requirements of the Employee Retirement Income Security Act of 1974, as amended, or such additional amounts as determined appropriate to assure that assets of the plan would be adequate to provide benefits. Substantially all of the plan’s assets are invested in mutual funds. As a result of the accelerated closing of the Hawaii production facility announced in 2006, the ILWU Local 42 collective bargaining agreement (the “CBA”) was not re-negotiated and expired in 2009 and as such the U.S.-based defined benefit pension plan has ceased accruing benefits.

U.S.-Based Post-Retirement Healthcare Plan

The expiration of the CBA resulted in the cessation of any benefits provided to retirees by retiree medical and life insurance plans. The U.S.-based post-retirement plan provided contributory healthcare benefits to certain of our U.S. retirees and their dependents. We funded claims under the plan as they were incurred, and accordingly, the plan had no assets. Effective May 1, 2009, we were no longer providing medical or life insurance benefits to the remaining Hawaii retirees previously covered under the collective bargaining agreement in the U.S.-Based post-retirement plan. Retirees wishing to continue coverage were required to purchase individual insurance policies and pay the entire premium. Postretirement healthcare benefits had been eliminated for all other active and retired employees previously. As such, we were relieved of all obligation and risk effective May 1, 2009 and the plan was effectively settled. During 2009, we recognized a settlement gain of \$3.2 million of which \$0.4 million related to the recognition of deferred actuarial gains in accumulated other comprehensive income as a result of the expiration of the CBA, which is included as a reduction to asset impairment and other charges in the Consolidated Statements of Income.

For the years ended January 1, 2010 and December 26, 2008, pension gains of \$3.4 million and \$2.9 million, respectively, were recognized in earnings as a reduction to asset impairment and other charges primarily as a result of the previously announced decision to exit all production activities in Hawaii in 2006 related to the U.S.-based post-retirement healthcare plan.

United Kingdom Defined Benefit Pension Plan

We sponsor a contributory defined benefit pension plan, which covers a portion of our employees in the United Kingdom (the “UK plan”). The UK plan provides benefits based on the employees’ years of service and qualifying compensation and has ceased accruing benefits. Benefit payments are based on a final pay scheme as of November 30,

2005 and are adjusted for inflation annually. Our funding policy for the UK plan is to contribute amounts into the plan in accordance with a recovery plan agreed by the Trustees and the Company in order to meet the statutory funding objectives of occupational trust-based arrangements of the United Kingdom or such additional amounts as determined appropriate to assure that assets of the UK plan would be adequate to provide benefits. Substantially all of the UK plan's assets are primarily invested in fixed income and equity funds.

Central American Plans

We provide retirement benefits to employees of certain Costa Rican and Guatemalan subsidiaries ("Central American plans"). Generally, benefits under these programs are based on an employee's length of service and level of compensation. These programs are commonly referred to as termination indemnities, which provide retirement benefits in accordance with programs mandated by the Costa Rican and Guatemalan governments. Funding generally occurs when employees cease active service.

16. Retirement and Other Employee Benefits (continued)

The following table sets forth a reconciliation of benefit obligations, plan assets and funded status for our defined benefit pension plans and post-retirement plans as of December 31, 2010 and January 1, 2010, which are also their measurement dates (U.S. dollars in millions):

	Pension plans (1)				Post-retirement plans		
	December 31, 2010		January 1, 2010		December 31, 2010	January 1, 2010	
	U.S.	U.K.	U.S.	U.K.	Central America	U.S.	Central America
Change in Benefit Obligation:							
Beginning benefit obligation	\$ 16.2	\$ 58.3	\$ 16.0	\$ 42.6	\$ 32.9	\$ 2.6	\$ 21.9
Service cost	-	-	-	0.1	3.3	-	1.6
Interest cost	0.9	3.1	1.0	3.0	3.6	0.2	2.8
Actuarial loss (gain)	1.5	(1.6)	0.6	9.7	(0.1)	-	10.6
Benefits paid	(1.4)	(1.4)	(1.4)	(1.5)	(5.0)	(0.1)	(1.4)
Exchange rate changes (2)	-	(2.0)	-	4.4	2.1	-	(1.4)
Settlement gain	-	-	-	-	-	(2.7)	(1.2)
Ending benefit obligation	17.2	56.4	16.2	58.3	36.8	-	32.9
Change in Plan Assets:							
Beginning fair value	11.7	35.6	12.2	26.0	-	-	-
Actual return on plan assets	1.6	4.7	0.6	5.5	-	-	-
Company contributions	0.2	2.6	0.3	2.9	5.0	0.1	2.6
Effect of settlements					-	-	(1.2)
Benefits paid	(1.4)	(1.4)	(1.4)	(1.5)	(5.0)	(0.1)	(1.4)
Exchange rate changes (2)	-	(1.1)	-	2.7	-	-	-
Ending fair value	12.1	40.4	11.7	35.6	-	-	-

Amounts recognized in the Consolidated

Balance Sheets:

Accounts payable
and accrued

expenses (current liability)	-	-	-	-	4.1	-	3.2
Retirement benefits liability (noncurrent liability)	5.1	16.0	4.5	22.7	32.7	-	29.7
Net amount recognized in the Consolidated Balance Sheets	\$ 5.1	\$ 16.0	\$ 4.5	\$ 22.7	\$ 36.8	\$ -	\$ 32.9
Amounts recognized in Accumulated other comprehensive income (loss)(3):							
Net actuarial (loss) gain	(6.4)	5.2	(4.9)	1.3	(14.2)	-	(14.5)
Net amount recognized in Accumulated other comprehensive income (loss)	\$ (6.4)	\$ 5.2	\$ (4.9)	\$ 1.3	\$ (14.2)	\$ -	\$ (14.5)

- (1) The accumulated benefit obligation is the same as the projected benefit obligation.
- (2) The exchange rate difference included in the reconciliation of the change in benefit obligation and the change in plan assets above results from the strengthening of the U.S. dollar relative to the British pound for the U.K. plan and the weakening of the U.S. dollar vs. Central American currencies such as the Costa Rican colon and Guatemalan quetzal for the Central American plans as of December 31, 2010 when compared to January 1, 2010. The exchange rate difference from the year ending January 1, 2010 relates to the weakening of the U.S. dollar relative to the British pound for the U.K plan and the strengthening of the U.S. dollar vs. the Costa Rican colon and Guatemalan quetzal for the Central American plans.
- (3) As of December 31, 2010 and January 1, 2010, we had accumulated other comprehensive income of \$4.9 million and \$5.0 million, respectively, related to tax effect of unamortized pension gains.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

16. Retirement and Other Employee Benefits (continued)

Actuarial Assumptions

The assumptions used in the calculation of the benefit obligations of our U.S. and U.K defined benefit pension plans and Central American plans consisted of the following:

	December 31, 2010			January 1, 2010			December 26, 2008		
	Pension plans		Post-retirement plans Central America	Pension plans		Post-retirement plans Central America	Pension plans		Post-retirement plans Central America
	U.S	U.K		U.S	U.K		U.S	U.K	
Weighted average discount rate	5.30 %	5.40 %	8.54 % ⁽¹⁾	5.85 %	5.70 %	10.90 % ⁽³⁾	6.25 %	6.50 %	14.64 %
Rate of increase in compensation levels	-	3.50 %	5.29 % ⁽²⁾	-	3.60 %	8.19 %	-	3.20 %	8.86 %

The assumptions used in the calculation of the net periodic pension costs for our U.S. and U.K. defined benefit pension plans and Central American plans consisted of the following:

	December 31, 2010			January 1, 2010			December 26, 2008		
	Pension plans		Post-retirement plans Central America	Pension plans		Post-retirement plans Central America	Pension plans		Post-retirement plans Central America
	U.S	U.K		U.S	U.K	(4)	U.S	U.K	
Weighted average discount rate	5.85 %	5.70 %	10.90 % ⁽³⁾	6.25 %	6.50 %	14.64 %	6.47 %	6.00 %	6.47 %
Rate of increase in compensation levels	-	3.60 %	8.19 %	-	3.20 %	8.86 %	3.50 %	3.40 %	3.50 %
Expected long-term rate of return on assets	7.50 %	7.20 %	-	4.75 %	5.80 %	-	7.50 %	6.87 %	-

(1) The decrease in the weighted average discount rate assumption for the benefit obligation and net periodic pension costs decreased from 2010 due to a decrease in inflation assumptions and country-specific investments.

