2 ANNUAL REPORT	JULY 31, 2009

Dear Shareholder

The past 12 months reveal two distinct market backdrops—one of extreme investor pessimism and decided weakness, and another of cautious optimism and nascent signs of recovery. The first half of the period was characterized by the former, as the global financial crisis erupted into the worst recession in decades. Daily headlines recounted universal macroeconomic deterioration, financial sector casualties, volatile swings in global equity markets, and unprecedented government intervention that included widespread (and globally coordinated) monetary and quantitative easing by central banks and large-scale fiscal stimuli. Sentiment improved noticeably in March 2009, however, on the back of new program announcements by the US Treasury Department and Federal Reserve, as well as generally stronger-than-expected economic data in a few key areas, including retail sales, business and consumer confidence, manufacturing and housing.

In this environment, US equities contended with extraordinary volatility, posting steep declines through mid-March 2009 before going on a three-month rally that largely negated year-to-date losses. Late in the period, investor enthusiasm waned and a correction ensued for several weeks, mostly as a result of profit taking and portfolio rebalancing, as opposed to a change in the economic outlook. Equities rallied once again as the period drew to a close, resulting in positive year-to-date returns for all major indexes. The experience in international markets was similar to that in the United States, though performance was generally more extreme both on the decline and on the upturn. Notably, emerging markets, which lagged most developed regions through the downturn, reassumed leadership in 2009 as these areas of the globe have generally seen a stronger acceleration in economic recovery.

In fixed income markets, while the flight to quality remained a prevalent theme, relatively attractive yields and distressed valuations, alongside a more favorable macro environment, eventually captured investor attention, leading to a sharp recovery in non-Treasury assets. This has been particularly evident in the high yield sector, which has firmly outpaced all other taxable asset classes since the start of 2009. At the same time, the municipal bond market enjoyed a strong return after the exceptional market volatility of 2008, buoyed by a combination of attractive valuations, robust retail investor demand and a slowdown in forced selling. Direct aid to state and local governments via the American Recovery and Reinvestment Act of 2009 has also lent support to municipal bonds.

Total Returns as of July 31, 2009	6-month	12-month
US equities (S&P 500 Index)	21.18%	(19.96)%
Small cap US equities (Russell 2000 Index)	26.61	(20.72)
International equities (MSCI Europe, Australasia, Far East Index)	30.63	(22.60)
US Treasury securities (Merrill Lynch 10-Year US Treasury Index)	(3.91)	7.58
Taxable fixed income (Barclays Capital US Aggregate Bond Index)	4.47	7.85
Tax-exempt fixed income (Barclays Capital Municipal Bond Index)	4.38	5.11
High yield bonds (Barclays Capital US Corporate High Yield 2% Issuer Capped Index)	30.11	5.30

The market environment has clearly improved since the beginning of the year, but a great deal of uncertainty and risk remain. Through periods of market turbulence, as ever, BlackRock s full resources are dedicated to the management of our clients assets. For additional insight and timely food for thought, we invite you to visit our award-winning *Shareholder*® magazine, now available exclusively online at www.blackrock.com/shareholdermagazine. We thank you for entrusting BlackRock with your investments, and we look forward to continuing to serve you in the months and years ahead.

Sincerely,

Rob Kapito President, BlackRock Advisors, LLC

Announcement to Shareholders

On June 16, 2009, BlackRock, Inc. announced that it received written notice from Barclays PLC (Barclays) in which Barclays Board of Directors had accepted BlackRock s offer to acquire Barclays Global Investors (BGI). At a special meeting held on August 6, 2009, BlackRock s proposed purchase of BGI was approved by an overwhelming majority of Barclays voting shareholders, an important step toward closing the transaction. The combination of BlackRock and BGI will bring together market leaders in active and index strategies to create the preeminent asset management firm. The transaction is scheduled to be completed in the fourth quarter of 2009, subject to important fund shareholder and regulatory approvals.

THIS PAGE NOT PART OF YOUR FUND REPORT

3

BlackRock California Investment Quality Municipal Trust Inc.

