Risk and balance sheet management

Balance sheet management

Capital

The Group aims to maintain an appropriate level of capital to meet its business needs and regulatory requirements as capital adequacy and risk management are closely aligned. The Group's regulatory capital resources and risk asset ratios calculated in accordance with FSA definitions are set out below.

	31 March 2011 £bn	31 December 2010 £bn
Risk-weighted assets (RWAs)		
Credit risk	367.9	385.9
Counterparty risk	62.8	68.1
Market risk	69.5	80.0
Operational risk	37.9	37.1
	538.1	571.1
Benefit of Asset Protection Scheme	(98.4)	(105.6)
	439.7	465.5
Risk asset ratio	%	%
Core Tier 1	11.2	10.7
Tier 1	13.5	12.9
Total	14.5	14.0

Key points

- Credit and counterparty RWAs fell by £23.3 billion principally driven by asset run-off, disposals and restructurings, and a reclassification of certain trades in Non-Core.
- Market risk decreased by £10.5 billion reflecting a lower event risk charge and reductions in VaR.
- The reduction in APS RWA benefit reflects the run-off of covered assets.
- The benefit of the APS to the Core Tier 1 was 1.3% compared with 1.2% at 31 December 2010.

Balance sheet management: Funding and liquidity risk

The Group's balance sheet composition is a function of the broad array of product offerings and diverse markets served by its Core divisions. The structural composition of the balance sheet is augmented as needed through active management of both asset and liability portfolios. The objective of these activities is to optimise liquidity transformation in normal business environments while ensuring adequate coverage of all cash requirements under extreme stress conditions.

Diversification of the Group's funding base is central to its liquidity management strategy. The Group's businesses have developed large customer franchises based on strong relationship management and high quality service. These customer franchises are strongest in the UK, US and Ireland but extend into Europe, Asia and Latin America. Customer deposits provide large pools of stable funding to support the majority of the Group's lending. It is a strategic objective to improve the Group's loan to deposit ratio to 100%, or better, by 2013.

The Group also accesses professional markets funding by way of public and private debt issuances on an unsecured and secured basis. These debt issuance programmes are spread across multiple currencies and maturities to appeal to a broad range of investor types and preferences around the world. This market based funding supplements the Group's structural liquidity needs and in some cases achieves certain capital objectives.

The table below shows the Group's primary funding sources, excluding repurchase agreements.

Key points

- The proportion of funding from customer deposits, excluding cash collateral, improved marginally from 56.5% to 57.1%.
- Short-term wholesale funding excluding derivative collateral increased from £129.4 billion to £144.7 billion during the first quarter of 2011 due to the inclusion of £15.6 billion of medium-term notes issued under the Credit Guarantee Scheme which will mature in Q1 2012. Short-term wholesale instruments (excluding repos and cash collateral) declined by £1.6 billion in Q1 2011.

Key points

- Term issuances in Q1 2011 were £10.2 billion, including £2.7 billion of euro denominated covered bonds, of which £0.9 billion had original maturity of 7 years and the balance had original maturity of 5 years.
- Issuances in Q1 2011 were £3.1 billion higher than in Q4 2010, of which £2.0 billion related to US dollar denominated instruments.
- The Group issued a further £3.8 billion of term debt in April 2011.

	34,965	34,529
Total liquidity portfolio	151,190	154,599

Notes:

- (1) Includes FSA eligible government bonds of £30.1 billion at 31 March 2011 (31 December 2010 - £34.7 billion).
- (2) Includes AAA rated US government guaranteed agencies.
- (3) Includes secured assets eligible for discounting at central banks, comprising loans and advances and debt securities.

Key points

- The Group's liquidity portfolio was £151.2 billion, a decline of £3.4 billion from 31 December 2010.
- The strategic target of £150 billion is unchanged.
- The liquidity portfolio is actively managed and as such its composition varies over time. Actions initiated in March 2011 to alter the maturity and currency mix resulted in a higher proportion of cash and central bank balances at the end of the quarter.

Net stable funding

The table below shows the Group's net stable funding ratio estimated by applying the Basel III guidance issued in December 2010. This measure seeks to show the proportion of structural term assets which are funded by stable funding including customer deposits, long-term wholesale funding, and equity. The Group's net stable funding ratio calculation will continue to be refined over time in line with regulatory developments.

Total assets and undrawn commitments	1,668	526	1,720	525	
Net stable funding ratio		96%		101%	

Notes:

- (1) Available stable funding.
- (2) Deferred tax, insurance liabilities and other liabilities.
- (3) Prepayments, accrued income, deferred tax and other assets.

Key point

- The Group's net stable funding ratio reduced to 96% at 31 March 2011, from 101% at 31 December 2010, primarily due to an increase in the wholesale funding with maturity of less than one year arising from the inclusion of £15.6 billion medium-term notes issued under the Credit Guarantee Scheme maturing during Q1 2012.

Loan deposit ratio and funding gap

The table below shows quarterly trends in the loan to deposit ratio and customer funding gap.

	Loan to deposit ratio (1)		Customer funding gap (1)
	Group %	Core %	Group £bn
31 March 2011	115	96	66
31 December 2010	117	96	74
30 September 2010	126	101	107
30 June 2010	128	102	118
31 March 2010	131	102	131
31 December 2009	135	104	142

Note:

- (1) Excludes repurchase agreements and bancassurance deposits to 31 March 2010 and loans are net of provisions.

Key points

- The Group's loan to deposit ratio improved by 200 basis points in Q1 2011 to 115%. The customer funding gap narrowed by £8 billion to £66 billion in Q1 2011, primarily due to a reduction in Non-Core customer loans.
- The loan to deposit ratio for the Group's Core business at 31 March 2011 remained stable at 96%.

Sensitivity of net interest income

The Group seeks to mitigate the effect of prospective interest rate movements which could reduce future net interest income through its management of market risk in the Group's businesses, whilst balancing the cost of such hedging activities on the current net revenue stream. Hedging activities also consider the impact on market value sensitivity under stress.

The following table shows the sensitivity of net interest income over the next twelve months to an immediate up and down 100 basis points change to all interest rates.

	31 March 2011 £m	31 December 2010 £m
+ 100bp shift in yield curves	266	232
- 100bp shift in yield curves	(302)	(352)

Key points

- In aggregate, the Group's interest rate exposure continues to reflect a slight asset sensitive bias in Q1 2011.
- There were no material actions taken to alter the position during the quarter. Certain assumptions used for modelling customer pricing have been modified to show greater opportunity for margin expansion as and when short-term interest rates begin to rise.