(2) The decrease in the rate of increase in compensation levels is due to a decrease in inflation assumptions.

- (3) The decrease in the weighted average discount rate assumption for the benefit obligation and net periodic pension cost from 14.62% in 2008 to 10.90% in 2009 for the Central American plans was due to the fact that country-specific investments dropped significantly in 2009.
- (4) The increase in the weighted average discount rate assumption used in the calculation of net periodic cost from 6.47% in 2008 to 14.62% in 2009 related to the change in method of calculating the discount rate described in the following paragraph.

Effective December 26, 2008, we changed the method of calculating the discount rate and rate of increase in compensation levels for the Central American plans in order to align the expected return on country-specific investments with the expected benefit payment stream. The impact to the ending benefit obligation as a result of this change was \$0.9 million, which resulted in a decrease in the retirement benefits liability and an increase in amounts recognized in accumulated other comprehensive income of \$0.9 million in our Consolidated Balance Sheets. The change in discount rate is treated as a change in assumption, which affects the net actuarial (loss) gain and is amortized over the remaining service period of the plan participants consistent with the ASC guidance on "Compensation – Retirement Benefits". The annual amortization began to impact net periodic cost in 2009.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

16. Retirement and Other Employee Benefits (continued)

The assumptions used in determining the APBO are the same as the expected post-retirement benefit obligation due to the accelerated closing of Hawaii. Since only eligible employees are accounted for in determining the APBO as of December 26, 2008 for our U.S.-based post-retirement healthcare plans the assumptions used consisted of the following:

	December 26, 2008	
Weighted average discount rate	6.25	%
Health care cost trend rate assumed for next year	8.00	%
Rate to which the cost trend rate is assumed to decline (the ultimate trend rate)	5	%
Year that the rate reaches the ultimate trend rate	2017	

Cash Flows

	Pension plans		Post-retirement plans Central America
	U.S	U.K	
Expected benefit payments for:			
2011	\$ 1.3	\$ 1.6	\$ 4.1
2012	1.3	1.9	4.2
2013	1.3	1.9	4.3
2014	1.2	2.0	4.3
2015	1.2	2.4	4.2
Next 5 years	5.4	13.2	20.6
Expected benefit payments over next 10 years	\$ 11.7	\$ 23.0	\$ 41.7

Expected contributions for the U.S. and U.K pension plans for 2011 are \$0.8 million and \$2.7 million, respectively. Contributions for the U.S. and U.K. pension plans are actuarially determined based on funding regulations.

U.S.-Based Defined Benefit Pension Plans

Plan Assets

Our overall investment strategy is to achieve a mix of between 50%-70% equity securities for long-term growth and 30%-50% fixed income securities for near-term benefit payments. Asset allocation targets promote optimal expected return and volatility characteristics given the long-term time horizon for fulfilling the obligations of the pension plans. Selection of the targeted asset allocation for U.S. plan assets was based upon a review of the expected return and risk characteristics of each asset class, as well as the correlation of returns among asset classes.

The fair values of our U.S. plan assets at December 31, 2010 by asset category are as follows:

Asset Category	Total	Fair Value Measurements at December 31, 2010 (U.S. dollars in millions)		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Mutual Funds:				
Fixed income securities	\$ 2.6	\$ 2.6	\$ -	\$ -
Bond securities	2.1	2.1	-	-
Value securities	2.0	2.0	-	-

Total	\$ 12.1	\$ 12.1	\$ -	\$ -

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

16. Retirement and Other Employee Benefits (continued)

The fair values of our U.S. plan assets at January 1, 2010 by asset category are as follows:

Asset Category	Total	Fair Value Measurements at January 1, 2010 (U.S. dollars in millions)		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Common/collective trust funds	\$ 1.2	\$ -	\$ 1.2	\$ -
Mutual Funds:				
Equity securities	7.0	7.0	-	-
Fixed income securities	3.5	3.5	-	-
Total	\$ 11.7	\$ 10.5	\$ 1.2	\$ -

Mutual Funds – This category includes investments in mutual funds that encompass both equity and fixed income securities that are designed to provide a diverse portfolio. The plan's mutual funds are designed to track exchange indices, and invest in diverse industries. Some mutual funds are classified as regulated investment companies. Investment managers have the ability to shift investments from value to growth strategies, from small to large capitalization funds, and from U.S. to international investments. These investments are valued at the closing price reported on the active market on which the individual securities are traded. These investments are classified within Level 1 of the fair value hierarchy.

Investment managers agree to operate, including criteria that determine eligible and ineligible securities, diversification requirements and credit quality standards, where applicable. Unless exceptions have been approved, investment managers are prohibited from buying or selling commodities, futures or option contracts, as well as from short selling of securities. Furthermore, investment managers agree to obtain written approval for deviations from stated investment style or guidelines. We considered historical returns and the future expectations for returns for each asset class as well as the target asset allocation of plan assets to develop the expected long-term rate of return on assets assumption.

The expected long-term rate of return assumption for U.S. plan assets is based upon the target asset allocation and is determined using forward-looking assumptions in the context of historical returns and volatilities for each asset class, as well as correlations among asset classes. We evaluate the rate of return assumption on an annual basis.

United Kingdom Defined Benefit Pension Plan

16. Retirement and Other Employee Benefits (continued)

The fair values of our U.K. plan assets at January 1, 2010 by asset category are as follows:

Asset Category	Fair Value Measurements at January 1, 2010 (U.S. dollars in millions)			
	Total Fair Value at January 1, 2010	Quoted Prices in Active Markets for Identical Asset (Level 1)	Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Cash	\$ 0.4	\$ 0.4	\$ -	\$ -
Equity securities:				
United Kingdom companies	15.2	15.2	-	-
United States companies	4.6	4.6	-	-
Other international companies	9.3	9.3	-	-
Fixed income securities				
United Kingdom government bonds	6.1	6.1	-	-
Total	\$ 35.6	\$ 35.6	\$ -	\$ -

Equity securities – This category includes stocks in various U.S., U.K. and other international companies over diverse industries. The portfolio of stocks is invested in diverse industries and includes a concentration of 23% in financial institutions, 16% in oil and gas, 13% in basic materials, 12% in consumer goods, 11% in industrial and the remaining 25% in various other industries. The expected return on equities is determined by the yield on U.K. government bonds based on the Financial Times Stock Exchange (“FTSE”) U.K. 20-year index plus an allowance for an equity risk premium.

These investments are valued at the closing price reported on the active market on which the individual securities are traded. These investments are classified within Level 1 of the fair value hierarchy.

Fixed income securities – This category includes investment in U.K. government bonds and U.K. corporate bonds. These investments are valued at the closing price reported on the active market on which the individual securities are traded. These investments are classified within Level 1 of the fair value hierarchy. The expected return on U.K. government bonds is as measured by the FTSE U.K. 20-year index. The expected return on U.K. corporate bonds is measured by the yield on the iBoxx over 15 year AA Corporate Index.

According to the plan’s investment policy, approximately 40% of the UK plan’s assets are invested in equity securities of companies of the United Kingdom, 28% in U.S. and European equities and 12% are invested in other international equities. Approximately 20% of the U.K. plan’s assets are invested in high-grade, fixed-income securities with maturities of up to 15 years. Fund managers have no discretion to make asset allocation decisions, but are required to

rebalance the portfolios back to the above benchmarks. Performance benchmarks for each asset class are based on various FTSE indices. Investment performance is evaluated annually. The actual return on plan assets for the UK plan years ended December 31, 2010 and January 1, 2010 were positive returns of approximately 13% and 18%, respectively.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

16. Retirement and Other Employee Benefits (continued)

Other Employee Benefits

We also sponsor a defined contribution plan established pursuant to Section 401(k) of the Internal Revenue Code. Subject to certain dollar limits, employees may contribute a percentage of their salaries to the plan, and we will match a portion of each employee's contribution. This plan is in effect for U.S.-based employees only. The expense pertaining to this plan was \$0.9 million for 2010, 2009 and 2008, respectively.

