**Honda to Display Modulo Custom Concept Vehicles
at Tokyo Auto Salon 2005**

January 12, 2005 Honda Motor Co., Ltd. will display three concept vehicles under the Modulbcustom brand name of Honda Access Corporation², a manufacturer of genuine Honda aftermarket products, at the Tokyo Auto Salon 2005 with NAPAC³ January 14-16, 2005 at Makuhari Messe in Chiba Prefecture, Japan. Headlining the Honda display will be the Legend Modulo, the Edix Modulo with ELLEDECO, and the ElySION Modulo concept vehicles.

With the theme Wonder Factory, the Honda display will showcase some of the key values Honda offers, including fun to use and fun to drive. The three concept vehicles spotlight a new approach to genuine Honda customization that offers each and every owner enhanced enjoyment of their vehicles.

Further highlighting the appeal of customization will be concept vehicles sporting aero-parts by Honda Access and DOOV Corp.⁴ Honda is also displaying Fit HB vehicles customized with its newly developed Incremental Forming Technology, which is used to form parts without metal molds, and presenting exciting new possibilities in customization.

¹ Original custom brand developed exclusively for Honda vehicles

² Wholly owned Honda subsidiary

³ Main promoter: TASA (Tokyo Auto Salon Association)

Affiliate co-promoter: NAPAC (Nippon Automotive Aftermarket Parts & Accessories Committee)

⁴ Wholly owned subsidiary of Honda Access Corp.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Fit HB concept vehicle

-1-

Table of Contents

- **Concept Vehicle Display Overview**

<Legend Modulo Concept Vehicle>

Based on the Authentic Performance Saloon concept, the exterior of the Legend Modulo Concept features an integrated wide front fender and sophisticated front grille all styled with dynamic curves that suggest a sporty elegance.

The interior includes an exclusive leather-wrapped wooden steering wheel, a wooden shift lever, and meticulously finished leather seats that provide a sense of quality and luxury. The interior is designed to convey to the occupant a sense of superior functionality and added value.

The Legend Modulo Concept was designed for superior driving performance with enhanced low-speed torque, refined engine tuning, and modified brake components, making it an exceptionally road-ready concept vehicle.

<Edix Modulo Concept Vehicle with ELLEDECO>

Built for style, the Edix Modulo Concept features unique customization, created in collaboration with lifestyle and décor magazine ELLEDECO. The white-themed interior conveys the concept of Fun Intelligence, while the styling around the instrument panel and the stretch-denim seats with striped accents offer a new sense of flair that goes well beyond the usual.

The new style of this new kind of minivan is also showcased in the audio/visual system, which includes a simple, stylish operation panel, an HDD-DVD player, headrest monitors for rear seat passengers, a visor monitor for the front seat passenger, and a large tailgate-mounted woofer.

Emphasizing the vehicle's integrated, organic form, the exterior styling employs a honeycomb motif on the hood grille, bumper grille, headlights and rear section to convey a sporty sensibility. The rear is also outfitted with customized illumination accentuated with green LEDs.

<ElySION Modulo Concept Vehicle>

The key phrase for the ElySION Modulo concept vehicle is Superior Performance. A sense of luxury that carries the assurance of cruising comfort combines with a unique aero-parts design to produce exterior styling that befits the flagship of Honda's minivan lineup.

Customizations that add to the aura of premium minivan luxury include a front grille reminiscent of Legend styling; a dynamic front end styled with sharp edges which are continued in the arcing design of the side lower skirts and integrated side sills; a satin surface finish that flows from front to back; aluminium wheels color-coordinated with the body color; a jaunty, three-circle headlight design; and rear combination lights with clear lenses for a bold look.

Table of Contents

- **Exhibit Highlights**

<Modulo>: Seven models, including the Legend, Odyssey, Elysion, Edix, and Integra Type R

<DOOV>: Three models the Legend, Elysion and Fit

<Gathers⁵>: Nine models in a lineup centered on the VXH-051MCVi, compatible with Internavi Premium Club

⁵ Genuine audio and navigation system brand exclusively for Honda vehicles

- **Incremental Forming Technology Highlights**

<S800 hood⁶> (for display)

Honda is displaying the S800 hood made with its newly developed Incremental Forming Technology. With Incremental Forming, no metal mold is necessary. An existing hood form can be digitized with a non-contact scanner and converted into 3D data. On the basis of this data, a special jib is used to manipulate sheet metal into the desired form. Eliminating the need for a metal mold, this facilitates extremely small lot production.

