LLOYDS TSB - TRADING UPDATE

Lloyds TSB Group plc will shortly be meeting analysts ahead of its close period for the year ending 31 December 2004. This announcement sets out the information that will be provided at those meetings.

Lloyds TSB continues to deliver good earnings momentum and expects to deliver a satisfactory trading performance for the year, with progress continuing to be made in all key strategic priorities.

In a year of significant transition within the branch network, the retail bank has continued to make progress in profitable franchise development, notwithstanding some slowdown in the demand for consumer credit. Good growth in the lending portfolios has been partly offset by an expected lower net interest margin, although the rate of margin erosion has reduced since the first half.

Scottish Widows has continued to refocus its product mix towards more profitable and capital efficient products and, over the last few months, has launched a new range of products more tailored to the branch network distribution channel. Both new business contribution and new business margin improved in the first nine months of 2004. Scottish Widows remains well capitalised and on track to pay a 2004 dividend to Lloyds TSB.

LLOYDS TSB - TRADING UPDATE .../2

In Wholesale and International Banking good progress has been made in deepening relationships with our existing corporate customers. All main businesses within the division continue to perform well, asset quality remains strong, and we have achieved a good increase in profitable new business in the corporate businesses, business banking and asset finance.

The Group's cost performance continues to be strong and further improvements in processing quality have been made throughout the business. The Group continues to deliver revenue growth in excess of cost growth in each division.

Our continuing focus on high quality lending has resulted in an improvement in asset quality, and the annualised charge for bad and doubtful debts as a percentage of average lending for the full year is expected to be lower than the 0.63 per cent annualised charge in the first half of 2004.

In the first 11 months of 2004 there was a positive investment variance totalling GBP70 million, largely as a result of a rise in the FTSE All Share Index during the period.

The Group continues to review the impact of the level of complaints received relating to past sales, and performance, of endowment policies. To ensure that adequate provision for any ongoing liabilities is maintained, an additional provision in this respect of some GBP110 million is expected to be made in the 2004 accounts. Despite this provision, Lloyds TSB expects to report earnings broadly in line with current market expectations.\*

We have made good progress in our preparations for the implementation of International Financial Reporting Standards in 2005. The detailed interpretation of a number of the new accounting standards, as well as Financial Reporting Standard 27 (formerly Financial Reporting Exposure Draft 34 - Life

Assurance), is being finalised. Current indications are that, excluding the effects of derivative and equity valuations introduced with IAS 39 and FRS 27, the overall impact of forthcoming accounting and regulatory changes will reduce the earnings of the Group, both before and after goodwill amortisation, by less than 5 per cent, and that the Group's regulatory capital position will not be materially affected.

LLOYDS TSB - TRADING UPDATE .../3

Eric Daniels, Group Chief Executive, said "Despite the slowdown in growth in demand for consumer credit, we are continuing to make progress against our objective to deliver sustained earnings momentum. Capital ratios remain strong, the Group's return on average risk-weighted assets has improved, and the Group is on track to make further earnings progress in 2005 and beyond."