As of August 31, 1997, one of our subsidiaries ceased accruing benefits under our salary continuation plan covering Central American management personnel. At December 31, 2010 and January 1, 2010, we had \$7.1 million and 7.0 million, respectively, accrued for this plan. At December 31, 2010 and January 1, 2010, we recorded \$0.9 million and \$1.1 million, respectively, in accumulated other comprehensive income (loss) related to unamortized pension gains. A gain of \$0.1 million is expected to be recognized in the Consolidated Statements of Income during 2011 related to unamortized actuarial pension gains related to this plan. Net periodic pension costs were \$0.3 million for each of the years ended December 31, 2010, January 1, 2010 and December 26, 2008. We expect to contribute approximately \$0.7 million to the salary continuation plan in 2011 and for each of the next 5 years. Benefit payments under the plan for the next 5 years from 2016 onward are expected to total \$3.9 million.

We provide retirement benefits to certain employees who are not U.S.-based. Generally, benefits under these programs are based on an employee's length of service and level of compensation and are insignificant. The unamortized pension losses related to other non-U.S.-based plans included in accumulated other comprehensive income (loss), a component of shareholders' equity was \$1.0 million for each of the years ending December 31, 2010 and January 1, 2010, respectively.

17. Stock-Based Compensation

Effective upon the completion of our initial public offering in October 1997, we established a share option plan pursuant to which options to purchase Ordinary Shares may be granted to certain directors, officers and key employees chosen by the Board of Directors (the "1997 Plan"). Under the 1997 Plan, the Board of Directors is authorized to grant options to purchase an aggregate of 2,380,030 Ordinary Shares. Under this plan, options have been granted to directors, officers and other key employees to purchase our Ordinary Shares at the fair market value of the Ordinary Shares at the date of grant.

On May 11, 1999, our shareholders approved and ratified the 1999 Share Incentive Plan (the "1999 Plan"). Under the 1999 Plan, as amended on April 30, 2008, the Board of Directors is authorized to grant options to purchase an aggregate of 9,000,000 Ordinary Shares. The aggregate number of options that may be granted to a single participant under the 1999 Plan is 2,000,000. Under this plan, options have been granted to directors, officers and other key employees to purchase our Ordinary Shares at the fair market value of the Ordinary Shares at the date of grant.

Under both the 1997 Plan and the 1999 Plan, 20% of the options usually vest immediately, and the remaining options vest in equal installments over the next four years. Options under the 1997 Plan and the 1999 Plan may be exercised over a period not in excess of 10 years from the date of the grant, respectively.

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

Stock-based compensation expense included in selling, general and administrative expenses related to stock options on a straight-line, single award basis and restricted stock awards included in the accompanying Consolidated Statements of Income was as follows (U.S. dollars in millions, except per share data):

	December 31, 2010	Year ended January 1, 2010	December 26, 2008
Stock-based compensation expense	\$ 7.5	\$ 10.4	\$ 9.7
Stock-based compensation expense per diluted share	\$ 0.12	\$ 0.16	\$ 0.15

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

17. Stock-Based Compensation (continued)

We are in a net operating loss carry-forward position in the relevant jurisdictions. Therefore, for the years ended December 31, 2010, January 1, 2010 and December 26, 2008, excess share-based payment deductions resulting from stock options exercised in these periods have not been realized through a reduction in taxes currently payable or related effect on cash flows. Proceeds of \$2.2 million, \$1.0 million and \$22.1 million were received from the exercise of stock options for the years ended December 31, 2010, January 1, 2010 and December 26, 2008, respectively.

The following table summarizes stock option activity for the years ended December 31, 2010, January 1, 2010 and December 26, 2008:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Fair Value
Options outstanding at December 28, 2007	2,670,368	\$ 23.92	\$ 8.85

Granted	161,000	20.13	7.46
Exercised	(135,722)	16.63	5.90
Cancelled	(86,750)	23.64	8.62
Options outstanding at December 31, 2010	4,882,901	\$ 22.82	\$ 8.44
Exercisable at December 26, 2008	1,298,823	\$ 26.45	\$ 9.01
Exercisable at January 1, 2010	2,425,373	\$ 23.79	\$ 8.75
Exercisable at December 31, 2010	3,199,901	\$ 23.18	\$ 8.54

On May 5, 2010, our shareholders approved and ratified the 2010 Non-Employee Directors Equity Plan (the “Directors Equity Plan”), which awards restricted stock to non-management members of our Board of Directors. Under the Directors Equity Plan, the initial award of restricted stock was made on May 5, 2010, the effective date of the plan, and future awards will be made on January 1st of each calendar year beginning in 2011. A share of “restricted stock” is one ordinary share of the Company that has restrictions on transferability until certain vesting conditions have been met. The number of ordinary shares that may be covered by awards granted under the Directors Equity Plan will be limited to a total of 150,000 ordinary shares. Fifty percent of each award of restricted stock granted under the Directors Equity Plan will vest on the date on which it was granted. The remaining 50% of each award will vest upon

the six-month anniversary of the date on which the recipient ceases to serve as a member of the Board of Directors. The provision in the Director's Equity Plan that allows directors to retain all of their awards once they cease to serve as a member of the Board of Directors is considered a nonsubstantive service condition in accordance with the guidance provided by the ASC on "Compensation – Stock Compensation". Accordingly, it is appropriate to recognize compensation cost immediately for restricted stock awards granted to non-management members of the Board of Directors.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

17. Stock-Based Compensation (continued)

On May 5, 2010, we awarded 32,956 restricted shares from our Directors Equity Plan at a price of \$21.24 per share. Stock-based compensation expense related to this grant was \$0.7 million for the year ended December 31, 2010.

As a subsequent event, on January 3, 2011, we awarded 27,853 shares from our Directors Equity Plan at a price of \$25.14 per share.

The following table lists the various stock option grants occurring for the years ended December 31, 2010 and January 1, 2010:

Stock Option Grant	Number of Options Granted	Exercise Price	Fair Value
March 3, 2010 - Chairman and Chief Executive Officer	161,000	\$ 20.13	\$ 7.46
July 31, 2009 - Employees	1,295,000	21.72	8.08
May 1, 2009 - Non-management Member of our Board of Directors	30,000	14.77	6.22
February 25, 2009 - Chairman and Chief Executive Officer	161,000	19.83	8.11
February 25, 2009 - Seven Non-management Members of our Board of Directors	43,750	19.83	7.33

All stock options listed above were granted from our 1999 Plan. The fair value for stock options was estimated at the date of grant using the Black-Scholes option pricing model, which requires us to make certain assumptions. Volatility is estimated based on the historical volatility of our stock over the past five years. The risk-free interest rate is based on U.S. Treasury zero-coupon issues with a remaining term equal to the expected term of grant. The expected term of grant was based on the contractual term of the stock option and expected employee exercise and post-vesting employment termination trends. Forfeitures are estimated based on historical experience.