⁶ Released in 2002 as a genuine Honda part

<Fit HB⁷> (concept vehicle)

Honda is also displaying the Fit HB concept vehicle, featuring parts made using the Incremental Forming Technology, as an example of how this new technology makes it possible to create cars to the taste of the individual.

⁷ The hood and fender are manufactured using Incremental Forming Technology.

Honda Finalizes 2005 Motorcycle Racing Plans

January 17, 2005 Honda Motor Co., Ltd. has finalized its plans for participation in both Japanese and world championship motorcycle racing series in 2005, as outlined below.

Honda's spirit of challenge is rooted in its motorsport activities. By constantly striving to fulfill its own dreams and aspirations through the ongoing challenge of leading-edge innovation, Honda also delivers dreams and excitement to its customers.

For the 2005 motorcycle racing season, Honda has set its sights on recapturing the rider's title and retaining the manufacturer's title in Moto GP, the top class of world championship road racing, aiming to secure the championship in each category.

World Championships

Road races

FIM 2005 Road Race Championship Series

In the MotoGP class of the FIM 2004 Road Race Championship Series, Honda plans to race seven 2005 model Honda RC211Vs, with the aim of capturing a double title in both the rider's and the manufacturer's categories. The Honda RC211V has undergone further refinements as it enters its fourth season of racing. In the 250cc class Honda will field six bikes and three teams, and has nominated Yuki Takahashi last year's Japanese GP250 class champion as the second recipient of the Honda Racing Scholarship, established last year. Last year's recipient was Hiroshi Aoyama.

Trial races

FIM 2005 World Trials Championship Series

In last year's world trials championships Honda captured both the rider's and the manufacturer's titles for the fifth year in a row, with a Japanese rider winning the series championship for the first time ever. This year Honda will race three Montesa COTA4RTs equipped with a newly developed 4-stroke engine in a bid to win its sixth consecutive series title.

**Honda Announces a Full Model Change
for the CBR600RR Super Sport Bike**

January 20, 2005 Honda Motor Co., Ltd. has announced a full model change for CBR600RR super sport bike, which incorporates advanced technologies inherited from Honda's RC211V[®] racing machine. The new model goes on sale Thursday, January 27.

The new model has been significantly lightened, especially in the main frame, for a weight saving of 5.6kg. Heavy components have also been moved closer to the center of gravity to attain a higher concentration of mass, achieving a major improvement in handling performance and high operating stability.

For the new model, the shape of the inlet port has been modified and the length of the muffler and exhaust pipe reworked to ensure a more linear throttle response in the mid-speed range. Fuel injector settings were also adjusted to achieve greater combustion efficiency. The previous model's PGM-DSFI settings were changed to go along with the modified inlet port shape, enabling stable, high-efficiency combustion over the full range of engine rpms to achieve optimum output characteristics.

The suspension incorporates an inverted front fork for greater rigidity, which works together with a lighter version of the popular Pro Link suspension in the rear unit to help make the bike more manageable. The front brake is equipped with the same high-rigidity radial-mount calipers as are used in the RC211V and the CBR1000RR, to ensure effective braking with outstanding control.

CBR600RR

- **Annual domestic sales target (Japan):** 1,300 units
- **Manufacturer's suggested retail price:** ¥966,000 (¥920,000 before consumption tax)

* Price does not include insurance, taxes (except consumption tax) registration, or other fees.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Publicity photographs and materials for the CBR600RR are available at the following URL:

[http:// www.honda.co.jp/PR/](http://www.honda.co.jp/PR/)

(The site is intended exclusively for the use of journalists.)

-1-

Table of Contents

The bike's styling incorporates the latest RC211V design, with changes to the shapes of the windscreen and air intake ducts. The seat cowl features slim styling for minimum air resistance.

For coloring, two new colors Black and Force Silver Metallic have been added to the current Italian Red, for three colors in all.

Since it was first introduced in July 2003, the CBR600RR's stable ride and high potential has earned it a reputation for comfortable riding performance on the street. A full range of amenities including HISS*² and multi-function instrument panel have further added to this model's popularity.

