PART I

Item 1. Business Forward Looking Statements

This report contains forward-looking statements, which can be identified by the use of such words as estimate, project, believe, intend, anticipate, plan, seek, expect and similar expressions. These forward-looking statements include:

statements of our goals, intentions and expectations;

statements regarding our business plans and prospects and growth and operating strategies;

statements regarding the asset quality of our loan and investment portfolios; and

estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks, assumptions and uncertainties, including, among other things, the following important factors that could affect the actual outcome of future events:

significantly increased competition among depository and other financial institutions;

inflation and changes in the interest rate environment that reduce our interest margins or reduce the fair value of financial instruments;

general economic conditions, either nationally or in our market areas, that are worse than expected;

decreased demand for our products and services and lower revenue and earnings because of a recession;

adverse changes and volatility in the securities markets;

adverse changes and volatility in credit markets;

legislative or regulatory changes that adversely affect our business;

our ability to enter new markets successfully and take advantage of growth opportunities, and the possible short-term dilutive effect of potential acquisitions or de novo branches, if any;

Edgar Filing: TFS Financial CORP - Form 10-K

changes in consumer spending, borrowing and savings habits;

changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board and the Public Company Accounting Oversight Board;

future adverse developments concerning Fannie Mae or Freddie Mac;

changes in monetary and fiscal policy of the U.S. Government, including policies of the U.S. Treasury and the Federal Reserve Board;

changes in policy and/or assessment rates of taxing authorities that adversely affect us;

inability of third-party providers to perform their obligations to us;

changes in our organization, compensation and benefit plans; and

the strength or weakness of the real estate markets and of the consumer and commercial credit sectors and its impact on the credit quality of our loans and other assets.

Because of these and other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements. Please see **Item 1A. Risk Factors**, for a discussion of certain risks related to our business.

TFS FINANCIAL CORPORATION

TFS Financial Corporation (we us our or the Company) was organized in 1997 as the mid-tier stock holding company for Third Federal Saving and Loan Association of Cleveland (Third Federal Savings and Loan or the Association). We completed our initial public stock offering on April 20, 2007 and issued 100,199,618 shares of common stock, or 30.16% of our post-offering outstanding common stock, to subscribers in the offering. Additionally, at the time of the public offering, 5,000,000 shares of our common stock, or 1.50% of our outstanding shares, were issued to our newly formed charitable foundation, Third Federal Foundation (the Foundation). Third Federal Savings and Loan Association of Cleveland, MHC (Third Federal Savings, MHC), our mutual holding company parent, holds the remainder of our outstanding common stock (227,119,132 shares). Net proceeds from our initial public stock offering were approximately \$886 million and reflected the costs we incurred in completing the offering as well as a \$106.5 million loan to the Third Federal Employee Stock Ownership Plan related to its acquisition of shares in the initial public stock offering. In February 2008, the Company s board of directors authorized a stock repurchase program totaling 15.8 million shares. A second repurchase program was authorized in September 2008 for 5.0 million shares, commencing immediately following completion of the first repurchase program. Through September 30, 2008, approximately 16.1 million shares had been repurchased at a total cost of \$192.7 million.

Our ownership of the Association remains our primary business activity.

We also operate Third Capital, Inc. as a wholly-owned subsidiary.

As the holding company of Third Federal Savings and Loan, we are authorized to pursue other business activities permitted by applicable laws and regulations for savings and loan holding companies, which include making equity investments and the acquisition of banking and financial services companies. We have no plans for any mergers or acquisitions at the present time.

Our cash flow depends primarily on earnings from the investment of the portion of the net offering proceeds we retained, and any dividends we receive from Third Federal Savings and Loan and Third Capital, Inc. The majority of our officers are also officers of the Association. In addition, we use the services of the support staff of the Association from time to time. We may hire additional employees, as needed, to the extent we expand our business in the future.

THIRD CAPITAL, INC.

Third Capital, Inc. is a Delaware corporation that was organized in 1998 as our wholly-owned subsidiary. At September 30, 2008, Third Capital, Inc. had consolidated assets of \$78.4 million, and for the fiscal year ended September 30, 2008, Third Capital, Inc. had consolidated net income of \$2.1 million. Third Capital, Inc. has no separate operations other than as the holding company for its operating subsidiaries, and as a minority investor or partner in other entities including minority investments in private equity funds. The following is a description of the entities, other than the private equity funds, in which Third Capital, Inc. is the owner, an investor or a partner.

Hazelmere Investment Group I, Ltd. and Hazelmere of California Limited Partnership. These entities engage in net lease transactions of commercial buildings in targeted United States markets. Third Capital, Inc. is a partner of each of these entities, receives a preferred return on amounts contributed to acquire investment properties and has a 70% ownership interest in remaining earnings. James Gascoigne, a director of the Company, indirectly owns or controls the majority of the remaining 30% ownership interest of these entities. Overall, the Hazelmere entities had pre-tax income of \$1.5 million during fiscal 2008.

Third Cap Associates, Inc. This corporation also maintains minority investments in private equity funds, and owns between 49% and 60% of two title agencies that provide escrow and settlement services in the State of Ohio, primarily to customers of Third Federal Savings and Loan. For the fiscal year ended September 30, 2008, Third Cap Associates, Inc. recorded net income of \$2.5 million.

Third Capital Mortgage Insurance Company. This Vermont corporation reinsures private mortgage insurance on residential mortgage loans originated by Third Federal Savings and Loan. For the fiscal year ended September 30, 2008, Third Capital Mortgage Insurance Company incurred a net loss of \$2.2 million.

THIRD FEDERAL SAVINGS AND LOAN ASSOCIATION OF CLEVELAND

General

Third Federal Savings and Loan is a federally chartered savings and loan association headquartered in Cleveland, Ohio that was organized in 1938. In May 1997, the Association reorganized into its current two-tier mutual holding company structure. The Association s principal business consists of originating residential real estate mortgage loans and equity loans and lines of credit and attracting retail savings deposits.

The Association s business strategy is to originate mortgage loans with interest rates that are competitive with those of similar products offered by other financial institutions in its markets. Similarly, the Association offers high-yield checking accounts and high-yield savings accounts and certificate of deposit accounts, each bearing interest rates that are competitive with similar products offered by other financial institutions in its markets. The Association expects to continue to pursue this business philosophy. While this strategy does not enable it to earn the highest rates of interest on loans it offers or pay the lowest rates on its deposit accounts, the Association believes that this strategy is the primary reason for its successful growth in the past.

The Association attracts retail deposits from the general public in the areas surrounding its main office and its branch offices. It also utilizes its internet website and its telephone call center to generate loan applications and attract retail deposits. In addition to residential real estate mortgage loans and equity loans and lines of credit, the Association originates residential construction loans. The Association retains in its portfolio the majority of the loans that it originates. Loans that the Association sells consist primarily of long-term, fixed-rate residential real estate mortgage loans. The Association retains the servicing rights on all loans that it sells. The Association s revenues are derived primarily from interest on loans and, to a lesser extent, interest on interest-bearing deposits in other financial institutions, federal funds sold, and investment securities including mortgage-backed securities. The Association also generates revenues from fees and service charges. The Association s primary sources of funds are deposits, borrowings, principal and interest payments on loans and securities and proceeds from loan sales.

The Association s website address is *www.thirdfederal.com*. Filings of the Company made with the Securities and Exchange Commission are available for free on the Association s website. Information on that website is not and should not be considered a part of this document.

Market Area

Third Federal Savings and Loan conducts its operations from its main office in Cleveland, Ohio, and from 37 additional, full-service branches and eight loan production offices located throughout the states of Ohio and Florida. In Ohio, the Association s 23 full-service offices are located in the northeast Ohio counties of Cuyahoga, Lake, Lorain, Medina and Summit, four loan production offices are located in the central Ohio county of Franklin (Columbus, Ohio) and four loan production offices are located in the southern Ohio county of Hamilton (Cincinnati, Ohio). In Florida, 15 full-service branches are located in the counties of Pasco, Pinellas, Hillsboro, Sarasota, Lee, Collier, Miami-Dade, Palm Beach and Broward. The economies and housing markets in Ohio and Florida have been seriously impacted by the current economic downturn. Both states have experienced dramatic increases in foreclosures and reductions in employment rates and housing values. The depressed housing market and employment uncertainties have created an aura of pessimism and apprehension, and are manifested in suppressed consumer housing demand. Additionally, a number of troubled financial institutions, both national and regional, that compete in our markets have targeted retail deposit gathering as an alternative funding source as the wholesale funding markets that they previously utilized have either ceased to function or have imposed

punitive pricing parameters. Faced with the alternative of high wholesale funding costs, these institutions have pursued retail deposit gathering and significantly increased their interest rates paid to depositors. The combination of reduced demand by borrowers and higher rates paid to depositors has created an increasingly competitive marketplace that could adversely affect future operating results.

The Association also provides savings products in all 50 states and offers secured lines of credit in 20 states through its internet site.

Competition

The Association faces intense competition in its market areas both in making loans and attracting deposits. Its market areas have a high concentration of financial institutions, including large money center and regional banks, community banks and credit unions and it faces additional competition for deposits from money market funds, brokerage firms, mutual funds and insurance companies. Some of its competitors offer products and services that the Association currently does not offer, such as commercial business loans, trust services and private banking.

The majority of the Association s deposits are held in its offices located in Cuyahoga County, Ohio. As of June 30, 2008 (the latest date for which information is publicly available), the Association had \$4.67 billion of deposits in Cuyahoga County, and ranked third among all financial institutions with offices in the county in terms of deposits, with a market share of 8.92%. As of that date, the Association had \$5.71 billion of deposits in the State of Ohio, and ranked 9th among all financial institutions in the state in terms of deposits, with a market share of 2.51%. As of June 30, 2008, the Association had \$2.56 billion of deposits in the State of Florida, and ranked 22nd among all financial institutions in terms of deposits, with a market share of 0.67%.

From January 2008 through September 2008, the Association had the largest market share of conventional purchase mortgage loans originated in Cuyahoga County, Ohio. For the same period, it also had the largest market share of conventional purchase mortgage loans originated in four of the largest northeast Ohio counties. In addition, based on the same statistic, the Association has consistently been one of the six largest lenders in Franklin County (Columbus, Ohio) and Hamilton County (Cincinnati, Ohio) since it entered those markets in 1999.

The Association s primary strategy for increasing and retaining its customer base is to offer competitive deposit and loan rates and other product features, delivered with exceptional customer service, in each of the markets it serves.

We rely on our 70 year history of serving our customers and the communities in which we operate, our high capital levels, and liquidity alternatives to maintain and nurture customer and marketplace confidence. Our high capital ratio continues to reflect the beneficial impact of our April 2007 initial public offering, which raised net proceeds of \$886 million. At September 30, 2008, our ratio of shareholders equity to total assets was 17.1%. Our liquidity alternatives include management and monitoring of the level of liquid assets held in our portfolio as well as the maintenance of alternative wholesale funding sources. At September 30, 2008, our liquidity ratio was 8.93% and we had the ability to immediately borrow an additional \$499.8 million from the Federal Home Loan Bank of Cincinnati (FHLB of Cincinnati) under existing credit arrangements. See Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operation Liquidity and Capital Resources.

In many respects, nurturing customer and marketplace confidence is as much an art as it is a science. To address this, we continue to utilize a multifaceted approach that supports our efforts in several different ways. First, we provide thorough and timely information to all of our associates so as to prepare them for their day-to-day interactions with customers and other individuals who are not part of the Company. We believe that it is important that our customers and others sense the comfort level and confidence of our associates throughout their dealings. Second, we encourage our management team to maintain a presence and to be available in our

branches and other areas of customer contact, so as to provide more opportunities for informal contact and interaction with our customers and community members. Third, our CEO remains accessible to both local and national media, as a spokesman for our institution as well as an observer and interpreter of financial marketplace situations and events. Fourth, we periodically include advertisements in local newspapers that display our strong capital levels and history of service. We also continue to emphasis our traditional tagline STRONG * STABLE * SAFE in our advertisements and branch displays. Finally, for customers who adhere to the old adage of trust but verify, we refer them to the safety/security rankings of two nationally recognized, independent rating organizations that specialize in the evaluation of financial institutions (each of which have awarded Third Federal Savings with its highest rating).

Lending Activities

The Association s principal lending activity is the origination of first mortgage loans to purchase or refinance residential real estate. Its current policies generally provide that it will maintain between 40% and 70% of its assets in fixed-rate, residential real estate, first mortgage loans and up to 20% of its assets in adjustable-rate, residential real estate, first mortgage loans, subject to its liquidity levels and the credit demand of its customers. The Association also originates a significant amount of equity loans and equity lines of credit, and, to a lesser extent, residential real estate mortgage loans totaled \$6.70 billion, or 72.0% of our loan portfolio, equity loans and lines of credit totaled \$2.49 billion, or 26.7% of our loan portfolio, and residential construction loans totaled \$115.3 million, or 1.2% of our loan portfolio.

Loan Portfolio Composition. The following table sets forth the composition of the Association s loan portfolio, by type of loan at the dates indicated, excluding loans held for sale.