The following are the weighted average assumptions used in the Black-Scholes option pricing model for the periods indicated:

	December 31, 2010		Year ended January 1, 2010		December 26, 2008	
Volatility	38.43	%	39.16	%	35.99	%
Risk-free rate	2.27	%	2.50	%	3.31	%
Expected term of grant	5.0 years		4.9 years		4.9 years

		4,882,901	\$ 15.9	3,199,901	\$ 10.6

The total intrinsic value of options exercised during the years ended December 31, 2010 and January 1, 2010 was \$0.8 million and \$0.4 million, respectively. The total fair value of options granted for years ended December 31, 2010 and January 1, 2010 was \$1.2 million and \$12.3 million, respectively. The total fair value of options vesting during the years ended December 31, 2010 and January 1, 2010 was \$7.3 million and \$10.1 million, respectively, with a weighted-average fair value of \$7.65 and \$8.30 per option, respectively. As of December 31, 2010, the total remaining unrecognized compensation cost related to non-vested stock options amounted to \$10.5 million, which will be amortized over the weighted-average remaining requisite service period of 1.4 years.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

18. Commitments and Contingencies

We lease agricultural land and certain property, plant and equipment, including office facilities and refrigerated containers, under operating leases. We also enter into vessel charter agreements for the transport of our fresh produce to markets worldwide using 14 chartered refrigerated vessels. Terms for vessel charter agreements range between three to 10 years. The aggregate minimum payments under all operating leases and vessel charter agreements with initial terms of one year or more at December 31, 2010 are as follows (U.S. dollars in millions):

2011	\$91.2
2012	56.9
2013	54.2
2014	39.0
2015	36.4
Thereafter	148.8
	\$426.5

Total expense for all operating leases and vessel charter agreements, including leases with initial terms of less than one year, amounted to \$91.2 million, \$102.2 million and \$71.9 million for 2010, 2009 and 2008, respectively.

We also have agreements to purchase the entire or partial production of certain products of our independent growers in Costa Rica, Guatemala, Ecuador, Cameroon, Colombia, Chile, United States, and the Philippines that meet our quality standards. Total purchases under these agreements amounted to \$722.2 million, \$671.4 million and \$698.9 million for 2010, 2009 and 2008, respectively.

19. Litigation

DBCP Litigation

Beginning in December 1993, certain of our U.S. subsidiaries were named among the defendants in a number of actions in courts in Texas, Louisiana, Hawaii, California and the Philippines involving claims by numerous non-U.S. plaintiffs alleging that they were injured as a result of exposure to a nematocide containing the chemical dibromochloropropane ("DBCP") during the period 1965 to 1990. As a result of a settlement entered into in December 1998, the remaining unresolved DBCP claims against our U.S. subsidiaries are pending in Hawaii, Louisiana and California.

In 1997, plaintiffs from Costa Rica and Guatemala named certain of our U.S. subsidiaries in a purported class action in Hawaii. On June 28, 2007, plaintiffs voluntarily dismissed our U.S. subsidiaries named in the action without ties to Hawaii. At a hearing held on June 9, 2009, the court granted summary judgment in favor of our remaining U.S. subsidiaries with ties to Hawaii, holding that the claims of the remaining plaintiffs are time-barred. A final judgment dismissing all remaining claims and terminating the action was entered on July 28, 2010. On August 24, 2010, plaintiffs filed a notice of appeal.

On November 15, 1999, one of our subsidiaries was served in two actions entitled Godoy Rodriguez, et al. v. AMVAC Chemical Corp., et al. and Martinez Puerto, et al. v. AMVAC Chemical Corp., et al., in the 29th Judicial District Court for the Parish of St. Charles, Louisiana. At this time, it is not known how many of the approximately

315 remaining Godoy Rodriguez and Martinez Puerto plaintiffs are making claims against our subsidiary.

On October 14, 2004, two of our subsidiaries were served with a complaint in an action styled Angel Abarca, et al. v. Dole Food Co., et al. filed in the Superior Court of the State of California for the County of Los Angeles on behalf of more than 2,600 Costa Rican banana workers who claim injury from exposure to DBCP. An initial review of the plaintiffs in the Abarca action found that a substantial number of the plaintiffs were claimants in prior DBCP actions in Texas and may have participated in the settlement of those actions. On June 27, 2008, the court dismissed the claims of 1,329 plaintiffs who were parties to prior DBCP actions. On June 30, 2008, our subsidiaries moved to dismiss the claims of the remaining Abarca plaintiffs on grounds of forum non conveniens in favor of the courts of Costa Rica. Hearings on the motion to dismiss were held on February 24, 2009, May 19, 2009 and September 17, 2009. On September 22, 2009, the court granted the motion conditionally dismissing the claims of those remaining plaintiffs who allege employment on farms in Costa Rica affiliated with our subsidiaries.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

19. Litigation (continued)

On April 25, 2005, two of our subsidiaries were served with a complaint styled *Juan Jose Abrego, et al. v. Dole Food Company, et al.* filed in the Superior Court of the State of California for the County of Los Angeles on behalf of 955 Guatemalan residents who claim injury from exposure to DBCP. An initial review of the plaintiffs in the Abrego action found that a substantial number of the plaintiffs were claimants in prior DBCP actions and may have participated in the settlement of those actions. On June 27, 2008, the court dismissed the claims of 206 plaintiffs who were parties to prior DBCP actions. On October 1, 2009, our subsidiaries joined a motion to dismiss the claims of the remaining Abrego plaintiffs on grounds of *forum non conveniens* in favor of the courts of Michigan. On December 15, 2009, the court granted the joint motion. On February 16, 2010, plaintiffs appealed the court's dismissal of the action. On December 29, 2010, the appellate court affirmed the Superior Court's dismissal of the remaining plaintiffs, who have sought review of the dismissal by the California Supreme Court and to date have not filed their claims with the courts of Michigan.

On January 2, 2009, three of our subsidiaries were served with multiple complaints in related actions styled *Jorge Acosta Cortes, et al. v. Dole Food Company, et al.* filed in the Superior Court of the State of California for the County of Los Angeles on behalf of 461 Costa Rican residents, 389 Guatemalan residents, 962 Panamanian residents and 673 Honduran residents who claim injury from exposure to DBCP. We and our subsidiaries have never owned, managed or otherwise been involved with any banana growing operations in Panama or Honduras. Accordingly, the Panamanian and Honduran plaintiffs filed requests to dismiss our subsidiaries without prejudice on March 26, 2009. The claims of the new Costa Rican plaintiffs were consolidated with those of the Costa Rican plaintiffs in *Abarca* and conditionally dismissed as in the *Abarca* case. Similarly, the claims of the new Guatemalan plaintiffs were consolidated with those of the Guatemalan plaintiffs in *Abrego* and dismissed in favor of the courts of Michigan as in the *Abrego* case.

Pineapple Class Action Litigation

On August 2, 2004, a consolidated complaint was filed against two of our subsidiaries in the U.S. District Court for the Southern District of New York. This consolidated action was brought as a putative class action on behalf of all direct and indirect purchasers of Del Monte Gold® Extra Sweet pineapples from March 1, 1996 through the present and merges four actions brought by fruit wholesalers and two actions brought by individual consumers. The consolidated complaint alleges claims for: (i) monopolization and attempted monopolization; (ii) restraint of trade; (iii) unfair and deceptive trade practices; and (iv) unjust enrichment. On May 27, 2005, our subsidiaries filed a motion to dismiss the indirect and direct purchasers' claims for unjust enrichment. On June 29, 2005, plaintiffs filed a joint motion for class certification. On February 20, 2008, the court denied plaintiffs' motion for class certification of the indirect purchasers and only granted class certification of the direct purchasers' claims for monopolization and attempted monopolization, which was uncontested by our subsidiaries. Also on February 20, 2008, the court granted the motion of our subsidiaries to dismiss the direct purchasers' claims for unjust enrichment and denied as moot the motion to dismiss the indirect purchasers' state law claims on the basis of the court's denial of plaintiffs' motion for class certification of the indirect purchasers. On August 13, 2008, our subsidiaries filed a motion for summary judgment on plaintiffs' remaining claims. Plaintiffs filed an opposition to the motion on October 6, 2008, which our subsidiaries replied to on December 8, 2008. On September 30, 2009, the court granted the motion for summary judgment in favor of our subsidiaries. On October 29, 2009, plaintiffs filed a notice of appeal. On November 3, 2010, the appellate court affirmed the District Court's decision granting summary judgment in favor of our subsidiaries.