*1 The RC211V is a special-purpose racing motorcycle equipped with a 990cc V5 engine that Honda has been racing in the MotoGP class of FIM World Road Race Championships the pinnacle of world motorcycle racing since 2002.

*2 Honda Ignition Security System

=Main Features=

- **Exhaustive lightening achieves high handling performance and operating stability**

No effort was spared to make the CBR600RR's frame and other components as light as possible. Advancements in hollow-core fine die-cast production technology for the main frame allowed the frame walls to be made physically thinner while maintaining rigidity. Around 65% of the bike's parts were reassessed and changes made to the muffler production process, muffler protector construction, swing arm construction, and in other areas, resulting in a significant weight saving of 5.6kg over the previous model. The seat rail was also lightened to attain a higher concentration of mass, achieving a major improvement in driving performance and more nimble handling.

- **Inverted front forks and radial-mount brake calipers**

The suspension employs 41mm-diameter inverted front forks for increased front-end rigidity, resulting in more precise control and dependable handling. The brakes employ the same radial-mount calipers as are used in the RC211V and the CBR1000RR. This ensures greater caliper rigidity during braking, ensuring even force distribution over the entire brake pad surface for effective braking control.

- **Styling that places performance first**

The CBR600RR, which incorporates various advanced technologies from the constantly evolving RC211V, also adopts the RC211V's design concept of functional beauty.

The shape of the windscreen on the front cowl has been changed to adopt the same sharp design as is used in the latest RC211V. The design of the air intake duct has also been modified to further reduce air resistance, while a slimmer shape has been adopted for the tail cowl.

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Like the previous model, the new CBR600RR employs a center-up exhaust system for its superior aerodynamic characteristics and concentration of mass near the center of gravity. Even the shape of the exhaust port has been changed from round to oval - an indication of the level of attention Honda has paid right down to the finest detail.

-2-

Table of Contents

• **Body colors**

In addition to vivid Italian Red, the CBR600RR now also comes in two new colors self-composed Force Silver Metallic with a black stripe running along the side and intrepid solid Black allowing owners to pick a color to suit their taste.

• **Equipment and options for greater ease of use**

An integrated electronic instrument panel that uses digital display meters grouped around an analog tachometer standard

Hazard lamps, convenient when stopping or parking standard

HISS (Honda Ignition Security System) offers effective anti-theft protection standard

Remote-controlled immobilization alarm function that detects vibrations and emits a piercing alarm optional (manufactured by Honda Access Co., Ltd.)

Optional cowl screens, instrument panels, top bridge covers, and single seat cowls that allow the user to customize the styling to suit his or her taste (manufactured by Honda Access Co., Ltd.)

U-shaped lock that stores inside the utility space beneath the pillion seat optional (manufactured by Honda Access Co., Ltd.)

**Honda Sets All-time Auto Production Record in Asia, Europe and Worldwide
in Calendar year 2004**

January 25, 2005 Honda Motor Co., Ltd. today announced production, domestic sales, and export results for December 2004 and calendar year 2004. Honda achieved all-time records for auto production in Asia, Europe and worldwide driven largely by continuous growth in Asia, especially China, and strong sales in Europe.

Annual domestic production for 2004 totaled 1,242,528 units, a 6.1% increase over the previous year. Domestic production increased 9.7% in December compared to the same month a year ago, due to increased production of domestic and export models.

Annual overseas production reached 1,939,096 units, a 7.9% increase compared to the previous year. Honda set an all time annual production record in Asia and Europe, which also helped lead to overseas and worldwide production records. Overseas production for December increased 9.1% compared to the same month last year. Continuous production growth in Asia, especially China, led the overall increase in overseas production, while Europe also remained strong.

Total annual domestic sales for 2004 increased 1.1% compared to last year, while domestic sales in December increased 9.9% compared to the same month a year ago. Strong sales of the Fit, which underwent a minor model change in June, and the Odyssey and Life, which had full model changes in fall 2003, contributed to the annual sales increase.

Total annual exports increased 10.3% compared to 2003, while total exports in December increased 22.4% compared to the same month a year ago. Strong sales in the U.S. of the CR-V, Acura TSX, the all-new Acura RL and the Accord Hybrid, as well as strong sales in Europe of the Jazz, Accord Diesel and FR-V (known as Edix in Japan) contributed to the increase in annual exports.