Loan Portfolio Maturities. The following table summarizes the scheduled repayments of the Association s loan portfolio at September 30, 2008. Demand loans, loans having no stated repayment schedule or maturity, and overdraft loans are reported as being due in the fiscal year ending September 30, 2009. Maturities are based on the final contractual payment date and do not reflect the impact of prepayments and scheduled principal amortization.

(1) Includes bridge loans.

Residential Real Estate Mortgage Loans. The Association s primary lending activity is the origination of residential real estate mortgage loans. At September 30, 2008, \$6.70 billion, or 72.0% of its total loan portfolio, consisted of residential real estate mortgage loans. The Association offers conforming and non-conforming, fixed-rate and adjustable-rate residential real estate mortgage loans with maturities of up to 30 years and maximum loan amounts generally of up to \$2.0 million, although a substantial portion of real estate mortgage loans are in amounts of \$650,000 or less.

The Association currently offers fixed-rate conventional mortgage loans with terms of up to 30 years that are fully amortizing with monthly loan payments, and adjustable-rate mortgage loans that amortize over a period of up to 30 years, provide an initial fixed interest rate for one, three, or five years and then adjust annually. The Association originates fixed-rate mortgage loans with terms of less than 15 years, but at rates applicable

15-year loans. It also offers interest only loans, where the borrower pays interest for an initial period (one, three or five years), after which the loan converts to a fully amortizing loan. The Association s Lowest Rate Guarantee program provides that, subject to the terms and conditions of the guarantee program, if a loan applicant finds a lower fixed interest rate on a residential real estate mortgage loan than the rate the Association offers, the Association will offer a lower rate or, after the applicant closes a loan with another lender at the lower interest rate, pay the loan applicant \$1,000.

Residential real estate mortgage loans are generally underwritten according to Fannie Mae guidelines, and the Association refers to loans that conform to such guidelines as conforming loans. The Association generally originates both fixed- and adjustable-rate mortgage loans in amounts up to the maximum conforming loan limits as established by the Office of Federal Housing Enterprise Oversight, which is currently \$417,000 for single-family homes in most of our lending markets. The Association also originates loans above the lending limit for conforming loans, which the Association refers to as jumbo loans. The Association generally underwrites jumbo loans in a manner similar to conforming loans. These jumbo loans are generally eligible for sale to various firms that specialize in purchasing non-conforming loans although activity in the market for jumbo loans has decreased dramatically during 2008. Jumbo loans are not uncommon in the Association s market areas.

The Association has always considered the promotion of home ownership a primary goal. In that regard, it offers affordable housing programs in all of its market areas. These programs are targeted toward low- and moderate-income home buyers. The Association s primary program is called Home Today and is described in detail below. Recently, attention has focused on sub-prime lending and its negative effect on borrowers and financial markets alike. Borrowers in the Home Today program are not charged higher fees or interest rates than non-Home Today borrowers. These loans are not interest only or negative amortizing and contain no low initial payment features or adjustable interest rates, features often associated with sub-prime lending. While the credit risk profiles of the Association s Home Today borrowers are generally higher risk than the credit risk profiles of its non-Home Today borrowers, the Association attempts to mitigate that higher risk through the use of private mortgage insurance and continued pre- and post-purchase counseling. The Association s philosophy has been to provide borrowers the opportunity for home ownership within their financial means. While the Home Today Program does have a higher risk characteristic, the Association does not classify it as a sub-prime lending program based on the exclusion provided to community development loans in the Office of Thrift Supervision s *Expanded Guidance for Sub-prime Lending*.

Through the Association s Home Today program, the Association originates loans with its standard terms to borrowers who might not otherwise qualify for such loans. To qualify for the Association s Home Today program, a borrower must complete financial management education and counseling and must be referred to the Association by a sponsoring organization with which the Association has partnered as part of the program. Borrowers must meet a minimum credit score threshold. The Association will originate loans with a loan-to-value ratio of up to 95% through its Home Today program, provided that any loan originated through this program with a loan-to-value ratio in excess of 80% must meet the underwriting criteria mandated by its private mortgage insurance carrier. Because the Association applies less stringent underwriting and credit standards to these loans, loans originated under the Home Today program have greater credit risk than traditional residential real estate mortgage loans. Effective October 2007, the private mortgage insurance carrier that provides coverage for the Home Today loans with loan-to-value ratios in excess of 80% has imposed more restrictive lending requirements that have already decreased the volume of Home Today lending, which we expect will continue through 2009. As of September 30, 2008, the Association had \$303.2 million of loans outstanding that were originated through its Home Today program. See Non-performing and Problem Assets Delinquent Loans for a discussion of the asset quality of this portion of the Association s loan portfolio.

The Association also originates loans under its High LTV program. These loans have loan-to-value ratios of 90% or greater, and may be as high as 95%. To qualify for this program, the loan applicant must satisfy more stringent underwriting criteria (credit score, income qualification, and other criteria). Borrowers do not obtain private mortgage insurance with respect to these loans. High LTV loans are originated with higher interest rates

than the Association s other residential real estate loans. The higher credit quality of this portion of the Association s portfolio offsets the risk of not requiring private mortgage insurance. While these loans are not initially covered by private mortgage insurance, the Association has negotiated with a private mortgage insurance carrier a contract under which, at the Association s option, a pre-determined dollar amount of qualifying loans may be grouped and submitted to the carrier for pooled private mortgage insurance coverage. As of September 30, 2008, the Association had \$392.5 million of loans outstanding that were originated through its High LTV program, \$340.9 million of which the Association has insured through a mortgage insurance carrier.

For loans with loan-to-value ratios in excess of 80% but lower than 90%, the Association requires either private mortgage insurance or a higher interest rate. For loans with loan-to-value ratios of 90% that are not its High LTV loans, the Association requires private mortgage insurance.

The Association actively monitors its interest rate risk position to determine the desirable level of investment in fixed-rate mortgages. Depending on market interest rates and its capital and liquidity positions, the Association may retain all of its newly originated longer-term fixed-rate residential mortgage loans, the Association may sell all or a portion of such loans in the secondary mortgage market to governmental entities such as Fannie Mae or other purchasers, or the Association may securitize such loans by selling the loans in exchange for mortgage-backed securities. These securities can be sold more readily to meet its liquidity or interest rate risk management needs, and have a lower risk-weight than the underlying loans, which reduces the Association s regulatory capital requirements. Almost all of the loans that the Association securitizes are fixed-rate mortgage loans.

During the financial market upheaval of 2008, concern arose about the financial health of Fannie Mae and Freddie Mac, the value of their guarantees and therefore the continued existence of the secondary market for mortgage loans upon which the Association relies for liquidity and interest rate risk management. This market was preserved when, in September 2008, the Federal Housing Finance Agency placed Fannie Mae and Freddie Mac into conservatorship. Shortly after taking control, the U.S. Treasury Department established financing agreements to ensure Fannie Mae and Freddie Mac meet their obligations to holders of mortgage-backed securities that they have issued or guaranteed.

During periods of low market interest rates, the Association may sell a substantial portion of its newly originated fixed-rate residential real estate mortgage loans. The Association currently retains the servicing rights on all loans sold in order to generate fee income and reinforce its commitment to customer service. For the fiscal year ended September 30, 2008, the Association received servicing fees related to these servicing rights of \$21.5 million. As of September 30, 2008, the principal balance of loans serviced for others totaled \$6.93 billion.

The Association currently offers several adjustable-rate mortgage loan products secured by residential properties with interest rates that are fixed for an initial period ranging from one year to five years. The Association also offers adjustable-rate mortgage loans that are fully-amortizing and that provide for the repayment of interest, and not principal (interest only loans), during an initial period. After the initial fixed period, the interest rate on adjustable-rate mortgage loans is generally reset every year based upon a contractual spread or margin above the average yield on U.S. Treasury securities, adjusted to a constant maturity of one year, as published weekly by the Federal Reserve Board, subject to periodic and lifetime limitations on interest rate changes. All of its interest only loans and its traditional adjustable-rate mortgage loans with initial fixed-rate periods of one, three or five years have initial and periodic caps of two percentage points on interest rate changes, with a cap of six percentage points for the life of the loan. Interest only loans are not available for initial fixed periods of more than five years. Previously, the Association offered adjustable-rate mortgage loans with an initial fixed-rate period of seven years. Loans originated under that program have an initial cap of five percentage points on the changes in interest rate, with a two percentage point cap on subsequent changes and a cap of five percentage points for the life of the loan. Many of the borrowers who select adjustable-rate mortgage loans into fixed-rate mortgage loans at no cost to the borrower.

The Association does not offer Option ARM loans, where borrowers can pay less than the interest owed on their loan, resulting in an increased principal balance during the life of the loan.

Adjustable-rate mortgage loans generally present different credit risks than fixed-rate mortgage loans primarily because the underlying debt service payments of the borrowers increase as interest rates increase, thereby increasing the potential for default. Interest-only loans present different credit risks than fully amortizing loans, as the principal balance of the loan does not decrease during the interest-only period. As a result, the Association s exposure to loss of principal in the event of default does not decrease during this period. These adjustable rate, interest only, loans comprise less than 3% of our residential loans and have historically not been popular with consumers during periods of volatile interest rates, such as we expect in the next twelve months.

The Association requires title insurance on all of its residential real estate mortgage loans, and the Association also requires that borrowers maintain fire and extended coverage casualty insurance (and, if appropriate, flood insurance) in an amount at least equal to the lesser of the loan balance or the replacement cost of the improvements. A majority of its residential real estate mortgage loans have a mortgage escrow account from which disbursements are made for real estate taxes and flood insurance. The Association does not conduct environmental testing on residential real estate mortgage loans unless specific concerns for hazards are identified by the appraiser used in connection with the origination of the loan.

Equity Loans and Equity Lines of Credit. The Association offers equity loans and equity lines of credit, which are primarily secured by a second mortgage on residences. The Association also offers an equity lending product that is secured by a third mortgage; although the Association only originates this loan to borrowers where the Association also holds the second mortgage. At September 30, 2008, equity loans totaled \$243.8 million, or 2.6%, of total loans receivable, and equity lines of credit totaled \$2.24 billion, or 24.1%, of total loans receivable. Additionally, at September 30, 2008, the unadvanced amounts of equity lines of credit totaled \$2.41 billion. The Association s equity lending products include bridge loans, where a borrower can utilize the existing equity in their current home to fund the purchase of a new home before the current home is sold. As of September 30, 2008, bridge loans totaled \$42.0 million, or 0.5% of total loans receivable, which is included in the total for equity loans, above.

The underwriting standards for equity loans and equity lines of credit include an evaluation of the applicant s credit history, an assessment of the applicant s ability to meet existing obligations and payments on the proposed loan and the value of the collateral securing the loan. In the fall of 2007, the combined loan-to-value ratio (first and second mortgage liens) for equity loans and equity lines of credit was reestablished at a limit of 85%, (from a limit of 89.99% that was generally in effect from the spring of 2006 through the fall of 2007). The Association originates its equity loans and equity lines of credit without application fees (except for bridge loans) or borrower-paid closing costs. Equity loans are offered with fixed interest rates, are fully amortizing and have terms of up to 15 years. The Association s equity lines of credit are offered with adjustable rates of interest indexed to the prime rate, as reported in *The Wall Street Journal*. The Association s Lowest Rate Guarantee program provides that, subject to the terms and conditions of the guarantee program, if a loan applicant or current equity line of credit borrower finds and qualifies for a better interest rate on a similar product with another lender, the Association will offer a lower rate or, if they close under the rate and terms presented with respect to the other lender, the Association will pay the loan applicant or borrower \$1,000.

Bridge loans are originated for a one-year term, with no prepayment penalties. These loans have fixed interest rates, and are limited to a combined 85% loan-to-value ratio (first and second mortgage liens). The Association charges a closing fee with respect to bridge loans.

Construction Loans. The Association originates construction loans for the purchase of developed lots and for the construction of single-family residences. Construction loans are offered to individuals for the construction of their personal residences by a qualified builder (construction/permanent loans), and to qualified builders (builder loans). At September 30, 2008, construction loans totaled \$115.3 million, or 1.2% of total loans receivable. At September 30, 2008, the unadvanced portion of these construction loans totaled \$46.5 million.

¹¹

The Association s construction/permanent loans generally provide for disbursements to the builder or sub-contractors during the construction phase as work progresses. During the construction phase, the borrower only pays interest on the drawn balance. Upon completion of construction, the loan converts to a permanent amortizing loan without the expense of a second closing. The Association offers construction/permanent loans with fixed or adjustable rates, and a maximum loan-to-completed-appraised value ratio of 95%. At September 30, 2008, the Association s construction/permanent loans totaled \$62.4 million, or 0.7% of total loans receivable.

The Association s builder loans consist of loans for homes that have been pre-sold as well as loans to developers that build homes before a buyer has been identified. The Association does not make land loans to developers for the acquisition and development of raw land. Construction loans to developers are limited to an 85% loan-to-completed-appraised value ratio for homes that are under contract for purchase and a 75% loan-to-completed-appraised value ratio for loans where no buyer has been identified. The interest rates are based on and adjust with the prime rate of interest, and are for terms of up to two years. As of September 30, 2008, the Association s builder loans totaled \$52.9 million, or 0.6% of total loans receivable.