On March 5, 2004, an alleged individual consumer filed a putative class action complaint against our subsidiaries in the state court of Tennessee on behalf of consumers who purchased (other than for resale) Del Monte Gold® Extra Sweet pineapples in Tennessee from March 1, 1996 to May 6, 2003. The complaint alleges violations of the Tennessee Trade Practices Act and the Tennessee Consumer Protection Act. On February 18, 2005, our subsidiaries filed a motion to dismiss the complaint. On May 15, 2006, the court granted the motion in part, dismissing plaintiffs' claim under the Tennessee Consumer Protection Act.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

19. Litigation (continued)

Between March 17, 2004 and March 18, 2004, three alleged individual consumers separately filed putative class action complaints against us and our subsidiaries in the state court of California on behalf of residents of California who purchased (other than for re-sale) Del Monte Gold® Extra Sweet pineapples between March 1, 1996 and May 6, 2003. On November 9, 2005, the three actions were consolidated under one amended complaint with a single claim for unfair competition in violation of the California Business and Professional Code. On September 26, 2008, plaintiffs filed a motion to certify a class action. On August 20, 2009, the court denied class certification. On October 19, 2009, plaintiffs filed a notice of appeal of the court's order denying class certification, which appeal remains pending.

On April 19, 2004, an alleged individual consumer filed a putative class action complaint against our subsidiaries in the state court of Florida on behalf of Florida residents who purchased (other than for re-sale) Del Monte Gold® Extra Sweet pineapples between March 1, 1996 and May 6, 2003. The only surviving claim under the amended complaint alleges violations of the Florida Deceptive and Unfair Trade Practices Act relating only to pineapples purchased since April 19, 2000. Our subsidiaries filed an answer to the surviving claim on October 12, 2006. On August 5, 2008, plaintiffs filed a motion to certify a class action. Our subsidiaries filed an opposition on January 22, 2009 to which plaintiffs filed a reply on May 11, 2009.

European Union Antitrust Investigation

On June 2, 2005, one of our German subsidiaries was visited by the antitrust authority of the European Union ("EU") as part of its investigation of certain of our overseas subsidiaries as well as other produce companies for possible violations of the EU's competition laws. Our subsidiaries cooperated fully with the investigation. On October 17, 2008, the European Commission concluded its investigation without finding any infringement of EU competition rules by, or imposing any fines on, our subsidiaries.

The European Commission did, however, find that Internationale Fruchthandels Gesellschaft Weichert & Co KG ("Weichert"), an entity in which one of our subsidiaries formerly held an indirect 80% noncontrolling interest, infringed EU competition rules and imposed upon it a €14.7 million (\$19.7 million using exchange rates as of December 31, 2010) fine. The European Commission has asserted that we controlled Weichert during the period by virtue of our subsidiary's former, indirect noncontrolling interest and has therefore held that we are jointly and severally liable for Weichert's payment of the fine. On December 31, 2008, we filed an appeal of this determination on grounds, among others, that Weichert did not violate EU competition rules and that, in any event, we cannot be held jointly and severally liable for Weichert's acts under applicable German law. On April 14, 2010, Weichert filed a statement of intervention in support of our appeal and seeking annulment of the European Commission's determination.

Breach of Contract Litigation

On July 31, 2003, Net Results, Inc., a consulting company, filed a complaint alleging breach of contract against one of our subsidiaries in an action styled Net Results, Inc. v. Del Monte Fresh Produce Company in the Eleventh Judicial Circuit of Florida (Miami-Dade County, Florida). On April 15, 2008, the plaintiff amended its complaint to include an additional claim of anticipatory repudiation and sought a significant amount of damages. Our subsidiary denied liability and brought a counterclaim against the plaintiff. In November 2009, the jury returned a verdict in favor of the plaintiff in the amount of \$10 million. Our subsidiary's post-trial motions requested, among other things, that the jury's

verdict be set aside and that judgment be entered in favor of our subsidiary. On March 25, 2010, the trial court denied the motions and entered a final judgment in the amount of \$15.7 million (plus attorneys' fees). On April 15, 2010, our subsidiary appealed the judgment.

Kunia Well Site

In 1980, elevated levels of certain chemicals were detected in the soil and ground-water at a plantation leased by one of our U.S. subsidiaries in Honolulu, Hawaii (the "Kunia Well Site"). Shortly thereafter, our subsidiary discontinued the use of the Kunia Well Site and provided an alternate water source to area well users and the subsidiary commenced its own voluntary cleanup operation. In 1993, the Environmental Protection Agency ("EPA") identified the Kunia Well Site for potential listing on the National Priorities List ("NPL") under the Comprehensive Environmental Response, Compensation and Liability Act of 1980, as amended. On December 16, 1994, the EPA issued a final rule adding the Kunia Well Site to the NPL.

On September 28, 1995, our subsidiary entered into an order (the "Order") with the EPA to conduct the remedial investigation and the feasibility study of the Kunia Well Site. Under the terms of the Order, our subsidiary submitted a remedial investigation report in November 1998 and a final draft feasibility study in December 1999 (which was updated from time to time) for review by the EPA. The EPA approved the remedial investigation report in February 1999 and the feasibility study on April 22, 2003.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

19. Litigation (continued)

As a result of communications with the EPA in 2001, we recorded a charge of \$15.0 million in the third quarter of 2001 to increase the recorded liability to the estimated expected future cleanup cost for the Kunia Well Site to \$19.1 million. Based on conversations with the EPA in the third quarter of 2002 and consultation with our legal counsel and other experts, we recorded a charge of \$7.0 million during the third quarter of 2002 to increase the accrual for the expected future clean-up costs for the Kunia Well Site to \$26.1 million.

On September 25, 2003, the EPA issued the Record of Decision (“ROD”). The EPA estimates in the ROD that the remediation costs associated with the cleanup of the Kunia Well Site will range from \$12.9 million to \$25.4 million and will last approximately 10 years. The undiscounted estimates are between \$14.8 million and \$28.7 million. The undiscounted estimate on which our accrual is based totals \$22.7 million and is discounted using a 5.0% rate. As of December 31, 2010, there is \$18.6 million included in other noncurrent liabilities and \$0.5 million included in accounts payable and accrued expenses in the Consolidated Balance Sheets for the Kunia Well Site clean-up. We expect to expend approximately \$0.5 million in cash per year for the next five years. Certain portions of the EPA’s estimates have been discounted using a 5% interest rate.

On January 13, 2004, the EPA deleted a portion of the Kunia Well Site (Northeast section) from the NPL. On May 2, 2005, our subsidiary signed a Consent Decree with the EPA for the performance of the clean-up work for the Kunia Well Site. On September 27, 2005, the U.S. District Court for Hawaii approved and entered the Consent Decree. Based on findings from remedial investigations at the Kunia Well Site, our subsidiary continues to evaluate with the EPA the clean-up work currently in progress in accordance with the Consent Decree.

Other

In addition to the foregoing, we are involved from time to time in various claims and legal actions incident to our operations, both as plaintiff and defendant. In the opinion of management, after consulting with legal counsel, none of these other claims are currently expected to have a material adverse effect on the results of operations, financial position or our cash flows. We intend to vigorously defend ourselves in all of the above matters. At this time, management is not able to evaluate the likelihood of a favorable or unfavorable outcome in any of the above-described matters. Accordingly, management is not able to estimate the range or amount of loss, if any, from any of the above-described matters and no accruals or expenses have been recorded for these matters as of December 31, 2010, except as related to the Kunia Well Site.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

20. Derivative Financial Instruments

Our derivative financial instruments reduce our exposure to fluctuations in foreign exchange rates and bunker fuel prices. We predominantly designate our derivative financial instruments as cash flow hedges.

Counterparty credit risk exposes us to loss in the event of non-performance on currency forward contracts and bunker fuel contracts. We monitor our exposure to counterparty non-performance risk both at inception of the hedge and at least quarterly thereafter. However, because the contracts are entered into with highly rated financial institutions, we do not anticipate non-performance by any of these counterparties. The exposure is usually the amount of the unrealized gains, if any, in such contracts.

Because of the high degree of effectiveness between the hedging instrument and the underlying exposure being hedged, fluctuations in the value of the derivative instruments are generally offset by changes in the cash flows or fair value of the underlying exposures being hedged. In addition, we perform an assessment of hedge effectiveness, both at inception and at least quarterly thereafter, whether the financial instruments that are used in hedging transactions are effective at offsetting changes in the cash flows or fair value of the related underlying exposures. Any ineffective portion of a financial instrument's change in fair value is immediately recognized in earnings.