Investment Objective

BlackRock California Investment Quality Municipal Trust Inc. (RAA) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal and California income tax consistent with preservation of capital. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned (0.93)% based on market price and 1.28% based on net asset value (NAV). For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of (3.92)% based on market price and (5.13)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. Duration positioning was neutral for most of the period. The majority of the Trust s outperformance was derived from a tightening in credit spreads. Cash and short-term investment reserves ranged from 1% to 13% of assets under management during the period. Overall, the cash position was beneficial to performance as it lowered portfolio duration and enhanced the Trust s yield as a portion of the cash reserves was invested in higher-yielding variable-rate demand notes. Along with attractive borrowing costs, the portfolio s accrual permitted an increase in dividends in June. Our strategy is to pursue a balanced approach to returns, continue to bolster current yield and commit cash reserves when research uncovers appropriate opportunities. Credit fundamentals warrant monitoring in the current weak economic environment, especially in California, considering budgetary challenges. Management is alert to improve quality as opportunities arise.

4	ANNUAL REPORT	JULY 31, 2009

BlackRock California Municipal Income Trust

Investment Objective

BlackRock California Municipal Income Trust (BFZ) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and California income taxes. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned (4.81)% based on market price and (2.36)% based on NAV. For the same period, the closed-end Lipper California Municipal Debt Funds category posted an average return of (3.92)% based on market price and (5.13)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. The Trust—s duration positioning was slightly above neutral for most of the period. The Trust—s outperformance based on NAV was derived from a tightening in credit spreads, although zero-coupon positions did contribute negatively as spreads for these structures widened. Along with attractive borrowing costs, the portfolio accrual permitted an increase in dividends in June. Our strategy is to pursue a balanced approach to returns, continue to bolster current yield and commit cash reserves when research uncovers appropriate opportunities. Credit fundamentals warrant monitoring in the current weak economic environment, especially in California, considering budgetary challenges. Management is alert to improve quality as opportunities arise.

ANNUAL REPORT JULY 31, 2009 5

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of July 31, 2009 and 2008, the market value of these securities was \$1,974,163, representing 1% and \$2,242,216, representing 1%, respectively, of the Trust s long-term investments.

BlackRock Florida Municipal 2020 Term Trust

Investment Objective

BlackRock Florida Municipal 2020 Term Trust (BFO) (the Trust) seeks to provide current income that is exempt from regular federal income tax and Florida intangible personal property taxes and to return \$15.00 per share (the initial public offering price) on or about December 31, 2020. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned 3.95%, based on market price and (0.48)%, based on NAV. For the same period, the closed-end Lipper Florida Municipal Debt Funds category posted an average return of 7.14% based on market price and 1.51% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. Although the Trust benefited from a declining interest rate environment during the period, Florida was a weak performer among the states, with only Michigan and Ohio posting lower returns, which hampered performance. Sector allocation was also an important component to performance. In particular, the Trust s exposure to high yield bonds and the health sector, which significantly underperformed, detracted from results. Low short-term rates, however, resulted in increased income to the Trust from leverage, which allowed for a dividend increase beginning with the July 1, 2009 distribution.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

6 ANNUAL REPORT JULY 31, 2009

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of July 31, 2009 and 2008, the market value of these securities was \$13,543,166, representing 11% and \$11,848,675, representing 9%, respectively, of the Trust s long-term investments.

BlackRock Investment Quality Municipal Income Trust

Investment Objective

BlackRock Investment Quality Municipal Income Trust (RFA) (the Trust) seeks to provide current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and to provide an exemption from Florida intangible personal property taxes consistent with preservation of capital. Effective September 16, 2008, BlackRock Florida Investment Quality Municipal Trust was renamed BlackRock Investment Quality Municipal Income Trust. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned (1.93)% based on market price and (3.68)% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 2.20% based on market price and (2.40)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in determining the Trust s performance during the period. Spread products, such as health care, tax increment and corporate-backed bonds, underperformed significantly, as the economic downturn continued to add more stress on the fundamental credit qualities of these sectors. The Trust s holdings in these segments, therefore, detracted from performance. Certain municipal bonds that are issued for a private purpose such as certain housing bonds may be subject to the alternative minimum tax (AMT). These bonds typically have higher yields than non-AMT bonds to compensate for the potential tax treatment of these issues. Exposure to AMT bonds also detracted from results, as these issues underperformed amid significant spread widening during the 12 months.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT JULY 31, 2009 7

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of July 31, 2009 and 2008, the market value of these securities was \$461,249, representing 2% and \$722,157, representing 3%, respectively, of the Trust s long-term investments.