Before making a commitment to fund a construction loan, the Association requires an appraisal of the property by an independent licensed appraiser. The Association generally also reviews and inspects each property before disbursement of funds during the term of the construction loan.

Construction financing generally involves greater credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan depends largely upon the accuracy of the initial estimate of the value of the property at completion of construction compared to the estimated cost (including interest) of construction and other assumptions. If the estimate of construction cost proves to be inaccurate, the Association may be required to advance additional funds beyond the amount originally committed in order to protect the value of the property. Moreover, if the estimated value of the completed project proves to be inaccurate, the borrower may hold a property with a value that is insufficient to assure full repayment of the construction loan upon the sale of the property. This is more likely to occur in a recession where home prices are falling, like our current economic environment.

Loan Originations, Purchases, Sales, Participations and Servicing. Lending activities are conducted primarily by the Association s loan personnel (all of whom are salaried employees) operating at our main and branch office locations and at our loan production offices. All loans that the Association originates are underwritten pursuant to its policies and procedures, which incorporate Fannie Mae underwriting guidelines to the extent applicable. The Association originates both adjustable-rate and fixed-rate loans. Its ability to originate fixed- or adjustable-rate loans is dependent upon the relative customer demand for such loans, which is affected by current market interest rates as well as anticipated future market interest rates. The Association s loan origination and sales activity may be adversely affected by a rising interest rate environment or economic recession, which typically results in decreased loan demand. Most of the Association s residential real estate mortgage loan originations are generated by its in-house loan representatives, by referrals from existing or past customers, by referrals from local builders and real estate brokers, from calls to its telephone call center and from the internet. The Association has a relationship with only one mortgage broker, which is affiliated with a national builder. During the fiscal year ended September 30, 2008, the Association originated \$53.1 million of loans through this relationship. All such loans are underwritten to conform to the Association s loan underwriting policies and procedures. The Association also advertises extensively throughout its market area.

The Association decides whether to retain the loans that it originates, sell loans in the secondary market or securitize loans after evaluating current and projected market interest rates, its interest rate risk objectives, its liquidity needs and other factors. The Association securitized and sold \$744.7 million of residential real estate mortgage loans (all fixed-rate loans, and primarily with 30-year terms) during the fiscal year ended September 30, 2008, and it held \$200.7 million of loans for sale in the secondary market at September 30, 2008. The fixed-rate mortgage loans that the Association originated and retained during the fiscal year ended September 30, 2008 consisted primarily of loans with 30-year terms. As discussed earlier, the recent government

support of Fannie Mae and Freddie Mac has addressed concerns about guarantees and the Association expects to continue to be able to securitize and sell loans.

The Association primarily sells its loans without recourse. Historically, the Association has retained the servicing rights on all residential real estate mortgage loans that it has sold, and intends to continue this practice in the future. At September 30, 2008, the Association serviced loans owned by others with a principal balance of \$6.93 billion. Loan servicing includes collecting and remitting loan payments, accounting for principal and interest, contacting delinquent borrowers, supervising foreclosures and property dispositions in the event of unremedied defaults, making certain insurance and tax payments on behalf of the borrowers and generally administering the loans. The Association retains a portion of the interest paid by the borrower on the loans it services as consideration for its servicing activities. The Association did not enter into any loan participations during the fiscal year ended September 30, 2008 and is not expected to do so in the near future.

Loan Approval Procedures and Authority. The Association s lending activities follow written, non-discriminatory underwriting standards and loan origination procedures established by its board of directors. The loan approval process is intended to assess the borrower s ability to repay the loan and the value of the property that will secure the loan. To assess the borrower s ability to repay, the Association reviews the borrower s employment and credit history and information on the historical and projected income and expenses of the borrower.

The Association s policies and loan approval limits are established by its board of directors. The Association s board of directors has delegated authority to its Executive Committee (consisting of the Association s Chief Executive Officer and two directors) to review and assign lending authorities to certain individuals of the Association to consider and approve loans within their designated authority. Residential real estate mortgage loans and construction loans in amounts above \$650,000 require the approval of two individuals with designated underwriting authority. Loans in amounts below \$650,000, including equity loans and equity lines of credit (which the Association caps at \$200,000) require the approval of one individual with designated underwriting authority. All loans that are approved by designated individuals are reviewed and ratified by the Executive Committee on a weekly basis.

The Association also maintains automated underwriting systems for point-of-sale approvals of residential real estate mortgage loans, equity loans and equity lines of credit. Applications for loans in amounts no greater than the conforming loan limit that meet certain credit and income criteria may receive a full approval with respect to the amount of credit available and the subject property. If the property securing the loan cannot be valued using an automated valuation model, the borrower may receive a credit approval only. Applications for loan amounts in excess of the conforming loan limit may only receive a credit approval, subject to an appraisal of the subject property.

The Association generally requires independent third-party appraisals of real property securing loan amounts in excess of \$250,000, although the Association may rely on alternative property valuation methods for loans up to the conforming loan limit. The Association obtains valuations or appraisals for all loans even if an appraisal is not required. The Association uses an automated valuation model to value most loans of \$250,000 or less. Appraisals are performed by independent licensed appraisers. All appraisers are reviewed and approved by the Association s board of directors annually.

Non-performing and Problem Assets. Within 15 days of a borrower s delinquency, the Association attempts personal, direct contact with the borrower to determine the reason for the delinquency, to ensure that the borrower correctly understands the terms of the loan and to emphasize the importance of making payments on or before the due date. If necessary, subsequent late charges and delinquent notices are issued and the borrower s account will be monitored on a regular basis thereafter. The Association also mails system-generated reminder notices on a monthly basis. When a loan is more than 30 days past due, the Association attempts to contact the borrower and develop a plan of repayment. By the 90th day of delinquency, the Association may recommend foreclosure. By this date, if a repayment agreement has not been established, or if an agreement is established but

is subsequently broken, the borrower s credit file is reviewed and, if considered necessary, information is updated or confirmed and the property securing the loan is re-evaluated. A summary report of all loans 30 days or more past due is provided to the Association s board of directors.

Loans are automatically placed on non-accrual status when payment of principal or interest is more than 90 days delinquent. Loans are also placed on non-accrual status if collection of principal or interest in full is in doubt or if the loan has been restructured. When loans are placed on a non-accrual status, unpaid accrued interest is fully reversed, and further income is recognized only to the extent received. The loan may be returned to accrual status if unpaid principal and interest are repaid so that the loan is less than 90 days delinquent.

Non-Performing Assets. The table below sets forth the amounts and categories of our non-performing assets at the dates indicated.

| | 2008 | 2007 | At September 30, 2006 Dollars in thousands | 2005 | 2004 |

(1) Includes bridge loans.

For the year ended September 30, 2008, gross interest income that would have been recorded had the non-accruing loans been current in accordance with their original terms was \$2.8 million. Interest income recognized on such loans for the year ended September 30, 2008 was not material. See Delinquent Loans.

Delinquent Loans. The following table sets forth loan delinquencies by type and by amount at the dates indicated.

| 2004 | 327,827 | 143,866 | 3.04% | 69% |
| 2005 | 231,078 | 108,626 | 5.12% | 69% |
| 2006 | 527,563 | 270,962 | 4.13% | 68% |
| 2007 | 763,515 | 414,131 | 1.01% | 69% |
| 2008 | 1,122,454 | 529,133 | 0.00% | 61% |
| Total | \$ 4,731,831 | \$ 2,244,288 | 2.10% | 67% |

In the early months of the calendar year 2008, we noted unfavorable trends in our primary lending markets, including but not limited to instability in employment and economic prospects, record residential foreclosure rates, further unfavorable trending of our equity line of credit delinquency level, and a steepening decline in residential housing values, linked, we believe, to the wholesale dumping of foreclosed housing stock by national mortgage lenders attempting to raise cash and maintain liquidity. In light of these events, beginning as of June 30, 2008 and prospectively, we have conducted an expanded loan level evaluation of our equity lines of credit which are delinquent 90 days or more. As a result of this evaluation process, we increased our allowance for loan losses related to equity lines of credit by \$15.0 million during the fiscal year ended September 30, 2008. We expect that, as these delinquencies of 90 days or more are resolved, and contingent upon future delinquency trends, we may realize an increase in net charge-offs related to equity lines of credit that will be applied against the allowance and could result in a net reduction in the balance of the allowance for loan losses.

Loans originated under the Home Today program, where the Association provides loans with its standard terms to borrowers who might not otherwise qualify for such loans, have greater credit risk than traditional residential real estate mortgage loans. At September 30, 2008, we had \$303.2 million of loans that were

Table of Contents

originated under the Home Today program, 30.9% of which were delinquent 30 days or more in repayments, compared to 1.2% for the portfolio of non-Home Today loans as of that date. At September 30, 2008, \$63.7 million of loans originated under the Home Today program were non-accruing loans, representing 36.8% of total non-accruing loans as of that date.

Real Estate Owned. Real estate acquired as a result of foreclosure or by deed in lieu of foreclosure is classified as real estate owned until sold. When property is acquired it is recorded at the lower of cost or estimated fair market value at the date of foreclosure, establishing a new cost basis. Estimated fair value generally represents the sale price a buyer would be willing to pay on the basis of current market conditions, including normal terms from other financial institutions, less the estimated costs to sell the property. Holding costs and declines in estimated fair market value result in charges to expense after acquisition. At September 30, 2008, we had \$14.1 million in real estate owned. For additional discussion see Management s Discussion and Analysis of Financial Condition and Results of Operation.

Classification of Assets. Our policies, consistent with regulatory guidelines, provide for the classification of loans and other assets that are considered to be of lesser quality as substandard, doubtful, or loss assets. An asset is considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those assets characterized by the distinct possibility that we will sustain some loss if the deficiencies are not corrected. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. Assets (or portions of assets) classified as loss are those considered uncollectible and of such little value that their continuance as assets is not warranted. Assets that do not expose us to risk sufficient to warrant classification in one of the aforementioned categories, but which possess potential weaknesses that deserve our close attention, are required to be designated as special mention.

When we classify assets as either substandard or doubtful, we allocate a portion of the related general loss allowances to such assets as we deem prudent. The allowance for loan losses is the amount estimated by management as necessary to absorb credit losses incurred in the loan portfolio that are both probable and reasonably estimable at the balance sheet date. When we classify a problem asset as loss, we provide a specific reserve for that portion of the asset that is uncollectible. Our determination as to the classification of our assets and the amount of our loss allowances are subject to review by our principal federal regulator, the Office of Thrift Supervision, which can require that we establish additional loss allowances. We regularly review our assets portfolio to determine whether any assets require classification in accordance with applicable regulations. On the basis of our review of our assets at September 30, 2008, classified assets consisted of substandard assets of \$160.8 million, doubtful assets of \$7.5 million and loss assets of \$22.8 million. As of September 30, 2008, we did not have any individual assets classified as substandard with balances exceeding \$1 million. The classified assets total includes \$172.9 million of nonperforming loans, \$14.1 million of real estate owned, and \$4.1 million of performing loans displaying a weakness sufficient to warrant an adverse classification. As of September 30, 2008, we had \$26.0 million of assets designated as special mention.

Impaired Loans. A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal and interest according to the contractual terms of the loan agreement. During the year ended September 30, 2008 in response to rapidly declining home values, the Company changed the population of loans that it individually evaluates for impairment to include real estate secured loans 180 days or more past due, except equity lines of credit which it evaluates at 90 or more days past due. Large groups of smaller balance homogeneous loans are combined and collectively evaluated by portfolio for impairment. For a collateral dependent loan, impairment is measured based on the fair value of the collateral. For a loan whose terms are modified in a troubled debt restructuring, the Company measures impairment based on the present value of expected future cash flows discounted at the loan s effective interest rate is based on the contractual rate of the original loan, not the terms of the restructuring. When the recorded investment of an impaired loan exceeds the fair value of the

collateral (or the present value of its expected future cash flows), a valuation allowance is established for the excess. For additional information regarding impaired loans, see footnote 5 in Item 15 (a)(1) Financial Statements.

Allowance for Loan Losses. We provide for loan losses based on the allowance method. Accordingly, all loan losses are charged to the related allowance and all recoveries are credited to it. Additions to the allowance for loan losses are provided by charges to income based on various factors which, in our judgment, deserve current recognition in estimating probable losses. We regularly review the loan portfolio and make provisions for loan losses in order to maintain the allowance for loan losses in accordance with accounting principles generally accepted in the United States of America. The allowance for loan losses consists of three components:

- (1) specific allowances established for any impaired loans for which the recorded investment in the loan exceeds the measured value of the collateral or, alternatively, the present value of expected future cash flows for the loan;
- (2) general allowances for loan losses for each loan type based on historical loan loss experience; and
- (3) adjustments to historical loss experience (general allowances), maintained to cover uncertainties that affect our estimate of probable losses for each loan type.

The adjustments to historical loss experience are based on our evaluation of several factors, including:

delinquency statistics (both current and historical) and the factors behind delinquency trends;

the status of loans in foreclosure, real estate in judgment and real estate owned;

the composition of the loan portfolio;

national, regional and local economic factors;

asset disposition loss statistics (both current and historical); and

the current status of all assets classified during the immediately preceding meeting of the Asset Classification Committee. We evaluate the allowance for loan losses based upon the combined total of the specific, historical loss and general components. Generally when the loan portfolio increases, absent other factors, the allowance for loan loss methodology results in a higher dollar amount of estimated probable losses than would be the case without the increase. Generally when the loan portfolio decreases, absent other factors, the allowance for loan loss methodology results in a lower dollar amount of estimated probable losses than would be the case without the decrease.