Certain of our derivative instruments contain provisions that require the current credit relationship between the Company and its counterparty to be maintained throughout the term of the derivative instruments. If that credit relationship changes, certain provisions could be triggered, and the counterparty could request immediate collateralization of derivative instruments in net liability position above a certain threshold. The aggregate fair value of all derivative instruments with a credit-risk-related contingent feature that are in a liability position on December 31, 2010 is \$22.7 million. As of December 31, 2010, no triggering event has occurred and thus we are not required to post collateral. If the credit-risk-related contingent features underlying these agreements were triggered on December 31, 2010 the entity would not be required to post collateral to its counterparty because the collateralization threshold has not been met.

Foreign Currency Hedges

We are exposed to fluctuations in currency exchange rates against the U.S. dollar on our results of operations and financial condition and we mitigate that exposure by entering into foreign currency forward contracts. Certain of our subsidiaries periodically enter into foreign currency forward contracts in order to hedge portions of forecasted sales or cost of sales denominated in foreign currencies with forward contracts and options, which generally expire within one to two years. Our foreign currency hedges will settle during 2011 and 2012.

We designate our foreign currency forward contracts as single-purpose cash flow hedges of forecasted cash flows. Based on our formal assessment of hedge effectiveness of our foreign currency forward contracts, we determined that the impact of hedge ineffectiveness was de minimis for the years ended December 31, 2010, January 1, 2010 and December 26, 2008.

Bunker Fuel Hedges

We are exposed to fluctuations in bunker fuel prices on our results of operations and financial condition and can mitigate that exposure by entering into bunker fuel swap agreements, which permit us to lock in bunker fuel purchase

prices. One of our subsidiaries has entered into bunker fuel swap agreements in order to hedge fuel costs incurred via our owned and chartered vessels. We designated our bunker fuel swap agreements as cash flow hedges. As of December 31, 2010, we had no outstanding bunker fuel hedge contracts.

Other Derivative Instruments

We entered into derivative instruments not designated as hedging instruments, also referred to as economic hedges, in order to minimize the impact of fluctuation in foreign exchange relative to the South African rand in 2010 and the euro, British pound, and Japanese yen for 2008 on our balance sheet. We recognized a loss of \$0.3 million and a net gain of \$2.5 million for the years ended December 31, 2010 and December 26, 2008, respectively, related to these derivative instruments included in other income (expense), net in our Consolidated Statements of Income. We did not have economic hedges for the year ended January 1, 2010. As of December 31, 2010, we had \$0.3 million outstanding as an economic hedge on the South African rand included in accounts payable and other accrued expenses on our Consolidated Balance Sheets. As of January 1, 2010 and December 26, 2008, we did not have any economic hedges outstanding.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

20. Derivative Financial Instruments (continued)

We had the following outstanding foreign currency forward contracts that were entered into to hedge forecasted cash flows as of December 31, 2010:

Foreign Currency Hedges:		Notional Amount	
Euro	€	165.4	million
British pound	£	11.5	million
Japanese yen	JPY	23,632.1	million
Polish zloty	PLN	10.0	million

The following table reflects the fair values of derivative instruments as of December 31, 2010 (U.S. dollars in millions):

Derivatives Designated as Hedging Instruments (1)

Balance Sheet Location:	Foreign exchange contracts		Bunker fuel swap agreements	
	December 31, 2010 (2)	January 1, 2010	December 31, 2010 (3)	January 1, 2010
Asset derivatives:				
Prepaid expenses and other current assets	\$ 4.1	\$ 12.0	\$ -	\$ 4.3
Other noncurrent assets	-	3.3	-	-
Total asset derivatives	\$ 4.1	\$ 15.3	\$ -	\$ 4.3
Liability derivatives:				
Accounts payable and accrued expenses	\$ 13.6	\$ -	\$ -	\$ -
Other noncurrent liabilities	9.1	-	-	-
Total liability derivatives	\$ 22.7	\$ -	\$ -	\$ -

(1) See Note 21, "Fair Value Measurements", for fair value disclosures.

(2) We expect that \$9.5 million of the net fair value of hedges recognized as a net loss in accumulated other comprehensive income

("AOCI") will be transferred to earnings during the next 12 months and a net loss of \$9.1 million will be transferred to earnings

during 2012, along with the effect of the related forecasted transaction.

(3) At December 31, 2010, there were no bunker fuel swap agreements remaining to be settled.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

20. Derivative Financial Instruments (continued)

The following table reflects the effect of derivative instruments on the Consolidated Statements of Income for the year ended December 31, 2010 (U.S. dollars in millions):

Derivatives in Cash Flow Hedging Relationships	Amount of Gain (Loss) Recognized in Other Comprehensive Income on Derivatives (Effective Portion) Year ended		Location of Gain (Loss) Reclassified from AOCI into Income (Effective Portion)	Amount of Gain (Loss) Reclassified from AOCI into Income (Effective Portion) Year ended	
	December 31, 2010	January 1 2010		December 31, 2010	January 1 2010
	Foreign exchange contracts	\$ (33.9)		\$ 6.9	Net sales
Foreign exchange contracts	(0.9)	2.2	Cost of products sold	0.9	3.5
Bunker fuel swap agreements (1)	(4.3)	4.3	Cost of products sold	3.6	-
Total	\$ (39.1)	\$ 13.4		\$ 26.2	\$ 18.6

(1) The bunker fuel swap agreements had an ineffective portion of less than \$0.1 million for the years ended December 31, 2010 and January 1, 2010 .

21. Fair Value Measurements

Fair Value of Derivative Instruments

We mitigate the risk of fluctuations in currency exchange rates and bunker fuel prices on our results of operations and financial condition by entering into foreign currency cash flow hedges and bunker fuel hedges. We account for the fair value of our derivative financial instruments as either an asset in other current assets or noncurrent assets or a liability in accrued expenses or other noncurrent liabilities. We use an income approach to value our outstanding foreign currency and bunker fuel cash flow hedges. An income approach consists of a discounted cash flow model that takes into account the present value of future cash flows under the terms of the contracts using current market information as of the measurement date such as foreign currency and bunker fuel spot and forward rates. Additionally, an element of default risk based on observable inputs was built into the fair value calculation.

The following table provides a summary of the fair values of our derivative financial instruments measured on a recurring basis under "Fair Value Measurements and Disclosures" (U.S. dollars in millions):

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

	Fair Value Measurements Foreign currency hedges (liability) asset		Bunker fuel hedges asset	
	December 31, 2010	January 1, 2010	December 31, 2010	January 1, 2010
	Quoted Prices in Active Markets for Identical Assets (Level 1)	\$ -	\$ -	\$ -
Significant Other Observable Inputs (Level 2)	(18.6)	15.3	-	4.3
Significant Unobservable Inputs (Level 3)	-	-	-	-

Refer to Note 16, "Retirement and Other Employee Benefits" for further fair value disclosures related to pension assets.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

21. Fair Value Measurements (continued)

In estimating our fair value disclosures for financial instruments, we use the following methods and assumptions:

Cash and cash equivalents: The carrying amount of these items approximates fair value due to their liquid nature.

Trade accounts receivable and other accounts receivable, net: The carrying value reported in the Consolidated Balance Sheets for these items is net of allowances for doubtful accounts, which includes a degree of counterparty non-performance risk.

Accounts payable and other current liabilities: The carrying value reported in the Consolidated Balance Sheets for these items approximates their fair value, which is the likely amount for which the liability with short settlement periods would be transferred to a market participant with a similar credit standing as the Company.

Capital lease obligations: The carrying value of our capital lease obligations reported in the Consolidated Balance Sheets approximates their fair value based on current interest rates, which contain an element of default risk. Refer to Note 14, "Long-Term Debt and Capital Lease Obligations".

Long-term debt: The carrying value of our long-term debt reported in the Consolidated Balance Sheets approximates their fair value since they bear interest at variable rates or fixed rates which contain an element of default risk. Refer to Note 14, "Long-Term Debt and Capital Lease Obligations".