Honda FC Stack-equipped FCX, Featuring Sub-freezing Temperature

Start-up Capability, Leased to Hokkaido Prefectural Government

January 27, 2005 Honda Motor Co., Ltd. today delivered a Honda FC Stack-equipped FCX, the world's first fuel cell vehicle capable of starting in sub-freezing temperatures, to the Hokkaido Prefectural Government. Today's ceremony at the Hokkaido Prefectural Government Office was attended by Hokkaido Governor Harumi Takahashi and Honda Motor Senior Managing Director Satoshi Dobashi.

The lease is the first of a fuel cell vehicle in Japan in a region that experiences sub-freezing temperatures. In December 2004, Honda leased an FCX to the State of New York, also a cold-weather area. Since December 2002, Honda has delivered a total of five FCX vehicles in the metropolitan Tokyo area to organizations including the Japanese Cabinet Office, the Ministry of the Environment, the Ministry of Economy, Trade and Industry, Iwatani International Corporation, and Idemitsu Kosan Co., Ltd.

The Honda FC Stack is the world's first fuel stack installed in a vehicle to feature a stamped metal separator structure and newly developed electrolytic membranes. The number of parts used in the new stack is only about 50% that used in the previous stack¹ and the output density² is more than double, resulting in world-leading high performance. Further, use of newly developed aromatic electrolytic membranes greatly improves durability and makes possible power generation at temperatures ranging from -20°C (-4°F) to +95°C (+203°F) which was not possible with previous stacks.

Consolidated Financial Summary for the Fiscal 3rd Quarter**Ended December 31, 2004 & Revised Forecast for Fiscal Year****On the basis of 3rd quarter results, fiscal year forecast revised upwards**

Honda realized an all-time record for consolidated net sales and other operating revenue for the fiscal 3rd quarter due to an increase in overseas sales. Operating income decreased due to the negative effect from depreciation of the U.S. dollar, as well as an increase in selling, general and administrative expenses, despite increased profit from higher revenue and cost reduction effects. Net income was roughly equivalent to the all-time record 3rd quarter result of the previous fiscal year due to an increase in equity in income of affiliates. Basic net income per common share set an all-time record for any quarter. On the basis of results for the 3rd quarter, the results forecast for the entire fiscal year has been revised upwards and taking into account the important weathering of a strong yen and depreciation of the U.S. dollar, Honda aims to set all-time records for net sales and other operating revenue as well as net income.

Results for Fiscal 3rd Quarter Ended Dec. 31, 2004(*record high for fiscal 3rd quarter, **record high for any quarter)

	Yen (billions)		
	3 rd Quarter ended		Difference (% change)
	Dec. 31, 2004	3 rd Quarter ended Dec. 31, 2003	
Net sales and other operating revenue	2,133.8*	1,992.2	+141.5 (+7.1)
Operating income	157.6	169.3	-11.6 (-6.9)
Income before income taxes	187.9	203.5	-15.5 (-7.7)
Equity in income of affiliates	29.3**	25.0	+4.3 (+17.5)
Net income	150.7	151.0	-0.2 (-0.2)
Basic net income per Common share	JPY 161.78**	JPY 158.66	+3.12 (+2.0)

(Honda's average rates: JPY 106 = U.S. dollar 1 JPY 137 = Euro 1)

Note:

Edgar Filing: HONDA MOTOR CO LTD - Form 6-K

Certain reclassifications have been made to the operating income of the prior year's 3rd quarter to conform to the presentation used for the fiscal 3rd quarter ended December 31, 2004.

- **Record 3rd quarter unit sales for motorcycles and automobiles**

Motorcycles: Approx. 2.483 million units (+4.9%); mainly due to an increase in sales of finished products and parts for overseas production bound for Asia and an increase in sales in Europe.

Automobiles: Approx. 817 thousand units (+9.4%); the increase was mainly due to an increase in sales of parts for overseas production bound for China in Asia and increased sales in Europe.

Power Products: Approx. 1.044 million units (-1.9%); the decrease was due primarily to decreased sales in Europe.