As described in Non-performing and Problem Assets Delinquent Loans, loans originated under the Home Today program have greater credit risk than traditional residential real estate mortgage loans. At September 30, 2008, we had \$303.2 million of loans that were originated under our Home Today program, 30.9% of which were delinquent 30 days or more in repayments, compared to 1.2% for our portfolio of non-Home Today loans as of that date.

Construction loans generally have greater credit risk than traditional residential real estate mortgage loans. The repayment of these loans depends upon the sale of the property to third parties or the availability of permanent financing upon completion of all improvements. In the event we make a loan on property that is not yet approved for the planned development, there is the risk that approvals will not be granted or will

Edgar Filing: TFS Financial CORP - Form 10-K

be delayed. These events may adversely affect the borrower and the collateral value of the property. Construction loans also expose us to the risk that improvements will not be completed on time in accordance with specifications and projected costs. In addition, the ultimate sale or rental of the property may not occur as anticipated.

We periodically evaluate the carrying value of loans and the allowance is adjusted accordingly. While we use the best information available to make evaluations, future adjustments to the allowance may be necessary if

conditions differ substantially from the information used in making the evaluations. In addition, as an integral part of its examination process, the Office of Thrift Supervision periodically reviews the allowance for loan losses. The Office of Thrift Supervision may require us to recognize additions to the allowance based on its analysis of information available to it at the time of its examination. For more on loan losses, see Management s Discussion and Analysis of Financial Condition and Results of Operation.

The following table sets forth activity in our allowance for loan losses for the fiscal years indicated.

Allocation of Allowance for Loan Losses. The following table sets forth the allowance for loan losses allocated by loan category, the total loan balances by category, and the percent of loans in each category to total loans at the dates indicated. The allowance for loan losses allocated to each category is not necessarily indicative of future losses in any particular category and does not restrict the use of the allowance to absorb losses in other categories.

Investments

The Association s board of directors is responsible for establishing and overseeing the Association s investment policy. The investment policy is reviewed at least annually by management and any changes to the policy are recommended to the board of directors and are subject to its approval. This policy dictates that investment decisions be made based on the safety of the investment, liquidity requirements, potential returns, the ability to provide collateral for pledging requirements, and consistency with our interest rate risk management strategy. The Association s Investment Committee, which consists of its chief operating officer, chief financial officer and other members of management, oversee its investing activities and strategies. The portfolio manager is responsible for making securities portfolio decisions in accordance with established policies. The portfolio manager has the authority to purchase and sell securities within specific guidelines established by the investment policy, but historically the portfolio manager has executed purchases only after extensive discussions with other Investment Committee members. All transactions are formally reviewed by the Investment Committee at least quarterly. In addition, all investment transactions are reviewed by the Executive Committee of the Association s board of directors within 60 days of the transaction date to determine compliance with our investment policy. Any investment which, subsequent to its purchase, fails to meet the guidelines of the policy is reported to the Investment Committee, which decides whether to hold or sell the investment.

The Association s current investment policy requires that it invests primarily in debt securities issued by the U.S. Government and agencies of the U.S. Government, which now include Fannie Mae and Freddie Mac. The policy also permits investments in mortgage-backed securities, including pass-through securities issued and guaranteed by Fannie Mae, Freddie Mac and Ginnie Mae as well as collateralized mortgage obligations (CMOs) and real estate mortgage investment conduits (REMICS) issued or backed by securities issued by these governmental agencies. The investment policy also permits investments in asset-backed securities, banker s acceptances, money market funds, term federal funds, repurchase agreements and reverse repurchase agreements.

The Association s current investment policy does not permit investment in municipal bonds, corporate debt obligations, preferred or common stock of government agencies or governmental agencies or equity securities other than its required investment in the common stock of the FHLB of Cincinnati. As of September 30, 2008, we held no asset-backed securities or securities with sub-prime credit risk exposure. As a federal savings association, Third Federal Savings and Loan is not permitted to invest in equity securities. This general restriction does not apply to the Company.

The Association s current investment policy prohibits hedging through the use of such instruments as financial futures, interest rate options and swaps, without specific approval from its board of directors.

Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities, requires that, at the time of purchase, we designate a security as held to maturity, available-for-sale, or trading, depending on our ability and intent. Securities designated as available-for-sale are reported at fair value, while securities designated as held to maturity are reported at amortized cost. We do not have a trading portfolio.

Our investment portfolio at September 30, 2008, primarily consisted of \$9.0 million of U.S. Government and federal agency obligations, \$30.5 million in primarily fixed-rate securities guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae, and \$801.2 million of REMICs.

U.S. Government and Federal Agency Obligations. While U.S. Government and federal agency securities generally provide lower yields than other investments in our securities investment portfolio, we maintain these investments, to the extent appropriate, for liquidity purposes, as collateral for borrowings and as an interest rate risk hedge in the event of significant mortgage loan prepayments.

Mortgage-Backed Securities. We purchase mortgage-backed securities insured or guaranteed by Fannie Mae, Freddie Mac or Ginnie Mae. We invest in mortgage-backed securities to achieve positive interest rate

spreads with minimal administrative expense, and to lower our credit risk as a result of the guarantees provided by Freddie Mac, Fannie Mae or Ginnie Mae. During the financial market upheaval of 2008, concern arose about the financial health of Fannie Mae and Freddie Mac, the value of their guarantees and therefore the continued existence of the secondary market for mortgage loans upon which the Company relies for liquidity and interest rate risk management. This market was preserved when, in September 2008, the Federal Housing Finance Agency placed Freddie Mac and Frannie Mae into conservatorship. The U.S. Treasury Department has established financing agreements to ensure that Fannie Mae and Freddie Mac meet their obligations to holders of mortgage-backed securities that they have issued or guaranteed.

Mortgage-backed securities are created by the pooling of mortgages and the issuance of a security with an interest rate that is less than the interest rate on the underlying mortgages. Mortgage-backed securities typically represent a participation interest in a pool of single-family or multi-family mortgages, although we invest primarily in mortgage-backed securities backed by one- to four-family mortgages. The issuers of such securities (generally Ginnie Mae, Fannie Mae and Freddie Mac) pool and resell the participation interests in the form of securities to investors such as the Association, and guarantee the payment of principal and interest to investors. Mortgage-backed securities generally yield less than the loans that underlie such securities because of the cost of payment guarantees and credit enhancements. However, mortgage-backed securities are more liquid than individual mortgage loans since there is an active trading market for such securities. While there has been significant disruption in the demand for private issuer mortgage-backed securities the Company typically purchases. In addition, mortgage-backed securities may be used to collateralize our specific liabilities and obligations. Investments in mortgage-backed securities involve a risk that the timing of actual payments will be earlier or later than the timing estimated when the mortgage-backed security was purchased, which may require adjustments to the amortization of any premium or acceleration of any discount relating to such interests, thereby affecting the net yield on our securities. We periodically review current prepayment speeds to determine whether prepayment estimates require modification that could cause amortization or accretion adjustments.

CMOs and REMICs are types of debt securities issued by a special-purpose entity that aggregates pools of mortgages and mortgage-backed securities and creates different classes of securities with varying maturities and amortization schedules, as well as a residual interest, with each class possessing different risk characteristics. The cash flows from the underlying collateral are generally divided into tranches or classes that have descending priorities with respect to the distribution of principal and interest cash flows, while cash flows on pass-through mortgage-backed securities are distributed pro rata to all security holders.

The following table sets forth the amortized cost and fair value of our securities portfolio (excluding FHLB of Cincinnati common stock) at the dates indicated.

Portfolio Maturities and Yields. The composition and maturities of the investment securities portfolio and the mortgage-backed securities portfolio at September 30, 2008 are summarized in the following table. Maturities are based on the final contractual payment dates, and do not reflect the impact of prepayments or early redemptions that may occur. All of our securities at September 30, 2008 were taxable securities.

Sources of Funds

General. Deposits traditionally have been the primary source of funds for the Association s lending and investment activities. The Association also borrows, primarily from the FHLB of Cincinnati, to supplement cash flow needs, to lengthen the maturities of liabilities for interest rate risk management purposes and to manage its cost of funds. Additional sources of funds are the proceeds of loan sales, scheduled loan payments, maturing investments, loan prepayments, collateralized wholesale borrowings, retained earnings and income on other earning assets.

Deposits. The Association generates deposits primarily from the areas in which its branch offices are located, as well as from its telephone call center and its internet website. It relies on its competitive pricing, convenient locations and customer service to attract and retain deposits. It offers a variety of deposit accounts with a range of interest rates and terms. Its deposit accounts consist of savings accounts (primarily high-yield savings), NOW accounts (primarily high-yield checking accounts), certificates of deposit and individual retirement accounts and other qualified plan accounts. It currently does not accept brokered deposits.

Interest rates paid, maturity terms, service fees and withdrawal penalties are established on a periodic basis. Deposit rates and terms are based primarily on current operating strategies and market interest rates, liquidity requirements, interest rates paid by competitors and our deposit growth goals.

At September 30, 2008, deposits totaled \$8.26 billion, NOW accounts totaled \$1.12 billion (including \$1.06 billion of high-yield checking accounts) and savings accounts totaled \$1.19 billion (including \$990.0 million of high-yield savings accounts). At September 30, 2008, the Association had a total of \$5.94 billion in certificates of deposit, of which \$3.67 billion had remaining maturities of one year or less. Based on historical experience and its current pricing strategy, management believes the Association will retain a large portion of these accounts upon maturity.

The following table sets forth the distribution of its average total deposit accounts, by account type, for the fiscal years indicated.

| | | 2008 | | For the Year | s Ended Sep 2007 | tember 30, | | 2006 | |
|-------------------------|--------------------|---------|-----------------------------|------------------------------|---------------------|-------------------------------------|--------------------|---------|-----------------------------|

Borrowings. At September 30, 2008, the Association had \$498.0 million of borrowings from third parties. The Association s third party borrowings consisted of loans, commonly referred to as advances, from the FHLB of Cincinnati. Borrowings from the FHLB Cincinnati are secured by the Association s investment in the common stock of the FHLB Cincinnati as well as by a blanket pledge of its mortgage portfolio not otherwise pledged. Our current additional borrowing capacity with the FHLB Cincinnati is \$499.8 million as limited by the amount of FHLB Cincinnati common stock that we own. From the perspective of the value of collateral securing advances, our capacity limit for additional borrowings from the FHLB Cincinnati at September 30, 2008 was \$2.20 billion, subject to satisfaction of the FHLB Cincinnati common stock ownership requirement, we would have to increase our ownership of FHLB Cincinnati common stock by an additional \$34.1 million.

\$ 5.941.166

| Federal Taxation | | | | | | |

General. The Company and Third Federal Savings and Loan are subject to federal income taxation in the same general manner as other corporations, with certain exceptions. Prior to the completion of our initial public stock offering on April 20, 2007, the Company and Third Federal Savings and Loan were included as part of Third Federal Savings, MHC s consolidated tax group. However, upon completion of the offering, the Company and Third Federal Savings and Loan are no longer a part of Third Federal Savings, MHC s consolidated tax group because Third Federal Savings, MHC no longer owns at least 80% of the common stock of the Company. For the period ended September 30, 2008 and prospectively, the Company intends to file consolidated federal tax returns with Third Federal Savings and Loan, its wholly-owned subsidiary. Third Federal Savings, MHC s and the Company s consolidated federal tax returns are not currently under audit, and have not been audited during the past five years. The following discussion of federal taxation is intended only to summarize certain pertinent federal income tax matters and is not a comprehensive description of the tax rules applicable to the Company or Third Federal Savings and Loan.

Bad Debt Reserves. Historically, the Third Federal Savings, MHC consolidated group used the specific charge off method to account for bad debt deductions for income tax purposes, and the Company intends to use the specific charge off method to account for tax bad debt deductions in the future.

Taxable Distributions and Recapture. Prior to 1996, bad debt reserves created prior to 1988 were subject to recapture into taxable income if Third Federal Savings and Loan failed to meet certain thrift asset and definitional tests or made certain distributions. Tax law changes in 1996 eliminated thrift-related recapture rules. However, under current law, pre-1988 tax bad debt reserves remain subject to recapture if the Association makes certain non-dividend distributions, repurchases any of its common stock, pays dividends in excess of earnings and profits, or fails to qualify as a bank for tax purposes.

At September 30, 2008, the total federal pre-base year bad debt reserve of Third Federal Savings and Loan was approximately \$105.0 million.

Charitable Contribution Carryovers. Federal income tax regulations limit charitable contribution deductions to 10% of taxable income. Unused charitable contribution deductions may be carried forward to the succeeding five taxable years. At September 30, 2008, TFS Financial Corporation has a charitable contribution carryover for federal income tax purposes of approximately \$38.4 million, which expires September 30, 2012.