Fair Value of Non-Financial Assets

The following is a tabular presentation of the non-recurring fair value measurement along with the level within the fair value hierarchy in which the fair value measurement in its entirety falls (U.S. dollars in millions):

	Fair Value Measurements at December 31, 2010			
	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investment in South Africa subsidiary	\$ 7.7	\$ -	\$ 7.7	\$ -
DEL MONTE® U.K. beverage trademark	5.1	-	-	5.1
Philippine banana assets	0.8	-	-	0.8
	\$ 13.6	\$ -	\$ 7.7	\$ 5.9

During the third quarter of 2010, we recognized an impairment charge of \$1.4 million related to the DEL MONTE® indefinite-lived intangible of a perpetual, royalty-free brand name license due to lower than expected sales volumes and pricing in the United Kingdom in the prepared food segment specifically related to beverage products. An income-based approach was used to value the trademark intangible, which measures the fair value of an intangible asset by capitalizing the royalties saved due to ownership of the intangible asset rather than paying a rent or royalty for the use of the asset. This income-based approach referred to as the royalty savings method utilizes internal unobservable inputs such as a discounted net sales cash flow model with the application of a royalty savings rate assumption corroborated by a mix of internal and market inputs. There was no further impairment of the U.K. beverage licenses for the year ended December 31, 2010.

During the second quarter of 2010, we entered into an agreement to sell substantially all the assets of our South Africa canning operations. As a result, we recognized a \$16.7 million asset impairment of our investment in South Africa in the prepared food reporting segment. The carrying value of our investment in South Africa was \$24.4 million, including cumulative translation adjustments, and was written down to a fair value of \$7.7 million. We estimated the fair value of the underlying assets by using the market approach. The market approach uses prices and other relevant information generated by market transactions involving comparable assets. We used observable inputs based on market participant information related to the probable sale of South African assets and, as such, we classify the fair value of the investment in South Africa within Level 2 of the fair value hierarchy. We received the regulatory approval for the sale of our South Africa canning operations effective October 11, 2010. On October 12, 2010, the sale of our South Africa canning operations was executed by the receipt of approximately \$1.5 million in cash and \$6.9 million recorded as a financing receivable, which was collected on January 27, 2011.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

21. Fair Value Measurements (continued)

During the fourth quarter of 2010, we recognized \$12.7 million in impairment charges related to plant disease affecting an isolated growing area in our banana operations in the Philippines that will be abandoned during 2011 in the banana segment. The carrying value of these assets was \$13.5 million and was written down to a fair value of \$0.8 million. We estimated the fair value of these assets using the income based approach considering the cash flows that would be obtained as a result of the production and distribution of bananas over the next few months prior to abandoning the growing areas impacted by disease. The income based approach utilizes unobservable inputs. Due to the use of unobservable inputs, we classify the fair value of these growing areas within Level 3 of the fair value hierarchy.

The following is a tabular presentation of the non-recurring fair value measurement along with the level within the fair value hierarchy in which the fair value measurement in its entirety falls (U.S. dollars in millions):

		Fair Value Measurements at January 1, 2010		
		Quoted Prices		
		in		
		Active	Significant	Significant
		Markets for	Other	Unobservable
		Identical	Observable	Inputs
		Assets	Inputs	Inputs
		(Level 1)	(Level 2)	(Level 3)
	Total			
Brazil pineapple assets	\$ 6.9	\$ -	\$ -	\$ 6.9
DEL MONTE® U.K. beverage trademark	5.9	-	-	5.9
	\$ 12.8	\$ -	\$ -	\$ 12.8

During the first quarter of 2009, we recognized an impairment charge of \$2.0 million related to the DEL MONTE® indefinite-lived perpetual, royalty-free brand name license due to lower than expected sales volumes and pricing in the United Kingdom in the prepared foods segment specifically related to beverage products. An income-based approach was used to value the trademark intangible, which measures the fair value of an intangible asset by capitalizing the royalties saved due to ownership of the intangible asset rather than paying a rent or royalty for the use of the asset. This income-based approach referred to as the royalty savings method utilizes internal unobservable inputs such as a discounted net sales cash flow model with the application of a royalty savings rate assumption corroborated by a mix of internal and market inputs. Due to the use of unobservable inputs, we classify the fair value of this indefinite-lived intangible asset within Level 3 of the fair value hierarchy.

We recorded \$10.5 million in asset impairment charges resulting from our decision in May 2009 to discontinue pineapple planting in Brazil and our subsequent decision, during the third quarter, to not use certain property, plant and equipment as originally intended for other crop production. The carrying value of these assets was \$17.4 million and was written down to a fair value of \$6.9 million. We estimated the fair value of the underlying assets by using a combination of the market approach and the cost approach. The cost approach is based on the amount that currently would be required to replace the service capacity of the assets. The market approach uses prices and other relevant information generated by market transactions involving comparable assets. We used a combination of observable

inputs primarily based on appraisals and unobservable inputs using market participant assumptions to estimate the fair value of the underlying assets. Due to the use of unobservable inputs, we classify the fair value of these long-lived assets within Level 3 of the fair value hierarchy.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

22. Related Party Transactions

We purchase goods and services from unconsolidated subsidiaries in the ordinary course of business. See Note 6, "Investments in Unconsolidated Companies."

At December 31, 2010 and January 1, 2010 there were \$0.1 million and \$0.2 million, respectively, of receivables from related parties, which are included in trade accounts receivable.

During 2010, 2009 and 2008, we received cash of \$0.7 million, \$11.1 million, and \$6.3 million, respectively, from one of our noncontrolling interests for capital expansion. We have reflected the cash in contributions from noncontrolling interests under financing activities in the Consolidated Statements of Cash Flows. We have \$21.6 million and \$20.9 million in other noncurrent liabilities in our Consolidated Balance Sheets related to one of our noncontrolling interests as of December 31, 2010 and January 1, 2010, respectively.

During 2010, 2009 and 2008, we incurred expenses of approximately \$2.0 million, \$1.5 million and \$2.0 million, respectively, for air transportation services for chartering of an aircraft that was indirectly owned by our Chairman and Chief Executive Officer.

23. Unaudited Quarterly Financial Information

Our fiscal quarter-ends correspond to the last Friday of the 13-week period, beginning the day following our fiscal year end. The following summarizes certain quarterly operating data (U.S. dollars in millions, except per share data):

	Quarter ended			
	April 2, 2010	July 2, 2010	October 1, 2010	December 31, 2010 (a)
Net sales	\$ 943.1	\$ 1,000.0	\$ 793.1	\$ 816.7
Gross profit	97.8	83.0	52.0	39.6
Net income (loss)	36.9	21.2	13.4	(10.7)
Net income (loss) attributable to Fresh Del Monte Produce Inc.	36.2	21.1	14.5	(9.6)
Net income (loss) per ordinary share attributable to Fresh Del Monte Produce Inc. – basic (b)	\$ 0.57	\$ 0.34	\$ 0.24	\$ (0.16)
Net income (loss) per ordinary share attributable to Fresh Del Monte Produce Inc. – diluted (b)	\$ 0.57	\$ 0.34	\$ 0.24	\$ (0.16)
	March 27,	June 26,	September 25,	

Edgar Filing: FRESH DEL MONTE PRODUCE INC - Form 10-K

	2009	2009	2009	January 1, 2010
Net sales	\$ 879.7	\$ 978.4	\$ 766.2	\$ 872.1
Gross profit	83.8	91.0	69.0	67.0
Net income	35.5	52.9	29.2	27.0
Net income attributable to Fresh Del Monte Produce Inc.	34.9	52.2	28.6	28.2
Net income per ordinary share attributable to Fresh Del Monte Produce Inc. – basic (b)	\$ 0.55	\$ 0.82	\$ 0.45	\$ 0.44
Net income per ordinary share attributable to Fresh Del Monte Produce Inc. – diluted (b)	\$ 0.55	\$ 0.82	\$ 0.45	\$ 0.44

- (a) Diluted earnings per share for the quarter ended December 31, 2010 excludes the impact of stock options of 203,104 shares as they were antidilutive.
- (b) Basic and diluted earnings per share for each of the quarters presented above is based on the respective weighted average number of shares for the quarters. The sum of the quarters may not necessarily be equal to the full year basic and diluted earnings per share amounts due to the effects of rounding.