-1-

Table of Contents

- Consolidated net sales and other operating revenue rose to a 3rd quarter record of JPY 2,133.8 billion (+7.1%) due to an increase in overseas sales notwithstanding a negative impact from currency translation effects. (If the exchange rate from the previous fiscal 3rd qtr. was applied, Honda estimates that an increase in revenue of approximately 8.5% would have been realized.)
- Consolidated operating income decreased to JPY 157.6 billion (-6.9%) due to negative effects from currency translation effects of JPY -11.1 billion, and an increase in selling, general and administrative expenses notwithstanding increased revenues and cost reduction effects.
- Consolidated net income was JPY 150.7 billion, which is roughly equivalent to the record 3rd quarter result of last fiscal year, due to increased equity in income of affiliates totaling JPY 4.3 billion (+17.5%).
- Consolidated net sales and other operating revenue for the first 9 months of the fiscal year (April to December) was JPY 6,300.5 billion (+4.7%). Consolidated operating income for the period was JPY 490.5 billion (+0.7%), consolidated income before income taxes was JPY 527.6 billion (-1.5%) and consolidated net income totaled JPY 392.1 billion (+0.5%). The basic net income per common share increased to JPY 418.99 (+2.7%). Consolidated net sales and other operating revenue, net income and basic net income per common share set all-time records for the first 9 months of the fiscal year (April to December).

Forecasts for Fiscal Year Ending March 31, 2005

A 5th consecutive all-time record is forecast for consolidated net sales and other operating revenue based on all-time record unit sales plans for motorcycles 10.525 million units, automobiles 3.25 million units and power products 5.36 million units. Despite the revised 4th qtr. exchange rate of JPY 103 = U.S. dollar 1 from JPY 105, Honda aims to achieve an all-time record for consolidated net income for the current fiscal year. The consolidated forecast for the fiscal year ending March 31, 2005 is as follows:

	Yen (billions)			
	Current forecast for year ending March 31, 2005	Year ended March 31, 2004	Difference (% change)	Oct. 27, 2004 forecast
Net sales and other operating revenue	8,650.0	8,162.6	+487.4 (+6.0)	8,690.0
Operating income	625.0	600.1	+24.8 (+4.1)	620.0
Income before income taxes	640.0	641.9	-1.9 (-0.3)	600.0
Net income	480.0	464.3	+15.6 (+3.4)	447.0

(Honda's average rates for the FY2005: JPY 107 = U.S. dollar 1 JPY 135 = Euro 1)

HONDA MOTOR CO., LTD. REPORTS

CONSOLIDATED FINANCIAL RESULTS

FOR THE FISCAL THIRD QUARTER AND

THE NINE MONTHS ENDED DECEMBER 31, 2004

Tokyo, January 28, 2005 Honda Motor Co., Ltd. today announced its consolidated financial results for the fiscal third quarter and the nine months ended December 31, 2004.

Third Quarter Results

Honda's consolidated net income for the fiscal third quarter ended December 31, 2004 totaled JPY 150.7 billion (USD 1,447 million), almost the same level as the corresponding period in 2003. Basic net income per common share for the quarter amounted to JPY 161.78 (USD 1.55), compared with JPY 158.66 for the corresponding period in 2003. Two of Honda's American depository shares represent one common share.

Consolidated net sales and other operating revenue (herein referred to as revenue) for the fiscal third quarter amounted to JPY 2,133.8 billion (USD 20,476 million), an increase of 7.1% from the corresponding period in 2003.

Revenue included currency translation effects, which had a negative impact on foreign currency denominated revenue from Honda's overseas subsidiaries translated into yen. Honda estimates that had the exchange rate of yen remained unchanged from the same period in 2003, revenue for the quarter would have increased by approximately 8.5%.

Consolidated operating income for the fiscal third quarter totaled JPY 157.6 billion (USD 1,513 million), a decrease of 6.9% compared with the corresponding period in 2003. This decrease in operating income was primarily due to the negative impacts of appreciation of the yen against the U.S. dollar, and to an increase in selling, general and administrative (SG&A) expenses, offsetting positive impacts of increased profit coming from higher revenue and Honda's ongoing cost reduction effects.

Consolidated income before income taxes for the fiscal third quarter totaled JPY 187.9 billion (USD 1,804 million), a decrease of 7.7% from the corresponding period in 2003.