State Taxation

Following its initial public stock offering in 2007, the Company converted from a qualified passive investment company domiciled in the State of Delaware to a qualified holding company in Ohio and is subject to Ohio tax levied on income. A significant majority of state taxes paid by the remaining entities in our corporate structure are also paid to the State of Ohio. Third Federal Savings and Loan is subject to Ohio franchise tax based on equity capital plus certain reserve amounts. Total equity capital for this purpose is reduced by certain exempted assets. The resulting net taxable value of capital is taxed at a rate of 1.3%. The other Ohio subsidiaries of the Company are taxed on the greater of a tax based on net income or net worth.

SUPERVISION AND REGULATION

General

The Company is a savings and loan holding company, and is required to file certain reports with, and is subject to examination by, and otherwise must comply with the rules and regulations of the Office of Thrift Supervision. TFS Financial Corporation is also subject to the rules and regulations of the Securities and Exchange Commission under the federal securities laws.

Third Federal Savings and Loan is examined and supervised by the Office of Thrift Supervision and is subject to examination by the Federal Deposit Insurance Corporation. This regulation and supervision establishes a comprehensive framework of activities in which an institution may engage and is intended primarily for the protection of the Federal Deposit Insurance Corporation s deposit insurance fund and depositors. Under this system of federal regulation, financial institutions are periodically examined to ensure that they satisfy applicable standards with respect to their capital adequacy, assets, management, earnings, liquidity and sensitivity to market interest rates. Following completion of its examination, the federal agency critiques the institution s operations and assigns its rating (known as an institution s CAMELS rating). Under federal law, an institution may not disclose its CAMELS rating to the public. Third Federal Savings and Loan also is a member of and owns stock in the FHLB of Cincinnati, which is one of the twelve regional banks in the Federal Home Loan Bank System. Third Federal Savings and Loan also is regulated to a lesser extent by the Board of Governors of the Federal Reserve System, governing reserves to be maintained against deposits and other matters. The Office of Thrift Supervision will examine Third Federal Savings and Loan and prepare reports for the consideration of the Association s board of directors on any operating deficiencies. Third Federal Savings and Loan s relationship

with its depositors and borrowers also is regulated to a great extent by federal law and, to a much lesser extent, state law, especially in matters concerning the ownership of deposit accounts and the form and content of Third Federal Savings and Loan s mortgage documents.

Any change in these laws or regulations, whether by the Federal Deposit Insurance Corporation, the Office of Thrift Supervision or Congress, could have a material adverse impact on the Company, Third Federal Savings and Loan and their operations.

Certain of the regulatory requirements that are applicable to Third Federal Savings and Loan and TFS Financial Corporation are described below. This description of statutes and regulations is not intended to be a complete explanation of such statutes and regulations and their effects on Third Federal Savings and Loan and TFS Financial Corporation and is qualified in its entirety by reference to the actual statutes and regulations.

Federal Banking Regulation

Business Activities. A federal savings association derives its lending and investment powers from the Home Owners Loan Act, as amended, and the regulations of the Office of Thrift Supervision. Under these laws and regulations, the Association may invest in mortgage loans secured by residential real estate without limitations as a percentage of assets, and may invest in non-residential real estate loans up to 400% of capital in the aggregate, commercial business loans up to 20% of assets in the aggregate and consumer loans up to 35% of assets in the aggregate, and in certain types of debt securities and certain other assets. An association also may establish subsidiaries that may engage in activities not otherwise permissible for an association, including real estate investment and securities and insurance brokerage.

Capital Requirements. Office of Thrift Supervision regulations require savings associations to meet three minimum capital standards: a 1.5% tangible capital ratio, a 4% leverage ratio (3% for savings associations receiving the highest rating on the CAMELS rating system) and an 8% risk-based capital ratio.

The risk-based capital standard for savings associations requires the maintenance of Tier 1 (core) and total capital (which is defined as core capital and supplementary capital) to risk-weighted assets of at least 4% and 8%, respectively. In determining the amount of risk-weighted assets, all assets, including certain off-balance sheet assets, are multiplied by a risk-weight factor of 0% to 100%, assigned by the Office of Thrift Supervision, based on the risks believed inherent in the type of asset. Core capital is defined as common shareholders equity (including retained earnings), certain non-cumulative perpetual preferred stock and related surplus and minority interests in equity accounts of consolidated subsidiaries, less intangibles other than certain mortgage servicing rights and credit card relationships. The components of supplementary capital currently include cumulative preferred stock, long-term perpetual preferred stock, mandatory convertible securities, subordinated debt and intermediate preferred stock, the allowance for loan and lease losses limited to a maximum of 1.25% of risk-weighted assets and up to 45% of net unrealized gains on available-for-sale equity securities with readily determinable fair market values. Overall, the amount of supplementary capital included as part of total capital cannot exceed 100% of core capital. Additionally, a savings association that retains credit risk in connection with an asset sale may be required to maintain additional regulatory capital because of the recourse back to the savings association.

At September 30, 2008, the Association s capital exceeded all applicable requirements.

Loans-to-One Borrower. Generally, a federal savings association may not make a loan or extend credit to a single or related group of borrowers in excess of 15% of unimpaired capital and surplus. An additional amount may be loaned, equal to 10% of unimpaired capital and surplus, if the loan is secured by readily marketable collateral, which generally does not include real estate. As of September 30, 2008, the Association was in compliance with the loans-to-one borrower limitations.

Qualified Thrift Lender Test. As a federal savings association, the Association must satisfy the qualified thrift lender, or QTL, test. Under the QTL test, the Association must maintain at least 65% of its portfolio assets in qualified thrift investments (primarily residential mortgages and related investments, including mortgage-backed securities) in at least nine months of the most recent 12-month period. Portfolio assets generally means total assets of a savings institution, less the sum of specified liquid assets up to 20% of total assets, goodwill and other intangible assets, and the value of property used in the conduct of the savings association s business.

The Association also may satisfy the QTL test by qualifying as a domestic building and loan association as defined in the Internal Revenue Code.

A savings association that fails the qualified thrift lender test must either convert to a bank charter or operate under specified restrictions. At September 30, 2008, the Association satisfied this test.

Capital Distributions. Office of Thrift Supervision regulations govern capital distributions by a federal savings association, which include cash dividends, stock repurchases and other transactions charged to the capital account. A savings association must file an application for approval of a capital distribution if:

the total capital distributions for the applicable calendar year exceed the sum of the savings association s net income for that year to date plus the savings association s retained net income for the preceding two years;

the savings association would not be at least adequately capitalized following the distribution;

the distribution would violate any applicable statute, regulation, agreement or Office of Thrift Supervision-imposed condition; or

the savings association is not eligible for expedited treatment of its filings. Even if an application is not otherwise required, every savings association that is a subsidiary of a holding company must still file a notice with the Office of Thrift Supervision at least 30 days before the board of directors declares a dividend or approves a capital distribution.

The Office of Thrift Supervision may disapprove a notice or application if:

the savings association would be undercapitalized following the distribution;

the proposed capital distribution raises safety and soundness concerns; or

the capital distribution would violate a prohibition contained in any statute, regulation or agreement. In addition, the Federal Deposit Insurance Act provides that an insured depository institution shall not make any capital distribution, if after making such distribution the institution would be undercapitalized.

On September 29, 2008, having complied with all regulatory stipulations and notification requirements, the Association paid a \$100 million dividend to the Company. There were no dividends paid to the Company by the Association during the years ended September 30, 2007 and 2006 and no dividends paid to the Company by Third Capital during the years ended September 30, 2008, 2007 and 2006.

Liquidity. A federal savings association is required to maintain a sufficient amount of liquid assets to ensure its safe and sound operation.

Edgar Filing: TFS Financial CORP - Form 10-K

Community Reinvestment Act and Fair Lending Laws. All savings associations have a responsibility under the Community Reinvestment Act and related regulations of the Office of Thrift Supervision to help meet the credit needs of their communities, including low- and moderate-income neighborhoods. In connection with its examination of a federal savings association, the Office of Thrift Supervision is required to assess the savings

association s record of compliance with the Community Reinvestment Act. In addition, the Equal Credit Opportunity Act and the Fair Housing Act prohibit lenders from discriminating in their lending practices on the basis of characteristics specified in those statutes. A savings association s failure to comply with the provisions of the Community Reinvestment Act could, at a minimum, result in denial of certain corporate applications such as branches or mergers, or in restrictions on its activities. The failure to comply with the Equal Credit Opportunity Act and the Fair Housing Act could result in enforcement actions by the Office of Thrift Supervision, as well as other federal regulatory agencies and the Department of Justice.

The Association received a satisfactory Community Reinvestment Act rating in its most recent federal examination.

Transactions with Related Parties. A federal savings association s authority to engage in transactions with its affiliates is limited by Office of Thrift Supervision regulations and by Sections 23A and 23B of the Federal Reserve Act and its implementing Regulation W. An affiliate is a company that controls, is controlled by, or is under common control with an insured depository institution such as the Association. The Company is an affiliate of the Association. In general, loan transactions between an insured depository institution and its affiliates are subject to certain quantitative and collateral requirements. In this regard, transactions between an insured depository institution and its affiliates are limited to 10% of the institution s unimpaired capital and unimpaired surplus for transactions with any one affiliate and 20% of unimpaired capital and unimpaired surplus for transactions must usually be provided by affiliates in order to receive loans from the savings association. In addition, Office of Thrift Supervision regulations prohibit a savings association from lending to any of its affiliates that are engaged in activities that are not permissible for bank holding companies and from purchasing the securities of any affiliate, other than a subsidiary. Finally, transactions with affiliates must be consistent with safe and sound banking practices, not involve low-quality assets and be on terms that are as favorable to the institution as comparable transactions with non-affiliates. The Office of Thrift Supervision requires savings associations to maintain detailed records of all transactions with affiliates.

The Association s authority to extend credit to its directors, executive officers and 10% shareholders, as well as to entities controlled by such persons, is currently governed by the requirements of Sections 22(g) and 22(h) of the Federal Reserve Act and Regulation O of the Federal Reserve Board. Among other things, these provisions require that extensions of credit to insiders:

- (i) be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons and that do not involve more than the normal risk of repayment or present other unfavorable features, and
- (ii) not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of the Association s capital.

In addition, extensions of credit in excess of certain limits must be approved by the Association s board of directors.

Enforcement. The Office of Thrift Supervision has primary enforcement responsibility over federal savings institutions and has the authority to bring enforcement action against all institution-affiliated parties, including shareholders, and attorneys, appraisers and accountants who knowingly or recklessly participate in wrongful action likely to have an adverse effect on an insured institution. Formal enforcement action by the Office of Thrift Supervision may range from the issuance of a capital directive or cease and desist order, to removal of officers and/or directors of the institution and the appointment of a receiver or conservator. Civil penalties cover a wide range of violations and actions, and range up to \$25,000 per day, unless a finding of reckless disregard is made, in which case penalties may be as high as \$1 million per day. The Federal Deposit Insurance Corporation also has the authority to terminate deposit insurance or to recommend to the Director of the Office of Thrift Supervision (Director) that enforcement action be taken with respect to a particular savings institution. If action

is not taken by the Director, the Federal Deposit Insurance Corporation has authority to take action under specified circumstances.

Standards for Safety and Soundness. Federal law requires each federal banking agency to prescribe certain standards for all insured depository institutions. These standards relate to, among other things, internal controls, information systems and audit systems, loan documentation, credit underwriting, interest rate risk exposure, asset growth, compensation, and other operational and managerial standards as the agency deems appropriate. The federal banking agencies adopted Interagency Guidelines Prescribing Standards for Safety and Soundness to implement the safety and soundness standards required under federal law. The guidelines set forth the safety and soundness standards that the federal banking agencies use to identify and address problems at insured depository institutions before capital becomes impaired. If the appropriate federal banking agency determines that an institution fails to meet any standard prescribed by the guidelines, the agency may require the institution to submit to the agency an acceptable plan to achieve compliance with the standard. If an institution fails to meet these standards, the appropriate federal banking agency may require the institution to submit a compliance plan.

Prompt Corrective Action Regulations. Under the prompt corrective action regulations, the Office of Thrift Supervision is required and authorized to take supervisory actions against undercapitalized savings associations. For this purpose, a savings association is placed in one of the following five categories based on the savings association s capital:

well-capitalized (at least 5% leverage capital, 6% Tier 1 risk-based capital and 10% total risk-based capital);

adequately capitalized (at least 4% leverage capital, 4% Tier 1 risk-based capital and 8% total risk-based capital);

undercapitalized (less than 3% leverage capital, 4% Tier 1 risk-based capital or 8% total risk-based capital);

significantly undercapitalized (less than 3% leverage capital, 3% Tier 1 risk-based capital or 6% total risk-based capital); and

critically undercapitalized (less than 2% tangible capital).