BlackRock Municipal Income Investment Trust

Investment Objective

BlackRock Municipal Income Investment Trust (BBF) (the Trust) seeks to provide current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and Florida intangible personal property tax. Effective September 18, 2008, BlackRock Florida Municipal Income Trust was renamed BlackRock Municipal Income Investment Trust. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned (1.46)% based on market price and (2.57)% based on NAV. For the same period, the closed-end Lipper General Municipal Debt Funds (Leveraged) category posted an average return of 2.20% based on market price and (2.40)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in determining how the Trust performed during the reporting period. The Trust was significantly overweight in pre-refunded securities in the one- to five-year maturity range. This enhanced performance as the yield curve steepened. Conversely, spread products, such as health care, land increment and corporate-backed bonds, significantly underperformed, as the economic downturn continued to add more stress on the fundamental credit quality for these sectors. The Trust s holdings in these segments, therefore, detracted from performance.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

8 ANNUAL REPORT JULY 31, 2009

The investment advisor has deemed certain of these non-rated securities to be of investment grade quality. As of July 31, 2009 and 2008, the market value of these securities was \$10,029,093, representing 7% and \$13,484,932, representing 9%, respectively, of the Trust s long-term investments.

BlackRock New Jersey Investment Quality Municipal Trust Inc.

Investment Objective

BlackRock New Jersey Investment Quality Municipal Trust Inc. (RNJ) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New Jersey gross income tax consistent with preservation of capital. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned 4.01% based on market price and (1.09)% based on NAV. For the same period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of 4.58% based on market price and 1.31% on a NAV basis. All returns reflect reinvestment of dividends. The Trust moved from a discount to NAV to a premium by period-end, which accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in the Trust s performance during the period. Spread products, such as health care and corporate-backed bonds, underperformed significantly, as the economic downturn continued to add more stress on the fundamental credit qualities of these sectors. The Trust s holdings in these segments, therefore, detracted from performance. Certain municipal bonds that are issued for a private purpose such as certain housing bonds may be subject to the AMT. These bonds typically have higher yields than non-AMT bonds to compensate for the potential tax treatment of these issues. Exposure to AMT bonds also detracted from results, as spreads widened out significantly during the 12 months. During the 12 months, Trust management maintained high cash allocations in an effort to reduce volatility and ensure that ample cash was available to take advantage of potential opportunities in the new-issue market. The Trust s cash balance lowered portfolio duration, which was beneficial; however, it also held the yield down slightly as the money was invested in lower-yielding short-term investments, a negative factor.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT JULY 31, 2009 9

BlackRock New Jersey Municipal Income Trust

Investment Objective

BlackRock New Jersey Municipal Income Trust (BNJ) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New Jersey gross income tax. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned 0.04% based on market price and (2.62)% based on NAV. For the same period, the closed-end Lipper New Jersey Municipal Debt Funds category posted an average return of 4.58% based on market price and 1.31% on a NAV basis. All returns reflect reinvestment of dividends. The Trust's premium to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. Sector allocation played an important role in the Trust's performance during the period. Spread products, such as health care and corporate-backed bonds, underperformed significantly, as the economic downturn continued to add more stress on the fundamental credit qualities of these sectors. The Trust's holdings in these segments, therefore, detracted from performance. Certain municipal bonds that are issued for a private purpose such as certain housing bonds may be subject to the AMT. These bonds typically have higher yields than non-AMT bonds to compensate for the potential tax treatment of these issues. Exposure to AMT bonds also detracted from results, as spreads widened out significantly during the 12 months. During the 12 months, Trust management maintained high cash allocations in an effort to reduce volatility and ensure that ample cash was available to take advantage of potential opportunities in the new-issue market. The Trust's cash balance lowered portfolio duration, which was beneficial; however, it also held the yield down slightly as the money was invested in lower-yielding short-term investments, a negative factor.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

10 ANNUAL REPORT JULY 31, 2009

BlackRock New York Investment Quality Municipal Trust Inc.