Table of Contents

Business Segment

With respect to Honda's sales in the fiscal third quarter by business category, motorcycle unit sales increased by 4.9% from the corresponding period in 2003 to 2,483 thousand units. Of them, unit sales in Japan decreased 9.3% to 78 thousand units, and overseas unit sales increased 5.4% to 2,405 thousand units, due mainly to increased unit sales of parts for local production in Indonesia, and favorable sales in Europe and Other regions, such as Brazil. Revenue from sales to unaffiliated customers increased 6.8%, to JPY 241.8 billion (USD 2,321 million). Operating income decreased by 28.6% to JPY 5.1 billion (USD 49 million), due primarily to a decrease in unit sales in North America, offsetting increased profit from higher revenue in Asia and Europe.

Honda's unit sales of automobiles increased by 9.4% from the corresponding period in 2003 to 817 thousand units. In Japan, unit sales of automobiles decreased 2.3% to 173 thousand units. Overseas unit sales increased 13.0% to 644 thousand units. Increased unit sales of parts for local production in China, and continued favorable sales in Europe and Other regions, such as Brazil were the major contributing factors for this increase in unit sales. Revenue from sales to unaffiliated customers increased 7.0%, to JPY 1,744.6 billion (USD 16,741 million) during the quarter, due to increased unit sales, offsetting the negative currency translation effects. Operating income decreased 7.0% to JPY 126.0 billion (USD 1,209 million) due mainly to negative currency effects caused by the appreciation of the yen against the U.S. dollar, which offset positive impacts of higher profit from increased revenue and ongoing cost reduction effects.

Revenue from sales to unaffiliated customers in financial services increased 15.0% to JPY 67.6 billion (USD 649 million), due to the growth of the automobile business in North America. Operating income decreased 2.4% to JPY 23.9 billion (USD 230 million), due primarily to negative currency translation effects caused by the appreciation of the yen against the U.S. dollar and increase in interest rates.

Unit sales of power products in Japan totaled 95 thousand units, a decrease by 12.8%, and overseas unit sales was 949 thousand units, which was almost the same level as the third quarter in 2003. Total unit sales of power products were 1,044 thousand units, a decrease of 1.9% compared to the corresponding period in 2003, due primarily to decreased sales of general-purpose engines in Europe, offsetting increased sales of general-purpose engines for OEM, generators and water pumps in North America. Revenue from sales to unaffiliated customers in power product and other businesses increased by 4.1% to JPY 79.7 billion (USD 765 million), due mainly to changes in the model mix. Operating income increased 22.1% to JPY 2.4 billion (USD 24 million).

Table of Contents

Geographic Segment

With respect to Honda's sales for the third quarter by geographic segment, in Japan, revenue was JPY 1,066.8 billion (USD 10,237 million), up by 10.9% compared to the corresponding period in 2003, due primarily to increased unit sales for export in motorcycle and automobile businesses. Operating income in Japan was JPY 47.4 billion (USD 456 million), up by 62.1%, mainly due to higher profit from increased revenue, and ongoing cost reduction effects.

In North America, revenue increased by 1.2% from the previous year to JPY 1,188.0 billion (USD 11,400 million), due mainly to improved model mix in automobile business, offsetting negative impact of the currency translation effects.

Operating income in North America decreased by 26.2% to JPY 81.7 billion (USD 784 million) from the corresponding period of the previous year, due primarily to the negative impact of the appreciation of the yen against the U.S. dollar, offsetting the positive impacts of increased profit from higher sales and ongoing cost reduction effects.

In Europe, revenue for the quarter increased by 30.7% to JPY 243.8 billion (USD 2,340 million) compared to the corresponding period of the previous year, due primarily to increased unit sales in motorcycle and automobile businesses, and a positive impact of currency translation effects. Operating income in Europe increased by 263.6% to JPY 5.5 billion (USD 53 million), due mainly to positive currency effects caused by the depreciation of the yen against Euro and increased profit from higher revenue.

In Asia, revenue increased by 28.0% to JPY 205.3 billion (USD 1,970 million) from the previous year, due mainly to increases in unit sales in motorcycle and automobile businesses. Operating income also increased by 48.5% to JPY 16.2 billion (USD 156 million) from the corresponding period of the previous year, due mainly to increased profit from higher revenue and ongoing cost reduction effects.