Generally, the banking regulator is required to appoint a receiver or conservator for a savings association that is critically undercapitalized within specific time frames. The regulations also provide that a capital restoration plan must be filed with the Office of Thrift Supervision within 45 days of the date a savings association receives notice that it is undercapitalized. significantly undercapitalized or critically undercapitalized. The criteria for an acceptable capital restoration plan include, among other things, the establishment of the methodology and assumptions for attaining adequately capitalized status on an annual basis, procedures for ensuring compliance with restrictions imposed by applicable federal regulations, the identification of the types and levels of activities the savings association will engage in while the capital restoration plan is in effect, and assurances that the capital restoration plan will not appreciably increase the current risk profile of the savings association. Any holding company for a savings association required to submit a capital restoration plan must guarantee the lesser of an amount equal to 5% of the savings association s assets at the time it was notified or deemed to be undercapitalized by the Office of Thrift Supervision, or the amount necessary to restore the savings association to adequately capitalized status. This guarantee remains in place until the Office of Thrift Supervision notifies the savings association that it has maintained adequately capitalized status for each of four consecutive calendar quarters, and the Office of Thrift Supervision has the authority to requirement payment and collect payment under the guarantee. Failure by a holding company to provide the required guarantee will result in certain operating restrictions on the savings association, such as restrictions on the ability to declare and pay dividends, pay executive compensation and management fees, and increase assets or expand operations. The Office of Thrift Supervision may also take any one of a number of discretionary supervisory actions against undercapitalized associations, including the issuance of a capital directive and the replacement of senior executive officers and directors.

At September 30, 2008, the Association met the criteria for being considered well-capitalized.

Insurance of Deposit Accounts. As of September 30, 2008 deposit accounts in the Association were insured by the Federal Deposit Insurance Corporation, generally up to a maximum of \$100,000 per separately insured depositor and up to a maximum of \$250,000 for self-directed retirement accounts. Effective October 3, 2008, the Emergency Economic Stabilization Act of 2008 (EESA of 2008) temporarily (until December 31, 2009) raised the basic limit on federal deposit insurance coverage from \$100,000 to \$250,000 per depositor. The Association s deposits are subject to Federal Deposit Insurance Corporation deposit insurance assessments.

On November 2, 2006, the Federal Deposit Insurance Corporation adopted final regulations that assess insurance premiums based on risk. As a result, the new regulation enables the Federal Deposit Insurance Corporation to more closely tie each financial institution s deposit insurance premiums to the risk it poses to the deposit insurance fund. Under the risk-based assessment system, the Federal Deposit Insurance Corporation evaluates the risk of each financial institution based on its supervisory rating, its financial ratios, and its long-term debt issuer rating. Under these regulations, the rates for nearly all of the financial institutions industry vary between five and seven cents for every \$100 of domestic deposits. As a part of the new regulations, in general, institutions that contributed to the recapitalization of the Savings Association Insurance Fund in 1996 were eligible to receive a one-time assessment credit. For Third Federal Savings and Loan, the one-time credit totaled \$6.3 million; of which \$2.6 million was utilized during the fiscal year ended September 30, 2007 to fully off-set the levied assessment. The remainder of their credit was utilized during the fiscal year ended September 30, 2008 to partially offset the otherwise required assessment payment.

All Federal Deposit Insurance Corporation-insured institutions are required to pay a pro rata portion of the interest due on obligations issued by the Financing Corporation (FICO) for anticipated payments, issuance costs and custodial fees on bonds issued by the FICO in the 1980s to recapitalize the Federal Savings and Loan Insurance Corporation. The bonds issued by the FICO are due to mature in 2017 through 2019. For the quarter ended September 30, 2008, the annualized FICO assessment was equal to 1.10 basis points for each \$100 in domestic deposits maintained at an institution.

For the fiscal year ended September 30, 2008, the Association paid \$937 thousand related to the FICO bonds and \$1.4 million pertaining to deposit insurance assessments, which amount was net of \$3.8 million of one-time credit which was applied to reduce the otherwise required payment. Deposit insurance assessments are paid on a delayed basis, one quarter in arrears.

Following the October 3, 2008 signing of EESA of 2008, which temporarily raised the basic limit on federal deposit insurance coverage, on October 7, 2008 the Board of Directors of the Federal Deposit Insurance Corporation adopted a restoration plan and proposed higher assessments on insured banks as well as adjustments to improve the risk-based assessment system. Under the proposal, the assessment rate schedule would be raised uniformly by seven basis points (annualized) beginning on January 1, 2009. Based on \$8.26 billion of insurable deposits at September 30, 2008, this additional assessment of seven basis points would increase the cost of our deposit insurance by \$5.8 million on an annual basis. The actual increase will depend on the future balances of our insurable deposits and the final assessment rates assigned by the Federal Deposit Insurance Corporation.

The Federal Deposit Insurance Corporation has also announced that full deposit insurance coverage will be provided for non-interest bearing deposit transaction accounts, regardless of the dollar amount. This new, temporary guarantee will expire December 31, 2009. Based on the current proposed terms we expect the Association to opt-out of the additional coverage.

Prohibitions Against Tying Arrangements. Federal savings associations are prohibited, subject to some exceptions, from extending credit to or offering any other service, or fixing or varying the consideration for such extension of credit or service, on the condition that the customer obtain some additional service from the institution or its affiliates or not obtain services of a competitor of the institution.

Federal Home Loan Bank System. The Association is a member of the Federal Home Loan Bank System, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank System provides a central credit facility primarily for member institutions. As a member of the FHLB of Cincinnati, the Association is required to acquire and hold shares of capital stock in the Federal Home Loan Bank in an amount at least equal to 1% of the aggregate principal amount of its unpaid residential mortgage loans and similar obligations at the beginning of each year, 1/20th of its borrowings from the Federal Home Loan Bank, or 0.3% of assets, whichever is greater.

As of September 30, 2008, outstanding borrowings from the FHLB of Cincinnati were \$498.0 million and the Association was in compliance with the stock investment requirement.

Other Regulations

Interest and other charges collected or contracted for by the Association are subject to state usury laws and federal laws concerning interest rates. The Association s operations are also subject to federal laws applicable to credit transactions, such as the:

Truth-In-Lending Act, governing disclosures of credit terms to consumer borrowers;

Home Mortgage Disclosure Act, requiring financial institutions to provide information to enable the public and public officials to determine whether a financial institution is fulfilling its obligation to help meet the housing needs of the community it serves;

Equal Credit Opportunity Act, prohibiting discrimination on the basis of race, creed or other prohibited factors in extending credit;

Fair Credit Reporting Act, governing the use and provision of information to credit reporting agencies;

Fair Debt Collection Act, governing the manner in which consumer debts may be collected by collection agencies; and

rules and regulations of the various federal agencies charged with the responsibility of implementing such federal laws. The operations of the Association also are subject to the:

Right to Financial Privacy Act, which imposes a duty to maintain confidentiality of consumer financial records and prescribes procedures for complying with administrative subpoenas of financial records;

Electronic Funds Transfer Act and Regulation E promulgated thereunder, which govern automatic deposits to and withdrawals from deposit accounts and customers rights and liabilities arising from the use of automated teller machines and other electronic banking services;

Check Clearing for the 21st Century Act (also known as Check 21), which gives substitute checks, such as digital check images and copies made from that image, the same legal standing as the original paper check;

Title III of The Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (referred to as the USA PATRIOT Act), which significantly expanded the responsibilities of financial institutions, including savings and loan associations, in preventing the use of the U.S. financial system to fund terrorist activities. Among other

Edgar Filing: TFS Financial CORP - Form 10-K

provisions, the USA PATRIOT Act and the related regulations of the Office of Thrift Supervision require savings associations operating in the United States to develop new anti-money laundering compliance programs, due diligence policies and controls to ensure the detection and reporting of money laundering. Such required compliance programs are intended to supplement existing compliance requirements, also applicable to financial institutions, under the Bank Secrecy Act and the Office of Foreign Assets Control Regulations; and

The Gramm-Leach-Bliley Act, which placed limitations on the sharing of consumer financial information by financial institutions with unaffiliated third parties. Specifically, the Gramm-Leach-Bliley Act requires all financial institutions offering financial products or services to retail customers to provide such customers with the financial institution s privacy policy and provide such customers the opportunity to opt out of the sharing of certain personal financial information with unaffiliated third parties.

Holding Company Regulation

General. Third Federal Savings, MHC, and the Company are non-diversified savings and loan holding companies within the meaning of the Home Owners Loan Act. As such, Third Federal Savings, MHC and the Company are registered with the Office of Thrift Supervision and subject to Office of Thrift Supervision regulations, examinations, supervision and reporting requirements. In addition, the Office of Thrift Supervision has enforcement authority over Third Federal Savings, MHC, the Company and the Association. Among other things, this authority permits the Office of Thrift Supervision to restrict or prohibit activities that are determined to be a serious risk to the Association. As federal corporations, Third Federal Savings, MHC and the Company are generally not subject to state business organization laws.

Permitted Activities. Pursuant to Section 10(o) of the Home Owners Loan Act and Office of Thrift Supervision regulations, a mutual holding company, such as Third Federal Savings, MHC, may engage in the following activities:

- (i) investing in the stock of a savings association;
- acquiring a mutual association through the merger of such association into a savings association subsidiary of such holding company or an interim savings association subsidiary of such holding company;
- (iii) merging with or acquiring another holding company, one of whose subsidiaries is a savings association;
- (iv) investing in a corporation, the capital stock of which is available for purchase by a savings association under federal law or under the law of any state where the subsidiary savings association has its home offices;
- (v) furnishing or performing management services for a savings association subsidiary of such company;
- (vi) holding, managing or liquidating assets owned or acquired from a savings association subsidiary of such company;
- (vii) holding or managing properties used or occupied by a savings association subsidiary of such company;
- (viii) acting as trustee under deeds of trust;
- (ix) any other activity:
 - (A) that the Federal Reserve Board, by regulation, has determined to be permissible for bank holding companies under Section 4(c) of the Bank Holding Company Act of 1956, unless the Director, by regulation, prohibits or limits any such activity for savings and loan holding companies; or
 - (B) in which multiple savings and loan holding companies were authorized (by regulation) to directly engage on March 5, 1987;

Edgar Filing: TFS Financial CORP - Form 10-K

- (x) any activity permissible for financial holding companies under Section 4(k) of the Bank Holding Company Act, including securities and insurance underwriting; and
- (xi) purchasing, holding, or disposing of stock acquired in connection with a qualified stock issuance if the purchase of such stock by such savings and loan holding company is approved by the Director. If a mutual holding company acquires or merges with another holding company, the holding company

acquired or the holding company resulting from such merger or acquisition may only invest in assets and engage in activities listed in (i) through (x) above, and has a period of two years to cease any nonconforming activities and divest any nonconforming investments.

The Home Owners Loan Act prohibits a savings and loan holding company, including the Company, directly or indirectly, or through one or more subsidiaries, from acquiring more than 5% of another savings institution or holding company thereof, without prior written approval of the Office of Thrift Supervision. It also prohibits the acquisition or retention of, with certain exceptions, more than 5% of a non-subsidiary company engaged in activities other than those permitted by the Home Owners Loan Act, or acquiring or retaining control of an institution that is not federally insured. In evaluating applications by holding companies to acquire savings institutions, the Office of Thrift Supervision must consider the financial and managerial resources, future prospects of the company and institution involved, the effect of the acquisition on the risk to the federal deposit insurance fund, the convenience and needs of the community and competitive factors.

The Office of Thrift Supervision is prohibited from approving any acquisition that would result in a multiple savings and loan holding company controlling savings institutions in more than one state, subject to two exceptions:

- (i) the approval of interstate supervisory acquisitions by savings and loan holding companies; and
- (ii) the acquisition of a savings institution in another state if the laws of the state of the target savings institution specifically permit such acquisition.

The states vary in the extent to which they permit interstate savings and loan holding company acquisitions.

Waivers of Dividends by Third Federal Savings and Loan Association of Cleveland, MHC. Office of Thrift Supervision regulations require Third Federal Savings, MHC to notify the Office of Thrift Supervision of any proposed waiver of its receipt of dividends from the Company. The Office of Thrift Supervision reviews dividend waiver notices on a case-by-case basis, and, in general, does not object to any such waiver if:

- (i) the waiver would not be detrimental to the safe and sound operation of the subsidiary savings association; and
- (ii) the mutual holding company s board of directors determines that such waiver is consistent with such directors fiduciary duties to the mutual holding company s members.

In February 2008 the Company declared its first quarterly dividend. Pursuant to the Office of Thrift Supervision s non-objection, Third Federal Savings, MHC waived its right to receive the dividend. The non-objection, issued in November 2007, is applicable for one year. We anticipate that on an annual basis, Third Federal Savings, MHC will continue to adhere to the regulatory requirements, including the filing of a waiver notice and will continue to waive any dividends paid by the Company. Under Office of Thrift Supervision regulations, our public shareholders would not be diluted because of any dividends waived by Third Federal Savings, MHC (and waived dividends would not be considered in determining an appropriate exchange ratio) in the event Third Federal Savings, MHC converts to stock form.

Conversion of Third Federal Savings and Loan Association of Cleveland, MHC to Stock Form. Office of Thrift Supervision regulations permit Third Federal Savings, MHC to convert from the mutual form of organization to the capital stock form of organization. There can be no assurance when, if ever, a conversion transaction will occur, and the Federal Savings, MHC s board of directors has no current intention or plan to undertake a conversion transaction. In a conversion transaction a new stock holding company would be formed as the successor to the Company, Third Federal Savings, MHC s corporate existence would end, and certain depositors and borrowers (Members) of Third Federal Savings and Loan would receive the right to subscribe for additional shares of the new holding company. In a conversion transaction, each share of common stock held by shareholders other than Third Federal Savings, MHC would be automatically converted into a number of shares of common stock of the new holding company determined pursuant to an exchange ratio that ensures that shareholders other than Third Federal Savings, MHC own the same percentage of common stock in the new

holding company as they owned in the Company immediately prior to the conversion transaction, subject to adjustment for any assets held by Third Federal Savings, MHC. Any such conversion transaction would require approval by the Members of the Association as well as approval by a majority of the Company s shareholders, other than Third Federal Savings, MHC.