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (continued)

24. Business Segment Data

We are principally engaged in one major line of business, the production, distribution and marketing of bananas, other fresh produce and prepared food. Our products are sold in markets throughout the world, with our major producing operations located in North, Central and South America, Europe, Asia and Africa.

Our operations are aggregated on the basis of our products: bananas, other fresh produce, prepared food, and other products and services, our segments. Other fresh produce includes pineapples, melons, non-tropical fruit (including grapes, apples, pears, peaches, plums, nectarines, avocados, citrus and kiwis), fresh-cut products, tomatoes, strawberries, and other fruit and vegetables. Prepared food includes prepared fruit and vegetables, juices, beverages, snacks, and a poultry and processed meat business. Other products and services include a third-party ocean freight business, a plastic product business in Chile and a grain business in Argentina. During the fourth quarter of 2010, we sold the grain silo and exited the grain business in Argentina.

We evaluate performance based on several factors, of which net sales and gross profit by product are the primary financial measures (U.S. dollars in millions):

	December 31, 2010		Year ended January 1, 2010		December 26, 2008	
	Net Sales	Gross Profit (Loss)	Net Sales	Gross Profit	Net Sales	Gross Profit
Banana	\$ 1,620.2	\$ 31.4	\$ 1,510.9	\$ 108.7	\$ 1,420.2	\$ 117.7
Other fresh produce	1,523.7	196.1	1,551.5	148.7	1,559.8	171.1

FRESH DEL MONTE PRODUCE INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

24. Business Segment Data (continued)

	December 31,	January 1,
	2010	2010
Identifiable assets:		
North America	\$ 358.6	\$ 354.7
Europe	401.4	479.7
Middle East	271.4	252.3
Africa	120.2	132.9
Asia	144.4	145.5
Central America	836.7	811.0
South America	229.7	253.6
Maritime equipment (including containers)	47.2	65.1
Corporate	108.1	101.2
Total identifiable assets	\$ 2,517.7	\$ 2,596.0

The United States accounted for approximately 49%, 48% and 46% of our net sales for the years ended 2010, 2009 and 2008. Our earnings are heavily dependent on operations located worldwide; however our net sales are not dependent on any particular country other than the United States, with no other country accounting for greater than 10% of our net sales for the years ended 2010, 2009 and 2008. These operations are a significant factor in the economies of some of the countries in which we operate and are subject to the risks that are inherent in operating in such countries, including government regulations, currency and ownership restrictions and risk of expropriation. Management reviews assets on the basis of geographic region and not by reportable segment, which more closely aligns our capital investment with demand for our products. Costa Rica is our most significant sourcing location representing approximately 42%, 40% and 39% of our property, plant and equipment as of December 31, 2010, January 1, 2010 and December 26, 2008, respectively. No country other than Costa Rica accounts for greater than 10% of our property, plant and equipment.

One customer accounted for approximately 13% of net sales in 2010, 2009 and 2008, respectively. These sales are reported in the banana and other fresh produce segments. No other customer accounted for 10% or more of our net sales. In 2010 and 2009, the top 10 customers accounted for approximately 34% of net sales as compared with 36% of our net sales during 2008. Identifiable assets by geographic area represent those assets used in the operations of each geographic area. Corporate assets consist of goodwill, building, leasehold improvements and furniture and fixtures.

25. Shareholders' Equity

Our shareholders have authorized 50,000,000 preferred shares at \$0.01 par value of which none has been issued or is outstanding. Our shareholders have authorized 200,000,000 Ordinary Shares of common stock of which 58,725,430 have been issued and are outstanding.

On July 31, 2009, our Board of Directors approved a three-year stock repurchase program of up to \$150 million of our Ordinary Shares.

On May 5, 2010, our Board of Directors approved an additional three-year stock repurchase program of up to \$150 million of our ordinary shares. During the quarter and year ended December 31, 2010, we purchased 1,338,359 and 5,058,659 of our ordinary shares in open market transactions at an average purchase price of \$21.83 and \$21.36 per

share under this program, respectively. We account for treasury stock using the cost method.

As of December 31, 2010, we repurchased \$108.1 million, or 5,058,659 ordinary shares, under the aforementioned \$300 million stock repurchase program approved by the Board of Directors. We have a maximum dollar value of \$192.0 million of shares that may yet be purchased under the stock repurchase program. As of December 31, 2010, we have retired all of the 5,058,659 ordinary shares.

On November 3, 2010, our Board of Directors reinstated a quarterly cash dividend, declaring a third quarter 2010 cash dividend of \$0.05 per ordinary share to shareholders of record on November 17, 2010. We paid \$2.9 million in dividends on December 10, 2010.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of December 31, 2010. Based upon this evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were effective as of such date to ensure that information required to be disclosed in the reports the Company files or submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission rules and forms. Such officers also confirm that there was no change in our internal control over financial reporting during the year ended December 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

See Management's Annual Report on Internal Control Over Financial Reporting included in Item 8. Financial Statements and Supplementary Data.

Item 9B. Other Information

None.

102

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information required by Item 10 of Part III of this Annual Report on Form 10-K will be included in our definitive Proxy Statement relating to our 2011 Annual General Meeting of Shareholders with respect to directors, executive officers, audit committee financial experts of the Company and Section 16(a) beneficial ownership reporting compliance, is incorporated herein by reference in response to this item.

Code of Ethics

We have adopted a Code of Conduct and Business Ethics Policy (“Code of Conduct”) that applies to our principal executive officer, principal financial officer and principal accounting officer as well as all our directors, other officers and employees. This Code of Conduct can be found on our Web site at www.freshdelmonte.com. We have not waived the requirements of the Code of Conduct for any directors or executive officers and there have been no amendments in 2010. We intend to disclose any amendment or waiver of the Code of Conduct promptly on our Web site.

Item 11. Executive Compensation

Information required by Item 11 of Part III of this Annual Report on Form 10-K will be included in our definitive Proxy Statement relating to our 2011 Annual General Meeting of Shareholders with respect to executive compensation, is incorporated herein by reference in response to this item.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by Item 12 of Part III of this Annual Report on Form 10-K will be included in our definitive Proxy Statement relating to our 2011 Annual General Meeting of Shareholders with respect to security ownership of certain beneficial owners and management and securities authorized for issuance under equity compensation plans, is incorporated herein by reference in response to this item.

Item 13. Certain Relationships and Related Transactions

Information required by Item 13 of Part III of this Annual Report on Form 10-K will be included in our definitive Proxy Statement relating to our 2011 Annual General Meeting of Shareholders with respect to certain relationships and related transactions and director independence, is incorporated herein by reference in response to this item.

Item 14. Principal Accountant Fees and Services

Information required by Item 14 of Part III of this Annual Report on Form 10-K will be included in our definitive Proxy Statement relating to our 2011 Annual General Meeting of Shareholders with respect to principal accountant fees and services, is incorporated by reference in response to this item.

PART IV

Item 15. Exhibits and Financial Statement Schedules

Consolidated Statements and Other Financial Information

The following financial statements and supplemental schedule of Fresh Del Monte Produce Inc. and its subsidiaries are included in Item 8. Financial Statements and Supplementary Data of this Report:

Consolidated Financial Statements

Report of Independent Registered Public Accounting Firm on Consolidated Financial Statements

Consolidated Balance Sheets at December 31, 2010 and January 1, 2010

Consolidated Statements of Income for the years ended December 31, 2010, January 1, 2010 and December 26, 2008

Consolidated Statements of Cash Flows for the years ended December 31, 2010, January 1, 2010 and December 26, 2008

Consolidated Statements of Shareholders' Equity for the years ended December 31, 2010, January 1, 2010 and December 26, 2008
