## Edgar Filing: BP PLC - Form 6-K

\*The refining Global Indicator Margin(GIM) is a weighted average based on BP's portfolio. Actual margins may vary because of refinery configuration, crude slate and operating practices.

1Q'03 refining margins are expected to be higher than 4Q'02, with some offset from a significant increase in utility costs. The marketing environment is projected to be down in 1Q'03 vs. 4Q'02 due to economic slowdown and normal seasonal variations.

### Chemicals

Weighted Chemicals Indicator Margin (\$/te)

1Q'03	4Q'02	3Q'02	1Q'02
n/a	100	120	80

\*The Chemicals Indicator Margin is a weighted average of externally-based product margins. It is based on market data collected by Nextant (formerly Chem Systems) in their quarterly market analyses, then weighted on BP's product portfolio. This is described more fully in the Group's quarterly results releases.

Chemicals margins in 1Q'03 are expected to be sharply lower than in 4Q'02, due to feedstock costs rising more rapidly than prices for the majority of petrochemical products.

### Stock Purchases

During the quarter the company purchased for cancellation 154.9 million of its shares at a cost of around \$1 billion. Shares in issue as at 27 March '03 were 22,242 million.