Investment Objective

BlackRock New York Investment Quality Municipal Trust Inc. (RNY) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income taxes and New York State and New York City income tax consistent with preservation of capital. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned 4.81% based on market price and 2.71% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of 1.84% based on market price and (2.86)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. Performance was positively affected by a slightly-above-average distribution rate, as well as the Trust s positioning in longer-dated maturities. The one-year period comprised two separate and major fixed income market moves. The end of 2008 witnessed severe dislocations whereby, as a result of illiquidity and credit concerns, municipal bonds were treated as risk assets and traded at historically-wide spreads versus Treasuries. The second half of the period saw a return of liquidity and more normal demand metrics, accompanied by significant spread compression and yield curve flattening. The Trust outperformed during the latter time due to its overweight in longer-dated bonds, its barbell credit structure, its slightly longer duration and its participation in new-issue deals, which were coming at significant discounts to secondary market levels. We also used the new-issue market to increase the Trust s exposure to bonds that have retail appeal, as these bonds should benefit from an environment with favorable municipal supply and demand factors.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT	JULY 31, 2009	11

BlackRock New York Municipal Income Trust

Investment Objective

BlackRock New York Municipal Income Trust (BNY) (the Trust) seeks to provide high current income which, in the opinion of bond counsel to the issuer, is exempt from regular federal income tax and New York State and New York City personal income taxes. No assurance can be given that the Trust s investment objective will be achieved.

Performance

For the 12 months ended July 31, 2009, the Trust returned (1.44)% based on market price and (1.28)% based on NAV. For the same period, the closed-end Lipper New York Municipal Debt Funds category posted an average return of 1.84% based on market price and (2.86)% on a NAV basis. All returns reflect reinvestment of dividends. The Trust s premium to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. Performance was positively affected by a slightly-above-average distribution rate, as well as the Trust s positioning in longer-dated maturities. The one-year period comprised two separate and major fixed income market moves. 12	ANNUAL REPORT	JULY 31, 2009

The Benefits and Risks of Leveraging

The Trusts may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, the Trusts issue Preferred Shares, which pay dividends at prevailing short-term interest rates, and invest the proceeds in long-term municipal bonds. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Trust on its longer-term portfolio investments. To the extent that the total assets of the Trust (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, the Trust s Common Shareholders will benefit from the incremental yield.

To illustrate these concepts, assume a Trust s Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Trust pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the securities purchased by the Trust with assets received from the Preferred Shares issuance earn the income based on long-term interest rates. In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the Trust s long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental net income.

Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Trust pays dividends on the higher short-term interest rates whereas the Trust s total portfolio earns income based on lower long-term interest rates. If short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental net income pickup on the Common Shares will be reduced or eliminated completely.

Furthermore, the value of the Trust s portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Trust s Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Trust s NAV positively or negatively in addition to the impact on Trust performance from leverage from Preferred Shares discussed above.

The Trusts may also, from time to time, leverage their assets through the use of tender option bond (TOB) programs, as described in Note 1 of the Notes to Financial Statements. TOB investments generally will provide the Trusts with economic benefits in periods of declining short-term interest rates, but expose the Trusts to risks during periods of rising short-term interest rates similar to those associated with Preferred Shares issued by the Trusts, as described above. Additionally, fluctuations in the market value of municipal bonds deposited into the TOB trust may adversely affect the Trusts NAV per share.

The use of leverage may enhance opportunities for increased returns to the Trusts and Common Shareholders, but as described above, it also creates risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in the Trusts NAV, market price and dividend rate than a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Trusts net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Trusts net income will be less than if leverage had not been used, and therefore the amount available for distribution to Common Shareholders will be reduced. The Trusts may be required to sell portfolio securities at inopportune times or at distressed values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments, which may cause the Trusts to incur losses. The use of leverage may limit the Trusts ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by a Trust. The Trusts will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce returns on the Common Shares.