In Other regions, unit sales increased in all business segments, namely motorcycle, automobile and power product, and revenue for the third quarter increased by 19.4% to JPY 114.1 billion (USD 1,095 million) compared to the corresponding period of the previous year. Increased unit sales in Latin America was a major contributing factor to this increase in revenue. Operating income increased by 14.2% from the corresponding period of the previous year to JPY 9.2 billion (USD 89 million).

Table of Contents

Nine-Month Results

Honda's consolidated net income for the fiscal nine months ended December 31, 2004 totaled JPY 392.1 billion (USD 3,763 million), an increase of 0.5% from the previous year. Basic net income per common share for the fiscal nine months amounted to JPY 418.99 (USD 4.02), compared with JPY 407.87 for the corresponding period a year ago.

Revenue for the fiscal nine months amounted to JPY 6,300.5 billion (USD 60,460 million), an increase of 4.7% from last year.

Revenue included the negative effect of currency translation, and Honda estimates that if the exchange rate of the yen had not changed from the previous year, revenue for the year would have increased by approximately 8.1%.

Consolidated operating income for the fiscal nine months totaled JPY 490.5 billion (USD 4,707 million), an increase of 0.7% compared with the corresponding period last year. This increase in operating income was primarily due to increased profit from higher revenue and continuing cost reduction effects, offsetting negative impacts, such as appreciation of the yen against the U.S. dollar, and an increase in SG&A expenses and research and development (R&D) expenses.

Consolidated income before income taxes for the fiscal nine months totaled JPY 527.6 billion (USD 5,063 million), a decrease of 1.5% compared with the previous year.

Business Segment

With respect to Honda's sales for the fiscal nine months by business category, motorcycle unit sales increased 17.9% to 7,766 thousand units. Of them, unit sales in Japan decreased 5.0% to 285 thousand units, while overseas unit sales increased 19.0% to 7,481 thousand, due mainly to strong sales in Asia, such as India and Indonesia. Revenue from sales to unaffiliated customers increased 10.1% to JPY 772.0 billion (USD 7,408 million), due primarily to increased unit sales, offsetting negative currency translation effects. Operating income increased 184.0% to JPY 42.3 billion (USD 406 million).

Unit sales related to automobiles for the fiscal nine months increased by 8.8% to 2,383 thousands units. In Japan, unit sales of automobiles increased 2.2% to 517 thousand units, and overseas unit sales increased 10.8% to 1,866 thousand units, due mainly to increased sales in Asia, such as China and Indonesia, and Europe. Revenue from sales to unaffiliated customers increased 4.0% to JPY 5,093.6 billion (USD 48,878 million), due mainly to increased unit sales, which offset negative currency translation effects.

Table of Contents

Operating income decreased 5.2% to JPY 361.7 billion (USD 3,472 million), due mainly to negative impact of the appreciation of the yen against the US. dollar, which offset positive impacts of increased profit from higher revenue and cost reduction effects.

Revenue from sales to unaffiliated customers in financial services increased 3.2 % to JPY 191.0 billion (USD 1,833 million). Operating income decreased 15.4% to JPY 71.7 billion (USD 689 million).

Unit sales of power products totaled 3,516 thousand units, an increase of 7.9% compared to the corresponding period of the previous year. Of them, unit sales in Japan totaled 315 thousand units, decreased by 11.0%, and overseas unit sales increased 10.2% to 3,201 thousand units, mainly contributed by increased unit sales in North America. Revenue from sales to unaffiliated customers increased by 4.5% to JPY 243.8 billion (USD 2,340 million). Operating income increased 145.5% to JPY 14.6 billion (USD 141 million).

Geographic Segment

With respect to Honda's sales for the fiscal nine months by geographic segment, in Japan, revenue was JPY 3,045.5 billion (USD 29,225 million), up by 6.9% from the corresponding period of the previous year, due mainly to increases in unit sales in automobile business. Operating income in Japan was JPY 134.2 billion (USD 1,289 million), up by 30.2% from the previous year.