Sarbanes-Oxley Act of 2002

The Sarbanes-Oxley Act of 2002 addresses, among other issues, corporate governance, auditing and accounting, executive compensation, and enhanced and timely disclosure of corporate information. As directed by the Sarbanes-Oxley Act, our Chief Executive Officer and Chief Financial Officer are required to certify that our quarterly and annual reports do not contain any untrue statement of a material fact. The rules adopted by the Securities and Exchange Commission under the Sarbanes-Oxley Act have several requirements, including having these officers certify that: they are responsible for establishing, maintaining and regularly evaluating the effectiveness of our internal control over financial reporting; they have made certain disclosures to our auditors and the audit committee of the board of directors about our internal control over financial reporting; and they have included information in our quarterly and annual reports about their evaluation and whether there have been changes in our internal control over financial reporting or in other factors that could materially affect internal control over financial reporting. We are subject to the reporting requirements of Section 404 of the Sarbanes Oxley Act beginning with the fiscal year ending September 30, 2008`. We have prepared policies, procedures and systems designed to ensure compliance with these regulations.

Emergency Economic Stabilization Act of 2008

In accordance with its stated purpose of restoring liquidity and stability to the financial system of the United States, EESA of 2008 established the Troubled Asset Relief Program (TARP), under which, the United States Department of the Treasury (UST) is authorized to purchase preferred stock from qualified financial institutions. The Company meets the requirements to be considered a qualified financial institution. Under TARP, for organizations like the Company, the federal government s purchase limitation is generally defined as 3% of risk-weighted assets, or about \$225 million for the Company. The terms of the preferred stock generally provide that:

cumulative dividends will be paid at a rate of 5% for the first five years and 9% thereafter;

redemption is prohibited for the first three years unless funded by the proceeds of a subsequent qualified equity offering;

any increase in the dividend rate paid on common stock during the first three years will require the consent of the UST;

any repurchase of common stock will require the consent of the UST;

conditions and limitations will be placed on executive compensation; and

UST will receive warrants, with a term of 10 years, to purchase a number of shares of common stock having an aggregate market price equal to 15% of the preferred stock amount on the day of investment.

We considered several factors in deliberating the appropriateness of applying under UST s capital purchase plan. These factors included the following: (1) the Company s initial public offering was completed in April 2007, raising \$886 million, further increasing our already high capital ratios, and creating our current business challenge of prudently deploying excess capital; (2) the announcement during fiscal 2008 of common stock repurchase programs totaling 20.8 million shares, of which repurchases totaling 16.1 million shares at a cost of \$192.7 million had been completed as of September 30, 2008; and (3) complications specific to our capital structure as a mutual holding company which arise with respect to the ownership rights of our shares of common stock that were withheld from our initial public offering. In light of these factors, at the current time, we have deemed it not appropriate to apply for funding under UST s capital purchase program.

Item 1A. Risk Factors

Future Changes in Interest Rates Could Reduce Our Net Income.

Our net income largely depends on our net interest income, which could be negatively affected by changes in interest rates. Net interest income is the difference between the interest income we earn on our interest-earning assets, such as loans and securities, and the interest we pay on our interest-bearing liabilities, such as deposits and borrowings.

The vast majority of our assets and liabilities are financial in nature, and as a result, changes in market and competitive interest rates can impact our customers actions as well as the types and amount of business opportunities that are available to us. In general, when changes occur in interest rates that prompt our customers to pursue strategies that are beneficial to them, the results are generally unfavorable for us.

For example, if mortgage interest rates decline, our customers may seek to refinance, without penalty, their mortgage loans with us or repay their mortgage loans with us and go to another lender. When that happens, either the yield that we earn on the customer s loan is reduced (if the customer refinances with us) or the mortgage is paid off and we are faced with the challenge of reinvesting the cash received to repay the mortgage in a lower interest rate environment. This is frequently referred to as reinvestment risk, which is the risk that we may not be able to reinvest the proceeds of loan prepayments at rates that are comparable to the rates we earned on the loans prior to receipt of the repayment. This risk exists in our mortgage loan portfolio as well in the securities in our investment portfolio that are backed by mortgage loans.

Another example of changes in interest rates that can have an unfavorable impact on our net interest income occurs in situations where interest rates paid on certificates of deposit experience a significant increase. In this circumstance, a certificate of deposit customer may determine that it is in his/her best interest to incur the existing penalty for early withdrawal, tender the certificate for cash and either reinvest the proceeds in a new certificate of deposit with us, or withdraw the funds and leave us. As a result, we either end up with a new, higher rate certificate (if the customer stays with us) or we must fund the customer s withdrawal by: (1) reducing our cash reserves; (2) selling assets to generate cash to fund the withdrawal; (3) attracting deposits from another customer at the then higher interest rate; or (4) borrowing from a wholesale lender like the FHLB of Cincinnati, again at the then-higher interest rate. Each of these alternatives can have an unfavorable impact on us.

Our net interest income can also be negatively impacted when assets and funding sources with seemingly similar repricing characteristics react differently to changing interest rates. An example of this phenomenon is our equity lines of credit loans and our high yield checking and high yield savings deposit products. Interest rates charged on our equity lines of credit loans are linked to the prime rate of interest which generally adjusts in a direct relationship to changes in the Federal Reserve s Federal Funds target rate. Similarly, our High Yield Checking and High Yield Savings deposit products are generally expected to adjust when changes are made to the Federal Funds target rate. However, to the extent that reductions are made to the Federal Funds target rate, and those reductions translate into reductions of the prime rate and the rate charged on our equity lines of credit loans, but do not extend to equivalent adjustments to our High Yield Checking and High Yield Savings deposit products, we will experience a reduction in our net interest income. At September 30, 2008 we held \$2.24 billion of equity lines of credit loans and \$2.05 billion of High Yield Checking and High Yield Savings deposits.

Our net income can be reduced by the impact that changes in interest rates can have on the value of our capitalized mortgage servicing rights. As of September 30, 2008, we were servicing \$6.9 billion of loans sold to third parties, and the mortgage servicing rights associated with such loans had an amortized cost of \$41.5 million and an estimated fair value, at that date, of \$84.7 million. Because the estimated life and estimated income from the underlying mortgage loans generally increase with rising interest rates and decrease with falling interest rates, the value of mortgage servicing rights increases as interest rates rise and decreases as interest rates fall.

In general, changes in market and competitive interest rates result from events that we do not control and over which we generally have little or no influence. As a result, mitigation of the risk of the adverse affects of

changing interest rates is generally limited to controlling the composition of the assets and liabilities that we hold. To monitor our positions, we maintain an interest rate risk modeling system which is designed to measure our interest rate risk sensitivity. Additionally, the results of a model to measure interest rate sensitivity are made available to us by the Office of Thrift Supervision. These models estimate the change in Third Federal Savings and Loan s net portfolio value over a range of interest rate scenarios. Net portfolio value is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts. At September 30, 2008, in the event of an immediate 200 basis point increase in all interest rates, the Office of Thrift Supervision model projects that we would experience a \$305.9 million, or 23%, decrease in net portfolio value, and our internal model projects that we would experience a \$410.9 million, or 26%, decrease in net portfolio value. Our internal calculations further project that, at September 30, 2008, in the event of an immediate 200 basis point increase in all interest rates income for the twelve months ended September 30, 2009 to decrease by 21%. See Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Recent Negative Developments in the Financial Industry and the Domestic and International Credit Markets May Adversely Affect Our Operations and Results.

Negative developments in the latter half of 2007 and during 2008 in the global credit and securitization markets have resulted in uncertainty in the financial markets in general with the expectation of the general economic downturn continuing into 2009. Loan portfolio quality has deteriorated at many institutions, and we also have experienced some deterioration. In addition, the value of real estate collateral supporting many home mortgages, including mortgages we hold, has declined and may continue to decline. Bank and bank holding company stock prices have been negatively affected, as has the ability of banks and bank holding companies to raise capital or borrow in the debt markets. As a result, the potential exists for new federal or state laws and regulations regarding lending and funding practices and liquidity standards, and bank regulatory agencies are expected to be active in responding to concerns and trends identified in examinations. Negative developments in the financial industry and the domestic and international credit markets, and the impact of new legislation in response to those developments, may negatively impact our operations by restricting our business operations, including our ability to originate or sell loans, and adversely impact our financial performance. In addition, these risks could affect the value of our loan portfolio as well as the value of our investment portfolio, which would also negatively affect our financial performance.

Difficult Market Conditions Have Already Affected Our Industry and May Adversely Affect Us.

Our performance is significantly impacted by the general economic conditions in the States of Ohio and Florida, and surrounding areas, which have been severely impacted by the current downturn. Recent merger announcements in northeast Ohio are likely to result in increased unemployment, which will further weaken an already distressed local economy and could result in additional defaults of mortgage loans. Most of the loans in our loan portfolio are secured by real estate located in our primary market areas. Negative conditions, such as layoffs, in the real estate markets where collateral for a mortgage loan is located could adversely affect a borrower s ability to repay the loan and the value of the collateral securing the loan, and we are experiencing negative conditions in our primary markets. Dramatic declines in the U.S. housing market over the past year, with falling home prices and increasing foreclosures, unemployment and under-employment, have negatively impacted the credit performance of mortgage loans and resulted in significant write-downs of asset values by financial institutions. These write-downs, initially of mortgage-backed securities but spreading to derivative and cash securities, in turn, have caused many financial institutions to seek additional capital from private and government entities, to merge with larger and stronger financial institutions and, in some cases, fail. Our business, financial condition and results of operations could be adversely affected by recessionary conditions that are longer or deeper than expected.

Reflecting concern about the stability of the financial markets generally, many lenders and institutional investors have reduced or ceased providing funding to borrowers, including other financial institutions. This

market turmoil and tightening of credit have led to an increased level of commercial and consumer delinquencies, lack of consumer confidence, increased market volatility and widespread reduction of business activity generally. The resulting economic pressure on consumers and lack of confidence in the financial markets may adversely affect our business, financial condition and results of operations. We do not expect that the difficult conditions in the financial markets are likely to improve in the near future. A worsening of these conditions would likely exacerbate the adverse effects of these difficult market conditions on us and others in the financial institutions industry. In particular, we may face the following risks in connection with these events:

We expect to face increased regulation of our industry, including as a result of the EESA of 2008. Compliance with such regulation may increase our costs and limit our ability to pursue business opportunities.

Our ability to assess the creditworthiness of our customers may be impaired if the models and approaches we use to select, manage, and underwrite our customers become less predictive of future behaviors.

The processes we use to estimate losses inherent in our credit exposure requires difficult, subjective, and complex judgments, including forecasts of economic conditions and how these economic predictions might impair the ability of our borrowers to repay their loans, which may no longer be capable of accurate estimation and which may, in turn, impact the reliability of the processes.

Our ability to engage in sales of mortgage loans to third parties (including mortgage loan securitization transactions with governmental entities) on favorable terms or at all could be adversely affected by further disruptions in the capital markets or other events, including deteriorating investor expectations.

Competition in our industry could intensify as a result of increasing consolidation of financial services companies in connection with current market conditions.

There Can Be No Assurance that the Actions of the U.S. Government, U.S. Federal Reserve, U.S. Treasury and Other Governmental and Regulatory Bodies for the Purpose of Stabilizing the Financial Markets, or Market Response to Those Actions, Will Achieve the Intended Effect.

On October 3, 2008, the President of the U.S. signed into law the EESA of 2008. The legislation was the result of a proposal by the U.S. Treasury Secretary to the U.S. Congress in response to the financial crises affecting the banking system and financial markets and going concern threats to investment banks and other financial institutions. The EESA of 2008 provides the U.S. Treasury Secretary with the authority to use up to \$700 billion to, among other things, inject capital into financial institutions and establish the TARP, for the purposes of stabilizing and providing liquidity to the financial markets. EESA of 2008 is expected to have a profound effect on the financial services industry. The effect of programs developed under EESA of 2008, including the TARP and Capital Purchase Programs, could dramatically change the competitive environment of the Company.

Currently, the Company does not participate in the TARP, however, the actual impact that EESA of 2008 and the implementation of its programs, or any other governmental program will have on the financial markets and the Company cannot reliably be determined at this time. However, the failure of the EESA of 2008 to help stabilize the financial markets and a continuation or worsening of current financial market conditions could materially and adversely affect our business, financial condition and results of operations.

In addition, the U.S. government, U.S. Federal Reserve, U.S. Treasury and other governmental and regulatory bodies have taken, or are considering taking, other actions to address the financial crisis. We cannot predict whether or when such actions may occur or what impact, if any, such actions could have on our business, financial condition, results to operations, or access to credit.

