Item 8.01 Other Events

On April 20, 2005, CallWave, Inc., Santa Barbara, California ( CallWave ), stipulated to an amendment to the complaint that J2 Global Communications, Inc. ( J2 ), previously filed against CallWave, to include an allegation that CallWave infringes the claims of U.S. Patent No. 6,857,074, Systems and Methods for Storing, Delivering, and Managing Messages, or the 074 Patent. CallWave has elected to stipulate to that amendment to J2 s complaint in order to accelerate the legal process and reduce the costs of defending itself against J2 s patent infringement allegations. CallWave has reviewed the claims of the 074 Patent and discussed them with intellectual property counsel. On the basis of input from intellectual property counsel, CallWave believes that it does not infringe any of the claims of the 074 Patent, which J2 has owned since before it initiated litigation with CallWave in August 2004 in the midst of CallWave s successful initial public offering. CallWave views the allegations regarding the 074 Patent to be frivolous, expects to receive a written noninfringement opinion from its intellectual property counsel within the next few weeks, and intends to vigorously defend against J2 s amended allegations. However, the scope of the litigation may be expanded over time, and the outcome of any litigation is inherently uncertain. CallWave anticipates that J2 will continue to pursue litigation with respect to its claims, and CallWave can offer no assurance that its present operations or past operations will not be determined to infringe or to have infringed these patents.

Item 9.01 Financial Statements and Exhibits

None.