Under the Investment Company Act of 1940, each Trust is permitted to issue Preferred Shares in an amount of up to 50% of its total managed assets at the time of issuance. Under normal circumstances, each Trust anticipates that the total economic leverage from Preferred Shares and TOBs will not exceed 50% of its total managed assets at the time such leverage is incurred. As of July 31, 2009, the Trusts had economic leverage from Preferred Shares and/or TOBs as a percentage of their total managed assets as follows:

Leverage BlackRock California Investment Quality Municipal Trust Inc. 37% BlackRock California Municipal Income Trust 40% BlackRock Florida Municipal 2020 Term Trust 39% BlackRock Investment Quality Municipal Income Trust 39% BlackRock Municipal Income Investment Trust 40% BlackRock New Jersey Investment Quality Municipal Trust Inc. 38% BlackRock New Jersey Municipal Income Trust 38% BlackRock New York Investment Quality Municipal Trust Inc. 37% BlackRock New York Municipal Income Trust 40%

Derivative Financial Instruments

The Trusts may invest in various derivative instruments, including financial futures contracts and swaps, as specified in Note 2 of the Notes to Financial Statements, which constitute forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the counterparty to the transaction and illiquidity of the derivative instrument. The Trusts ability to successfully use a derivative instrument depends on the investment advisor s ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require a Trust to sell or purchase portfolio securities at inopportune times or for distressed values, may limit the amount of appreciation a Trust can realize on an investment or may cause a Trust to hold a security that it might otherwise sell. The Trusts investments in these instruments are discussed in detail in the Notes to Financial Statements.

CMA California Municipal Money Fund, 0.04% (b)(c)	1,637,526	\$ 1,637,526
Total Short-Term Securities (Cost \$1,637,526) 13.1%		1,637,526
Total Investments (Cost \$20,591,079*) 161.1%		20,045,022
Liabilities in Excess of Other Assets (3.6)%		(445,496)
Liability for Trust Certificates, Including Interest Expense and Fees Payable $(9.9)\%$		(1,233,307)
Preferred Shares, at Redemption Value (47.6)%		 (5,925,376)
Net Assets Applicable to Common Shares 100.0%		\$ 12,440,843

^{*} The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$	19,381,083
	_	
Gross unrealized appreciation	\$	230,421
Gross unrealized depreciation		(799,365)
	_	
Net unrealized depreciation	\$	(568,944)

- (a) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired the residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (b) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate Income

	Net Activity	
CMA California Municipal Money Fund	1,105,390	\$ 6,325

(c) Represents the current yield as of report date.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Securities Level 2 Long-Term Investment's	\$ 1,637,526 18,407,496
Level 3	10,107,170
Total	\$ 20,045,022

¹ See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.

ANNUAL	REPORT	JULY 31, 2009	17

Schedule of Investments (concluded)

BlackRock California Municipal Income Trust (BFZ)

* The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 276,419,926
Gross unrealized appreciation	\$ 3,850,332
Gross unrealized depreciation	(19,409,820)
Net unrealized depreciation	\$ (15,559,488)

- (a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (d) Security is collateralized by Municipal or US Treasury Obligations.
- (e) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (f) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity, and is subject to mandatory redemption at maturity.
- (g) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (h) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA California Municipal Money Fund	(13,825,340)	\$ 75,890

(i) Represents the current yield as of report date.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair

values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Securities Level 2 Long-Term Investments	\$ 3,630,796 313,608,419
Level 3	515,006,419
Total	\$ 317,239,215

See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.

Net Assets Applicable to Common Shares 100.0% \$ 74,255,949

* The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 121,518,412
Gross unrealized appreciation	\$ 1,341,818
Gross unrealized depreciation	(7,196,833)
Net unrealized depreciation	\$ (5,855,015)

- (a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (d) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA Florida Municipal Money Fund	(281,811)	\$ 19,328

(e) Represents the current yield as of report date.

Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the

Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short Term Securities	\$ 120,735
Level 2 Long Term Investments Level 3	120,176,235
Total	\$ 120,296,970

See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.