In North America, revenue decreased by 3.7% from the fiscal nine months of the previous year to JPY 3,421.2 billion (USD 32,830 million), due mainly to decreased unit sales in motorcycle and automobile businesses, and negative currency translation effects. Operating income in North America decreased by 17.3% to JPY 247.5 billion (USD 2,375 million) from the corresponding period of the previous year.

In Europe, revenue for the fiscal nine months increased by 15.2% to JPY 758.4 billion (USD 7,278 million) compared to the corresponding period of the previous year, due mainly to increased unit sales in motorcycle, automobile and power product businesses, and positive impact of currency translation effects. Operating income in Europe increased by 55.4% to JPY 29.6 billion (USD 284 million).

Table of Contents

In Asia, revenue increased by 24.4% to JPY 620.9 billion (USD 5,959 million) from the previous year, due primarily to increased unit sales in motorcycle and automobile businesses. Operating income also increased by 53.0% to JPY 53.6 billion (USD 515 million) from the corresponding period of the previous year.

Revenue from Other regions for the fiscal nine months increased by 30.7% to JPY 333.2 billion (USD 3,198 million) compared to the corresponding period of the previous year, due primarily to increased unit sales in motorcycle, automobile and power product businesses. Operating income increased by 47.1% to JPY 28.5 billion (USD 274 million) from the corresponding period of the previous year.

Table of Contents**Forecasts for the fiscal year ending March 31, 2005****FY2005 Forecasts for consolidated results**

	<u>Yen (billions)</u>	<u>Changes from FY 2004</u>
Net sales and other operating revenue	8,650	+6.0%
Operating income	625	+4.1%
Income before income taxes	640	-0.3%
Net income	480	+3.4%

FY2005 Forecasts for unconsolidated results

	<u>Yen (billions)</u>	<u>Changes from FY2004</u>
Net sales	3,480	+4.8%
Operating income	130	-29.6%
Ordinary profit	208	-33.2%
Net income	143	-36.9%

These forecasts are based on the assumption that the exchange rates for the yen to the U.S. dollar and the euro for the fourth quarter will average JPY 103 and JPY 135, and for the current fiscal year, JPY 107 and JPY 135, respectively.

This announcement contains forward-looking statements within the meaning of Section 21E of the U.S. Securities Exchange Act of 1934. Honda's actual results could materially differ from those contained in these forward-looking statements as a result of numerous factors outside of Honda's control. Such factors include general economic conditions in Honda's principal markets, foreign exchange rates between the Japanese yen and other major currencies, as well as other factors detailed from time to time in Honda's reports filed with the U.S. Securities and Exchange Commission.

Asia	Thailand, Indonesia, China, India
Other Regions	Brazil, Australia

Table of Contents

Explanatory notes:

1. The Company prepares its consolidated financial statements in conformity with accounting principles generally accepted in the United States because the Company has issued American Depositary Receipts listed on the New York Stock Exchange and files reports with the U.S. Securities and Exchange Commission. All segment information, however, is prepared in accordance with a Ministerial Ordinance under the Securities and Exchange Law of Japan.
2. The average exchange rates for the fiscal third quarter ended December 31, 2004 were ¥105.96=U.S.\$1 and ¥137.16=euro1. The average exchange rates for the corresponding period last year were ¥108.92=U.S.\$1 and ¥129.44=euro1. The average exchange rates for the fiscal nine months ended December 31, 2004 were ¥108.56=U.S.\$1 and ¥134.60=euro1, as compared with ¥115.01=U.S.\$1 and ¥132.12=euro1 for the corresponding period last year.
3. United States dollar amounts have been translated from yen solely for the convenience of the reader at the rate of ¥104.21=U.S.\$1, the mean of the telegraphic transfer selling exchange rate and the telegraphic transfer buying exchange rate prevailing on the Tokyo foreign exchange market on December 31, 2004.
4. The Company's Common Stock-to-ADR exchange rate was changed from two shares of Common Stock to one ADR to one share of Common Stock to two ADRs, effective January 10, 2002.
5. The Company has adopted the provisions of the Statement of Financial Accounting Standards (SFAS) No.130, Reporting Comprehensive Income. The following table represents components of the Company's comprehensive income. Other comprehensive income (loss) consists of changes in adjustments from foreign currency translation, net unrealized gains on marketable equity securities and minimum pension liabilities adjustment.