Loans Originated Through Our Home Today Program Have Higher Delinquency Rates than the Remainder of Our Loan Portfolio.

Through our Home Today program, we offer loans with our standard terms to borrowers who might not otherwise qualify for such loans. To qualify for our Home Today program, a borrower must complete financial management education and counseling and must be referred to us by a sponsoring organization with which we have partnered as part of the program and must meet a minimum credit score threshold. Because we apply less stringent underwriting and credit standards to these loans, loans originated under the Home Today program have greater credit risk than traditional residential real estate mortgage loans. As of September 30, 2008, we had \$303.2 million of outstanding loans that were originated through our Home Today program, 30.9% of which were delinquent 30 days or more, compared to 1.2% for our portfolio of non-Home Today loans as of that date. During the fiscal year ended September 30, 2008, we incurred net charge-offs of \$4.2 million, (1.37% of the average balance of Home Today loans) on loans originated through our Home Today program, compared to \$4.9 million, (0.08% of the average balance of non-Home Today loans) of net charge-offs for our non-Home Today portfolio.

The Federal Deposit Insurance Corporation has Issued New Rules that Will Increase Our Deposit Insurance Assessments and Reduce Our Income and has Proposed Additional New Rules that Will Further Increase Our Deposit Insurance Assessment and Reduce Our Income.

For approximately ten years prior to January 2007, the Federal Deposit Insurance Corporation (FDIC) did not impose deposit insurance premiums on financial institutions, such as Third Federal Savings and Loan, that were, among other criteria, well-capitalized. On November 2, 2006, the FDIC adopted final regulations that, prospectively, assess insurance premiums based on risk. As a result, the regulation enables the FDIC to more closely tie each financial institution s deposit insurance premiums to the risk it poses to the deposit insurance fund. Under the rules, the FDIC will evaluate the risk of each financial institution based on its supervisory rating, its financial ratios, and its long-term debt issuer rating. Assessment rates for nearly all banks and savings institutions vary between five and seven cents for every \$100 of domestic deposits. As a part of the regulations, in general, institutions that contributed to the recapitalization of the Savings Association Insurance Fund in 1996 were eligible to receive a one-time assessment credit. For Third Federal Savings and Loan, that credit totaled \$6.3 million and was available to offset future deposit insurance assessments. Quarterly deposit insurance assessment notices are provided by the FDIC which designate the insurance period and the amount of credit used to reduce the assessment. During the fiscal year ended September 30, 2007, \$2.6 million of the credit was utilized with the remainder utilized during the fiscal year ended September 30, 2008. On October 3, 2008 the EESA of 2008 temporarily (through December 31, 2009) raised the basic limit on federal deposit insurance coverage from \$100,000 to \$250,000 per depositor. On October 7, 2008 the Board of Directors of the FDIC adopted a restoration plan and proposed higher assessments on insured banks as well as adjustments to improve the risk-based assessment system. Under the proposal, the assessment rate schedule would be raised uniformly by seven basis points (annualized) beginning on January 1, 2009. Based on \$8.26 billion of insurable deposits at September 30, 2008, this additional assessment of 7 basis points would increase the cost of our deposit insurance by \$5.8 million on an annual basis.

Hurricanes or Other Adverse Weather Events Could Negatively Affect the Economy in Our Florida Market Area or Cause Disruptions to Our Branch Office Locations, Which Could Have an Adverse Effect on Our Business or Results of Operations.

A significant portion of our operations are conducted in the State of Florida, a geographic region with coastal areas that are susceptible to hurricanes and tropical storms. Such weather events can disrupt our operations, result in damage to our branch office locations and negatively affect the local economy in which we operate. We cannot predict whether or to what extent damage caused by future hurricanes or tropical storms will affect our operations or the economy in our market area, but such weather events could result in fewer loan originations and greater delinquencies, foreclosures or loan losses. These and other negative effects of future hurricanes or tropical storms may adversely affect our business or results of operations.

Strong Competition Within Our Market Areas May Limit Our Growth and Profitability.

Competition in the banking and financial services industry is intense. In our market areas, we compete with commercial banks, savings institutions, mortgage brokerage firms, credit unions, finance companies, mutual funds, money market funds, insurance companies, and brokerage and investment banking firms operating locally and elsewhere. Some of our competitors have greater name recognition and market presence that benefit them in attracting business, and offer certain services that we do not or cannot provide. In addition, larger competitors may be able to price loans and deposits more aggressively than we do. Troubled financials institutions also may significantly increase the interest rates paid to depositors as they pursue a retail deposit funding strategy when wholesale funding sources are not available to them, and we may have to pay increased rates in order to compete. Our profitability depends upon our continued ability to successfully compete in our market areas. For additional information see Business Third Federal Savings and Loan Association of Cleveland Competition.

Item 1B. Unresolved Staff Comments None.

Item 2. Properties

We operate from our main office in Cleveland, Ohio, our 37 branch offices located in Ohio and Florida and our eight loan production offices located in Ohio. Our branch offices are located in the Ohio counties of Cuyahoga, Lake, Lorain, Medina and Summit and in the Florida counties of Collier, Hillsborough, Lee, Miami-Dade, Palm Beach, Pasco, Pinellas and Sarasota. Our loan production offices are located in the Ohio counties of Franklin and Hamilton. The Company owns the building in which its home office and executive offices are located, and five other office locations. The net book value of our land, premises, equipment and software was \$68.1 million at September 30, 2008.

Item 3. Legal Proceedings

On June 13, 2006, Dr. Gary Greenspan filed a putative class action lawsuit against Third Federal, captioned Gary A. Greenspan v. Third Federal Savings & Loan, Case No. CV 06 593882 in the Cuyahoga County, Ohio Court of Common Pleas. The plaintiff sought to represent a class of Ohio residents in connection with mortgage loans that the Company provided to the plaintiff and the putative class members. The plaintiff alleges that the Company impermissibly charged a document preparation fee that included the cost of preparing legal documents in connection with the mortgages. The plaintiff alleges that the Company should disgorge the document preparation fee because the document preparation constituted the practice of law and was performed by Company employees who are not licensed to practice law in Ohio. The plaintiff sought to certify a class of individuals who were charged such a fee anytime after June 13, 2001. The Company vigorously disputes these allegations.

The Company answered the plaintiff s complaint and moved for judgment on the pleadings. The trial court granted the Company s motion and dismissed the action. The plaintiff appealed to the Eighth District Court of Appeals. On June 25, 2008, the appellate court reversed the trial court s dismissal of the plaintiff s complaint as to claims arising before September 15, 2004, the date that the relevant statute was amended to expressly give the Ohio Supreme Court exclusive jurisdiction over claims for the unauthorized practice of law.

On August 8, 2008, the Company appealed the decision of the Eighth District Court of Appeals to the Supreme Court of Ohio. Although the parties have filed memoranda regarding jurisdiction, the Ohio Supreme Court has not yet decided whether to accept or deny this appeal.

Likewise, on August 8, 2008, the Company filed a Complaint in Mandamus with the Ohio Supreme Court asking that the Court compel the Cuyahoga County Court of Appeals to follow its own local rules which require

it to abide by a prior Eighth District panel decision absent an en banc hearing. Respondent has filed a Motion to Dismiss and Company has filed a Memorandum in Opposition. The Ohio Supreme Court has yet to rule on this matter.

As the court decisions and current litigation in this case center around procedural issues rather than substantive merit issues, we cannot predict an outcome, favorable or unfavorable, to the Company or to estimate the amount or range of any potential loss.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of our security holders during the fourth quarter of our fiscal year.

PART II

Item 5. Market for Registrant s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

(a) Our common stock is listed and traded on the NASDAQ Global Select Market under the symbol TFSL. As of November 18, 2008, we had 10,495 shareholders of record, which number does not include persons or entities holding shares in nominee or street name through brokerage firms. Shares of our common stock began trading on April 23, 2007 following the completion of our initial public offering, which date is also the commencement date for the quarterly trading information, provided by NASDAQ and, included in the following table.

| | Traded M | Traded Market Prices | | | | | |
|----------------------------------|----------|-----------------------------|-----------|--|--|--|--|
| Fiscal 2007 | High | Low | Dividends | | | | |
| Quarter ended June 30, 2007 | \$ 12.60 | \$ 11.35 | \$ 0.00 | | | | |
| Quarter ended September 30, 2007 | 13.00 | 10.45 | 0.00 | | | | |
| Quarter ended December 31, 2007 | 13.20 | 11.58 | 0.00 | | | | |
| Quarter ended March 31, 2008 | 12.75 | 10.43 | 0.05 | | | | |
| Quarter ended June 30, 2008 | 12.59 | 11.48 | 0.05 | | | | |
| Quarter ended September 30, 2008 | 13.50 | 9.39 | 0.05 | | | | |

Payment of dividends is subject to declaration by our board of directors and is dependent of a number of factors, including:

our capital requirements and, to the extent that funds for any such dividend are provided by Third Federal Savings and Loan, the regulatory capital requirements imposed by the Office of Thrift Supervision;

our financial position and results of operations;

tax considerations;

statutory and regulatory limitations; as well as

general economic conditions.

No assurances can be given that the Company will continue to pay dividends, nor can assurances be given that, if paid, such dividends will not be reduced or eliminated in the future. Special cash dividends, stock dividends or returns of capital, to the extent permitted by Office of Thrift Supervision policy and regulations, may be paid in addition to, or in lieu of, regular cash dividends, but no assurances can be given that such dividends will be paid.

Pursuant to Office of Thrift Supervision regulations, any payment of dividends by Third Federal Savings and Loan to the Company that would be deemed to be drawn from Third Federal Savings and Loan s bad debt reserves would require a payment of taxes at the then-current tax rate by Third Federal Savings and Loan on the amount of earnings deemed to be removed from the reserves for such distribution. Third Federal Savings and Loan does not intend to make any distribution to the Company that would create such a federal tax liability.

Additionally, pursuant to Office of Thrift Supervision regulations, during the three-year period following our initial public stock offering, we may not take any action to declare an extraordinary dividend to shareholders that would be treated by recipients as a tax-free return of capital for federal income tax purposes.

Through September 30, 2008, Third Federal Savings, MHC, has waived its right to receive dividends. The waivers comply with regulatory authorization (in the form of non-objection) obtained by Third Federal Savings, MHC in November 2007. Such regulatory non-objection is

Edgar Filing: TFS Financial CORP - Form 10-K

subject to periodic regulatory review and no assurances can be given regarding future regulatory non-objection.

In the table and graph that follow, we have provided summary information regarding the performance of the cumulative total return of our common stock from our first trading date (April 23, 2007) through September 30, 2008, relative to the cumulative total return on stocks included in the (a) SNL Bank and Thrift Index; and (b) SNL Thrift Index in each case for the same period. The cumulative return data are presented in dollars, based on starting investments of \$100 and assuming the reinvestment of dividends.

| | | Measurement Date | | | | | | |
|--------------------------------------|--------------|------------------|---------|----------|---------|---------|---------|--|
| Index (with base price at 4/23/2007) | 4/23/2007(*) | 6/30/07 | 9/30/07 | 12/31/07 | 3/31/08 | 6/30/08 | 9/30/08 | |
| TFS Financial Corporation | 100.00 | 97.88 | 109.75 | 101.27 | 102.44 | 99.10 | 107.51 | |
| SNL Bank and Thrift Index | 100.00 | 97.21 | 93.70 | 77.38 | 70.52 | 53.93 | 66.75 | |
| SNL Thrift Index | 100.00 | 97.08 | 90.71 | 63.68 | 60.73 | 50.23 | 46.72 | |

(*) April 23, 2007 was the first day of trading following our initial public offering.

(a) We did not sell any unregistered securities during the quarter ended September 30, 2008.

(b) Not applicable

(c) The following table summarizes our stock repurchase activity during the three months ended September 30, 2008 and the stock repurchase plans approved by our Board of Directors.

| Period | Total Number of Shares Purchased(1) | Average Price Paid per Share | Total Number of Shares Purchased as Part of Publicly Announced Plans | Maximum Number of Shares that May Yet Be Purchased Under the Plans |
|--|---|------------------------------------|---|---|
| July 1, 2008 through July 31, 2008 | 3,327,400 | \$ 11.14 | 3,327,400 | 6,789,600 |
| August 1, 2008 through August 31, 2008 | 3,355,500 | 11.72 | 3,355,500 | 3,434,100 |
| September 1, 2008 through September 30, 2008 | 3,719,300 | 12.62 | 3,719,300 | 4,714,800 |
| Total | 10,402,200 | \$ 11.86 | 10,402,200 | |

- (1) On February 11, 2008, the Company announced its first stock repurchase plan of 15,800,000 shares. This repurchase plan commenced on April 21, 2008 and was completed on September 26, 2008.
- (2) On September 12, 2008, the Company announced its second stock repurchase program which authorizes the repurchase of up to an additional 5,000,000 shares of the Company s outstanding common stock. This stock repurchase program commenced upon the completion of the first program on September 26, 2008. The Company intends to purchase shares on an ongoing basis, and purchases will be subject to the availability of stock, general market conditions, the trading price of the stock, alternative uses of capital, and our financial performance. Repurchased shares will be held as treasury stock and be available for general corporate use. The program has 4,714,800 shares yet to be purchased as of September 30, 2008.