Total Investments (Cost \$21,160,043*) 163.4%		20,537,502
Other Assets Less Liabilities 1.1%		131,224
Liability for Trust Certificates, Including Interest Expense and Fees Payable (28.1)%		(3,528,242)
Preferred Shares, at Redemption Value (36.4)%		(4,575,218)
Net Assets Applicable to Common Shares 100.0%		\$ 12,565,266

^{*} The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 17,680,547
Gross unrealized appreciation	\$ 656,592
Gross unrealized depreciation	(1,323,747)
Net unrealized depreciation	\$ (667,155)

- (a) Security is collateralized by Municipal or US Treasury Obligations.
- (b) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (c) Non-income producing security.
- (d) Issuer filed for bankruptcy and/or is in default of interest payments.
- (e) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (f) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA Florida Municipal Money Fund	(519,263)	\$ 10,238
FFI Institutional Tax-Exempt Fund	100,105	\$ 485

(g) Represents the current yield as of report date.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Securities	\$ 100,105
Level 2 Long-Term Investment's Level 3	20,437,397
201013	
Total	\$ 20,537,502

26	ANNUAL REPORT	JULY 31, 2009

Schedule of Investments (concluded)

BlackRock Municipal Income Investment Trust (BBF)

* The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 120,561,464
Gross unrealized appreciation	\$ 4,122,726
Gross unrealized depreciation	(7,240,498)
Net unrealized depreciation	\$ (3,117,772)

- (a) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Non-income producing security.
- (d) Issuer filed for bankruptcy and/or is in default of interest payments.
- (e) When-issued security.
- (f) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (g) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA Florida Municipal Money Fund	(6,503,333)	\$ 51,123
FFI Institutional Tax-Exempt Fund	1,702,906	\$ 4,821

(h) Represents the current yield as of report date.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust s policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	 Assets
Level 1 Short-Term Securities	\$ 1,702,906
Level 2 Long-Term Investments Level 3	137,969,550
Total	\$ 139,672,456

See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.

* The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 19,542,466
Gross unrealized appreciation	\$ 513,817
Gross unrealized depreciation	(1,841,356)
Net unrealized depreciation	\$ (1,327,539)

- (a) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown is as of report date.
- (b) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (c) Security is collateralized by Municipal or US Treasury Obligations.
- (d) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (e) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA New Jersey Municipal Money Fund	403,358	\$6,120

(f) Represents the current yield as of report date.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Securities	\$ 819,689
Level 2 Long-Term Investment's Level 3	17,555,155
Level 5	
Total	\$ 18,374,844

See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.

ANNUAL REPORT	JULY 31, 2009	3

Schedule of Investments (concluded)

BlackRock New Jersey Municipal Income Trust (BNJ)

* The cost and unrealized appreciation (depreciation) of investments as of July 31, 2009, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 164,657,583
Gross unrealized appreciation	\$ 4,473,259
Gross unrealized depreciation	(14,292,025)
Net unrealized depreciation	\$ (9,818,766)

- (a) Represents a step-up bond that pays an initial coupon rate for the first period and then a higher coupon rate for the following periods. Rate shown reflects the current yield as of report date.
- (b) US government securities, held in escrow, are used to pay interest on this security, as well as to retire the bond in full at the date indicated, typically at a premium to par.
- (c) Represents a zero-coupon bond. Rate shown reflects the current yield as of report date.
- (d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (e) Security represents a beneficial interest in a trust. The collateral deposited into the trust is federally tax-exempt revenue bonds issued by various state or local governments, or their respective agencies or authorities. The security is subject to remarketing prior to its stated maturity, and is subject to mandatory redemption at maturity.
- (f) Securities represent bonds transferred to a tender option bond trust in exchange for which the Trust acquired residual interest certificates. These securities serve as collateral in a financing transaction. See Note 1 of the Notes to Financial Statements for details of municipal bonds transferred to tender option bond trusts.
- (g) Investments in companies considered to be an affiliate of the Trust, for purposes of Section 2(a)(3) of the Investment Company Act of 1940, were as follows:

Affiliate	Net Activity	Income
CMA New Jersey Municipal Money Fund	9,141,934	\$68,437

(h) Represents the current yield as of report date.

Effective August 1, 2008, the Trust adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value

of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are active, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstances, to the extent observable inputs are not available (including the Trust s own assumptions used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Trust spolicy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of July 31, 2009 in determining the fair valuation of the Trust s investments:

Valuation Inputs	Investments in Securities
	Assets
Level 1 Short-Term Investments Level 2 Long-Term Investments	\$ 10,639,704 145,558,409
Level 3 Total	\$ 156,198,113

¹ See above Schedule of Investments for values in each sector.

See Notes to Financial Statements.
